🕒 Tuesday June 17th
8:00am to 3:30pm

EVENT INFO

- Chose from three different course. Preferred provider CEU's will be given for each course taken. Breakfast pastries and coffee will be provided at registration and lunch will be provided

ICC LA BASIN CHAPTER

BUILDING AND SAFETY TRAINING MATRIX

MATRIX COURSE AND DESCRIPTIONS

• **CBC Chapter 11B: Accessible Path of Travel Upgrades** 8:00AM - 10:00 AM

Presented by: John Caprarelli

- Accessible path of travel scoping and examples. Attendees will gain an understating of what triggers path of travel upgrades, the extent of upgrades required, valuation threshold, and unreasonable hardship determination.
- Accessible path of travel technical provisions. Attendees will study accessibility provisions for parking, accessible routes, entrances, restrooms, drinking fountains, signs, storage, and alarms.
- Tips for effectively enforcing the path of travel provisions during plan review and building inspection. Field verification, record plans, online tools, proper documentation, and deferred upgrades will be covered.

• **CBC & CFC Chapter 9: Fire Protection and Fire Life Safety Systems** 8:00AM - 10:00AM

Presented by: Celine Sarkisloo & Gabe Reza

- Description: In this course, attendees will learn about fire protection and life safety system of Chapter 9, including plan check and inspection requirements for Alternative Automatic Fire Extinguishing Systems, Emergency Alarm Systems, Fire Pump, Automatic Sprinkler Systems, Fire Alarm and Detection Systems and more.

• **2025 Title 24, Part 6: What's New -Single Family and Multi Family** 8:00AM - 10:00 AM

Presented by: Bruce Cheney

- This event summarizes the new and revised requirements in the 2025 California Building Energy Efficiency Standards (Title 24, Part 6 or Energy Code) for single-family and multifamily buildings.
- This class directs participants to informational resources and training that provide more in-depth information on the Energy Code.
- Question and answer session along with print resources will be provided.

• **Energy Storage Systems for Single-Family Installations** 10:15AM - 12:15 PM

Presented by: Mostafa Kashe & Dave MacLean

- This course provides an overview of single-family installation of Energy Storage Systems (ESS) for compliance with 2022 California Electrical codes.
- Discussion includes plan review issues, installation requirements, and field installation challenges faced by today's building department and inspection staff.
- Whether you are a new to building safety or seeking to enhance your expertise, this course is designed for plan check engineers, combination building inspectors, electrical inspectors, and design professionals.

BUILDING AND SAFETY

TRAINING MATRIX

MATRIX COURSE AND DESCRIPTIONS

Artificial Intelligence: Impact in the Building Industry 10:15AM - 12:15 PM

Presented by: Karyn Beebe

- Artificial Intelligence and Its Impact on the Building Industry. The promise of this new generation of Artificial Intelligence software is that it has all the answers.
- This session will cover those challenges both from the perspective of a user trying to evaluate and utilize AI tools for building codes, and from the view of those on the software side trying to build and train those tools.

Multi-story Wood Structures: Heights and Areas Issues and Other Special Provisions 10:15AM - 12:15PM

Presented by: Paul Armstrong

- This course will provide an overview of the evaluating CBC height and area provisions for multi-story wood structures. There are more multi-story wood structures in design now and jurisdictions need to understand the application of CBC Chapters 5 and 6 to these buildings. Tall wood buildings will be a part of the discussion as a result.

CBC Capter 10: Fundamentals of Means of Egress 1:15PM - 3:15 PM

Presented by: Rodolfo Arias

- This training provides an overview of Chapter 10 of the California Building Code focusing on the requirements for safe and efficient means of egress in buildings.
- Participants will learn to interpret and apply the code provisions related to exit access, exits, and exit discharge.
- Additionally, the course covers the requirements are various building elements such as doors stairs corridors and paths of travel among others as they relate to means of egress.

Legislative Updates: State Laws to Watch for in Building Departments 1:15PM - 3:15 PM

Presented by: Faruk Sezar & Eric Rodriguez

- This course provides an overview of the most recent Assembly Bills and Senate Bills related to Accessory Dwelling Units (ADUs), focusing on their impact on building codes and zoning regulations.
- Participants will learn how these legislative changes influence local permitting procedures, administrative processes, and compliance requirements.
- The course will cover key provisions affecting ADU development, including updates to land use policies, design standards, and streamlining measures aimed at increasing housing availability.

Commercial Kitchens: Inspection of Plumbing and Mechanical Installations. 1:15PM - 3:15 PM

Presented by: Iggy Contreras

- This course covers critical aspects of the rough-in phase, proper pipe sizing techniques and appliance connections.
- You will also learn to apply the latest Uniform Plumbing Code (UPC) and Uniform Mechanical Code (UMC) standards to ensure code compliance, efficiency, and optimal system performance in kitchen operations.
