CAREVA HARNESS SYSTEM

CAREVA PELVIC HARNESS

The **Careva Harness System** is a postural and support harness that provides support and prevents the person falling forward or to the side to ensure that the function of ordinary three-point safety belts works at an optimum level

What is the function of **Careva Pelvic Harness**?

This product is used to hold the pelvis to the back of the seat and to ensure a good seating position.

The system consists of a range of single belts that can be combined as required for users of all ages who need additional support for an upright sitting position. **Careva Pelvic Harness** can be used in any seat, provided there is an opening between the seat and the backrest.

The **Careva Pelvic Harness** Kit includes a **Spinal Belt** which is fastened vertically over the backrest.

FEATURES

-  Can be adapted to Child Seats
-  Quick and easy to install and transfer between vehicles
-  Available in: **Small, Medium** and **Large** - it fastens at the sides by a buckle

SPECIFICATIONS

-  Assists to achieve a non-forward sliding for the sitting position for the regular safety belt in vehicles to work properly
-  **Careva Harness System DOES NOT** replace the vehicle safety

REQUIREMENTS It is a requirement to keep a **current** Doctor's Certificate in your vehicle when this Harness is in use in the vehicle

The **Careva Combination Harness** is a positioning belt designed with the help of many involved parents of children with disabilities, drivers in the community transport, Occupational Therapists and health professionals to ensure the correct postural supports are achieved.

Our harnesses are quick to install and can be easily transferred from across vehicles.

BENEFITS

-  Prevents the person from sliding forward when seating
-  Fits all seats
-  Belts can be moved to suit users of all ages

OPTIONAL ACCESSORIES

THORACIC BELT

An additional option that provides additional upper body chest support
