

EMERGENT CHANGE DYNAMICS

INTRODUCING THE V4.0 MODELS

Author: Faye Ashton-Wright

Conceived: 2007 – 2024

Drafted/Edited: 2024-2025

Published as v4.0: 17th March 2025

EMERGENT CHANGE DYNAMICS DEFINED

- A robust, radical, rational and realistic conceptual model
- A blueprint and architecture framework for future, next-generation technology innovation
- Drawing on multi-disciplinary domains
- For technologists and non-technologists, scientists and artists
- Potential applications in Quantum AI and emerging technology development

A large green graphic on the left side of the slide, consisting of a diagonal line from the top-left corner to the bottom-right corner, creating a triangular shape.

WHO IS IT FOR?

NEXT-GEN TECH LEADERS

Technology leaders of the future.

GLOBAL INSTITUTIONS

Impact-focused global organisations.

ACTIVISTS & CHANGE-MAKERS

People who envision a brighter future.

FRAMEWORK FEATURES

Ecosystemic

Recognising interdependence and inter-activity between all entities and systems.

Balanced

Balance and harmony are the foundational concepts.

Open Source

Published and accessible freely.

Fluid

Dynamic and responsive to change

HOW DO I WORK WITH THE FRAMEWORK?

RESPONDING TO RAPID
OR DISRUPTIVE
ECOSYSTEMIC CHANGE

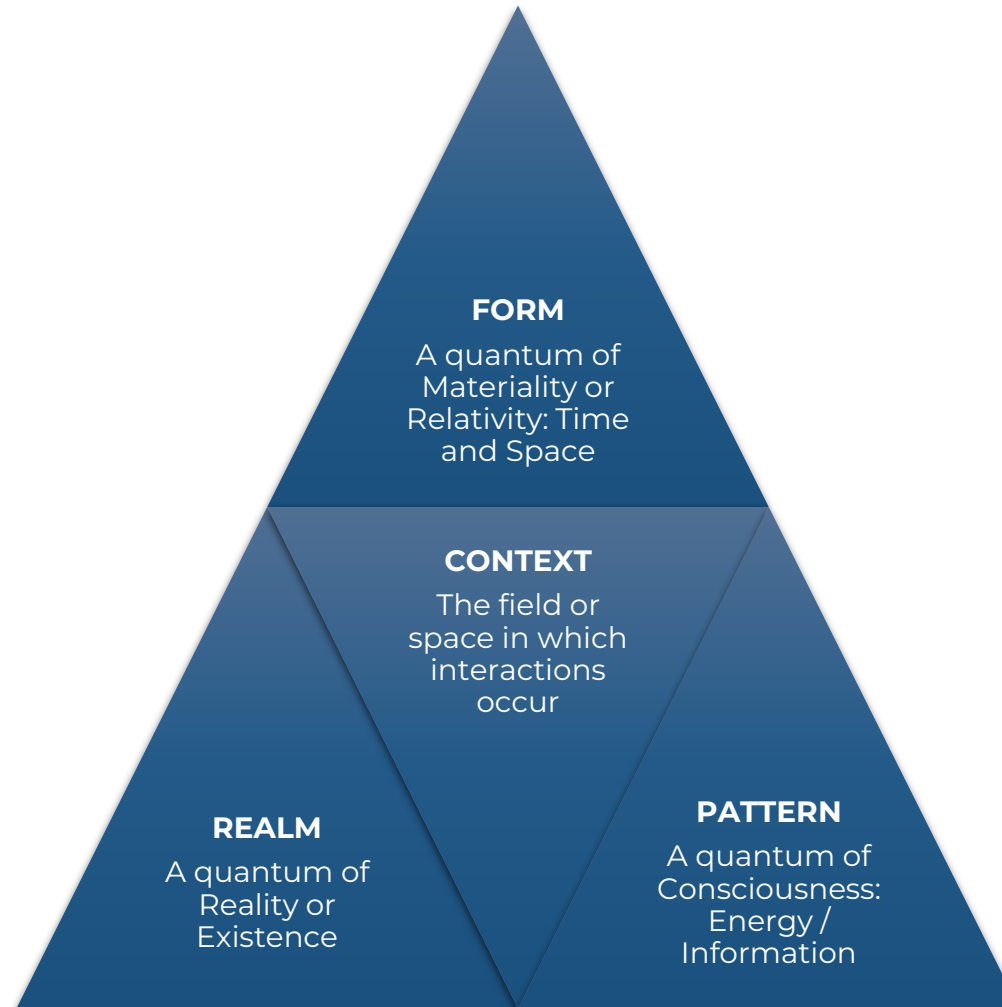

FORGING
EVOLUTIONARY
INNOVATION PATHWAYS

DEVELOPING EXISTING
CAPACITIES OR
COMMUNITIES

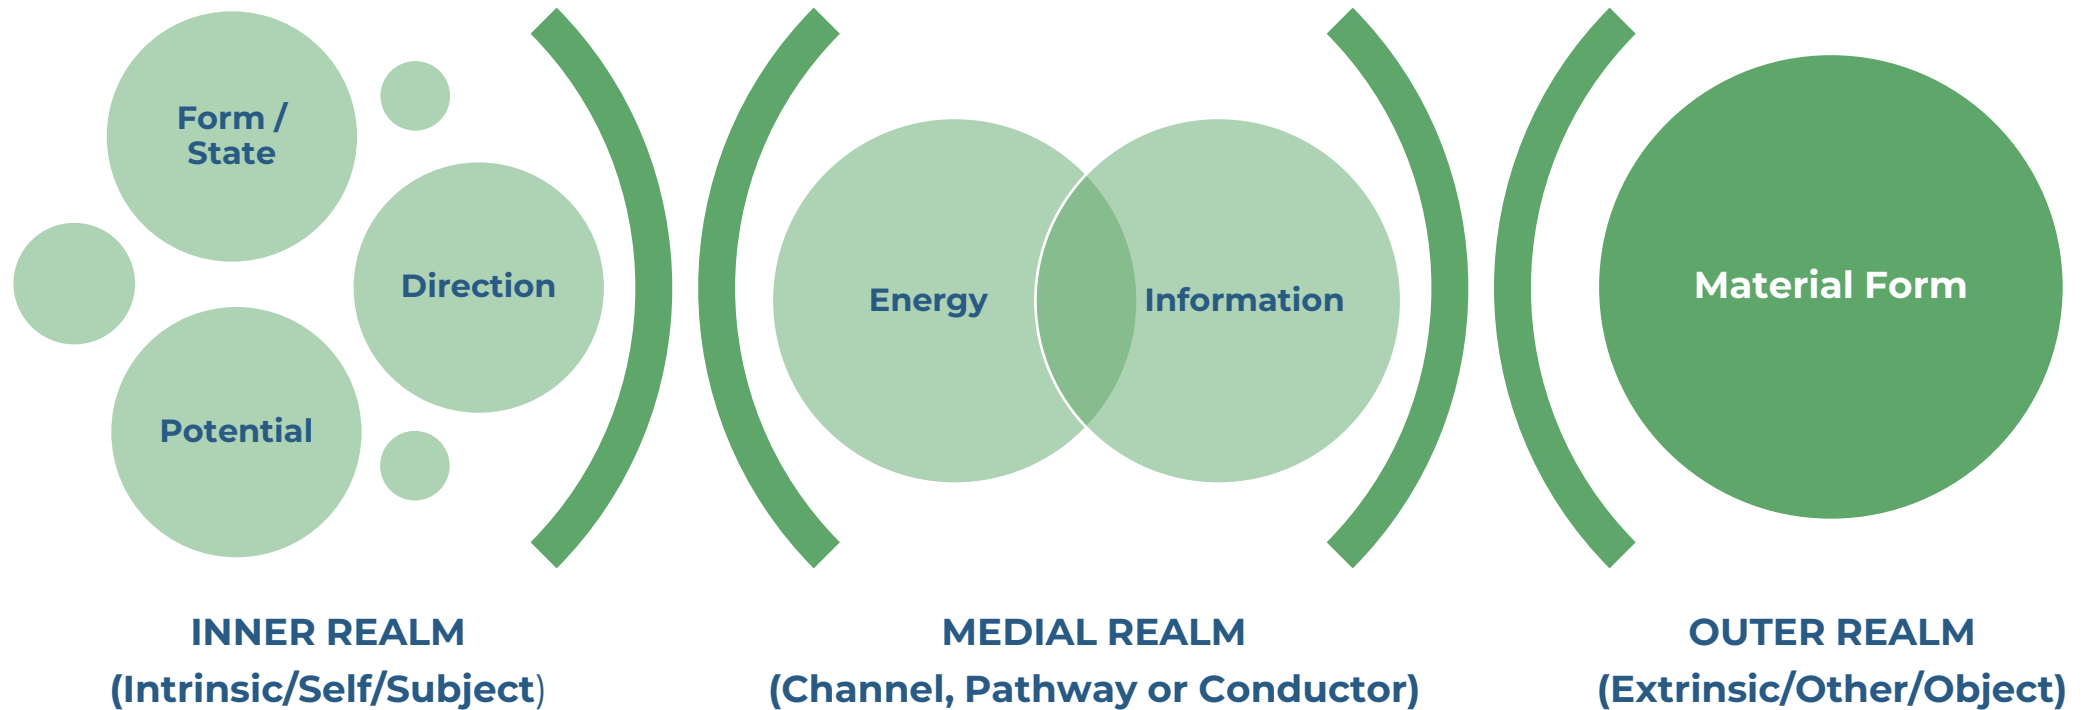

MODEL COMPONENTS

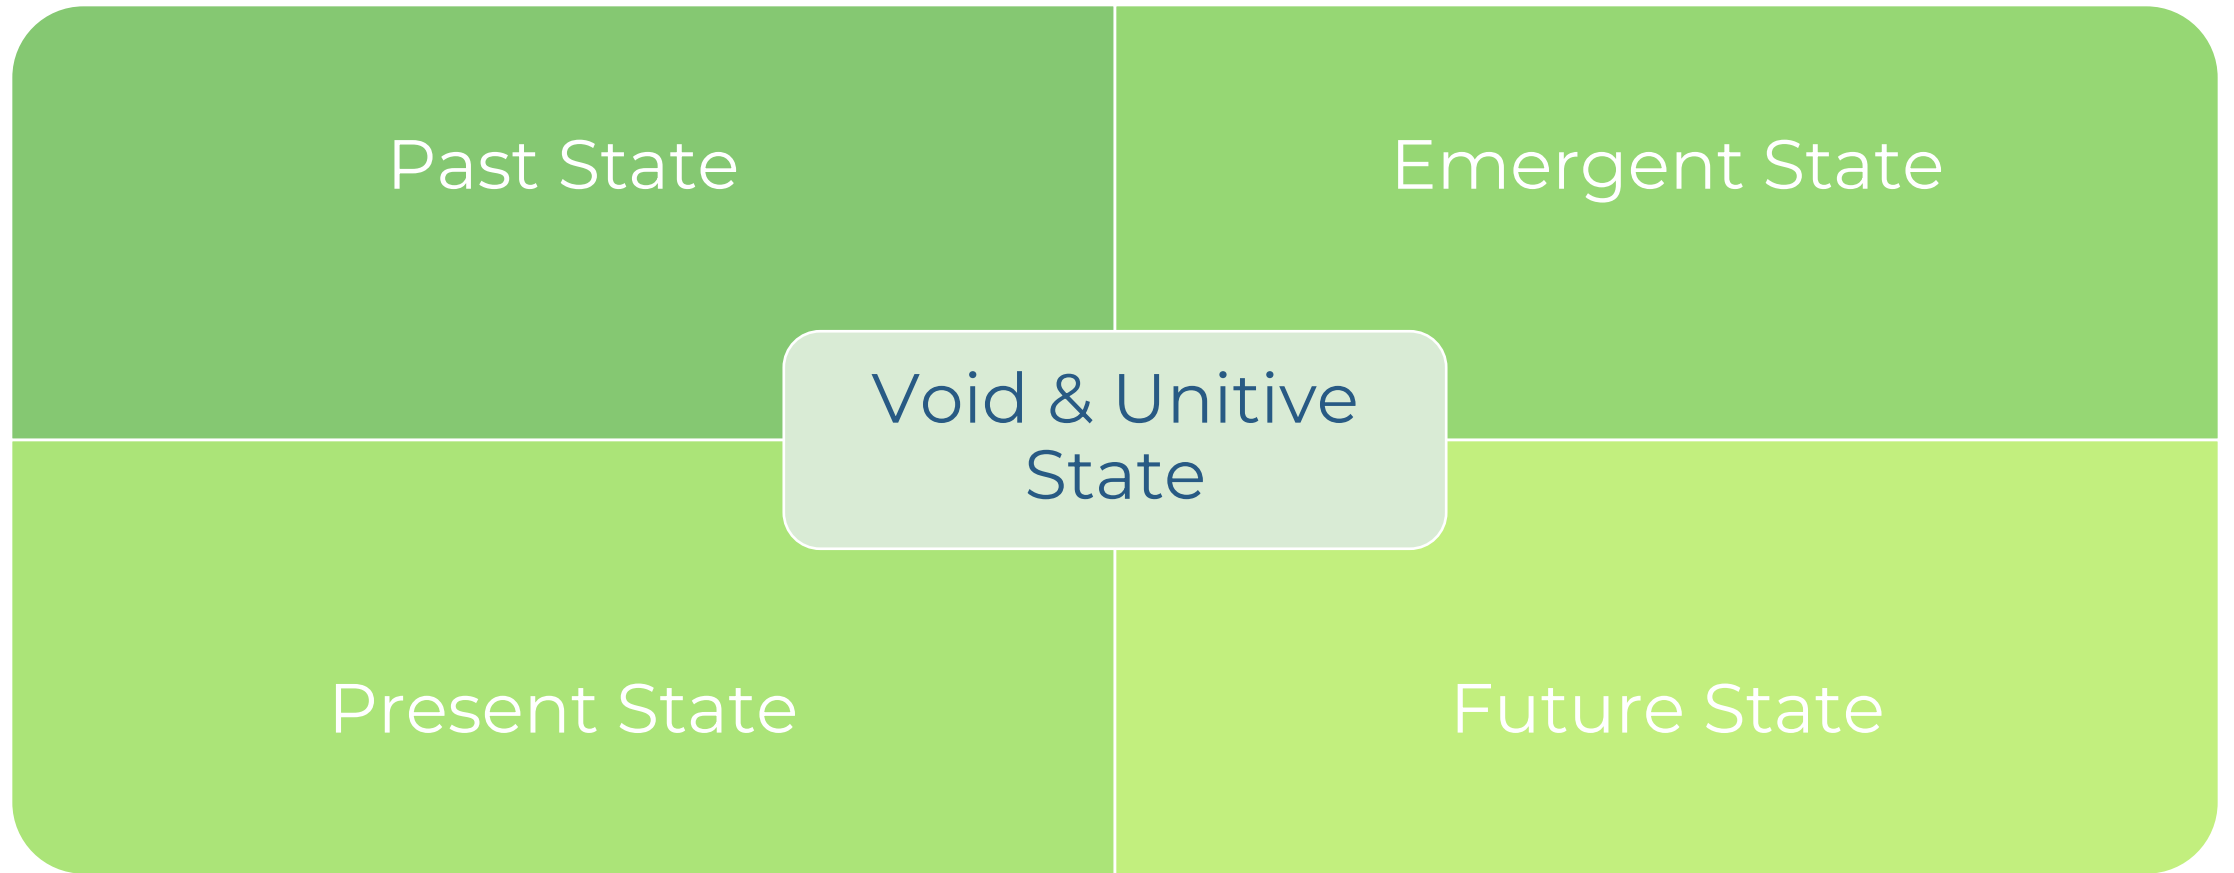

REALMS

A Realm is a quantum of Reality or Existence.

