The mystery of the Peralta Stones is solved. This novel will be based on a real meeting I had with a Mr. Gray in Placerville in 2003. He claimed he was the last of the group of people from Southern California who produced the Peralta Stone hoax, which had now gone one for decades...but as he was the last one of the team, he heard I was the kind of person who might listen to his story of how they were made and why...mystery solved.
