Independent, Third-Party Validation
Stepphenson Stellar Corporation (SSC) is a nonprofit vendor-agnostic organization that can enable satellite cyber experimentation against ground-based FlatSats representing a constellation of spacecraft.

Highest Levels of Training
SSC Subject Matter Experts provide realistic red team and blue team training in space system cyber vulnerabilities and mitigation techniques.

Space-Cyber Experimentation
SSC’s expertise in cyber and space technologies allows operators to conduct cyber research across a full spectrum of systems and conditions in a secure and contained laboratory environment.

The Future of Space Security
We can provide Tactics, Techniques, and Procedures (TTPs) to improve space asset resiliency and provide next-generation cyber tradecraft solutions for space systems.

Stellar Space Cyber Range (SSCR)
Simulated Cybersecurity Pathfinder Constellation
