Post Office Box 1625
Nashville, Tennessee 37202

Dear Mr. Smith:

Thank you for your letters asking questions concerning the Americans with Disabilities Act (ADA). Although the Department of Justice is authorized by law to give legal opinions only to the President and to the heads of Federal Executive agencies, the ADA authorizes the Department to provide technical assistance to entities that are subject to the Act. Therefore, we may provide informal guidance to assist you in understanding the ADA Guidelines. However, this technical assistance does not constitute a binding determination by the Department of Justice.

Your first question asks whether the 48" clear width requirement for stairs adjacent to areas of rescue assistance (4.3..11.3) applies if a building is exempt from the requirement to provide an area of rescue assistance. You are correct in your interpretation that if a section does not apply, the subsections under it also do not apply. It should be pointed out, however, that the exemption from the requirement for an area of rescue assistance only applies in buildings with supervised automatic sprinkler systems (i.e, those that have built-in signals for monitoring various features, as explained in Appendix section 4.1.3(9)).

Your second question asks whether vinyl composition tile complies with section 4.5.1. The Department of Justice does not issue opinions as to whether particular products comply with accessibility standards. You might, however, wish to contact the Architectural and Transportation Barriers Compliance Board (phone 800-USA-ABLE) for technical information on products.

cc: Records; CRS Files; Oneglia; Wodatch; Friedlander; Drake.
:UDD1:UDD:WODATCH:SMITHLETTER

01-00500

We would also point out that you have incorrectly assumed that section 4.5.1 includes a requirement for a static coefficient of 0.6. The only requirement in section 4.5.1 is for a slip-resistant surface. No specific static coefficient of friction is mandated. Although the appendix encourages a static coefficient of 0.6, nothing in the appendix is mandatory.

Your third question concerns employee work areas. Section 4.1.1(3) requires that areas used only as work areas must be designed and constructed so that an individual with disabilities can approach, enter, and exit the areas. The preamble language at page 35587 explains that the section applies to any areas used only as work areas, not just to areas "that may be used by employees with disabilities." Thus, all work areas must be designed in accordance with the ADA Guidelines, unless exempted under section 4.1.1(5) because (1) it would be structurally impracticable to comply, (2) the area is an observation gallery used primarily for security purposes, or (3) the area is non-occupiable space fitting the criteria in Section 4.1.1(5)(b)(ii), such as an elevator pit or penthouse.

Assumptions as to whether individuals with disabilities can be employed in particular positions are not determinative as to whether an area must be built accessibly. Unless one of the above exemptions applies, the work areas must be built in accordance with the Guidelines. Staff toilet areas for surgical nurses and factory or airplane maintenance workers (examples mentioned in your letter), therefore, must be designed in accordance with the Guidelines.

You also asked whether a staff toilet serving employees working in mechanical rooms must be accessible, since elevator access is not required to mechanical rooms. The "mechanical room" that is referred to in Section 4.1.3(5), Exception 2 is intended to include rooms that are only used incidentally on an "in and out" basis. If a bathroom serves the room, as your hypothetical suggests, then the room you have called a "mechanical room" is probably not a mechanical room to which Exception 2 would apply. As a work area, it must comply with the

requirement in Section 4.1.1(3) that an individual with disabilities be able to approach, enter, and exit the area, as well as with the requirement for fully accessible common areas, including bathroom facilities. Thus, there would have to be elevator access to the room as well as to any bathroom serving the room.

If the room you are describing is, in fact, a true "mechanical room," then, as you point out, Section 4.1.3(5), Exception 2 would exempt it from any requirement for an elevator. In such a case, if the only bathrooms in the facility were to be provided on that inaccessible level, accessible bathrooms would

need to be provided on the accessible ground floor. This principle is stated in Section 4.1.3(5), Exception 1.

In response to your question about accessibility in an air traffic control tower, the tower would be a work area subject to the requirement that individuals with disabilities be able to approach, enter, and exit it. If it were infeasible to use an elevator because of visibility problems, a lift would be permissible. Section 4.1.3(5), Exception 4(d) permits lifts to provide access where "existing site constraints or other constraints" make use of an elevator infeasible.

I hope this information has been helpful to you.

Sincerely,

John L. Wodatch

AMERICANS WITH DISABILITIES ACT

On July 26, 1990, in a ceremony on the White House lawn attended by more than 3,000 people, President Bush signed into law the Americans with Disabilities Act (ADA) -- landmark legislation that extends civil rights protection to individuals with disabilities in the areas of employment, State and local government services, and access to public accommodations and commercial facilities.

The ADA adopts a comprehensive approach that will enable individuals with disabilities to move into the mainstream of society. Title I's prohibition of discrimination in employment will ensure that they have an equal opportunity to work; title II, which prohibits discrimination in State and local government services, including transportation, will ensure that they can get to work; and title III's prohibition of discrimination in places of public accommodation will ensure that they have an equal opportunity to spend their earnings. (The Fair Housing Act Amendments of 1988 already prohibit discrimination on the basis of disability in housing.) And the ADA's application to theaters, concert halls, museums, libraries, and galleries will ensure that individuals with disabilities have equal access to the arts and to the rich cultural heritage our nation has to offer.

Museums that receive Federal financial assistance are already familiar with the requirements of section 504 of the Rehabilitation Act, which prohibits discrimination against individuals with handicaps in federally assisted programs. The

ADA extends those requirements to all activities of State and local governments, under title II, and, under title III, to "places of public accommodation" operated by private entities, including places of "public display or collection," such as museums. Museums operated by State or local governments, therefore, are covered by title II of the ADA, while those operated by private entities are covered by title III. Both title II and title III are effective on January 26, 1992. Museums operated by Federal Executive agencies are not affected by the ADA, but are covered by the requirements of section 504 for federally conducted programs and activities.

The requirements of the ADA for places of public accommodation and State and local governments are based on the requirements of section 504 and are essentially the same as those requirements. Entities covered by the Act are prohibited from discrimination in the full and equal enjoyment of the goods, services, and accommodations that they offer to the public. They cannot exclude individuals with disabilities, and must make reasonable modifications in policies, practices, and procedures that would deny equal access to individuals with disabilities. For example, a rule prohibiting animals in a museum would have to be modified to permit the use of guide dogs and other service animals by individuals with disabilities visiting the museum.

Covered entities are also required to provide effective communication with customers or clients with hearing or vision impairments. In some cases, this requirement may necessitate the provision of auxiliary aids or services such as sign language interpreters.

The ADA's requirement for removal of physical barriers is the area that has received the most public attention. In existing facilities, public accommodations must remove barriers when removal is "readily achievable" -- that is, easily accomplishable and able to be carried out without much difficulty or expense. What is "readily achievable" will be determined on an individual, case by case, basis in light of the resources available. The case-by-case approach takes into account the diversity of enterprises covered by title III and the wide variation in the economic health of particular entities at any given moment.

State and local government entities are covered by a different standard with respect to existing facilities. They must ensure that the services, programs, and activities that they offer are accessible to individuals with disabilities, but may use alternative methods for providing access, such as providing

services in an alternative accessible location, rather than making an existing facility accessible.

The most rigorous physical accessibility requirements apply to new construction and alterations. The regulations adopt specific architectural standards for new construction and alterations. Places of public accommodation and commercial facilities must comply with the Americans with Disabilities Act Accessibility Guidelines for Buildings and Facilities (ADAAG). State and local governments may use either ADAAG or the Uniform Federal Accessibility Standards (UFAS), which is the standard used under section 504. Both UFAS and ADAAG contain special provisions for alterations to historic properties to ensure that alterations to provide accessibility are not required if they would threaten or destroy significant historic features of an historic property. Where providing physical access is not required, alternative methods may be used to provide services to individuals with disabilities.

The Americans with Disabilities Act has been called a radical piece of legislation. But there is nothing at all radical about this law. Rather, it is the logical extension of the nation's deep commitment to eradicating unjustifiable obstacles that deny anyone the right to enjoy full participation in the American way of life -- a commitment that has President Bush's full support. The Department of Justice is committed to ensuring that the law is implemented effectively, and has established a program for providing technical assistance to

entities with responsibilities under the law as well as individuals protected by it. Our goal is to promote voluntary compliance, and we hope and expect that those businesses covered by the law will comply voluntarily so that we will rarely be forced to resort to enforcement procedures.

The Department of Justice, the Equal Employment Opportunity Commission, and the Access Board have established information lines to answer questions about the ADA. The numbers are:

FEB 28 1992

Mr. Dave Hoffman
Law/Kingdon, Inc.
P.O. Box 1094
Wichita, Kansas 67201-1094

Dear Mr. Hoffman:

I am responding to your letter requesting information about the requirements of title III of the Americans with Disabilities Act of 1990 (ADA). On July 26, 1991, this Department published a regulation to implement title III, 56 Fed. Reg. 35544, to be codified at 28 C.F.R. pt. 36. We have enclosed a copy of this regulation for your information.

Because the ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that are subject to the Act, we may provide informal guidance to assist you in understanding the ADA accessibility standards. However, this technical assistance should not be construed as a legal opinion of this Department or a determination of your rights or responsibilities under the ADA, and it is not binding on the Department of Justice.

You have asked us to provide definitive answers to several broad questions pertaining to the statutory concept "readily achievable barrier removal" in order that you may be able to advise the clients of your architecture and engineering design firm about their obligation to comply with the ADA.

These questions cannot be answered in the abstract. The ADA clearly requires places of public accommodation to remove existing architectural barriers and communication barriers that are structural in nature to the extent that it is readily achievable to do so. However, the Department's regulation does not establish a "quantifiable connection" or other mathematical formula to determine if barrier removal is "readily achievable."

When the title III regulation was being drafted, the Department considered -- but ultimately rejected -- the idea of trying to establish a mathematical formula because it is virtually impossible to devise a specific ceiling on compliance

cc: Records CRS CSU McDowney Oneglia Arthur
UDD:Blizard.ada.interpretation.glickman

costs that would adequately take into account the vast diversity of enterprises covered by the ADA's public accommodations requirement, and the economic situation that any particular entity would find itself in at any moment. Therefore, the regulation requires that the determination as to whether the removal of a specific barrier is readily achievable must be made on a case-by-case basis after a thorough consideration of the

factors established in the statute. The decision should be made by each public accommodation in consultation with its own legal advisors and others.

If the place of public accommodation is a facility that is owned or operated by a parent entity that conducts operations at many different sites, the public accommodation must consider the resources of both the local facility and the parent entity to determine if required barrier removal is "readily achievable." The administrative and fiscal relationship between the local facility and the parent entity must also be considered in evaluating what resources are available for any particular act of barrier removal.

In striking a balance between guaranteeing access to individuals with disabilities and recognizing the legitimate cost concerns of businesses and other private entities, the ADA establishes different standards for existing facilities and new construction. In existing facilities, where retrofitting may be expensive, the requirement to provide access is less stringent than it is in new construction and alterations, where accessibility can be incorporated in the initial stages of design and construction without a significant increase in cost. The readily achievable standard does not require barrier removal that requires extensive restructuring or burdensome expense. It does not require rearrangement of temporary or movable structures if it results in a significant loss of selling or serving space.

The Department's regulation contains a list of examples of modifications that are likely to be readily achievable. The list is merely illustrative. It is not intended to suggest that each of these modifications will always be readily achievable or that no other type of modifications would be required. Changes that are likely to be readily achievable are: installing ramps or curb cuts; repositioning shelves or telephones; rearranging display racks and other furniture; adding raised markings on elevator control buttons; installing flashing alarm lights; and installing grab bars in toilet stalls.

Because the resources available for barrier removal may not be adequate to remove all existing barriers at any given time, he Department's regulation suggests a way to determine which barriers should be mitigated or eliminated first. The purpose of these priorities is to facilitate long-term business planning and to maximize the degree of effective access that will result

from any given level of expenditure. These priorities are not mandatory. Public accommodations are free to exercise discretion

in determining the most effective "mix" of barrier removal measures to undertake in their facilities.

The suggested priorities are to 1) enable individuals with disabilities to physically enter the facility; 2) provide access to those areas of a place of public accommodation where goods and services are made available to the public; 3) provide access to restrooms; and 4) remove any remaining barriers to using the public accommodation's facility by, for example, installing visual alarms, adding Brailled floor indicators to elevator panels, or lowering telephones. It is not necessary to remove barriers in areas used only by employees.

An effective way for public accommodations to determine what they need to do is to conduct a "self-evaluation" of the facility to identify existing barriers. This Department encourages all public accommodations to establish procedures for an ongoing assessment of their compliance with the ADA's barrier removal requirements. This process should include consultation with individuals with disabilities or organizations representing them. A serious effort at self-assessment and consultation can diminish the threat of litigation and save resources by identifying the most efficient means of providing required access.

If a public accommodation determines that its facilities have barriers that should be removed, but it is not readily achievable to undertake all of the modifications immediately, the Department recommends that the public accommodation develop an implementation plan designed to achieve compliance with the ADA's barrier removal requirements. Such a plan, if appropriately designed and diligently executed, could serve as evidence of a good faith effort to comply with the ADA's barrier removal requirements.

The obligation to engage in readily achievable barrier removal is continuing, but not unlimited. Over time, barrier removal that initially was not readily achievable may later be required because of changed circumstances. But the obligation to remove barriers will never exceed the level of access required under the alterations standard (or the new construction standard if the regulation does not provide specific standards for alterations). Once an existing facility has reached the level of

accessibility that it would be required to achieve if it was subject to the alterations requirements of the ADA, the obligation to remove barriers ends.

I hope that this information is helpful to you.

Sincerely,

John L. Wodatch

Mr. Michael J. Davis
Co-Publisher, Engravers Journal
Post Office Box 318
26 Summit Street
Brighton, Michigan 48116

Dear Mr. Davis:

This letter is in response to your recent letter to the Attorney General concerning the requirements for permanent signs contained in the Americans with Disabilities Act Accessibility Guidelines (ADAAG), which are incorporated as an appendix to the Department of Justice's regulation implementing title III of the Americans with Disabilities Act.

The Architectural and Transportation Barriers Compliance Board (Board) is currently drafting proposed accessibility guidelines for title II of the Americans With Disabilities Act, which covers State and local governments. At the next Board meeting on March 10, I plan to request that the Board agree to include specific questions concerning appropriate standards for signage in the preamble to that proposed rule. This will enable the engraving industry to formally present to the Board its views on engraved lettering.

The Board will carefully consider all comments received and determine whether the title II guidelines should permit engraved lettering on permanent signs. If the comments received indicate that such a determination is appropriate, I will recommend to the Board that the title III guidelines be revised to be consistent with the title II guidelines. I strongly encourage representatives of the engraving industry to submit comments on the proposed title II guidelines so that the Board will have the necessary information to make a wise decision on the issue.

cc: Records; CRS Files; Oneglia; Friedlander; Wodatch; McDowney.
:udd:friedlander:davis.2

For your information, I have enclosed a copy of our recently issued title II and title III technical assistance manuals. The Department of Justice has defined "permanent signs" in a restrictive manner. The only signs subject to the raised letter requirement are men's and women's rooms, room numbers, and exit signs (see page 59 of the title III manual).

Finally, I would like to clear up some confusion in your letter about the requirements for permanent signs under the Uniform Federal Accessibility Standards (UFAS). The Department of Justice title II regulation permits public entities to follow UFAS, contained at Appendix A to 41 CFR part 101-19.6. That version of UFAS was amended in 1989 by the General Services Administration to delete the reference to engraved letters and to instead require raised letters only on permanent signs. Thus, public entities are, in fact, held to the same standard as private entities (see page 26 of the title II manual). In other words, raised letters are required on permanent signs both under UFAS and under ADAAG. Confusion has resulted because the other three agencies that issued UFAS (the Department of Defense, the Department of Housing and Urban Development, and the United States Postal Services) never amended their UFAS documents as the General Services Administration did. Therefore, Federal buildings under those agencies' jurisdictions continue to permit engraved letters on permanent signs.

I hope this information has been helpful to you.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

THE
ENGRAVERS
JOURNAL
February 11, 1992

Attorney General of the United States
The Honorable William P. Barr
Department of Justice
Constitution Avenue & 10th Street NW
Washington, DC 20530

Dear Mr. Attorney General:

I understand that your Mr. John Dunne met with the ATBCB recently and the outcome, according to ATBCB Executive Director, Larry Roffee, was that the ATBCB is awaiting a letter of recommendation from you personally. As Mr. Roffee explained it to me, your letter is supposed to deal specifically with an issue of great concern to the engraving and sign industries: the prohibition under the ADA of incised lettering on interior signs. This prohibition, in turn, is based on the Georgia Tech "study" which is the subject of the enclosed article reprint.

Unfortunately, the study was poorly done and all that it proves is that both raised and incised lettering can be read tactually but that neither can be read infallibly.

The only major concern our industry has is the raised-letter-only provision, especially since both raised and incised lettering are permitted under the UFAS standard. Therefore the ADA subjects privately owned buildings to more stringent requirements than certain government-owned buildings.

Our publication and entire industry applaud the spirit and intent of the ADA and would like to produce highly innovative and cost effective "accessible" signage which provides total freedom of

movement for the visually impaired. It would be desirable to get this issue resolved and get back to business as usual.

Therefore our industry respectfully requests that you promptly send the ATBCB the letter of recommendation they are awaiting. We would also appreciate a copy of the same.

Thank you in advance and we remain,

Sincerely,

Michael J. Davis

THE AMERICANS WITH DISABILITIES ACT: HOW IT AFFECTS OUR INDUSTRY

As things stand now, January 26, 1992 may be the beginning of the end for the engraving industry as we know it. That is the day the Americans with Disabilities Act goes into effect. It is a new law affecting the entire United States, which is based on strong Civil Rights premises, but has implications that could severely impair the businesses of up to 50,000 engravers.

The bill was passed by both houses of Congress and subsequently signed into law by President George Bush on July 26, 1990. It is the most sweeping nondiscrimination legislation since the Civil Rights Act of 1964.-(Nancy Lee Jones. Legislative Attorney). The overall law is a very positive step for the equality of Americans with all types of physical disabilities. Unfortunately, in providing this segment of society the equality they have long deserved. the law is nearly legislating our entire industry out of existence.

This law has caught the engraving industry totally off guard. Although the law went through the entire legislative process, including hearings in selected cities, apparently either no one in the engraving industry knew of it or the word never spread until a few months ago. Consequently, our industry had no input into the law. Obviously we are all very concerned about it.

The provisions of the law state that "No individual shall

be discriminated against on the basis of disability in the full and equal enjoyment of the goods, services, facilities. privileges. advantages or accommodations of any place of public accommodation..." (section 302.a). This means that all people, disabled and able alike, have the right to equal access to all public facilities. The phrases "public facilities" and "places of public access" are important

Reprinted with permission from The Engravers Journal
November/December 1991

because the law affects the signage in just about any building open to the public - not just government buildings, but every school, hospital, office building and mom and pop retail store in America.

To have access to a facility means to be able to move around the building freely. Blind people are unable to move freely through some buildings because they are unable to read the signs on the wall. This law addresses this problem by ruling that all permanent signs must be tactile (read with the hands) so the visually impaired are able to read them.

Tactile signage is not, per se, a problem for engravers. It is possible to read engraved signage tactually. The problem is that the law mandates that these permanent signs be made with raised tactile letters only. It states that:

1) Letters must be raised 1 32" from the surface.

2) Grade B braille messages must be on every permanent sign.

3) Pictograms and graphics must have a verbal description below them and a 1 32" raised border around them.

4) The character type must be simple or sans serif.

5) The character height must be a minimum of 5 8" and a maximum of 2".

6) The width-to-height ratio should be between 3:5 and 1:1, and the stroke width-to-height ratio should be between 1:5 and 1:10.

7) There should be a 70% difference in reflectance between the background color and the character color. (This basically means dark on light and light on dark colors only, e.g. black on white, off-white on dark brown.)

8) The finish must be eggshell or matte (low-glare).

This list indicates the major provisions that will affect engravers. There are other provisions regarding such requirements as sign placement, etc., that are not covered here.

It would appear that the new law covers all the bases. If a visually impaired person has some, albeit poor, vision, he or she can read the message. If not, he or she can read it tactually by feeling the characters or by reading the braille.

There is a "grandfather clause" built into the law so that it only applies to new building construction and major renovations. Every building in America

will not have to change its current signage to avoid violations. It should also be pointed out that only "permanent" signage need comply with the regulations. According to the Rules and Regulations in the Federal Register, Volume 56, Number 144, the law deals with:

(16) Building Signage

(a) Signs which designate permanent rooms and spaces shall comply with 4.30.1, 4.30.4, 4.30.5 and 4.30.6.
(b) Other signs which provide direction to or information about functional spaces of the building shall comply with 4.30.1, 4.30.2, 4.30.3 and 4.30.5.

EXCEPTION: Building directories, menus and all other signs which are temporary are not required to comply.
These regulations are vague and open to interpretation. It appears that most building signs, short of directories, menus and other temporary signs such as personnel nameplates that appear on office doors and cubicles, are required to have raised letters and braille. Other signs, e.g. those directing you through and around permanent floors, hallways and rooms, must also have raised letters and braille. So, for example, the room number on an office door must have raised letters and braille, but the name of the person occupying that office presumably can be marked in any number of ways, including sunken, engraved characters.

Anyone who has recently filled an architectural signage order knows that the trend is to coordinate the signage throughout the building. The colors are coordinated, the sign styles are coordinated and the marking method used for the signs is coordinated. When some signs in a building must be raised letter signs on 70% reflective material,

such as black/white or white/black, how likely is it that the customer will order different types and colors of signs for the ones that are not strictly regulated?

Probably the most interesting aspect of the new law is that engraved ("incised" or sunken) characters are tactile and can be read by feeling them. Yet, in effect, incised characters are outlawed by the new law. Why should this be? The answer is that the new regulations are based almost entirely on a study conducted by the Architectural and Transportation Barriers Compliance Board (ATBCB), a Federal agency in Washington DC.

The Journal obtained and examined the ATBCB study which was used to come up with these regulations. It appears that the regulations are based almost completely on the findings of this study, yet the study draws conclusions that range from questionable to actually false.

The Study Behind the Regulations

Titled A Multidisciplinary Assessment of the State of the Art of Signage for Blind and Low Vision Persons, this study was funded by the Federal government through the ATBCB in the mid 1980s ('84-'85). It cost nearly $1.3 million to complete, and the findings which are now law are, in places, absurd.

The study's intent was to test day-to-day functions of the visually impaired. By way of background, about 12 million Americans are severely visually impaired, which means their vision cannot be corrected to 20/20 visual acuity. About 648,000 people are legally blind and 23% of them (or about 144,000) are totally blind. The test was to see how well visually impaired people can read various signs.

The test basically covered the areas

of tactile and non-tactile readability of signs and surfaces based on the size of the characters, the relief or depth of the characters, the characteristics of the various typefaces, the contrast between the letters and the background, upper- or lower-case lettering, lighting, glare, reflections, information content and sign design. Some aspects were tested in the lab and others were tested in the field. There was also a comprehensive test that combined those aspects tested in the lab and those tested in the field into one test.

The study was presented to the ATBCB with impeccable credentials. Most of the research, testing and statistical compilations were done by the highly prestigious Georgia Institute of Technology, Atlanta, Georgia.

The general conclusions that were drawn state that past signage regulations for the disabled were incomplete, unclear and, in some instances, incorrect. As a result, the Justice Department adopted nearly all of the study's findings, which were considered clear and correct.

The study was conducted by an impressive board of representatives from academic institutions as well as from large organizations. Members of the ATBCB were part of the advisory panel, as were members of the Ameri-

01-00516

can Foundation for the Blind, Georgia Tech School of Architecture, the School of Architecture from the University of Wisconsin and the Special Education and Rehabilitation Center, to name a few highly prestigious organizations.

The participants, or subjects, in the study (visually impaired volunteers) came from the National Federation of the Blind Conference in Phoenix, and

the American Council of the Blind Conference in Philadelphia. There were also participants from Georgia Tech. Of the 167 total participants, some were totally blind and others were partially sighted (partially sighted people's best corrected vision does not exceed 20/70, or the maximum diameter of their visual field does not exceed 20 degrees, e.g. tunnel vision).

Of the participating subjects, 73.7% could read braille. (According to the American Foundation for the Blind, only 19% of the legally blind in the U.S., or 1% of the severely visually impaired, read braille.) Similarly, 61.7% of the participants were congenitally blind (blind from birth) yet the overwhelming majority of the blind in America (80%) are adventitiously blind (go blind later in life). Some participants (35.1%) had training in tactile reading. The study acknowledges that this is a well-educated group (32.9% of the test subjects had college degrees) and is, on a whole, better educated than the average visually impaired person.

The participants took part in a series of tests involving reading raised letter signs. They were given 24 signs with random characters (not words) to read both visually (if possible) and tactually (the partially sighted wore blindfolds for tactile readings). The success rates that participants had when reading these signs were then statistically tallied. Some of the conclusions drawn in the study are based on these results, while others appear to be diametrically opposite the statistical data, and based purely on the subjective opinions of the participants.

The Results of the Study

The regulations of the law are almost exactly the same as the results of the study. The study results state: 1) All tactile characters should be sans serif or simple serif: 2) All characters should be upper case: 3) All characters must be raised a minimum of 1/32"; 4) All characters should be 2" high; 5) Blind people preferred raised letters over incised letters.

This last conclusion is especially troublesome, because it indicates that based on a preference, not overall readability, incised letters should not be used. This is one of the main questionable points in the study. Can they really base a great deal of credence on the fact that these people prefer to read raised over incised characters?

What Does All This Mean?

The fact of the matter is, a law has been passed that is a good law overall. It makes a bold Civil Rights movement by helping a group that has been unconsciously discriminated against for a long time. The problem is the regulations adopted by the Justice Department (which is responsible for enforcing parts of the law) are almost solely based on a single, highly biased study which at times based conclusions and recommendations on totally flawed and even blatantly false information.

One of the major problems with the study is that the sign samples that the participants read were inconsistent and inaccurate. They tested two thicknesses of raised letters, 3/64" relief and 1/8" relief. For the incised letters, they tested 1/32" deep letters and also letters whose depth was described as "less than 1/32". How deep is that?

Also, many typestyles are misiden-

tified in the study. For example, they labeled a letter that is clearly an Optima typestyle as a Roman typestyle. They also compared the tactile readability of two totally different typefaces in raised vs. incised characters and then compiled statistical data based on which was more readable, the raised or the incised characters. These sorts of incongruities call into question the accuracy of the statistical conclusions that can be drawn.

The sign samples did not contain recognizable words, but rather tested random letter combinations. This is an unreal scenario because the only signs that are read day to day contain real words. The text of the study states that, "Some experts will argue that reading is accomplished by recognizing the 'footprint' of the word or sentence not by reading and recognizing each individual letter." The study went on to say that testing this factor would have made this study too complex and it would require further research.

The study also says that a 1:5 to 1:10 stroke to height ratio is best, yet acknowledges that some typestyles outside this range are just as easily read as those which meet the standard.

Not once in the study were either raised or incised letters read 100% accurately. True, in some instances raised were read somewhat more accurately than incised, but in other cases, the opposite was true. In any event, both types fluctuated primarily in the 60%-80% accuracy range. It was certainly not the case that raised letters were unquestionably more readable; especially since they did not compare like letters, i.e. they compared high relief letters (1/8") with shallow incised letters (1/32"). One would suspect that

if the height/depth of the raised incised characters were reversed and then compared, e.g. 1/8" deep incised characters vs. 1/32" raised characters, the incised characters would be statistically more readable in all cases! How can this type of unscientific comparison be used as the basis for financially devastating our industry?

These "apples to oranges" comparisons occur throughout the study. For example, figure 1 shows Table 8 from the study. In it they are comparing the readability of incised and raised letters based on intercharacter spacing. Notice the relief vs. depth in each example, as well as the comparison of distinctly different typestyles. Also note that the statistical readability of two out of three of the examples shows the "incised" characters to be more readable than the raised letters. In only one instance do they compare "like" typestyles (albeit with different heights/depths). In the other examples the typestyles being compared are different. From there the conclusion is formulated that "All characters should be raised." How can this be indisputable based on such a poor example?

If the test compared raised Caslon typestyle and incised Caslon typestyle, then raised Jubilee and incised Jubilee, and the conclusions were the same as they were with the Helvetica Medium (which was read by 17% more people when it was raised than when it was incised), the conclusions might be believable. As it is, they are questionable because the examples are inherently incomparable.

The study is riddled with similar "apples to oranges" disparities. For example, in some areas very vague directions are given, e.g. "letters should

line width changes." while in others very specific recommendations are given, e.g. Helvetica Medium is the easiest to read. Some areas, therefore, are wide open for interpretation and others are not. There are a lot of "gray areas" from which specific "black and white" recommendations are drawn.

Another factor that might have affected the results of this study's recommendations is that it was conducted with a highly-educated, elite group of visually impaired people. It simply was not a cross section of "everyday" people, although they were testing "everyday" activities. Of those tested, 73.5% could read braille; yet only 1% of the total severely visually impaired in the U.S. ever use braille. Similarly, only 20% of the visually impaired are congenitally blind. The other 80% lose their sight later in life, often due to age-related conditions such as cataracts, diabetes or glaucoma. Most of those 80% are elderly people who have never been trained to read braille or raised letters. Would a group of the elderly blind with an average education who don't read braille score the same as the study's test subjects?

The bottom line is that the study, which is the foundation of the new regulations, does not provide any conclusive evidence that these signage requirements are best for the general visually impaired public. Yet, the legislation is passed, and the new sign regulations are the law of the land!

It appears that the study was skewed from the beginning to support a pre-

conceived notion among certain blind people that raised letters are better. Realistically speaking, there may be some truth to this notion, at least if the only "incised" letters the visually impaired person has experience with are improperly engraved. As a practical matter, until now there has never been any serious consideration given to the special needs of the visually impaired. That should change! Still, that is not a valid reason to outlaw incised characters based on a biased, slap-dash study.

One of the most disturbing aspects of this study and the new law and regulations is that at no time during the process was our industry consulted or even informed as to what was taking place. Our products were tried and convicted in absentia, by a group using scant and questionable evidence. And, having had our products "outlawed," our industry must now pay the price: financial devastation!

The staggering financial repercussions have already begun. One reader has reported submitting the winning bid for a $10,000 contract to redo the signage in a hospital. Upon hearing about the new law, the hospital then cancelled the project!

So, the logical question is, "Where does it stand now?" Well, the fact of the matter is, although this is probably the first time most industry members are hearing about this, the law is passed, the regulations are finalized and they soon go into effect. After January 26, any new construction or major renovations must have signage which complies with these laws. But you still owe it to yourself and the industry not to give up hope.

Some current movements in the

industry are organizing groups interested in protesting or appealing certain aspects of the law, but it's mainly been "all talk, no action." It will take more than an individual effort to work for modifications to the regulations. The entire industry must make a concerted effort if there is any hope for changes to be made. We at The Journal will do our best to keep you informed with the latest developments, so watch future issues for updates.

There are materials available for you to educate yourself so that you have a better idea of all the implications. The ATBCB has copies of the accessibility guidelines for new construction and alterations (call 800-USA-ABLE). The Department of Justice has an ADA information package and is available to answer your questions (call 202-514-0301). The law itself (Public Law 101-336) is available from your senator or representative in Washington.

The incredible fact about this law is that all these negative implications that it holds for the sign and engraving industry are disguised by the overall good aim of the law. Honestly, who wouldn't vote for more accessibility for the disabled? The law is good, the regulations are bad. Most of the Congressmen that voted for the law probably had little understanding of the technical sign terms included in the sign regulations. It's up to us to pass the word on how ludicrous this really is. Maybe, if the engraving industry stands up to be counted, the far-reaching and detrimental effect that this has on our industry will change. But it is up to you to bring about this change!

Washington, D.C. 20035-6118

Mr. Marty Keene, President
Able Handicapped Industries, Inc.
P.O. Box 159
Shelburne, Vermont 05482

Dear Mr. Keene:

Thank you for your letter concerning the Americans with Disabilities Act (ADA).

The Department issued final rules implementing titles II and III of the ADA on July 26, 1991. Copies of these rules are enclosed. Title II bans discrimination on the basis of disability in all programs, activities, and services provided or made available by State and local governments, instrumentalities, or agencies. Title III prohibits discrimination on the basis of disability in public accommodations operated by private entities. Thus, Title III applies to privately owned golf courses.

Although the Department of Justice is authorized by law to give legal opinions only to the President and to the heads of Federal Executive agencies, the ADA authorizes the Department to provide technical assistance to entities that are subject to the Act. Therefore, we may provide informal guidance to assist you in understanding the ADA requirements. However, this technical

assistance does not constitute a binding determination by the Department of Justice.

You asked about the possibility of an exemption from the ADA requirements for existing golf courses, in exchange for the ability to assign or transfer their obligations to a golfing facility that is designed especially for golfers with disabilities. For two reasons, the exemption is not appropriate. First, the ADA does not allow the Department to exempt public accommodations -- regardless of reason -- from the statute or rule. Second, this type of arrangement would be inconsistent with the principle of integration that underlies the ADA. See, for example, sections 36.203 and 36.202(c) of the regulation.

01-00519

Currently, the ADA requirements do not include specific accessibility standards for new construction or alterations of the unique aspect of recreation facilities, e.g., golf courses. Other facilities, however, like restrooms, locker rooms, and restaurants must comply with the ADA accessibility standards. The standards do not cover air conditioning and hospitalization equipment.

I hope this information has been helpful to you.

Sincerely,

John L. Wodatch
Director
Office on the Americans with Disabilities Act
Civil Rights Division

MAR 27 1992

T. Dwight Hanna
Personnel Director
Florence County Council
Office of Personnel
Drawer S, City-County Complex
Florence, South Carolina 29501

Dear Mr. Hanna:

This responds to your request for an interpretation of title II of the Americans with Disabilities Act (ADA) as applied to employment policies of State and local governments.

The ADA authorizes the Department to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you in understanding how the ADA may apply to you. However, this assistance does not constitute a determination by the Department of Justice of your rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

Title II of the ADA, which became effective January 26, 1992, applies to all programs and activities of State and local governments, including employment. Employment practices of State and local governments are also covered by title I of the ADA, which is effective July 26, 1992 for employers with 25 or more employees and July 26, 1994 for employers with 15 or more employees. Title I is enforced by the Equal Employment Opportunity Commission (EEOC). Under the Department of Justice's regulation implementing title II, the employment practices of State and local governments that are not covered by title I are subject to the requirements of section 504 of the Rehabilitation Act. Questions concerning interpretations of title I should be directed to the EEOC.

01-00521

The requirements of section 504 are, however, essentially the same as those of title I. The general requirement is that applicants and employees with disabilities receive equal treatment. There are no specific procedural requirements for applications. The ADA does not provide an exception for the employment policies of elected officials.

We hope that this information is helpful.

Sincerely,

Stewart B. Oneglia
Chief
Coordination & Review Section

MAR 30 1992

The Honorable Larry Combest
U.S. House of Representatives
1527 Longworth House Office Building
Washington, D.C. 20515

Dear Congressman Combest:

I am writing in response to your recent inquiry concerning the Department of Justice's regulations implementing the Americans with Disabilities Act provisions regarding 911 emergency services.

We are aware of the concern expressed by you and the

National Emergency Number Association about the provision in our regulation implementing title II of the Americans with Disabilities Act that states "telephone emergency services, including 911 services, shall provide direct access to individuals who use TDD's and computer modems."

The apparent concern is that by mandating access to persons using computer modems, the regulation may require that there be access by every format that could be used by a modem, including those that are not compatible with equipment presently used by emergency service systems. That is not the case. The regulation does not require telephone emergency systems to do anything that is technologically infeasible; accordingly, we are interpreting the requirement for access by computer modems to mean only when the modem is using the Baudot format. Until it can be technically proven that communications in another format can operate in a reliable and compatible manner in a given telephone emergency, the public service answering point is not required to provide direct access to computer modems using other formats.

This interpretive guidance has been issued by the Department of Justice in its recently published Technical Assistance Manual, which is available from the Office on the Americans with Disabilities Act, Post Office Box 66738, Washington D.C. 20035-9998, telephone: (202) 514-0301.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

01-00523

January 31, 1992

Mr. Robert Mather
U.S. Department of Justice
Civil Rights Division
P.O. Box 66118
Washington, D.C. 20035-6118

Dear Mr. Mather:

It has been brought to my attention that there is a flaw in the implementation rules for Title II Section 35 of the Americans With Disabilities Act. I voted for the Americans With Disabilities Act when it was considered by Congress, however, the Department of Justice (DOJ) in providing these rules may have created a situation that could prove devastating to hearing and speech impaired persons.

As you may know, the hearing and speech impaired community must communicate by using a device similar to a typewriter (called a TDD). They also communicate using a personal computer (PC). The Department of Justice specifies that all emergency services shall provide direct access to individuals who use TDD's and computer modems.

Currently, the hearing impaired have communicated using the baudot modem which is compatible with emergency centers. However, with the advent of the PC, a new modem with a language called ASCII (American Standard Code for Information Interchange) appeared. Now that ASCII is being placed into TDD's, it presents a problem. It is not compatible with the emergency centers' equipment. At this time, no technology exists that will connect an incoming ASCII call to an ASCII modem in the emergency centers.

Therefore, if a hearing impaired person places an emergency call using the ASCII mode, chances are likely that the call will not be handled properly. It could disconnect, receive garbled data or fail to make a connection. The result could prove devastating for the hearing and speech impaired person. Emergency centers could be held liable for conditions over which they have no control. The hearing and speech impaired will not be served with the same quality assurance that others have come to expect of their emergency centers and the advent of 911 systems.

01-00524

The reference to "computer modem" should be removed from the implementation rules until technology can assure that every TDD

call will be answered with the same quality as a voice placed call. I would greatly appreciate your consideration and comments regarding this matter.

Sincerely,

Larry Combest

CURTIS BAUER, COORDINATOR COUNTY COURTHOUSE
RES. PH. XXX PH. 382-6581 EXT. 310
292-3739 Ames
NEVADA, IOWA 50201

Dear Senator Grassley,

I am a member of the National Emergency Number Association (NENA). I am writing to you to alert you to a flaw in the implementation rules for Title II Section 35 of the A.D.A. Law. (Hearing and Speech Impaired). Our organization supports the A.D.A. Law 100%. However, the Dept. of Justice, who provided these rules, have set in motion a situation that could be fatal to a hearing and speech impaired person.

The hearing and speech impaired community must communicate by using a device similar to a typewriter (called a T.D.D.). They also communicate using a personal computer (PC). The Justice Dept. specifies that all emergency services shall provide direct access to individuals who use T.D.D.s and computer modems.

In the past, they have communicated using a baudot modem. It still serves virtually all of the hearing and speech impaired today. It is compatible with our emergency centers. But with the advent of the personal computer, a new modem with a language called ASCII (American Standard Code for Information Interchange) appeared. Its original design was for a business machine to communicate with another business machine, without human involvement.

However, since it is being placed into T.D.D.s, and is the norm for P.C.s, it presents a problem. It is not compatible with emergency centers equipment. Also there is, at this time, no technology that exists that will connect an incoming ASCII call to an ASCII modem in the emergency centers and guarantee connection.

Simply put, if a hearing impaired person places an emergency call using the ASCII mode, chances are virtually certain that the call will not be handled properly. It could disconnect, receive garbled data or make no connection at all. The result could be a possible loss of life or property. Emergency centers will be held

liable for conditions over which they have no control. The hearing and speech impaired will not be served with the same quality assurance that others have come to expect of their emergency centers and the advent of 9-1-1 systems.

01-00528

We need your help to keep this from happening. We feel that the reference to "computer modem" should be removed from the implementation rules until technology can assure that every T.D.D. call will be answered with the same quality as a voice placed call.

Please contact the Dept. of Justice and urge this change be made. Our contact is:

MAR 31 1992

Mr. Neil E. Reichenberg
Director of Government Affairs
International Personnel Management
Association
1617 Duke Street
Alexandria, Virginia 22314

Dear Mr. Reichenberg:

This letter responds to your recent inquiries requesting clarification of the employment requirements of title II of the Americans with Disabilities Act (ADA). I am enclosing for your information a copy of the Department of Justice's title II implementing regulation, which establishes, effective January 26, 1992, employment nondiscrimination requirements applicable to all State and local governments. 28 C.F.R. S 35.140.

Your letter inquired whether the regulations implementing title I of the ADA, 29 C.F.R. pt. 1630, issued by the Equal Employment Opportunity Commission (EEOC), are effective on January 26, 1992, for State and local governments. The EEOC regulations are effective: (1) for all employers, including State and local government employers, with 25 or more employees after July 26, 1992; and (2) for all employers, including State and local government employers, with 15 or more employees after July 26, 1994. For additional information about title I requirements, you may contact:

Christopher G. Bell

Acting Associate Legal Counsel for
Americans with Disabilities Act Services
Equal Employment Opportunity Commission
1801 - "L" Street, N.W.
Washington, D.C. 20507

Your letter also inquired about the requirements that will apply to employment under title II as of January 26, 1992. As set forth in the enclosed regulation, the nondiscrimination requirements of section 504 of the Rehabilitation Act of 1973, 29 U.S.C. S 794, apply, under title II, to all State and local government employment effective January 26, 1992. 28 C.F.R. S 35.140(b)(2). (The section 504 employment requirements are set out in the section 504 coordination regulation issued by the

Department of Justice, 28 C.F.R. pt. 41.) Thus, under the title II regulation, all State and local governments are subject to the employment nondiscrimination requirements of section 504 during the period from January 26 to July 26, 1992. As of July 26, 1992, at the time that any State or local government becomes subject to title I, the title II regulation incorporates the nondiscrimination requirements of title I for those public entities. 28 C.F.R. S 35.140(b)(1). Any State or local government that does not become subject to title I on July 26, 1992, remains subject to the employment requirements of section 504 during the period until, if ever, it meets the jurisdictional standards for title I coverage. Because title I was modeled on section 504 regulations, employment requirements under the two authorities are, for the most part, the same.

Another question your letter raises concerns Federal enforcement responsibility for employment discrimination claims from January 26 to July 26, 1992. Subpart F of the enclosed regulation sets forth the compliance procedures that are applicable to title II complaints, including employment complaints, and subpart G designates the Federal agencies that will be responsible for title II complaint investigations.

In addition, each Federal agency that extends financial assistance to State or local governments is responsible for ensuring compliance with section 504, which prohibits discrimination on the basis of disability in federally assisted programs, in the State or local programs it assists. Each Federal agency with a program of Federal financial assistance has issued section 504 regulations, which establish nondiscrimination

requirements and compliance procedures.

Accordingly, between January 26 and July 26, 1992, complaints alleging discrimination on the basis of disability in employment by State or local governments, may be processed, as appropriate, by a Federal agency designated in the title II regulation to process title II complaints, or, where the State or local program receives Federal financial assistance, by a Federal agency responsible for processing section 504 complaints.

Sincerely,
Stewart B. Oneglia
Chief
Coordination and Review Section
Civil Rights Division

Dear Congressman:

I am a member of the National Emergency Number Association (NENA). I am writing to you to alert you to a flaw in the implementation rules for Title II Section 35 of the A.D.A. Law. (Hearing and Speech Impaired). Our organization supports the A.D.A. Law 100%. However; the Department of Justice, who provided these rules, have set in motion a situation that could be fatal to a hearing and speech impaired person.

The hearing and speech impaired community must communicate by using a device similar to a typewriter (called a T.D.D.) They also communicate using a personal computer (P.C.). The Justice Department specifies that all emergency services shall provide direct access to individuals who use T.D.D.'s and computer modems.

In the past, they have communicated using a baudot modem. It still services virtually all of the hearing and speech impaired today. It is compatible with our emergency centers. But with the advent of the personal computer, a new modem with a language called ASCII (American Standard Code for Information Interchange) appeared. Its original design was for a business machine to communicate with another business machine, without human involvement.

However; since it is being placed into T.D.D.'s and is the norm for P.C.'s it presents a problem. It is not compatible with emergency centers equipment. Also, there is at this time, no technology that exists that will connect an incoming ASCII call to an ASCII modem in the emergency centers and guarantee connection.

Simply put, if a hearing impaired person places an emergency call using ASCII mode, chances are virtually certain that the call would not be handled properly. It could disconnect, receive garbled data or made not connection at all. The result could be a possible loss of life or property. Emergency centers will be held liable for conditions over which they have no control. The hearing and speech impaired will not be served with the same quality assurance that others have come to expect of their emergency centers and the advent of 9-1-1 systems.

We need your help to keep this from happening. We feel that the reference to "computer modem" should be removed from the implementation rules until technology can assure that every T.D.D. call will be answered with the same quality as a voice placed call.
Please contact the Department of Justice and urge this change to be made. Out contact is:

The Honorable James L. Oberstar
Member, U.S. House of Representatives
231 Federal Building
Duluth, Minnesota 55802

Dear Congressman Oberstar:

This letter is in response to your inquiry on behalf of your constituent, xx about the Americans with Disabilities Act (ADA). Mr. xx asked about the obligations of organizations to remove barriers in their facilities if they receive public funds.

From your inquiry, we infer that "public funds" means Federal funds. Section 504 of the Rehabilitation Act of 1973, as amended, applies to facilities that receive Federal funds. Section 504 regulations require that physical barriers be removed when necessary to make programs accessible. A copy of the Department of Justice's section 504 regulation is enclosed. Barrier removal is addressed in section 42.521.

ADA coverage is not determined by whether an entity receives public funds. Titles II and III of the ADA apply -- regardless of the receipt of "public funds." Title II of the ADA applies to all programs, activities, and services of State and local governments whether or not they receive Federal funds. Title III applies to places of public accommodation operated by private entities, such as restaurants, places of lodgings, theaters, doctors' offices and retail stores. Enclosed are copies of the Department of Justice's regulations implementing titles II and III of the ADA. Section 35.150 of the title II regulation

cc: Records; Oneglia; Wodatch; Kaltenborn; McDowney; hkb

(patterned after section 504) addresses barrier removal in existing State and local government facilities. Section 36.304 of the title III regulation addresses barrier removal in existing places of public accommodation.

I hope that this information is useful to you.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

The Honorable Leon E. Panetta
Member, U.S. House of Representatives
380 Alvarado Street
Monterey, CA 93940

Dear Congressman Panetta:

This letter is in response to your letter on behalf of your constituent, XXX,concerning whether fines may be levied against State and local government entities under the Americans with Disabilities Act (ADA).

Title II of the ADA, which covers State and local government entities, incorporates by reference the remedies, procedures, and rights set forth in section 505 of the Rehabilitation Act of 1973. The remedies authorized by section 505 include injunctions and damages in certain cases, but they do not include fines or civil penalties.

I hope this information has been helpful to you.

Sincerely,

John R. Dunne

APR 3 1992

The Honorable Ralph Regula
U.S. House of Representatives
2207 Rayburn House Office Building
Washington, D.C. 20515

Dear Congressman Regula:

I am responding to your letter of March 18, 1992, to the Attorney General, relating your concerns about our regulatory requirements relating to the height of controls of automated teller machines (ATM's).

As required by the Americans with Disabilities Act (ADA), the requirements that apply to ATM's are included in guidelines developed by the Architectural and Transportation Barriers Compliance Board (Access Board). These guidelines are incorporated into the Department of Justice's ADA regulation. The ADA requires that our regulation be consistent with the

guidelines of the Access Board; therefore, the Department is not in a position to amend this provision of its rule absent a change in the Board's guidelines.

The provision in question, which applies only to new construction and alterations, requires that a person using a wheelchair be able to reach the controls of an ATM through both a forward and a side reach. This provision was first included in the Board's proposed guidelines (published in January 1991), and was subject to an extensive public comment process that included 18 public hearings.

The concerns that are now being raised were not expressed during the rulemaking process. Nevertheless, we take seriously the newly stated concerns raised by the American Bankers Association. With our support and concurrence, the Access Board recently decided to reopen this issue to public comment through a notice in the Federal Register and is considering holding a hearing on the matter. The Board will decide on further action at its July 1992 meeting.

cc: Records; Chrono; Wodatch; Magagna; Bowen.

01-00549

While changes to the rule are under consideration, the Department is constrained to enforce the requirements of the ADA regulations now in effect. In every instance, we will first attempt to educate, discuss, and negotiate, particularly in cases where use of designs and technologies other than those specified in our regulations may provide substantially equivalent or greater access to and usability of a facility. Such departures are permitted by the "equivalent facilitation" section of the accessibility guidelines.

I hope this information is responsive to your inquiry.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

March 18, 1992

Attorney General William P. Barr
Department of Justice
Washington, D.C. 20530

Dear Mr. Attorney General:

I am writing to you concerning the American with Disabilities Act (ADA) Height Controversy for access to automatic teller machines (ATMs). Since enactment of ADA, a second interpretation of the height accessibility guidelines for ATMs has arisen. The Access Board has recently stated they believe the intent of the guidelines were that ATMs should be designed and installed to allow "a forward reach range". This

is contrary to my previous understanding as well as the ATM industry and the American Bankers Association. Current equipment is designed to allow a side reach to the ATM, not a forward reach.

On Wednesday, March 11, the Access Board reviewed a petition from the American Bankers Association. Their decision was to place a notice in the Federal Register to release the issue for public comments.

The implications of this are severe. It is most likely this will cause a freeze in the marketplace for the sale or installation of walk up ATMs (drive up ATMs are exempt). The redesign effort would take the industry up to a year to accomplish and cost over $10 million.

Congress intended to ensure access to such machines by the disabled. But that access is already present through the "side reach". Requiring a major retooling of these machines just to permit a different angle of approach does not seem to be warranted given the existing access. This costs jobs to Americans and will cripple a thriving industry without any significant benefit to the disabled.

Your assistance in correcting this problem is appreciated and expected. Further, I request your immediate release of a statement allowing either forward or side reach until the controversy is resolved.
With best wishes, I am

Sincerely,
Ralph Regula, M. C.

Ms. Barbara Hall
Your Signs Express

P.O. Box 965
Mountain View, CA 94042

Dear Ms. Hall:

This is in response to your letter to the Office on the Americans with Disabilities Act (ADA) concerning signage.

As a sign engraver, you do not necessarily have any responsibilities to manufacture signs in compliance with ADA. The ADA regulations about which you are concerned apply only to commercial facilities and places of public accommodation. Owners and operators of those facilities are responsible for assuring that their signs comply. Moreover, there is nothing in the ADA regulations that requires a sign engraver to inform customers about the ADA. If one of your clients decides not to adhere to the ADA's requirements, any penalties that may be incurred will be imposed on your client, and not on yourself. These penalties may include injunctive relief, attorney's fees, damages, and civil penalties.

In response to your specific question about sign colors, section 4.30.5 of the ADA accessibility guidelines, which are an appendix to the Department of Justice's title III regulations (enclosed), do not require specific colors but rather require contrast of characters and background. Your other specific technical questions about letter height and transcribing into Braille can be directed to the Architectural and Transportation Barriers Compliance Board, 1331 F Street, N.W., Suite 1000, Washington, D.C. 20004-1111, (202) 272-5434.

01-00552

I hope this information has been helpful to you. A packet of all of the relevant material on the ADA is enclosed for your further information.

Sincerely,

Stewart B. Oneglia
Chief
Coordination and Review Section

The Honorable John C. Danforth
United States Senate
249 Russell Office Building
Washington, D.C. 20510-2502

Dear Senator Danforth:

I am writing in response to your recent inquiry on behalf of Mayor Marvin D. Ensworth of the City of Lee's Summit, Missouri.

We are aware of the concern expressed by your constituent and the National Emergency Number Association about the provision in our regulation implementing title II of the Americans with Disabilities Act that states "telephone emergency services, including 911 services, shall provide direct access to individuals who use TDD's and computer modems."

The apparent concern is that by mandating access to persons using computer modems, the regulation may require that there be access by every format that could be used by a modem, including those that are not compatible with equipment presently used by emergency service systems. That is not the case. The regulation does not require telephone emergency systems to do anything that is technologically infeasible; accordingly, we are interpreting the requirement for access by computer modems to mean only when the modem is using the Baudot format. Until it can be technically proven that communications in another format can operate in a reliable and compatible manner in a given telephone emergency, the public service answering point is not required to provide direct access to computer modems using other formats.

February 4, 1992

The Honorable John C. Danforth
United States Senator
SR249 Russell Office Building
Washington, D.C. 20510

Dear Senator Danforth:

The Americans with Disabilities Act (ADA) passed by Congress in 1990 contains a provision we believe is impossible for Lee's Summit and every other City to follow. We are requesting your assistance to change the regulations mandating emergency telephone access by computer modems.

The ADA mandates public agencies provide direct access to emergency telephone numbers (9-1-1) to individuals who use telecommunication devices for the deaf (TDDs) and computer modems. The TDD requirement is not an issue. We obtained the necessary equipment for such access last year. What is an issue, and what we believe to be technologically impossible as we understand it, is the requirement to make access available to computer modems.

Even though most computers can be outfitted with a modem, not every such computer can communicate with every other computer. From a technological standpoint, we cannot comply with this requirement.

The mandate for computer modems, by the way, is not found in the ADA, but rather in the regulations promulgated by the Department of Justice, 28 CFR, Section 35.162.

We encourage you to require the Department of Justice to change this mandate until such time as technology can provide viable equipment, software and standards.

Sincerely,

Marvin D. Eusworth
Mayor

Mr. Robert Mather
U.S. Department of Justice
Civil Rights Division
Coordination and Review Section
P.O. Box 66118
Washington, D.C. 20035-6118

Dear Mr. Mather:

Several of my constituents who are emergency service providers have expressed concern over the implementation rules for Title II Section 35 of the Americans with Disabilities Act (A.D.A.)

pertaining to the hearing and speech impaired. They argue that the reference to computer modems is too ambitious for the current state of technology and could make them liable for conditions over which they have no control.

The hearing and speech impaired telecommunicate by using a device called a T.D.D. The Department of Justice specifies that all emergency services shall provide direct access to individuals who use T.D.D.'s and computer modems. However, with the advent of the personal computer and the use of new ASCII (American Standard Code for Information Interchange) modems, compatability has become a problem. In other words, if a hearing impaired person places an emergency call using the ASCII modem, the call could be disconnected, garbled, or not completed, resulting in possible loss of life and property.

I understand that the Department is currently reviewing this matter. I would appreciate receiving a copy of the clarification when it becomes available.

Thank you for your consideration of my request.

Sincerely,

Tom Lantos

01-00571

DJ 202-PL-00001

APR 8 1992

Mr. Richard T. Conrad
Executive Director
California Building Standards
Commission
428 J Street, Suite 450
Sacramento, California 95814

Dear Mr. Conrad:

We are responding to your recent letter requesting that the Civil Rights Division respond to certain questions concerning the enforcement of State accessibility codes that are certified by the Department of Justice to meet or exceed the requirements of title III of the Americans with Disabilities Act of 1990 (ADA), Pub. L. 101-336, 104 Stat. 327 (July 26, 1990), 42 U.S.C.A. 12101 et seq., and this Department's regulation implementing title III, 56 Fed. Reg. 35544 (July 26, 1991), to be codified at 28 C.F.R. pt. 36.

Before we address your specific questions, we must clarify the scope of this response. The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that are subject to the Act. This letter provides

informal guidance to assist you in understanding the ADA and the ADA regulations. However, this technical assistance does not constitute a determination by the Department of Justice of your rights or responsibilities under the ADA, and it is not binding on the Department.

With regard to your specific inquiry: title III of the ADA provides that the Attorney General, in response to a request from a State or local government, may certify that the accessibility provisions of a State or local building code meet or exceed the accessibility requirements of the ADA. Certification of a State or local code by the Attorney General does not guarantee that a building built in compliance with the code will be in compliance with the ADA. In litigation concerning violations of title III, a place of public accommodation or commercial facility can point to compliance with a certified code as rebuttable evidence of

cc: Records Chrono Wodatch Bowen Blizard
arthur.ada.interpretation.conrad

01-00572

compliance with the ADA. This "protection" applies only to the new construction or alteration of facilities that are subject to title III; it does not apply to barrier removal under title III, or in any litigation to enforce other provisions of the ADA.

Title III of the ADA does not alter the responsibility of State or local government officials to enforce existing State laws, and title III does not authorize or require State officials to enforce Federal law. The ADA specifically provides that enforcement of title III will be carried out through litigation initiated by the Department of Justice or by private litigants.

The certification process is not intended to impose greater liabilities on State or local officials toward private parties than they now have in carrying out their responsibilities under State law. This Department anticipates that State and local officials enforcing a certified code will continue to enforce that code under the same standard of care that would apply if the code was not certified.

State or local officials may interpret the provisions of the

State or local code if the State law permits them to do so. These interpretations will continue to be effective with respect to the State or local codes, as they are now. However, if an element of a place of public accommodation or a commercial facility is constructed pursuant to a waiver or a variance from the provisions of a certified code, a defendant could not necessarily use the fact of construction in accordance with the variance as evidence of compliance with the ADA requirements in any litigation to enforce title III.

We hope that this information is helpful to you.

Sincerely,

John L. Wodatch
Director
Office on the Americans with Disabilities Act
Civil Right Division

01-00573

January 15, 1992

John Wodatch, Director
Office of the ADA
U.S. Department of Justice
Washington, DC 20530

Dear Mr. Wodatch:

The State of California is in the process of adopting the 1991 editions of the Uniform Building, Mechanical, and Plumbing Codes. As part of that process, the Office of the State Architect/Access Compliance Section (OSA/AC) will be modifying their current disabled access regulations, including the adoption of ADA standards to conform with the Americans with Disabilities Act (ADA). During a recent hearing of the Commission a number of issues were raised relative to this action by OSA/AC.

Since the civil rights aspect of the Act places enforcement with the Federal Department of Justice (DOJ), this raises specific questions as to the impact of the enforcement of California's Building Code, containing these standards, by local government. If California's Building Code becomes certified by the DOJ as equivalent to the requirements of the ADA, can local government be authorized to interpret the requirements in the California Building Code, as they currently do with the existing disabled access standards? In carrying out their responsibilities of enforcement, will local government be in conflict by enforcing the ADA standards, or will they be limited only to California requirements? I raise this issue because of concern expressed by representatives of local government who feel that their ability to enforce California's access standards will be limited if they become certified to be equivalent to the ADA. Local government has an obligation by state law to enforce state accessibility standards, yet they have no authority to enforce the ADA standards.

The DOJ encourages the adoption of ADA standards in state and local codes to facilitate "voluntary compliance." Does voluntary compliance, through enforcement of the State Building Code, ensure compliance with the ADA? If so, what responsibilities and liabilities rest with local government in performing this function? Currently, OSA/AC provides assistance in interpreting state accessibility standards, but state law mandates enforcement authority for these regulations to local government; including the authority to interpret the regulations. Will local government still have the ability to interpret the state code once it is deemed to comply with the ADA? That is, can local government vary from federal ADA standards when the agency finds the need to adjust such standards due to site conditions?

01-00574

In summary, answers are needed to the following questions:

1. Will local governments be limited to the enforcement of California standards only? What is the exact scope of enforcement?

2. May local governments interpret, or be authorized to interpret, the

ADA-based California Building Code?

3. May local governments vary from the ADA standards dependent on site conditions?

4. What are the responsibilities and liabilities of local government in carrying out their enforcement and interpretive functions of a "certified" state code?

5. Does voluntary compliance, through enforcement of the State Building Code, ensure ADA compliance?

We anticipate having the revised accessibility standards before the Building Standards Commission for approval at the end of February. If you could respond prior to that time, it will assist the Commission in addressing this sensitive subject.

Thank you very much for your assistance.

Sincerely yours,

Richard T. Conrad AIA
Executive Director

RTC:mag

01-00575

DJ 182-06-00064

APR 8 1992

Harry A. Horwitz, Esq.
Davis, Reberkenny & Abramowitz
499 Cooper Landing Road
Cherry Hill, New Jersey 08002

Dear Mr. Horwitz:

I am responding to your recent letter requesting that the Department of Justice review the plans for the Hershey Water

Treatment Plant and issue an "advisory opinion" that certain areas of the planned facility are exempt from the accessibility requirements of the Americans with Disabilities Act of 1990 (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that are subject to the Act. Accordingly, this letter provides informal guidance to assist you in understanding the ADA accessibility standards. However, this technical assistance does not constitute a legal interpretation of the application of the statute to the Hershey Water Treatment Plant, and it is not binding on the Department of Justice.

We direct your attention to the Americans with Disability Act Accessibility Guidelines (Appendix A to this Department's regulation implementing title III of the ADA). Section 4.1.1(5)(b) provides that:

> Accessibility is not required . . . in non-occupiable spaces accessed only by ladders, catwalks, crawl spaces, very narrow passageways, or freight (non-passenger) elevators, and frequented only by service personnel for repair purposes . . . .

cc: Records; Chrono' Wodatch; Oneglia; Blizard.
:udd:bethea:ada.interpretation.horwitz

01-00576

Spaces that are entered or approached by one of the limited means of access described in this section are not required to comply with the guidelines. In addition, section 4.1.3(5)(Exception 2) provides that elevator access to elevator pits, elevator penthouses, and piping or equipment catwalks is not required.

Areas that are not subject to these limited exemptions must comply with the requirements of section 4.1.1(3), which provides that:

> Areas that are used only as work areas shall be designed and constructed so that individuals with disabilities can approach, enter, and exit the areas. These guidelines do not require that any areas used only as work areas be constructed to permit maneuvering within the work area or be constructed or equipped (i.e., with racks or shelves) to be accessible.

I hope that this information is helpful to you in advising your clients.

Sincerely,

John L. Wodatch
Director
Office on the Americans with Disabilities Act

Re: Advisory Opinion, Title III,
Americans With Disabilities Act

Dear Mr. Wodatch:

I request an advisory opinion concerning accessibility of water treatment plants. For purposes of review, I have enclosed plans of an illustrative plant. The enclosed plans are for the Hershey Water Treatment Plant, prepared by Gannett Fleming Water Resources Engineers, Inc., dated October, 1989, Sheet Nos. CP 4, CP 11 and CP 12. Due to the nature of water treatment plants, pipes and equipment are situated at various locations and heights and in many sizes.

The areas reflected in the plans show a typical pipe gallery for a surface water treatment plant. I request an advisory opinion that portions of surface water treatment plants similar to those reflected in the enclosed plans would be exempt from ADA accessibility requirements. I would also request an advisory opinion that other areas in surface water treatment plants that are below grade pipe areas and are frequented only by service personnel similarly be exempted from ADA accessibility requirements.

If you require further information, please contact me as soon as possible.

Very truly yours,

DAVIS, REBERKENNY & ABRAMOWITZ

APR 9 1992

The Honorable Dennis DeConcini
United States Senate
328 Hart Senate Office Building
Washington, D.C. 20510-6025

Dear Senator DeConcini:

This is in response to your inquiry on behalf of your constituent, Al Tarcola, concerning the religious exemption contained in section 307 of the Americans with Disabilities Act of 1990, Pub. L. 101-336. At issue is how the exemption applies to hospitals operated by religious orders.

Title III of the ADA establishes requirements for private entities that own, operate, lease (or lease to) places of public accommodation such as hospitals. A private entity has no title III obligations, however, if it is a religious entity. A religious entity is a religious organization or a private entity controlled by a religious organization.

A religious entity, however, is not exempt from the employment requirements of title I of the ADA, which go into effect on July 26, 1992, for hospitals with 25 or more employees. Moreover, if a religious entity receives Federal funds, as most hospitals do, it is subject to section 504 of the Rehabilitation Act of 1973, as amended, 29 U.S.C. S794, which prohibits disability discrimination in federally assisted programs.

I hope that you find this information useful in responding to your constituent.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

January 24, 1991

Rosalie Lopez, Legislative Aide
c/o Senator DeConcini
2424 East Broadway
Suite 104
Tucson, Arizona 85719-6011

RE: Inquiry of An Issue In The American Disability Act

Dear Ms. Lopez:

As a followup to our phone conversation on January 23, 1992 with you in the Senator's Washington, D.C. office, this letter is being sent to the Senator's local office in Tucson and then transmitted to you in Washington, D.C.

As noted in our conversation, I have placed 15 phone calls trying to ascertain an answer to a question related to the fact that religious organizations and entities controlled by religious Foundation organizations have no obligation under the American Disabilities Act. My inquiries started on January 8, 1992 via the Arizona office of ADA who directed me to the Architectural and Transportation Barriers Compliance Board in Washington, D.C. [1- 800-USA-ABLE] who in turn directed me the Department of Justice. All of the calls to the Department of Justice [202-514-0301] never went beyond a recording which directed me to hold until someone came on the line which also never occurred. It was on January 17, 1992 that I contacted the Senator's office for assistance in this matter.

Page 35554 of the Federal Registration//Volume 56, No. 144/Friday, July 26, 1991/Rules and Regulations addresses to and speaks of religious organizations and/or religious entities having no obligations under the ADA. Carondelet Health Care operates a number of hospitals and related medical facilities in Southern Arizona. Both the Corporation and the hospitals are a part of the Sisters of St. Joseph's of Carondelet. With this affiliation, would we in fact be exempt or not obligated under the Rules and Regulations of the ADA?

The purpose of clarifying this point is if we are indeed not obligated under the Rules and Regulations of the ADA we would then have an opportunity to allocate our resources over a

longer period of time if need be to accomplish many of the good aspects of the ADA. There is no question that the ADA requirements will place a significant financial burden on hospitals and other institutions at a time when we can least

01-00580

afford it. We have in the past both committed and utilized resources to accommodate access to our facilities for those who are less fortunate with respect to their ability to move about as easily as those of us who have normal mobility and who are not disabled and handicapped.

Thank you very much for your time, consideration and a timely response to my question above and/or a source from whom I can acquire a definitive answer.

Sincerely,

Al Tarcola
Corporate Administrative Director of Facilities

The Honorable E. Thomas Coleman
U.S. House of Representatives
2468 Rayburn House Office Building
Washington, D.C. 20515

Dear Congressman Coleman:

I am writing in response to your recent inquiry on behalf of your constituents.

We are aware of the concern expressed by your constituents and the National Emergency Number Association about the provision in our regulation implementing title II of the Americans with Disabilities Act that states "telephone emergency services, including 911 services, shall provide direct access to individuals who use TDD's and computer modems."

The apparent concern is that by mandating access to persons using computer modems, the regulation may require that there be access by every format that could be used by a modem, including those that are not compatible with equipment presently used by emergency service systems. That is not the case. The regulation does not require telephone emergency systems to do anything that is technologically infeasible; accordingly, we are interpreting the requirement for access by computer modems to mean only when the modem is using the Baudot format. Until it can be technically proven that communications in another format can operate in a reliable and compatible manner in a given telephone emergency, the public service answering point is not required to provide direct access to computer modems using other formats.
cc: Records; CRS Files; Oneglia; Wodatch; McDowney.

01-00582

This interpretive guidance has been issued by the Department of Justice in its recently published Technical Assistance Manual, which is available from the Office on the Americans with Disabilities Act, Post Office Box 66738, Washington D.C. 20035-9998, telephone: (202) 514-0301.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

01-00583

January 23, 1992

Honorable Ike Skelton
United States Representative, District 4
2134 Rayburn Office Building
Washington, D.C. 20515, 202/225-2876

Dear Representative Skelton:

In 1984 Mid America Regional Council assisted the County of Platte, as well as other local governments in the region to install and make continued service improvements on the 9-1-1 services. During 1991 Mid America Regional Council assisted us in acquiring telecommunication devices for the deaf (TDD machines) to allow 9-1-1 answering points to serve the area's hearing and speech impaired residents. Most hearing and speech impaired residents communicate using this type of machine. T.D.D. machines use a baudot modem to communicate over telephone lines.

New technology allows hearing and speech impaired individuals to use personal computers to communicate over telephone lines. This communication system uses a language called ASCII (American Standard Code for Information Interchange). Our 9-1-1 answering point, along with the other local answering points, are not able to receive and respond to ASCII calls.

The regulations issued to the Americans with Disabilities Act of 1990 require public agencies to provide direct access to individuals who use TDDs and computer modems, however, we have been informed that current computer modem technology is not compatible in the telephone service environment at this time.

We would request your immediate attention and assistance by encouraging the Department of Justice to modify it's rules implementing the Americans with Disabilities Act by delaying implementation of the computer modem requirement until such time as industry can provide viable equipment, software and standards for the emergency services.

01-00584

We appreciate your time and consideration in this matter. If we can assist you by providing further information, please do not hesitate to contact us.

Sincerely,

Carol Tomb,
Presiding Commissioner

Scott D. Spangler, 1st District

Chuck Reineke, 2nd. District

T. 4/3/92 APR 13 1992
SBO:MF:RM:hkb
DJ# 192-180-03114

The Honorable Leon E. Panetta
Member, U.S. House of Representatives
380 Alvarado Street
Monterey, California 93940

Dear Congressman Panetta:

This letter is in response to your inquiry on behalf of your constituent, XXX, about the Americans with Disabilities Act (ADA).

Title III of the ADA applies to places of public accommodation, such as restaurants, places of lodging, theaters, doctors' offices and retail stores. "Places of lodging" include inns, hotels, motels, or other places of lodging, except for owner-occupied establishments renting fewer than six rooms

(S36.104). Based on the information you have supplied, your constituent's establishment would constitute a place of public accommodation. Enclosed is a copy of the Department of Justice's regulation implementing title III of the ADA, which will assist XXX in understanding the requirements.

Public accommodations may not discriminate on the basis of disability (S36.201). Places of public accommodation must be operated in accordance with the full range of title III requirements, such as: elimination of discriminatory eligibility criteria (S36.301); reasonable modifications in policies, practices, and procedures (S36.302); provision of auxiliary aids (S36.303); and removal of barriers in existing facilities (S36.304). However, barriers only need be removed if it is "readily achievable" to do so, i.e., easily accomplishable and able to be carried out without much difficulty or expense. For many small businesses, this will mean taking of modest measures such as ramping of a few steps or installation of grab bars in a bathroom. In addition, construction and alterations must be accessible in compliance with the ADA Accessibility Guidelines (SS36.401 and 36.402).

cc: Records; CRS; Oneglia; Friedlaner; Mather; Downey; hkb
01-00586

The general title III requirements became effective on January 26, 1992. While all businesses must comply by January 26, 1992, small businesses do have limited protection from lawsuits. Except with respect to new construction and alterations, no lawsuit may be filed until July 26, 1992, against businesses with 25 or fewer employees and gross receipts of $1 million or less; or January 26, 1993, against businesses with ten or fewer employees and gross receipts of $500,000 or less (36.508).

In suits by the Attorney General, civil penalties for violations under title III are not to exceed $50,000 for the first violation, and $100,000 for any subsequent violation. When considering the dollar amount of a civil penalty, if any is

appropriate, the court is required to give consideration to any good faith effort or attempt by the public accommodation to comply with its obligations under the Act (36.504).

I hope that this information is useful to you. If I can be of further assistance in this matter, please do not hesitate to let me know.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

WBS/css

01-00591

January 7, 1992

The Honorable Strom Thurmond
SR-128 Russell Senate Office Bldg.
Washington, DC 20510
Honorable Thurmond:

I am a member of the National Emergency Number Association (NENA). I am writing to you to alert you to a flaw in the implementation rules for Title II Section 35 of the A.D.A Law. (Hearing and Speech Impaired). Our organization supports the A.D.A. Law 100%. However, The Dept. of Justice, who provided these rules, have set in motion a

situation that could be fatal to a hearing and speech impaired person.

The hearing and speech impaired community must communicate by using a device similar to a typewriter (called a T.D.D.). They also communicate using a personal computer (PC). The Justice Dept. specifies that all emergency services shall provide direct access to individuals who use T.D.D.s and computer modems.

In the past, they have communicated using a baudot modem. It still serves virtually all of the hearing and speech impaired today. It is compatible with our emergency centers. But with the advent of the personal computer, a new modem with a language called ASCII (American Standard Code for Information Interchange) appeared. Its original design was for a business machine to communicate with another business machine, without human involvement.

However, since it is being placed into T.D.D.s, and is the norm for P.C.s, it presents a problem. It is not compatible with emergency centers equipment. Also, there is at this time, no technology that exists that will connect an incoming ASCII call to an ASCII modem in the emergency centers and quarantee connection.

Simply put, if a hearing impaired person places an emergency call using ASCII mode, chances are virtually certain that the call will not be handled properly. It could disconnect, receive garbled data or make no connection at all. The result could be a possible loss of life or property. Emergency centers will be held liable for conditions over which they have no control. The hearing and speech impaired will not be served with the same quality assurance that others have come to expect of their emergency centers and the advent of 9-1-1 systems.

01-00590

The Honorable Alan J. Dixon
United States Senate
331 Hart Building
Washington, D.C. 20510-1301

Dear Senator Dixon:

This is in response to your letter requesting an update on the Department of Justice's review of the requirements for permanent signs under the Americans with Disabilities Act (ADA) and the Department of Justice regulations promulgated thereunder.

To assist in an understanding of the signage requirements at present, I have enclosed a copy of our recently issued title III technical assistance manual. In the manual the Department has defined "permanent signs" in a restrictive manner. The only signs subject to the raised letter requirement are men's and women's rooms, room numbers, and exit signs (see page 59 of the manual). Engraved letters are permitted on all other types of signs.

The Architectural and Transportation Barriers Compliance Board (Board) is currently drafting accessibility guidelines for title II of the ADA, which covers State and local governments. At my request, the Board agreed to include specific questions concerning appropriate standards for signage in the preamble to that proposed rule. This action, which is a direct response to previous Congressional inquiries, will enable the engraving industry to formally present to the Board its views on engraved lettering.

I strongly encourage representatives of the engraving industry to submit comments on the proposed title II guidelines so that the Board will have the necessary information to make a wise decision on the issue. The Board will carefully consider all comments received and determine whether the guidelines should

permit engraved lettering on permanent signs in State and local

cc: Records; CRS; Oneglia; Friedlander; Milton; hkb
McDowney:

01-00593

facilities. If the comments received indicate that such a determination is appropriate, I will recommend to the Board that the title III guidelines, covering places of public accommodation and commercial facilities, should likewise be revised to permit engraved letters.

I hope this information has been helpful to you.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

Enclosure
01-00598

December 2, 1991

Senator Alan J. Dixon
Hart Senate Office Building
Room 331
Washington, D.C. 20510

Re: The Americans with Disabilities Act Regulations. The Federal Register, Vol.56, No.144, July 26, 1991. Part III, Dept of Justice, Office of Attorney General, 28 CFR Part 36, Appendix A, Nondiscrimination on the basis of disability by public accommodations and in commercial facilities. Signage, section 4.30-1 through 4.30-6.

Dear Senator Dixon:

The regulations promulgated by the Architectural and Transportation Barriers Compliance Board with respect to above mentioned act requires that certain signs in public buildings be made with 1/32" raised letters. Accordingly, this will preclude the use of engraved signs for these applications when the regulations become effective January 26, 1992.

It has been demonstrated that blind people can read an engraved sign as well as raised letters. Engraved signs are in very common use, very economical to produce and are the products of principally many small businesses throughout the country. Aside from having a very negative impact on many small engraving businesses, a raised letter sign will cost substantially more to produce, thus adding a substantial, unnecessary cost to build a large new commercial building.

The engraving industry was not consulted with or informed by the Architectural and Transportation Barriers Compliance Board that these regulations were being issued. Being an industry of small businesses, there

are no resources to monitor legislation affecting the industry or to lobby on it's behalf.

As a member of the engraving industry, I respectfully request your help to get these regulations changed to include engraved signs. This legislation effects blind people but also the mere existence of many small businesses. Let's be fair to both. Thank you.

Sincerely,

Jeanne Brommer
President

Washington, DC 20510

Re: The Americans with Disabilities Act Regulations. The Federal Register, Vol. 56, No 144 July 26, 1991. Part III, Dept. of Justice, Office of Attorney General, 28 CFR Part 36, Appendix A, Nondiscrimination on the basis of disability by public accommodations and in commercial facilities. Signage, sections 4.30-1 through 4.30-6.

Dear Senator Dixon:

The regulations promulgated by the Architectural and Transportation Barriers Compliance Board with respect to above mentioned act requires that certain signs in public buildings be made with 1/32" raised letters. Accordingly, this will preclude the use of engraved signs for the applications when the regulations become effective on January 26, 1992.

It has been demonstrated that blind people can read an engraved sign as well as raised letters. Engraved signs are in very common use, very economical to produce and are the products of principally many small business throughout the country. Aside from having a very negative impact on many small engraving business, a raised letter sign will cost substantially more to produce, thus

adding a substantial, unnecessary cost to build a large new commercial building.

The engraving industry was not consulted with or informed by the Architectural and Transportation barriers compliance Board that these regulations were being issued. being an industry of small businesses, there are no resources to monitor legislation affecting the industry or lobby on it's behalf.
Thank you in advance for considering this matter. I would like to hear what your feelings are concerning this issue.

Sincerely,

Thomas K. Denson
President

Mr. William B. Ingersoll
Ingersoll and Block
1401 Sixteenth Street, N.W.
Washington, D.C. 20036

Dear Mr. Ingersoll:

This letter responds to your August 21, 1991, letter on behalf of Marriott Ownership Resorts, Inc. (Marriott), requesting guidance on the application of certain provisions of the Americans with Disabilities Act (ADA) to the timesharing resorts operated by Marriott under its Vacation Ownership System. Specifically, you have requested guidance as to whether "timesharing that is sold in increments of one week or less is a public accommodation as that term is defined in the ADA."

The ADA authorizes the Department to provide technical assistance to entities that are subject to the Act. This letter

provides informal guidance to assist you in understanding how the ADA may apply to your client. However, this technical assistance does not constitute a determination by the Department of Justice of your client's rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

Based on our review of your letter and supporting materials, it is our understanding that the specific question you pose is the following: Is a vacation property owned in the form of ownership referred to by Marriott as "timesharing," and sold by Marriott in increments of one week or less, a "place of public accommodation" as defined in this Department's regulation Implementing title III of the ADA? See, 56 Fed. Reg. 35,544 (July 26, 1991) to be codified at 28 C.F.R. pt. 36.

cc: Records; CRS Files; Oneglia; Friedlander; Wodatch; Pecht.
:uddl:udd:pecht:ingersoll

01-00597

To be considered a place of public accommodation under the title III regulation, a facility must be operated by a private entity, its operations must affect commerce, and it must fall within one of the 12 categories listed in S 36.104 of the regulation. Each category includes representative examples of covered facilities. However, the examples included are meant to be illustrative, not exhaustive. Thus, a facility does not have to be specifically listed in order to be covered.

Therefore, in order for Marriott's timesharing resorts to be considered places of public accommodation, they must fall within one of the 12 categories. In this instance, the analysis turns on whether any given resort is a "place of lodging" such as an inn, hotel, or motel. These terms are not defined in either the Act itself or the title III regulation. However, the preamble to the title III regulation does note that the category "places of lodging" would "exclude solely residential facilities because the nature of a place of lodging contemplates the use of the facility for short-term stays."

Thus, one factor that should be considered in determining whether a particular facility is a place of lodging is whether the facility is intended or used for, or permits short-term stays. Although the regulation does not define "short-term," the Department would consider stays of one week or less to be "short-term" stays. While this interpretation may be consistent with certain Federal court precedents established under title II of the Civil Rights Act of 1964 and cited in the materials you provided to us, you should be aware that the Department may look to such precedents for guidance but does not consider itself bound by them in interpreting its ADA regulations.

In addition to considering whether a given facility is intended or used for, or permits short-term stays, in making a determination as to whether a facility is a place of lodging, each entity should also consider the extent to which the facility does or does not share the characteristics of the examples listed as places of lodging. For example, one potentially significant difference between inns, hotels, and motels, as a group, and facilities held in Marriott's form of timeshare ownership is that, according to your April 23, 1991, letter to John Wodatch, timeshare owners are deeded a fee interest in the timesharing resort. Obviously, a deeded fee interest differs from the interest normally conveyed to the patron of a hotel or motel. However, if, as you point out in the April 23rd letter, the fee interest conveyed is subject to recorded restrictive covenants that substantially restrict the "traditional possessory rights of ownership" and the properties are, in fact, operated in a manner very similar to the manner in which hotels are operated, timeshare facilities are more likely to be treated as places of lodging covered under the ADA.

Based on the representations made in your April 23, 1991, letter, we believe that timeshare facilities in Marriott's Vacation Ownership System are nonresidential places of public accommodation. In reaching this conclusion we have considered the following factors to be of particular significance:

1. Ownership of timesharing units is sold in intervals of one week or less, which is consistent with the requirement that a place of lodging be a facility that is intended or used for, or permits short-term stays;

2. While ownership to individual units is conveyed in fee simple, recorded restrictive covenants substantially limit rights of ownership and owners have no right to occupy, alter, or

exercise other control over any specific unit;

3. Owners of timesharing interests are not required to return to the same unit or project and may utilize various exchange options to exchange their units for units at other resorts; and

4. Marriott's timeshare accommodations are operated like hotels (i.e., reservations, central registration, and room assignments are required) by a company that is in the hotel business.

We wish to stress that we have reached this conclusion based on your description of the ownership and operation of Marriott's Vacation Ownership System. Thus, this conclusion should not be viewed as a general statement of the Department's position with respect to other types of timesharing facilities; our position on this issue may well be different given a different set of facts concerning the ownership and operation of such facilities.

As you note in your April 23, 1991, letter, as places of public accommodation, timeshare facilities are subject to the title III requirements for readily achievable barrier removal; and any new construction or alteration of such facilities must follow the Accessibility Guidelines adopted as Appendix A to the Department's title III regulation. We would also like to point out that, as a public accommodation, Marriott is also subject to other significant non-discrimination requirements under title III of the ADA. For example, Marriott must provide auxiliary aids and services to guests with hearing, speech, or vision impairments, unless doing so would result in an undue burden or a fundamental alteration in the nature of the services or accommodations being offered.

01-00599

I hope this information has been helpful to you.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

RE: Request for Guidance
Final Rule published by the Department of Justice ("Department") in the Federal Register on July 26, 1991 with respect to Title III of the Americans with Disabilities Act, Nondiscrimination on the Basis of Disability by Public Accommodations and in Commercial Facilities (the "Final Rule")

Dear Ms. Oneglia:

On behalf of Marriott Ownership Resorts, Inc. ("Marriott"), we are requesting guidance as to the meaning of the term "short-term stay" as used in the Department's Section by Section Analysis in the Final Rule with respect to the definition of public accommodations. On April 23, Marriott submitted comments to the Department with respect to the proposed rule making implementing Title III of the Americans with Disabilities Act (the "ADA" or the "Act"), requesting confirmation in the Final Rule of Marriott's position that timesharing that is sold in increments of one week or less is a public accommodation as that term is defined in the ADA. A copy of Marriott's April 23 comments is enclosed for your reference.

In addition, on March 14, I spoke at the public hearing in Washington, D.C. regarding this issue. At that time, the panel indicated that it was aware of this question and intended to address it in the Final Rule. Although we recognize that it was difficult for the Department to address the many individual questions that arose in the comments to the proposed rule, we were nevertheless disappointed to find no reference at all to timesharing or vacation ownership in the Final Rule. We were encouraged, however, by the Department's statements in the Section-By-Section

Analysis and Response to Comments (the "Department's Analysis") that "... the nature of a place of lodging contemplates the use of the facility for short-term stays." (56 Fed. Reg. 35552; emphasis added).

Although the Department's distinction between short-term stays and long-term stays was encouraging, the absence of any definition of a short-term stay has left Marriott, and the timeshare industry, without the immediate guidance necessary to know whether or not they are required to comply with the provisions of the ADA. Given the approaching deadlines for removal of architectural barriers, as well as plans for future projects to be constructed, this places an undue burden on the industry. We are therefore requesting guidance as to whether a stay of one week or less constitutes a "short-term stay."

As discussed in the attached comments, we believe that there is considerable legal basis to conclude that stays of one week or less constitute a short-term stay. In particular, please refer to our discussion of Title II public accommodations (Section II.A. of our comments, beginning on page 7) in which we cite several Federal court decisions interpreting the term lodging to transient guests, as used in the definition of public accommodations in Title II, to apply to lodging for one week or less.

In its analysis, the Department repeatedly differentiates between short-term and long-term stays. For example, in discussing residential hotels, the Department states,

> Although such hotels or portions of such hotels may fall under the Fair Housing Act when operated or used as long-term residences, they are also considered "places of lodging" when guest of such hotels are free to use them on a short-term basis.

We wish to emphasize that it is Marriott's position that its timeshare projects are not residential in nature, as that term has been interpreted in the context of the Fair Housing Act. Therefore, Marriott projects are not mixed use projects that allow both residential and short-term stays and should not be subject to both the ADA and the Fair Housing Act.

Based on the Department's distinction between short-term and long-term stays and the legal precedent cited in the attached comments, we believe that projects in which timesharing that is sold in increments of one week or less are public accommodations which are covered only by the ADA. Because of the necessity to take immediate steps to remove architectural barriers and to design

new construction, we would appreciate your comments and guidance on this issue as soon as possible.

Sincerely,

William B. Ingersoll

John L. Wodatch
Office of Americans with Disabilities Act
Civil Rights Division
U.S. Department of Justice
Rulemaking Docket 003
Box 75087
Washington, D.C. 20013

RE: Comments of Marriott Ownership Resorts, Inc. with respect to Timesharing and the Marriott Vacation Ownership System

Dear Mr. Wodatch:

On behalf of Marriott Ownership Resorts, Inc., ("Marriott"), a subsidiary of the Marriott Corporation, we are submitting the following comments in response to the proposed rule making implementing Title III of the Americans with Disabilities Act ("ADA") or (the "Act") issued by the Department of Justice (the "Department") in the February 22 Federal Register (55 Fed. Reg. 7452) (the "Proposed Rulemaking"). By separate letter, Marriott is submitting comments on several provisions in the proposed rule making. However, because of the importance to Marriott of confirming that timesharing that is sold in increments of one week or less is a public accommodation, as that term is defined in the Act, we are submitting separate comments on this issue alone.

Since the enactment of the Americans with Disabilities Act of 1990 (the "ADA")1, there has been considerable confusion as to whether the ADA or the handicapped provisions in the 1988 Amendments to Fair Housing Act (the "Fair Housing Act")2 apply to timesharing. Historically, the timesharing industry has stressed compliance with Title II of the Civil Rights Act of 1964 ("Title

1 Americans with Disabilities Act of 1990, Pub. L. No. 101-336, S 104 Stat. 327, (1990).

2 Title VIII of the Civil Rights Act of 1968, as amended, 42 U.S.C. S 3601 et seq. (1988).

II")3 because of the public accommodations nature of timesharing facilities. Marriott, a subsidiary of the Marriott Corporation, is a leader in the timesharing industry. Marriott's Vacation Ownership System currently includes seven timesharing resorts developed by Marriott and several other resorts under construction or in the planning stage.4

Marriott has been committed to non-discriminatory practices in all aspects of its business, and it has been particularly concerned about complying with the new requirements enacted by Congress regarding handicapped accessibility. It is clear that Congress intended to provide handicapped access to all facilities which are generally available to the public, including both public accommodations which are occupied on a transient basis and residential dwelling units. However, we believe that Congress did not intend timesharing to be covered by both the ADA and the Fair Housing Act. Further, even if some types of timesharing are covered by the Fair Housing Act, we do not believe that all types of timesharing, regardless of the length of stay of the owners, are subject to the Fair Housing Act.

The Department recognized that the transitory nature of a stay as well as the length of stay is determinative when it stated in the Section by Section Analysis:

> Places of lodging (e.g. hotels and inns, primarily intended for transitory stays) are designated as places of public accommodation. Places used for longer stays (e.g. residential hotels) are not consider "commercial facilities" because they are residential facilities. (Emphasis added.)

Based on the reasons expressed herein, we urge the Department to clarify the confusion by clearly stating in the final regulations that transitory timesharing facilities which are sold in increments of one week or less, are subject to regulation as public accommodations under the ADA.

The following memorandum will provide a background on timesharing as it is structured today, with particular emphasis on

3 42 U.S.C. 2000 et seq.

4 Marriott has developed seven timesharing resorts in three states: Florida, South Carolina and California. New resorts are under construction in Florida and Colorado and resorts are also being planned in the Bahamas, Mexico and other national and international locations.

Marriott's Vacation Ownership System. This will be followed by analysis of the legal basis for applying the ADA to timesharing, as well as a discussion of the inapplicability of the Fair Housing Act to timesharing which is sold in increments of one week or less.

I. INTRODUCTION

In addition to the case law and statutory interpretations outlined herein, there is a practical reason why timesharing such as the Marriott Vacation Ownership System should be covered by the ADA. ADA will provide immediate accessibility to individuals with disabilities at no personal cost. Under ADA, architectural and communication barriers in existing projects must be removed, when readily achievable, at no expense to the individual with a disability. Further, all alterations and renovations must meet the standards for new construction, as well as for alterations. Under the Fair Housing Act, a person with disabilities who wishes such modifications must make them at his own expense. This is unrealistic when a guest only spends one week a year at a resort. Similarly, under the proposed Architectural and Transportation Barriers Compliance Board ("ATBCB") accessibility guidelines, a percentage of each class of new units must be readily accessible to individuals with disabilities. The Fair Housing Act provides for less accessible units. For example, the proposed ATBCB guidelines require grab bars in accessible units; Fair Housing only requires reinforcement in the walls, but the handicapped must install grab bars at their own expense. Thus, confirming that timesharing that is sold in increments of one week or less is subject to the ADA will make the majority of timesharing in the United States more accessible to the disabled at no personal cost.

Background

Although there are many types of timesharing, all

timesharing is sold as a mechanism which allows individuals to assure the availability of transient vacation accommodations of a short duration, typically one week intervals. There are four essential elements in the structure of any timeshare project: the interest, the unit, the interval and the exchange.

Interests. There are two basic types of timesharing interests - fee and non-fee or "right to use." In fee timesharing, the purchaser receives some type of deeded interest - either an undivided percentage interest in the entire project or in a specific unit. Right to use timesharing is generally structured as a club membership in which the purchaser receives the right to use a certain type of unit at a timeshare project for a specified number of years. All of Marriott's timesharing resorts are structured as some type of fee timesharing.

Units. Although Marriott owners are deeded an interest in a specific unit, they waive the right to use that specific unit under the recorded covenants and restrictions for the project. Instead, owners may only use one of several units of the type in which an interest was purchased, i.e., 1 bedroom, 2 bedroom, etc. Owners have absolutely no individual control over the units and are prohibited from altering them in any manner or from installing furnishings or fixtures. Further, the recorded covenants and restrictions prohibit the use of a unit as a permanent residence. Therefore, few, if any, of the traditional possessory rights of ownership are available to Marriott timeshare owners. The emphasis is on the vacation experience, not on ownership.

Timeshare owners occupy standardized units similar to hotel suites that are designed for the transient use of the public. The units are identical both inside and outside, with floor plans that facilitate interchangeability. Interior furnishings are identical, from furniture to color schemes. Linens, towels, tissues, utensils, ashtrays, etc. are provided by the timesharing facility management group, just as in hotels.

A unique feature in Marriott's California timesharing project are "lock-out" units, in which a second or guest bedroom can be physically locked off from the rest of the unit to create two usable units - a master or one-bedroom apartment and a one-bedroom guest suite. Owners may use each of the two separate halves of the unit in their appropriate season. Or they may rent or exchange either half through the exchange programs described below.

Intervals. Timesharing involves the concept of purchas-

ing the right to use accommodations for a defined time period or "interval." Marriott timesharing intervals are sold in one week intervals. There are two types of intervals - fixed and floating - with variations within each type. Fixed time generally refers to the right to use a unit during a specific week each year. However, it may also refer to a specified season. In projects with floating time, all owners must reserve their time, usually on a first-come, first-served basis. Although the organizational structure varies from resort to resort, except for a few units in the first two resorts developed by Marriott, all of the units in the Marriott Vacation Ownership System are subject to floating time.

Under Marriott's floating time program, all owners are required to reserve the use of a unit of the type in which their interest was purchased within the season of the week they purchased. For example, a purchaser of an interest in Unit 100, a 2-bedroom unit, for the first week in August, could reserve any available 2-bedroom unit during the summer season. Owners are

requested to submit four choices in order of preference. The management company assigns the weeks on a first-come, first-served basis; however, the actual units are not assigned until the time of check-in. Under this program, there is no anticipation nor likelihood of an owner staying in the same unit each year or even of vacationing during the same week each year.

The documentation for all of Marriott's timesharing resorts permits two flexible features which add to the transient nature of the occupancy - "odd-even year usage" and "split week usage." The odd-even year program permits owners to use a unit at a specific timesharing resort every other year rather than annually. In addition, a split week program has been implemented at the Desert Springs Villas Resort in California. Under this program, an owner may divide the normal seven-day use period into two separate use periods of three and four days during the same season as the week they purchased. When the split-week program is combined with the "lock-out" feature, as described above, owners may use, rent or exchange the separate halves of their units for a total of four periods each year - two three-day periods in one half of the unit and two four-day periods in the other half.

Marriott timeshare accommodations are similar to hotel accommodations in additional respects: central registration, check-in and check-out, and room assignment is required; keys are distributed and collected as in hotel facilities; and all maintenance and housekeeping functions are the responsibility of

management, not of the guests. Utilities are usually master-metered and the expense covered out of the facility's operating budget.

In short, Marriott timesharing purchasers are not buying an interest in a residential unit; they are buying usage of vacation accommodations which can be used, rented or exchanged from one project to another. The vacation experience is reinforced by the exchange systems, in which owners may exchange a week in their project for a week in a project in another location.

Exchange. The nature of timesharing as transient vacation accommodations is further underlined by the existence of exchange systems. Virtually every timesharing project participates in some type of exchange system, as timesharing developers have found that people will not buy timesharing if they are limited to returning to the same project year after year. Almost all time-share owners utilize the exchange during their period of timeshare ownership, with over 75% maintaining their affiliation with an exchange system in anticipation of exchanging their vacation week for a week at another project. Industry figures indicate that over one-third of exchange members exchanged their unit for another in 1990, with this percentage increasing each year. Marriott's

statistics are even higher, showing that owners in the Marriott Vacation Ownership System utilize the exchange systems provided more than 50% of the time, depending on the resort and the length of ownership.

Marriott timesharing resorts offer two exchange options to their owners. Marriott is affiliated with one of the two major exchange companies, Interval International, Inc. In addition to the external exchange program with timesharing projects around the world, Interval International operates a special internal exchange program for Marriott timesharing resorts under which owners at Marriott resorts are given priority over other Interval Interna-tional members in exchanging their time period for time in another Marriott timesharing resort.

A final benefit currently offered to all Marriott owners is the Honored Guest Awards program. This program substantially broadens the bundle of rights purchased with a timeshare interest. The Honored Guest Awards program is similar to the airline frequent flyer programs. Originally designed for guests at Marriott hotels, owners of timeshare interests in Marriott timesharing resorts are

currently eligible to participate in this program.5 Members may earn points that can be accumulated and redeemed for future stays at various Marriott hotels, free or discounted airline tickets, rental cars, etc. Marriott timeshare owners can earn Honored Guest Awards points by assigning the use of their unit to Marriott during any given year instead of using it personally. In addition, points are sometimes given as a sales incentive.

Clearly, timesharing is appropriately seen as a transient public accommodation, which is differentiated from other public accommodations by virtue of the concept of a pre-purchase which assures the availability of a vacation experience in a standardized setting. Marriott sales and owner literature emphasizes the many ways that owners may use their floating time: personal use, the internal Marriott exchange, the external Interval International exchange, rental to third parties or the Honored Guest Awards program. None of these features are characteristic of a residential unit that an owner expects to return to year after year. Instead, the one week periods, floating time reservation system, flexible features in some resorts such as split weeks and lock-out units and the Honored Guest Awards program are all typical of transient public accommodations such as hotels which are subject to the ADA.

5 Like the hotel program, the Honored Guest Award program for timeshare owners may be changed or eliminated at the discretion of Marriott.

II. TIMESHARING AS PUBLIC ACCOMMODATIONS UNDER TITLE II AND THE AMERICANS WITH DISABILITIES ACT.

A. Title II

Because of the relationship between public accommodations under Title II and public accommodations under the ADA, it is first necessary to address the application of Title II to public accommodations such as Marriott timesharing. Marriott views its timesharing facilities as public accommodations for transient guests that are regulated by Title II. Section 2000a(b)(1) of Title II includes as public accommodations, "any inn, hotel, motel, or other establishment which provides lodging to transient guests.-..." The legislative history regarding the scope of Title II differentiates lodging for transient guests from permanent residential housing:

Only public establishments furnishing lodging

to transcients [sic] would be within this subsection. Establishments furnishing lodging to guests of a permanent duration, or to guests of an indefinite duration having no fixed intent to leave, as in the case of a boarding house, would not be included.6

Similarly, the following explanation of the transient guest requirement, submitted by U.S. Attorney General Kennedy during the extensive hearings on the Civil Rights Act of 1964, emphasizes that transient guests were intended to be non-permanent in nature:

> The "transient guest" requirement exempts establishments, like apartment houses, which provide permanent residential housing. For example, apartments rented on month-to-month tenancies automatically renewed each month unless specifically terminated, are exempted.7

Federal courts have interpreted the term "transient" to apply to lodging for one week or less. In U.S. v Beach Associates,

6 S. Rep. No. 872, 88th Cong., 2nd Sess., reprinted in 1988 U.S. Code Cong. & Admin. News 2355, 2356.

7. Hearings Before Subcommittee No. 5 of the Committee on the Judiciary, House of Representatives, 88th Cong., 1st Session, Part II, Series No. 4, p. 1402.

Inc.8, the court held that beach apartments which were rented by the week were "lodging by transient guests" within the meaning of section 2000a(b)(1)9.

Affirming the decision in Beach Associates, the court in U.S. v. Young Men's Christ. Ass'n of Columbia, S.C.10, construed "transient" as including "lodgers of a week or less." Although there was disagreement between the parties as to whether the YMCA rented accommodations for less than a week, the record established that accommodations were rented for no more than one week.11 Citing Beach Associates and United States v. Sadler (No. 570, E.D. N.C., January 15, 1968), the court stated:

> I feel obliged to accept the construction of "transient" adopted in these decisions. Since

> the defendant concedes that it is its policy to rent rooms in its dormitory by the week, it follows that, under the construction adopted in the Beach Associates Case, the defendant does provide, as I have concluded, lodging for "transient" guests within the meaning of 42" U.S.C. section 2000a(b)(1).12

The one week threshold in Beach Associates and Young Men's Chris. Assn' is analogous to the sale of timesharing in increments of one week or less. Equally important is the non-residential nature of the facilities, a point which is emphasized in the ADA.

B. Americans with Disabilities Act of 1990 (the "ADA")

Title III of the ADA is entitled "Public Accommodations and Services Operated by Private Entities." The definition of "public accommodations" in the ADA is almost identical to the definition in Title II - "an inn, hotel, or other place of lodging...."13 Although the term "transient guests" is not included in the ADA definition, both the House and the Senate reports state

8 286 F.Supp. 801 (D.C. Md. 1968).
9 Id. at 808.
10 310 F.Supp 79 (D. S.C. 1979)
11 Id. at 82.
12 Id.
13 Section 301(7)(A).

01-00611

that "[O]nly nonresidential facilities are covered by this title."14

A one week stay in a timesharing resort cannot be deemed to be residential in any sense of the word. Timesharing units are nonresidential. Even when there is an ownership interest, permanent residence is prohibited and owners have no possessory rights in their units. Congress, in enacting the Americans with Disabilities Act, extended the protection to the handicapped afforded

in the Fair Housing Act to residential facilities to nonresidential public accommodations such as timesharing resorts.

II. FAIR HOUSING ACT

Congress did not specifically include timesharing facilities in the 1988 Amendments to the Fair Housing Act; however, HUD, in its Section by Section Analysis of the Final Fair Housing Accessibility Guidelines, stated that "... the fact of vacation timesharing ownership of units in a building does not affect whether the structure is subject to the Act's accessibility requirements."15 We believe this statement is incomplete. Although the fact of vacation ownership should not affect whether a structure is subject to the Fair Housing Act, the length of stay, based on a timeshare owner's interest, should be determinative.

The underlying policy of the Fair Housing Act is "to provide, within constitutional limitations, for fair housing throughout the United States."16 "Housing" is not defined in the Act, nor is the term used to any extent. Instead, the focus is on "dwellings," which are defined as:

> ... any building, structure, or portion thereof which is occupied as, or designed or intended for occupancy as, a residence by one or more families, and any vacant land which is offered for sale or lease for the construction or location thereon of any such building structure, or portion thereof.17

14 H.R. Rep. No. 101-485, Part 2, 101st Cong., 2d Sess, at 99. See also, S. Rep. No. 101-16, 101st Cong., 1st Sess., at 59.

15 Comments to Final Fair Housing Accessibility Guidelines, 56 Fed. Reg. 9472 at 9482 (March 6, 1991).

16 Id. at S 3601 (emphasis added).

17 Id. at S 3602(b) (emphasis added).

The application of the Act to timesharing that is sold in increments of one week or less hinges on whether timesharing units are "dwellings." The central concept in the definition of "dwelling" is the term "residence." It is the consistent emphasis on residence as opposed to transient accommodations that distin-

guishes traditional housing units from timesharing units.

Although the legislative history of the Act is meager due to the lack of committee reports and other relevant materials, the background events against which the Act was passed, such as the urban riots of 1967, indicate that a major concern was segregation in residential neighborhoods.18 Case law is equally sparse. The few courts that have addressed the question of whether the Act applies to a particular structure have focused on the term "residence."

In United States v. Hughes Memorial Home19, the court held that the Act applies to a children's home in which the average stay was four years. In its analysis, the court stated "[W]hether the Home is within the scope of the prohibition in section 3604(a) thus turns on whether it is "occupied as a ... residence."20

Because "residence" is not defined in the Act, the court looked to its ordinary meaning, quoting from Webster's Third New International Dictionary:

> a temporary or permanent dwelling place, above or habitation to which one intends to return as distinguished from the place of temporary sojourn or transient visit [.]21

The transient nature of accommodations has been an essential element in deciding whether a structure is a "dwelling."

In Patel v. Holley House Motels,22 the court held that a motel was not a "dwelling" under the Act. Citing the above definition of a residence in Hughes Memorial, the court stated:

18 See Laufman v. Oakley Building & Loan Co., 408 F. Supp, 489, 496-97, quoting from The Report of the National Advisory Commission on Civil Disorders (1968).

19 396 F.Supp. 544 (W.D. Va. 1975)
20 Id. at 549.
21 Id.
22 483 F.Supp 374 (S.D. Ala. S.D. 1979).

> It is clear that the Palms Motel is an establishment which provides lodging to "transient" guests. The Palms Motel is a "public accommodation" as distinguished from a "dwelling," see Title II, Civil Rights Act of 1965 (Public Accommodations), 42 U.S.C. S 2000a(b)-(1), and Plaintiffs, therefore, have no claim under the Fair Housing Act.23

Using the same rationale, the district court in Baxter v. City of Belleville, Ill.24, held that a home for AIDS victims was subject to the Act, stating, "[A]lthough the length of the residence may vary, the persons who will reside at [the home] will not be living there as mere transients."25

The most recent case to address the definition of a dwelling is U.S. v. Columbus Country Club26, which involved the rental of summer bungalows belonging to a private club. The Columbus Country Club was a non-profit social organization whose "annual" members owned the land collectively, which it leased to its annual members for a fee. However, the annual members owned their cottages.27 Members could spend up to five months a year in their bungalows and most returned each summer. The court quoted, in part, from R. Schwemm, a professor of law at the University of Kentucky:

> Title VIII "would presumably cover... facilities whose occupants remain for more than a brief period of time and who view their rooms as a residence 'to return to.'"28

To better understand the court of appeal's decision, the full passage from which this quote was taken is reproduced below:

23 Id. at 381.

24 720 F.Supp. 720 (S.D. Ill. 1989).

25 Id at 731.

26 915 F2d 877 (3rd Cir. 1990).

27 U.S. v. Columbus Country Club, No. 87-8164, Lexis Slip op. 14757 (E.D. Pa. 1989).

28 Id. at 881, quoting from Robert G. Schwemm, Housing Discrimination Law, 53 (1983).

> Other courts have agreed with Hughes Memorial that temporary residence cases should generally be decided by looking to whether the occupants intend to remain in these residences for any substantial period of time. If occupancy is merely transient, as would be the case with most motel and hotel rooms, the property may be viewed as something less than a dwelling and therefore not subject to Title VIII. On the other hand, Title VIII has been held to apply when a longer term occupancy is involved as in Hughes Memorial and in the monthly rental of a mobile home site. If this principle is followed, the statute would presumably cover boarding houses, dormitories, and other facilities whose occupants remain for more than brief period of time and who view their rooms as a residence "to return to." 29

After citing Professor Schwemm, Hughes Memorial, Holley House Motels and City of Belleville, the third circuit held:

> We agree with these cases and hold that the central inquiry is whether the defendant's annual members intend to remain in the bungalows for any significant period of time and whether they view their bungalows as a place to return to.30

Timeshare units have none of the traditional attributes of a residence, but are merely transient vacation accommodations. Unlike the members of the Columbus Country Club, Marriott timeshare owners purchase intervals of one week, hardly a "significant period of time." Members of the Club returned to the same bungalow year after year. Timeshare owners of one week intervals do not intend to return to their resorts each year, as evidenced by the use of the exchange systems. Columbus Country Club members owned their bungalows, which could be permanently furnished and altered according to each owner's wishes. They were entitled to the traditional possessory rights of ownership. Not only are many timeshare owners denied the use of the same unit each year, but, like hotel guests, they are never permitted to furnish a unit or to make any type of alteration, however temporary.

29 Schwemm at 53.

30 Columbus Country Club at 881.

01-00615

IV. CONCLUSION

Based on the above and because ADA provides more accessibility at less personal cost to individuals with disabilities, we feel that the final rule should clarify that timesharing, such as Marriott's, which is sold in increments of one week or less, is a public accommodation which is covered by the ADA. Such timesharing is sold and used as transient vacation accommodations that are most analogous to hotel use; therefore, such timesharing units should be regulated as public accommodations under the ADA. The entire nature of timesharing is nonresidential. The emphasis is on variety of vacation use, not on the unit itself.

The district courts in Beach Associates and Young Men's Christ. Assn explicitly held that lodgings which are used for periods of one week or less are covered by Title II. It follows that timesharing interests that are sold in increments of one week or less should also be covered by Title II. As a public accommodation, timesharing should also be subject to the ADA.

We wish to stress that Marriott does not wish to avoid civil rights or handicapped accessibility regulation. In fact, as stated herein, we believe that by confirming that timesharing that is sold in increments of one week or less is subject to the ADA, the Department will provide immediate accessibility in such projects to individuals with disabilities at no personal cost.

Sincerely,

William B. Ingersoll

The Honorable Carl Levin
United States Senate
459 Russell Senate Office Building
Washington, D.C. 20510

Dear Senator Levin:

I am writing in response to your recent inquiry on behalf of your constituent, XXX of Charlotte, Michigan.

We are aware of the concern expressed by your constituent and the National Emergency Number Association about the provision in our regulation implementing title II of the Americans with Disabilities Act that states "telephone emergency services, including 911 services, shall provide direct access to individuals who use TDD's and computer modems."

The apparent concern is that by mandating access to persons using computer modems, the regulation may require that there be access by every format that could be used by a modem, including those that are not compatible with equipment presently used by emergency service systems. That is not the case. The regulation does not require telephone emergency systems to do anything that is technologically infeasible; accordingly, we are interpreting the requirement for access by computer modems to mean only when the modem is using the Baudot format. Until it can be technically proven that communications in another format can operate in a reliable and compatible manner in a given telephone emergency, the public service answering point is not required to provide direct access to computer modems using other formats.

This interpretive guidance has been issued by the Department of Justice in its recently published Technical Assistance Manual, which is available from the Office on the Americans with Disabilities Act, Post Office Box 66738, Washington D.C. 20035-9998, telephone: (202) 514-0301.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

01-00618

January 6, 1992

Senator Carl Levin
140 Russell Senate Office Bldg.
Washington, DC 20510

Dear Senator Levin:

I am a member of the National Emergency Number Association (NENA). I am writing to you to alert you to a flaw in the implementation rules for Title II Section 35 of the A.D.A. Law. (Hearing and Speech Impaired.) Our organization supports the A.D.A. Law 100%. However, the Department of Justice, who provided these rules, have set in motion a situation that could be fatal to a hearing and speech impaired person.

The hearing and speech impaired community must communicate by using a device similar to a typewriter (called a T.D.D.). They also communicate using a personal computer (PC). The Justice Dept. specifies that all emergency services shall provide direct access to individuals who use T.D.D.'s and computer modems.

In the past, they have communicated using a baudot modem. It still serves virtually all of the hearing and speech impaired today. It is compatible with our emergency centers. But with the advent of the personal computer, a new modem with a language called ASCII (American Standard Code for Information Interchange) appeared. Its original design was for a business machine to communicate with another business machine, without human involvement.

However, since it is being placed into T.D.D.'s and is the norm for PC's, it presents a problem. It is not compatible with emergency centers equipment. Also there is, at this time, no technology that exists that will connect an incoming ASCII call to an ASCII modem in the emergency centers and guarantee

connection.

Simply put, if a hearing impaired person places an emergency call using the ASCII mode, chances are virtually certain that the call will not be handled properly. It could disconnect, receive garbled data, or make no connection at all. The result could be a possible loss of life or property. Emergency centers will be held liable for conditions over which they have no control. The hearing and speech impaired will not be served with the same quality assurance that other have come to expect of their emergency centers and the advent of 9-1-1 systems.

01-00619

We need your help to keep this from happening. We feel that the reference to "computer modem" should be removed from the implementation rules until technology can assure that every T.D.D. call will be answered with the same quality as a voice placed call.

Please contact the Department of Justice and urge this change be made. Our contact is:

Mr. Robert Mather, Attorney
U.S. Department of Justice
Civil Rights Division

01-00620

T. 4/8/92
DJ 202-16-0
Control/202-CON-0001

APR 20 1992

The Honorable Robert S. Walker
U. S. House of Representatives
2369 Rayburn House Office Building
Washington, D.C. 20515-3816

Dear Congressman Walker:

I am responding to your recent inquiry on behalf of your constituent, XXX, about his obligations under title III of the Americans with Disabilities Act of 1990 (ADA), Pub. L. 101-336, 104 Stat. 327 (July 26, 1990), and this Department's regulation implementing title III, 56 Fed. Reg. 35544 (July 26, 1991). Specifically, XXX is seeking clarification of whether a physician is required to provide a sign language interpreter for a patient who is deaf or hard of hearing if effective communication can be achieved through other means.

The ADA authorizes the Department of Justice to provide

technical assistance to individuals and entities that are subject to the Act. This letter provides informal guidance about the obligation of a health care provider to provide auxiliary aids; however, this technical assistance does not constitute a determination by the Department of XXX rights or responsibilities under the ADA and it is not binding on the Department.

The ADA requires that a public accommodation, such as the professional office of a health care provider, make available appropriate auxiliary aids when those aids are necessary to ensure effective communication. An individual who has a hearing impairment that substantially limits his or her ability to communicate is entitled to receive auxiliary aids from a health care provider, unless the health care provider can demonstrate that providing the auxiliary aid will fundamentally alter the nature of the service being provided or that it will result in undue burdens.

cc: Records; Chrono; Wodatch; Bowen; Blizard; McDowney.
:udd:bowen:cong.walker

01-00621

Auxiliary aids include a wide range of services and devices that promote effective communication. The type of auxiliary aid or service necessary to ensure effective communication will vary with the length and complexity of the communication involved. Brief exchanges of information would not ordinarily require the use of interpreter, but discussions of complex issues, such as alternative methods of treating a serious illness, may require an interpreter.

To determine what type of auxiliary aid should be provided, a health care provider should consult with the patient whenever possible to determine what type of auxiliary aid is needed to ensure effective communication, because it is important to ensure that the auxiliary aid that is used is, in fact, effective for that individual. However, the ultimate decision as to what measures to take to facilitate communication rests in the hands of the health care provider, as long as the method chosen results

in effective communication.

The Department of Justice recently published a technical assistance manual to assist individuals and entities affected by title III of the ADA to understand their rights and responsibilities under the Act. I am enclosing a copy of that manual for your use. The manual addresses both the obligation to provide auxiliary aids and the limitations on that obligation. It also identifies the factors to consider in determining if providing an auxiliary aid will constitute an undue burden.

I hope that this information is helpful to you in responding to XXX.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

Washington, DC 20515

Re: The American Disabilities Act

Dear Congressman Walker:

I am writing to express my concern about ambiguities in the wording of the American Disabilities Act, particularly in regard to the provision of services to the deaf.

We have received a communication from the Department of Justice referring to

Section 36.303 - Auxiliary Aids and Services. This states, "Implicit in this duty to provide auxiliary aids and services is the underlying obligation of a public accommodation to communicate effectively with its customers, clients, patients or participants who have disabilities affecting hearing, vision, or speech." It goes on to mandate that "appropriate auxiliary aids and services be furnished to ensure that communication with persons with disabilities is as effective as commination with others." This is being interpreted by the Deaf Association to mean that we must provide an interpreter provided by the Deaf Association, and pay that interpreter for those services. The charge that they are asking in some cases exceeds our charge for the office visit.

It is our interpretation of the law that we simply need to provide adequate communication with the patient, whether through written mechanisms or through lip reading. It is the Deaf Association's interpretation that we must provide an interpreter who can effectively sign as well as speak. Whenever the law is ambiguous, as this is, the interpretation is left to the courts.

We have been informed by the Deaf Association that if we do not pay them for an
interpreter that they insisted come along to a patient visit, that they will sue us and "shut us down." The publicity of a law suit on discrimination is potentially far more harmful to us than the cost of paying an interpreter. So though legally we have the right to refuse and accept a lawsuit which we may well win, the threat of adverse publicity puts a dampening effect on our ability to fight for our interpretation of the law. The additional costs of an interpreter obviously add to our overhead which ultimately must be passed on to other patients, further increasing the cost of medical care. There is also a clear risk that physicians will be less willing to take on a deaf patient if it means paying more for the deaf patient's care than is received from the visit.

For these reasons, I request that you work to ammend the American Disabilities Act inserting language clarifying that this does not require an interpreter to

be present, as long as communication can be carried out through lip reading or through written notes.

I thank you for your attention to this matter.

Sincerely,

XXX

Washington, D.C. 20035-6118

APR 21 1992

Daniel L. Bart, Esq.
Senior Attorney
GTE Service Corporation
1850 M Street, N.W.
Suite 1200
Washington, D.C. 20036

Dear Mr. Bart:

This is in response to your letter requesting a "Declaratory Ruling" from the Department of Justice that "telecommunications equipment spaces, designed to be non-occupiable and frequented by service personnel for repair or maintenance fit the functional criteria for the General Exception of Section 4.1.1(5)(b)" of the Americans with Disabilities Act Accessibility Guidelines (ADAAG).

The ADA authorizes this Department to provide technical assistance to entities that are subject to title III. This letter provides informal guidance to assist you in understanding how the ADA accessibility standards may apply to specific situations. However, this technical assistance does not constitute a determination by the Department of Justice of rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

Section 4.1.1(5)(b) of ADAAG provides that "[a]ccessibility is not required . . . in non-occupiable spaces accessed only by ladders, catwalks, crawl spaces, very narrow passageways, or freight (non-passenger) elevators, and frequented only by service personnel for repair purposes . . . ." Thus, telecommunications equipment spaces that are entered or approached by one of the

limited means of access described in this section are not required to comply with the guidelines. However, all other

telecommunications equipment spaces (i.e., those accessed by other means) are not exempt and must comply with the requirements for work areas contained in section 4.1.1(3). That section provides that:

> Areas that are used only as employee work areas shall be designed and constructed so that individuals with disabilities can approach, enter, and exit the areas. These guidelines do not require that any areas used only as work areas be constructed to permit maneuvering within the work area or be constructed or equipped (i.e., with racks or shelves) to be accessible.

I hope that this information is helpful to you.

Sincerely,

Stewart B. Oneglia
Chief

Barriers Compliance Board

01-00626

DJ 202-PL-00111

APR 21 1992

Mr. James C. Hanna
Director
Department of Housing and
Community Development
100 Community Place
Crownsville, MD 21032-2023

Dear Mr. Hanna:

We are responding to your letter of February 5, 1992, to Irene Bowen inviting the Civil Rights Division to comment on Maryland Senate Bill No. 469, and asking us to respond to certain questions concerning the enforcement of the Americans with Disabilities Act of 1990 (ADA), Pub. L. 101-336, 104 Stat. 327 (July 26, 1990), 42 U.S.C.A. 12101 et seq.

Before we address your specific questions, we must clarify the scope of this response. The Department of Justice is authorized by law to provide legal opinions only to the President and to the heads of Federal Executive agencies; therefore we can not provide a legal opinion with respect to a pending State legislative proposal.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that are subject to that Act; therefore, we may provide informal guidance to assist you in understanding the ADA and the ADA regulations. However, this technical assistance does not constitute a determination by the Department of Justice of your rights or responsibilities under the ADA and it is not binding on the Department.

You have asked whether the State of Maryland has the authority to enforce the ADA. The ADA does not authorize State officials to enforce the ADA's accessibility standards. The ADA will be enforced at the Federal level through litigation or through Federal administrative enforcement proceedings. The specific enforcement mechanism varies according to the provision

cc: Records Chrono Wodatch Blizard arthur.ada.interpre.hanna
01-00627

of the Act that is being enforced. The ADA may also be enforced by private litigants. However, if the State enacts legislation adopting accessibility requirements based on the ADA as State law, those provisions may be enforced by State officials to the same extent that they would enforce any other provision of State law.

You have also asked if State officials may interpret the ADA accessibility standards, or if requests for such interpretations should be referred to the Department of Justice or to the Architectural and Transportation Barriers Compliance Board. We reiterate that State or local officials do not have the authority to enforce the ADA. If a State adopts an accessibility code that duplicates or is based on the ADA, State or local officials may interpret the provisions of that State code to the extent that State law permits them to do so. Such interpretations do not, however, constitute interpretations of the ADA.

Neither the Department of Justice nor the Architectural and Transportation Barriers Compliance Board plans to provide interpretations of the accessibility standards with respect to individual projects in the way that State or local agencies do. However, both agencies plan to respond to requests for technical assistance with respect to the accessibility standards to the extent that their resources permit.

We hope that this information is helpful to you.

Sincerely,

John L. Wodatch
Director
Office on the Americans with Disabilities Act

01-00628

Mr. Hanna -

This note is intended to provide to you my own general and informal answer to the two questions raised in your letter of February 5. We are not able to give you a more formal response due to staffing limitations and our own time constraints. We have numerous requests from all over the country. Partly because of our limited staff resources, it takes a while to answer the letters, and we try to answer them in the order in which they are received.

In response to your second concern stated in your letter, your State does not have the authority to enforce the ADA as a Federal statute. You do have the authority to enforce the same provisions as are in the ADA, if you make them part of your State code. But you are then enforcing the State code, not the ADA as such.

As to your first concern, the answer is similar. If you have a State code that is identical to or like the ADA, the State is able to interpret that code as a State code. That doesn't mean you are interpreting the ADA as such. DOJ will not have staff to provide interpretations about individual projects in the way that State or local agencies do. We will not do plan approvals.

Also, we are not necessarily encouraging the States and localities to incorporate the ADA regulations by reference; it may be more appropriate to include the substance of the ADA provisions in the existing code in language that is more familiar to those working with the codes. But if you do use the approach of incorporating by reference, it is very important to include not only the ADA accessibility guidelines (ADAAG) that the ATBCB issued, but also the other parts of the DOJ regulation that relate to new construction and alterations (subpart D of our title III rule for private entities' buildings).

I hope this is helpful. I'm glad to see the progress you're making in your State. I'm sorry that we can't give you guidance right now that is more official. We'll go ahead and answer your

letter officially as soon as we can.

Thanks,
Irene Bowen

February 5, 1992

L. Irene Bowen, Esquire
Coordination and Review, Civil Rights Division
Department of Justice
Washington DC 20530

Dear Ms. Bowen:

In re: Senate Bill 469 - Disabled Persons -
Maryland Accessibility Code

Enclosed is a copy of Maryland Senate Bill No. 469, which was introduced on January 30, 1932, and assigned to the Senate Economic and Environmental Affairs Committee.

In view of our short legislative session, the bill will soon be scheduled for hearing by the assigned committee. Any specific comments from you will be invaluable in understanding our role in interpretation and enforcement of two provisions in the bill. The first concern: SB 469 makes the State responsible for interpretation of accessibility guidelines for buildings and facilities of the Americans with Disabilities Act of 1990. Do we have that authority or should requests for interpretation be forwarded to the Department of Justice or the ATBCB?

Our second concern: Does the State have the authority to enforce the provisions of the ADA in the legislation or is that done through the Department of Justice?

Because of our limited response time, we should appreciate hearing from you as quickly as possible.

Sincerely,

James C. Hanna, Director

SENATE OF MARYLAND

2lr2361 No. 469 03

CF 2lr2424

By: Senators Stone and Garrott
Introduced and read first time: January 30, 1992
Assigned to: Economic and Environmental Affairs

A BILL ENTITLED

AN ACT concerning

Disabled Persons-Maryland Accessibility Code

FOR the purpose of requiring the Department of Housing and Community Development to develop, adopt regulations for, and administer the Maryland Accessibility Code; requiring the Department to incorporate certain guidelines in the Code; specifying certain procedures regarding the Code, including: interpretation, jurisdiction preparation of regulations, investigations of violations, and enforcement remedies; defining a term; establishing certain penalties; making stylistic changes; and generally relating to access for individuals with disabilities to buildings and facilities.

BY repealing and reenacting, with amendments,
Article 83B- Department of Housing and Community Development
Section 6-102
Annotated Code of Maryland
(1991 Replacement Volume)

SECTION 1. BE IT ENACTED BY THE GENERAL ASSEMBLY OF MARYLAND, That the Laws of Maryland read as follows:

Article 83B- Department of Housing and Community Development

19 6-102

20 [(a)(1) the Department, or an appropriate division of the Department, shall
21 promulgate and adopt a State building code for the purpose of developing rules and
22 regulations for making building and facilities accessible and usable by the physically
23 handicapped to the extent feasible.

24 (2) The rules and regulations shall be developed in conjunction with
25 the Governor's Committee for Employment of the Handicapped, the
26 Maryland Rehabilitation Association, and the Maryland Society of Architects.

EXPLANATION: CAPITALS INDICATE MATTERS ADDED TO EXISTING LAW.
[BRACKETS] indicate matter deleted from existing law

1 (3) (i) In addition to any other penalty for a violation of the State
2 building code for the handicapped, the Secretary shall investigate to determine the
3 existence of any violation.]

4 (A) IN THIS SECTION "CODE" MEANS THE MARYLAND
5 ACCESSIBILITY CODE.

6 (B) THERE IS A MARYLAND ACCESSIBILITY CODE ADMINISTERED
7 BY THE DEPARTMENT.

8 (C) (1) THE DEPARTMENT SHALL DEVELOP THE CODE AND ADOPT
9 REGULATIONS TO MAKE BUILDINGS AND FACILITIES ACCESSIBLE AND
10 USABLE BY INDIVIDUALS WITH DISABILITIES TO THE EXTENT FEASIBLE.

11 (2) THE DEPARTMENT SHALL INCORPORATE BY REFERENCE IN
12 THE CODE THE ACCESSIBILITY GUIDELINES FOR BUILDINGS AND
13 FACILITIES OF THE AMERICANS WITH DISABILITIES ACT OF 1990 AS PART
14 OF THE MINIMUM STANDARDS OF THE CODE.

15 (3) THE DEPARTMENT SHALL PREPARE THE REGULATIONS
16 WITH THE:

17 (I) MARYLAND ADVISORY COUNCIL FOR INDIVIDUALS
18 WITH DISABILITIES;

19 (II) GOVERNOR'S COMMITTEE FOR EMPLOYMENT OF

PEOPLE WITH DISABILITIES:

(III) MARYLAND STATE INDEPENDENT LIVING COUNCIL;
(IV) MARYLAND REHABILITATION ASSOCIATION; AND

(V) MARYLAND SOCIETY OF ARCHITECTS.

(D) (1) THE SECRETARY SHALL INVESTIGATE QUESTIONS OF BUILDING AND FACILITY ACCESSIBILITY AND USABILITY BY INDIVIDUALS WITH DISABILITIES TO DETERMINE THE EXISTENCE OF A VIOLATION OF THE CODE.

[(ii)](2) If the Secretary determines that a violation exists, the Secretary may resolve [any] AN issue [in] REGARDING the violation by informal methods of mediation and conciliation.

[(iii)](3) In addition to the provisions of[subparagraph (ii) of this paragraph] PARAGRAPH (2) OF THIS SUBSECTION, the Secretary may institute in any court of competent jurisdiction in the subdivision in which the violation occurred an action for equitable relief which may include:

SENATE BILL No. 469

(I) [enjoining] ENJOINING the construction, renovation, or occupancy of a building or facility that violates the [Maryland Building] Code [for the Handicapped or to seek]; OR

(II) SEEKING other appropriate relief from the violation.

[(iv)](4) Notwithstanding any other provision of this [paragraph] SUBSECTION, the Secretary may not seek [any] AN injunction under [subparagraph (iii) of this paragraph] PARAGRAPH (3) OF THIS SUBSECTION until 5 working days after the Secretary has sought to seek a resolution through mediation and conciliation under [subparagraph (ii) of this paragraph] PARAGRAPH (2) OF THIS SUBSECTION.

(5) IF THE SECRETARY DETERMINES THAT A VIOLATION OF THE CODE IS ALSO A VIOLATION OF THE ACCESSIBILITY GUIDELINES UNDER PARAGRAPH (2) OF THIS SUBSECTION, THE SECRETARY MAY PURSUE AN ACTION OR SUPPORT AN ACTION OF OTHERS FOR ENFORCEMENT UNDER THE APPROPRIATE PROVISIONS OF THE CODE OF FEDERAL REGULATIONS.

[(4)](6) The Attorney General is authorized to prosecute all civil cases arising under this section which are referred to the Attorney General by the Secretary.

[(b)](D) (1) Enforcement of the Code shall be the responsibility of local

20 jurisdictions or any other public agencies having authority over buildings or facilities.

21 (2) The Department shall decide questions of interpretation of the Code
22 [and authorize any waivers or exemptions under the Code].

23 [(c)](E) (1) Any person who willfully violates any provision of the
[Maryland
24 Building] Code [for the Handicapped] adopted under subsection [(a)] (C) of this
25 section is guilty of a misdemeanor and on conviction for each violation is
subject to a fine
26 not exceeding $500 for each day that the violation exists or imprisonment not
exceeding 3
27 months[,] or both.

28 (2) Any penalty ordered under paragraph (1) of this subsection is in
29 addition to and is not a substitute for any other penalty ordered under a federal, State, or
30 local law.

31 [(d)](F) (1) Nothing in this section shall limit the authority of the Human
32 Relations Commission to enforce the provisions of Article 49B, S 22 of the
Code.

33 (2) The Department shall cooperate with and provide technical assistance to
34 the Human Relations Commission concerning any action brought by the Commission to
35 enforce the provisions of Article 49B, S 22 of the Code.

36 SECTION 2. AND BE IT FURTHER ENACTED, That this Act shall take effect
37 October 1, 1992.

APR 21 1992

Mr. James D. Harris
Deputy Attorney General
Office of the Attorney General
State of New Jersey
3rd Floor, West Wing
25 S. Market Street, CN 081
Trenton, New Jersey 08625

Dear Mr. Harris:

This letter responds to your letter to John L. Wodatch,

Director, office on the Americans with Disabilities Act, in which you seek clarification on the application of title I of the Americans With Disabilities Act (ADA) to State governments.

Title I of the ADA, which prohibits discrimination on the basis of disability by an employer in its employment practices, becomes effective on July 26, 1992, for employers with twenty-five or more employees. As all States employ more than twenty-five employees, title I will apply to all State governments after that date.

Additionally, title II of the ADA prohibits discrimination on the basis of disability in all programs, services, and activities of a State government, including its employment practices. Title II became effective on January 26, 1992. Although the Department of Justice title II regulation does incorporate title I's substantive standards with respect to a State's employment practices, these standards will not be applicable to State governments until July 26, 1992, the date that title I becomes effective. In the interim, the Department of Justice coordination regulation for federally assisted programs (28 C.F.R. Part 41) as implemented by the Department's section 504 regulation for its federally-assisted programs (28 C.F.R. Part 42, Subpart G), will be applied to complaints of employment discrimination under title II.

We hope this letter responds to your concerns. Should you require additional information, please call Louis M. Stewart of my staff at (202) 616-7779.

Sincerely,

Stewart B. Oneglia
Chief

DJ# 192-06-00013

APR 21 1992

Mr. C.J. Morrow-Fundin
Assistant City Attorney
City of Mobile
P.O. Box 1827
Mobile, Alabama 36633-1827

Dear Mr. Morrow-Fundin:

This is in response to your letter concerning the applicability of the Americans with Disabilities Act (ADA) to the City of Mobile's Convention Center construction project.

The ADA authorizes the Department of Justice to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you in understanding how the ADA may apply to you. However, this technical assistance does not constitute a determination by the Department of Justice of your rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

Because the City began construction of the Convention Center before January 26, 1992, there is no obligation under the ADA to follow either the Uniform Federal Accessibility Standards (UFAS) or the ADA Accessibility Guidelines (ADAAG) in your construction project. However, because the Center, when completed, will be an "existing facility" under the Act, there is an obligation to make the Center's programs accessible. Constructing the Center in compliance with an accessibility standard will increase the probability that the programs offered in the Center will be accessible to all.

cc: Records; CRS; Oneglia; Friedlander; bb

The enclosed technical assistance manual for title II of the ADA at page 28 describes the different standards for assembly areas under UFAS and ADAAG. You will note that the ADAAG requirements are more detailed and more stringent than the UFAS requirements.

I hope this discussion has been helpful.

Sincerely,

Stewart B. Oneglia
Chief
Coordination and Review Section

Dear Director:

On January 9, 1992, I discussed the City of Mobile's Convention Center construction project with your office requesting a written confirmation of the City's legal position regarding the Americans with Disabilities Act (ADA) relative to this project. I was informed this request would take four to six weeks to complete. The City of Mobile would be most appreciative of whatever assistance you can provide to expedite the forwarding of this information to my attention in the City Legal Department, P. O. Box 1827, Mobile, Alabama 36633.

Attached for your information is a letter to Convention Center Project Manager Garry Johnson advising him of the conversation I had with your office. It is imperative the City of Mobile receive written confirmation as soon as possible. Thank you for your assistance in this matter.

Yours truly,

C. J. Morrow-Fundin
Assistant City Attorney
City of Mobile

Re: Americans With Disabilities Act
Mobile Convention Center Construction Project

Dear Garry:

I was successful in discussing the City of Mobile's Convention Center construction project with the Justice Department on the telephone January 9, 1992. By copy of this letter to the Justice Department, I am seeking a written confirmation of the following legal position with regards to the Americans with Disabilities Act (ADA). I was informed this request would take four to six weeks to complete.

First, a brief history on the topic. On July 29, 1990, President George Bush signed the ADA into law. The City of Mobile received bids from general contractors for the Convention Center project on January 9, 1991. On March 19, 1991, the City of Mobile entered into a contract for construction of the Convention Center with Harbert International of Birmingham, Alabama. Thompson, Ventulett, Stainback & Associates of Atlanta, Georgia, had previously been chosen as the architects for the project. The local architectural consultant is TAG Architects - The Architects Group. Manhattan - Ogden Joint Venture is the City's local construction consultant. The City of Mobile's Inspection Services Department issued a building permit to Harbert International for the Mobile Convention Center on April 4, 1991. In the meantime, on July 26, 1991, the Department of Justice acting pursuant to the ADA, issued its ADA Rules and Regulations which included an appendix with the ADA Accessibility Guidelines.

Obviously, much planning and design of the Convention Center had been completed prior to July 26, 1991 when the Department of Justice ADA Rules and Regulations were issued. The July, 1991 Justice Department regulations determined the compliance date for municipal governmental buildings under Title II of the Act to be January 26, 1992. The scope of Title II's coverage

of public entities is broad. Title II coverage is not limited to "executive" agencies, but includes activities of the legislative and judicial branches of state and local governments. All governmental activities of public entities are covered even if they are carried out by contractors. The private, nongovernmental entity operating a public facility would also be subject to the obligations of public accommodations under the standards set out by Title III of the Act, not Title II like the City of Mobile.

Under Title II of the ADA, "New Construction and Alterations" of facilities under design on January 26, 1992 will be governed by the ADA if the date the bids were invited falls after January 26, 1992. Since the bids for the Mobile Convention Center were received on January 9, 1991, over a year prior to the effective date of Title II of the ADA, the Mobile Convention Center would be classified as an "Existing Facility". The requirements under the ADA for an "Existing Facility" are as follows:

> "Unlike Title III of the Act, which requires public accommodations to remove architectural barriers where such removal is 'readily achievable,' or to provide goods and services through alternative methods, where those methods are 'readily achievable,' Title II requires a public entity to make its programs accessible in all cases, except where to do so would result in a fundamental alteration in the nature of the program or in 'undue financial and administrative burdens'. Congress intended the 'undue burden' standard in Title II to be significantly higher than the 'readily achievable' standard in Title III. Thus, although Title II may not require removal of barriers in some cases where removal would be required under Title III, the program access requirement of Title II should enable individuals with disabilities to participate in and benefit from the services, programs or activities of public entities in all but the most unusual cases." [56 F.R. 35708] Emphasis added.