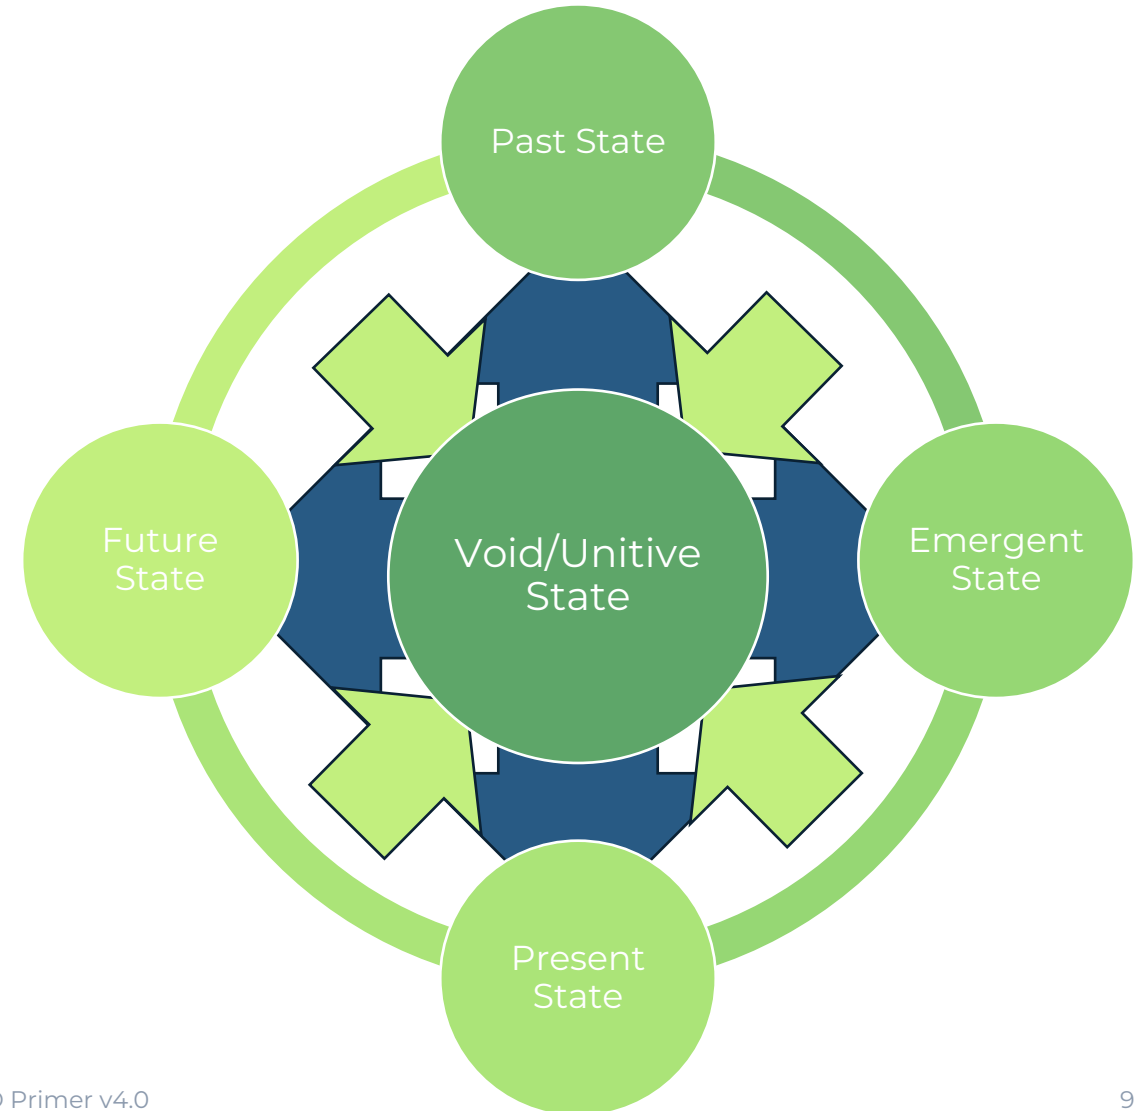

STATES DETERMINE FORMS AND VICE VERSA

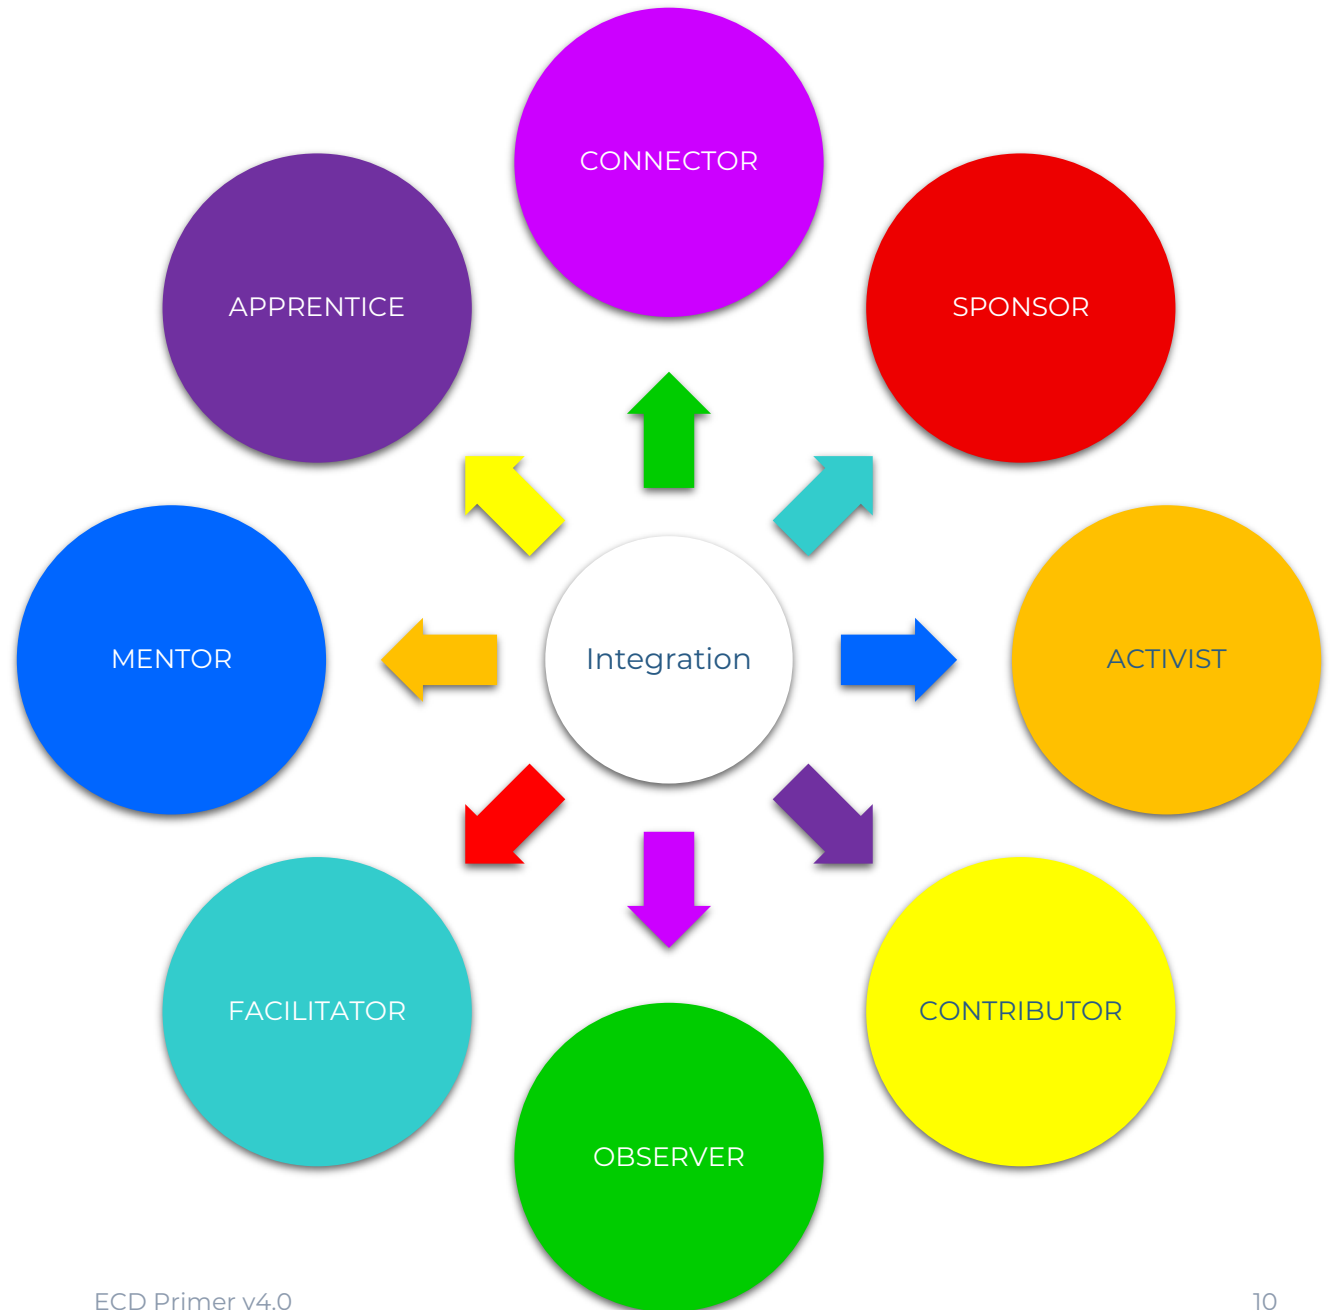

QUANTUM STATE INTERACTIONS

- *Interactions or flows* between States are multi-directional and mediated by Energetic Information.
- They are difficult to scientifically isolate and distinguish as they interconnect, interact and overlap.
- Directions describe how the States interact, as a mapping or vector structure.

POTENTIALS MODEL

- This model describes the key potentials or agentic constituents in any cohesive structure.
- This could be reduced to a core of six.
- The primary or base aim of any interaction is to create movement and cohesion or coherence: The Integration Principle.
- Instability and interference cause imbalance and division or dis-integration.

