

THREE PILLARS OF HEALTH

1,200 Calorie Meal Plan

Meal Planning Made Simple:

Trying to lose weight and eating healthier has never been easier.

The Three Pillars of Health Meal Plan provides many healthy options for breakfast, lunch, dinner, and various snacks.

To follow the meal plan, please select one item from each food list starting on page 3 to create meals and snacks of the ideal portion sizes for your weight loss or weight maintenance goal. Correct portion sizes are essential for accurate calorie estimates.

- Don't want to eat five times a day? No worries. You can combine meals and snacks if you choose. The only thing that matters for your weight loss plan is staying within the total amount of food recommended in 24 hours.
- Are you trying to avoid excess carbohydrates and grains? That's fine. Your meal plan can interchange protein and grain portion sizes.
- Do you dislike too many vegetables or fruit? Vegetables and Fruit portions can be substituted for each other.
- The only thing we recommend not substitute is your portion sizes for fats in your meal plan. Fats have more calories per serving.

Most importantly, have fun making meals. We are excited for you and are grateful to be a part of your weight loss journey!
