About United Euro Foundation

We take this opportunity to introduce ourselves as one of the leading pile foundation contractors, established in the UAE. Dealing with all sort of piling, shoring/retaining wall, soil improvements, marine works, and testing. We have a sound backing of foundation engineering and soil mechanics with a long term experience in the field to match the technical requirements, to solve the various problems that occur in the region and the ability to apply the proper solution for the same.

Since 2005 our experienced team in general construction researched a study for the UAE market, mainly in Abu Dhabi, where we had reached a conclusion that a foundation company is highly required to share with the foundation companies available in the market. United Euro Foundation Co. L.L.C., started to share its expertise over the past years to experience all kinds of substructure works, and worked hard to find solutions for the technical soil problems in the region. Those researches concluded a need to introduce and provide a new advanced technology to the market at this time.

With 20+ International registered clients and more than 5+ international certificates, and 300+ Completed projects, here is a glimpse.

- f. Osterberg cell (o-cell) testing

Services Overview

Pile Foundation:

Piles are rigid structural components inserted in the soil surface and underlying rock strata to transfer loads from an overlaying structure (superstructure). Depending on the kind of load and soil conditions, the installation method can vary.

Types of Bored Piles Provided:

- Casing
 - Permanent Casing
 - Temporary Casing
 - Vertical board pile.
 - Raked board pile
- Continuous flight auger (CFA) piles
- Micro pile
- Bentonite System of Piles.

Soil Improvements:

When the qualities of current soil are insufficient to meet the intended criteria, ground improvement is required. Environmental worries over dwindling natural resources have also pushed ground modification techniques to the forefront.

•

TYPES OF SOIL IMPROVEMENT PROVIDED

- CMC
- Stone Columns
- Grouting

•

COMBINED SOLUTION

- To enhance the lateral stiffness of piles and therefore minimize the quantity of steel reinforcement necessary, a combined solution of ground improvement and piling works can be undertaken.

Shoring:

Earth retaining structures prevent landslides caused by gravity or erosion by holding back soil or rock. Earth retaining walls in deep excavations must endure high lateral earth pressures as well as hydrostatic forces induced by ground water. Many pile types and combinations are utilized to build retention systems, depending on the design requirements.

Types of Shoring Systems Provided:

- Secant pile
- Contiguous pile
- Sheet pile
- H. Beam with Wood blanks OR RC blanks
- Anchoring
- Strutting and Bracing

Marine works:

UEF has successfully executed a variety of projects including maritime works, such as marine bored piles, sheet piling, Jetties, and others.

Types of Marine Works Provided:

- Off-shore marine piling
- Off-shore sheet piles
- Jetties

Services Overview

Enabling Work:

Being a foundation contractor, UEF offers a complete enabling works package for all types of building projects. In addition to the excavation work itself, enabling activities include shoring for deep excavations and dewatering. Deep foundations may or may not be included in the process. The primary contractor will be given a ready-to-build site for the basements and superstructure.

Types of Enabling Work Services Provided:

- Installation of security fencing, ramps, and placement of signboards
- Creation of access routes
- Setup of offices and relevant infrastructure
- Shoring for deep excavations
- Piling
- Dewatering
- Excavation
- Pile head breaking

Full Package:

The different enabling works we provide can be combined with our ground engineering services to produce an integrated package solution, potentially saving time and money on any construction project.

Early Package:

An early enabling package enables the customer to begin building work on-site while tendering the main package, which can be a time-consuming procedure. The site is promptly handed over to the primary contractor after the enabling package is completed.

Testing:

ASSURANCE

- Our skilled engineers examine, monitor, verify, and inspect the whole defined scope of work on a project to ensure adherence to tight standards.
- In reality, experience has proven that faults may arise in piles. The goal of testing is to detect such defects before they cause any harm. UEF's humble history and experiences proves our excellence with no major failings till this day.

Out Testing Techniques

- Pile Integrity test
- Cross-hole sonic logging
- Caliper logging
- High strain dynamic testing
- Static load testing
- Osterberg cell (o-cell) testing

Establishing the Future's Foundation

Insured Quality

We take tremendous satisfaction in the work we produce at UEF. We make no compromises in our efforts to preserve our exceptional health, safety, environmental, and quality records. Our credibility and the significant portion of loyal customers are evident indicators of our superior performance.

All of this is made possible by our highly skilled, devoted, and experienced project teams, a top-of-the-line fleet of equipment, and a quality management system with the highest standards.

Policy upon Quality

UEF understands the significance of service quality to the future of our company. We are committed to providing high-quality service that ensures projects are completed on time, under budget, and with rigorous quality assured.

Management and V Planning of Projects

The goal is to maintain supervision over the project's timeline, quality, and cost. At UEF, we apply specialist project management approaches to monitor a project's planning, design, and construction from start to finish.