Therefore, it is my legal opinion it would be in the City of Mobile's best interest to abide by the ADA's less ambiguous, more clear "New Construction and Alterations" Standards whereby public entities, like the City are allowed to choose to comply with either the ADAAG (ADA Accessibility Guidelines for Buildings and Facilities - Appendix "A" to Department of Justice's Regulation on Title III, 7/26/91) or UFAS (Uniform Federal Accessibility Standards-1988) if construction or an alteration on a governmental facility is to begin after the effective date of the Act - January 26, 1992.

Practically speaking, the UFAS Standards, which are the old military construction guidelines which have been codified, are better defined and more certain than the ADAAG Standards. Plus, the UFAS Standards do not differ greatly from the ANSI Standards [ANSI A117.1 American National Standard for Buildings and Facilities - Providing Accessibility and Usability for Physically Handicapped People - 1986], which the architects abided by in drafting the original plans for the Convention Center, whereas the ADAAG Standards do differ significantly from the ANSI Standards. In light of these considerations, I recommend that the construction team for the Mobile Convention Center abide by the UFAS guidelines and in my opinion that will more than cover compliance with the ADA.

Attached you will find copies of an "ADA - Title II - Public Entity Facilities Compliance Fact Sheet and Timetable", note the "self-evaluation" requirement. Please contact me if I can be of further assistance regarding this issue.

Yours truly,

C. J. Morrow-Fundin
Assistant City Attorney

Americans with Disabilities Act
Title II-Public Entity Facilities Compliance Fact Sheet

General Rule:
No qualified individual with a disability shall be discriminated against or excluded from participation in or the benefits of the services, programs, or activities of a public entity.

Program Accessibility:
No qualified individual with a disability shall, because of inaccessible or unusable facilities of a public entity, be excluded from participation in, or be denied the benefits of the services, programs, or activities of a public entity or be subject to discrimination by any public entity.

Limitations:
It is not required that a public entity take any action that it can demonstrate would constitute a fundamental alteration in the nature of the service, program or activity, or would cause an undue administrative or financial burden. Regardless of that, a public entity is required to take some action that would not trigger this limitation and ensure program accessibility.

Existing Facilities:
A public entity is required to make structural changes to existing facilities only when program accessibility is not feasible any other way (i.e.: reassignment of services to accessible building, or provision of auxiliary aids).

Although unable to protect a public entity from complaint or civil suit if programs are not readily accessible to and usable by persons with disabilities by Jan. 26, 1992, each public entity in the U.S. is required to complete a "self-evaluation" of its current policies and practices to identify any non-compliant policies or practices. (See the timetable for Title II facilities compliance on the other side of this sheet).

Where "structural changes" to existing facilities are the only way to arrive at program accessibility, a "transition plan" (only for public entities with 50 employees or more) outlining the steps necessary to complete the structural changes is required. Comments must be invited from disabled persons or organizations representing such individuals. The "transition plan" must be completed by July 26, 1992 and must include the identification of barriers (architectural and communication) to program accessibility, detailed methods for making the facilities accessible, a schedule for implementation and the official responsible for implementation.

New Construction:
All new facilities constructed by, on behalf of or for the use of a public entity shall be designed and constructed to be readily accessible to and usable by persons with disabilities if construction is started or if the invitation for bids is after Jan. 26, 1992.
Alterations:
Alterations to facilities of a public entity must also meet the "readily accessible" standard, to the maximum extent feasible.

Effective Date:
The effective date of this Title is Jan. 26, 1992.

Regulations and Standards:
The Department of Justice issued regulations on July 26, 1991 for all portions of Title II except those portions dealing with Public Transportation which have been issued by the Department of Transportation.

The regulations associated with Title II of the Act and printed in the Federal Register on July 26, 1991 state that compliance with the Uniform Federal Accessibility Standards (UFAS) or the ADAAG (without the

elevator exemption) shall satisfy the accessibility requirements of this Title for new and altered buildings and facilities. This publication also states that "departures from particular requirements of those standards by use of other methods shall be permitted when it is clearly evident that equivalent access to the facility or part of the facility is thereby provided."

Most facilities constructed or altered with Federal funds are presently required to comply with UFAS under the Architectural Barriers Act of 1968. Facilities constructed or altered by recipients of Federal financial assistance are presently required to comply with UFAS under Section 504 of the Rehabiliation Act of 1973.

Enforcement:
Those who believe themselves discriminated against may file a civil lawsuit in Federal District Court.

Individuals may file complaints with the designated Federal agencies concerning matters of Title II discrimination or contact the Department of Justice who will direct the complaints as required. The Federal agency specified in the regulations will then investigate the complaint (if made within 180 days of the alleged discrimination), attempt to resolve complaints on a voluntary compliance basis and then, if unsuccessful, refer case to the Department of Justice for civil suit.

Remedies are the same as available under Section 505 of the Rehabilitation Act of 1973. Courts may order an entity to make facilities accessible, provide auxiliary aids or services, modify policies, and pay attorneys' fees.

Notes: Unless stated otherwise, information presented above was taken from the Title II regulations published by the D.O.J. in the Federal Register July 26, 1991.

This is not legal advice. A competent lawyer should be consulted regarding any specific legal questions.

Americans with Disabilities Act

Title II-Public Entity Facilities Compliance Timetable

7-26-1990 Signing of the Americans with Disabilities Act of 1990 by President George Bush.

2-28-1991 Draft Regulations issued by the Department of Justice for implementing Title II.

4-29-1991 Final comments on draft regulations due at DOJ.

7-26-1991 Final regulations for implementing Title II published by the Department of Justice.

1-26-1992 Effective Date of Title II.

1.) Ensure that the operation of each service, program and activity is operating so that each, when viewed in its entirety, is readily accessible to and usable by individuals with disabilities. (35.150(a)

Even though the following required procedures will not shield a public entity from a discrimination complaint, they are mandatory if programs are not readily accessible to and usable by people with disabilities:

A. Begin self-evaluation process for those areas of services, policies and practices not previously evaluated (and on file) for section 504 of the Rehabilitation Act of 1973. (35.105)
B. Begin transition plan outlining structural changes required for program accessibility and proceed with structural changes, as required, to facilities "as expeditiously as possible". (35.150(e))

2.) New construction starting after this date must be readily accessible. (35.151(a))

3.) The altered portions of alterations beginning construction after this date must, to the maximum extent feasible, meet the "readily accessible to and usable by individuals with disabilities" standard set by the Uniform Federal Accessibility Standard or, at the public entity's option, the ADAAG. (35.151(b))

4.) Date a complaint or civil law suit may be filed by an individual based on ADA discrimination by a public entity.

7-26-1992 Transition plan complete where structural changes to facilities will be undertaken to provide program access. Transition plan must identify obstacles, describe in detail the methods that will be

used to make facilities accessible, specify the schedule for taking the steps identified and indicate the official responsible for implementation of the plan. (35.150(d))

1-26-1994 Self-evaluation complete. (35.105(a))

1-26-1995 Completion of last structural changes to facilities where such changes were undertaken for program accessibility.(35.150(c))

This is not legal advice. A competent lawyer should be consulted regarding any specific legal questions. Information presented above was taken from D.O.J. Regulation (28CFR Part 35) on Title II of ADA.

Mr. (b)(6)
XX
Stoneboro, Pennsylvania 16153

Dear Mr. (b)(6)

This is in response to your letter to our office concerning

the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you in understanding how the ADA may apply to you. However, this technical assistance does not constitute a determination by the Department of Justice of your rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

Title III of the ADA covers public accommodations and commercial facilities. The remedies available under title III depend upon the type of suit being brought. In a private suit, the available remedies are injunctive relief and attorney's fees, but not damages. If a suit is brought by the Department of Justice under title III, the remedies available are injunctive relief, damages to individuals, and civil penalties or fines. Title III of the ADA became effective on January 26, 1992, generally. New facilities for which construction began after January 26, 1992, for first occupancy after January 26, 1993, must be fully accessible.

Title II of the ADA, which covers State and local government entities, incorporates by reference the remedies, procedures, and rights set forth in section 505 of the Rehabilitation Act of 1973. The remedies authorized by section 505 include injunctions and damages in certain cases, but they do not include civil penalties. Title II of the ADA became effective on January 26, 1992.

cc: Records; CRS; Oneglia; Friedlander; Milton; FOIA; hb

01-00646

Title I of the ADA covers employment by all employers, other than the Federal government, with 15 or more employees. Title I becomes effective on July 26, 1992, for employers with 25 or more employees, and on July 26, 1994, for employers with 15-24 employees. For information on the remedies available under title I, you should contact the Equal Employment Opportunity

Commission, 1801 L Street, N.W., Washington, D.C. 20507, at (800) 669-EEOC.

A packet of materials on the ADA, including the ADA Accessibility Guidelines, is enclosed for your further information. Also enclosed is a copy of the Department of Justice's regulation for the coordination of nondiscrimination in federally assisted programs, which was issued pursuant to section 504 of the Rehabilitation Act of 1973. If you are interested in receiving additional information about the Rehabilitation Act of 1973, you should contact the Government Printing Office, Superintendent of Documents, Washington, D.C. 20402, at (202) 783-3238.

I hope this information has been helpful to you.

Sincerely,

Stewart B. Oneglia
Chief
Coordination and Review Section
Civil Rights Division

DJ 192-180-05606 April 24, 1992

Ms. Catherine Richter

San-Suz-Ed RV Park
Post Office Box 387
West Glacier, Montana 59936

Dear Ms. Richter:

This letter is in response to your correspondence regarding the application of the Americans with Disabilities Act (ADA) to ground surfaces that are required to be accessible. You appear to believe that you would Violate the ADA if you followed your county's requirements for gravel ground surfaces on a public roadway and in parking spaces in your RV park.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities with rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA accessibility standards. However, this technical assistance does not constitute a legal interpretation of the statute and it is not binding on the Department.

If you are a private entity operating a place of recreation that affects interstate commerce, you are a public accommodation subject to title III of the ADA and this Department's regulation, including its ADA Accessibility Guidelines. There are, however, no specific requirements under the ADA for public roads. Thus, the county's requirements for the public roadway would not be inconsistent with the ADA.

As for the parking spaces, the ADA Accessibility Guidelines require that the access aisle of the accessible parking space be "stable, firm, slip-resistant." It is true that gravel is generally not considered to be a complying ground surface for new construction or alterations. However, because your project was undertaken before the effective date of the ADA, you should apply the ADA requirements for existing facilities, not new construction or alterations.

In existing facilities, a public accommodation must remove barriers when it is "readily achievable" to do so. "Readily achievable" means easily accomplishable and able to be carried out without much difficulty or expense. If you determine that it is readily achievable to add pavement or other suitable binder treatment to the surfaces of the access aisles of certain of your parking spaces to provide accessibility, you would be complying with the barrier removal requirements of the ADA. It is likely that such action regarding the parking spaces would be permitted by the county regulations.

I am enclosing a copy of the regulations and a copy of the title III Technical Assistance Manual prepared by the Department of Justice. I hope this information is useful to you in complying with the ADA.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

Enclosures (2)

CARING FOR THE HANDICAPPED and obeying the State and Federal Accessibility Law brings guilty verdict to the Richter's of the San-Suz-Ed Trailer & R.V. Park.

ATTENTION HANDICAPPED - DISABLED
& SENIOR CITIZENS

We want you to know - Howard Gipe DID NOT speak up on your behalf! Sharon Stratton DID NOT speak up on your behalf ! Mary Atkins DID NOT speak up on your behalf! Your County Planning Board, Mr. Herbaly and Mr. Greer, who are in charge of this department, DID NOT speak or ACT IN YOUR BEHALF!

These people and our politicians have not paid any attention to the Federal and State Laws. These people are DEGRADING our campgrounds by wanting to use OIL AND/OR THREE-QUARTER INCH ROCKS for you to walk on and try to get around in your wheelchairs.

"This information will help you to comply with the new Accessibility Laws:"

- Public accommodations such as restaurants, hotels, theaters, doctors' offices, pharmacies, retail stores, museums, libraries, parks, private schools, and day care centers, may not discriminate against individuals with disabilities.

- Physical barriers in existing facilities must be removed, if removal is readily achievable. If not, alternative methods of providing the services must be offered, if they are readily achievable.

- All new constructions and alterations of facilities must be accessible.

- Auxiliary aids and services must be provided to individuals with vision or hearing impairments or other individuals with disabilities unless an undue burden would result.

- Complaints can be filed with the Attorney General, who may file lawsuits to stop discrimination and obtain money damages and penalties.

This information was sent to the San-Suz-Ed by their wheelchair people that come every year and by Michael J. Regnier, Advocacy Coordinator of the Summit Independent Living Center Inc.

The San-Suz-Ed has been using these hard packed, clean, gravel spaces since 1968 and all electric wheelchairs can travel all over the campground with no assistance from others. They DO NOT track oil into their 80 to 800 thousand dollar homes on wheels. Oil and/or 3/4" rocks are degrading.

Montana STATE LAW says all roads must be well drained and graded.

(Handwritten letter) March 30 -

Hello from Beautiful Western Montana

I was told to send you this information I went to our county commissioner they did not care our judge could care less and the state attorney general said sorry and so I sent it to the Attorney General's Office in D.C. and I was able to get them on the phone and they said they received my information and would call me back in a week probably on Tuesday. Well I also turned Justice of the Peace Stewart (word illegible) in to the judicial committee and have not heard from them yet, to see how they are go(illegible) to vote on this.

We have to know soon as we are getting reservations and need to know if we can use these spaces as they are.

We started our camp in 1964 so we do know what it is all about and we are proud of our camp. We have gravel, "lots", of it, and it is the kind that wheel chairs can get around in. 3/4" rock gravel is not what we need. Oil is supposed to settle the dust. Well if and when we have dust we sprinkle it with water (illegible) we water our grass, natural flowers, & (illegible) this is clean and no (illegible) get

---

upset with water but oil don't (illegible) it to our tourist campers, the word passes fast and the campers would just go by. So will our business We have a very short season and we don't want to go into bankruptcy over this.

Hope to hear from you soon. I can get the D.C. Attorney General office on the phone or by mail.

Thanks
Catherine Richter

DJ 182-06-00043 APR 24 1992

Mr. Charles E. Scharbrough, AIA, CSI
Project Architect
Paul I. Cripe, Inc.
7172 Graham Road
Indianapolis, Indiana 46250

Dear Mr. Scharbrough:

This responds to your request for an interpretation of the Americans with Disabilities Act (ADA) as applied to office buildings.

The ADA authorizes the Department to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you in understanding how the ADA may apply to you. However, this technical assistance does not constitute a determination by the Department of Justice of your rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

Title III of the ADA establishes specific requirements for "places of public accommodation," which are facilities whose operations affect commerce and fall into one or more of twelve specified categories including restaurants, sales or rental establishments, and service establishments. "Commercial facilities" are facilities that are intended for nonresidential use and whose operations affect commerce. Commercial facilities that do not fall into one or more of the listed categories of places of public accommodation are only subject to the requirements of title III for new construction and alterations (subpart D of the Department's regulation implementing title III).

The requirements for removal of barriers in existing facilities apply to facilities that are "places of public

accommodation" (including common areas serving a place of public accommodation), whether or not those facilities are also included in the definition of "commercial facility." Thus, those areas of

cc: Records Chrono Files Oneglia Wodatch Kaltenborn
FOIA Breen
01-00654

an office building that are places of public accommodation are subject to the barrier removal requirement as well as the other requirements of title III for places of public accommodation. Areas of an office building that are not places of public accommodation are only subject to the requirements for commercial facilities.

We hope that this information is helpful.

Sincerely,

Stewart B. Oneglia

Washington, DC 20530

RE: Question on 28 CFR Part 36
Commercial Facilities Definition

Dear Ms. Drake:
Can you be more specific about the definition of Commercial Facilities, specifically as it regards Office Buildings? Office buildings are defined as commercial facilities in the middle of the third column of page 35547 of the Federal Register. On page 35551, however, places of public accommodation are defined to include sales and/or service establishments. We have not yet found an office building where sales and/or service do not take place. Is there an intent in the law concerning the "extent" to which sales and/or service take place?

If a building qualifies as an office building, and does not house any of the specific places of public accommodation itemized in 36.104, is it then a commercial facility? Is the type of sales and service done in an office building recognized as inherently different? Why were "office buildings" included in the category of "commercial facilities".

We, Paul I. Cripe, Inc. offer architectural services. Our clients want to know the answers to the above questions so they will know if the requirements for removal of barriers in existing facilities apply to them.

Thank you for your consideration.

Sincerely,
PAUL I. CRIPE, INC.

DEC 10 1991

(inserted in three columns)
from physical impairments, or other sexual behavior disorders;

(ii) Compulsive gambling, kleptomania, or pyromania; or

(iii) Psychoactive substance use disorders resulting from current illegal use of drugs.

Drug means a controlled substance, as defined in schedules I through V of section 202 of the Controlled Substances Act (21 U.S.C. 812).

Facility means all or any portion of buildings, structures, sites, complexes, equipment, rolling stock or other conveyances, roads, walks, passageways, parking lots, or other real or personal property, including the site where the building, property, structure, or equipment is located.

Illegal use of drugs means the use of one or more drugs, the possession or distribution of which is unlawful under the Controlled Substances Act (21 U.S.C. 812). The term "illegal use of drugs" does not include the use of a drug taken under supervision by a licensed health care professional, or other uses authorized by the Controlled Substances Act or other provisions of Federal law.

Individual with a disability means a person who has a disability. The term "individual with a disability" does not include an individual who is currently engaging in the illegal use of drugs, when the private entity acts on the basis of such use.

Place of public accommodation means a facility, operated by a private entity, whose operations affect commerce and fall within at least one of the following

categories-

(1) An inn, hotel, motel, or other place of lodging, except for an establishment located within a building that contains not more than five rooms for rent or hire and that is actually occupied by the proprietor of the establishment as the residence of the proprietor;

(2) A restaurant, bar, or other establishment serving food or drink;

(3) A motion picture house, theater, concert hall, stadium, or other place of exhibition or entertainment.

(4) An auditorium, convention center, lecture hall, or other place of public gathering;

(5) A bakery, grocery store, clothing store, hardware store, shopping center, or other sales or rental establishment;

(6) A laundromat, dry-cleaner, bank, barber shop, beauty shop, travel service, shoe repair service, funeral parlor, gas station, office of an accountant or lawyer, pharmacy, insurance office, professional office of a health care provider, hospital, or other service establishment;

(7) A terminal, depot, or other station used for specified public transportation;

(8) A museum, library, gallery, or other place of public display or collection;

(9) A park, zoo, amusement park, or other place of recreation;

(10) A nursery, elementary, secondary, undergraduate, or postgraduate private school, or other place of education;

(11) A day care center, senior citizen center, homeless shelter, food bank, adoption agency, or other social service center establishment; and

(12) A gymnasium, health spa, bowling alley, golf course, or other place of exercise or recreation.

Private club means a private club or establishment exempted from coverage under title II of the Civil Rights Act of 1964 (42 U.S.C. 2000a(e)).

Private entity means a person or entity other than a public entity.

Public accommodation means a private entity that owns, leases (or leases to), or operates a place of public accommodation.

Public entity means-

(1) Any State or local government;

(2) Any department, agency, special purpose district, or other instrumentality of a State or States or local government; and

(3) The National Railroad Passenger Corporation, and any commuter authority (as defined in section 103(8) of the Rail Passenger Service Act). (45 U.S.C. 541)

Qualified interpreter means an interpreter who is able to interpret effectively, accurately and impartially both receptively and expressively, using any necessary specialized vocabulary.

Readily achievable means easily accomplishable and able to be carried out without much difficulty or expense. In determining whether an action is readily achievable factors to be considered include--

(1) The nature and cost of the action needed under this part;

(2) The overall financial resources of the site or sites involved in the action; the number of persons employed at the site; the effect on expenses and resources; legitimate safety requirements that are necessary for safe operation, including crime prevention measures; or the impact otherwise of the action upon the operation of the site;

(3) The geographic separateness, and the administrative or fiscal relationship of the site or sites in question to any parent corporation or entity;

(4) If applicable, the overall financial resources of any parent corporation or entity; the overall size of the parent corporation or entity with respect to the number of its employees; the number,

type, and location of its facilities; and

(5) If applicable, the type of operation or operations of any parent corporation or entity, including the composition, structure, and functions of the workforce of the parent corporation or entity.

Religious entity means a religious organization, including a place of worship.

Service animal means any guide dog, signal dog, or other animal individually trained to do work or perform tasks for the benefit of an individual with a disability, including, but not limited to, guiding individuals with impaired vision, alerting individuals with impaired hearing to intruders or sounds, providing minimal protection or rescue work, pulling a wheelchair, or fetching dropped items.

Specified public transportation means transportation by bus, rail, or any other conveyance (other than by aircraft) that provides the general public with general or special service (including charter service) on a regular and continuing basis.

State means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, the Trust Territory of the Pacific Islands, and the Commonwealth of the Northern Mariana Islands.

Undue burden means significant difficulty or expense. In determining whether an action would result in an undue burden, factors to be considered include--

(1) The nature and cost of the action needed under this part;

(2) The overall financial resources of the site or sites involved in the action; the number of persons employed at the site; the effect on expenses and resources; legitimate safety requirements that are necessary for safe

operation, including crime prevention measures; or the impact otherwise of the action upon the operation of the site;

(3) The geographic separateness, and the administrative or fiscal relationship of the site or sites in question to any parent corporation or entity;

(4) If applicable, the overall financial resources of any parent corporation or entity; the overall size of the parent corporation or entity with respect to the number of its employees; the number, type, and location of its facilities; and

(5) If applicable, the type of operation or operations of any parent corporation or entity, including the composition, structure, and functions of the workforce of the parent corporation or entity.

required to meet the "program accessibility" standard in order to comply with section 504, but would not be in violation of the ADA unless it failed to make "readily achievable" modifications. On the other hand, an entity covered by the ADA is required to make "readily achievable" modifications, even if the program can be made accessible without any architectural modifications. Thus, an entity covered by both section 504 and title III of the ADA must meet both the "program accessibility" requirement and the "readily achievable" requirement.

Paragraph (b) makes explicit that the rule does not affect the obligation of recipients of Federal financial assistance to comply with the requirements imposed under section 504 of the Rehabilitation Act of 1973.

Paragraph (c) makes clear that Congress did not intend to displace any of the rights or remedies provided by other Federal laws or other State or local laws (including State common law)

that provide greater or equal protection to individuals with disabilities. A plaintiff may choose to pursue claims under a State law that does not confer greater substantive rights, or even confers fewer substantive rights, if the alleged violation is protected under the alternative law and the remedies are greater. For example, assume that a person with a physical disability seeks damages under a State law that allows compensatory and punitive damages for discrimination on the basis of physical disability, but does not allow them on the basis of mental disability. In that situation, the State law would provide narrower coverage, by excluding mental disabilities, but broader remedies, and an individual covered by both laws could choose to bring an action under both laws. Moreover, State tort claims confer greater remedies and are not preempted by the ADA. A plaintiff may join a State tort claim to a case brought under the ADA. In such a case, the plaintiff must, of course, prove all the elements of the State tort claim in order to prevail under that cause of action.

A commenter had concerns about privacy requirements for banking transactions using telephone relay services. Title IV of the Act provides adequate protections for ensuring the confidentiality of communications using the relay services. This issue is more appropriately addressed by the Federal Communications Commission in its regulation implementing title IV of the Act.

Section 36.104 Definitions

"Act." The word "Act" is used in the regulation to refer to the Americans with Disabilities Act of 1990, Pub. L. 101-336, which is also referred to as the "ADA."

"Commerce." The definition of "commerce" is identical to the statutory definition provided in section 301(1) of the ADA. It means travel, trade, traffic,

commerce, transportation, or communication among the several States, between any foreign country or any territory or possession and any State, or between points in the same State but through another State or foreign country. Commerce is defined in the same manner as in title II of the Civil Rights Act of 1964, which prohibits racial discrimination in public accommodations.

The term "commerce" is used in the definition of "place of public accommodation." According to that definition, one of the criteria that an entity must meet before it can be considered a place of public accommodation is that its operations affect commerce. The term "commerce" is similarly used in the definition of "commercial facility."

The use of the phrase "operations affect commerce" applies the full scope of coverage of the Commerce Clause of the Constitution in enforcing the ADA.

The Constitution gives Congress broad authority to regulate interstate commerce, including the activities of local business enterprises (e.g., a physician's office, a neighborhood restaurant, a laundromat, or a bakery) that affect interstate commerce through the purchase or sale of products manufactured in other States, or by providing services to individuals from other States. Because of the integrated nature of the national economy, the ADA and this final rule will have extremely broad application.

"Commercial facilities" are those facilities that are intended for nonresidential use by a private entity and whose operations affect commerce. As explained under S 36.401, "New construction," the new construction and alteration requirements of subpart D of the rule apply to all commercial facilities, whether or not they are places

of public accommodation. Those commercial facilities that are not places of public accommodation are not subject to the requirements of subparts B and C (e.g., those requirements concerning auxiliary aids and general nondiscrimination provisions).

Congress recognized that the employees within commercial facilities would generally be protected under title I (employment) of the Act. However, as the House Committee on Education and Labor pointed out, "[t]o the extent that new facilities are built in a manner that make[s] them accessible to all individuals, including potential employees, there will be less of a need for individual employers to engage in reasonable accommodations for particular employees." H.R. Rep. No. 485, 101st Cong., 2d Sess., pt. 2, at 117 (1990) [hereinafter "Education and Labor report"]. While employers of fewer than 15 employees are not covered by title I's employment discrimination provisions, there is no such limitation with respect to new construction covered under title III. Congress chose not to so limit the new construction provisions because of its desire for a uniform requirement of accessibility in new construction, because accessibility can be accomplished easily in the design and construction stage, and because future expansion of a business or sale or lease of the property to a larger employer or to a business that is a place of public accommodation is always a possibility.

The term "commercial facilities" is not intended to be defined by dictionary or common industry definitions. Included in this category are factories, warehouses, office buildings, and other buildings in which employment may occur. The phrase, "whose operations affect commerce," is to be read broadly, to include all types of activities reached under the commerce clause of the

Constitution.

Privately operated airports are also included in the category of commercial facilities. They are not, however, places of public accommodation because they are not terminals used for "specified public transportation." (Transportation by aircraft is specifically excluded from the statutory definition of "specified public transportation.") Thus, privately operated airports are subject to the new construction and alteration requirements of this rule (subpart D) but not to subparts B and C. (Airports operated by public entities are covered by title II of the Act.) Places of public accommodation located within airports, such as restaurants, shops, lounges, or conference centers, however, are covered by subparts B and C of this part.

The statute's definition of "commercial facilities" specifically includes only facilities "that are intended for nonresidential use" and specifically exempts those facilities that are covered or expressly exempted from coverage under the Fair Housing Act of 1968, as amended (42 U.S.C. 3601-3631). The interplay between the Fair Housing Act and the ADA with respect to those facilities that are "places of public accommodation" was the subject of many comments and is addressed in the

Austin, Texas 78704

Dear Ms. X

This letter is in response to your inquiry concerning a list of addresses and telephone numbers to be used in contacting the agencies designated to receive complaints under title II of the Americans with Disabilities Act (ADA). In addition, you have asked whether there are regional offices of the Department of Justice designated to address title II issues.

With respect to your last question, there are no regional offices of the Department of Justice designated to respond to title II complaints.

The list of agency addresses and phone numbers is as follows:

Department of Agriculture: Complaints Adjudication Division, Office of Advocacy and Enterprise, Room 1353 - South Building, Department of Agriculture, 14th & Independence Avenue, S.W. ,Washington, D.C. 20250; Telephone: (202) 720-5681 (Voice); (202) 720-7327 (TDD);

Department of Education: Office for Civil Rights, Department of Education, 330 C Street, S.W., Suite 5000, Washington, D.C. 20202; Telephone: (202) 732-1637 (Voice); (202) 732-1673 (TDD) ;

Department of Health and Human Services: Office of Civil Rights, Department of Health & Human Services, 330 Independence Avenue, S.W. , Washington, D.C. 20201; Telephone: . (202) 619-0553 (Voice) ; (800) 537-7697 (TDD) , (202) 863-0101 (TDD-for 202 area code);

Department of Housing and Urban Development: Assistant Secretary for Fair Housing and Equal Opportunity, Department of Housing and Urban Development, 451 7th Street, S.W., Room 5100, Washington, D.C. 20410; Telephone: (800) 669-9777 (Voice) ; (800) 927-9275 (TDD);

Department of the Interior: Office for Equal Opportunity, Office of the Secretary, Department of Interior, 18th & C Streets, N.W., Washington, D.C. 20547; Telephone: (202) 208-4015 (Voice); (202) 208-4817 (TDD) ;

Department of Justice: Coordination and Review Section, P.O. Box 66118, Civil Rights Division, U.S. Department of Justice, Washington, D.C. 20035-6118; Telephone: (202) 514-0301 (Voice) ; (202) 514-0381, 0383 (TDD) ;

Department of Labor: Directorate of Civil Rights, Department of Labor, 200 Constitution Avenue, N.W., Room N-4123, Washington, D.C., 20210; Telephone: (202) 523-8927 (Voice); (202) 523-8927 (TDD) ;

Department of Transportation: Office for Civil Rights, Office of the Secretary, Department of Transportation, 400 Seventh Street, S.W. , Room 10215, Washington, D.C. 20590; Telephone: (202) 366-4754 (Voice) ; (202) 755-7687 (TDD).

I hope you find this information of assistance.

Sincerely,

Stewart B. Oneglia
Chief

Civil Rights Division

APR 29 1992

DJ 181-06-0010
Mr. Walter Laroque
Laroque Consulting/Training, Inc.

2640 Canal Street
Suite 304 - Third Floor
New Orleans, Louisiana 70119-6410

Dear Mr. Laroque:

This responds to your letter to Barbara Drake, Stewart Oneglia, and John Wodatch. Your request for written materials has been referred to our publications unit.

Although Federal Executive agencies are not covered by the Americans with Disabilities Act (ADA), they are covered by sections 501 and 504 of the Rehabilitation Act of 1973, as amended, 29 U.S.C. SS791 and 794. Because section 504 served as the model for the requirements of the ADA, the requirements for Executive agencies are substantially the same as the requirements for private employers under the ADA. The Federal judiciary, however is covered by neither the ADA nor the Rehabilitation Act.

Section 304 of the ADA prohibits discrimination on the basis of disability in the provision of transportation services to the general public by bus, rail, or any other conveyance on a regular and continuing basis by any private entity that is primarily engaged in the business of transporting people and whose operations affect commerce. This requirement would include taxi services.

Your questions concerning the employment requirements of title I should be addressed to the Equal Employment Opportunity Commission. We note, however, that there is no requirement for development of a strategic plan or conducting of training seminars.

Section 310 of the ADA was intended to defer the effective date of title III for small businesses. The regulation is taken directly from the statute and provides that, except for any civil action brought for a violation of section 303 of the Act, no civil action shall be brought for any act or omission described in section 302 of the Act that occurs-

cc: Records, CRS, Kaltenborn, Friedlander, Craig, FOIA:dhj
udd:Kaltenborn:Laroque
01-00661

(1) Before July 26, 1992, against businesses with 25 or fewer employees and gross receipts of $1,000,000 or less.

(2) Before January 26, 1993, against businesses with 10 or fewer employees and gross receipts of $500,000 or less.

The effective date for public accommodations not covered by this provision is January 26, 1992. All public accommodations are fully covered, and subject to suit, after January 26, 1993.

I hope this information is helpful.

Sincerely,

Stewart B. Oneglia
Chief
Coordination and Review Section
Civil Rights Division

01-00662

Friday - 16 August 1991
THIS LETTER IS INDIVIDUALLY ADDRESSED, AND SEPARATELY MAILED, TO EACH OF THE THREE PEOPLE SHOWN BELOW AS THE ADDRESSEES

Ms. Barbara S. Drake
Deputy Assistant Attorney General - Civil Rights Division - U. S. Department of Justice
Washington, DC 20530

Mr. Stewart B. Oneglia - Chief
Coordination and Review Section - Civil Rights Division
U. S. Department of Justice
Washington, DC 20530

Mr. John L. Wodatch - Director - Office on the Americans With Disabilities - Civil Rights Division - U.S. Department of Justice
Washington, DC 20530

Dear Ms. Drake and Messrs. Oneglia and Wodatch:

We have been "commissioned", by the CHAMBER/New Orleans and the River Region (ie: the New Orleans Chamber of Commerce) to write, and conduct, public training seminars, for businesses, employers, and others, affected by the provisions of PL 101-336 - AMERICANS WITH DISABILITIES ACT OF 1990 (short title: ADA). That Chamber's membership is found in the 7 Civil Parishes (ie: Counties in other States) of: Jefferson, Orleans, Plaquemines, St. Bernard, St. Charles, St. James and St. John the Baptist.

We come to you to request you factually/legally assist our effort. We ask that you send us certain written materials. We ask you for certain legal and/or other clarifications. Please help us in these specific areas:

WRITTEN MATERIALS (Affecting TITLES II, III and IV only): Copies of: (a) final rules and interpretive appendices, in LARGE PRINT - (b) - compliance manuals - (c) - policy guidances - (d) - any other written pieces re: USDJ's approach to the implementation of the ADA and the enforcement of its legal and regulatory requirements and (e) parts of compliance manuals, now completed, even though the total manuals are not now available.

LEGAL AND/OTHER DEFINITIVE INTERPRETATIONS (Re: TITLES II, III and IV, except for Request One below):

Request One: (Re: TITLE I) - Act's Coverage: TITLE I - EMPLOYMENT SEC. 101. DEFINITIONS (5) EMPLOYER (B) EXCEPTIONS (i) - says: "The term 'employer' does not include - (i) the United States, a corporation wholly owned by the government of the United States ***. OUR QUESTION: Does this mean that the Executive and Judicial Branches of the Federal Government, and the Federal Agencies, under these two Branches, are exempt (as employers) from the provisions of the Act (PL 101 336)? We note that Section 509 of TITLE Vof that

Act says: the ADA covers Congress and Senate (the Legislative Branch) and certain agencies of that Branch.

Request Two:
Possible Contradiction: Section 506 (PL 101 336) - TECHNICAL ASSISTANCE (c) IMPLEMENTATION - (3) TECHNICAL ASSISTANCE MANUALS says: "Each Federal agency that has responsibility *** shall ***ensure the availability and provision of technical assistance manuals to individuals or entities with rights or duties under this Act ***." Then, in (e) further down, in the Act, it says: "***shall not be excused from compliance with the requirements of this Act because of any
failure to receive technical assistance under this section, including any failure in the development or dissemination of any technical assistance manual authorized by this section." To us this sounds unfairly punitive and contradic-
01-00663

tory since, in one place it says: "ensure availability and provision" and then later, no excuse: "because of any failure ***including any failure in the development, etc."

Request Three:
Taxis: Buses, and trains, as forms of public transportation are mentioned in the Act. OUR QUESTION: Are taxis, as a mode of public transportation, exempt from coverage under the ADA?

Request Four:
We read a newspaper news article. It said that ADA-covered employers will be required to: (A) - prepare a STRATEGIC PLAN and (B) - conduct educational training seminars re: TITLES I, II, III and IV, for their staffs. Are these two things so? We did not find these two requirements mentioned anywhere in the ADA (PL 101 336).

Request Five:
If a STRATEGIC PLAN is a legal and/or regulatory requirement of employers, please send us (a) - a model or format for one of these PLANS and/or (b) - a statement of the content, needed, in one of these PLANS, which would fully satisfy the requirements for an acceptable STRATEGIC PLAN, if this type PLAN, indeed, will be required. And,

Request Six:
We are probably reading it incorrectly. We are probably missing the point. We are sure you can correct our reading. We are certain you can help us see the point. Such help, in interpretation, on your part, is hereby requested.
Situation: It concerns a piece prepared by Erica Jones (possibly associated with: President's Committee on Employment of People With Disabilities). This is excerpted from it:

Why this seemingly (at least to us) unnecessary language? It refers to TITLE III(A). We opine: if a Company has (a) - 2 employees, then those 2 are: "***(25)or less employees" and (b) - revenue of $100, then those $100 are: "***$1 million or less". And, what happens to a Company with 26 employees and $1,000,001 in revenue? Are they not covered?

NEW SUBJECTS:
NS#1: We wish to be active in the promotion, advancement and educational/training aspects of the ADA.

(COPY OF PIECE OF PAPER ON PAGE) A. Public accommodations (all business and service providers - January 26, 1992, for businesses with twenty-five (25) or less employees and revenue $1 million or less; January 26, 1993, for

businesses with ten (10) or less employees and revenue $500,000 or less.

Section 506 (d) (1) and (2) refer (at least in our opinion, they seem to) to the need, for people, like us (ie: LAROQUE CONSULTING/TRAINING, Inc.) to assist in effectuation of the intents and purposes of the AMERICANS WITH DISABILITIES ACT.

OUR QUESTION: To whom can we go to get information in this matter of assistance in effectuation of the intents and purposes of the ADA?

NS#2: Please send us: (1) regulations implementing Section 504 of the Rehabilitaation Act of 1973, transferred to your Department, in 1980 by Executive Order 12250 (2) a copy of EO 12250 (3) the Federal Register of 26 July 1991 Part II - Architectural and Transportation Barriers Compliance Board and (4) the Regulatory Flexibility Act and the Paper Work Reduction Act.

Thanks for your assistance in fulfilling the requests, made in this letter.
And, we reiterate our interest: to have our seminars be: accurate - correct factual - legal in their
01-00664

subject content!

Ms. Drake and Messrs. Oneglia and Wodatch, we have attached, to this letter, a copy of one we wrote, on 26 July 1991. It is sent to you with the hope that it will be, to you, or others, useful, in addition, we would also hope, to being merely informative.

SICUT PATRIBUS, SIT DEUS NOBIS!

(picture)

Sincerely,

Walter Laroque

New Orleans, Louisiana 70119-6410
(504) 827-8601

Friday - 26 July 1991

WHILE THIS LETTER APPEARS TO BE JOINTLY ADDRESSED - IT IS, IN FACT, INDIVIDUALLY ADDRESSED, TO EACH OF THE TWO SEPARATE ADDRESSEES, AND IT IS INDIVIDUALLY MAILED TO THEM.

Mr. Charles L.Gambel, Jr.
President
GENERAL HEATING AND AIR CONDITIONING
3500 Monticello Avenue
New Orleans, LA 70118

Mr. Conrad Meyer IV
Attorney at Law
BALDWIN AND HASPEL LAW OFFICES
2200 Energy Centre
New Orleans, LA 70163-2200

Dear Messrs. Gambel and Meyer:

The Latin Scholar is wont to say: VERBUM SAT SAPIENTI! Or, as we, in the practical world of commerce always exclaim: Let a Word to the Wise be Sufficient!

In June, I made a promise to both of you. This is an interim/status report in the matter.

The monthly Meeting of the CHAMBER/New Orleans and the River Region, convened on: 13 June 1991

During that Meeting I made a brief statement. It was to this effect: The 1990 AMERICANS WITH DISABILITIES ACT - Public Law 101-336, signed into law on 26 July 1990, is fraught with peril for those affected companies and organizations who ignore, or, are ignorant of, its legal provisions, and the rules and regulations to enforce its effect.

I mentioned that our Company was planning, in our private practice, to prepare a training program to cover its legal requirements upon companies/organizations affected by it.

And, the design of the program, to be how our clients, and others interested, and hiring us, can be shown how to comply with the law, and thus avoid the costly penalties, and legal actions, coming from their viola-

tions - purposeful or not!

You both showed interest in my comments made to the CHAMBER's Board. Then each of you asked us to send you a copy of our training program.

I promised to fill your request. And, when the training program is complete and published, I shall do so. In the meantime here are some important informative

Dick Thornburgh, U.S. Attorney General, says, "The Americans with Disabilities Act gives civil rights protection to individuals with disabilities similar to those provided to individuals on the basis of race, sex, national origin and religion ... Fair, swift and effective enforcement of this landmark civil rights. legislation is a high priority of the Department of Justice." The Justice Department will file lawsuits on behalf of disabled individuals, with businesses incurring their own legal expenses. The purpose of these lawsuits will be to stop discrimination and to seek monetary damages and penalties for the disabled individual.

The real impact of the public accommodations section is that it requires everyone doing business with the public to serve the disabled just as they serve anyone else. The Department of Justice considers expenses associated

Educational training seminars must be held to educate staff on both public accommodation and employment. Searching for loopholes or window-dressing actions w ill not pass muster as a good-faith effort. Anything less than a sincere attempt to conform may result in monetary damages, penalties and a shocking backlash of negative publicity. If an organization does not understand this legislation, that organization has a cause for legitimate concern.

From his wheelchair, EEOC Chairman Evan Kemp Jr., a top law school graduate from the University of Virginia and a former employee of the Ralph Nader-sponsored Disability Rights Center, intends to attack

disability discrimination in the workplace. His enforcement will include scrutiny of the subtle discrimination in training, promotions, assignments and reward structures. His concerns are not limited to entry-level employees, but also encompass discrimination that keeps the disabled out of executive suites.
01-00666

(in the broadest - non-detailed sense) highlights re: THE 1990 ADA:
CHAMBER'S REQUEST OF US: Mr. Ronnie Robert is Chairman of the Executive Committee of the CHAMBER's SMALL BUSINESS COUNCIL. He has requested us to consider giving training to Member companies/organizations of the CHAMBER. We have answered "Yes" to his request.

MEANS OF DELIVERING PROGRAM WITHIN THE CHAMBER: We envision three possible ways to present our material, to suffice the CHAMBER's needs: (1) - To the Board, and anyone else it chooses and invites to hear our presentation (2) - The CHAMBER's monthly evening program: "BUSINESS AFTER HOURS - 60-MINUTE SUBJECT PRESENTATION" and (3) - "CHAMBER SPOTLIGHT" - a radio show. Or, any other program delivery means the CHAMBER may decide.

STRATEGIC PLAN AND EDUCATIONAL TRAINING: The Act requires a company or organization to prepare a STRAGETIC PLAN. And, to conduct Educational Training Seminars to educate their staffs re: the Employment and Public Accommodations Titles of the Act.

SPECIFIC AREAS OF THE ACT'S COVERAGE: The Act consists of five TITLES. These are: (I) - Employment (II) - Public Services (State and Local Governments - including transportation) (III) - Public Accommodations (operated by private companies/organizations) (IV) - Telecommunications and (V) - Miscellaneous (the Act's relationship to other laws). It is our belief that the most generally applicable provisions most widespread in their affect upon businesses and organizations will be TITLES: I - II and III.

EFFECTIVE DATES: Several. 26 July 1992 for Title I. 26 January 1992 for Titles II and III. 26 July 1993 for Title IV. And, Title V's effective date is contingent upon actions outcoming from application/enforcement of the other Titles.
FEDERAL ENFORCEMENT AGENCIES: Title I's enforcement has been assigned to the EQUAL EMPLOYMENT OPPORTUNITY COMMISSION. The JUSTICE DEPARTMENT, broadly, will enforce the remaining Titles.

REMEDIES AND PENALTIES: Private rights of action. Injunctive relief. Job reinstatement. Back pay. Equal Employment Opportunity Commission enforcement. Damages, in certain cases. Civil penalties. Compensatory damages. And, relief generally available through the Federal Communications Commission.

LEGAL FEES: The Department of Justice will file lawsuits on behalf of disabled individuals. Business and organizations will incur and pay their own legal costs.

BUSINESSES/ORGANIZATIONS AFFECTED BY THE ADA - 1990: Title I:Companies/organizations employing 25 plus employees working on 26 July 1992. Then, on 26 July

1994, the 25 drops to 15. A Part of Title III: Companies/organizations (all business and service providers) on 26 January 1992, with 25 or less employees and $1,000,000, or less, in revenue. Then, on 26 January 1993, this criterion changes to 10 or less employees, and revenue of $500,000 or less.

ACT-COVERAGE EXEMPTIONS: Section 307 (Affecting: Title III - Public Accommodations) of the Act exempts from coverage: (a) - private clubs (b) - establishments previously exempted under Title VII of the Civil Rights Act of 1964 and (c) religious organizations or entities controlled by religious organizations. Places of worship are included under the exemption. Re: (c) - religion: A catch!: Not applicable if Federal funding is accepted. EXAMPLE: The Society of Jesus - the Jesuits, operate New York's Fordham University. If that University gets any kind of Federal funding, the exemption, then, does not apply.
UNDER THE ACT - WHAT IS A DISABILITY: It can be from "A" to "V". AIDS to Visual Disability and beyond. The definition is all-inclusive. Example: While it does not include illegal users of alcohol and/or drugs, it does not permit discrimination vs. those no longer illegally using drugs/alcohol, but who are undergoing rehabilitation and treatment or those who have successfully completed such. Disability is not a consideration if the disabled person can perform the essential functions of the job. The disability becomes a consideration when: there is a "direct threat". This means: a significant risk to the
01-00667

health or safety of others which cannot be eliminated by reasonable accommodation.

AFFIRMATIVE ACTION: Not, at this time, generally required under the ADA. However, Federal funding again comes into play here. Also, performance of "Agency Services" for the Federal Government. In the instances of acceptance of Federal funds and performing "Agency Services", then Affirmative Action becomes a requirement. Example of "Agency Services": A bank, selling and redeeming U. S. Savings Bonds.

EQUAL EMPLOYMENT OPPORTUNITY: For all intents and purposes, disabled persons will join others in the Title VII (Civil Rights Act of 1964) Protected Classes (eg: blacks, women et al). Equal Employment Opportunity is not only hiring. It is training, promotions, assignments, re-assignments, rewards, and other employment benefits, rules, regulations, etc. affecting employees. These must be administered without discrimination.
Messrs. Gambel and Meyer - VERBATIM ET LITTERATIM!
Sincerely,
Walter Laroque

DJ 202-PL-00106

APR 29 1992

The Honorable Trent Lott
United States Senate
487 Russell Senate Office Building
Washington, D.C. 20510-2403

Dear Senator Lott:

This is in response to your recent letter on behalf of your constituent, Carter Bise. Mr. Bise has asked about the application of title III of the Americans with Disabilities Act of 1990 (ADA) to the operation of the professional office of a health care provider.

The ADA authorizes the Department to provide technical assistance to individuals and entities that have rights or responsibilities under the Act. This letter provides informal guidance to assist Mr. Bise in understanding the ADA and the Department's regulation. However, this technical assistance does not constitute a determination by the Department of Justice of the rights or responsibilities of the physicians represented by Mr. Bise under the ADA, and it is not binding on the Department of Justice.

The professional office of a health care provider is a place of public accommodation subject to title III of the ADA. Title III applies to any private entity that owns, operates, leases, or leases to a place of public accommodation. Coverage under title III is not determined by the size of a business or the number of people it employs. However, except for litigation initiated to enforce the new construction or alterations requirements of title III, no civil action alleging discrimination on the basis of disability can be brought against businesses with 25 or fewer employees and gross receipts of $1,000,000 or less before July

26, 1992; or against businesses with 10 or fewer employees and gross receipts of $500,000 or less before January 26, 1993.

cc: Records; Chrono; Wodatch; Breen; Blizard; Arthur; McDowney,
Friedlander:udd:jonessandra:ada.interpretation.lott
01-00669

It appears that the office described by Mr. Bise is a "commercial facility," but not a "place of public accommodation" because it is a separate facility only for employees where patients do not receive any treatment or services. Under title III, new construction of (or alterations to) commercial facilities must comply with the ADA accessibility standards, but barrier removal in existing facilities is not required.

However, any operations at the office, such as billing practices, fee policies, or scheduling of appointments, that affect the delivery of services by the physicians in their hospital practice would be subject to title III. Moreover, if patients do, in fact, receive treatment or services of any kind at the office, the office would be a place of public accommodation subject to the full range of title III requirements.

This Department recently issued a technical assistance manual to assist individuals and entities subject to the ADA to understand the requirements of title III. I have enclosed a copy for your information.

I hope that this information is helpful to you in responding to Mr. Bise.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

Hon. Trent Lott
Senate Office Building
Washington, D.C. 20510

Dear Senator Lott:

Please be advised that I represent a small firm which is a professional medical group. Their practice is limited to a hospital practice. They have one private office which is used purely for billing purposes, and no patients are treated at that office. There are less than five employees in that office. The question has arisen whether they would be a private entity subject to the regulations regarding public accommodations as defined under 42 USC Section 12181(7) (F).

I would appreciate it if you could give me some advice regarding clarification of this matter, including but not limited to the names of individuals, entities, or organizations with whom I should correspond regarding this issue.

I would appreciate your prompt reply.

Very truly yours,

CARTER BISE

APR 28 (?)

The Honorable Richard G. Lugar
United States Senator
1180 Market Tower
10 W. Market Street
Indianapolis, Indiana 46204

Dear Senator Lugar:

This letter responds to your recent letter to the Department of Education on behalf of your constituent, Dr. Robert K. Poinsett. The Department of Education forwarded your letter to this office for response.

Dr. Poinsett requests information on Federal funding sources for the installation of an elevator in a facility operated by a private college to make the upper levels of the facility accessible to persons with disabilities. Evidently, Dr. Poinsett believes that the installation of the elevator is needed to comply with the Americans With Disabilities Act (ADA).

Dr. Poinsett should be advised that under title III of the ADA (which covers private educational institutions), a private college would only have to remove architectural barriers to make its facilities accessible where the removal of such barriers is readily achievable. Barrier removal is readily achievable if it can be accomplished without much difficulty or expense. The installation of an elevator rarely would be considered readily achievable under this standard.

With respect to Federal funding for barrier removal, we are unaware of any Federal grant programs that fund projects for the purposes identified by Dr. Poinsett. Section 190 of the Internal

cc: Records; CRS; Oneglia; Friedlander; LS; hb
McDowney:

01-00672

Revenue Code, however, provides a deduction up to $15,000 per year for expenses associated with the removal of certain architectural barriers.

Sincerely,

John R. Dunne
Assistant Attorney General

Mr. Robert G. Weiss
10849 East Vassar Drive
Aurora, Colorado 80014-1769

Dear Mr. Weiss:

This responds to your request for an interpretation concerning the application of the Americans with Disabilities Act (ADA) to religious entities.

The ADA authorizes the Department to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you in understanding how the ADA may apply to you. However, this technical assistance does not constitute a determination by the Department of Justice of your rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

Section 307 of the ADA provides that religious organizations and entities controlled by religious organizations are not subject to the requirements for public accommodations or commercial facilities under title III of the Act. Religious organizations may, however, accommodate individuals with disabilities at their own discretion, and do not waive their exemption from the requirements of title III by doing so.

I hope that this information is responsive to your inquiry.

Sincerely,

Stewart B. Oneglia
Director
Coordination and Review Section
Civil Rights Division

January 5, 1992

Ms. Sarah Kaltenborn
Conditional Review Section
Civil Rights Division
United States Department of Justice
Post Office Box 66118
Washington, DC 20035-6118

Dear Ms. Kaltenborn:

This letter is to recap our conversation of January 3, 1992.

I am a member of a committee at my son's school, which is a religious, non-profit institution. This committee is trying to put into effect policies and procedures to deal with faculty, staff, and students with infectious diseases, especially those who are HIV positive (AIDS).

The committee has received a number of legal opinions on its efforts. Unfortunately, those opinions have been quite divergent.

The troubling opinion we have received is related to the "Americans with Disabilities Act," which is tied to the "Civil Rights Act."

We were told that if we accommodated any handicapping conditions, like AIDS, we would then wave our exemption under the "Americans with Disabilities Act." If we set a policy for one, we would then have to accommodate all handicaps covered in the ADA. This would prove to be cost prohibitive to the school.

The committee's intent is to encourage the school to accept and adjust to those with many handicaps as possible, taking into account our financial and physical constraints. Should the school be in (financial) jeopardy by implicitly waving its exemption by adopting a policy to prevent the spread of AIDS, the committee will recommend that such a policy not be adopted.

01-00675

It is the hope of the committee that your office's "official" opinion will be that:

> An institution which is specifically exempt from the ADA, will not wave any rights or exemptions, nor have any additional obligations because it adopts policies or procedures for handicaps covered by either the ADA or the Civil Rights Act. (In short, we still retain our exemption.)

We request a written reply documenting your agency's opinion, for the school's records. During our conversation, you indicated that you were in agreement with the committee and that a written opinion was available if requested in writing.

Thank you for your time and effort in our behalf.

Sincerely,

Robert G. Weiss
Committee Member
AIDS Task Force
Herzl Day School
Denver, Colorado

cc: Leslie Englander, Chairperson

DJ 192-180-04158

APR 30 1992

The Honorable Frank Horton
U.S. House of Representatives
2108 Rayburn House Office Building
Washington, D.C. 20515

Dear Congressman Horton:

This is in response to your letter on behalf of your constituent, Ms. Susan Yara, regarding signage requirements under the Americans with Disabilities Act (ADA).

This letter provides informal guidance to assist you in responding to an inquiry from your constituent. However, this technical assistance does not constitute a determination by the Department of Justice of Ms. Yara's rights or responsibilities under the ADA and does not constitute a binding determination by the Department.

With respect to Ms. Yara's concerns, please be advised as follows:

1. Ms. Yara quotes S4.30.3 of the Americans with Disabilities Act Accessibility Guidelines (Guidelines) (Appendix A to the Department of Justice's title III regulation), which requires that characters and numbers on signs be sized according to the viewing distance from which they are to be read, and inquires as to whether further guidelines are available. The only further guideline available regarding this issue is found in the chart contained in S4.30.3, which sets out the requirement that, with respect to signs that are required to be suspended or projected overhead, the minimum character height is three inches (75mm). As Ms. Yara notes, the appropriate height for characters and numbers on signs is a subjective judgment. The Accessibility Guidelines permit this judgment to be made by design professionals.

cc: Records; Chrono; Oneglia; Friedlander; Pecht; McDowney.
:uddl:udd:pecht:horton.yara.2
01-00677

2. With respect to Ms. Yara's question regarding the color contrast between characters and their background, S4.30.5 of the Accessibility Guidelines requires that ". . . characters and symbols shall contrast with their background - either light characters on a dark background or dark characters on a light background."

Further guidance regarding S4.30.5 (and all other sections of the Accessibility Guidelines designated with an asterisk) is found in the Appendix to the Guidelines. The Appendix contains materials of an advisory nature designed to help the reader understand and comply with the Guidelines. Appendix SA4.30.5 explains that ". . . signs are more legible for persons with low vision when characters contrast with their background by at least 70 percent," and includes a formula for determining contrast in percent. For your convenience, we have enclosed a copy of the title III ADA regulation, which includes the Accessibility Guidelines.

There is no requirement in the Guidelines that signage materials be a solid color. With reference to the sample enclosed by Ms. Yara, the Department does not issue determinations as to whether specific products comply with the ADA Guidelines.

3. Ms. Yara requests a source of local assistance to aid her in "determining the application of this law." Through the National Institute on Disability and Rehabilitation Research, Congress has funded a regional network of Disability and Business Technical Assistance Centers. The Center in Ms. Yara's region should be able to provide her with technical assistance and referrals to local resources. The applicable Center is the Region 2 Northeast Center at the following address:

United Cerebral Palsy of N.J.
354 South Broad Street
Trenton, New Jersey 08608
609-392-4004 (Voice)
609-392-7004 (TDD)

4. Ms. Yara requests clarification as to what constitutes a permanent room or space under section 4.1.2(7) of the ADA Accessibility Guidelines. In its Title III Technical Assistance Manual, the Department has indicated that it considers the category of permanent signage to include only those signs that designate men's and women's rooms, room numbers, and exit signs. Signs that provide direction to or information about functional spaces of a building (e.g., "cafeteria this way" or "copy room")

need not comply with the requirements for raised and Brailled letters (which are only applicable to permanent signage) but are subject to other requirements. For your convenience, we have
01-00678

enclosed a copy of the Manual. The information cited can be found on page 59.

5. Ms. Yara inquires whether company logos are required to be in raised lettering. Such logos are not considered permanent signs subject to the raised letter requirement.

6. Ms. Yara asks whether raised lettering can be thicker than 1/32". On January 14, 1992, the Architectural and Transportation Barriers Compliance Board amended its ADA Accessibility Guidelines (which are the same Guidelines adopted by the Department for its title III regulation) to make it clear that lettering must be raised a minimum of 1/32" (emphasis added). A copy of this amendment is enclosed. The Department plans to make this technical correction to its title III regulation at a later date.

7. Ms. Yara inquires as to whether, each time a permanent sign is replaced, the replacement must comply with the ADA Accessibility Guidelines. Under ADA regulations, any replacement of permanent signage is considered an alteration which must be made in a manner that complies with the Accessibility Guidelines.

8. Ms. Yara asks which sign should be used to determine the centerline for complying with the S4.30.6 requirement for mounting height when multiple signs are used. As stated in the regulation, the measurement should be made from the centerline of the permanent sign. In the example given in Ms. Yara's letter, this would be the sign designating the room number.

9. Ms. Yara requests a description of the pictorial for the "sign depiction of a telephone handset with radiating sound waves," as required by S4.30.7(2). Ms. Yara is correct in assuming that this sign is typically provided with the telephone equipment. However, if one is not provided, any pictorial fitting the description set out in the regulation is acceptable.

10. Ms. Yara asks whether the signage at non-accessible entrances required by S4.1.6(1)(h) of the Guidelines must meet the permanent signage requirements (raised letters and Braille). Such signs are not considered permanent signs and, thus, do not have to meet the raised letter and Braille requirements. Please refer to the discussion of permanent signs at number 4 above.

11. Ms. Yara requests a listing of letter styles falling into the categories "sans serif" and "simple serif." She also asks where the Braille required by S4.30.4 should be located.

The term "serif" refers to the short lines that stem from

and are located at an angle to the upper and lower ends of the strokes of a letter. "Sans serif" refers to type styles without these flourishes, while "simple serif" type may include styles
01-00679

with some, but not excessive, additional lines. Many letter styles fall within these broad, generic categories, and new styles are frequently created. Thus, a comprehensive listing would be impossible. The intention of the regulation is to provide design professionals with the ability to exercise their professional and aesthetic judgment within these general guidelines.

The same holds true for the location of Braille. Braille must accompany raised characters on permanent signs, but no particular location is required, thus providing design professionals with an opportunity to place Braille characters in the location most appropriate to a given design application.

12. Ms. Yara inquires ". . . where are upper case letters required and lower case letters allowed?"

Lower case letters are permitted for all signs subject to the requirements of S4.30.3. Section 4.1.2(7) requires " . . . signs which provide direction to, or information about, functional spaces of the building . . ." to comply with S4.30.3. Examples of such signage are discussed at number four above.

Upper case letters are required for all signs subject to the requirements of S4.30.4. Section 4.1.2(7) requires " . . . signs which designate permanent rooms and spaces . . ." to comply with S4.30.4. Please refer to the discussion of permanent signs at number 4 above.

13. Ms. Yara asks whether the S4.30.4 requirement that the border dimension of a pictogram must be six inches minimum in height refers to the size of the pictogram or to the overall dimension of the sign. It refers to the overall dimension of the sign. The edge of the plate is considered to be the border and no separate border or frame is required.

14. Ms. Yara requests clarification regarding the required date of compliance for existing businesses. Title III generally went into effect on January 26, 1992. Although there are phase-in periods for smaller businesses (see S36.508 of the enclosed title III regulation), these phase-in periods are, in effect, grace periods during which civil actions cannot be brought against covered small businesses. However, those businesses are still expected to comply with the title III regulation.

There is no general obligation to replace signage in existing facilities when no alteration or new construction is planned. However, S36.304 of the title III regulation requires businesses to remove architectural barriers and communications

barriers that are structural in nature from existing facilities when such removal is readily achievable, that is, easily accomplishable and able to be carried out without much difficulty
01-00680

or expense. Section 36.304(c) suggests priorities for such barrier removal. Under S 36.304(c)(2), which discusses measures that may be taken as a second priority (to provide access to those areas of a place of public accommodation where goods and services are made available to the public), providing Brailled and raised character signage is listed as an example.

As noted above, all signage in newly altered areas must comply with the requirements of the Guidelines. In addition, signage in buildings designed for first occupancy after January 26, 1993, must also comply.

15. Ms. Yara expresses concern regarding the requirement that raised rather than engraved lettering be used for permanent signage. First, as noted above, in its technical assistance manual, the Department has defined permanent spaces in a restrictive manner. Thus, only a limited number of rooms are subject to the raised letter and Braille requirement.

Also, the Architectural and Transportation Barriers Compliance Board (Board) is currently drafting accessibility guidelines for title II of the ADA, which covers State and local governments. At my request, the Board agreed to include specific questions concerning appropriate standards for signage in the preamble to that proposed rule. This action will enable the engraving industry to formally present to the Board its views on engraved lettering.

I strongly encourage representatives of the engraving industry to submit comments on the proposed title II guidelines so that the Board will have the necessary information to make a wise decision on the issue. The Board will carefully consider all comments received and determine whether the guidelines should permit engraved lettering on permanent signs in State and local facilities. If the comments received indicate that such a determination is appropriate, I will recommend to the Board that the title III guidelines, covering places of public accommodation and commercial facilities, should likewise be revised to permit engraved letters.

I hope this information has been helpful to you.

Sincerely,

John R. Dunne
Assistant Attorney General

Civil Rights Division

February 17, 1992
Congressman Frank J. Horton
House of Rep., 2108 Rayburn Bldg.
Washington, D.C. 20515

Re: The Americans with Disabilities Act Regulations
Dear Congressman Horton:

It was a pleasure to meet with you last week to discuss my questions and concerns regarding the above referenced law. As per your recommendation, I have compiled questions on several aspects of the law with regard to the signage requirements. Since my customers rely on me to assist them in complying with this law, I want to be sure that I understand it as fully as possible.

Section 4.30.3"...shall be sized according to the viewing distance from which they are to be read..." This section discusses the letter height requirements; and we wonder if there are any further guidelines with regard to maximum distance vs. letter height. This is a very subjective determination. In addition, available wall space is of concern since lettering of this height, particularly 2", takes up a large amount of space.

We have been reading that the color contrast between lettering the background should have at least a "70% reflective difference". What does that mean and how do we determine whether or not we are within this standard? Also, does the color have to be a solid dark or light; or can it be something like the sample of material enclosed?

Where can we obtain assistance locally in determining the application of this law? I do not want to be the judge of whether what the client wants to do will meet the required standards. Also, we do not have the time to consult Washington D.C. every time we have a question.

Section 4.1.2 (7) "...Signs which designate permanent rooms and spaces shall comply...". What specifically is a permanent room or space. Many room usages change over time, so is the room number the only identification that is considered permanent, or is the function to be indicated with raised lettering as well?

Is a company logo; eq. Coca Cola, required to be in raised lettering as well?

01-00682

Is raised lettering to be only 1/32" in thickness, or can it have more thickness? The study included in the enclosed article tested 1/8" thick letters as well.

I have read articles that suggest that each time a "permanent" sign is changed that the replacement should meet the new standards. Is this correct, or will a change be required only when an area is totally renovated or remodeled?

Section 4.30.6 "...Mounting height shall be 60 inches...to centerline of sign " If several signs are used at the same doorway; e.q. room number, room function, occupant's names; and stacked one above the other, which is used for the centerline measurement?

Section 4.30.7 (2) What does the pictorial look like for the "sign depiction of a telephone handset with radiating sound waves.", or is this sign provided with the telephone itself?

4.1.6 (1)(h) "...signage at non-accessible entrance..." Is this required to have raised letters and braille? Section 4.30.4 states "...upper case, san serif or simple serif type and be accompanied with Grade 2 braille..." Specifically what letter styles fall into this category and where is the braille to be located on the sign?

Section 4.30.3 states "...lower case characters are allowed." and Section 4.30.4 states "...letters and numerals shall be...upper case...". Specifically where are upper case letters required and lower case letters allowed?

Section 4.30.4 states "Border dimension of pictogram shall be 6 in. minimum in height." Does this refer to the size of the pictogram itself, or the overall sign? Also, does border mean the sign must have a separate border or frame, or is the edge of the plate considered a border?

The information I have been receiving seems to be contradictory with regard to the date of compliance for

existing businesses. Assuming no physical alterations or new construction are planned by an existing business, when must this business comply with the law; specifically regarding the changing of their signage to comply with this law?

01-00683

Congressman Horton, as we discussed last week, I still do not understand why engraved signage is no longer allowed for "permanent" signage. It can be read tactily, is less expensive, and is usually less subject to vandalism; a major concern to my clients. As I mentioned in my last letter to you, a similar law in Connecticut was amended to include engraved signs because blind people testified that they could read an engraved sign as well as raised letters. Also, please refer to the section of the Engravers Journal article that I have attached which also addresses this subject.

In conclusion, I want to reiterate that we wish to help our clients comply fully with a law whose purpose we completely agree with which is why we are requesting clarification on certain points. However, we would like to see engraved signage included in the allowable signs for the reasons stated above and in my earlier correspondence. As we discussed before.....If it ain't broke, don't fix it.

Sincerely,

Susan Yara

T. 04/30/92
DJ 202-PL-00107
Wodatch
Date
Mr. Julio Rufo
Solomon Cordwell Buenz & Associates Inc.
57 West Grand Avenue
LIB Chicago, Illinois 60610
Deputy
Dear Mr. Rufo:
Date
I am responding to your request for clarification of the effective date of the new construction requirements of Title III of the Americans with Disabilities Act of 1990 (ADA), Pub. L.
Blizard 101-336, 104 Stat. 327 (July 26, 1990), 42 U.S.C.A. SS 12101 et seq., and this Department's regulation implementing title III, 56
Date Fed. Reg. 35544 (July 26, 1991), to be codified at 28 C.F.R. Pt. 36.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that are subject
GYB to the Act. This letter provides informal guidance to assist you in understanding the ADA. However, this technical assistance
Date does not constitute a determination by the Department of Justice of your client's rights or responsibilities under the ADA and it is not binding on the Department of Justice.

Your understanding of which buildings are subject to new construction standards is correct. The new construction requirements of the ADA apply to any place of public accommodation or commercial facility first occupied after January 26, 1993, for which the last application for a building permit or permit extension was completed after January 26, 1992. If a facility is constructed under a permit for which the application was completed prior to January 26, 1992, or the facility is occupied before January 26, 1993, the facility is not subject to the new construction requirements of the ADA.

However, places of public accommodation are subject to a continuing obligation to remove architectural, communication, and transportation barriers. Under this continuing obligation, each public accommodation is required to remove barriers in its

cc: Records, Chrono, Wodatch, Blizard,
udd:Blizard.interpretation.rufo

until the facility complies with the accessibility standards that would apply if the facility was being altered.

This Department recently issued a technical assistance manual to assist individuals and entities subject to the ADA to understand the requirements of title III. I have enclosed a copy for your information. I hope that this information is helpful to you.

Sincerely,

L. Irene Bowen
Deputy Director
Office on Americans with Disbilities
Civil Rights Division

U.S. Department of Justice
Civil Rights Division
Office of the Assistant Attorney General Washington, D.C. 20035

MAY 1 1992

Ms. Nessa Feddis
Senior Federal Counsel
American Bankers Association
1120 Connecticut Avenue, N.W.
Washington, D.C. 20036

Dear Ms. Feddis:

I am responding to your letter relating to accessibility requirements for automated teller machines (ATM's) under the Americans with Disabilities Act (ADA).

As required by the Americans with Disabilities Act, the requirements that apply to ATM's are included in guidelines developed by the Architectural and Transportation Barriers Compliance Board (Access Board). These guidelines are incorporated into the Department of Justice's ADA regulation. The ADA requires that our regulation be consistent with the guidelines of the Access Board.

The provision in question, which applies only to new construction and alterations, requires that a person using a wheelchair be able to reach the controls of an ATM through both a forward and a side reach. This provision was included in the ADA Accessibility Guidelines when they were first published for comment in January 1991. The Guidelines were subject to an extensive public comment process that included 18 public hearings. The concerns that you are now raising were not expressed during the rulemaking process.

The Department of Justice takes seriously the concerns that you have stated. As you know, the Access Board recently decided to reopen this issue to public comment through a notice in the Federal Register and to hold a hearing on the matter. The action of the Board has the support and concurrence of the Department of Justice. However, while changes to the rule are under consideration, the Department is not in a position to amend the provision on ATM's, and we are constrained to enforce the requirements of the ADA regulation now in effect.

You should be aware that section 2.2 of the ADA Accessibility Guidelines permits departures from particular technical requirements by use of other designs and technologies
01-00687

where the alternative designs and technologies will provide substantially equivalent or greater access to and usability of the facility. Based on the information you have sent us, it appears that, in some circumstances, the ATM's that are currently available may be usable by individuals with disabilities. If you can demonstrate that particular ATM's, as installed, provide equivalent facilitation, they will be considered as complying with the ADA. You may be able to show that meeting one of the reach ranges specified in S 4.2.5 or S 4.2.6 provides equivalent facilitation, assuming all other requirements for ATM's contained in S 4.34.1, S 4.34.2, and S 4.34.4 are met.

You have described two situations as a common occurrence in the banking industry: the installation of new ATM's that were ordered before the effective date of the ADA, and the relocation of existing ATM's, originally installed prior to January 26, 1992. You have suggested that compliance with neither S 4.2.5 nor S 4.2.6 will be possible with respect to many of these machines. While the number of such ATM's is not certain, we are confident that many can be "redeployed" consistent with the standards. For example, they could be used as drive-up-only teller machines, which are not required to comply with SS 4.27.2, 4.27.3, and 4.34.3. (See S 4.1.3(20), exception.) They could also be used at locations where two or more ATM's are provided, because only one is required to comply in that situation. (See S 4.1.3(20).) In limited circumstances, they could be installed outside the specified reach ranges if the use of the particular equipment so dictated (S 4.27.3, exception) or where full compliance would be technically infeasible in alterations due to existing physical or site constraints (S 4.1.6(1)(j)).

Please note: The interpretations in the preceding two paragraphs are premised on the information currently available to us and will be revisited based on the information received as a result of the Access Board's notice.

Based on the approach that I have outlined here, your fears of an adverse economic impact on ATM vendors and financial institutions should be greatly alleviated. I strongly urge you to submit data and other information to the Access Board in response to its notice.

Sincerely,

John R. Dunne
Assistant Attorney General

Re: Accessibility requirements for ATMs under the Americans With Disabilities Act Accessibility

Dear Mr. Wodatch,

The American Bankers Association ("ABA"), NCR, and InterBold ("the ATM vendors") recently submitted the attached petition to the Architectural and Transportation Barriers and Compliance Board ("the Board") to clarify the reach and height requirements for automated teller machines ("ATMs") under the Americans with Disabilities Act Accessibility Guidelines ("ADAAG").1 Until the issue is resolved, however, financial institutions and major ATM vendors are unable to make critical business decisions.

Therefore, ABA and the ATM vendors respectfully request that the Department of Justice issue either a letter or interim regulations specifically stating that under ADAAG wheelchair accessible ATMs must allow either a forward or front reach until final action on the petition. Additionally, we request that the letter or interim regulation provide that used ATMs relocated after January 26, 1992 are not subject to ADAAG. Rather, such ATMs must comply with Sections 36.303 and 36.304 of the Department of Justice's Americans With Disabilities Act regulation. Those sections generally require removal of barriers where readily achievable and the addition of auxiliary aids and services where such measures do not impose an undue burden. It is vital that the Department of Justice respond promptly to this request given the adverse economic impact on ATM

_____

1 The ABA is the national trade and professional association for America's commercial banks, from the smallest to the largest. ABA members represent about 90 percent of the industry's total assets. Approximately 94 percent of ABA members are community banks with assets less than $500 million. InterBold and NCR manufacture about 88% of the ATMs sold in the United States annually.

vendors and financial institutions associated with delaying critical business decisions.

It is our understanding that the Board is preparing to request comment on the subject of ATM reach and accessibility requirements. However, no final action can be expected for several weeks to allow publication of the request for comment, review of comments, and final action.

Neither NCR nor InterBold, the two major ATM vendors, currently have available an ATM which allows both a forward and side reach. Accordingly, until the matter is resolved, the ATM vendors and financial institutions cannot proceed with critical business decisions. The ATM vendors cannot go forward with the design, production, and sale of new ATMs. Financial institutions cannot proceed with:

- the installation of newly purchased ATMs;
- the relocation and retrofitting of existing ATMs;
- the delivery and installation of previously ordered ATMs;
- purchase orders for new ATMs; and
- the installation of new ATMs.

Relying on ANSI-A117 and ergonomic studies, ATM vendors developed and financial institutions installed wheelchair accessible ATMs to best accommodate the needs of all their customers. They also chose side reach ATMs to allow more functions and better security and privacy than provided by a lower forward reach ATM. Moreover, many institutions and people, including Department of Justice staff responding to telephone inquiries, have interpreted ADAAG to allow either a side or forward reach. For these reasons, the majority of wheelchair-accessible ATMs installed and available from the two major vendors allow only a side reach.

While Fujitsu, an ATM vendor with approximately 11% of the domestic market, has available an ATM which allows both reaches, there are a variety of reasons that its product may not, as a practical matter, be a solution for many institutions. For example, a Fujitsu ATM may not be compatible with the institution's existing ATM processing, maintenance, and servicing system. In addition, as the attached petition explains, the flat plane design of that ATM may present accessibility, security, and privacy issues for many institutions.

Further, the Department of Justice should allow financial institutions to redeploy ATMs originally installed prior to January 26, 1992 which do not comply with ADAAG until final resolution of this matter. Rather, those ATMs should be subject to Sections 36.303 and 36.304 of the Department of Justice's Americans With Disabilities Act regulations. Those sections generally require removal of barriers where readily

achievable and the addition of auxiliary aids and services where such measures do not impose an undue burden.

ATMs are expensive machines with an average useful life of ten to fifteen years. Because of their expense and longevity, they are often relocated for a variety of reasons. For instance, a bank may replace an old ATM with an upgraded ATM and reinstall the old ATM in another location. It may relocate it in an area where only a less expensive ATM is justified because of the low transaction volume expected. ATMs may also be relocated when the branch moves to a new location. Used ATMs are also often installed in new branches.

Financial institutions have invested heavily over many years to install tens of thousands of ATMs nationwide. We do not believe that the subsequent enactment of the Americans With Disabilities Act ("ADA") should significantly reduce their utility and useful life, and believe that such a result would be inconsistent with both the letter and intent of that statute.

Financial institutions and the ATM vendors are eager to comply with ADA and have taken significant measures in that regard. However, we feel that the additional burden of redesigning and producing even lower wheelchair accessible ATMs, and restricting the relocation of existing ATMs contradicts the much publicized policy of the Bush Administration to avoid overly burdensome, costly, and unnecessary regulations. We believe that an interim regulation or a letter which allows either a side or forward reach and which permits continued use of used ATMs will help to avoid costly business decision delays. This approach will also advance the Administration's policy to minimize regulatory burdens in a manner which does not contradict the implementation and enforcement of the ADA.

We will be happy to discuss this matter further.

Sincerely,

Nessa Feddis

MAY 4 1992

Ms. Clare Beckett
Clare's Engraving
P.O. Box 1012
Moorhead, Minnesota 56560

Dear Ms. Beckett:

This is in response to your letter to our office concerning coverage of apartment buildings under the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you in understanding how the ADA may apply to you. However, this technical assistance does not constitute a determination by the Department of Justice of your rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

Under title III of the ADA, entities which are covered by the Fair Housing Act of 1968, i.e. long-term residential facilities, are expressly exempted from the ADA's commercial facilities requirements. Such facilities may, however, be covered by the ADA as places of public accommodation if they fall under one of the 12 categories of places of public accommodation (see pages 35551 and 35594 of the title III rule). If a long-term residential facility provides social services, for example, it would be a place of public accommodation because it falls under category 11.

Note, however, that the category "places of lodging" (the first category on the list) excludes facilities that are solely residential. Only facilities used for short-term stays are included within this category. (See page 35552 of the rule.)

Thus, if a facility is purely residential and does not fall within one of the 12 listed categories, then the facility is covered by the Fair Housing Amendments Acts only and not by title III.
01-00692

Title II of the ADA, which covers State and local government services, must also be considered. Thus, for example, State-operated public housing apartments are covered by title II and must be constructed in compliance with one of two accessibility design standards, the Uniform Federal Accessibility Standards or the ADA Accessibility Guidelines (which are an appendix to our title III rule). See section 35.151(c) of the title II rule.

Copies of our title II and title III rules and technical assistance manuals are enclosed. I hope this information is helpful to you.

Sincerely,

Stewart B. Oneglia
Chief
Coordination and Review Section
Civil Rights Division

Ms. Susan Perry
Senior Vice President -
Government Relations
American Bus Association
1015 - 15th Street, N.W., #250
Washington, D.C. 20005

Dear Ms. Perry:

This is in response to your petition for reconsideration or clarification of the Department of Justice's final rule implementing title III of the Americans with Disabilities Act (ADA) with respect to application of the elevator exemption to transportation terminals.

As explained in the preamble to the final regulation, the elevator exemption is an exception to the requirement for "ready access" to floors above and below the ground level for certain small buildings (i.e., a facility that is less than three stories or has less than 3000 square feet per story), where such access would require installation of an elevator. The ADA provides an exception to the elevator exemption for buildings housing a shopping center, shopping mall, or the professional offices of a health care provider, or other category determined by the Attorney General.

In issuing the final regulation, the Attorney General determined that the elevator exemption should not apply to terminals, depots, or other stations used for specified public transportation, or airport passenger terminals because of the significance of transportation services for individuals with disabilities. The Department, however, provided in the final regulation that the requirement applies only to those areas used for passenger loading and unloading and for other passenger services. This approach is similar to that used for the other types of facilities that are ineligible for the elevator exemption.

cc: Records; CRS; Oneglia; Kaltenborn; hb
UDD: Kaltenborn(Susan Perry 1)(PB)FOIA

Example 3 at page 35580 of the preamble explains that when all retail stores that make a facility a "shopping center" are located on the first floor, elevator access need not be provided to the offices on the second floor. Likewise, if all passenger service areas of a terminal are located on the ground floor, S36.401(d) (2) (ii) of the regulation does not require elevator access to other floor levels of the building. Thus, the amendment you have proposed is unnecessary since elevator access in not required when passenger services are provided exclusively at the ground level. The only requirement is that any area housing passenger services, including boarding debarking, loading and unloading, baggage claim, dining facilities, and other common areas open to the public, be on an accessible route from an accessible entrance.

We hope this information is helpful to you.

Sincerely

John R. Dunne

_____

28 CFR PART 36

NONDISCRIMINATION ON THE
BASIS OF DISABILITY BY
PUBLIC ACCOMMODATIONS AND
IN COMMERCIAL FACILITIES;
FINAL RULE

_____

PETITION OF
THE AMERICAN BUS ASSOCIATION

FOR

RECONSIDERATION OR, IN
THE ALTERNATIVE, CLARIFICATION

_____

Enclosed for convenient reference is a copy of Comments of the American Bus Association (ABA) in response to the Notice of Proposed Rulemaking in the above-captioned proceeding.

In the preamble to the final rule pertaining to the elevator exemption, it is stated that no one opposed adding terminals, depots, and stations used for specified public transportation to the nonexempt categories. As indicated by the attachment to this petition, that statement is not correct.

ABA opposed the removal of the elevator exemption for bus terminals and stations because -

> At all bus terminals and stations, with relatively few exceptions, buses arrive and depart, load and unload only at ground level. No services are provided for passengers on the second floor or above.

ABA then suggested specific language to address the unique characteristics of intercity bus terminals and stations.

Section 401(d)(2)(ii) of the rule reads as follows:

> A terminal, depot, or other station used for specified public transportation, or an airport passenger terminal. In such a facility, any area housing passenger services, including boarding and debarking, loading and unloading, baggage claim, dining facilities, and other common areas open to the public, must be on an accessible route from an accessible entrance.

We have no problem with this requirement if it is satisfied by compliance with the second sentence. In all new construction or alterations contemplated by members of ABA, there would be an accessible route from an accessible entrance to all areas of the facility housing passenger services.

For the reasons set forth above, ABA urges that the elevator exemption with respect to bus terminals and stations be reconsidered or, in the alternative, that the purpose and effect of the exemption be clarified.

Respectfully submitted,

Susan Perry

28 CFR PART 36

NONDISCRIMINATION ON THE BASIS OF DISABILITY
BY PUBLIC ACCOMMODATIONS AND IN
COMMERCIAL FACILITIES; PROPOSED RULE

_____

COMMENTS OF

AMERICAN BUS ASSOCIATION

_____

These Comments are filed by the American Bus Association ("ABA") in response to the Notice of Proposed Rulemaking published in the Federal Register on February 22, 1991 (56 Fed. Reg. 7452). The proposed rule implements title III of the Americans With Disabilities Act ("ADA") which prohibits discrimination on the basis of disability by private entities in places of public accommodation.

ABA is the national trade association for the intercity bus industry. The Association has over 600 operator members. All of these members are private entities who are primarily engaged in the business of transporting passengers and who operate over-the-road buses as defined in section 301(5) of the ADA.

ABA's particular interest in this proceeding stems from its members' operation of terminals, which subparagraph (G) of section 301(7) specifically includes in the definition of "public accommocation."

Sec. 36.104--Definitions--Current Illegal Use of Drugs

The term, "current illegal use of drugs," is defined as follows in section 36.104:

> Current illegal use of drugs means illegal use of drugs that occurred recently enough to justify a reasonable belief that a person's drug use is current or that continuing use is a real and ongoing problem.

This definition is taken verbatim from the Report of the Conference Committee. H. Conf. Rep. No. 596, 101st Cong., 2d Sess. 64 (1990). The definition is obviously congruent with Congressional intent and we urge its adoption. We note, however, that the Equal Employment Opportunity Commission has proposed a somewhat different definition of "current illegal use of drugs."1 In the interest of government-wide consistency, we hope the Department of Justice will be able to persuade EEOC that its definition of "current illegal use of drugs" is preferable.

1 Equal Employment Opportunity for Individuals With Disabilities--EEOC Notice of Proposed Rulemaking, 56 Fed. Reg. 7452 (February 28, 1991)

Secs. 401(d) and 404(a)--Elevator Exemption

Section 303 (b) of the ADA provides that requirements for new construction and alterations in public accommodations and commercial facilities in section 303(a)-

> shall not be construed to require the installation of an elevator for facilities that are less than three stories or have less than 3,000 square feet per story . . . unless the Attorney General determines that a particular category of such facilities requires the installation of elevators based on the usage of such facilities.

In sections 36.401(d) and 36.404(a) of the regulations, the Department of Justice proposes not to apply the elevator exemption to:

> A terminal, depot, or other station used for specified public transportation, or an airport passenger terminal.

In the preamble to the proposed rule, the following reason is given for adding passenger terminals, depots, and other stations to the nonexempt category:

> It is not uncommon for an airport passenger terminal or train station, for example, to have only two floors, with gates on both floors. Because of the significance of transportation, because a person with disabilities could be arriving or departing at any gate, and because inaccessible facilities could result in a total denial of transportation services, it is reasonable to require that newly constructed transit facilities be accessible, regardless of square footage or number of floors.

56 Fed. Reg. 7475.

At all bus terminals and stations, with relatively few exceptions, buses arrive and depart, load and unload only at

ground level. No services are provided for passengers on the second floor or above. Since the reason for the proposed regulation has no relevance to intercity bus operations, ABA urges that section 401(d)(ii) relating to new construction and section 404(a) relating to alterations be amended by adding the following language at the end of each section:

> A bus terminal or bus station shall be eligible for the elevator exemption if buses arrive and depart and load and unload exclusively at ground level and if no services for passengers are provided on the second story or above.

If the proposed amendment were adopted, two-story bus terminals and stations would be treated in the same way as a building which houses retail stores "exclusively on the ground floor, with only office space (not professional offices of health care providers) on the second. (56 Fed. Reg. 7475, par. 3). It is especially important to eliminate unnecessary economic burdens on the intercity bus industry which (1) provides the most economical form of transportation, (2) is virtually unsubsidized, and (3) is only marginally profitable.

Respectfully submitted,

Susan Perry

DUE : April 23, 1991

U.S. Department of Justice
Civil Rights Division
Office of the Assistant Attorney General Washington, D.C. 20035

Mr. Kenneth M. Lesser
First Vice-President
Association of City Employees
with Disabilities
706 North Vendome Street
Los Angeles, California 90026

Dear Mr. Lesser:

This is in response to your letter about the provision of curb cuts under title II of the Americans with Disabilities Act (ADA). Your letter also asked about available remedies under title II and section 504 of the Rehabilitation Act of 1973, as amended.

The ADA authorizes the Department to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you in understanding how the ADA may apply to public entities. This technical assistance, however, does not constitute a determination by the Department of Justice of rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

Title II prohibits discrimination on the basis of disability in all programs, activities, and services provided or made available by State and local governments, instrumentalities, or agencies. The title II regulation (enclosed) is based on regulations implementing section 504.

Like the section 504 rule, the title II rule provides that a public entity must not deny the benefits of its programs, activities, and services to individuals with disabilities because its facilities are inaccessible (S35.149). A public entity's services, programs, or activities, when viewed in their entirety, must be readily accessible to and usable by individuals with

disabilities. A public entity, however, is not necessarily required to make each of its existing facilities accessible. Nor does a public entity have to take any action that it can demonstrate would result in a fundamental alteration in the nature of its program or activity or in undue financial and administrative burdens (S35.150(a)).

Section 35.150(d)(2) of the title II rule states that public entities with responsibility for or authority over streets, roads, or walkways must prepare a schedule for providing curb ramps where pedestrian walks cross curbs. Priority must be given to walkways serving State and local government offices and facilities, transportation, places of public accommodation, and employers, followed by walkways serving other areas. This schedule must be included as part of a transition plan (S35.150(d)(2)).

However, section 35.150 does not necessarily require a curb ramp at every intersection. Alternative routes to buildings that make use of existing curb cuts may be acceptable under the concept of program accessibility, even if an individual with disabilities may need to travel a longer route to reach a particular building than would a nondisabled individual.

In residential areas, as opposed to commercial areas, it may be appropriate to establish a procedure for installing curb ramps upon request when an individual with disabilities moves into a neighborhood. Moreover, the fundamental alteration and undue burdens defenses will limit the number of curb ramps required in many cases. In developing a transition plan to provide curb ramps, a public entity should consider all of these factors.

In the case of new construction and alterations (as opposed to existing facilities), the rule requires that curb ramps be provided at any intersection having curbs or other barriers to entry from a street level pedestrian walkway (S35.151(e)).

In response to your question about remedies, title II incorporates the remedies of section 505 of the Rehabilitation Act, which include court orders to stop discrimination, termination of Federal funds when there are Federal funds to

terminate, and damages in some circumstances. Penalties are not available. Nor is reimbursement of Federal funds an available remedy under title II or section 504.

I hope this information has been helpful to you.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

Enclosure
01-00705

U.S. Department of Justice
Civil Rights Division
Office of the Assistant Attorney General Washington, D.C. 20035

Ms. Susan Logan
Associate Director
Division of Continuing Education
Texas Tech University
Box 4110
Lubbock, Texas 79409-2191

Dear Ms. Logan:

This letter is in response to your letter regarding the applicability of the Americans with Disabilities Act's (ADA) requirements to warehouse rooms.

The ADA authorizes the Department to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you in understanding how the ADA may apply to your University. This technical assistance, however, does not constitute a determination by the Department of Justice of the University's rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

Texas Tech University, as we understand, is a public entity, which is covered by title II of the ADA. Effective January 26, 1992, title II prohibits discrimination on the basis of disability by public entities. The Department of Justice is responsible for implementation of title II of the ADA. Enclosed are copies of our title II rule and a technical assistance manual explaining the rule.

If Texas Tech University is part of a program that receives financial assistance from any Federal agency, then the University is also subject to section 504 of the Rehabilitation Act of 1973, as amended, and the implementing Department of Education regulation at 34 C.F.R. pt. 104 (1991). Section 504 prohibits discrimination on the basis of handicap in federally assisted

programs and activities.

01-00706

In your letter, you explained that in order to house a large inventory of textbooks, the University is making two changes to a warehouse room. First, sales transactions will occur at the door of the warehouse room. The door is being fitted with a half door with a ledge built onto the bottom half of the door to facilitate transactions. It is not apparent from the letter whether the ledge would be accessible to persons who use wheelchairs. Second, the University is arranging seven foot high shelves to house the large inventory of textbooks, and the arrangement of shelving will not provide wheelchair access to the textbooks in the room.

You also explained that employees in the warehouse room would bring boxes of books from the basement of the building, stock high book shelves, retrieve the books from these shelves, and conduct sales transactions from the door. Specifically you asked whether the nature of the work to be done in the warehouse room would disqualify persons who use wheelchairs from employment in the room and whether the room would be exempt from the ADA.

Many of the provisions contained in the title II regulation are based on section 504 of the Rehabilitation Act and its implementing regulations. The following are basic employment and program accessibility requirements under title II and section 504.

With respect to possible employment in the warehouse, covered entities must provide reasonable accommodation to the known physical or mental limitations of a qualified individual with a disability who is an applicant or employee, unless the entity can demonstrate that the accommodation would impose an undue hardship on the operation of the program (see 28 C.F.R. S35.140 (title II rule); and 34 C.F.R. S104.12 (Education's section 504 rule)). If an individual with a disability works in the warehouse room, the question of whether an accommodation, including modifying the shelves, is required, would need to be determined on a case-by-case basis.

As to access at the door of the warehouse room for students with disabilities who want to purchase textbooks, two different requirements are applicable. First, the title II rule, as well as the section 504 rule, requires that alterations, to the maximum extent feasible, be made in an accessible manner

(S35.151(b) of the title II rule; and 34 C.F.R. S104.23(b) (section 504 rule)). The section 504 rule at S104.23 provides that compliance with the Uniform Federal Accessibility Standards (UFAS) is considered compliance with the alterations requirements. The title II rule at S35.151(c) permits the use of either UFAS or the ADA Accessibility Guidelines, which are an appendix to the Department's regulation implementing title III of the ADA (also enclosed). Section 7 of each of these standards covers sales and service counters.

Second, the title II rule, like the section 504 rule, also requires a public entity to make its programs, services, and activities accessible, except where to do so would result in a fundamental alteration in the nature of the program or in undue financial and administrative burdens (see SS35.150(a) and (a)(3) of the title II rule). With respect to the services provided at the door of the warehouse room, if necessary to achieve program accessibility, the University may need to lower the ledge of the door to an accessible height, or open the door to provide the service.

I hope this information has been helpful.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

Enclosures (4)

SBO:MF:hb MAY 07 1992
XX

Mr. (b) (6)
Gainsville, Florida 32606

Dear Mr. XX

Thank you for your letter about the Florida Commission on Human Rights' ruling, which considers transsexualism a disability. You asked about the relationship between that ruling and the Americans with Disabilities Act (ADA). You were concerned that transsexualism should not be considered a disability.

The ADA authorizes the Department to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you in understanding how the ADA may apply to you. This technical assistance, however, does not constitute a determination by the Department of Justice of your rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

Section 511 of the ADA states that for purposes of the definition of "disability," the term "disability" does not include transvestism, transsexualism, pedophilia, exhibitionism, voyeurism, gender identity disorders not resulting from physical impairments, or other sexual behavior disorders. Accordingly, the term "disability" does not apply to an individual solely because of an individual's transsexuality.

cc: Records; CRS; Oneglia; Friedlander; Mather; FOIA; hb
01-00709

You asked about the relationship between the ADA and State laws. The ADA does not preempt any State law, if that State law provides protection for individuals with disabilities at a level greater or equal to that provided by the ADA.

I hope this information has been helpful to you.

Sincerely,

Stewart B. Oneglia

P.O. Box 66118
Washington, DC 20035-6118

Dear Honorable Hearing Officer

I am a recovering drug abuser (pot) and alcoholic who lost not only a military career and my South Carolina drivers license as a result of substance abuse, but - more important it also cause me a divorce after nine years of marriage. Today, after struggling with physical and emotional addiction to alcohol and pot, I have found freedom from the addiction of these drugs through the help of the State of South Carolina, local support groups, churches, and friends. My road to continuing recovery has not been easy; but with the love of my new wife, family, friends and determination on my part, I am now living a life of hope and productivity. True, at fourty years of age, I have a long ways to go to recover a small percentage of the finances and value I wasted away because of alcohol abuse. But now under The Americans Disability Act, I have a hope of securing employment in area where in the past I was denied because I had been dismissed from the Air Force and have a D.U.I. conviction against me. The ILLEGIBLE discrimination against me
01-00711

(Hand written)

Pg2

during the 1980's and to present (because of my military record - although I'm a Vet with an Honorable Discharge from 1971-1975) and not having a driver license until last year, appears to be having an effect upon my life mentally and emotionally: my tax return upon income and job stability will verify great financial hardship over the last ten years. At the present, I am still unemployed; and I am having great difficulty finding employment in the town which I live, Gaine sville, Florida. Is it because of my legally recognized handicap? I don't know. With a college education and my skills and experience in construction, I would think there would be some kind of work for me to secure having been looking for work since Sept of last year. Do I feel like I'm being discriminated against? Yes! But by the homosexual community. I belong to a grass-root organization, Concerned Citizens for Traditional Family Values, and am actively involved - without pay - in "politically" voicing my and our believes against the concept of "sexual-orientation" to be added to the already existing anti-discrimination ordances. Did I take this to the Alachua County Commission in Florida? Yes, but by letter (see Board of County Commissioner letter, dated March 11, 1992) they referred me to the Florida Commission on Human Relations. The problem, however, in having referred me to the Florida State Commission is I don't believe they will give me a fair and impartial hearing on possible Civil Rights violations against me because they - the State Commission - have already voted in 8 to 1 in favor in

declaring "Transsexuality" as a disability (See Exhibit I) in apparent violation of the intent and spirit of Public Law 101-336, Sec. 511(a)(1). Because of their "biased" pro-homosexual stance - in violation of The Americans Disability Act and Florida State laws criminalizing the acts of homosexuals; and because of the Florida State Commission "attitude" of State immunity from Civil and Federal action; I and others - Concerned Citizens - are asking that the Federal government authorities to take jurisdiction in this matter (See original certified ltr. P 752 670 584 and 5, Exhibit II). On the issue of our Human Rights concerning sexual orientation and Transsexuality under the Human Rights of 1977 and Florida Civil Rights Act of 1992 [FS 760.01(2) and FS 760.11(4)(a) and (5)], we got no answer because of being deferred to the Florida Commission. It is to my and others understanding; however, the legal authority for all County Commissions in the State of Florida comes from Florida Statute (FS) 125.66(2)(a) - a sweeping and unchecked power for Commissions to enact laws in apparent violation of mine and others Seventh, Eigth, Nineth and Fifteenth Amendment Rights under the Constitution.

Consequently, because of possible Civil and Bill of Rights violations, we are asking the Civil Rights Division of the US Department of Justice to ask the Florida State Attorney General and/or proper authority having jurisdiction to enact an emergency injunction against FS 125.66(2)(a) and any other Florida Statue which is in direct conflict with existing Federal laws against the sex act(s) of homosexual and

24 Mar 92 Article P 752 670 587
bi-sexuals which violate our Civil Liberties in Federal, State, and local laws and/or ordanances.

Sincerely,
(b)(6)

The Honorable Strom Thurmond
United States Senate
Senate Office Building
Washington, D. C. 20515

Dear Senator Thurmond:

I am a member of the National Emergency Number Association (NENA). I am writing to you to alert you to a flaw in the implementation rules for Title II Section 35 of the A.D.A. Law.

(Hearing and Speech Impaired). Our organization supports the A.D.A. Law 100%. However, the Department of Justice, who provided these rules, have set in motion, a situation that could be fatal to a hearing and speech impaired person.

The hearing and speech impaired community must communicate by using a device similar to a typewriter (called a T.D.D.) They also communicate using a personal computer (PC). The Justice Department specifies that all emergency services shall provide direct access to individuals who use T.D.D.s and computer modems.

In the past, they have communicated using a baudot modem. It still serves virtually all of the hearing and speech impaired today. It is compatible with our emergency centers. But with the advent of the personal computer, a new modem with a language called ASCII (American Standard Code for Information Interchange) appeared. Its' original design was for a business machine to communicate with another business machine, without human involvement.

However, since it is being placed into T.D.D.s, and is the norm for PCs, it presents a problem. It is not compatible with emergency centers equipment. Also there is, at this time, no technology that exists that will connect an incoming ASCII call to an ASCII modem in the emergency centers and guarantee connection.

December 31, 1991

The Honorable J. Strom Thurmond
SR-217 Russell Senate Office Building
Washington, DC 20510-4001

Dear Senator Thurmond:

I am a member of the National Emergency Number Association (NENA). I am writing to you to alert you to a flaw in the implementation rules for Title II Section 35 of the A.D.A. Law. (Hearing and Speech Impaired). Our organization supports the A.D.A. Law 100%. However, the Department of Justice, who provided these rules, have set in motion a situation that could be fatal to a hearing and speech impaired person.

The hearing and speech impaired community must communicate by using a device similar to a typewriter (called a T.D.D.). They also communicate using a personal computer (PC). The Justice Department specifies that all emergency service shall provide direct access to individuals who use T.D.D.s and computer modems.

In the past, they have communicated using a baudot modem. It still serves virtually all of the hearing and speech impaired today. It is compatible with our emergency centers. But with the advent of the personal computer, a new modem with a language called ASCII (American Standard Code for Information Interchange) appeared. Its original design was for a business machine to communicate with another business machine, without human involvement.

However, since it is being placed into T.D.D.s, and is the norm for P.C.s, it presents a problem. It is not compatible with emergency centers equipment. Also there is at this time, no technology that exists that will connect an incoming ASCII call to an ASCII modem in emergency centers and guarantee connection.

01-00717

Simply put, if a hearing impaired person places an emergency call using the ASCII mode, chances are virtually certain that the call will not be handled properly. It could disconnect, receive garbled data or make no connection at all. The result could be a possible loss of life or property. Emergency centers will be held liable for conditions over which they have no control. The hearing and speech impaired will not be served with the same quality assurance that others have come to expect of their

We need your help to keep this from happening. We feel that the reference to "computer modem" should be removed from the implementation rules until technology can assure that every T.D.D. call will be answered with the same quality as a voice placed call.

Please contact the Department of Justice and urge this change be made. Our contact is:

Transsexuality ruled disability

Associated Press

TALLAHASSEE - The firing of a Jacksonville transsexual who worked as a corrections officer was handicap discrimination according to the Florida Commission on Human Rights.

The board voted 8-1 Thursday that transsexualism is a disability and Belinda Smith - formerly Lt. William Smith - should not have been fired by the Jacksonville Sheriff's Office in 1985.

"Transsexualism is a recognized disor- it's a handicap. Commissioner Judith Kavanaugh of Sarasota said before voting.

Smith, 43, was fired after he was observed dressed as a woman while off-duty. The firing came after the 14 year veteran Smith explained plans to undergo a sex-change operation, with the prerequisite that she live and dress as a woman for two years before the surgery.

Since then, Smith has had the operation.

"This is excellent. This is as strong a ruling as we could have gotten in our favor," Smith said.

Jacksonville attorney Sam Jacobson who represents Smith on behalf of the American Civil Liberties Union said the ruling breaks new ground in Florida.

"Under a handicap law, this is the first one. I think it's a case that is going to make the world a more comfortable place for people with this trait" he said.

Jacobson and several of the commissioners said the ruling will amplify the

state's Human Rights Act of 1977. It prohibits discrimination based on reasons

Court: Officials may
See UF student Wooten pa 1-A
be sued for damages
Associated Press

WASHINGTON - State officials who violate someone's rights while performing governmental duties may be sued and forced to pay monetary damages, the Supreme Court ruled Tuesday.

The 8-0 decision in a Pennsylvania case could expose officials to costly lawsuits when they are accused of violating a Civil War-era federal law aimed at preventing abuses of power.

"Imposing personal liability on state officers may hamper their performance of public duties," Justice Sandra Day O'Connor wrote for the court.

But she said the law is clear: State officials are not immune from being sued "solely by virtue of the official nature of their acts."

In other developments, the court:

* Heard arguments in an Illinois dispute over the use of hearsay evidence in child sex abuse cases. At issue is whether juries may hear statements allegedly victimized children make to others.

The court's decision in the Pennsylvania case cleared the way for trial of a suit against Barbara Hafer, a Republican, was accused of firing 18 Democratic employees for political reasons.

The workers sued, alleging they were fired based on unsubstantiated charges that they had "bought jobs" in the auditor general's office.

Hafer was elected to her post in 1988 after a campaign in which she made the job-buying allegations.

Don't remember the date. This article was cut out of the Gainesville Sun somewhere between Oct and Dec. 1991. Front page Article was about UF Student, Wooten who died of alcohol overdose.

NOTICE:

Due to the political sensitivity of the following material and the possibility of retaliation and/or reprisal from political activist and/or individual(s) opposed to Concerned Citizens for Traditional Family Values, we are requesting the same legal protection other1 political and/or self declared minority and/or special interest group(s) are enjoying under the Federal and State Hate Crime Act. We believe this request is justifiable because of our political views which are opposed to the criminal sexual acts2,3 and/or practices of gays, lesbians and bi-sexuals, and others; because of the Political Correctness left-wing militant(s)4 who may want to suppress and/or deny our Constitutional rights to freedom of speech and thought; because of race, color, ancestry, national origin, sex, nationality, family traditional values, religious traditional values5 and/or present view(s); and because of the fact(s) that since 1989, fifty or more religious dwellings6 for worship in the State of Florida have been fire damaged and/or burnt down, eight of these dwellings being in Gainesville, Florida.

1 "Other" used in the contents of the notice of request is meant to be understood as any individual(s), interest group(s), minority group(s), political group(s) and/or parties, and/or religious organizations which may have personal and/or politically active views contrary to concerned citizens for Traditional Family Values.

2 Criminal sexual acts and/or practices refers not only to gays, lesbians and bi-sexuals, but "any" illegal sex act committed by any individual(s), male and/or female - which violates existing laws and/or another person(s) unwillingness to participate in such behavior (rape and etc).

3 In the State of Florida, as well as many other states, the sexual consenting or non-consenting acts(rape) is still on the law books as being a misdemeanor and/or felony in some cases, the degree depending upon the seriousness of the offenses.

4 Political Correctness can be a racist ideology at the national level (KKK; "equal, but separate"; South Africa) and/or it can be illegally practiced individually or collectively by some (Neo-NAZI; Yah-whe Ben Yah-whe; secular humanism; New Age Movement; Academic PC; and etc). See also "Voice of the People", by Bill Maxwell, The Gainesville Sun, Gainesville, FL, February 8, 1992, page 11 A.

5 Religious tradional values refers to the thousands of years of Western culture and other cultures which have (as far back as recorded history)and do (present and future) hold the view(s) of the importance of the family unit and/or member(s), and that the sexual acts and/or practices of gays, lesbians, and bi-sexuals are unnatural and normally wrong.

In Care of Ida Reynolds and Special Commission on sexual orientation proposal amendment

County Commissioner
P.O. Box 2877
Gainesville, FL 32602-2877

Dear Honorable Elected Officials

This letter is in addition to the letter(s) to Honorable Commissioner Leveda Brown and P. Wheat. The purpose of this particular is to make another political positional statement against the proposed sexual orientation amendment, and all other wording which may be interpret to imply any illegal criminal sexual orientation to be added to either the local anti-discrimination ordinance, or at the state level on the Florida Human Civil Rights Act of 1992 (SB's 1368 and 72). For example, gays, lesbians, bi-sexuals, transvestites, transsexuals, and all others with criminal sexual orientations could - and probably will - use the lack of clarification in what is handicap, or marital status to further their criminal cause(s): ("Transsexuallity Ruled ILLEGIBLE) 01-00723

insurance to domestic tranquality.
2.) It would violate my First Amendment Right to petition the government for redress of grievances - since the sex acts of gays, lesbians, bi-sexuals, and others with criminal sexual orientation are on the Federal and State law books as being illegal.
3.) It would violate my Seventh Amendment right to sue anyone who violates personal, physical and/or mental, boundaries of my children, my family and/or myself (See attch 4: ltr, 26 JAN 9).
4.) It would be a violation of my Eighth Amendment rights in that it would be tantamount to "cruel and unusual (mental) punishment (it would be a molestation of mine and others conscience(s) - desiring to enjoy our ancestry, pro-heterosexual, or single lifestyle of millions of years.) Supreme Court Justice O'Connor made it clear it is unconstitutional to punch prisoners in the face or to serve unappetizing food because it would bluntly ignore the concepts of dignity, civilized standards, humanity and decency that estimates the 8th Amendment (The Gainesville 26 Feb 92); how much more, then, are the victims of cruel and unusual punishment who are legally forced against Federal and State laws to protect, ignore and possibly become victims of those with criminal sexual orientation.

Sincerely,

(b)(6)

Monday, 16 Dec. 1991

Dear Honorable Commissioner Tom McKnew and Commissioners:

Bravo for you, Tom! Your stance against Ms. Gilda Josephson and her "Task Force Against Offensive Advertisement" was a timely breeze of rationality. This latest affront against the advertising practices of private businesses has the appearance of political groping for recognition and power by an apparently frustrated and hypocritical pack of "witch hunters."

And no wonder; one can only imagine their loss of political face and self-respect to the communities irritation against Police Lt. Sadie Darnell and the Commissioners On The Status Of Women presumptuousness: "letters sent by Sadie Darnell on city government stationary" (at the expense of Alachua County taxpayers - without the voice of the majority) "to US Sen. Connie Mack and Bob Graham to vote against the Supreme Court nomination of Clarence Thomas and a dozen businesses" since January of this year. This same police spokeswoman was quoted in the Gainesville Sun newspaper on 12 Dec. 91 as saying that she feels an innocent verdict for William Kennedy Smith "will intimidate rape victims?" He was found innocent, but yet it appears he has now become a victim of sexual harassment by the accuser and by Sadie's personal opinion, regardless of his innocence.

It appears that she and her self-interest group will overturn a pebble looking for a mirage of sexual exploitation of women (in advertisement), but will overlook the fact that they are slamming themselves against boulders of hypocracy. This is truly an irony and a miscarriage to their own objectives. Has Gilda Josephson been willing to send letters of "enlightenment and correction" to the owners of Cafe Risque, Fantasy Cafe, and Trader South Gatorland for exploiting women - having them dance in the nude for financial profit; and the Gainesville Sun newspaper for running phone sex ads? Would Police Lt. Sadie Darnell and her other commissioners politically intimidate and possibly even threaten legal actions against the women who sexually exploit men for financial profit or other gain by sexually suggestive nudity and/or by paid bedroom sex talk over the phone? Have they written to the publishers of PENTHOUSE, PLAYBOY, HUSTLER, and other such magazines sold here in Alachua County?

Let the commissioners on the status Of Women "enlighten and correct" their own gender first; then we, the taxpayers of Gainesville and Alachua County will gain respect, with compassion and understanding, for their concerns about possible sexual exploitation of women in advertisement.

Thus, until the commissioners on The Status Of Women assume accountability of their own gender for their part in exploitation

of women and men for financial gain, I, as do many of the

Gainesville, Florida 32614-7147

This weekend while reading the Gainesville Sun, Sunday, January 26, 1992, I came across an article in the Horizon section by Sun staff writer Bob Arndorfer. This masterful piece of public enlightenment to The Darkest Secret: sexual abuse of children... was not only deeply disturbing, but also very informative to just how serious and prevailing this hideous crime is. As a loving and caring father, it staggers my imagination and sickens me to the stomach to think how any man and/or woman victimize innocent children - who look to their parents for love and security. I can only imagine with disgust and anger what rationalization and mitigating factors defense attorneys might use to lessen the emotional and legal impact for such victimization. My emotions can sympathize with Mary's extreme solution to the sexual predators: castration or hysterectomy; but, sound reasoning and the perplexing question as to why begs for answers which both will protect children from such abuse and bring swift justice. How can humanity stoop to such degradation whereas "one in three women in the United States, and one in five men, were sexually abused as children?" Men of America, are we that sexually perverted that "95 to 98 percent of identified sexual abusers are males?" Do you hear what Ted Shaw, Bob Arndorfer, Dennis Gies, Judge Jack Singbush, Julie McCall and Gilda Josephson are saying about our gender? I, for one, am in total agreement with the Florida Legislature in passing the "Florida Sexual Predators Act" to put away for a very long time such persons as Mark Dean Schwab, Jeffery L. Dahmer, and Aileen Wuornos - all which have been accused and/or found guilty of heinous sex crimes. And what did all the alleged sex offenders have in common besides stating they themselves were sexually victimized? It appears that all had numerous homosexual, lesbian and/or bi's relationships. Indeed, children and others must have legal protection from molestation from sex predators and all others with "criminal sexual orientations." Will the courts agree with Gilda Josephson, a licensed mental health counselor and chairwoman for the Gainesville Commission on the

March 11, 1992
(b)(6)

Gainesville, FL 32606

Dear Mr. XX

Thank you for your letter of March 3, 1992, with enclosures regarding the issue of adding sexual orientation as a protected category in the County's anti-discrimination ordinance. We appreciate that you forwarded copies of your prior correspondence, including a copy of a letter dated January 26, 1992, which apparently was not received by the County or which was lost or misplaced. Please be assured that all your correspondence has been placed in the official County file of public comments and materials on this issue. The file is maintained in the County's Equal Opportunity Office and all information is available for inspection and review by the County Commissioners, as well as the public.

With regard to specific concerns expressed in your letter, if you wish to pursue the circumstances regarding the lost letter, you would need to file a complaint with the United States Postmaster, 4600 S.W. 34th Street, Gainesville, FL 32608-9998.

With regard to your concern regarding a possible human rights violation under state law, you would need to contact the Florida Commission on Human Relations, 325 John Knox Road, Building "F", Suite 240, Tallahassee, FL 32303-4113; telephone (904) 323-4115, since that agency would have jurisdiction.

Any violations you perceive against you in relation to the state law on hate crimes, and any concerns or questions regarding the church fires would need to be directed to law enforcement or the State Attorney's office, since they have jurisdiction.

I hope this information is helpful. The Board appreciates your concerns regarding the issue of sexual orientation.

Sincerely,

Leveda Brown, Chairman

(hand written partially illegible)
Tuesday November 26, 1991

Dear Honorable Commissioner(s):

As an American citizen and tax payer of ILLEGIBLE County, I am deeply concerned - as many ILLEGIBLE are - that the adding of the "sexual-orientation clause" to already existing anti-discrimination laws would be a blatant assault against historical heterosexual values and a breach of the doctrine of "Seperation of The Church and State." The passage of this clause would appear to be no more than another legal loophole ILLEGIBLE gays to broaden their market to solicit and ILLEGIBLE the morally confussed, the unsuspecting, the ILLEGIBLE, and the willful rebels of law and nature. Which species - other than mankind and dogs - practice sexual behavior as gays do? Actually, dogs don't even do some of the things ILLEGIBLE indulge themselves in. Gay-rights, which ILLEGIBLE to have its origin from secular humanism - ILLEGIBLE a religion by the U.S. Supreme Court - and heterosexual phobia, already are protected as a ILLEGIBLE interest group under the Federal and Florida ILLEGIBLE Hate Crime Act. Herein is a contradiction ILLEGIBLE dids: Gay ultra left wing radical groups such as "Stop the Morality Police (S.T.O.M.P.) and ILLEGIBLE the protection -
ILLEGIBLE
ideology and lifestyle is hostile towards christian values and standards of the heterosexual community. These morality "hate groups" driven by lewd and lascivious desires are determined to undermind social stability and morality by seeking - under existing "gay" laws - a new flesh market. Of course, they appear to be getting help from NOW, the ACLU, the NEA, and the ideologies of Political Correctness (PC) of the new Age movement. One can't help it but to wonder if - in some way - the secular humistic ideologies of anti-christian values coupled with the desired lifestyles of homosexuals are responsible for the fifty or more church fires (seven in G'ville) across the State of Florida? Under the Hate Crime Act, gays are protected from such crimes against society; but we heterosexual, law abiding citizens seem to be denied such protection. Has any of the commissioners and/or law enforcement agencies considered this

possibility? I - like the vast majority - say NO to the self interest groups (gays) seeking to add this "sexual-orientation clause" to already existing anti-discrimination laws! Additionally, I am requesting protection for my family and myself under the Federal and State Hate Crime Act.

Thank you,

who uses a wheelchair can reach all the books. Rather, a salesperson can tell the blind person how much an item costs, make a special order of brailled books, and reach the books that are out of the reach of the person who uses a wheelchair.

The legislation specifies that auxiliary aids and services includes qualified interpreters or other effective methods of making aurally delivered materials available to individuals with hearing impairments. Other effective methods may include: telephone handset amplifiers, telephones compatible with hearing aids, telecommunication devices for the deaf, closed captions, and decoders.

For example, it would be appropriate for regulations issued by the Attorney General to require hotels of a certain size to have decoders for closed captions available or, where televisions are centrally controlled by the hotel, to have a master decoder.

It is also the Committee's expectation that regulations issued by the Attorney General will include guidelines as to when public accommodations are required to make available portable telecommunication devices for the deaf. In this regard, it is the Committee's intent that hotels and other similar establishments that offer nondisabled individuals the opportunity to make outgoing calls, on more than an incidental convenience basis, to provide a similar opportunity for hearing impaired customers and customers with communication disorders to make such outgoing calls by making available a portable telecommunication device for the deaf.

It is not the Committee's intent that individual retail stores, doctors' offices, restaurants or similar establishments must have telecommunications devices for the deaf since people with hearing impairments will be able to make inquiries, appointments, or reservations with such establishments through the relay system established pursuant to title IV of the legislation, and the presence of a public telephone in these types of establishments for outgoing calls is incidental.

Open-captioning, for example, of feature films playing in movie theaters, is not required by this legislation. Filmmakers are, however, encouraged to produce and distribute open-captioned versions of films and theaters are encouraged to have at least some preannounced screenings of a captioned version of feature films.

Places of public accommodations that provide film and slide shows to impart information are required to make such information accessible to people with disabilities.

The legislation also specifies that auxiliary aids and services includes qualified readers, taped texts, or other effective methods of making visually delivered materials available to individuals with visual impairments. Additional examples of effective methods of making visually delivered materials available include: audio recordings and the provision of brailled and large print materials.

The legislation specifies that auxiliary aids and services includes

the acquisition or modification of equipment or devices. For example, a museum that provides audio cassettes and cassette players for an audio-guided tour of the museum may need to add brailled adhesive labels to the buttons on a select number of the tape-players so that they can be operated by a blind person.

The Committee wishes to make it clear that technological advances can be expected to further enhance options for making

AMERICANS WITH DISABILITIES ACT OF 1990

May 15, 1990.-Ordered to be printed

Mr. Hawkins, from the Committee on Education and Labor, submitted the following

REPORT
together with
MINORITY VIEWS

[To accompany H.R. 2273 which on May 9, 1989, was referred jointly to the Comm-ittee on Education and labor, the Committee on Energy and Commerce, the Com-mittee on Public Works and Transportation, and the Committee on the Judiciary]

[Including cost estimate of the Congressional Budget Office]

The Committee on Education and Labor, to whom was referred the bill (H.R. 2273) to establish a clear and comprehensive prohibition of discrimination on the basis of disability, having considered the same, report favorably thereon with an amendment and recommend that the bill as amended do pass.

The amendment is as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

SECTION 1: SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.--This Act may be cited as the "Americans with Disabilities Act of 1989".

(b) TABLE OF CONTENTS.--The table of contents is as follows:

Sec. 1. Short title; table of contents.
Sec. 2. Findings and purposes.
Sec. 3. Definitions.
TITLE I--EMPLOYMENT
Sec. 101. Definitions.
Sec. 102. Discrimination.
Sec. 103. Defenses.
Sec. 104. Illegal drugs and alcohol.
Sec. 105. Posting notices.
Sec. 106. Regulations.
Sec. 107. Enforcement.
Sec. 108. Effective date.

29-939

public telephone in these types of establishments for outgoing calls is incidental.

Open-captioning, for example, of feature films playing in movie theaters, is not required by this legislation. Filmmakers, are, however, encouraged to produce and distribute open-captioned versions of films, and theaters are encouraged to have at least some pre-announced screenings of a captioned version of feature films.

Places of public accommodations that provide films and slide shows to impart information are required to make such information accessible to people with disabilities.

The legislation also specifies that auxiliary aids and services include qualified readers, taped texts, or other effective methods of making visually delivered materials available to individuals with visual impairments. Additional examples of effective methods of making visually delivered materials available include audio recordings and the provision of brailled and large print materials.

The legislation specifies that auxiliary aids and services include the acquisition or modification of equipment or devices. For example, a museum that provides audio cassettes and cassette players for an audio-quided tour of the museum may need to add brailled adhesive labels to the buttons on a select number of the tape-players so that they can be operated by a blind person.

The Committee wishes to make it clear that technological advances can be expected to further enhance options for making meaningful and effective opportunities available to individuals with disabilities. Such advances may require public accommodations to provide auxiliary aids and services in the future which today would not be required because they would be held to impose undue burdens on such entities.

Indeed, the Committee intends that the types of accommodation and services provided to individuals with disabilities, under all of the titles of this bill, should keep pace with the rapidly changing technology of the times. This is a period of tremendous change and growth involving technology assistance and the Committee wishes to encourage this process. (See, for example, the enactment in 1988 of P.L. 100-407, the Technology Related Assistance for Individuals with Disabilities Act). Information exchange is one of the areas where there are still substantial barriers, but where great strides are being made. Access to time sensitive print information, whether in the press or in government documents (such as notices of grants and contracts in the Federal Register or the Commerce Daily) is one of the cornerstones of our free society and of equal opportunity and access. It is not coincidental that access to information was the first guarantee extended by the Bill of Rights.

For these reasons, the Committee expects the Federal agencies charged with the implementation of this Act to take special interest in being aware of the possibilities relating to information dis-

semination and to make special efforts to share this information through technical assistance programs. Programs such as the Newspapers for the Blind Program in Flint, Michigan, a program which has been nationally recognized and is in the process of being emulated, provide an excellent example of what can be done in this area.

01-00736

Ret. 5/1/92
SBO:WRW:rjc
DJ#192-180-04976

MAY 07 1992

The Honorable Robert S. Walker
Member, United States House of
Representatives
2369 Rayburn House Office Building
Washington, D.C. 20515

Dear Congressman Walker:

This letter responds to your request for assistance on behalf of your constituent, Mr. Charles Price. Mr. Price has asked about his responsibility as a manager of a community park and pool to comply with the Americans with Disabilities Act (ADA). In addition, he has asked about Federal grant money available to bring his facility into compliance with the ADA.

There are no Federal loan programs directly addressed to meeting the costs of complying with the requirements of the ADA. Nor has Congress appropriated any money specifically earmarked to defray the costs to private and public entities of compliance with the ADA. However, the Department of Housing and Urban Development (HUD) makes available community development block grants designed to aid low and moderate income households and communities. These grants may be used to remove architectural barriers that restrict accessibility of publicly owned and privately owned buildings, facilities, and improvements. For more information on how to apply for a community development block grant, your constituent may contact HUD's Office of Block Grant Assistance at (202) 708-3587.

In addition, if the community park and pool is a private entity subject to title III of the ADA, tax legislation may help defray the cost of making alterations. As amended in 1990, the Internal Revenue Code (IRS) allows a deduction of up to $15,000 per year for expenses associated with removal of qualified

architectural and transportation barriers. In the same law, Congress established the Disabled Access Credit. This credit is available to businesses whose receipts in the preceding tax year were not more than $1,000,000 or who employed no more than 30 full-time employees. Qualifying businesses may claim a

Records, CRS, Worthen, Friedlander, Oneglia, McDowney, Craig
:UDD:Worthen.Citizen.Cong.Walker.Grants.4.92
01-00737

credit of up to 50 percent of the eligible access expenditures that exceed $250, but do not exceed $10,250. The credit may be elected through IRS form 8826. If the community park and pool is a public entity subject to title II, neither the tax credit nor tax deduction provisions apply.

Mr. Price should be advised that the ADA requirements applicable to both public and private entities do not include specific accessibility standards for new construction or alterations of the unique aspects of pools and parks. However, facilities and features commonly associated with pools and parks, such as restrooms, parking lots, locker rooms, and routes to and from a pool or park, must comply with the ADA accessibility standards.

We hope you find this information of assistance.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

CONGRESSIONAL INQUIRY

Mr. Charles Price
2957 Main Street
Conestoga, Pennsylvania 17516

Mr. Price runs a community park and pool. He recently received information relative to the Americans with Disabilities Act. He notes that the facility has a lot of work to do to bring the facilities up to standard. He notes they will have to start the "upgrade" very soon and wants to know if there are any federal funds available for this type of upgrading. He also wants to know, if there is money available, if they would be reimbursed, should they begin renovations now. He is interested in federal grants and very low interest loans.

Your attention to this request is appreciated.

MAY 8 1992

Mr. Donald Springer Hawley, PE
Post Office Box 102
Ruidoso, New Mexico 88345

Dear Mr. Hawley:

This letter responds to your correspondence requesting information about the provisions of the Americans with Disabilities Act, 42 U.S.C. 12101-12213 (ADA). The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA accessibility standards. However, it does not constitute a legal interpretation and it is not binding on the Department.

Your letter specifically inquires as to the means by which title III of the ADA will be enforced.

Title III provides for enforcement by both private litigation and by government litigation. Under Section 308(a), Title III may be enforced by a private individual through a law suit against a public accommodation to obtain a court order requiring compliance with Title III. The private individuals may obtain reasonable attorney fees, but may not obtain compensatory or punitive damages. Under Section 308(b), Title III may be enforced by the Department of Justice through a law suit to obtain not only a court order requiring compliance, but also monetary damages (but not punitive damages) and a civil penalty not exceeding $50,000.00 for a first violation and not exceeding $100,000.00 for a subsequent violation.

The Department has received and is investigating complaints of title III violations from all over the country. There are also many active disability rights groups around the country that may choose to pursue litigation to enforce the ADA.

cc: Records Chrono Wodatch Magagna Beard.ta.308.hawley
arthur T. 4/28/92
01-00740

I enclose a copy of the Department's Title III Regulations and a copy of the Title III Technical Assistance Manual which may further clarify obligations under and enforcement of Title III.

We hope that this information is useful to you in evaluating the rights and obligations of your customers under the ADA.

Sincerely,

Joan A. Magagna
Deputy Director
Office on the Americans with Disabilities Act

Dear Sirs,

I am a registered professional engineer interested in assisting firms to comply with Title III of the Disabilities Act, and I understand that you are the authority which will enforce compliance. How will this be enforced? I understand that the local building department will not be involved, and I wonder how much attention firms will pay to compliance if they feel that enforcement is remote and not likely to be effective. Can you supply me with information or advice as to how I can convince firms that they should make the investment to comply with Title III?

Yours sincerely,

Donald Springer Hawley, PE

DJ 202-PL-18

MAY 11, 1992

Mr. Mark Lawrence, General Manager
International Inn
662 Main Street
Hyannis, Massachusetts 02601

Dear Mr. Lawrence:

This letter is to follow up my May 11, 1992, letter to you regarding the Americans with Disabilities Act (ADA). The paragraph that begins at the top of page 2 is not totally accurate. That paragraph relates to alterations to guest rooms. ADA Accessibility Guidelines (ADAAG) require that when guest rooms are being altered in an existing facility, at least one sleeping room or suite shall be made accessible for each 25 sleeping rooms, or fraction thereof, of the total number of rooms being altered until the total number of such accessible rooms meets the number required by ADAAG for new construction. The total number of accessible rooms required is not a fixed percentage but is set forth in a table in ADAAG. My earlier letter had stated that all altered guest rooms were required to be made accessible until 5% of the total was reached. I have enclosed a copy of the Department's Title III regulations which includes ADAAG as an Appendix. See generally ADAAG Section 9 and specifically 9.1.5 and 9.1.2.

I regret the confusion and hope that this provides clearer guidance for you. Please feel free to contact this office if we can be of further assistance.

Sincerely,

Joan A. Magagna
Deputy Director
Office on the Americans with Disabilities Act

DJ 202-PL-18

MAY 11 1992

Mr. Mark Lawrence, General Manager
International Inn
662 Main Street
Hyannis, Massachusetts 02601

Dear Mr. Lawrence:

This letter responds to your correspondence with several offices of the Department of Justice seeking information about the provisions of the Americans with Disabilities Act (ADA). The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA accessibility standards. However, it does not constitute a legal interpretation and it is not binding on the Department.

Your letter describes various measures the International Inn has taken to comply with the ADA and asks for our further suggestions. You inquire specifically whether 5% of the total number of guest rooms must be made accessible immediately.

We commend you for taking steps to bring your facility into compliance with the ADA. However, short of conducting an in-depth compliance review, we cannot assess the sufficiency of those efforts.

With respect to the 5% requirement, this Department is not authorized to grant a waiver of any statutory requirement. However, the extent of your obligation under the ADA depends on whether you are planning guest room renovations in the ordinary course of business or whether your intent is to make alterations only insofar as required by the ADA.

cc: Records; Chrono; Wodatch; Magagna.
:uddl:udd:magagna:pl.18

When a public accommodation is engaged (after January 26, 1992) in an alteration or remodeling of an existing facility in the ordinary course of business, it must comply with the ADA Accessibility Guidelines (ADAAG) to the maximum extent feasible--that is, unless it is virtually impossible to comply because of the structure of the building being altered. Cost is not a consideration. This means that all renovations to guest rooms must comply with ADAAG until the requisite number of rooms are made accessible. Thus, for example, if you now have no accessible rooms and plan to renovate a number of rooms each year, making only one per year accessible, that would not be permissible under the ADA. If you plan full renovations of any rooms, every room so renovated must comply with ADAAG to the maximum extent feasible until 5% of the rooms are made fully accessible. If minor alterations are planned, the altered features in 5% of the rooms must comply with ADAAG.

If no alterations are planned in the ordinary course of business, the hotel's obligation is less rigorous. It must remove architectural barriers to accessibility where it "readily achievable" -- that is, where the removal can be done easily and without much difficulty or expense. There are a number of factors to be used in determining whether the removal of a particular barrier is readily achievable. These include: the nature and cost of the action; the financial resources available both to the site and the parent organization; the size and number of employees at the site and overall; and the relationship of the sites to the parent organization. The hotel must take these factors into account in determining whether making one room per year accessible fulfills the barrier removal obligations.

I am enclosing a copy of the Department's Title III Technical Assistance Manual which may further assist you in understanding your obligations under the ADA. We hope that this information is useful to you.

Sincerely,

Joan A. Magagna

International Inn
662 MAIN STREET HYANNIS, CAPE COD, MA 02601 (508) 775-5600

February 3, 1992

Wayne Budd
United States Attorney General
U.S. DEPARTMENT OF JUSTICE
Washington, DC 20530

Dear Mr. Budd,

In our endeavor to conform to the Americans with Disability Act, our Controller contacted the Massachusetts Office on Disability and spoke with Bruce Bruneau. A meeting was set up for January 13, 1992 and the following persons were in attendance:

Bruce Bruneau, Massachusetts Office on Disability
Pam Berkley and Julie Nolan, Cape Organization for Rights of the Disabled
Arthur D. Rittel, President, International Inn
Mark Lawrence, General Manager, International Inn
Paul Larsen, Chief Engineer, International Inn

Let me take this opportunity to state for the record my impression of these fine ladies and gentlemen and their commitment to this cause. On the date of our appointment we experienced a fierce snowstorm and anticipated their cancellation. However, punctually at 10:00 AM there these individuals were, ready, willing, and able.

We toured the entire property noting their recommendations in regards to conforming our Sleeping Rooms, Stairways, Indoor and Outdoor Pool accessibilty, certain areas of our Registration Lobby, i.e., height of Registrations Desk, Public Restrooms, and Dining Room.

The following will outline each area, along with their recommendations, and what we are doing to conform to these regulations.

-Sleeping Rooms: Presently we lodge four Accessible Accommodations. The only recommendations made to each of these rooms is to change the swing of the door which we anticipate being completed in the near future.

-Stairway: It was recommended that we close in the risers for the stairway located in the Lobby. This has been completed.

-Indoor Pool: It was suggested to us that we build a ramp leading from the Hallway to the Pool Entrance with a landing located at the turn in the Hallway.
This, too, has been completed.

-Changing Rooms (Located in the Indoor Pool): Widening of the entryways to 36" and building one 5' X 6' Stall to replace the existing stalls was recommended. Also to remove existing vanity and replace with an accessible sink that meets all regulations. At this time, we have completed the widening of the entryways and bringing the interior up to regulation is in process. We are receiving estimates from bidders for the installation of the vanity.

-Outdoor Pool: No recommendations were made due to the inclement weather, however, it has come to our attention that a ramp will be needed to facilitate access to the pool area. In the case of both the Indoor and Outdoor Pools a lift must be installed to enable the disabled full use of these amenities.

-Registration Lobby: Many recommendations were made as outlined below and we intend to adhere to all of them.

1). Portico: Our slated Entrance Way must be regraded for a more accessible approach to the Front Doors.
2). Registration Desk: A lower-level desk will be installed to enable wheelchair registration.
3). Public Phone: Our Chief Engineer has been in touch with New England Telephone to replace existing equipment with equipment that conforms.
4). House Phone: Our Chief Engineer is presently constructing a split-level phone center to be installed upon completion.
5). Public Restrooms: It was suggested that we create a Unisex Bathroom due to the physical restrictions that are present. We are consulting with Contractors to submit plans for this reconstructive project. This project should be completed by April 1, 1992.

-Dining Room: A tour of the Dining Room was conducted and it appears we meet all required regulations.

In regards to our Accessible Guest Rooms Quota of 5% of the total number of Guest Rooms, we would like to seek temporary relief in that we presently
01-00747

have four such rooms and wish to complete the quota on a scale of one room per year for the next four years. We seek this relief simply because of the hard economic times we are all experiencing in the Lodging Industry.

My President, Arthur Rittel, is also owner and operator of The Country Squire Motor Lodge located at 206 Main Street, Hyannis, MA. As this property utilizes less than 25 employees, grosses less than one million dollars annually, and is only open seven months of the year, it is not required to comply until the required date of July 26, 1992. However, in Mr. Rittel's attempt to be an example to others in our community, he intends to begin renovations prior to the hotels opening in April 1992. In this regard, a meeting has been established with The Cape Organizations for the Rights of the Disabled (CORD) to discuss necessary compliance.

I would welcome any suggestions you may have in our endeavor to comply to this long awaited Legislative Ruling. May I have a reply to our request regarding Accessible Rooms Quota? If you require any additional information, please do not hesitate to contact me personally. I anxiously await your reply.

Yours Sincerely,

THE INTERNATIONAL INN

Mr. Chandler Rand
Attorney
Mental Health Advocacy Project
111 West St. John, Suite 315
San Jose, California 95113

Dear Mr. Rand:

This is in response to your letter requesting information about the Americans with Disabilities Act (ADA).
The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

You inquire whether the ADA covers public housing and subsidized housing. Public housing is typically owned and operated by a State or local government entity. Title II of the ADA prohibits discrimination on the basis of disability in all of the programs, activities, and services of State and local government entities. Public housing operated by a State or local government entity would be considered a program, activity or service and is thus covered by title II.

Strictly residential facilities that are privately owned are not otherwise covered by the ADA. Subsidized housing is typically owned and operated by private entities. Title II does not cover a private entity simply because it receives State or local financial assistance. However, any private entity that receives Federal financial assistance, as many subsidized housing facilities do, would be covered by section 504 of the Rehabilitation Act which has similar obligations to those of title II regarding nondiscrimination on the basis of disability.

cc: Records; Chrono; Wodatch; Magagna.
:uddl:udd:magagna:pl.113
01-00749

I have enclosed a copy of this Department's Title II Technical Assistance Manual which further describes the coverage of title II and also provides some discussion of section 504.

I hope this information will be useful to you.

Sincerely,

Joan A. Magagna
Deputy Director
Office on the Americans with Disabilities Act

Enclosure

(Hand written)

March 10, 1992

To Whom it may concern:

I read the handbook entitled: The Americans With Disabilities Act Questions and Answers. I believe it was published by the U.S. Equal Employment Opportunity Commission and the U.S. Department of Justice Civil Rights Division. It was printed by the National Institute on Disability and Rehabilitation Research (July, 1991).

I have a question: Under the miscellaneous section it states "All Government facilities" are covered and yet it then states residential apartment units are covered by the Fair Housing Act. Here's my question:

Does the ADA Cover
1 Public Housing?
2 Subsidized Housing?

Thank You.

Ms. (b)(6)
Gainesville, New York 10923

Dear Ms. XX

This letter responds to your correspondence requesting information about the application of the Americans with Disabilities Act (ADA) to churches. The ADA authorizes the Department of Justice to provide technical assistance to individuals or entities having rights or responsibilities under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation, and it is not binding on the Department.

Section 307 of the ADA provides that "[t]he provisions of this title shall not apply to . . . religious organizations or entities controlled by religious organizations, including places of worship." As noted in the preamble to the ADA title III regulation:

> [T]he ADA's exemption of religious organizations and religious entities controlled by religious organizations is very broad, encompassing a wide variety of situations. Religious organizations and entities controlled by religious organizations have no obligations under the ADA. Even when a religious organization carries out activities that would otherwise make it a public accommodation, the religious organization is exempt from ADA coverage. Thus, if a church itself operates . . . a private school, or a diocesan school system, the operations of the . . . school or schools would not be subject to the ADA or [the title III regulations]. The religious entity would not lose its exemption merely because the services provided were open to the general public. The

test is whether the church or other religious organization operates the public accommodation, not which individuals receive the public accommodation's services.

cc: Records; OADA; Wodatch; Breen; Beard; Arthur
01-00752

56 Fed. Reg. 35,554 (July 26, 1991).

Nonreligious entities may be subject to title III when operating places of public accommodation in the facilities of a religious organization. A nonreligious entity running a place of public accommodation -- such as a community theatre in a church auditorium -- is exempt when the space is donated by the church. However, the public accommodation (i.e. the community theatre) -- but not the church itself -- is covered when the space is rented (for money or any other consideration) from the church. See 56 Fed. Reg. 35,554 (July 26, 1991); Department of Justice ADA Title III Technical Assistance Manual SIII-1.5200 (1992).

