

The Chase Pack Running Co. Commitment

The Chase Pack Running Co. was established to offer support to athletes with high quality and innovative running events that allow for continued athlete development. We soon increased our offerings to include lower cost high quality FAT timing to help lower the barrier of access for smaller or startup events and the running community at large. We understand that timing can be a major cost to events and want to help offset that cost while still maintaining the highest quality so race directors can reinvest that money in other ways. We are committed to doing our fair share in developing and supporting running in every possible way.
