

INDEPENDENT DRIVING CAROBRAKE ELECTRONIC HANDBRAKE

INDEPENDENT DRIVING

CAROBRAKE ELECTRONIC HANDBRAKE

Carobrake 700 converts a standard manual parking brake into a powered parking brake.

The **Carobrake 700** is suitable for people with arm injuries or other previous conditions that make pulling up the handbrake difficult.

The **Carobrake** electric park brake converts the manual park brake to a complete electronic system.

The system assists in activating / deactivating the parking brake at the touch of a button.

Installation of a **Carobrake** removes the necessity of the manual park brake lever. The manual park brake lever is completely removed during installation and replaced by the button on the dashboard