A religious entity, however, is not exempt from the employment requirements of title I of the ADA, which go into effect on July 26, 1992, if it has 25 or more employees. Moreover, if a religious entity receives Federal funds, it is subject to section 504 of the Rehabilitation Act of 1973, as amended, 29 U.S.C. S794, which prohibits disability discrimination in federally assisted programs.

I hope that this information is useful to you in understanding the requirements of the ADA.

Sincerely,
Philip L. Breen
Special Legal Counsel
Office on the Americans with Disabilities Act
01-00753

III-4.4200

MAY 12 1992

Ms. (b)(6)
Tenton Falls, New Jersey 07724

Dear Ms. XX

This letter responds to your correspondence requesting information about the provisions of the Americans with Disabilities Act (ADA). The ADA authorizes the Department of Justice to provide technical assistance to individuals or entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

You state that you use a wheelchair and cannot go down the aisles at a book store because there are temporary displays set up in the aisles. Book stores are subject to the provisions of title III of the ADA which requires the removal of barriers, such as shelving that impedes access by wheelchair users, if removal is "readily achievable." The ADA defines "readily achievable" to mean easily done and without much difficulty or expense. In many circumstances, it will not be difficult or expensive to make aisles wide enough for access by persons using wheelchairs. The ADA regulations indicate, however, that removing or reconfiguring shelves would not be considered readily achievable if it would result in a "significant loss of selling or serving space."

If barrier removal is not readily achievable, then a store must take other readily achievable measures to make its goods and services available to persons with disabilities. Retrieving

books for a customer may be an appropriate way to do this but only if barrier removal is not readily achievable. The factors considered in determining whether the removal of a particular barrier is readily achievable are: the nature and cost of the action; the financial resources available both to the store and any parent organization; the size of the business and number of employees, and the relationship of the businesses to the parent organization.

cc: Records Chrono Wodatch Magagna Beard.ta.302baiv. xx(b)(6)
arthur T. 5/8/92

01-00754

You also inquired what steps you could take to resolve your problem with the book store. Individuals may file law suits under the ADA to secure their rights and you may wish to consult an attorney to explore this option. This Department investigates complaints of discrimination and can take enforcement action where there is a pattern or practice of discrimination or a denial of rights raising an issue of general public importance. A Title III Complaint Information Sheet is enclosed.

I hope that this information is useful to you in understanding your rights under the ADA.

Sincerely,
Joan A. Magagna
Deputy Director
Office on the Americans with Disabilities Act

Tinton Falls NJ 07724

March 3, 1992

Dear Sirs

I have been in a wheelchair for 13 years and with the passing of the ADA I am beginning to have the freedom to browse and shop I had before my disability.

However I seem to be having quite a problem

with Encore Books, Shrewsbury Plaza, Shrewsbury, NJ 07701.

The store has many temporary displays set up in its aisles which prohibit me from going into the aisles to look for books.

I spoke to the manager

01-00756

about this problem and he said the legal department had advised him that having some one get books for me satisfied the ADA regulations.

In reading the ADA information from the Justice Department I believe he is wrong.

These are temporary racks
and displays, not walls or
permanent fixtures. In fact
I am able to push & lift
most of them, when
needed (But it really would be messy).

The statement that
they will get books for
me tells me they don't
really want me there.

How can I tell them

01-00757

to get the books, when
I don't know what's there.
Am I not to browse as
other shoppers do? Cannot
I make my own selections?

What must I do to get

this store to clear its aisles? How do I get help and from whom?

I remain respectfully yours,

(b)(6)

Washington, D.C. 20530

Mr. xx(b)(6)
XX
Sodus Point, New York XX

Dear Mr. XX

This letter responds to your correspondence requesting information about the Americans with Disabilities Act (ADA). In your letter you note that because of the short-term memory loss

resulting from your head injury, it was necessary for you to tape record the November 2, 1991, meeting of the board of directors of the New York State Head Injury Association, and that this accommodation was denied to you.

The ADA authorizes the Department of Justice to provide technical assistance to individuals or entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation, and it is not binding on the Department.

Entities covered by either title II (State and local government) or title III (public accommodations and commercial facilities) of the ADA are required to make their programs and activities accessible to individuals with disabilities. As noted by S 36.302 of the title III regulation issued by the Department of Justice, "[a] public accommodation shall make reasonable modifications in policies, practices, and procedures when . . . necessary to afford . . . services, . . . to individuals with disabilities, unless the public accommodation can demonstrate that making the modifications would fundamentally alter the nature of the . . . service . . . ." 28 C.F.R. S 36.302(a). Similar language may be found in the title II regulation. 28 C.F.R. S 35.130(b) (3) (ii).

The ADA was not yet in effect at the time of the November 2, 1991, meeting. Both title II and title III of the Americans with Disabilities Act (ADA) took effect on January 26, 1992. However, if the New York State Head Injury Association received Federal financial assistance, it would be required to conform to section 504 of the Rehabilitation Act of 1973. The obligations under section 504 are similar to those under the ADA.

cc: Records; OADA; Wodatch; Bowen; Breen; Beard; Arthur
01-00759

If you wish to file a complaint concerning the November 2, 1991, incident, you should contact the Office for Civil Rights of the United States Department of Education, which has jurisdiction over alleged violations of section 504 by grantees of the Department of Education.

We hope that this information is useful to you in evaluating your rights under the ADA.

Sincerely,

Philip L. Breen
Special Legal Counsel
Office on the Americans with Disabilities Act

Washington, D.C. 20530
MAY 12 1992

Frank H. Burder, President
Tacala, Inc.
500 Chase Park South, Suite 108
Birmingham, Alabama 35244

Dear Mr. Burder:

This letter responds to your correspondence regarding your efforts to comply with the Americans with Disabilities Act (ADA). The ADA authorizes the Department of Justice to provide technical assistance to individuals or entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation, and it is not binding on the Department.

Depending on the context, title III of the ADA imposes a range of compliance standards on private entities regarding physical barriers in places of public accommodation. When a public accommodation is engaged in new construction of a facility, it must comply with the accessibility provisions of the ADA and the ADA Accessibility Guidelines (ADAAG) established pursuant to it. When a public accommodation is engaged in an alteration or remodeling of an existing facility, it must comply with ADAAG's requirements for alterations.

When a public accommodation is engaged in neither new construction nor alteration of a facility, then a significantly less rigorous accessibility obligation is imposed. The public facility must remove any physical barriers to individuals with disabilities where the removal of those barriers is "readily achievable" -- that is, where the removal can be done easily and without much difficulty or expense.

The regulations issued by the Department of Justice discuss the factors that are to be used in determining whether the removal of a particular barrier is readily achievable. These include the nature and cost of the action, the financial resources available both to the site and the parent organization, the size and number of employees at the site and overall, and the relationship of the site to the parent organization. A copy of these regulations is enclosed.
cc: Records; OADA; Wodatch; Breen; Beard; Arthur
01-00761

The removal of existing physical barriers to your restrooms should be evaluated under the "readily achievable" standard. Where removal of all barriers is not readily achievable, you must still take whatever steps you can under that standard to remove barriers. In addition, the obligation to remove any existing barriers is an ongoing one. What is not readily achievable today may be readily achievable next year.

We hope that this information is useful to you in evaluating your compliance with the ADA.

Sincerely,

Philip L. Breen
Special Legal Counsel
Office on the Americans with Disabilities Act

Enclosure

MAY 12 1992

DJ 202-PL-00104

Mr. Duane L. Cobeen
Cobeen, Tsuchida & Associates, Inc.
210 Ward Avenue, Suite 240
Honolulu, Hawaii 96814

Dear Mr. Cobeen:

I am responding to your request for clarification of the effective dates of various provisions of title III of the Americans with Disabilities Act of 1990 (ADA), Pub. L. 101-336, 104 Stat. 327 (July 26, 1990), 42 U.S.C.A. SS 12101 et seq., and this Department's regulation implementing title III, 56 Fed. Reg. 35544 (July 26, 1991), to be codified at 28 C.F.R. pt. 36.

The ADA authorizes the Department to provide technical assistance to individuals and entities having rights or responsibilities under the Act. This letter provides informal guidance to assist you in understanding the ADA. However, this technical assistance does not constitute a determination by the Department of Justice of your rights or responsibilities under the ADA and it is not binding on the Department of Justice.

The new construction requirements of the ADA apply to any place of public accommodation or commercial facility first occupied after January 26, 1993, for which the last application for a building permit or permit extension was completed after January 26, 1992. If a facility is constructed under a permit for which the application was completed prior to January 26, 1992, or the facility is occupied before January 26, 1993, the facility is not subject to the new construction requirements of the ADA. Alterations to places of public accommodation and commercial facilities are required to comply with the ADA accessibility standards if the alteration began after January 26, 1992.

cc: Records Chrono Wodatch Bowen Magagna
Blizard.udd:ada.interpretation.cobeen arthur T. 4/17/92

01-00763

In addition, existing places of public accommodation are required to remove architectural, communication, and transportation barriers to the extent that it is readily achievable to do so. This requirement took effect on January 26, 1992. This Department's regulation provides that the duty to remove barriers is a continuing obligation under which each public accommodation is required to remove barriers in its facilities, to the extent that it is readily achievable to do so, until the facility complies with the accessibility standards that would apply if the facility was being altered.

This Department recently issued a technical assistance manual to assist individuals and entities subject to the ADA to understand the requirements of title III. I have enclosed a copy for your information. I hope that this information is helpful to you.

Sincerely,

Joan A. Magagna
Deputy Director
Office on the Americans with Disabilities Act
Civil Rights Division

RE: ADA EFFECTIVE DATES

Dear Mr. Wodach:

I attended a seminar, Designing for Accessibility, October 22 and 23, 1990, here in Honolulu in which you participated. I was impressed with you excellent presentation and knowledge of the various acts.

We have been trying to advise our clients, and as Chairman of the Building Codes Committee for the Honolulu Council A.I.A., our entire membership of the progress and implementation of the Fair Housing Amendments Act and the Americans with Disabilities Act. On the most part, with the help of your shared insight, the implementation of these Acts is clear, but we have come up with divided interpretations on an important segment of the A.D.A.

A. New Structures, January 26, 1993. (Sec. 36.401)

B. Alterations, January 16, 1992. (Sec. 36.402)

C. Existing Structures. (Sec. 36.402)

Our State of Hawaii Commission on Persons with Disabilities, Mr. Bruce Clark says existing structures must comply by January 26, 1992.

A call to the U.S. Department of Justice (A Ms. Brenda
) produced a date of January 26, 1995.
Please advise us. A lot people are anxiously awaiting a clear answer on this question.

Very truly yours,

Duane L. Cobeen, A.I.A.

MAY 12 1992

Mr. Donald R. Holt
Schroeder & Holt
212 West Wisconsin Avenue
Milwaukee, Wisconsin 53203
Dear Mr. Holt:

This letter responds to your correspondence requesting technical assistance with respect to the provisions of the Americans with Disabilities Act (ADA). The ADA authorizes the Department of Justice to provide technical assistance to individuals or entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA accessibility standards. However, it does not constitute a legal interpretation, and it is not binding on the Department.

You inquire whether it is correct to construe Section 36.401(a)(2)(i) [and (ii)] (which applies to new construction) to mean "that if permits are applied for prior to January 26, 1992, a building would not technically have to be in compliance, even if was completed after January 26, 1992, and also that if a permit is applied for after January 26, 1992, and is occupied prior to January 26, 1993, it would not have to comply."

If by "permits are applied for" you mean that the last application for a building permit or permit extension is certified to be complete, or received by the relevant local government agency, and if by "occupied" you mean that a

certificate of occupancy has been issued, then your understanding appears to be correct.

We hope that this information is useful to you in evaluating your compliance with the ADA.

Sincerely,

L. Irene Bowen
Deputy Director
Office on the Americans with Disabilities Act

December 9, 1991

Ms. Barbara S. Drake
Deputy Assistant Attorney General
Civil Rights Division
U.S. Department of Justice
Washington, D.C. 20530

Dear Ms. Drake:

I have tried on many occasions to call your Information Hotline, and I have never been able to get through. Your machine asks that I wait on the line, repeating itself for about fifteen minutes, and then ultimatly disconnecting me.

I was calling to ask for a clarification of Paragraph 36.401(a)(2)(i) of Subparagraph D. I would interpret this section to say that if permits are applied for prior to January 26, 1992, a building would not technically have to be in compliance, even if it was completed after January 26, 1992, and also that if a permit is applied for after January 26, 1992 and is occupied prior to January 26, 1993, it would not have to comply.

Please advise whether my interpretation is correct, and if not, what is the

correct interpretation of this section?

Sincerely,

Donald R. Holt

01-00767

T. 04/15/92

202-PL-00109

MAY 12 1992

Mr. Paul G. Johnson
Smith, Hinchman & Grylls Associates, Inc.
150 West Jefferson, Suite 100
Detroit, MI 48226

Dear Mr. Johnson:

I am responding to your request for an advisory opinion concerning the application of the new construction and barrier removal requirements of title III of the Americans with Disabilities Act of 1990 (ADA), Pub. L. 101-336, 104 Stat. 327 (July 26, 1990), 42 U.S.C.A. SS 12101 et set., and this Department's regulation implementing title III, 56 Fed. Reg. 35544 (July 26, 1991), to be codified at 28 C.F.R. pt. 36, to your client, a private entity that is constructing a highrise office tower.

The ADA authorizes the Department to provide technical assistance to individuals and entities that are subject to the Act. This letter provides informal guidance to assist you in understanding the ADA. However, this technical assistance does not constitute a determination by the Department of Justice of your client's rights or responsibilities under the ADA and it is

not binding on the Department of Justice.

The new construction requirements of the ADA apply to any place of public accommodation or commercial facility first occupied after January 26, 1993, for which the last application for a building permit or permit extension was completed after January 26, 1992. If a facility is constructed under a permit for which the application was completed prior to January 26, 1992, or the facility is occupied before January 26, 1993, the facility is not subject to the new construction requirements of the ADA.

However, even if your facility is not subject to the new construction requirements because it receives its certificate of occupancy before January 26, 1993, it will be subject to a continuing obligation to remove architectural, communication, and transportation barriers if it is a public accommodation. Under this continuing obligation, each public accommodation is required to remove barriers in its facilities, to the extent that it is

cc: Records, Chrono, Wodatch, Blizard
udd:Blizard.ada.interpretation.johnson

readily achievable to do so, until the facility complies with the accessibility standards that would apply if the facility was being altered.

This Department recently issued a technical assistance manual to assist individuals and entities subject to the ADA to understand the requirements of title III. I have enclosed a copy for your information. I hope that this information is helpful to you.

Sincerely,

L. Irene Bowen

RE: ADA/ADAAG Interpretation

Dear Sirs:
I recently spoke on the telephone with Michelle, of your office, for assistance in an interpretation of ADA/ADAAG. Our project consists of eight floors of office space to be completed within a newly constructed, but as yet incomplete highrise office tower. The majority of core and shell construction

on this building is nearly complete, including central facilities such as toilet rooms, elevators, structure, exterior walls, mechanical and electrical systems, and main entry lobbies. Our client will be contracting for construction services to complete partitions, finishes, final mechanical and electrical systems, and other required items on eight floors which they will lease within this highrise tower. We are currently finalizing contract documents for construction to begin in mid-December of this year, with a scheduled completion date prior to year-end 1992. Based on our interpretation of ADA/ADAAG and my conversations with Michelle, and Lucille Johansen at the A.T.B.C., we will proceed as follows:

1. All core spaces and services which are in place or nearing completion, are considered to be existing construction. We will not attempt to modify any of these spaces which may not be in full compliance with all of the detailed provisions of ADA/ADAAG. We will review these facilities and recommend to our client that revisions be made to toilet rooms, if required by existing conditions to comply with Section 36.304, C, 3 of ADA (see attached copies).

2. New facilities (our project) within the eight floors will be designed and constructed to comply with ADA/ADAAG, unless prohibited by fixed elements of the completed core building.

01-00771

(2) Illustration-medical specialties. A health care provider may refer an individual with a disability to another provider. If that individual is seeking, or requires treatment or services outside of the referring provider's area of specialization, and if the referring provider would make a similar referral

for an individual without a disability who seeks or requires the same treatment or services. A physician who specializes in treating only a particular condition cannot refuse to treat an individual with a disability for that condition, but is not required to treat the individual for a different condition.

(c) Service animals-(1) General. Generally, a public accommodation shall modify policies, practices, or procedures to permit the use of a service animal by an individual with a disability.

(2) Care or supervision of service animals. Nothing in this part requires a public accommodation to supervise or care for a service animal.

(d) Check-out aisles. A store with check-out aisles shall ensure that an adequate number of accessible check-out aisles are kept open during store hours, or shall otherwise modify its policies and practices, in order to ensure that an equivalent level of convenient service is provided to individuals with disabilities as is provided to others. If only one check-out aisle is accessible, and it is generally used for express service, one way of providing equivalent service is to allow persons with mobility impairments to make all their purchases at that aisle.

S 36.203 Auxiliary aids and services.

(a) General. A public accommodation shall take those steps that may be necessary to ensure that no individual with a disability is excluded, denied services, segregated or otherwise treated differently than other individuals because of the absence of auxiliary aids and services, unless the public accommodation can demonstrate that taking those steps would fundamentally alter the nature of the goods, services, facilities, privileges, advantages, or accommodations being offered or would result in an undue

burden, i.e., significant difficulty or expense.

(b) Examples. The term "auxiliary aids and services" includes-

(1) Qualified interpreters, notetakers, computer-aided transcription services, written materials, telephone handset amplifiers, assistive listening devices, assistive listening systems, telephones compatible with hearing aids, closed caption decoders, open and closed captioning, telecommunications devices for deaf persons (TDD's), videotext displays, or other effective methods of making aurally delivered materials available to individuals with hearing impairments;

(2) Qualified readers, taped texts, audio recordings, Brailled materials, large print materials, or other effective methods of making visually delivered materials available to individuals with visual impairments;

(3) Acquisition or modification of equipment or devices; and

(4) Other similar services and actions.

(c) Effective communication. A public accommodation shall furnish appropriate auxiliary aids and services where necessary to ensure effective communication with individuals with disabilities.

(d) Telecommunication devices for the deaf (TDD's). (1) A public accommodation that offers a customer, client, patient, or participant the opportunity to make outgoing telephone calls on more than an incidental convenience basis shall make available, upon request, a TDD for the use of an individual who has impaired hearing or a communication disorder.

(2) This part does not require a public accommodation to use a TDD for receiving or making telephone calls incident to its operations.

(e) Closed caption decoders. Places of lodging that provide televisions in five

or more guest rooms and hospitals that provide televisions for patient use shall provide, upon request, a means for decoding captions for use by an individual with impaired hearing.

(f) Alternatives. If provision of a particular auxiliary aid or service by a public accommodation would result in a fundamental alteration in the nature of the goods, services, facilities, privileges, advantages, or accommodations being offered or in an undue burden, i.e., significant difficulty or expense, the public accommodation shall provide an alternative auxiliary aid or service, if one exists, that would not result in an alteration or such burden but would nevertheless ensure that, to the maximum extent possible, individuals with disabilities receive the goods, services, facilities, privileges, advantages, or accommodations offered by the public accommodation.

S 34.204 Removal of barriers.

(a) General. A public accommodation shall remove architectural barriers in existing facilities, including communication barriers that are structural in nature, where such removal is readily achievable, i.e., easily accomplishable and able to be carried out without much difficulty or expense.

(b) Examples. Examples of steps to remove barriers include, but are not limited to, the following actions-

(1) Installing ramps;

(2) Making curb cuts in sidewalks and entrances;

(3) Repositioning shelves;

(4) Rearranging tables, chairs, vending machines, display racks, and other furniture;

(5) Repositioning telephones;

(6) Adding raised markings on elevator control buttons;

(7) Installing flashing alarm lights;

(8) Widening doors;

(9) Installing offset hinges to widen

doorways;
(10) Eliminating a turnstile or providing an alternative accessible path;
(11) Installing accessible door hardware;
(12) Installing grab bars in toilet stalls;
(13) Rearranging toilet partitions to increase maneuvering space;
(14) Insulating lavatory pipes under sinks to prevent burns;
(15) Installing a raised toilet seat;
(16) Installing a full-length bathroom mirror;
(17) Repositioning the paper towel dispenser in a bathroom;
(18) Creating designated accessible parking spaces;
(19) Installing an accessible paper cup dispenser at an existing inaccessible water fountain;
(20) Removing high pile, low density carpeting; or
(21) Installing vehicle hand controls.
(c) Priorities. A public accommodation is urged to take measures to comply with the barrier removal requirements of this section in accordance with the following order of priorities.
(1) First, a public accommodation should take measures to provide access to a place of public accommodation from public sidewalks, parking, or public transportation. These measures include, for example, installing an entrance ramp, widening entrances, and providing accessible parking spaces.
(2) Second, a public accommodation should take measures to provide access to those areas of a place of public accommodation where goods and services are made available to the public. These measures include, for example, adjusting the layout of display racks, rearranging tables, providing Brailled and raised character signage, widening doors, providing visual alarms, ILLEGIBLE

(3) Third, a public accommodation should take measures to provide access to restroom facilities. These measures include, for example, removal of
01-00772

obstructing furniture or vending machines, widening of doors, installation of ramps, providing accessible signage, widening of toilet stalls, and installation of grab bars.
ILLEGIBLE
should take any other measures necessary to provide access to the goods, services, facilities, privileges, advantages, or accommodations of a place of public accommodation.

(d) Relationship to alterations requirements of subpart D of this part.

(1) Except as provided in paragraph (d)(2) of this section, measures taken to comply with the barrier removal requirements of this section shall comply with the applicable requirements for alterations in S 36.402 and SS 36.404-36.406 of this part for the element being altered. The path of travel requirements of S 36.403 shall not apply to measures taken solely to comply with the barrier removal requirements of this section.

(2) If, as a result of compliance with the alterations requirements specified in paragraph (d)(1) of this section, the measures required to remove a barrier would not be readily achievable, a public accommodation may take other readily achievable measures to remove the barrier that do not fully comply with the specified requirements. Such measures include, for example, providing a ramp with a steeper slope or widening a doorway to a narrower width than that mandated by the alterations requirements. No measure shall be taken, however, that poses a significant risk to the health or safety of

individuals with disabilities or others.

(e) Portable ramps. Portable ramps should be used to comply with this section only when installation of a permanent ramp is not readily achievable, in order to avoid any significant risk to the health or safety of individuals with disabilities or others in using portable ramps, due consideration shall be given to safety features such as nonslip surfaces, railings, anchoring, and strength of materials.

(f) Selling or serving space. The rearrangement of temporary or movable structures, such as furniture, equipment, and display racks is not readily achievable to the extent that it results in a significant loss of selling or serving space.

(g) Limitation on barrier removal obligations. (1) The requirements for barrier removal under S 38.304 shall not be interpreted to exceed the standards for alterations in subpart D of this part.

(2) To the extent that relevant standards for alterations are not provided in subpart D of this part, then the requirements of S 38.304 shall not be interpreted to exceed the standards for new construction in subpart D of this part.

(3) This section does not apply to rolling stock and other conveyances to the extent that S 38.310 applies to rolling stock and other conveyances.

S38.306 Alternatives to barrier removal.

(a) General. Where a public accommodation can demonstrate that barrier removal is not readily achievable, the public accommodation shall not fail to make its goods, services, facilities, privileges, advantages, or accommodations available through alternative methods, if those methods are readily achievable.

(b) Examples. Examples of alternatives to barrier removal include, but are not limited to, the following

actions--
(1) Providing curb service or home delivery;
(2) Retrieving merchandise from inaccessible shelves or racks;
(3) Relocating activities to accessible locations;
(c) Multiscreen cinemas. If it is not readily achievable to remove barriers to provide access by persons with mobility impairments to all of the theaters of a Multiscreen cinema, the cinema shall establish a film rotation schedule that provides reasonable access for individuals who use wheelchairs to all films. Reasonable notice shall be provided to the public as to the location and time of accessible showings.
S38.308 Personal devices and services.
This part does not require a public accommodation to provide its customers, clients, or participants with personal devices, such as wheelchairs; individually prescribed devices, such as prescription eyeglasses or hearing aids; or services of a personal nature including assistance in eating, toileting, or dressing.
S 36.307 Accessible or special goods.
(a) This part does not require a public accommodation to alter its inventory to include accessible or special goods that are designed for, or facilitate use by, individuals with disabilities.
(b) A public accommodation shall order accessible or special goods at the request of an individual with disabilities, if, in the normal course of its operation, it makes special orders on request for unstocked goods, and if the accessible or special goods can be obtained from a supplier with whom the public accommodation customarily does business.
(c) Examples of accessible or special goods include items such as Brailled versions of books, books on audio cassettes, closed-captioned video tapes,

special sizes or lines of clothing, and special foods to meet particular dietary needs.

S 36.308 Seating in assembly areas.

(a) Existing facilities. (1) To the extent that it is readily achievable, a public accommodation in assembly areas shall-

(i) Provide a reasonable number of wheelchair seating spaces and seats with removable aisle-side arm rests; and

(ii) Locate the wheelchair seating spaces so that they-

(A) Are dispersed throughout the seating area;

(B) Provide lines of sight and choice of admission prices comparable to those for members of the general public;

(C) Adjoin an accessible route that also serves as a means of egress in case of emergency; and

(D) Permit individuals who use wheelchairs to sit with family members or other companions.

(2) If removal of seats is not readily achievable, a public accommodation shall provide, to the extent that it is readily achievable to do so, a portable chair or other means to permit a family member or other companion to sit with an individual who uses a wheelchair.

(3) The requirements of paragraph (a) of this section shall not be interpreted to exceed the standards for alterations in subpart D of this part.

(b) New construction and alterations. The provision and location of wheelchair seating spaces in newly constructed or altered assembly areas shall be governed by the standards for new construction and alterations in subpart D of this part.

S 36.309 Examinations and courses.

(a) General. Any private entity that offers examinations or courses related to applications, licensing, certification, or credentialing for secondary or postsecondary education, professional,

or trade purposes shall offer such examinations or courses in a place and manner accessible to persons with disabilities or offer alternative accessible arrangements for such individuals.

(b) Examinations. (1) Any private entity offering an examination covered by this section must assure that-

(i) The examination is selected and administered so as to best ensure that, when the examination is administered to an individual with a disability that impairs sensory, manual, or speaking skills, the examination results accurately reflect the individual's

Civil Rights Division

Retyped 5/6/92
SBO:MAF:SK:ca:jfh

DJ# 192-180-04931
Office of the Assistant Attorney General Washington, D.C. 20035

The Honorable Frank H. Murkowski
United States Senator
222 West 7th Avenue, Box 1
Anchorage, Alaska 99513-7570

Dear Senator Murkowski:

This letter responds to your request for information concerning the Americans with Disabilities Act (ADA) in response to an inquiry from your constituent, Elsie O'Bryan.

The ADA authorizes the Department to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you in responding to Ms. O'Bryan. However, this technical assistance does not constitute a determination by the Department of Justice of Ms. O'Bryan's rights or responsibilities under the ADA and

does not constitute a binding determination by the Department of Justice.

Ms. O'Bryan requested guidance on whether the ADA requires the City of Houston, Alaska, to continue the service of "plowing and sanding handicap driveways." Title II of the ADA, which applies to State and local governments, prohibits discrimination against qualified individuals with disabilities in the provision of services, programs, and activities. Under the ADA, the City may not deny services to individuals on the basis of disability, if it makes those services available to other citizens. Generally, however, it is not required to provide special programs or services for individuals with disabilities if it does not provide such programs or services for individuals without disabilities.

cc: Records CRS Oneglia Friedlander Kaltenborn McDowney Arthur
udd:kaltenborn:murkowski

01-00774

Pursuant to your request, I am enclosing a copy of our implementing regulation for title II. I hope that this information is helpful in responding to your constituent's inquiry.

Sincerely,

John R. Dunne
Assistant Attorney General

RE: Americans with Disabilities Act

Dear Senator Murkowski,

We are sending this letter in hopes that you may have the answers to a question that we have in reference to the Americans with Disabilities Act.

At the present time the City of Houston has been plowing and sanding handicap driveways, on a limited basis. Due to budget shortfalls and the increasing number of driveways that need to be done, this is a service that the City of Houston can not longer afford to provide. What we would like to know is are we required, under the law, to provide this service?

We have contacted several different organizations and they have not been able to provide us with an answer. Any help you can provide in this area would be greatly appreciated.

Sincerely,

Elsie O'Bryan
Councilmember

Lee E. Sapira, Esq.
Kozloff, Diener, Payne & Fegley
Post Office Box 6286
Wyomissing, Pennsylvania 19610

Dear Mr. Sapira:

This letter responds to your correspondence requesting

information about the Americans with Disabilities Act, 42 U.S.C. 12101-12213 (ADA). The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under to the Act. This letter provides informal guidance to assist you in understanding the ADA accessibility standards. However, it does not constitute a legal interpretation and it is not binding on the Department.

Your letter makes inquiry with respect to two issues under title III of the ADA: whether automatic doors are required in existing facilities, regardless of cost, in order to assure accessibility for individuals with disabilities; and whether a self evaluation is required for public accommodations. You also request a source for answering future questions concerning the ADA.

Title III of the ADA requires places of public accommodation to remove architectural barriers in existing facilities where it is "readily achievable" to do so. The Act defines "readily achievable" to mean "easily accomplishable and able to be carried out without much difficulty or expense." The factors to be considered in determining whether the removal of a particular barrier is readily achievable include: the nature and cost of the action; the financial resources available both to the site and the parent organization; the size and number of employees at the site and overall; and the relationship of the site to the parent organization.

cc: Records; Chrono; Wodatch; Magagna. FOIA
:uddl:udd:magagna:pl.78

01-00777

This is a case-by-case determination, and without all of this kind of information, we cannot make a judgment as to whether, in response to your specific inquiry, installation of an automatic door in a credit union facility would be "readily achievable." Automatic doors, as such, are not required. There may be other less costly measures to make an entrance accessible. The Department's title III regulations, 28 C.F.R. Pt. 36, do suggest that the first priority in barrier removal should be access to the facility, 28 C.F.R. 36.304(c)(1).

Where an entity can demonstrate that removal of a particular barrier is not readily achievable, the entity then has the obligation to take alternative steps to make its goods and services available to persons with disabilities, if such alternatives are readily achievable. The regulations provide several examples that may be relevant to your clients' situations, such as providing curb service or home delivery. 28 C.F.R. S305(b).

The duty to remove barriers is a continuing obligation. Thus, for example, if barrier removal is not now readily achievable due principally to financial constraints but is at some later time due to an improved financial condition, the barriers must be removed at that time.

Title III does not require public accommodations to conduct a self-evaluation to determine barrier removal obligations. However, in its Preamble to the title III regulations, this Department recommends that public accommodations develop an implementation plan to achieve compliance and suggests methods for such development. See 56 Fed. Reg. 35569 (July 26, 1991). The source of your confusion regarding the self-evaluation requirement may be that title II, which covers State and local governments, does have such a requirement.

I have enclosed copies of the Department's title III regulations and Title III Technical Assistance Manual. These materials may assist you in advising clients of their title III obligations. If you have further questions, we will attempt to answer future written inquiries or you may call the ADA Information Line at (202) 514-0301. You indicated that you had previously attempted to call without success. Although we answer hundreds of calls per week, the demand has been very heavy and we regret that some callers have not been unable to get through.

01-00778

We hope that this information will be useful to you.

Sincerely,

Joan A. Magagna
Deputy Director
Office on the Americans with Disabilities Act

Re: Our File No. 9318-77

Dear Mr. Wodatch:

I am an attorney in Reading, Pennsylvania. I have been attempting for quite some time now, with very little success, to get some aid in understanding the contents of the ADA, which I have reviewed at length. I have repeatedly attempted to utilize the phone numbers provided in the Code of Federal Regulations, without success.

My specific concerns arise from representation of several clients who fall within the rubric of "public accommodations", for purposes of the Act. I have been attempting to discern what obligations they face. For example, one of my clients is a large credit union. They have an immediate question which I have been unable to answer. The question is whether the Credit Union is required to install automatically opening doors in their facility. The expense they would incur is substantial, but no more so than for any other facility installing automated doors. My clients certainly think the ecomonic burdon of installing these doors is unreasonable, but I cannot comfortably advise them as to whether it is unreasonable for purposes of the Act. I have similar questions for other clients, and anticipate more and more of them, particularly as to specific physical characteristics of their accommodations, as time goes on. Please tell me if there is a technical review section to the American with Disabilities Act, and if so, how I may reach them.

Another specific concern I have is as regards the several references I have encountered to a "self-evaluation". I have not been able to discover the standards pursuant to which such an evaluation must be performed. I cannot tell from any of the materials to which I have access whether the self-evaluation must be performed for all public accommodations, whether it can be performed simply by having an employee of the facility inspect the

facility and designate areas he or she believes to be troublesome, or whether a certified engineering service must be hired to perform the evaluation. Alternatively, I have no idea, and cannot discern from the materials to which I have access, whether the evaluation must be performed by somebody with any particular qualifications relating to the Act.

I would greatly appreciate you assistance in resolving these specific questions, and perhaps more importantly providing me with a source for resolving related questions in the future. Thank you for your anticipated cooperation. I look forward to hearing from you.

Very truly yours,

KOZLOFF, DIENER, PAYNE & FEGLEY

DJ 202-PL-00048

MAY 12 1992

Ms. Cheryl L. Villaume, Law Clerk
Goldman, Marshall & Muszynski, P.C.
1515 Market Street, Suite 500
Philadelphia, Pennsylvania 19102

Dear Ms. Villaume:

This letter responds to your correspondence requesting clarification of the provisions of title III of the Americans with Disabilities Act (ADA), 42 U.S.C. S12101-12213. Specificality you inquired whether the exemption for religious organizations, section 307, includes church owned or funded hospitals. The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights and obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

Title III of the ADA establishes requirements for private entities that own, operate, lease (or lease to) places of public accommodation, such as hospitals. A private entity has no title III obligations, however, if it is a religious entity, that is, a religious organization or a private entity controlled by a religious organization. A private hospital controlled by a religious organization is exempt from title III requirements. A useful discussion of the scope of title III's exemption for religious entities can be found in the Preamble to the Attorney General's Title III regulations. See 56 Fed. Reg. 35544, 35554 (July 26, 1991). A copy is enclosed.

A religious entity, however, is not exempt from the employment requirements of title I of the ADA, which go into effect on July 26, 1992, for hospitals with 25 or more employees. Moreover, if a religious entity receives Federal funds, as most

cc: Records Chrono Wodatch Magagna Beard.ta.307.villaume

01-00782

hospitals do, it is subject to section 504 of the Rehabilitation Act of 1973, as amended, 29 U.S.C. S 794, which prohibits disability discrimination in federally assisted programs.

We hope that this information is useful to you in evaluating your rights and obligations under the ADA.

Sincerely,

Joan A. Magagna

Department of Justice
Office on the Americans with Disabilities Act
Civil Rights Division
P.O. Box 66118
Washington, D.C. 20035 - 6118

On February 21, 1992, I spoke with one of your representatives on the "ADA" information line (at 202-514-0301 *5). I was calling to find out if the religious exemption of the Americans with Disabilities Act (S 307) applies to church owned (funded) hospitals and, if so, to what extent it does apply. The representative on the line informed me that it does apply as long as the hospital is controlled/funded by the religious organization. I would like to

confirm this. The Act itself and the legislative history behind it do not offer a concise answer to the question.

Thank you for your time and attention to this matter. It is appreciated.

Very truly yours,

MAY 13 1992

Mr. Bert L. Bares
Program Director
Hearing-Impaired Outreach
Montrose Clinic
3400 Montrose Blvd
Suite 315
Houston, Texas 77266-6251

Dear Mr. Bares:

Thank you for your letter concerning title III of the Americans with Disabilities Act (ADA). In it, you asked for clarification of the obligations of public accommodations, including HIV service providers, to provide interpreting services.

The ADA authorizes the Department to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you in understanding how the ADA may apply to your organization. This technical assistance, however, does not constitute a determination by the Department of Justice of rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

We agree with your assertion that the roles of case manager and interpreter are very different, and that a case manager, who is also a certified interpreter, should not be asked to interpret in a situation where a client is involved.

When an interpreter is required to ensure effective communication, the public accommodation must provide a qualified interpreter (S 36.303 of the Department's title III rule). A qualified interpreter, according to our title III rule, is one who is able to interpret "effectively, accurately, and impartially" (S 36.104) (emphasis added). Even a certified interpreter may not be considered "qualified" for all situations. For instance, an interpreter may not be suitable, particularly in those situations where emotional or personal involvement or considerations of confidentiality, may adversely affect his or her ability to interpret effectively, accurately, and impartially (56 Fed. Reg. 35,544, 35,553 (July 26, 1991)).

We also agree that if your Center refers a client to another agency for a particular service that is not offered by your Center, then the responsibility for providing an interpreter falls to that agency, not your Center. The agency receiving the referral may not refuse to offer the needed service simply because the client is deaf or because the agency would have to provide interpreting services to ensure effective communication.

Finally, public accommodations that provide workshops, seminars, or support groups are subject to all of the requirements of title III, including the obligation to provide appropriate auxiliary aids and services to ensure effective communication. The fact that a deaf participant may be a client or employee of another agency does not exempt the public accommodation from complying with the title III requirements.

Your letter states that your Center and other service providers all receive Federal funding. Section 504 of the Rehabilitation Act of 1973, as amended, prohibits discrimination on the basis of handicap in federally assisted programs and activities. Like our title III rule, section 504 rules require the provision of appropriate auxiliary aids and services, including interpreting services, that are necessary to ensure effective communication (see e.g., 45 C.F.R. S 84.51(d) (Department of Health and Human Services' section 504 rule for

federally assisted programs)).

Enclosed are copies of our title III rule and title III technical assistance manual. I hope this information has been helpful.

Sincerely,

Stewart B. Oneglia

Mr. Michael Elias
Vaughan Pools Inc.
RockBridge Shopping Center
Columbia, Missouri 65201

Dear Mr. Elias:

This is in response to your letter to our office concerning the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to entities that are subject to the Act.

This letter provides informal guidance to assist you in understanding how the ADA may apply to you. However, this technical assistance does not constitute a determination by the Department of Justice of your rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

Currently, there are no requirements for pools in the ADA accessibility Guidelines (ADAAG). A copy of ADAAG, which is an appendix to our ADA title III regulation, is enclosed.

However, the Architectural and Transportation Barriers Compliance Board, the agency that issued ADAAG, is currently considering establishing requirements for swimming pools. Proposed regulations regarding pools may be published in August. In the meantime, if you are looking for guidance in making your pools more accessible, I have enclosed the title III technical

01-00787

assistance manual (see page 44 for mention of pools) and the Department of Interior's interim draft Design Guide for Accessible Outdoor Recreation (see pages 41-43).

I hope this information has been helpful to you.

Sincerely,

Stewart B. Oneglia

I am writing in regard to the Americans with Disabilities act (ADA). I am in the swimming pool construction and service business. Accordinly I have numerous hotels and clubs that will have to comply with this act. I have not been able to determine exactly what the stipulations of this act are. Will existing pools have to install ramps, lifts or other devices? Will pools now under construction have to have these devices installed?

I understand all Government facilities regulations are due on July 6, 1992, is this going to be used as a guideline? I would appreciate any information you could send me on this matter.

Thank you

U.S. Department of Justice

Office of Legislative Affairs

Office of the Assistant Attorney General Washington, D.C. 20530

MAY 15 1992

The Honorable Robert A. Roe
U.S. House of Representatives

2243 Rayburn House Office Building
Washington, D.C. 20515-3008

Dear Congressman Roe:

This is in response to your inquiry on behalf of your constituent, XX

Ms. XX(b)(6) seeks information about the Americans with Disabilities Act (ADA). Although we cannot provide legal interpretations or legal advice to individuals, this letter provides informal guidance to assist your constituent in understanding the ADA accessibility standards.

Ms. XX writes that she does all of her shopping by telephone because of her disability. She presents two concerns -- first, that she is required to pay postage and handling fees for merchandise that is mailed to her, and, second, that some stores will not take special orders by telephone. She inquires whether the Americans with Disabilities Act (ADA) affords any recourse in these situations.

Ms. XX(b)(6)suggests that some mechanism should be created whereby stores would be exempt from paying postage for mailing merchandise to persons who can provide proof of disability. The ADA itself has no provisions that require creation of such a mechanism. An amendment to the postal service laws or regulations would be required to implement such a procedure. The ADA does not require a store to pay the postage fees itself in these circumstances if the store is accessible to persons with disabilities.

Ms. XX(b)(6) also states that some stores have policies not to take special orders for out-of-stock merchandise unless the customer appears personally to sign the order. Ms. XX states that she is unable to make a personal visit to the store because of her disability. She is therefore unable to obtain the

special order merchandise she seeks. The ADA requires stores to make "reasonable modifications" in their policies, practices and procedures in order to make their goods and services available to

persons with disabilities, unless a modification would "fundamentally alter" the nature of the goods and services offered. In the circumstance Ms. XX describes, it may be reasonable to require the store to take special orders by telephone from persons with disabilities who cannot visit the store. If the store's concern is obtaining a guarantee of payment that only a signed order would provide, the store may be able to take such orders by mail from persons with disabilities or, in the alternative, take credit card orders by telephone.

We hope this information will be of assistance to you in responding to your constituent.

Sincerely,

W. Lee Rawls
Assistant Attorney General

Dear Assistant Attorney General Rawls:

Enclosed please find a copy of a letter from Ms. (b)(6) (b)(6) a constituent of my Eighth Congressional District in New Jersey, in which she discusses the possibility of exempting disabled individuals from paying postage for store sent items.

I would greatly appreciate your review and comment on this matter.

Thank you again for your time and consideration, if I can be of any additional assistance, please do not hesitate to contact this office.

With all good wishes.

Sincerely,

Robert A. Roe
Member of Congress

01-00792

xx (b)(6)
Upper Montclair, NJ 070

February 15, 1992

Editor, The Montclair Times:

As a disabled citizen, I am delighted and relieved to observe that the Aid to the Disabled act, the most important civil rights legislation of the century, is being implemented on local and state levels as well as federal. I realize that change cannot happen all at once. It will be a gradual "inch by inch, row by row" process.

Since I am forced to do all but grocery shopping by phone, I constantly am confronted by a situation familiar to all who are housebound. No matter what I order--be it a single compact and lipstick, or an audiocassette, whether it comes from a store in downtown Montclair or one of the shopping malls in Essex County--I am required to pay a $4 fee for postage and handling. Since I depend largely on Social Security Disability benefits for income, this can add up to an amount which becomes a financial hardship. Since the ADA is a federal policy, there should be some way that stores would themselves be exempt from paying postage when mailing merchandise to people who, by means of identification--e.g. a photocopy of their Social Security award--can mail in proof of their disability.

Even more frustrating is the situation which arises when the item I wish to purchase--e.g. a record, a book--is not in stock and the store has to place a special order for it. I am told that this can be done only if I appear in person to sign the order. I explain that were I able to appear in person, I wouldn't be making this call in the first place, nor be asking to be notified by phone when the merchandise is in. The clerk then calls the manager, who understands, perhaps even sympathizes with, my predicament but reminds me that he is only quoting store policy. it is a no-win situation for us both. I cannot obtain what I want, and the store loses a customer. There must be a way out. All suggestions are welcome!

XX (b)(6)

Wodatch Ms. Ann Hafar
Manager
Date Traveler Budget Inn
1210A Avenue East
Oskaloosa, Iowa 52577

LIB Dear Ms. Hafar:
Deputy

I am responding to your letter requesting specific guidance
Date from the Department of Justice about the application of title III of the Americans with Disabilities Act of 1990 (ADA) to the facility that you manage.

Blizard The ADA authorizes the Department to provide technical assistance to entities that are subject to title III. This
Date letter provides informal guidance to assist you in understanding the ADA accessibility requirements. This technical assistance does not constitute a formal policy determination and it is not binding on the Department of Justice.

GYB The ADA does not establish specific requirements regarding alterations that must be made to existing facilities for the
Date purpose of accessibility, if alterations are not otherwise planned. It simply requires that places of public accommodation, including hotels and motels, remove architectural and communication barriers to the extent that it is readily achievable to do so. Congress defined the term "readily achievable" to mean "easily accomplishable and able to be carried out without much difficulty or expense." If it is not readily achievable to remove barriers in an existing facility that is not otherwise being altered, then barrier removal is not required.

If a public accommodation, such as a hotel or motel, is undertaking new construction or altering existing facilities, then the newly constructed or altered area must comply with the ADA accessibility standards in the enclosed Department of Justice regulation for title III of the ADA. These standards are also helpful in determining what readily achievable barrier removal would be appropriate in an existing hotel or motel.

cc: Records, Chrono, Wodatch, Blizard, FOIA
udd:Blizard.ada.interpretation.hafar

01-00794

With respect to your specific questions, the percentage of rooms required to be accessible in new construction is set out at sections 9.1.2 through 9.1.4 of the Appendix to the enclosed regulation. The chart in section 9.1.2 details when accessible showers are required. One bathroom in each accessible unit must comply with the requirements of section 4 of the appendix. In accessible rooms, permanently installed telephones must have volume controls (section 9.3.1). Alterations are addressed in section 9.1.5.

The requirement that "auxiliary aids," such as television decoders and telephone handset amplifiers, be provided, is separate from the requirement that physical barriers be removed in existing buildings. Auxiliary aids are addressed in section 36.303.

You may obtain information on particular products by calling the Architectural and Transportation Barriers Compliance Board at 1-800-USA-ABLE.

I hope that this information is helpful to you.

Sincerely,

John L. Wodatch
Director

Washington, D.C. 20530

MAY 19 1992

(b)(6)
San Antonio, Texas 78221

Dear Mr. XX

This letter responds to your correspondence requesting technical assistance with respect to the provisions of the Americans with Disabilities Act (ADA). The ADA authorizes the Department of Justice to provide technical assistance to individuals or entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA accessibility standards. However, it does not constitute a legal interpretation and it is not binding on the Department.

Title III of the ADA imposes on places of public accommodation, such as shopping malls, three different requirements concerning their facilities. When a public accommodation is engaged in new construction of a facility, it must comply with the accessibility provisions of the ADA and the ADA Accessibility Guidelines (ADAAG) established pursuant to it. When a public accommodation is engaged (after January 26, 1992) in an alteration or remodeling of an existing facility, it must comply with ADAAG's alteration requirements, which are sometimes less stringent.

When a public accommodation is engaged in neither new construction nor alteration of a facility, then a third requirement applies: the public accommodation must remove any barriers to individuals with disabilities where the removal of those barriers is "readily achievable" -- that is, where the removal can be done easily and without much difficulty or expense. In so doing, the public accommodation is never required to exceed ADAAG's alteration requirements.

The regulations issued by the Department of Justice discuss the factors that are to be used in determining whether the removal of a particular barrier is readily achievable. These include: the nature and cost of the action; the financial resources available both to the site and the parent organization; the size and number of employees at the site and overall; and the relationship of the site to the parent organization.

cc: Records OADA Wodatch Bowen Beard Arthur FOIA
udd:beard.ta.304 (b)(6)
01-00797

However, where a public accommodation is not able to comply completely with the accessibility specifications of the ADAAG, title III provides that a public accommodation should comply to the extent it is able to do so -- again without much difficulty or expense. With respect to your question about automatic doors in particular, it is important to note that ADAAG does not currently require automatic doors in any case.

I hope that this information is useful to you in understanding the requirements of the ADA.

Sincerely,

L. Irene Bowen
Deputy Director
Office on the Americans with Disabilities Act

(b)(6)
SAN ANTONIO TX 78221

TO: U.S. DEPT. OF JUSTICE
CIVIL RIGHTS DIVISION

DEAR SIR(S),
I AM AN AMERICAN WITH A DISABILITY. I AM A QUADRAPLEGIC CONFINED TO A WHEELCHAIR. I WOULD APPRECIATE YOUR HELP IN ANSWERING SOME QUESTIONS CONCERNING ADA. SPECIFICLY IN REFERENCE TO ACCESSIBILITY TO PUBLIC ACCOMMODATIONS. ONE OF MY MAIN PROBLEMS IS GETTING IN-SIDE OF A SHOPPING MALL. SOME MALLS NOT ONLY HAVE ONE DOOR BUT TWO. THESE DOORS DO NOT OPEN AUTOMATIC. THEREFORE, THEY ARE A PHYSICAL BARRIER. AM I CORRECT OR NOT? IF I AM CORRECT THEY MUST BE REMOVED IF REMOVAL IS READILY ACHIEVABLE. MY QUESTION IS, CAN A SHOPPING MALL CLAIM THAT REMOVING THEIR DOOR(S) IS NOT READILY ACHIEVABLE?
I'M SURE THAT A SHOPPING MALL MAKES ENOUGH MONEY TO INSTALL AUTOMATIC DOOR(S). HOW MUCH TIME DOES A PUBLIC ACCOMMODATION HAVE TO REMOVE PHYSICAL BARRIERS, ESPECIALLY SINCE ADA REQUIREMENTS BE-CAME EFFECTIVE JANUARY 26, 1992? I WOULD LIKE TO POINT OUT THAT UNDER ADA HIGHLIGHTS TITLE III , VII IT STATES "FIRST PRIORITY SHOULD BE GIVEN

TO MEASURES THAT WILL ENABLE INDIVIDUALS WITH DISABILITIES TO "GET IN THE FRONT DOOR," IT'S ONLY COMMON SENSE THAT IF WE CANNOT GET IN, WE DO NOT HAVE ACCESS TO PUBLIC GOODS AND SERVICES. IS A SHOPPING MALL IN VIOLATION OF MY CIVIL RIGHTS IF IT IS NOT ACCESSIBLE? THE REASON I ASK THIS QUESTION IS BECAUSE I SPOKE TO AN INDIVIDUAL IN CHARGE OF A SHOPPING MALL. HIS RESPONSE WAS THAT THE MALL WAS IN COMPLIANCE WITH ADA. EVEN AFTER I EXPLAINED TO HIM THAT I COULD NOT GET IN THE FRONT DOOR. GETTING IN THE FRONT DOOR IS VERY IMPORTANT AND MEANS ALOT TO INDIVIDUALS WITH DISABILITIES. I ONLY HOPE THAT WE ARE NOT TOLDED TO USE THE BACK DOOR AS AN ALTERNATIVE TO GET IN TO A PUBLIC ACCOMMODATION. I TRULY APPRECIATE YOUR ASSISTANCE IN THIS MATTER AND LOOK FORWARD HEARING FROM YOU.

SINCERELY YOURS,

xx
(b)(6)

202-PL-00094

01-00799

III-4.4200

#2042106145

MAY 19 1992

The Honorable Robert S. Walker
U.S. House of Representatives
2369 Rayburn House Office Building
Washington, D.C. 20515-3816

Dear Congressman Walker:

This is in response to your inquiry on behalf of your constituent, Robert Anderson.

Mr. Anderson writes that he is a board member of the New Holland Memorial Park Association. He is concerned about the requirements of the Americans with Disabilities Act (ADA) for removal of barriers in the New Holland Park facilities. He asks

for assistance in determining what changes are required to be made and whether Federal funds are available to help pay for such changes.

Although we cannot provide legal interpretations or legal advice to individuals, this letter provides informal guidance to assist your constituent in understanding the ADA accessibility standards.

Section 302(b)(2)(iv) of the ADA requires existing public accommodations to remove architectural barriers "where such removal is readily achievable." Section 301(9) defines "readily achievable" to mean "easily accomplishable and able to be carried out without much difficulty or expense." Section 301(9) also sets forth factors to be considered in determining whether a particular action is readily achievable. These factors include the nature and cost of the action required, the type of facility involved, the nature of the covered entity's business, its overall size and financial resources, and the number, type and location of all its facilities.

cc: Records; Chrono; Wodatch; Magagna; Friedlander; McDowney.
:uddl:udd:magagna:walker.cong

01-00800

Where removal of a barrier is not readily achievable, the public accommodation must take alternative steps to make its goods and services available to persons with disabilities, if it is readily achievable to do so.

With regard to the inquiry about federal funds to assist in barrier removal, neither the Department nor any other Federal agency is authorized to provide financial assistance to covered entities seeking to bring their facilities and operations into compliance with the ADA. However, businesses may be eligible to take Federal tax deductions and some small businesses may be eligible to receive tax credits for removing architectural barriers. Mr. Anderson may wish to contact the Internal Revenue Service to determine whether his organization is eligible for any of these tax benefits.

We have enclosed a copy of the Department's Title III Technical Assistance Manual which may be of further assistance in understanding the obligations imposed by the ADA.

We hope this information will be of assistance to you in responding to your constituent.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

Community Memorial Park

March 2, 1992

Robert S. Walker
Congressional Office
50 North Duke Street
Lancaster, PA 17601

Dear Congressman Walker:

I am a board member of the New Holland Memorial Park Association. I was asked by the board to get information about Public Law 101-336, known as the Americans with Disabilities Act and how it will affect the New Holland Park. I contacted your office earlier and they had sent me a copy of the law and a copy of "CRS Report for Congress, The Americans With Disabilities Act: An Overview of Major Provisions" written by Nancy Lee Jones, Legislative Attorney, American Law Division on July 31, 1990. I thank you and your staff for sending that information which I have shared with the other board members. My request was initiated because of an article which appeared in a magazine which one of the parks board members gets. In addition, the park has had a phone call from someone in D.C. asking if the park was in compliance with the act.

You will probably remember the problems the New Holland Park had a year or so ago getting insurance because of a Conrail track through the park. The New Holland Park is a non-profit corporation, "501-C" not part of any government body. That classification, we assumed, made us a public facility even though we are not a unit of government. The materials which were sent confirmed that fact.

Through the years the New Holland Park Board has tried to make changes in restrooms and other building to make most them accessible to the handicap. The swimming pool is not accessible to the handicap. If the park is required to make to the pool accessible to the handicap, it would require the expenditure of a large sum of money. The park simply does not have the funds and could not afford to borrow them at this time. This past year we received over $75,000.00 in donations and that has just barely enough to kept us solvent to pay the bills and debts load which we now have.

Community Memorial Park Association
P. O. Box 62, New Holland, PA 17557-0062

01-00802

I have read the CRS Report which was sent, it states on page CRS-5 "There are some limitations on the nondiscrimination requirement and a failure to remove architectural barriers is not a violation unless such a removal is 'readily achievable.' 'Readily achievable' is defined as meaning 'easily accomplishable and able to be carried out without much difficulty or expense". I can not find this in the legislation and the board is concerned that the federal agency designated to enforce the law may not have the same

interpretation as the CRS Report.

I hope that someone on your staff would be able to help us or give us a person to contact who can help determine what in fact that statement means. In addition, where would we be able to get assistance in determining: (1) what the changes would be, (2) what government funds would be available to help pay for the improvements, and (3) how to qualify for the funds. The park board feels that the cost of these requirements will be so excessive that we will no longer be able to provide any recreational services to the New Holland Community. We are not opposed to helping the handicap but feel this type of expenditure for the possible use of the pool by a handicap person someday will force us to stop serving the many people who now use the park. However, we do not want to get a fine because our interpretation is an incorrect interpretation.

Any help which you or your staff can be in having a determination made by the correct agency on what the New Holland Community Memorial Park must do to meet the requirements under this law would be greatly appreciated.

Sincerely,

Robert Anderson

MAY 21 1992

Mr. (b)(6)
XX
Indianapolis, Indiana 46219

Dear Mr. (b)(6)xx

This is in response to your inquiry about the Americans with Disabilities Act (ADA) covering payment for certain court costs and provision of auxiliary aids and services necessary to understand court proceedings.

The ADA authorizes the Department to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you in understanding how the ADA may apply to your case. This technical assistance, however, does not constitute a determination by the Department of Justice of your rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

There are two Federal laws that require the provision of auxiliary aids and services in court proceedings. If the court receives Federal financial assistance from the Department of Justice, section 504 of the Rehabilitation Act of 1973, as amended, may apply. Section 504 prohibits discrimination on the basis of handicap in federally assisted programs. The Department's regulation implementing section 504, which has been in effect since 1980, requires that State and local courts receiving Federal funding provide auxiliary aids and services where necessary to ensure effective communication with members of the public (28 C.F.R. SS 42.503(e) and (f)). A copy of the Department's section 504 rule is enclosed.

Title II of the ADA, which was effective on January 26, 1992, prohibits discrimination on the basis of disability in all programs, activities, and services provided or made available by State and local governments, instrumentalities, or agencies--regardless of the receipt of Federal funds. The title II regulation is based on regulations implementing section 504. Copies of the title II regulation and a manual explaining the regulation are enclosed. Like the section 504 rule, the title II

rule requires the provision of auxiliary aids and services by courts where necessary to ensure effective communication with an individual who is deaf or hard of hearing (S35.160 of our title II rule).

Title II also prohibits State and local courts from charging an individual with a disability for the costs of auxiliary aids and services (S35.130(f) of our title II rule). If a court transcript is used as an auxiliary aid for you to understand the proceeding, then the court may not charge the cost to you.

For individuals with hearing impairments, auxiliary aids and services include, but are not limited to, qualified interpreters, notetakers, assistive listening devices, assistive listening systems, and transcription services such as computer aided real-time transcription (CART) (S35.104). Public entities must provide the auxiliary aid requested by an individual, unless the public entity can demonstrate that another effective means of communication exists or that providing the requested aid would result in a fundamental alteration in the program or in undue financial and administrative burdens (SS 35.160(b)(2) and 35.164).

The title II rule also requires that a State or local court make reasonable modifications in practices, policies and procedures, if necessary, to avoid discrimination on the basis of disability, unless the court can demonstrate that making those modifications would fundamentally alter the nature of the service, program, or activity (S35.130(b)(7)).

If you believe that you have been subjected to discrimination on the basis of disability by the court under section 504 or title II, you may, within 180 days of the alleged discrimination, file either-

1) An administrative complaint by writing a letter to: Coordination and Review Section, Civil Rights Division, U.S. Department of Justice, P.O. Box 66118, Washington, D.C. 20045-6118; or

2) A private lawsuit in Federal district court.

If you file an administrative complaint that is timely and to which section 504 and/or title II apply, the Department of Justice will investigate the allegations of discrimination. Should we conclude that the public entity violated the Federal law, we will attempt to negotiate settlement to remedy the

violations. If settlement efforts fail, termination of funds or court litigation may be instituted. Please note that to be covered under title II, your complaint must allege discriminatory actions that took place after January 26, 1992.

I hope this information has been helpful to you.

Sincerely,

Stewart B. Oneglia
Chief
Coordination and Review Section
Civil Rights Division

Mr. William J. Gordon
BHP Petroleum
1401 Eye Street, N.W.
Suite 200
Washington, D.C. 20005

Dear Mr. Gordon:

This letter is in response to your inquiries with respect to the obligations of self-service gasoline stations and convenience stores under the Americans with Disabilities Act (ADA).

The ADA authorizes the Department to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you in understanding how the ADA may apply to your business. However, this technical assistance does not constitute a determination by the Department of Justice of your rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

The general provisions applicable to public accommodations, such as self-service gasoline stations and convenience stores, are provided in the regulations implementing title III of the ADA. These regulations were published on July 26, 1991, in the Federal Register. I have enclosed a copy of the regulations for your reference.

The section of the regulation that appears most relevant to your concerns is S36.305, which governs alternatives to barrier removal. The general language of S36.305 and the examples used in the preamble to that section indicate that attendant assistance could be a readily achievable alternative in many cases, if more than one attendant is on duty at the facility. If assistance is provided to an individual with a disability as an alternative to barrier removal under S36.305, the service station may not charge extra for the service provided.

The preamble to S36.305 recognizes, however, that there may be security considerations that would legitimately prevent a cashier from leaving the cash register. The preamble makes clear that the ADA would not require a cashier who is the only employee on duty to leave a cash register to assist a motorist with a disability.

Service stations and convenience stores are subject to the requirements of title III without regard to their size. There is no exemption for small businesses from the ADA's requirements for public accommodations and commercial facilities.

We hope you find this information of assistance.

Sincerely,

Stewart B. Oneglia
Chief
Coordination and Review Section

01-00809

T. 5/21/92

DJ 202-PL-00014

MAY 26 1992

Allan Davis Associates, Inc.
488 Main Avenue
Norwalk, CT 06851

Dear Mr. Davis:

This letter responds to your correspondence regarding the application of the Americans with Disabilities Act (ADA) to parking.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities with rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA accessibility standards. However, this technical assistance does not Harland constitute a legal interpretation of the statute and it is not binding on the Department.

Section 4.1.2(5)(d) of the ADA Accessibility Guidelines requires that parking at facilities providing medical care, e.g., parking for inpatient services, employees, or visitors at general hospitals, be provided in accordance with the table in

S4.1.2(5)(a). At outpatient units or facilities, whether stand-alone units or part of a general hospital, 10 percent of the total number of parking spaces serving such unit or facility must be accessible. At units or facilities that specialize in treatment or services for persons with mobility impairments, such as rehabilitation centers or orthopedic hospitals, 20 percent of parking spaces must be accessible.

Section 4.1.2(1) of ADAAG requires at least one accessible route to an accessible building entrance from accessible parking spaces irrespective of their location on a lot or in a parking structure. Furthermore, S4.6.3 specifies that parking access aisles shall be part of an accessible route to the entrance. Though exterior accessible routes may include "crosswalks at

cc: Records, Chrono, Wodatch, Harland, Russell
udd:Harland.Breen.pak

01-00810

vehicular ways," the definition does not allow the vehicular way itself to be used as an accessible route. The design options available in new construction are many and varied, sufficiently so that the knowledgeable and professional designer can develop a satisfactory parking layout with little or no increase in overall size of the lot.

I hope this information is useful to you in complying with the ADA.

Sincerely,

Philip L. Breen
Special Legal Counsel
Office on the Americans with Disabilities Act

Civil Rights Division
Coordination and Review Section
P. O. Box 66118
Washington, DC 20035-6118

Subject: Americans with Disabilities Act
28 CFR Part 36

Dear Sir/Madam:

Our firm serves as parking consultant to hospitals and other clients and this letter is to seek clarification of the requirements of Part III of the ADA with respect to the provision of accessible parking spaces. Two clarifications are sought, and

three problems with the standards which may need early revision of the text are pointed out.

CLARIFICATIONS
ADA Accessibility Guidelines for Buildings and Facilities
Section 4.1.2(5)(d)

I can find no definition of the term "mobility impairment". This Section would appear to distinguish between facilities which provide medical care and other services to the general public and those which provide medical care and other services for persons with mobility impairments. May I have your concurrence that hospitals serving the general public, including outpatient units of those hospitals, are not covered by the 10 percent accessible parking space requirement in 4.1.2(5)(d)(i)?

Section 4.3.2(1)

This Section provides that "the accessible route shall, to the maximum extent feasible, coincide with the route for the general public". In parking lots and garages, the walking route for the general public is generally the vehicular aisle. Would you please confirm that, provided the width, passing space, headroom, surface texture, slope, changes in level and provisions for egress and areas of rescue assistance comply with the remainder of Section

Civil Engineering * Traffic Engineering * Parking Studies * Transportation Planning
Tel.: (203) 849-0898 FAX (203) 849-0355
01-00812

4.3, the vehicular travel aisle in a parking lot or garage may serve as part of an accessible route in compliance with Section 4.3.2(1)?

PROBLEMS REQUIRING RESOLUTION BY CHANGING THE TEXT OF THE REGULATIONS

Sections 4.1.2(5)(d)(i)&(ii)

These Sections provide for increased percentages of parking spaces to be accessible at some "facilities providing medical care and other services for persons with mobility impairments". The problem

with this is that persons with mobility impairments, using the natural meaning of the expression, who seek medical care and other services may not be entitled to use accessible spaces. The regulation makes it more difficult rather than less difficult for a person whose mobility is temporarily impaired (bad back, broken leg) or even slightly impaired (not disabled) to obtain the services provided! It would appear that an illustration of the kind of facilities intended to be covered by Section 4.1.2(5)(d) would be helpful, and that a definition of "mobility impairment" which makes it clear that this includes only disabling impairment is required. Alternatively, if it is the intent of the regulation, "persons with disabilities" may be substituted for the phrase "persons with mobility impairments".

These Sections also require the increased percentage to be applied to the total number of spaces serving such facilities, not to those spaces serving patients or clients. Typically, 85 percent of spaces at such facilities are for staff parking. I suggest the wording be changed to remove staff parking from this requirement.

Section 4.1.2

Another difficulty appears to lie in the assumption, implicit in Section 4.1.2, that all parking is part of "Accessible Sites and Exterior Facilities". References are made to "ground surfaces", "the particular lot", and "total parking in lot" in this Section. Section 4.1.3, Accessible Buildings, makes no reference to provision for parking either in a separate building or integral with the main building itself. Parking garages are not mentioned. Is it the intention that parking garages be excluded from the requirements of the ADA?

01-00813

ADA

We have several projects pending where the answers to the points raised above are urgently required. Your early response would be appreciated.

Yours sincerely,

Allan Davis, President

AD:jmh
95-M-ADA.1

01-00814

III.7.5185

DJ 192-180-04985
Mr. James M. Johnson, III
Senior Vice President
Sunshine Bank
Post Office Drawer 2769

Fort Walton Beach, Florida
Dear Mr. Johnson:

I am responding to your letter to Congressman Earl Hutto regarding the requirements of title III of the Americans with Disabilities Act of 1990 (ADA), Pub. L. 101-336, 104 Stat. 327 (July 26, 1990), and this Department's regulation implementing title III, 56 Fed. Reg. 35,544 (July 26, 1991). Specifically, you seek clarification of the requirements applicable to the relocation of automatic teller machines (ATM's).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that have rights or responsibilities under the Act. This letter provides informal guidance about the provisions of the ADA. This technical assistance does not constitute a determination by the Department of your rights or responsibilities under the ADA, and it is not binding on the Department.

The requirements for accessible ATM's are established in SS 4.1.3(20) and 4.34 of the ADA Accessibility Guidelines, which are published as Appendix A to this Department's regulation implementing title III. The Guidelines were developed by the Architectural and Transportation Barriers Compliance Board (Access Board).

All newly constructed ATM's must comply with the Guidelines. Alterations to ATM's must comply with the Guidelines unless it is technically infeasible to do so. Cost factors are not to be considered in determining if an accessible alteration is feasible. Existing ATM's that are not otherwise being altered, but are being relocated to improve accessibility, should comply with the Guidelines to the extent that it is readily achievable

cc: Records; Chrono; Wodatch; Breen; Friedlander; McDowney.
:udd:jonessandra:ada.interpretation.jmjohnson

01-00815

for a financial institution to bring them into compliance. The ADA defines readily achievable as "easily accomplishable and able to be carried out without much difficulty or expense," and this Department's regulation sets out the factors to consider in making this determination.

Please note that in response to concerns raised by the American Bankers Association, the requirements set by the Guidelines in SS4.2.5 and 4.2.6 for "reach ranges," as they relate to the location of ATM controls, are under review by the Access Board. This review has the support and concurrence of the Department of Justice. However, while changes to the rule are under consideration, the Department is not in a position to amend the provision on ATM's and we are constrained to enforce the requirements of the ADA regulation now in effect. You should be aware that S2.2 of the ADA Accessibility Guidelines permits departures from particular technical requirements by use of other designs and technologies where the alternative designs and technologies will provide substantially equivalent or greater access to and usability of the facility. If you can demonstrate that particular ATM's, as installed, provide equivalent facilitation, they will be considered as complying with the ADA. You may be able to show that meeting one of the reach ranges specified in S4.2.5 or S4.2.6 provides equivalent facilitation, assuming all other requirements for ATM's contained in S4.34.1, S4.34.2, and S4.34.4 are met.

I have enclosed a copy of our title III regulation, which contains the ATM requirements at S4.34. In addition, the Department recently published a technical assistance manual to assist individuals and entities affected by title III of the ADA to understand their rights and responsibilities under the Act. I am enclosing a copy of that manual for your information. I hope that this information is helpful to you.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

RE: Clarification of the "Americans With Disability Act"

Dear Earl:

I am writing to request your assistance in obtaining clarification of the applicable guidelines under the "Americans Disability Act" from the Department of Justice. I have been trying to contact the department in regard to my specific request for over thirty days in regard to this matter but have not gotten any further than the recording on the telephone. I have also requested the assistance of Mr. Dan Steck of your office in trying to contact the Department of Justice in regard to this matter. However, he has informed me that his attempt to make inquiries on my behalf have also been fruitless.

Specifically, I have been trying to ascertain the applicability of the American Disability Act to this Bank's proposal to relocate its existing Automatic Teller Machine from its current location on the Hollywood Blvd. side of the bank to a new location at a out building located on the same parcel of property but facing Eglin Parkway. The reasons that we wish to relocate this Automatic Teller Machine are two fold: 1) The current location is less visible and is close to a high crime area. The proposed new location is further away from that area and much more visible to travelers on Eglin Parkway and would add a greater degree of security for potential customers. 2) The current location is neither accessible by drive-up automobile or by individuals confined to wheelchairs. The new installation would make the ATM machine accessible both by automobile and those confined to wheelchairs.

01-00817

I am enclosing for your reference various photos with captions and other documents showing the existing location, the proposed location and the minor addition we are making to the existing building where we wish to relocate the ATM machine.

I apologize for having to impose upon your valuable time to get assistance in this matter. However, I hope you can appreciate the frustrations we have experienced in trying to seek clarifications/ approval for this rather simple matter. Should you have any questions or require further information please do not hesitate to contact at (904) 664-5884. As always, we appreciate your fine support and assistance as well as your excellent representation of our area in the House of Representatives.

Very truly yours,

James M. Johnson, III
Sr. Vice President

DJ# 181-06-0007

Coordination and Review Section
P.O. Box 66118
Washington, D.C. 20035-6118

Mr. Ken Franklin
Community Liaison, Governor's Advocacy
Council for Persons with Disabilities
1318 Dale Street, Suite 100
Raleigh, North Carolina 27605-1275

Dear Ken Franklin:

This letter is in response to your inquiries with respect to the obligations of self-service gasoline stations and convenience stores under the Americans with Disabilities Act (ADA).

The ADA authorizes the Department to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you in understanding how the ADA may apply to your concern. However, this technical assistance does not constitute a determination by the Department of Justice of your rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

The general provisions applicable to public accommodations, such as self-service gasoline stations and convenience stores, are provided in the regulations implementing title III of the ADA. These regulations were published on July 26, 1991, in the Federal Register. I have enclosed a copy of the regulations for

your reference.

The section of the regulation that appears most relevant to your concerns is S 36.305, which governs alternatives to barrier removal. The general language of S 36.305 and the examples used in the preamble to that section indicate that attendant assistance could be a readily achievable alternative in many cases, if more than one attendant is on duty at the facility. If assistance is provided to an individual with a disability as an alternative to barrier removal under S 36.305, the service station may not charge extra for the service provided.

01-00823

The preamble to S 36.305 recognizes, however, that there may be security considerations that would legitimately prevent a cashier from leaving the cash register. The preamble makes clear that the ADA would not require a cashier who is the only employee on duty to leave a cash register to assist a motorist with a disability.

We hope you find this information of assistance.

Sincerely,

Stewart B. Oneglia

Mr. Wayne W. Harley
Assistant Director, Beaver County
Emergency Services Center
250 East End Avenue
Beaver, Pennsylvania 15009

Dear Mr. Harley:

This responds to your request for an interpretation of the Americans with Disabilities Act (ADA).

The ADA authorizes the Department to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you in understanding how the ADA may apply to the situation you describe. However, this technical assistance does not constitute a determination by the

Department of Justice of your rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

The Department's Technical Assistance Manual for title II of the ADA, which applies to State and local governments, addresses requirements for TDD access to telephone emergency services. It provides that public entities must ensure that these services, including 911 services, are accessible to persons with impaired hearing and speech, and includes the following discussion of the questions you raise:

> Are any additional dialing or space bar requirements permissible for 911 systems? No. Additional dialing or space bar requirements are not permitted. Operators should be trained to recognize incoming TDD signals and respond appropriately. In addition, they also must be trained to recognize that "silent" calls may be TDD or computer modem calls and to respond appropriately to such calls as well.

Title II Technical Assistance Manual at 38 - 39.

01-00825

A copy of the Manual and of the title II regulation are enclosed for your information.

We hope this information is helpful to you.

Sincerely

Stewart B. Oneglia

Reference: Section 35.162 of Title 2

Dear Sirs;

I am writing on behalf of the Beaver County Emergency Services Center, Beaver County, PA. We operate a Countywide 9-1-1 Center here in southwestern PA for 185,000 residents. Although we don't have access to Federal Register 28 CFR 35 which details the provisions of Section 35.162 of Title 2 (regarding TDD's), we are aware from trade journal articles that we need to fully comply with this law. We have had a TTY machine for 10 years but it is not directly hooked into 9-1-1. I am asking for guidance regarding whether our current setup is in compliance to the law.

Since 1981 our TTY machine has been hooked up to a dedicated phone number, 728-1222. All the local directories issued for the benefit of our hearing impaired citizens have listed this number for years. A citizen using a TTY or TDD machine and calling this number automatically knows that he will be connected to our TTY machine. We have had Enhanced 9-1-1 here in Beaver County since March, 1988. Our approach to date with 9-1-1 has been to advise those with TTY or TDD machines that they have the option of dialing 9-1-1 to report an emergency, but that they need to hit the spacer bar a number of times to alert our dispatchers. With our Bell of PA Centrex system we can then transfer such a 9-1-1 call to 728-1222 and then communicate via our TTY with the calling party. I think our present system is the best way to go here in Beaver County, but perhaps it is not in

compliance with the law. I'm especially concerned that we'll mistake a TTY/TDD call received via 9-1-1 for a prank call if our dispatcher does not detect the sound of the TTY/TDD machine. What is your interpretation of our system compliance to the law?

Incidentally we've had only one emergency call (a fire) reported via our TTY in the more than 10 years its been in place. I suppose I expected that we'd have received more than 1 call every 10 years.

Please if possible send me a copy of Section 35.162 of Title 2 and offer an opinion as to whether our current setup would be in compliance to the law.

Sincerely,

Wayne W. Harley, Assistant Director
Beaver County
Emergency Services Center

Ms. Tria D. Vikesland
Adaptive Recreation Specialist

Eden Prairie Community Center
16700 Valley View Road
Eden Prairie, Minnesota 55346

Dear Ms. Vikesland:

This letter responds to your correspondence requesting technical assistance with respect to the provisions of the Americans with Disabilities Act, 42 U.S.C. 12101-12213 (ADA). The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

You are correct in your understanding that title II of the ADA generally requires that if local governments provide services or programs to residents or non-residents without disabilities, they must therefore provide these programs and services for individuals with disabilities. You inquire whether a local government may now designate some programs as being open to the general public -- both individuals with disabilities and those without disabilities -- and some programs only to residents of your local jurisdiction, again including both individuals with disabilities and those without disabilities. Generally, limiting participation in this way does not appear to be prohibited by title II.

We must caution you, however, against limiting participation to residents only in some programs, but not others, if all programs have historically been open to all. Your reason for offering certain programs only to residents should not be related to the fact that you expect people with disabilities to participate in them. For example, the ADA might be violated if you allowed the general public to use most facilities of a

cc: Records OADA Wodatch Bowen Beard
udd:beard.ta.202.vikesland

01-00829

recreation center (e.g., picnic areas, tennis courts, basketball courts), but you limited use of the swimming pool to residents

when you know that you have no mobility impaired residents and you do not want to provide pool services to individuals with those impairments.

We hope that this information is useful to you. I enclose a copy of the regulations issued by the Department of Justice under both title II and title III (which contains the ADA Accessibility Guidelines, an optional standard for local government use), Title II Highlights, and our Title II Technical Assistance Manual.

Sincerely,

L. Irene Bowen
Deputy Director
Office on the Americans with Disabilities Act

P.O. Box 66118
Washington, D.C. 20035-6118

Dear Sirs:

I am writing to request any new and updated information about the Americans with Disability Act. We also would like to know if anyone has raised the issue of non-resident fees or providing services to non-residents.

The City of Eden Prairie is looking hard at the issue of providing services or programs to non-residents. Past history is that we have, however it has shown to be very costly and at times, very time consuming for a program. To our understanding if we provide services or programs to residents or non-residents without disabilities we therefore must provide for individuals with disabilities. What we are looking at now is if we can legally designate some programs open to the public and some programs just to residents of Eden Prairie, whether they have a disability or not.

Has there been other cities or organizations dealing with this same issue and do you have any information or articles about this?

Please send information to:

Tria D. Vikesland
Adaptive Recreation Specialist
Eden Prairie Community Center

DJ 202-PL-000120

JUN 1 1992

Craig C. Birker, Esq.
Sandler and Rosen
Suite 510 Gateway West Century City
1801 Avenue of the Stars
Los Angeles, CA 90067

Dear Mr. Birker:

I am responding to your letter requesting an "interpretative ruling" from the Department of Justice that the provisions of title III of the Americans with Disabilities Act of 1990 (ADA) do not apply to the construction of model homes.

The ADA authorizes the Department to provide technical assistance to entities that are subject to title III. This letter provides informal guidance to assist you in understanding how the ADA accessibility standards may apply to model homes. However, this technical assistance does not constitute a legal interpretation, and it is not binding on the Department.

Model homes by themselves do not fall under any of the 12 categories of places of public accommodation. If, however, the sales office for a residential housing development were located in a model home, the area used for the sales office would be considered a place of public accommodation. Although model homes are not covered, the Department encourages developers to voluntarily provide at least a minimal level of access to model homes for potential homebuyers with disabilities. For example, a developer could provide physical access (via ramp or lift) to the primary level of one of several model homes and make photographs of other levels within the home as well as of other models available to the customer.

cc: Records, Chrono, Wodatch, Blizard, Breen
udd:Blizard.ada.interpretation.modelhomes

This Department recently issued a technical assistance manual to assist individuals and entities subject to the ADA to understand the requirements of title III. I have enclosed a copy for your information. I hope that this information is helpful to you.

Sincerely,

John L. Wodatch
Director
Office on the Americans with Disabilities Act
Civil Rights Division

VIA FEDERAL EXPRESS

Mr. John Wodatch
Office Of The Americans With
Disabilities Act
Civil Rights Division
U.S. Department of Justice
Rulemaking Docket 003
Box 75087
Washington, D.C. 20013

Re: Americans With Disabilities Act -
Request For Interpretative Ruling
Regarding Certain Model Homes

Dear Mr. Wodatch:

Our law firm represents Pardee Construction Company and Pardee Construction Company of Nevada (collectively "Pardee"), both of which are subsidiaries of Weyerhaeuser Real Estate Company, a subsidiary of Weyerhaeuser Company. Pardee develops master-planned communities in Southern California and Nevada, consisting of single family and multi-family residences, as well as commercial projects. As part of its residential projects, Pardee constructs model homes.

The purpose of this letter is to request an interpretative ruling from the Department of Justice that the provisions of Title III of the Americans With Disabilities Act ("ADA") do not apply to the model homes described herein.

Granting such an exemption will not permit Pardee or other residential real estate developers to discriminate against the disabled. Discriminatory practices in residential real estate

transactions are prohibited by the Fair Housing Act (42 U.S.C. 3601 et. seq.). Section 3605(a) of the Fair Housing Act states as follows:

> "It shall be unlawful for any person or other entity whose business includes engaging in residential real

002P3EMO.972

01-00834

> estate-related transactions to discriminate against any person in making available such a transaction, or in the terms or conditions of such a transaction, because of race, color, religion, sex, handicap, familial status, or national origin."

We want to emphasize that the subject of our request is limited to model homes and we are not requesting an exemption for sales offices. We also recognize that a blanket exemption for all model homes may not be appropriate. For example, a model home which also serves as a sales or escrow office may be a commercial facility to which the provisions of Title III of the ADA probably should apply.

To evaluate our request, it is important to understand the different functions of model homes and sales offices utilized by Pardee and many other developers in Southern California and Nevada. Although in some cases Pardee's sales offices may be located in the garage of a model home or in a future dwelling unit of a multifamily building, Pardee's model homes and sales offices are separate facilities and serve different purposes.

In the sales office, prospective buyers can review maps, floor plans, photographs and brochures relating to the homes in the development and can discuss their prospective purchase with Pardee salespeople. After prospective buyers have made their decision to purchase, they review and sign purchase documents in the sales office, not in the model home. Pardee's closings are handled through an outside escrow company and do not take place in the sales office or model homes.

Pardee's sales offices are constructed in compliance with all applicable state and local codes relating to commercial facilities, including California and Nevada disability access laws. Pardee's sales offices will be constructed in full compliance with the ADA Accessibility Guidelines, at such time when such compliance is required.

On the other hand, model homes are constructed for the purposes of showing prospective buyers what their home will look like. The model homes are intended to be accurate representations of the homes constructed in the project. When the project has sold out, the model homes are sold to the public. Sales personnel are not stationed in the model homes, but may accompany prospective buyers visiting the models to answer any

questions they may have. Prospective buyers also have the option to visit model homes alone.

Model homes are constructed in accordance with building codes applicable to residences and not commercial facilities. If a model home is required to comply with the ADA Accessibility Guidelines, drastic changes would have to be made in its design and construction. The changes would include the following:

1. Installation of ramps to the front entry area and in some cases to the interior of the model home to provide wheelchair access into and through the unit.

2. Increase the width of hallways to accommodate latch-side clearances.

3 Raise all door heights to 80 inches.

4. Substantially increase the size of bathrooms to provide wheelchair access; redesign toilet and lavatory area; change height of sink; provide foot space below sink; install grab bars; install towel dispensers; raise height of toilet seat; change angles and locations of mirrors; and install lever-operated faucets.

5. Installation of lever hardware for doors.

6. Increase the width of bathroom and bedroom doorways and doors.

7. Add a second handrail to staircase and provide warning devices for sight-impaired persons for low clearances under the stairs.

The cost of these alterations would ultimately be passed on to the consumer. There is no reason to require these substantial permanent alterations to a model home. A disabled person does not intend to live in the model home; he or she only needs to examine it. Pardee will take reasonable steps to provide a disabled prospective homebuyer access to the interior of the model home. Such efforts would include assisting a disabled person in a wheelchair up the front steps and into and through the model home. Restroom facilities for the disabled are already available at the sales office located in close proximity to the model homes.

002P3EMO.972

01-00836

"dwelling" as "any building, structure or portion thereof which is occupied as, or designed or intended for occupancy as, a residence by one or more families, and any vacant land which is offered for sale or lease for the construction or location thereon of any such building, structure or portion thereof." A model home is a building or structure designed or intended for occupancy as a residence. It is a "dwelling" covered by the Fair Housing Act, and is not a "commercial facility" under the ADA definition. Therefore, model homes should be subject to the anti-discrimination provisions of the Fair Housing Act and not the ADA.

For all of these reasons, we respectfully request the Department of Justice to issue an interpretative ruling that the model homes described hereinabove are not subject to the provisions of Title III of the ADA.
If you have any questions or need any further information, please contact me at your convenience.

Very truly yours,

Craig C. Birker

Mr. John Wodatch
Office of Americans with Disabilities Act
P.O. Box 66118
Washington, DC 20035-6118

Dear Mr. Wodatch,

This is a follow up letter regarding a telephone conversation I had today with Mr. Jeff Floriam at the ADA office. I contacted the office to inquire the legalities regarding the ADA and the playground industry. I am a Certified Therapeutic Recreation Specialist and hold a Masters Degree in Therapeutic Recreation. I work for Kompan Inc. and BigToys which are leading playground manufacturers. We have been involved in

wheelchair accessible/barrier free playgrounds for several years and are quite interested in the implications that the ADA requirements may hold for our industry.

I am looking for better direction on what the implications are. Should playgrounds be:

1) Accessible just to the playground?

2) Accessible to the playground and around all of the equipment?

3) Accessible to the playground, around all of the equipment and on the equipment via ramps?

4) A certain percentage accessible?

These are questions I cannot get answered through the ADA, ATBCB, UFAS or MGRAD. I would like to be notified of someone in your office that holds these interest that would like to develop a line of communication.

I look forward to a response as we make this world accessible for all.

Sincerely,

John LaRue
Certified Therapeutic Recreation Specialist

(b)(6) JUN 2 1992
Beavercreek, Ohio 45432

Dear xxx :

This letter responds to your correspondence requesting technical assistance with respect to the provisions of the Americans with Disabilities Act, 42 U.S.C. 12101-12213 (ADA). The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or

obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation, and it is not binding on the Department.

The regulations issued by the United States Department of Justice under Title III of the ADA define a disability as a physical impairment that substantially limits one or more of the major life activities of an individual. Physical impairments include

> (1) Any physiological disorder or condition, . . . or anatomical loss affecting one or more of the following body systems: neurological; musculoskeletal; special sense organs; respiratory, including speech organs; cardiovascular; reproductive; digestive; genitourinary; hemic and lymphatic; skin; and endocrine;
>
> * * *
>
> (iii) The phrase physical or mental impairment includes, but is not limited to, such contagious and noncontagious diseases and conditions as orthopedic, visual, speech, and hearing impairments, cerebral palsy, epilepsy, muscular dystrophy, multiple sclerosis, cancer, heart disease, diabetes, mental retardation, emotional illness, specific learning disabilities, HIV disease (whether symptomatic or asymptomatic), tuberculosis, drug addiction, and alcoholism.

cc: Records OADA Wodatch Bowen Beard
udd:beard.ta.300(b)(6).2

01-00840

28 C.F.R. S36.104, Disability.

While your lack of the sense of smell is a physical impairment, you would be protected under the ADA only if that impairment substantially limits a major life activity. The regulation defines a major life activity to mean functions such as caring for one's self, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning, and working. This determination is sometimes made on a case-by-case basis, and it would depend on information that is not disclosed in your letter.

We are enclosing a copy of the regulations this Department issued under titles II and III of the ADA and our "Title II Highlights" and "Title III Highlights." I hope this information is helpful to you.

Sincerely,

L. Irene Bowen
Deputy Director
Office on the Americans with Disabilities Act

01-00842

JUN 2 1992

The Honorable Bob Graham

United States Senator
Post Office Box 3050
Tallahassee, Florida 32315

Dear Senator Graham:

This is in response to your letter on behalf of your constituent, Mr. Doug Heisler, Vice President of Humana, Inc., regarding the Americans with Disabilities Act (ADA) requirements relating to hospitals.

Mr. Heisler requests a reconsideration of ADA regulatory requirements for the construction of accessible hospital facilities because of the economic burden the new law will place on hospital construction. The standards at issue were first developed as Guidelines by the Architectural and Transportation Barriers Compliance Board (Board), and were incorporated as an appendix to the Department of Justice's regulations implementing the ADA with respect to public accommodations, and commercial facilities. 56 Fed. Reg. 35,544.

During development, the Guidelines received intensive public scrutiny. The Board held 14 public hearings and received over 12,000 pages of comments and testimony from more than 2,300 individuals. The Board carefully considered all comments, including extensive comments received from Humana, Inc., and completed a Regulatory Impact Analysis as required by Executive Order 12291. As a result of this process, numerous changes were made in the final Guidelines.

cc: Records; Chrono; Wodatch; Breen; Lusher; McDowney.
:udd:breen:cong.humana.merge

01-00843

In developing regulations under ADA, the Board and the Department of Justice have made every effort to consider and be responsive to the needs of industry as well as the needs of persons with disabilities. We believe that the ADA requirements for new construction of hospital facilities accurately interpret the statute and are fair and balanced. They were developed after extensive public comment and with concern to the costs that these rules would impose on the provision of health care services. The rules were examined by the Board, the Department of Justice, and the Office of Management and Budget under Executive Order 12291. It would be, therefore, duplicative and unnecessary to reexamine the ADA's rules again so soon after such a complete and exhaustive regulatory process.

In addition, section 504 of the Rehabilitation Act of 1973 and Federal regulations implementing section 504 have required the construction of accessible hospitals for entities receiving Federal funds since the late seventies. Because most hospitals in this country receive Federal funds on a regular basis, we expect that the ADA's requirements are supplemental in nature and should prove to add little economic burden.

I hope that you find this information helpful. Please let me know if I can be of further assistance.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

01-00844

Doug Heisler March 18, 1992

The Honorable Bob Graham
United States Senate
U.S. Capitol Humana
Washington, D.C. 20510

Re: Americans with Disabilities Act

Dear Senator Graham:

I am writing this letter both as a healthcare consumer and Vice President, Design & Construction for Humana Inc. Humana Inc. is one of the largest health care companies in the world. The company is noted for its pioneering role in developing integrated health care systems that include high quality hospital services and a variety of health insurance plans. Humana Inc. owns and operates over 77 hospitals in 19 states, one of which you represent.

The Americans with Disabilities Act, Public Law 101-336 (the "ADA") became law in January, 1992. I totally support the concept of making all buildings accessible to disabled person and a national standard for disabled access is more desirable to the design and construction industry than many different regulations for each state or city. Many states have adopted their own separate building code for hospitals; however, regulations implementing the ADA, as applied to hospitals, are either excessive or ambiguous, and go far beyond accessibility. Strict compliance will mean higher healthcare costs to the consumer, a subject that is being discussed every day by state and national officials and candidates. The issue of health care cost containment is debated almost daily in the national media.

Humana Inc. operates its own design and construction department which, over the last ten years, has been responsible for over three billion dollars of hospital new construction and renovation. As such, I can speak to the level of regulation of hospital construction, which is one of the most, if not the most, regulated building construction in the United States. There are specific regulations for hospitals in the areas of fire protection, room and door size, bathroom accommodations, and many more. Whole chapters of every building code are dedicated to hospital design which, as a requirement to the basic function and mission of a hospital, must be designed and built to accommodate wheelchairs, oversized beds,

and other facilities for the temporarily and permanently non-ambulatory patient.

01-00845

Humana

I am asking your support in calling for a review of the regulations implementing the ADA. In the absence of clear, reasonable regulations, hospitals must accomplish new construction and renovation according to individual interpretations without total confidence that they are accomplishing their activities in the least burdensome and least restrictive manner possible.

Again, I emphasize that I support making public accommodations accessible to the disabled; however, the economic burden to the hospital construction and operation industries must be balanced against the perceived inaccessibility to the disabled patient and visitor. As one of your constituents, Humana Inc. requests your support in taking action to contain healthcare costs by calling for a realistic appraisal of the feasibility and economic impact of full implementation of the ADA as promulgated in the regulations covering public accommodations as applied to hospitals. I will look forward to your reply in this matter.

Sincerely yours,

Doug Heisler
Vice President
Design and Construction

JUN 2 1992

Ms. Debra A. Hixson
Stark Manufacturing, Inc.
Post Office Box 633
Paris, Arkansas 72855

Dear Ms. Hixson:

This letter responds to your correspondence requesting technical assistance with respect to the provisions of the Americans with Disabilities Act (ADA). The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA regulations. However, it does not constitute a legal interpretation and it is not binding on the Department.

Specifically, your letter inquires as to the obligations of a manufacturing concern under title III of the ADA.

Title III of the Americans with Disabilities Act governs the obligations of privately-owned places of public accommodation and of commercial facilities to provide access to individuals with disabilities. A commercial facility is a non-residential facility whose operations affect commerce (such as a manufacturing operation), but which does not contain a place of public accommodation such as a showroom, retail sales office, or establishment serving food or drink.

Title III of the ADA imposes three different types of compliance duties on commercial facilities and places of public

accommodation. When a commercial facility or a public accommodation is engaged in new construction of a facility, it must comply with the accessibility provisions of the ADA standards for new construction, including the ADA Accessibility Guidelines (ADAAG). When a commercial facility or a public accommodation is engaged (after January 26, 1992) in an alteration to an existing facility, it must comply with the alterations standards.

When a public accommodation is engaged in neither new construction nor alteration of a facility, then a third and less rigorous duty is imposed: The public accommodation must remove any barriers to individuals with disabilities where the removal
cc: Records OADA Wodatch Bowen Beard
udd:beard.ta.304.hixson

of those barriers is "readily achievable" -- that is, where the removal can be done easily and without much difficulty or expense. If your facility is a place of public accommodation, rather than a commercial facility, you may be required to remove barriers such as the curb.

The Title III regulations discuss the factors that are to be used in determining whether the removal of a particular barrier is readily achievable. These include: the nature and cost of the action; the financial resources available both to the site and the parent organization; the size and number of employees at the site and overall; and the relationship of the sites to the parent organization.

However, where it is not possible to comply completely with the accessibility specifications of the ADAAG, title III provides that a public accommodation should comply as much as possible -- again without much difficulty or expense.

When a commercial facility is engaged in neither new construction nor alteration of its building, then it has no obligations under title III of the ADA. However, as of July 26, 1992, title I of the ADA will become effective, and any employer with 25 or more employees will be covered. Employers with 15 or more employees will be covered after July 26, 1994. Such an employer will be obligated to make a reasonable accommodation for the disabilities of any current or newly hired employee. This may include modifications of the buildings, such as yours, in which the employer conducts his or her business. Decisions about what is reasonable would be made on a case-by-case basis. We are unable to give you more specific guidance; implementation of

title I is within the jurisdiction of the Equal Employment Opportunity Commission. We are enclosing the Title I regulation for your information.

I hope that this information will be of assistance to you in evaluating your obligations under the ADA.

Sincerely,

L. Irene Bowen
Deputy Director
Office on the Americans with Disabilities Act

RE: TITLE III Public Accommodations Provisions

To Whom it may concern:

A few months ago I wrote to you requesting information on the new ADA act. Your department mailed me a Federal register and a booklet with questions and answers that was very helpful, and I appreciate it.

Within the booklet are phone numbers to call for more specific information about ADA requirements affecting employment. I have called the number a total of ten (10) times, as of today, and have

become very aggravated with the facility I am phoning. The first three (3) times I called, a lady named Brenda took my message and assured me each time that she would have another lady named Mrs. Kay Klugh return my call. The last seven times, (last, Thursday & Friday, and every day this week) I called I have received a recording (which could not clearly be heard) and left a message for Mrs. Klugh to please return my call. It does not look good for an Official Office to handle there business in this manner. It also makes it very difficult to make every effort to comply with the new Act, and not be able to do so because of the very people who are requiring it. The name, address, and phone number of the facility I am referring to it:

Equal Employment Opportunity Commission
1801 L Street NW
Washington, DC 20507
1-800-669-4000

Could you please answer one question for me concerning the ADA Act? I work within a Manufacturing Company. We fully understand the requirements in employing disabled personnel. My question is in reference to Title III (Public Accommodations Provisions). This company hires through an employment agency. We do not accept application forms in our office area. Do we still need to make our front office area accessible to the disabled person, by January 26, 1992, will the front work, the front office ILLEGIBLE ILLEGIBLE

As an example lets say they (any disabled person) did not know we were not accepting applications in the front office area, and they tried to come in to submit one.

There is a 6 ' curb beginning at the front entrance walkway. We will eventually slant that curb, but until then are we in error with the Act?

We realize that plans need to be outlined to comply in theses areas by July 26, 1992.

My Manager is waiting on an answer from me on this single question and I cannot get the answer anywhere, please help!

Sincerely,

Debra A. Hixson
Personnel Assistant

U.S. Department of Justice
Civil Rights Division

202-CON

Office of the Assisant Attorney General Washington, D.C. 20035

JUN 3 1992

The Honorable Gary L. Ackerman
U.S. House of Representatives
238 Cannon House Office Building
Washington, D.C. 20515-3223

Dear Congressman Ackerman:

This letter responds to your correspondence regarding an inquiry by your constituent, Ira Farbstein, concerning the obligations of public accommodations with respect to barrier

removal under title III of the Americans with Disabilities Act of 1990.

Depending on the context, title III of the ADA imposes a range of compliance standards on private entities regarding physical barriers in places of public accommodation. When a public accommodation is engaged in new construction of a facility, or in an alteration or remodeling of an existing facility, it must comply with the rigorous requirements of the ADA Accessibility Guidelines.

When a public accommodation is engaged in neither new construction nor alteration of a facility, then a significantly less demanding accessibility obligation is imposed. The public facility must remove any physical barriers to individuals with disabilities where the removal of those barriers is "readily achievable" -- that is, where the removal can be done easily and without much difficulty or expense.

The regulations issued by the Department of Justice discuss the factors that are to be used in determining whether the removal of a particular barrier is readily achievable. These include the nature and cost of the action, the financial resources available both to the site and the parent organization, the size and number of employees at the site and overall, and the relationship of the site to the parent organization. A copy of these regulations is enclosed.

cc: Records OADA Wodatch Bowen Breen Beard McDowney Arthur
udd:Beard.C.302B2AIV.Ackerman

The removal of physical barriers in an existing restaurant should be evaluated under the "readily achievable" standard. Where removal of all barriers is not readily achievable, a public accommodation must still take whatever steps it can under that standard to remove barriers. In addition, the obligation to remove any existing barriers is an ongoing one. What is not readily achievable today may be readily achievable next year.

I hope that you find this information useful in responding to your constituent.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

January 15, 1992

(Hand Written)

DEAR SIR,

I AM WRITING YOU IN REGARD TO THE AMERICANS WITH DISABILITIES ACT (ADA) PUBLIC LAW 101-336, AND HOW THIS LAW

WILL AFFECT ME.

I HAVE A SMALL FORTY (40) SEAT RESTAURANT AT ABOVE ADDRESS. MY RESTAURANT HAS ALWAYS BEEN ACCESSIBLE TO THE HANDICAPPED: IE THE BLIND, DOWNS SYNDROME PERSONS, WHEELCHAIR ACCESSIBLE, ETC.

UNFORTUNATELY THE PHYSICAL SETUP OF THE STORE MAKES THE RESTROOMS UNACCESSIBLE TO THE WHEELCHAIR.

IN ORDER TO MAKE THE RESTROOMS WHEELCHAIR ACCESSIBLE I MUST ILLEGIBLE DOWN EXISTING WALL WHICH WILL CAUSE ME TO LOSE EIGHT SEATS. (20% OF ILLEGIBLE SEATING CAPACITY.

ALSO MY PRESENT RESTROOMS WHICH ARE SEPARATED BY A ILLEGIBLE WOULD HAVE TO BE TORN DOWN. ALSO, PART OF MY KITCHEN WALL WOULD HAVE TO BE TORN DOWN AND MOVED BACK. THIS WOULD FORCE ME TO DISCONNECT MY DISHWASHER-MACHINE, MOVE MACHINE AND ILLEGIBLE WITH NEW PLUMBING.

ALL THIS WOULD HAVE TO BE DONE IN ORDER TO MAKE A RESTROOM THAT WILL COMPLY WITH ADA ORDER.

THE COST TO DO THIS WOULD PUT ME IN A SEVERE FINANCIAL BIND AND CREATE MUCH HARDSHIP.

IT SEEMS RIDICULOUS THAT I MUST INVEST ALL THIS MONEY, PLUS LOSS OF BUSINESS AS THE RESTAURANT WOULD HAVE TO BE CLOSED DURING ALTERATIONS.

ITS ALSO UNHEARD OF FOR A BUSINESS OF ANY KIND TO MAKE AN INVESTMENT TO DO LESS BUSINESS. PLEASE ADVISE ME AS TO MY RIGHTS

SINCERELY YOURS

IRV FARESTEIN

P.S. WHEN YOU'RE BACK HOME FROM
YOUR DUTIES IN THE CAPITOL I WOULD
MORE THAN WELCOME A VISIT TO MY
ILLEGIBLE

Ms. Julie Klauber
Outreach Services Administrator
Suffolk Cooperative Library
System
627 North Sunrise Service Road
Bellport, New York 11713

Dear Ms. Klauber:

This responds to your request for an interpretation of the Americans with Disabilities Act (ADA) as applied to public libraries.

The ADA authorizes the Department to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you in understanding how the ADA may apply to you. However, this technical assistance does not constitute a determination by the Department of Justice of your rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

You requested an opinion on whether the public libraries of Suffolk County are covered by title II or title III of the ADA. Title II of the ADA applies to any "public entity," which is defined in accordance with section 201(1) of the ADA as any State or local government; any department, agency, special purpose district, or other instrumentality of a State or States or local government; and the National Railroad Passenger Corporation, and any commuter authority (as defined in section 103(8) of the Rail Passenger Service Act). Title III applies to public accommodations and commercial facilities, and defines "public accommodation" as a private entity that owns, leases (or leases to) or operates a place of public accommodation. The term "private entity" is defined as a person or entity that is not a "public entity."

cc: Records; CRS; Oneglia; Kaltenborn; Friedlander; Arthur
UDD: Kaltenborn Klauber
01-00854

The libraries in question would, therefore, be covered by title II if they are components of a State or local government. If they are not components of a State or local government, they would be covered by title III as private entities operating a place of public accommodation, i.e., a library. Generally speaking, the question of whether an entity is public or private is not difficult. For example, a municipal library, as a department of the township, would be a public entity covered by title II.

The question may be difficult, however, where an entity has both public and private features. A library operated by a private organization would not be a "public entity" merely because it is open to the public. In such cases, it is necessary to examine the relationship between the entity and the government unit. The factors to be considered include whether the library is operated with public funds; whether the library employees are considered government employees; whether the library receives significant assistance from the government by provision of property or equipment; and whether the library is governed by an independent board selected by the members of a private organization or is elected by the voters or appointed by elected officials.

We hope that this information is helpful.

Sincerely,

Stewart B. Oneglia
Chief
Coordination and Review Section
Civil Rights Division

Mr. Stewart Oneglia
Civil Rights Division
U.S. Department of Justice
P.O. Box 66118
Washington, DC 20035-6118

Dear Mr. Oneglia:

As per my conversation with Brenda Shepherd this morning, I am writing to request a written opinion as to whether the public libraries of Suffolk County, New York fall under Title II or Title III of the Americans with Disabilities Act.

Suffolk has 54 independent public libraries. One is a "municipal" library, one is a "special district" library, and all of the others are "school district" or "association libraries." Attached is a description of the public libraries of New York State and each of these types.

The association libraries were created by groups of individuals as private, not for profit membership organizations, although they generally function in a public capacity. The school district libraries were created by votes of the residents of the respective school districts. The special district library was created by the state legislature, and the municipal library is a department of its township.

With the exception of the municipal library, each of these libraries has its own board of trustees and sets its own policies and budget. These budgets are generally voted upon by the residents of the district, although the taxes themselves are collected by the local school districts.

We have had many conflicting opinions as to which Title of the ADA these libraries fall under, and obviously need this information as quickly as possible in order to assist them in meeting the regulations of this law. I am looking forward to hearing from you.

Sincerely,

Julie Klauber

Libraries, Library Systems and Networks

Some 7,600 libraries serve the people of New York State. Many of these libraries are linked with others in resource sharing systems and networks. These libraries have book collections of some 171 million volumes. Brief summary data on the several types of libraries are shown in the table on the preceding page.

Public Libraries. The people of New York State are served by 733 chartered public libraries and over 390 branch libraries. Of these chartered libraries, 730 are members of the 22 public library systems. Some 63 percent of the libraries (463) in the State are small, serving fewer than 7,500 popu- lation. Only 105 of the libraries (and almost half of these are located on Long Island) serve a population of 25,000 or more. The three public libraries in New York City, (the Brooklyn, The New York and the Queens Borough public libraries) serve more than 40 percent of the population of the State.

In 1985 the total public library operating expenditure in New York State was $383 million. The main financial support for public libraries in New York State (an average of 70 percent) comes from local public funds ($274 million in 1985). The average per capita expenditure for public library service (including that for public library systems) in 1985 was $21.83.

The Regents of The University of the State of New York charter (i.e., incorporate) the public libraries. A library serves a village, town, city, county, school district, a combination of these units, or in exceptional cases a special library district established by the Legislature. These libraries are subject to State Education Law and to the Regulations of the Commissioner of Education.

A board of trustees governs each library, with specific powers and responsibilities under Education Law. Each public library board is autonomous. The four major types of public libraries (and the number in the State) are:

Municipal (209). Created by a village, town, city, or county government (5-11 trustees appointed by local government).

Association (392). Created by a membership association. Contracts with a unit of government

or a school district to provide library services (5-25 trustees elected by the membership of the association).

Ms. M. Angela White
Director
Personnel Department
Room 302
City Hall Annex
Petersburg, Virginia 23803

Dear Ms. White:

This responds to your inquiry concerning medical examinations of City employees.

The ADA authorizes the Department to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you in understanding how the ADA may apply to you. However, this technical assistance does not constitute a determination by the Department of Justice of your rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

The Department of Justice's regulation implementing title II of the Americans with Disabilities Act, which applies to all programs and activities of public entities, provides that the requirements of title I of the Act apply to employment by public entities that are covered by title I. Title I will apply to all employers, including public entities, with 25 or more employees, effective July 26, 1992, and to all employers with 15 or more employees effective July 26, 1994. Title I will be enforced by the Equal Employment Opportunity Commission (EEOC), whose implementing regulation you cite in your letter. Inquiries concerning that regulation should be directed to the EEOC at

Dear Ms. White:

The Civil Rights Division of the Department of Justice has received your request for an interpretation of the Americans with Disabilities Act (ADA). The ADA authorizes the Department of Justice to provide technical assistance to entities that are subject to the Act. The Civil Rights Division will treat your inquiry as a request for technical assistance and will provide informal guidance to you. However, because of the large volume of requests for interpretations of the ADA, we are unable to answer your letter at this time.

Please be assured that the Division will respond to your letter expeditiously. We regret any inconvenience caused by our delay in responding and have enclosed for your information two documents on the ADA: "Title II Highlights," and "Title III Highlights."

Sincerely,

Stewart B. Oneglia
Chief
Coordination & Review Section

Mr. Stewart Oneglia
Office on the Americans with
Disabilities Act
U.S. Department of Justice
Post Office Box 66118
Washington, D.C. 20035-6118

Dear Mr. Oneglia:

Please provide a written opinion in regard to the appropriate handling of the following situation as it pertains to Title I of the Americans with Disability Act. It is my understanding that the U.S. Department of Justice will enforce Title I as of January 26, 1992 even though the Equal Employment Opportunity Commission does not begin enforcement until July 26, 1992. Consequently, an expeditious response will be appreciated.

Section 1630.14(c) Examination of Employees "permits periodic physicals to determine fitness for duty or other medical monitoring if such physicals or monitoring are required by medical standards or requirements established by Federal, State or local law that are consistent with the ADA and this part in that they are job-related and consistent with business necessity." The City of Petersburg currently conducts a mandatory physical fitness program for sworn fire and police personnel in order to maintain the physical standards necessary to safely perform in these positions. As part of this program medical examinations are required every four years for those

individuals forty (40) years or under and every two years for those over forty (40) years. The program and medical examinations are required by department policy, but not by federal, state, or local law. Are the medical examinations allowed under this act?

Your guidance will be appreciated.

Sincerely,

M. Angela White
Personnel Director

Mr. XXXXX(b)(6)
Seattle, Washington 98103

Dear Mr. xx:

This is in response to your letter requesting information about the Americans with Disabilities Act (ADA). It was referred from the Architectural and Transportation Barriers Compliance Board.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

You ask whether movie theaters are considered places of public accommodation under the ADA and, if so, whether the ADA requires them to have some showings with captions.

Movie theaters are places of public accommodation and, therefore, subject to the requirements of the ADA. However, the Act does not require theaters to offer film showings with open captioning. This issue was specifically considered by Congress

during the legislative process and Congress indicated that open captioning would not be required. Closed captioning cannot be used because it is not a technology that is currently compatible with film projection.

I hope this information will be useful to you in understanding your rights under the ADA.

Sincerely,

Joan A. Magagna
Deputy Director
Office on the Americans with Disabilities Act

Dear Mr. XX

We are in receipt of your letter dated February 27, 1992 regarding the Americans
with Disabilities Act of 1990 (ADA).

With respect to the ADA, the Access Board is charged with the development and issuance of the ADA Accessibility Guidelines for Buildings and Facilities (ADAAG). Our technical assistance role is limited to explanation and clarification of the ADAAG's scoping and technical provisions. As the regulatory
authority, the U.S. Department of Justice (DOJ) is responsible for application of the ADAAG and for certain other regulations pursuant to the Act.

Your questions addressed issues under the purview of the ADA Office at DOJ. For
this reason, we are forwarding your letter to:

Office on the Americans with Disabilities Act
Civil Rights Division
U.S. Department of Justice
P.O. Box 66118
Washington, DC 20530

Thank you for contacting the Access Board. If we can be of assistance, please don't hesitate to contact us at the above address or at (800) 872-2253.

Sincerely,

Marsha K. Mazz
Technical Assistance Coordinator

The Access Board

Wanaque, New Jersey 07465

Dear Ms. XX

This is in response to your letter requesting information about the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

Your inquire whether the condominium in which you live is required to provide access for disabled persons, specifically by providing an elevator or lift. The ADA does not apply to strictly residential facilities. The federal Fair Housing Act, as amended, which does apply, does not require the condominium to install a lift or elevator in the circumstance you have described. The condominium would be required to allow you to install a left or elevator but you would have to pay the cost.

There are more extensive accessibility requirements for newly constructed multi-family buildings. There may also be state or local laws that have more stringent requirements.

I am sorry we cannot be of assistance.

Sincerely,

Joan A. Magagna
Deputy Director
Office on the Americans with Disabilities Act

U.S. Department of Justice
Civil Rights Division
Coordination and Review Section
P.O. Box 66118
Washington, D.C. 20035-6118

Dear Sir or Madam:

My 4-year-old daughter XX is multiply handicapped and requires an adaptive stroller for mobility. As she grows and gains weight it is becoming increasingly more difficult to leave the house with her. My problem is the following:

We have lived in this condominium since several years before XX was born. Our unit is two stories high with a basement containing a garage. We own our unit, but everything on the outside belongs to the Condominium Association, even the decks to which we alone have access. Normally, we are not permitted to alter anything on the outside of our units.

The Association has taken the position that it will allow handicapped access which must be pre-approved by them. They, are not willing to provide it themselves.

A local charitable organization was willing to build a ramp, but the contractor looked at the premises and informed us that the slope of the grounds in front of the unit is too steep and the area too small to build a safe ramp. (The grounds behind the unit are lower, so that we can drive into the garage or walk into the basement.)

My daughter's caseworker from N.J. Special Child Health Services then contacted a company which sells and installs elevators

and lifts for the handicapped. The sales representative felt
a lift could be installed next to and leading onto the deck
located directly above the garage door in the rear, which would
bring us into our living room on the main floor. It would also
allow us easy access to the car. An estimate along with the
required documentation of need were submitted to the N.J.
01-00865

Division of Developmental Disabilities; after many months
we were recently told there is no funding available for
this purchase.

Unfortunately, my husband and I are unable to pay for a lift
either, and we have been told ramping is not possible.
We are also in no position to move to a one-floor home, which
we had hoped.

My question pertains to the Condominium Association's position.
This is of course private property, and the outside of the units
is common ground. Does this fact exempt them from being
required to provide access to the handicapped? Unfortunately
we do not have the resources to consult an attorney on this
issue.

If you can provide an answer or suggest alternative resources
I would be very grateful.

Sincerely,

(b)(6)

Office of the Assistant Attorney General Washington, D.C. 20035

JUN 4 1992

The Honorable Hank Brown
United States Senate
717 Senate Hart Building
Washington, D.C. 20510

Dear Senator Brown:

This responds to your letter requesting information about the Americans with Disabilities Act (ADA) in order to respond to your constituent, Mark H. Schmidt.

The ADA authorizes the Department to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you in responding to Mr. Schmidt. However, this technical assistance does not constitute a determination by the Department of Justice of Mr. Schmidt's rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

Mr. Schmidt's letter concerns the paperwork burden of conducting the self-evaluation required by S 35.105 of the Department of Justice's regulation implementing title II of the

ADA. He enclosed with his letter a guide for conducting the self-evaluation distributed by Colorado Counties, Inc. That guide was not produced by the Department of Justice, and the Department of Justice does not require that it, or any other particular guide, be used in completing the self-evaluation. Section 35.105 of the Department's regulation provides that:

> (a) A public entity shall, within one year of the effective date of this part, evaluate its current services, policies, and practices, and the effects thereof, that do not or may not meet the requirements of this part and, to the extent modification of any such services, policies, and practices is required, the public entity shall proceed to make the necessary modifications.

cc: Records CRS Oneglia Friedlander Kaltenborn McDowney
udd:kaltenborn.brown
01-00867

> (b) A public entity shall provide an opportunity to interested persons, including individuals with disabilities or organizations representing individuals with disabilities, to participate in the self-evaluation process by submitting comments.
>
> (c) A public entity that employs 50 or more persons shall, for at least three years following completion of the self-evaluation, maintain on file and make available for public inspection:
>
> (1) A list of the interested persons consulted;
>
> (2) A description of areas examined and any problems identified; and
>
> (3) A description of any modifications made.
>
> (d) If a public entity has already complied with the self-evaluation requirement of a regulation implementing section 504 of the Rehabilitation Act of 1973, then the requirements of this section shall apply only to those policies and practices that were not included in the previous self-evaluation.

This requirement is intended to enable a public entity to identify and correct obstacles to participation in its services, programs, and activities by individuals with disabilities in

order to avoid the necessity for administrative complaints or litigation. It is derived from the regulations implementing section 504 of the Rehabilitation Act of 1973 for programs and activities that receive Federal financial assistance, and is the same as the self-evaluation requirement imposed on Federal Executive agencies under regulations implementing section 504 for federally conducted programs, see, e.g., 28 CFR S 39.110 (Department of Justice).

As explained in the preamble to the regulation,

> Experience has demonstrated the self-evaluation process to be a valuable means of establishing a working relationship with individuals with disabilities, which has promoted both effective and efficient implementation of section 504. The Department expects that it will likewise be useful to public entities newly covered by the ADA.

56 Fed. Reg. 35,701 (July 26, 1991). The requirement in the regulation is both simple and flexible. The Department has not issued detailed guidelines for conducting self-evaluations because it intends to allow public entities to tailor their
01-00868

evaluations to their own programs and needs. However, pages 40-43 of the enclosed Technical Assistance Manual contain some general guidance on self-evaluations. We have not reviewed the document enclosed with Mr. Schmidt's letter and have no opinion on its contents.

I hope that this information is helpful to you in responding to your constituent.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

WARREN E. SCHMIDT 1924-1987

Honorable Hank Brown
717 Senate Hart Building
Washington, D.C. 20510

Dear Senator Brown:

One of the clients I represent is Baca County. I have become increasingly frustrated by the amount of time County officials and employees and I must devote to complying with

Federal regulations. These include Fair Labor Standards Act, landfills, stormwater, alcohol and drug free workplace, wetlands and others. The most recent is Americans With Disabilities Act (ADA) regulations.

Baca County's population is approximately 4,500. The County employs about 100 full and part-time people. The economy here is heavily dependent on agriculture. We don't have a lot of the problems of more heavily populated parts of the country. Nor do we have some of the human resources that other larger units of government have. It is a considerable burden for us to keep up with the current Federal paperwork requirements.

I have enclosed a copy of the March 19, 1992 memo from Allen E. Chapman, Loss Prevention Manager for CCI. This memo went out to all of the counties in Colorado. In it Mr. Chapman attempts to provide some guidance as to the requirement to conduct self-evaluations under ADA by January 26, 1993.

I challenge any Congressman who voted for the ADA to conduct a similar evaluation of his own office. Even a cursory examination of the proposed checklist would reveal what a time-consuming and basically meaningless exercise this evaluation is.
01-00870

It seems to me that any time some pressure group (in this case that group is the disabled) seeks some assistance from Washington on a perceived problem the answer that comes from the Congress is more regulation, more paperwork, and more bureaucracy. We're literally drowning in paperwork and it affects this country's productivity.

My simple wish is that Congress would show a little faith in state and local officials to deal with these issues

without massive Federal rules, regulations and paperwork requirements. The idea that all problems can or should be solved in Washington has to end.

Sincerely,

Mark H. Schmidt

MHS/nal
Enclosure
01-00871

DJ 202-PL-125 JUN 4 1992

Mr. James D. Harris
Deputy Attorney General
Department of Law and Public Safety
Office of the Attorney General
Legal Affairs
Richard J. Hughes Justice Complex CN 081
Trenton, New Jersey 08625-0081

Dear Mr. Harris:

This is in response to your letter requesting information about the Americans with Disabilities Act.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

You inquire what obligations state governments have with respect to nondiscrimination in employment under the ADA. As you recognize, Title I applies to the employment activities of state employers and goes into effect on July 26, 1992 for employers with 25 or more employees and on January 26, 1994, for employers with 15 to 24 employees. Title II, which became effective on January 26, 1992, prohibits discrimination in all of the programs, activities, and services of public entities. Title II also covers the employment practices of public entities, regardless of the number of employees. As you note, the Department's Title II regulations incorporate Title I standards for employment practices covered under Title I. 28 C.F.R. S 35.140(b)(1). Title II and its implementing regulations, became effective on January 26, 1992. However, until Title I becomes effective for an employer, the standards for employment practices under Title II will be the same as those under Section 504 of the Rehabilitation Act.

cc: Records Chrono Wodatch Magagna.PL.125 arthur T. 6/3/92
01-00872

Section 504 prohibits employment discrimination on the basis of disability. It has been in effect for many years and applies to all programs and activities that receive federal financial assistance as many state entities do.

The Department has recently published a Title II Technical Assistance Manual. I have enclosed a copy. I hope this information will be of assistance to you.

Sincerely,

Joan A. Magagna

Re: Written Opinion
Americans With Disabilities Act

Dear Mr. Wodatch:

I am writing on behalf of the Attorney General of the State of New Jersey to request a written opinion on the application of Title I of the Americans With Disabilities Act (ADA) to the New Jersey Division of State Police prior to July 26, 1992, the effective date of that title. There is some confusion about the proper interpretation of Section 35.140(b)(1) of the Department of Justice regulations implementing Title II of the ADA. We have been informed by some sources -- mistakenly I believe, -- that this sub-section provides that the EEOC's Title I regulations are incorporated into Title II and thereby apply to State governments as of January 26, 1992. Having read the materials relied on, it is my belief that this language is more properly interpreted to mean that until a State government is covered by Title I of the ADA on July 26, 1992, the Title II employment non-discrimination requirements applicable are those in the Department of Justice coordination regulations applicable to federally-assisted programs under Section 504 of the Rehabilitation Act of 1973. While this Act and Title I may be similar in many respects, there are distinct differences.

By way of background, you should note that the New Jersey State Police has been under a hiring freeze for the past three and one-half years. Recently, this hiring freeze was lifted by the Governor. Consequently, we are now beginning reprocessing of

609-984-6996

NEW JERSEY IS AN EQUAL OPPORTUNITY EMPLOYER

01-00874

the original group which was put on hold due to the hiring freeze. This selection process must begin now while we have a commitment to fund the academy training and a preliminary commitment in the Governor's budget to provide for the salaries of these academy graduates in fiscal year 1993. We plan to begin the selection process on or about April 24, 1992 with the physical agility test. The training academy then is set to begin on August 23, 1992 and run through January 21, 1993.

For the reasons stated above, the State Police cannot afford to revamp its entire process at this late date in order to meet all the requirements of Title I of the ADA. Again, I do not read Title I of the Act as requiring this; rather, it is my interpretation that the Division of State Police is not bound by Title I of the ADA until July 26, 1992. We have already begun to examine the process to make sure that the next academy class will meet all the requirements of Title I of the ADA.

In light of the above, please advise in writing as soon as possible whether the New Jersey State Police will be bound by Title I of the ADA prior to July 26, 1992. Again, it is my interpretation of the statute and regulations that the crucial date remains July 26, 1992, which will be after the selection process for the next academy class has been completed. Time is of the essence; a response at your earliest convenience would be appreciated. If you need additional information, please do not hesitate to contact me at 609-984-1695.

Very truly yours,

James D. Harris
Deputy Attorney General

202-PL-87 JUN 4 1992

Mr. Larry Healey
122 Klondike Avenue
Haverhill, Massachusetts 01832

Dear Mr. Healey:

This letter responds to your correspondence requesting information about the Americans with Disabilities Act (ADA). The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under to the Act. This letter provides informal guidance to assist you in understanding the ADA accessibility standards. However, it does not constitute a legal interpretation and it is not binding on the Department.

Your letter inquires whether a camp composed of a dining hall, three sleeping lodges, administrative buildings, and sleeping tents operated by a volunteer organization is covered by the provisions of the ADA, and what is the nature of the obligations under the Act.

Title III of the ADA covers places of lodging and recreation, and therefore includes camps of the sort you describe.

Title III prohibits covered entities from discriminating on the basis of disability in offering its services and facilities. The camp cannot impose discriminatory eligibility requirements or provide segregated services. The camp also has an obligation to make reasonable modifications in its program and services to accommodate the needs of individuals with disabilities unless doing so would fundamentally alter the nature of the services, accommodations and privileges being offered. There is also an obligation to provide auxiliary aids and services in order to insure effective communication with individuals with hearing, speech, or vision impairments unless doing so would fundamentally alter the nature of the camp's operations or cause an undue burden.

With respect to the physical facilities, the camp is required to remove architectural barriers to accessibility and structural communication barriers if it is readily achievable to

cc: Records Chrono Wodatch Magagna.PL.87 Beard
arthur T. 6/3/92
01-00876

do so. Readily achievable means easily accomplishable without much difficulty or expense. Should the camp engage in new construction or an alteration of any facility, the construction or alterations must comply with the ADA Accessibility Guidelines.

I have enclosed a copy of the Title III Technical Assistance Manual published by the Department of Justice. I hope that this information will be useful to you in evaluating your obligations under the ADA.

Sincerely,

Joan A. Magagna
Deputy Director
Office on the Americans with Disabilities Act

Dear Sirs:

I am currently involved with a volunteer organization that operates a camp. Primarily this camp is utilized during the months of July and August, however, it is utilized during other months on a limited basis. My inquiry is how does ADA apply to this type of facility?

The camp does have a dining hall and three lodges used for sleeping quarters, as well as various other administrative buildings. Primarily, tents are used for sleeping arrangements.

Which sections of Title III would be applicable, if any, and are there specific other requirements or time frames?

Thank you in advance for your assistance.

Respectfully,

Larry Healey

Corona del Mar, California 92625

Dear Mr. Holmes:

This letter responds to your correspondence requesting information regarding the provisions of the Americans with Disabilities Act, 42 U.S.C. S 12101-12213 (ADA). The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights and obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA accessibility standards. However, it does not constitute a legal interpretation and it is not binding on the Department.

Specifically, your letter inquired whether apartment rental units are covered by the ADA.

Residential apartment units are not covered by the Americans with Disabilities Act. However, they are governed by the Fair Housing Act, as amended in 1988, which prohibits discrimination on the basis of disability and sets minimum accessibility standards for new construction of certain multi-family housing units.

Apartment units in a building that are used for nonresidential purposes -- such as a doctor's office -- would be covered by the ADA, because such an entity falls within the ADA's definition of a "place of public accommodation."

We hope that this information is useful to you in evaluating your rights and obligations under the ADA.

Sincerely,

Joan A. Magagna

P. O. Box 66118
Washington, DC 20035-6118

Gentlemen,

After several unsuccessful telephone calls to reach an operator, I have decided to send my question in the form of this letter.

Based upon my understanding of the Americans with Disabilities Act, specifically Title III, I have concluded that apartment units, whether rented or leased, are not covered by the Act. They do not appear in the definitions for Public Accommodations or Commercial Facilities.

Please confirm that the Act does not cover residences of this nature. If, however, it does, please advise how this has been determined. Thank you.

Sincerely,

LESTER HOLMES Associates

Mr. David Kessler
Project Manager
Katherine McGuiness and
Associates, Inc.
267 Moody Street
Waltham, Massachusetts 02154

Dear Mr. Kessler:

This is in response to your letter requesting information about the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

You inquire whether UFAS or ADAAG should be used for the design and construction of a parking garage built and owned by a state authority but to be operated by a private company.

In the situation you describe, the garage should be built in accordance with ADAAG, but without the elevator exemption.

Title III governs the operations of private entities that provide services to the general public, such as parking. If the private entity leases its facilities from a state or local government, the private entity remains subject to Title III requirements. State and local governments, however, are never subject to Title III, even when leasing to a private entity operating a place of public accommodation. Title III requires

alterations and new construction to comply with ADAAG.

Title II governs the operations of state and local government entities, including services or operations it provides through contract with a private entity. Title II permits covered entities to choose whether to use ADAAG (without the elevator exemption) and UFAS.

cc: Records Chrono Wodatch Magagna.PL.100 Beard
arthur T. 6/3/92
01-00881

In the circumstance you describe, the private entity, as operator of the facility, will be subject to Title III; the state, because it is contracting out what would otherwise be a state function, is subject to Title II. Given the joint nature of the project it would be advisable to use ADAAG, without the elevator exemption. In order to comply with both Titles, you must use ADAAG, without the elevator exemption.

I have enclosed copies of the Department's Title II and Title III Technical Assistance Manuals. I hope this information will be useful to you.

Sincerely,

Joan A. Magagna
Deputy Director
Office on the Americans with Disabilities Act

Washington, DC 20035-6118

Dear Sir/Madam,

Re: Use of UFAS vs. ADDAG in the design and construction of a state facility operated by a for profit private company as an agent for the public authority, for example:

Does a newly constructed addition to a parking garage built and owned by a state authority, to be run by a private company acting as an agent for the authority, come under Title III (as a public accommodation).

This sort of scenario is coming up repeatedly.

Subpart B, paragraph 36.201, prohibits discrimination by any private entity who owns leases, or operates a place of public accommodation. This appears to indicate that the above described facility would come under Title III. Yet, in the discussion of paragraph [b] of 36.201 it states, "Although the statutory language could be interpreted as placing equal responsibility on all private entities, whether lessor, lessee...." The reference to "all private entities" makes me question whether the public authority would be included. Whether to comply with ADAAG or UFAS in the design and construction of the facilities appears to rests on this determination.

I would greatly appreciate your expediting a response to this issue.

Sincerely,

David Kessler
Project Manager

202-PL-00019

Mr. Philip E. Kremer, Property Manager JUN 4 1992
J. R. Parrish, Inc.
1960 The Alameda: No. 100
San Jose, California 95126

Dear Mr. Kremer:

This responds to your letter requesting information about the provisions of the Americans with Disabilities Act (ADA). The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA accessibility standards. However, it does not constitute a legal interpretation and it is not binding on the Department.

Your letter requests an exemption from the requirements of the ADA for a an office building located in a converted mansion that is 85 years old. You also indicate that the facility is currently generating a negative cash flow.

Title III of the ADA applies to privately owned or operated

places of public accommodations and commercial facilities. There is no provision under the ADA for granting exemptions to Title III. Neither the historic nature of a building nor its poor financial condition is a basis for avoiding the requirements of the ADA. However, the obligations imposed by the statute are not onerous.

Your letter does not specify, but I am assuming that the businesses located in your building are places of public accommodation within the meaning of the ADA. Among the types of businesses considered places of public accommodation are those providing services to the public (attorneys, accountants, physicians, travel agencies, etc.) and sales and rental operations. A more extensive list is found in the enclosed Title III Technical Assistance manual.

cc: Records Chrono Wodatch Magagna.PL.19 Beard
arthur T. 6/4/92
01-00884

For existing facilities of places of public accommodations, the ADA requires the removal of architectural access barriers and structural communication barriers where such removal is "readily achievable." The statute defines readily achievable to mean easily accomplishable without much difficulty or expense. A number of factors are considered to determine whether a measure is readily achievable. These include: the nature and cost of the action; the financial resources available both to the site and the parent organization; the size and number of employees at the site and overall; and the relationship of the sites to the parent organization. The historic nature of the building in which the place of public accommodation is located is relevant to several of these factors.

Where barrier removal is not readily achievable, alternative steps must be taken to provide access if such measures are themselves readily achievable. However, the obligation to remove barriers is a continuing one. In other words, if removal of a particular barrier is not presently readily achievable because of cost factors, it must be undertaken at whatever point in the future the financial situation improves and makes removal readily achievable.

The ADA imposes additional obligations for making alterations to a building and for new construction. These requirements are described in the enclosed Manual.

We hope that this information is useful to you in evaluating your rights and obligations under the ADA.

Sincerely,

Joan A. Magagna

Deputy Assistant Attorney General
Civil Rights Division
U.S. Department of Justice
Washington, D.C. 20530

Re: Request for an Advisory Opinion Regarding the Applicability of Public Accommodation Section of The Americans with Disabilities Act

Dear Ms. Drake:

I am writing this letter to request an opinion regarding the applicability of Title III of the Americans with Disabilities Act ("ADA") regarding public accommodations and services operated by private entities. Specifically, I am requesting an opinion regarding the interaction of Section 307 of the ADA, which states that the provisions of Title III of the ADA shall not apply to religious organizations or entities controlled by religious organizations and of public accommodations otherwise subject to Title III, who lease facilities from religious organizations.

The specific situation we are concerned with involves the operation of a pre-school by a private entity in a facility that is leased from a religious organization. The pre-school itself is not otherwise controlled or operated by the religious organization. The nature of the relationship between the religious organization and the pre-school is one of landlord and tenant. The religious organization leases classrooms located on the religious organization's premises, in buildings adjacent to the place of worship, to the pre-school.

We are concerned with the dichotomy created by the specific exemption from the provisions of Title III for religious organizations and the mandates of the ADA applicable to private entities that operate public accommodations such as day care centers/pre-schools/nurseries.
01-00886

While it is clear that Section 307 of the ADA exempts religious organizations, Section 301(7) (k) specifically states that private entities are considered public accommodations for purposes of the Act if the operation of such entities affects commerce. Section 301(7) (k) includes nurseries as a public accommodation. Section 301(7) (j) specifically includes a day care center or social service center establishment in the list of public accommodations affecting commerce. Here, it is assumed that the pre-school is, in fact, a public accommodation under either Section 301(7) (j) or (k) of the Act.

Pursuant to the comments accompanying the regulations at page S-45, it appears that there is a distinction between the place of public accommodation (in this case the religious organization's premises) and the public accommodation itself (here, the pre-school). The comments state that "it is the public accommodation and not the place of public accommodation" that is subject to the nondiscrimination requirements of Title III. However, the regulations state that in cases of landlord/tenant responsibilities under Section 36.201(b), both the landlord, who owns the building that houses a place of public accommodation, and the tenant, who owns or operates the place of public accommodation, are public accommodations subject to the Act's requirements. Religious entities are exempt from Title III of the ADA however, and, therefore, cannot be considered public accommodations. Thus, we question whether this situation is to be handled similarly to situations where there are places of public accommodation located in private residences. Section 36.207 of the Regulations indicates that the private residences, like the religious organizations, are not covered by the provisions of the Act. However, when a place of public accommodation is located in a private residence, the portion of the residence used exclusively in the operation of the public accommodation is covered by the Act. Thus, we ask your opinion as to whether this is an analogous situation. Our questions are as follows:

1. As the landlord of the public accommodation, does the religious organization have any responsibilities under Title III of the ADA or is it specifically exempt from coverage pursuant

to Section 307 of the ADA?

2. If the religious organization is specifically exempt pursuant to Section 307 of the ADA, which we believe to be the case, are all operations on its premises, including those leased to entities that would otherwise be considered public accommodations, exempt from coverage under Title III of the ADA.

3. Is the pre-school, which may otherwise be considered a public accommodation, exempt from the responsibilities under

Title III of the ADA because it operates a place of public accommodation at a religious organization and/or leases facilities from a religious organization, which is otherwise exempt?

4. If the religious organization is otherwise exempt as appears to be the case from Section 307 of the ADA, is it the sole responsibility of the pre-school, a public accommodation, to meet the requirements of Title III of the ADA with regard to the facility operated by the pre-school and leased from the religious organization?

5. In this situation whose responsibility is it to ensure compliance with Title III of the ADA?

6. Would the pre-school be obligated to ensure that the portion of the religious organization's premises it leases must comply with Title III of the ADA?

7. What is the responsibility and to whom does the responsibility for compliance with Title III belong for common areas used both by the religious organization and the pre-school, such as bathrooms, hallways, stairwells, lobbies, parking lots, etc.?

I would appreciate your consideration of these issues and a written advisory response at your earliest convenience.

Very truly yours,

MARY E. BRUNO

Ms. Helen C. King, Innkeeper
Babbling Brook Inn
1025 Laurel Street
Santa Cruz, California 95060

Dear Ms. King:

This letter responds to your correspondence requesting information about the provisions of the Americans with Disabilities Act (ADA). The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights and obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

Your letter states that you wish to install a jacuzzi type bathtub in two upstairs bathrooms in your bed and breakfast inn. You inquire whether you must also install a jacuzzi in the ground floor acessible rooms.

Your bed and breakfast inn is subject to the requirements of the ADA unless it is occupied by the proprietor and has five or fewer rooms for hire. The ADA does not require you to install jacuzzis in the first floor accessible rooms simply because you are adding those features to other rooms. However, all remodeling or renovation must comply "to the maximum extent feasible" with the ADA Accessibility Guidelines (ADAAG). The installation of a two person jacuzzi is an alteration and must comply with ADAAG requirements for bathrooms and bathtubs even if

those rooms are not accessible.

