

WARRANTY REGISTRATION INSTRUCTIONS

Congratulations on your brand new System X® coating! On this page we will discuss how to register a ceramic coating on our website.

LOCATE THE STICKER:

All new System X® ceramic coatings come with a registration sticker. Locate this sticker in the box. For customers, you can find this on your drivers side door jamb.

SCAN QR CODE:

- Use your smartphone to scan the QR code on the sticker.
- After scanning, you will be directed to the warranty registration page. Your code will be auto populated in the code field area.

SELECT THE CORRECT DROP-DOWN OPTION AND ENTER THE CODE:

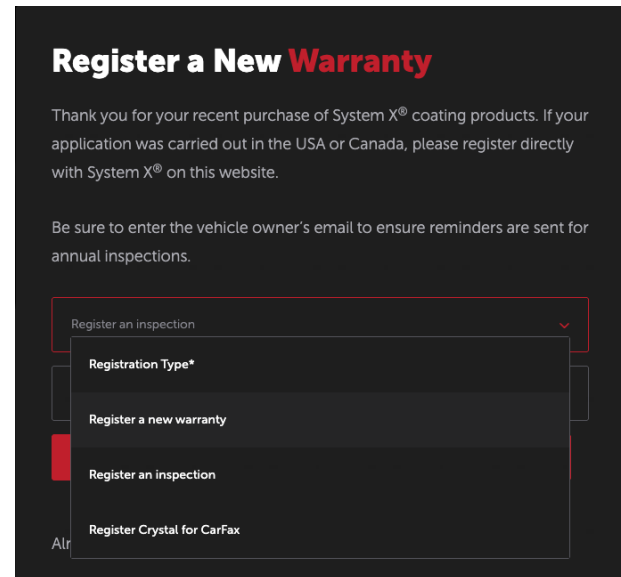

On the registration page, you will see three drop-down options to select the type of coating registration:

Max G+ (or MF), Pro+, Crystal+, and LVP (Register a New Warranty)

- Select this option if your product has a Max G+ (or MF), Pro+, or Pro+, Crystal+, or LVP coating and you need to register a new warranty. These will automatically be registered to Carfax

Inspection Coating (Register an Inspection)

- Select this option if you are registering an inspection coating for your vehicle.

(Important Note: Please ensure your code field is filled out and that dashes are included between each character set. Additionally, for VINS shorter than 17 characters, add zeros at the front to ensure a total length of 17 characters.)

COMPLETE THE REGISTRATION:

- Follow any additional prompts or instructions to complete the warranty registration process. This will include providing your contact information and purchase details.

CONFIRMATION:

- Once you have completed all the steps, you should receive a confirmation message and email indicating that your warranty has been successfully registered.
