STAMP PEDAL EXTENSION

Pedal extensions are an innovative solution for those that have trouble reaching a vehicle’s pedals. They are designed to be used for those who are of short-stature, pregnant, over-weight or those with hip or knee problems.

The **Stamp Pedal Extension** provides a larger extension and is suited to individuals who require 10-30cm more reach. The system’s key feature is a raised platform which provides the driver with extra support and simulates the floor of the vehicle providing greater comfort over longer drives.

These extensions are also removable when not in use and can be both installed into both *automatic* and *manual* vehicles.

Typically, when using extensions of this length, there are other modifications that need to be done to ensure a safe driving position.

These options include cushions to fill the gaps between you and the seat, sash guides, to ensure the seatbelt is in the correct position, as well as, driver’s airbag modifications if you are sitting too close to the steering wheel.

FEATURES

-  Raised platform to ensure comfortable driving position
-  Adjustable distance, height and space between pedals
-  Available for both *automatic* and *manual* vehicles
-  Removable when not in use

SPECIFICATIONS

-  Provides 10 - 30cms of extension to your pedals

BENEFITS