In addition, when a public accommodation engages in an alteration to a primary function area -- such as a bathroom in an inn -- the ADA imposes a duty to spend an additional maximum of twenty percent of the original cost of the alteration in making that area accessible to persons with disabilities by creating an accessible path of travel from the entrance to the facility to the altered area. If the cost of making the path of travel fully accessible would exceed twenty percent of the original cost, any changes that can be made without exceeding twenty percent must be made.

cc: Records OADA Wodatch Magagna Beard Arthur
udd:Magagna.PL.13

THE
BABBLING
BROOK
INN

Dear Sir,

For over a year I have been trying to get a building permit to enlarge two bathrooms in my twelve room bed and breakfast inn. In those two bathrooms I would like to install jacuzzi type bathtubs for two persons. My designated handicap bedroom is in the same building downstairs, the other two are upstairs. The local planning department and building department are unclear. I have been told that their interpretation of the law is that I am required to install a jacuzzi tub in the handicap bathroom also. That if I provide an amenity for another guest, I must also provide a jacuzzi bathtub for the handicap. The alternate plan is to provide an elevator to allow the handicap to use the bathrooms upstairs in the other guest's rooms, (obviously this would not be a desireable situation for any of the guests.)

In my telephone conversation this morning with the ADA office in Washington, D.C. I was informed that if the improvements were not being made to ground floor accessable rooms, I would not be required to add an additional jet tub to the handicap room. If I am forced to spend $3,000 to $5,000 improving the handicap bathroom the room

rate must be increased also at least $20 per night to help repay the expense and this will be a hardship to my frequent handicap guests who have not requested, nor will probably ever use the jacuzzi tub. Please clarify your position on the issue. The Santa Cruz Building Department says they have no specifications on a jacuzzi tub for the handicap, and I must also find out what those are before they will issue a permit if I want to put one in the handicap room. If you do not require I do so, naturally I would prefer not to spend the additional funds. My handicap guests like the room just the way it and would most likely stay elsewhere if the rate was increased that much.

A letter or statement from you would be most helpful on your position on this issue so that I may proceed with the plans and construction details with my architect.

Sincerely,

Helen C. King
Innkeeper

Mrs. Hedy Schick
President
Sunrise East Homeowners'
Association, Inc.
2333 Silver Oak Circle
Palm Springs, California 92264

Dear Mrs. Schick:

This is in response to your letter requesting information about the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

You inquire whether you are required to install ramps in your condominium building for persons with disabilities.

The ADA does not apply to strictly residential facilities. However, the federal Fair Housing Act, as amended, also prohibits discrimination on the basis of disability. That Act does not require the Condominium Association to provide a ramp. However, it does prohibit the Association from refusing to rent or sell to a person with a disability and would require the Association to permit the person with a disability to install a ramp at his or her own expense. There are more extensive requirements for providing accessibility in newly constructed multi-family housing, including condominiums.

There may also be state or local laws that have more stringent requirements.

I hope this information is useful to you.

Sincerely,

Joan A. Magagna
Deputy Director
Office on the Americans with Disabilities Act

01-00894

DJ 202-PL-00010 JUN 10 1992

Mr. James Cadwallader
Oreland Laundry Service
60 N. Clinton
Doylestown, Pennsylvania 18901

Dear Mr. Cadwallader:

This is in response to your letter requesting information about the Americans with Disabilities Act.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

You inquire whether apartment buildings are subject to the ADA in circumstances both where they house "HUD tenants" and where they do not. I am assuming that your reference to "HUD tenants" means situations where apartment buildings are privately owned (as opposed to being owned by a public housing authority) and where some or all of the apartments are rented to tenants receiving federal housing assistance. I am also assuming that your inquiry is not directed to employment issues. After July 26, 1992, regardless of the nature of their business, all employers with 25 or more employees are subject to the nondiscrimination provisions of the ADA. After July 26, 1994, employers with 15 or more employees are covered.

In a privately owned apartment building, regardless of whether any or all of the tenants receive federal assistance, the individual units used as residences are not covered by the ADA. However, apartment units within a building that are used for nonresidential purposes -- such as a doctor's office -- would be covered by the ADA, because such an entity falls within the ADA's definition of a "place of public accommodation."
cc: Records Chrono Wodatch Magagna.PL.10 arthur T. 6/9/92
01-00895

Although residential uses are not covered by the ADA, other laws prohibiting discrimination on the basis of disability may be applicable, such as the Fair Housing Amendments Act of 1988 and, for entities receiving federal financial assistance, Section 504 of the Rehabilitation Act.

I have enclosed a copy of the Department's Title III Technical Assistance Manual. I hope this information will be useful to you.

Sincerely,

Joan A. Magagna

Deputy Director
Office on the Americans with Disabilities Act

The Honorable Paul E. Gillmor JUN 10 1992

U.S. House of Representatives
1203 Longworth House Office Building
Washington, D.C. 20515-3505

Dear Congressman Gillmor:

This is in response to your inquiry on behalf of your constituent, Louis Fioritto, who has inquired about the enforcement of the Americans with Disabilities Act of 1990 (ADA).

The Department of Justice takes seriously its enforcement obligations under the ADA. We have promulgated final regulations to implement titles II and III. We recently published Technical Assistance Manuals for both titles II and III as well as other informational materials. The Department has also awarded over three million dollars in grants to various groups for them to develop additional educational materials to advise covered entities and individuals with disabilities of the rights and obligations created by the ADA.

The Civil Rights Division has created a new Office on the Americans with Disabilities Act. This Office is responsible for investigating complaints and bringing litigation under title III. It currently has over 240 complaints under investigation. The Office will also be responsible for handling title II litigation based on referral from the Federal agencies designated to investigate title II complaints. The Coordination and Review Section within the Civil Rights Division carries out the title II investigative responsibilities for the Department of Justice. That Section currently has over 120 title II complaints under investigation.

cc: Records; Chrono; Wodatch; Bowen; Magagna; Blizard; McDowney.
:udd:magagna:gillmor.cong
01-00898

The Office on the Americans with Disabilities Act is also responsible for reviewing State and local building codes to determine if they can be certified by the Attorney General as providing accessibility requirements that meet or exceed the minimum requirements of the ADA. The Office has several submissions under review and is working with the major model code organizations toward development of model codes that will meet ADA requirements.

The Equal Employment Opportunities Section within the Civil Rights Division will have the responsibility to enforce the employment discrimination provisions of title I of the ADA against State and local government employers.

In enforcing the ADA, the Civil Rights Division will follow the Department-wide policy of attempting to resolve disputes short of litigation where that is appropriate and possible. However, we will file suits in Federal court, and ask for civil penalties as appropriate, when such efforts are not successful.

I have enclosed copies of the Department's regulations under titles II and III, as well as our Technical Assistance Manuals, regulation highlights, and fact sheets.

I hope that this information is helpful to you in responding to Mr. Fioritto.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

ADC ILLEGIBLE

April 14, 1992

Congressman Paul Gillmor
1203 Longworth HOB
Washington, D.C. 20515

Dear Congressman Gillmor:

I am writing this letter as a disabled American. I am totally blind and I am also the principal of a corporation recently formed called American Disabilities Compliance, Inc.

We have formed this corporation in response to the new ADA legislation which was enacted into law on January 26, 1992. The purpose of our company is to assist building owners, agencies, businesses, schools, institutions, etc. to ensure that they are in compliance with the regulations set forth by this Act. We conduct surveys which analyze all 282 points starting from the parking lot through all interior aspects of the building. A conclusive report is compiled and submitted for their use in establishing a barrier removal plan.

I am compelled to write this letter due to the response we are getting from over 200 contacts made to schools, major business and other institutions across the State of Ohio. The consensus we are observing is "this is not serious legislation". In other words, "there will be no fines, we will certainly never be caught".

As a principal of ADC, but more important, as a disabled American, I find this attitude very disheartening. I have been successfully employed since 1969 in many different positions and am currently a self-employed business individual while presiding on the board of ADC. My concern is, how serious is this legislation? Will there be fines? Is this "window-dressing" legislation or is this in fact legislation that will change the outlook and the future for disabled Americans. My request is two-fold: (1) I would like a personal assurance that this legislation is designed to improve the dignity and quality of life for disabled Americans, and (2) a letter from your office detailing the consequences and importance of complying with the ADA standards that we would be able to show to prospective clients clearly stating the responsibility they have to make this legislation effective.

If you have further questions regarding our company or suggestions as to how we can do a more effective service to enhance this Act, Patrick Holmes, the President of ADC, and I will be more than willing to spend time discussing our goals and intentions of ADC. We, of course, are concerned about compliance with ADA; however, our real concern is meeting the spirit of ADA.

Sincerely,
Louis Fioritto

Vice President
Sales and Organizational Rights
01-00900

DJ 202-PL-00163

Ms. Karen R. Fitzpatrick
Pyramid Life Insurance Company
6201 Johnson Drive
Shawnee Mission, Kansas 66202

Dear Ms. Fitzpatrick:

This letter responds to your correspondence requesting information about the provisions of the Americans with Disabilities Act (ADA). The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights and obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA accessibility standards. However, it does not constitute a legal interpretation and it is not binding on the Department.

Your letter inquires as to your responsibilities as tenant and employer with respect to your field offices, and to what extent your responsibilities as a tenant are effected by the provisions of your lease with the building owners.

Your inquiry with respect to your responsibilities as an employer should be directed to the Equal Employment Opportunity Commission (EEOC). That is the agency charged with enforcing the employment provisions in Title I of the ADA. You can write to the EEOC at 1801 L Street, N.W., Washington, D.C. 20507 or call the EEOC information line at (800) 669-EEOC.

Title III of the ADA, which this office enforces, sets forth the obligations of privately owned places of public accommodations.

With respect to the existing facilities, places of public accommodation are required to remove architectural barriers to access and structural communication barriers where it is readily achievable to do so. Readily achievable means easily

cc: Records Chrono Wodatch Magagna.pl.42 Beard
arthur T. 6/9/92
01-00901

accomplishable without much difficulty or expense. The factors to be considered in determining whether the removal of a particular barrier is readily achievable include: the nature and cost of the action; the financial resources available both to the site and the parent organization; the size and number of employees at the site and overall; and the relationship of the sites to the parent organization. If barrier removal is not readily achievable, you must take alternate steps to make services available to the extent such measures are themselves readily achievable. More stringent requirements apply for alterations and new construction.

These obligations are imposed on both owners of the structures in which places of public accommodation are located, and on the operators of the places of public accommodation. These obligations were effective as of January 26, 1992, and cannot be delayed by any lease or other private agreement. The landlord and the tenant may allocate the expense of conforming to the requirements of Title III in their lease agreement, but both landlord and tenant remain obliged under the ADA to comply with its terms and remain liable for any failure to comply.

These and other obligations imposed by the ADA are discussed in the enclosed Title III Technical Assistance Manual recently published by this Department. I hope this information will be useful to you.

Sincerely,

Joan A. Magagna
Deputy Director
Office on the Americans with Disabilities Act

OFFICE ON THE ADA
CIVIL RIGHTS DIVISION
US DEPT OF JUSTICE
PO BOX 66118
WASHINGTON DC 20035-6118

Gentlemen:

We are an insurance company with our home office in Shawnee Mission, Kansas, but with 25 field offices located across the country.

1. What are our responsibilities as tenants and employers as regards the field offices?

2. Is the fact that we are incorporating a section in our leases requiring the landlord be responsible for making any alterations to comply with the accessility requirement of the ADA sufficient?

3. If we are in existing leases not due to expire until after July 31, 1992, maywe wait until the lease expires to require the landlord to comply with the ADA?

4. What if the landlord, by signing the lease, agrees to make any changes necessary, but then does not make them? What are our responsibilities at that point?

Thank you for any assistance you can give me. I have read the Public Law 101-336 publication, but cannot find specific answers to the above questions.

Sincerely,

Karen R. Fitzpatrick

Mr. Mark Lawrence, General Manager
International Inn
662 Main Street
Hyannis, Massachusetts 02601

Dear Mr. Lawrence:

This letter is to follow up my May 11, 1992, letter to you regarding the Americans with Disabilities Act (ADA). The paragraph that begins at the top of page 2 is not totally accurate. That paragraph relates to alterations to guest rooms. ADA Accessibility Guidelines (ADAAG) require that when guest rooms are being altered in an existing facility, at least one sleeping room or suite shall be made accessible for each 25 sleeping rooms, or fraction thereof, of the total number of rooms being altered until the total number of such accessible rooms meets the number required by ADAAG for new construction. The total number of accessible rooms required is not a fixed percentage but is set forth in a table in ADAAG. My earlier letter had stated that all altered guest rooms were required to be made accessible until 5% of the total was reached. I have enclosed a copy of the Department's Title III regulations which includes ADAAG as an Appendix. See generally ADAAG Section 9 and specifically 9.1.5 and 9.1.2.

I regret the confusion and hope that this provides clearer guidance for you. Please feel free to contact this office if we can be of further assistance.

Sincerely,

Joan A. Magagna
Deputy Director
Office on the Americans with Disabilities Act

MAY 11 1992

Mr. Mark Lawrence, General Manager
International Inn
662 Main Street
Hyannis, Massachusetts 02601

Dear Mr. Lawrence:

This letter responds to your correspondence with several offices of the Department of Justice seeking information about the provisions of the Americans with Disabilities Act (ADA). The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA accessibility standards. However, it does not constitute a legal interpretation and it is not binding on the Department.

Your letter describes various measures the International Inn has taken to comply with the ADA and asks for our further suggestions. You inquire specifically whether 5% of the total number of guest rooms must be made accessible immediately.

We commend you for taking steps to bring your facility into compliance with the ADA. However, short of conducting an in-depth compliance review, we cannot assess the sufficiency of those efforts.

With respect to the 5% requirement, this Department is not authorized to grant a waiver of any statutory requirement. However, the extent of your obligation under the ADA depends on whether you are planning guest room renovations in the ordinary course of business or whether your intent is to make alterations only insofar as required by the ADA.

cc: Records; Chrono; Wodatch; Magagna.
:udd1:udd:magagna:pl.18

01-00905

When a public accommodation is engaged (after January 26, 1992) in an alteration or remodeling of an existing facility in the ordinary course of business, it must comply with the ADA Accessibility Guidelines (ADAAG) to the maximum extent feasible--that is, unless it is virtually impossible to comply because of the structure of the building being altered. Cost is not a consideration. This means that all renovations to guest rooms must comply with ADAAG until the requisite number of rooms are made accessible. Thus, for example, if you now have no accessible rooms and plan to renovate a number of rooms each year, making only one per year accessible, that would not be permissible under the ADA. If you plan full renovations of any rooms, every room so renovated must comply with ADAAG to the maximum extent feasible until 5% of the rooms are made fully accessible. If minor alterations are planned, the altered features in 5% of the rooms must comply with ADAAG.

If no alterations are planned in the ordinary course of business, the hotel's obligation is less rigorous. It must remove architectural barriers to accessibility where it "readily achievable" -- that is, where the removal can be done easily and without much difficulty or expense. There are a number of factors to be used in determining whether the removal of a particular barrier is readily achievable. These include: the nature and cost of the action; the financial resources available both to the site and the parent organization; the size and number of employees at the site and overall; and the relationship of the sites to the parent organization. The hotel must take these factors into account in determining whether making one room per year accessible fulfills the barrier removal obligations.

I am enclosing a copy of the Department's Title III

Technical Assistance Manual which may further assist you in understanding your obligations under the ADA. We hope that this information is useful to you.

Sincerely,

Joan A. Magagna

February 3, 1992

Wayne Budd
United States Attorney General
U.S. DEPARTMENT OF JUSTICE
Washington, DC 20530

Dear Mr. Budd,

In our endeavor to conform to the Americans with Disability Act, our Controller contacted the Massachusetts Office on Disability and spoke with Bruce Bruneau. A meeting was set up for January 16, 1992 and the following persons were in attendance:

Bruce Bruneau, Massachusetts Office on Disability
Pam Berkley and Julie Nolan, Cape Organization for Rights of the Disabled
Arthur D. Rittel, President, International Inn
Mark Lawrence, General Manager, International Inn
Paul Larsen, Chief Engineer, International Inn

Let me take this opportunity to state for the record my impression of these fine ladies and gentlemen and their commitment to this cause. On the date of our appointment we experienced a fierce snowstorm and anticipated their cancellation. However, punctually at 10:00AM there these individuals were, ready, willing, and able.

We toured the entire property noting their recommendations in regards to conforming our Sleeping Rooms, Stairways, Indoor and Outdoor Pool accessibility, certain areas of our Registration Lobby, i.e., height of Registrations Desk, Public Restrooms, and Dining Room.

The following will outline each area, along with their recommendations, and what we are doing to conform to these regulations.

-Sleeping Rooms: Presently we lodge four Accessible Accommodations. The only recommendations made to each of these rooms is to change the swing of the door which we anticipate being completed in the near future.

-Stairway: It was recommended that we close in the risers for the stairway located in the Lobby. This has been completed.

01-00907

Mr. Wayne Budd
U.S. DEPT. OF JUSTICE
Page Two

-Indoor Pool: It was suggested to us that we build a ramp leading from the Hallway to the Pool Entrance with a landing located at the turn in the Hallway.
This, too, has been completed.

-Changing Rooms (Located in the Indoor Pool): Widening of the entryways to 36" and building one 5' X 6' Stall to replace the existing stalls was recommended. Also to remove existing vanity and replace with an accessible sink that meets all regulations. At this time, we have completed the widening of the entryways and bringing the interior up to regulation is in process. We are receiving estimates from bidders for the installation of the vanity.

-Outdoor Pool: No recommendations were made due to the inclement weather, however, it has come to our attention that a ramp will be needed to facilitate access to the pool area. In the case of both the Indoor and Outdoor Pools a lift must be installed to enable the disabled full use of these amenities.

-Registration Lobby: Many recommendations were made as outlined below and we intend to adhere to all of them.

1). Portico: Our slated Entrance Way must be regraded for a more accessible

approach to the Front Doors.

2). Registration Desk: A lower-level desk will be installed to enable wheelchair registration.

3). Public Phone: Our Chief Engineer has been in touch with New England Telephone to replace existing equipment with equipment that conforms.

4). House Phone: Our Chief Engineer is presently constructing a split-level phone center to be installed upon completion.

5). Public Restrooms: It was suggested that we create a Unisex Bathroom due to the physical restrictions that are present. We are consulting with Contractors to submit plans for this reconstructive project. This project should be completed by April 1, 1992.

-Dining Room: A tour of the Dining Room was conducted and it appears we meet all required regulations.

In regards to our Accessible Guest Rooms Quota of 5% fo the total number of Guest Rooms, we would like to seek temporary relief in that we presently

have four such rooms and wish to complete the quota on a scale of one room per year for the next four years. We seek this relief simply because of the hard economic times we are all experiencing in the Lodging Industry.

My President, Arthur Rittel, is also owner and operator of The Country Squire Motor Lodge located at 206 Main Street, Hyannis, MA. As this property utilizes less than 25 employees, grosses less than one million dollars annually, and is only open seven months of the year, it is not required to comply until the required date of July 26, 1992. However, in Mr. Rittel's attempt to be an example to others in our community, he intends to begin renovations prior to the hotels opening in April 1992. In this regard, a meeting has been established with The Cape Organizations for the Rights of the Disabled (CORD) to discuss necessary compliance.

I would welcome any suggestions you may have in our endeavor to comply to this long awaited Legislative Ruling. May I have a reply to our request regarding Accessible Rooms Quota? If you require any additional information, please do not hesitate to contact me personally. I anxiously await your reply.

Yours sincerely,
THE INTERNATIONAL INN

202-PL-00009 JUN 11 1992

Richard J. Sagall, M.D.
Post Office Box 1069
Bangor, Maine 04402-1069

Dear Dr. Sagall:

This letter responds to your correspondence requesting information about the provisions of the Americans with Disabilities Act (ADA). The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA. However, it does not constitute a legal interpretation and it is not binding on the Department.

You have inquired whether a health care provider may fulfill the obligation under the ADA to ensure effective communication with a hearing impaired patient by requesting a family member to interpret or by using written communication or communication via a computer screen.

The ADA requires health care providers to make available appropriate auxiliary aids and services in order to ensure effective communications. Communication through written notes, communication via computer, and providing sign language interpreters are all considered auxiliary aids and services within the meaning of the ADA. However, a note pad or computer screen may not be sufficient to provide "effective" communication in all circumstances, especially in a doctor's office when a matter of significance is being discussed. The appropriateness of a particular type of auxiliary aid or service will depend on the nature of the services being delivered -- for example, giving a flu shot versus discussing options for surgery. Effective communication is required and the means to provide that will vary depending on the length and complexity of the communication involved.

cc: Records Chrono Wodatch Magagna.p1.9 Beard
arthur T. 6/8/92

01-00910

Asking a family member to interpret for a person with a hearing impairment may be inappropriate because of factors such as emotional or personal involvement or considerations of confidentiality that may adversely affect the ability to interpret effectively.

We encourage health care providers to consult with their individual patients having hearing impairments to ascertain what will be effective for each of them in particular circumstances.

A health care provider is not required to provide any auxiliary aid or service that would result in an undue burden, i.e., significant difficulty or expense. Although a health care provider may not charge individuals for the auxiliary aids and services provided to them, the costs can be spread to all patients, just as other overhead expenses are. Among the factors to be considered in determining whether providing a particular auxiliary aid will cause an undue burden are the nature and cost of the service and the resources available to the care provider. If providing a particular aid or service would be an undue burden, the health care provider must provide an alternative auxiliary aid or service that is not such an undue burden and that ensures effective communication to the maximum extent feasible.

I enclose a copy of the Department's Title III Technical Assistance Manual which may further clarify your obligations under Title III.

We hope that this information is useful to you in evaluating your obligations under the ADA.

Sincerely,

Joan A. Magagna
Deputy Director
Office on the Americans with Disabilities Act

OADA
Civil Rights Division

U. S. Dept. of Justice
PO Box 66108
Washington, DC 20035-6118

Dear Sirs:

I am writing in need of verification of one aspect of the Americans with Disabilities Act. I am a Family Physician practicing in an office with handicap accessibility.

I am writing concerning the requirements for equal accessibility for the hearing impaired. A local agency interpretation of the ADA is that I, as a physician, am required under the Americans with Disabilities Act to arrange and pay for the presence of a sign language interpreter in the office whenever a deaf patient is being seen. They feel that written communication or communication via a computer screen does not meet the requirements of the act.

In the past deaf patients have usually brought a family member or an interpreter provided by a local agency to assist with communication. Many times, when an interpreter is not available, we have communicated in the ways mentioned above without difficulty.

As I understand it, the Act requires modifications unless it results in an undue burden. Since most physicians see a limited number of deaf patients, and paying for the services of an interpreter would result in the health care provider spending more money for the visit than he or she gets paid, I am wondering if the local agency's interpretation is correct?

I would appreciate your input on this issue.

Sincerely yours,

Richard J. Sagall, M.D.

RJS:rjp

01-00912

JUN 12 1992

Mr. Jeffrey H. Schiff
Executive Director
National Association of Towns
and Townships
1522 "K" Street, N.W.

Suite 730
Washington, D.C. 20005

Dear Mr. Schiff:

This is in response to your March 4, 1992, correspondence regarding the Department's analysis of the economic impact of its regulations implementing title II of the Americans with Disabilities Act (ADA). We regret any misunderstanding or inconvenience that may have occurred because we did not respond to your letter, which we regarded as a "comment letter" on our analysis. It is standard rulemaking practice for the Department not to reply individually to comment letters submitted on pending regulations or accompanying impact analyses.

In the July 26, 1991, Federal Register notice containing our final title II regulation, we invited additional comment on the preliminary impact analysis that was prepared in connection with the proposed rule. The notice stated that additional comments would facilitate the development of a final Regulatory Impact Analysis by January 1, 1992. 56 Fed. Reg. 35,694; 35,695.

We submitted our final analysis to the Office of Management and Budget in December 1991. At the time we received your letter in March, however, the analysis had not yet been cleared for public release. During the interim, our policy was to treat letters regarding the analysis as comment letters, particularly when, as in the case of your letter, the correspondence explicitly identified itself as a comment letter.

We believe that the Department's title II regulation is unlikely to have the severe impact on small governments that you foresee. As mandated by section 204(b) of the ADA, 42 U.S.C. 12134(b), the requirements of the title II regulation track the well-known requirements of section 504 of the Rehabilitation Act, as amended, 29 U.S.C. S794. These obligations had wide

:udd:breen:natt

01-00913

application to small governments during the period prior to the termination of the revenue sharing programs in 1986. During that

period, small governments made major efforts to bring their operations into compliance with section 504 and became well-acquainted with such key section 504 concepts as "program accessibility," "effective communication," "integrated setting," "undue hardship," and "undue burden." Interpretation of the title II regulation will be informed by a well-established body of case law and administrative practice under section 504. Even after the termination of the revenue sharing program in 1986, significant portions of local government activity remained subject to section 504 through other Federal funding. Of course, many small governments are also subject to State and local disability rights laws that predate the ADA.

By tracking the requirements of section 504, the title II regulation incorporates the inherent flexibility of section 504. Under the program accessibility requirement, small governments do not, as is widely perceived, have to make all of their facilities accessible. Structural changes are only required when the numerous alternatives, such as relocation of activities, home visits, and delivery of services are inadequate to provide access. Even then, the regulation does not require a government to undertake any activity that will result in undue financial and administrative burdens. With respect to new construction, the cost of incorporating accessibility features is generally estimated to add a mere one-half of one percent to construction costs. Because local jurisdictions are already subject to substantial State and local accessible design requirements, the added cost of the title II requirements for new construction and alterations is truly insignificant.

Title II's requirements with respect to communications are similarly flexible. In most situations, creativity, common sense, and training in the art of common courtesy will go a long way in providing effective communication without the need for more costly auxiliary aids. Again, as with respect to physical access, public entities are not required to take any steps that would result in undue financial and administrative burdens.

We also believe that you need not be as concerned as your letter suggests regarding our compliance with the Regulatory Flexibility Act. Given the marginal impact that the title II regulation was likely to have on small governments, it was determined that the proposed title II rule would not have a significant economic impact on a substantial number of small entities. 56 Fed. Reg. 8538, 8550. Under the terms of section 3(a) of the Regulatory Flexibility Act, initial and final regulatory flexibility analyses are not required when such a determination is made by the head of the rulemaking agency. 5 U.S.C. 605(b).
01-00914

The Office of Management and Budget shared our assessment of the impact of the title II regulation and determined that the proposed rule was not a "major rule" within the meaning of Executive Order 12291. 56 Fed. Reg. 8538, 8550 (1991). Even though the Department was therefore not required to publish a preliminary or final regulatory impact analysis, the Department nevertheless made an analysis available to the public.

Upon publication of the final rule, the Department invited additional comment on its analysis. Although a final regulatory flexibility analysis was not required because of the absence of significant impact on small entities, the Federal Register notice indicated that the analysis prepared by the Department contained the information that would be included in a regulatory flexibility analysis if one were required. 56 Fed. Reg. 35,694; 35,695. A copy of our final analysis is enclosed.

We share your commitment to the effective implementation of the ADA and your concerns that small governments not be overwhelmed by Federal mandates. Throughout the long process of drafting, enacting, and implementing the ADA, the Administration has worked tirelessly to strike a critical balance between the rights of individuals with disabilities to enjoy equal access to the mainstream of American life and the legitimate needs of hard-pressed State and local governments. We believe that the Department's title II regulations strike that balance and we will monitor their implementation to ensure that this balance is maintained.

Sincerely,

Stewart B. Oneglia
Chief
Coordination and Review Section
Civil Rights Division

Enclosure

01-00915

National
Association of
Towns and Townships

March 4, 1992

Mr. John Wodatch, Director
Office of ADA
Department of Justice
P.O. Box 66738
Washington, D.C. 20035-6118

Dear Mr. Wodatch:

On behalf of the National Association of Towns and Townships (NATaT), I am writing to offer comments on the Department of Justice's analysis of the impact of the Americans with Disabilities Act (ADA) on small local governments.

NATaT represents approximately 13,000 mostly small, mostly rural local governments. In a sense, NATaT represents the typical local government, since the vast majority (78 percent) of the 39,000 gen eral purpose units of local government in the United States have fewer than 5,000 residents.

Let me begin by stating, emphatically, that NATaT supports the goals of the ADA. We are currently developing technical assistance materials for use by small local governments so that they will be able to implement the ADA regulations to the letter of the law. We also have a history of working with small governments so that they could comply with Section 504 requirements during the days of the General Revenue Sharing program.

RegFlex Law Not Followed

NATaT has several concerns with the Department of Justice's (DoJ) evaluation of the impact of the ADA on local governments. First, the supplementary information accompanying the proposed ADA Title II regulations states that the Department determined that the proposed rules will not have a significant economic impact on a substantial number of small business entities and therefore are not subject to the Regulatory Flexibility Act.

It is certainly true that the proposed rules have no significant impact

on small business entities because the rules pertain to state and local government service. Nevertheless, the proposed rules have a most significant impact on small local governments, which are also defined

1522 K ILLEGIBLE, N.W., Suite 730, Washington, D.C. 20005
(202) 737-5200

as small entities under the Regulatory Flexibility Act. Since the DoJ is silent on the impact of the rules on small local governments and did not exempt itself from the requirements of the RegFlex Act. It should have conducted a regulatory flexibility analysis for small local governments.

Secondly, the supplementary information to the proposed regulations goes on to reveal that the Department did prepare a preliminary Regulatory Impact Analysis (RIA) pursuant to Executive Order 12291. However, the supplementary information accompanying the final Title II regulations curiously observes that the preliminary RIA contained "all the available information that would have been included in a preliminary regulatory flexibility analysis, had one been prepared under the Regulatory Flexibility Act, concerning the rule's impact on small entities" and that "[t]he final RIA will contain all of the information that is required in a final regulatory flexibility analysis and will serve as such an analysis."

These comments certainly seem to indicate that the Department believes that it now has the obligation to conduct a regulatory flexibility analysis, since DoJ would have the final RIA serve as a regulatory flexibility analysis. Putting aside the point that an RIA is not a regulatory flexibility analysis, what does the Department's RIA say of the impact of Title II on small local governments? Since the final RIA was not made available at the time the final Title II regulations were published, and has yet to be released, one must go to the preliminary RIA for guidance.

RIA Assumptions Are Unfounded

That document notes that "there is considerable uncertainty regarding the precise impact of the Title II regulations..." It goes on to state that Title II extends the program accessibility standards of the Rehabilitation Act of 1973 " ... to the last small remaining portion of the public sector not yet covered by those standards. Virtually all of the public sector ... is already subject to the Rehabilitation Act on account of receipt of Federal funding." That assumption led the authors of the RIA

to believe that the reach of the regulations seems to be limited to state and local court systems not receiving federal aid " ... and to the central 'town hall' operations of those local and special purpose governmental entities that do not receive Federal aid for administrative and other purposes."

The fact of the matter is that since the end of the General Revenue Sharing program in 1986, the vast majority of the 39,000 general purpose units of local governments in the United States -- we estimate 80 percent -- do not receive federal funds, for administrative or any

other purpose. Therefore, they have not been subject to the provisions of Section 504 for quite some time and have had no financial incentive to make their programs and services accessible for disabled persons since that time.

It follows, then, that the impact of Title II on the majority of local governments -- and virtually all small local governments -- is quite significant. All programs must be accessible, physical facilities must be accessible, local governments may have to incur higher costs to construct new buildings or rehabilitate old ones in order to meet certain access requirements, emergency numbers must have TDD access and so forth. To say that there is no significant impact on small local governments simply flies in the face of the facts.

The Department, by not conducting a preliminary regulatory flexibility analysis, disingenuously avoids the key requirements of the Regulatory Flexibility Act. Accompanying the proposed rules should be a preliminary regulatory flexibility analysis, which includes a list of significant alternatives which would accomplish the stated objectives of the ADA and minimize the economic impact of the regulations upon small entities. A preliminary regulatory flexibility analysis was not published in the Federal Register along with the proposed rules.

No one could have known that the preliminary RIA was to serve as a preliminary regulatory flexibility analysis, since that wasn't stated until the final regulations were issued six months later. And in any case, the preliminary RIA was not published in the Federal Register for public scrutiny and comment. The public was required to request it from the Department, and even then, the preliminary RIA contains virtually none of the most important information of a preliminary regulatory flexibility analysis, especially proposed alternatives for small entities that accomplish the goals of the ADA while taking into

consideration the limited resources of small entities. This is a key difference between an RIA and a regulatory flexibility analysis.

Public Was Denied the Chance to Participate

The final regulatory flexibility analysis which accompanies the final regulations should, by statute, include public comments in response to the preliminary analysis, as well as changes made in response to those comments. Most importantly, the final analysis should include a description of each of the significant alternatives to the rule which was considered by the agency, and the reason(s) why each was either accepted or rejected.

By neither performing a preliminary regulatory flexibility analysis nor availing itself of the exemption for small governmental entities, and

implying the need for one upon issuing the final regulations, the Department subverted the regulatory flexibility analysis process. Alternatives weren't proposed -- an obligation placed on the federal government by the Regulatory Flexibility Act -- so there was never a question of small entities being allowed to implement the regulations flexibly.

Groups such as NATaT certainly would have challenged an assertion of no impact on small local governments and, if a RegFlex analysis had been performed, would have participated vigorously in the examination of proposed alternatives. Unfortunately, we were not permitted either of these opportunities specified in the RegFlex law.
The sole flexibility that the regulations give small communities is that they must "reasonably accommodate" a disabled person unless it causes "undue hardship." Unfortunately, those terms are not well-defined and can only be clarified on a case-by-case basis. Small communities are essentially being told by the federal government: "Comply with the law. We won't tell you how, but we will tell you if you do it wrong."

Such an approach can only result in communities complying by investing more than is necessary, in the face of uncertainty, to avoid legal challenges, or by communities learning the hard way through costly lawsuits. Either alternative seems inefficient, uneconomical and unnecessary. This approach is also inequitable for local governments.

For example, two local governments in different states are found to be out of compliance with ADA under the exact same circumstances and

must make physical modifications to their town hall. The courts could compel each jurisdiction to make very different modifications, thereby incurring very different costs. Until there is a wealth of case history, there will be no agreed-upon common approach to resolving such an issue. The same holds true for the employment provisions of the ADA that apply to local governments: what might be a reasonable accommodation or an undue hardship for one local government could be judged the complete opposite elsewhere.

With virtually all small governments responsible for constructing new facilities or rehabilitating existing ones according to set standards, ensuring that their programs -- including new programs mandated by federal and state authorities since the end of General Revenue Sharing -- are accessible to the disabled, and installing TDD or similar equipment to ensure that the hearing impaired can access emergency numbers, it is difficult to believe that the cost of interpreters is going to be the primary program accessibility cost for local governments, as the Department stated in its preliminary RIA.

01-00919

RegFlex Strongly Supported by President Bush

Given the Department's assumption that virtually all public entities were already covered by Section 504 of the Rehabilitation Act (which they are clearly not) it is incumbent upon the Department of Justice to re-evaluate its conclusions about the impact of the Title II regulations on small local governments. We would certainly expect this to be the case for two reasons. First, this is an enormous and all encompassing piece of legislation, directed specifically at local governments. Secondly, at our annual conference this past year, our keynote speaker, President Bush, told our membership that he would instruct all federal departments and agencies to implement the Regulatory Flexibility Act to the full extent of its spirit and intent.

Again, let me reiterate that we support the ADA fully. We are not seeking exemptions for small local governments. We are asking the Department to properly consider the ADA regulations in light of the Regulatory Flexibility Act, specifically the act's requirements that alternative, flexible approaches be proposed and considered that will allow small entities to meet the ADA's requirements. NATaT staff would be glad to offer the Department any assistance we can regarding the impact of Title II on local governments.

Sincerely,

Jeffrey H. Schiff
Executive Director

JUN 15 1992

Captain (b)(6)
XX
Naples, Florida 33942

Dear Captain XX

This responds to your request for an interpretation of the Americans with Disabilities Act (ADA) as applied to retail gasoline sales.

The ADA authorizes the Department to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you in understanding how the ADA addresses your concerns. However, this technical assistance

does not constitute a determination by the Department of Justice of your rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

Title III of the ADA requires places of public accommodation to remove architectural barriers in existing facilities to the extent that removal is readily achievable. Where barrier removal is not readily achievable, the public accommodation is required to make its goods and services available through other methods, if those methods are readily achievable. If it would not be readily achievable for a self-service gas station to redesign its gas pumps to enable people with disabilities to use them, the station would be required to provide refueling services upon request to an individual with a disability if that is readily achievable.

A public accommodation may not impose a surcharge on an individual with a disability for the costs associated with the alternative method, so the station would be required to provide the refueling service for individuals with disabilities at the self-service price. The preamble to S 36.305 recognizes, however, that there may be security considerations that would legitimately prevent a cashier from leaving the cash register. The preamble makes clear that the ADA would not require a cashier who is the only employee on duty to leave a cash register to assist a motorist with a disability.

01-00921

To respond to several specific questions you asked: title III of the ADA was effective January 26, 1992, and no enforcement actions have yet been brought, although numerous complaints are under investigation. The Department of Justice has no statistics concerning gas stations on interstate highways. Such information may be available from the Department of Transportation.

As provided in section 36.501 of the Department's regulation implementing title III, you have a right to file a private suit for preventive relief for a violation of the Act that occurs after the effective date. Section 36.505 of the regulation provides that, if you are successful in your suit, the defendant may be required to pay your attorney's fees. You may also request an investigation by the Department of Justice, which can initiate litigation in cases of general public importance or where a pattern or practice of discrimination is found.

Complaints may be directed to:

Office on the Americans with Disabilities Act
P.O. Box 66738
Washington, D.C. 20035-9998

We are enclosing a copy of the title III regulation and the technical assistance manual for that title. We hope that this information is helpful.

Sincerely,

Stewart B. Oneglia
Chief
Coordination and Review Section
Civil Rights Division

JUN 15 1992

Ms. Leonora L. Guarraia
General Deputy Assistant Secretary
Office of the Assistant Secretary
for Fair Housing and Equal Opportunity
U.S. Department of Housing and Urban
Development
Washington, D.C. 20410-2000

Dear Ms. Guarraia:

We have received your request for an interpretation of section 504 of the Rehabilitation Act of 1973, as amended.

Specifically, you asked whether, for purposes of section 504, an individual with multiple chemical sensitivity should be considered an "individual with handicaps."

The Department addressed a similar issue during the development of regulations to implement the Americans with Disabilities Act (ADA). The Department received numerous comments detailing how exposure to various environmental conditions restricts access for individuals who have a heightened sensitivity to a variety of chemical substances. The commenters asked that environmental illness be recognized as a disability covered by the ADA.

The Department declined to state categorically that environmental illness is a disability. The preambles to both the title II rule (which covers State and local governments) and title III rule (which covers public accommodations and commercial facilities) state that the determination as to whether an impairment is a disability depends on whether, given the particular circumstances at issue, the impairment substantially limits one or more major life activities (or has a history of, or is regarded as having such an effect). Sometimes respiratory or neurological functioning is so severely affected that an

cc: Records, CRS, Oneglia, Friedlander, Mather, Foster
:udd:mather:ltr.guarraia

01-00923

individual will satisfy the requirements to be considered disabled. In other cases, individuals may be sensitive to environmental elements but their sensitivity will not rise to the level needed to constitute a disability. For example, their major life activity may be somewhat, but not substantially, impaired. In such circumstances, these types of sensitivities are not disabilities. (See 56 Fed. Reg. 35,699 (title II rule), and 56 Fed. Reg. 35,549 (title III rule).)

The same analysis would apply under section 504. Decisions

as to whether particular impairments are disabilities must be made on a case-by-case basis.

Copies of the title II and title III rules are enclosed. I hope this information is helpful to you.

Sincerely,

Stewart B. Oneglia

OFFICE OF THE ASSISTANT SECRETARY

Ms. Stewart B. Oneglia
Chief, Coordination and Review Section
Civil Rights Division
U.S. Department of Justice
10th and Pennsylvania Avenue, N.W.
Washington, D.C. 20530

Dear Ms. Oneglia:

During the past year, the Department of Housing and Urban Development (HUD) issued technical guidance on a controversial disability commonly referred to as Multiple Chemical Sensitivity or "environmental illness." Those who have Multiple Chemical Sensitivity claim to experience adverse reactions after extremely low levels of chemical exposure. The scientific community, as you are probably aware, does not recognize Multiple Chemical Sensitivity as a physical disability because there exists no concrete scientific proof that the illness has physical origins.

Both the scientific community and various advocacy groups for those who claim to have this disability are actively supplying me with literature supporting each position on the matter. I have enclosed the most recent information provided by the scientific community. This information suggests Multiple Chemical Sensitivity is an inaccurate term for the physical disability we previously described in our guidance; they claim the correct term is Chemical Sensitivity.

I understand the Department of Justice, as the coordinating agency for Section 504 of the Rehabilitation Act of 1973, is developing guidance on this subject. It would be helpful if you would supply me with Justice's position on this matter so that HUD can be accurate and consistent in its own guidance. I may be reached on (202) 708-3855.

Very sincerely yours,

Leonora L. Guarraia
General Deputy Assistant Secretary

February 6, 1992

Ms. Leonora L. Guarraia
U.S. Department of Housing and Urban Development
Fair Housing and Equal Opportunity
451 7th Street, S.W.
Suite 5100
Washington, D.C. 20410

Dear Ms. Guarraia:

Thank you for the opportunity to discuss your agency's position on multiple chemical sensitivity (MCS or environmental illness). As I related at our meeting of January 9, the Department of Housing and Urban Development has clearly confused the definitions of chemical sensitivity or hypersensitivity and MCS. The two examples cited in Mr. Mansfield's letter are examples of the former, not the latter, as suggested by Mr. Mansfield. I have enclosed a copy of his letter for your reference.

After consulting experts in the medical field, I would like to offer the following definitions:

> Chemical hypersensitivy is a state of ordered reactivity in which the body reacts with an exaggerated immune response to a foreign substance (some chemical agents, plant products, animal products). Symptoms may resemble hay fever, asthma, or contact dermatitis. The hypersensitivity reaction is repeatable with similar symptoms each time the individual is exposed to the same or a chemically similar substance. This medical condition can readily be confirmed by using well-recognized and accepted diagnostic techniques and laboratory studies.

01-00926

Chemical hypersensitivity should not be confused with symptoms produced by irritants such as sulfur dioxide, nuisance odors such as paint fumes, or unpleasant odors such as sewer gas.

Multiple chemical sensitivity has been described as an acquired disorder characterized by recurrent symptoms, referable to multiple organ systems, occurring in response to demonstrable exposure to many chemically unrelated compounds at doses far below those established in the general population to cause harmful effect.

The American Medical Association, as recently as December 1991, and other medical societies, including the American Association of Allergy and Immunology, the American College of Physicians, and the American College of Occupational and Environmental Medicine, agree that to date there is inadequate scientific evidence to establish the existence of MCS as a disorder. Research is currently being conducted by a number of institutions and supported in part by federal agencies.

For your information, I have enclosed BCIA's white paper on environmental illness, the American College of Physician's position on the syndrome, and a recent clinical study of 26 subjects demonstrating symptoms that have been attributed to the syndrome. We would greatly appreciate a correction of the guidance document sent previously to your district offices. I will call you in a week or so to discuss this request.

Sincerely,
Paul A. Cammer, Ph.D.
President

May 1991

ENVIRONMENTAL ILLNESS

"Environmental illness" is a term used to refer to a collection of general symptoms. It is a controversial human health phenomenon similar to other ill-defined syndromes which have been described for over 100 years and has attracted attention from such diverse groups as lawyers, physicians, insurance companies, scientists, industry, and Congress. It is known by at least 20 synonyms, including "multiple chemical sensitivity," "total allergy syndrome," and "twentieth-century disease." Those who suffer from environmental illness maintain that the condition is an acquired disorder resulting in an aversion to a wide variety of synthetic materials, ingested foods, and drugs resulting in symptoms that may be multiple and wide ranging.

The concept of environmental illness is not a new issue. As early as the 1950's, it was postulated that environmental illness resulted from the failure of humans to adapt to modern-day synthetic materials.1-3 According to this theory, the influx of man-made materials has resulted in a new form of medically unexplained, specific sensitivity. Once sensitized, the person generally reacts to increasingly lower concentrations of the causative agent as well as to other chemicals and foods.1-3 This "spreading" effect is one area among many where the environmental illness theory is inconsistent with medically-accepted doctrine concerning allergic sensitivity to individual substances.

Historically, the theory that environmental illness is caused by chemical contact has only weak support. This causation theory has received some attention in recent years, however, because of anecdotal reports of the suffering of certain individuals demonstrating symptoms attributed to this syndrome (e.g., nausea, headaches, dizziness), there are very few symptoms that have not been considered to be related to such an etiology.

While there is a broad variety of claims regarding the

initiation of environmental illness, there are no reliable statistics estimating its prevalence. Some people cite the National Academy of Sciences (NAS) as estimating the incidence of environmental illness in the United States. NAS has stated, however, that they have never made this statement or published such a conclusion.4

Numerous professional medical associations have examined available information regarding environmental illness and the diagnostic criteria that have been proposed by clinical ecologists (practitioners who diagnose and treat this phenomenon). These medical groups have generally found deficiencies in the scientific evidence for the syndrome as a distinct clinical entity.5-13 Moreover, in double-blind studies, the treatment (i.e., provocation- neutralization) of individuals by clinical ecologists has not been indicated to relieve symptoms any better than placebo treatment.14-15 Additionally, the implication of a role for environmental illness in immune system dysfunction has been criticized on both theoretical and empirical grounds. Dr. Abba Terr (Division of Immunology, Stanford University Medical School), whose views on environmental illness have been supported by the American College of Physicians and the American Academy of Allergy and Immunology, states the following:

> The pattern of symptomatology is too wide ranging, nonspecific, and variable to suggest a single pathogenetic mechanism, immunologic, or otherwise. The now well-established pathways for immunologic mediated forms of hypersensitivity each produce specific patterns of tissue inflammation and corresponding organ dysfunction, whereas no clinical or histopathologic evidence of inflammation has been demonstrated in patients with [environmental illness].16

Though the medical profession expresses doubt that environmental illness is, in fact, a distinct clinical entity, it is clear that a small but significant number of people display symptoms from whatever cause that do not conform to our present understanding of allergic disease.17-21 While chemical exposure has often been attributed as the cause of the symptoms, other factors such as biological contaminants, noise, lighting, interpersonal relationships, stress, work station design, and psychological factors22,23 have not been ruled out. Whatever the actual causes of environmental illness, baseline research aimed at identifying the nature of claims for the etiology of symptoms is necessary.

Recommendations

Because of the controversy surrounding environmental illness it is premature to develop any governmental policy based on the vague and anecdotal information currently available. Accordingly, the initial focus of environmental illness research should be to seek clarification of the medical/physiological/psychological nature of the syndrome. To this end, a few state governments are conducting reviews of environmental illness and NAS has conducted a workshop to discuss environmental illness-related research needs.

01-00929

All people deserve quality medical care including correct diagnosis and appropriate treatment. Our nascent understanding of environmental illness, however, does not allow us to determine proper diagnosis or treatment. Therefore, it is of paramount importance that these issues for environmental illness be resolved and the significance of environmental exposure, if any, be established. To address this issue, only research of the soundest scientific design should be supported, employing double-blind, placebo-controlled techniques. A research agenda could include the following:

(1) definition of the syndrome to be studied;

(2) investigation of the role of specific toxicologic (e.g., immunological) mechanisms for environmental illness or for the syndrome defined;

(3) determination of specific, measurable health effects, if any, that can be scientifically attributed to exposure to specific chemical substances and an estimation of the dose necessary to produce these symptoms;

(3a) determination of specific, measurable health effects, if any, that can be scientifically attributed to exposure to a variety of unrelated chemicals and an estimation of the dose necessary to produce these symptoms;

(4) determination of the role of biological contaminants in contributing to symptoms;

(5) determination of the clinical relationship,

if any, between chemical hypersensitivity and environmental illness; and

(6) development of an epidemiological study of symptoms and clinical findings attributed to environmental illness, determining a distribution of prevalence by age, sex, race, education, occupational history, psychiatric status, and geographical region (this would include determination of age at onset of environmental illness). In addition, the natural history of environmental illness should be studied and documented.

June 6, 1991

OFFICE OF THE ASSISTANT SECRETARY
FOR FAIR HOUSING AND EQUAL OPPORTUNITY

MEMORANDUM FOR: All Regional PHEO Directors

FROM: Leonora L. Illegible General Deputy Assistant Secretary for Fair Housing and Equal Opportunity, ED

SUBJECT: Technical Guidance Memorandum 91-3: Multiple Chemical Sensitivity Disorder

HUD has recently seen an increase in housing discrimination complaints from people with Multiple Chemical Sensitivity Disorder (MCSD), sometimes referred to as "environmental illness." HUD presently recognizes MCSD as a "handicap" under the Fair Housing Act. People with this disability are also considered "individuals with handicaps" under Section 304 of the Rehabilitation Act of 1973. Accordingly, PHEO investigators should become familiar with this disability and how those who have this disability are protected by the law.

MCSD is a condition, the origin of which is currently

unknown. Adverse symptoms are caused by exposure to various chemical substances at exposure levels so low that for most people, they are considered harmless. Symptoms appear after a person with MCSD comes into contact with the air, water, food, medication or surface that contains the chemicals to which the individual is sensitive. The most common substances that are believed to cause adverse reactions in people with MCSD are solvents and other volatile compounds, pesticides, formaldehyde, natural gas, disinfectants, detergents, plastics, tobacco smoke, and perfumes. The adverse reactions of individuals with MCSD often include extreme tiredness and an inability to carry out major life activities such as manual tasks and walking. For housing providers, acts which are necessary and accepted business practices, such as cleaning, painting, exterminating the building or fertilizing the lawn, may be threatening events to people with MCSD since exposure to the various chemicals involved can cause severe symptoms.

As with other handicaps, housing providers are required by the Fair Housing Act to provide reasonable accommodations to individuals with MCSD. Housing providers are also required to comply with all other requirements of the Fair Housing Act including the obligation to permit people to make, at their own expense, reasonable modifications to the existing premises, if the proposed modifications are necessary to afford them the full enjoyment of the housing premises.

01-00933

INTERNAL:NOT FOR RELEASE)

Additionally, under Section 504 of the Rehabilitation Act of 1973, housing providers who receive Federal financial assistance are required to modify their housing policies and practices to ensure that these policies and practices do not discriminate on the basis of handicap against qualified individuals with MCSD. Housing providers who receive Federal financial assistance are also obligated to carry out all other requirements of Section 504. This includes operating each housing program or activity receiving Federal financial assistance so that the program or activity, when viewed in its entirety, is readily accessible to individuals with handicaps.

Because people with MCSD suffer adverse reactions as a result of exposure to a wide variety of substances, reasonable accommodations for this disability, as with all disabilities, should be based on the particular circumstances of the tenant or

applicant. To the extent that the elements which trigger adverse reactions in the individual can be identified, requests for reasonable accommodations may be sought to enable the individual to minimize or avoid exposure to these elements.

Although the reasonableness of a particular accommodation request will depend on the circumstances of the individual and an assessment of the feasibility, practicality, and burdens involved in making the accommodation, it is possible to provide examples of accommodations which are considered reasonable:

-- A tenant with MCSD has a sensitivity to chemical pesticides. He requests that the housing provider notify him in advance before fumigating the apartment building and substitute boric acid for the chemicals normally used to spray his apartment.

-- An applicant with MCSD has a sensitivity to the chemicals found in certain types of carpeting. She inquires about an available apartment located in a building in which all the apartments have wall-to-wall carpeting. She requests that the housing provider inform her as to the type of carpeting used throughout the building so that she may determine whether the apartment would suit her needs before renting it.

If you have any questions about this guidance, please contact Mary-Jean Moore, Section 504 Branch Chief, Office of HUD Program Compliance at FTS 458-0015 (TDD).

01-00934

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, D.C. 20410-2000

OFFICE OF THE ASSISTANT SECRETARY FOR FAIR HOUSING AND EQUAL OPPORTUNITY

September 6, 1991

Paul A. Cammer, Ph.D.
President
Business Council On Indoor Air
1225 19th Street, N.W., Suite 300
Washington, D.C. 20036

Dear Dr. Cammer:

Thank you for your letter of July 16, 1991 regarding the Department's policy on multiple chemical sensitivity and its guidance on this issue to regional and field offices.

As noted in the Department's letter to Senator Lautanberg, HUD presently recognizes Multiple Chemical Sensitivity Disorder (MCSD), sometimes referred to as "environmental illness," as a "handicap" under the Fair Housing Act. People with this disability are also considered "individuals with handicaps" under Section 504 of the Rehabilitation Act of 1973.

Accordingly, the Department has instructed its regional and field investigators to become familiar with this disability which is extremely complex and difficult to comprehend. Individuals with MCSD are protected by the law and the Department has provided its regional offices with some general guidelines to ensure compliance with non-discrimination laws and regulations.

As with other handicaps, housing providers are required by the Fair Housing Act to provide reasonable accommodations to individuals with MCSD. Housing providers are also required to comply with all other requirements of the Fair Housing Act including the obligation to permit people to make, at their own expense, reasonable modifications to the existing premises, if the proposed modifications may be necessary to afford them the full enjoyment of the housing premises.

Additionally, under Section 504 of the Rehabilitation Act of 1973, housing providers who receive Federal financial assistance are required to modify their housing policies and practices to ensure that these policies and practices do not discriminate on the basis of handicap against qualified individuals with MCSD. Housing providers who receive Federal financial assistance are also obligated to carry out all other requirements of Section 504. This includes operating each housing program or activity receiving Federal financial assistance so that the program or activity, when viewed in its entirety, is readily accessible to individuals with handicaps.

Finally, because people with MCSD suffer adverse reactions as a result of exposure to a wide variety of substances, reasonable accommodations for this disability, as with all disabilities, should be based on the particular circumstances of the tenant or applicant. To the extent that the elements which trigger adverse reactions in the individual can be identified, requests for reasonable accommodations may be sought to enable the individual to minimize or avoid exposure to these elements.

Although the reasonableness of a particular accommodation

request will depend on the circumstances of the individual and an assessment of the feasibility, practicality, and burdens involved in making the accommodation, it is possible to provide examples of accommodations which are considered reasonable:

-- A tenant with MCSD has a sensitivity to chemical pesticides. He requests that the housing provider notify him in advance before fumigating the apartment building and substitute boric acid for the chemicals normally used to spray his apartment.

-- An applicant with MCSD has a sensitivity to the chemicals found in certain types of carpeting. She inquires about an available apartment located in a building in which all the apartments have wall-to-wall carpeting. She requests that the housing provider inform her as to the type of carpeting used throughout the building so that she may determine whether the apartment would suit her needs before renting it.

I hope the information provided is helpful.

Very sincerely yours,

Gordon H. Mansfield
Assistant Secretary

01-00936

Honorable Frank R. Lautenberg
United States Senate
Washington, D.C. 20510-3002

Dear Senator Lautenberg:

Thank you for your letter of October 11, 1990 regarding your constituent, Mary Lamielle, and her request that the Department of Housing and Urban Development (HUD) prepare a written policy acknowledging those people who are chemically sensitive as a disabled population deserving reasonable accommodation with regard to exposure to chemicals.

HUD presently recognizes Multiple Chemical Sensitivity (MCS) as a disability entitling those with chemical sensitivities to reasonable accommodation under Section 504 of the Rehabilitation Act of 1973. People with MCS are also recognized as disabled under Title VIII of the Fair Housing Amendments Act of 1988. However, because of the unique nature of MCS and the limitless variety of chemical sensitivities possible, HUD has not written a policy that sets forth specific required reasonable accommodation for this disability. Instead, we have acknowledged chemical sensitivity as a disability and accommodated those with various hypersensitivities on a case-by-case basis. As with all disabilities, housing providers are required to provide reasonable accommodations to chemically sensitive individuals, unless those accommodations would cause an undue financial and administrative burden or would result in a fundamental alteration in the nature of the program or activity.

Information about MCS has been disseminated at recent HUD Section 504 Town Meetings in an effort to make housing providers more aware of the needs of those with this disability. To better assure that HUD staff and the public are aware of the need to treat this condition as a disability, HUD is also planning to issue formal guidance on this matter to its Regional and Field Offices.

01-00937

HUD welcomes any information that the National Center for Environmental Health Strategies can provide and will keep Ms. Lamielle informed as new guidance is issued.

I hope that this information has been helpful.

Very sincerely yours,

Timothy L. Coyle
Assistant Secretary

01-00938

U.S. Department of Justice
Civil Rights Division

DJ 192-06-00025

Coordination and Review Section
P.O. Box 66118
Washington, D.C. 20035-6118

JUN 15 1992

Charles E. Scharbrough, AIA, CSI
Paul I Cripe, Inc.
7172 Graham Road
Indianapolis, Indiana 46250

Dear Mr. Scharbrough:

This letter responds to your April 29, 1992, letter requesting a clarification of the relationship of the program accessibility requirements of the Department of Justice's regulation implementing title II of the Americans With Disabilities Act (ADA), 28 C.F.R. part 35, and the accessibility guidelines for newly constructed or altered facilities contained in the Americans With Disabilities Act Accessibility Guidelines (ADAAG). ADAAG was issued by the Architectural and Transportation Barriers Compliance Board (ATBCB) and is found at Appendix A to the Department of Justice's regulation implementing title III of the ADA, 28 C.F.R. part 36. These regulations became effective on January 26, 1992.

The ADA authorizes the Department of Justice to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you in understanding how the ADA may apply to you. However, this technical assistance does not constitute a determination by the Department of Justice of your rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

Concerning the requirements for program accessibility, 28 C.F.R. 35.150 provides, in relevant part:

> (a) General. A public entity shall operate each service, program, or activity so that the service, program, or activity, when viewed in its entirety, is readily accessible to and usable by individuals with disabilities.

Recently, the Department issued a Title II Technical Assistance Manual that explains the requirements of program accessibility in existing facilities under section 35.150. We have enclosed a

copy of the manual for your information.

01-00939

On the issue of program accessibility, a city, county, or State may not deny the benefits of its programs, activities, and services to individuals with disabilities because its facilities are inaccessible. The services, programs, or activities, when viewed in their entirety, must be readily accessible to and usable by individuals with disabilities. Public entities, however, are not necessarily required to make each of their existing facilities accessible. See Technical Assistance Manual at 19-20. The primary focus of program accessibility is not on existing facilities but whether the programs, services, or activities provided by a local government are readily accessible to individuals with a disabilities. Program accessibility may or may not require alterations to existing facilities.

With respect to the construction of new facilities or the alteration of existing ones, the title II regulation provides, in relevant part, at 28 C.F.R. 35.151:

> (a) Design and construction. Each facility or part of a facility constructed by, on behalf of, or for the use of a public entity shall be designed and constructed in such manner that the facility or part of the facility is readily accessible to and usable by individuals with disabilities, if the construction was commenced after January 26, 1992.
>
> (b) Alteration. Each facility or part of a facility altered by, on behalf of, or for the use of a public entity in a manner that affects or could affect the usability of the facility or part of the facility shall, to the maximum extent feasible, be altered in such manner that the altered portion of the facility is readily accessible to and usable by individuals with disabilities, if the alteration was commenced after January 26, 1992.

Thus, all facilities designed, constructed, or altered by, on behalf of, or for the use of a public entity must be readily accessible and usable by individuals with disabilities, if the construction or alteration is begun after January 26, 1992.

Under the regulation, public entities may select from two design standards for new construction and alterations -- the Uniform Federal Accessibility Standards (UFAS) or the Americans with Disabilities Act Accessibility Guidelines for Buildings and Facilities (ADAAG), which is the standard that must be used for

public accommodations and commercial facilities under title III of the ADA. 28 C.F.R. 35.151(c). If ADAAG is chosen, however, public entities are not entitled to the elevator exemption (which permits certain buildings under three stories or under 3,000 square feet per floor to be constructed without an elevator). See Technical Assistance Manual at 23. Therefore, the standards for 01-00940

of the ADA. 28 C.F.R. 35.151(c). If ADAAG is chosen, however, public entities are not entitled to the elevator exemption (which permits certain buildings under three stories or under 3,000 square feet per floor to be constructed without an elevator). See Technical Assistance Manual at 23. Therefore, the standards for the construction of new facilities or alterations to existing facilities address the facility itself rather than the program, service, or activity offered there. New facilities must be constructed so that they are readily accessible to and usable by individuals with disabilities without regard to the program, service, or activity that will or may be offered in the facility.

Even where a public entity fully complies with ADAAG or UFAS in constructing new facilities or altering existing ones, if an individual with a particular disability is unable to enter a facility where a program, service, or activity is offered (e.g., a ramp complying with ADAAG standards is too steep for the individual to ascend), a public entity would have to make the program, service, or activity offered in the facility accessible. Program accessibility could be provided through such means as relocating the program, service, or activity to an accessible site. Therefore, program accessibility may impose stricter standards than those required for new construction because all individuals must be served.

In your letter, you reference some ADAAG scoping requirements for parking and assembly seating areas. The ATBCB has determined that these scoping requirements are the minimum standards for these particular elements to make a new facility accessible. This does not mean that existing facilities necessarily would have to be altered to comply with these scoping requirements. Program accessibility is based on whether a government's programs, activities, and services, when viewed in their entirety, are readily accessible and not whether a particular facility is readily accessible to and usable by individuals with disabilities. This determination should be made as part of the public entity's self-evaluation process.

I hope this information is helpful to you.

Sincerely,

Stewart B. Oneglia
Chief
Coordination and Review Section
Civil Rights Division

01-00941

JUN 16 1992

(b)(6)
(b)(6)
Orlando, Florida 32822

Dear Mr. XX

This letter responds to your complaint filed with our office under title II of the Americans with Disabilities Act (ADA). Title II of the ADA protects qualified individuals with disabilities from discrimination in the services, programs, and activities of a State or local government. You have requested an expedited determination from this office due to your need for a decision prior to June 22, 1992.

You are seeking to be placed on the ballot as a nominee for State Representative for the 37th District to the Florida House of Representatives for the Democratic Party primary in September 1992. You contend that Florida's nomination process discriminates against you on the basis of your disability.

In Florida, there are two methods for having one's name placed on a party's primary ballot for a State office. First, an individual can pay a qualifying fee, which is a percentage of the salary of the position sought. Fla. Stat. Ann. 99.092. In your case, you state that you are unable to pay the qualifying fee which would be $1600.00. Second, if an individual does not wish to pay the qualifying fee, he or she may qualify for placement on the primary ballot by the petition method by collecting signatures on petitions from three percent of the voters registered in the party in the district where the individual is running. Fla. Stat. Ann. 99.095. You allege

that you need to collect 1072 signatures, which must be filed by June 22, 1992.

Those individuals selecting the petition alternative, "... shall file an oath with the officer before whom the candidate would qualify for the office stating that he intends to

cc: Records, CRS, Friedlander, Stewart, Foster
:udd:stewart:XX ltr

01-00942

qualify by this alternative method for the office sought." Fla. Stat. Ann. 99.095(1). In addition, "[t]he oath shall be filed at any time after the first Tuesday after the first Monday in January of the year in which the first primary is held, but prior to the 21st day preceding the first day of qualifying for the office sought." Id. Once the oath is filed, an individual and his or her supporters may start collecting signatures from qualified registered voters. We have been informed by a representative of the Division of Elections, Florida Department of State, that the Division has never granted a waiver of the petition requirement because it has no authority to do so.

You allege that you have numerous medical conditions that greatly affect your mobility. As compared to other potential candidates who may use the petition process, you claim that you are discriminated against because you cannot walk door-to-door to collect signatures due to your mobility impairment.

Assuming for purposes of our analysis that you are a qualified individual with a disability, we conclude that the Florida law does not discriminatorily affect you because of your mobility impairment. Florida provides over five months to collect signatures. Individuals who seek nomination through the petition process are not required personally to collect the signatures. Rather, any individual may gather signatures on your behalf. Further, the Florida law does not require that an individual go door-to-door to collect signatures. An individual may gather signatures at any site where qualified registered voters congregate, such as shopping malls, public parks, recreational sites, public buildings, or other areas. In addition, according to the Division of Elections, an individual may mail petitions to potential supporters in his or her district for signing. Thus, an individual need not be able to walk in

order to collect signatures.

The ADA provides for equality of opportunity, but does not guarantee equality of results. The basis for many of the specific requirements of the Department's title II regulation is the principle that individuals with disabilities must be afforded an equal and effective opportunity to participate in or benefit from a public entity's aids, benefits, and services. In this instance, we conclude that the Florida election laws conform to these requirements of title II with respect to your claims of discrimination.

This letter constitutes our letter of findings with respect to your allegations of discrimination in your administrative complaint. If you are dissatisfied with our determination, you may file a complaint presenting your allegations of discrimination in an appropriate United States District Court under title II of the ADA.

This letter does not address other potential claims of discrimination on the basis of disability that may arise under the Florida election laws. Rather, this letter is limited to the application of the Florida election laws to the allegations presented in your complaint.

Under the Freedom of Information Act, 5 U.S.C. S 552, we may be required to release this letter and other correspondence and records related to your complaint in response to a request from a third party. Should we receive such a request, we will safeguard, to the extent permitted by the Freedom of Information Act and the Privacy Act, the release of information which could constitute an unwarranted invasion of your or other's privacy.

Sincerely,

Stewart B. Oneglia
Chief
Coordination & Review Section

Sub: Ballot and the ADA Act

I am sending this message in accordance with a phone call to Wonder Moore on Last Wed., She mentioned that I should send this fax in care of the above name and she would pass it on to the right person for processing. Can you please confirm receipt by calling voice (b)(6) (b)(6) and ask for (b)(6). Thanks!

I wish to be placed on the ballot for the Democratic Nomination of the 37th State House District of Florida's House of Representatives. There are two alternative methods of being placed on the ballot. One is to

pay a required fee, the second is to collect 1072 petitions and return them for certification. Being that I am disabled, and having severe difficulties obtaining the money required, and the petitions filled out I have requested that I be waived of both ways and be placed on the ballot with a waiver under the American with Disabilities Act Title 2. I have requested a ruling from the Florida Board of Elections and have yet to receive a satisfactory reply. Can this be looked into as to my rights of having my name placed on the ballot with a waiver of both methods? Sincerely yours, and awaiting your reply,

(b)(6)

Dear Ms. XX

This letter responds to your correspondence regarding the denial of free entrance to Eisenhower State Park in possible violation of the Americans with Disabilities Act (ADA), 42 U.S.C. 12101-12213. The ADA authorizes the Department of Justice to provide technical assistance to individuals or entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation, and it is not binding on the Department.

Specifically, you inquire whether a state agency that grants free entrance to those 65 years of age and older and disabled veterans, must grant free entrance to others who are similarly disabled.

Title II of the ADA prohibits discrimination on the basis of a disability, but does not prohibit a state agency from granting a privilege (such a free admission to state parks) to particular groups of individuals with disabilities and groups of individuals without disabilities so long as that decision has neither the intent nor the effect of discriminating against individuals on the basis of their disability. The information that you have given us does not appear to present a violation of the ADA.

We hope that this information is useful to you in evaluating your rights under the ADA.

Sincerely,

L. Irene Bowen
Deputy Director
Office on the Americans with Disabilities Act

WASHINGTON,D.C. 20530

TO WHOM IT MAY CONCERN;

I AM WRITING TO YOU FOR A COUPLE OF REASONS. I AM A PHYSICALLY CHALLENGED PERSON WHO ENJOYS THE OUTDOORS. I GO CAMPING OFTEN. RECENTLY, I WAS CAMPING AT EISENHOWER STATE PARK. I WAS TOLD PRIOR TO THE OUTING THAT DISABLED PERSONS WERE GIVEN A PASS TO ALLOW ADMITTANCE TO THE

CAMPGROUND WITHOUT HAVING TO PAY AN ENTRANCE FEE. I HAD PROOF OF DISABILITY PENSION FROM SOCIAL SECURITY.

WHEN I ENTERED THE GROUNDS I APPROACHED THE PARK STATION AND INQUIRED ABOUT THE PASS AND THE PROCEDURE TO ACQUIRE ONE THE PARK SUPERVISOR EXPLAINED THAT THE PASSES WERE ONLY GRANTED TO PERSONS 65 AND OLDER OR DISABLED VETERANS. I AM UNDER 65 AND I AM NOT A VETERAN. HOWEVER I AM DISABLED IN A WHEELCHAIR. THIS SEEMED VERY UNFAIR TO ME.

DOES THIS TYPE EXCLUSION SEEM CONTRARY TO TITLE 2, SECTION 202 OF THE AMERICANS WITH DISABILITIES ACT OF JULY, 1990? I WANT VERY MUCH FOR ALL PEOPLE TO RECEIVE FAIR TREATMENT UNDER THIS LAW. YOUR RESPONSE IS APPRECIATED. THANKING YOU IN ADVANCE,

SINCERELY YOURS,

(b)(6)

JUN 18 1992

Mr. Robert J. Moldashel
President
Lakeland Communications, Inc.
Lincoln Towers
1350 Lincoln Avenue
Holbrook, New York 11741

Dear Mr. Moldashel:

This letter is in response to your letter to the Office on the Americans with Disabilities Act (ADA) concerning TDD access to emergency phone numbers. Specifically, you asked if a volunteer fire department and ambulance service that provides a supplementary seven-digit emergency phone line to speed access to emergency services to the hearing public, in addition to a general 911 system, would be exempt from TDD access requirements.

The ADA authorizes the Department to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you in understanding how the ADA may apply to the situation you describe. However, this technical assistance does not constitute a determination by the Department of Justice of your rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

Title II of the ADA, which contains the ADA provisions relating to TDD access, applies to State and local governments. In order to determine whether a volunteer fire or rescue company is covered by the requirements of title II, it is necessary to examine the relationship between the company and the unit of local government. The factors to be considered include whether the company is operated with public funds; whether the employees, if any, are considered government employees; whether the government provides significant assistance to the company by providing equipment or property; and whether it is governed by an independent board selected by the members of a private organization or is elected by the voters or appointed by elected officials.

cc: Records, CRS, FOIA, Friedlander 3, Breen, Worthen
:udd:Oneglia:moldashel

01-00948

The provision regarding TDD access to emergency telephone systems for those entities covered by title II is found in the Department of Justice's regulation implementing that title, specifically 28 C.F.R. S35.162. The Department's Technical

Assistance Manual for title II specifically addresses the question you raise:

> Where a 911 line is available, a separate seven-digit telephone line must not be substituted as the sole means for nonvoice users to access 911 services. A public entity may, however, provide a separate seven-digit line for use exclusively by nonvoice calls in addition to providing direct access for such calls to the 911 line. Where such a separate line is provided, callers using TDD's or computer modems would have the option of calling either 911 or the seven-digit number.
>
> Where a 911 line is not available and the public entity provides emergency services through a seven-digit number, it may provide two separate lines -- one for voice calls, and another for nonvoice calls -- rather than providing direct access for nonvoice calls to the line used for voice calls, provided that the services for nonvoice calls are as effective as those offered for voice calls in terms of time response and availability in hours. Also the public entity must ensure that the nonvoice number is publicized as effectively as the voice number, and is displayed as prominently as the voice number wherever the emergency numbers are listed.

Technical Assistance Manual at pp. 38-39

Copies of the Manual and of the title II regulation are enclosed for your information.

We hope this information is helpful to you.

Sincerely,

Stewart B. Oneglia

DECEMBER 3, 1991

TO WHOM IT MAY CONCERN:

A RECENT ARTICLE PUBLISHED IN THE APCO (ASSOCIATED PUBLIC-SAFETY COMMUNICATIONS OFFICERS) BULLETIN MADE A REFERENCE TO THE MANDATORY IMPLEMENTATION OF TELECOMMUNICATIONS DEVICES FOR THE DEAF (TDD) IN DISPATCH CENTERS UNDER THE AMERICANS WITH DISABILITIES ACT (ADA).

THIS ARTICLE, HOWEVER, WAS UNCLEAR AS TO WHETHER OR NOT ALL DISPATCH CENTERS, INCLUDING SMALL FIRE DEPARTMENTS AND AMBULANCE COMPANIES THAT HAVE THEIR OWN SEVEN-DIGIT EMERGENCY NUMBERS HAVE TO COMPLY WITH THE NEW RULING.

9-1-1 DIALING IS AVAILABLE HERE ON LONG ISLAND BUT MANY OF THE VOLUNTEER FIRE AND AMBULANCE COMPANIES OFFER THEIR OWN EMERGENCY NUMBERS TO THE COMMUNITIES THEY SERVE TO AVOID UNNECESSARY DELAYS FROM THE 9-1-1 DISPATCH SYSTEM. ARE THESE PUBLIC SAFETY AGENCIES EXEMPT OR MUST THEY COMPLY WITH THE NEW RULING? IF THEY MUST COMPLY, DOES THE JANUARY 26, 1992 DEADLINE APPLY AS WELL?

PLEASE SUPPLY US WITH THE NECESSARY DOCUMENTATION THAT ANSWERS THESE QUESTIONS SO THAT WE MAY ALERT OUR PUBLIC SAFETY CUSTOMERS OF THIS NEW RULING. THANK YOU IN ADVANCE FOR YOUR PROMPT RESPONSE.

DJ 202-PL-165

Mr. Thomas R. Howard
Beck Program Management
1401 Elm Street, No. 4585
Dallas, Texas 75202

Dear Mr. Howard:

This letter responds to your inquiry as to the requirements for barrier removal under the Americans with Disabilities Act (ADA), 42 U.S.C. 12101-12213. The ADA authorizes the Department of Justice to provide technical assistance to individuals or entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation, and it is not binding on the Department.

Specifically, you inquire whether any alteration to make a rest room accessible that can be made without requiring the relocation of walls is probably (or necessarily) readily achievable. Further, you inquire whether the same number of accessible entrances to a building are required under the readily achievable barrier removal standard as are required under 4.1.3.(8) of ADAAG.

As you clearly understand, depending on the context, title III of the ADA imposes a range of compliance standards on private entities regarding physical barriers in places of public accommodation. When a public accommodation is engaged in neither new construction nor alteration of a facility, then the least rigorous accessibility obligation is imposed. The public facility must remove any physical barriers to individuals with disabilities where the removal of those barriers is "readily achievable" -- that is, where the removal can be done easily and without much difficulty or expense.

cc: Records Chrono Wodatch Bowen Bea rd.ta.302.howard
arthur T. 6/17/92

01-00951

The regulations issued by the Department of Justice discuss the factors that are to be used in determining whether the removal of a particular barrier is readily achievable. These include the nature and cost of the action, the financial resources available both to the site and the parent organization, the size and number of employees at the site and overall, and the relationship of the site to the parent organization. A copy of these regulations is enclosed.

Because all of these factors must be considered, it is not possible to state a general principle concerning whether the removal of particular existing physical barriers in restrooms is readily achievable. Some alterations requiring the relocation of a wall, particularly an easily moved wall, might indeed be done easily and without much difficulty or expense; but also some modifications, particularly those requiring the moving of plumbing and fixtures, might not be readily achievable.

Whether a particular building entrance to an existing building must be made accessible must be evaluated in the same way. Your clients do not need to make any entrance accessible if to do so would not be readily achievable. However, as all or parts of the existing facility are altered or modified, the facility's owner would have an obligation under the "path of travel" provision of 28 C.F.R. 36.403(e) to spend at least twenty per cent of the original alteration cost to make accessible a path of travel to the original altered area, including an accessible entrance.

Where removal of all barriers is not readily achievable, you must still take whatever steps you can under that standard to remove barriers. In addition, the obligation to remove any existing barriers is an ongoing one. What is not readily achievable today may be readily achievable next year.

We hope that this information is useful to you in evaluating your client's compliance with the ADA.

Sincerely,

L. Irene Bowen
Deputy Director
Office on the Americans with Disabilities Act

P.O. BOX 66118
Washington, D.C. 20035-6118

Re: Title III of the ADA
Section 36.304 Removal of Barriers

Dear Sir:
BECK Program Management is a construction management firm located in Dallas, Texas, that is involved in ADA compliance. We provide consulting services to clients regarding compliance with Title III of the ADA. More specifically, our firm provides site surveys and inspection services to clients for their existing facilities. In essence, we help our clients develop compliance plans for barrier removal for their existing facilities. We also are a member of a group which among others includes the Kent Waldrep National Paralysis Foundation. This group which was formed in May, 1991 provides seminars and training sessions to public and private groups. All of our services to this group are donated and all proceeds from these seminars are donated directly to the Foundation.

The purpose of this letter is to request clarification on two issues regarding barrier removal in existing facilities or buildings. First, in advising clients
regarding toilet facilities, where does one draw the line between readily achievable and not readily achievable? In general, we advise our clients that if improvements can be made that do not require the relocation of walls, these changes are probably readily achievable and should be undertaken. On the other hand, if the size of a toilet room is such that nothing short of relocating walls will make these rooms accessible, we advise them that such changes may not be required.

Second, regarding accessible entrances into a building, how many accessible routes are actually required into an existing building? Is it the same number as that required for new buildings as specified per 4.1.3.(8) of ADAAG or can less than 50% be accessible for existing buildings? If the building has four entrances and only one of these is accessible, must the building owner make

other entrances accessible?

We would appreciate any input or advice you could provide regarding these areas of compliance. We are constantly confronted with questions regarding these areas of accessibility and would like to know that we are providing accurate and reasonable advice to our clients and associates.

Sincerely,
Thomas R. Howard
ADA Program Administrator

RETURN RECEIPT
REQUESTED

"The National Law Journal" dated Monday, August 26, 1991.
ADA - is the first comprehensive civil rights statute to cover the disabled.

The provisions contained in Title III of the ADA, however, will have far reaching ramifications on building design, construction and the development of real estate.

Existing buildings, new construction and alterations are all within the scope of Title III. Moreover, compliance with Title III is the responsibility of almost everyone who has an interest in a covered building, including owners, managers, and tenants.

(As the above statements in "The National Law Journal" dated Monday, August 26, 1991) The partners/owners would like to make improvements that would be necessary.

What name and address do we have to send a letter to so we can find out, if any improvements must be done on building/buildings?

JUN 25 1992

The Honorable Joe Skeen
U.S. House of Representatives
2447 Rayburn House Office Building
Washington, D.C. 20515-3102

Dear Congressman Skeen:

I am responding to your letter to Janet Blizard, of my staff, in which you expressed concern about two matters that pertain to the implementation of the Americans with Disabilities Act of 1990 (ADA): the State of New Mexico's plans to amend its statewide building code to incorporate the ADA accessibility requirements prior to seeking ADA certification from this Department; and the national model building code organizations' plans to revise the model codes to make them consistent with the ADA. You have suggested that for the State or the national code groups to adopt the ADA Accessibility Guidelines without limiting their application to situations in which accessibility is "readily achievable" or "economically feasible" may be inconsistent with the intent of the ADA.

In enacting the ADA, Congress endeavored to strike a balance between the right of people with disabilities to participate fully in American society and the legitimate economic concerns of business owners who are subject to the ADA. The ADA provides that public accommodations subject to the Act are required to remove architectural and structural communication barriers in existing facilities only when it is "readily achievable" to do so. However, this limitation applies only to barrier removal in existing facilities that are not otherwise being altered.

When a place of public accommodation or a commercial facility is newly constructed or altered, a stricter standard applies. New construction of and alterations to places of public accommodation and commercial facilities must be readily

cc: Records, Chrono, Wodatch, Russell
udd: Blizard.cert.ltr.skeen

01-00957

accessible to and usable by individuals with disabilities. New construction must be accessible unless it is "structurally impracticable"; alterations must be accessible to the maximum extent feasible.

This rationale for this stricter standard is found in the report of the House Committee on the Judiciary which notes that:

> The ADA is geared to the future -- the goal being that, over time, access will be the rule rather than the exception. Thus, the [ADA] only requires modest expenditures to provide access in existing facilities, while requiring all new construction to be accessible. The provision governing alterations is akin to new construction because it is only applicable to situations where the commercial facility itself has chosen to alter the premises.

H.R. Rep. No. 485, 101st Cong., 2d Sess., pt. 3, at 63 (1990).

The ADA directs the Architectural and Transportation Barriers Compliance Board (Access Board) to develop guidelines for the design and construction of accessible buildings and facilities, and requires this Department to adopt regulations that are consistent with the Access Board's guidelines. Pursuant to this requirement, in July 1991, the Access Board published the ADA Accessibility Guidelines, which have been adopted by this Department as enforceable standards.

Places of public accommodation and commercial facilities subject to the ADA are, therefore, required by Federal law to comply with the ADA accessibility standards in all new construction and alteration projects. To the extent that State or local codes provide for a lower standard of accessibility, those codes are preempted by the ADA. State or local laws that provide equal or greater access may still be enforced, and if these laws have been certified by the Department of Justice to meet or exceed the requirements of the ADA, building owners, architects, and design professionals will have the assurance that compliance with the certified code will be considered evidence of compliance with the ADA in any litigation to enforce the Act.

The certification process is not mandatory. Nevertheless, many States have expressed their intent to revise their codes to be consistent with the ADA, and to seek ADA certification, because it will facilitate the design and construction process for people working on commercial facilities and places of public accommodation. Certification will not change an entity's obligations under State or Federal law, but it will streamline

the process of design and construction by permitting a covered entity to rely on the State or local code provisions to determine what is required, rather than having to consult both State and Federal regulations.

I believe that the certification of State and local codes will, over the course of time, prove to be an effective mechanism for achieving the goals of the ADA because the incorporation of the ADA requirements into State and local codes will ensure that accessibility is considered at the earliest stages of the construction process. This Department is, therefore, actively working to educate State and local officials about the certification process and to encourage these officials to seek

certification of their codes.

Because the ADA limits certification to State and local codes, model codes cannot be certified. However, the Division has established a procedure through which the national model code organizations can seek technical assistance from the Division to determine whether, and in what respects, the model codes are consistent with the requirements of the ADA. We view the attempts by the national model code organizations to develop of model accessibility codes that are consistent with the ADA as a commendable effort to ensure that future construction is accessible to all Americans. We are prepared to provide assistance to the code groups in this endeavor.

I hope that this information is responsive to your inquiry.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

Enclosures (3)

Congress of the United States
House of Representatives

June 2, 1992

Janet Blizzard, Attorney
Public Access Section
P.O. Box 66738
Washington, D.C. 20035-9998

Dear Janet:

I am writing because I have concerns with respect to efforts being made to bring stringent handicapped access requirements into our building codes. This is apparently happening in response to the Americans with Disabilities Act becoming law.

New Mexico is on the verge of adopting Americans with Disability Accessibility Guidelines, taken out of context, into their building codes in order to obtain "certification" from the Department of Justice.

Various provisions such as "readily achievable" and "economically feasible" are an important part of ADA. I believe congress intended that these provisions be preserved, especially under Title Three of the Act, in order to give affected businesses a chance to provide reasonable accommodation. If building codes simply absorb the building design sections of ADA without any provision for other features such as "readily achievable" then I believe we have lost the original intent of ADA.

Our national model building code organizations are rushing to modify their documents, as evidenced by the new Chapter 31 and the appendix on Site Accessibility contained in the Uniform Building Code which we use in New Mexico. Apparently they all feel compelled, or pressured, to modify their model codes, even though this action moves their codes away from their own stated philosophy, which is

> "The purpose of this code is to provide minimum standards to safeguard life or limb, health, property and public welfare by regulation and controlling the design, construction, quality of materials, use and occupancy, location and maintenance of all buildings and structures within this jurisdiction and certain equipment specifically regulated herein.
>
> "The purpose of this code is not to create or otherwise

> establish or designate any particular class or group of persons who will or should be especially protected or benefited by the terms of this code" - Part 1, Chapter, Sec. 102 of the 1991 Uniform Building Code.

This codification of handicapped access guidelines may well be counter to the spirit and intent of the Americans with Disabilities Act as passed by Congress. Before you proceed with "certification" of any building codes, I would appreciate discussing this with you further.

Sincerely,

Joe Skeen
Member of Congress

The Honorable Wally Herger
Member, United States House of
Representatives
2400 Washington Avenue, Suite 410
Redding, California 96001

Dear Congressman Herger:

This letter responds to your recent inquiry on behalf of the Sasser Development Company, which seeks information on the enforcement and funding of the Americans With Disabilities Act (ADA).

Under title III of the ADA, 42 U.S.C. SS12181-12189, which applies to places of public accommodation and commercial facilities, an individual can institute a private civil action for preventive relief. 42 U.S.C. S12188(a). The Department of Justice may commence a civil action in cases of general public importance or where a pattern or practice of discrimination is found. 42 U.S.C. S12188(b)(1)(B). Remedies in such cases include court orders to stop discrimination, civil penalties, and money damages. 42 U.S.C. S12188(b)(2). Individuals may file complaints with the Department of Justice by writing a letter to the Office on the Americans with Disabilities Act, Civil Rights Division, U.S. Department of Justice, P.O. Box 66738, Washington, D.C. 20035-9998.

Under title II of the ADA, 42 U.S.C. SS12121-12134, which applies to State and local governments, an individual may file a private civil action for preventive relief. 42 U.S.C. S12132. Alternatively, an individual may file an administrative complaint with one of the eight agencies designated in the title II rule. Those agencies and their addresses are listed on pages 46-47 of the enclosed title II technical assistance manual. Agency findings of violations of title II may be enforced by the Department of Justice, which can commence a civil action. 42 U.S.C. S12123. Remedies include injunctions and damages, if applicable. 01-00962

There is no specific funding source designated for the Department of Justice to enforce the ADA. The Department receives funding through its congressional appropriations to enforce the ADA.

We have enclosed the following publications to assist the Sasser Development Company in understanding the ADA's requirements: (1) Title II regulations; (2) Title II technical assistance manual; (3) Title III regulations; and (4) Title III technical assistance manual.

I hope this information has been helpful to you.

Sincerely,

John R. Dunne

Constitution Avenue and Tenth Street NW
Washington, D.C. 20530

Dear John:

I have been contacted to ascertain information regarding the implementation and enforcement of the Americans with Disabilities Act (ADA), as well as information regarding the funding source designated for the Department of Justice to enforce the Law.

I have contacted the Congressional Research Service and their information packs do not include this information. Sasser Development Company, specifically has requested I try to locate the enforcement provisions because they provide consulting services for the physically challenged. Since Sasser advises others they want their information to be accurate.

I would appreciate you responding to my Redding office, noted above, any information available regarding enforcement and funding of the ADA. Thank you in advance for your assistance to this request.

Sincerely,

Mr. Charles A. Herman
McCrory-Ambler Architecture
117 S. W. Fifth Street
P.O. Box 2446
Bartlesville, Oklahoma 74005

Dear Mr. Herman:

This is in response to your letter requesting information about the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

You request confirmation of information you received in telephone conversations with persons from this Department and from the Architectural and Transportation Barriers Compliance Board. Your questions concern the applicability of the ADA to off-shore drilling platforms, any ADA requirements for accessibility of factory machinery and equipment, and the meaning of the term "continuous" as it relates to handrails for ramps in 4.8.5(2) in the ADA Accessibility Guidelines (ADAAG).

Off-shore drilling platforms would not be considered places of public accommodation within any of the categories designated in Title III of the ADA. However, as facilities "whose operations affect commerce," off-shore drilling platforms do fall within Title III's definition of "commercial facilities."

There are no ADAAG requirements for design or building of factory machinery and equipment. However, it may be necessary

under Title I of the ADA to modify equipment or provide alternative equipment as part of a reasonable accommodation to an employee with a disability. ADAAG does require work areas to be designed and constructed so that individuals with disabilities can approach, enter and exit the areas.

cc: Records Chrono Magagna.pl.159 arthur T. 6/25/92

01-00965

We agree with the ATBCB's explanation of the term "continuous handrail" as one without interruption - i.e., the handrail follows the slope of the ramp, continues the length of the landing and becomes an integral part of a contiguous handrail system along a wall or intersects with a guardrail at a floor edge, etc.

I have enclosed the Department's recently published Title III Technical Assistance Manual. I hope this information will be useful to you.

Sincerely,

Joan A. Magagna

DJ 202-PL-0015 JUN 26 1992

M. D. Lindeman
U.S. West Business Resources, Inc.
188 Inverness Drive West
Edgewood, Colorado 80112

Dear M. D. Lindeman:

I am responding to your request for clarification of the requirements of title III of the Americans with Disabilities Act of 1990 (ADA), Pub. L. 101-336, 104 Stat. 327 (July 26, 1990), 42 U.S.C.A. SS 12101 et seq., and this Department's regulation implementing title III, 56 Fed. Reg. 35544 (July 26, 1991), to be codified at 28 C.F.R. pt. 36. Specifically, you have asked how

to determine the appropriate basis on which to determine the amount of money that must be spent on alterations to provide an accessible path of travel when the "overall" cost of an alteration to a telephone switching facility includes expenses associated with renovations to electrical or mechanical systems.

The ADA authorizes the Department to provide technical assistance to individuals and entities having rights or responsibilities under the Act. This letter provides informal guidance to assist you in understanding the ADA. However, this technical assistance does not constitute a determination by the Department of Justice of your rights or responsibilities under the ADA and it is not binding on the Department of Justice.

Under the ADA, alterations to commercial facilities such as telecommunications centers must, to the maximum extent feasible, be made accessible to individuals with disabilities. An alteration is any change that affects or could affect the usability of the facility. Normal maintenance, reroofing, painting or wallpapering, asbestos removal, or changes to mechanical and electrical systems are not alterations unless they affect the usability of the building or facility.

cc: Records Chrono Magagna Blizard:ada.interpretation.uswest
arthur T. 6/25/92

01-00971

In addition, alterations that affect the usability of or access to an area of a facility that contains a primary function must include alterations to ensure that, to the maximum extent feasible, the path of travel to the altered area is accessible, unless the cost and scope of such alterations is disproportionate to the cost of the overall alteration. Alterations made to provide an accessible path of travel to the altered area will be deemed disproportionate to the overall alteration when the cost exceeds 20% of the cost of the alteration to the primary function area.

You have asked if in determining the amount of money to be spent on alterations to the path of travel, you should consider the cost of the total alteration, including the amount spent on modernizing electrical and mechanical equipment, or only the cost of physical alterations to the area housing the equipment. Because changes in electrical systems are not included in the regulation's definition of "alterations," you need not include the cost of changes to the electrical and mechanical equipment in calculating the total cost of an alteration in the circumstances you describe where useability is not affected.

This Department recently issued a technical assistance manual to assist individuals and entities subject to the ADA to understand the requirements of title III. I have enclosed a copy for your information. I hope that this information is helpful to you.

Sincerely,

Joan A. Magagna
Deputy Director
Office on the Americans with Disabilities Act

Ms. Janet Blizzard, General Counsel
The Office of the Americans with Disabilities Act
Civil Rights Division
U.S. Department of Justice
P. O. Box 66118
Washington DC 20035-6118

Dear Ms. Blizzard,

As an introduction, I work for U S WEST, Inc. and manage the building design and construction program for U S WEST Communications, our telecommunications subsidiary, throughout its fourteen state territory. Your name was given to me by Jay Murdoch of BOMA International. He agreed with the following interpretation, but suggested I ask you to confirm that our interpretation of ADA and its application in telephone switching environments is correct.

We have an aggressive network modernization plan which involves replacing old central office switching machines with digital switches, upgrading facilities from copper to fiber optic technology and other network related improvements. A major effort is to upgrade our rural offices with new technology. A typical central office in the rural program has less than 2000 access lines and a typical renovation might cost $100,000. Of this amount, $90,000 would be spent to upgrade HVAC, electrical systems, central office grounding systems, asbestos abatement, and standby power plants, and $10,000 might be spent building a drywall compartment for the new switch. The equipment is compartmentalized for two reasons. One is to provide a very clean, highly filtered environment for the digital equipment, and the second is to provide additional fire protection since these buildings do not have sprinkler systems.

My question is whether the 20% path of travel requirement would be applied to the total project cost of $100,000 or just to the non-electrical mechanical part of the job; the $10,000 amount.

01-00973

As I read the regulations, I interpret the 20% requirement to apply to the $10,000 amount by using the following logic: In section 36.402 (b) (1) it states "Normal maintenance, reroofing, painting or wallpapering, asbestos removal, or changes to mechanical and electrical systems are not alterations unless they affect the usability of the building or facility." (My underlining.) The facility was and continues to be a telecommunications switching facility and its use was not changed.

Section 36.403 (f) (1) reads, "Alterations made to provide an accessible path of travel to the altered area will be deemed disproportionate to the overall alteration when the cost exceeds 20% of the cost of the alteration to the primary function area." It would seem that the 20% clearly would apply only to that part of the job which fits the definition in 36.402 of an alteration.

Clearly, the drywall compartment and any other architectural changes would need to be built in accordance with the new construction requirements of the law.

These buildings are frequently not work reporting locations for any employees. It would seem clear that the intent of the Act is to improve accessibility for people with disabilities to public accommodations and improve accessibility for employees. It is our intention, if this interpretation is correct, to focus our efforts toward improving accessibility in locations which meet the definition of a public accommodation and the commercial facilities in which our 58,000 employees work and to prioritize our investments to impact the work environment positively for the highest number of employees with disabilities.

Thank you for your help in clarifying this matter.

Sincerely,

cc. Barb Japha
Ted Williams

JUN 28 1992

The Honorable Richard G. Lugar
United States Senate
306 Hart Senate Office Building
Washington, D.C. 20510-1401

ATTN: Ms. Ellen Whitt

Dear Senator Lugar:

This responds to your letter requesting information about the Americans with Disabilities Act (ADA) in order to respond to the Crown Point City Council's inquiry about the applicability of certain ADA provisions to Council activity.

The ADA authorizes the Department of Justice to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you in responding to the City Council. However, this technical assistance does not constitute a determination by the Department of Justice of their rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

Title II of the ADA, which covers State and local government, establishes strict accessibility requirements for new construction and alterations. See S 35.151 of the enclosed title II regulation. However, in existing buildings, State and local governments are not required to make physical changes to facilities if the programs offered in the facilities can be made accessible by other means. 28 C.F.R. 36.150. Those other means may include relocating a meeting to another location or providing services in alternate accessible sites. 28 C.F.R. 35.150(b). In many cases, however, providing access to facilities through structural changes may be the most efficient method of providing program accessibility. (See enclosed Department of Justice Title II Technical Assistance Manual, at SII-5.2000.) Public entities must make their programs accessible in all cases, except where doing so would result in a fundamental alteration in the nature of the program or in undue financial and

administrative burdens. 28 C.F.R. 35.150(a).

:udd:kaltenborn:lugar.6.19
cc: CRS, Records, FOIA, Friedlander 3, Kaltenborn, McDowney, Breen

01-00975

The City Council has inquired about whether a "chair lift" may be installed to provide program access, and whether, if so, meetings may be moved while it is being installed. Changes made to comply with the program accessibility requirement must be done in compliance with either the Uniform Federal Accessibility Standards or the ADA Accessibility Guidelines. 28 C.F.R. S 35.150(b)(1). Both of those standards permit the use of a platform lift (or wheelchair lift), if it complies with the specified requirements. See S 4.1.2(5) of the Uniform Federal Accessibility Standards; S 4.1.6(3)(g) of the ADA Accessibility Guidelines. Relocating a meeting to an accessible location would be acceptable as an interim measure while structural changes, such as installing a platform lift, are being made. Such changes may be made over a three year period from January 26, 1992, pursuant to a transition plan that sets out the necessary steps to complete the changes. 28 C.F.R. S 35.150(d).

To respond to another question raised in your inquiry, a public entity must ensure that its communications with individuals with disabilities are as effective as communications with others. The Technical Assistance Manual offers the following illustration: "A deaf individual does not receive an equal opportunity to benefit from attending a city council meeting if he or she does not have access to what is said." Manual at 9. The Manual contains a discussion at pages 35-37 of the requirements for provision of auxiliary aids to ensure effective communications with individuals who have speech, vision, or hearing impairments.

I hope this information is useful to you in responding to the Crown Point City Council.

Sincerely,

John R. Dunne
Assistant Attorney General

Civil Rights Division

REPUBLICAN STEVEN J. BAZIN
COUNCILMAN AT LARGE

241 EAST GREENWOOD - CROWN POINT, INDIANA 46307 - (219) 663-4130

February 26, 1992

Senator Richard G. Lugar
U. S. Senate-Indiana
306 Hart Building,
Washington, D.C. 20510

Dear Senator Lugar:

We represent the City of Crown Point, Indiana, both as a City Councilman at Large and as the Republican City Chairman. Since the compliance date of January 26, 1992 of the American Disabilities Act, there has been great confusion in our city. Too many legal opinions and no substantive answers. Therefore, respectfully, we call upon you and your resources to please expedite all avenues to advise us about the legalities of ADA.

We, above all, want to be in harmony with ADA and, in turn, we want to best serve the needs of all our citizens, including our disabled ones. Yet, we pose a question of "reasonable accomodation".

First, we would like to share some relevant information: The City Council Chambers are on the second floor of our two story City Hall. The second story is presently accessible only by stairs. Therefore would the only way for the council chambers to be in compliance dictate a structural change be made? It is our understanding that when a structural change is required to make a facility

accessible that a "grace period" is allowed:--a six month period (from January 26, 1992) to develop a transition plan and a three year period (from January 26, 1992) in which to make the necessary changes.

Therefore, must the council chambers be abandoned now and remain so until the building is retrofitted. Or would "reasonable accomodation" (504, 35, 150) apply until, at least, a chair lift is installed. During that brief and temporary period, could we use the second story council chambers to hold regular committee and council meetings without the risk of the government entity facing a grievance and/or frivolous lawsuit.

01-00977

REPUBLICAN STEVEN J. BAZIN
COUNCILMAN AT LARGE

241 EAST GREENWOOD * CROWN POINT, INDIANA 46307 * (219) 663-4130

The old policy was to move the council meetings to an accessible building when given 48 hours prior notice. Could we continue to do this while a plan is being developed and necessary changes are being made? We have heard two completely opposing opinions on this from legal "experts". Is there a definitive answer?

The current administration has now temporarily moved Council meetings to a School Corporation building. This building has not accomodated our large overflowing crowds. Citizens must stand in the hallway away from the meeting room. Violations of the fire code are apparent with the large crowds. Parking for the disabled citizen is not available and/or reserved. To us, these accomodations are not acceptable to ALL of our citizens.

We have a question pertaining to the wording of elevator exemption. Can this two story City Hall be retrofitted with a chair lift to bring it up to compliance? Or do two story municipal buildings need to have an elevator.

Furthermore, does compliance and discrimination against the disabled impose more urgency on the environment/work place and, in turn, swifter adherence to the 504.35.150 section of the Act than a Council meeting held once a month in a two story building? To ask the question another way, are we, the City Council of Crown Point, unprotected under 504.35.150 from a $50,000.00 law suit even if we've already filed a letter of intent with the proper authorities to be in compliance within the time parameter defined under 9.6 Existing Facilities-504.35.150 and Section 35.151 New Construction and Alterations (c) Time Period for Compliance.

01-00978

REPUBLICAN STEVEN J. BAZIN
COUNCILMAN AT LARGE

241 EAST GREENWOOD * CROWN POINT, INDIANA 46307 * (219) 663-4130

We think "reasonable accomodations" should apply to our case, especially since no alternative meeting place has met the needs of space, parking and fire code.

Also, much of the discussion in Crown Point has been limited to people who are in wheel chairs or have a handicap that in some way restricts ones mobility. Are we being remiss in not also dealing with the hearing and seeing impaired? Should the City be looking to use signers at Council meetings? Should posted agendas, as required by State Statute, also be printed in Braille?

Anything that your office could do to help us determine proper legal couse and compliance with the Am erican Disabilities Act would be greatly appreciated.

Regards,

Steven J. Bazin, Michael Conquest,
Councilman at Large, Chairman,
Crown Point, Indiana Crown Point Republican
Central Committee

JUN 29 1992

DJ 202-PL-186

Leonard Perez, M.D.
503 W. Columbus, Suite B
Bakersfield, California 93301

Dear Dr. Perez:

This responds to your request for information about the Americans with Disabilities Act (ADA). The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA accessibility standards. However, it does not constitute a legal interpretation and it is not binding on the Department.

You inquire about your obligations to provide a sign language interpreter when you are treating deaf patients.

The ADA requires health care providers to provide auxiliary aids and services where necessary to communicate effectively with their patients with speech, hearing and vision impairments. Sign language interpreters and communication via pen and paper are both types of auxiliary aids and services. A health care provider can choose among various alternatives as long as the result is effective communication. Whether a particular aid or service will provide effective communication in a particular circumstance depends on the nature and complexity of the communication involved. While a routine appointment for a simple and familiar treatment procedure might not require the services of an interpreter, a lengthier appointment to discuss diagnosis and treatment options might well necessitate such services.

A health care provider cannot charge the patient with a disability for the cost of providing a particular auxiliary aid or service. However, such costs can be treated as any other overhead costs and passed along to all patients.

A health care provider is not obligated to provide a particular auxiliary aid or service if doing so will cause an

undue financial burden. In such a case, however, alternative

cc: Records Chrono Magagna.pl.186 arthur T. 6/26/92

01-00980

auxiliary aids or services that will not cause such a burden must be provided. The factors to be considered in determining whether there is an undue burden include the cost and nature of the service, the size and resources of the covered entity and the number of employees.

I have enclosed a copy of the Department's recently published Technical Assistance Manual which may further assist you in understanding your obligations under the ADA. I hope this information will be useful to you.

Sincerely,

Joan A. Magagna

Re: LAW REQUIRING THE PROVIDING OF A SIGNING INTERPRETER FOR THE DEAF

I have recently become aware of the new law that states one must provide a signing interpreter for a deaf person if one is to provide services to them. I understand that this is at the expense of the one providing the services. Some of the documents that I have read, states that one is not obligated to provide this service at ones expense if it causes a financial burden on the business.

I am in a part-time private medical practice in my community in the specialty of Obstetrics and Gynecology. I have several deaf patients in my practice, all of which I have communicated with on paper quite well. The interpreting services charge $40.00 per hour, with a minimum of one hour of service. Many of my patients are recipients of Medi-Cal (Medicaid). Medi-Cal pays me $14.78 for a return visit whether I spend 10 minutes or one hour with the patient. As you can see, in addition to having to pay for my office and office staff, I must pay $25.22 (40.00-14.78) in order to see this patient. This would put a financial burden on my practice by creating a negative cash flow.

IN THIS SITUATION, WOULD I STILL BE LEGALLY OBLIGATED TO PROVIDE AN INTERPRETER AT MY EXPENSE FOR THESE PATIENTS?

Sincerely,

Leonard Perez, MD

Jack L. Hockel, D.D.S.
2651 Oak Grove Road
Walnut Creek, California 94598

Dear Dr. Hockel:

This is in response to your letter requesting information about the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

You inquire about your obligations under the ADA in connection with your operation of a dental practice in an old home that has five steps to the entrance. You state that installing a ramp would affect the beauty and historicity and that installing a lift would be too expensive.

The ADA requires places of public accommodations, such as your dental office, to remove access barriers, such as the entrance steps, where such removal is "readily achievable." The ADA defines readily achievable to mean easily accomplishable without much difficulty or expense. A number of factors are considered in determining whether barrier removal is readily achievable including the nature and cost of the action required and the size and resources of the business involved.

Barrier removal is not considered readily achievable if it would threaten or destroy the historic significance of a building or facility that is eligible for listing in the National Register of Historic Places or is designated as historic under State or local law. In many circumstances, providing access to a historic building will not threaten or destroy its historic significance.

cc: Records Chrono Wodatch Magagna.pl.88 FOIA Library
arthur T. 6/29/92

If removal of a particular barrier is not readily achievable, health care providers must take alternative measures to make their services available to persons with disabilities as long as these alternative steps are themselves readily achievable. Such alternative measures might include providing services in a different location or making home visits.

The obligation to remove barriers is a continuing one. So, for example, if a particular barrier cannot be removed at this time because of financial considerations, but the financial picture subsequently improves, the barrier must then be removed when it becomes readily achievable to do so.

I have enclosed a copy of the Department's recently published Title III Technical Assistance Manual which may further assist you in understanding your obligations under the ADA. I hope this information is useful to you.

Sincerely,

Joan A. Magagna
Deputy Director
Office on the Americans with Disabilities Act

Washington, D.C. 20035-6118

To Whom It May Concern:

I am interested in clarifying my responsibilities under the Americans with Disabilities Act. I own a dental office which is located in an historic old home. I have had a dental practice here since 1981. There is no ramp or elevator to help people in wheelchairs up the five steps to our front entrance porch (photo enclosed). Am I responsible to construct a ramp (which would affect the beauty and historicity) or install a lift (which would be prohibitively expensive at about $11,000)?

Thank you for an early reply.

Sincerely,

Jack L. Hockel, D.D.S.

DJ 202-16-0 JUL 2 1992

The Honorable John Breaux
United States Senate
516 Senate Hart Building
Washington, D.C. 20510

Dear Senator Breaux:

This is in response to your inquiry on behalf of your constituent, Valerie S. Reed. Ms. Reed writes requesting information about the Americans with Disabilities Act, 42 U.S.C. S 12181 et seq. She is specifically seeking advice as to the application of the Act to a convenience store that she expects to open and occupy by Labor Day, 1992.

Although we cannot provide legal interpretations or legal advice to individuals, this letter provides informal guidance to assist your constituent in understanding the Americans with Disabilities Act accessibility standards. The Act authorizes the Department of Justice to provide technical assistance to individuals and entities that are subject to the Act. However, this technical assistance does not constitute a determination by the Department of Ms. Reed's rights or responsibilities under the Americans with Disabilities Act and it is not binding on the Department.

The regulations issued by the Department under the Americans with Disabilities Act (enclosed) contain different implementation dates for new construction and alterations. New construction that is first occupied after January 26, 1993, must be readily accessible to persons with disabilities. A new facility will not be subject to the new construction standards if the last application for a building permit is certified to be complete before January 27, 1992, and the first certificate of occupancy for the facility is issued before January 27, 1993. 28 C.F.R. S 36.401 (a)(2). If, however, an alteration to a commercial facility or place of public accommodation is made after January 26, 1992, it must be carried out in such a way that the altered portions are readily accessible to individuals with disabilities. Id. at S 36.402(a).

cc: Records Chrono Wodatch Millerc.Breaux.Cong. McDowney

I have enclosed copies of the Department's regulations under title III as well as our Technical Assistance Manuals, regulation highlights, and fact sheets.

I hope this will assist you in responding to your constituent.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

May 12, 1992

John B. Breaux
U.S. Senator
516 Hart Bldg.
Washington, DC 20510

Dear Senator Breaux:

This letter is a request for information! We are negotiating to construct a new Fuel and Convenience Store Facility in Jennings. For the previous twenty-four years, we were Chevron affiliated owner and operator of a Full-Service Station. Due to our unsuccessful bid for an additional long term lease with the Jennings Airport Authority, we are now attempting to build our own facility. As we hope to break ground in four to six weeks, I need some important information as soon as possible from various Governmental Agencies.

We have applied for a "Free Enterprise Zone", and are awaiting permits to begin construction. We expect to celebrate our Grand Opening near Labor Day. It is very important that we make certain our new Conoco Facility meets or exceeds all of the Federal, State, and Local guidelines concerning health, safety, environmental concerns, and especially handicap accessibility for both our employees and customers.

I would appreciate any and all information and assistance you can give us regarding the various Governmental Agencies regulating these aspects of concern, as well as these very important guidelines.

Cordially yours,

Valerie S. Reed

Ms. Olivia Cromwell Curtis
Property Manager
Rockhurst Corporation
500 Helendale Road
Rochester, New York 14609-3109

Dear Ms. Curtis:

This is in response to your letter requesting information about the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

You inquire whether a residential condominium building must comply with the ADA requirements for elevators and interior and exterior ramps.

The ADA does not apply to strictly residential facilities. However, the federal Fair Housing Act, as amended, also prohibits discrimination on the basis of disability. That Act does not require the condominium to provide ramps or elevators in existing buildings. However, it does prohibit the refusal to rent or sell to a person with a disability and would require the condominium to permit the person with a disability to make structural modifications at his or her own expense. There are more extensive requirements for providing accessibility in newly constructed multi-family housing, including condominiums.

There may also be state or local laws that have more stringent requirements.

I hope this information is useful to you.

Sincerely,

Joan A. Magagna
Deputy Director
Office on the Americans with Disabilities Act

JUL 2 1992

The Honorable Connie Mack
United States Senator
1342 Colonial Boulevard
Suite 27
Fort Myers, Florida 33907

Dear Senator Mack:

This is in response to your inquiry on behalf of your constituent, Ms. (b)(6), relating to whether service stations must provide refueling service for individuals with disabilities at the "self-service" rate.

The Americans with Disabilities Act of 1990 (ADA) authorizes the Department to provide technical assistance to individuals and entities that have rights or responsibilities under the Act. This letter provides informal guidance to assist Ms. (b)(6) in understanding the ADA. However, this technical assistance does not constitute a determination by the Department of Justice of her rights under the ADA, and it is not binding on the Department of Justice.

The Americans with Disabilities Act does not contain a specific requirement that individuals displaying an emblem indicating that they have a disability must receive refueling service at self-service prices. Our regulations implementing title III of the ADA, however, require public accommodations to make reasonable modifications in their policies, practices, and procedures in order to serve individuals with disabilities, unless they fundamentally alter the nature of the services provided. 28 C.F.R. S 36.302 (title III regulation). The ADA prohibits any cost involved in making a reasonable modification

from being imposed as a surcharge on the individual with a disability who requires the assistance. 28 C.F.R. S 36.301(c).

cc: Records; Chrono; Wodatch; Breen; Willis; McDowney.
:udd:jonessandra:cong.mack

01-00991

The preamble to our regulation provides in an analogous context that assistance is not required where only one attendant is on duty who must remain at the cash register for security reasons. 56 Fed. Reg. 35,544; 35,570 (preamble discussion of 28 C.F.R. S 36.305). The provisions cited in this paragraph may be found in the enclosed copy of our title III regulation.

Under title III of the ADA, which applies to places of public accommodation and commercial facilities, an individual can institute a private civil action to obtain a court order to prevent or stop violations of the ADA. The Department of Justice may commence a civil action in cases of general public importance or where a pattern or practice of discrimination is found. In this regard, individuals may file complaints with the Department of Justice by writing a letter to the Office on the Americans with Disabilities Act, Civil Rights Division, U.S. Department of Justice, P.O. Box 66738, Washington, D.C. 20035-9998.

For further information, you may wish to refer to our Title III Technical Assistance Manual, which is enclosed. I hope that this information is helpful to you in responding to Ms (b)(6) .

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

May 4, 1992

Senator Connie Mack
1342 Colonial Blvd., Ste. 27
Ft. Myers, FL 33907

Dear Sir:

I understand there is a law that a handicapped person who drives into a "Self-service" area of a service station and displays the "handicapped" emblem must be given service by an attendant at the "Self-service" rate. I have found a few stations where this is the case, but I have found more where they claim no knowledge of any such law and others where the clerk says something like, "Oh, we don't do that here."

In my case I must use oxygen at all times. Not only do I have to try to handle the pumping of the gas with a small tank of oxygen on my shoulder, I also should not be inhaling the gasoline fumes, which are quite concentrated when a person is bent over the opening to the gas tank. I'm certain I am not the only handicapped person who has run into problems in this situation.

Is there some way this law could be better publicized both to the general public and to service station owners and attendants? What recourse does the handicapped person have when service is refused? I would appreciate hearing from you in regard to these questions.

Thank you very much for your help.

Sincerely,

(Ms.) (b)(6)
(b)(6)
01-00993

JUL 2 1992

T. 6/26/92
SBO:LMS:KGF
DJ 192-180-07642

The Honorable Wayne Owens
U.S. House of Representatives
1728 Longworth House Office Building
Washington, D.C. 20515-4402

Dear Congressman Owens:

This letter responds to your inquiry on behalf of your constituent, Mayor Elden Sandino, Town of Stockton, Utah, who expresses concern about the town's financial ability to make the restrooms in its town building accessible to individuals with disabilities. Mayor Sandino also notes the need for Federal and State funding for the removal of barriers.

The Americans With Disabilities Act (ADA) authorizes the Department of Justice to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you in responding to your constituent. However, this technical assistance does not constitute a determination by the Department of Justice of your constituent's rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

Title II of the ADA and the Department of Justice's title II regulation require that a local government provide access to its programs, services, and activities to individuals with disabilities. To the extent that the town provides its programs, services, and activities to the public in its town building, they must be readily accessible to and usable by individuals with disabilities. The concept of program accessibility is discussed on pages 19-22 of the enclosed title II technical assistance manual.

Normally, where toilet facilities are furnished to individuals participating in the programs, services, and activities offered in the town building, those facilities also must be accessible to individuals with disabilities. See title II technical assistance manual at page 19, Illustration 1.

Stockton, however, is not required to make alterations to its facilities, if the town can demonstrate that the expense of

cc: Records, CRS, Friedlander, Stewart, McDowney, Foster
:udd:Stewart:owens1.ltr

01-00994

making its public toilet facilities accessible would result in undue financial and administrative burdens. See enclosed copy of the Department of Justice's title II regulation at 28 C.F.R. S 35.150(a)(3).

If the alterations to the facilities would result in such burdens, the public entity must take other actions that would not result in such hardships but would help to provide access. 28 C.F.R. S 35.150(a)(3). Thus, Mayor Sandino's suggestion for using accessible portable toilet facilities may be an option, should the town determine that undue burdens would result from making its regular toilet facilities accessible. The portable facilities should be available during the periods of time when the regular facilities are available. 28 C.F.R. S 35.130(b)(ii).

With respect to Federal funding for barrier removal, the Department of Housing and Urban Development (HUD) provides community development block grants designed to assist low and moderate income households and communities. These grants may be used to remove architectural barriers that restrict accessibility to publicly owned and privately owned buildings, facilities, and improvements. For information on applying for a community development block grant, Mayor Sandino should contact HUD's Office of Block Grant Assistance at (202) 708-3587.

I hope this information is helpful to you in responding to your constituent's inquiry.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

Attn: Rob Morse

Dear Congressman Owens:

Thank you for your correspondence bringing to our attention the concerns of Mr. Elden Sandino, Mayor of the Town of Stockton, regarding the accessibility
requirements of the Americans with Disabilities Act (ADA).

The Stockton City Hall would be covered by the regulations promulgated by the Department of Justice under title II of the ADA which prohibits discrimination on the basis of disability in State and local government services. Section 35.150 of the regulations outlines the requirements for program accessibility in existing facilities. This section explains the general
provisions of program accessibility for existing facilities; suggests methods for achieving program accessibility; and outlines the time period for compliance. I have enclosed a copy of the regulations.

Because this matter falls within the jurisdiction of the Department of Justice, I am also taking the liberty of bringing this matter to their attention.

Thank you for contacting the Access Board. Please let me know if I can be of further assistance.

Sincerely,

Lawrence W. Roffee
Executive Director

Re: ADA Regulations

Dear Congressman Owens:

We, recently received a copy of the ADA Regulations from the League of Cities and Towns and would like to address some of our concerns.

We support these regulations in theory and are willing to do what we can to abide by them. Unfortunately, like most small towns in the State of Utah, we are very limited in our funds and feel if these regulations are to be imposed upon us, some kind of Federal or State funding or grant also needs to be addressed.

Our building does have a ramp access in the rear, however our restrooms are down stairs. Our building used to be an elementary school and the stairs and stalls in the restrooms are rather small. Making these facilities handicap

accessible would be a major undertaking and very costly. The Town Board has discussed the matter and has decided it would be feasible to rent a handicapped accessible portable toilet for times when many people would be using the building (such as elections) but don't know if this would be an acceptable solution.

We would appreciate these concerns being addressed for small towns in Utah.

Respectively,

Elden Sandino, Mayor

elm

DJ 192-180-08479

JUL 6 1992

The Honorable Leon E. Panetta
Member, United States House
of Representatives
380 Alvarado Street
Monterey, California 93940

Dear Congressman Panetta:

This is in response to your inquiry on behalf of your constituent, Michael Sarka, who inquired about the applicability of the Americans with Disabilities Act (ADA) to a rental agency that handles rentals for private homes used as vacation rental homes. He further inquires whether the individual homes are required to meet the accessibility guidelines of the ADA.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

Title III of the ADA sets forth twelve categories of entities that are places of public accommodation having

obligations under the Act. Two of these categories are sales or rental establishments and service establishments. The type of rental agency described by Mr. Sarka probably would fall within one or both of these categories. Accordingly, the rental agency itself would be subject to the ADA requirements to have nondiscriminatory policies and procedures, to provide effective communication to persons with disabilities, and to remove architectural barriers in the rental office facilities where it is readily achievable to do so. These obligations are described in more detail in the enclosed Technical Assistance Manual recently published by this Department. See Part III-3.000 (pp. 13-20) and Part III-4.000 (pp. 21-39).

cc: Records Chrono Wodatch Magagna.panetta.cong FOIA Library arthur T. 7/1/92

01-00998

We cannot determine whether the vacation rental homes Mr. Sarka writes about are covered by Title III. Another one of the twelve Title III categories is "an inn, hotel, motel, or other place of lodging, except for an establishment located within a building that contains not more than five rooms for rent or hire and that is actually occupied by the proprietor of such establishment as the residence of such proprietor." Without more specific information about the individual properties and how they are used, it is not possible to determine whether individually owned vacation rental homes would fall within this category. The enclosed Federal Register publication at pp. 35551-35552 and 35559-35560 has a further discussion of these issues.

I hope that this information will be helpful to you in responding to your constituent.

Sincerely,

John R. Dunne
Assistant Attorney General

Civil Rights Division

CONSTITUENT REQUEST

DATE: 4/23/92

STAFF MEMBER: MKB

CONSTITUENT NAME: Mr. Michael Sarka

ADDRESS: P.O. Box 1202

Santa Cruz, CA 95061

PHONE: 458-3573

Position/A Information/B Bill Status/C Document/D

VIEWPOINT OR REQUEST

Issue/Subject: Americans with Disabilities Act requirements

Mr. Sarka said that he is the manager of a vacation rental agency. He said that they have been receiving conflicting information on what aspects of the Americans with Disabilities Act apply to his industry.

He understands that his offices must comply with certain aspects of the above legislation, however, they are not being given precise information on the law as it relates to the rentals that they manage.

He needs to know what aspects of the above legislation pertain to the rentals that are managed by a rental agency. He said that such agencies manage either homes or vacation homes for individuals. Such an agency takes care of advertising, maintaining, renting and collecting for such rentals for people.

In other words, are the private homes used as vacation rental homes required to meet the handicapped accessibility regulations of the Americans With Disabilities Act.

01-01000

The Honorable Guy Vander Jagt
U.S. House of Representatives
2409 Rayburn House Office Building
Washington, D.C. 20515-2209

Dear Congressman Vander Jagt:

Your letter to the U.S. Department of Housing and Urban Development on behalf of your constituent, James P. Durfee, was referred to this Department for response.

Mr. Durfee requested information on the existence of grants and low-interest loans for use in making Sugar Ridge Church of the Brethren accessible to individuals with disabilities. Religious entities are exempt from the provisions of the Americans with Disabilities Act. 42 U.S.C. S 12187. This

exemption applies to religious organizations or entities controlled by religious organizations and includes places of worship. It is, therefore, unlikely that Mr. Durfee's church would be required to undergo barrier removal in order to comply with the ADA.

Officials of the Department of Housing and Urban Development have informed us that they do not have grants which they issue directly to churches for the purpose of removing barriers to accessibility. It may, however, be possible to obtain funding from a state or local government which receives community development block grants.

Mr. Durfee may be interested in "That All May Worship", a handbook published by the National Organization on Disability. It provides information on accommodating persons with disabilities in religious settings. Copies of the handbook may be obtained from the Religious and Disability Program, National Organization on Disability, 910 16th Street, N.W., Suite 600, Washington, D.C. 20006. They may be reached by telephone at (202) 293-5960 or (800) 248-ABLE.

DJ 202-PL-161

JUL 8 1992

DIRECTOR
WODATCH Mr. John Baker
Customer Service Manager
DATE J. L. Industries
4450 West 78th St. Circle
Bloomington, Minnesota 55435
DEPUTY Dear Mr. Baker:
LIB

This letter responds to your correspondence regarding the
DATE application of the Americans with Disabilities Act Accessibility Guidelines to semi-recessed and surface-mounted fire extinguishers with respect to compliance with S4.4 Protruding Objects.

SPECIAL The ADA authorizes the Department of Justice to provide
COUNSEL technical assistance to individuals and entities with rights or
BREEN obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA accessibility
DATE standards. However, this technical assistance does not constitute a legal interpretation of the statute and it is not binding on the Department.

First, you note a potential conflict between fire codes that
BLIZARD require the installation of portable fire extinguishers and the ADA requirement, which prohibits projections of more than four
DATE inches when the leading (bottom) edge of the object is between 27 inches and 80 inches above the floor. Although fire extinguishers traditionally are mounted with the top at 60 to 72 inches above the floor, if the local fire code does not specifically prohibit a lower installation, the required fire
HARLAND extinguishers can be mounted with the lower edge of the protrusion at 27 inches above the floor. When the leading edge
DATE is at or below 27 inches, the presence of the object can be detected in the normal sweep of a long cane used by many individuals who are blind, and the projection of the object can

cc: Records, Chrono, Wodatch, Harland, FOIA
udd:Harland.Baker

01-01004

be more than 4 inches. Mounting the extinguisher lower on the wall also has the incidental advantage of assuring that the highest operable part (the door handle) is within the reach range of a person who uses a wheelchair, as required by S 4.27.3.

Secondly, you ask if the protrusion of the door handle could be exempted from being considered as part of the allowable projection. The ADA standards do not specifically exempt hardware or other operating mechanisms from the requirements for protruding objects in S 4.4.1; therefore, the protrusion of the handle would have to be considered as part of the allowable total. If you choose to mount the semi-recessed cabinet with its lower edge at 27 inches, the projection of the handle is no longer a problem.

I hope this information is useful to you and will assist you in understanding and applying the requirements of the ADA.

Sincerely,

John L. Wodatch
Director
Office on the Americans with Disabilities Act

Ms. Barbara S. Drake
Deputy Assistant Attorney General
Civil Rights Division
U.S. Department of Justice
P.O. Box 66118
Washington, D.C. 20035-6118

SUB: Americans with Disabilities Act,
Public Law 101-336

Dear Ms. Drake:

J.L. Industries is a manufacturer of products for the construction industry. We are writing with two questions of interpretation pertaining to Section 4.4, Protruding Objects, of the ADA Accessibility Guidelines for Buildings and Facilities, as it relates to one of our product lines, fire extinguishers and fire extinguisher cabinets.

Firstly, the most commonly used fire extinguishers on the market (5 lb. and 10 lb. multi-purpose dry chemical) have cylinder diameters ranging from 4-1/4" to 6", dimensions which exceed the allowable projection of 4", per 4.4.1. To be sure, in most cases these units will be housed in metal cabinets, which are then partially recessed into the wall and usually result in a projection of less than 4". However, there are many instances in which an interior wall will not be thick enough to

accommodate a recessed cabinet, necessitating, then, the mounting of the extinguisher in a special bracket on the surface of the wall.

APR 30 1992

01-01006

This will generally project beyond the allowable amount - yet, to delete the fire extinguisher would be to violate the local or national fire code. It would therefore appear that the potential exists for a conflict between the ADA and the fire codes. Our first question concerns how such a conflict would be addressed.

Secondly, most fire extinguisher cabinets are equipped with door-operating hardware, e.g., a pull handle which, in a very small area, projects beyond the surrounding face of the cabinet. (Please note the enclosed drawings which illustrate this). Our second question is, Could such door-operating hardware be exempted from the 4" maximum projection as stipulated in Section 4.4.1? In other words, provided the cabinet itself conforms to the 4" rule, could the hardware only then project beyond the 4"?

Thank you very much for considering these matters. I look forward to your early reply.

Respectfully,

John Baker
Customer Service Manager

Ms. Mary E. Bruno
Littler, Mendelson, Fastif & Tichy
400 Capitol Mall
Sacramento, California 95814-4410

Dear Ms. Bruno:

This letter responds to your correspondence requesting technical assistance with respect to the provisions of the Americans with Disabilities Act, 42 U.S.C. S 12101-12213 (ADA). The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

Specifically, your letter inquires whether a public accommodation -- a pre-school not otherwise controlled or operated by a religious entity -- that leases facilities from a religious organization is within the exemption granted to religious entities under Section 307 of the ADA, and, if not,

what are the respective obligations of the pre-school, as tenant, and the religious organization, as landlord, under the ADA.

Title III of the ADA establishes requirements for private entities that own, operate, lease (or lease to) places of public accommodation. A private entity has no Title III obligations, however, if it is a religious entity. A religious entity is a religious organization or a private entity controlled by a religious organization.

A non-religious entity that operates a place of public accommodation in space donated by a religious entity is itself exempt from title III's requirements. The nonreligious tenant entity is subject to title III only if a contract exists under which rent or other consideration is paid.

cc: Records Chrono Wodatch Magagna.pl.20 FOIA Library
arthur T. 7/7/92

01-01009

On the other hand, a private entity that rents the religious entity's facilities to operate a place of public accommodation is not exempt, unless it is also a religious entity. If it is not a religious entity, then its activities would be covered by title III. The religious entity, however, would remain exempt, even if its tenant is covered. That is, the obligations of a landlord for a place of public accommodation do not apply if the landlord is a religious entity. Compliance with the requirements of the ADA are the sole responsibility of the tenant, and this would include compliance with respect to common areas of the leased facility.

Neither a religious entity nor a tenant in donated space, however, is exempt from the employment requirements of Title I of the ADA, which go into effect on July 26, 1992, for employers with 25 or more employees. Moreover, if a religious entity receives Federal funds, as may child care facilities do, it is subject to section 504 of the Rehabilitation Act of 1973, as amended, 29 U.S.C. Section 794, which prohibits disability discrimination in federally assisted programs.

I have enclosed a copy of the Department's Title III Technical Assistance Manual. I hope that this information is useful to you in evaluating your rights and obligations under the ADA.

Sincerely,

Joan A. Magagna
Deputy Director
Office on the Americans with Disabilities Act

Re: Request for an Advisory Opinion Regarding the Applicability of Public Accommodation Section of The Americans with Disabilities Act

Dear Ms. Drake:

I am writing this letter to request an opinion regarding the applicability of Title III of the Americans with Disabilities Act ("ADA") regarding public accommodations and services operated by private entities. Specifically, I am requesting an opinion regarding the interaction of Section 307 of the ADA, which states that the provisions of Title III of the ADA shall not apply to religious organizations or entities controlled by religious organizations and of public accommodations otherwise subject to Title III, who lease facilities from religious organizations.

The specific situation we are concerned with involves the operation of a pre-school by a private entity in a facility that is leased from a religious organization. The pre-school itself is not otherwise controlled or operated by the religious organization. The nature of the relationship between the religious organization and the pre-school is one of landlord and tenant. The religious organization leases classrooms located on the religious organization's premises, in buildings adjacent to the place of worship, to the pre-school.

We are concerned with the dichotomy created by the specific exemption from the provisions of Title III for religious organizations and the mandates of the ADA applicable to private entities that operate public accommodations such as day care centers/pre-schools/nurseries.

01-01011

While it is clear that Section 307 of the ADA exempts religious organizations, Section 301(7) (k) specifically states that private entities are considered public accommodations for purposes of the Act if the operation of such entities affects commerce. Section 301(7) (k) includes nurseries as a public accommodation. Section 301(7) (j) specifically includes a day care center or social service center establishment in the list of public accommodations affecting commerce. Here, it is assumed that the pre-school is, in fact, a public accommodation under either Section 301(7)(j) or (k) of the Act.

Pursuant to the comments accompanying the regulations at page S-45, it appears that there is a distinction between the place of public accommodation (in this case the religious organization's premises) and the public accommodation itself (here; the pre-school). . The comments state that "it is the public accommodation and not the place of public accommodation" that is

subject to the nondiscrimination requirements of Title III. However, the regulations state that in cases of landlord/tenant responsibilities under Section 36.201(b), both the landlord, who owns the building that houses a place of public accommodation, and the tenant, who owns or operates the place of public accommodation, are public accommodations subject to the Act's requirements. Religious entities are exempt from Title III of the ADA however, and, therefore, cannot be considered public accommodations. Thus, we question whether this situation is to be handled similarly to situations where there are places of public accommodation located in private residences. Section 36.207 of the Regulations indicates that the private residences, like the religious organizations, are not covered by the provisions of the Act. However, when a place of public accommodation is located in a private residence, the portion of the residence used exclusively in the operation of the public accommodation is covered by the Act. Thus, we ask your opinion as to whether this is an analogous situation. Our questions are as follows:

1. As the landlord of the public accommodation, does the religious organization have any responsibilities under Title III of the ADA or is it specifically exempt from coverage pursuant to Section 307 of the ADA?

2. If the religious organization is specifically exempt pursuant to Section 307 of the ADA, which we believe to be the case, are all operations on its premises, including those leased to entities that would otherwise be considered public accommodations, exempt from coverage under Title III of the ADA.

3. Is the pre-school, which may otherwise be considered a public accommodation, exempt from the responsibilities under

Title III of the ADA because it operates a place of public accommodation at a religious organization and/or leases facilities from a religious organization, which is otherwise exempt?

4. If the religious organization is otherwise exempt as appears to be the case from Section 307 of the ADA, is it the sole responsibility of the pre-school, a public accommodation, to meet the requirements of Title III of the ADA with regard to the facility operated by the pre-school and leased from the religious

organization?

5. In this situation whose responsibility is it to ensure compliance with Title III of the ADA?

6. Would the pre-school be obligated to ensure that the portion of the religious organization's premises it leases must comply with Title III of the ADA?

7. What is the responsibility and to whom does the responsibility for compliance with Title III belong for common areas used both by the religious organization and the pre-school, such as bathrooms, hallways, stairwells, lobbies, parking lots, etc.?

I would appreciate your consideration of these issues and a written advisory response at your earliest convenience.

Very truly yours,

MARY E. BRUNO

JUL 8 1992

DIRECTOR
WODATCH
DATE
Mr. M. Wayne Bryant
Vice President
DEPUTY Sears Authorized Driving School
LIB P.O. Box 1266

JAM Arlington, Texas 76004-1266

DATE Dear Mr. Bryant:

I am responding to your inquiry about your obligations under title III of the Americans with Disabilities Act of 1990 (ADA) and this Department's regulation implementing title III.

SPECIAL COUNSEL BREEN Specifically, you have asked if a proprietary driving school is required to provide a sign language interpreter for students attending a defensive driving course.

DATE The ADA authorizes the Department to provide technical assistance to individuals and entities that have rights and responsibilities under the Act. This letter provides informal guidance about the general obligation of private schools to provide auxiliary aids. However, this technical assistance does

BLIZARD not constitute a determination by the Department of Justice of your rights or responsibilities under the ADA and it is not

DATE binding on the Department.

In order to provide equal access to individuals with disabilities, a public accommodation, such as a private school, is required to make available appropriate auxiliary aids when it is necessary to ensure effective communication. An individual who has a hearing impairment that substantially limits his or her ability to communicate is entitled to receive auxiliary aids from a public accommodation unless the public accommodation can demonstrate that providing the auxiliary aid will fundamentally alter the nature of the service being provided or that it will result in undue burdens.

Auxiliary aids and services include a wide range of services and devices that promote effective communication. Examples of auxiliary aids and services for individuals who are deaf or hard of hearing include interpreters, notetakers, written materials, assistive listening systems, telephones compatible with hearing

cc: Records, Chrono, Wodatch, Blizard (2), Library, FOIA
udd:ada.interpretation.Bryant
01-01014

aids, telecommunications devices for deaf persons (TDD's), videotext displays, open or closed-captioned video presentations, and exchange of written notes.

The type of auxiliary aid or service necessary to ensure effective communication will vary with the length and complexity

of the communication involved. Brief exchanges of information would not ordinarily require the use of an interpreter; but presentations of complex issues, such as those involved in a classroom presentation, may require the use of an interpreter or the use of captioned video presentations.

To determine what type of auxiliary aid should be provided, you should consult with your students whenever possible to determine what type of auxiliary aid is needed to ensure effective communication, because it is important to ensure that the auxiliary aid that is used is, in fact, effective. However, the ultimate decision as to what measures to take to facilitate communication rests in the hands of the public accommodation, as long as the method chosen results in effective communication.

When the ADA requires auxiliary aids to be provided, such auxiliary aids must be provided to the individual with a disability at no extra cost. The costs incurred by the public accommodation in providing auxiliary aids to its clients and customers who require auxiliary aids should be regarded as any of the other administrative costs associated with the operation of the business.

The Department of Justice has developed a technical assistance manual to assist individuals and entities affected by title III of the ADA to understand their rights and responsibilities under the Act. I am enclosing a copy of that manual for your use. I hope that this information is helpful to you.

Sincerely,

John L. Wodatch

Deborah C. Craytor, Esq.
Fisher & Phillips
1500 Resurgens Plaza
DEPUTY Atlanta, GA 30326
BOWEN
DATE Dear Ms. Craytor:

I am responding to your request for an opinion concerning the application of the Americans with Disabilities Act of 1990 (ADA), and this Department's regulation implementing title III of
DEPUTY the ADA, to your client, a private university that conducts
MAGAGNA pharmaceutical trials on behalf of manufacturers. This research is conducted by members of the university's medical faculty whose
DATE test subjects are selected from among their patients and the general public. Your letter asserts that the primary purpose of these tests is pharmaceutical research, not medical treatment or education; therefore, title III's barrier removal requirements
SPECIAL should not apply.
COUNSEL
BREEN The ADA authorizes the Department to provide technical assistance to individuals and entities having rights or
DATE obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA. However, this technical assistance does not constitute a determination by the Department of Justice of your rights or responsibilities under
BLIZZARD the ADA and it is not binding on the Department of Justice.
DATE Title III of the ADA prohibits discrimination against individuals with disabilities by public accommodations. In order to be considered a public accommodation, an entity must be
GYB

DATE

cc: Records, Chrono, Wodatch, Blizard, Russell
udd:Blizard.ada.interpretation.craytor

01-01016

private and it must own, operate, lease, or lease to a place of public accommodation. A place of public accommodation is a facility whose operations affect commerce and fall within at least one of the 12 categories identified in the ADA. You have correctly noted that a place of education is a place of public accommodation. The professional office of a health care provider is a also place of public accommodation.