Assurance of Quality by Testing

In reality, experience has proven that faults may arise in piles. The goal of testing is to detect such defects before they cause any harm. UEF's humble history and experiences proves our excellence with no major failings till this day.

Establishing the Future's Foundation

QHSE Policy

United Euro Foundation Co. LLC

QHSE Policy

United Euro Foundation Co. LLC shall commit and ensure Quality of its services, Health & Safety of its Employees, Clients, Visitors and the community at large and protect the physical environment in which the UEFCL's associated business activities are carried out.

The Management and Staff of UEFCL shall:

- Ensure that our service meet the needs and expectations of our clients in terms of quality;
- Develop and implement an Integrated Management System conforming to ISO 9001:2015, ISO 14001:2015 & OHSAS 18001:2007;
- Ensure the availability of personal, financial and human resources necessary to mitigate the adverse impact of its operations on HSE;
- Undertake reviews to measure QHSE performance against identified objectives and targets and continually improve the system;
- Ensuring the safety and welfare of our staff and the protection of our assets;
- Comply with or exceed all relevant Quality, Environmental, Health & Safety legal laws, regulations and other requirements;
- Identify the hazards in the production facility, assess the risks and manage those risks in order to reduce adverse impact on HSE;
- Periodically review the suitability, adequacy and effectiveness of the (QHSE) management system;
- Make every effort to protect the environment and prevent pollution, minimize consumption of materials, promote reuse and recycling of wastes and adopt best practice on waste management;
- Strive to achieve continual improvement of the QHSE management system and related performance;
- Prevent accidents and cases of work-related ill-health;
- Provide appropriate training to employees where applicable;
- Ensure that the company's QHSE policy is well communicated to all quarters concerned;

Mr. Wadih Demachki
General Manager

Subject : Pre-Qualification Status

We have pleasure to inform you that M/s. UNITED EURO FOUNDATION CO. LLC, United Arab Emirates, Code No. 9997781, has been pre-qualified as a possible source to supply of the following services, which has been rated as per the schedule below:

S.No	WG Criteri	WG No.	WG Description	Current Status	Decision	Validation Date	Remarks
1	C3	2201000	PILING & GROUND STABILIZATION, UNDERPINNING AND BORING WORKS	GOOD	RPQSC/15/4061/201	11-Sep-2022	

However you have to maintain and update your company records in ADWEA Commercial directory to avoid any inactivation due to such. These record shall be maintained and updated through e-registration system and shall include but not limited to the following documents once they are renewed.

1. Respective licenses
2. Agency certificates and Agreements where applicable.
3. Any other changes in your address, contact person, owners/sponsors etc.

Please note that at the time of release of enquiries, a further short listing takes place based on exhibited interest at that time and the specifics of material/equipment in question as needed.

You are advised to quote your registration No.(9997781) in all future correspondence.

Sub: Company Prequalification

Dear Sir,

Reference to your submission of your company's prequalification document, please note that United Euro Foundation has been listed in ACG list of enabling works subcontractors as grade D (projects up to Dhs 50 Million).

Further evaluation will be done after a period of time to examine your company's status in the market and study any progress made.

Best Regards,
For Architectural Consulting Group

Request for Subcontractor Acceptance – United Euro Foundation Co – LLC

Reference: Nil

Dear Anwar,

Please be advised that pursuant to Exhibit "A" clause 28 titled Subcontractors, Owner accepts Contractor's request to utilize United Euro Foundation Co – LLC, for the scope of services identified within the attached Request for Subcontractor Acceptance Form.

Kindly note that this acceptance in no way relieves Contractor of the mobilisation requirements or its obligations under this Construction Contract including Exhibit "A" Clause 3.12 titled Applicable Laws. Contractor shall be fully responsible for any part of this Construction Contract performed by its Subcontractor(s) and for the acts and omission of Subcontractor(s) and persons either directly or indirectly employed by them.

Should you have any questions please do not hesitate to contact Prue Fan, Contracts Administrator.

Yours Faithfully

Project: NPCC-Mussafah Fabrication Yard

Subject: **Completion Certificate**
Piling Foundation by Continuous flight Auger (CFA) Method.

Dear Sir/Madam,

Gulf Erection Co. L.L.C. affirm, to the best of knowledge, based on inspection, observations, testing of the construction and upon reports submitted, that this project (NPCC-Mussafah Fabrication Yard) is perfectly completed and operatable. The **piling foundation by continuous flight auger (CFA) method** done by **United Euro Foundation Co. L.L.C.** was completed in accordance with the contract Documents, design specification, plans, and drawings for the above Construction Package

The piling works are now in excellent condition and very much appreciated by the client.

Thanking you,

Yours faithfully,
