CHILDS BULLDOGS

Should said litter be born with cleft palates or deformities are present in the litter, this again is not qualified reasoning for a repeat breeding as many of these can take place due to lack of proper prenatal care.

Should a deposit be placed on a stud that passes away, buyer will be presented to use frozen semen off said stud. If no frozen semen is available, another stud in the sire's program will be offered of sire owners choosing to complete the breeding.
