

Packaging Clinic & Research Institute

The Packaging Clinic & Research Institute (PCRI), founded in 2012 by Prof. BK Karna, is based in Hyderabad, India. PCRI focuses on meeting the growing demands for packaging research and provides comprehensive support to various stakeholders, including industries, institutes, and government agencies.

Services Offered:

1. Consultancy: Includes package design, shelf-life determination, and expertise in sectors such as food, pharmaceuticals, cosmetics, horticulture/agriculture, and hazardous goods.
2. Testing: PCRI conducts tests on various packaging materials like paper, corrugated boxes, plastic films, bottles, metals, and more, ensuring they meet quality standards and reduce costs.
3. Training Programs: These programs cater to undergraduates, graduates, and professionals from other fields, providing skills for careers in packaging or entrepreneurial ventures. Notable programs include a Post Graduate Diploma in Packaging and a Graduate Diploma in Packaging.
4. Research and Audits: The institute engages in packaging research, storage/shelf-life studies, and annual packaging audits.

PCRI also offers annual packaging testing contracts and collaborations with international research centers, promoting the Indian packaging industry through education, research, and advocacy for consumer interests.
