# SEAMLESS- INSURANCE SOFTWARE AS A SERVICE

Faster, Flexible and Seamless Way to Run Your Insurance Business

In today's hard insurance market, insurance companies want to be able to quickly launch or modify their products and services as the situation warrants. However, with legacy system & traditional coding approach it can take ages and puts a high pressure on internal IT resources. They need a solution to efficiently take advantage of new market opportunities.

Contemi's Seamless helps you digitally transform your insurance value chain faster while focusing your resources more on core business functions rather than IT maintenance. It is designed to make everyday life easier for all parties in an insurance business.

It is a cloud native modular insurance software platform, delivered as a service though AWS. Built around holistic customer management and multichannel sales with a microservice architecture, it lets you turn on and off the features you need and only pay for what you need.

SEAMLESS HIGHLIGHTS

LOW CODE/NO CODE INTEGRATION

MODULAR SOLUTIONS

OMNI CHANNEL EXPERIENCE

VALUE CHAIN AUTOMATION

CENTRALISED CONTROL

CLOUD-NATIVE

MICROSERVICES

PLUG & PLAY

PAY AS YOU GO
