

Medical Face Shield
New Proprietary Design

Item Description:

This medical face shield is a proprietary design that was developed in partnership with the Mayo Clinic Health System in Minnesota. This face shield is designed to be comfortably worn all day; easily conforms to fit any person; and gives medical staff the safety protection they need. This face shield was designed to be lightweight and flexible for maximum comfort and safety. This face shield was designed by the medical community for use in the medical community.

Features:

- Anti-fog coating
- Made in USA
- Adjustable elastic strap (latex-free)
- Foam forehead band
- Lightweight
- Reusable and washable

This face shield features a thin, flexible plastic shield with an anti-fog coating so it stays clear with fog-free vision. The face shield also features a foam forehead band and an adjustable, latex-free elastic strap for maximum comfort and size flexibility. This unique design ensures that the face shield can be used comfortably and effectively on virtually any person. Dimensions of the shield area are approximately 9" tall by 13". Made in the USA.
