RE: Johnson Land Surveying, Inc.

10185 SW Hoodview Dr
Tigard, OR 97224

To whom it may concern:

It gives me great pleasure to express my opinion of Johnson Land Surveying to potential employers thereof. I have evaluated work submitted by Johnson Land Surveying, going on three years. In that time, they have submitted several Subdivisions, Partitions and Land surveys for County review; which all met or exceeded State statutory and County requirements.

Columbia County contracted Johnson Land Surveying for a high precision G.P.S. (Global Positioning System) Control project that required three phases. This was a demanding project that had no room for error. Not only did they exceed the accuracy standards, they raised the bar for future projects.

I seize every opportunity to examine survey work done by Johnson Land Surveying, not to critique, but as an opportunity to learn from another professional. It is my opinion that Johnson Land Surveying is in the "Top Tier" of surveying companies and has the knowledge and resources to accomplish any survey job they set out to do.

Sincerely,

Handwritten signature of Nathan A. Woodward.

Nathan A. Woodward, PLS
Deputy County Surveyor
Columbia County Surveyor's Office
