DOCTOR RAIL OUTLINE

After the apocalypse, Dr. Aaron Pearsall remains as one of the few surviving physicians to serve a disbursed, rural population that made it through the final war. His challenge is to remain alive through the attacks by marauders and madmen as he uses a velocipede to move through a large region on remaining rails, along with his black lab, Carl. He depends on medicines now concocted by herbalists, mostly older women, which he can bring to the ailing and damaged depending on him in the new wilderness.
