

DOOR SENTRY

DESCRIPTION

The Diamond Defense “Door Sentry” System is a low profile, Lightweight, Cost Effective Ballistic Solution that can be retrofitted to any door. The system is designed to be easily installed and can be customized designed to provide maximum coverage and offers UL 752 Ballistic Protection Levels 3-8.

Our Standard UL Level III System is only 3/8” thick and weighs less than forty (40) lbs. The system is designed with a UD Kevlar covered in a robust Aluminum Alloy and is attached with a system of screws and VHB Adhesive Tape, engineered to absorb damage without penetration or separation from the door. The entire system can be installed in under ten (10) minutes and is Warrantied for ten (10) years.

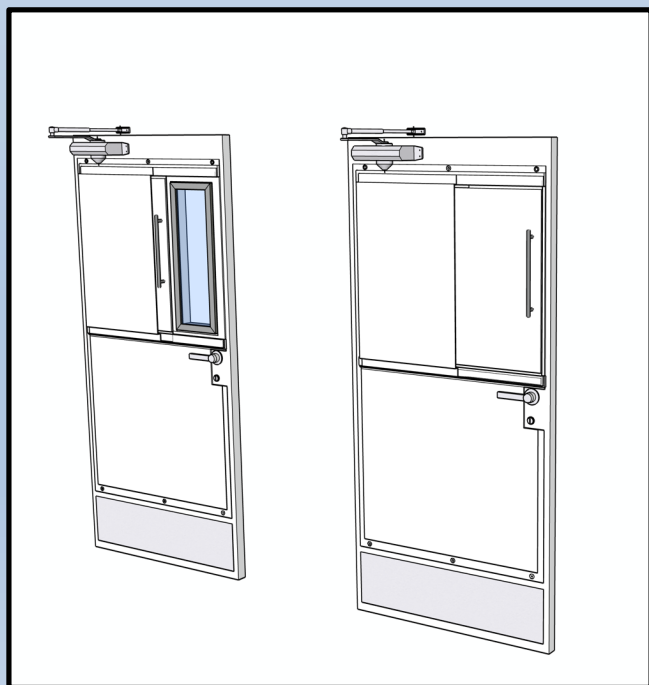

ASTHETICS

The Protected Side of the Door Sentry System can be factory coated in high quality vinyl with many colors and styles to choose from including Dry Erase White Board or color matched to your existing door.