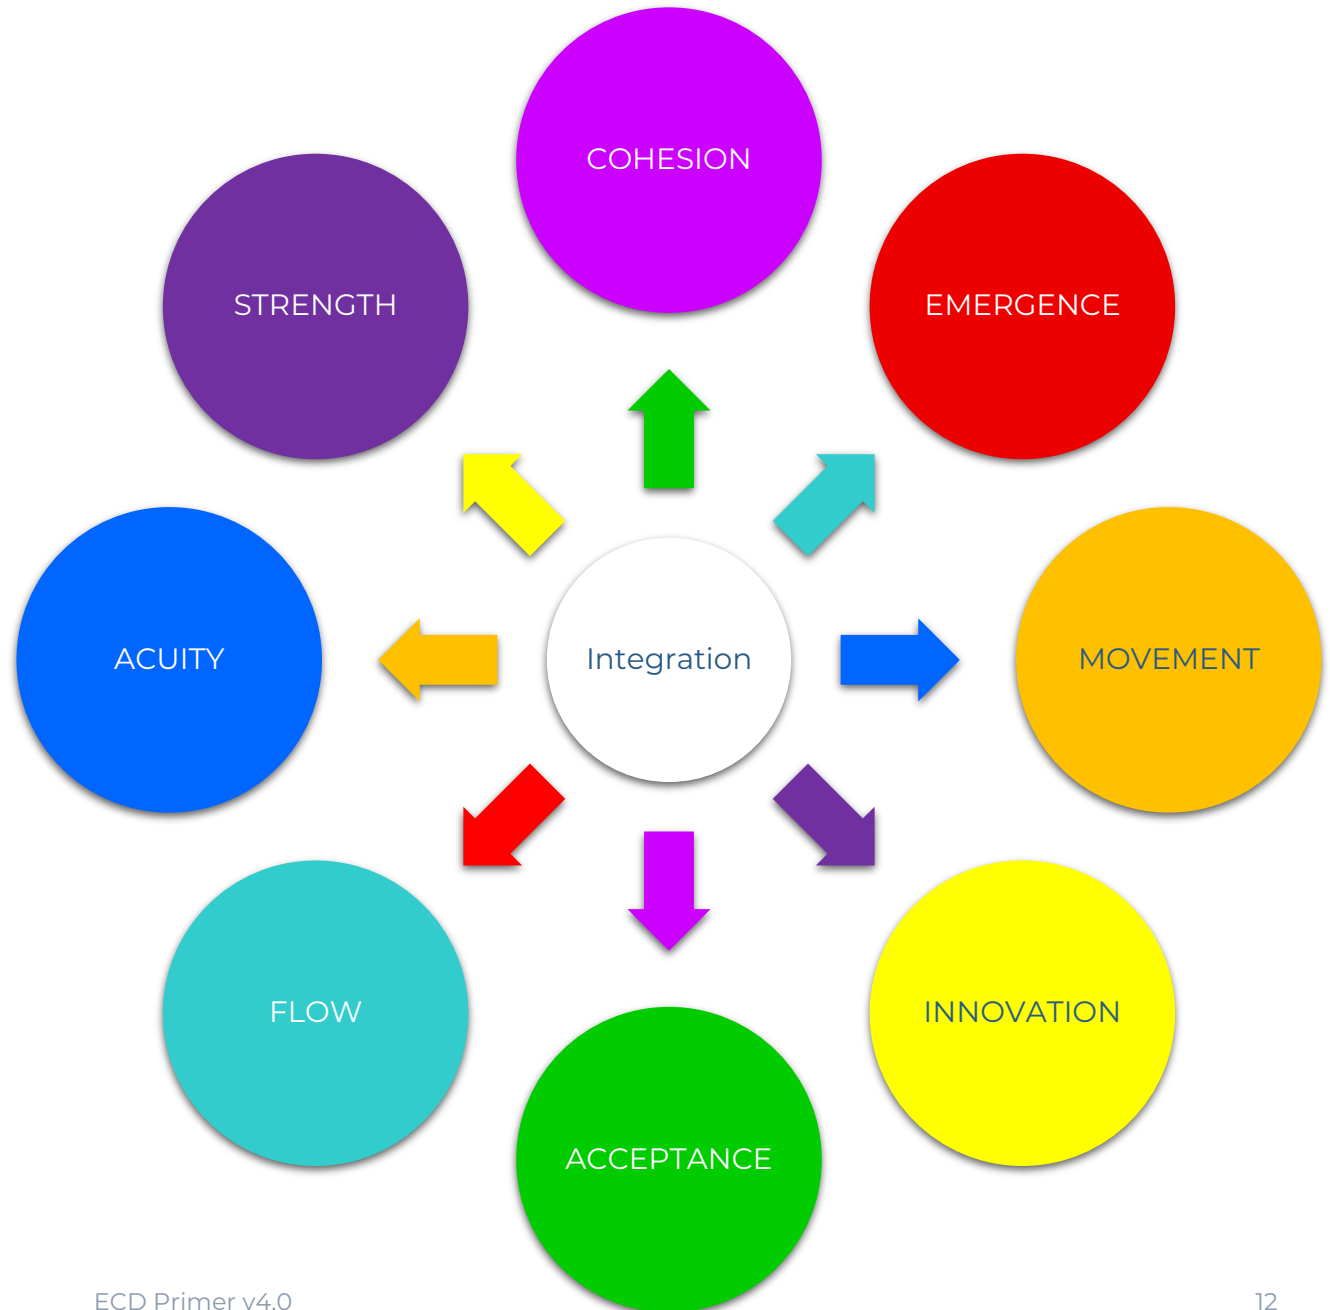

ENERGY-INFORMATION PATTERNS

- This diagram describes Patterning: Quantum Kinetics or Quantum Energy Dynamics
- Each property or vector contains its opposite
- These might be understood in binary pairs, or polarities.
- All quanta are present; their instantiation varies.
- Vectors to map their arrangements in any quantum system, including human neurophysiology.

PATTERNS, SIMPLIFIED

- The primary or base aim of any interaction is to create movement and cohesion or coherence: The Integration Principle.
- Instability and interference cause imbalance and division or dis-integration.