Under the Department's title III regulation, a public accommodation is responsible for ensuring compliance with title III in all of the activities of the place of public accommodation that it owns or operates. This provision is intended to be read broadly. Nothing in the ADA or the Department's regulation supports the conclusion that a place of education is a place of public accommodation only with respect to the administration of its curriculum. Research activities are an integral part of the operations of many colleges and universities, and, in our view, are subject to the requirements of title III.

Please note that the obligations of a public accommodation under title III include more than the obligation to remove barriers. A public accommodation may not discriminate against an individual with a disability in the operation of a place of public accommodation. Individuals with disabilities may not be denied full and equal enjoyment of the "goods, services, facilities, privileges, advantages, or accommodations" offered by a place of public accommodation. The phrase "goods, services, facilities, privileges, advantages, or accommodations" applies to whatever type of good or service a public accommodation provides to its customers, clients, or participants.

A public accommodation has an affirmative obligation to modify its policies and practices to ensure that individuals with disabilities are not excluded from participation. The public accommodation must provide auxiliary aids when it is necessary to ensure effective communication with individuals with disabilities; it must remove architectural, communication, and transportation barriers to the extent that it is readily achievable to do so; and it must ensure that all new construction and alterations comply with the accessibility standards established in the title III regulation.

This Department recently issued a technical assistance manual to assist individuals and entities subject to the ADA to understand the requirements of title III. I have enclosed a copy for your information. I hope that this information is helpful to you.

Sincerely,

John L. Wodatch

Re: Request for Written Opinion on Coverage of Title III
of the Americans with Disabilities Act
Our File No. 1944.0070

Dear Ms. Drake:

We would like a written opinion concerning the application of Title III of the Americans with Disabilities Act to the following situation.

We represent a private university ("University"). Certain of the University's medical faculty are retained by pharmaceutical manufacturers to test the efficacy of new drugs. These research studies take place in buildings owned or leased by the University. The test subjects generally are unpaid volunteers but may be paid for their participation. They are generally patients of the doctor conducting the research, but they are occasionally solicited from the general public through advertisements. The purpose of the research studies is to test the drugs' effectiveness in treating particular physical or psychological conditions, not to provide a health benefit to the

test subject. However, an incidental effect of the study may be an improvement (or worsening) of the subject's condition.

Under these circumstances, we believe that the University facilities within which these drug studies take place are not places of public accommodation and therefore need not comply with Title III's barrier removal obligations. The operation of the drug study is not a part of the University's curriculum or educational program; thus, the facility should not be considered a "place of education." Moreover, the purpose of the study is not to provide a health service to the test subjects; rather, the study is
01-01019

conducted for the primary benefit of the pharmaceutical manufacturer, which bases its decision to market the drug on the success or failure of the study. In this respect, the drug study is akin to a wholesale establishment which sells exclusively to other businesses, and the Title III regulations recognize that such business-to-business transactions are excluded from the definition of public accommodation.

We would appreciate your written confirmation that, with respect to the activity described in this letter, the University is not a place of public accommodation and is not required to undertake readily achievable barrier removal in the space reserved for drug studies. If you have any questions, you may call either me or Tom Rebel.

Very truly yours,

Deborah C. Craytor

Ms. Barbara S. Drake
Deputy Assistant Attorney General
Civil Rights Division
U.S. Department of Justice
Washington, D.C. 20530

Dear Ms. Drake:

The Linroc Nursing Home, Inc., (a subsidiary of Linroc Community Service Corporation) is in the process of starting construction of a Skilled Nursing Facility ("SNF"). The design, plans and specifications have been completed. The project and

design have been approved by the New York State Department of Health (the "Department of Health"). The plans have been reviewed and approved by the City of New York Department of Buildings (the "Building Department").

A Building Permit will be issued by the City of New York prior to January 26, 1992. We intend to break ground in the early spring of 1992 and the SNF is scheduled for completion in November, 1993. The Building Department, as a matter of policy, will not issue a building permit for a period longer than one year. Projects that require a longer construction period are granted extensions as necessary.

It is our understanding that we will not be required to follow the Americans with Disabilities Act (ADA) Accessibility Guidelines for Buildings and Facilities (Final Guidelines, as published in the Federal Register, Vol. 56, No. 144, July 26, 1991) in our construction of the SNF. On December 6, 1991, I telephoned the Office of the General Counsel, Architectural and Transportation Barriers Compliance Board. I spoke with a representative who referred me to Part III of the July 26, 1991 Federal Register, "Subpart D - New Construction and Alterations", Section 36.401, Page 35599. In her opinion, since we received our building permit from the City of New York, as well as the approval of the Department of Health prior

DEC 13 1991

01-01023

to January 26, 1992, we will not be required to comply with the ADA guidelines as we do not fall within the definition of "new construction" as defined in paragraph 36.401(a)(2)(i). She further instructed me to write to your office and request a written reply.

We would appreciate your prompt response to this inquiry as we intend to finalize the start of construction, based on the existing plans, within the next few weeks. Any delay will have a serious impact on both the cost of construction and the occupancy date set for the patients. Thank you in advance for your attention to this matter.

Sincerely,

Marvin J. Fischer, P.E., FACHE
Project Coordinator

T. 6-30-92

JUL 8 1992

DJ 202-PL-00077

DIRECTOR
WODATCH Mr. Roy Hendrick
5647 Galleria Avenue
DATE Suite H
Baton Rouge, LA 70816

Dear Mr. Hendrick:

DEPUTY
LIB I am responding to your letter asking if title III of the

Americans with Disabilities Act of 1990 (ADA), Pub. L. 101-336,
DATE 104 Stat. 327 (July 26, 1990), 42 U.S.C.A. SS 12101 et seq.,, and this Department's regulation implementing title III, 56 Fed. Reg. 35544, to be codified at 28 C.F.R. pt. 36, require that elevator access be provided to a mezzanine in a one-story supermarket. You have also asked if the requirement differs if the supermarket
SPECIAL is located in a shopping center or shopping mall.
COUNSEL
BREEN The ADA authorizes the Department to provide technical assistance to individuals and entities that have rights or
DATE responsibilities under the Act. This letter provides informal guidance to assist you in understanding the ADA and the Department's regulation. However, this technical assistance does not constitute a determination by the Department of Justice of your rights or responsibilities under the ADA, and it is not
BLIZARD binding on the Department of Justice.

DATE Title III of the ADA requires all places of public accommodation designed and constructed for first occupancy after January 26, 1993, to be accessible to and usable by individuals with disabilities, including people who use wheelchairs. Therefore, the ADA generally requires that at least one accessible passenger elevator serve each level, including mezzanines, in a newly constructed multistory building.

However, title III contains an exception to this general rule. Elevators are not required in facilities that are less than three stories or have fewer than 3000 square feet per story, unless the building is a shopping center or mall; the professional office of a health care provider; a public transit station; or an airport passenger terminal. To determine if elevator access to a mezzanine in a specific building is
cc: Records, Chrono, Wodatch, FOIA, Library, Blizard
udd:Blizard.ada.interpretation.Hendrick

01-01025

required, you must look to the requirement that applies to the building in which the mezzanine is located.

Section 3.5 of the ADA accessibility guidelines (Appendix A to the Department's title III regulation) defines a "story" as:

> That portion of a building included between the upper surface of a floor and upper surface of the floor or roof next above. If such portion of a building does not include occupiable space, it is not considered a story for purposes of these guidelines. There may be

more than one floor level within a story as in the case of a mezzanine or mezzanines.

A mezzanine is not, itself, considered a "story" for the purpose of determining if an elevator is required.

If you are constructing a grocery store in a building that has fewer than three stories, and is not part of a shopping center or shopping mall, no elevator is required. When no elevator is required in a building, you are not required to provide any accessible means of vertical access to mezzanines within that building.

However, a grocery store with a mezzanine that is part of a shopping center or shopping mall is not eligible for the statutory exemption from the elevator requirement. The Department of Justice regulation implementing title III requires that all floor levels within a newly constructed shopping center or shopping mall be made accessible to people with disabilities; therefore, elevator access must be provided to mezzanines located in grocery stores that are part of a shopping center.

For your information, I am enclosing a copy of this Department's regulation implementing title III of the ADA and the technical assistance manual that we developed to assist individuals and entities subject to the ADA to understand the requirements of title III. The questions you raise are addressed in section III - 7.3110. I hope that this information is helpful to you.

Sincerely,

John L. Wodatch
Director
Office on the Americans with Disabilities Act

RE: A.D.A. Elevator Requirements
Grand Union Supermarket
Monroe, NY

Dear Mr. Wodatch:

We have a problem concerning the A.D.A. requirements and cannot get confirmation on the requirements and decisions as they affect our project.

Our architectural firm has been trying to resolve one question since September, 1991 and to date we have not received any written confirmation on Justice Department letterhead.

We have designed a supermarket for the Grand Union Company and based upon our interpretations and telephone conversations with A.D.A. personnel, it is understood that an elevator is not required to the mezzanine in the one-story supermarket.

Ms. Linda King has been extremely helpful in her research and by providing A.D.A. literature to us. We have requested written confirmation since last September and to date no "definitive" written response has been received.

Grand Union is working with many architects and the majority of these architects are interpreting the A.D.A. requirements as "an elevator is required to the mezzanine in a single story supermarket".

Grand Union is requiring us to obtain written confirmation of our interpretation of the A.D.A. requirement that an elevator is not required. Without this written confirmation, we are told to either put an elevator in the building or prepare to be sued in the event a Monroe, New York building inspector demands the elevator should be installed during or after construction. Our decision is complicated, without immediate written confirmation, we are forced

to redesign the building to receive an elevator.

We have previously submitted letters and drawings to the A.D.A. office in September and October of 1991. Weekly telephone calls, mainly to Ms. Linda King and Ms. Irene Bowen have been conducted since November, 1991. On February 21, 1992 Ms. King faxed us several pages of Title III, Technical Assistance Manual which seemed to confuse the issue. According to telephone conversation with Ms. King after receiving the fax, she discussed the elevator problem with Ms. Friedlander who said that "An elevator is never, never required in a single story building, ever, ever. Even if it is in a shopping center or connected to a shopping center".

The problem is that other people have read the pages from the Technical Assistance Manual and the above interpretation is not found. Their opinion, based on the manual, is that an elevator is required.

Please assist us by confirming immediately on letterhead by fax, the correct A.D.A. decision or interpretation one way or the other. Your prompt response would be greatly appreciated.

Sincerely yours,

Roy Hendrick, AIA
Architect

JUL 8 1992

DJ 202-PL-155
Mr. Gregory W. Silliman
DIRECTOR Senior Project Engineer
WODATCH Code Consultants Incorporated
Fire Protection Consultants
DATE 760 Office Parkway
St. Louis, MO 63141

Dear Mr. Silliman:
DEPUTY
LIB This letter responds to your correspondence regarding the application of the Americans with Disabilities Act (ADA) to a
DATE newly constructed parking structure connected to an existing mall building.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities with rights or
SPECIAL obligations under the Act. This letter provides informal
COUNSEL guidance to assist you in understanding the ADA accessibility
BREEN standards. However, this technical assistance does not constitute a legal interpretation of the statute and it is not
DATE binding on the Department.

Your letter states that an accessible entry to each level of the mall will be provided from each level of the parking garage and that the mall building contains accessible elevator service.
BLIZARD You ask if, in lieu of providing an elevator in the parking structure, this provides an adequate degree of accessibility with
DATE respect to ADA requirements.

The parking structure could be regarded as an addition (see ADA Guidelines S 4.1.5) to the existing mall; as such, the design would have to in compliance with the applicable provisions of
HARLAND S 4.1.1 through S 4.35, the requirements for new construction. Where the parking structure connects to the existing mall, that
DATE portion would be considered an alteration to an area of primary function and would trigger the path of travel requirements of S 4.1.6(2). As to the alteration requirements, your affirmative

cc: Records, Chrono, Wodatch, Harland, FOIA
udd:Harland.Silliman

answer from the DOJ ADA hotline was well-reasoned with respect to the path of travel. However, this would be considered correct only if the parking structure is used exclusively for access to the mall building.

If the parking structure could be used independently of the mall (e.g., as parking for another building or as parking when the mall building was not open for business) when direct access to the street would be necessary, we believe that the parking structure would be considered a separate new facility subject to the new construction requirements. In that situation, the Guidelines S 4.1.3(5) would require an elevator serving each level of the parking structure. Also, because the ADA does not affect the application or enforcement of state or local building regulations, if your local building code requires an elevator within the structure, that requirement would have to be satisfied irrespective of ADA requirements.

To assist you in complying with the ADA, attached are the final Title III regulations and a Technical Assistance Manual. We hope this information is useful to you.

Sincerely,

John L. Wodatch
Director
Office on the Americans with Disabilities Act

Washington D.C. 20035-6118

To Whom It May Concern:

Based upon my conversation on the morning of April 28, 1982 with a Department of Justice "Hotline" representative, I would like to document and verify the items discussed.

The question pertained to an existing two story covered mall building and a newly proposed open parking structure three stories in height connected to the covered mall building. At issue is the need for an elevator within the newly proposed open parking structure based upon the provisions of Section 4.1.3(5) of the Accessibility Guidelines.

As currently designed the covered mall building contains accessible elevator service within the public mall area. The proposed open parking structure adjacent to the covered mall building will provide accessible parking on each level and will provide an accessible entry from each level of the open parking structure to each level of the existing covered mall building. Since the occupants of the proposed open parking structure have an accessible entry into the existing public mall area, the Department of Justice hotline representative indicated that in his opinion, this proposed condition would provide an adequate degree of accessibility for compliance with the ADA.

This opinion was based upon the fact that the open parking structure and covered mall building function together and constitute one facility even though they are technically considered two separate buildings by the local Building Code. It is additionally important to note that the proposed open parking structure will be owned and/or operated by the same firm that owns and operates the covered mall building.

Although we understand that the Department of Justice opinions and written comments are not binding, we would still appreciate acknowledgement of this condition for future reference.

APPROVED: DATE:

01-01032

T. 6/26/92
SBO:LMS:KGF
XX (b)(6) JUL 9 1992

XX (b)(6)
Hutchinson, Kansas XX

Dear Mr. XX

This letter responds to your April 25, 1992, letter requesting information relating to the accessibility requirements for a State prison.

Section 504 of the Rehabilitation Act of 1973, as amended, prohibits discrimination against qualified individuals with handicaps by recipients of Federal financial assistance. Each agency which provides Federal financial assistance has issued regulations implementing section 504. In 1988, Congress enacted the Civil Rights Restoration Act of 1987 which, among other things, amended section 504. Under the Civil Rights Restoration Act, if a State department of corrections receives Federal financial assistance from a Federal agency, then the State's whole prison system is covered by section 504 including each of its prison facilities. Therefore, if at the time that a State is constructing new prison facilities, its department of corrections is receiving Federal financial assistance, the prison facilities should be constructed in compliance with the construction standards contained in the Federal funding agency's section 504 regulation.

In your letter you asked what accessibility standards would have applied to the construction of a prison in 1989 or 1990. Your specific concern is bathrooms. Most Federal funding agencies, including the Department of Justice, which frequently funds State departments of corrections, have adopted the Uniform Federal Accessibility Standards as the accessibility standards for new construction. Sections 4.21 and 4.22 of those standards cover bathrooms and shower rooms. We have enclosed a copy of those sections of the standards for your information.

Additionally, title II of the Americans With Disabilities Act prohibits discrimination against individuals with

cc: Records, CRS, Friedlander, Stewart, Foster
:udd:stewart: XX (b)(6).ltr

01-01033

disabilities by State and local governments. Under title II, a State must provide access to its programs, services, and activities in those facilities existing on January 26, 1992, the effective date of the title. Thus, the program accessibility requirements of title II would apply to all State prisons, regardless of the date of their construction. The services, programs, or activities of a prison, when viewed in their entirety, must be readily accessible to and usable by individuals with disabilities. Prisons, however, are not necessarily required to make each of their existing facilities accessible. The primary focus of program accessibility is not on existing prison facilities but on whether the programs, services, or activities are accessible to and usable by individuals with disabilities. Program accessibility may or may not require alterations to existing prison facilities.

With respect to new construction begun after January 26, 1992, a State must follow the construction guidelines required by the Department of Justice regulation. See page 23 of the enclosed Technical Assistance Manual on title II.

In response to your question concerning carrying individuals with mobility impairments as a means of providing access to a facility, the Technical Assistance Manual states:

> Is carrying an individual with a disability considered an acceptable method of achieving program

> access? Generally, it is not. Carrying persons with mobility impairments to provide program accessibility is permitted in only two cases. First, when program accessibility in existing facilities can be achieved only through structural alterations (that is, physical changes to the facilities), carrying may serve as a temporary expedient until construction is completed. Second, carrying is permitted in manifestly exceptional cases if (a) carriers are formally instructed on the safest and least humiliating means of carrying and (b) the service is provided in a reliable manner. Carrying is contrary to the goal of providing accessible programs, which is to foster independence.

Technical Assistance Manual at 20-21. Therefore, under limited circumstances, it is permissible to carry individuals with

mobility impairments to provide them access to different parts of a facility.

We hope this information is responsive to your inquiry.

Sincerely,

Stewart B. Oneglia
Chief
Coordination and Review Section
Civil Rights Division

JUL 9 1992

DJ 202-PL-214

Philip H. Wolfson, D.M.D.
210 Broadway
Long Branch, New Jersey 07740

Dear Dr. Wolfson:

I am writing in response to your June 18, 1992, letter requesting information about the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements;

however, it does not constitute a legal interpretation and it is not binding on the Department.

Your letter states that you intend to operate a dental practice in the second floor suite of a renovated 1859 Victorian professional building that you believe local officials may have deemed unsuitable for elevators or ramps because of the design of the existing structure. You also inquire whether there is a mechanism to obtain a waiver.

The ADA does not authorize the issuance of an official ruling or waiver exempting individuals or entities from complying with its requirements.

The ADA requires places of public accommodations, such as your prospective dental office, to remove access barriers, such as the entrance steps or stairs, where such removal is "readily achievable." The ADA defines readily achievable to mean easily accomplishable without much difficulty or expense. A number of factors are considered in determining whether barrier removal is readily achievable, including the nature and cost of the action required and the size and resources of the business involved.

cc: Records, Chrono, Wodatch, Magagna, Nakata, FOIA, Library,
Udd:Nakata:PL.214.Wolfson.1

01-01036

Barrier removal is not considered readily achievable if it would threaten or destroy the historic significance of a building or facility that is eligible for listing in the National Register of Historic Places or is designated as historic under State or local law. In many circumstances, providing access to a historic building will not threaten or destroy its historic significance.

If removal of a particular barrier is not readily achievable, health care providers must take alternative measures to make their services available to persons with disabilities as long as these alternative steps are themselves readily achievable. Such alternative measures might include providing

services in a different location or making home visits.

The obligation to remove barriers is a continuing one. For example, if a particular barrier cannot be presently removed because of financial difficulties, the barrier must nonetheless be removed if financial conditions subsequently improve to the point that barrier removal becomes readily achievable.

I have enclosed a copy of the Department's recently published Title III Technical Assistance Manual which may further assist you in understanding your obligations under the ADA. I hope this information is useful to you.

Sincerely,

Joan A. Magagna
Deputy Director
Office on the Americans with
Disabilities Act

U.S. Department of Justice
P.O. Box 66118
Washington, D.C. 20035-6118

Dear Mr. Wodatch:

I have been referred to you for information as to what conformity to the ADA is required in the following case:

A second floor suite, in a 1859 Victorian renovated professional building, without elevators, was previously occupied by a dentist, and would be occupied by me for similar purpose.

I believe local officials deemed the building as unsuitable for elevators or ramps because of design of existing structure.

What is the mechanism by which we can obtain an official ruling or waiver? Or are we required to conform with elevator? Or if we cannot obtain an official ruling on the building/suite, how can we be protected under the law?

The building's location is Shrewsbury, Monmouth County, New Jersey. Exact address would be supplied if necessary. Thank you.

Sincerely,

Philip H. Wolfson, D.M.D.

01-01038

JUL 21 1992

The Honorable Lloyd Bentsen
United States Senator
961 Federal Building
Austin, Texas 78701

Attention: Edward Lopez

Dear Senator Bentsen:

I am responding to your inquiry on behalf of your constituent, Brett Boaz, concerning the implementation of title III of the Americans with Disabilities Act of 1990 (ADA). Mr. Boaz believes that the ADA will become a vehicle for frivolous lawsuits because there is no mechanism through which the Department of Justice or the Architectural and Transportation Barriers Compliance Board (Access Board) provides binding pre-construction review of building designs.

In responding to this concern, it is important to keep in mind the nature of the ADA and the remedies it provides. The ADA is a civil rights law, not a building code. Therefore, it is enforced through the traditional civil rights mechanism of administrative complaint investigation and case-by-case enforcement in the Federal courts by individuals or the Department of Justice. However, when the ADA was enacted, President Bush and the Congress took care to ensure that there would be no incentive for private litigants to file "frivolous" lawsuits. The only remedy in private litigation is injunctive relief, i.e., an order requiring that a violation be corrected. No compensatory or punitive damages may be awarded. In addition, attorneys' fees may be awarded to the prevailing party at the discretion of the court. In a situation where a court finds that a plaintiff's claim was frivolous, the court may require the plaintiff to pay the attorneys' fees and litigation costs incurred by the defendant.

In addition, the ADA requires that certain Federal agencies provide technical assistance to individuals and entities affected by the ADA to facilitate voluntary compliance. Both this Department and the Access Board provide informal technical assistance regarding the ADA to enable people like Mr. Boaz to become familiar with the requirements of the law. However,

neither agency will function as a "building department" to review plans and specifications, conduct inspections, or issue building permits or occupancy certificates. These functions continue to

be the responsibility of State and local officials implementing State and local requirements. The ADA does not authorize any entities to carry out these functions with respect to the ADA.

Mr. Boaz raised a concern about the specific ADA requirements for accessible door hardware. He believes that these requirements would prevent designers from specifying the use of door locks that are operated by keys. This is a misinterpretation of the rule. The requirements of the rule apply to the construction of the lock itself, not to the mechanism that may be required to operate the lock from the outside. Devices are commercially available that enable people who have limited manual dexterity to use traditionally designed keys.

If Mr. Boaz requires further information on this issue, he should contact the Access Board at 1-800-USA-ABLE. The Access Board's technical specialists are available to provide informal technical assistance to individuals who have questions about the technical requirements of the ADA regulations. In addition, the Access Board may be able to direct Mr. Boaz to sources of accessible products that are available to architects and builders.

I hope that this information is helpful to you in responding to Mr. Boaz.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

01-01040

BRETT B. BOAZ
4508C UNIVERSITY BOULEVARD
DALLAS, TEXAS 75205

02 April 1992

The Honorable Lloyd Bentsen
United States Senate
Washington, D.C. 20510

My Dear Senator Bentsen:

As an overburdened, overregulated taxpaying Architect, I thought I would share with you my disappointments with recent legislation passed by Congress.

One example of Congress' regulation insanity is the American With Disabilities Act (ADA). Although this law was conceived out of compassion for the disabled, it has become nothing more than a vehicle for militant handicap activists to engage in frivolous lawsuits against building owners and design professionals. As with most legislation written by bureaucrats, these guidelines are cloudy, confusing and complicated. It has become virtually impossible to contact the Department of Justice or the Architectural and Transportation Barriers Compliance Board for interpretations to determine if a particular design is in compliance. This leaves the only real source for binding interpretations of the ADA to the Court System. (Congress has an uncanny knack for furthering the legal profession's ability to transfer wealth from those who produce to those who complain.)

Just for your information, I have included the following excerpt from the ADA to highlight one of the absurd requirements now considered law:

> "4.13.9 Door Hardware. Handles, pulls, latches, locks and other operating devices on accessible doors shall have a shape that is easy to grasp with one hand and does not require tight grasping, tight pinching or twisting of the wrist to operate."

In other words, as an Architect, I can be held liable for specifying a door that requires the use of a simple house key to open. How do you expect hard working Americans to stay in business and continue to pay taxes when you pass legislation like this?

Another disappointment with Congress was its inability to predict the devastating effects of the luxury tax. Instead of increasing tax revenues, as promised by the Democrats, it put countless number of Americans (especially boat manufacturers) out of business. When will Congress learn that the most effective way to increase tax revenues is by creating jobs -- not raising taxes. The "politics of envy" preached by your party has got to stop now!

I realize that serving as a Senator can be a thankless job. Your efforts in serving this particular constituent are appreciated; however, throw out the partisan politics in Washington, D.C. and help get this Country moving in the right direction again.

With warmest regards, I remain

Sincerely,

Brett B. Boaz

JUL 21 1992

The Honorable Alan J. Dixon
United States Senate
331 Hart Building
Washington D.C. 20510-1301

Dear Senator Dixon:

This is in response to your inquiry on behalf of your constituent, Ms. Betty Garner, about the applicability of the Americans with Disabilities Act (ADA) to an existing two-story building serving as the offices of a dentist and two orthodontists.

Title III of the ADA and the regulation issued by this Department require that architectural barriers in existing places of public accommodation, such as a professional office of a health care provider, be removed if doing so is "readily achievable," i.e., easily accomplishable and able to be carried out without much difficulty or expense. The regulation and the preamble to the regulation include detailed discussions of this requirement, including the factors to be considered in determining whether the removal of a particular barrier is readily achievable and the priority that should be placed on removing particular types of barriers.

The requirements became effective on January 26, 1992. However, section 310 of the ADA provides that civil actions cannot be brought concerning acts or omissions by businesses with 25 or fewer employees and gross receipts of $1,000,000 or less if the acts or omissions occur prior to July 26, 1992; and civil actions cannot be brought concerning acts or omissions by businesses with 10 or fewer employees and gross receipts of $500,000 or less if the acts or omissions occur prior to January 26, 1993.

The Internal Revenue Code includes a tax credit and

deduction for businesses taking steps to comply with the ADA. Further information on the tax benefits is available from the Internal Revenue Service, Office of the Chief Counsel, P.O. Box 7604, Ben Franklin Station, Washington D.C. 20044, (202) 566-3292.

cc: Records; Chrono; Wodatch; Bowen; McDowney; FOIA; Library.

June 2, 1992

Todd Atkinson:

I am writing to seek information regarding the rulings for existing buildings to comply with the Disabilities Act.

Our building, built in 1973, has two floors. The first floor is entered into by 6 steps going down. The 2nd floor is entered into by 8 steps going up. The first floor houses a dentist -working 4 days per week. The second floor houses two ortho-dontists working 1 day per week.

How soon or must facilities be built or installed to comply? Also we would like infor regarding tax credits in connection with the compliance rulings.

Thank you.

01-01045

JUL 22 1992

The Honorable Leon E. Panetta
Member, U. S. House of Representatives
380 Alvarado Street
Monterey, California 93940

Attention: Ken Christoper

Dear Congressman Panetta:

This is in response to your letter requesting information on behalf of Ms. Christine Dowd concerning the applicability of the Americans with Disabilities Act (ADA) to banks.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's requirements. It does not, however, constitute a legal interpretation and it is not binding on the Department.

As a place of public accommodation, banks are required to have nondiscriminatory policies and procedures, to make reasonable modifications in their policies, practices, and procedures to avoid discrimination against persons with disabilities, provide effective communication with persons with disabilities, and to remove architectural barriers in existing

facilities where it is readily achievable to do so. These requirements are set forth in Subparts B and C of the enclosed title III regulations, at pages 35595 to 35599.

The ADA imposes further accessibility requirements for new construction or alterations to existing facilities. For this purpose, the title III regulations adopt the ADA Accessibility Guidelines promulgated by the Architectural and Transportation Compliance Board (Access Board). There is a specific provision for Automated Teller Machines (ATM's) in section 4.34 of the Accessibility Guidelines. However, the Access Board has recently decided to reopen the issue of ATM accessibility for public comment through a notice in the Federal Register and has held a

cc: Records, Chrono, Wodatch, McDowney, Magagna, Nakata,
Library, FOIA
Udd:Nakata:Congress.letters.Panetta.1

01-01046

public hearing on this matter. While the changes to the rule are under consideration, section 4.34 remains in effect. However, the regulations specifically permit covered entities to use designs and technologies other than those specified in the regulations if they provide substantially equivalent or greater access to and usability of the facility. Such departures are permitted by the "equivalent facilitation" provision in section 2.2 of the Accessibility Guidelines.

Subpart D of the title III regulations includes requirements for new construction and alterations of places of public accommodations at pages 35599 to 35602. The Accessibility Guidelines begin on page 35605. Section 4.34 dealing with ATM requirements is at page 35664 and section 2.2 dealing with equivalent facilitation is at page 35607.

Also enclosed is the Department's Title III Technical Assistance Manual, which may provide further assistance to your constituent.

I hope this information will be useful to you in responding to your constituent.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

2345 Sand Lake Road: No. 100
Orlando, Florida 32809

Dear Ms. Perryman:

This letter responds to your correspondence and telephone

conversation with this office regarding the requirements of the Americans with Disabilities Act (ADA) for TDD's (telecommunications devices for deaf persons). Your letter specifically inquires whether a timeshare resort is covered by title III of the ADA and is therefore obliged to equip itself with TDD equipment for use by guests and owners.

The ADA authorizes the Department of Justice to provide technical assistance to individuals or entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

Assistant Attorney General John R. Dunne, recently responded to a detailed inquiry regarding the ADA's coverage of a timeshare resort operated by a major resort management corporation. His letter may provide guidance as to whether your resort has obligations as a place of lodging under title III, and I enclose a copy for your consideration.

If your resort is covered as a place of lodging by title III of the ADA, then the front desk should be equipped with a TDD. TDD's also must be made available on request to timeshare owners and guests in units where in-room telephone service is provided.

cc: Records, Chrono, Beard, Breen, Wodatch:dhj T. 6/27/92

XX
XX
XX

Dear Mr. XX

This letter responds to your August 21, 1991, letter on behalf of XX Ownership Resorts, Inc., (XX), requesting guidance on the application of certain provisions of the Americans with Disabilities Act (ADA) to the timesharing resorts operated by XX under its Vacation Ownership System. Specifically, you have requested guidance as to whether "timesharing that is sold in increments of one week or less is a public accommodation as that term is defined in the ADA."

The ADA authorizes the Department to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you in understanding how the ADA may apply to your client. However, this technical assistance does not constitute a determination by the Department of Justice of your client's rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

Based on our review of your letter and supporting materials, it is our understanding that the specific question you pose is the following: Is a vacation property owned in the form of ownership referred to by XX as "timesharing," and sold by

XX in increments of one week or less, a "place of public accommodation" as defined in this Department's regulation implementing title III of the ADA? See, 56 Fed. Reg. 35,544 (July 26, 1991) to be codified at 28 C.F.R. pt. 36.

cc: XX CRS Files XX
XX

01-01051

Based on the representations made in your April 23, 1991, letter, we believe that timeshare facilities in XX

Vacation Ownership System are nonresidential places of public accommodation. In reaching this conclusion we have considered the following factors to be of particular significance:

1. Ownership of timesharing units is sold in intervals of one week or less, which is consistent with the requirement that a place of lodging be a facility that is intended or used for, or permits short-term stays;

2. While ownership to individual units is conveyed in fee simple, recorded restrictive covenants substantially limit rights of ownership and owners have no right to occupy, alter, or exercise other control over any specific unit;

3. Owners of timesharing interests are not required to return to the same unit or project and may utilize various exchange options to exchange their units for units at other resorts; and

4. XX timeshare accommodations are operated like hotels (i.e., reservations, central registration, and room assignments are required) by a company that is in the hotel business.

We wish to stress that we have reached this conclusion based on your description of the ownership and operation of XX Vacation Ownership System. Thus, this conclusion should not be viewed as a general statement of the Department's position with respect to other types of timesharing facilities; our position on this issue may well be different given a different set of facts concerning the ownership and operation of such facilities.

As you note in your April 23, 1991, letter, as places of public accommodation, timeshare facilities are subject to the title III requirements for readily achievable barrier removal; and any new construction or alteration of such facilities must follow the Accessibility Guidelines adopted as Appendix A to the Department's title III regulation. We would also like to point out that, as a public accommodation, XX is also subject to other significant non-discrimination requirements under title III of the ADA. For example, XX must provide auxiliary aids and services to guests with hearing, speech, or vision impairments, unless doing so would result in an undue burden or a fundamental alteration in the nature of the services or accommodations being offered.

I hope this information has been helpful to you.

Sincerely,

John R. Dunne
Assistant Attorney General

Kevin W. Betz, Esq.
Krieg, Devault, Alexander, & Capehart
SPECIAL One Indiana Square
COUNSEL Suite 2800
BREEN Indianapolis, Indiana 46204-2017

DATE Dear Mr. Betz

I am responding to your letter asking for clarification of the requirements of title III of the Americans with Disabilities Act of 1990 (ADA), Pub. L. 101-336, 104 Stat. 327 (July 26,
DEPUTY 1990), 42 U.S.C.A. SS 12101 et seq., and this Department's
BOWEN regulation implementing title III, 56 Fed. Req. 35544, to be codified at 28 C.F.R. pt. 36.
DATE

The ADA authorizes the Department to provide technical assistance to individuals and entities that have rights or responsibilities under the Act. This letter provides informal guidance to assist you in understanding the ADA and the
BLIZZARD Department's regulation. However, this technical assistance does not constitute a determination by the Department of Justice of
DATE your clients' rights or responsibilities under the ADa, and it is not binding on the Department of Justice.

You have asked whether a retail business that operates two-story facilities in which all customer service activity is carried out on the first floor is required to provide elevator
GYB access to the employee areas on the second floor in either its existing facilities or in the facilities that it is planning to
DATE construct.

In new construction and alterations, title III generally requires that at least one accessible passenger elevator serve each level of a multistory building. However, there is an exception to this general rule. Elevators are not required in facilities that are less than three stories or have fewer than

cc: Records, Chrono, Wodatch, Blizard, Breen
udd:Blizard.ada.interpretation.betz

3000 square feet per story, unless the building is a shopping center or mall; the professional office of a health care provider; a public transit station; or an airport passenger terminal. Therefore, a newly constructed or altered two-story retail facility would only be required to provide elevator access to the second floor if the store is part of a shopping center or mall, as defined in section 36.401(d)(1)(ii) or section 36.404(a)(2) of the title III rule. If a building does not qualify for the elevator exemption, all floors must be served by elevators, even if the floors are used only by employees. Although areas used only as work areas need not be designed to permit maneuvering within the areas, an accessible approach and entrance to the areas must be provided.

In existing facilities that are not otherwise being altered, a public accommodation is required to remove architectural barriers to the extent that it is readily achievable, i.e., easily accomplishable and able to be carried out without much difficulty or expense. The requirements for barrier removal are not to be interpreted to exceed the title III rule's alteration standards. In other words, if an existing building would be eligible for the elevator exemption if it were undergoing alterations, it would never be necessary to install an elevator for purposes of barrier removal. In addition, in most cases installation of an elevator would not be considered "readily achievable" because of the expense.

For your information, I am enclosing a copy of this Department's regulation implementing title III of the ADA and the technical assistance manual that we developed to assist individuals and entities subject to the ADA to understand the requirements of title III. I hope that this information is helpful to you.

Sincerely,

John L. Wodatch

RE: Request For Comment From Department of Justice About
Application of Americans With Disabilities Act

Dear Mr. Wodatch:

Please find attached to this letter a situation that we would appreciate your comments upon in relation to the newly enacted Americans With Disabilities Act.

We have attempted to describe all facts of which we are aware, but if you have any questions, please call me at 317-636-4341 or 317-263-9141. Thank you for your assistance.

Respectfully,

Kevin W. Betz

KWB:sbh:870

01-01057

SITUATION

We understand that Company A is considering the placement of its employees on the upper (second) level of its two-story retail stores. Customers of Company A will not have access to the upper (second) level of the stores inasmuch as all retail activities will be conducted on the first (ground) floor. The functions to be performed by the employees on the second level would include telemarketing, cash-counting and other detail functions. As many as 12 employees may be utilized for these functions. Currently, there is no elevator which serves the upper (second) level of the stores. Moreover, the current design of new stores do not include elevators. Company A has asked whether, under these circumstances, elevators which would serve the second level will be required by the American With Disabilities Act ("ADA") in Company A stores. If you determine that an elevator would be required, what are your suggested alternatives to installing an elevator?

KWB:sbh:869

JUL 28 1992

DJ 202-PL-205

Newton Greenblatt, Esq.
P.O. Box 726
Vineland, New Jersey 08360-0726

Dear Mr. Greenblatt:

This letter responds to your inquiry regarding accessibility requirements under the Americans With Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

You inquired whether the entrance to a building occupied by the Vineland Historical and Antiquarian Society must be reconstructed so as to make it accessible to persons with disabilities.

You indicated in your letter that the Vineland Historical and Antiquarian Society is a private entity. Accordingly, it would be considered a "place of public display or collection," one of the categories of places of public accommodation under the ADA. The ADA requires public accommodations to remove architectural barriers in existing facilities where such removal is "readily achievable," i.e., easily accomplishable and able to be carried out without much difficulty or expense. Determining if barrier removal in a public accommodation is readily achievable is necessarily a case-by-case judgment. Whether such action is readily achievable for the Vineland Historical and Antiquarian Society is to be determined according to the following factors:

> (1) the nature and cost of the action needed;
>
> (2) the overall financial resources of the site or sites involved in the action; the number of persons employed at the site, the effect on expenses and resources; legitimate safety requirements

cc: Records, Chrono, Wodatch, Foran, Magagna, Library, FOIA
Udd:Foran:Newestgreenblatt.202.pl.205

01-01059

> necessary for safe operation, including crime prevention measures; or any other impact of the action on the operation of the site;
>
> (3) the geographic separateness, and the administrative or fiscal relationship of the site or sites in question to any parent corporation or entity with respect to the number of employees; the number, type, and location of its facilities;
>
> (4) if applicable, the overall financial resources of any parent corporation or entity; the overall size of the parent corporation or entity with respect to the

number of its employees; the number, type, and location of its facilities; and

(5) if applicable, the type of operation or operations of any parent corporation or entity, including the composition, structure, and functions of the workforce of the parent corporation or entity.

Generally, a public accommodation would not be required to remove a barrier to physical access posed by a flight of steps if removal would require very extensive ramping or an elevator. In contrast, ramping a single step will likely be readily achievable, and ramping several steps will in many circumstances also be readily achievable. Also, you should be aware that if your organization's facility is eligible for listing in the National Register of Historic Places under the National Historic Preservation Act (16 U.S.C. 470, et seq.), or is designated as historic under State or local law, barrier removal would not be considered "readily achievable" if it would threaten or destroy the historic significance of the building. In many cases, however, removing barriers will not threaten or destroy the architectural significance of a building.

Enclosed please find a copy of the Department's Title III Technical Assistance Manual and the Title III regulations. I hope this information will be useful to you.

Sincerely,

Joan A. Magagna
Deputy Director
Office on the Americans With Disabilities Act

Dear Sirs:

I am a member of the Board of Trustees of the Vineland Historical and Antiquarian Society, which was originated here in Vineland in 1864. The Society presently occupies a building erected in 1910 and the entrance to same is by ascending ten steps before entering the front door.

I have attempted to ascertain information by reading the pamphlet of questions and answers entitled "The Americans with Disabilities Act", as well as what was published in the Federal Regulation by the Department of Justice in July 1991.

I appears to me that the Society would fit into the definition of "public accommodation", i.e., museums, libraries, etc., but I am not sure that it is necessary to presently reconstruct the entrance to the building, which is open to the public on a part-time basis and by appointment for those persons interested in genealogy.

If you can give me a simple answer, I would appreciate same. If not, can you please direct me to the source for a response to my inquiry.

Thanking you, I am

JUL 28 1992

Mr. Harold McClellan
Maybrook Construction Company
774 State Route 7 N.E.
P.O. Box 53
Brookfield, Ohio 44403

DIRECTOR Dear Mr. McClellan:
WODATCH

I am responding to your letter asking whether title III of
DATE the Americans with Disabilities Act of 1990 (ADA) and this Department's regulation implementing title III would require the installation of an elevator in a newly constructed two-story
DEPUTY building that houses a business that provides home health care
LIB services, if no members of the public or clients of the business receive services at that facility.
DATE

The ADA authorizes the Department to provide technical assistance to individuals and entities that have rights or
ORIGINATOR responsibilities under the Act. This letter provides informal
BLIZZARD guidance to assist you in understanding the ADA and the Department's regulation. However, this technical assistance does
DATE not constitute a determination by the Department of Justice of your clients' rights or responsibilities under the ADA, and it is not binding on the Department of Justice.

In new construction and alterations, title III generally requires that at least one accessible passenger elevator serve each level of a multistory building. However, there is an exception to this general rule. Elevators are not required in facilities that are less than three stories or have fewer than 3000 square feet per story, unless the building is a shopping center or mall, the professional office of a health care provider, a public transit station, or an airport passenger terminal.

cc: Records, Chrono, Wodatch, Bowen, Blizard, FOIA, Library
udd:mercado:policy.letters.certif:blizard.wodatch.mcclellan

This Department's regulation implementing title III defines a "professional office of a health care provider" as a location where a State-regulated professional provides physical or mental health services to the public. If no health care services will be provided at the facility that you are designing, the facility is not the "professional office of a health care provider;" therefore, elevator access to the second floor is not required. Although elevator access to the second floor is not required, the second floor must meet all of the other requirements for accessibility that are established by this Department's regulation.

For your information, I am enclosing a copy of this Department's regulation implementing title III of the ADA and the technical assistance manual that we developed to assist individuals and entities subject to the ADA to understand the requirements of title III. I hope that this information is helpful to you.

Sincerely,

John L. Wodatch

RE: A. Title III
rs

Gentlemen:

ADAAG Section 4.1.3 (5); 4.1.6 (1) (K) (L) indicates elevators are not required in a building less than three stories in height, unless the building is the office of a professional health care provider.

We are designing a two story office building for a company that runs a home health care business. Employees only would use the building, no public and/or patients would have reason to access the building.

Is an elevator required?

Very truly yours,

MAYBROOK CONSTRUCTION COMPANY

JUL 29 1992

The Honorable Dennis DeConcini
United States Senate
328 Senate Hart Building
Washington, D. C. 20510-6025

Dear Senator DeConcini:

This is in response to your inquiry on behalf of your constituent, XX , who seeks information about the applicability of the Americans with Disabilities Act (ADA) to a housing community that includes common areas sometimes open to the public.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

Title III of the ADA imposes certain obligations on places of public accommodation. The Act lists twelve types of entities as places of public accommodation; strictly residential facilities are not among the twelve categories. Accordingly, the individual dwelling units in strictly residential facilities are not covered by title III of the ADA. Similarly, common areas in such facilities are not covered where use is restricted exclusively to residents and their guests. However, if a residential facility opens up its common areas to general use by non-residents, it may lose its strictly residential character and those areas will probably be covered by the ADA if common area activities or facilities fall within one of the twelve categories of places of public accommodation in title III.

To assist in understanding these provisions, please refer to pages 35551-35552 of the enclosed title III regulations for a

listing of the twelve categories of places of public accommodation and a discussion of the circumstances where a residential facility may be covered by title III. Some further discussion of the issue is found at pages 1 to 3 of the enclosed Title III Technical Assistance Manual.

Dear ADA Specialist:

I am writing on behalf of (b)(6), a constituent who is concerned about the applicability of the Americans with Disabilities Act.

XX is a member of the Homeowner's Association for an elderly residential facility in Mesa, Arizona. Her concern lies in the accessibility requirements of the Act as applied to this facility. It is a large housing community of over 2000 homes with approximately 5000 residents. The common areas of the facility are composed of three buildings which are currently inaccessible to wheelchairs. While most of the activities in these common areas are limited to residents, there are some events which are open to the public.

It would be greatly appreciated if you would look into this matter and respond to the concerns raised by this constituent. If you require any additional information on this matter, please contact Rosalie Lopez at (202)-224-4521.

Sincerely,

DENNIS DeCONCINI

DJ 202-PL-00188

JUL 29 1992

Ms. Elizabeth A. Lunday
Assistant City Attorney
City of Mesquite Texas
Post Office Box 850137
Mesquite, Texas 75185-0137

Dear Ms. Lunday:

This is in response to your letter, and your subsequent telephone conversation with Ruth Lusher of my staff, about the requirements of title II of the Americans with Disabilities Act (ADA). Your letter asked several questions about the ADA requirements for the installation of curb ramps.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that have rights and responsibilities under the Act. This letter provides informal guidance to assist you in understanding how the ADA may apply to public entities. This technical assistance, however, does not constitute a determination by the Department of Justice of the City of Mesquite's rights or responsibilities under the ADA and it is not binding on the Department.

Section 35.149 of the Department's regulation implementing title II (enclosed) provides that a public entity must not deny

the benefits of its programs and services to individuals with disabilities because its facilities are inaccessible. A public entity's services, programs, or activities, when viewed in their entirety, must be readily accessible to and usable by individuals with disabilities. However, a public entity is not necessarily required to make each of its existing facilities accessible or to take any action that it can demonstrate would result in a fundamental alteration in the nature of its program or activity or in undue financial and administrative burdens (S35.150(a)).

Section 35.150(d)(2) of the title II rule states that public entities with 50 or more employees and with responsibility for or authority over streets, roads, or walkways must prepare a schedule for providing curb ramps or other sloped areas where existing pedestrian walks cross curbs. Priority must be given to walkways serving State and local government offices and facilities, transportation, places of public accommodation, and employers, followed by walkways serving other areas. This

cc: Records; Chrono; Wodatch; Bowen; Library; FOIA.
:udd:bowen:ada.interpretation.lunday

schedule must be included as part of the required transition plan.

However, section 35.150 does not necessarily require a curb ramp at every existing intersection. Alternative routes to buildings that make use of existing curb ramps may be acceptable under the concept of program accessibility, even if an individual with disabilities may need to travel a longer route to reach a particular building than would a nondisabled individual. Moreover, the fundamental alteration and undue burdens defenses may limit the number of curb ramps required.

In the case of new construction and alterations (as opposed to situations in which a public entity modifies existing walkways solely to provide access), the rule requires that curb ramps be provided at any intersection having curbs or other barriers to entry from a street level pedestrian walkway (S 35.151(e)).

You asked if the ADA Accessibility Guidelines (Guidelines) are mandatory standards. Please note that section 35.151 of the title II regulation requires that all newly constructed or altered facilities comply with one of two Federal accessibility standards. A public entity may choose to follow either the Uniform Federal Accessibility Standards (Uniform Standards) or

the ADA Accessibility Guidelines (except for the title III elevator exemption). A copy of each of these standards is enclosed.

The Architectural and Transportation Barriers Compliance Board (Board), which developed the ADA Accessibility Guidelines, is currently developing specific title II guidelines, which are expected to be proposed for public comment later this summer. At such time as the Board issues final guidelines, this Department will consider adopting them as the standards that must be followed under title II.

In the meantime, when a public entity chooses either the Uniform Standard or the ADA Accessibility Guidelines for a building, facility, or project, it must follow that standard completely. While these standards are similar in most respects, there are differences between the two standards in several areas, which may affect a public entity's choice between them. The Department's Title II Technical Assistance Manual (at pp. 23-32) sets out the major distinctions between the two standards.

For example, one of the areas in which the two standards differ relates to the requirements for detectable warnings on curb ramps, which your letter specifically addressed. The Uniform Standards do not require detectable warnings; the Guidelines require the use of a specific pattern of truncated domes.

Section 4.7.7 of the Guidelines provides that "a curb ramp shall have a detectable warning complying with 4.29.2" Section 4.29.2 requires the use of a specific pattern of detectable truncated domes. Therefore, if the City decides to follow the Guidelines for its curb ramp program, it must comply with the provisions of section 4.7.7. However, as discussed above, the City may choose to follow the Uniform Standards, which do not require detectable warnings on curb ramps.

You also expressed concern in your letter and in the telephone conversation about problems with drainage if curb ramps are constructed to comply with section 4.8.4 of the Guidelines. Section 4.8.4 ("Landings") does not apply to curb ramps. The requirements for curb ramps, which are somewhat different from those for ramps, are set out in sections 4.7.1 through 4.7.11. In lieu of the provision for the level landings required at ramps, section 4.7.5 of the Guidelines ("Sides of Curb Ramps") and Figure 12(a) provide that where the landing at the top of the ramp is less than 48 inches, the slope of the side flares shall

not exceed 1:12. This allows the side flares to be used in traversing the curb ramp as shown in Figure 12(a) of the Guidelines.

It appears that the City of Mesquite's specifications, which you enclosed with your letter, were developed with the intention of complying with section 4.8.4 of the Guidelines, which is not required. In complying with the provisions of section 4.7.1 through 4.7.11, the City of Mesquite should be able to develop simplified specifications and drawings that more closely resemble the examples shown in Figures 12 and 13 of the Guidelines. Please note, however, that a 5/8 inch curb height or lip where the ramp meets the street, shown in the City's drawings, is not allowed by either standard. See SS 4.5 and 4.7.4 of the Uniform Standards and the Guidelines.

I am enclosing copies of the two standards, the title II regulation, and the title II technical assistance manual for your use. I hope that you find this information helpful.

Sincerely,
John L. Wodatch
Director
Office on the Americans with Disabilities

Office on the Americans with Disabilities Act
U.S. Department of Justice
P.O. Box 66118
Washington, D.C. 20035-6118

Re; Handicapped ramp construction.

Dear Sir or Madam:

I have been requested to make inquiry to your office on behalf of the Planning and Engineering divisions of the City of Mesquite, Texas regarding handicapped ramp construction. As with all aspects of the Americans with Disabilities Act, the City of Mesquite is establishing plans and procedures to comply with the requirements of the Act. In doing so, the City is following

the guidelines set out in the American with Disabilities Act Guidelines for Buildings and Facilities.

Due to the manner in which streets in Mesquite are constructed to allow for drainage, certain of the ramp requirements set out in the American with Disabilities Act for Buildings and Facilities have come into question.

Enclosed is a detailed drawing of the current specifications for the construction of wheel chair ramps within the City of Mesquite. These ramps are required to be constructed at all drive approaches, alley intersections and street intersections. If the ramps are constructed to meet the Guideline standards set forth in section 4.8.4 assuming the standards can be met, major reconstruction of City streets would be required. This reconstruction would at a minimum result in diversion of drainage, and in many instances severe drainage problems would occur. It is my understanding that at the present time approximately 1500 handicapped ramps will need to be constructed in the City of Mesquite, therefore the concerns expressed herein have an enormous effect on the City of Mesquite and its infrastructure. The resulting question is, are the guideline standards mandatory, or as suggested by their title, guidelines from which there may be other options or alternatives. If alternative standards may be used, do the City of Mesquite specifications for constructing ramps, as shown in the enclosed drawing, constitute an acceptable alternative? If the Mesquite specifications are not sufficient, are there alternatives that have been approved that may be utilized by the City of Mesquite?

The City of Mesquite also requests interpretation of 4.29.5 and the related section 4.29.2. Section 4.29.5 reads as follows:

> 4.29.5 Detectable Warnings at Hazardous Vehicular Areas. If a walk crosses or adjoins a vehicular way, and the walking surfaces are not separated by curbs, railings or other elements between the pedestrian areas and the vehicular areas, the boundary between the areas shall be defined by a continuous detectable warning which is 36 in (915mm) wide, complying with 4.29.2.

As I read this section, it does not apply to intersections where the curb wraps around either side of a handicapped wrap such as in the design of the ramps constructed in Mesquite (per the enclosed diagram), or in figure 12 of the Guidelines. A copy of figure 12 is enclosed for your convenience. I request you let me know if this interpretation is incorrect. In instances where detectable warnings are required, where this is no curb, railing, etc., are there acceptable alternatives to the truncated domes described in Guidelines S 4.29.2 which reads in part:

B.J. Smith City Attorney
Elizabeth A. Lunday J. Michael Ferrin
Attorneys

01-01073

4.29.2 Detectable Warnings on Walking Surfaces. Detectable warnings shall consist of raised truncated domes with a diameter of nominal 0,.9 in (23mm), a height of nominal 0.2 in (5mm and a center to center spacing of nominal 2.35 in (60mm) and shall contrast visually with adjoining surfaces, either light-on-dark, or dark-on-light.

An example of an alternative warning proposed by the City of Mesquite is scored concrete with the scoring at least 1/2 inch deep and spaced no more

than 1/2 inch apart. Is this an acceptable alternative to the use of truncate domes in concreted areas? Are there alternatives which have been approved on concrete and other surfaces. If so, please provide descriptions of acceptable alternatives to the City of Mesquite.

Thank you for your attention and consideration to the questions and issues raised herein. I look forward to your written response.

Yours truly,

Elizabeth A. Lunday
Assistant City Attorney
City of Mesquite, Texas

(Form) TYPICAL WHEELCHAIR RAMP

(Form) B-30 APPENDIX B

01-01076

DJ 202-PL-26

JUL 29 1992

Cynthia M. Shewan, Ph.D.
Director, Research Division
American Speech-Language Hearing Association
10801 Rockville Pike
Rockville, Maryland 20852

Dear Dr. Shewan:

This letter responds to Ms. Lorraine Eyde's request for informal guidance on the three case studies your committee has prepared for inclusion in the multidisciplinary casebook on test misuse being published by the American Psychological Association. The case studies raise important issues for test-takers with disabilities, and we appreciate your committee's efforts to provide accurate guidance to test administrators. As requested, we have reviewed the analysis provided for each case for conformity with the requirements of the Americans With Disabilities Act ("ADA"). In general, we urge that your materials be revised to accurately reflect the statutory framework of Titles II and III of the Americans With Disabilities Act, which is destined to have a major impact on test administration.

I. General Recommendations

We recommend that the analysis of each case study begin by discussing whether the examinee or test-taker is covered by the Americans With Disabilities Act. For purposes of coverage under the ADA, a person with a disability is:

- an individual who has a physical or mental impairment that substantially limits one or more major life activities;

- an individual who has a record of such impairment; or

cc: Records; Chrono; Wodatch; Breen; Foran.
:udd:foran:shewanltr

01-01077

- an individual who is regarded as having such an impairment.

28 C.F.R. S36.104.

The analysis should then point out that once it is determined that the potential test-taker is an "individual with a disability" under the Act, it is necessary to consider the status of the entity administering the test and the purpose of the test. Title III governs private entities offering examinations, while Title II applies to licensing activities by state and local government entities. Only one of the case studies you submitted for our review, Case #90, involves Title III alone. Cases #88 and 89 would be governed by Title III and II both.

A. Title III

All three of the case studies submitted for review involve the administration of examinations by private entities. Accordingly, the analyses for these cases should point out that the regulations promulgated under Title III of the ADA, effective January 26, 1992, provide very explicit requirements for private entities administering examinations, including the following:

- Any private entity that "offers examinations or courses related to applications, licensing, certification, or credentialing for secondary or postsecondary education, professional, or trade purposes" must offer such examinations or courses in an accessible place and manner or offer alternative accessible arrangements for people with disabilities. 28 C.F.R. S36.309(a).

- Examinations must be selected and administered so as to ensure that the examination accurately reflects an individual's aptitude or achievement level, rather than reflecting the individual's impaired sensory, manual or speaking skills. 28 C.F.R. S36.309(b)(1)(i).

- Where necessary, examinations must be modified for people with disabilities. Required modifications may

include changes in the length of the time permitted to complete the exam or adaptation of the manner in which the exam is given. 28 C.F.R. S36.309(b)(2).

- Auxiliary aids and services must be provided for test-takers with disabilities when necessary, unless offering a particular aid or service would "fundamentally alter the measurement of the skills or knowledge the examination is intended to test or would result in an undue burden." 28 C.F.R. S36.309(b)(3).

B. Title II

Two of the three case studies submitted for review also involve licensing activities by state and/or local government entities, and are thus covered by Title II of the ADA in addition to Title III. The analysis of these cases should explain that Title II, which took effect on January 26, 1992, generally prohibits discrimination on the basis of disability by public entities (instrumentalities of state and local government). Specifically, the regulations under Title II prohibit the public entity from discriminating against qualified individuals with disabilities on the basis of disability in the granting of licenses or certification. A person is a "qualified individual with a disability" with respect to licensing or certification if he or she can meet the essential eligibility requirements for receiving the license or certification. Like Title III, the regulations under Title II require the testing entity to make reasonable modifications in testing practices, policies, or procedures. Generally, Title III regulations should be used as a guide in determining what constitutes discriminatory conduct by a public entity in testing situations under both Titles II and III.

II. Individual Case Study Comments

A. Case #88: Reasonable Testing Accommodations for a Person With Attention Deficit Disorder

1 Focus Questions

Both of the "Focus Questions" for Case #88 should be rephrased. Question 1 uses incorrect terminology. The term "reasonable accommodation" actually applies only to Title I of the ADA. The analyses for the three case studies involve Titles II and III of the Act. The phrase "reasonable accommodation" should be replaced with "reasonable modification" throughout. Thus, the question might be rephrased as follows:

"List the criteria for determining what reasonable modifications in testing practices, policies and/or procedures are necessary to avoid discriminating against a test-taker on the basis of disability."

Question Two is also problematic. The question "what are the arguments in favor of granting a person with a disability special administration procedures," suggests that modifying testing practices, policies or procedures for persons with disabilities is a voluntary matter. The question should instead remind testing administrators of their legal duty to provide such modifications. Thus, the question might read:

"What are the legal requirements of testing administrators with respect to modifying testing policies, practices or procedures for persons with disabilities?"

2. Analysis

(a) Paragraph 1

Paragraph 1 of the analysis for Case #88 is not wrong; it is simply incomplete. The analysis should add a section discussing all applicable ADA requirements. In Case #88, the State Education Agency (SEA) administered the test in consultation with a private testing company. The testing company would be covered by Title III's requirements. If the teacher in Case #88 had requested auxiliary aids which would result in an undue burden, or would "fundamentally alter the measurement of the skills or knowledge the examination is intended to test," the company would not be required to provide such aids. 28 C.F.R. S 36.309(b)(3).

Meanwhile, the other entity presented in the case study, the State Education Association (SEA), appears to be a "department, agency,... or other instrumentality of a State," 42 U.S.C. S 12131(1)(B), and would thus be covered by Title II. As a state government entity, the SEA would be prohibited from discriminating against qualified individuals (those who meet essential eligibility requirements) in the granting of licenses or certification. Because the phrase "essential eligibility requirements" is taken from the definitions in the regulations implementing section 504, caselaw under 504 is applicable to its interpretation. It is therefore appropriate for the Case #88 analysis to retain a discussion of caselaw under section 504 -- so long it reflects recent developments in the law, as discussed

below.

(b) Paragraphs 2-4

The major problem with the text of paragraphs 2-4 in the Case #88 analysis is that it is based on a district court decision which was reversed on appeal. In Pandazides v. Virginia Board of Education, 946 F.2d 345 (4th Cir. 1991) (attached), the appellate court found that the district court had erred in concluding that the teacher with learning disabilities in Case #88 was not "otherwise qualified." The appellate court stated that the trial court had to do more than simply determine whether the teacher met all of the stipulated requirements of the Virginia Board of Education (one of which was passing a "communication skills" test) -- the court had to look to the actual requirements of the particular position sought. Thus, the appellate court held that the question of whether the teacher was "otherwise qualified" should involve two factual determinations: (1) whether the teacher could perform the

essential functions of a school teacher, and (2) whether the requirements imposed by the Board actually measured those functions. Moreover, the appellate court held that even if the lower court were to determine that the teacher could not perform her duties, it would have to determine whether modifications could be made to allow her to teach in any event.

Obviously, the appellate and district courts' legal analyses differ markedly, and paragraphs 2-4 in the analysis for Case #88 should be rewritten accordingly. Further, the new analysis should note that the results in Case #88 reflect the judgment of one judicial circuit only; other circuits' interpretation of section 504 may differ.1

B. Passing the Bar Examination With a Learning Disability: Case #89

The analysis for Case #89 suggests that bar examiners follow the recommendation of the National Conference on Bar Examiners and develop a "routine policy" with respect to test-takers with disabilities. This analysis should be rewritten to reflect the ADA's goal of individualized assessment. See preamble to Title II regulations (stating that ascertaining the accommodation needs of individual persons with disabilities will depend on the "individual needs" of that person.) (Preamble to Section 35.130, "General Prohibitions Against Discrimination"). Under the Title III regulations, the focus should be on the examination's measurement of the individual test-taker's skill or aptitude.

See 28 C.F.R. S 36.309(b)(1)(i) (a private entity offering an examination covered by the section must assure that the examination is selected and administered so as to best ensure that the examination accurately reflects an individual's aptitude or achievement level or other factor the examination purports to measure, rather than any impaired sensory, manual, or speaking skills.)

1 See, e.g., Wynne v. Tufts University School of Medicine, 932 F.2d 19 (1st Cir. 1991) (academic institution has statutory obligation to reasonably accommodate persons with disabilities unless it can prove accommodations would result in substantial alteration of the program, or would impose an undue burden); Taylor v. U.S. Postal Service, 946 F.2d 1214 (6th Cir. 1991) (whether individual meets the statutory definition of handicapped under the Act is best suited to a case-by-case analysis); Nathanson v. Medical College of Pennsylvania, 926 F.2d 1368 (3rd Cir. 1991) (stating that "reasonable accommodation" must be decided on a case-by-case basis, and holding there can be no summary judgment on Rehabilitation Act claim, where issue of material fact exists as to whether medical college had reason to know that student's condition was a handicap and whether college provided reasonable accommodation).

The other issue raised in Case #89 concerns documentation of a disability. The analysis should point out that examiners may require evidence that an applicant is entitled to modifications or aids, but requests for documentation must be reasonable and must be limited to the need for the modification or aid requested. Appropriate documentation might include a letter from a physician or other professional, or evidence of a prior diagnosis or accommodation, such as eligibility for a special education program. Preamble to Section 36.309, "Examinations and Courses."

In this connection, the analysis for Case #89 is remiss in suggesting that a person with a newly diagnosed disability who has never before received the benefit of modified testing practices or procedures has a less credible claim to such modifications. The question is whether the individual now qualifies as a "person with a disability" under the Act, and whether it is necessary to modify testing practices or procedures in order to accurately test the individual's skill or aptitude, and not his or her disability.

C. Testing individuals With Physical Disabilities: Case #90

The analysis for Case #90 shares an error common to all three case studies -- failing to use the ADA's analytical framework and terminology. More specifically, Case #90's analysis of the first individual, Karen, should focus on whether she is an individual with a disability for purposes of the Act, and whether modifications in testing policies, practices or procedures should have been provided to ensure that the exam reflected her aptitude and not her disability.

The issues raised by Case #90's second example are slightly different. The analysis states: "It is certainly easier for a school counselor not to have to request special accommodations and proctor the special administration, but failure to request special accommodations for this reason is not professional behavior." If the school were the entity offering the test, and the counselor knew of Paul's "history of need for special accommodation," the counselor's purposeful failure to advise Paul of his right to receive a special test administration would not only be unprofessional -- it might very well be illegal. In Case #90, however, it appears that an entity other than the school administered the college admissions test. Under those circumstances, the counselor may not have a direct legal duty to advise Paul of his right to receive appropriate modifications. Nevertheless, the analysis should be revised to reflect a considerably stronger duty on the part of the school counselor to advise Paul to receive testing modifications than as now stands.

The third example in Case #90 involves an individual who was provided alternative testing arrangements which featured numerous distractions. Such arrangements would be insufficient under the ADA. See 28 C.F.R. S 36.309(b)(4) (comparable conditions must be provided when alternative accessible arrangements are made).

I hope that this information has been helpful to you. If you have any questions, please contact Sheila M. Foran at (202) 616-2314.

Sincerely,

Philip L. Breen

The Honorable Joseph R. Biden, Jr.
United States Senate
221 Russell Senate Office Building
Washington, D.C. 20510

Dear Senator Biden:

This letter is in response to your inquiry on behalf of your constituent, Marsha Hitch, who has inquired whether the Americans with Disabilities Act (ADA) precludes her from excluding children with HIV or AIDS from her day care center.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or

obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

Title III of the ADA prohibits discrimination against persons with disabilities in public accommodations, including day care centers. HIV disease is specifically mentioned in the title III regulations as a disability within the meaning of the ADA. Thus, exclusion from a day care center on the basis of HIV is a violation of the ADA, unless the participation of such individual poses a direct threat (significant risk) to the health or safety of others that cannot be eliminated by a policy or procedural modification. Please note that under this exception an individual may be excluded on the basis of disability only if he or she poses a direct threat to others. Thus, a child with HIV may not be excluded from a day care center on the basis of the risk to that child of acquiring infections from other children.

cc: Records, Chrono, Wodatch, Novich, McDowney, FOIA, Library.
Udd:Novich:cong.biden.ltr

01-01084

Your constituent also expressed concern about admitting children infected with HIV because of a gap for HIV-related accidents in her insurance coverage. The title III regulations specifically prohibit public accommodations from excluding people with disabilities on the basis of limitations in insurance coverage.

Enclosed is a copy of the title III regulations. You may refer to Section 36.104 at page 35593 and pages 35548-35549;

Section 36.208 at pages 35595-35596 and 35560-35561; Section 36.212 at page 35596 and pages 35562-35563, where the regulatory provisions relating to the above discussion appear.

I hope this information will be useful to you in responding to your constituent.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

June 1, 1992

Senator Joseph Biden
221 Russell Senate Office
Washington DC, 20510

Dear Senator Biden,

I'm writing this letter in response to a phone call from your Washington office in April. The call was in regards to a preceding call I placed in February stating my concerns on Public Law 101-336 also known as The Disabilities Act which states under Title III, 7K that people with disabilities including HIV and AIDS Persons are to be permitted in Day Care.

My first concern is looking at HIV or AIDS as a disability. I am not qualified as a Medical Person to care for an HIV or AIDS infected child and do not understand why a child with a weak immune system should be subjected to such risk. Most illnesses are not known for 24-48 hours before the onset of infection. For example; strep throat, pneumonia, chicken pox, influenza and/or viruses (which can not be treated with most medications). This is not a risk free situation for an HIV or AIDS child.

My second concern arose when I tried to obtain Liability Insurance to cover my Day Care business should an AIDS related incident occur resulting in a law suit. All Insurance agents I contacted stated they would not cover such an incident because HIV and AIDS is classified under the Communicable Disease Clause. On one hand I have the Federal Government saying I must care for these children because it isn't a Communicable Disease and on the other hand the Insurance Companies say it is. Where does this leave me?

Thank you for taking time to listen to and investigate my concerns. I await your solution to this dilemma.

Sincerely,

Marsha Hitch
Director

JUL 31 1992

R.J. Dieter, D.P.M.
Portage Foot Clinic and Surgicenter
756 Portage Avenue
South Bend, Indiana 46616

Dear Dr. Dieter:

DIRECTOR
WODATCH This letter is in response to your correspondence requesting technical assistance with respect to the provisions of the
DATE Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide
DEPUTY technical assistance to individuals and entities that have rights
LIB or responsibilities under the Act. This letter provides informal guidance to assist you in understanding the ADA accessibility
DATE standards. However, this technical assistance does not constitute a determination by the Department of Justice of your rights or responsibilities under the ADA, and it is not binding
ORIGINATOR on the Department.
JOHANSEN
7/27/92 Your question deals with your obligations to provide access
DATE to your office, which is located in an older home. Specifically, you ask whether or not you must install a ramp. The ADA does not establish specific requirements regarding alterations that must be made to existing facilities for the purpose of accessibility, if alterations are not otherwise planned. It simply requires that places of public accommodation remove architectural and communication barriers to the extent that it is "readily achievable" to do so. Congress defined the term "readily achievable" to mean "easily accomplishable and able to be carried out without much difficulty or expense." If it is not readily achievable to remove barriers in an existing facility that is not otherwise being altered, then barrier removal is not required. However, if it is not possible to comply completely with the

cc: Records, Chrono, Wodatch, Bowen, Johansen, FOIA, Library
udd:mercado:policy.letters.certif:johansen.bowen.dieter

01-01087

accessibility specifications, title III provides that a public accommodation should comply to the extent that it is able to do so -- again without much difficulty or expense.

We are enclosing a copy of the title III regulations and direct your attention to section 36.304, Removal of Barriers.

I hope this information is helpful to you.

Sincerely,

L. Irene Bowen
Deputy Director
Office on the Americans with Disabilities Act
Civil Rights Division

T. 7-31-92

DJ 202-PL-225

JUL 31 1992

Mr. Steven John Fellman
Galland, Kharasch, Morse & Garfinkle, P.C.
Canal Square
1054 Thirty-First Street N.W.
Washington, D.C. 20007-4492

DIRECTOR Dear Mr. Fellman:
WODATCH

This is in response to your letter on behalf of your client,
DATE the National Association of Theatre Owners (NATO), regarding the application of the public accommodations sections of the Americans with Disabilities Act (ADA) to motion picture theaters.
SP COUNSEL Your letter specifically addressed three issues of concern to
PLB NATO: the elevator exemption as applied to mezzanines in theaters; aisle slopes of theater aisles not serving an
DATE accessible part of an accessible route; and line of sight as related to floor slope.

ORIGINATOR The ADA authorizes the Department of Justice to provide
LUSHER technical assistance to individuals and entities that are subject
7/13/92 to the Act. This letter provides informal guidance to assist you
DATE in understanding the ADA accessibility standards. However, this technical assistance does not constitute a legal interpretation of the application of the statute to NATO or theater owners and it is not binding on the Department.

In buildings that qualify for the elevator exemption, elevator access is not required to the mezzanine level of a movie theater. In addition, if the theater is part of a shopping center or shopping mall, and the theater mezzanine is not part of a floor level housing at least one sales or rental establishment, the mezzanine is not considered part of the shopping center or shopping mall, as defined in section 36.401(d)(1)(ii)(B) of the ADA title III regulations, and does not have to be accessible by elevator.

Section 4.33 of the ADA Accessibility Guidelines requires that wheelchair locations in movie theaters adjoin an accessible

route that also serves as a means of egress. Any aisle or portion of an aisle that serves as an accessible route to a

cc: Records, Chrono, Wodatch, Breen, Lusher, FOIA, Library
udd:mercado:policy.letters.certif:lusher.breen.fellman

wheelchair location must comply with all of the requirements in the ADA Accessibility Guidelines for accessible routes including 4.3 Accessible Route and 4.8 Ramps. Under circumstances where wheelchair seating will be located adjacent to a portion of an aisle that serves as an accessible means of egress, then other portions of that aisle and other aisles that do not serve the accessible wheelchair locations are not required to comply with the requirements for ramps. ADA does not specify the location of the accessible means of egress. Therefore, the accessible means of egress from wheelchair locations can be through the rear, the side, or the front of the theater.

We agree that further discussion of the exception to section 4.33.3 of the guidelines relating to sight lines would be appropriate. If you wish to arrange for a meeting on this issue, please contact Philip L. Breen, Special Legal Counsel, at (202) 616-7526.

Sincerely,

John L. Wodatch
Director
Office on the Americans with Disabilities Act

01-01090

July 6, 1992

Mr. Philip L. Breen
Civil Rights Division
Office on the American
with Disabilities Act
Department of Justice
P.O. Box 66118
Washington, D.C. 20035-6118

Dear Phil,

We are writing this letter on behalf of our client, the National Association of Theatre Owners (NATO). NATO has worked diligently to educate its members with regard to application of the public accommodations sections of the Americans with Disabilities Act to motion picture theatres. In this connection, the Association has published a special handbook for motion picture theatre operators explaining how the Act applies to them. Several questions have come up with regard to interpretations of the regulations issued by the Department of Justice. In order to properly answer these questions, NATO representatives have met with the staff of the Office on Americans with Disabilities Act of the Department of Justice. We have set forth below these questions and our understanding of the staff interpretations of the regulations.

1. The Elevator Exemption.
   In motion picture theatres, the projection booth is commonly located on a mezzanine level. This mezzanine level is not open to the public. No other stores, retail space, or other public accommodations are located on this mezzanine. It is

our understanding that theatres subject to the elevator exemption are not required to provide an elevator to this mezzanine/projection booth level. This is so if a theatre is an integrated part of a shopping center or is located in a free-standing building on the parking lot pad of a shopping center, or is on its own independent parcel of ground. Under Section 36.401(d)ii of the ADA regulations, if the theatre is in a shopping center and the mezzanine is not part of a floor level housing at least one retail establishment, the mezzanine is not considered part of the shopping center and does not have to be accessible by elevator.

2. Theatre Aisles Should Not be Classified as Ramps.
Under the regulations, a question has been raised as to whether theatre aisles with a slope greater than 1 in 20 must comply with the requirements for ramps and have a flat resting area every 30 feet. In discussing this issue, we reviewed the configurations of various theatres. In motion picture theatres, wheelchair seating will generally be located in one or more locations along the rear row of seats of the theatre. Such seating must be on an access route that also serves as an accessible means of egress as provide in 4.33.3. Under circumstances where wheelchair seating will be located adjacent to an aisle which is a designated means of egress and the exit will be through the rear of the auditorium into the lobby area, then other portions of that aisle and other aisles that do not serve the accessible wheelchair locations are not required to comply with the

requirements for ramps.

3. Floor Slope vs. Line of Sight - Section 4.33.3
During our discussions, we raised certain questions with regard to application of the exemption for wheelchair seating integration in those portions of an auditorium having sight lines that require slopes of greater than five percent. This is the exemption contained in the footnote to Section 4.33.3 of the ADAAG. We explained that architects and engineering firms that have worked with our industry and other industries have interpreted this exemption to refer to a five percent slope in the floor of the facility. You had indicated to us that there was some question with regard to this interpretation and that, in fact, the ATBCB's interpretation was that the language of the exemption referred to slope of the line of sight. As we explained, line of sight is usually considered in terms of degrees and not "slope" or "percent." Indeed, the degree of line of

sight will vary from seat to seat in a motion picture theatre and also vary from within any given seat to various portions of the screen. After reviewing these issues after our meetings and discussing the matter further with out experts, it is clear to us that the reference involved is to the slope of the floor rather than the line of sight. We would like to discuss this issue with you further if there are still open questions. We would be glad to set up a meeting at your convenience if it is necessary.

We would appreciate your confirming these understandings to us as soon as possible. We have several projects under construction where work may be delayed based on ADA questions. For your information we are attaching a copy of a letter sent to a NATO member by a shopping center developer wherein the NATO member has been asked to indemnify the shopping center developer because of potential liability in applying the elevator exemption.

We thank you for your continued cooperation and assistance.

Very truly yours,

Steven John Fellman

Re: Wheel Chair - Platform Lift

Dear Mr. Fellman:
Attached please find a letter directed to me from Arrowstreet, Inc. an architectural firm. They have been retained by Sarakreek USA, a developer and landowner to

draw a set of plans for a movie theatre, that when constructed, would be occupied by Cinemark USA under a lease agreement.

The theatre is a single level structure with high ceilings because it houses multiple auditoriums with screens in each. The exception to the single floor is the mezzanine area in which the projection machinery is located along with storage rooms, all of which are not public areas. The mezzanine does not serve as a pathway to or from any accessible areas since it is an equipment room. This is a free standing building next to an existing shopping center.

As a result of our meeting with the Justice Department on 3/26/92 and their subsequent verbal ruling on 3/27/92 that we would be exempt from elevator requirements I instructed Arrowsmith to delete the elevator.

The attached letter is self explanatory and is a perfect example of the dilemma we are faced with if we do not have written confirmation of the Justice Department's ruling. Time is of the essence and the amount of money in question on each project is sizable. Please let me know as soon as you have word on their position.

Thanking you in advance for your help and cooperation.

Sincerely,

CINEMARK USA, INC.

JUL 31 1992

The Honorable Martin Frost
Member, U.S. House of Representatives
NCNB Tower, Room 720
801 West Freeway
Grand Prairie, Texas 75051

Dear Congressman Frost:

This letter responds to your request on behalf of David L. Barber, Assistant City Attorney of Arlington, Texas, for

information about the interpretation of "service animal" under the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities with rights or obligations under the Act. This letter provides informal guidance to assist Mr. Barber in understanding the ADA. However, this technical assistance does not constitute a legal interpretation of the statute and it is not binding on the Department.

As Mr. Barber notes, section 36.302 of the regulation issued by the Department of Justice under title III of the ADA requires that places of public accommodation, such as restaurants, retail establishments, offices of service providers, and hotels, modify their policies, practices, or procedures to permit the use of a service animal by an individual with a disability. Section 36.104 of the regulation defines a "service animal" as an animal that is "individually trained to do work or perform tasks for the benefit of an individual with a disability . . . ." Section 36.301 of the title III regulation does, however, allow a public accommodation to impose eligibility criteria that are necessary for the provision of services and facilities. In particular, paragraph (b) of that section allows for the imposition of legitimate safety requirements that are necessary for safe operation of a facility or service. A copy of the title III regulation is enclosed.

cc: Records; Chrono; Wodatch; Bowen; McDowney; FOIA; Library.
:udd:jonessandra:cong.frost

01-01096

Mr. Barber inquires whether public accommodations can restrict the use of service animals to those that, along with their owners, have completed intensive individualized training in a specific area by an authority whose competence is recognized by rehabilitation agencies. Texas law defines "support dog" in this way.

The Department's ADA regulation does not require that an animal be certified by a State or have a permit nor does it allow a State or public accommodation to require proof of training or

certification. The Department is aware of a wide range of State regulatory definitions of service or support animal that are narrower than the ADA definition. While these definitions may be appropriate for State purposes, they cannot be used to narrow or eliminate the scope of the ADA's coverage.

Mr. Barber expresses several concerns about animal behavior, including the possibility that any animal trained only by its owner (or by a person not specially qualified) is more likely to attack another service animal or person. In our view, such behavior is generally at odds with the concept of an individually trained service animal. In addition, because the ADA allows a public accommodation to impose eligibility criteria, including legitimate safety requirements, a public accommodation could generally exclude from its facility any animal that displays the kind of behavior mentioned, regardless of the kind of training it has received and what function it serves for its owner.

I hope this information is helpful to you in responding to your constituent.

Sincerely,

John R. Dunne

GameTime

P.O. Box 121
101 Kingsberry Road
Fort Payne, Alabama 35967

Dear Mr. Mollet:

This is in response to your letter concerning requirements for playgrounds under the Americans with Disabilities Act (ADA).

Title II of the ADA covers playgrounds owned and operated by State and local government entities, and title III of the ADA covers playgrounds that are privately owned and operated.

Under title III, privately owned public accommodations and commercial facilities must design facilities in accordance with the title III accessibility guidelines, which appear as an appendix to the Department of Justice's title III rule. Under title II, public entities can choose to design facilities either in accordance with the title III guidelines or in accordance with the Uniform Federal Accessibility Standards. Neither of those standards, however, contains specific sections on playgrounds. Guidelines for recreational facilities are currently in the process of being developed by the Architectural and Transportation Barriers Compliance Board, an independent Federal agency. Until such time as those guidelines are finalized, playgrounds need not be built in compliance with any specific design standards.

I hope this information has been helpful to you.

Sincerely,

Stewart B. Oneglia

Washington, D.C. 20035-6118

Dear Ms. Oneglia:

I am writing to you for guidance and clarification of the A.D.A. regulations, especially as they pertain to playground and recreation equipment.

GameTime is one of the largest providers of park and playground equipment in the world. We have been developing and building playground equipment for over 63 years, with 5 years of this effort being devoted to developing playground events for the needs of disabled individuals. Obviously, we take a very keen interest in the need to provide accessibility to play events for as many children as is possible.

It is with great interest that I write to you to get clarification of the A.D.A. rules that have been issued. Specifically, GameTime would like to know what specific guidelines we have to build playground equipment to. We want to make sure that we are building the safest, most affordable play equipment possible.

Please feel free to contact me with any questions or ideas you might have. I may be reached at 1-800-633-2394 ext. 5251.

Sincerely,

Thomas S. Mollet
Director of Marketing

AUG 4 1992

The Honorable Thomas J. Bliley, Jr.
U.S. House of Representatives
2241 Rayburn House Office Building
Washington, D.C. 20515-4603

Dear Congressman Bliley:

This letter is in response to your inquiry on behalf of your constituent, Mrs. XX , concerning retirement homes that do not permit use of electric wheelchairs.

The letter from Mrs. (b)(6) provides insufficient information to enable us to determine what provisions of the ADA may apply to the circumstances in question. If Mrs. XX believes that her husband has been discriminated against on the basis of his disability she has two enforcement options under the ADA: (1) She may secure private legal representation and bring an action in Federal court, or (2) she may file a complaint with the Department of Justice.

If Mrs. (b)(6) chooses to file a complaint with the Department of Justice, she should send it to one of two offices of the Civil Rights Division assigned to investigate such complaints. If the nursing home is operated by a State or local government, she should send any relevant information to the Coordination and Review Section, Civil Rights Division, U.S. Department of Justice, P.O. Box 66118, Washington, D.C. 20035-6118. If, on the other hand, the nursing home is operated by a private entity, she should send any relevant information to the Office on the Americans with Disabilities Act, Civil Rights Division, U.S. Department of Justice, Post Office Box 66738, Washington, D.C. 20035-9998. All complaints should be in writing and should set forth, in as complete a manner as possible, the factual circumstances surrounding the complaint.

cc: Records, Chrono, Wodatch, Russo, Breen, McDowney, FOIA,
Library
Udd:Russo:Cong.Blilely

To provide some information about possibly relevant ADA provisions, I have enclosed copies of the Department's Technical Assistance Manuals. Discussion of requirements regarding eligibility criteria and reasonable modifications in policies, practices, and procedures may be found on pages 12-13 of the Title II Manual and pages 21-25 of the Title III Manual. We are also enclosing a copy of the ADA Handbook, which includes a copy of the Act (requested by Mrs. (b)(6) in section V(A).

I hope this information is of assistance to you in responding to your constituent.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

the letter to The
ADA office goes
to the attention
of Joe Russo

(b)(6)
XX

(handwritten)
She and her husband want to move into a retirement home. Her husband is a quadroplegic and uses an electric wheelchair. The retirement homes they visited will not allow electric wheelchairs. Isn't this discrimination against the handicap? She wants to know where her rights stand? What about the ADA.
She would like to get a copy of the ILLEGIBLE

01-01102

Congress of the United States
House of Representatives
Washington, DC 20515-4603
June 25, 1992

Mr. John Wodatch
Director
Office on the Americans With Disabilities Act
Department of Justice
P.O. Box 66738
Washington, D.C. 20035-9998

Dear Mr. Wodacth:

I am writing you on behalf of my constituent, Ms. (b)(6) XX She is concerned because she has been informed by a retirement home in Richmond that her husband would not be allowed to reside their due to the fact he operates an electric wheel chair.

Enclosed is a copy of Ms. XX request. I am aware that I am sending you few facts to go by in this case, but it is my hope that you would be able to explain to both Ms. (b)(6) and myself the laws surrounding matters such as this one.

I am looking forward to your response, and I thank you in advance.

With kindest regards, I am

Sincerely,

Thomas J. Bliley, Jr.
Member of Congress

01-01103

AUG 4 1992

The Honorable John A. Boehner
U. S. House of Representatives
1020 Longworth House Office Building
Washington, D.C. 20515

Dear Congressman Boehner:

This letter is written in response to your correspondence to Attorney General William Barr on behalf of your constituent, (b)(6), who alleges that he was discriminated against on the basis of his disability by Booth's Pharmacy.

Title III of the Americans with Disabilities Act of 1990 (ADA) prohibits sales establishments from excluding persons with disabilities from their facilities or from the benefits of their services. Persons who believe that they have been discriminated against on the basis of disability have two enforcement options under the ADA: (1) They may secure private legal representation and bring an action in federal district court, or (2) they may file a complaint with the U.S. Department of Justice.

If Mr. XX wishes to file a formal complaint with the Civil Rights Division, he should send any relevant information to the Office on the Americans with Disabilities Act, Civil Rights Division, U.S. Department of Justice, Post Office Box 66738, Washington, D.C. 20035-9998.

I hope this information is of assistance to you in responding to your constituent's complaint.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

The Americans with Disabilities Act

The Americans with Disabilities Act (ADA) gives civil rights protections to individuals with disabilities that are like those provided to individuals on the basis of race, sex, national origin, and religion. It guarantees equal opportunity for individuals with disabilities in employment, public accommodations, transportation, State and local government services, and telecommunications.

I. Employment

* Employers with 15 or more employees may not discriminate against qualified individuals with disabilities. For the first two years after July 26, 1992, the date when the employment provisions of the ADA go into effect, only employers with 25

or more employees are covered.

* Employers must reasonably accommodate the disabilities of qualified applicants or employees, unless an undue hardship would result.

* Employers may reject applicants or fire employees who pose a direct threat to the health or safety of other individuals in the workplace.

* Applicants and employees are not protected from personnel actions based on their current illegal use of drugs. Drug testing is not affected.

1

01-01107

* Employers may not discriminate against a qualified applicant or employee because of known disability of an individual with whom the applicant or employee is known to have a relationship or association.

* Religious organizations may give preference in employment to their own members and may require applicants and employees to conform to their religious tenets.

* Complaints may be filed with the Equal Employment Opportunity Commission. Available remedies include back pay and court orders to stop discrimination.

II. Public Accommodations

* Public accommodations such as restaurants, hotels, theaters, doctors' offices, pharmacies, retail stores, museums, libraries, parks, private schools, and day care centers, may not discriminate on the basis of disability, effective January 26, 1992. Private clubs and religious organizations are exempt.

* Reasonable changes in policies, practices, and procedures must be made to avoid discrimination.

* Auxiliary aids and services must be provided to individuals with vision or hearing impairments or other individuals with disabilities so that they can have an equal opportunity to participate or benefit, unless an undue burden would result.

AUG 6 1992

202-PL-00069

The Honorable Donald F. Munson
Senate of Maryland
28 West Church Street
Hagerstown, Maryland 21740-4808

Dear Senator Munson:

This letter responds to your correspondence regarding the

application of the Americans with Disabilities Act, 42 U.S.C. 12101-12213 (ADA) to the limited use of a golf cart on the shoulder of a public highway by an individual with a mobility impairment.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities with rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation, and it is not binding on the Department.

The regulations issued by the United States Department of Justice under title II of the ADA, provide that "[a] public entity shall make reasonable modifications in policies, practices, or procedures when the modifications are necessary to avoid discrimination on the basis of disability, unless the public entity can demonstrate that making the modifications would fundamentally alter the nature of the service, program, or activity." 28 C.F.R. S 35.130(b)(7).

Permitting the use of a golf cart as a mobility device on the shoulder of a public highway where pedestrians are permitted to walk, in limited circumstances that do not involve a significant risk to the health or safety of others, would be the type of modification in State policy contemplated by the cited portion of our title II regulation. Any assessment of significant risk must be based on objective evidence and not generalizations or stereotypes about individuals with disabilities.

cc: Records, Chrono, Wodatch, Breen, Beardta.202.munson, arthur

We hope that this information is useful to you in evaluating your constituent's rights under the ADA.

Sincerely,

John L. Wodatch
Director
Office on the Americans with Disabilities Act

01-01110

SENATE OF MARYLAND
ANNAPOLIS, MARYLAND 21401-1991

March 30, 1992

James D. Bennett, Director
Coordination and Review
Civil Rights Division
Department of Justice
320 First Street, N.W.
Washington, D.C. 20530

Re: American Disabilities Act

Dear Mr. Bennett:

This office has been contacted by a constituent in an effort to clarify a question with regard to the use of a golf cart, as a "temporary" mode of transportation, for a handicapped individual. The golf cart provides my constituent, who is paralyzed from the waist down, with some mobility, which he very much enjoys. Through the use of the golf cart, he is able to visit nearby neighbors and just simply enjoy the outdoors.

On occasion, my constituent, in order to go hunting, takes the golf cart on the shoulder of the road for a distance not to exceed a half mile. (The road is not heavily-travelled). Recognizing that this is not an acceptable practice with the State Police, I am wondering if, under the American Disabilities Act, my constituent's golf cart can be categorized as his "wheelchair". It is my understanding that, under the ADA, "wherever a pedestrian can go, a wheelchair can go." In this case, can the golf cart be used legally, for a short time, on the shoulder of the road, in lieu of the wheelchair?

Thank you for any clarification you can provide regarding this matter.

Very truly yours,

Donald F. Munson
Senator, District 2

DFM:jt
XX (b)(6)

01-01111

The Honorable William S. Cohen
United States Senate
322 Hart Senate Office Bldg.
Washington, D.C. 20510-1901
Dear Senator Cohen:

This letter is in response to your inquiry on behalf of Ms XX , who has expressed concerns about access to restaurants, housing, and common carriers by disabled individuals accompanied by trained assistance animals.

The ADA authorizes the Department of Justice to provide technical assistance to entities that have rights or obligations under the Act. This letter provides informal guidance regarding the ADA's requirements concerning service animals. This technical assistance, however, does not constitute a determination by the Department of Justice of rights or responsibilities under the ADA and does not constitute a binding determination by the Justice Department.

Under title III of the Americans with Disabilities Act (ADA) and section 36.302 of the regulation issued by the Department of Justice, a place of public accommodation, such as a restaurant, hotel, retail store, or theater, is required to modify its policies, practices, and procedures to accommodate the use of a service animal, unless doing so would result in a fundamental alteration or jeopardize the safe operation of the public accommodation. As defined in section 36.104 of the title III regulation, a service animal includes any animal individually trained to do work or perform tasks for the benefit of an individual with a disability. Service animals are not limited to animals that assist people with hearing or sight impairments, but also include those that otherwise assist individuals with disabilities, such as by providing minimal protection or rescue work, pulling a wheelchair, or retrieving dropped items.

cc: Records; Chrono; Wodatch; Barrett; McDowney; FOIA; Library.
:udd:barrett:cong.cohen

01-01408

Likewise, under the ADA regulation issued by the Department of Transportation (49 C.F.R. Part 37) for the provision of transportation services to individuals with disabilities by public and private entities, section 37.167(d) requires those entities to permit service animals to accompany individuals with disabilities in vehicles and facilities. The regulation defines the term "service animal" in the same manner as the Department's ADA regulation.

The Fair Housing Act (42 U.S.C. 3604(f)(3)(B)) prohibits discrimination against a renter or buyer on the basis of disability. Discrimination includes a refusal to make reasonable accommodations in rules, policies, practices, or services, when those accommodations may be necessary to afford a person with a disability equal opportunity to use and enjoy a place of residence. While the Fair Housing Act and the regulations issued by the Department of Housing and Urban Development do not specifically address service animals, it is likely that the Act would at times require that service animals be allowed in a housing facility in order to afford a disabled individual fair use and enjoyment of the facility.

I am enclosing the regulation issued by the Department of Justice for title III of the ADA, as well as the Department's title III Technical Assistance Manual. Information about this subject can be found at sections 36.104 and 36.302 of the regulation, pages 35554 and 35565 of the preamble, and section 4.2300 of the Manual. You may want to request further information from the Department of Housing and Urban Development's Office of Fair Housing, at 202-708-0404, or the Department of Transportation, at 202-366-9305 or 9306, about the regulations they have issued.

I hope the above information is helpful in addressing your constituent's concerns.

Sincerely,

John R. Dunne
. Assistant Attorney General
Civil Rights Division

Ms. Ann Colgrove
Director of Legislative Affairs
Equal Employment Opportunity Commission
1801 L Street, NW
Washington, D.C. 20570

Dear Ms. Colgrove:

Enclosed please find a copy of a letter from a constituent, Ms. XX of Portland, Maine, regarding the exclusion of certain disabled persons from laws that permit use of animals to assist the handicapped. As you can see, Ms. XX is concerned that disabled individuals who are not blind or hearing impaired, but nevertheless require assistance of trained animals for essential care, would not be permitted access to restaurants, housing and common carriers. I would appreciate receiving your comments on Ms. XX concerns.

I appreciate your help with this matter.

With best wishes, I am

Sincerely,
William S. Cohen
United States Senator

WSC:jkv
Enclosure
01-01410

Portland, ME 04101
May 20, 1992

Senator William Cohen
10 Moulton Street
Portland, ME 04101

Dear Senator Cohen:

We have reviewed the following rules and act as well as state rulings for disabled persons who have trained dogs assisting them in their day to day living:

H.R. 2245 dated May 7, 1991
H.R. 2278 dated June 26, 1991
Public Law 102 - 240 dated December 18, 1991

In summary, Public Law 102-240 does provide that as far as transportation carriers are concerned, trained animals that assist disabled indivduals are permitted to accompany them on common carrier transportation.

Present laws permit dogs trained to assist blind and hearing impaired individuals to accompany and stay with said individuals in housing, restaurants, and other businesses.

However, it is important to note that animals trained to provide specialized services for disabled individuals are not covered under federal ruling and Maine State Statutes.

In recent years, programs have started and are running to train and provide dogs and other animals to assist disabled individuals (who are not blind or hearing impaired) in their daily routine. Therefore, strong consideration should be given to ammending the present Federal and State rules including disabled individuals and their assisting animals under the same rules established for the blind and hearing impaired.
Additionally, it will solve embarrassing situations that occur while traveling interstate and within this state.
Thank you for your consideration and help in this matter.

Sincerely,
XX

01-01411

The Honorable Charles E. Grassley
United States Senate
135 Hart Senate Office Building
Washington, D.C. 20510-1501

Dear Senator Grassley:

This letter is in response to your inquiry about coverage (and exemptions) of the Americans with Disabilities Act of 1990.

The Americans with Disabilities Act of 1990 (ADA) authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituents in understanding the ADA's requirements. It does not, however, constitute a legal interpretation and it is not binding on the Department.

Title III of the ADA covers places of public accommodation, including restaurants and other establishments serving food or drink, as well as homeless shelters and other social service establishments. The only places of public accommodation specifically exempted from the coverage of title III of the ADA are private clubs and religious entities. These exemptions are set forth in section 36.104 of the enclosed title III regulations, at page 35594, and the accompanying analysis, at pages 35551 to 35555. Therefore, in the example raised by your letter, the charity soup kitchen would not be exempted from the requirements of title III of the ADA, unless the soup kitchen can be considered either a private club or religious entity.

In addition to these two specific exemptions, the ADA allows smaller public accommodations additional time to comply with the requirements of the ADA. Lawsuits may not be brought for

cc: Records, Chrono, Wodatch, Bowen, Nakata, McDowney, Library, FOIA

violations of the ADA that occurred before July 26, 1992, where the public accommodation has 25 or fewer employees and $1,000,000 or less in gross annual receipts. Lawsuits may not be brought for violations of the ADA that occur before January 26, 1993, where the public accommodation has 10 or fewer employees and $500,000 or less in gross annual receipts.

Even if a public accommodation is subject to the requirements of the ADA, the Act does provide limitations on renovations necessary to make a facility accessible. For instance, while a public accommodation must provide auxiliary aids or services, such as interpreters for people with hearing impairments in order to ensure that persons with disabilities have equal access to services, the public accommodation does not have to provide such aids or services if it would impose an undue burden. Furthermore, a public accommodation has to remove barriers to a facility only if such removal is readily achievable, that is, if it is easily accomplishable and can be carried out without too much difficulty or expense.

In addition to the requirement for barrier removal, the ADA requires that, if a public accommodation makes certain other alterations to existing places of public accommodations, the entity must ensure that, to the maximum extent feasible, the altered portions of the facility are readily accessible to and usable by individuals with disabilities. However, areas that are used only as work areas, which generally include kitchens, are subject only to the requirements affecting approach and entrance to, and exit from, the work area. While the accessibility requirements do not apply to the interior of the space, certain alterations within the kitchen may trigger additional requirements. The requirements relating generally to alterations are set forth in subpart D of the enclosed title III regulations, at pages 35599 to 35602, and the accompanying analysis, at pages 35574 to 35589.

I have also enclosed the Department's Title III Technical Assistance Manual, which may provide further assistance in understanding the scope of these limited exemptions and limitations to title III of the ADA. Relevant information may be found in sections 1.5000 to 1.6000, 4.3000, 4.4000, 6.0000, 7.3100, and 8.8000.

Title I of the ADA prohibits employment discrimination on the basis of disability but completely exempts employers with fewer than 15 employees. Even those with between 15 and 24 employees are not covered until July 26, 1994. Employers of 25

or more were covered by title I as of July 26, 1992. You may wish to contact the Equal Employment Opportunity Commission, at 1-800-669-EEOC, about title I and its exemptions.
01-01413

I hope this information will be useful to you and your constituents.

Sincerely,
John R. Dunne
Assistant Attorney General
Civil Rights Division

Charles E. Grassley
United States Senator

CEG/dl
01-01415

The Honorable Tom Harkin
United States Senator
210 Walnut Street
733 Federal Building
Des Moines, Iowa 50309

Attn: Denita Swenson

Dear Senator Harkin:

This letter is in response to your inquiry on behalf of Ms. Jean Samson of the Iowa Commission on Persons with Disabilities, who requested guidance on providing child care services to children with disabilities under the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to entities that have rights or responsibilities under the Act. This letter provides informal guidance to assist you in understanding how the ADA may apply to public or private entities. This technical assistance, however, does not constitute a determination by the Department of Justice of rights or responsibilities under the ADA and does not constitute a binding determination by the Justice Department.

Title II of the ADA covers public entities, which include any State or local government and any of its departments, agencies, or other instrumentalities. Title III covers public accommodations, which include day care centers.

The regulations issued by the Department of Justice under both title II and title III require that reasonable modifications must be made in policies, practices, and procedures to ensure that children with disabilities have equal opportunity and access to child care services. However, if the modification would fundamentally alter the nature of the child care service, the

modification is not required. (See the enclosed title II rule,
section 35.130, and the enclosed title III rule, section 36.302.)

cc: Records; Chrono; Wodatch; Barrett; McDowney; FOIA; Library.
:udd:barrett:cong.harkin.samson
01-01416

Section 35.130(b)(8) of the title II rule and section 36.301(a) of the title III rule prohibit the use of eligibility criteria that screen out an individual with a disability or any class of individuals with disabilities from fully and equally enjoying any services, unless the criteria can be shown to be necessary for the provision of the services, and section 36.301(b) of the title III rule allows the imposition of legitimate safety requirements necessary for the safe operation of a program. In addition, section 35.130 of the title II regulation and 36.301(c) of the title III regulation prohibit the charging of additional fees for services to children with disabilities when those services are necessary to achieve compliance with the ADA.

The provisions applying to these issues can be found at section 35.130 of the enclosed title II regulations and sections 36.301 and 36.302 of the enclosed title III regulation. In addition to the ADA regulations, I am also enclosing a copy of the Technical Assistance Manual for titles II and III, which should be of further assistance to Ms. Samson in evaluating this issue. It may be especially helpful for her to refer to II-3.0000, on General Requirements, beginning on page 9 of the title II manual, and III-4.0000, on Specific Requirements, beginning on page 21 of the title III manual.

I hope this information is helpful to you in responding to your constituent.

Sincerely,
John R. Dunne
Assistant Attorney General
Civil Rights Division

DATE: May 24, 1992

RE: Program Accessibility under ADA for Day Care Providers

Recently at an ADA presentation, a number of child care providers requested information on their requirements to provide program access to children diagnosed with behavioral disorders. There was concern that some child care facilities would be unable to adequately meet the needs of children. with behavior disorders.

A specific example was provided by a public school child care program, which had accepted a child with this diagnosis. The child care program indicated that this child required one on one supervision in order to provide the child a safe environment. The day care center indicated that the child would wander off if not carefully watched., as well as exhibit other serious safety violations. This day care facility had hired extra staff for the summer to work with this child but indicated that this could not continue indefinitely. The day care facility wanted to terminate their services with this child but were uncertain of their requirements under ADA.

The day care industry has asked for guidance on this issue and I would appreciate any information you could provide us in this area. I look forward to hearing from you.

A DIVISION OF THE DEPARTMENT OF HUMAN RIGHTS
01-01418

The Honorable Jim McCrery
Member, U.S. House of Representatives
621 Edwards Street
Shreveport, Louisiana 71101

Dear Congressman McCrery:

This letter is in response to your inquiry on behalf of your constituent, (b)(6), concerning the Americans with Disabilities Act's (ADA) requirements for barrier removal in retail establishments and the proper method of filing a complaint.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities with rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA accessibility standards. However, this technical assistance does not constitute a legal interpretation of the statute and it is not binding on the Department.

Title III of the ADA requires places of public accommodation, including retail establishments and department stores, to undertake readily achievable barrier removal to make the stores accessible to individuals with disabilities including those who use wheelchairs. These requirements are further explained in the enclosed Department of Justice title III regulations at 28 C.F.R. 36.304 and 36.305.

If Ms.XX(b)(6) believes that KMart's failure to widen the checkout lanes has resulted in her daughter being discriminated against on the basis of her disability she has two enforcement options under the ADA: (1) She may secure private legal representation and bring an action in Federal court, or (2) she may file a complaint with the Department of Justice.

If Ms. XX(b)(6) chooses to file a complaint with the Department of Justice, she should send any relevant information to the Office on the Americans with Disabilities Act, Civil Rights Division, U.S. Department of Justice, Post Office Box 66738,

Washington, D.C. 20035-9998. All complaints should be in writing and should set forth, in as complete a manner as possible, the factual circumstances surrounding the complaint.

cc: Records, Chrono, Wodatch, Bowen, Russo, McDowney, Library, FOIA

John R. Dunne
Assistant Attorney General
Civil Rights Division

Enclosure
01-01420

BENTON, LA 71006

July 1, 1992

Hon. Jim McCrery
United States Representative
621 Edwards Street
Shreveport, LA 71101

In re: (b)(6)

Dear Mr. McCrery:

I would like to call your attention to a situation that I am very concerned about in connection with the Americans with Disabilities Act. My daughter, XX is a disabled American, having been injured in October of 1991 and is now paralyzed and in a wheelchair. I have tried to become familiar with that Act and as I understand Title III as it covers existing "places of public accomodation", the alterations to a facility after January 26, 1992 shall be made so as to ensure that to the maximum extent feasible the altered portions of the facility are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

I have also read about the penalties for noncompliance. It is my understanding that civil actions may be brought by individuals who have been subjected to discrimination or who have reasonable grounds for believing that he/she is "about to be subjected to" discrimination. It is my understanding that the courts may grant injunctive relief, award monetary damages as well as assess civil penalties to the person aggrieved.

My daughter's situation involves the KMart store located at 3045 East Texas in Bossier City, Louisiana. I have shopped at Kmart for many years. Since XX accident, I have tried, even when I am alone, to only go to and buy from stores whose facilities are easily accessible for handicapped/disabled people. Recently, (b)(6) and I went shopping at Kmart and when we were ready to go to pay for the merchandise, the space between the "check-out stands" was not wide enough for her wheelchair to go through. She had to hand me her merchandise and money to pay for her and she had to back out of the line and go to the front of the store to wait for me to pay. I have visited Kmart on two occasions since that time, the last time being approximately one week ago.
01-01421

On the first occasion, I only complained to the person checking me out. On the last occasion, I asked the manager if he knew he was in violation of the law. He said yes. I asked him why no provisions had been made for a person who comes into the store to shop, but cannot pay for his/her purchases. He said he knew it should have been done, but he had no real explanation as to why it had not been done. I further asked him if he thought my daughter was the only person in Caddo/Bossier Parish in a wheelchair. He acknowledged that was doubtful.

I have read several articles lately commending the national Kmart and other corporations for utilizing disabled people in the "mainstream" of their advertising. This was presented as a very positive step for disabled people. I therefore find it baffling that this local Kmart does not even have provisions for a disabled person to pay for their purchases, especially when they are knowingly in violation of Title III of the ADA.

I am asking for your assistance in providing me with the person or agency to contact to file a complaint against Kmart. I certainly appreciate your assistance in this matter. Since my daughter is of the opinion that her disabilities should not stop her from going to college next year, living alone, driving a car, participating in a beauty pageant, and generally doing whatever she wants to do, it is especially distressing to me that simple steps cannot be taken by a major corporation to accomodate her and others who have to use wheelchairs.

I will look forward to hearing from you or your representative regarding this request. Thank you for your assistance in this matter.

Yours very truly,
XX
/frc
cc: Manager - KMart, Bossier City
Mr. William H. Ledbetter, Jr.
Ms. Jan Elkins - KTBS TV
Kmart - Troy, Michigan
01-01422

The Honorable Christopher Shays
Member, U.S. House of Representatives
10 Middle Street
Bridgeport, Connecticut 06604

Dear Congressman Shays:

This letter is in response to your inquiry on behalf of your constituent, Allan Davis, who is seeking clarification of parking space requirements for a hospital outpatient facility under the Americans with Disabilities Act (ADA) as the result of our response to an earlier inquiry from Mr. Davis.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities with rights or obligations under the Act. This letter provides informal guidance to assist you and your constituent in understanding the ADA accessibility standards. However, this technical assistance does not constitute a legal interpretation of the statute and it is not binding on the Department.

Mr. Davis has asked for clarification of the requirements for the number of accessible parking spaces that must be provided under the ADA. Section 4.1.2(5)(d) of the ADA accessibility guidelines (page 35612 of the enclosed ADA title III regulation) applies to hospital outpatient facilities. In general, the section requires that "facilities providing medical care and other services for persons with mobility impairments" must have the number of accessible spaces set forth in a table included in the Guidelines. This section does not apply only to facilities that exclusively serve individuals with mobility impairments. To the contrary, it applies to any medical care facility that provides service to individuals with mobility impairments along with other members of the general public.

cc: Records; Chrono; Wodatch; Breen; Harland; McDowney;
FOIA; Library.
:udd:breen:parking
01-01423

The section includes a specific requirement (in lieu of the table requirements) for outpatient units and facilities that 10 percent of the total number of parking spaces be accessible. In the case of a hospital outpatient facility, the 10 percent requirement would only apply to that proportion of total parking use attributable to the outpatient facility. In addition, if a hospital outpatient facility specializes in services for individuals with mobility impairments, the Guidelines specify a 20 percent requirement in lieu of the table requirements. The 20 percent requirement would only apply to that proportion of a facility's parking use that is attributable to the provision of specialized services.

Mr. Davis is also concerned that people with mobility impairments may not be legally entitled to park in accessible places. This is highly unlikely because it is common practice for States, including Connecticut, to issue accessible parking permits to anyone who has need for accessible parking including those persons who may be only temporarily disabled.

Mr. Davis also seeks clarification of the requirement for accessible routes to parking. In general, an "accessible route," as defined in 3.5 of the Guidelines, may not include a vehicular way. The area behind parked cars in a parking garage, however, may be used as part of an accessible route, if it meets the definition of "marked crossing" under 3.5 of the Guidelines.

I hope that his information is useful in responding to your constituent.

Sincerely,
John R. Dunne
Assistant Attorney General
Civil Rights Division

01-01424

The Honorable Tom Harkin
United States Senate
531 Senate Hart Building
Washington, D.C. 20510-6025

Dear Senator Harkin:

This letter is in response to your inquiry on behalf of your constituent, Lynn Ferrell, who seeks information about the application of the Americans with Disabilities Act (ADA) to a privately owned social services organization providing small group homes for persons with mental disabilities.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

According to Ms. Ferrell's description, Polk County Health Services (PCHS) plans to house persons with mental disabilities in small group homes, located in existing houses that it will purchase. PCHS has informed us that it is a private non-profit organization. At present, the organization plans to make six out of its nine homes accessible because it has identified participants from six homes who will need wheelchair accessibility. Because of questions raised by the State of Iowa, Ms. Ferrell asks whether renovation of the six homes will satisfy ADA requirements.

The requirements of title III of the ADA apply to a private entity operating a place of public accommodation. Title III defines a place of public accommodation as a facility that is privately owned, affects commerce, and fits into one of twelve categories. Strictly residential facilities are not included in

cc: Records; Chrono; Wodatch; Novich; McDowney; FOIA; Library.
:udd:novich:cong.harkin.ltr5
01-01425

this list and are not covered by title III. If the PCHS homes are strictly residential, they will not be covered by title III of the ADA. The PCHS homes may, however, be covered by title III if they are social service center establishments. Facilities are considered social service center establishments under the ADA if they provide a significant level of such social services as medical care, meals, transportation, and counseling.

Title III requires that a public accommodation remove architectural barriers to access to existing facilities where their removal is readily achievable. "Readily achievable" means easily accomplished and able to be done without significant difficulty or expense. If each group home is considered a social service center establishment, then title III requires that each one be made accessible to the extent that it is readily achievable to do so. Discussion of these provisions, including the factors to be considered, can be found at pages 35553-54 of the enclosed title III regulation, and at pages 28-32 of the enclosed Title III Technical Assistance Manual.

Ms. Ferrell's letter describes the group homes as ICF/MR facilities. If so, they may be part of a State or local government program and may, as a result, have to consider accessibility issues because of this relationship. Title II of the ADA prohibits discrimination on the basis of disability by State and local governments. If the State of Iowa contracts with private entities for the provision of services, the State must ensure that the contract activities are carried out in a way consistent with the State's title II responsibilities. This principle is set out in sections 35.102(a) and 35.130(b) of the title II regulation and further explained in the preamble to the Department's regulation at page 35696 (first column). Title II and the regulation adopt the principles established under section 504 of the Rehabilitation Act of 1973, as amended, which applies to programs and activities receiving Federal financial assistance.

If the PCHS group homes are part of a State program, your constituent should consider sections 35.149 and 35.150 of the title II regulation, which requires the provision of "program access," which means that the program, when viewed as a whole, must be accessible to qualified persons with disabilities. Achieving program access does not necessarily entail making all facilities used in the program accessible. In addition, sections 35.130(d) and (e) require the government entity to administer services, programs, and activities in the most integrated setting appropropriate to the needs of qualified individuals with

disabilities.
01-01426

Relevant information may also be found in 35.130, 35.149, 35.150, and 35.151 of the enclosed title II regulation and 36.104, 36.203, 36.304, 36.305, and 36.402 of the enclosed title III regulation.

I hope this information is helpful to you in responding to your constituent.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

Ms. Denita Swenson
Office of Senator Tom Harkin
Federal Building
210 Walnut
Des Moines, IA 50309

Dear Denita:

This letter is a follow-up to the telephone conversation you had with Karen Walters of our staff regarding the development of nine four bed ICF/MR facilities. PCHS will be purchasing existing family homes in the community to house those 36 individuals.

At the present time, all 36 persons have been identified for admission to the homes, and we already have an extensive waiting list. By identifying the individuals before the purchase of the homes, we can better identify the needs of the individuals and the adaptations needed for each home. We are projecting that six of the nine homes will be made wheelchair accessible. The reason for this is that the individuals identified for the three homes do not need a fully accessible home at the present time, and it is very costly (estimate of approximately $15,000 to renovate a home for full accessibility). By renovating six homes out of the nine we feel we will have many options if persons will need a wheelchair accessible home in the future. Also if a person in a non-handicap accessible home needs adaptations in the future, we can make further renovations or find a more appropriate living environment.

Some persons with the State of Iowa have questioned whether our plan will comply with requirements of the Americans with Disabilities Act. We believe we will meet ADA requirements, but some sort of written clarification would be very much appreciated.

Thank you for your consideration of this matter. If you have any further questions, please feel free to contact me.

Sincerely,
Lynn D. Ferrell

Executive Director

T. 8/19/92
SBO:LMS:kgf
DJ# 192-180-09673
The Honorable Doug Bereuter
U.S. House of Representatives
2348 Rayburn House Office Building
Washington, D.C.20515-2701

Dear Congressman Bereuter:

This letter responds to your inquiry concerning compliance with the Americans With Disabilities Act (ADA) by public and private schools in the State of Nebraska.

The ADA authorizes the Department of Justice to provide technical assistance to entities subject to the Act. This letter provides informal guidance with regard to the questions you have posed, but does not constitute a determination by the Department of Justice of rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

Your specific questions and our responses are as follows:

1. Must every area of an existing school facility be made accessible to an individual with a disability?

Section 35.149 of the enclosed title II regulation requires accessibility to programs, services, and activities in facilities existing on the effective date of the statute, January 26, 1992. The principal focus of the program accessibility standard is access to programs, services, and activities, as opposed to access to physical structures. Therefore, not every area of an existing school facility would have to be made accessible, as long as there is access to a school's programs, services, or activities. You may refer to II-5.1000, pages 19-20, of the enclosed Title II Technical Assistance Manual for further discussion.

In addition, section 35.150(b)(1) of the title II regulation

does not require that a school district eliminate structural barriers if it provides access to its programs through alternative methods. You may refer to II-5.2000, page 20, of the Manual for further discussion of alternatives for making a program accessible.

:udd:stewart:bereut.dr5
cc: Records, CRS, Friedlander, Stewart, McDowney, Breen
01-01429

Even if structural alterations are necessary to provide program accessibility, section 35.150(a)(3) states that a public entity is not required to alter its facilities if it can demonstrate that the alterations would cause a fundamental change to its program or that the cost of the alterations would result in undue financial and administrative burdens. These limitations are discussed in II-5.1000, pages 19-20, of the Manual.

As you may know, many Nebraska public school districts have been required to comply with section 504 of the Rehabilitation Act, which prohibits discrimination on the basis of handicap, since 1973, because they receive Federal financial assistance. Since Title II of the ADA merely extended section 504's program accessibility requirements to all programs, services, and activities of a State or local government, title II should impose few added burdens on Nebraska public school districts subject to section 504.

2. Does the term "qualified individual with a disability" apply to students only, or does it apply to visitors? For example, could a grandparent wishing to visit the school sue because of lack of access?

Section 35.104 defines a "qualified individual with a disability" as "an individual with a disability who ... meets the essential eligibility requirements for the receipt of services or participation in programs or activities provided by the public entity." With respect to those qualified to participate in a school district's programs, the preamble to the title II regulation states at page 35696 that "[p]ublic school systems must comply with the ADA in all of their services, programs, or activities, including those that are open to parents or to the public." Therefore, if a public school's programs are open to visitors, access must be provided to them if they are individuals with disabilities.

3. Do the regulations apply to private schools in the same manner as public schools?

As places of public accommodation, private schools are subject to the requirements of title III of the ADA (not title II, which applies to public schools) and the Department's title III regulation. Different standards apply under title III than under title II. For example, under the title III regulation, a private school must remove barriers to accessibility where such removal is "readily achievable."

4. At what point must a school district without a disabled student comply? When a disabled student enters the district or within a certain time frame

after the January 26, 1992, date when structural barriers regulations went into effect?

Under title II, a school district must provide access to its programs, services, and activities after January 26, 1992. Under section 35.150(d) of the title II regulation, a school district with fifty or more employees that identifies structural barriers to program access must develop a transition plan by July 26, 1992. Please refer to II-8.3000, page 43-44, of the Manual for further discussion of the requirements for a transition plan. In addition, section 35.105 requires a school district to conduct a self-evaluation of its current services, policies, and practices and modify those services, policies, and practices that do not comply with the Department's title II regulation. The self-evaluation requirements are discussed in II-8.2000, pages 40-43, of the Manual.

5. Nebraska has many school districts which contain only a one-room elementary school house. Many of these are not accessible to individuals with disabilities; however, there are no disabled students in those districts. How far must these schools go to comply with the ADA? Must they install chair lifts? Must they discontinue classes in their basements? Again, would the level of compliance be different for students and visitors?

Consistent with a longstanding interpretation of section 504 of the Rehabilitation Act by the former Department of Health, Education, and Welfare, (copy enclosed) the apparent lack of individuals with disabilities in a school district's service area does not excuse the school district from taking whatever appropriate steps are necessary to ensure that its programs, services, and activities are accessible to qualified individuals with disabilities. Section 501(a) of the ADA states that the ADA is not to be interpreted as providing a lesser standard than that provided under the Rehabilitation Act. Thus, title II would require that steps be taken even if there are no disabled students in a district.

I hope this information is responsive to your inquiry.

Sincerely,
John R. Dunne
Assistant Attorney General
Civil Rights Division

Civil Rights Division
U.S. Department of Justice
P.O. Box 66118
Washington, D.C. 20035-6118

Dear Ms. Oneglia:

I have recently been contacted by several school board representatives in my Congressional District regarding compliance with the Americans with Disabilities Act. Their questions particularly pertain to structural compliance in existing school facilities.

It would seem the recommendations they are receiving from the Nebraska Department of Education go above and beyond the intent of Congress and, from my understanding, the regulations set forth by the Department of Justice. I have listed several of the questions they have raised and would ask you to please respond.

1. Must every area of an existing school facility be made accessible to an individual with a disability?

2. Does the term "qualified individual with a disability" apply to students only, or does it also apply to visitors? For example, could a grandparent wishing to visit the school sue because of lack of access?

3. Do the regulations apply to private schools in the same manner as public schools?

4. At what point must a school district without a disabled student comply? When a disabled student enters the district or within a certain time frame after the January 26, 1992, date when the

structural barriers regulations went into effect?

5. Nebraska has many school districts which contain only a one-room elementary school house. Many of these buildings are not accessible to individuals with disabilities; however, there are no disabled students in those districts. How far must these schools go to comply with the ADA? Must they install chair lifts? Must they discontinue classes in their basements? Again, would the level of compliance be different for students and visitors?

01-01432

I would greatly appreciate an expedient reply to my inquiry. Many school districts in my Congressional District are preparing to spend tens of thousands of dollars in what I am concerned may be unnecessary compliance measures.

Thank you for your consideration of this matter.

Best wishes,
DOUG BEREUTER

Washington, D.C. 20515

ATTN: Ms. Kelly Hughes

Dear Congressman Emerson:

This letter responds to your request for information about the Americans with Disabilities Act (ADA) on behalf of Missouri State Senator Jerry Howard.

The concerns expressed in Senator Howard's letter and the attachments appear to be based on some misconceptions about the requirements of the ADA for existing facilities. As explained in II-6.1000 (page 23 of the enclosed Title II Technical Assistance Manual), title II, which covers State and local governments, does establish strict accessibility requirements for new construction and alterations. However, these requirements do not apply to existing buildings.

Under title II, a public entity must provide program access to its services, programs, and activities. This requirement does not necessarily mean that all existing facilities must be accessible, but does require that the program, when viewed in its entirety, must be accessible to and usable by individuals with disabilities. The Title II Technical Assistance Manual includes further discussion of program accessibility on pages 19-22.

The attachment to Senator Howard's letter also refers to renovation requirements applicable to businesses. As explained on pages 28-32 in the Department's Title III Technical Assistance Manual (enclosed), title III of the ADA, which applies to public accommodations and commercial facilities, requires that structural barriers in existing places of public accommodation be removed, but only if the removal is "readily achievable." Commercial facilities, such as office buildings, are not subject

cc: Records, CRS, FOIA, Friedlander 3, Kaltenborn, McDowney
udd:kaltenborn:emerson
01-01434

to the requirement for readily achievable barrier removal, but, like places of public accommodation, are subject to the accessibility requirements for new construction and alterations as discussed on pages 43-44 of the Manual.

I hope that this information clarifies the requirements of the ADA and is helpful in responding to Senator Howard.

Sincerely,
John R. Dunne
Assistant Attorney General

January 8, 1992

The Honorable Bill Emerson
United States House of Representatives
418 Canon Office Building
Washington, D.C. 20515

Dear Bill:

Each of us care about handicapped persons. Their talents, skills and intelligence should never be wasted. We always try to accommodate each person whenever possible. Although good intentions are at the root of the Americans with Disabilities Act, this new law may create disastrous situations for our governments and businesses.

Missouri's state government is facing a serious budget crisis. The state cannot continue to support existing programs. The mentally ill, the poor and our children are already suffering because falling revenues have led to painful budget cuts. Many of our schools have pinched pennies for years, while some districts are now confronting bankruptcy. Federal court desegregation decisions have tapped even more money away from our schools across the state, and court challenges exist as to equity of our school formula and the equity of the desegregation order.

Mandated changes from the Americans with Disabilities Act (ADA) will force the state to spend more in the midst of this terrible financial crisis. Currently the state pays $26 million for buildings rented throughout Missouri. ADA required construction changes will increase the cost of our leases to an estimated $80 million a year. An increase of that proportion would be disastrous. New state owned buildings such as the Truman

Building and the Secretary of States newly constructed Information Center will not be in compliance with the latest standards from ADA. Bathrooms, ramps and doors will have to be remodeled. New carpets that meet current standards will have to be ripped out and replaced with 30 pound carpets. Sadly, we have already built or modified existing buildings to comply with current standards. Now ADA will change those standards. To remain within this new federal law the state may have to spend hundreds of millions of dollars to reach extraordinary demands. Our Social Services building in Sikeston alone was rebid. An estimated $800,000 in construction and remodeling costs ensued. This increase was caused by moving to

a new building to meet specifications. Rent on this building has risen from a bid of $6,700 per month to $12,000 per month.

Our financially strapped schools, cities and counties will also have to pay for altering conditions to exceed those a disabled person may enjoy in his or her own home.

The impact on our businesses, along with the jobs they provide, will be substantial. Major corporations such as General Motors and IBM are laying off employees in huge numbers. Brown Shoe Company has closed two facilities in Southeast Missouri alone. Now, during a deep recession, the federal government is going to demand that any enterprise must spend enormous amounts of money on new construction or face penalties and law suits. Anyone can be fined as much as $100,000 just because a parking space fails to meet minimum ADA size requirements. We should not force businesses to attain standards that are so extraordinary.

The ADA will also mean increased exposure to law suits for businesses. Large scale industries may be better prepared to handle the rising costs of liability and legal fees, but the existence of small businesses may be threatened by new vulnerability to litigation. Small business owners will certainly be angry once they learn about the costly alterations and potential liabilities that ADA will create.

People have committed themselves to improvements that would help the handicapped. Achieving previous standards has always been a goal of state government and the business community. Millions of dollars have been spent to make our offices, factories and stores accessible to the disabled. Now ADA will erase any value of those previous efforts. One small example is the Missouri state Probation and Parole building in Kennett, Missouri. Five years ago ramps were constructed because of legal requirements. With ADA, those ramps will have to be replaced.

The same stability that government should lend to the economicprocess is eliminated. Contracts and rental agreements were designed with long term obligations in mind. Such agreements cannot remain unchanged if major construction changes are mandated. It becomes far more difficult to plan for capital investments and anticipate fixed costs.

If ADA has its full impact, who can say what rule changes or new laws might lie ahead. It is completely unreasonable to assume that people can depend on ADA becoming the last word on this issue. Everyone has prepared as though previous laws and regulations would be more lasting. Once again, more money will be bled away to pay for a change today that will be meaningless tomorrow.

I have also included information from others about the implications of the ADA with this letter.

My request is that something be done to phase in the ADA over a long period of time. If this is not possible, the law should be significantly amended so that the practical needs of the entire nation are met, while addressing the needs of the disabled. Without a significant change, Missourians will suffer from greater budget cuts and weakened businesses. Thank you for your efforts to prevent this end.

Very truly yours,

Jerry T. Howard
State Senator

January 7, 1992
Senator Jerry Howard
Missouri State Senate
Jefferson, City, Missouri

Dear Senator Howard:
Fax Message 1-75l-2230

Reference: Federal Register Friday july 26, 1991
Non-discrimination on the basis of Dis-
ability by Public Accommodation and
Commercial Facilities.

I just received my copy of the new law last Friday, when I meet with the staff from Design & Construction to inspect two new offices buildings, that were occupied in July and August of last year. According to the new law, a number of items will not now meet the new law.

These buildings were bid, and built, according to the specifications given us by the state at that time, one is a 5 year lease, and the other a 10 year lease. They were bid on a firm fixed price for the term of the lease.

This new law is going to be DEVASTATING for small business like ourselves that have no recourse, and have to go back and make changes to comply with a new law. It is also going to place an equally burden on Cities, Counties, and the State. Many of the buildings are Handicap accessible, but will not meet the new law, this is going to be an added expense, with really little or no benefit.

We built a new office building in Kennett 5 years ago for Probation & parole to the States specifications, and it was Handicap accessible. When the lease come up for re-new last year, it would not technically meet the law, so we tore out the walk, and re-did it, now 3 months later it will not meet the law again. This is ridiculous, since the building was Handicap accessible to start with, this building should have been "Grandfathered" and us spending our time, energy, and money on something that does not comply. This was an added expense to the owner, with no re-course, and if their was some re-course, it would have been added expense to the State with no real benefit to anyone. In this case it just happened to be a Probation & Parole office, which is just one more example of the "Criminals" having more rights than the average citizen and Tax payer of this country.

01-01440

Senator Jerry Howard 1/9/92

As per your request, I have assembled a reasonable assumption, based on the State's own information, of lease expenditures yearly. Projections are based on past history of known inflationary items, construction costs, insurances, utilities, etc.

From information received, from the Assistant Director of Design and Construction, the State is currently spending in excess of 25,000,000 yearly, for approximately 3,000,000 sq. ft. of leased buildings. This figure exactly doubles the figures I had given you previously. Let's chart these figures out and see what will be spent in the next 20 years.

1st 5 year lease period ---------- $125,000,000
2nd 5 year lease period -(50% increase)-$187,500,000
3rd 5 year lease period -(same)------$281,250,000
4th 5 year lease period -(same)------$421,875,000
$1,015,625,000

The 50% increase in lease costs shown, in 5 year increments, is a reasonable assumption based on the last 5 to 10 years.

If you would divide the known 3,000,000 sq. ft. of leased property, by 114 counties, the average would be 26,000 sq. ft. per county. Current known construction costs for this type building would run approximately $50.00 per sq. ft., for normal office type construction. Total cost per building would run approximately $1,300,000, including parking, and misc. Multiply this times 114 counties, for a total cost of $150,000,000. Pay for it in five years, like they are doing anyway with leased buildings, or pay for them in twenty years with conventional financing. Look at the cost savings to the taxpayers.

Look at all the money that could then be diverted, back towards education, health care, ect. Wouldn't that be a shot in the arm.

Jerry, I had mentioned that I had a copy of the new Americans With Disabilities Act, here on my desk. I'm really not too surprised with it, since it seems now the minorities seem to have more rights now than the majorities. (Their's are written down and Federally mandated.)

One item worth mentioning, no longer are we required to just furnish a low handicapped water fountain, but will have to furnish a water fountain taller than normal as

01-01441
AUG 21 1992
The Honorable Connie Mack
United States Senator
1342 Colonial Boulevard
Suite 27
Fort Myers, Florida 33907

Attn: Helen Bina

Dear Senator Mack:

This letter responds to your correspondence on behalf of your constituent, XX, concerning the Americans with Disabilities Act (ADA) and his experience at Joe Robbie Stadium.

Title III of the ADA bans discrimination by places of public accommodation, including stadiums and concert halls. The ADA requires that those entities remove barriers to access by individuals with disabilities, including those who use wheelchairs, to the extent that removing the barriers is readily

achievable. The title III regulation issued by the Department of Justice (enclosed) requires that wheelchair seating be dispersed throughout seating areas in places of assembly to the extent that doing so is readily achievable. These requirements are further explained in the title III regulation in sections 36.304-36.305 and 36.308.

If Mr. XX believes that Joe Robbie Stadium, Genesis, TicketMaster, and the Sound Shop's actions resulted in discrimination on the basis of his disability, he has two enforcement options under the ADA: (1) He may secure private legal representation and bring an action in Federal court, or (2) he may file a complaint with the Department of Justice.

To file a complaint with the Department of Justice, XX should send all relevant information to the Office on the Americans with Disabilities Act, Civil Rights Division, U.S. Department of Justice, Post Office Box 66738, Washington, D.C.

cc: Records; Chrono; Wodatch; Russo; McDowney; FOIA; Library
:udd:russo:cong.mack. (b)(6)
01-01442

20035-9998. All complaints should be in writing and should set forth, in as complete a manner as possible, the factual circumstances surrounding the complaint.

I hope this information is of assistance to you in responding to your constituent.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

AUG 21, 1992

The Honorable Richard Shelby
United States Senate
313 Hart Senate Building
Washington, D.C. 20510-0103

Dear Senator Shelby:

This letter responds to your recent inquiry on behalf ofyour constituent, XX(b)(6).

Mr. XX(b)(6) states that his employment was terminated on March 4, 1992, by a food store in Dora, Alabama, based on his disability. Title I of the Americans With Disabilities Act, which prohibits discrimination by employers with twenty-five or more employees, became effective on July 26, 1992. As the alleged act of discrimination occurred prior to title I's effective date, Mr. XX(b)(6) allegations would not be covered by that title.

Apparently, Mr. XX(b)(6) is also alleging that the store where he was employed is a Federal contractor, and thus, subject to section 503 of the Rehabilitation Act of 1973, as amended, which prohibits discrimination on the basis of handicap by Federal contractors. Section 503 is enforced by the Office of Federal Contract Compliance Programs, Department of Labor. As the enclosed letter reflects, we have forwarded XX(b)(6) correspondence to that office for review and, if necessary, appropriate action.

I hope this information will assist you in responding to your constituent's inquiry.

Sincerely,
John R. Dunne
Assistant Attorney General
Civil Rights Division

Mr. Jaime Ramon, Director
Office of Federal Contract
Compliance Programs (b)(6)
Department of Labor
200 Constitution Avenue, N.W.
Washington, D.C. 20210

Dear Mr. Ramon:

Enclosed is correspondence that was sent to this office by Senator Richard Shelby concerning Mr. XXXXXX of Birmingham, Alabama.

In his letter to Senator Shelby, Mr. XXXXXX states that his employment was terminated on March 4, 1992, by a food store in Dora, Alabama, based on his disability. Apparently, Mr. XXXXXX is alleging that the store where he was employed is a Federal contractor, and thus, subject to section 503 of the Rehabilitation Act of 1973, as amended, which prohibits discrimination on the basis of handicap by Federal contractors.

We are forwarding Mr. XXXXXX correspondence to your office for review and, if necessary, appropriate action.

Sincerely,

Stewart B. Oneglia
Chief
Coordination and Review Section
Civil Rights Division

(b)(6)
Birmingham, Alabama XX

July 9, 1992

The Honorable Richard Shelby
United States Senate
321 Federal Building
1800 5th Avenue North
Birmingham, Alabama 35203

Dear Senator Shelby:

I am respectfully requesting your assistance in obtaining a written determination from the Justice Department, or whomever, for myself and for my attorney, as to my status in relationship to the American Disabilities Act and to the 1988 Revision of Title 29 of the United States Labor Code. After talking to your office, I was advised by Ms. Blair Agricola to send you a written summary of a situation that I find myself involved in. Her advice came after discussion with her on the phone and some investigation on her part.

On August 24, 1990 while employed by a food store in Dora, Alabama, I fell from an electric pallet jack platform in the store stock room. I was taken to Baptist Medical Center Princeton in Birmingham in a semi-conscious state, was examined, released, and knew I had sustained serious injuries. Shortly thereafter I went to an orthopedic surgeon at HealthSouth Hospital in Birmingham. He recommended immediate knee surgery (performed 8-27-90). After an intense rehabilitation program, my doctor allowed me to return to work on "limited time and restricted duty as tolerated". This was 10-29-1990.

I was not allowed by my store manager to work on this basis

and was immediately put back on full 12 hour shifts, which made it impossible for me to continue my therapy as instructed by the surgeon. This resulted in the deterioration of both of my knees, additional swelling, pain and inflammation to the point where the surgeon made it quite clear total reconstructive surgery would be necessary if a program of continuous therapy could not turn the situation around. Consequently, the decision was made that because of the long hours (and lack of therapy) while I was continuing to work, that the damage was not reversable. On 9-29-91 I did have total reconstructive surgery on both

01-01449

knees (dual surgery). The decision to have both knees operated on at the same time was made in an effort to get it all behind me and try to get on the road of recovery as soon as possible so in turn I could return to full employment.

My assigned supervisor had discussed allowing me to return to work on a "limited duty basis" and was working on a "special assignment" which I would be able to carry out and continue with my therapy. In December of 1991 his death occurred and his plan to arrange my duties conforming with the "Disabilities Act" apparently died with him. After his death, while in the process of rehabilitation from the double surgery I was terminated by my employer on 3-4-92. During this time (and as of this date) I am still under the care of my doctor.

I do not know exactly what my now deceased supervisor was referring to in regards to the "special assignment due to disability". Since my termination I have researched employer/employee roles in disability cases. This has made me aware of ADA, and Title 29, Labor Code of 1988 dated January 3, 1989, as well as the Disabilities Act of 1973.

My question to you is: Do the above mentioned laws apply to me and if so in what respect? I do know that Article 793 of the Title 29 Labor Code, Page 1203, outlines the requirement for employment under Federal Contracts and Sub-Contractors. If my employer meets this criteria (of a Sub-Contractor) would the effective date of ADA be 1/26/92 prior to my termination.
My former employer was and is, actively engaged in:

1. Interstate Commerce and Transportation

2. Receiver of Food Stamps

3. Receiver of Women Indigent Children Vouchers

4. Some type of State and Federal Supplement for training and employment

5. Dept of Agriculture Regulations

6. Sale of U.S. Postage Stamps

7. Sale of Money Orders

Again, I respectfully request your assistance in obtaining a written determination from the Justice Department, or whomever, as to my status in relationship to the American Disabilities Act and to the 1988 Revision of Title 29 of the United States Labor Code. On July 26, 1992, my surgeon with

HealthSouth stated by letter that my current disability is approximately 85 to 100%.

01-01450

Let me thank you in advance for your assistance in this matter and for any assistance/information on rehabilitation, retraining, available benefits, or etc. that I might be entitled to, as I have been unable to obtain the "concrete information" that is needed in order to resume as normal and as productive a lifestyle as possible.

