

An Agile Leader's Manifesto ...

As Agile Leaders we have come to value...

Requesting an Outcome - over - Requiring an Output

Discussing the Increment Live - over - Reviewing a Report

Progress - over - Perfection

Serving the Team - over - Tasking the Team

Collaborative, Trusting Environment - over - Command & Control

Funding the Team - over - Funding the Project

Mentoring & Coaching the Team - over - Monitoring & Critiquing the Team

We recognise that, while there appears to be success with the behaviours on the right, we know that the behaviours on the left, though they require a little more from us, provide far greater, better and more long lasting results