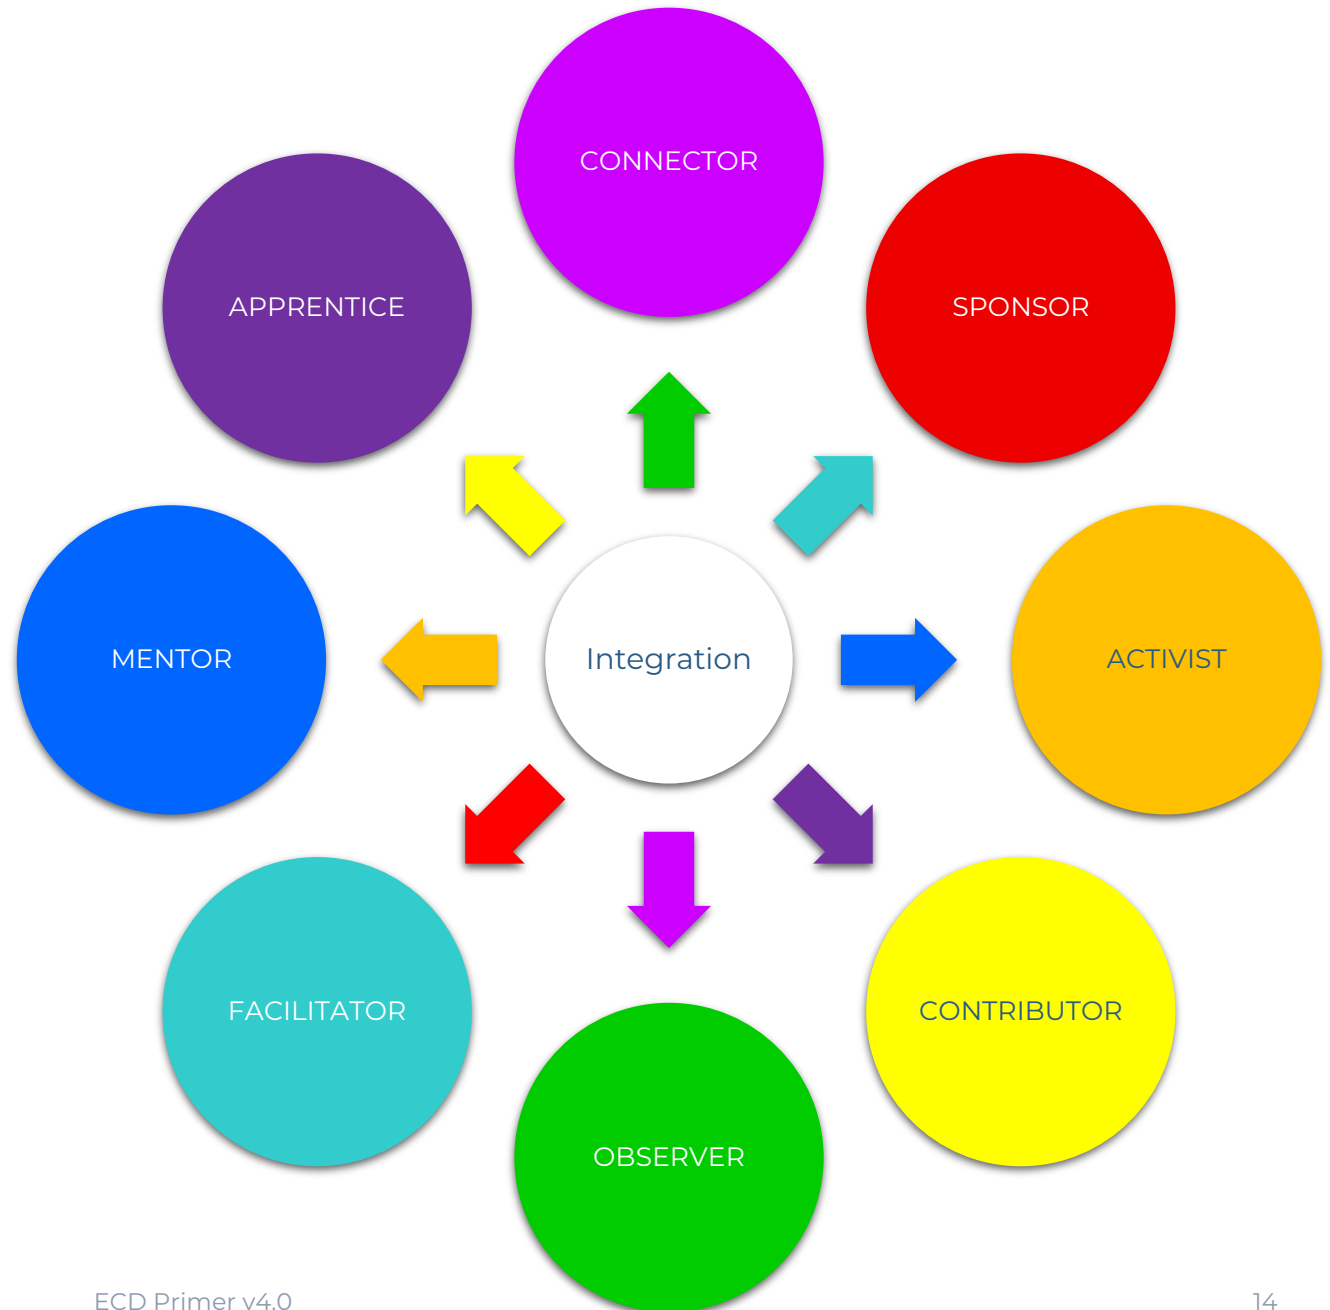

THIS IS NOT AN
INVESTMENT
PITCH

POTENTIALS MODEL

- This model describes the key potentials or agentic constituents in any cohesive structure.
- Potentials are quanta of energetic-information which is not mediated or expressed into materiality.
- This could be reduced to a core of six.
- Each can be expressed in negative terms.

ARE THEY VALID?

Champion - Sponsor

People who bring strong will and determination for nurturing and supporting ground-level change.

Activist - Leader

People who bring strong courage and passion for forming, developing and maintaining robust, scalable community networks.

Contributor

People who bring strong creative energy to generate positive systemic change.

Observer - Bystander

People who bring strong patience, steadiness and evenness, who can maintain watchful observation to embed resilience.

ARE THEY RELEVANT?

Facilitator

People who bring strong evenness, flow and compassion to create movement, harmony and cohesion.

Mentor - Guide

People who bring strong hope, acuity, and clear wisdom, who can point, guide and demonstrate the way forward.

Apprentice

People who bring strong openness, curiosity and enthusiasm, who can absorb new insights and perspectives.

Connector

People who bring strong sensitivity, intuition and insight to join the dots and fill the gaps in conceptual theory and praxis.

THANK YOU