Sincerely,
(b)(6)

Washington, D.C. 20515-3816

Dear Congressman Walker:

This letter is in response to your inquiry on behalf of your constituents, Mr. and Mrs. XXXX. They have requested information about workshops explaining the Americans with Disabilities Act (ADA) to businesses.

While the Department of Justice does supply speakers for ADA seminars and conferences, we currently have no speaking engagements scheduled in Pennsylvania. The XXXXXX may wish to contact the Council of Better Business Bureaus' Foundation, which has received a grant from the Department of Justice to educate small and medium-sized businesses about the ADA's requirements, for information about ADA training activities in their area. The Foundation is located at 4200 Wilson Boulevard, Suite 800, Arlington, Virginia 22203-1804, telephone (703) 276-0100.

Another useful resource is the Region 3 Disability and Business Technical Assistance Center (which serves Pennsylvania, Delaware, Maryland, Virginia, and West Virginia), operated under a grant from the National Institute on Disability and Rehabilitation Research. The Center may be reached through a toll-free number at 1-800-949-4232.

Enclosed are copies of the Department of Justice's ADA title III technical assistance manual and regulation, which provide information on ADA requirements applicable to businesses.

XXXX(b)(6)
Xxtree XX
Tacoma, Washington

Dear Ms. XXXX(b)(6)

This letter is in response to your inquiry requesting information about the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation or legal advice, and it is not binding on the Department.

You have asked whether the ADA would require an amateur clown who performs in facilities such as nursing homes to provide a sign language interpreter for the performance. You have also asked whether the ADA covers persons with mental disabilities.

The ADA places responsibility for providing access to persons with disabilities, including the provision of interpreters to deaf individuals, on any private entity that owns, leases from or to, or operates a place of public accommodation. The twelve categories of places of public accommodations are listed and discussed on page 35551 of the enclosed title III regulation. A nursing home is considered a place of public accommodation, and, as such, must provide auxiliary aids, including sign language interpreters where necessary to afford effective communication, unless to do so would fundamentally alter the nature of the performance or would be an undue burden on the nursing home.

A performer or performing group, however, is not by itself considered a place of public accommodation under the ADA. Therefore, a performer will be responsible for providing

auxiliary aids, or any other access to persons with disabilities, only if he or she leases from the place of public accommodation in which he or she performs. If a clown were to perform in a nursing home, the clown would have no ADA responsibilities unless he or she leased from the nursing home for the performance.

01-01455

In response to your second question, the ADA's ban against discrimination protects individuals with mental as well as physical disabilities. The enclosed regulations define a "disability" as including a "mental impairment that substantially limits one or more of the major life activities." See page 35548 for this discussion. I have also enclosed a Title III Technical Assistance Manual, which provides further discussion of the ADA requirements for public accommodations.

I hope this information will be useful to you in understanding the ADA.

Sincerely,

John L. Wodatch
Director
Office on the Americans Disabilities Act

Thank you,

XXXXX(b)(6)

01-01457

AUG 28, 1992

The Honorable Howard L. Berman
Member, U.S. House of Representatives
14600 Roscoe Blvd., Suite 506
Panorama City, California 91402

Attn: Margaret Mott

Dear Congressman Berman:

This letter is in response to your inquiry on behalf of your constituent, (b)(6) concerning provision of sign language interpreters under the Americans with Disabilities Act (ADA) for medical patients who are deaf.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities with rights or obligations under the Act. This letter provides informal guidance to assist Ms. (b)(6) in understanding the ADA. However, this technical assistance does not constitute a legal interpretation of the statute and it is not binding on the Department.

The ADA requires physicians to furnish appropriate auxiliary aids and services where necessary to ensure effective communication with individuals with disabilities. A physician may not impose a surcharge on any particular individual with a disability to cover the costs of measures, such as providing auxiliary aids, that are required by the ADA. These provisions appear in sections 36.301(c) and 36.303 of the enclosed ADA title III regulation, at pages 35596 and 35597, respectively. Under section 36.301(c) of the regulation, the cost of an interpreter must be absorbed by the doctor in the limited circumstances when an interpreter is necessary. However, as provided in section 36.303(f), a doctor is not required to provide any auxiliary aid that would result in an undue burden.

cc: Records, Chrono, Wodatch, Bowen, Russo, McDowney, Library,
FOIA
Udd:Russo:Cong.Berman. (b)(6)

What constitutes an effective auxiliary aid or service will depend upon the unique facts of each situation, including the length and complexity of the communication involved. Generally, a doctor may satisfy the auxiliary aid or service requirement by using a note pad and written materials where a deaf patient is making a routine office visit. By contrast, a discussion of whether to undergo major surgery may require the provision of a sign language interpreter. Further discussion of this point may be found on page 35567 of the enclosed regulation. Also enclosed is the Department's Technical Assistance Manual, which includes discussion of these provisions at page 26.

If Ms. (b)(6) believes, after reviewing the enclosed materials, that she has been discriminated against on the basis of her disability she has two enforcement options under the ADA: (1) She may secure private legal representation and bring an action in Federal court, or (2) she may file a complaint with the Department of Justice.

If Ms. chooses to file a complaint with the Department of Justice, she should send it to one of two offices of the Civil Rights Division assigned to investigate such complaints. If the medical office is operated by a State or local government, she should send any relevant information to the Coordination and Review Section, Civil Rights Division, U.S. Department of Justice, P.O. Box 66118, Washington, D.C. 20035-6118. If, on the other hand, the medical office is operated by a private entity, she should send any relevant information to the Office on the Americans with Disabilities Act, Civil Rights Division, U.S. Department of Justice, Post Office Box 66738, Washington, D.C. 20035-9998. All complaints should be in writing and should set forth, in as complete a manner as possible, the factual circumstances surrounding the complaint.

I hope this information is of assistance to you in responding to your constituent.

Sincerely,
James P. Turner
Acting Assistant Attorney General
Civil Rights Division

Enclosure (2)
01-01459

AUG 28, 1992

The Honorable Thomas J. Bliley, Jr.
U. S. House of Representatives
2241 Rayburn Office Building
Washington, D.C. 20515

Dear Congressman Bliley:

This letter is in response to your inquiry on behalf of your constituent, Dr. Paul E. Galanti, Deputy Executive Vice President of the Medical Society of Virginia, regarding the cost of providing auxiliary aids or services for persons with disabilities.

The Americans with Disabilities Act (ADA) authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's requirements. It does not, however, constitute a legal interpretation, and it is not binding on the Department.

The ADA requires physicians to furnish appropriate auxiliary aids and services where necessary to ensure effective communication with individuals with disabilities. A physician may not impose a surcharge on any particular individual with a disability to cover the costs of measures, such as providing auxiliary aids, that are required by the ADA. These provisions appear in sections 36.301(c) and 36.303 of the enclosed ADA title III regulation, at pages 35596 and 35597, respectively. Also enclosed is the Department's Title III Technical Assistance Manual, which may provide further assistance to your constituent. Pertinent discussion may be found at pages 22 (surcharges) and 25-28 (auxiliary aids).

Under section 36.301(c) of the regulation, the cost of an interpreter must be absorbed by the doctor in the limited circumstances when an interpreter is necessary. However, as provided in section 36.303(f), a doctor is not required to provide any auxiliary aid that would result in an undue burden. The flexibility of the auxiliary aids requirement, the undue burden limitation, and the ability to spread costs over all patients should minimize any burden on the medical profession.

cc: Records, Chrono, Wodatch, Breen, Nakata, McDowney, FOIA
Library
Udd:Nakata:Congress.letters.Bliley.1

01-01460

What constitutes an effective auxiliary aid or service will depend upon the unique facts of each situation, including the length and complexity of the communication involved. Generally, a doctor may satisfy the auxiliary aid or service requirement by using a note pad and written materials where a deaf patient is making a routine office visit. By contrast, a discussion of whether to undergo major surgery may require the provision of a sign language interpreter. Further discussion of this point may be found on page 35567 of the enclosed regulation.

Dr. Galanti's letter raises a specific question involving use of interpreters, concerning a deaf patient who brought a sign language interpreter for an office visit and billed the doctor for the cost of the interpreter. Clearly, the auxiliary aid provisions of the ADA (cited above) do not contemplate that a person with a disability can unilaterally decide on the appropriate type of auxiliary aid, make arrangements for the auxiliary aid, and then bill the public accommodation for the service.

I hope this information will be helpful to you in responding to your constituent.

Sincerely,

James P. Turner
Acting Assistant Attorney General
Civil Rights Division

CONGRESS OF THE UNITED STATES
HOUSE OF REPRESENTATIVES
Washington, DC 20515-4603

June 25, 1992

Mr. John Wodatch
Director
Office on the Americans With Disabilities Act
Department of Justice
P.O. Box 66738
Washington, D.C. 20036-9998

Dear Mr. Wodatch:

I am writing to you in regards to the Americans With Disabilities Act (ADA) and the effect it will have on small business, and, more specifically, doctor's practices.

It has come to my attention that the requirements concerning auxiliary aids contained within the ADA legislation are both unclear in their nature, and potentially detrimental to other health care programs. Doctors in my district have voiced uncertainty about the situations in which they would be required to obtain the services of an interpreter. Not only do these question present a problem, but, should an interpreter be necessary, the cost of the interpreter, about $50.00, is placed on the practice's shoulders. When the patient in question is covered by Medicaid, the doctor could end up paying $50.00 for an interpreter while attending to a $18.00 visit. If this becomes the norm, the Medicaid program could find itself losing a good number of doctors.

I have enclosed a letter from my constituent, Mr. Paul E. Galanti, the Deputy Executive Vice President of the Medical Society of Virginia, concerning this problem. I would appreciate your attention and comments on the matter, and I look forward to hearing your thought. I thank you in advance.

With kindest regards, I am

Sincerely,

Thomas J. Bliley, Jr.
Member of Congress

The Medical Society Of Virginia

May 13, 1992

The Honorable Thomas J. Bliley, Jr.
U.S. House of Representatives
Washington, D.C. 20515

Dear Tom:

This is a request for assistance with a problem that has cropped up relating to the Americans with Disabilities Act. It was brought to my attention by Dr. Percy Wootton, one of Virginia's most prominent physicians and a member of the AMA Board of Trustees.

As related to me, a medicaid patient who was hearing impaired was treated by Dr. Wootton's practice using a signing translator provided by the patient. This particular treatment is reimbursed $18.00 by Medicaid. Shortly after treatment, the group practicereceived a bill for $50.00 for services provided by the translator who threatened to sue under the Americans with Disabilities Act if not paid.

In a conversation with Mr. Bruce U. Kozlowski, Virginia's Director of the Department of Medical Assistance Services and a very capable administrator, I was informed that there are no provisions under the law to reimburse physicians or any health care provider for this type of service.

This seems terribly unfair to physicians who, in many cases, lose financially by treating Medicaid patients.

I see a potential for abuse-not just in medicine-if this is allowed to be an interpretation of the ADA. I feel certain that the authors of the bill did not have this in mind when they passed it. I also foresee many physicians dropping out of the Medicaid program which could jeopardize the entire program.

I enjoyed getting a brief chance to see you at the Medical Society's Legislative Luncheon in Washington last week and know that you will have sound advice to give Dr. Wootton and other Virginia physicians who are potentially victims of this unsolicited "help."

Thank you in advance for any help you can provide.

With best wishes,

Paul E. Galanti
Deputy Executive Vice
President

AUG 28, 1992

Ralph Lancaster, President
The Lancaster Group
2800 North Atlantic Avenue, #16
Daytona Beach, Florida 32118

Dear Mr. Lancaster:

This letter responds to your inquiry concerning cancellation of your group health insurance coverage.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities with rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA. However, this technical assistance does not constitute a legal interpretation of the statute and it is not binding on the Department.

I have enclosed copies of the Department of Justice's regulation under title III of the Americans with Disabilities Act (ADA), as well as our Technical Assistance Manual. Insurance practices are discussed at pages 18-19 of the Manual and pages 35562-63 and 35596 of the regulation. Generally, the ADA prohibits discrimination on the basis of a disability, which is defined as a physical or mental impairment that substantially limits one or more major life activities. However, the ADA's coverage of insurance practices is limited. The ADA does not prohibit the refusal to insure, limitations in the amount,

extent, or kind of insurance, or the charging of different rates for the same coverage (even when based on physical or mental impairment) when such actions are based on sound actuarial principles or are related to actual or reasonably anticipated experience.

After reviewing these provisions, if you wish to file a complaint under the Americans with Disabilities Act, you may write to the Office on the Americans with Disabilities Act, Civil Rights Division, U.S. Department of Justice, Post Office Box 66738, Washington, D.C. 20035-9998.

01-01464

Your letter includes allegations of age discrimination and antitrust violations. For further information regarding age discrimination, please contact Mr. Edward Mercado, Director, Office for Civil Rights, Department of Health and Human Services, 330 Independence Avenue, S.W., Room 5400, Washington, D.C. 20201. Antitrust questions may be directed to the Federal Trade Commission, Washington D.C. 20580.

Finally, because insurance practices are traditionally regulated at the State level, you may wish to direct your complaint to the Florida Department of Insurance, Consumer Services. The mailing address is Post Office Box 7117, Tallahassee, Florida 32314.

I hope this information is of assistance to you.

Sincerely,

John L. Wodatch
Director
Office on the Americans with Disabilities Act
Civil Rights Division

June 1, 1992

The Honorable William P. Barr
Attorney General of the United States
Department of Justice
10th and Constitution Avenue, N.W.
Washington, D.C. 20530

Dear Mr. Barr:

Our company is a small firm with only two full-time employees and a couple of part time workers. For the past ten years or so, we have been an Affiliate Member of the Florida League of Financial Institutions, a group composed of thrift institutions and those who provide services to the thrift industry. Our sole reason for membership in this group was so that we could obtain health insurance under their group insurance plan. Each year, we have paid approximately $1,000 for membership dues in the organization, or some $10,000. And, each year, we have faithfully paid the insurance premium on myself, and Mrs. Gail McTiernan, our other employee. That premium has risen, year after year, and is now $670 per month for the two of us, or an annualized $8,040. This means that, on an annualized basis, plus the $1,000 membership fee we have had to pay to obtain the insurance, the annual health insurance bill for just the two of us is approximately $10,000.

I am 53 years old, and Mrs. McTiernan is 56 years old. During the many years we have been covered by the insurance plan offered by the Florida League of Financial Institutions, both of us, as people our age tend to do, have developed medical conditions, or have medical histories, that make us virtually uninsurable.

The Florida League has traditionally reviewed the group insurance plan each year and at the beginning of each year, has decided to

remain with the existing carrier for one more year (often with an

increase in rates), or retain a new carrier. Regardless of the insuror chosen, however, all members have always been insured.

This year, on January 1, the Florida League selected the Travelers Insurance Co. for coverage for all of 1992. In May of this year, only five months into the Plan year, the Florida League began negotiating with Mutual of Omaha. The end result is that, on May 29, 1992, three days ago, we were advised that, effective today, our firm would no longer be allowed to participate in coverage through the new carrier, Mutual of Omaha, because of requirements dictated by the new carrier that members of the League with 75 or fewer employees must be individually underwritten, and not treated as the rest of the group

The notification to our company, a copy of which is attached, states that, "Unfortunately, due to Mutual of Omaha's decision to evaluate the overall health risk of each League participant separately, (your firm) has been declined for life and health insurance for reasons attributable to adverse medical conditions."

I feel confident that Mutual of Omaha's decision to selectively underwrite was not a unilateral one, but was supported and agreed upon by the Florida League.

So here we are, at ages 53 and 56 respectively, we find ourselves uninsurable, with health problems, and with only three days notice, after being in the same group plan for many, many years, while others in the plan remain fully covered.

It is my strong opinion that these actions violate numerous laws, regulations, rights constitutional guarantees, and various discrimination laws. I believe that both Mrs. McTiernan and I have:

1. Been singled out and discriminated against because we are a small company with less than 75 employees, even though we were

a long standing member of a group where all members are covered.

2. Been discriminated against because of our age.

3. Been discriminated against due to physical impairment.

4. Had our civil rights violated.

5. Not been treated fairly under the terms of our contract and Florida League's agreement with us and the insurance carrier.

6. Been a victim of collusion and a conspiracy that has resulted in a loss of our rights and benefits so that other members of our same group could enjoy lower rates.

7. Been a victim of violations of various anti-Trust laws.

8. Suffered as a result of numerous violations of Federal Trade Commission and State laws and regulations.

The Florida League has offered to "negotiate with the old carrier" and see if they will carry our firm on an individual stand-alone basis until January 1, 1993, and to then see if the new carrier, Mutual of Omaha, will accept us at that time. There is no question in our minds that the old carrier will readily agree to accept us at a much, much higher rate, with severe restrictions, for only a few months, and then drop us, and that Mutual of Omaha will be no more inclined to accept us in January than are they now.

In short, we see these actions as nothing more than a disguised effort to "cull" the entire ranks of the Florida League of folks who are undesirable from an age and/or medical standpoint, using the guise of those with 75 employees or less, so as to reduce overall health costs for the large, influential members of the League.

It is, in our opinion, a blatant act of discrimination, an illegal and unethical business practice, and a shocking example of (a) the health insurance industry gone amok, and (b) a conspiracy between a member of that industry and an insured to hold costs down at the expense of a group that should be protected.

01-01468

We need your help. What can you do to assist us in assuring that this unconscionable act is not allowed to stand?

We thank you in advance for your consideration and your assistance and, even though we know you are busy with numerous other matters, hope you will find time to assist us.

Further, in my opinion, this is a classic test case on such matters. If you wish me to testify, at any time and at any place, as to this situation, I will be more than happy to do so.

Sincerely,

Ralph D. Lancaster
Principal

Re: Group Insurance Coverage

Dear Ralph:

As you are aware, the Florida League of Financial Institutions' Group Insurance Program will be transferring coverage to Mutual of Omaha as of June 1, 1992. One of the requirements dictated by the new carrier was the collection and acceptance of health questionnaires from the employees of each group with less than 75 lives.

Unfortunately, due to Mutual of Omaha's decision to evaluate the overall health risk of each League participant separately, the Lancaster Group has been declined for life and health insurance for reasons attributable to adverse medical conditions.

As the normal effective date of renewal coverage for the Travelers program in January 1, 1993, I am prepared to direct on your behalf Alexander & Alexander to negotiate with the Travelers in an attempt to maintain your contract with the Travelers. If they are successful, this will mean that your current level coverage and rates will continue unaffected on an individual stand-alone basis until January 1, 1993. We will also be pleased at that time to ask Mutual of Omaha to reassess the health status of your group in an effort to have you rejoin the League program.

Ralph, we are pleased that the Lancaster Group has been able to participate in the League Group Insurance Program for a long period of time. We regret that the continuing restriction of underwriting policies in the marketplace has made it impossible for you to continue with us at this time. We are hopeful that you will be able to rejoin us at some point in the future.

Again, please notify me immediately if you would like me to direct A&A to attempt to negotiate a continuance of your existing contract with the Travelers. You may also contact the League's benefits representative, Andrew Thiele of Alexander & Alexander (813-273-5512) if you have questions about this action by Mutual of Omaha.

Best regards,
William D. Hussey
President

AUG 28, 1992

The Honorable Larry Pressler
United State Senate
133 Hart Senate Office Building
Washington, D.C. 20510-6125
Dear Senator Pressler:

This letter is in response to your inquiry on behalf of your constituent, Dr. Robert Johnson. Dr. Johnson has asked whether he is required by the Americans with Disabilities Act to provide interpreters to his patients with hearing impairments.

The Americans with Disabilities Act authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the Act's requirements. It does not, however, constitute a legal interpretation, and it is not binding on the Department.

The ADA requires physicians to furnish appropriate auxiliary aids and services where necessary to ensure effective communication with individuals with disabilities. A physician may not impose a surcharge on any particular individual with a disability to cover the costs of measures, such as providing auxiliary aids, that are required by the ADA. These provisions appear in sections 36.301(c) and 36.303 of the enclosed title III regulation, at pages 35596 and 35597, respectively. Also enclosed is the Department's Title III Technical Assistance Manual, which may provide further assistance to your constituent. Pertinent discussion may be found at pages 22 (surcharges) and 25-28 (auxiliary aids).

cc: Records, Chrono, Wodatch, MillerC,-McDowney, FOIA, Library
:udd:millerc:pressler.cong
01-01471

Under section 36.301(c) of the regulation, the cost of an interpreter must be absorbed by the doctor in the limited circumstances when an interpreter is necessary. However, as provided in section 36.303(f), a doctor is not required to provide any auxiliary aid that would result in an undue burden. The flexibility of the auxiliary aids requirement, the undue burden limitation, and the ability to spread costs over all patients should minimize any burden on the medical profession.

What constitutes an effective auxiliary aid or service will depend upon the unique facts of each situation, including the length and complexity of the communication involved. Generally, a doctor may satisfy the auxiliary aid or service requirement by using a note pad and written materials where a deaf patient is making a routine office visit. By contrast, a discussion of whether to undergo major surgery may require the provision of a sign language interpreter. Further discussion of this point may be found on page 35567 of the enclosed regulation.

I hope this information will be helpful to you in responding to your constituent.

Sincerely,

James P. Turner
Acting Assistant Attorney General
Civil Rights Division

SENATOR LARRY PRESSLER
SENATE OFFICE BUILDING
HART 133
WASHINGTON DC 20510
Dear Senator Pressler:

I received this letter (copy enclosed) from the South Dakota Association of the Deaf. The tone of the letter is quite mandatory and does not express the real fine job these organizations have done for the deaf-mute. I have also enclosed a copy of the letter I have written to them. I have really enjoyed XX(b)(6) as my patient. We did have a good way of communicating that seemed relatively error-free without an intermediary as an interpreter that interjects another source of possible error.

My purpose for writing you is to ask, what was the purpose of the "Americans with Disabilities Act" 28 C. F. R. 36.104? Was it intended to be used in such a mandatory way? As you can see from my letter, I am not so disturbed by it, even though a "gentler, kinder letter" could have been written with much less chance of antagonizing doctors. Doctors are already beset in the last two years to comply with the new Medicare fee schedule and coding system, the OSHA regulations requiring a documented program for controlling exposure to blood-borne diseases in their offices, the steps necessary to qualify our office labs under the quality standards set out by the Clinical Laboratory Improvement Act of 1988. As a result, we have had to add staff duties to our employees by new expensive computer software programs and education of these programs to comply to all these new regulations. We are feeling pressured to deliver less and less care to our patients with more overhead.

My two ultimate questions to you are:
1. Are we breaking the law if we refuse to use the interpreters here?
2. What was the intention of the Act?

Thank you.

Sincerely yours,

Robert K. Johnson, M.C.

William T. McNett, Chairman
Bradford County Commissioners
Bradford County Court House
Towanda, Pennsylvania 18848

Dear Mr. McNett:

This letter responds to your correspondence requesting information about the Americans with Disabilities Act, 42 U.S.C. 12101-12213 (ADA). The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

Specifically, your letter inquires whether your county government must microfilm or computerize its real estate records in order to accommodate an attorney who states that he has difficulty handling the record books because he has only one arm. You state that county staff have been directed to offer assistance to the individual and that "tremedous expense" would be involved in transforming the records into electronic data.

Title II of the Americans with Disabilities Act (ADA) governs the operations of local and state governments. Title II and its implementing regulations require public entities to make reasonable modifications in their policies, practices, or procedures when the modifications are necessary to avoid discrimination on the basis of disability, unless the public entity can demonstrate that making the modifications would fundamentally alter the nature of the service, program, or activity. If, as you indicate, you can provide full access to the records by having staff assist in lifting and handling the record books, further modifications would not be "necessary to avoid discrimination."

cc: Records, Chrono, Wodatch, Magagna, Barrett, FOIA, Library
Udd:Barrett:PL.49

01-01474

I have enclosed copies of the title II regulation and the Department's Technical Assistance Manual. I hope this information will be useful to you.

Sincerely,

Joan A. Magagna
Deputy Chief
Office on the Americans with Disabilities Act

Washington, D.C. 20035

Dear Sirs:

I am a County Commissioner in Pennsylvania and our courthouse contains several county offices, among which is the office of "Register and Recorder." Within the Register and Recorder's office are the bound books of real property deeds. These books are of the standard size and weight. They are heavy (about 20 pounds) and they are cumbersome to handle.

We have a county resident who, as a child, lost an arm in a farming accident. He is now a leading attorney and has handled these record books for the past 15 years while searching titles. He has just threatened bringing suit against the county under the Americans with Disabilities Act claiming that our records should be transformed into electronic data so that he can look at records without handling the record books. Our county staff has been directed to offer assistance to the attorney, but this does not satisfy him.

My question is: Does the Justice Department expect local government to incur the tremendous expense involved in transforming all written records into electronic data?

Sincerely,
William T. Mc Nett, Chairman
Bradford County Commissioners

Robert Sweetser, RA
Office of R.S. Griffin
32 All Souls Crescent
Asheville, North Carolina 28803

Dear Mr. Sweetser:

This is in response to your letter requesting information about the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation or legal advice, and it is not binding on the Department.

You have asked whether a strictly residential building would be covered by the ADA. The ADA does not apply to strictly residential buildings, which offer no social, recreational or other services. Nor does it apply to amenities provided for the exclusive use of tenants and their guests. However, as you correctly noted, it does cover any spaces within the building intended for or used by the public. In addition, the federal Fair Housing Act, as amended, prohibits discrimination on the basis of disability in housing and provides additional accessibility requirements for certain newly constructed housing facilities. There may also be state or local laws that have additional or more stringent requirements.

Please consult the enclosed title III regulations and Technical Assistance Manual for further discussion of ADA issues.

Stewart B. Oneglia, Chief, Coordination and Review Section
Civil Rights Division
U.S. Department of Justice
Washington, D.C. 20530

Re: Manor Inn Apartments
Asheville, NC

Dear Mr. Oneglia:

We are currently underway with renovations of The Manor Inn. This is a Federal Register identified historic building constructed 1899-1913 being converted into forty-four rental apartments.

The Americans with Disabilities Act is applicable to all private entities providing places of public accommodations, including places of lodging and places of public gathering. It is our understanding that "places of lodging would exclude solely residential facilities because the nature of a place of lodging contemplates the use of the facility for short term stays" (28 CFR PART 36, p.23) and therefore this solely residential project is excluded from conformance with the ADA. Spaces intended for lease for public use or events shall, however, conform with ADA recommendations as places of public gathering.

At the request of our client, we seek your confirmation of our understanding of the ADA as noted above. We appreciate your assistance in this matter.

Sincerely,

Robert Sweetser, RA
RHS/dr

SEP 1 1992

Bernard B. Nebenzahl, Esq.
Nebenzahl & Kohn
Suite 800 Glendale Federal Building
9454 Wilshire Boulevard
Beverly Hills, California 90212-2988

Dear Mr. Nebenzahl:

This letter is in response to your request for guidance regarding the obligations under the Americans with Disabilities Act of 1990 ("ADA") of financial institutions that foreclose on public accommodations.

The ADA authorizes this Department to provide technical assistance to entities that are subject to Title III. This letter provides informal guidance to assist you in understanding the ADA and the Department's regulation. However, this technical assistance does not constitute a determination by the Department of Justice of rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

Section 302(a) of the ADA prohibits discrimination on the basis of disability by "any person who owns, leases (or leases to), or operates a place of public accommodation." See also 28 C.F.R. S 36.104. Accordingly, Title III applies to a financial institution that acquires ownership of a place of public accommodation through foreclosure. Neither the statute nor the Department's regulation has an exemption for a private entity that owns a place of public accommodation because the ownership is temporary or because the private entity, e.g., financial institution, intends to liquidate its interest in the place of public accommodation.

Because a financial institution that owns a place of public accommodation is covered by the ADA, it is responsible for removing existing barriers that are "readily achievable" as

defined by Section 301(9) of the ADA and Section 36.304 of the Department's regulation. For further discussion of the concept

cc: Records, Chrono, Wodatch, Magagna, Delaney, Arthur, Library,
FOIA
Udd:Delaney:ada.ltr.nebenzahl.foreclosure
01-01480

of barrier removal please see pages 35,553-54 of the enclosed regulation and pages 28-39 of the enclosed Technical Assistance Manual. The extent of its obligation to remove existing barriers will depend on a variety of factors, including the nature of the legal relationships between the financial institution and the place of public accommodation and the likely term of ownership. Of course, the exact obligation of any particular financial institution will have to be determined on a case-by-case basis.

I hope this information has been helpful to you.

Sincerely,

John L. Wodatch

July 6, 1992

United States Department of Justice
Civil Rights Division
Office on the Americans with Disabilities Act
P.O. Box 66118
Washington, D.C. 20034-6118

Dear Sir/Madam:

Several financial institutions which are clients of our office have requested our advice concerning their obligations under the Americans With Disabilities Act of 1990 (42 U.S.C. 12181 et seq.) with respect to public accommodations upon which they foreclose as lenders. Subsequent to a foreclosure, the financial institutions hold these properties for a short term until they are liquidated.

The issue presented here is the ownership and retention of property by lenders as a result of the defalcation of borrowers under their loan obligations, the result of which causes the lender to foreclose upon the collateral, namely the public accommodations. Americans With Disabilities Act provides that there shall be no discrimination on the basis of disability, in connection with, among other things, accommodations of any place of public accommodation by any person who "owns" or operates a place of public accommodation. More particularly, regulations promulgated under the Act (28 C.F.R. 36.304) require that public accommodations shall remove architectural barriers where such removal is readily achievable. The regulations further define what "readily achievable" means with the operable phrases being "without much difficulty or expense."

There is uncertainty with respect to the obligations of a lender under the circumstances recited above when looking at the

affirmative obligations of one who "owns" the public accommodation.

These clients have been told by others (including some persons at the Department of Justice) that their temporary ownership of the public accommodation is a consideration in determining whether or not there is an affirmative obligation to remove barriers under the cited sections.

01-01482

We would appreciate your advice on the following in relation to the current regulations and enforcement policies:

1. Is temporary ownership a basis upon which a lender, who forecloses and owns a public accommodation with a view to liquidate said property and not with a view towards investment or retention, is exempt from Section 36.04?

2. Is there a definition or any advisory opinions on temporary ownership of a public accommodation by lenders?

3. Is a lender which forecloses upon a public accommodation and owns such accommodation for resale only, for a period of less than 12 months (or any other period), required to comply with 28 C.F.R. 36.304?

Thank you for your consideration of this inquiry, and should you have any questions, please do not hesitate to contact me.

Very truly yours,
Bernard B. Nebenzahl

Ms. (b)(6)
XX
Lufkin, Texas XX

Dear Ms. (b)(6)

This is in further response to your letter of June 16, 1992, requesting an interpretation of the Americans with Disabilities Act ("ADA").

We are unable to give you an advisory opinion regarding the specific questions raised in your letter. However, I can refer you to the Department of Justice implementing regulation for title III of the ADA that may provide you with some guidance in these matters. See 28 C.F.R. 36.101 et seq. (copy enclosed).

Section 3 of the ADA defines a disabled individual as one who (a) has a physical or mental impairment that substantially limits one or more of the major life activities of the individual; (b) has a record of such impairment; or (c) is regarded as having such an impairment. See, in particular, 28 C.F.R. S 36.104 for the definitions of a person who "has a record of impairment" and one who "is regarded as having such an impairment." See also pages 8-12 of the Title III Technical Assistance Manual (copy enclosed).

The executive branch of the Federal Government is covered by Title V of the Rehabilitation Act of 1973, which prohibits discrimination in services and employment on the basis of handicap. Accordingly, questions concerning disabled persons and whether they are eligible for Social Security benefits should be

cc: Records Chrono Wodatch Bowen Delaney.ada.ltr.(b)(6) (7)(c)
Library FOIA arthur T. 9/8/92

Director
Americans With Disabilities Act
Enforcement
U.S. Department of Justice
Washington, D.C. 20530

Dear Mr. XX

ILLEGIBLE Americans With Disabilities. In the list at the beginning of the Act are included, after the mentally ill, those who are "thought" to be mentally ill--in a separate classification. Would these include someone who had been committed to a state mental hospital for three months but who was subsequently cleared by an order of a state court of appeals six months after the beginning of the commitment? The court of appeals ruled the commitment to be an error in judgement by the trial court based on five points of error including lack of evidence. The argument before the court of appeals asserted that the person had her constitutional rights violated by this commitment.

This person was unable to find a half-way house that would receive her unless she applied for SSI while still in the hospital. The SSI was awarded based on the diagnosis of the doctors in the state hospital. Social Security awarded the SSI even though they were informed before the issuance of the first check that a state court of appeals had vacated the original order of commitment.

The person told the Social Security officer that they believed that they could be included in SSI under the new law because they suffered the stigma of an illegal commitment and would have great difficulty in getting employment because of this stigma. The Social Security office was informed that the person was seeking legal aid to have the records cleared and that there was no attempt to make a fraudulent claim. She has been unable to get a lawyer to seek a court order to clear the record for fear that she would lose her SSI.

(1) Does the new law include such a person who was committed to a state hospital in violation of the law?

(2) Can she qualify for Social Security benefits for the disabled under the classification of those who are "thought" to be mentally ill as described in the new law?

I would appreciate an answer as soon as possible to my questions in such a form that it could be used as documentation in listing a new basis for the SSI award and as a means to clear the obstacles for clearing the record.

Sincerely,
(b)(7)(c)

01-01486

DJ 202-PL-126

SEP 9 1992

John Tysse, Esq.
McGuiness & Williams
1015 Fifteenth Street, N.W.
Suite 1200
Washington, D.C. 20005

Dear Mr. Tysse:

I am responding to your recent inquiry on behalf of your client, the Schindler Elevator Corporation, and to the Schindler Elevator Corporation's letters to this Department concerning the requirements of title III of the Americans with Disabilities Act of 1990 (ADA) governing the floor plan of accessible passenger elevators.

The ADA authorizes the Department to provide technical assistance to individuals and entities that have rights or responsibilities under the Act. This letter provides informal guidance to assist you in understanding the ADA. However, this technical assistance does not constitute a determination by the Department of Justice of the rights or responsibilities of any individual under the ADA, and it is not binding on the Department of Justice.

The ADA requirements for the design and construction of accessible elevators are contained in section 4.10 of the ADA Accessibility Guidelines, which are adopted as the ADA standard by this Department's title III regulation. Section 4.10.9 provides that:

The floor plan of elevator cars shall provide space for

wheelchair users to enter the car, maneuver within reach of the controls, and exit from the car. Acceptable door opening and inside dimensions shall be as shown in Fig. 22 . . . .

cc: Records, Chrono, Wodatch, Blizard, Bowen, FOIA
Udd:Blizard:ADA.Interpretation.Tysse

01-01487

Figure 22 depicts the minimum dimensions of an elevator car that will permit a person using a wheelchair to enter, turn to reach the controls, and exit the car. The Schindler Elevator Corporation has asked if an alternative elevator floor plan that provides adequate space for a wheelchair user to enter an elevator car and make a "U-turn" to reach the controls is an acceptable alternative to the floor plans specified in Figure 22 or if Figure 22 must be followed exactly.

To eliminate discrimination in the built environment, the ADA required this Department to establish minimum standards for the design and construction of new buildings and for alterations to existing buildings. Compliance with these standards, or building to specifications that provide greater accessibility than these standards require, will constitute compliance with the ADA's new construction and alteration requirements. However, the standards do not constitute a strict formula for design, nor are they intended to constrain design innovations that provide equal or greater access.

The Department recognizes that there may be other ways to provide access to buildings and facilities. Thus while section 4.10.9 specifies the standards for a conventionally designed passenger elevator, it does not establish the only acceptable design for an accessible elevator car. Section 2.2 of the ADA Accessibility Guidelines expressly provides that "[d]epartures from particular technical and scoping requirements of this guideline by the use of other designs and technologies are permitted where the alternative designs and technologies used will provide substantially equivalent or greater access to and usability of the facility." In a specific application of that principle, section 4.1.6(3)(c)(iii) provides that "equivalent facilitation may be provided with an elevator car of different dimensions when usability can be demonstrated and when all other elements required to be accessible comply with the applicable provisions of 4.10. . . ." In addition, the ADA Guidelines for transportation facilities (49 C.F.R. pt. 37, App. A 10.3.2(17)) provide that elevator cars with a clear floor area in which a 60 inch diameter circle can be inscribed may be substituted for the minimum car dimensions of section 4.10.

Neither the Department of Justice nor the Architectural and Transportation Barriers Compliance Board will certify any specific variation from the standards as being "equivalent," but proposed alternate designs, when supported by available data (which may include advisory material from the Appendix to the guidelines), are not prohibited. However, in any ADA enforcement

action, the covered entity would bear the burden of proving that any alternative design does provide equivalent access.

01-01488

I hope that this information is helpful to you.

Sincerely,

John L. Wodatch
Director
Office on the Americans with Disabilities Act

01-01489

DJ 202-PL-63

SEP 11 1992

(b)(6)
XX
Columbus, Ohio XX

Dear Dr. (b)(6)

This letter is in response to your inquiry about whether there is any legal obligation to accept a deaf patient as a new consult referral in a non-emergency situation.

The Americans with Disabilities Act (ADA) authorizes the Department of Justice to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you in understanding how the ADA may apply to a place of public accommodation. This technical assistance, however, does not constitute a determination by the Department of Justice of rights or responsibilities under the ADA and it is not binding on the Department.

A health care facility, such as a doctor's office, is covered by the provisions of title III of the ADA and the Department's title III regulation as a place of public accommodation (see section 36.104 of the enclosed regulation). The regulation prohibits public accommodations from excluding persons with disabilities from participation in the goods, services, facilities, privileges, advantages, or accommodations provided by a place of public accommodation (section 36.202(a)). A public accommodation is also prohibited from imposing or applying eligibility criteria that screen out individuals with disabilities from fully and equally enjoying goods and services, unless the criteria can be shown to be necessary for the provision of the goods and services being offered (section 36.301(a)).

cc: Records; Chrono; Wodatch; Bowen; Barrett; Friedlander; FOIA
:udd:barrett:pl.63

01-01490

As applied to the situation as you have stated it, the ADA would require generally that, in deciding whether to accept a patient with a disability, you must make that decision on the basis of factors other than the disability. The information you have provided does not enable us to give more specific guidance.

I am enclosing a copy of the Department's title III, Technical Assistance Manual, which may provide further guidance in understanding the ADA's requirements.

I hope this information is helpful to you.

Sincerely,

L. Irene Bowen
Deputy Director

RE: THE AMERICANS WITH DISABILITIES ACT

Dear Sirs,

It has come to out attention that this act was recently passed by congress. My specific question is whether or not there is any legal obligation to accept a deaf patient as a new consult referral in a non emergency situation. I recently had occasion to have a deaf patient referred to me and because of a personality conflict elected not to see this patient. I was informed that I was in violation of this act and I am not sure that I understand the implication of this act and I would appreciate a determination from you for future reference.

Sincerely,

(b)(6)

JTS/rls

01-01492

DJ 202-PL-118

SEP 11 1992

(b)(6)
XX
Freehold, New Jersey XX
Dear (b)(6)

This is in response to your letter requesting information about the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation or legal advice, and it is not binding on the Department.

Your letter states that you reside with your wife in a senior citizen housing development consisting of 671 homes and a two-story clubhouse building. You state that the second floor is not accessible to your wife and other persons who use wheelchairs because there is no elevator or wheelchair lift.

The ADA does not apply to strictly residential facilities. Assuming your housing complex is strictly residential and would not be considered a social service center establishment, whether the ADA applies to the clubhouse depends on who is entitled to use the clubhouse. If activities in a clubhouse within a residential complex are intended for the exclusive use of residents and their guests, the facility is considered an amenity of the housing development. It would not be considered a public accommodation subject to the accessibility requirements of the ADA. Nonetheless, the housing units and the clubhouse would be subject to the requirements of the Fair Housing Act, which prohibits discrimination on the basis of disability.

If the clubhouse facilities and activities are made available to the general public for rental or use, they would be covered by the ADA. Once covered by the ADA, the owners or operators of the clubhouse would be required to remove

architectural barriers to accessibility if their removal is

cc: Records, Chrono, Wodatch, Magagna, Novich, Library, FOIA
Udd:Novich:policy.pl.118.ltr

01-01493

readily achievable, that is, without much difficulty or expense. However, because the clubhouse is a two-story facility, it would not be required to have an elevator, even if it were readily achievable to install one. The ADA requirements for new construction mandate elevators only in certain types of two-story buildings -- shopping malls and doctor's offices, for example. The barrier removal obligation for existing facilities does not require a facility to exceed the requirements that would be applicable to new construction.

I have enclosed the Department's Title III Technical Assistance Manual which may provide further guidance on these issues.

I hope this information is useful to you in understanding the requirements of the ADA.

Sincerely,

John L. Wodatch

Dear Sirs;

My wife (who uses a wheelchair) and I reside in a Senior Citizen (over 55 years of age) housing developement which consists of 671 homes and a two story building which is referred to as a clubhouse.

In this clubhouse there is an auditorium and a number of rooms in which different activities are held. However, there is no elevator or wheelchair lift there., which means that my wife, and the other residents here who use wheelchairs are prevented from using the facilities in the upper story of this clubhouse, although we all pay monthly fees for its maintenance.

Your reply will be greatly appreciated.

Yours truly,
(b)(6)

SEP 11 1992

Edward B. Frankel, M.D.
Assured Management, Inc.
434 S. Euclid Street
Anaheim, California 98202-1247

Dear Dr. Frankel:

This is in response to your letter requesting information about the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation or legal advice, and it is not binding on the Department.

You have asked whether rental offices within apartment buildings must be made wheelchair accessible under the ADA. You have also described 10-20 year old apartments to which wheelchair access may be physically impossible, and have asked whether these and other older buildings may be "grandfathered" under the ADA.

Title III of the ADA addresses accessibility requirements for public accommodations. Strictly residential facilities are not considered places of public accommodation, but common areas that function as one of the ADA's twelve categories of places of public accommodation within residential facilities are considered places of public accommodation if they are open to persons other than tenants and their guests. Rental offices, which by their nature are open to the public, are places of public accommodation and must comply with ADA requirements.

In response to your second question about older buildings, if the facilities you have described are strictly residences, and if the complex they are within provides-only residential services, they are not places of public accommodation, and title III of the ADA does not apply to them. Please be aware, though, that accessibility and non-discrimination requirements under the

Fair Housing Act, as amended, may be applicable to these units.

cc: Records, Chrono, Wodatch, Magagna, Novich, Library, FOIA
Udd:Novich:pl.60.ltr

01-01496

If the facilities you have described are places of public accommodation, they will not be "grandfathered" under the ADA. No places of public accommodation are exempted from title III requirements, regardless of their age. However, existing facilities need only remove architectural barriers if the removal is readily achievable. Readily achievable means that removal is easily accomplishable and can be done without much difficulty of expense. Any improvements that would be truly "physically impossible" would not be readily achievable, and would not be required under the ADA. Please consult the enclosed title III regulations and Technical Assistance Manual for further discussion of these issues.

I hope this information is useful to you.

Sincerely,

John L. Wodatch
Director
Office on the Americans with Disabilities Act

Washington, D.C. 20035-6118

Dear Sir:

We contacted Benny Howard (415) 556-4592 who indicated that "All public accommodations have to be wheel chair accessible but not the apartments themselves, but possibly the rental office." He indicated this was a gray area and not quite sure "whether rental offices are considered public accommodations."

Are rental offices in an apartment project public accommodations?

In addition, certain apartments which we manage were constructed about 10-20 years ago and it may be physically impossible to run a ramp up elevated areas which involve landscaping and parking. It is the case that, at the time of construction, the City required a certain percentage of site to remain landscaping and parking. Is there any "grandfathering" of older buildings?

Thank you.

Most sincerely,

Edward B. Frankel, M.D.

SEP 11 1992

The Honorable Michael G. Oxley
House of Representatives
2448 Rayburn House Office Building
Washington, D.C. 20615-3804

Attn: Jot Carpenter

Dear Congressman Oxley:

This letter is in response to your inquiry on behalf of your constituent, David A. Kovach, concerning the provision of a reader for a State Board cosmetology test under the Americans with Disabilities Act (ADA).

Requirements for State licensing boards are discussed in section II-3.7000, pages 13-14, of the enclosed Title II Technical Assistance Manual. Under section 35.130(b)(6) of the regulation implementing title II (copy enclosed), a public entity, such as a State licensing board, may not discriminate on the basis of disability in its licensing activities. A person is a "qualified individual with a disability" with respect to licensing, if he or she can meet the essential eligibility requirements for receiving the license. A public entity does not have to lower or eliminate licensing standards that are essential to the licensed activity to accommodate an individual with a disability. Whether a specific requirement is "essential" will depend on the facts of the particular case.

As discussed in section II-3.6000, page 13, of the Manual, a public entity offering an examination must modify its policies, practices, or procedures in order to provide an individual with a disability an equal opportunity to demonstrate his or her knowledge or ability. However, if the public entity can demonstrate that a particular modification would fundamentally alter the nature of the licensing program, the entity is not required to make the modification.

udd:mather:cong.kovach

cc: Records, Chrono, FOIA, Friedlander (3), Breen, Mather

01-01499

Please note that sections 102(B)(6) and 103(b) of the ADA, to which Ms. Keys referred in her June 17, 1992, letter, are contained in title I of the ADA, which covers employment practices. Title I is inapplicable to licensing programs offered by public entities. As noted above, State licensing examinations are covered by title II of the ADA.

If Ms. (b)(6) believes that she has been discriminated against on the basis of her disability, she has two enforcement options under the ADA: (1) She may secure private legal representation and bring an action in Federal court, or (2) She may file a complaint with the Department of Justice.

If Ms. (b)(6) chooses to file a complaint with the Department of Justice, she should send it to the Coordination and Review Section, Civil Rights Division, U.S. Department of Justice, P.O. Box 66118, Washington, D.C. 20035-6118. All complaints should be in writing and should set forth, in as complete a manner as possible, the factual circumstances surrounding the complaint.

I hope this information is helpful to you in responding to your constituent.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

Mr. Patrick Keys, Director
State Board of Cosmetology
8 East Long Street, Suite 1000
Columbus, OH 43215

Dear Mr. Keys:

As superintendent of the Ashland County-West Holmes Joint Vocational School District I am writing this letter on behalf of (b)(6), a June, 1992 graduate of Hillsdale High School and a completer of our district's Cosmetology program.

Miss (b)(6) was a Learning Disabled (LD) student while in attendance in our school district and the Hillsdale Local School District. She successfully completed the laboratory and classroom hours required to take the State Board Cosmetology test this past spring. While a student, Miss (b)(6) education in our school followed the requirements of the Individual Educational Plan (IEP) as required under the handicapped guidelines. Her IEP identified that she was required to have interventions which included someone reading daily work and reading tests to Miss (b)(6) and permitting her to answer questions orally. Under Ohio and Federal law, handicapped students must follow an IEP in order to insure that the educational plan is followed and, that the student has an equal opportunity to learn without discrimination.

Unfortunately, when Miss (b)(6) took the State Board of Cosmetology written test (taken two times), a reader was not provided to assist her. Therefore, Miss(b)(6) was not provided an equal opportunity to pass the written State Board test without discrimination due to the fact she was not provided a reader to assist her. The purpose of my letter is to request a reader be provided for Miss (b)(6) on the next

testing date she selects. This request has been asked before by our teacher Mrs. (b)(6) and other interested parties.
continued . . .

"Working Together-We Build Successful Careers"

01-01501

Mr. Keys, (b)(6) has the capability to be a licensed Cosmetologist. All(b)(6) needs is an equal opportunity to take the test so she can evidence her knowledge and skill. has the right under the constitution of both the United States and the State of Ohio for an equal opportunity as a handicapped person to take the State Board test.

Section 504 of the Rehabilitation Act of 1973, the American With Disabilities Act of 1990, as well as Titles VI, VII, and IX, give Miss (b)(6) the right as an American citizen and resident of this great State of Ohio to an equal opportunity to take the State Board of Cosmetology test. As superintendent and as an educator interested in the welfare of all students regardless of sex, race, color, religion, national origin, age or handicap, I appeal to you, Mr. Keys, to permit Miss (b)(6) to have the opportunity to use a reader to assist her in the written examination of the State Board of Cosmetology test. I thank you for your time and sincere interest in this very critical issue regarding a student who has successfully completed the Cosmetology program in our school regardless of her handicap! Please give this person an equal opportunity for success and a positive future. I will look forward to hearing from you in the near future.

Sincerely,

David A. Kovach
Superintendent

Peter J. Pitassi
9267 Haven Avenue, Suite 220
Rancho Cucamonga, California 91730

Dear Mr. Pitassi:

This is in response to your letter requesting information about the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation or legal advice, and it is not binding on the Department.

You have asked whether certain common-use facilities within existing privately owned residential apartment projects must be made accessible under the ADA. You have asked specifically about rental offices, recreational facilities, including clubhouses, swimming pools, spas, game rooms, exercise rooms, and laundry buildings.

Although the ADA does not apply to strictly residential facilities, it does cover public accommodations within residential facilities. Common areas that function as one of the ADA's twelve categories of places of public accommodation and that not intended for the exclusive use of tenants and their guests are considered places public accommodation and are thus required to comply with the ADA. Rental offices, which are by their nature open to persons other than tenants and their guests, are covered. The other facilities you have mentioned will be covered only if they may be used by persons other than tenants and their guests, regardless of whether a fee is charged. If they are not consistently made available to the public, they will be covered by the ADA only for those events that are open to people other than tenants and their guests. Please be aware that even facilities open only to tenants may have accessibility and non-discrimination obligations under the Fair Housing Act of
cc: Records, Chrono, Wodatch, Magagna, Novich, Library, FOIA

1968, as amended. For further information on accessibility standards of the Fair Housing Act, please direct inquiries to the Department of Housing and Urban Development.

Those common areas that are covered by the ADA must comply with the nondiscrimination and accessibility requirements of Title III. In existing facilities, all barriers to accessibility must be removed if the removal is readily achievable. Readily achievable means easily accomplishable and able to be carried out without much difficulty or expense. Section 36.304(b) and (c) of the enclosed title III regulations, at pages 35597-98, provide examples and suggest priorities of barrier removal steps. Public accommodations are urged first to provide an accessible route into the facility from public sidewalks, parking or transportation. Next, a public accommodation should provide access to, in order of priority, areas where goods and services are made available and to restroom facilities. The public accommodation should then provide access to the remainder of its "goods, services, facilities, privileges, advantages, or accommodations." Please consult the enclosed regulations and Technical Assistance Manual for a more complete discussion of barrier removal.

I hope this information is useful to you.

Sincerely,

John L. Wodatch

Subject: Americans with Disabilities Act (ADA)
Applicability for Apartment Projects

Dear Mr. Wodatch:

We are writing you on behalf of one of our clients who owns and manages a significant number of apartment projects in the Southern California area. Many of these projects are 20 to 25 years old. It is these projects which are privately owned and not undergoing any remodeling, renovation or addition which generates our inquiry.

In our review of the ADA Title III, the following issues are not clearly defined regarding existing privately owned apartment projects:

1. Does the rental office need to be accessible and on an accessible route?

2. When recreation facilities such as club houses, game rooms, exercise rooms or similar spaces are for the private use and enjoyment of the tenants, do they need to be made accessible?

3. If the recreation building is available to the tenants for a private party, such as a wedding reception, is the status of the facility altered regarding ADA? What if non-residents are guests at

a private gathering in the recreation facility?

4. How is the status of the recreation facility affected if management rents the building to non-residents for their use?

5. Do existing swimming pools and spas, including the main pool and satellite pools, need to be made accessible if they are for the exclusive use of the tenants and their guests?

6. Do accessible routes need to be created for common use tenant facilities such as laundry buildings?

To reiterate, all of these questions are brought to your attention in regards to existing privately owned apartment projects which are not considering additions, remodeling or renovation work.

Mr. Wodatch, we have discussed these issues with Ms. Ronda Daniels, Director of the Legal Department at the National Association of Home Builders, and we have received her opinion regarding several of these questions. She indicated that you would be the most appropriate individual in the Department of Justice to respond to our questions.

Our client is concerned about these issues and fully intends to comply with the law. An official interpretation by your department would greatly clarify his responsibilities and allow him to proceed with his efforts to meet the requirements of the ADA.

If you are in need of any additional information, please advise. Thank you in advance for your prompt response to our inquiry.

Very truly yours,

Pitassi Dalmau Architects

Washington, D.C. 20515-4810

Attn: Anne MacKenzie

Dear Congressman Wolf:

This letter responds to your inquiry on behalf of your constituent,(b)(6) from Winchester, Virginia.

Department of Justice staff from its Office on the Americans with Disabilities Act telephoned (b)(6)on August 25, 1992, and in the ensuing conversation resolved (b)(6) concerns. He was reassured that the actions he had considered onerous were, in fact, not required by the Americans with Disabilities Act (ADA).

Please feel free to encourage your constituents to contact our Office on the Americans with Disabilities any time they have questions or need information. The Department maintains a telephone information line to provide technical assistance regarding the rights and obligations of individuals, businesses, agencies, and others covered or protected by the ADA. This technical assistance is available by calling 202-514-0301 (voice) or 202-514-0383 (TDD) between 11:00 a.m. and 5:00 p.m., Monday through Friday.

I hope the information we have provided is helpful to you and your constituent.

June 25, 1992

Congressman Frank R. Wolf
104 Cannon House Building
Washington, DC 20515

Dear Congressman Wolf:

I am writing this letter in reaction to a situation that has occurred in my efforts to add an office area to my business, a situation that arose due to the new Americans Disability Act.

Although I agree that handicapped individuals should have the opportunity to pursue a productive life, I wonder if you and other law makers really know the problems that now exist for business and property owners.

In order to move three offices, three people, and improve my service to the community of Winchester and Frederick County, I must place a new bathroom and drinking fountain, special kinds, with 30 feet of existing facilities in an area that will see little public use.

The thing that blew my mind most of all is the expense of placing a sidewalk from a major four-lane road to my building. This sidewalk will not be used, as those using my service do not walk into my place of business. In fact, even my postman drives up to the door for mail delivery.

I would hope that when congress enacts such laws, that they would not let the civil servents, who in my mind know very little about the real world of business, write the regulations for these laws.

(b)(6)
01-01508

Please, before you vote on these things, know what is there, debate them, correct them, think of everyone.

Sincerely yours,

(b)(6)
President

The Honorable Richard G. Lugar
United States Senator
SH 306 Senate Office Building
Washington, D.C. 20510

Dear Senator Lugar:

This letter is in response to your inquiry on behalf of your constituent, (b)(6) , concerning the obligation of places of public accommodation to accommodate persons with disabilities.

Title III of the Americans with Disabilities Act (ADA) bans discrimination on the basis of disability by places of public accommodation. The ADA requires that such entities remove barriers to access by individuals with disabilities, including those who use wheelchairs, to the extent that removing the barriers is readily achievable. In situations where barrier removal is not readily achievable, an entity must make its goods and services available through alternative methods, such as the provision of curb service, if those methods are readily achievable. With regard to the provision and maintenance of parking spaces for persons with disabilities, the Department's regulation specifically includes the creation of designated accessible parking spaces as an action that a public accommodation may take to remove architectural barriers.

These requirements are more fully explained in the regulations for title III issued by the Department of Justice (enclosed) at sections 36.304 and 36.305 and in the Department's Title III Technical Assistance Manual (also enclosed) at pages 28-35 and 37-38. If (b)(6) believes that he or his wife has been discriminated against on the basis of disability, he has two enforcement options under the ADA: (1) He may secure private legal representation and bring an action in Federal court, or (2) he may file a complaint with the Department of Justice.

cc: Records, Chrono, Wodatch, Bowen, Russo, McDowney, Library,
FOIA
Udd:Russo:Cong.Lugar (b)(6)
01-01510

If(b)(6) chooses to file a complaint with the Department of Justice, he should send any relevant information to the Office on the Americans with Disabilities Act, Civil Rights Division, U.S. Department of Justice, Post Office Box 66738, Washington, D.C. 20035-9998. All complaints should be in writing and should set forth, in as complete a manner as possible, the factual circumstances surrounding the complaint.

I hope this information is of assistance to you in responding to your constituent.

Sincerely,

James P. Turner
Acting Assistant Attorney General
Civil Rights Division

Enclosures (2)
01-01511

(b)(6)
Lawrence, IN

July 2, 1992

Dear Senator Lugar:

I am a person with a physical handicap, and I am writing out of concern for myself and other handicap individuals.

It is commonly known to me that Federal Law #504 requires businesses and other public places to provide equal access and opportunities/services for handicap individuals (i.e. ramps, handicap parking, etc.). However, I am also commonly aware that many, many times I see these rules violated (i.e. non-authorized parking in handicapped spaces, no ramps provided or restrooms, etc.). Many times, I have confronted business establishments with much inconvenience and risk on my part. Sometimes, this has been with success; however, other times my efforts have been in vain.

On one particular occasion, I called the police to take action on unauthorized parking in a handicap space, and I was told that they could not do anything because the owners of the property were not supportive of police involvement.

On another occasion, my wife was unable to walk, and in a lot of pain while waiting on a hip replacement. She went to the drive up at Merchants Bank to close our checking, and she was told "you have to come in." My wife explained her situation, and she was again told that basically it did not matter, she still had to come in. When I confronted the Castleton Branch Manager about this, and that there was not a ramp, handicap space, or accessible restrooms, I was told "Well if any handicap person wants to use our services, all they have to do is call me, and I will help them in." My response was simple, "handicap people have the right to use your services like anyone else." The manner he suggests to provide access is without dignity and respect. To this day, there still is not a ramp, handicap parking space, accessible restrooms, or equal services provided at the drive up window.

I find these (2) situations to be frustrating because there is not an agency to report these violations to. Essentially, we

have a law without anyone to enforce it. The EFOC and the Civil Rights office stated that I would have to bring suit against these people on my own, with my own funds. At any rate, the current process is not going to help handicap individuals stand up for themselves any easier.

Something needs to be done to keep situations like those I to make sure these rules are properly enforced.

Furthermore, are you aware that businesses do not provide a discount to disabled/handicap individuals as they do for senior citizens. This does not seem to be acceptable or fair. Many disabled people live on low incomes, and could use this benefit.

If I can be of any assistance, please feel free to notify my at the address and telephone number above.

Thank you for your time,

(b)(6)

DJ 202-PL-285

SEP 14 1992

Mr. Dan E. Neal
Neal & Eng
1361 Pearl Street
Eugene, Oregon 97401

Dear Mr. Neal:

This letter is in response to your recent inquiry concerning the application of the Americans with Disabilities Act to your law office.

The Americans with Disabilities Act authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the Act's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

Title III of the Americans with Disabilities Act prohibits public accommodations from discriminating in the provision of goods, services and facilities on the basis of a disability. The Act and the Department's implementing regulation specifically include attorney's offices in the definition of public accommodation and require them to remove architectural barriers in existing facilities, where such removal is readily achievable. "Readily achievable" is defined as those activities which are easily accomplishable and able to be carried out without much difficulty or expense, keeping in mind the overall resources available to the public accommodation and the nature and cost of the action needed, among other considerations.

With respect to the specific areas identified in your letter, you are obligated to ensure access to your facility for persons with disabilities, on a readily achievable basis. You may be required to install a ramp or other means of gaining physical access to your offices. You are required to make all modifications to bathrooms specified in the Accessibility

cc: Record Chrono Wodatch Magagna Millerc.neal.pl

Guidelines, appended to the enclosed regulation, and are required to widen entrances in your office, to the extent that you can do these modifications without much difficulty or expense.

Please note that there is no exemption in the Americans with Disabilities Act for buildings which have historic value. Indeed, even buildings eligible for listing in the National Register of Historic Places or designated as historic under State or local law are required to comply with the Americans with Disabilities Act to the maximum extent feasible. Where it is not feasible to comply in a manner that will not threaten the historic significance of the building, alternative methods of access must be provided.

If you offer your clients the opportunity to make outgoing telephone calls on more than an incidental convenience basis, a TDD must be made available on request. In addition, you may be required to make other revisions or modifications to your policies and practices. For example, you are required to ensure effective communication with your clients who have disabilities. In some cases, this may mean that you will be required to provide some form of auxiliary aid, such as a sign language interpreter, for a hearing impaired client.

I have enclosed copies of the Department's regulation under title III of the Americans with Disabilities Act, as well as our Technical Assistance Manual. These materials will provide you with further guidance as to your obligations under the Act.

I hope this information is of assistance to you.

Sincerely,

Joan A. Magagna
Deputy Director
Office on the Americans with Disabilities Act

Re: Compliance with ADA at 1361 Pearl Street
Eugene, Oregon

To Whom It May Concern:

I understand that your office is available to provide technical assistance and advice on compliance with the ADA. In reviewing the ADA, I believe that our law office is in compliance but I would be most grateful if you would review the situation, as I outline it in this letter, and provide me with your comments. Our law office normally employs three individuals for staff support in addition to serving as the office for four attorneys. The office is the sole occupant of a two story building with approximately 2000 square feet. Two of the attorney's offices are located on the second floor which is accessible by a staircase. The office has one doorway which is open to the public. Entrance to the doorway requires one to climb two steps. I believe that the width of the doorway is less than would be required in new construction. The building itself is nearly 100 years old and is of a somewhat Victorian style. I have been contacted by the local government's Historic Review Board on several occasions about the possibility of having the property formally listed as a historic structure, but thus far, I have been reluctant to ask for the property to be so listed. However, I am quite sensitive about preserving the building. Such structures are rare in Eugene and I believe that it is of value to the community at large to preserve historic structures such as this office.

Our office engages in the private practice of law. In addition, we offer services as court appointed counsel for

qualified members of the public. The City of Eugene provides an office at City Hall where we can perform public defender services. This alternative location is in full compliance with the ADA, as I understand it.

My review of the Act leads me to conclude that we are under no obligation to modify our telephone system (i.e., because there are no pay phones in our building, TDD's aren't required, correct?), install a handicap access ramp, modify our bathroom or widen any

doorways. In addition, I understand that we are under no obligation to undertake any other revisions. If you believe that this conclusion may be incorrect, please let me know as soon as possible. Please feel free to call and you certainly may call collect if you wish. Thank you for your assistance in this matter. I look forward to hearing from you.

Sincerely,

Dan E. Neal

DEN:pap

SEP 14 1992

The Honorable Bill Richardson
U.S. House of Representatives
204 Cannon House Office Building
Washington, D.C. 20515-3103

Dear Congressman Richardson:

This letter is in response to your inquiry on behalf of your constituent, Jack C. Milarch, Jr., who represents the New Mexico Home Builders Association.

The Americans with Disabilities Act (ADA) authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's requirements. However, it does not constitute a legal interpretation, or legal advice, and it is not binding on the Department.

Mr. Milarch opposes efforts in the State of New Mexico to adopt the Americans with Disabilities Act Accessibility Guidelines into the State's building code. The attachments to Mr. Milarch's letter indicate that his organization believes that incorporating the ADA's accessibility standards into the State code would impose a greater obligation on entities constructing or altering facilities than would the ADA itself. This rationale confuses the ADA's requirements for new construction and alterations with its requirements for making "readily achievable" changes to existing buildings.

Title III of the ADA establishes the following requirements for new construction and alterations to existing facilities: For new construction, the ADA requires that a facility comply with

the ADA Accessibility Guidelines. The only exemption from this requirement is where making a particular feature accessible would

cc: Records; Chrono; Wodatch; Blizard; Novich; McDowney; FOIA.
udd:blizard:ada.interpretation.richardson.2
01-01518

be structurally impracticable. This standard does not permit exemptions based on the financial status of the building owner. When alterations are performed to existing buildings, the ADA requires that the altered portions be made accessible to the maximum extent feasible. As with new construction, alterations must meet the ADA Accessibility Guidelines. The phrase "to the maximum extent feasible" allows consideration of the existing structure's technical limitations, not the financial status of the covered entity. The only situation in which cost is a factor in determining ADA obligations for alterations is the determination of the amount that a covered entity is required to spend to provide an accessible path of travel to an altered area containing a primary function of the facility.

For existing facilities that are not otherwise being altered, title III of the ADA establishes a distinct requirement that covered entities remove architectural, transportation, and communication barriers to access if removal is readily achievable. "Readily achievable" is the least rigorous standard and permits consideration of the financial condition of the covered entity. In undertaking readily achievable barrier removal, places of public accommodation should comply with the ADA Accessibility Guidelines if it is "readily achievable" to do so, but they are permitted to deviate from the standards if strict compliance would not be readily achievable.

I have enclosed a copy of the Department's regulation implementing title III and our title III Technical Assistance Manual. You may refer to Section 36.401 at pages 35599-600 and 35574-80 of the title III regulations for a discussion of new construction requirements; sections 36.402 to 36.406 at pages 35600-02 for a discussion of alterations; and section 36.304 at pages 35597-98 and pages 35568-71 for a discussion of barrier removal.

The ADA does not require States to amend their building codes to incorporate the ADA Accessibility Guidelines, but it does establish a procedure by which States can have their building codes certified as meeting the ADA's accessibility standards. Certification will not change an entity's obligations under State or Federal law, but it will streamline the process of design and construction for architects and builders by permitting them to rely on the State or local code provisions to determine what is required, rather than having to consult both State and Federal rules. The Department of Justice is working to educate State and local officials about the certification process and to encourage these officials to seek certification of their codes. Certification is discussed in the enclosed title III regulation

at sections 36.601-36.608 at pp. 35603-04 and at pages 35590-92 and in the enclosed Manual at pages 68-73.

01-01519

I hope this information is helpful to you in responding to Mr. Milarch.

Sincerely,

James P. Turner
Acting Assistant Attorney General
Civil Rights Division

Congressman Bill Richardson
204 Cannon House Office Building
Washington, D.C. 20515

Dear Congressman Richardson,

Thank you for taking time out of you busy schedule last week to meet with the delegation from the New Mexico Home Builders Association. We particularly appreciate commitment from you and your staff to investigate problems being created by Americans with Disabilities Act as it relates to our building codes.

I have enclosed a packet of information which will give you additional background information on this subject.

We are very concerned about the speed with which efforts to codify strict interpretations of ADA are proceeding. There is no doubt that business operators and building owners know nothing of these efforts, let alone the effect they will have on their buildings. The only backstop for this seems to be the U.S. Department of Justice.

You indicated it was your belief that Congress did not intend this interpretation of ADA. We need your help in preventing an unintended reaction to the new law.

If you or your staff have questions please call me anytime. Thank you.

Sincerely,

Jack C. Milarch, Jr.
Executive Vice President

BUILDING CODE ADOPTION HEARINGS

AMERICANS WITH DISABILITIES ACT & THE UNIFORM BUILDING CODE

NMHBA CALL TO ACTION

- Support adoption of the 1991 Uniform Building Code WITHOUT the inclusion of Chapter 31, and the Appendix, concerning Site Accessibility.

- Oppose any further inclusion of Americans With Disabilities Act references in our building code, such as the proposed ADAAG document.

CONTACT YOUR CONSTRUCTION INDUSTRIES COMMISSIONERS
MAKE THEM AWARE OF THE FOLLOWING:

- The Federal Government will enforce the Americans With Disabilities Act (ADA), along with other civil rights acts, whether or not the New Mexico building code includes ADA. States are not required to certify their building codes as equivalent to ADA. Congress did not grant funds to the states to enforce ADA.

- ADA is phased to gradually impact more businesses over a period of time. This phasing is lost if Americans With Disabilities Act Architectural Guideline (ADAAG) requirements are brought into the building code. Building owners would lose rights granted by Congress.

- Congress provided certain flexibility in the ADA law which may be lost if ADA Standards of Construction are put into the building code. For example, ADA allows a business owner to be exempt from ADA requirements if the business is financially weak. Code officials would have difficulty accommodating this.

- The New Mexico Legislature specifically declined to fund ADA related education of our building officials and inspectors. It is essential that building owners and their contractors be able to predict the responses of code official to particular building designs.

- Contractor licenses should not be jeopardized because of building owners decisions regarding construction details.

- The proposed Chapter 31 of the Uniform Building Code is inadequate for ADA compliance.

SEPT 15 1992

The Honorable Newt Gingrich
U.S. House of Representatives
2438 Rayburn House Office Building
Washington, D.C. 20515-1006

Dear Congressman Gingrich:

This letter is in response to your inquiry on behalf of your constituent, Mr. (b)(6)about requirements of the Americans with Disabilities Act Accessibility Guidelines for Buildings and Facilities (ADA Guidelines). (b)(6) specific concern is the application of maximum reach height limitations for storage shelves and hanging rods to display units in retail sales areas.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that are subject to the Act. Therefore, this letter provides informal guidance to assist you in responding to your constituent. However, this technical assistance does not constitute a legal interpretation by the Department and it is not binding on the Department.

The ADA Guidelines contain both scoping and technical provisions that set out accessibility requirements for different types of facilities and elements. The scoping provisions that apply to (b)(6) concerns are contained in section 4.1.3(12)(b) of the ADA Guidelines and require only that shelves or display units that allow self-service by customers be located on an accessible route. That section further states explicitly that "requirements for reach range do not apply." Thus the technical requirements for reach height limitations set out in ADA Guidelines sections 4.2.5 and 4.2.6, referred to by (b)(6) do not apply to shelves or display units. These provisions were developed specifically to address many of the concerns expressed in (b)(6) letter. I am enclosing a copy of the regulations with this section marked (p. 35615).

cc: Records; Chrono; Wodatch; Lusher; McDowney; FOIA; MAF.

(b)(6)

Fred Aiken
Field Director
P.O. Box 71028
Suite 140
Marietta, Georgia 30007-1028

Dear Fred:

This letter is in response to our conversation about the A.D.A. law passed by Congress. I apologize for the delay, but it is a comprehensive law and I am having to learn it as I do work relating to the regulations. Its intent is good, but its effect is disastrous for small property owners and business in certain key areas.

The largest problem is 4.2 which deal with the height and minimum reach for shelving or rods for hanging. The maximum height is either 48 inches for forward reach (4.2.5) or 54 inches for side reach (4.2.6). Additionally, the lowest shelf allowed is either 15 inches for forward reach (4.2.5) or 9 inches for side reach (4.2.6). Currently we have rods and shelving as high as 77 inches and as low as 4 inches and carry the amount of stock that we do. This is necessary in order to double hang the merchandise. Men's, lady's and most children's clothes are too long to be able to double hang within 48 to 54 inches. As a matter of fact, many woman's dresses and jeans cannot be hung within that range unless it lays partly on the floor.

To hang the same merchandise per the guidelines would require about a third to a half more space than we currently have. It would also increase the cost of the merchandise due to the following factors: 1) additional rental cost of the extra space 2) additional heating and air cost for the additional space 3) additional cost for electricity 4) additional loss to shoplifting due to more area being available and observed by the same amount of employees. This will seriously effect the cost of doing business for us and other small business when it is increasingly harder to compete against the big stores.

The option for the small store is to expand and increase costs or carry less merchandise. To carry less merchandise can translate in loss of sales and an increase cost to the smaller amount of merchandise for sale. Also that can effect back up the line to the manufacturer who loses sales due to less inventory being carried by its customers and then less jobs.

On this particular item, I request that the regulation be changed to allow for a maximum rod height of 76 inches so that the merchandise can be double racked and properly displayed. One item

that the regulations do not take into consideration, is that stores like ours have clerks there to help. If, something is out of reach for a customer, disabled or not, we get the merchandise for the
01-01526

customer.

We are in the process of moving to our new and smaller location and should be in the location by July 5, 1992. We are a business with under 10 employees and have gross receipts of less than $500,000.00.

Pursuant to Sections 36-401 and 36-402, two conflicting dates are given for compliance. It appears that if the store already has non complying fixtures prior to one date (January 26, 1993) in one area it is safe and may continue in noncompliance. Is there a way of getting a letter from the appropriate authority that will grant permission or confirm that it is legally sufficient to have rods and shelves a maximum height of 77 inches? The space we are moving into is the old First National Bank Building. We have almost completed renovation of the first floor at this point.

Was there any bill or regulation that was passed that delayed the effective date of the regulation? This may also make a difference if we are in the store prior to any delayed effective date.

If you have any questions, you may contact me at xxxx(b)(6) (work) or xxxxx(b)(6) Again, I apologize for the delay of this letter. I will send you other suggestions as I wade through the process.

Sincerely,

Xxxxxx
Vice President,
01-01527

The Honorable Jesse Helms
United States Senate
403 Dirksen Senate Office Building
Washington, D.C. 20510-3301

Dear Senator Helms:

This letter is in response to your inquiry on behalf of your constituent, Boyce B. Dobbins, concerning the application of the Americans with Disabilities Act (ADA) to floor mats.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities with rights or obligations under the Act. This letter provides informal guidance to assist Mr. Dobbins in understanding the ADA. However, this technical assistance does not constitute a legal interpretation of the statute and it is not binding on the Department.

The ADA Accessibility Guidelines (Guidelines) were issued by the Department of Justice as one portion of the regulations implementing title III of the ADA (enclosed). The Guidelines apply only to the design, alteration, and new construction of buildings and facilities, not to movable furniture and equipment, and not to existing facilities not undergoing alterations. If floor mats are not actually built-in as a part of a building or facility, they will not be subject to the provisions of the Guidelines. However, if floor mats are built-in as part of new construction or alterations, and are part of an accessible route, they must comply with the Guidelines, particularly section 4.5.1 General (which requires that "Ground and floor surfaces . . . shall be stable, firm, and slip resistant") and section 4.5.2 Changes in Level. Floor mats are not considered carpeting and, therefore, are not subject to the requirements of section 4.5.3 of the Guidelines.
cc: Records; Chrono; Wodatch; Bowen; Lusher; FOIA; Friedlander.
:udd:bowen:cong.helms2
01-01528

In addition to circumstances in which the Guidelines will apply to built-in floor mats, there may also be circumstances in which different ADA requirements apply to floor mats that are not built in. If movable floor mats impede access for people with disabilities, they may need to be moved or removed under section 36.304 of the title III regulation. That section requires that a public accommodation remove barriers in existing facilities where removing them is "readily achievable," that is, easily accomplishable and able to be carried out without much difficulty or expense. Even though the requirements of the Guidelines would not apply to the mats themselves, the Guidelines can provide helpful guidance in ensuring that mats do not constitute barriers.

I hope this information is helpful in responding to your constituent.

Sincerely,
W. Lee Rawls
Assistant Attorney General

Satisfied Customers Are Building Our Business

August 13, 1992

The Honorable Jesse Helms
UNITED STATES SENATE
Washington, DC 20510

Dear Senator Helms:

I am writing on behalf of myself and numerous other North Carolina businesses regarding the applicability of the Americans with Disabilities Act (ADA) to mats manufactured and rented to commercial and industrial users. We urgently need written clarification on this matter.

Over the past few months, many members of our industry have been told by their customers that various ADA compliance experts have advised them that mats do not meet the specifications of the ADA Accessibility Guidelines (ADAAG). Specifically, at training seminars and through newsletters like the one I have enclosed, these experts have advised that the use of mats could violate ADDAG's Section 4.5.3, which requires that "carpet" be "securely attached" and "fastened to floor surfaces."

As a result of this advice, and without any policy interpretation to the contrary, many commercial, retail, and industrial customers have canceled their rental agreements or purchase orders for mats, fearing the prospect of finding themselves out of compliance with the ADA. Unless countered, this incorrect interpretation of the ADA could cause severe economic harm to the entire mat manufacturing and supply industry.

Mats are not carpets and, for the purposes of Section 4.5.3, ought not to be treated as such. Instead, assuming mats are intended to be covered by ADAAG at all, they ought to be subject only to the general provisions of Sections 4.5.1 and 4.5.2, which relate to "Ground and Floor Surfaces."

Section 4.5.1 requires that ground and floor surfaces be "stable, firm [and] slip-resistant," which of course are the very properties that characterize mats. If anything, installing mats -- rather than posing a barrier to the disabled and raising questions of compliance with the ADA -- is one of the easiest and

least expensive things that retail, commercial, and industrial establishments can do to make their places of business more accessible, particularly to those who are ambulatorily disabled.

Whatever assistance you could render as soon as possible would be greatly appreciated. Quite obviously, the longer this incorrect application of the ADA to mats is allowed to continue, the greater the damage will be to mat manufacturers and suppliers in North Carolina and elsewhere.

Thank you very much for your attention to this matter.

Sincerely yours,
BOYCE B. DOBBINS
President
North Carolina Association
of Textile Services

from this information.

H O R T O N

Gary Rosenhamer, CIC, CPCU

INSURANCE AGENCY, INC.

New ADA Legislation Takes Effect

The Americans with Disabilities Act (ADA) officially took effect January 26, 1992. The first phase of the law applies to public accommodations and governmental agencies. These include restaurants, theaters, offices, supermarkets, retailers, museums, schools and BANKS. The ADA guarantees an estimated 13 million disabled Americans equal access to business and fair hiring privileges.

By 1993, the ADA will extend to telecommunications and transportation. Generally, the law requires compliance in two areas: all physical barriers must be removed or altered to enable free access; communication aids must be provided for people with hearing, vision or speech impairments.

Obviously, strict compliance with such broad generalities will be difficult and could be costly. Alterations could range from cutting a curb to constructing a new building. Here are some tips that can be inexpensively implemented:

* Re-arrange furniture, vending machines and equipment.
* Add raised Braille lettering in elevators.
* Post directional signage.
* Remove loose rugs and door mats.
* Install paper cup dispenser beside and otherwise inaccessible water fountain.
* Rewrite job descriptions for disabled employees.
* Hire a part-time employee or student to assist disabled customers or provide "curb service" banking.
* Have one of your employees learn sign language.
* Remove crowd control ropes and dividers in front of teller windows.
* Check building codes revisions before you plan new construction.
* Install ramps around steps.
* Make your landlord aware of the law. Owners are normally responsible for building compliance.
* Install offset hinges to widen doors.
* Install grab bars in bathrooms.
* Provide adequate handicapped parking spaces, including van access areas.
* Provide a portable table as counter desktop for wheelchair accommodations.
* Change door hardware to met new ADA specifications.
* Remove pay phones.
* Post emergency exit routes.

* Make all employees aware of the law.

These are just a few of the many factors any business should consider when reviewing this new law. At the HORTON INSURANCE AGENCY, we realize the effect new legislation may have on bottom lines. We have a professionally staffed risk management department capable of assisting your bank with customer safety and employee training. The law is untested at this time, but it has already facilitated litigation discrimination. Most of the recommendations above are less costly then defending against such litigation.

Ms. (b)(6)
P.O. XX
Lorraine, New York XXXXX

Dear (b)(6)

This letter is in response to your request for information about Federal laws pertaining to closed captioning. At least four Federal requirements deal with the provision of closed captioning: titles II, III, and IV of the Americans with Disabilities Act (ADA), and section 504 of the Rehabilitation Act of 1973, as amended.

Title II of the ADA prohibits discrimination on the basis of disability in all programs, activities, and services provided or made available by State and local governments, instrumentalities, or agencies, regardless of the receipt of Federal funds. Title III of the ADA covers public accommodations such as shopping centers, doctors' offices, museums, zoos, private schools, and other private establishments. Copies of the title II and III regulations and manuals explaining the regulations are enclosed.

Regulations implementing titles II and III require the provision of auxiliary aids and services by public and private entities where necessary to ensure effective communication with an individual who is deaf or hard of hearing (section 35.160, p. 35721, of the title II rule; and section 36.303, p. 35597, of the title III rule, respectively). For individuals with hearing impairments, auxiliary aids and services include, but are not limited to, qualified interpreters, closed captioning, and transcription services such as computer aided real-time transcription (section 35.104, p. 35717, of the title II regulation; and section 36.303 (b) (1), p. 35597, of the title III regulation).

The title II regulation covers television and videotape programming produced by public entities. Access to audio portions of such programming may be provided by closed captioning. Page 35712 of the title II regulation explains this concept.

:udd:mather:ltr.cedar
cc: Records, CRS, FOIA, Friedlander (3), Mather, Breen
01-01533

The title III regulation, section 36.307, p. 35598, does not require that video-tape rental establishments stock closed-captioned video tapes, although the most recent titles in the establishments are, in fact, close-captioned. Further discussion of this point can be found on p. 35571 of the title III regulation. Neither are movie theaters required by title III to present open-captioned films. However, other public accommodations that impart verbal information through soundtracks on films, video tapes, or slide shows are required to make such information accessible to persons with hearing impairments. Captioning is one means to make the information accessible to individuals with disabilities. Page 35567 of the title III regulation explains this concept.

Title IV of the ADA requires that any public service announcements that are wholly or partially funded by the Federal government include closed captioning of the verbal content of the announcement. Individual television stations will not be required to supply the closed captioning for any announcements that do not include closed captioning. For more information on this requirement, please contact the Federal Communications Commission, which is responsible for implementing and enforcing title IV.

Section 504 of the Rehabilitation Act of 1973, as amended, prohibits discrimination on the basis of handicap in federally conducted and assisted programs. Like the title II regulation, regulations implementing section 504 require that Federal agencies and recipients provide auxiliary aids and services whenever necessary to ensure effective communications with members of the public. Services include the provision of closed captioning.

I hope this information is helpful to you.

Sincerely,

Stewart B. Oneglia
Chief
Coordination and Review Section

Thank you,

(b)(6)

01-01535

DJ 202-PL-30

SEP 17 1992

(b)(6)
XXXXXXXX
Nanticoke, Pennsylvania XXXXX

Dear Mr. (b)(6)

This is in response to your letter requesting information about the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation or legal advice, and it is not binding on the Department.

You ask whether titles II and III of the ADA apply to the conversion of a fire-damaged hotel into a personal care center for the elderly where inspection, licensing, and occupancy will occur after January 26, 1992. You also ask whether the State can obtain a waiver of the Americans with Disabilities Act Accessibility Guidelines (ADAAG) for this building. You indicate that the facility will receive financial assistance from a state or local government.

Title II of the ADA applies to the programs, activities, and services of State or local governments. It does not apply to private entities that receive assistance from a State or local government. Thus, if the facility in question receives financial assistance but is not owned or operated by the State or local government, title II does not apply. If the facility receives Federal funding, the Rehabilitation Act of 1973 applies and bans discrimination on the basis of disability and prescribes accessibility requirements for the facility.

Title III of the ADA applies to privately owned or operated facilities that fall within one of the twelve categories of "places of public accommodation" listed in that title. If the facility provides a significant enough level of social services that it can be considered a social service center establishment,

cc: Records, Chrono, Wodatch, Magagna, Novich, Friedlander, FOIA

it is thus covered by title III. Social services in this context include, for example, medical care, meals, transportation, and counseling. If, however, the facility is strictly residential in nature or only minimal services are provided to residents, it is not covered by title III. In this situation the facility may be covered by the nondiscrimination and accessibility requirements of the Fair Housing Act, as amended. A facility that provides extensive "personal care" services is likely to be a social service center establishment covered under the ADA.

Assuming the facility is covered as a place of public accommodation under title III, and assuming that the conversion is a building alteration rather than a new construction project, the title III alterations requirements apply, if the alteration began after January 26, 1992. If so, the alteration must meet the standards of the ADA Accessibility Guidelines "to the maximum extent feasible." If the alteration began before January 26, 1992, the building is subject to the requirements applicable to existing facilities -- that is, to remove architectural barriers to accessibility where it is "readily achievable" to do so.

No State or municipality may obtain a waiver of ADA requirements or architectural standards. A State or municipality may obtain from the Department of Justice a certification that its standards meet or exceed ADA requirements. The certification process allows for public notice, comment and hearing. A building that is constructed in strict compliance with a certified code, without waivers or variance, may use the certification as rebuttable evidence of ADA compliance.

State and local governments are not required to obtain certification or to enact building codes that conform to the ADA, nor are State or local officials required to enforce the requirements of the ADA. However, owners and builders should be aware that compliance with State or local accessibility code requirements may be insufficient to meet their ADA obligations.

For further discussion of these issues, please consult the enclosed ADA regulations under titles II and III and Technical Assistance Manuals dealing with both titles.

I hope this information is useful to you.

Sincerely,

John L. Wodatch
Director

Office on the Americans with Disabilities Act

Enclosures (4)

01-01537

Dec. 7, 1991
(b)(6)
Nanticoke,Pa.

XXXX

Dear Sir,

Recently I contacted the Penna. Dept. of Labor and Industry to find out if a fire damaged hotel in my community, being converted to a 75 room personal care center for the elderly, and scheduled to be inspected,licensed and opened after Jan. 26, 1992 had to comply with Title II & III of the Americans with Disabilities Act for accessibility. It is to receive financial help from what I believe to be an instrument of the state and local government.

I was told that Labor and Industry will address this after Jan.1,1992 and then he proceeded to tell me how Pa. would like to get a waiver from the federal govt., to use their standards of accessibility instead of the Architectural Barriers Comm. standards.

Some parts of the project, such as concrete work, have a life expectancy of decades and will effect the disabled for many years. I would like to know if projects in Pa. scheduled to be completed, licensed and opened after Jan. 26,1992 are covered by Title II & III of the Act? If so, then why isn't Labor and Industry enforcing it?

As for the waiver of your standards, I am against it. A disabled person traveling around the country has a right to know what to expect. That is what's meant by the term "Uniform"standards. A disabled person should not have to check out all irregularities of design to see if that particular state has different rules or had a shoddy inspector or granted some political croonie a varience. Standards should be uniform in all states. If such a waiver is granted however, it should state that in conflicting rules, the more stringent of the two rules shall apply.

Sincerely,

(b)(6)

01-01538

202-PL-00097

SEP 19 1992

Mr. Todd Corey
Project Architect
Henningson, Durham & Richardson, Inc.
8404 Indian Hills Drive
Omaha, Nebraska 68114-4049

Dear Mr. Corey:

This letter responds to your correspondence regarding the application of the Americans with Disabilities Act (ADA) to toilet rooms containing one toilet and one lavatory.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities with rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA accessibility standards. However, this technical assistance does not constitute a legal interpretation of the statute and it is not binding on the Department.

Following are answers to each of your questions as written in your letter dated October 22, 1991, a copy of which is enclosed.

#1 - The clear floor space required at the toilet shown in Fig. 28 in the Americans with Disabilities Act Accessibility Guidelines (ADAAG), the clear floor space at the lavatory shown in Fig. 32, and the turning space complying with Section 4.2.3. may overlap according to ADAAG 4.22.3.

#2 - Although there is no restriction against swinging a door into a toilet room, 4.22.2 stipulates that doors shall not swing into the clear floor space required for any fixture. A door swing may encroach upon only the required turning space.

#3 - The architect would comply with the local code by designing to local requirements. But he or she must also comply with the ADA, even if the ADA imposes stricter requirements.

cc: Records, Chrono, Wodatch, Bowen, Friedlander, FOIA
Udd:Cager:Corey
01-01539

#4 - Section 4.1.3(11) requires that, in new construction, each public or common use toilet room or bathroom be accessible. Staff locker rooms and toilets are considered "common use" facilities. They are similar on this respect to employee lounges and exercise facilities, discussed at page 35557 (column 1) of the title III regulation (enclosed).

#5 - Yes. All common use toilet rooms and bathrooms must be accessible with at least one of each type fixture provided in each room being accessible.

#6 - Yes. A staff toilet in a newly constructed surgery suite would be considered a common use toilet room and would be required to be accessible.

#7 - Yes. A unisex toilet room, if provided for nursing station staff, would be required to be accessible when newly constructed.

#8 - Yes. Section 4.1.3(11) requires that, in new construction, each public or common use toilet room be accessible regardless of proximity.

#9 - If the local building or plumbing code allows the installation of a unisex toilet room for the use of staff, and if it were built in compliance with the appropriate ADAAG requirements, it would be in compliance with the ADA regulations.

#10 - If a toilet room is built for the use of a single occupant of a specific space, it may be adaptable. A toilet room is considered to comply with the ADAAG definition of adaptability if all space requirements have been met and the walls are prepared for the future addition of grab bars.

Attached please find a marked-up copy of your sketch and a copy of the Technical Assistance Manual for title III. We hope these answers and materials will assist you in complying with the ADA.

Sincerely,

John L. Wodatch

RE: Code Issues

Dear Sir:

Regarding the Federal Register printed July 26, 1991, I would like to ask your assistance in clarifying some issues.

The first series of questions deal with Section 4.16, Water Closets, which pertain to "water closets not in stalls". Figure 28 shows the clear floor space required to access the fixture. Other provisions of the code require a 60 inch turning circle within the toilet. It is my assumption that these two measures of accessibility may, in fact, overlap.

Question 1: Is this true?

Question 2: In many cases, even in new construction, it is not feasible to swing the door out. In fact, it can be hazardous to swing a door into an exit corridor. Assuming the door can swing into a handicap accessible toilet, by how much can the door swing overlap the turning circle and/or the clear floor space requirements?

I have attached an illustration from an Illinois code which addresses the same issue. Another example; I'm told North Carolina allows a 12 inch maximum overlap. Further clarification on this matter would help many others like myself who work in various jurisdictions.

Question 3: Obviously a local authority may impose more stringent requirements than those contained in the ADA Code. However, when the local code criteria is less stringent than the ADA criteria, is it lawful for an architect to knowingly use the lesser criteria?

The ADA regulations seem to concentrate on the areas of public accommodations, however, within the Health Care Occupancy Group, there are some questions which frequently occur. These are in regards to provisions for staff, including locker rooms and staff toilets.

Question 4: Does the ADA require that staff locker rooms be provided which are accessible?

01-01541

Question 5: If the answer to question 4 is yes, then does this apply to all categories of locker rooms, i.e. doctors lockers, nurses lockers, etc.?

Question 6: If a staff toilet is provided within an area such as Surgery Suite, must it be accessible?

Many times a single unisex toilet room is provided for a limited use situation, such as near a nurse station for staff.

Question 7: Would this require accessibility?

Question 8: Would this require accessibility even if an accessible public toilet is nearby?

Question 9: If it were designed to be accessible, would a single unisex staff toilet suffice?

On a given floor of a new office building, accessible public toilets have been provided. Within a suite on that floor a tenant has additionally provided a staff toilet.

Question 10: Will this toilet be required to be accessible?

I would appreciate your thoughts on these matters. Thank you very much.

Sincerely,

HENNINGSON, DURHAM & RICHARDSON, INC.

Re: Americans with Disabilities Act Accessibility Guidelines

Dear Mr. Martin:

Thank you for your letter regarding the accessibility standards required by the Americans with Disabilities Act (ADA). I am pleased to hear that you found the Jacksonville seminar useful. I apologize for the delay in responding to your inquiry, which has resulted from the large volume of requests we have received for interpretations of the ADA.

The ADA authorizes the Department of Justice to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you in understanding how the ADA may apply to you. However, this technical assistance does not constitute a determination by the Department of Justice of your rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

We have reviewed the mailing attached to your letter. We have clarified some of the statements therein and referred to the applicable sections of either the title II or title III regulation. Please keep in mind that, in some cases, requirements differ according to whether the facility in question is constructed or altered by, on behalf of, or for the use of an entity covered by this Department's title II regulation, or whether it is a place of public accommodation or a commercial facility covered by the title III regulation. All regulatory references contained in discussions below relating to title II

:udd:pecht:martin.ltr
cc: Records, CRS, FOIA, Friedlander (3), Pecht, Breen
01-01544

are to the title II regulations to be codified at 28 C.F.R. Part 35. Title III references are to the regulations to be codified at 28 C.F.R. Part 36. Copies of both sets of regulations as well as both the title II and title III Technical Assistance Manuals are enclosed.

1. "All new construction which is begun after January 26, 1992 must comply with these new requirements [referring to the Americans with Disabilities Act Accessibility Guidelines (ADAAG)]." This statement is misleading with respect to both titles II and III, although for different reasons.

   A. Title II - New construction and alterations that are commenced after January 26, 1992, must meet ADA accessibility requirements. See S 35.151. However, the use of ADAAG is not mandated. Instead, the design must conform to either the Uniform Federal Accessibility Standards (UFAS) or ADAAG, except that the elevator exemption contained in sections 4.1.3(5) and 4.1.6(1)(j) of ADAAG is not available. The preamble to S 35.151 states that facilities under design on January 26, 1992, will be governed by that section if the date that bids were invited falls after that date.

   B. Title III - Any alteration to a place of public accommodation or commercial facility undertaken after January 26, 1992, must comply, to the maximum extent feasible, with ADAAG. See S 36.402(a)(1). An alteration is undertaken after January 26, 1992, if physical alteration to the property begins after that date. The preamble to S 36.402 notes that the Department will interpret the provision to apply to alterations that require a permit, if physical alterations made pursuant to the terms of the permit begin after January 26, 1992.

   The requirements for new construction are somewhat more complex. New facilities designed and constructed for first occupancy after January 26, 1993, must be constructed in accordance with ADAAG. As S 36.401(a)(2) states:

   For purposes of this section, a facility is designed and constructed for first occupancy after January 26, 1993, only

   (i) If the last application for a building permit or permit extension for the facility is certified to be complete, by a State, County, or local government after January 26, 1992 (or, in those jurisdictions where the government does not certify completion of applications, if the last application for a building permit or permit

extension for the facility is received by the State, County, or local government after January 26, 1992); and

(ii) If the first certificate of occupancy for the facility is issued after January 26, 1993.

Therefore, the actual date construction commenced is irrelevant for purposes of determining whether compliance with ADAAG is required.

However, when compliance with UFAS or ADAAG is required as described above, the mailing is correct in stating that "[P]lans reviewed by State and local inspection authorities (for compliance with ANSI 117.1 and the Barrier Free Design Standard) WILL NOT MEET the new requirements!"

2. "All existing buildings and facilities must be brought into compliance with the provisions of ADA by January 26, 1992. Buildings which were constructed in accordance with ANSI 117.1 and/or the Barrier Free Design Standard WILL NOT MEET the new requirements for existing buildings."

A. Title II - State and local governmental entities are not required to remove physical barriers in all existing buildings or to bring existing buildings into compliance with any particular design standard as long as they make their programs accessible to individuals who are unable to use an inaccessible existing facility. See, S 35.150. However, such entities may need to make some changes to existing facilities if program access cannot be achieved through alternative methods such as relocating a public service from an inaccessible to an accessible location. Any alterations made must comply with the standards discussed in paragraph 1(a) above.

B. Title III - Under title III, public accommodations are required to remove architectural barriers in existing facilities, including communications barriers that are structural in nature, where such removal is readily achievable, that is, "easily accomplishable and able to be carried out without much difficulty or expense." See, S 36.304. The title III regulation lists examples of readily achievable barrier removal such as installing ramps, making curb cuts at sidewalks and entrances, widening doorways, and adding raised letters or braille to elevator control buttons. What is "readily achievable" will be

determined on a case-by-case basis in light of the factors listed in the regulation (including the resources available through any parent corporation). See, S 36.104.

As with title II, public accommodations are not required to retrofit existing buildings to bring them into compliance with the Accessibility Guidelines. However, any "readily

achievable" changes made in existing facilities should generally be made in accordance with ADAAG. See, S 36.304(d) (2).

I hope this information has been useful. Thank you again for your interest in the successful implementation of the Americans with Disabilities Act.

Sincerely,

Stewart B. Oneglia

RE: Americans With Disability Act Accessibility Guidelines

Dear Ms. Oneglia:
I attended the seminar entitled "The ADA: Getting Down To Business" in Jacksonville, Florida on August 16, 1991 which you spoke at. The seminars and my conversation with you during breaks were very helpful in helping me understand the intentions of the ADA Legislation. I am writing for two reasons, the first being a request for the July 26, 1991 issue of ADA. The second reason concerns the attached mailing I received from James G. Munger & Associates, Inc.

I am very concerned about the underlined statement since I got the impression from the seminars that compliance with ANSI A117.1 would basically comply with ADA. I understand that there may be some differences and as we discussed the most stringent requirements should be complied with. Our company has been keeping our clients informed about developments concerning the ADA and I am afraid that mailings such as the attached may cause undue alarm. It is obviously an advertisement for their services, but I ask you, is it verging on untruth or at least misleading.

I would be very interested in discussing this with you to get your opinions since our company is studying this legislature carefully so that we may provide accurate advice and consulting services to our established clients and others when we feel we have an adequate understanding of it. As yet we have not advertised this service and feel the advertisements like the attached are misleading to the client, possibly scaring him into some service he may not need. Please feel free to call me if you do not have time for a written response.

Thank you for your help in this matter and I look forward to hearing from you and reviewing the up-to-date ADA Guidelines.

Sincerely,
James T. Martin, AIA/CSI/CCS
Vice President

SEPTEMBER 1991

NEW HANDICAPPED REGULATIONS ISSUED

The United States Attorney General has issued the final regulations setting out the handicapped accessibility requirements as required by the ADA. The final regulations were issued on July 26, 1991. The ADAAG (American with Disability Act Accessibility Guidelines) apply to virtually all buildings in the United States both new and existing.

All new construction which is begun after January 26, 1992 must comply with these new requirements. The enforcement of the provisions of this civil rights legislation is on the FEDERAL LEVEL ONLY. Plans reviewed by state and local inspection agencies (for compliance with ANSI 117.1 and the Barrier Free Design Standard) WILL NOT MEET the new requirements!

All existing buildings and facilites must be brought into compliance with the provsions of ADA by January 26, 1992. Buildings which were constructed in compliance with ANSI A117.1 and/or the Barrier Free Design Standard WILL NOT MEET the new requirements for existing buildings.

While these regulations affect the construction of buildings and other physical facilities, it should be remembered that the ADA is civil rights legislation. Failure to comply with the requirements can result in a civil lawsuit in Federal District Court.

Our firm is qualified to preform the review of our plans and specifications for compliance with the new requirements. Our reviewing process will help assist you and your clients in complying with the new requirements.
01-01549

SEP 22 1992

The Honorable Lloyd Bentsen
United States Senator
961 Federal Building
Austin, Texas 78701

Dear Senator Bentsen:

This letter responds to your inquiry on behalf of your constituent, (b)(6) concerning the enforcement of provisions requiring accessible parking and curb ramps for individuals with disabilities, particularly in public and private parking lots serving hospitals and other such facilities.

The Americans with Disabilities Act (ADA) authorizes this Department to provide technical assistance to individuals and entities that have rights or responsibilities under the ADA.

Therefore, this letter provides informal guidance to assist you in responding to (b)(6) However, this technical assistance does not constitute a legal interpretation and it is not binding on the Department of Justice.

Title II of the ADA requires that State and local governments with responsibility over streets, roads, or walkways provide curb ramps, giving priority to walkways serving State and local government offices and facilities, transportation, places of public accommodation, and employers. For a fuller discussion of this issue, please refer to section 35.150(d) (2) of the enclosed title II regulation and pages 19-22 of the enclosed Title II Technical Assistance Manual.

Under title III of the ADA, a public accommodation, including a private hospital or health care facility, is required to remove architectural barriers to access by individuals with disabilities in existing facilities where such removal is readily achievable. For a fuller discussion of this issue, please refer to section 36.304 of the enclosed title III regulation and pages

28-39 of the enclosed Title III Technical Assistance Manual.

cc: Records, Chrono, Wodatch, McDowney, Breen, Delaney, FOIA
Udd:Delaney:ada.cong. bentsen (b)(6)
01-01550

The ADA provides remedies to enforce the substantive provisions of the statute. Private individuals may file a court action to enforce rights under title II and title III of the ADA. They may also file complaints with the Federal government. For a further discussion of the enforcement provisions of the ADA, please refer to the enclosed title II and III regulations (SS35.170-178 and SS36.501-508) and the Technical Assistance Manuals at pages 45 and 64-67, respectively. However, neither the statute nor the implementing regulations directly address the enforcement of local parking restrictions. State and local authorities generally are responsible for ensuring that parking restrictions are enforced in accordance with state and local law.

I hope this information is helpful in responding to your constituent.

Sincerely,

James P. Turner
Acting Assistant Attorney General
Civil Rights Division

(b)(6)

Dear Senator Bentsen,

I regret having to write you on such a trivial matter in light of the great problems facing the nation. However, if you can assist me in finding the right person or agency to communicate with, I would be most appreciative.

I would like to know who the enforcing arm of the various applications of The Americans With Disabilities Act are. Of particular concern at this moment are ramps to hospitals and other such facilities. We have had one accident and many near misses with the Elderly and Handicapped vans run by the city of Port Arthur. Governor Ann Richards and State Senator Parker have assured me that legislation will be forthcoming in the next legislative session of the state of Texas to cover public thoroughfares regarding the safety of these vans. However, they are reluctant to cover private parking lots in their legislation. The city attorney has said that the city has no jurisdiction in such matters. The U.S. attorney's office in Beaumont has said that it is not a criminal offence, therefore, they do not have jurisdiction. Security at the mall in this city has said they have no teeth to enforce any sign they may put up. It seems to be overkill to send out the National Guard to see that ramps are kept clear for the elderly and handicapped to have access to a facility. However, it seems equally stupid to have a law mandating ramps to a given facility and yet not be able to enforce it. Rather frankly, I do not know where to turn.

You have been most helpful in the past. I would appreciate your assistance in this matter.

(b)(6)

01-01552

SEP 22 1992

The Honorable Bob Dole
United States Senator
444 S.E. Quincy
Topeka, Kansas 66683

Dear Senator Dole:

This letter is in response to your inquiry on behalf of your constituent, Frank Buehler, Chairman of the Claflin United Methodist Church Administrative Council. Mr. Buehler asks about the application of the Americans with Disabilities Act (ADA) to the Church.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that are subject to the Act. Therefore, this letter provides informal guidance to assist you in responding to your constituent. However, this technical assistance does not constitute a legal interpretation by the Department and it is not binding on the Department.

Section 307 of the ADA specifically provides that religious organizations and entities controlled by religious organizations are not subject to the provisions of the ADA. Thus, the Claflin United Methodist Church is not required to make improvements increasing accessibility for individuals with disabilities. Further, any improvements the Church voluntarily chooses to make would not need to comply with ADA standards. However, nonreligious entities may be subject to title III if they conduct activities in the Church facilities. Enclosed are the Department's Title III Technical Assistance Manual and the Department's implementing regulation for further guidance. A discussion of the religious exemption may be found on pages 4-5 of the Technical Assistance Manual and page 35,554 of the regulation.

cc: Records Chrono Wodatch Magagna Foran McDowney FOIA
Friedlander:udd:foran:dolecongressional

For information regarding voluntary measures by religious organizations to improve access for persons with disabilities, you may wish to direct Mr. Buehler's attention to a handbook published by the National Organization on Disability entitled "That All May Worship: An Interfaith Welcome to People with Disabilities." A copy of the handbook can be obtained by writing: National Organization on Disability, Religion and Disability Program, 910 16th Street, N.W. Suite 600, Washington, D.C. 20006.

I hope this information is helpful in responding to your constituent.

Sincerely,

James P. Turner
Acting Assistant Attorney General
Civil Rights Division

Enclosures (2)

FRANK BUEHLER
P.O. BOX 317
CLAFLIN, KANSAS 67525
JULY 25, 1992

Senator Bob Dole
141 Hart Senate Office Bldg.
Washington, D. C. 20510

Dear Bob:

The Claflin United Methodist Church anticipates making some improvements relative to accessibility for those who may have physical handicaps. One of the people who sell the equipment we are looking at tells us that we will at some point in time need to comply with Federal mandates pertaining to access for the handicapped.

In order to help us reach a decision on what equipment to install, we would like to know if there is in fact some federal requirement, and if so, to what extent would it apply to a Church building that is used exclusively for worship purposes, as opposed to a facility that is rented or made available for public use.

Could you ask one of your staff to research this problem and inform me of your determination? Since we are currently involved in. this consideration, a quick response would expedite our ability to proceed.

Claire and I are both doing well and we look forward to seeing and working for you in the upcoming campaign.

With Best Regards

Frank Buehler, Chairman

Claflin United Methodist Church
Administrative Council

SEP 22 1992

The Honorable Patrick Leahy
United States Senate
516 Senate Hart Building
Washington, D.C. 20510-4502

Dear Senator Leahy:

This letter is in response to your inquiry on behalf of your constituent, (b)(6) who is seeking advice as to the application of the Americans with Disabilities Act (ADA) to Camp Kiniya, a private children's summer camp.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that are subject to the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's requirements. However, this technical assistance does not constitute a determination by the Department of (b)(6) rights or responsibilities under the Americans with Disabilities Act, and it is not binding on the Department.

(b)(6) concerned about the expense of making Camp Kiniya's facilities and services accessible to children with disabilities. Under section 36.304 of the enclosed ADA title III regulation (pages 35,568-35,570 and 35,597-35,598), Camp Kiniya would have to remove barriers in existing facilities only where such removal is "readily achievable," i.e., easily accomplishable and able to be carried out without much difficulty or expense. Discussion of the barrier removal requirement may be found on pages 29-37 of the enclosed Title III Technical Assistance

Manual.

The focus of Camp Kiniya, which is "physical challenges," including hiking, riding, mountain climbing, waterskiing, and sailing, does not have to be changed because of the ADA. However, under section 36.302 of the enclosed regulation (pages 35,564-35,565 and 35,596-35,597), the Camp will have to make reasonable modifications in practices when necessary to accommodate individuals with disabilities, unless the

cc: Records; Chrono; Wodatch; Foran; McDowney; FOIA; MAF
:udd:foran:leahycongressional
01-01553

modifications would fundamentally alter the nature of the services. However, the ADA does not prohibit public accommodations such as Camp Kiniya from imposing neutral rules and criteria that screen out, or tend to screen out, individuals with disabilities, if the criteria are necessary for the safe operation of the public accommodation. Discussion of these provisions may be found at pages 21-25 of the Technical Assistance Manual.

(b)(6) points out that specially designed camps for children with disabilities already exist, and asks why children's camps other than church camps have not been exempted from the requirements of the Americans with Disabilities Act. One of the primary purposes of the ADA is the integration of persons with disabilities into the mainstream of American society. Accordingly, several provisions of the Act prohibit exclusion and segregation of individuals with disabilities and the denial of equal opportunity. These provisions are discussed on pages 13-15 of the Technical Assistance Manual.

I hope this information will assist you in responding to your constituent.

Sincerely,

James P. Turner
Acting Assistant Attorney General
Civil Rights Division

"A Good CAMP FOR GIRLS SINCE 1919"

Dear Senator Leahy,

I have just discovered, to my dismay, that the American With Disabilities Act, evidently passed by the Congress last year, rather profoundly affects our small business. Because this is now the law, our organization, The American Camping Ass'n. is following the law, and requiring those of us who are accredited members, to:provide access to children with handicaps (all businesses with 15 employees or more, except (and I am astonished that only they are exempt) church camps. As a private children's summer camp, in the woods with roots, rocks, and on 3 levels, (which even healthy children have occasional trouble traversing) we must evidently have ramps into cabins in areas, in which handicapped children could only reach if they were carried. Our beach is 100 yds. down a very steep path - and a ski tow would be the only way we could get a wheel chair bound person to the water. The entire focus of our particular summer camp is physical challenges.

I would really appreciate an explanation as to why exemptions were not included for children's camps other than church camps. There are quite a few special camps for children with handicaps and I cannot understand how a traditional children's summer camp such as ours (founded in 1919) which specializes in hiking, riding, mountain climbing, waterskiing, sailing, etc. can or should have to shoulder the enormous expense of putting in the sort of facilities that would be necessary for disabled children. We are a private business, and have access to no federal funds; nor do we ask for them. If the Congress feels this bill necessary than it should provide funding.

Could you further tell me if this bill has been challenged in the courts. I would also like to know how you voted on this issue.

Cordially,
(b)(6)

01-01555

SEP 22 1992

The Honorable Norman F. Lent
U.S. House of Representatives
2408 Rayburn House Office Building
Washington, D. C. 20515

Dear Congressman Lent:

This letter is in responses to your inquiry on behalf of your constituent, Dr. David A. Grossman, regarding the Americans with Disabilities Act's (ADA) requirements for accessible parking and curb ramps. Specifically, Dr. Grossman stated his concern that his landlord has failed to provide parking and curb access for use by patients who have disabilities.

The ADA authorizes the Department of Justice to provide technical assistance individuals and entities with rights or obligations under the Act. This letter provides informal guidance to assist you in answering Dr. Grossman's inquiry. However, this technical assistance does not constitute a legal Interpretation of the statute, and it is not binding on the Department.

Title III of the ADA requires public accommodations to remove barriers to access by individuals with disabilities, including those who use wheelchairs, to the extent that it is readily achievable to do so. The installation and maintenance of parking spaces and curb ramps are among the actions required by the ADA when readily achievable. For further discussion of title III's barrier removal requirements, please refer to pages 29-32 of the enclosed Title III Technical Assistance Manual.

The ADA, however, specifies that the duty to undertake readily achievable barrier removal falls both upon the landlord and the tenant in instances where, as here, a place of public accommodation is located in space leased from another entity. The lease agreement may, however, be used to allocate

cc: Records; Chrono; Wodatch; Russo; McDowney; FOIA; MAF.
:udd:russo:cong.lent.grossman

responsibility between the landlord and tenant for actually removing the barrier. Please refer to page 3 of the enclosed Manual for further discussion of landlord and tenant liability.

If Dr. Grossman feels that the refusal of Grand Baldwin Associates to provide parking spaces and curb ramps for persons with disabilities constitutes a violation of the ADA, he has two enforcement options under the ADA: (1) He may secure private legal representation and bring an action in Federal court, or (2) he may file a complaint with the Department of Justice. If Dr. Grossman chooses to file a complaint with the Department of Justice, he should send any relevant information to the Office on the Americans with Disabilities Act, Civil Rights Division, U.S. Department of Justice, Post Office Box 66738, Washington, D.C. 20035-9998. All complaints should be in writing and should set forth, in as complete a manner as possible, the factual circumstances surrounding the complaint. Enforcement procedures are discussed on pages 64-67 of the enclosed Manual.

I hope this information is of assistance to you in responding to your constituent.

Sincerely,

James P. Turner
Acting Assistant Attorney General
Civil Rights Division

ATT'N: Emma Dixon
Property Manager

Dear Ms. Dixon;

It has been almost one year since I first brought to your attention the problem handicapped people face when attempting to use your parking facility located at 1685 Grand Avenue in Baldwin. Despite four letters I have sent you, a plea for some common decency, and the institution of the Americans with Disabilities Act, I find it abhorrent that you continue to ignore this serious problem. Now that a Subway restaurant is due to open any day, handicapped persons will face even GREATER difficulty should they attempt to use your lot.

As stated in "Removing Barriers in Place of Public Accommodation, " a publication of the Eastern Paralyzed Veterans Association, the A.D.A. states that

A reserved parking space is one which is eight feet wide with an adjoining access aisle five feet wide. However, one in every eight handicapped parking spaces, but not less than one, should have an eight foot wide access aisle and be designated as "van accessible...
Curb cuts should be designed to be three feet in width, have a slope of 1 in 12 and have level areas at top and bottom.

Ms. Dixon- even if there was no law stipulating access for handicapped persons, I would still appeal to your sense of common decency. As I mentioned in my letter of March 3, 1992, I have already had wheelchair-bound patients telephone me from inside their van while parked in the lot, complaining they were unable to access the sidewalk (and subsequently my office) . How would you feel if this happened to a member of YOUR family?

I am not looking for any more "we will look into it" letters from you or any of the well-respected parties listed at the end of this letter. Nor do I believe that the "barrier removal efforts" involved here would be very costly or time-consuming, and I believe that there might even be a tax credit for removing these "barriers." Regardless, I find your disregard of this matter quite appalling, and I AGAIN beseech you to attend to this serious issue.

Sincerely,

David A. Grossman, D.D.S.

David A. Grossman, DDS
1685 Grand Ave. Suite 209
Baldwin, NY 11510

Dear Dr. Grossman:

As you are aware on Tuesday Feb 24 I had great difficulty in keeping my 5:30 PM appointment. My wife & I , being confined to wheelchairs, were unable to gain access to your office because the curb clips for wheelchairs was blocked by a parked vehicle. This problem, at this location, has presented itself on other occasion and I feel very strongly that better arrangement should be worked out for your disabled patience.

We do appreciate your coming down to the parking lot lifting us up the curb however we feel that a problem of this nature should be corrected & not be a burden on anyone. We

would appreciate if you would once again notify the landlord or other authorities so that this can be corrected-very (illegible) and economically. Thanks once again for your help.

Sincerely,

XXXXXX

SEP 22 1992

The Honorable Jim McCrery
Member, U.S. House of Representatives
621 Edwards Street
Shreveport, Louisiana 71101

Dear Congressman McCrery:

This letter responds to your inquiry concerning your previous correspondence on behalf of (b)(6). Enclosed is a copy of our letter of August 12, 1992, addressing that inquiry. Included is a copy of the enclosure that accompanied that response.

I hope you find this information helpful in responding to your constituent's request.

Sincerely,

James P. Turner
Acting Assistant Attorney General

Civil Rights Division

U.S. Department of Justice
Civil Rights Division
Office of the Assistant Attorney General Washington, D.C. 20038

The Honorable Jim McCrery
Member, U.S. House of Representatives
621 Edwards Street
Shreveport, Louisiana 71101

Dear Congressman McCrery:

This letter is in response to your inquiry on behalf of your constituent, (b)(6) concerning the Americans with Disabilities Act's (ADA) requirements for barrier removal in retail establishments and the proper method of filing a complaint.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities with rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA accessibility standards. However, this technical assistance does not constitute a legal interpretation of the statute and it is not binding on the Department.

Title III of the ADA requires places of public accommodation, including retail establishments and department stores, to undertake readily achievable barrier removal to make the stores accessible to individuals with disabilities including those who use wheelchairs. These requirements are further explained in the enclosed Department of Justice title III regulations at 28 C.F.R. 36.304 and 36.305.

If (b)(6) believes that KMart's failure to widen the checkout lanes has resulted in her daughter being discriminated against on the basis of her disability she has two enforcement options under the ADA: (1) She may secure private legal representation and bring an action in Federal court, or (2) she may file a complaint with the Department of Justice.

If(b)(6)chooses to file a complaint with the Department of Justice, she should send any relevant information to the Office on the Americans with Disabilities Act, Civil Rights Division, U.S. Department of Justice, Post Office Box 66738, Washington, D.C. 20035-9998. All complaints should be in writing and should set forth, in as complete a manner as possible, the factual circumstances surrounding the complaint.

I hope this information is of assistance to you in responding to your constituent.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

Enclosure
01-01558

U.S. Department of Labor
The Honorable Jim McCrery
Member, U.S. House
of Representatives
621 Edwards Street
Shreveport, Louisiana 71101

Dear Congressman McCrery:

Thank you for your July 7 letter, with enclosure, regarding your constituent, XXXXXX. Your correspondence was referred to the Office of Federal Contract Compliance Programs (OFCCP) for response.

OFCCP administers and enforces three equal employment opportunity programs: Executive Order 11246, as amended; Section 503 of the Rehabilitation Act of 1973, as amended; and the Vietnam Era Veterans' Readjustment Assistance Act of 1974, as amended, 38 U.S.C. 4212. Taken together, these programs prohibit contractors and subcontractors from discriminating on the bases of race, color, religion, sex, national origin, handicap or veteran status. These laws and their implementing regulations require that a complaint be filed within 180 days from the alleged discriminatory act.

The concerns your constituent expresses regarding Title III of the Americans with Disabilities Act of 1990 are not within OFCCP's jurisdiction. Title III is enforced by the Department of Justice. Accordingly, we have referred your correspondence to the official listed below for consideration:

Mr. John Wodatch
Director
Americans with Disabilities Act Unit
Coordination and Review Section
Civil Rights Division
U. S. Department of Justice
HOLC Building
320 First Street, N.W.
Washington, D.C. 20532

Thank you for your interest in this matter.
Sincerely,
Robert B. Greaux
Director
Division of Program Operations
cc: Washington, DC Office

Hon. Jim McCrery
United States Representative
621 Edwards Street
Shreveport, LA 71101

In re:

Dear Mr. McCrery:

I would like to call your attention to a situation that I am very concerned about in connection with the Americans with Disabilities Act. My daughter, is a disabled American, having been injured in October of 1991 and is now paralyzed and in a wheelchair. I have tried to become familiar with that Act and as I understand Title III as it covers existing "places of public accomodation", the alterations to a facility after January 26, 1992 shall be made so as to ensure that to the maximum extent feasible the altered portions of the facility are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

I have also read about the penalties for noncompliance. It is my understanding that civil actions may be brought by individuals who have been subjected to discrimination or who have reasonable grounds for believing that he/she is "about to be subjected to" discrimination. It is my understanding that the courts may grant injunctive relief, award monetary damages as well as assess civil penalties to the person aggrieved.

My daughter's situation involves the KMart store located at 3045 East Texas in Bossier City, Louisiana. I have shopped at Kmart for many years. Since accident, I have tried, even when I am alone, to only go to and buy from stores whose facilities are easily accessible for handicapped/disabled people. Recently, and I went shopping at Kmart and when we were ready to go to pay for the merchandise, the space between the "check-out stands" was not wide enough for her wheelchair to go through. She had to hand me her merchandise and money to pay for her and she had to back out of the line and go to the front of the store to wait for me to pay. I have visited Kmart on two occasions since that time, the last time being approximately one week ago.

01-01559

On the first occasion, I only complained to the person checking me out. On the last occasion, I asked the manager if he knew he was in violation of the law. He said yes. I asked him why no provisions had been made for a person who comes into the store to shop, but cannot pay for his/her purchases. He said he knew it should have been done, but he had no real explanation as to why it had not been done. I further asked him if he thought my daughter was the only person in Caddo/Bossier Parish in a wheelchair. He acknowledged that was doubtful.

I have read several articles lately commending the national Kmart and other corporations for utilizing disabled people in the "mainstream" of their advertising. This was presented as a very positive step for disabled people. I therefore find it baffling that this local Kmart does not even have provisions for a disabled person to pay for their purchases, especially when they are knowingly in violation of Title III of the ADA.

I am asking for your assistance in providing me with the person or agency to contact to file a complaint against Kmart. I certainly appreciate your assistance in this matter. Since my daughter is of the opinion that her disabilities should not stop her from going to college next year, living alone, driving a car, participating in a beauty pageant, and generally doing whatever she wants to do, it is especially distressing to me that simple steps cannot be taken by a major corporation to accomodate her and others who have to use wheelchairs.

I will look forward to hearing from you or your representative regarding this request. Thank you for your assistance in this matter.
Yours very truly,

(b)(6)

/frc

SEP 22 1992

The Honorable William V. Roth, Jr.
United States Senate
104 Hart Senate Office Building
Washington, D.C. 20510

Dear Senator Roth:

This letter responds to your request for information concerning the Americans with Disabilities Act (ADA) in response to an inquiry from your constituent, Dr. David M. August, D.O. Dr. August requested an opinion on whether current Medicare policy could be interpreted as a violation of the ADA. Specifically, he questions the Medicare policy of reimbursing 80 percent of doctors' charges for treating physical illness and 65 percent of doctors' charges for treating mental or emotional illness.

The ADA authorizes this Department to provide technical assistance to individuals and entities that have rights or responsibilities under the ADA. Accordingly, this letter provides informal guidance to assist you in responding to Dr. August; however, this technical assistance does not constitute a legal interpretation and is not binding on the Department of Justice.

While we cannot issue a legal opinion on this question, we can point out that the ADA, in some respects, was modeled after the Rehabilitation Act of 1973, which prohibits discrimination in federally conducted and federally assisted programs and activities, and that legal challenges under the Rehabilitation Act to similar classifications of types of medical treatment have not been successful. For example, in Alexander v. Choate (469 U.S. 287 (1985)), the United States Supreme Court determined that a state reduction of the number of days of inpatient hospital care under the Medicaid program was lawful, noting the "States' longstanding discretion to choose the proper mix of amount, scope, and durational limitations on services."

Fax (302) 645-2870

May 1, 1992

Senator William V. Roth, Jr.
3021 Federal Building
844 King Street
Wilmington, DE 19801

Dear Senator Roth:

I am writing to you about a matter that has come to my attention concerning Medicare's treatment of the mentally ill. I am a psychiatrist treating patients in Delaware and I have discovered that Medicare has a policy of specifically discriminating against mentally ill patients in their reimbursements for medical treatment.

It is Medicare policy to reimburse patients for what Medicare considers to be a physical illness 80% of doctors charges. If Medicare considers the patient to have a mental or emotional illness, the patient will only be reimbursed 65% of the doctor's charges.

This Medicare policy makes it very difficult for mentally ill patients to obtain psychiatric care. This Medicare policy could also violate federal laws such as the American Disabilities Act or perhaps other constitutional guarantees. I am requesting an opinion from your office as I am considering pursuing this inequity, either through legislation or the court system.

Sincerely,

David M. August, D.O.

AMP:SBO:kgf
DJ# 192-180-12198

SEP 22 1992

The Honorable Rick Santorum
Member, United States House of
Representatives
200 Fleet Street, Suite 4000
Pittsburgh, Pennsylvania 15220

Dear Congressman Santorum:

This letter responds to your inquiry on behalf of your constituent, Kathryn Bommer, who seeks information regarding what action her volunteer fire department must take in order to comply with the Americans with Disabilities Act (ADA). She also requests information regarding the availability of Federal financial assistance to make changes mandated by ADA.

The ADA authorizes the Department of Justice to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you in responding to your constituent. However, this technical assistance does not constitute a determination by the Department of Justice of your constituent's rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

When the fire department uses its second floor banquet facilities for public fund raising activities or private parties, the department is considered to be a public accommodation subject to the responsibilities of title III of the ADA. The general obligations of public accommodations under title III are discussed in the enclosed title III Technical Assistance Manual.

With respect to barrier removal obligations, which seem to be of particular concern to your constituent, title III of the ADA and this Department's implementing regulations, 28 C.F.R. Part 36 (copy enclosed), only require the removal of barriers in existing facilities where such barrier removal is "readily achievable", that is, "easily accomplishable with little

difficulty or expense." The requirement for readily achievable barrier removal is discussed in more detail in section 36.304 of the title III rule and on pages 28-36 of the Technical Assistance Manual.

:udd:pecht:santorum.ltr
cc: Records, CRS, FOIA, Friedlander (3), Pecht, McDowney, Breen
01-01565

As discussed in section 36.104 of the rule, whether barrier removal is readily achievable is to be considered in light of a number of factors including the overall financial resources available to the entity. The obligations of a volunteer fire department under this standard would certainly never, as suggested by your constituent, rise to a level that would require the fire department to close its doors.

The use of the volunteer fire department's banquet hall as a polling place is covered by the Voting Accessibility for the Elderly and Handicapped Act of 1984, 42 U.S.C. 1977ee-1. For further information on the applicability of that Act to the situation described by your constituent, you may wish to contact the Federal Election Commission.

You should also be aware that, where the operations of a volunteer fire department are closely linked to those of a local governmental entity, the operations of that volunteer department may be covered by title II of the ADA, which covers State and local governmental entities. In order to determine whether a volunteer fire department is covered by the requirements of title II, it is necessary to examine the relationship between the company and the unit of local government. The factors to be considered include whether the company is operated with public funds; whether the employees, if any, are considered government employees; whether the government provides significant assistance to the company by providing equipment or property; and whether it is governed by an independent board selected by the members of a private organization or is elected by the voters or appointed by elected officials.

If a volunteer department is considered an entity covered by title II, it must operate its programs and activities so that, when viewed in their entirety, such programs and activities are readily accessible to and usable by individuals with disabilities. The concept of "program access" is discussed in sections 35.149 and 35.150 of this Department's title II regulations, 28 C.F.R. Part 35, and on pages 19-22 of the title II Technical Assistance Manual (copies enclosed). However, as stated in section 35.150(a)(3) of the title II rule, a title II entity is not required to take any actions that it can demonstrate would result in a fundamental alteration of its services, programs, or activities, or in undue financial and administrative burdens.

With respect to Federal funding for barrier removal, the Department of Housing and Urban Development (HUD) provides community development block grants designed to assist low and moderate income households and communities. These grants may be used to remove architectural barriers that restrict accessibility to publicly owned and privately owned buildings, facilities, and

improvements. For information on applying for a community development block grant, Ms. Bommer should contact HUD's Office of Block Grant Assistance at (202)708-3587.
01-01566

I hope this information is helpful to you in responding to your constituent's inquiry.

Sincerely,

James P. Turner
Acting Assistant Attorney General
Civil Rights Division

OPTION INDEPENDENT FIRE COMPANY
OF BALDWIN BOROUGH
825 STREETS RUN ROAD
PITTSBURGH, PA 15236

August 06, 1992

Congressman Rick Santorum
200 Fleet Street
Room 4000
Pittsburgh, PA 15220

Dear Congressman Santorum:

I am writing to you as a follow up to my phone conversation with Bruce Barron on 08/05/92. We, the members of the Option Independent Fire Company are in need of you and your staffs assistance. We are in need of some answers pertaining to the American Disabilities Act, which was recently put in to effect. We are a non-profit, all volunteer organization in Baldwin Borough, which serves as a polling place for the fifth district and we have a small banquet hall that we rent out for private gatherings and we use for fund raising events that is on the second floor. Our problem is we are unable to make all of the necessary changes to our hall as mandated by the American Disabilities Act without causing severe financial problems to our association.

We are asking if there is any type of Federal grants or assistance available for the needed structural changes, and since we are both a public polling place and a private banquet hall, where do we fall in the eyes of the Act?

We use our banquet hall for public fund raising activities such as Lenten fish fries, spaghetti dinners etc., as well as private parties to help pay for our State loans that we currently have on our new fire trucks. If we are forced to close our banquet hall due to non compliance of the Act, because of all the necessary mandated changes to make our fire company accessible to the handicapped for both the polling center and banquet hall, we would soon have to close our company due to lack of funds.

We have spoken with an architect who stated the necessary changes include widening the entrance door, replacing two (2) bathrooms, one on each floor and changing them to be handicapped accessible and to install a chair lift on the staircase to the second floor. He stated the cost to be under ten thousand (10,000.00) dollars.

We are asking for any help that your office can give us in this matter, since it is not our intention to have to close our doors to the public.

Thank you for your attention to this matter. If you have any questions, please feel free to contact me at 412-881-5158.

Sincerely,

Kathryn R. Bommer
Secretary

SEP 23 1992

Mr. Luther Field
Batt-Chief/Critical Issues
Municipal Building, 8th at Colorado
Post Office Box 1088
Austin, Texas 78767

Dear Mr. Field:

This letter responds to your inquiry concerning fire station modifications that may be required by the Americans with Disabilities Act, 42 U.S.C. 12131-12134 ("ADA"). The ADA authorizes the Department of Justice to provide technical assistance to individuals or entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. It does not, however, constitute a legal interpretation and it is not binding on the Department.

Title II of the ADA prohibits State and local governments from discriminating against persons with disabilities. Title II and the Department's implementing regulation, 28 C.F.R. pt. 35 (enclosed), also require that new construction and alterations of government buildings ensure accessibility and that programs in government facilities be made accessible. ADA 204(b); 28 C.F.R. 35.149 -.150. More specifically, all State and local government buildings constructed or altered after January 26, 1992, must meet federal accessibility standards by complying with either the Uniform Federal Accessibility Standards (UFAS) or the Americans with Disabilities Act Accessibility Guidelines (ADAAG). 28 C.F.R. 35.151.

A different standard applies to services, programs, or activities conducted in State or local government facilities. Each such service, program, or activity must be operated so that, when viewed in its entirety, it is readily accessible to and usable by individuals with disabilities.

cc: Records, Chrono, Wodatch, Bowen, Friedlander, FOIA, Nakata
Udd:Nakata:202.PL.00034
01-01569

> [T]itle II requires a public entity to make its programs accessible in all cases, except where to do so would result in a fundamental alteration in the nature of the program or in undue financial and administrative burdens.... [T]he program access requirement of title II should enable individuals with disabilities to participate in and benefit from the services, programs, or activities of public entities in all but the most unusual cases.

56 Fed. Reg. 35,708 (1991).

Program access required by title II can be achieved by various means, including physical changes to existing buildings, the acquisition or redesign of equipment, the reassignment of services to accessible buildings, and the delivery of services at alternate accessible sites. 28 C.F.R. 35.150(b). For instance, you may wish to provide tours of accessible existing facilities as a means of making that aspect of your activities accessible. You would not necessarily be required to alter other inaccessible facilities for that purpose. If this approach would impose undue burdens, program access may be achieved by providing an audio-visual display of inaccessible areas in an accessible location on the ground floor. I have included a copy of the Department's Title II Technical Assistance Manual, which may provide further assistance in this area at Section II-5.0000.

This letter does not address other accommodations that may be required under the employment requirements of title I of the ADA.

Thank you for your inquiry in this matter.

Sincerely,

L. Irene Bowen
Deputy Director
Office on the Americans with Disabilities Act

Dear Sirs:

As a member of the Austin Fire Department's ADA compliance committee I am contacting the Justice Department directly to obtain guidance in the matter of requirements for Fire Stations under the Americans with Disabilities Act. We seem to be getting conflicting interpretations of the ADA pertaining to this question. I am hoping you can inform us as to what extent Fire Stations are required to be made accessible under the ADA.

Our stations are primarily used to house firefighters, trucks and equipment. We conduct no scheduled programs or activities at the stations involving the public other than tours of the stations and equipment upon request by interested groups, usually school children. My interpretation of the ADA requirements are that the stations do not need modifying since our programs and services, when viewed in their entirety, are accessible. I would appreciate any clarification you could supply on this matter as soon as possible and in writing, please. If you have any questions or I can be of help in any way, please contact me at (512) 477-5784.

Sincerely,

Luther Field
Batt. Chief/Critical Issues
Austin Fire Department

SEP 29 1992

The Honorable Scott Klug
Member, U.S. House of Representatives
16 North Carroll Street
Madison, Wisconsin 53703

Dear Congressman Klug:

This letter is in response to your inquiry on behalf of Matt Logan, seeking clarification of sign requirements under the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that are subject to the Act. Therefore, this letter provides informal guidance to assist you in responding to your constituent. However, this technical assistance does not constitute a legal interpretation by the Department and it is not binding on the Department.

Mr. Logan's questions relate to the requirements of section 4.30.4 of the ADA Accessibility Guidelines for Buildings and Facilities, as applied to pictograms (pictorial symbol signs) that are used to identify permanent rooms and spaces, such as restrooms. Section 4.30.4 requires that "pictograms shall be accompanied by the equivalent verbal description placed directly below the pictogram," and that "the border dimension of the pictogram shall be 6 inches minimum in height." This means that the field used for the pictogram must be 6 inches in height and that the verbal description must be placed below the 6 inch field. Based on our discussions with staff from the Architectural and Transportation Barriers Compliance Board, we understand that the Society for Environmental Graphic Design interprets these requirements in the same way. Section 4.30.4 further requires the raised letters and numerals used in the verbal description below the pictogram to be a minimum of 5/8 inches in height and to be accompanied by Grade II Braille.

cc: Records; Chrono; Wodatch; Lusher; McDowney; FOIA; MAF
:udd:mercado:congressional.letters:lusher.klug.logan
01-01572

The Department is unable to certify or to endorse products as complying with the requirements of the ADA. However, based on the photocopy of the sign we received, it does not appear that your constituent's product complies with the requirement that the border dimension of the pictogram be a minimum of 6 inches in height, since the measurement from the top of the sign to the top of the characters is approximately 5 1/4 inches (see attached).

I hope that the information we have provided is helpful to you and your constituent. If you or Mr. Logan have questions about this letter, please feel free to contact Ruth Lusher of my staff at (202) 434-9300.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

August 29, 1992

Hon. Scott Klug
Member of Congress
16 North Carroll St.
Room 600
Madison, WI 53703

Dear Scott:

I would like to take this opportunity to thank your office for your prompt response to my inquiry of August 26. It's not so much that we're having difficulties with the ADA it's that we're having trouble understanding the application of the code as interpreted by the Society for Environmental Graphic Design that put out a white paper on the subject. I fully believe that our signs are in compliance and will provide great benefit to the visually impaired of our country. I would like to get this confirmed through your office as quickly as possible so that we can continue our market introduction. The signs were developed around an industry standard 5x7 size that met the 6" minimum height requirement as we read it (Sec. 4.30.4 Raised and Brailled Characters and Pictorial Symbol Signs). I believe these signs will allow the small business owner to comply with the ADA's sign requirements without unnecessary cost.

Thanks again for your attention to this matter during the busy "election season" that is underway.

Sincerely,

Matt Logan
Product Manager
01-01575

OCT 14 1992

The Honorable Jeff Bingaman
United States Senate
524 Hart Senate Office Building
Washington, D.C. 20510-3102

Dear Senator Bingaman:

This letter responds to your recent inquiry concerning the Americans with Disabilities Act of 1990 (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that have rights and responsibilities under the Act. This letter provides informal guidance but does not constitute a determination by the Department of Justice of any State's rights or responsibilities under the ADA, and it is not binding on the Department.

You have raised five specific questions about the ADA. Those questions and our responses are as follows:

1) What is a State's liability under the Act if the State does not amend its law to comply with ADA?

States are required to operate all programs, services, and activities in a manner consistent with title II of the ADA, and could be held liable for noncompliance. However, States are not required to adopt a State law comparable to the ADA.

2) What is a State's liability under the Act for building code violations after the State informs contractors of the requirements of Federal law?

Under title II, all buildings or facilities constructed or altered by or for the State itself must comply with the ADA, and the State may be liable for ADA violations if contractors employed by or on behalf of the State fail to comply with the requirements of title II of the ADA, even if the State has informed the contractors of the ADA requirements.

cc: Records; Chrono; Wodatch; Blizard; Bowen; McDowney; FOIA.
:net:ss63:udd:blizard:ada.interpretation.bingaman.2

The ADA does not authorize or require State officials, including State building code officials, to enforce the ADA as it applies to private entities. If a private entity that is subject to the ADA fails to comply with the requirements of title III, that entity may be subject to ADA enforcement through Federal court litigation initiated by the Department of Justice or by private parties.

