

The Artificial Intelligence Playbook.

Part 2: Defining Intelligence

What is Intelligence?

Intelligence is the ability to
receive, store and synthesise
energetic information, for the
purpose of sustaining
existence.

Think Delta

Business & Digital Consulting

True intelligence is always
generative.

Intelligence depends on
neurophysiological
mechanisms of sensory
perception to dynamically
receive energetic information.

Think Delta

Business & Digital Consulting

Any entity, system or organism
with higher levels of sensory
receptivity or awareness, has a
natural propensity for Super-
Intelligence.

What is Super-Intelligence?

Super-Intelligence is indicated
and characterised by
exceptionally high levels of
multiple forms of intelligence.

Think Delta
Business & Digital Consulting

Natural Super-Intelligence is not
contingent on private wealth
investment for training or
education.

Think Delta
Business & Digital Consulting

Natural Super-Intelligence
arises naturally in living
beings, through natural forms
of learning.

Think Delta

Business & Digital Consulting

Natural Super-Intelligence is not
limited or confined to human
beings.

Human Super-Intelligence may
be found and observed in any
demographic, category or
‘class’ of human.

Think Delta

Business & Digital Consulting

Human Super-Intelligence is not limited or confined to any single demographic, category or 'class' of human.

Think Delta

Business & Digital Consulting

Human Intelligence
Augmentation Theory is a
hypothesis that Artificial
Intelligence will increase the
scope, depth and range of
human intelligence.

Think Delta

Business & Digital Consulting

Dead Brain Theory is a hypothesis that Artificial Intelligence will reduce, limit and restrict human intelligence.

Human intelligence is
sustained by awareness,
recognition, expression and
support of all its forms.

Human intelligence is diminished
by ignorance, dismissal, denial,
and suppression of all its forms.

“You are not as intelligent
as you think.”

Think Delta

Business & Digital Consulting

You are more intelligent
than you may ever
realise.

“We don’t think (like that)
around here.”

Think Delta

Business & Digital Consulting

Be the
exception.

Think Delta

Business & Digital Consulting

For the Extra-
Ordinary thinkers.
