Create a Personal Vision Statement

Just like an organization has a vision statement, you should have one as well. A vision statement serves as a guide when making decisions in your professional and personal life. It also keeps you on track and prevents you from engaging in activities that are not aligned with your values, goals and, most importantly, the vision for your life. In this session participants will learn:

- How to develop a vision statement for their life
- The principles necessary for a vision statement
- How to use their vision statement when making decisions
- How to use their vision statement to effectively plan for the future