3) Are the States required to amend their building codes to comply with ADA, or does the Federal law preempt existing State law?

The ADA does not require states to amend building codes that apply to the construction of private buildings. However, private entities are required to comply with the ADA's accessibility requirements, rather than State code requirements, in circumstances where local code requirements are less stringent than the ADA.

States that choose to amend their codes may ask the Attorney General to review the accessibility requirements of the State code and to certify that these provisions meet or exceed the requirements of title III of the ADA. In ADA litigation, compliance with a certified code will constitute rebuttable evidence that a building or facility complies with the ADA.

4) What is the State's resultant liability? If the State amends its law, can it be involved in a civil suit for violations of the State law?

Simply by adopting a building code that is consistent with title III, a State does not become liable for the failure of private entities to comply with the ADA. However, the operation of some State statutes or case law may affect the State's liability for failure to enforce State laws or regulations.

5) What resources are available to the States to assist them in interpreting and implementing the access provisions, as well as the other sections, of ADA?

The ADA requires that each Federal agency with an ADA implementation role (Department of Justice, Department of Transportation, Federal Communications Commission, Equal Employment Opportunity Commission, and Architectural and Transportation Barriers Compliance Board) provide technical assistance to individuals and entities affected by the agency's ADA regulations. Pursuant to this requirement, the Department of Justice has published technical assistance manuals for both title

II and title III of the ADA, as well as other informational materials.

01-01577

In addition, the Department has awarded over three million dollars in grants to nineteen groups, including representatives of the business community and of people with disabilities. These groups are developing additional educational materials to advise covered entities and individuals with disabilities of the rights and obligations created by the ADA. The Department also operates an ADA telephone information line (202/514-0301 (voice) or 202/514-0381 (TDD)) and an electronic bulletin board (202/514-6193).

I am enclosing copies of the Department's regulations implementing titles II and III, our technical assistance manuals for titles II and III, and a list of our technical assistance grant projects for your information.

Sincerely,

W. Lee Rawls
Assistant Attorney General

May 27, 1992

The Honorable William Barr
Attorney General
Department of Justice
Constitution and Tenth Street NW
Washington, D.C. 20530

Dear Attorney General Barr:

I would appreciate your assistance with the following matter.

As a member of the Senate Labor and Human Resources Committee and a cosponsor of the Americans with Disabilities Act (ADA), I have been actively involved in the drafting and implementation of this landmark legislation. Throughout this legislative process, I have been preoccupied with several pressing questions regarding the states' liability under ADA. Specifically, I would like your response to the following questions:

1) What is a state's liability under the Act if the state does not amend its law to comply with ADA?

2) What is a state's liability under the Act for building code violations after the state informs contractors of the requirements of the federal law?

3) Are the states required to amend their building codes to comply with ADA, or does the federal law preempt existing state law?

4) What is the state's resultant liability? If the state amends its law, can it be involved in a civil suit for violations of the federal law?

5) What resources are available to the states to assist them in interpreting and implementing the access provisions, as well as the other sections, of ADA?

Thank you for your attention to my inquiry. I am looking forward to hearing from you in a timely manner. I send my best regards.

Sincerely,

Jeff Bingaman
United States Senator

OCT 15 1992

The Honorable George J. Mitchell
United States Senate
176 Russell Senate Office Building
Washington, D.C. 20510-1902

Dear Senator Mitchell:

This letter is in response to your inquiry on behalf of(b)(6) expressing concern that certain persons with disabilities who use service animals may be excluded from restaurants and other places of public accommodation, and that such individuals are not protected by Federal law.

The Americans with Disabilities Act of 1990 ("ADA") authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

Title III of the ADA specifically prohibits the use of eligibility criteria that tend to screen out individuals with disabilities from using places of public accommodation, unless such criteria are necessary for the operation of the public accommodation. This section, and the title III implementing regulations promulgated under it, directly address the concerns raised by (b)(6).

The Department's title III regulation makes clear that places of public accommodation are prohibited from separating individuals with disabilities from their service animals. The regulation specifically provides that a public accommodation shall modify policies, practices, or procedures to permit the use of a service animal by an individual with a disability. Further, service animals are defined to include any guide dog, signal dog,

cc: Records; Chrono; Wodatch; Contois; McDowney; FOIA; MAF.
:udd:contois:cgl.mitchell
01-01580

or other animal individually trained to do work or perform tasks for the benefit of an individual with a disability, including not only those animals that assist hearing or visually impaired individuals, but also those animals that provide minimal protection or rescue work, pull a wheelchair, or retrieve dropped items.

For your information, I am enclosing a copy of this Department's regulation implementing title III of the ADA and the Technical Assistance Manual that was developed to assist individuals and entities subject to the ADA to understand the requirements of title III. The ADA's requirements on service animals can be found at Sections 36.104 and 36.302(c) at pages 35594 and 35397 of the Department's rule and page 23 of the Department's manual.

I hope this information is useful to you in responding to (b)(6)

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

INDEPENDENCE DOGS INC.
LOVE-LIBERTY

146 STATE LINE ROAD
HADDSFORD, PA 19317
(215) 358-2723

M. JEAN KING
PRESIDENT

WHAT IS NEEDED TO MAKE A RELATIONSHIP WITH A SERVICE DOG WORK.

1. A NECESSARY REALIZATION ON THE RECIPIENTS PART.
   That his dog is fully trained upon his arrival.
   The recipient must further realize that his dog is obeying the trainer implicitly at this time. It is now the recipients' responsibility to transfer this love and obedience to himself. The trainer will aid in this process as much as she can but can not accomplish it until the recipient has won the dogs' love and respect.

2. BONDING
   To the point where the dog chooses to stay by your side even though the dog knows he's on free time to be where ever he wants. For this to occur the dog should go everywhere you go and apply the following guide lines.

3. MUTUAL RESPECT & UNDERSTANDING.
   To the point where the dog wishes to work and please his person instead of the trainer.
   To be in tune with your dog to the point where a new situation arises and you are able to problem solve and resolve the problem.

4. TO BE ABLE TO VOCALIZE TO YOUR DOG IN DIFFERENT TONES AND EMOTIONS. ie. To know when you need to command and when to enthusiastically motivate your dog to listen and obey.

5. CONFIDENCE IN YOUR DOG.
   To always think positive when asking your dog to do something which due to lack of bonding he has refused to do for you before and also when it's something you ask of your dog to do for the first time.

01-01582

QUESTIONS MOST FREQUENTLY ASKED ABOUT INDEPENDENCE DOGS

What kind of dog is Shantih?

An Akbash Dog from Turkey. This breed is 8,000 years old and is used now to guard sheep. They are called the "Guard Dog of the Sultans". There are only 800 of these dogs in the U.S. at this time. They area very loyal and highly intelligent breed.

How long is the training period for an Independence Dog?

From 6 to 8 months depending on the individual dog and depending also on the need of the recipient.

What breeds of dogs are used in the program?

Akbash Dogs, Rottweilers, German Shepherds, Collies, Chesapeake Bays, Labrador Retrievers, Golden Retrievers, are used for walkers and wheelchair dogs.

How much does an Independence Dog cost?

It costs approximately $8,000 to breed, raise and train one dog but the recipient is only asked to pay $150.00 and arrangements may be made to pay this amount in small installments if necessary. It has been our experience to have those who are financially able express a desire to contribute more than the minimum requirement. Such gifts are most gratefully accepted and are tax deductible.

Who is eligible for an Independence Dog?

Any man, woman or child who is mobility impaired, i.e. people suffering from muscular dystrophy, multiple sclerosis, polio, cerebral palsy, rheumatoid arthritis, etc.

What must a person do to obtain an Independence Dog?

* They must have their physicians fill out a form stating that there is a need for such a dog and describing the patient's physical condition.
* They must be willing to spend 2-4 weeks training with their dog.
* They must have a desire to live life to the fullest in spite of their handicap.
* They must agree to pay a minimum of $150 for their dog.
* They must be able (or have someone who is) to provide proper care for their dog, such as grooming, feeding, veterinary care, etc.
* They must agree to allow Independence Dogs the right to periodically ascertain that the dog is being well cared for and properly utilized.

Is there an age requirement for recipients?

Yes and no! In general Independence Dogs will be trained for anyone between the age of 10 to 65. However, there is not a hard and fast rule because each recipient is carefully screened and judged upon their individual circumstances. We have known many "old" youngsters of eight, and many "young" adults of seventy!

Isn't there a possibility that such a dog would cause their recipient to become "lazy" and not get enough exercise?

Yes, this is a possibility but we hope to circumvent it by working closely with the recipients physical therapist or occupational therapist. We feel very strongly that if properly utilized, our dogs can and will encourage their masters to attempt to do more for themselves - become more independent!

My child is still in school and we live in an apartment where dogs are not allowed, how can we have an Independence Dog?

ILLEGIBLE
ILLEGIBLE
ILLEGIBLE
ILLEGIBLE
Such bills have already been passed into law in twenty four other states and we are currently trying to have such legislation passed on a national level.

Are Independence Dogs friendly?

Yes! But we ask that our dogs not be petted by the public. They are, as are dog guides for the blind, working dogs and their full attention must be on their masters at all times! Even a moment's distraction could, in some instances, be a matter of life or death for the team.

Is Independence Dogs the only organization of this kind?

No. C.C.I. (Canine Companions for Independence) has been doing similar work for over 10 years, but they are located in Santa Rosa, California, and a recipient must pay their own transportation out and motel cost for the four week training period. They have, to date, established no other branches. It is our understanding that they are planning an extensive expansion program within the next ten years.

Handi-Dogs in Tucson, Arizona are also training "companion type" dogs. However, it is their policy to train the dog and handicapped person together which requires a much longer period of involvement for the handicapped person. These dogs are not as specialized in their training for the handicapped, neither do Handi-Dogs have other branches.

To the best of our knowledge, Support dogs for the Handicapped of Saint Louis is the fourth and final large training school for dogs serving the mobility impaired. They are located in Saint Louis, Missouri and are producing top notch service dogs. According to their director and founder they, also, have no plans for future expansion.

Independence Dogs is the first organization of its scope on the east coast. We are pleased to announce that initial steps have been taken preparatory to future cooperation and accreditation among these schools.

Will Independence Dogs protect their masters if the need arises?

Yes! They are not attack dogs or personal protection dogs, but they will be trained to give protection if and when there is a need.

How are your dogs trained?

With as much love and patience and as little discipline as it is possible to give. Our dogs work because they want to and are proud of what they are

doing not because they are afraid not to! Our dogs are trained to be intelligent "thinking" partners in a team - they do not work for us - they work with us!
Their reward is the bond we share with them - our companionship and our undying love. They are not trained "robots" they are partners-in-living.

How is Independence Dogs. Inc. financed?

Independence Dogs.Inc. is a "not-for-profit organization" and as such relies on private contributions, fund raisers, contributions from service organizations and grants from philanthropic foundations. At the present time all of our help professional and nonprofessional is volunteer, with the exception of a full time trainer and her part time assistant.

Have any provisions been made to house out-of-town students during the training periods with their dogs?

Yes, there will be rooms available for such students at our school Independence Knoll. 146 State Line Road, Chadds Ford, Pennsylvania, 19317. There will be no charge for this service (to the recipient). If the

ILLEGIBLE
ILLEGIBLE
ILLEGIBLE
ILLEGIBLE
May a recipient request a special breed of dog?

In general, no. Our dogs and recipients are carefully screened so as to achieve the "perfect match" as concerns activity level, temperament, strength, etc. These factors will, in the long run, become much more important to the recipient than the appearance or breed of the dog.

Is this a "good" life for a dog?

Yes indeed! An Independence Dog can and does go anywhere with its master. They are rarely, if ever, left alone. They receive the love and gratitude of their master many, many times a day. They are proud of their work. They feel wanted and very needed. They have the best of care, personal and veterinary, and also enjoy times of recreation and "dog" play everyday. What better life could a dog have?

We have other dogs and cats in the family who are pets, can I still have an Independence Dog?

Yes. All Independence Dogs are well socialized and non-aggressive. Advice will be given concerning the best methods to be used when introducing your Independence Dog into a home where there are other pets.

What is meant by the terms: Wheelchair Dog and Walker Dogs?

* A Wheelchair Dog is an especially trained dog to aid persons who are confined to a chair. These dogs are taught to pull their partners up ramps, through shopping malls, grocery stores, etc.: stand and brace enabling their partner to change from a wheelchair to another chair, car or bed and in the event that there is a fall from the chair this last maneuver will help the person to get back into their chair. These dogs are taught to retrieve articles which their masters may drop, turn off light switches, open heavy mall doors, pop curbs, pick up a telephone receiver and carry packages in their especially constructed back packs.

* A Walker Dog is trained to assist a partner who has difficulty walking needing perhaps a cane, crutches or human assistance. With the use of these dogs the person with cerebral palsy, multiple sclerosis or muscular dystrophy can throw away one crutch or cane and by leaning on the dog with the use of an especially designed harness be assisted up and down stairs, over curbs and out of chairs. These dogs will, of course, perform all other tasks such as retrieving etc. which are enumerated above.

In addition to services enumerated for the various categories mentioned above,

all of our dogs provide a fount of non-judgemental love, loyalty and understanding that cannot be obtained from any other source.

Whom may we contact about Independence Dogs, should we wish to contribute, volunteer our services or have need of a dog?

Mr. James C. Lafferty
Director of Legislative Affairs
U.S. Equal Employment Opportunity Commission
1801 L Street, N.W.
Washington, DC 20507

Dear Mr. Lafferty:

I am writing on behalf of of (G)(6) Portland, Maine. I am enclosing a letter I received from (G)(6) with regard to the use of dogs to assist sighted disabled individuals to accompany them on common carrier transportation. I am interested in knowing if there is any flexibility within your regulations to address the issues raised in her correspondence.

I appreciate your consideration and I look forward to hearing from you soon.

With best wishes.

Sincerely,
George J. Mitchell

Enclosure

(Form) INDEPENDENCE DOGS CALLING

01-01591

(b)(6)
Portland, Me

May 20, 1992

Senator George Mitchell
U S Senate
Washington, DC 20510-1902

Dear Senator Mitchell:

We have reviewed the following rules and act as well as state rulings for disabled persons who have trained dogs assisting them in their day to day living:

H. R. 2245 dated May 7, 1991
H. R. 2278 dated June 26, 1991
Public Law 102 - 240 dated December 18, 1991

In summary, Public Law 102-240 does provide that as far as transportation carriers are concerned, trained animals that assist disabled individuals are permitted to accompany them on common carrier transportation.

Present laws permit dogs trained to assist blind and hearing impaired individuals to accompany and stay with said individuals in housing, restaurants, and other businesses.

However, it is important to note that animals trained to provide specialized services for disabled individuals are not covered under federal ruling and Maine State Statutes.

In recent years, programs have started and are running to train and provide dogs and other animals to assist disabled individuals (who are not blind or hearing impaired) in their daily routine.

Therefore, strong consideration should be given to ammending the present Federal and State rules including disabled individuals and their assisting animals under the same rules established for the blind and hearing impaired.

Additionally, it will solve embarrassing situations that occur while traveling interstate and within this state.

Thank you for your consideration and help in this matter.

Sincerely,
(b)(6)

DELAWARE STATE SENATE
134TH GENERAL ASSEMBLY
SENATE BILL NO. 143

AN ACT TO AMEND TITLE 6, CHAPTER 45 OF THE DELAWARE CODE RELATING TO SUPPORT ANIMALS.

BE IT ENACTED BY THE GENERAL ASSEMBLY OF THE STATE OF DELAWARE (Two-thirds of all members elected to each House thereof concurring therein):

Section 1. Amend S4501, Title 6, Delaware Code by adding a new subsection 3, as follows:

"(3) 'Handicap' includes the use of support animal(s) because of a physical handicap of the user. Support animal means any animal individually trained to do work or perform tasks to meet the requirements of a physically disabled person, including, but not limited to, minimal protection work, rescue work, pulling a wheelchair, or fetching dropped items."

Section 2. Amend S4504(a), Title 6, Delaware Code by adding the following:

"For the purposes of training support animals to be used by the handicapped, all trainers and their support animals shall be included within the those covered by this subsection."

SYNOPSIS

At the end of the 133rd General Assembly, the word 'handicap' was added to the list of those against whom discrimination is prohibited. This Bill includes within the definition of handicap the use of support animals for such persons as those in wheelchairs. Currently, the blind and deaf already have similar legal protection in Title 31, S2117. This Bill also gives the trainers of support animals the same rights for the purposes of training these animals. This Bill requires a two-thirds majority vote due to the criminal penalties attached to violation of the Equal Accomodation Chapter.

No. 1986-186

AN ACT

HB 141

Amending the act of October 27, 1955 (P.L. 744, No. 222), entitled, as amended,

"An act prohibiting certain practices of discrimination because of race, color, religious creed, ancestry, age or national origin by employers, employment agencies, labor organizations and others as herein defined; creating the Pennsylvania Human Relations Commission in the Department of Labor and Industry; defining its functions, powers and duties; providing for procedure and enforcement; providing for formulation of an educational program to prevent prejudice; providing for judicial review and enforcement and imposing penalties," further providing for definitions; prohibiting certain discriminatory acts and practices; prohibiting the imposition of certain quotas; and reestablishing the commission and providing for its composition and compensation.

The General Assembly of the Commonwealth of Pennsylvania hereby enacts as follows:

Section 1. Sections 2 and 3 of the act of October 27, 1955 (P.L. 744, No. 222), known as the Pennsylvania Human Relations Act, amended April 8, 1982 (P.L. 284, No. 80), are amended to read:

Section 2. Findings and Declaration of Policy. -

(a) The practice or policy of discrimination against individuals or groups by reason of their race, color, religious creed, ancestry, handicap or disability, use of guide [dogs] animals because of blindness or deafness of the user, use of support animals because of a physical handicap of the user or because the user is a handler or trainer of support or guide animals, age, sex, or national origin is a matter of concern of the Commonwealth. Such discrimination foments domestic strife and unrest, threatens the rights and privileges of the inhabitants of the Commonwealth, and undermines the foundations of a free democratic state. The denial of equal employment, housing and public accommodation opportunities because of such discrimination, and the consequent failure to utilize the productive capacities of individuals to their fullest extent, deprives large segments of the population of the Commonwealth of earnings necessary to maintain decent standards of living, necessitates their resort to public relief and intensifies group conflicts, thereby resulting in grave injury to the public health and welfare, compels many individuals to live in dwellings which are substandard, unhealthful and overcrowded, resulting in racial segregation in public schools and other community facilities, juvenile delinquency and other evils, thereby threatening the peace, health, safety and general welfare of the Commonwealth and its inhabitants.

(b) It is hereby declared to be the public policy of this Commonwealth to foster the employment of all individuals in accordance with their fullest capacities regardless of their race, color, religious creed, ancestry,

use of support animals because of a physical handicap of the user or because the user is a handler or trainer of support or guide animals, age, sex, or national origin, and to safeguard their right to obtain and hold employment without such discrimination, to assure equal opportunities to all individuals and to safeguard their rights [at places of] to public accommodation and to secure [commercial housing] housing accommodation and commercial property regardless of race, color, religious creed, ancestry, sex, handicap or disability, use of guide [dogs] animals because of blindness or deafness of the user or national origin.

(c) This act shall be deemed an exercise of the police power of the Commonwealth for the protection of the public welfare, prosperity, health and peace of the people of the Commonwealth of Pennsylvania.

Section 3. Right to Freedom from Discrimination in Employment, Housing and [Places of] Public Accommodation. - The opportunity for an individual to obtain employment for which he is qualified, and to obtain all the accommodations, advantages, facilities and privileges of any [place of] public accommodation and of [commercial housing] housing accommodation and commercial property without discrimination because of race, color, religious creed, ancestry, handicap or disability, age, sex [or], national origin [are], the use of a guide or support animal because of blindness, deafness or physical handicap of the user or because the user is a handler or trainer of support or guide animals is hereby recognized as and declared to be [civil rights] a civil right which shall be enforceable as set forth in this act.

[The opportunity of an individual to obtain all the accommodations, advantages, facilities and privileges of commercial housing without discrimination due to the sex of an individual or to the use of a guide dog because of blindness or deafness of the user is hereby recognized as and declared to be a civil right which shall be enforceable as set forth in this act.]

Section 2. Section 4(c), (i), (j), (l) and (q) of the act, amended February 28, 1961 (P.L.47, No.19), November 27, 1967 (P.L.622, No.284), November 29, 1967 (P.L.632, No.291),' December 10, 1970 (P.L.882, No.278) and December 9, 1982 (P.L.1053, No.247), are amended and the section is amended by adding a clause to read:

Section 4. Definitions. - As used in this act unless a different meaning clearly appears from the context:

* * *

(c) The term "employee" does not include (1) any individual employed in agriculture or in the domestic service of any person, (2) any [individual] individuals who, as a part of [his] their employment, [resides] reside in the personal residence of the employer, (3) any individual employed by said individual's parents, spouse or child.

* * *

(i) The term "housing accommodations" includes (1) any building [or], structure, mobile home site or facility, or portion thereof, which is used or

occupied or is intended, arranged or designed to be used or occupied as the home residence or sleeping place of one or more individuals, groups or fami-
ILLEGIBLE
01-01594

land offered for sale [or], lease [for commercial housing] or held for the purpose of constructing or locating thereon any such building, structure, mobile home site or facility. The term "housing accommodation" shall not include any personal residence offered for rent by the owner or lessee thereof or by his or her broker, salesperson, agent or employee.

(j) [The term "commercial housing" means housing accommodations held or offered for sale or rent (1) by a real estate broker, salesman or agent, or by any other person pursuant to authorization of the owner; (2) by the owner himself; or (3) by legal representatives, but shall not include any personal residence offered for rent by the owner or lessee thereof, or by his broker, salesman, agent or employee.] The term "commercial property" means (1) any building, structure or facility, or portion thereof, which is used, occupied or is intended, arranged or designed to be used or occupied for the purpose of operating a business, an office, a manufactory or any public accommodation; and (2) any vacant land offered for sale, lease or held for the purpose of constructing or locating thereon any such building, structure, facility, business concern or public accommodation.

* * *

(l) The term "[place of] public accommodation, resort or amusement" means any [place] accommodation, resort or amusement which is open to, accepts or solicits the patronage of the general public, including but not limited to inns, taverns, roadhouses, hotels, motels, whether conducted for the entertainment of transient guests or for the accommodation of those seeking health, recreation or rest, or restaurants or eating houses, or any place where food is sold for consumption on the premises, buffets, saloons, barrooms or any store, park or enclosure where spirituous or malt liquors are sold, ice cream parlors, confectioneries, soda fountains and all stores where ice cream, ice and fruit preparations or their derivatives, or where beverages of any kind are retailed for consumption on the premises, drug stores, dispensaries, clinics, hospitals, bathhouses, swimming pools, barber shops, beauty parlors, retail stores and establishments, theatres, motion picture houses, airdromes, roof gardens, music halls, race courses, skating rinks, amusement and recreation parks, fairs, bowling alleys, gymnasiums, shooting galleries, billiard and pool parlors, public libraries, kindergartens, primary and secondary schools, high schools, academies, colleges and universities, extension courses and all educational institutions under the supervision of this Commonwealth, nonsectarian cemeteries, garages and all public conveyances operated on land or water or in the air as well as the stations, terminals and airports thereof, financial Institutions and all Commonwealth facilities and services, including such facilities and services of all political subdivisions thereof, but shall not include any accommodations which are in their nature distinctly private.

* * *

(q) The term "permanent hearing examiner" shall mean a full-time employe who is an attorney [or other person knowledgeable in human relations matters designated by the Commission to conduct hearings required to be held under this act. The person knowledgeable in human relations matters must demonstrate such knowledge through a written examination created,

developed and administered by the Commission].
* * *
(s) The term "commercial profit" means any form of ILLEGIBLE money, or which can be measured in terms of money.
Section 3. Section 5 of the act, reenacted, amended or added February 28, 1961 (P.L. 47, No. 19), December 27, 1965 (P.L. 1224, No. 497), November 29, 1967 (P.L. 632, No. 291), July 9, 1969 (P.L. 133, No. 56), June 9, 1972
(P.L. 368, No. 102), December 19, 1974 (P.L. 966, No. 318), January 10, ILLEGIBLE
(P.L. 1, No. 1), December 9, 1980 (P.L. 1122, No. 198) and April 8, ILLEGIBLE (P.L. 284, No. 80), is amended to read:
Section 5. Unlawful Discriminatory Practices.--It shall be an ILLEGIBLE discriminatory practice, unless based upon a bona fide occupational qualification, or in the case of a fraternal corporation or association, unless based upon membership in such association or corporation, or except where based upon applicable security regulations established by the United States or the Commonwealth of Pennsylvania:
(a) For any employer because of the race, color, religious creed, ancestry, age, sex, national origin or non-job related handicap or disability of an individual to refuse to hire or employ, or to bar or to discharge from employment such individual, or to otherwise discriminate against such individual with respect to compensation, hire, tenure, terms, conditions or privileges of employment, if the individual is the best able and most competent to perform the services required. The provision of this paragraph shall not apply, to (1) termination of employment because of the terms or conditions of any bona fide retirement or pension plan, (2) operation of the terms or condition, of any bona fide retirement or pension plan which have the effect of a minimum service requirement, (3) operation of the terms or conditions of any bona fide group or employee insurance plan, (4) age limitations placed upon entry into bona fide apprenticeship programs of two years or more approved by the State Apprenticeship and Training Council of the Department of Labor and Industry, established by the act of July 14, 1961 (P.L. 604, No. ILLEGIBLE),
known as "The Apprenticeship and Training Act." Notwithstanding any provision of this clause, it shall not be an unlawful employment practice for a religious corporation or association to hire or employ on the basis of sex in those certain instances where sex is a bona fide occupational qualification because of the religious beliefs, practices, or observances of the corporation, or association.
(b) For any employer, employment agency or labor organization, prior to the employment or admission to membership, to
(1) Elicit any information or make or keep a record of or use any form of application or application blank containing questions or entries concerning the race, color, religious creed, ancestry, age, sex, national origin or past handicap or disability of any applicant for employment or membership. An employer may inquire as to the existence and nature of a present handicap or disability. To determine whether such handicap or disability substantially

interferes with the ability to perform the essential function of the employ-
01-01595

ment which is applied for, is being engaged in, or has been engaged in, the employer must inquire beyond the mere existence of a handicap or disability.

(2) Print or publish or cause to be printed or published any notice or advertisement relating to employment or membership indicating any preference, limitation, specification or discrimination based upon race, color, religious creed, ancestry, age, sex, national origin or non-job related handicap or disability.

(3) Deny or limit, through a quota system, employment or membership because of race, color, religious creed, ancestry, age, sex, national origin, non-job related handicap or disability or place of birth.

(4) Substantially confine or limit recruitment or hiring of individuals, with intent to circumvent the spirit and purpose of this act, to any employment agency, employment service, labor organization, training school or training center or any other employee-referring source which services individuals who are predominantly of the same race, color, religious creed, ancestry, age, sex, national origin or non-job related handicap or disability.

(5) Deny employment because of a prior handicap or disability.

Nothing in clause (b) of this section shall bar any institution or organization for handicapped or disabled persons from limiting or giving preference in employment or membership to handicapped or disabled persons.

(c) For any labor organization because of the race, color, religious creed, ancestry, age, sex [or], national origin or non-job related handicap or disability of any individual to deny full and equal membership rights to any individual or otherwise to discriminate against such individuals with respect to hire, tenure, terms, conditions or privileges of employment or any other matter, directly or indirectly, related to employment.

(d) For any person, employer, employment agency or labor organization to discriminate in any manner against any individual because such individual has opposed any practice forbidden by this act, or because such individual has made a charge, testified or assisted, in any manner, in any investigation, proceeding or hearing under this act.

(c) For any person, [whether or not an] employer, employment agency, labor organization or employe, to aid, abet, incite, compel or coerce the doing of any act declared by this section to be an unlawful discriminatory practice, or to obstruct or prevent any person from complying with the provisions of this act or any order issued thereunder, or to attempt, directly or indirectly, to commit any act declared by this section to be an unlawful discriminatory practice.

(f) For any employment agency to fail or refuse to classify properly, ILLEGIBLE for employment or otherwise to discriminate against any individual because of his race, color, religious creed, ancestry, age, sex, national origin or non-job related handicap or disability.

(g) For any individual seeking employment to publish or cause to be published any advertisement which [specifies or in any manner expresses his race, color, religious creed, ancestry, age, sex or national origin, or] in any manner expresses a limitation or preference as to the race, color, religious creed, ancestry, age, sex [or], national origin or non-job related handicap or disability of any prospective employer.

(h) For any person to:

(1) Refuse to sell, lease, finance or otherwise to deny or withhold [commercial housing] any housing accommodation or commercial property from any person because of the race, color, religious creed, ancestry, sex, national origin or handicap or disability of any prospective owner, occupant or user of such [commercial housing,] housing accommodation or commercial property, or to refuse to lease [commercial housing] any housing accommodation or commercial property to any person due to use of a guide [dog] animal because of the blindness or deafness of the user, or use of a support animal because of a physical handicap of the user or because the user is a handler or trainer of support or guide animals.

(1.1) Evict or attempt to evict an occupant of any housing accommodation before the end of the term of a lease because of pregnancy or the birth of a child.

(2) Refuse to lend money, whether or not secured by mortgage or otherwise for the acquisition, construction, rehabilitation, repair or maintenance of [commercial housing] any housing accommodation or commercial property or otherwise withhold financing of [commercial housing] any housing accommodation or commercial property from any person because of the race, color, religious creed, ancestry, sex, national origin [or], handicap or disability or the use of a guide or support animal because of the blindness, deafness or physical handicap of the user or because the user is a handler or trainer of support or guide animals, of any present or prospective owner, occupant or user of such [commercial housing] housing accommodation or commercial property.

(3) Discriminate against any person in the terms or conditions of selling or leasing any [commercial housing] housing accommodation or commercial property or in furnishing facilities, services or privileges in connection with the ownership, occupancy or use of any [commercial housing] housing accommodation or commercial property because of the race, color, religious creed, ancestry, sex, national origin [or], handicap or disability or the use of a guide or support animal because of the blindness, deafness or physical handicap of the user or because the user is a handler or trainer of support or guide animals, of any present or prospective owner, occupant or user of such [commercial housing or to discriminate against any person in the terms of leasing any commercial housing or in furnishing facilities, services or privileges in connection with the occupancy or use of any commercial housing due to use of a guide dog because of the blindness or deafness of the user] housing accommodation or commercial property.

(4) Discriminate against any person in the terms or conditions of any loan of money, whether or not secured by mortgage or otherwise for the acquisition, construction, rehabilitation, repair or maintenance of [commercial housing] housing accommodation or commercial property because of the race, color, religious creed, ancestry, sex, national origin or handicap or disability of any present or prospective owner, occupant or user of [such commercial housing] any housing accommodation or commercial property.

01-01596

(5) Print, publish or circulate any statement or advertisement: (i) relating to the sale, lease or acquisition of any [commercial housing] housing accommodation or commercial property or the loan of money, whether or not secured by mortgage, or otherwise for the acquisition, construction, rehabilitation, repair or maintenance of [commercial housing] any housing accommodation or commercial property which indicates any preference, limitation, specification, or discrimination based upon race, color, religious creed, ancestry, sex, national origin or handicap or disability, or [to print, publish or circulate any statement or advertisement relating to] (ii) relating to the lease of any [commercial dwelling] housing accommodation or commercial property which indicates any preference, limitation, specification or discrimination based upon use of a guide [dog] or support animal because of the blindness [or], deafness or physical handicap of the user or because the user is a handler or trainer of support or guide animals.

(6) Make any inquiry, elicit any information, make or keep any record or use any form of application, containing questions or entries concerning race, color, religious creed, ancestry, sex, national origin or handicap or disability in connection with the sale or lease of any [commercial housing] housing accommodation or commercial property or loan of any money, whether or not secured by mortgage or otherwise for the acquisition, construction, rehabilitation, repair or maintenance of [commercial housing] any housing accommodation or commercial property, or to make any inquiry, elicit any information, make or keep any record or use any form of application, containing questions or entries concerning the use of a guide [dog] or support animal because of the blindness [or], deafness or physical handicap of the user or because the user is a handler or trainer of support or guide animals, in connection with the lease of any [commercial housing] housing accommodation or commercial property.

(i) For any person being the owner, lessee, proprietor, manager, superintendent, agent or employe of any place of public accommodation, resort or amusement to:

(1) Refuse, withhold from, or deny to any person because of his race, color, sex, religious creed, ancestry, national origin or handicap or disability, or to any person due to use of a guide [dog] or support animal because of the blindness [or], deafness or physical handicap of the user or because the user is a handler or trainer of support or guide animals, either directly or indirectly, any of the accommodations, advantages, facilities or privileges of such place of public accommodation, resort or amusement.

(2) Publish, circulate, issue, display, post or mail, either directly or indirectly, any written or printed communication, notice or advertisement to the effect that any of the accommodations, advantages, facilities and privileges of any such place shall be refused, withheld from or denied to any person on account of race, color, religious creed, sex, ancestry, national origin or handicap or disability, or to any person due to use of a guide [dog] or support animal because of the blindness [or], deafness or physical handicap of the user, or that the patronage or custom threat of any person, belonging to or purporting to be of any particular race, color, religious creed, ancestry, national origin or handicap or disability, or to any person due to

ILLEGIBLE guide [dog] or support animal because of the blindness [or], deafness or physical handicap of the user or because the user is a handler or trainer of support or guide animals, is unwelcome, objectionable or not acceptable, desired or solicited.

Nothing in clause (h) of this section shall bar any religious or denominational institution or organization or any charitable or educational organization, which is operated, supervised or controlled by or in connection with a religious organization or any bona fide private or fraternal organization from giving preference to persons of the same religion or denomination or to members of such private or fraternal organization or from making such selection as is calculated by such organization to promote the religious principles or the aims, purposes or fraternal principles for which it is established or maintained. Nor shall it apply to the rental of rooms or apartments in a landlord occupied rooming house with a common entrance.

(j) For any person subject to the act to fail to post and exhibit prominently in his place of business any fair practices notice prepared and distributed by the Pennsylvania Human Relations Commission.

(k) For any employer to discriminate against an employe or a prospective employe because [he] the employe only has a general education development certificate as compared to a high school diploma. However, should vocational technical training or other special training be required with regard to a specific position, then such training or special training may be considered by the employer.

This section of the act [as amended] shall not be construed to prohibit the refusal to hire or the dismissal of a person who is not able to function prop- erly in the job applied for or engaged in. Section 4. Section 5.1 of the act, added July 20, 1968 (P.L. 454, No. 213), is amended to read:

Section 5.1. Religious Observance: Public Employes.--(a) It shall be an unlawful discriminatory practice for any officer, agency or department of the State or any of its political subdivisions, to prohibit, prevent or disqualify any person from, or otherwise to discriminate against any person in, obtaining or holding employment by the State or by any such subdivision, because of [his] such person's observance of any particular day or days or any portion thereof as a sabbath or other holy day in accordance with the requirements of [his] the person's religion.

(b) Except as may be required in an emergency or where [his] personal presence is indispensable to the orderly transaction of public business, no person employed by the State or any of its political subdivisions shall be required to remain at [his] the place of employment during any day or days or portion thereof that, as a religious requirement [of his religion, he], the person observes as [his] the sabbath or other holy day, including a reasonable time prior and subsequent thereto for travel between [his] the place of employment and [his] home, provided however, that any such absence from work shall, wherever practicable in the judgment of the employer, be made up by an equivalent amount of time and work at some other mutually convenient

nient time, or shall be charged against any leave with pay ordinarily granted, other than sick leave, provided further, however, that any such absence not so made up or charged, may be treated by the employer of such person as leave taken without pay.

(c) This section shall not be construed to apply to any position dealing with the public health or safety where the person holding such position must be available for duty whenever needed, or to any position or class of positions the nature and quality of the duties of which are such that the personal presence of the holder of such position is regularly essential on any particular day or days or portion thereof for the normal performance of such duties with respect to any applicant therefor or holder thereof who, as a religious requirement [of his religion], observes such day or days or portion thereof as [his] the sabbath or other holy day.

Section 5. Section 5.2(a) of the act, added October 10, 1973 (P.L.278, No.78), is amended to read:

Section 5.2. Abortion and Sterilization; Immunity from Requirement to Perform; Unlawful Discriminatory Practices.-(a) No hospital or other health care facility shall be required to, or held liable for refusal to, perform or permit the performance of abortion or sterilization contrary to its stated ethical policy. No physician, nurse, staff member or employee of a hospital or other health care facility, who shall state in writing to such hospital or health care facility [his] an objection to performing, participating in, or cooperating in, abortion or sterilization on moral, religious or professional grounds, shall be required to, or held liable for refusal to, perform, participate in, or cooperate in such abortion or sterilization.

***

Section 6. The act is amended by adding a section to read:

Section 5.3. Prohibition of Certain Real Estate Practices.-It shall be an unlawful discriminatory practice for any person to:

(a) Induce, solicit or attempt to induce or solicit for commercial profit any listing, sale or transaction involving any housing accommodation or commercial property by representing that such housing accommodation or commercial property is within any neighborhood, community or area adjacent to any other area in which there reside, or do not reside, persons of a particular race, color, religious creed, ancestry, sex, national origin, handicap or disability, or who are guide or support animal dependent.

(b) Discourage, or attempt to discourage, for commercial profit, the purchase or lease of any housing accommodation or commercial property by representing that such housing accommodation or commercial property is within any neighborhood, community or area adjacent to any other area in which there reside, or may in the future reside in increased or decreased numbers, persons of a particular race, color, religious creed, ancestry, sex, national origin, handicap or disability, or who are guide or support animal dependent.

(c) Misrepresent, create or distort a circumstance, condition or incident for the purpose of fostering the impression or belief, on the part of any owner, occupant or prospective owner or occupant of any housing accommodation or commercial property, that such housing accommodation ILLEGIBLE

commercial property is within any neighborhood, community or area adjacent to any other area which would be adversely impacted by the residence, or future increased or decreased residence, of persons of a particular race, color, religious creed, ancestry, sex, national origin, handicap or disability,
or who are guide or support animal dependent within such neighborhood, community or area.

(d) In any way misrepresent or otherwise misadvertise within a neighborhood or community, whether or not in writing, that any housing accommodation or commercial property within such neighborhood or community is available for inspection, sale, lease, sublease or other transfer, in any context where such misrepresentation or misadvertising would have the effect of fostering an impression or belief that there has been or will be an increase in real estate activity within such neighborhood or community due to the residence, or anticipated increased or decreased residence, of persons of a particular race, color, religious creed, ancestry, sex, national origin, handicap or disability, or the use of a guide or support animal because of the blindness, deafness or physical handicap of the user.

Section 7. Section 6 of the act, amended August 4, 1961 (P.L. 922, No.402), is amended to read:

Section 6. Pennsylvania Human Relations Commission. There shall be, and there is hereby established in the [Department of Labor and Industry] Governor's Office a non-partisan, departmental administrative commission for the administration of this act, which shall be known as the "Pennsylvania Human Relations Commission," and which is hereinafter referred to as the "Commission."

Said Commission shall consist of eleven members, to be known as Commissioners, who shall be appointed by the Governor by and with the advice and consent of [two thirds of all] a majority of the members of the Senate, not more than six of such Commissioners to be from the same political party, and each of whom shall hold office for a term of five years or until his successor shall have been duly appointed and qualified[: Provided, however, That in making the first appointments to said Commission one member shall be appointed for a term of one year, two for a term of two years, two for a term of three years, two for a term of four years and two for a term of five years. The two members added to the Commission hereby shall be appointed for terms to run concurrently with the term of the member or his successor who was appointed for a one year term when the Commission was first established]. Vacancies occurring in an office of a member of the Commission by expiration of term, death, resignation, removal or for any other reason shall be filled in the manner aforesaid for the balance of that term. Commission members failing to attend meetings for three consecutive months shall forfeit their seats unless the chairperson of the commission receives written notification from the member involved that the absence was due to personal illness or the death or illness of an immediate family member.

Subject to the provisions of this act, the Commission shall have all the powers and shall perform the duties generally vested in and imposed upon

departmental administrative boards and commissions by the act, approved the ninth day of April, one thousand nine hundred twenty-nine (Pamphlet Laws 177), known as "The Administrative Code of one thousand nine hundred twenty-nine," and its amendments, and shall be subject to all the provisions of such code which apply generally to departmental administrative boards and commissions.

The Governor shall designate one of the members of the Commission to be its chairman who shall preside at all meetings of the Commission and perform all the duties and functions of the chairman thereof. The Commission may designate one of its members to act as chairman during the absence or incapacity of the chairman and, when so acting, the member so designated shall have and perform all the powers and duties of the chairman of the Commission.

Six members of the Commission or a majority of those duly appointed and qualified shall constitute a quorum for transacting business, and a majority vote of those present at any meeting shall be sufficient for any official action
taken by the Commission.

Each member of the Commission shall receive per diem compensation at the rate of [fifteen dollars ($15)] sixty dollars ($60) per day for the time actu-
ally devoted to the business of the Commission. Members shall also receive the amount of reasonable traveling, hotel and other necessary expenses incurred in the performance of their duties in accordance with Commonwealth regulations.

The Commission shall adopt an official seal by which its acts and proceed-
ings shall be authenticated, and of which the courts shall take judicial notice.
The certificate of the chairman of the Commission, under the seal of the Commission and attested by the secretary, shall be accepted in evidence in any judicial proceeding in any court of this Commonwealth as adequate and sufficient proof of the acts and proceedings of the Commission therein certified to.

Section 8. Section 7(i), (j) and (k) of the act, amended July 9, 1969 (P.L.133, No. 56) and November 26, 1978 (P.L.1292, No. 309), are amended and the section is amended by adding clauses to read:

Section 7. Powers and Duties of the Commission.-The Commission shall have the following powers and duties:
***

(c.1) To conduct mandatory training seminars on the Pennsylvania Human Relations Act and other applicable Federal and State law procedures and rules for all investigative personnel.

(c.2) To afford complainants and respondents the opportunity for comments after the final disposition of a complaint. These comments shall be provided to the Commission members.

(c.3) To appoint attorneys to perform the following functions: (1) render legal advice to Commission members on matters appearing before it; or (2) give legal assistance to complainants appearing before the Commission or hearing examiners. These responsibilities shall require a separate staff of attorneys to perform each function.

***

(i) To create such advisory agencies and conciliation councils, local or state-wide, as will aid in effectuating the purposes of this act. The Commission may itself or it may empower these agencies and councils to (1) study the problems of discrimination in all or specific fields of human relationships when based on race, color, religious creed, ancestry, age, sex [or], national origin or handicap or disability, and (2) foster, through community effort or otherwise, good will among the groups and elements of the population of the State. Such agencies and councils may make recommendations to the Commission for the development of policies and procedure in general. Advisory agencies and conciliation councils created by the Commission shall be composed of representative citizens, serving without pay, but the Commission may make provision for technical and clerical assistance to such agencies and councils, and for the payment of the expenses of such assistance.

(j) To issue such publications and such results of investigations and research as, in its judgment, will tend to promote good will and minimize or eliminate discrimination because of race, color, religious creed, ancestry, age, sex [or], national origin or handicap or disability.

(k) From time to time but not less than once a year, to report to the [Leg-
islature] General Assembly and the Governor describing in detail the investigations, proceedings and hearings it has conducted and their outcome, the decisions it has rendered and the other work performed by it, and make recommendations for such further legislation concerning abuses and discrimination because of race, color, religious creed, ancestry, age, sex [or], national origin or handicap or disability as may be desirable.

***

(m) To submit annually a report to the Labor and Industry Committee of the Senate and the State Government Committee of the House, with a description of the types of complaints received, status of cases, Commission action which has been taken, how many were found to have probable cause, how many were resolved by public hearing and the length of time from the initial complaint to final Commission resolution.

(n) To notify local human relations commissions of complaints received by the Pennsylvania Human Relations Commission involving persons within a commission's jurisdiction.

(o) To prepare and publish all findings of fact, conclusions of the law,

final decisions and orders made after a public hearing by the hearing examiners, Commission panel or full Commission.

(p) To give public access to the commission's compliance manual.

(q) To preserve opinions rendered by the Commission for five years from the date of publication.

Section 9. Section 8 of the act is amended to read:

Section 8. Educational Program.-

[In order to eliminate prejudice among the various racial, religious and nationality groups in this Commonwealth and to further good will among such groups, the] The Commission, in cooperation with the [Department of Public Instruction] Department of Education, is authorized to prepare a comprehensive educational program, designed for the students of the schools

in this Commonwealth and for all other residents thereof, in order to eliminate prejudice [against such groups] against and to further good will among all persons, without regard to race, religious creed, ancestry, age, sex, national origin, handicap or disability.

Section 10. Section 9(a), (b), (l) and (g) of the act, amended December 9, 1982 (P.L.1053, No.247), are amended to read:

Section 9. Procedure.--(a) Any [Individual] person claiming to be aggrieved by an alleged unlawful discriminatory practice may make, sign and file with the Commission a verified complaint, in writing, which shall state the name and address of the person, employer, labor organization or employment agency alleged to have committed the unlawful discriminatory practice complained of, and which shall set forth the particulars thereof and contain such other information as may be required by the Commission. Commission representatives shall not modify the substance of the complaint. The Commission upon its own initiative or the Attorney General may, in like manner, make, sign and file such complaint. Any employer whose employes, or some of them, hinder or threaten to hinder compliance with the provisions of this act may file with the Commission a verified complaint, asking for assistance by conciliation or other remedial action and, during such period of conciliation or other remedial action, no hearings, orders or other actions shall be taken by the Commission against such employer.

(b) (1) After the filing of any complaint, or whenever there is reason to believe that an unlawful discriminatory practice has been committed, the Commission shall make a prompt investigation in connection therewith.

(2) The Commission shall send a copy of the complaint to the named respondent within thirty days from the date of docketing the complaint.

(3) A respondent shall file a written, verified answer to the complaint within thirty days of service of the complaint. The Commission, upon request of the respondent, may grant an extension of not more than thirty additional days.

* * *

(l) If, upon all the evidence at the hearing, the Commission shall find that a respondent has engaged in or is engaging in any unlawful discriminatory practice as defined in this act, the Commission shall state its findings of fact, and shall issue and cause to be served on such respondent an order requiring such respondent to cease and desist from such unlawful discriminatory practice and to take such affirmative action, including, but not limited to, reimbursement of certifiable travel expenses in matters involving the complaint, not to exceed fifty dollars ($50), compensation for loss of work in matters involving the complaint, not to exceed two hundred dollars ($200), hiring, reinstatement or upgrading of employees, with or without back pay, admission or restoration to membership in any respondent labor organization, the making of reasonable accommodations, or selling or leasing specified [commercial housing] housing accommodations or commercial property upon such equal terms and conditions and with such equal facilities, services and privileges or lending money, whether or not secured by mortgage or othnance of [commercial housing] housing accommodations or commercial property, upon such

equal terms and conditions to any person discriminated against or all persons as, in the judgment of the Commission, will effectuate the purposes of this act, and including a requirement for report of the manner of compliance. When the respondent is a licensee of the Commonwealth, the Commission shall inform the appropriate State licensing authority of the order with the request that the licensing authority take such action as it deems appropriate against such licensee. An appeal from the Commission's order shall act as a supersedeas and stay such action by the State licensing authority until a final decision on said appeal. If, upon all the evidence, the Commission shall find that a respondent has not engaged in any such unlawful discriminatory practice, the Commission shall state its findings of fact, and shall issue and cause to be served on the complainant an order dismissing the said complaint as to such respondent.

(g) The Commission shall establish rules or practice to govern, expedite and effectuate the foregoing procedure and its own actions thereunder. Three or more members of the Commission or a permanent hearing examiner designated by the Commission shall constitute the Commission for any hearing required to be held by the Commission under this act. The recommended findings, conclusions and order made by said members or permanent hearing examiner shall be reviewed and approved or reversed by the Commission before such order may be served upon the parties to the complaint. The recommended findings, conclusions and order made by said members or permanent hearing examiner shall become a part of the permanent record of the proceeding and shall accompany any order served upon the parties to the complaint. Any complaint filed pursuant to this section must be so filed within [ninety] one hundred eighty days after the alleged act of discrimination. Any complaint may be withdrawn at any time by the party filing the complaint.

Section II. Section 12(b) of the act, amended December 19, 1994 (P.L.966, No.318), is amended and the section is amended by adding a subsection to read:

Section 12. Construction and Exclusiveness of Remedy. -

* * *

(b) Except as provided in subsection (c), nothing contained in this act shall be deemed to repeal or supersede any of the provisions of any existing or hereafter adopted municipal ordinance, municipal charter or of any law of this Commonwealth relating to discrimination because of race, color, religious creed, ancestry, age, sex, national origin or handicap or disability, but as to acts declared unlawful by section five of this act the procedure herein provided shall, when invoked, be exclusive and the final determination therein shall exclude any other action, civil or criminal, based on the same grievance of the complainant concerned. If [such] the complainant institutes any action based on such grievance without resorting to the procedure provided in this act, [he] such complainant may not subsequently resort to the procedure herein. In the event of a conflict between the interpretation of a ILLEGIBLE of this ILLEGIBLE and the interpretation of a similar provision contained

in any municipal ordinance, the interpretation of the provision in this act shall apply to such municipal ordinance.

* * *

(c.1) Notwithstanding subsections (a) and (c) or any other provision of this act, nothing in this act shall be deemed to authorize imposition by the Commission of remedial quota relief in cases involving hiring or promoting of employees of the Commonwealth, its agencies or instrumentalities or employees of local governments and school districts in this Commonwealth. This subsection shall not, however, prohibit the voluntary adoption of an affirmative action plan designed to assure that all persons are accorded equality of opportunity in employment.

* * *

Section 12. Section 12.1 of the act is amended by adding a clause to read:

Section 12.1. Local Human Relations Commissions.--* * *

(e) The local human relations commission shall notify the Pennsylvania Human Relations Commission of complaints received involving discriminatory acts within that commission's jurisdiction.

Section 13. This act, with respect to the Pennsylvania Human Relations Commission, constitutes the legislation required to reestablish an agency under the act of December 22, 1981 (P.L.508, No. 142), known as the Sunset Act.

Section 14. The Pennsylvania Human Relations Commission shall continue together with its statutory functions and duties until December 31, 1991, when it shall terminate and go out of existence unless reestablished or continued by the General Assembly for an additional ten years. Evaluation and review, termination, reestablishment and continuation of the agency beyond December 31, 1991, and every tenth year thereafter, shall be conducted pursuant to the act of December 22, 1981 (P.L.508, No.142), known as the Sunset Act.

Section 15. The presently confirmed members of the existing Pennsylvania Human Relations Commission, as of December 31, 1986, shall continue to serve as members until their present terms of office expire and until their successors are appointed and qualified.

Section 16. Each rule and regulation of the Pennsylvania Human Relations Commission in effect on December 31, 1986, shall remain in effect until repealed or amended by the Pennsylvania Human Relations Commission.

Section 17. This act shall be retroactive to December 31, 1986, if enacted
after that date.

Section 18. This act shall take effect immediately.

APPROVED - The 16th day of December, A.D. 1986.

DICK THORNBURGH

No. 1986-187

AN ACT

HB 241

Providing for the operation of vending facilities by licensed blind persons: creating a Committee of Blind Vendors; granting powers to and imposing duties

upon the committee; and granting powers to and imposing duties upon an administrative unit in the Department of Public Welfare.

The General Assembly of the Commonwealth of Pennsylvania hereby enacts as follows:

Section 1. Short title.

This act shall be known and may be cited as the Little Randolph Sheppard Act.

Section 2. Definitions.

The following words and phrases when used in this act shall have the meanings given to them in this section unless the context clearly indicates otherwise:

"Blind person." A person whose central acuity does not exceed 20/200 in the better eye with correcting lenses or whose visual acuity, if better than 20/200, is accompanied by a limit of the field of vision in the better eye to a degree that its widest diameter subtends an angle of no greater than 20 degrees. In determining whether an individual is blind, there shall be an examination by a physician skilled in diseases of the eye or by an optometrist.

"Bureau" or "Bureau of Blindness and Visual Services." The administrative unit in the department, under the commissioner, which provides services to the blind and visually impaired.

"Commissioner." The Commissioner of the Bureau of Blindness and Visual Services of the department.

"Committee." The Committee of Blind Vendors established by section 3.

"Department." The Department of Public Welfare of the Commonwealth.

"Rental fee." The fee fixed by the commissioner and the committee for the rental of the snack bar location and equipment.

"State property." Property owned or leased by the State government or an agency of the State government and designated by the bureau as appropriate for participation in the Business Enterprise Program. The definition shall not include property which is owned or leased for:

(1) Rest, recreation and safety rest areas on the national system of interstate and defense highways.

(2) Institutions of higher learning except as provided in section 9.

(3) Institutions of the Department of Corrections.

T. 10/13/92
SK:SBO:kgf
DJ# 192-180-11554

OCT 16 1992

The Honorable Alan Cranston
United States Senate
112 Hart Senate Office Building
Washington, D.C. 20510

ATTN: Melissa Baker

Dear Senator Cranston:

This responds to your letter requesting a response to your previous correspondence of July 18, 1991, which transmitted an inquiry from Mr. Herb Levine, Program Services Coordinator of the Independent Living Resources Center in San Francisco, California.

We regret that we have been unable to locate a record of your previous letter. However, we have ascertained that on behalf of Mr. Levine, you expressed concerns about access to substance abuse treatment programs for individuals with disabilities.

Since January 26, 1992 (six months subsequent to Mr. Levine's original inquiry), substance abuse treatment programs offered by State or local governments have been covered by title II of the Americans with Disabilities Act (ADA), which applies to all services, programs, and activities provided by public entities. If the programs receive Federal financial assistance, they are also covered by section 504 of the Rehabilitation Act, which applies to programs and activities that receive Federal financial assistance and to programs and activities conducted by Federal Executive Agencies. Both the ADA and section 504 prohibit discrimination against individuals with disabilities, and their requirements are generally similar. These requirements are explained in the enclosed Technical Assistance Manual for title II.

Private entities that operate substance abuse treatment

programs are not covered by title II of the ADA, but would be covered by section 504 if they receive Federal financial assistance. Since July 1992, they have also been covered by

:udd:kaltenborn:cranston
cc: Records, CRS, FOIA, Friedlander (3), Kaltenborn, Breen
01-01602

title III of the ADA as places of public accommodation. The requirements of title III, which are similar to those of title II, are explained in the enclosed Technical Assistance Manual for title III.

If Mr. Levine is aware of specific cases in which the ADA or Section 504 requirements are being violated, he may file a complaint with the appropriate Federal agency. Complaints alleging violations of title II or III of the ADA that have occurred since January 26, 1992, may be filed under the procedures for filing complaints under the ADA as explained in sections II-9.2000 and III-8.3000 of the Manuals. A complaint may be filed by an individual who believes that he or she or a specific class of individuals has been discriminated against, and must describe the alleged discriminatory action in sufficient detail to enable the agency to investigate the allegations.

Complaints under section 504 should be filed with the civil rights office of the agency that provides the Federal financial assistance to the program or activity. Also, an individual may file a private suit under title II or III of the ADA or section 504 and is not required to exhaust administrative remedies before doing so.

I hope that this information is helpful to you in responding to Mr. Levine.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

WITH DISABILITIES

May 23, 1991

Senator Alan Cranston
Hart Bldg. #112
Washington, D.C. 20510

Dear Senator Cranston:

Enclosed you will find correspondence from San Francisco Community Substance Abuse Services, the San Francisco Task Force on Alcohol, Drugs and Disability and Independent Living Resource Center relating to serious concerns about access to substance abuse treatment programs for people with disabilities.

We are dismayed and alarmed that the substance abuse treatment system may be largely inaccessible to people with disabilities. Reports from the Little Hoover Commission, State Alcohol and Drug Programs and the California Attorney General's Commission on Disability speak of such lack of access. Is ADA to be a sign of change or empty ILLEGIBLE? Does the War on Drugs exclude people with disabilities?

We request the advocacy of your office to demand a prompt compliance review, evaluation and monitoring of San Francisco Community Abuse Services by the office of Civil Rights with a firm action plan to address areas where compliance is lacking. We trust that you will see this request as consistent with your record of concern with and advocacy for the rights of people with disabilities.

Yours truly,

Herb Levine
Program Services Coordinator

Jonathan Botelho
Branch Chief, Investigations Division
Stanley K. Yarnell, M.D. Dept. of Health and Human Services
President of the Board Office of Civil Rights
Kathy Uni, M.S., M.P.A. 50 United Nations Plaza
Executive Director San Francisco, CA 94102

Dear Mr. Botelho:

Enclosed is a packet of correspondence between the San Francisco Task Force on Alcohol, Drugs and Disability and San Francisco Community Substance Abuse Services regarding 504 compliance and accessibility of facilities, programs and services to people with disabilities. Independent Living Resource Center addresses the following questions to your office:

1. Has there been a compliance evaluation and review since 1978? Was there a plan or agreement to provide accessibility where it did not exist? If so, has this agreement been reviewed for compliance?
2. Is provision of access to the ILLEGIBLE of services by modality an equal benefit? Does there need to exist a priority waiting list for those services which are accessible?
3. If a program is "drug free", is that a discriminatory eligibility criteria for people with disabilities using disability-related medication?
4. Does Independent Living Resource Center have standing to request a compliance review, formal action plan and monitoring of compliance? If so, consider this to be such a request. If not, what must be done to achieve this?

We would appreciate your prompt attention to this matter.

Yours truly,
Herb Levine
Program Services Coordinator

Ms. Sandra D. Burns
State of Colorado
Department of Social Services
Rehabilitation Services
1575 Sherman Street, 4th Floor
Denver, Colorado 80203-1714

Dear Ms. Burns:

This responds to your letter seeking written guidance on implementation of title II of the Americans with Disabilities Act (ADA).

The ADA authorizes the Department to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you in understanding how the ADA may apply. However, this technical assistance does not constitute a determination by the Department of Justice of your rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

You have asked whether the application of the ADA Accessibility Guidelines (ADAAG) rather than use of the Uniform Federal Accessibility Standards (UFAS) by an entity covered by section 504 of the Rehabilitation Act of 1973, as amended, would violate section 504.

Under section 504 regulations, departures from UFAS are permitted whenever substantially equivalent or greater access is provided. As your letter notes, the ADAAG standard is the newer standard. Generally, it provides for greater accessibility than mandated by UFAS, where the two standards differ.

Records, CRS, Worthen, Friedlander, FOIA, Breen
Worthen:Citizen:Colorado.UFAS.ADAAG.9.92
01-01607

There are, however, a few areas where UFAS requires greater access than demanded by ADAAG (e.g., UFAS requires a specified percentage of prison cells to be accessible, but ADAAG contains no such requirement). In these few circumstances, compliance with ADAAG alone would not constitute compliance with section 504.

I hope this information will be of assistance to you.

Sincerely,

Stewart B. Oneglia

P. O. Box 66118
Civil Rights Division
U. S. Department of Justice
Washington, D. C. 20035-6118

Gentlepersons:

The State of Colorado, as part of its efforts to meet the Title II requirements of the Americans with Disabilities Act, has established an ADA Implementation Committee, consisting of the ADA Coordinators for the state agencies and community representatives with disabilities.

A portion of the discussion has centered around the advantages and disadvantages of using the ADA Architectural Guidelines (ADAAG) as opposed to the Uniform Federal Accessibility Standards (UFAS), both for purposes of meeting the Transition Plan requirements and for purposes of alterations and new construction.

The Committee understands that the ADAAG is the newer standard and that the intent is to eventually eliminate the UFAS as a separate standard. Therefore, we are disposed toward using ADAAG.

However, a question has been raised with regard to this:

> The regulations relating to Section 504 of the Rehabilitation Act of 1973 require application of the UFAS in new construction or remodeling projects involving the use of Federal funds. Would application of the ADAAG in such projects constitute a violation of 504?

The Committee would appreciate a written response, as we would like to arrive at a decision and would prefer not to be applying different standards to different types of projects.

Sincerely,

xc: David Leavenworth

The Honorable Porter J. Goss
Member, U.S. House of Representatives
2000 Main Street
Suite 303
Fort Myers, Florida 33901

Attn: Jan Manriquez

Dear Congressman Goss:

This letter is in response to your inquiry on behalf of Stan Enebo, concerning applicability of the Americans with Disabilities Act (ADA) to his condominium community. Mr. Enebo writes that a homeowner has asked the Board of Directors of the Myerlee Gardens Condominium Association to remove speed bumps at the entrance to the residential area and golf course, because driving over them aggravates his back and neck problems.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

The only provisions of the ADA that may apply to this situation appear in title III, which imposes certain obligations on "places of public accommodation." The Act lists twelve types of entities as places of public accommodation. Residential facilities are not among the twelve categories. Accordingly, the individual dwelling units in residential communities are not covered by title III of the ADA, and common areas and facilities in such communities are not covered where use is restricted exclusively to residents and their guests, and not open to the public. Likewise, assuming that the golf course and other complexes that are accessible only through the entrance with speed bumps are restricted to residents or members, and not open to the public, they are not covered by title III.

cc: Records; Chrono; Wodatch; Mobley; McDowney; FOIA; MAF.
:udd:mobley:congressionals:goss.letter

I hope this information is useful to you in responding to your constituent.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

Condominium Association, Inc.
1351 MYERLEE GARDENS AVENUE, FORT MYERS, FLORIDA 33919

AUG 14 1992

Congressman Porter Goss
2000 Main Street
Suite 303
Fort Myers, Florida 33901
August 13, 1992

Dear Congressman Goss:

I am the chairman of the Myerlee Gardens Condominium Association. We are an Association with 210 units, here in South Fort Myers. Our streets and sidewalks and most of our facilities are readily access free for those with disabilities.

We have one owner who has asked the board to remove the only speed bumps that we have that are at the entrance/exit to our complex. The past board and the membership has turned this down twice. Their main reason has been that this entrance/exit enters into the only road to the golf course and other complexes There is heavy traffic on this road and it could be a hazard if not for these speed bumps and the thru stop.

The owner who has back and neck problems has gone around the speed bumps by going on the sidewalk. The board, two years ago installed a pipe on the edge of the sidewalk at the entrance/exit. The board felt that this driving on the sidewalk was not safe.

The Federal Americans Disabled Act has now come into the controversy and we would like to have an opinion on this matter before the board acts. (see letter, pictures and layout)

The Association will appreciate any help to clear up this problem. Thank you,

Respectfully,

Stan Enebo, Chairman
01-01612

(b)(6)

August 4, 1992

Myerlee Gardens Condominuim Association
1351 Myerlee Gardens Avenue
Fort Myers, Fl. 33919

Dear Board of Directors:

I do not feel that the Myerlee Gardens Condo Association are within regulations with HUD and American Disability Act. At this time i can not go out or the complex without getting in and out of the car, and walking across the speed bumps. My back and neck are just too fragile to cross over the bumps. I have letters from two different neurosurgeons stating that any sudden jar or bump could cause more damage, with more surgery and long term problems with my back and neck. There is no way that I can drive my car in and out. If my family should have an emergency and I would need to drive my car I would not be able to do so. According to the disability act you are not in compliance with the law.

Before someone had the pipes put in the sidewalks I could drive on the sidewalk and get out without crossing the bumps. The mailman does this all the time. I don't understand why the pipes were put in to obstruct the sidewalk like they do.

If you and the other residents who live here want the speed bumps you could cut them down or make them longer so you don't have the sudden jerk that you do now. The bumps are hard on the car also.

The new Disability Laws states that all person that are disable must have access to all places. I feel that I am being discriminated by not being able to have access to my own home.

I have had to spend over $10,000 in doctor and hospital bill, because of the bumps. I am still under the care of a neurosurgeon, because of this problem.

Any help that you could give to me and my family would be greatly appreciated. I don't want to have to take legal action without giving the Condo Assoc. a Chance to correct this matter.

I want to thank all of the board members for all their time working for all of The residents here in Myerlee Gardens. I am sure that no one realize the time spend for all of us. I feel that this board understand the needs of all the residents much better than any past board.

Sincerely,

(b)(6)

September 21, 1992

Office on the ADA
Civil Rights Division
U.S. Department of Justice
Box 66118
Washington, D.C. 20035

Dear Office,

Southwest Community Resources is a non-profit community-based organization providing housing-related programs and services in a five-county area of Southwest Colorado. Please send us any appropriate material which can provide us with guidance on how we can or must comply with the ADA.

We also have some specific questions:

1. SCR rents its office space. It is a small house with one bathroom. We have a staff of 14. Are we required to convert our bathroom to be accessible. (This may not be possible.) If we adopt a policy which says that the organization does not have a bathroom available to the general public, would we still be required to make it accessible?

2. We are concerned about making sure that SCR has policies which clearly define how all our programs and services are available to persons with disabilities, including visual and hearing impairments. Could you send any sample policies that we might follow to ensure that we comply with the act?

Thank you.

Sincerely,

Peter Tregillus
Executive Director
01-01615

DJ 202-PL-193

OCT 20 1992

A. V. Pusateri
President
National Apartment Association
Suite 900
1111 Fourteenth Street, N.W.
Washington, D.C. 20005

Dear Mr. Pusateri:

This is in response to your letter requesting information about the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation or legal advice, and it is not binding on the Department.

You have asked whether the ADA governs a "business/rental clubhouse" within a residential complex. You have explained that the clubhouse is used primarily to coordinate on-site staffs and collect rent, but also occasionally to lease to tenants' friends, as a meeting place with outside brokers and for leasing to the public. You have specified that only "[a] very, very small percentage of the actual leasing is conducted with the public."

Although the ADA does not apply to privately owned strictly residential facilities, it does cover places of public accommodation within residential facilities. Common areas that function as one of the ADA's twelve categories of places of public accommodation and that are not intended for the exclusive use of tenants and their guests are considered places of public accommodations and are thus required to comply with the ADA. An office that is used for rental transactions with the public is a public accommodation under the ADA, regardless of the extent of actual use by the public. Other common areas, such as party rooms, swimming pools, and tennis courts, that are intended for the exclusive use of residents and their guests, are amenities of the residential facility and not places of public accommodation.

cc: Records, Chrono, Wodatch, Magagna, Novich, Library, FOIA
Udd:Novich:policy.pl.193.ltr
01-01618

Such facilities are not subject to the accessibility requirements of the ADA, but to the requirements of the Fair Housing Act. If these common areas are opened up beyond residents and their guests on intermittent occasions, the facilities are subject to the ADA only for those events that are open to non-residents and their guests. Please consult the enclosed title III regulations and Technical Assistance Manual for further discussion of ADA issues.

I hope this information is useful to you.

Sincerely,

John L. Wodatch
Director
Public Access Section

May 26, 1992

Mr. John Wodatch, Director
Office on the Americans with Disabilities Act
Department of Justice
P.O. Box 66738
Washington, D. C. 20035-9998

Dear Sirs,

I am the President of the National Apartment Association, representing 8 million rental units. The majority of these units are built in configurations of 100 plus units, which require an on-site business/rental clubhouse. The usage of these facilities, is primarily as a private business location coordinating the on-site staffs and collection of rental payments.

In addition, a very small area of these business offices are occasionally utilized to leasing to friends of the existing tenants and as a meeting place for appointments made telephonically with outside leasing brokerage concerns. A very, very small percentage of the actual leasing is conducted with the public.

I would use your country club example as a parallel example.

We highly screen and qualify potential residents in our business office. We occasionally have individuals who drive into the apartment community and are given a tour and documents for review and signature similar to a private country club.

All common facilities usage at the apartment properties are restricted to use by the qualified, rent paying observing residents at the communities. Again, parallel to the usage of a country club, golf course, tennis courts, club house, restaurants, swimming pools etc.

Due to these similar examples, I urge the ADA and the Department of Justice to allow all of the offices, facilities and physical improvements involved with housing to remain under the Fair Housing Regulations already in existence and successfully working.

Sincerely,

A. V. Pusateri, CPM, CSM, CAPs

President

DJ 202-PL-283

OCT 22 1992 (STAMP)

Philip D. Mosciski, AIA
The Tecton Partnership
One Hartford Square West
Hartford, Connecticut 06106

Dear Mr. Mosciski:

This letter is in response to your letter requesting clarification of the application of section 403(g) of this Department's regulation implementing title III of the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or responsibilities under the Act. This letter provides informal guidance to assist you in understanding the ADA. However, it does not constitute a legal opinion or legal advice, and it is not binding on the Department.

Your letter indicates that you represent a client who is altering a primary function area in a commercial facility. Your client plans to modify the path of travel to provide access to the altered area according to the priorities established in section 403(g), but your client does not plan to spend the full 20 percent of the cost of the alteration to the primary function area. You have asked if your client is required to spend the full 20 percent to make all of the restrooms and drinking fountains on the path of travel accessible.

Section 36.403 of this Department's regulation requires a public accommodation or commercial facility that is altering an area containing a primary function to spend up to 20 percent of the cost of the overall alteration to make the path of travel to the altered area and the restrooms, drinking fountains, and telephones serving the altered area accessible. The full 20 percent must be spent unless the path of travel (including the restrooms, drinking fountains, and telephones serving the altered area) may be brought into compliance with the ADA Accessibility

Guidelines for a lesser amount. Section 403(g) establishes the

cc: Records, Chrono, Wodatch, Breen, Blizard, FOIA, Library
udd:mercado:policy.letters.certif:blizard.wodatch.mosciski
01-01616

priorities that should be followed only when it is not possible to make the path of travel accessible without exceeding 20 percent of the cost of the alteration.

Your letter also asks if it is necessary to make all of the restrooms and drinking fountains on the path of travel accessible if this can be done without exceeding the 20 percent limit. The ADA only requires that restrooms, drinking fountains, and telephones that serve the altered primary function area must be made accessible. Determining which particular elements must be made accessible requires a case-by-case assessment of the area that is being altered to determine which elements actually serve that area.

For your information, I have enclosed copies of this Department's regulation implementing title III and our Title III Technical Assistance Manual. I hope that this information is helpful to you.

Sincerely,

John L. Wodatch

RE: 28 CFR Part 36 36.403(g)(2)

Dear Sir/Madam:

I would like a written clarification on section 36.403(g)(2) in regards to disproportionality. A commercial building owner is making alterations to their facilities and plan on complying with the priority list as stated in the above mentioned section for making the path of travel accessible. The costs for the planed changes to the path of travel do not reach 20% of the costs of alterations. Also, there are more restrooms and drinking fountains along the path of travel that are not going to be made compliant. Does the owner have to keep going and make more restrooms and drinking fountains accessible until the path of travel costs reach 20% of the costs for the alterations?

To date this question is affecting our commercial clients. We see the need to get clarification on this same section in regards to our "Public Accommodations" clients also. A written clarification will be helpful in our efforts to make sure we are informing our clients appropriately for complying the the Americans with Disabilities act.

Sincerely,

Philip D. Mosciski AIA

Mr. Bruce Mims
Vice President
FOUR POINT DESIGN, INC.
1575 Catamount Road
Fairfield, Connecticut 06430

Dear Mr. Mims:

This is in response to your correspondence of July 7 and 8 and September 25, 1992, regarding the Americans with Disabilities Act and comments attributed to me concerning the steps to be taken by pharmacists in communicating with persons with hearing impairments.

Section 36.303 of the regulation implementing title III of the ADA requires that a public accommodation make available appropriate auxiliary aids and services to ensure that communication with individuals with disabilities is as effective as that with nondisabled persons. The auxiliary aid requirement is a flexible one and the type of auxiliary aid or service necessary to ensure effective communication will vary in accordance with the length and complexity of the communication involved.

In many instances, the exchange of written notes with a person with a hearing impairment will suffice to ensure effective communication. In other instances, however, the use of other auxiliary aids or services may be required. There are a wide variety of services and devices for ensuring effective communication, e.g., qualified interpreters, notetakers, computer-aided transcription services, written materials, telephones compatible with hearing aids and/or videotext displays; and the use of the most advanced technology is not required as long as effective communication is achieved. See, e.g., 56 Fed. Reg. 35,565-68; 35,597 (36.303); see also 4.3000-4.3600 of the Title III Technical Assistance Manual at pages 25-28 (copies enclosed).

cc: Records Chrono Wodatch Magagna FOIA MF
Delaney.ada.ltr.mims.pharmacy arthur T. 10/15/92
01-01621

We encourage pharmacists, health-care providers and other public accommodations to consult with persons with hearing impairments to determine what types of auxiliary aids or services can be made available to ensure effective communication.

Sincerely,

John L. Wodatch

OCT 22 1992

DJ 202-PL-257
Michael Reynolds, Esq.
St. John & King
500 Australian Avenue South
West Palm Beach, Florida 33401

Dear Mr. Reynolds:

This letter is in response to your letter requesting information about the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or responsibilities under the Act. This letter provides informal guidance to assist you in understanding the ADA. However, it does not constitute a legal opinion or legal advice, and it is not binding on the Department.

You have asked about the certification process under the ADA. Section 308(b)(1)(A)(ii) of the ADA permits State and local governments to ask the Department of Justice to certify that the accessibility requirements of a State or local building code that applies to places of public accommodation or commercial facilities meet or exceed the requirements of the ADA. In ADA enforcement actions, compliance with a certified State or local code will constitute rebuttable evidence of compliance with the ADA. State laws other than those that govern the construction or alteration of facilities subject to title III of the ADA are not eligible for certification.

Requests for certification must be made by an authorized State or local government official. The Department's review will be limited to the accessibility requirements that apply to new construction or alteration of places of public accommodation and commercial facilities subject to title III of the ADA. This includes any interpretations of the code by a State Attorney General or State courts that is included in the request for certification. Certification will apply to the State or local code as it has been formally interpreted prior to the request for certification. Subsequent interpretations that alter the way the code is applied would not be certified unless a new request for

c: Records, Chrono, Wodatch, Breen, Blizard, FOIA, Library
dd:mercado:policy.letters.certif:blizard.wodatch.reynolds
01-01625

certification is made. Individual "interpretations" or variances permitted by building inspectors reviewing specific buildings or building plans under the certified code are not certified.

The procedures for applying for certification are established in subpart F of the Department's regulation implementing title III of the ADA (28 C.F.R. SS 36.601-36.608) and explained on pages 68-73 of our Title III Technical Assistance Manual. Copies of the regulation and the Manual are enclosed for your information.

You also asked what procedure an entity should follow to determine if it is in compliance with the ADA if the State or local code has not been certified. In addition, you inquired whether there is State enforcement of the ADA. There is no Federal procedure for "preclearance" of a covered entity's operation. Title III enforcement will be carried out through case-by-case adjudication. Enforcement litigation may be initiated in the U.S. District Court by private parties or by the Department of Justice. No title III enforcement authority is delegated to State or local agencies. The enforcement procedures for title III are addressed in subpart E of the enclosed regulation (28 C.F.R. SS 36.501-36.508) and at pages 64-67 of the Technical Assistance Manual.

Finally, you have asked about the application of the ADA to private multifamily residences such as condominiums. Title III of the ADA imposes certain obligations on places of public accommodation. The Act lists twelve types of entities as places of public accommodation; strictly residential facilities are not among the listed categories. In addition, strictly residential facilities do not qualify as commercial facilities. Because strictly residential facilities are neither places of public accommodation nor commercial facilities, they are not covered by title III of the ADA. Portions of residential facilities that are used for a business purpose that would fall within the definition of place of public accommodation, such as the professional office of a health care provider, are subject to the requirements of title III. In addition, strictly residential facilities may have obligations under the Federal Fair Housing Act.

Common areas in residential facilities are not subject to title III if their use is restricted exclusively to residents and their guests. However, if a residential facility makes its common areas available for general use by nonresidents, it may lose its strictly residential character and be subject to the requirements of title III, if the common area facilities fall within one of the statutory categories of public accommodation.

Please refer to pages 35,551-35,552 of the enclosed regulation to find the twelve categories of public accommodation
01-01626

and a discussion of the circumstances in which a residential facility may be covered under title III. Some further discussion may be found at pages 1-3 of the enclosed Technical Assistance Manual.

I hope that this information is helpful to you.

Sincerely,

John L. Wodatch

re: the certification of state laws and the ADA's application to condominiums and other cooperative housing associations

To whom it may concern:

I have just recently begun investigating the ADA, specifically its effects on housing associations such as condominiums. I have some specific questions about the application of the bill's public accommodations section and possible state laws' certification, however my phone conversations haven't yielded any answers (when I can actually get through). I realize how busy your office must be at this time, but any assistance you could provide in response to these questions would be greatly appreciated.

1. What agency would have knowledge or be in charge of the certification of existing Florida laws under the ADA?

1a. If a state law was properly certified, would previously-issued state attorney general opinions interpreting that law be valid under the ADA? This question specifically relates to a 1980 opinion issued by the Florida attorney general which exempted condominiums as private residences from the then-existing accessibility standards for the disabled. If those laws

were certified (and, truthfully, I have not yet received any confirmation of the opinion's continuing validity in Florida), would the exemptions be rebuttable evidence against charges of discrimination?

Extend the question to include court interpretations of existing state laws. Basically I would like to know: when a state law is certified, do all of the state's interpretations of that law, in courts and regulations, continue to govern the implementation and effect of the laws, or will those interpretations have to be reconsidered in light of the ADA?
01-01628

3. Can a private entity request the certification of existing state laws? Could a condominium ask the state of Florida to certify the aforementioned accessibility standards and the existing exemptions? This question, if answered in the positive, also brings up the issue of correct procedure for such a request.

4. If no state laws have been certified, what is the correct procedure for an entity to determine if its actions and accommodations comply with the ADA's standards?

5. How do the ADA's public accommodations standards apply to private multi-family residences such as condominiums? Under the Federal Fair Housing Act Amendments of 1988, condominiums have followed certain standards. Will these change?

I am specifically interested in the ADA's application to the non-housing sections of a condominium or any other kind of private housing association. Most of these associations have recreational facilities where members can assemble for association meetings or for social activities. Where such a facility is open to the public (a golf course, for example), I understand the law to require appropriate accommodation. However, where the facility is only for the members of the association, is strict compliance with public accommodation standards required?

Any information you can provide will be very helpful. Further, if you could direct me to the proper state agencies in charge of Florida's implementation and interpretation of the ADA, I will direct all further inquiries to them.

Thank you very much for your time and assistance.

Sincerely yours,

Michael Reynolds

01-01629

OCT 26 1992

The Honorable Dennis DeConcini
United States Senate
328 Hart Senate Office Building
Washington, D.C. 20510

Attn: Ms. Susan D. Scott

Dear Senator DeConcini:

I am writing in response to your inquiry on behalf of (b)(6) regarding requirements for signs under the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist XX in understanding the ADA's requirements. This technical assistance, however, does not constitute a determination by the Department of Justice of rights or responsibilities under the ADA, and it is not binding on the Justice Department.

In existing facilities, title III of the ADA requires places of public accommodation to remove architectural barriers where it is readily achievable to do so, that is, where it is "easily accomplishable and able to be carried out without much difficulty or expense." Because signs in a facility may themselves create barriers to access by individuals with disabilities, installing new signs or altering existing signs is one action that should be considered when determining which barriers to remove. This obligation is, however, limited to places of public accommodation and is not imposed on the broader category of existing commercial facilities.

Because we do not know the nature of (b)(6) business, we are unable to determine whether the sign provisions apply to his business or to provide more specific guidance for

cc: Records; Chrono; Wodatch; Barrett; McDowney; FOIA; MAF.
:udd:jonessandra:ada.deconcinil
01-01630

him. However, further information is provided in the enclosed copy of the Department's title III regulation. The types of businesses that are considered places of public accommodation are listed in Section 36.104 on page 35594. The readily achievable standard is discussed at Section 36.304 on page 35597. Also enclosed is a copy of the Department's Title III Technical Assistance Manual. Discussion of removal of existing barriers appears at pages 28-35. These materials should provide guidance for XX in determining if and to what extent the ADA applies to his business.

Compliance with the ADA Accessibility Guidelines, which apply only to new construction and alterations, is not required for existing facilities, but the Guidelines can serve as a useful guide in determining what barriers may exist in existing facilities. For example, the Guidelines detail standards for lettering, finish and contrast, character proportion and height, and the height and location of signs designating permanent rooms and spaces, exit signs, and directional signs. The ADA Accessibility Guidelines appear as an Appendix to the enclosed rule, and Section 4.30, relating to signs, is on page 35659.

Congress enacted the ADA to ensure uniform protection for persons with disabilities across the country, and considered it inappropriate to allow each State unlimited discretion in setting standards for the removal of existing architectural barriers. As noted above, existing places of public accommodation must remove barriers only where it is readily achievable to do so. Accordingly, XX should not be overly concerned that the ADA requirements will have a negative impact on the conduct of his business.

I hope this information is helpful in answering (b)(6) inquiry.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

Department of Justice

Initially, my office asked for comment on this subject by the Department of Labor. I have enclosed their correspondence which indicates that the Department of Justice will be enforcing provisions of ADA regarding public accommodation. As (b)(6) has concerns regarding the rules in ADA on non-compliant signs, I would appreciate DOJ's input. Please clarify whether non-compliant signs must be removed altogether at a business or whether other accommodations may be made. Your comments regarding this matter will be most appreciated.

Sincerely,

DENNIS DeCONCINI

OCT 26 1992

The Honorable Bob Graham
United States Senator
Post Office Box 3050
Tallahassee, Florida 32315

Attention: Xalina LaBarge

Dear Senator Graham:

This letter responds to your inquiry on behalf of (b)(6) concerning his experiences in reserving hotel rooms to accommodate his disability.

The Americans with Disabilities Act (ADA) authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's provisions. However, it does not constitutes a legal interpretation, and it is not binding on the Department.

We understand the factual situation described by Mr. (b)(6) to be as follows: Through his travel agent, he attempted to secure a guaranteed reservation for a particular room to accommodate his disability. The request was made to the international reservation center of a major hotel chain, which advised the travel agent that the specific hotel would have to be contacted directly to arrange for the special type of accommodation requested. The hotel was contacted directly, and the desired reservation was made. Mr. (b)(6) concern seems to be that his request could not be accommodated through the central reservations center.

To assist Mr. (b)(6) in understanding all of the ADA's requirements applicable to public accommodations such as hotels, I have enclosed copies of the Department of Justice's Title III regulation and technical assistance manual. In this particular

cc: Records; Chrono; Wodatch; Breen; McDowney; FOIA; MAF.
:udd:jonessandra;ada.graham1
01-01634

instance, the applicable provisions are those included in Section 36.302, concerning modifications of practices. Discussion of this provision appears on pages 35564-5 and 35596-7 of the regulation, and on pages 22-3 of the manual.

Based on the information contained in Mr. (b)(6) letter, we are unable to conclude that the actions in question violate the ADA. The company was able to meet his request for a guaranteed reservation of a particular type of room and to insure its availability on his arrival, by asking him to call the specific hotel directly. Based on the information provided, we are unable to determine whether the company would be required to modify its central reservation system to be able to accommodate requests for individual hotels through that system.

I hope that this information assists you in responding to your constituent.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

Attention: Reservation Supervisor

I have always enjoyed staying at Best Western Motels, and have used your facilities whenever possible.

I am now 75 years of age, handicapped for various reasons including removal of cancerous kidney, heart and breathing problems, and an artificial hip. I have a disabled card from Florida which is good in all states.

Yesterday Aug. 6, 1992 AAA called your reservation center for advansed guaranteed reservations at ILLEGIBLE S. and ILLEGIBLE Tenn for the nights of Sept 14th and 15th and was told that guaranteed reservations for handicapped persons were not your policy.

The AAA representative immediately called the motels mentioned and received assurance for complete cooperation of our request.

I was under the impression that accommodation for handicapped persons was a Federal Law as of Jan 1, 1992.

I feel that this a very unfair condition for we who are handicapped and I would appreciate a letter stating that this situation could and would be remedied.

I would appreciate a prompt reply to this letter as we do appreciate and enjoy staying with you.

Sincerely
(b)(6)

P.S. It is not necessary for the bars and rods are not necessary, as a down and out room would suffise.

Copies of this letter (which is not word for word to the original sent to Best Western as a few changes were made from original rough draft).

Mr. (b)(6)
Leesburg, FL

Dear Mr. (b)(6)

Thank you for taking the time to make us aware of the problems you encountered with the Best Western International Reservation Center. We are concerned and wish to apologize for any inconvenience you may have experienced.

When you call our toll-free number, our reservation sales agents are trained to provide you with every assistance in booking your reservations. Our computer system provides our agents with the most up to date information available on rates, room availability and special requests for each of our hotels. This is provided to us by the management of each hotel. In a situation such as yours, you were informed that we could not guarantee a handicapped room at the Best Western member establishments that you requested. If we are unable to confirm the special room type requested, the reservations sales agents will then advise the guest to contact the hotel directly.

Without comments such as yours, we would be unable to provide the value, quality and service Best Western is known for worldwide. We look forward to another opportunity to serve your lodging needs.

Sincerely,

KATHRYN MARTIN
Senior Customer Service Representative

OCT 26 1992

Ms. Corey Hudson
Executive Director
Canine Companions for Independence
4350 Occidental Road
P.O. Box 446
Santa Rosa, California 95402-0446

Dear Ms. Hudson:

This is in response to your letter concerning service animals under title III of the Americans with Disabilities Act (ADA). We apologize for the delay in responding.

The ADA authorizes the Department to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you in understanding how the ADA may apply to public accommodations. This technical assistance, however, does not constitute a determination by the Department of Justice of rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

Under section 36.302 of the enclosed title III rule, a public accommodation must make reasonable modifications in its policies, practices, and procedures to avoid discrimination. A public accommodation must modify its policies to permit the use of a service animal by an individual with a disability, unless doing so would result in a fundamental alteration of the goods or services provided. These concepts are further discussed in section III-4.2000 of the enclosed title III technical assistance manual. As defined in section 36.104, the term "service animal" includes any guide dog, signal dog (e.g., a "hearing dog"), or other animal individually trained to do work or perform tasks for the benefit of an individual with a disability.

You asked how public accommodations will determine whether an accompanying animal is a service animal. The title III regulation does not permit public accommodations to require any type of identification or certification of status to be shown.

:udd:mather:1tr.hudson.servcanimals
cc: Records, CRS, FOIA, Friedlander, Mather, Breen
01-01639

Moreover, the fact that a particular State law may require the showing of identification is irrelevant for purposes of determining rights under the ADA. However, section 36.301(b) of the title III regulation permits a public accommodation to impose legitimate safety requirements that are necessary for safe operation of the public accommodation. Thus, a public accommodation may ask that the animal be removed when such removal is necessary for safe operation.

You also asked about the relationship between title III and State laws. Title III does not preempt any State law, if that State law provides protection for individuals with disabilities at a level greater or equal to that provided by the ADA. As explained in section 36.103(c), the ADA does, however, prevail over any conflicting State laws, or those laws that provide lesser protection against discrimination.

For example, assume that an individual with a disability, accompanied by a monkey as a service animal, enters a hotel in a State where the State law requiring access for service animals is limited to "guide dogs." Because this provision would result in a level of access that is less than that provided by title III, the hotel may not rely on the State law as a basis for prohibiting access for the monkey. A similar conclusion would apply to the situation you are concerned about, in which presentation of certification verifying the status as a service animal is a prerequisite to granting access to a place of public accommodation under a State law. Because the State law provides a level of access that is less than that provided by title III, the ADA would not permit the hotel to require presentation of such certification.

I hope this information has been helpful to you.

Sincerely,

Stewart B. Oneglia

CANINE COMPANIONS for INDEPENDENCE, founded in 1975
Exceptional Dogs for Exceptional People
Bonita M. Bergin, Ed.D.
Founder
Director of Research

October 23, 1991

Robert Mather
Office on the Americans with Disabilities Act
Civil Rights Division
US Department of Justice
Washington, DC 20530

Dear Mr. Mather,

I spoke with you the week of October 1, 1991, concerning the ADA Rules and Regulations as they pertain to service animals.

As you will recall we discussed how a public accommodations was to determine what animals/dogs were properly trained and therefore should be granted access as opposed to a person merely wishing to gain access with his/her pet. In response to how was the public accommodation to make this judgement, I believe you responded the public accommodation would have to make a good faith assumption that all animals/dogs were trained and entitled to access. Therefore all animals should be granted access with no further qualifications like a special ID card or an identifying cape or backpack.

While Canine Companions for Independence and other members of Assistance Dogs International are pleased that the ADA recognizes service animals, we are also concerned that the law not be abused by others.

To this concern I believe your response was that the existing state laws/rules of access for service animals/dogs should be what determines access at this local level.

By our most recent count, 13 states do not have laws providing for the access of assistance dogs. What do you propose our clients do, for example in Maine or the District of Columbia for that matter? Will Federal ADA prevail? Will the passage of ADA in January 1992 make it mandatory on the 18 states to

pass laws defining how a public accommodation is to determine a pet poodle from a properly trained service dog?
01-01641

In April 1991, Robin Dickson, President of Assistance Dogs International, Canine Companions for Independence and I believe several other Assistance Dog Schools/Centers submitted suggestions (see attached) that ADA regs. provide for some ID for properly trained assistance dogs. I am again making this request. Is it possible to have the matter reconsidered?

If not, what action do you suggest we take or advise our clients to take in gaining as problem free access to public accommodations as possible?

I have enclosed some Canine Companions for Independence material in the hopes you may become more familiar with the Assistance Dog concept and the Schools/Centers that perform the valuable training.

Looking forward to your response.

Sincerely,

Corey Hudson

Mr. John L. Wodatch
Office of American Disabilities Act
Civil Rights Division Department of Justice
Rule Mailing Docket 003
P.O. Box 75087
Washington, DC 20013

Dear Committee Members:

Assistance Dogs International, Inc. is a coalition of representatives of Guide Dog, Hearing Dog, and Service Dog organizations. Our purpose is to facilitate communication amongst members, provide opportunities for learning amoung members, and work on assuring that top quality training goes into every dog and organization that is a part of Assistance Dogs International.

The purpose of this letter is to address teh issue of rights of access for all disabled persons who are accompanied by Assistance Dogs. An Assistance Dog is defined as a Guide Dog for the visually impaired, a Hearing Dog for the hearing impaired, or a Service Dog for the mobility impaired. GUIDE DOG is defined as a dog which has been trained or is being specially trained for or in conjunction with a school for guide dogs to lead in harness and serve as an aid to the mobility of a particulare blind person.

HEARING DOG is defined as a dog which has been or is being specially trained by or in conjunction with a school for hearing dogs to alert a particular deaf or hearing impaired person to certain sounds.

SERVICE DOGS is defined as a dog which has been or is being specially trained by or in conjunction with a school for service dogs to the individual requirements of a physically disabled person, including but not limited to any of the following:

1. Pull wheelchair as needed
2. Retrieve/carry dropped items
3. Open/close doors
4. Provide balance/counter balance

Each school for Assistance Dogs provides illegible of certification, such as an identification illegible individual illegible of disabled person and Assistance Dog.

In addition:
A GUIDE DOG is identified by wearing a harness.
01-01643

CANINE COMPANIONS FOR INDEPENDENCE
THE CCI PROGRAM

Canine Companions for Independence (CCI) has changed the lives of hundreds of men, women, and children through its unique program of providing highly trained assistance dogs for individuals with disabilities. By helping them overcome physical and social barriers, the dogs enable CCI's participants to lead more independent, satisfying lives.

Most Canine Companions come from CCI's own breeding program. They are placed in volunteer "foster homes" for 16 months to be socialized and to receive initial obedience training. From there, the puppies are sent to one of CCI's regional centers for six months of advanced training. By two years of age, each dog has learned 89 commands and is ready to be matched with a participant from CCI's waiting list.

The matching of participants and canines takes place through a process that has earned the name, Boot Camp. During this intensive two-week training course, participants learn the techniques to command and control their new companions, as well as how to later expand the range of commands to meet their particular needs. In addition, each participant must demonstrate the ability to provide for the dog's care and well-being before graduating with a Canine Companion.

Graduation ceremonies at CCI are inspirational and emotional events, signalling the beginning of a new phase of life rich with promise for the new participant/canine teams. For some CCI graduates, having a Canine Companion means the ability to live without a full-time attendant for the first time; for others, it is a chance to regain independence lost through illness or accident.

A Canine Companion not only provides physical assistance, but offers companionship and unconditional love as well. It was early graduate teams who inspired the motto for Canine Companions Independence: "Exceptional Dogs for Exceptional People."

In 1975, Canine Companions for Independence pioneered the concept of the Service Dog. Since the program's inception, over 525 certified Canine Companions have been placed across the nation and abroad.

National Headquarters: P.O. Box 446, Santa Rosa, CA 95402
(707) 528-0830

COMMONLY ASKED QUESTIONS ABOUT CANINE COMPANIONS FOR INDEPENDENCE

Q. What is Canine Companions for Independence?

Canine Companions for Independence (CCI) is a 501(c)(3) non-profit organization that trains assistance dogs to serve people with disabilities other than blindness, providing them with greater independence.

Q. What types of dogs does CCI train?

CCI trains four types of dogs:

Service Dogs work-for people with physical disabilities, performing such tasks as turning on and off light switches, pushing elevator buttons, retrieving items, and pulling a wheelchair.

Signal Dogs are trained to alert people who are hearing-impaired to crucial sounds, such as a telephone, alarm clock, smoke alarm or baby's cry.

Social Dogs work for people with developmental disabilities by providing the loving interaction known as pet facilitated therapy.

Specialty Dogs are trained to help meet the needs unique to people with multiple disabilities, such as a hearing-impaired individual who also uses a wheelchair.

Q. What does it cost to receive a Canine Companion?

There is a $25 application fee and a $100 class registration fee, which includes the necessary canine supplies. These are the only charges to a CCI participant, even though the actual cost of breeding, raising and training each dog is over $10,000.

Q. How is CCI funded?

CCI is funded by donations, group and service club contributions, grants, and ongoing fundraising activities.

Q. Who can apply for a Canine Companion?

Any person with a disability wanting increased independence through the use of a dog, or a facility that wishes to institute a pet therapy program may apply for a Canine Companion.

(over)

newspaper clipping

'She's made me
self-reliant'

Together a boy and his dog do what he cannot do alone-live a normal life

Lots of kids want pets, but some kids need them. Really need them. Such kids as Travis Stout, who is unable to move his ankles, bend his knees and elbows or even wiggle his toes.

For Travis, who was born with a rare muscle condition called arthrogryposis multiplex congenita, the actions that are commonplace for any other nine-year-old boy were all impossible.

He couldn't, for instance, grab a snack from the fridge, switch on a light, carry books to school, even clean his room. Then a Labrador retriever came into his life.

Kosmic is Travis's dog, a highly trained canine companion able to obey 89 verbal commands. "She's my best friend," he says. Kosmic is also Travis's hands and feet...

Because Travis's arms and legs are "locked," he needs help even to get out of bed. Kosmic lies down on the floor, Travis slides himself off the bed, tummy up, and across Kosmic's back. "Then I say, 'Stand,'" says Travis, "and Kosmic gets up, getting me up too."

Kosmic carries Travis's books in a pack on her back. At school, where Travis is enrolled in a program for the gifted, Kosmic waits patiently.

"The school principal was really great about Kosmic," says Travis's mother, 32-year-old Kay. "He said keeping Travis from having his dog in school would be like telling another child he couldn't have his wheelchair."

At home, Kosmic tugs on a towel tied to the refrigerator door and fetches food from the bottom shelf for Travis.

In the Stout household, which includes dad Tom, 33, and brother Kendra, four, when Kay orders, "Pick up your clothes!" Kosmic picks them up.

Dogs like Kosmic aren't trained to protect, but if a stranger approaches Travis when his mother isn't nearby, Kosmic growls.

"If someone wanted to hurt Travis, they could," says Kay. "He can't run away or defend himself. I can't tell you what peace of mind that dog gives me!"

Three years ago, Kay read an item in an Ann Landers column about Canine Companions for Independence, a nonprofit organization in Santa Rosa, California, that provides trained dogs for the disabled free of charge.

Travis went through his instruction sessions alone, with his mother only watching. And because a disabled person's life may depend on it, the trainers must be certain that every match is perfect, so there was no guarantee that Travis would go home with a dog. But he's glad he did. "I love her so much," he says.

And Kosmic loves him back. "If I go visit my friends without her, she cries until I get back. Then she leaps into the air and licks my face. I'm never lonely. And she's made me a lot more self-reliant."

That sounds like a big word for a fourth-grader, but Travis has always been bright. His mother says he was saying "please" and "thank you" at age 10 months. He spoke in complete sentences by 18 months. Now Travis loves to read, and he can even use a computer.

"We're so proud of him," says his mom. "But we can't take much of the credit. Travis has been a joy from the start."

Right, Kosmic would say, in a language every boy understands: the wag of a dog's tail.

01-01647

OCT 26 1992

The Honorable Sandra Swift Parrino
Chairperson
National Council on Disability
800 Independence Avenue, S.W.
Suite 814
Washington, D.C. 20591

Dear Sandy:

I am responding to your recent letter asking about our strategies and funding for Americans with Disabilities Act (ADA) enforcement efforts in the next fiscal year.

The Civil Rights Division will devote extensive resources to ADA compliance activities in this fiscal year. Fortunately, during fiscal year 1992 we were able to secure staffing increases for our ADA complaint resolution efforts. Following is a survey of our staff resources available for processing complaints by Section.

1) Our newly created Public Access Section (formerly the Office on the Americans with Disabilities Act) investigates title III complaints against public accommodations and commercial facilities. Since the January 26, 1992, effective date, the Public Access Section has received 545 complaints alleging violations of title III. We currently have 10 staff attorneys and one paralegal involved in processing these title III complaints. Nine of the attorney positions and the one paralegal position were filled after June 1, 1992.

2) Our Coordination and Review Section handles all title II complaints against State or local governments involving programs, services, or regulatory activities relating to law enforcement, public safety, and the administration of justice.

cc: Records; Chrono; Wodatch; Breen; Willis; FOIA; MAF.
:net:ss63:udd:willis:letter.dunne.parrino
01-01648

Since the January 26, 1992, effective date, the Coordination and Review Section has received 304 title II complaints falling within its subject matter jurisdiction. We currently have 8 staff attorneys and 5 staff investigators involved in processing these title II complaints.

3) Our Employment Litigation Section handles all title I complaints against State or local governments that are referred to us by the Equal Employment Opportunity Commission after that agency has made a determination that there is reasonable cause to believe that a violation of title I has occurred and after its efforts to conciliate the matter have proven unsuccessful. This Section also has independent authority to bring "pattern or practice" suits. With title I only taking effect on July 26, 1992, the Employment Litigation Section has focused its efforts on three ADA investigations that it has initiated under its pattern or practice authority. No additional staffing has been provided for these efforts.

Our technical assistance program, which is the responsibility of the Public Access Section, plays a crucial role in our efforts to promote ADA compliance and minimize the need for complaints and litigation. The Section will continue its public outreach, education, and technical assistance activities to raise public awareness of the ADA's requirements. These activities include:

* Operating a speakers bureau that has provided expert speakers to more than 150 conferences and seminars nationwide, reaching over 19,000 individuals;
* Distributing copies of the title II and title III rules, technical assistance manuals, and other ADA reference materials to as wide an audience as possible. Over 1.75 million documents have been sent;
* Staffing a telephone information line that receives nearly 3,000 inquiries per week from the public about the Department's title II and title III rules;
* Issuing technical assistance letters to clarify certain provisions in the title II or title III rules; and
* Awarding grants to selected business and disability rights organizations to promote voluntary compliance with titles II and III. Nineteen grants have been awarded thus far totaling $3.4 million.

For fiscal year 1993, Congress has appropriated $4.5 million for technical assistance activities. We anticipate that a substantial portion of this sum will be spent on new grants. The remainder will be used to support our ongoing technical

assistance efforts.

01-01649

We believe that with the resources at our disposal, we can mount a credible enforcement program. The highly dedicated professionals of the Civil Rights Division have a long track record of producing results even under the most difficult circumstances. If our complaint load continues to increase at the current rate, however, we may at some point need additional resources.

We believe that ADA Watch has an important role to play in ensuring the effective implementation of the ADA by Federal agencies. If we can be of further assistance to you in this effort, please let me know.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

Mr. John R. Dunne
Assistant Attorney General
Civil Rights Division
Department of Justice
Tenth Street & Constitution Ave., NW
Room 5643
Washington, DC 20530

Dear John:

On behalf of the members of the National Council on Disability (NCD), I am writing to ask you to inform us about your strategies and plans to provide adequate funding, within the confines of budgetary constraints, for effective compliant resolution under the Americans with Disabilities Act (ADA) for the next fiscal year. I am writing to all of the agencies which enforce the ADA in order to request this information.

As you may know, NCD is very concerned about the adequate implementation of the ADA. As you may also know, we have initiated an ADA Watch program to gather information about the implementation of the Act. We know that several federal agencies have not received sufficient funds to effectively implement the titles of the Act for which they are responsible. NCD stands ready to act as an advocate to help make your case to Congress and the Administration for increased funding in order to fully implement the Americans with Disabilities Act.

Thank you for your help in this matter. I look forward to hearing from you and to working with you in the future.

Sincerely,

Sandra Swift Parrino
Chairperson

OCT 27 1992

The Honorable Conrad Burns
United States Senator
2708 First Avenue North
Billings, Montana 59101
Attention: Kathy McLane

Dear Senator Burns:

This letter responds to your inquiry of September 18, 1992, requesting information about the applicability of the Americans with Disabilities Act (ADA) to Federal agencies, enforcement of the ADA, and distribution of ADA regulatory materials.

The ADA does not apply to Federal agencies, but it does apply to private and public entities as described below. Similar Federal statutes which do apply to practices and facilities of Federal agencies are the Rehabilitation Act of 1973 and the Architectural Barriers Act.

With regard to the ADA, it applies and is enforced as follows: title I covers private employers and State and local governments and is enforced by the Equal Employment Opportunity Commission; title II applies to State and local governments and agencies, and enforcement is coordinated by the Department of Justice; title II also covers public transportation, and to that extent is enforced by the Department of Transportation; title III applies to public accommodations and commercial facilities and is enforced by the Department of Justice; title IV relates to telecommunications and is enforced by the Federal Communications Commission.

cc: Records; Chrono; Wodatch; Breen; McDowney; FOIA; MAF.
:udd:jonessandra:ada.burnsl

01-01652

We have enclosed copies of the title II and III regulations and technical assistance manuals published by the Department of Justice. Regulatory materials promulgated by other enforcing agencies are available directly from those agencies.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

John Wodatch, Director
Americans With Disabilities
Post Office Box 66738
Washington, DC 20035-9998

Dear Mr. Wodatch,

My office has been contacted by a constituent with concerns regarding the Americans With Disabilities Act (ADA). This constituent requests the following information:

1) What agencies and federal departments, if any, are exempt from complying with the ADA law?

2) How are materials informing agencies about new regulations distributed; such as by bulletin or publication?

3) What agency enforces the Americans With Disabilities Act?

Any information or help you can provide my staff to enable us to assist in responding to our constituent will be greatly appreciated. Please direct any correspondence or questions regarding this inquiry to my office at:

Senator Conrad Burns

Attention: Kathy McLane

OCT 27 1992

The Honorable Phil Gramm
United States Senator
2323 Bryan Street, #1500
Dallas, Texas 75201

Attention: Clarissa Clarke

Dear Senator Gramm:

This letter responds to your inquiry on behalf of (b)(6) concerning limitations on insurance coverage and the applicability of the Americans with Disabilities Act to her situation.

The Americans with Disabilities Act (ADA) authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's provisions. However, it does not constitutes a legal interpretation, and it is not binding on the Department.

The provisions of the ADA applicable to insurance company practices are somewhat limited, and are set forth in Section 36.212 of the Department of Justice's title III regulation, a copy of which is enclosed. The provision appears on page 35596, and additional discussion on this issue is included in the regulatory preamble on pages 35562-3. Also enclosed is a copy of our title III Technical Assistance Manual, which includes

information on this point on pages 18-9.

We are unable to determine from the information provided whether the situation described by Ms. (b)(6) is a potential violation of title III of the ADA. If, after reviewing the enclosed information, Ms. (b)(6) believes there may be such a violation, she can proceed to remedy it by proceeding as described on pages 64-7 of the Manual.

cc: Records; Chrono; Wodatch; Breen; McDowney; FOIA; MAF.
:udd:jonessandra:ada.gramm2
01-01655

There is also a possibility that Ms. (b)(6) may have a claim under title I of the ADA, which is enforced by the Equal Employment Opportunity Commission. It is clear from her letter that she has already forwarded the information to the EEOC, and I assume that she will hear from that agency concerning the title I ADA provisions that may apply.

I hope this information assists you in responding to your constituent.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

EMPLOYEE: All full time employees on the company payroll and working a minimum of 30 hours per week or more.

NEW EMPLOYEES: First of the month following the completion of one month full time employment.

DEPENDENT: Whenever used herein shall mean - (A) An employee's spouse and (B) unmarried child(ren) including stepchildren, legally adopted children, or foster children who have the same legal residence as the employee, who have not attained their 19th birthday, and who are not members of the armed forces; provided that any child over age 19, but less than 25, shall be considered as a dependent only if he is attending an accredited institution of learning as a full-time student and is primarily dependent on the employee for support and maintenance and claimed as an income tax deduction.

GENERAL EXCLUSIONS: Charges for eye glasses, eye refractions and hearing aids, alcoholism or drug addiction, miscarriage, abortion, confinement or care in any government hospital or institution, charges in connection with war or an act of war or participation in a riot or insurrections; or self-inflicted injuries, or sickness, or an attempted suicide, while sane or insane; exogenous obesity; and any other expenses not necessitated by an accident or sickness, including male or female sterilization or reversals thereof, whether voluntary or otherwise. Charges for illness or injury arising out of the Military Service; charges which a person is not legally required to pay; treatment of corns, callouses, bunions, trimming of toenails except as provided in the Policy. Service or treatment due to altering the size or shape of the breast, or any other anatomical part of the body, male or female, whether voluntary or otherwise.

Any care or treatment of the teeth or gums or for the fitting or wearing of dentures; or any care or treatment of teeth, jaws, or jaw joints, including, but not limited to: atrophy of the lower jaw; malocclusion; maxillo-facial surgery; tempero-mandibular joint dysfunction; and retrognathia; except for treatment of a congenital anomaly in a child born while the person is insured for Medical Expense Benefits under this plan. However, with respect to Section 11 - Benefits - Employee - Part EDMM - Employee and Dependent Major Medical Expense Insurance, this exclusion shall not apply to treatment of accidental injury to sound natural teeth (including their replacement) if the injury occurs while insured and the treatment is given within six months after the date of the injury. Charges incurred for a deviated nasal septum, unless sustained in an accident which occurs while the person is a covered person under the Policy.

GENERAL LIMITATIONS: Charges for Jaw, Dental and/or Cosmetic treatment or Surgery, except for charges resulting from an accident occurring while insured hereunder, and except for congenital defect in a newborn child. Psychiatric treatment out of hospital will be limited to a benefit of 50% of the eligible charge for treatment or consultation, up to a maximum eligible charge

of $30.00 per treatment or consultation. Lifetime maximum of $5,000 on mental and nervous conditions for covered expenses incurred in and/or out of hospital. Charges for any care/service or supplies provided in connection with hernia, tonsillitis, adenoids; any disease or disorder of reproductive system, gall bladder, tuberculosis, cancer, tumor, varicose veins or rectal disease will not be considered eligible charges unless such charges are incurred after the end of 6 consecutive months, during which the medical expense benefits have continuously been in force for the covered person; provided, however, the covered person has satisfied all other conditions of the policy including the Pre-Existing Condition Limitation. Benefits payable for all charges for or in connection with an organ transplant are limited to a lifetime maximum of $25,000. No benefits are payable for charges related to the donor or for the organ itself. The maximum for all benefits payable while the person is a covered person under the policy for care or treatment related to or resulting from Acquired Immune Deficiency Syndrome (AIDS), on and after the date such disease has been diagnosed, shall be $10,000. For the purposes of this provision, care or treatment shall include, but not be limited to, care or treatment of conditions such as Kaposi's sarcoma, pneumonia, pneumocystitis, viral diseases, and other infectious diseases, but shall not include care or treatment of any disease or injury which is clearly not related to the person having contracted or having AIDS. Preventive medical care: $200 maximum per family per year; includes immunizations, mammograms, routine physicals and pap smears.

Hospital charges incurred on Friday, Saturday or Sunday in connection with an admission on any of those days are excluded unless the admission is for:

(a) an emergency condition requiring immediate medical care: or
(b) diagnostic tests or procedures, or surgery if performed within 24 hours from the time of admission.

RATE CHANGE: Based on claims experience - Any premium due date with 30 days advance written notice after completion of selected rate guarantee. Rate guarantee not valid if medical history provided is not complete and accurate.

TERMINATION: By Class - Non-payment of Premium - Material Misstatement.

LIFE INSURANCE CONVERSION POLICY: If application is received within 31 days of employment termination.

EXTENSION OF BENEFITS: Covered Medical expenses as a result of injury or sickness originating prior to the dates of termination of employment will be payable up to 12 months after termination providing the insured is wholly and continuously disabled as a result of such injury or sickness from the date of termination of employment to the date of incurred expense, however no benefits are payable for expenses incurred more than 3 months after termination of insurance with respect to the participating employer, or after the master policy terminates, or the date you or your dependents are covered under any

other group plan, whichever occurs first.

INSTRUCTIONS: PROCEDURE FOR SALE AND ENROLLMENT

1. Fill out name of company and "Date & Presented By" spaces on cost calculation page.
2. Select and circle plan of life and medical coverage and any optional plans of coverage desired.
3. Enter name, ages and dependent status for each employee on cost calculation page.
4. Use rates for proper coverage by age and dependent status and enter on cost calculation page.
5. Carry all rates totalled by benefit to the bottom of the cost calculation page.
6. Enter totals of columns one (1) thru four (4) and bring these figures to the right hand side of the cost calculation page under "PREMIUM SUMMARY" heading.
7. Add the $15.00 billing charge and the $1.00 per employee participation fee.
8. Total these figures. This total will be the first month's remittance and must be submitted with the application.
9. Complete the Employers Agreement and Subscription to the Trust and the agents statement which is on the reverse side of the cost calculation page and obtain the employers signature in the space provided.
10. Separate the cost calculation/Employers Agreement from the Outline of Benefits page and mail this page with the completed enrollment cards, a check for the first month's remittance, and include all material as requested by the underwriting requirements to:

REV.8/89

01-01658

September 10, 1992

STATE BOARD OF INSURANCE
P. O. Box 149091
Austin, TX 78714-9091

I applied for medical insurance with a group at the office. A period from about June 19th - August 6th, 1992 went by, along with an incurred cost to me to release medical records, and postage to cover our numerous correspondence. Finally a notice was sent stating the following "we must respectfully decline coverage on this applicant due to medical and underwriting regulations". Would this not be in writing somewhere under the General Exclusions or General Limitations in the handbook? Upon asking the agent over the phone if there was a medical or regulation number, she replied that she along with her head underwriter had decided this over the phone, and that there was nothing in writing to be seen. I HAD BEEN COMPLETELY HONEST AT THE OUTSET WITH THEM...COULD I NOT EXPECT THE SAME?

It was explained to me that since I had sustained a spinal cord injury 20 years ago, and that I am ambulatory they could not risk protecting me from falls... CAN THEY ASSUME THAT I AM GOING TO FALL? They were going to exclude my lower extremities and my back, but since I am ambulatory, they could not risk against falls. Can't they cover me for a cold, or virus? I had a complete physical last year, with excellent results -- above the average as a matter of fact. My condition has been stable for some time now, and I am in great condition.

I had insurance for 13 years with Prudential, and took my policy portable when I left my previous employer. After the second premium didn't arrive in the mail at my address, consequently I was cancelled with no notice--it was my word against the mail carriers, I guess. Here again my fate is decided over the phone.

First of all, I am just wondering about some kind of pre-existing time frame on insurance. Not that I am planning in any way to take advantage of the coverage I can get -- I never have and never will. I do occasionally catch a cold or virus that perhaps an able bodied person passed on to me. I just want the peace of mind to know that if something catastrophic does happen, I would be covered. The least they could do would be refund the money that I paid to have my records released, knowing they were not going to cover me from the beginning.

I am wondering how this cannot be discrimination. It might help if someone would come out first hand to take the application and see whose fate they're deciding upon. In light of the Civil Rights Act of 1991, and the ADA (Americans with Disabilities) Regulations, treatment should be getting better to those of us making a significant contribution to society. NOW I AM FORCED TO USE THE TAXPAYERS DOLLARS FOR HEALTHCARE, AND I WOULD RATHER USE MY OWN

MONEY.

Respectfully submitted,

(b)(6)

OCT 27 1992

The Honorable Phil Gramm
United States Senator
712 Main Street, Suite 2400
Houston, Texas 77002

Attention: Sherrie Parks

Dear Senator Gramm:

This letter responds to your inquiry on behalf of (b)(6) concerning the applicability of title III of the Americans with Disabilities Act (ADA) to car rental companies.

The Americans with Disabilities Act (ADA) authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's provisions. However, it does not constitutes a legal interpretation, and it is not binding on the Department.

Title III of the ADA, which prohibits public accommodations from discriminating against persons with disabilities, does apply to rental establishments, including car rental companies. Specifically, there are two different provisions that may apply to the circumstances (b)(6) has described: those relating to barrier removal and those relating to modifications of policies. Both provisions are discussed in detail in the Department's title III regulations and technical assistance manual, copies of which are enclosed.

Barrier removal is addressed beginning with Section 36.304 (page 35599) of the regulation and at page 28 of the manual. Modification of policies is discussed in Section 36.302 (page 35597) and on pages 22-4 of the manual. An additional provision of the regulation may be relevant: Section 36.301 of the regulation (page 35596) addresses the prohibition against

surcharges for accommodations required under the ADA, including barrier removal and modification of policies.

cc: Records; Chrono; Wodatch; McDowney; Breen; FOIA; MAF.
:udd:jonessandra:ada.gramml
01-01660

I have also enclosed for (b)(6) information a pamphlet that generally addresses ADA requirements for car rental agencies. The pamphlet was developed by the Council of Better Business Bureaus Foundation under a grant from the Department of Justice.

It is not possible for us to determine from the information provided in XX correspondence whether the actions of the company she described violated the provisions of the ADA noted above. If, on receiving this information and reviewing the regulations and manual, she wishes to request the Department to pursue an investigation to determine whether a violation did occur and, if so, to pursue the statutory remedies, she may do so in accordance with the procedures discussed in the manual on pages 64-6.

I hope this information assists you in responding to your constituent.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

TO: Sharon

FROM: (b)(6)

This is to follow up our conversation last week, regarding Title III of the ADA and our trouble in trying to get Hertz to accommodate our needs for a van rental with the rear seat removed.

As you can see from the letter, we have a partial victory. My perseverance has gotten us the van, but at a much higher cost than we should have to pay, or can afford. I should be able to pay the original price quoted when I first tried to rent, since service should have been in place at that time. That is what I am trying to accomplish now.

But as you can tell from all this, companies will only obey the law if you force them into it. People less knowledgable will still be getting jerked around. A few wellplaced phone calls might get some of the major companies to comply. Hertz doesn't even have a toll free customer service number. I have been calling the Customer Relations Manager in Oklahoma City, Carol Loud, (405) 721-6440.

Thanks for any help you can give.

(b)(6)
01-01662

(b)(6)
June 27, 1992

Mr. Craig R. Koch, President
Hertz North American Rental
225 Brae Blvd.
Parkridge, NJ 07656

Dear Mr. Koch,

Although my husband has Multiple Sclerosis, we like to travel like any other family. I am writing to report a problem I am having with your company, Hertz Car Rental.

My husband now needs to travel with a three-wheel mobility cart, and therefore we need a minivan to fit the cart, luggage and family in. Even with a van, the rear seat would have to be removed to accommodate the cart.

In early June I called several car rental companies to inquire about rates and availabilities. We will be traveling to San Diego on July 11, returning to Dallas on July 18. Hertz is the only company with on premises rental in San Diego, which is necessary with the cart.

The rate quoted for one week, unlimited mileage, was $268.99. However, the reservationist said that Hertz's policy was that the rear seat could not be removed. I was told it was because customers had damaged the vehicles. I explained why we needed it, and that the removal would be done by the agent. I was told the only thing that could be done was to call San Diego directly and ask the manager if he would do it. Money was spent to call San Diego Hertz twice to get the manager, and again be told, no.

We then reserved a full size car, since that seemed to be the only option, but this would make travel very difficult. The cart seat must be detached. The body of the cart, which is much harder to lift into a trunk, would take up the whole space in the trunk, and the seat and my son would take up most of the back seat, leaving no room for regular suitcases.

During this time, we learned that Title III of the Americans With Disabilities Act, which covers companies selling goods and services to the public, is already in effect. Hertz has to make reasonable accommodations; and certainly, what we were asking is reasonable, since it

costs nothing.

I then pursued it further. I asked reservations for a corporate customer service phone number. All I could get was a P.O. box in Oklahoma City. I had to call information myself to find a phone number. I called and spoke to the secretary of Carol Loud, the Customer Relations manager, and left a message. The phone call was not returned by the next day. I also spoke to Senator Phil Gramm's legislative aide, who was ready to investigate when I put it in writing. I decided to make another call to Carol Loud, and finally got her on the phone. The problem was explained.

01-01663

Her tone was curt and somewhat defensive. She said Hertz was providing for the handicapped with hand controlled cars, which has nothing to do with our needs. However, since I was knowledgeable of the new law, she knew she had better deal with it. She said she'd "check it out". She called back in about an hour and said, "as of today, Hertz's policy had changed, and that a van, with rear seat removed, would be available for us in San Diego". A victory, we thought! But short lived. The price she quoted, even with a 5% discount we had, was $468. This is more that we can afford, and $200 more than the original quote. I called reservations for an explanation, and was told that the first few van rentals on a certain date were at a special "promotional price" and that successive rentals got more expensive as fewer vans were left. What a terrible and unfair policy!

We believe that we should get our rental at the original $268 price quoted in early June, since that is when we would have reserved if the service we needed (and which should have been-available) was allowed then. If not, we will have to struggle with the car, which will greatly diminish our much looked forward to vacation.

Time is short, so I hope you will act on this quickly. I will be calling Carol Loud again next week. (Customer service really should have a toll free number.)

We have never used Hertz before, and I hope we can become satisfied and long-term customers. We are also in touch with many other handicapped people through the MS Society who will be very happy to learn of your new accommodations. Please don't make us suffer for being ground-breakers.

I can be reached days at(b)(6) or evenings at (b)(6).

Thank you for your help.

Sincerely,
(b)(6)

OCT 27 1992

Mr. Louis A. Green, P.S.
Land Planners and Surveyors
684 Country Club Drive
Xenia, Ohio 45385

Dear Mr. Green:

This letter is in response to your inquiry of September 18, 1992, about the potential conflict between the Americans with Disabilities Act ("ADA") and the local zoning ordinances of Xenia, Ohio.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation or legal advice and it is not binding on the Department of Justice.

Your letter indicates that the city of Xenia initially approved your use of a new facility and then reversed itself, disapproving your use. If you have reason to believe that the city reversed its decision because you employ persons with disabilities, then you may wish to file a complaint under title II of the ADA, which generally prohibits discrimination by State and local governments against persons with disabilities. You may file such a complaint with Ms. Stewart Oneglia, Chief, Coordination and Review Section, Civil Rights Division, United States Department of Justice, Post Office Box 66118, Washington, D.C. 20035-6118.

If, on the other hand, the city disapproved your use of the new facility for reasons unrelated to the fact that you employ persons with disabilities, then, based on the facts stated in your letter, it is unlikely that the ADA applies to your situation.

cc: Records, Chrono, Wodatch, Contois
Udd:Contois:pl.zoning

01-01665

Thank you for your inquiry. I hope this information is useful to you in understanding the requirements of the ADA.

Sincerely,

John L. Wodatch

September 18, 1992

Ms. Lori Kohn
U.S. Department of Justice
Civil Rights Division
Washington, D.C. 20035

Re: The Americans with Disabilities Act

Dear Ms. Kohn:

I want to express my appreciation to you for the assistance you have provided recently. I especially want to thank you for sending us copies of the Federal Register (dated 7/26/91) and the Title II Technical Assistance Manual. They have been very helpful.

Yesterday, September 17, I met with my attorney to discuss several issues pertaining to our business operation including our pending move into a new facility. I am the owner of a consulting engineering business which employees two certifiably disabled persons (one since 1978). Our business is a highly technical low traffic business and not a detriment to the property values or quality of life in any area in which it would operate.

Our business has experienced positive growth such that it has outgrown our present office. We have agreed to lease a new facility which will allow us to hire another engineer who incidentally also is certifiably disabled. The location we wish to move into is presently zoned residential although it has been used as a retail business for 23 years and is adjacent to other business properties.

The City of Xenia, Ohio originally approved our use of this facility and then without notification, held a subsequent meeting in which they reversed their decision. The outcry from citizens, business associates and other public officials has been in total support of us. We have been advised that in as much as we employ certifiably disabled persons that our business is exempt from local zoning and interference under The Americans with Disabilities Act. In addition, the owner of our facility

will by contract (as allowed and stipulated in our lease) work

with the State of Ohio Agencies, and use part of the facility for technical rehabilitation of other disabled professional persons.

My attorney, Alan G. Anderson, feels that we have a very strong legal case. However, he would like to have answers to the following specific questions:

> "I am somewhat familiar with the Federal Fair Housing Act Amendments of 1988 and cases like Oxford-Evergreen v. City of Plainfield 769 F. Supp. 1329 (DNJ 1991). I understand that practically speaking a municipality cannot zone to keep out disabled group homes, and that local zoning is pretty much powerless. However, to switch to business under ADA: Does the same apply? Can my client, Louis A. Green and Associates, operate a consulting business in a residential area (it is important to note that the property was used as a business for 23 years prior to their lease, and that there is other business use around the facility by variance)? The owner of the facility has contracts with State Rehabilitation Departments to retrain certifiably disabled persons, and Louis A. Green and Associates does and will employ certifiably disabled persons in the course of their business, are they in effect exempt from such local zoning in this case? Is this a type of case in which the U.S. Justice Department would participate?"

Again, I appreciate your help and any advice or assistance you might provide.

Sincerely,

Louis A. Green, P.S.

LAG:bh

OCT 27 1992

The Honorable Robert S. Walker
U.S. House of Representatives
2369 Rayburn House Office Building
Washington, D.C. 20515-3816

Dear Congressman Walker:

This letter responds to your inquiry on behalf of (b)(6) concerning the Americans with Disabilities Act (ADA).

The Americans with Disabilities Act authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's provisions. However, it does not constitutes a legal interpretation, and it is not binding on the Department.

We understand (b)(6) inquiry as follows: He uses a wheelchair. Presumably because of a State or local law or regulation relating to land use, he has been prohibited from installing running water in a cabin that he owns. He has asked whether the ADA includes any provisions that would require that he be given permission to install running water in his cabin.

Title II of the ADA prohibits State and local governments from discriminating against individuals with disabilities. The general provisions of this title are discussed in the enclosed Department of Justice regulation. Specifically, the provisions that may apply to this situation are in Section 35.130(b)(7), which appears beginning at the bottom of page 35718, and requires a public entity to make reasonable modifications in policies when necessary to avoid discrimination on the basis of disability. Further discussion of this provision is included on page 13 of the enclosed Technical Assistance Manual for title II.

cc: Records; Chrono; Wodatch; Breen; McDowney; FOIA; MAF.

We are unable to determine from the information provided whether these provisions would require the State or local entity to permit (b)(6) to install running water on his property. If, after reviewing the enclosed materials, (b)(6) believes the ADA requires such a modification of the rule creating the prohibition, he can proceed as explained on pages 45-8 of the Manual.

I hope this information assists you in responding to (b)(6)

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

01-01671

OCT 28 1992

(b)(6)

Dear Mr. (b)(6:

This letter is in response to your inquiry concerning the responsibilities of a private, non-profit organization that intends to build a foster care home for children under the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

Senator Harkin has informed us that your organization, The Baptist Children's Home and Family Ministries, Inc. (BCH), is privately owned and non-profit, and is licensed by the State of Iowa. You further informed us that BCH has no affiliation with State or local government entities, other than its State license, and it receives no funding from Federal, State, or local government entities. Senator Harkin stated that you seek information about BCH's ADA responsibilities in building a foster home for eight children. This letter concerns BCH's responsibilities as a public accommodation under title III of the ADA. BCH may also have ADA obligations as an employer, under title I of the ADA. You may contact the Equal Employment Opportunity Commission at 1801 "L" Street, N.W., Washington, D.C. 20507, (800) 669-4000 for further information about BCH's title I obligations.

Because BCH is a private organization and has no affiliation to State or local governmental entities, the applicable ADA provision is title III, which applies to private entities

cc: Records; Chrono; Wodatch; Novich; McDowney; FOIA, MAF.
:udd:novich:congress:harkin2. (b)(6)
01-01672

operating places of public accommodation. Title III defines a place of public accommodation as a facility that is privately owned, affects commerce, and fits into one of twelve categories. Strictly residential facilities are not included in this list. If the BCH home is strictly residential, is not covered by title III of the ADA. It will, however, be covered by title III if it provides a significant enough level of social services that it can be considered a social service center establishment. Social services in this context include, for example, medical care, meals, transportation, counseling, and social activities. You may consult the enclosed title III regulation, at pages 35551-35552 for further discussion of social service center establishments.

Even if the BCH home is a social service center establishment, title III will not apply if the home is controlled by a religious entity. Section 307 of the Act exempts religious or religiously controlled entities from their title III obligations, even where those entities operate facilities that would otherwise be covered as places of public accommodation. You informed us that BCH receives 80% of its funding from Baptist churches and individuals in those churches, and that the entire BCH Board of Directors is Baptist, including both pastors and laypersons from Baptist churches. Although we are unable to determine whether BCH would qualify for title III's religious exemption, funding sources and the composition of a board of directors are relevant factors in such a determination. You may consult section 36.102(e) at page 35593 of the enclosed title III regulations, with further discussion at page 35554, for explanation of the religious entity exemption. Please be aware that religious entities are not exempt from their responsibilities under title I.

Therefore, if the foster care home BCH intends to build is a social service center establishment, and if BCH is not religiously controlled, the BCH home would be subject to the title III requirements for new construction, found in section 303 of the ADA. Section 303 governs new construction of facilities for which: (a) the last application for a building permit or permit extension was certified to be complete after January 26, 1992; and (b) the first certificate of occupancy is issued after

January 26, 1993. Section 303 requires that such facilities be designed and constructed to be readily accessible to and usable by individuals with disabilities. The effective dates and requirements for new construction can be found in section 36.401 of the enclosed title III regulation, at pages 35599-35600, with further discussion at pages 35574-35580. A facility will be considered readily accessible and usable if it is designed and constructed in strict compliance with the technical specifications found in the Americans with Disabilities Act Accessibility Guidelines, which are appended to the enclosed title III regulation, beginning at page 35605.
01-01673

Once the BCH home is built and operational, it must comply with section 302 of the ADA, which prohibits discrimination on the basis of disability in existing facilities. Pursuant to that section, the BCH home must: (a) eliminate discriminatory eligibility criteria for the home's participants; (b) make reasonable modifications to discriminatory policies, practices, and procedures; (c) provide auxiliary aids and services when necessary for effective communication with participants with disabilities; and (d) remove architectural barriers to access where such removal is readily achievable. Please consult Subparts B and C of the enclosed title III regulation, at pages 35595-35599, with further discussion at pages 35555-35574, for explanation of the ADA responsibilities for existing facilities.

I hope this information is helpful to you.

Sincerely,

John L. Wodatch
Chief
Public Access Section

John Wodatch, Director
Office of the Americans with Disabilities Act
Civil Rights Division
United States Department of Justice
P.O. Box 66738
Washington, DC 20035-498

Dear Mr. Wadotach:

A constituent of mine, (b)(6) contacted my Des Moines office to request information pertaining to the Americans with Disabilities Act of 1990.

(b)(6) is employed with the Baptist Children's Home and Family Ministries, Inc. This is a private/non-profit

organization which is licensed by the State to provide foster care services. They are presently in the process of planning to build a foster care home in order to provide services for eight children.

(b)(6) would like to know what the agencies' obligations are under the Americans with Disabilities Act. I would appreciate any assistance you could provide to (b)(6) regarding this issue. His address is (b)(6). The telephone number is (b)(6).

Thank you, in advance, for your assistance regarding this matter.

Sincerely,

Tom Harkin
United States Senator

TH/ds

OCT 28 1992

The Honorable Amo Houghton
Member, U.S. House of Representatives
Federal Building, Room 122
Jamestown, New York 14701

Attention: Carol Sheldon

Dear Congressman Houghton:

This letter responds to your inquiry on behalf of (b)(6) concerning roadway conditions in the trailer park where he resides. You have asked whether the Americans with Disabilities Act (ADA) requires the roadways to be accessible to(b)(6).

The Americans with Disabilities Act (ADA) authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's provisions. However, it does not constitutes a legal interpretation, and it is not binding on the Department.

Title III of the ADA regulates "places of public accommodation," as listed under Section 36.104 of the enclosed title III regulation on page 35594. Residential facilities and

communities are not included under the ADA as places of public accommodation. Therefore, if the trailer park in question is open only to residents and their guests, and does not otherwise include facilities qualifying as a "place of public accommodation," neither the park nor its roadways would be subject to ADA regulation. Of course, residential facilities may be subject to the nondiscrimination and accessibility requirements of the Fair Housing Act.

cc: Records; Chrono; Wodatch; Breen; McDowney; FOIA; MAF.
:udd:jonessandra:ada.houghtonl

01-01676

The only other ADA provisions that may apply would be those of title II, which governs State and local government programs and services. However, it does not appear from your inquiry that the roadways in question are under the authority of a State or local government entity. Nevertheless, I have also enclosed a copy of the Department's title II regulation, which describes accessibility requirements applicable to State and local services.

If (b)(6) feels, after reviewing the enclosed information, that the roadway conditions in question are violative of either of the regulations, he may proceed as explained on page 45 of the enclosed Title II Technical Assistance Manual (for a title II violations) or, for a title III violation, as described on pages 64-7 of the enclosed Title III Technical Assistance Manual. These two manuals also include additional discussion of the general applicability of the ADA.

I hope this information assists you in responding to your constituent.

Sincerely,

John R. Dunne

Assistant Attorney General
Civil Rights Division

Room 1244
633 Indiana Avenue, NW
Washington, D.C. 20531

Dear Mr. Walter:

My Jamestown District Office has recently been contacted by XX XXXX XXXXXX XXXXXX XXXXXXX XXXXXXX XXXXXXX New York 14733, regarding difficulties he is encountering with handicapped access.

(b)(6) is confined to an electric three-wheel vehicle (much like a wheelchair) and his son is confined to an electric wheelchair. Due to roadway speed bumps neither are able to access the roadway or sidewalk. They need help to get over each speedbump. Since these speedbumps are part of the trailer park roadway, would the trailer park be subject to ADA regulations? Would these speedbumps be considered a removable obstacle?

Any insight you may be able to provide would be greatly appreciated. I would request a written response. All correspondence should be addressed to me at the Jamestown District Office, P.O. Box 908, Jamestown, New York 17401 - 0908. Should you have any questions, please do not hesitate to contact the Jamestown office. Carol Sheldon, one of my staff assistants, will be happy to help you. Thank you for your help in this matter.

The Honorable Jim Saxton
Member, U.S. House of Representatives
1 Maine Avenue
Cherry Hill, New Jersey 08002

Attention: Dee Denton

Dear Congressman Saxton:

This letter responds to your inquiry on behalf of (b)(6) requesting information on the applicability of the Americans with Disabilities Act (ADA) to the Merchantville Community Center.

The Americans with Disabilities Act authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's provisions. However, it does not constitutes a legal interpretation, and it is not binding on the Department.

It is not possible for us to determine, from the information your constituents have provided, what provisions of the ADA may apply to this facility. We are enclosing copies of the Department's regulations and Technical Assistance Manuals for both title III, which applies to public accommodations (as defined in the Act and the regulations), and title II, which applies to state and local government activities. There are different standards and provisions under the two different titles.

We recommend that your constituents review the enclosed information, and determine whether either of these titles applies to the Community Center. They may then proceed to remedy any violations in the manner described under the "Enforcement" section at the end of each Manual. I should note that there are different procedures for each title.

cc: Records; Chrono; Wodatch; Breen; McDowney; FOIA; MAF.

August 25, 1992

Congressman James H. Saxton
1 Maine Avenue
Cherry Hill, New Jersey

Dear Honorable Congressman Saxton:

My wife and I are writing to you with regard to the Merchantville Community Center and its lack of handicap facilities.

(b)(6) and myself belong to the Merchantville Assembly and have occasion to rent the Merchantville Community Center four (4) times a year. Our concern is that there are three (3) members of our assembly who are handicapped, and the Community Center does not have any handicap facilities, i.e., lavatory and entrance.

For the past year, I have been in communication with the Community Center authorities, and have asked them to seriously consider installing a wheel chair entrance. I have had no success with my request.

We are writing to you to ask for your intervention on our behalf. Any assistance you can give us with this endeavor will be greatly appreciated.

Sincerely,

(b)(6)

Cherry Hill, New Jersey 08003

01-01681

OCT 30 1992

The Honorable Scott Klug
Member, U. S. House of Representatives

16 North Carroll Street, Room 600
Madison, Wisconsin 53703

Attention: Sam Gold

Dear Congressman Klug:

This letter responds to your inquiry on behalf of (b)(6) concerning application of the Americans with Disabilities Act (ADA) to a restaurant owned by his client.

