Check Availability

*Temporary stocked item. Confirm availability with our Customer Service Department.

Reynobond® FR Composite Material is our standard ACM product offering for all architectural applications. We no longer offer Reynobond® PE Composite Material for architectural use on buildings.

- Reynobond® Composite Material and Pre-Painted Sheet stocking list is subject to change based upon market conditions and demand.
- Reynobond® Composite Material is stocked only in the widths indicated above.
- All Reynobond® Composite Material Finishes listed are available for custom production orders based on a 2,000 square feet minimum.

Laws and building and safety codes governing the design and use of AAP's products, including aluminum composite, bonded and flat sheet materials, vary widely. It is the responsibility of the owner, the architect, the general contractor, the installer and the fabricator/transformer, consistent with their roles, to determine the appropriate materials for a project in strict conformity to all applicable national, regional and local building codes and regulations.

REYNOBOND® AND AS3000B ARE COMBUSTIBLE; THEY COULD CATCH FIRE AND BURN. SEE AAP WEBSITE FOR PRODUCT WARNINGS. ANY LABORATORY TESTING INFORMATION PROVIDED BY AAP APPLIES ONLY TO THE PARTICULAR PRODUCT OR ASSEMBLY TESTED AND DOES NOT NECESSARILY REPRESENT HOW PRODUCTS WILL ACTUALLY PERFORM IN USE.

Slight variations in color, gloss and texture can occur between different paint production batches. Paint variations within a specific color, especially for mica and metallic colors, can and do occur that are visible to the human eye, but are within industry tolerances.

Contact your area Sales Manager or Customer Service Representative for ordering assistance.
