

# Indoor Plants

**FOR BEGINNERS**

Verdant Interiors

## SWISS CHEESE PLANT

1

This iconic beauty is not only visually striking but also a breeze to care for. Its distinctive split leaves create a captivating focal point in any room. Perfect for both high and low light conditions, it adapts well to various indoor environments.

## RUBBER PLANT

2

The Rubber Plant's glossy leaves and air-purifying qualities make it a fantastic choice. It's adaptable to various light conditions and easy to grow. Water when the top inch of soil is dry and avoid overwatering.

## SNAKE PLANT

3

Snake plants don't require much water. Between waterings, these plants prefer to dry out a bit. During the summer, only water your plant once every two weeks.

## ZZ PLANT

4

The ZZ Plant is a resilient superstar. Its glossy, dark green leaves thrive with minimal care, making it an ideal choice for beginners. It's tolerant of low light and irregular watering, making it a low-maintenance delight.

## POTHOS

5

Pothos is the go-to plant for those seeking beauty and simplicity. Its heart-shaped leaves cascade gracefully, and it can adapt to various light conditions, from low to moderate. Water when the top inch of soil is dry, and trim trailing vines to maintain its lush appearance.

## PEACE LILY

6

The Peace Lily's elegant white flowers and lush green foliage make it a popular choice. It's a natural air purifier and does well in low to moderate light. Water when the leaves droop slightly, and avoid overwatering to prevent root rot.

VERDANT INTERIORS

## CHINESE EVERGREEN

7

With its vibrant leaves and adaptability, the Chinese Evergreen brings a touch of the tropics indoors. It's suited for low to medium light and requires minimal maintenance. Water when the top inch of soil is dry, and avoid direct sunlight.

## CALATHEA

8

Calatheas are known for their mesmerizing patterned leaves that fold up at night. They thrive in medium to bright indirect light and are perfect for adding a splash of color. Keep the soil consistently moist and use distilled or filtered water to prevent leaf damage.