The ADA authorizes this Department to provide technical assistance to individuals and entities having rights or responsibilities under the ADA. Accordingly, this letter provides informal guidance to assist you in responding to (b)(6) However, this technical assistance does not constitute a legal interpretation, and it is not binding on the Department of Justice. (b)(6) has raised a number of questions to which the following information is responsive:

Section 302(a) of the ADA prohibits discrimination on the basis of disability by "any person who owns, leases (or leases to), or operates a place of public accommodation." Accordingly, title III applies to both the owner and a lessee of a public accommodation, and both are responsible for removing existing barriers when it is "readily achievable," as defined by Section 301(9) of the ADA.

As provided in the definition of "readily achievable" in Section 36.104 of the title III regulation, factors to be taken into account in determining whether an action is readily achievable include the overall financial resources of the facility and the effect of the action on expenses and resources of both the owner and the lessee, as well as a number of other factors. The exact obligations of an owner and lessee would be determined on a case-by-case basis, and we cannot anticipate whether (b)(6) client's entire portfolio of businesses would be considered in this instance.

cc: Records; Chrono; Wodatch; Breen; Delaney; McDowney; FOIA;
MAF. :udd:jonessandra:ada.klugl
01-01682

Further discussion of landlord/tenant responsibilities appears on pages 35555-56 and in Section 36.201 of the title III regulation. Discussion of barrier removal is included on pages 3553-54 and in Sections 36.304-305 of the title III regulation, and pages 28-39 of the Title III Technical Assistance Manual. A full discussion of the enforcement provisions of the ADA can be found in Sections 36.501-508 of the title III regulation and in the Technical Assistance Manual at pages 64-67. Since we understand (b)(6) has copies of the materials referred to, we have not enclosed copies with this letter.

The Department of Justice does not perform inspections of public accommodations except in the course of conducting an investigation for noncompliance. However, informal technical assistance regarding the ADA accessibility standards is available by calling our telephone information line, (202) 514-0301. His client can also receive such guidance from local building professionals, who should be familiar with the ADA's requirements.

I hope this information is helpful in responding to your Constituent.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

Mr. John L. Wodatch
Director
Office On The A.D.A.
Department of Justice
P.O. Box 66738
Washington, DC 20035-6738

Dear Mr. Wodatch:

I am writing on behalf of my constituent, (b)(6) would like to receive a written reply concerning some questions he has about the Americans with Disabilities Act (ADA).

(b)(6) has a client who would like to rent space as a restaurant/bar. His client not only owns this restaurant, but has other substantial commercial and residential assets in the city. It is my understanding that the restaurant is not part of a chain.

We have been told by DOJ officials that the restaurant would have to make changes to conform with ADA which are are "readily achievable", i.e., "easily accomplishable without much difficulty or expense." (b)(6) central question is this: Will DOJ evaluate the criterion of "readily achievable" on the basis of the financial status of the restaurant alone or will they evaluate it on the basis of the entire portfolio of his client? In addition, he would like to know who would be primarily responsible for making any changes, the lessee or the lessor.

(b)(6) would also like to know if it is possible for a DOJ official or representative to look at the property or examine in greater detail the specifics of the case in advance and let him know what kind of changes, if any, would need to be made. In addition, he would like information on the enforcement mechanism.

I would appreciate it if you would direct your correspondence in reply to this inquiry to my District Office in

Madison. (b)(6) already has copies of the regulations and Technical Assistance Manual, but the information is not clear. Please feel free to contact Sam Gold of this office if you have any questions.

NOV 3 1992

Tom Gallagher
Manager, Research and Planning
Department of Employment
P.O. Box 2760
Casper, Wyoming 82602

Dear Mr. Gallagher:

Your letter to the Architectural and Transportation Barriers Compliance Board requesting information about the Americans with Disabilities Act (ADA) was referred to this office for response.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements; however, it does not constitute a legal interpretation and it is not binding on the Department.

Your letter describes an ordinance, adopted by the city of Casper, Wyoming, allowing certain individuals, including persons with disabilities, to purchase curbside parking rights on a monthly basis. Under this ordinance, persons with disabilities are allowed to park along a curb for up to eight hours a day for a monthly fee of $25. Your letter questions whether some recourse is available to you because you believe that this ordinance is discriminatory. Included with your letter was a brochure describing the city's parking regulations in the downtown area of Casper, Wyoming.

The ADA prohibits State and local government entities from denying benefits or services to any person with a disability, if that person would otherwise be entitled to those benefits or services. 42 U.S.C. 12132; 28 C.F.R. 35.130. Furthermore,

> [a] public entity may not place a surcharge on a particular individual with a disability or any group of individuals with disabilities to cover the costs of measures ... that are

required to provide that individual or group with nondiscriminatory treatment required by the Act or this part.

cc: Records, Chrono, Wodatch, Magagna, Friedlander, Nakata, FOIA
Udd:Nakata:202.PL.267.Gallagher

01-01686

28 C.F.R. 35.130(f).

According to the brochure included with your letter, the city of Casper allows free curbside parking for up to two hours in the downtown area. Ordinarily, curbside parking is not allowed beyond two hours. Because persons with disabilities are allowed to stay at the curbside for longer periods of time, the city is offering persons with disabilities a service not generally available to the public. The Department of Justice's regulation specifies that the ADA does not prohibit a local government from providing a benefit or service to persons with disabilities that goes beyond those required by the ADA. 28 C.F.R. 35.130(c).

Furthermore, the $25 per month fee does not appear to be discriminatory. Long-term parking is provided in the city's Parking Garage Structure for a cost of $.35 per hour after the first two hours. Therefore, a person working an eight-hour day in the downtown area could park along the curb for two hours, then move to the Parking Garage Structure, stay for free for two hours, then pay $.35 for the remaining four hours. Therefore, a person could park in the downtown area for $1.40 per day or $28 per month (assuming a 20-day work month). Because the $25 per month curbside parking fee for persons with disabilities is less than the parking fee that a non-disabled person would ordinarily have to pay for monthly parking in the downtown area, the $25 fee does not appear to be a discriminatory surcharge.

Under certain circumstances, a city's parking policy might be discriminatory. For instance, if the monthly parking fee in the city's parking garages were higher for persons with disabilities than for persons without disabilities or if these garages did not provide adequate parking spaces for persons with disabilities, the city might be in violation of the ADA. These circumstances, however, are not indicated in your letter.

I have enclosed a copy of the Department's recently published Title II Technical Assistance Manual which may further assist you in understanding the obligations of public entities under the ADA. I hope this information is useful to you.

Sincerely,

John Wodatch
Director

June 23, 1992

Architectural and Transportation
Barriers Compliance Board
1111 18th Street NW
Suite 501
Washington DC 20036

Dear Sir/Madam:

I am an employer situated in down town Casper Wyoming. By city ordinance a handicapped individual may purchase, for a monthly fee of $25, the right to park for 8 hours curbside for 8 hours. Others who may purchase these same rights are disabled veterans, taxi companies and hospitals.

Until last month, I employed a disabled individual whose disability required her to park in front of the entrance to our place of work. For this reason, I paid the city a monthly fee of $25. Because I perceive a city imposed rental fee for curbside parking, exclusive to the disabled and taxi companies, to present a barrier to the employment of the disabled I also wrote two letters to the Mayor and city council requesting that the city's ordinance be modified and made non-discriminatory. As you can see from the enclosed brochure, the city is managing downtown parking to support downtown merchants.

It certainly appears to me that the City is in violation of ADA. My question is this: Since the city refuses to commit itself to the development of a nondiscriminatory ordinance, what is the next step available to me as an employer?

My work number is 307-265-6715 and I am available from 8 AM to 5 PM Mountain time.

Thank you for your time and consideration.

Sincerely,

Tom Gallagher
Manager, Research and Planning

PARKING ORDINANCE PUBLIC INFORMATION FLYER

HOW SERVICE IS PROVIDED:

Parking enforcement is provided by the City through the Casper Police Department's Traffic Division. The Parking Enforcement Personnel, and scooters are a familiar sight in the Downtown area.

The Division serves as a source of enforcement and information on parking in Downtown Casper. Parking Enforcement Personnel serve this dual role of insuring turnover of parking spaces for customers and visitors to the Downtown, and answering question about the community.

Remember, parking enforcement is a public service. The Traffic Division of the Casper Police Department welcomes your comments. Sgt. W. Sandfort at 235-8261.

FREQUENTLY ASKED QUESTION

Q: WHEN WILL THE PARKING METERS BE REMOVED?

A: All parking meters in Downtown area will be removed by June 1, 1992.

Q: WILL THERE STILL BE A 2-HOUR PARKING LIMIT?

A: Yes, parking spaces in the Downtown area are limited to two hours of free parking except in those areas which are specifically marked. The parking restriction will be Enforcement Clerks utilizing hand-held computerized ticket writers that will record the amount of time that a space is occupied by each vehicle.

Q: CAN I AVOID A CITATION BY MOVING MY VEHICLE TO AN ADJACENT SPACE EVERY TWO HOURS?

A: No. The parking ordinance has been amended to help maintain parking availability for customers and clients of Downtown businesses. The regulations make it a violation to park more that two hours in any block face in the Downtown. Long-term parking spaces are available in the Parking Garage Structure located at 230 South Wolcott for a cost of $.35 per hour after the first two hours for shoppers or clients. Employees are encouraged to lease spaces in the city-owned parking lot at 1st and Center or in the Parking Garage Structure.

Q: WHEN WILL THE NEW PARKING REGULATIONS GO INTO EFFECT?

A: The effective date of the Ordinance is May 1, 1992. The Parking Enforcement Personnel will be issuing courtesy tickets for a 30-day "grace period" between May 1 and May 31, 1992. Regular parking citations will be issued for violation for June 1, 1992.

Q: WILL THERE BE A CHANGE IN THE HOURS OF ENFORCEMENT?

A: Yes. The new ordinance provides that the two hour parking restrictions will be enforced daily from 8:00 a.m. to 5:00 p.m. on weekdays and from 8:00 a.m. to 2:00 p.m. on Saturdays. enforced on Sundays and Legal Holidays.

Q: WILL THERE BE AN INCREASE IN FINES FOR PARKING VIOLA TIONS?

A: Yes. The new Ordinance provides for a change in the line structure for parking violation. The fine for the first violation in a 24 hour period will increase from $2.00 to $5.00. The second violation will result in a $10.00 fine and the third violation in a 24 hour period will carry a $20.00 fine. All fines will double if not paid in 10 days.

Q: WILL THERE BE CHANGES IN THE COST OF PARKING IN THE CITY'S PARKING GARAGE?

A: The cost of parking in the Parking Garage will continue to be $.35 for every hour or portion of an hour after the first two hours. The parking Garage is located at 230 S. Wolcott with entrances on Wolcott and on Center. Spaces are also available for lease on a monthly basis. Contact the City of Casper Finance Office for more information on the cost for leasing spaces in the Parking Garage.

Q: WHAT WILL BE THE RESTRICTIONS ON PARKING IN THE CITY PARKING LOT AT 1ST AND CENTER?

A: The long-term parking spaces in the Parking Lot at 1st and Center will be converted to lease spaces only under the provisions of the new ordinance. For more information on the costs of leasing spaces in the Parking Lot contact the Finance

NOV 3 1992

Mr. Michael Milroy
Director of Operations
Deepwood Center
8121 Deepwood Boulevard
Mentor, Ohio 44060

Dear Mr. Milroy:

Thank you for your letter dated February 5, 1992, in which you requested guidance regarding the number of parking spaces required at certain facilities under your control.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that are subject to the Act. This letter provides informal guidance to assist you in understanding the ADA accessibility standards. However, this technical assistance does not constitute a legal interpretation of the application of the statute to parking and it is not binding on the Department.

Section 4.1.2(5) of the ADA Guidelines (ADAAG) lists the requirements for parking. Section 4.1.2(5)(d)(ii) of the ADAAG states that units and facilities that specialize in treatment or services for persons with mobility impairments must make 20 percent of the total number of parking spaces accessible. This provision applies to facilities and units that offer medical services if the facility is one where clients may stay for a period of time exceeding twenty-four hours, i.e., overnight.

Section 6.1 of the ADA Accessibility Guidelines. If the facility or unit is providing "other services" particularly for people with mobility impairments (including vocational rehabilitation services), the overnight requirement does not apply. Since your workshop offers occupational and physical therapy services to persons with mobility impairments, it would appear to be covered by the 20 percent requirement of section 4.1.2(5)(d)(ii).

However, since your entire facility is not used exclusively by people with mobility impairments, you should try to determine what proportion of people with mobility impairments use your facility for physical therapy and make 20 percent of that number of spaces accessible rather than 20 percent of the entire parking lot.

01-01692

We are enclosing a copy of the title III regulation and this Department's title III Technical Assistance Manual to assist you in complying with the ADA.

I hope this information is useful to you.

Sincerely,

John L. Wodatch
Director

NOV 4 1992

The Honorable Robert E. Andrews
Member, U. S. House of Representatives
63 N. Broad Street
Woodbury, New Jersey 08096-4602

Dear Congressman Andrews:

This letter is in response to your inquiry on behalf of (b)(6) XXX concerning inaccessibility of convenience stores.

The Americans with Disabilities Act (ADA) authorizes the Department of Justice to provide technical assistance to individuals with rights or responsibilities under the ADA. This letter provides informal guidance to assist (b)(6) in understanding the ADA requirements. However, this technical assistance does not constitute a legal interpretation, and it is not binding on the Department of Justice.

The ADA requires that physical barriers to entering and using existing places of public accommodation (which include convenience stores) be removed when removal is "readily achievable." This provision is applied on a case by case basis, and may or may not require that specific actions be taken in an individual case.

Enclosed are copies of the Department's Title III regulation, regulation highlights and technical assistance manual, which include detailed discussion about the requirements for accessibility under the ADA. If, after reviewing this information, (b)(6) believes there are facilities operating in violation of the ADA, he can proceed as explained in the section on enforcement in the manual, beginning on page 64.

Robert E. Andrews
63 North Broad Street
Woodbury, NJ 08096-4602

Dear Congressman Andrews,

I am writing you today for two very specific reasons. First, I am confined to a wheelchair; due to a Developmental Disability. I am very perplexed with a problem in my community and the surrounding area. No "Convenience Store"; such as, Wa Wa Food Market, Cumberland Farms, and 7-11 are accessible. When I speak of accessibility in this case, I do not mean as defined by the Americans with Disabilities Act (ADA), I cannot even enter the front door at most stores. This does not make them very "convenient" for me, just frustrating. I am mainly referring to the stores in my vicinity, but most of these stores (on a much larger scale) has many factors which make them inaccessible to someone confined to a wheelchair. Factors such as: (1) no "handicapped parking", (2) no "curb cuts", (3) doors are not wide enough, (3) and all of the counters are to high. The real joke about the whole situation is that some of these stores display a blue stickers with a stick figure of a person confined to a wheelchair, saying "Ask for assistance". I would, if I could get into the store. Usually when I have a problem of this nature, I attempt to find the name(s) and address(s) of the people responsible, but I do not know where to begin in this case. Would you help me - please?

Secondly, I collect Social Security Disability Insurance (S.S.D.I.) and S.S.I. which entitles me to Medicare Insurance Benefits through the S.S.D.I. and Medicaid Insurance Benefits through the S.S.I. My question is - Would I lose my Medicaid Insurance Benefits if I were to get a part-time job?

Finally, again I just want to thank you, your assistant, Ms. Kathy Hogan, and your entire staff for all of your/their help. You and they have been nothing but a pleasure to work with throughout the past few months. It seems everywhere I turn or any paper I read you are their (all good things!). When I saw you in the Courier-Post for spending a few days assisting in the clean-up of Hurricane Andrew I felt chills up my spine. I believe your biggest reason for being down there was just because you care. Being a twenty-two year old young adult, anti-government is a big sentiment with people my age, but I believe if

those young adults could meet and work with you, they would definitely change their mind.

NOV 4 1992

The Honorable Thomas J. Bliley, Jr.
U. S. House of Representatives
2241 Rayburn House Office Building
Washington, D.C. 20515

Dear Congressman Bliley:

This letter responds to your inquiry on behalf of Dr. John R. Partridge, regarding the regulatory requirements of the Americans with Disabilities Act (ADA) for accessible rest rooms in professional offices open to the public.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities with rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA accessibility standards. However, this technical assistance does not constitute a legal interpretation of the statute and it is not binding on the Department.

The ADA Accessibility Guidelines (which apply to new construction such as the facility planned by Dr. Partridge) do not specify the number of rest rooms required in any type of building or facility. Any number of rest rooms beyond what may be required by local building codes or plumbing codes is determined entirely at the discretion of the owner. Section 4.1.3 (11) of the Guidelines (page 35614 of the enclosed regulation) stipulates accessibility requirements for new construction of toilet rooms as follows:

> If toilet rooms are provided, then each public and common use toilet room shall comply with 4.22. Other toilet rooms provided for the use of occupants of specific spaces (i.e., a private toilet room for the occupant of a private office) shall be adaptable.

cc: Records; Chrono; Wodatch; Harland; McDowney; FOIA; MAF.

:udd:mercado:congresional.letters:harland.bliley.partridge

01-01698

Rest rooms associated with examination rooms, laboratory facilities, and staff support areas would be considered common use toilet rooms. All such rest rooms must be fully accessible. A doctor's private rest room, on the other hand, need only be adaptable. In other words, it must be designed to satisfy all space requirements but need not initially have grab bars or knee space below the lavatory, as long as such features can be added or modified without much difficulty when the need arises.

The technical provisions for accessibility of individual elements such as doors or turning spaces are referenced in S4.22. Accessibility requirements do require some increase in floor area within a single-user rest room but, through careful and knowledgeable planning of a new building, there is often no increase in the overall size, or cost, of the facility.

Please feel free to encourage your constituents to contact the Public Access Section any time they have questions or need information. The Department maintains a telephone information line to provide technical assistance regarding the rights and obligations of individuals, businesses, agencies, and others covered or protected by the ADA. This technical assistance is available by calling 202-514-0301 (voice) or 202-514-0383 (TDD) between 1:00 p.m. and 5:00 p.m., Monday through Friday.

I hope the information we have provided is helpful to you and your constituent.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

Enclosure
01-01699

Congress of the United States
House of Representatives
Washington, DC 20515-4603
September 10, 1992

Mr. John Wodatch
Director
Office of Americans With Disabilities Act
Department of Justice
P.O. Box 66738
Washington, D.C. 20036-9998

Dear Mr. Wodatch:

I am writing you on behalf of my constituent, Dr. John R. Partridge, in regards to the problems he has encountered in complying with the Americans With Disabilities Act (ADA). Dr. Partridge is in the midst of planning a new health care facility and has run into, what we both believe to be, overly extensive and very costly compliance requirements.

The health facility planned will house seventeen specialists, dividing them into several groups, each of which will occupy suite-like areas boasting seventeen or eighteen rest rooms. Such a set up would bring the total number of rest rooms to approximately sixty.

Yet, according to the ADA, each of these rest rooms, regardless of how close together they are located or how the facility is designed as to their accessibility to disabled people, is required to comply to ADA standards. As you know, these standards include a sixty inch wheelchair turning area or a t-shaped space, and an eighteen inch distance from the door to the corner. The loss of rent as well as the construction costs of such requirements will result in at least $500,000 in aggregate additional expense in the first decade of occupancy alone. These costs will be passed along to the consumer, and tacked onto the already high costs of medical care.

In my mind, there must be a more economical way in which to make sure that facilities are accessible to disabled individuals, while keeping in mind the resources of small businesses. Perhaps by concentrating on the location and the arrangement of the

01-01700

bathrooms, as opposed to merely mandating that all bathrooms comply, a compromise can be reached.

Enclosed is a copy of Dr. Partridge's letter for your comments. As building will begin shortly, time is an important factor in this situation.

I thank you in advance for your time, and look forward to the benefit of your views.

With kindest regards, I am

Sincerely,

Thomas J. Bliley, Jr.
Member of Congress

Re: Americans With Disability Act
Dear Congressman Bliley:

I am writing to you to seek urgent assistance from your staff in obtaining from the appropriate administrative agencies relief from certain provisions of the Americans With Disability Act, Title III from the Federal Register dated July 26, 1991, volume 56, number 144, section 4.22 regarding restrooms in facilities open to the public including professional offices.

I am the senior partner of a six physician obstetrical practice that is seeking to build a new office at the new hospital facilities being constructed at Johnston-Willis Hospital in Bon Air, VA. The physicians listed below are likewise heads of their respective practices and together we comprise a group of seventeen specialists in our field, all of whom are anticipating occupying new offices in the Atrium Building. Altogether, we render medical care for thousands of your constituents yearly; and the decisions we make affect numerous procedures, tests, and hospitalizations totalling many millions of dollars a year in medical care within your district.

In designing our new offices, we have run up against what we feel to be totally unreasonable and unrealistic bureaucratic requirements for compliance under the above act. Specifically, in the design of restrooms for our office, we are being told that each restroom in the facility must have a five foot turning radius inside and the door must be eighteen inches from the corner of the room. In the case of each bathroom so affected, the requirement for additional square footage is considerable and, indeed, almost doubles the size of the restroom. This may

be of relatively minor consequence in a fast food restaurant with one or two restrooms, but is of major consequence in a medical office in which there are 17 or 18 restrooms per group of
01-01702

doctors. The total number of restrooms that will be constructed for the groups to whom I have referred will be in the range of 60. When one considers the additional construction costs of this extra square footage and the additional yearly rent that each of the groups will pay for extraneous bathroom space, the total tab faced at this one facility just for obstetrics becomes rather staggering. We will face at least $500,000 in aggregate additional expense that we would not have faced under former design requirements, just in the first decade of occupancy. It is illogical to suppose that we will not have to pass these costs on to our patients, who are your constituents. At a time when health costs are a concern to all Americans, including their congressmen, such a waste of expense seems unconscionable.

What we would propose as a remedy under this act would be to give an exemption to bathrooms totally over a certain number per square foot of office space. For example, in a one practice office of 6,000 square feet, one might reasonably argue that one bathroom equipped and suitably scaled for handicapped for each physician that would be actively seeing patients in the office at any one time would suffice. In our case for my practice, that would mean three or perhaps four such bathrooms for the total office. We would thus save on the expense of the other 14 bathrooms without impairing access of disabled individuals to medical care at all. The cost savings would obviously be passed on to the consumer.

Time is of the essence if any relief is to be obtained for our facility since construction is under rapid progress and plans are being finalized. If we do not have relief within the next 60 days, we will be forced to go ahead with the more stringent provisions, but, again, this will significantly impact on health care costs in your district.

Please take action to help us in our plight.

Sincerely,

John R. Partridge, M.D.

NOV 4 1992

The Honorable Jim Sasser
United States Senate
363 Russell Senate Office Building
Washington, D.C. 20510-4201

Attn: Kim Bengston

Dear Senator Sasser:

This letter is in response to your inquiry on behalf of Paul Voiles, regarding the accessibility of restrooms to visually impaired individuals.

The Americans with Disabilities Act (ADA) authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist Mr. Voiles in understanding the ADA's requirements. However, it does not constitute a legal interpretation, and it is not binding on the Department.

Title II of the ADA applies generally to public entities such as State and local governments, and requires that new construction meet certain accessibility requirements. For existing facilities, Title II requires that covered state and local governments make "reasonable modifications" of programs and services to make them accessible to persons with disabilities, which may include modifications to make restrooms accessible to visually impaired persons. Discussion of the title II requirements appears in the enclosed title II regulation at section 35.151 on pages 35710-11 and 35720 (new construction), and section 35.103(b)(7) on pages 35718-19 (reasonable modifications). These issues are also addressed in the enclosed Title II Technical Assistance Manual at pages 11, 20, and 23.

cc: Records; Chrono; Wodatch; Mobley; McDowney; FOIA; MAF.
:udd:jonessandra:ada.sasserl
01-01704

Title III of the ADA applies generally to places of public accommodation, as defined in the ADA. For existing facilities, it requires removal of barriers in existing facilities, if removal is "readily achievable." Such required barrier removal may include modifications to make restrooms accessible to visually impaired persons. For new construction and alterations, places of public accommodation must comply with the Accessibility Guidelines (Guidelines) promulgated by the Department of Justice, which include specific requirements relating to restroom accessibility. Discussion of the title III requirements appears in the enclosed regulation at sections 36.401-402 on pages 35599-600 and 35574-75 (new construction and alterations), section 36.104 on page 35594 and pages 35553-54 (definition of "readily achievable"), and sections 4.30.4, 4.30.5, and 4.30.6 of the Guidelines at page 35659 (specific signage requirements). There is further discussion of these issues in the enclosed Title III Technical Assistance Manual at pages 29, 43, 48, and 57.

All Department of Justice publications are available in large print, braille, audiocassette, and computer disk. They may be obtained by calling this office, (202) 514-0301, Monday through Friday, 1:00 p.m. through 5:00 p.m., E.S.T., or by requesting those documents in writing at the address listed above.

I hope this information is helpful in responding to your constituent.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

The Blind & Visually Impaired
Support Group
Greeneville and Greene County
Route 1, Box 357
Mosheim, TN 37818

June 9, 1992

Representative Tommy Haun
202 War Memorial Building
Nashville, TN 37243-0108

Dear Representative Haun:

We, as a concerned group, wish to commend the State of Tennessee for the fine job they have done in their campaign to help the handicapped. However, we believe that a group of handicapped, the blind and visually impaired, have been left out.

We especially feel that this is true as far as restroom facilities are concerned. A visually impaired person has no way in which to distinguish the men's restroom from the ladies restroom. We think that the words for the respective restrooms could be printed in Braille. A hand rail could be installed on the wall just inside the door as a guide to a stall.

Also at public rest stops and facilities on the interstates, we feel that the same idea could be implemented or even a family restroom facility could be built for the visually impaired and their families.

We would appreciate whatever help and support you can give us in helping us obtain our goal.

Thanks,

Paul Voiles, President

NOV 4 1992

The Honorable Harold L. Volkmer
U.S. House of Representatives
2411 Rayburn House Office Building
Washington, D.C. 20515-2509

Dear Congressman Volkmer:

This letter responds to your inquiry on behalf of (b)(6) requesting information about the Americans with Disabilities Act (ADA).

(b)(6) is interested in obtaining information to help make her work place more available to the public. If her work place is privately owned or operated, the ADA provisions that govern are those in title III, which applies to public accommodations and commercial facilities. If her work place is owned or operated by a state or local government, title II would be applicable. Enclosed are copies of the Department regulations and technical assistance manuals for both titles II and III of the ADA.

We regret that (b)(6) experienced difficulty in obtaining this information through our ADA telephone line. Unfortunately, due to the volume of calls handled through this line, there are occasions when calls cannot be promptly answered. We are continually revising our procedures to provide the best service possible given the high volume of requests, and we appreciate (b)(6) bringing to our attention the problems she experienced.

I hope this information assists you in responding to your constituent.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

September 22, 1992

Mr. John R. Dunne
Assistant Attorney General
Civil Rights Division
US Department of Justice
10th Street and Constitution Avenue, NW
Washington, D.C. 20530

Dear Mr. Dunne:

Will you please send me information about the Americans with Disabilities Act. I am particularly interested in current information about accessibility and other applications which will help make the facility at my workplace more available to the public.

In searching for information about the new ADA, the ACCESS office at the University of Missouri-Columbia gave me a telephone number to call: (202) 514-0301. I called the number at 8:00 a.m. CDT, assuming the office would open at 9:00 EDT. I was greeted with a message which began: the office is open from 11:00-5:00. After this initial greeting, I hung up, thinking I was being told to call again later. I called again at 11:30 CDT, and thought office personnel were probably at lunch. I called again at 2:30 CDT and listened through much of the recording--until I was finally given an "800" number. Before reaching the 800 number, however, I was informed that the information--which I never got to--was not legal advice, and that if I was on hold for more than five minutes I should hang up and try again. What arrogance! I was calling for information. A long distance call during your open hours is not inexpensive. If I had been calling about a problem with the ADA, I would have been furious. I strongly recommend that you either create a more explicit answer for your machine or provide an "800" number-- especially if limited office staff makes a wait of five minutes routine.

I include this information in the hope that my experience will help someone else. I trust something will be done to improve this situation.

Sincerely,

(b)(6)

Senator Christopher S. Bond
Senator John C. Danforth
Representative Harold L. Volkmer

DJ 202-PL-325

NOV 5 1992

(b)(6)
Plantation, Florida 33317

Dear (b)(6)

This letter is in response to your inquiries of September 3, 1992, and October 2, 1992, requesting information about the effect of title III of the Americans with Disabilities Act ("ADA") on your plans to purchase an antebellum house and operate it as a bed and breakfast inn.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation or legal advice and it is not binding on the Department of Justice.

As discussed in your recent telephone conversation with Thomas Contois of this office, there are four general requirements that appear to apply to your plans for the bed and breakfast. First, the ADA requires existing facilities to take certain steps to make their services accessible to persons with disabilities. In particular, title III and the Department of Justice's implementing regulation require existing facilities to provide auxiliary aids and services to ensure effective communication -- for example, telecommunications devices for deaf persons and closed caption decoders -- and to remove barriers to access where it is readily achievable to do so. These requirements for existing facilities are spelled out in sections 36.303 and 36.304 of the title III regulation (which is included as Part III of the ADA Handbook).

Second, you indicated that you intend to make certain changes to the rooms on the second floor of the inn. The ADA requires that any alterations to existing facilities that take place after January 26, 1992, must comply with the ADA Accessibility Guidelines. These guidelines are also included in the ADA Handbook, as Appendix B. You will want to look particularly at part 4, which sets out requirements for several types of building features and facilities, and part 9, which sets

out additional requirements for places of transient lodging.

cc: Records, Chrono, Wodatch, Breen, Contois, Friedlander, FOIA
Udd:Contois:PL.bednbreakfast

01-01709

Third, you should be aware of the path of travel requirements that are triggered by alterations to primary function areas. As section 36.403 of the title III regulation spells out, whenever a place of public accommodation alters a part of its facility that contains a primary function -- as, for instance, guest rooms or bathrooms at a bed and breakfast inn -- the place of public accommodation must also provide an accessible path of travel to the altered area. You are not required to spend more than 20% of the total cost of the alterations on the path of travel, but you are obligated to make necessary expenditures up to that 20%. This requirement is further explained in the enclosed Title III Technical Assistance Manual, at pages 49-51.

Finally, because the house you are considering buying is an historic building, some of the ADA requirements that would ordinarily apply may be relaxed. The special provisions that apply to historic buildings are set out in part 4.1.7 of the ADA Accessibility Guidelines, and are explained at pages 52-53 of the Technical Assistance Manual.

Thank you for your inquiry. I hope this information is useful to you in understanding the requirements of the ADA.

Sincerely,

Philip L. Breen
Special Legal Counsel
Public Access Section

01-01711

(b)(6)
OF FORT LAUDERDALE

September 3, 1992

TO: Office on the Americans with Disabilities Act.

From: (b)(6)

Subject: Interpretation of Handbook

I have received the subject handbook and have spent many hours trying to find the answer/s to my application of the Disabilities Act to a business my wife and I are pursuing. We will purchase a antebellum house in West Georgia that is on the Historical Register due to it's age, former use and classic neo-Greek design which is one of the few in the United States. We desire to establish this facility as a Bed and Breakfast Inn. The proposed conditions are the following.

1. The inn will have six (6) bedrooms, and in the future possibility 10, all on the second floor.

2. We will also live in the facility as our permanent and only residence.

3. We are greatly restricted by the historical society as to the changes and modifications we can make to the facility.

4. What faction, Act or Society, has jurisdiction in this situation?

I thank you for your cooperation in answering these questions and interpretation of the Disabilities Act as it applies to my situation.

Sincerely,

(b)(6)
Plantation, FL.

T. 9/30/92
SK:SBO:kgf
DJ# 192-06-00009

NOV 5 1992

Mr. Evan Gifford Smith
Illinois Department of Mental Health
and Developmental Disabilities
State of Illinois Center
100 West Randolph Street, Suite 6-400
Chicago, Illinois 60601

Dear Mr. Smith:

This responds to your request for an interpretation of the Americans with Disabilities Act (ADA).

The ADA authorizes the Department to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you in understanding how the ADA may apply to the situation you describe. However, this technical assistance does not constitute a determination by the Department of Justice of your rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

As discussed in S II-1.1000 of the enclosed Title II Technical Assistance Manual, title II of the ADA prohibits discrimination on the basis of disability in all services, programs, and activities provided or made available by "public entities," i.e., State and local governments or any of their instrumentalities or agencies, whether or not they receive Federal financial assistance. Title II does not apply to private entities and does not authorize or require State or local governments to enforce its requirements for private businesses. (The obligations of private entities that operate places of public accommodation, including health care providers, are discussed in the enclosed Title III Technical Assistance Manual.)

Section 35.130(b)(6) of the title II regulation prohibits discrimination by public entities in administering certification and licensing programs. However, the programs or activities of private entities licensed or certified by a public entity are not

:udd:kaltenborn:smith.ill
cc: Records, CRS, FOIA, Friedlander(2), Kaltenborn, Breen

01-01713

themselves programs or activities of the public entity merely because they are licensed by the public entity. Section II-3.7000 of the Manual for title II discusses licensing.

On the other hand, section 35.130(b) of the title II regulation prohibits discrimination in all governmental activities of public entities, even if they are carried out indirectly through other entities. Section 35.130(b)(3) states that public entities may not, directly or through contractual, licensing, or other arrangements, utilize criteria or methods of administration that have the effect of discriminating. Thus, as a public entity, the Illinois Department of Mental Health and Developmental Disabilities must ensure nondiscrimination by entities, such as community agencies, with whom it enters into contractual or other arrangements to carry out its programs.

I hope this information is helpful to you.

Sincerely,

Stewart B. Oneglia
Chief
Coordination and Review Section
Civil Rights Division

Civil Rights Division
P.O. Box 66118
Washington, D.C. 20035-6118
Re: Request for Assistance in Resolving Issues under
Title II of the American with Disabilities Act
Dear Ms. Oneglia:

I am a staff attorney with the Illinois Department of Mental Health and Developmental Disabilities (DMHDD). On February 24, 1992, I called the Americans with Disabilities Act Help Line and had the pleasure of discussing some issues regarding the ADA at some length with a Department of Justice attorney, Bill Worthen. I later spoke again with Wonder Moore, a DOJ investigator, who suggested that I write or FAX you to possibly obtain some written clarification of issues under the ADA.

The main issue that Mr. Worthen and I discussed concerned S 35.130(b)(6) of the Regulations pertaining to Title II of the ADA. Mr. Worthen was very helpful in clarifying a misunderstanding that we at DMHDD had concerning that section. The Department takes a very active role in the monitoring of community agencies that it funds, certifies and licenses. As such, we were under the impression that DMHDD would be responsible in large part for the compliance of community agencies with the ADA. As Mr. Worthen explained, this issue was considered in depth when the ADA was being drafted, and the clear intent of section 35.130(b)(6) is not to extend such a responsibility to government agencies. As stated in the preamble to the Regulations at page 35704, "Paragraph (b)(6) does not extend the requirements of the Act or this part directly to the programs or activities of licensees or certified entities themselves. The programs or activities of licensees or certified entities are not themselves programs or activities of the public entity merely by virtue of the license or certificate." Based on that section of the preamble, as well as Mr. Worthen's discussion of the history and intent of section 35.130(b)(6), it does not appear that DMHDD should integrate ADA compliance into its requirements for certification or licensure or make certification or licensure dependent upon ADA compliance (at least, not beyond ensuring that DMHDD certification and licensure standards do not subject qualified individuals with disabilities to discrimination on the basis of disability).

State of Illinois Center

100 West Randolph Street Suite 6-400
Chicago, Illinois 60601
312-814-2735
01-01715

This is clearly a significant departure from our original approach to S 35.130(b)(6), which would have assumed DMHDD responsibility for ADA compliance for all the agencies it licenses or certifies. Given the significant impact this recent information has on DMHDD policies regarding the ADA, I hope you understand our request for written confirmation concerning the interpretation of S 35.130(b)(6) of the Regulations. I would greatly appreciate it if you could send to me anything in writing concerning the interpretation and intent of this section that was explained to me by Mr. Worthen. Legislative history and comments that were submitted would be very helpful.

There is another related issue which you may be able to help us resolve. As discussed in the preamble to the Regulations at page 35704, S 35.130(b)(1)(v) of the Regulations "provides that a public entity may not aid or perpetuate discrimination against a qualified individual by providing significant assistance to an agency, organization, or person that discriminates on the basis of a disability in providing any aid, benefit, or service to beneficiaries of the public entity's program." This may be significant for DMHDD, as the Department funds a vast number of community agencies and programs. DMHDD involvement with these agencies ranges from merely funding through contracts or agreements to funding as well as certifying and licensing. DMHDD merely audits or provides technical assistance with specific problems at those agencies that only receive DMHDD funding, while agencies that are certified or licensed are thoroughly surveyed annually by the Department. It may be significant for purposes of this subsection that these agencies do not provide services to direct beneficiaries of DMHDD's services. When a recipient is discharged from a state operated facility, he or she may choose to go to one of these agencies. The facility will help facilitate that process, but the individual is no longer receiving services directly from the state.

To what extent is DMHDD required to ensure that it is not funding agencies that do not comply with the ADA? Is a clause in the funding contract or agreement in which the agency certifies that it is in compliance with the ADA sufficient for purposes of S 35.130(b)(v)? We are planning to train DMHDD auditors, surveyors, and technical assistance staff as to the general requirements of the ADA for the purpose of observing clear ADA violations on site visits, but again, we are unclear as to the sufficiency of this course of action.

The last area with which we have concern also relates to community agencies. Section 35.130(b)(1) provides, generally, that a public entity may not, directly or through contractual means, provide its

services to beneficiaries in a way that would discriminate against a qualified individual on the basis of disability. DMHDD operates 21

01-01716

mental health and developmental disability facilities in Illinois. As discussed above, many of our recipients are discharged and placed in community agencies. While the services received by these individuals are not provided directly by DMHDD in state operated facilities, it could be argued that DMHDD is "providing" those services indirectly by placing individuals in community agencies that are licensed, certified, or funded by DMHDD. Our concern is whether the Department may be liable under S 35.130(b)(1) for placing individuals upon discharge into agencies where, without DMHDD knowledge, ADA violations may occur. If this is the case, is DMHDD then, in a sense, responsible for ADA compliance by these agencies, as we originally thought we were under S 35.130(b)(6)?

As you can see, making our way through the ADA is a complicated and, at times, circular task. On behalf of the Illinois Department of Mental Health and Developmental Disabilities, I greatly appreciate any assistance you can give us in resolving these issues as we develop policies to comply with the ADA. If you have any questions, please feel free to contact me directly at 312/814-2752 (FAX: 312-814-3793). If I am not available, you may contact our ADA Coordinator, David Neff, at 217/782-5018. As I will be out of town for most of March, would it be possible to also send Mr. Neff a copy of your response? His address is 100 N. Ninth Street, 1st Floor, Springfield, IL, 62765. Thank you again for your time and assistance in this matter.

Sincerely,

Evan Gifford Smith

NOV 12 1992

The Honorable Gus Yatron
U. S. House of Representatives
2205 Rayburn House Office Building
Washington, DC 20515

Dear Congressman Yatron:

This letter responds to your inquiry on behalf of Opal I. Lebo of Reading Rehabilitation Hospital, concerning the requirements of the Americans with Disabilities Act (ADA) for accessible parking spaces.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities with rights or obligations under the Act. This letter provides informal guidance to assist Ms. Lebo in understanding the ADA accessibility standards. However, this technical assistance does not constitute a legal interpretation of the statute, and it is not binding on the Department.

Existing private medical care facilities are subject to the readily achievable barrier removal requirements of the title III ADA regulations (section 36.304 on page 35597 of the enclosed document). Readily achievable is defined as being easily accomplishable and able to be carried out without much difficulty or expense. Modifications to existing facilities undertaken to remove barriers should be done in conformance with the applicable standards for alterations if it is readily achievable to do so (section 36.304(d)).

When new construction or alterations are undertaken, full compliance with the accessibility standards is required. The standards for parking are found in sections 4.1.2 (5) and 4.6 of the Accessibility Guidelines (pages 35612 and 35631 of the enclosed document). Section 4.1.2(5)(d)(ii) states that units and facilities that specialize in treatment or services for persons with mobility impairments must make 20 percent of the total number of parking spaces accessible.

cc: Records; Chrono; Wodatch; Harland; McDowney; FOIA; MAF.

:net:ss63:udd:harland:yatron.lebo.cong
01-01718

Barrier removal requirements apply to the public portions of places of public accommodation. The 20 percent standard would not apply to parking areas reserved only for employees. Provision of parking spaces to employees is a matter of reasonable accommodation, required under titles I and III of the ADA for an employee with a disability. Reasonable accommodation is determined according to the needs of the individual and the hospital on a case-by-case basis.

I hope the information we have provided is helpful to you and your constituent.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

READING
REHABILITATION
HOSPITAL

October 2, 1992

The Honorable Gus Yatron
1940 North 13th Street
Reading, PA 19604

Dear Congressman Yatron:

This is to request your assistance in relating the new "Americans with Disabilities Act Accessibility Guidelines for Facilities and Buildings" to our hospital. As you already know, this 92 bed hospital is dedicated to serving the physically disabled. We are committed to doing whatever is necessary and appropriate to meet the needs of our patients in service to this community.

In addition to the In-patients, we serve approximately 1200 outpatients annually. Eighty (80%) to ninety (90%) percent of our outpatients are driven to the hospital by family or Barta bus, dropped off and picked up under the canopy at the front entrance. Wheelchairs are located nearby for those who need them to get to the therapy areas.

Being built on a hillside poses its special parking challenges. We have four (4) parking lots, A, B, C and D. The A-level parking lot has 118 spaces, 65 of which are dedicated to outpatients and visitors. Nine (9) of these spaces on A-level are reserved for handicapped parking. Except for four spaces in B-level parking lot, lots B, C, and D are dedicated to staff parking. Lots B and C are carved out of the hillside and accessible only by a steep, narrow road. Lot D is fairly level, but accessibility is also limited to the steep, narrow road. Handicapped staff are provided parking privileges in Lot A.

Questions:
1. Does the "20% rule" mentioned in the attached article, apply to all our parking spaces, including staff parking, or may we apply the rule to the spaces reserved for patients/visitors? This would mean adding four (4) spaces to give a total of thirteen (13) handicapped spaces (.20 X 65 = 13).

R.D. 1 Box 250, Morgantown Road * Reading, PA 19607-9727 * (215) 777-7615

01-01720

2. Since the front entrance has designated, protected spaces for vehichles to load and unload passengers, this decreases the need for handicapped parking spaces. Might this be taken into consideration in assessing how well we are meeting our handicapped parking space needs?

Thank you for your consideration and assistance.

Sincerely,

Opal I. Lebo, V.P., Patient Support Services

01-01721

T. 11-12-92

DJ 202-PL-00092

NOV 16 1992

Mr. Richard J. Furman
Furman and Furman Architects, P.C.
60 Cutter Mill Road
Great Neck, New York 11021-3131

Dear Mr. Furman:

CHIEF
WODATCH I am writing in response to your letter requesting information on the application of the requirements of the
DATE Americans with Disabilities Act (ADA) to mezzanines in food stores.

SP COUNSEL The ADA authorizes the Department of Justice to provide
PLB technical assistance to individuals and entities that are subject to the Act. This letter provides informal guidance to assist you
DATE in understanding the ADA Accessibility Guidelines. However, this technical assistance does not constitute a legal interpretation and it is not binding on the Department.

ORIGINATOR
LUSHER In new construction and alterations, the Guidelines
11/12/92 generally require that at least one accessible passenger elevator
DATE serve each level of a multistory building, including mezzanines (S 4.1.3(5)). However, there is an exception to this general rule. Elevators are not required in facilities that are less than three stories or have fewer than 3000 square feet per story, unless the building is a shopping center or mall, the professional office of a health care provider, a public transit station, or an airport passenger terminal. Similarly, elevators are not required in a one-story building.

As defined in S 3.5 of the Guidelines, a story is "occupiable" space, which means space designed for human occupancy, contained between the upper surface of a floor and the upper surface of the floor or roof above. Basements designed or intended for occupancy are considered "stories." Mezzanines are not counted as stories, but are levels within stories.

If the food store is in a multistory building that is part of a shopping center or a shopping mall, then the mezzanine level must be served by an elevator. This is required unless (1) the

cc: Records, Chrono, Wodatch, Breen, Lusher, FOIA, Library
udd:mercado:policy.letters.certif:lusher.wodatch.furman
01-01722

mezzanine is an "observation gallery used primarily for security purposes" (S 4.1.1(5) (b)(i)), or (2) the mezzanine is both located within an area used solely by employees as a "work area" and also contains only space used solely by employees as a "work area" (S 4.1.1(3)).

In the latter case the mezzanine need not be accessible because the larger area in which it is located must only comply with the requirements for work areas contained in S4.1.1(3). That section provides that:

> Areas that are used only as employee work areas shall be designed and constructed so that individuals with disabilities can approach, enter, and exit the areas. These guidelines do not require that any areas used only as work areas be constructed to permit maneuvering within the work area or be constructed or equipped (i.e., with racks or shelves) to be accessible.

For example, if the mezzanine is located completely within a work area, such as the warehouse portion of a food store, and the mezzanine itself contains only work areas (meaning it does not contain public use or common use areas such as toilets or an employee lounge), the mezzanine area would not be required to be accessible. The work area accessibility requirement would be satisfied as long as the larger warehouse area could be approached, entered, and exited.

I hope this information is helpful. I am enclosing for your use a copy of the Department's ADA Title III Technical Assistance Manual. Further discussion of this issue may be found on page 56 of the Manual. Please feel free to contact our ADA Information Line for further assistance on (202) 514-0301.

Sincerely,

John L. Wodatch

Re: Shoprite Food Store
Montgomery, NY

Dear Mr. Wodatch:

I am writing this letter to you for a formal interpretation of the requirement of the ADA with regard to the necessity for passenger elevators in a food store. The food store in question is part of a strip center and has a small mezzanine at the front for administrative personnel. This mezzanine also includes a "break room" and toilet facilities. There are toilet facilities for the physically handicapped provided on the first floor.

My understanding of requirements of the ADA with regard to elevators are as follows:

1. Section 4.1.3. of the ADA indicates that a facility less than three stories in height is exempt from the requirement of an elevator, unless it is a shopping center.

2. Appendix III of the ADA defines the term "shopping center" as only including floor levels containing at least one sales or rental establishment or any floor level designed or intended for use by at least one sales or rental establishment. This section also states that grocery stores incorporating mezzanines, housing administrative offices were sought for exemption by the commentors on this code.

3. Appendix III further states in section 36.401 that the facility housing a shopping center or shopping mall only includes floor levels housing at least one sales or rental establishment or any floor level designed or intended for use by at least one sales or rental establishment.

The code is somewhat confusing with regard to these requirements. Does the term "used by at least one sales or

rental establishment" mean mercantile use for the public? The
above stated information appears to point in that direction? Rec'd 12/20/91

NOV 17 1992

Mr. Carl Keeling
Deaf Services Coordinator
Johnson County Deaf Services
301 A S. Clairborne
Olathe, Kansas 66062

Dear Mr. Keeling:

This is in response to your inquiry regarding the Americans with Disabilities Act (ADA) as it applies to probation meetings involving a hearing adolescent whose parent is deaf.

The ADA authorizes the Department to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you in understanding how the ADA may apply to your case. This technical assistance, however, does not constitute a determination by the Department of Justice of your rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

Title II of the ADA prohibits discrimination on the basis of disability by public entities. It applies to all programs, activities, and services provided or operated by State and local governments, including probation meetings.

Section 35.160 of the enclosed title II regulation requires that public entities provide auxiliary aids and services where necessary to afford an individual with disabilities an equal opportunity to participate in, and enjoy the benefits of, the public entity's program or activity, or otherwise to ensure effective communication with members of the public. This requirement is further explained in section II-7.0000 of the enclosed title II Technical Assistance Manual. Where parental participation, either voluntary or mandatory, is part of the probation program, parents who are deaf must be provided with

auxiliary aids so that they can receive the benefits of the program, unless to do so would result in an undue burden or a fundamental alteration in the nature of the program. These concepts are explained in section II-7.1000 of the Manual.

Washington, D.C. 20035-6118

Dear Mr. Oneglia:

I wrote you last year concerning an issue about whether doctor's offices had to provide interpreting services for deaf people under the ADA. I am happy to say that more and more doctor's are providing this service in our area.

I have another issue I would like clarification about. As coordinator of deaf services for Johnson County government, I interpret probation meetings for court services in our area. I interpret both adult and youth probation meetings. We have a little different situation that involves a hearing adolescent whose mother is deaf. Court services likes to keep contact with the parents, but do not require the parent to be present at every probation meeting. I have been interpreting every meeting as a courtesy to the mother. A meeting was set up unexpectedly without contacting our services. When I asked about the meeting I was told by the probation officer that they did not have to provide an interpreter for the mother, they only had to provide an interpreter to the youth, if the youth is deaf. I disagreed.

My question is, if a deaf parent wants to be present at a probation meeting, and their child is hearing, should the court services be responsible for providing an interpreter? I would appreciate your response. Thank you.

Sincerely,

Carla Keeling

Boston, Massachusetts 02114

ATTN: Bonnie Cronin

Dear Senator Kerry:

This is in response to your request for assistance on behalf of XX concerning the Americans with Disabilities Act (ADA). In XX letter to you, XX indicated that (b)(6) uses a wheelchair and has experienced difficulty finding accessible facilities during recent travels in New York and (b)(6) Pennsylvania.

Title III of the ADA prohibits discrimination against persons with disabilities by places of public accommodation, including restaurants, hotels, theaters, and retail stores. The Department of Justice investigates alleged violations of title III. An investigation may be requested by any individual who believes that he or she has been discriminated against or that a specific class of persons has been discriminated against in violation of title III.

We have enclosed copies of the title III regulation and technical assistance manual to provide more information to (b)(6) If XX wishes to file a complaint alleging specific violations of the ADA, XX may submit the complaint to the address below. The complaint should include the name and address of the place of public accommodation, the date, and a detailed account of the alleged incident or pattern of discrimination and should be mailed to: Public Access Section, Civil Rights Division, U.S. Department of Justice, P.O. Box 66738, Washington, D.C. 20035-9998.

PRESCOTT
HOUSE
Nursing Home

August 24, 1992

Dear (Handwritten) Senator John Kerry

Again a disappointing experience as I, with some assistance recently traveled in Massachusetts and New York. At all public places the International Symbol of Access-ability was a parking space - curb ramp and wide door. I am a double, (above the knee) amputee. Nowhere did the toilet facilities comply with the Title III Provisions of the American with Disabilities Act*.

I have the arm strength to lift down but no way (just impossible) for me to raise my body the inches needed to return to the wheelchair. In a private home, I accept the need of assistance but it should not be necessary in a public facility, that has a handicap sign.

This is not a new situation. The International Symbol at a public place, a public restaurant has no meaning re-garding toilet rooms **toilet***. To become accessible for me - the new - the unknown- needs to be investigated. This is one of the many barriers for me and is also one of the many violations of the rules and regulations of the ADA.

Ms. Sheri L. Mabey
Office Manager
2059 E. Sahara, Suite C
Las Vegas, Nevada 89104

Dear Ms. Mabey:

This letter responds to your inquiry regarding the provision of an interpreter for a hearing-impaired patient.

The Americans with Disabilities Act (ADA) authorizes the Department of Justice to provide technical assistance to individuals having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. It does not, however, constitute a legal interpretation, and it is not binding on the Department.

The ADA requires a physician to furnish auxiliary aids and services when necessary to ensure effective communication, unless an undue burden or fundamental alteration of the physician's services would result. What constitutes effective communication depends upon the facts of each situation, including the length and complexity of the communication involved. For instance, a discussion of whether to undergo major surgery may require the provision of a qualified sign language interpreter, while a routine office visit may not. While the physician is encouraged to consult with the patient in determining what is needed to ensure effective communication, the ultimate decision as to what measures to take to ensure effective communication rests with the physician. Thus, a hearing-impaired patient cannot insist or require that an interpreter be provided at the physician's expense in every situation.

Relevant ADA provisions appear in section 36.303 of the enclosed ADA title III regulation at page 35597, and related discussion is found in the preamble to the regulation at page 35553. In response to your particular inquiry, please note that use of family members as interpreters should be approached with

01-01732

caution, as discussed on page 35597 of the preamble. Also enclosed is the Department's Title III Technical Assistance Manual. Pertinent discussion appears at pages 25-28.

I hope this information is helpful to you.

Sincerely,

John L. Wodatch
Chief

Donnie Loux
Nevada Developmental Disabilities Council

Dorothy Porther, Director
Equal Employment Opportunity Commission

RE: Hearing Disabled Patients

Dear Mr. Loux:

Last Friday Sami from your council contacted me to discuss my payment arrangements for an interpreter for one of our hearing impaired patients. He informed me at that time that it was Federally mandated that I pay for this interpreter.

After reviewing the file with the office staff and Dr. Mabey, it was apparent that the patient did not need an interpreter present, but because in the past it was something she did not have to pay for, she would continue to request that service. The patient has been coming to our office for over two years; this is the second pregnancy Dr. Mabey has taken care of her for; she has a mother-in-law, husband and brother who can all communicate to her if there is a problem, and at least one or more is present at each visit, and on prior visits, the interpreter was there as well.

Dr. Mabey can communicate with her without any interpreter--family member, etc., present. Her visits at our office are for routine pregnancy care--they are straightforward and direct. Dr. Mabey's questions to her can be easily answered by pen and paper if needed.

After reviewing some of the guidelines from the Washington office and Senator Reid's office locally, we have complied with all needed requirements with respect to this patient.

As I explained to Sami, the cost for us to provide this service to a patient would exceed the amount we would be reimbursed for Dr. Mabey's time and expertise. This would place an undue hardship on our office in that we would not only be providing an interpreter free of charge, but her care as well. This is against the ADA

guidelines.

01-01734

A standard office visit for a new patient, after being reimbursed by the carriers, would mean approximately $10-15 of income for that patient if we were required to pay for an interpreter. On a pregnant patient, for the 10-12 visits prior to their delivery, the delivery time and postpartum care, it is possible that the interpreter's fee alone could be over two-thirds of the amount reimbursed for the total nine-months of care provided by Dr. Mabey. This seems to be an extreme hardship--especially in light of the fact that there are family members, in this particular case, that are able and willing to provide that service at no charge.

You should also note that patients frequently are late, and forget to call to cancel their appointments. This patient was over 30 minutes late for the appointment Sami wanted me to pay for an interpreter.

We believe we have made every effort to reasonably accommodate all patients.

Sincerely,

Sheri L. Mabey
Office Manager

NOV 20 1992

The Honorable Marge Roukema
Member, U.S. House of Representatives
61 Spring Street
Newton, New Jersey 07860

Attention: Carol Ann Dougherty

Dear Congresswoman Roukema:

This letter responds to your inquiry on behalf of (b)(6), regarding the accessibility of performance areas to individuals with visual impairments.

The Americans with Disabilities Act (ADA) authorizes the Department of Justice to provide technical assistance to individuals and entities that are subject to the Act. This letter provides informal guidance to assist your constituent in understanding the requirements of the ADA. However, this technical assistance does not constitute a determination by the Department of rights or responsibilities under the ADA, and it is not binding on the Department.

Title III of the ADA prohibits discrimination against persons with disabilities by places of public accommodation, including restaurants, hotels, retail stores, and theaters of the type mentioned in XX's letter. Specifically, the ADA and the regulation issued by the Department under title III of the ADA require a public accommodation, such as an arena, civic center, or auditorium, which is privately owned and operated, to make reasonable modifications in policies, practices, or procedures, when such modifications are necessary to afford services, facilities, or accommodations to individuals with disabilities. Please refer to section 36.302 of the title III regulation and pages 22-25 of the Title III Technical Assistance Manual, enclosed, for a discussion of this requirement.

cc: Records; Chrono; Wodatch; Foran; McDowney; FOIA; MAF.
:udd:foran:roukemacongressional

01-01736

Without further information about the incident at issue, it is not possible to determine whether the entity may have violated the ADA. Should XX wish to file a complaint with the Department of Justice, however, the matter will be further investigated. A complaint should include the name and address of the place of public accommodation, and a detailed account of the alleged incident or pattern of discrimination, including the date. Complaints can be mailed to: Public Access Section, Civil Rights Division, U.S. Department of Justice, P.O. Box 66738, Washington, D.C. 20035-9998.

If (b)(6) would like to obtain further information about his rights under the ADA, relevant Department of Justice publications are available in alternative formats such as large print, braille, audiocassette, and computer disk. They may be obtained by calling (202) 514-0301, Monday through Friday, 1:00 p.m. through 5:00 p.m., E.S.T., or by requesting those documents in writing at the address listed above.

I hope this information will assist you in responding to your constituent.

Sincerely,

John R. Dunne

Hope NJ 07844
July 25, 1992

The Honorable Marge Roukema
58 Trinity St.
Newton NJ 07860
Dear Madam:

Why does discrimination exist in New Jersey? (b)(6)
XX are being discriminated against because XX are Legally Blind. Four weeks ago, I called requesting Visual Handicapped Seating for a concert at Waterloo Village. After three weeks being hassled from one person to another and not getting return calls, I was told that there was no accommodations since this was a field concert. The person who called, XX was rude, abusive and arrogant ILLEGIBLE XX. Can you picture a visually handicapped person racing across a field along with hundreds of other people to get a seat close enough to see the concert? I was also told that Waterloo Village does not discriminate. There are handicapped seating for wheel chairs in tent concerts and they even have a handicap ILLEGIBLE. This is all well and good - if you are in a wheel chair. But I, along with many other New Jersey residents, need Visually Handicapped Seating. It does my (b)(6) or any other Visually Handicapped person no good to be in a wheel chair section at the rear of a tent concert - or field concert.

Why does Handicapped only mean wheel chair disability? Legs? Blindness is also a disability and yet it is ignored. There are facilities that recognize this problem: Yankee Stadium: ILLEGIBLE ILLEGIBLE Arena: ILLEGIBLE

01-01739

Arena at Lehigh University in Bethlehem, Pa. and especially Allentown Fair Grounds in Allentown, Pa. They even distinguish between Wheel Chair, Visual and Hearing disabilities. I purchased tickets from Allentown Fair Grounds for the same concert that will be in Waterloo Village. I will be met and escorted to Visually Handicapped Seating by a member of the staff.

Why must I travel out of the state to enjoy a concert with XX (b)(6) family? As an elected official of New Jersey, ILLEGIBLE your help to rectify this abominable and discriminatory practice.

Sincerely yours,
(b)(6)

The Honorable Charles H. Crawford
Commissioner
The Commonwealth of Massachusetts
Executive Office of Human Services
Commission for the Blind
88 Kingston Street
Boston, Massachusetts 02111-2227

Dear Commissioner Crawford:

This letter responds to your inquiry regarding the content of certain materials reportedly produced by a grantee of the Department of Justice. You have not identified the grantee or the materials in question.

The Americans with Disabilities Act (ADA) authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation or legal advice and it is not binding on the Department of Justice.

Your letter expresses concern that certain technical assistance materials containing a summary of compliance steps for public entities do not discuss computer text files and descriptive video as additional means of providing effective means of communication to individuals with disabilities under the ADA.

The ADA requires public entities to furnish appropriate auxiliary aids and services to ensure that communication with persons with disabilities is effective. The title II regulation lists several examples of such auxiliary aids and services. Although computer text files and descriptive video are not specifically cited as examples, the list is not in any sense intended to be exhaustive or all-inclusive. In fact, the portion of the regulation addressing auxiliary aids and services that may be required for persons with vision impairments is written

cc: Records; Chrono; Wodatch; Foran; McDowney; FOIA; MAF.

broadly to include "other effective methods of making visually delivered materials available to individuals with visual impairments." 28 C.F.R. s 35.104.

In explaining the limited nature of the list of examples included in the regulation, the Justice Department's interpretive commentary or "preamble" to the regulation states:

> A substantial number of commenters suggested that additional examples be added to this list. The Department has added several items to this list but wishes to clarify the list is not an all-inclusive or exhaustive catalogue of possible or available auxiliary aids or services. It is not possible to provide an exhaustive list, and such an attempt would omit new devices which will become available with emerging technology.

56 Fed. Reg. 35697.

The preamble to the regulation also specifically discusses additional examples of aids and services for making visually delivered materials accessible to persons with visual impairments. As the preamble states, although these examples are not included in the regulation, they would nonetheless be considered auxiliary aids and services under the ADA.

Many commenters proposed additional examples such as signage or mapping, audio description services, secondary auditory programs, telebraillers, and reading machines. While the Department declines to add these items to the list, they are auxiliary aids and services and may be appropriate depending on the circumstances.

56 Fed. Reg. 35697. For more information on auxiliary aid requirements see section 35.104 of the enclosed federal regulation at page 35717 and the additional discussion at page

35697 and pages 35711-35712.

I hope this information is useful to you in understanding the requirements of the ADA.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

October 15, 1992

The Honorable William Pelham Barr
Attorney General of the United States
Department of Justice
Tenth and Constitution Avenues N.W.
Room 4400
Washington DC 20570

Dear Mr. Attorney General:

I am writing to convey my concern after speaking with a person who operates with funding from the Department of Justice on a project to advise the public with respect to obligations under the Americans with Disabilities Act. I had an opportunity to read a summary of compliance steps that public entities would have to execute under the ADA and was surprised and disappointed at the omission of important points relative to information access for blind and otherwise print handicapped person.

Rightfully, entities were advised that they would have to provide information in an "equally effective" fashion and consistent with the preferences of the person requesting the information. Correctly, they went on to point out that print materials could be made accessible through audio tapes, large print, and Braille. Unfortunately, they omitted the critical

consideration of how print materials are generated and the advantages associated with proper attention to computer based text files as both a means of accommodating the information needs of computer literate persons who are print handicapped, and the ability of the text file to be easily printed in large print, sent to Braille printers or even output to high quality speech processors for audio tapes when such speech is acceptable to the user. Moreover, the computer file is amenable to word processing where the user is then able to use the source material much more effectively than the passive reading of it.

In view of the thrust of the thrust of the current Administration along with the platforms of all major contenders for the Presidency endorsing increased automation, I am seriously concerned at the lack of mentioning text files as a prime method of information accessibility.

The above is only worsened by the representation made to me that the information had been reviewed by the Department of Justice in advance of my reading it. If this is so, then an immediate education process is in order at the Department to avoid similar instances.

My other concern at the document was the rightful articulation of "closed captioning" as a viable means of information access for persons who are deaf and watching videos, but no mention at all of the same type "descriptive video" access for persons who cannot see what is happening on the screen.

I realize the difficulties associated with attempting to implement a major piece of legislation which contains many concepts not in the ordinary public discourse, however, misinformation cannot be tolerated if we are to achieve our common goal. If I can be of any further assistance in this regard, please contact me at the above address or call (617)-727-5550 extension 4503 to speak with me.

Sincerely,

Charles H. Crawford
Commissioner

NOV 24 1992

Jeffrey H. Flora, CAE
Managing Director
The Electric Association of
Missouri & Kansas
638 W. 39th
Kansas City, Missouri 64141-4168

Dear Mr. Flora:

This letter is in response to your request for a statement of our policy for enforcing the Americans with Disabilities Act (ADA).

As with other Federal civil rights statutes protecting Americans against employment discrimination, the ADA will be enforced with reason and fairness. I am confident that our enforcement policy will not contribute to the litigation crisis, but rather will provide expanded opportunities for businesses, as well as potential employees and consumers.

Our general enforcement strategy is a simple one and can be summarized in a phrase: educate, negotiate and litigate only when those efforts fail. Our goal is voluntary compliance with the ADA through an active outreach and public education effort. We will attempt first to resolve complaints through a process of

technical assistance and negotiation, and resort to litigation only when necessary to achieve compliance after those efforts.

To date, this policy has been very successful. Daily, we advise owners and managers of businesses on ways to comply with the ADA, and they express a great interest in doing so voluntarily - not to avoid litigation, but because it is the right thing to do. In the long run, compliance will also make them more competitive in the marketplace.

cc: Records; Chrono; Wodatch; Breen.
:udd:jonessandra:disabling.america

01-01745

It is true that litigation will be unavoidable in some circumstances. The ADA and the Federal regulations, however, strike a careful balance between the rights of individuals with disabilities to equal access to the mainstream of American life and the legitimate needs of business for efficiency and profitability. The ADA's incorporation of such limiting concepts as "readily achievable," "undue burden" and "undue hardship" takes into consideration the economic health of individual businesses and simultaneously protects essential rights and promotes economic growth.

The day has long passed when individuals with disabilities can be shunted away in segregated programs or denied employment. Now is the time for all American institutions to reassess their policies and practices to ensure that all individuals are included in their activities, services, and employment opportunities. It's good business, it makes sense, and it's

fair.

Sincerely,

John R. Dunne

Mr. John R. Dunne
Assistant Attorney General
Civil Rights Division
U.S. Justice Department
Washington, D.C. 20515

Dear Mr. Dunne:

I read with much interest your letter to the editor in the August 20th issue of the Wall Street Journal.

Our Association represents approximately 600 members who are individual businesses and business owners and who are also very concerned about the impact of the employment provisions of Title I of the Americans With Disabilities Act which went into effect in July, 1992.

We would appreciate very much for you to write the Electric Association of Missouri & Kansas a memo on Justice Department stationery outlining the policies that you stated in your letter to the Wall Street Journal.

I look forward to hearing from you soon.

Sincerely,

Jeffrey H. Flora, CAE

Letters to the Editor

Unsupported Fears About the ADA

Your July 24 editorial "Disabling America" is misleading and fosters unsupported fears about the consequences of the employment provisions of Title I of the Americans With Disabilities Act (ADA), which went into effect last month. As with other federal civil rights statutes protecting Americans against employment discrimination, Title I will be enforced with reason and fairness. I am confident that our enforcement policy will not contribute to the litigation crisis, but rather will provide expanded opportunities for employers, as well as potential employees.

Our compliance strategy is a simple one and can be summarized in a phrase: educate, negotiate and litigate only when those efforts fail. Our goal is voluntary compliance with the ADA through an active outreach and public education effort. We will attempt first to resolve complaints through a process of technical assistance and negotiation, and resort to litigation only when compliance is required.

You confuse the administrative enforcement procedures for the ADA's various provisions and actual court litigation. Your reference to 320 cases filed with our department and the "20% jump in discrimination lawsuits, or 15,000 new cases a year," is a reflection of this confusion. These statistics refer to the number of administrative complaints filed with our department and those that may be lodged with the Equal Employment Opportunity Commission (EEOC) during the coming year. Some of the department's cases go to litigation, but the vast majority will be settled voluntarily. Similarly, a very small percentage of EEOC's cases will result in litigation.

To date, our experience has been very

different from the bleak view you present. Daily we advise the owners and managers of businesses on ways to comply with the ADA and they express a great interest in doing so voluntarily -- not to avoid litigation, but because it is the right thing to do. Moreover, in the long run, compliance will make them more competitive in the marketplace.

It is true that litigation will be unavoidable in some circumstances. The ADA and the federal government's regulations, however, strike a careful balance between the rights of individuals with disabilities to equal access to the mainstream of American life and the legitimate needs of government and business for efficiency and profitability. The ADA's incorporation of such limiting concepts as "readily achievable," "undue burden" and "undue hardship" takes into consideration the economic health of individual businesses and state and local governments, and simultaneously protects essential rights and promotes economic growth.

The day has long passed when individuals with disabilities can be shunted away in segregated programs or denied employment. Now is the time for all American institutions to reassess their policies and practices to ensure that all individuals are included in their activities, services and employment opportunities. It's good business; it makes sense, and it's fair.

JOHN R. DUNNE
Assistant Attorney General
Civil Rights Division
U.S. Justice Department
Washington

* * *

You accurately describe fears many people have about the ADA. You point out that there is a fear that there will be many costly lawsuits and that ultimately we may find costs of "reasonable accommodation" to be excessive.

One of the uncertainties that breeds fear is that there is no consensus on the

definition of disability. Who counts under the ADA as having a disability is simply not known. Also, the face of disability is changing quickly due to the rise of AIDS, the recurrence of tuberculosis in our cities and the overall aging of the population (thus increasing the prevalence of disability).

JOHN B. WINGATE
Executive Director
International Center for the Disabled
New York

* * *

Your editorial is unfortunately a reflection of the fear, ignorance and patronizing attitudes that made the ADA necessary in the first place. It's not only remarkable for its misstatement of fact, but for its complete misunderstanding of the spirit and history underlying the ADA, of which I was the primary sponsor in the Senate.

Let's remember for a moment why the ADA enjoyed such sweeping bipartisan support when it was passed: because Congress and the White House recognized that "compassion for the accidents of birth or circumstance that limit some people" (your phrase) has been insufficient to guarantee to individuals with disabilities the rights that are taken for granted by others in our society. With the ADA, for the first time, people with disabilities have those same rights.

While you see the ADA as a potential "Lawyer's Annuity Act," people with disabilities see it as the one law that will help them achieve inclusion and independence in the mainstream of society. For the same reason that soldiers hate war most because they have the most to lose, people with disabilities have the greatest interest in seeing the effective and non-adversarial implementation of the law -- because they have the most to lose if the ADA fails.

However, your editorial suggests that fear of legal liability under the ADA will result in increased employment discrimination against people with disabilities. But

your conclusions are contradicted by your own reporters. The Journal has previously documented not only the existence of rampant job discrimination in the absence of legal protection, but also the benefits to the work force as a whole when protections are in place.

As early as January 1976, in reporting on the change in employment practices resulting from the Rehabilitation Act of 1973, a Journal article highlighted the limitations that had been placed on American businesses, not by civil rights laws, but by erroneous perceptions of the value of disabled Americans in the workplace. Regarding the efforts by the Disability Rights Education and Defense Fund (DREDF): Far from the lawsuit-happy "Barrier Busters" you portrayed, DREDF has worked from the beginning of the ADA to bring the business and disability communities together, to educate and clarify misperceptions.

Finally, your editorial quotes economist Walter Ol as saying the ADA will "make the disabled more dependent on the government." A Harris Poll recently found that two-thirds of all working-aged people with disabilities are on the public dole. Case after case has found that when given a chance, people with disabilities perform as well as the non-disabled. Little wonder the EEOC projects not only productivity gains of $164 million under the ADA, but a $222 million net benefit from decreased support payments coupled with increased revenue. Far from making people with disabilities more dependent on government, this law is truly a mandate for transforming tax-users into taxpayers.

TOM HARKIN (D., Iowa)
U.S. Senate
Washington

NOV 24 1992

The Honorable Arlen Specter
United States Senator
Suite 9400, Federal Building
600 Arch Street
Philadelphia, PA 19106

ATTN: Ms. Mary Clark

Dear Senator Specter:

This letter is in response to your inquiry on behalf of Marie A. Midas, Chief Clerk, County of Carbon, who requested a response to her letter of May 13, 1992, to the Office on the Americans with Disabilities Act. We regret that we have been unable to locate a record of that letter.

The ADA authorizes the Department of Justice to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you in responding to Ms. Midas. However, this technical assistance does not constitute a determination by the Department of Justice of the County's rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

As indicated in section II-5.0000 of the enclosed Technical Assistance Manual, title II of the Americans with Disabilities

Act requires for existing facilities that programs and activities operated by public entities must be accessible to individuals with disabilities. Title III of the ADA establishes different requirements for places of public accommodation operated by private entities, and a copy of our Title III Manual is also enclosed for your information. The relationship between the title II requirements for public entities and the title III requirements for private entities is discussed in section II-1.2000 of the Title II Manual, and the examples in that section may be relevant to Ms. Midas' concerns. Illustration #2 indicates that when a city leases to a restaurant, newsstand, and travel agency, the city is a landlord subject to title II even

cc: Records, CRS, Friedlander, Kaltenborn, McDowney, FOIA, Breen
:udd:kaltenborn:specter

01-01749

though the tenants are public accommodations covered by title III. Also, section II-5.5000 of the Manual discusses the application of the program accessibility requirements to programs operated in historic properties.

I hope that this information is helpful to you in responding to Ms. Midas.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

May 13, 1992

US Department of Justice
Civil Rights Division
Office on the Americans with Disabilities Act
Washington, DC 20035

Dear Sir/Madam:

The County of Carbon owns a downtown historic structure and in turn rents space to a bank, tourist agency and small railline. It has been brought to my attention as ADA Coordinator that the bank (branch) is not handicapped accessible due to a threshold step at the entrance to same.

I am aware that the County as landlord is subject to Title II

regulations of the ADA Act. However, the bank is governed by Title III. If a ramp, portable or otherwise is erected, the doorway would not accommodate wheelchair passage. Consequently, a full accommodation would result in a structural change. The building in question is an 1888 train station within a National Historic District. Thus, historic standards would also apply. Any historical modification would be cost-prohibitive at this time.

The bank has a main location which is approximately 1 1/2 miles from the branch site. As the bank has provided full banking services at a main office which is handicapped accessible, safer, less congested, including adequate parking and within close proximity to the branch, have they met ADA compliance? What regulations would govern in this case? Would a service doorbell and appropriate signage satisfy accessibility standards?

The County would appreciate your written response in this matter. Thank you for your time and consideration.

Sincerely,

Marie A. Midas
Chief Clerk
COUNTY OF CARBON

NOV 25 1992

The Honorable Thomas W. Ewing
U.S. House of Representatives
1632 Longworth House Office Building
Washington, D.C. 20515-1315

Dear Congressman Ewing:

This letter responds to your inquiry regarding the

requirements of the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that are subject to the Act. This letter provides informal guidance to assist your constituents in understanding the requirements of the ADA. However, this technical assistance does not constitute a determination by the Department of rights or responsibilities under the ADA, and it is not binding on the Department.

As you may know, a member of the Public Access Section at the Department of Justice spoke to Eric Nicoll, a staff person in your Washington office, several weeks ago regarding the questions posed in your letter of inquiry. This letter provides written confirmation of the information provided to Mr. Nicoll.

You have asked how the ADA would apply to a small manufacturing plant in your district. Manufacturing plants are not considered public accommodations and thus are not required to undertake removal of barriers in existing facilities. A manufacturing plant would, however, be considered a commercial facility for purposes of the ADA. This means that any alterations undertaken by the plant after January 26, 1992, must be in accordance with the ADA Accessibility Guidelines. New construction undertaken by the plant is also covered by the ADA. For more information about requirements for alterations and new construction, please refer to sections 36.401-36.406 of the title III regulation and pages 43-53 of the Title III Technical Assistance Manual (enclosed).

cc: Records, Chrono, Wodatch, McDowney, Foran, FOIA, MAF
Udd:Foran:ewingcongressional

01-01754

A manufacturing plant may also be required to comply with title I of the ADA, the provisions that require non-discrimination in employment. For more information on the requirement to provide reasonable accommodations to employees with disabilities, please see section III of the enclosed Title I

Technical Assistance Manual.

Your letter also asks a series of questions about the applicability of the ADA to businesses with financial difficulties. A business covered by the ADA is only required to remove barriers in existing facilities where "readily achievable" to do so. "Readily achievable" means easily accomplishable and able to be carried out without much difficulty or expense. Further discussion of section 36.304 of the title III regulation can be found in the interpretive guideline or preamble to the regulation at 56 Fed. Reg. 35568-35570 and pages 29-35 of the Title III Technical Assistance Manual. There are several sources of financial assistance to help businesses comply with ADA requirements. An eligible small business may take a tax credit of up to $5000 per year for a wide variety of expenditures made to improve access. There is also a tax deduction of up to $15,000 per year for any business for expenses of removing specified architectural and transportation barriers. Information on the Section 44 tax credit and the Section 190 tax deduction can be obtained from a local IRS Office or by contacting the Office of Chief Counsel, Internal Revenue Service.

I hope this information will assist you in responding to your constituent.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

Ms. Thomasina Rogers
Legal Counsel
Equal Employment Opportunity Commission
1801 L Street, N.W.
Washington, D.C. 20507

Dear Ms. Rogers:

I am writing to you because I have some questions about the Americans with Disabilities Act. I was not in Congress when this legislation was enacted, and I hope you can be of assistance. Please get back to me by October 15.

I know of a small manufacturing plant in my district which produces wood trusses and wall panels. The company has approximately 45 employees. The company has a small office with two small bathrooms. The owner of the company tells me that there is no room for a bathroom which is accessible to the disabled even if he were to combine the present two small bathrooms. Such a modification would require a major structural change at great expense. The owner of this company tells me that he cannot afford this expense and that other expenses already have left the company

with a difficult financial burden.

This business is not a retail building supplier dealing with the general public. Their customers are building contractors who are not disabled. The owner has even informed me that if he did have a disabled customer, he would go to that customer to conduct his business.

This situation brings up many questions which I would like you to answer. Does the Act allow for exemption in the case of businesses facing financial difficulties? If the Act does not allow this flexibility, is there some federal program which can assist financially-strapped businesses to meet these mandates? If so, please give me the specifics and how a business can obtain an exemption from the Act or he could go for financial assistance. After all, if the expenses incurred by this Act drive businesses out of businesses, many jobs can be lost. Can an exemption be obtained for a business which can clearly demonstrate that there is not a demand for handicapped accessibility at his place of business? How would a businessman apply for an exemption? Again, I would like specifics.

01-01756

I would greatly appreciate it if you would get back to me with the answers to these questions by October 15. Any additional comments you have would be appreciated. If you have any questions, please have your staff contact Eric Nicoll in my Washington, D.C. office at (202) 225-2371.

Sincerely,

Thomas W. Ewing
Member of Congress

01-01757

NOV 25 1992

The Honorable Dan Glickman
Member, U. S. House of Representatives
401 N. Market Street, Room 134
Wichita, Kansas 67202

Attention: Janet Anderson

Dear Congressman Glickman:

This letter responds to your inquiry on behalf of (b)(6) XX concerning the regulatory requirements of the Americans with Disabilities Act for curb side locations for accessible parking spaces.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities with rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA accessibility standards. However, this technical assistance does not constitute a legal interpretation of the statute and it is not binding on the Department.

The ADA Accessibility Guidelines in section 4.6.2 (page 35631 of the enclosed Federal Register document) do require that accessible parking spaces serving a particular building be located on the shortest accessible route of travel to an accessible entrance. In some instances, local fire engine access requirements prohibit parking immediately adjacent to a building. If such is the case, a marked crossing may be used as part of the accessible route to the entrance.

I hope this information will be helpful to your constituent.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

01-01758

NOV 25 1992

The Honorable Charles S. Robb
United States Senator
Old City Hall
1001 East Broad Street
Richmond, Virginia 23219

Dear Senator Robb:

This letter responds to your inquiry on behalf of XX (b)(6) concerning the Martinsville Speedway. XX has complained that personnel at the Speedway refused to admit him after he asked permission to carry a lawn chair onto the premises to accommodate his disability.

The Americans with Disabilities Act (ADA) authorizes this Department to provide technical assistance to individuals and entities that have rights or responsibilities under the ADA. Therefore, this letter provides informal guidance to assist you in responding to (b)(6) xx However, this technical assistance does not constitute a legal interpretation, and it is not binding on the Department of Justice.

Under title III of the ADA, a public accommodation, including a place of recreation such as a speedway, is obligated to make reasonable modifications in its policies, practices, or procedures when the modifications are necessary to ensure that individuals with disabilities have access to its goods and services, unless the modifications would fundamentally alter the nature of those goods and services. For a fuller discussion of this issue, please refer to section 36.302 of the enclosed title III regulation and pages 22-24 of the enclosed Title III Technical Assistance Manual.

cc: Records; Chrono; Wodatch; Delaney; McDowney; FOIA; MAF.
:udd:delaney:ada.cong.robb.(b)(6)

01-01759

We cannot ascertain solely on the basis of the information provided whether the Speedway is in violation of the ADA. If (b)(6)xx wishes to file a formal complaint with the Department of Justice to initiate an investigation of this matter, he should send a written complaint to: Public Access Section, Civil Rights Division, Post Office Box 66738, Washington, D.C. 20035-6738.

I hope this information is helpful in responding to your constituent.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

Dear Sirs: Ridgeway, Va.

On Sept. 24 at 9am I was vehemently refused entrance to the Martinsville Speedway after requesting to carry a ILLEGIBLE mesh lawn chair in explaining to the man at the entrance I needed it to sit in having 100% disability resulting from 2 failed back operations, ILLEGIBLE severe cronical pain in lower back, hips, both legs, and numbness down both legs all the way to my toes. This has left me handicap in walking, standing sitting and restricting my movements and activities.

It would have been impossible for me to sit on those hard cement & metal seats they have. My request was for that day only. My request should have been heeded. (ILLEGIBLE) is only a few

people there to see practing on this
day. The ticket collector agreed with me.
On being sent to the office to ask
permission & explaining my problems
an older lady seemed to become furious
ILLEGIBLE & eventually chewing me out
the 2 men at the gate for sending me
up there. Coming back she said no exceptions
could be made to anyone, that the rules
were no chairs could be taken through the
gates. I am aware that Federal Laws was
passed not long ago giving disabled and
handicap people ample, and special cond-
itions. I want to register a complaint:
Through the proper channels and request
ILLEGIBLE prudent emotional, damages
ILLEGIBLE trouble to correct this problem.
I am mailing 2 copies of
this letter one to Health & Human Service
Roanoke, Va. & Honorable Senator Charles
Robb. Please advise if you can help. I
ILLEGIBLE 62 ticket would
be XX (b) (6)
$500 Regular Charge

Sincerely Yours
(b) (6)

DJ 202-PL-340
Mr. George A. Zitnay
President and Chief Executive Officer
National Head Injury Foundation
1776 Massachusetts Ave., Suite 100
Washington D.C. 20036

Dear Mr. Zitnay:

This letter is in response to your inquiry regarding whether individuals who have experienced traumatic brain injury are protected by the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation or legal advice, and it is not binding on the Department of Justice.

The ADA defines the word "disability" as a physical or mental impairment that substantially limits one or more of an individual's major life activities; a record of such an impairment; or being regarded as having such an impairment. 42

U.S.C. S12102(2). Section 36.104 of the Department's ADA title III regulation (enclosed), at page 35,593, provides that:

(1) The phrase physical or mental impairment means --

(i) Any physiological disorder or condition, cosmetic disfigurement, or anatomical loss affecting one or more of the following body systems: neurological; musculoskeletal; special sense organs; respiratory, including speech organs; cardiovascular; reproductive; digestive; genitourinary; hemic and lymphatic; skin; and endocrine; ...

(iii) The phrase physical or mental impairment includes, but is not limited to, such contagious and noncontagious diseases and conditions such as orthopedic, visual, speech, and hearing impairments, cerebral palsy, epilepsy, muscular dystrophy, multiple

cc: Records, Chrono, Wodatch, Breen, Perley, Friedlander, FOIA
Udd:Perley:zitnay.pl

01-01762

sclerosis, cancer, heart disease, diabetes, mental retardation, emotional illness, specific learning disabilities, HIV disease ..., tuberculosis, drug addiction, and alcoholism ... (emphasis added).

In your letter you state that "because disability from traumatic brain injury is not specifically identified in the ADA statute or regulations, there is concern that persons with TBI are not protected by the ADA." Please be assured that traumatic brain injury is an impairment covered by the statute. As explained in the section-by-section analysis of the regulation at page 35,548, "traumatic brain injury is a physiological condition

affecting one of the listed body systems [in paragraph (1)(i)], i.e., 'neurological'." Indeed, the absence of traumatic brain injury in paragraph (1) (iii) does not mean that it is not a physical or mental impairment as defined by the Act. The list of diseases and conditions in this paragraph is not an exhaustive one; it merely provides examples of the broad range of impairments included under the ADA.

I hope this information is helpful and dispels any concerns that you may have.

Sincerely,

John L. Wodatch
Chief
Public Acess Section

Enclosure
Title III Regulation

01-01763

mailed between
December 2, 1992 and
December 14, 1992

Mr. Steven J. Cole
Vice President and General Counsel
Council of Better Business Bureaus, Inc.
4200 Wilson Boulevard
Arlington, Virginia 22203-1804

Dear Steve:

This letter is in response to your inquiry regarding whether physicians must assist patients with disabilities in dressing and undressing.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation or legal advice and it is not binding on the Department of Justice.

The ADA requires public accommodations to make "reasonable modifications in policies, practices, or procedures when the modifications are necessary to afford goods [and] services . . . to individuals with disabilities, unless the public accommodation can demonstrate that making the modifications would fundamentally alter the nature of the goods [or] services . . . ." 28 C.F.R. S 36.302(a). In most cases, we believe that providing assistance in dressing and undressing would not fundamentally alter the nature of the service provided by a physician.

You are quite correct to point out that the regulations generally do not require a public accommodation to provide its customers or clients with services of a personal nature, including dressing. 28 C.F.R. S 36.306. We do not think, however, that this limitation to the general rule applies to assistance in dressing and undressing provided by physicians. The personal services limitation is a narrow one and must be interpreted in light of the nature of the services provided and the assistance required. Because the nature of medical services is inescapably very personal, it is not unreasonable to require physicians to provide assistance with dressing or undressing, even though other public accommodations may not be required to

cc: Records, Chrono, Wodatch, Breen, Contois, Friedlander, FOIA
Udd:Contois:PL.dressingandundressing
01-01764

provide such assistance. Moreover, because undressing is commonly crucial to the provision of medical services, applying the personal services limitation to assistance in dressing and undressing would inappropriately deny medical care to large numbers of individuals with disabilities.

I regret the long delay in answering your request and hope that the delay has not created a hardship for you. I really do appreciate the fine work that the Council of Better Business

Bureaus' Foundation has done in helping implement the ADA. I especially value Barbara Bode's efforts on the technical assistance grant and out on the hustings. She has been an invaluable resource and has helped open communications between business and the disability rights community.

Thanks again for your inquiry, and let me know if we can be of any further help to you.

Sincerely,

John L. Wodatch
Chief
Public Access Section

COUNCIL OF BETTER BUSINESS BUREAUS, INC.
THE INTERNATIONAL ASSEMBLY OF BETTER BUSINESS BUREAUS

MEMORANDUM

TO: JOHN WODATCH, Director
Office of Americans With Disabilities Act
Civil Rights Division, Department of Justice

FROM: Steven J. Cole
Vice President and General Counsel

RE: CBBBF Technical Assistance Grant--
Outpatient Medical Facilities

DATE: July 20, 1992

I hope that this is finding you well. I know that you must be exceedingly busy, but I hope that all of the hard work you and your staff have been doing is now beginning to pay off.

We have received and incorporated your staff's helpful comments on the final set of industry-specific brochures, and Jim McIlhenny has given final approval of copy for printing, which is now imminent.

In the brochure directed to outpatient medical facilities we have included a sentence that was in the draft reviewed and accepted by the DOJ reviewer but that, in my mind, raises a question under your regulations.

I would appreciate it if you would be able to provide for our use in connection with questions that might arise after the booklets are distributed, or for future printing, a confirmation of DOJ's interpretation.

The brochure will ask the following question:

> "What assistance must health care facilities provide for patients and clients who use wheelchairs or other mobility devices to ensure equal and effective treatment and services?"

Our answer includes the following sentence:

> "Medical and health care facilities must provide assistance to undress and dress as needed or requested by patients with disabilities unless doing so fundamentally alters the services provided."

4200 Wilson Boulevard Arlington, VA 22203-1804 (703) 276-0100 FAX (703) 525-8277

It was my understanding that services of a personal nature, defined to include assistance in dressing, 28 CFR S 36.306, are not required by Title III, ibid.

At the same time, it was my understanding that notwithstanding the personal services limitation on all requirements of the regulation, 1 a public accommodation that customarily provides a personal service to its customers must do so for persons with disabilities who require the assistance. See 56 Fed. Reg. 35571 (July 26, 1991) and DOJ Technical Assistance Manual, III-4.2600, p. 24 (January 24, 1992).

Accordingly, it would be very helpful to receive from you a confirmation that we have correctly advised medical facilities that they are obligated to provide dressing and undressing assistance where needed or requested (in the absence of a showing that such services would fundamentally alter the services of the facility), whether or not the facility customarily provides the services to its patients.

Thank you for your prompt attention to this. And, again, thank you and your staff for the excellent cooperation we have received on this important project.

cc: James McIlhenny
Barbara Bode

1 The preamble to the final rule explains that this limitation applies to all requirements, including those pertaining to modifications to policies and procedures, a point not clear in the proposed rule. See 36 Fed. Reg. 35571 (July 26, 1991).

XXXXXX(b)(6)
Myrtle Beach, South Carolina 29577

Dear XX

This is in response to your correspondence regarding the Americans with Disabilities Act (ADA) and interpreting services. The first issue you raise, concerning the postal exam, is under the primary jurisdiction of the Equal Employment Opportunity Commission, and, accordingly, it is more appropriate for that Commission to respond. The Commission is responsible for the implementation and enforcement of section 501 of the Rehabilitation Act of 1973, as amended. Section 501 imposes upon the Federal government affirmative action requirements to hire and promote qualified individuals with disabilities. For more specific information about Title I, please contact EEOC, 1801 L Street, N.W., Washington, DC 20507, (800) 699-EEOC (voice) or (800) 800-EEOC (TDD).

We are unable to assist you in your complaint about lack of sufficient community resource centers. Regarding your fourth concern involving vocational rehabilitation counselors, the U.S. Department of Education, Office of Special Programs and Rehabilitation Services, Rehabilitation Services Administration is responsible for implementing the Rehabilitation Act of 1973, as amended, in rehabilitation service programs. You may want to contact that office. Its address is: 330 C Street, SW, Washington, D.C. 20202.

Your second concern involves payment of interpreters. Title II of the ADA prohibits discrimination on the basis of disability by public entities. It applies to all programs, activities, and services provided or operated by State and local governments. Title III covers private entities in places of public accommodation.

:udd:mather:ltr. (b)(6)
cc: Records, CRS, FOIA, Friedlander, Mather, Breen

Section 35.160 of the enclosed title II regulation requires that public entities provide auxiliary aids and services where necessary to afford an individual with disabilities an equal opportunity to participate in, and enjoy the benefits of, the public entity's program or activity, or otherwise to ensure effective communication with members of the public. This requirement is further explained in section II-7.0000 of the enclosed title II Technical Assistance Manual. Among auxiliary aids and services that promote effective communication are qualified interpreters.

Private entities are required to furnish appropriate auxiliary aids and services where necessary to ensure effective communication with individuals with disabilities. These provisions appear in section 36.303 of the enclosed title III regulation and section III-4.3000 of the enclosed title III Technical Assistance Manual.

When an interpreter or other auxiliary aid or service is necessary to ensure effective communication, the public or private entity must absorb the cost for this aid or service. The entity, however, is not required to provide any auxiliary aid that would result in an undue burden.

Federal agencies have similar obligations under section 504 of the Rehabilitation Act of 1973, as amended. Section 504 regulations for federally conducted programs require that Federal agencies take appropriate steps to ensure effective communication with personnel of other Federal entities, applicants, participants, and members of the public. The agencies must provide auxiliary aids at no cost to individuals with disabilities.

If you believe, after reviewing the enclosed materials, that you have been discriminated against on the basis of your disability, you have two enforcement options under the ADA: (1) You may secure private legal representation and bring an action in Federal court, or (2) you may file a complaint with the Department of Justice.

If you choose to file a complaint with the Department of Justice, you should send it to one of two offices of the Civil Rights Division assigned to investigate such complaints. If the program is operated by a State or local government, you should

send any relevant information to the Coordination and Review Section, Civil Rights Division, U.S. Department of Justice, P.O. Box 66118, Washington, D.C. 20035-6118. If, on the other hand, the program is operated by a private entity, you should send any relevant information to the Public Access Section, Civil Rights Division, U.S. Department of Justice, Post Office Box 66738, Washington, D.C. 20035-9998.

01-01769

If the program is conducted by a Federal agency, you should file a complaint with that agency. All complaints should be in writing and should set forth, in as complete a manner as possible, the factual circumstances surrounding the complaint.

I hope this information is helpful to you.

Sincerely,

Stewart B. Oneglia

Dear Sir,

I hope this is the right Department I am referring to. If not, please give this letter to the proper people in the department. Thank you.

I am writing this letter on the behalf of the deaf communities and you will notice some letters have deaf people's signatures.

The state of S.C. is not well serving the deaf communities as it ought to or nothing at all.

I had written complaint letters to South Carolina Association of the Deaf (S.C.A.D.), South Carolina Protective and Advocacy (S.C.P.A.) and the Community Resources Center (C.R.C.) about these problems. They all seem don't care or play their games with the deaf people's lives doing nothing about these problems.

NO. 1 PROBLEM--There is no way to find or contact an interpreter in the South Carolina area. A deaf man called me and asked me to look for an interpreter for Post Office exam tomorrow. I really don't know where to contact one, but I had to call around to find one. The deaf man asked me if the Post Office will pay for the interpreter and I don't have no idea and I am sure that the interpreter had to convince the Post Office to pay for his interpreting fee, but I doubt the interpreter got paid for his service.

NO. 2 PROBLEM--This is a big hassle-- all STATE and FEDERAL agencies or private sectors should pay for an interpreter's service. Everywhere the deaf people go they have to wrestle with all kinds of agencies to pay for the interpreter's fee. Majority of them refuse to pay. SOLUTION:-- Set up on Interpreter Referral Center, in a good location, has all the interpreter's name, address and qualification in the computer. The Interpreter Referral Center (IRC) will seek grants and funds from the State and Federal Government to pay for the interpreter's fee instead of the deaf trying to find one and trying to make sure the interpretor are being paid by the agencies. It is a lot of hassle to find an interpreter and make sure the agencies or private sectors paying for the interpreter.

PROBLEM NO. 3-- I wrote a letter to Community Resources Center (CRC) at S.C. School for the Deaf & Blind in Spartanburg, S.C. asking them to provide C.R.C. in the Northeastern part of S.C. and they said the Deaf Services Center in Horry County is enough and they told me they were looking for C.R.C. director and will contact us later. I haven't heard from them months and months. All I hear is the State is cutting back on grants and funds and they can't provide money to set up another C.R.C. in the northeastern part of S.C. We have a Deaf Services Center

(DSC) in Myrtle Beach, S.C. (Horry County) but lack of money and fund to continue the services to the deaf communities. I was involved with the Deaf Services Center (DSC) as a chairman and I knew it was tough to get
01-01771

grant us any more money. DSC only supports by the Sertoma Clubs and the Christmas Gift Wrapping by deaf volunteers. The DSC did request money from the Horry County Council but they said we were last in priority. I assume they play game with our lives and maybe the Horry County refuse to give the DSC the money to hire a full-time director and a secretary to run the DSC.

PROBLEM NO. 4--You can read the letters that I attached with this letter. Many deaf people are disgusted with the Vocational Rehabiliation (VR) in S.C. and the deaf refuse to go back to ask for help because the VR counselors won't help the deaf in training for a future job and the VR wants most of the deaf to start working in the sweat workshop. I know many deaf people went to the Company to ask for a job and the company refers them to the VR and the VR counselors do nothing to help the deaf get that job. I think it is time for the VR to provide a better training for the deaf and others to get a better future job.

Many deaf peoples complained by talking among other deaf communities but they give up fighting the problems alone.

All I am asking you to help the deaf communities for better services. We have been denying services for too long. You are our last person or department I can refer to seek help.

I want to take some legal action than talking about these problems. Must get the South Carolina Assoc. of the Deaf, South Carolina Protective and Advocacy and the Community Resources Center and the Deaf communities together and see what can be done better to serve the deaf communities thruout whole S.C.

I wrote letters to all agencies and nothing had been done about these problems. I am going to give you the name of the agencies and their addresses.

Please let me know what you will do to help us.

I had lived in Virginia for a long time and the state provides the deaf communities good services. I can call TOLL FREE in Richmond to get an interpreter free. I feel if I live in America so why can't all the states in America have same services for the deaf..

Letter All
DATE:
NAME:
ADDRESS:
CITY/ZIP CODE:
Dear Sir:

We, the deaf communities in the northeastern part of S.C. would like to discuss some issues that need to be solved.

1. No Community Resources Center to provide services to the deaf in the northeastern part of S.C.

2. Vocational Rehabilitation won't train deaf people for the proper future job and help deaf people get a Post Office job.

3. No agency in the S.C. area to contact for an interpreter's services.

The northeastern part of S.C. like Florence, and Horry County as well other counties need a Community Resources Center like the one in South Carolina School for the Deaf & Blind in Spartanburg. They have been neglected the services to the deaf for too long. We prefer a BRAND NEW Community Resources Center rather than trying to join with another Services Center because the deaf people will not use that Services Center because of their personal reasons. We would like to have a BRAND NEW CENTER maybe located in Florence.

You can read the article that attached to this letter about Vocational Rehabilitation (Voc. Reh.) won't provide the proper training for future job and several deaf people went to Voc. Reh. to seek help to get a Post Office job and the Vocational Reh. counselor won't help them. Don't know why. Maybe the Florence, Myrtle Beach, Conway Post Office or elsewhere won't hire the deaf for some reasons. If deaf people are able to work the Post Office in Columbia, Greenville, and Orangeburg, then why can't the deaf people work the Post Office anywhere.

There is such a big problem in S.C. nationwide, you can't get an interpreter service anywhere. There should be an agency like Community Resources Center as Main Network, maybe located in the middle of S.C. to be able to have all the names of interpreters and their qualifications stored in computer and where the interpreters live. The Community Resources Center should seek grants or funds to have liability insurance for all interpreters and pay for the interpreter's fee and transportation expenses. They should pay interpreter good wages and benefits. MAJORITY of deaf people in S.C. can't afford to pay for interpreter's fee like $25.00 or more an hour plus transportation expenses. Of Course, we highly recommend South Carolina Association of the Deaf (S.C.A.D.) to be the overseer of this project. If I need an interpreter to see a doctor, I can call the Main Community Resources Center TOLL FREE and the Community Resources Center will look for an interpreter nearby where I live and contact one if I get an interpreter.

I highly recommend if I don't like what they offer of an interpreter, then I have the right for the Center to look for another interpreter. OR South Carolina Association of the Deaf (S.C.A.D.) can establish a Main Network Center with all the names and addresses of all interpreters thruout the S.C. area in the computer storage and S.C.A.D. will evaluate all the interpreters' qualifications and provide the deaf the
ILLEGIBLE
01-01773

fees and transportation expenses. This project will be overseen by S.C.A.D. but it will become independence. Or S.C.A.D. prefers the Community Resources Center to be responsible for the interpreter services. Fine with us.

These vital problems of services for the deaf have been ignored or neglected for too long. We are getting tired of running around like a dog chasing a cat and get nothing solved.

If any of you, the organization or the agencies won't pitch-in in solving these problems, then maybe we will take some legal action to get something done in someway. We will give you 60 days fair warning to come up with some answers. Please don't play games with our lives. Our life is so valuable to be neglected.

Thank you for taking the time to listen to this letter.

There will be a list of names signed below who want something be done.

Myrtle Beach, S.C. 29577
XX
SCSDB Community Service Center
Cedar Spring School for the Deaf
Spartanburg, S.C.
ATTN: Director
Dear Sir:

Let me explain the obstacles that the deaf community face in reality thruout the Horry, Florence and Sumter Counties as well as other counties. The S.C. School for the Deaf has Community Resources Centers in Spartanburg, Columbia and Charleston and has nothing in the northeastern part of S.C.

The deaf/hearing impaired can't get an interpreter for a doctor consulation or other services. Many deaf professional are frustrated in getting an interpreter for any situations. Most deaf people can't afford an interpreter. Most interpreters want to get paid well for their services. and I don't blame them.

I am getting tired of hearing the State is cutting back on the fund and no money for the services. Also I am getting fed up that S.C. Deaf Community Resources Centers in Spartanburg base the statistics or the measurement of how many times deaf person use the interpreter services then they will be able to establish Community Resources Center in Florence area. Don't you measure with my life, when it comes to be serious problem.

You know the American Disability Act passed in Congress not too long ago. You can't deny me the services like other areas.
Suppose I have a heart attack and the hospital couldn't find me an intepreter to communicate or don't know where to fine one. Then you better start thinking about this and it can be very serious matter. I am being denying for an interpreter service. I want the hospital to know there is a deaf client and need an interpreter, so they can contact the Community Resources Center in Florence to find an qualified interpreter close by.

Let me tell you something. Don't play with my life. If I can't get nothing out of you, then I will take this matter to S.C. Protective and Advocacy and if nothing happens there, then I will take this matter to the next step.

In Virginia, they have a Center in the middle of the state and they get money from the State to pay for the interpreters service and have a list of interpreters that live in different regions. If a deaf calls toll-free phone no. for an interpreter, then that Center will find one nearby where he lives. Also it depends on what case an interpreter can handle. Not all interpreters can handle court case.

I won't give up, I will fight til I get what I deserve. I can make a lot of noise too.

So I want you to get your sleeves roll up and act on this matter.

There are many interpreters in Florence, Conway and Myrtle Beach,

01-01775

up to help the deaf/hearing impaired in the community.

I am sure the Deaf community wants a Community Resources Center in Florence that sponsored by the SCSDB.

I will be hearing from you within a month.

Thank You

June 15, 1992

(b)(6)
Myrtle Beach, South Carolina 29577

Dear XX

I received your letter today dated June 10, 1992, which expressed your concerns with regard to employment by deaf individuals in the post office, particularly the Florence, Myrtle Beach and Conway Post Offices.

I certainly understand your feeling since the post office for many years has been an excellent place of employment, but there is some information that I would like to share with you that will perhaps clarify some of your concerns.

I have talked with several people in the personnel divisions of the post offices throughout the state concerning the hiring of deaf and hearing impaired. The post office officials explained to me that there is a nationwide "downsizing" of permanent employees with the United States Postal Service. What this means is that the post office is not hiring anyone, hearing or non-hearing, in "career" jobs at this time. Several years ago, the post offices throughout the country had 800,000 employees. They currently have approximately 700,000 and their goal by 1995 will be to eliminate another 200,000 jobs, reaching their employment ceiling at 500,000 employees.

What the post office is hiring are "casual" employees which are temporary employees who work for 90 days with no benefits included. Basically, this is manual labor and an individual can only receive two 90 day appointments during the course of a year, again with no insurance or vacation. The reason that the post office is eliminating jobs is because of automation which is assuming a lot of the duties that

people did. Therefore, if an individual is interested in being a "temporary" employee at the post office with no benefits, then he/she may apply through the personnel office or Vocational Rehabilitation will assist the client with an application.

I hope this information helps you realize that there are no permanent career positions being accepted currently by the United States Postal Service and that this is not a lack of effort on anyone's part, but a policy of the post office, according to post office officials. If I can be of any further service to you, please contact me directly.

Sincerely,

Larry M. Harrelson

Better Services Needed from Vocational Rehabilitation

By (b)(6)

We are getting tired of deaf/hearing impaired being shoving around by the Vocational Rehabilitation Dept. (VR) in Horry and Florence County as well as elsewhere in training for a job and helping deaf/hearing-impaired people get a job in the Post Office (P.O.) for a long time.

Asking help from the S.C.A.D. about the VR problems, they told us to write a complaint letter to the South Carolina Protection & Advocacy System. We are not accusing anyone in the SCAD but how the SCAD as an organization is set up like an information-referral center rather than getting involved to fight and help meet deaf's physical needs because SCAD is afraid to say something that might cause them to lose money from the state. Every SCAD member should make noise for all deaf communities thruout S.C. We would be better off joining the N.A.C.C.P. because they watch after their own people. Tell you the truth, most deaf people live way below proverty which is a sad situation.

If we complain to the South Carolina Protection and Advocacy System for the Handicapped, Inc. (SCPA), we wouldn't get anywhere. It is unfair for all handicapped people trying to improve the services for themselves. Even worse, deaf citizens are the least of handicapped people that would get aid or attention--the worst ignored group of all. We thought the VR is a place where you go to get help and training for a future job. You know where they usually send them? To a simple sweat job doing piece-work in their own VR "training" workshop or to a work-place with lousy position at low pay with no future in it.

Focusing on the Post Office job, several deaf, in Myrtle Beach and Florence, tried in vain to apply for any kinds of P.O. job. They even

went to the VR to seek help but nothing happened. Don't know why the VR counselors are not helping the deaf with the P.O. job in every city?

The impression came from deaf people when one deaf person get fired from the P.O. for any reason, then the P.O. would not hire any more deaf people. Don't the normal White, Black & Spanish people get fired from the P.O., too? Of Course!! Why penalize all good deaf people trying to seek any job in the P.O.?

It doesn't make any sense at all that it is okay for deaf people to work in the big P.O. cities like Columbia or Greenville and can't work in the small P.O. cities like Myrtle Beach or elsewhere.

The deaf, with an excellent driving record and production, will make a wonderful mail carrier or worker of any kind of P.O. career.

Hope everyone is listening to what we have to say now. Most deaf people, known as little people are afraid to say anything and they know you won't listen to them; thus, they have been neglected for years. So DO something NOW!

ATTN: Craig Jacobs, Director

Dear Sir:

We the deaf/hearing impaired would like to have a Deaf Community Resources Center located maybe in Florence to provide interpreter services thruout Florence, Horry and Sumter counties as well as other counties. Not only interpeter services but we also want other services that Community Resources Center in Spartanburg can provide.

We feel that Community Resources Center has neglected in providing assistances to the northeastern part of S.C. like Florence, Horry and Sumter counties.

We would like for you to talk with us as a deaf community in a group to discuss this matter.

There will be a list of deaf or hearing people's name listed below.

We only want a brand new Community Resources Center located maybe in Florence.

Thank you for your cooperation.

We don't want Day Service Center in Myrtle Beach, S.C.

Ms. Martha L. Mann
Special Legislative Counsel
Division of Legal Counsel
The City of New York
Law Department
100 Church Street
New York, New York 10007

Dear Ms. Mann:

This letter responds to your request for guidance concerning the application of title II of the Americans with Disabilities Act (ADA) to a proposed franchise for the installation and operation of public toilet facilities in the City of New York. It does not address any obligations that a private provider or operator of these toilet facilities may have under title III of the ADA.

By the end of this year, the Architectural and Transportation Barriers Compliance Board (Access Board) will issue proposed accessibility guidelines for newly constructed or altered facilities covered by title II of the ADA (Title II Accessibility Guidelines). Among other things, these proposed Guidelines will address scoping and technical standards for fixed public toilets on public streets. The title II regulation issued by the Department of Justice currently allows public entities to choose between the Uniform Federal Accessibility Standards (UFAS) and the ADA Accessibility Guidelines adopted in the Department's title III regulations (without the elevator exemption). When final Title II Accessibility Guidelines are issued, the Department of Justice will eliminate this choice and those Guidelines will be the sole standard for title II compliance. Neither of the current UFAS or ADAAG provisions for single user portable toilet units would appear to apply to your proposed fixed toilet facilities.

cc: Records, Chrono, Wodatch, Breen, FOIA, Friedlander
Udd:Breen:toilets.nyc

01-01781

The Access Board has announced its intention to provide a 90-day period for public comment on the proposed Title II Accessibility Guidelines. It also intends to hold public hearings at five locations throughout the country during the second half of the comment period. After analyzing the comments received, the Access Board will issue final Title II Accessibility Guidelines that will have legal effect once the Department of Justice issues an amendment incorporating the Guidelines into its title II regulation.

We believe that this title II rulemaking process will provide the appropriate forum for addressing the concerns raised in your letter. We invite and encourage you to participate fully in this process so that this important issue may be resolved in the fairest and most comprehensive manner possible.

Sincerely,

John L. Wodatch
Chief
Public Access Section

NEW YORK, N.Y. 10007

O. PETER SHERWOOD (212) 788-
Corporation Counsel

October 6, 1992

John Wodatch, Director
Office on the Americans with Disabilities Act
Civil Rights Division
U.S. Department of Justice
P.O. Box 66738
Washington, D.C. 20035-9998

Dear Mr. Wodatch:

We are writing to request guidance as to how the Americans with Disabilities Act (the "ADA") applies to a proposed franchise for public toilets that is under consideration in the City of New York.

On June 30, 1992, the City of New York commenced a four month pilot project for which three pairs of public toilets were installed at three designated sites in the City -- West 34th Street across from Macy's Department Store; Chambers Street at City Hall Park; and 125th Street in front of the Adam Clayton Powell Jr. State Building. The public toilets come in two models, one of which is accessible to persons who use wheelchairs, and were donated and installed by their French manufacturer, J.C. Decaux International. J.C. Decaux International is also servicing the units during the pilot project's duration.

After the pilot project is completed, the City of New York's Department of Transportation will make public a written evaluation of the pilot project. This evaluation will be considered for purposes of making a determination as to whether to proceed through the franchise process set forth in the New York City Charter for the permanent installation of pay toilets throughout the City of New York. It is with this anticipated franchise process in mind that we currently request the Department of Justice to comment upon the City of New York's obligations under the ADA.

As already noted, three pairs of public toilets manufactured and donated by J.C. Decaux International have been

installed for the pilot project. The smaller, kiosk-size units are self-cleaning and coin-operated. The larger, wheelchair accessible units are not self-cleaning, but are monitored by

attendants who clean the units after each use. Users can only gain access to the wheelchair accessible units with card keys that have been distributed free of charge to disabled persons by the City of New York. The card keys are distributed at sites near each wheelchair accessible facility during all hours that the facilities are in operation. The attendants at the three sites also have card keys on hand to assist users in gaining access.

For the pilot project, the City of New York used the two different types of Decaux units available because of public safety concerns triggered by the larger size of the wheelchair accessible models. Since more than one person can occupy the larger models, which contain 29.7 square feet of public room compared to the 8.5 square feet of public room contained in the kiosk-size models, the larger models might be used for criminal or other improper activities. In order to prevent abuse of the larger models, they are made accessible only to persons who have received card keys. These card keys have been distributed to individuals whose disabilities preclude them from using the kiosk-size models. Use of the card keys was also made necessary because J.C. Decaux indicated that it would not provide coin-operated wheelchair accessible models because of potential tort liability.

Thus far, the pilot project has proven to be enormously successful as well as popular with both residents and visitors. J.C. Decaux International has reported that the smaller, kiosk-size units are averaging 100 to 150 flushes per day whereas in Paris they only average 70 flushes. These statistics indicate that the units are meeting a substantial need in our community, and it is likely that the City of New York will want to proceed with a permanent installation.

Any franchise granted by the City of New York must comply with all applicable federal, state and local laws relating to accessibility for persons with disabilities. If during the solicitation process the City obtains a proposal for a single model toilet that would be accessible for use by all members of the population without posing risks to public safety or being susceptible to improper uses, that proposal, provided it met other requirements, would be awarded the franchise. However, in the event that we do not receive such a proposal, we are seeking guidance as to whether and how a franchise allowing for two models of public toilets could be implemented in a manner consistent with the ADA.

Our own analysis of the final rules implementing Titles II and III of the ADA leads us to analogies premised upon single user portable toilets and restrooms. The Title III regulations, which incorporate the final guidelines issued by the Architectural and Transportation Barriers Compliance Board

("ATBCB"), provide that "[f]or single user portable toilet ... units clustered at a single location, at least 5% but no less than one toilet unit ... complying with 4.22 or 4.23 shall be installed at each cluster whenever typical inaccessible units are provided." Americans with Disabilities Act Accessibility Guidelines for Buildings and Facilities ("ADAAG") 4.1.2(6). The ADAAG rules also provide that where less than six toilet stalls are provided in a common and public use toilet room, only one toilet stall is required to be accessible. 1

With respect to the final rules issued under Title II of the ADA, Section 35.151(c) establishes two standards for accessible new construction and alteration. Design, construction or alteration of facilities in conformance with either the ADAAG rules, discussed supra, or the Uniform Federal Accessibility Standards ("UFAS"), contained in Appendix A to 41 C.F.R. S101-19.6, is deemed to comply with the requirements of the section with respect to the particular facilities. 2

The UFAS rules contain specific provisions related to toilet rooms that are similar to the ADAAG rules. These rules state that toilet facilities required to be accessible must, inter alia, have doors that do not swing into the clear floor space required for any fixture. Appendix A 4.22.2. This and other applicable provisions are not mandatory for "single user portable toilets ... clustered at a single location," as to which "at least one toilet unit complying with 4.22 ... should be installed at each location whenever standard units are provided." Appendix A 4.1.1(6).

The ATBCB has announced its intention to issue Title II guidelines in the future. However, for the time being, either UFAS or ADAAG compliance presently satisfies the Title II requirements. Finally, the Title II rules also recognize that "[d]epartures from particular requirements of those standards by the use of other methods shall be permitted when it is clearly evident that equivalent access to the facility or part of the facility is thereby provided." Id. (emphasis added).

_____

1 ADAAG 4.22.4 and 4.23.4; see also Federal Register, Volume

56, No. 144, July 26, 1991 at page 35421. In response to the different needs of persons with mobility impairments, the final ADAAG guidelines also state that where six or more toilet stalls are provided, a 36 inch wide alternate stall with parallel grab bars will be provided in addition to the 60 inch wide standard stall. Id.

2 S35.151(c) The only limitation is that the elevator exemption contained in section 4.1.3(5) and 4.1.6(1)(j) of ADAAG shall not apply under Title II of the ADA. Id.

If the analogies to single user portable toilets and/or public restrooms are appropriate, the installation of accessible and smaller size units, if pursued for the permanent installation by a prospective franchisee, would appear to meet existing requirements under the ADA. Regardless of the appropriateness of these analogies, however, it is our view that safety concerns may still warrant a permanent installation of two different types of units. The final rules under Title III of the ADA recognize that "[a] public accommodation may impose legitimate safety requirements that are necessary for safe operation [provided] [s]afety requirements [are] based on actual risks and not on mere speculation, stereotypes, or generalizations about individuals with disabilities." S36.301(b). The City's concerns about the risks posed by the larger accessible models are not based on stereotypes or generalizations about individuals with disabilities. Rather, based on unfortunate past experience with public restrooms in subways and parks, the City is concerned that facilities larger than kiosk-size increase the risk of criminal and other improper activity, and threaten the safety of their users.

These safety concerns also support a system of limiting access to the larger, wheelchair accessible units to persons who have been issued card keys based on a determination that a disability prevents their use of the smaller facility. The card keys would be issued through government offices and organizations in the disability community, and it is also contemplated that they would be available at sites at or near the accessible units. By limiting access to those persons with disabilities who cannot patronize the kiosk-size units, the City hopes to ensure legitimate usage of the wheelchair accessible units and the safety and well-being of all the City's residents and visitors. 3

One question that neither the ADA nor its implementing regulations address is how close a kiosk-size unit and a wheelchair accessible unit would have to be to constitute a "cluster" of portable toilets or to fit within the analogy of

multiple stalls in a single public use toilet room. It is our belief that the two units could be placed within several blocks of one another and still fall within either of these analogies.

---

3 The report to be published by the City's Department of Transportation will evaluate the safety of the facilities used during the pilot project. However, the presence of attendants at the wheelchair accessible models during the pilot project may undermine the utility of the safety data collected. It will be difficult to predict, based on the experiences the City has had while attendants have been present, the extent to which accessible models that are self-cleaning and not watched by attendants might be abused.

The constraints of site selection in a geographic area as densely populated as the City of New York warrant a several block radius for placement of the two units. The City has many rules and regulations limiting placement of facilities on its streets for reasons including, but not limited to, provision of a clear path for pedestrians, freeing busy intersections and eliminating blockage of bus shelters and subway entrances. Sewer and water connections also place limitations on the siting of such units.

If the City of New York does not get a satisfactory proposal for a single model toilet unit, the City believes that it would be in compliance with the ADA and its implementing regulations if it awards a franchise for the permanent installation of two different models of toilets, one of which is accessible to persons who use wheelchairs. The City also believes that it would be in compliance with the ADA and its implementing regulations if it limited access to the larger units to those persons whose disabilities prevented them from using the kiosk-size facilities. The City of New York would ensure that all qualified persons could obtain card keys to gain access to the wheelchair accessible units through government offices and organizations in the disability community. It is also contemplated that the card keys would be available at sites at or near the wheelchair accessible units.

The City of New York asks for the Department of Justice's opinion on these matters. If the Department of Justice confirms that the use of two different units complies with the ADA, the City of New York also hereby seeks the Department of Justice's guidance with respect to the issues of (1) placement of the facilities, and (2) the permissibility of using special

security measures such as card keys to prevent abuse of the larger facilities.

We appreciate your assistance in this matter. If you would like further information, please call me at 212-788-1084, or Assistant Corporation Counsel Nancy Batterman, at 212-788-1104.

Sincerely yours,

Martha L. Mann
Special Legislative Counsel
Division of Legal Counsel

Control No. X92101515120

DEC 7 1992

AAG
JRD
DATE
The Honorable Phil Gramm
United States Senator
DAAG 2323 Bryan Street, #1500
BSD Dallas, Texas 75201

DATE Attn: Clarissa Clark

Dear Senator Gramm:

CHIEF
WODATCH This letter is in response to your inquiry on behalf of (b) (6) , who is concerned about the application of the
DATE Americans with Disabilities Act (ADA) to cruise ships, particularly those registered under foreign flags, that operate United States ports.

The ADA authorizes the Department to provide technical assistance to individuals and entities that have rights or

DATE responsibilities under the Act. This letter provides informal guidance to assist you in responding to XX . However, this technical assistance does not constitute a determination by
ORIGINATOR the Department of Justice of xx rights or
BLIZARD responsibilities under the ADA, and it is not binding on the Department.
DATE

Cruise ships may be subject to the requirements of both the Department of Justice and the Department of Transportation regulations implementing title III of the ADA. This Department's regulation implementing title III applies to private entities that own, operate, lease, or lease to a private entity whose operations fall within one or more of twelve specified categories. Among those categories are places of lodging, places that serve food or drink, places of public gathering, and places of recreation or entertainment. Because cruise ship operations fall within several of the listed categories, cruise ships are places of public accommodation, and would be subject to the Department of Justice title III regulation to the extent that the operators are subject to the laws of the United States.

cc: Records, Chrono, Wodatch, Breen, Blizard, FOIA, Library
udd:mercado:congressional.letters:blizard.gramm.(b)(6)
01-01788

As places of public accommodation, cruise ships must comply with the full range of title III requirements, which include nondiscriminatory eligibility criteria; reasonable modifications in policies, practices, and procedures; provision of auxiliary aids; and removal of barriers in existing facilities. However, a ship is not required to comply with a specific accessibility standard for new construction or alterations because no Federal standard for the construction of accessible ships has been developed.

Coverage of cruise ships is discussed in the preamble to section 36.104 of this Department's title III regulation (at page 35550) and in section III-5.3000 of the Title III Technical Assistance Manual. Copies of the regulation and the Technical Assistance Manual are enclosed for your information.
Under the regulation issued by the Department of Transportation, which was published in the Federal Register on September 4, 1991 (56 Fed. Reg. 45584), cruise ships are classified as "specified public transportation, "because they are operated by a private entity that is primarily engaged in the business of providing transportation. Entities operating forms of specified public transportation may not discriminate on the basis

of disability in providing transportation services.

The Department of Transportation has not yet established specific requirements applicable to cruise ships; however, that Department has stated that ships registered under foreign flags that operate in United States ports may be subject to United States regulations (which would include the title III regulation discussed above) unless there are specific treaty prohibitions that preclude enforcement. Additional information about the regulation issued by the Department of Transportation may be obtained from the Office of the General Counsel, U.S. Department of Transportation, 400 7th Street, S.W., Washington, D.C. 20590.

The ADA establishes two avenues for enforcement of the requirements of title III, private suits by individuals and suits by the Department of Justice in cases that involve a pattern or practice of discrimination or that raise an issue of general public importance. If (b)(6) believes that his rights under the ADA have been violated, he may file a lawsuit in a United States District Court, or he may request an investigation by the Department of Justice by writing to the Public Access Section, Civil Rights Division, U.S. Department of Justice, P.O. Box 66738, Washington, D.C. 20035-6738.

01-01789

I hope that this information is helpful to you in responding to (b)(6) xx.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

Dear Sirs:

My first enclosure is the text of a letter sent to my travel agent to be forwarded to the powers to be at the Carnival Cruise line headquarters. My second enclosure is a copy of the response to me from Carnival. I believe that the largest percentage of carnival business is drawn from United States of America and therefore they should be in compliance with the American Disabilities Act and not allowed to hide behind Liberian Registry.

We were told by a crew member during the cruise that nothing had been done bring that ship in compliance and they simply told the people whatever the thought we wanted to hear. Further that the Carnival ship "Celebration" had no intentions of ever bringing that ship into line with the Disabilities act.

I would appreciate your attention to this matter.
Sincerely,

Cruise Center
54k9 Fredericksburg Rd.
San Antonio, Texas 78229
c/o Ms. Marie Baxter

Dear Marie:

This letter is a follow up of our phone conversation about Carnival Cruise Lines cruise on the M.S. Celebration from June 20, 1992 to June 27, 1992. The list of complaints follows:

1. 6 1/2 " step into bathroom from the bed area.

2. Bath area not large enough to get a wheel chair, scooter or even a walker in.

3. No T. V. remote control --- T. V. on wall --- disabled could not reach controls.

4. The gangplank (not in Miami) in San Juan, St. Thomas, St. Maartin was about 22 inches wide. The wheelbase on adult disabled equipment is wider than that. St. Maartin was completely unavailable because of a long flight of steps.

5. Steps on each end of gangplank meant carrying person and chair and any other equipment.

6. Food in "Wheelhouse Bar and Grill " was horrible.

7. Room service was limited in variety.

8. Promenade unavailable without lifting patient and chair or scooter. a ramp would have made it more accessable.
(HANDWRITTEN) 202-76-0
9. The final "Midnight Buffet" was unaccessable to the disabled and not allowed to take food to the disabled out of the dining room..

All in all we found disabled facilities to be limited or non-existant and certainly not adequate for one disabled as was the indication when ticket were purchased. After lengthy conversations with other disabled passengers

we feel that this is a fair and accurate portrayel of the situation. In fact some of them experienced even worse problems than we did. Had XX been provided with more disabled facilities XX trip would have been a much more enjoyable experience. The total objective of this trip was a week of stress free relaxation since we had not been able to take a vacation in 3 years due to XX surgeries. Due to heavy lifting XX is also experiencing some strain in never before troubled joints.

The N.S. Celebration is not in compliance with United States law for the disabled and should be XX until they are in compliance. We realize the ship is a Liberian Registry but they are doing business in the United States and should XX.

.

We believe this to be a completely accurate appraisal and could go further disabled facilities needed. However, we are not the ones doing business and therefore will close on this note.

Sincerely,

(b)(6)

RE: Complaint Number 192-T2-00001

Dear XX

This letter responds to your complaint against the State of Oklahoma under title II of the Americans with Disabilities Act (ADA).

Your complaint alleges that the State of Oklahoma draws its jury selection lists from the lists of individuals who hold Oklahoma driver's licenses and of individuals who have volunteered for jury service. You claim that this method of jury selection excludes individuals with disabilities who are not able to drive, and thereby violates the ADA.

The Civil Rights Division has completed its investigation of your complaint. As detailed below, our investigation revealed that the jury lists used by the State of Oklahoma include individuals who have obtained non-driver identification cards issued by the Oklahoma Department of Public Safety, in addition to those with driver's licenses. State law also permits counties to include individuals who have volunteered for jury service. On that basis; we have concluded that the State's jury selection procedures do not violate title II of the ADA.

The procedures for the selection of jurors appear in 38 Okl. St. Ann. 18, which provides that jury selection pools include lists of individuals compiled by the Department of Public Safety and comprised of persons who:

1. reside in the county;
2. are 18 years or older; and
3. hold a current driver's license or a current identification license issued by the Department of Public Safety.

The Department of Public Safety issues and renews non-driver identification cards in the same manner as driver's licenses. The cards are available to any person over the age of 12,

including individuals with disabilities who do not drive. All persons holding such cards aged 18 and older will automatically be included on the jury selection list for their county of residence.

In addition to the names of individuals holding driver's licenses and non-driver identification cards, the statute provides that county jury selection lists may be supplemented by adding the names of residents aged 18 and over, who have completed a "Voluntary Jury Service" form available from the court clerk's office. This list can include individuals with disabilities who do not hold either a driver's license or non-driver identification card.

Based on the foregoing information, we have concluded that the procedures utilized by the State of Oklahoma for jury selection do not deny individuals with disabilities an equal opportunity to be selected as potential jurors. Therefore, the policy for selecting jurors in Oklahoma does not violate title II of the Americans with Disabilities Act.

This letter constitutes our letter of findings with respect to your allegations of discrimination in your administrative complaint. If you are dissatisfied with our determination, you may file a private complaint in the United States District Court under title II of the ADA.

Under the Freedom of Information Act. 5 U.S.C. S 522, we may be required to release this letter and other correspondence and records related to your complaint in response to a request from a third party. Should we receive such a request, we will

safeguard, to the extent permitted by the Freedom of Information Act and the Privacy Act, the release of information which could constitute an unwarranted invasion of your or another's privacy.

Sincerely,

Stewart B. Oneglia
Chief
Coordination and Review Section
Civil Rights Division

cc: Don Austin
Tulsa County Court Clerk

DEC 16 1992

The Honorable Arlen Specter
United States Senator
The Federal Building
Liberty Avenue and Grant Street
Pittsburgh, Pennsylvania 15222
Attn: Vernon Jackson

Dear Senator Specter:

This letter is in response to your inquiry on behalf of (b)(6)xx regarding his difficulty in locating a cellular phone that is compatible with a hearing aid.

The Americans with Disabilities Act ("ADA") authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist XX in understanding the ADA's requirements. However, it does not constitute a legal interpretation, and it is not binding on the Department.

Title III of the Americans with Disabilities Act prohibits discrimination on the basis of disability by public accommodations. Even if manufacturers of cellular phones were considered

places of public accommodations, the Act does not require a public accommodation to alter its inventory to include accessible or special goods that are designed for, or facilitate use by individuals with disabilities. Discussion of this issue appears in the enclosed title III regulation at section 36.307 on page 35,996. Further clarification can be found in the regulation's preamble, which states on page 35,571 that "the purpose of the ADA's public accommodations requirements is to ensure accessibility to the goods offered by a public accommodation, not to alter the nature or mix of goods that the public accommodation has typically provided."

cc: Records; Chrono; Wodatch; McDowney; Perley; FOIA; MAF.
:udd:perley:congressional.specter.phones

01-01796

Please note, however, if cellular phones compatible with hearing aids do become available, stores that sell cellular phones would be required to special order such phones if the store in the normal course of its operation, made special orders for unstocked goods.

I have enclosed a list of organizations that may be able to help (b)(6)xx in search for cellular phones that are compatible with hearing aids. Of these organizations, the American Speech-Language-Hearing Association would be the most likely source of information for XX

I hope this information is helpful in responding to your constituent.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

PHONE ANSWERS 24 HOURS A DAY
HOURS: DAILY, EVENINGS AND SATURDAY BY APPOINTMENT

(Handwritten)

Dear Senator Spector INSTRUCTIONS

A number of weeks ago I spoke to your assistant, Mr. Vernon Jackson about a

problem I am trying to resolve.
I am 60 years old, in an active eye practice
in Mt. Lebon, Pa. I have a severe Hearing
loss in 1 ear and no hearing in the other
ear. I wear, full time, a powerful
hearing aid in 1 ear. That is telephone
compatable (I/E Induction coil compatability).
In attempting to purchase a cellular
mobil telephone that would be Hearing
Aid compatable I have found that
all manufactures have, for some reason,
chosen to ignore this problem and
have no intention of doing so now
or in the future.
I believe legislation was enacted
recently (For Disabled people) that
addresses this issue Directly.
(ie the Disability Act)
Could your office direct me to the
appropriate federal agency to whom
I could direct my complaint and
possibly solve this situation for myself
and other seriously Hearing Impaired Citizens.
Cordially,

PS/Good luck in the
(b)(6) xx Election--We need you

DEC 17 1992

The Honorable Mel Levine
Member, U.S. House of Representatives
5250 West Century Boulevard
Suite 447
Los Angeles, California 90045

Attention: Joan Lerner

Dear Congressman Levine:

This letter is in response to your inquiry on behalf of (b)(6) xx , concerning the protections afforded by the Americans with Disabilities Act to persons with memory impairments.

The Americans with Disabilities Act of 1990 ("ADA") authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's requirements. However, it does not constitute a legal interpretation, and it is not binding on the Department.

The ADA defines "disability" to include any physical or mental impairment that substantially limits one or more of an individual's major life activities, such as walking, seeing, hearing, speaking, breathing, learning, working, or caring for oneself. The definition is a broad one, and includes persons with brain injuries if their injury substantially limits one or more of their major life activities. Accordingly, such a person would be entitled to all of the protections of the ADA, including its general prohibitions against discrimination by both public and private entities, and the requirement to make reasonable modifications in policies and procedures where necessary to provide equal opportunity.

Enclosed are the Department's Title II and Title III Technical Assistance Manuals and the Department's implementing regulations for further guidance. A discussion of the definition of disability may be found on pages 3-5 of the Title II Technical

cc: Records; Chrono; Wodatch; McDowney; Contois; FOIA; MAF.
:udd:contois:cgl:cgl.levine

01-01800

Assistance Manual and pages 8-10 of the Title III Technical Assistance Manual, and on pages 35,698-35,700 of the Title II regulation, and pages 35,548-35,550 of the Title III regulation. Both of the Technical Assistance Manuals and both of the regulations provide extended discussions of the ADA's general and

specific prohibitions of discrimination against persons with disabilities.

I hope this information is useful to you in responding to your constituent.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

October 16, 1992

Dear Mr. Wodatch:

I am faxing the following information and request to you on behalf of constituent XX , a head injury victim who has been in touch with this office for many years. I am sending material at his request XX has requested a letter from Bobby Silverstein at the Subcommittee on Disability Policy clarifying the ADA bill on three specific issues. Attached is the letter that Linda Hinton sent to XX . This letter was not helpful to (b)(6)xx and Bobby suggested that perhaps you would be the correct person to address his request. He would like to have a letter suitable to present to legal representatives or any agencies he may need to contact in the future for assistance with his memory impairment including the issue of telecommunication i.e. transcripts being made available at public forums etc. He has

included letters he received from legal advocates turning him down for assistance and letters he has written stating needs of the memory impaired. Bobby had assured him that his needs are included in the ADA and basically he wants something specific in lay man's language to point out to agencies that they must adhere to the ADA and assist him. Anything appropriate you can do for him would be greatly appreciated. Thank you so much for taking time out from your busy schedule to consider this request.

Marina Del Ray, CA 90295

Dear XX ,

Enclosed is a copy of the section of S. 3065, the Rehabilitation Act Amendments of 1992, relating to the Protection and Advocacy of Individual Rights. I have also included the report language that explains the rationale for the changes that are made by this legislation.

S. 3065 addresses the concern that there are individuals with disabilities who are not served by the current protection and advocacy system. In addition, S. 3065 reiterates the principles of the Americans with Disabilities Act in the findings, purpose, and policy section of the bill. A copy of this section is also enclosed. This section specifically addresses your concern that materials be accessible to persons with disabilities. The values expressed in this section are repeated throughout S. 3065.

I hope this information is helpful to you. We are currently in the process of working out the differences between the House and Senate versions of the bill so that the reauthorization can be passed before Congress adjourns.

Sincerely,

Linda Hinton
Legislative Assistant

December 20, 1990

Rep. Mel Levine
2443 Rayburn HOB
Washington, D.C. 20515

Dear Congressman Levine,

I am writing to you as a constituent with a mental impairment. I suffered a brain injury as the result of a violent crime 5 years ago. I am writing for myself and many others who suffer the frustration of day to day life with this type of disability.

I am urging you to contact the committee which will implement the Americans with Disabilities Act to inform them of our special needs. Mental impairment is only mentioned one time in the ADA in section 3(2)A. Our needs must be addressed in all public arenas where accommodations are required for the other disabled, hearing impaired, blind and those with ambulatory needs.

There are three major areas of concern: public forum, education and legal assistance. Written transcripts should be made available in a timely manner (one week or less). In addition audio tapes should made available at the end of each day forum.

In Title II, Section 201,202 Qualified individual with a disability is defined and it is stated that "no qualified individual with a disability shall by reason of such disability, be excluded from participation in or be denied the benefits of the services programs or activities of a public entity, or be subjected to discrimination by any such entity. This definition provides that no "barrier" shall deter these individuals from their rights. Tapes and transcripts are remedies for the barriers of the memory impaired. A liaison should be available at all public functions to assist the needs of people with my

disability.

In Title III, section 302(A,B,C,D) Integrated Settings: Opportunity to participate and Administrative methods

01-01804

DEC 21 1992

The Honorable Dan Glickman
Member, U.S. House of Representatives
401 N. Market Street
Room 134
Wichita, Kansas 67202

Attention: Janet Anderson

Dear Congressman Glickman:

This letter is in response to your inquiry on behalf of Reverend Roy Nelson, concerning the compliance obligations of churches under the Americans with Disabilities Act.

The Americans with Disabilities Act of 1990 ("ADA") authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's requirements. However, it does not constitute a legal interpretation, and it is not binding on the Department.

Section 307 of the ADA specifically provides that religious organizations and entities controlled by religious organizations are not subject to title III of the ADA. Thus, the 10th Avenue United Methodist Church is not required to provide an elevator, and if it does provide an elevator, the elevator is not required to comply with the ADA Accessibility Guidelines. However, any nonreligious entities that are places of public accommodation and that lease space to conduct activities in the church facilities would have to comply with ADA requirements. Enclosed are the Department's Title III Technical Assistance Manual and the Department's implementing regulation for further guidance. A

discussion of the religious exemption may be found on pages 4-5 of the Technical Assistance Manual and page 35,554 of the regulation.

cc: Records, Chrono, Wodatch, Contois, MaDowney, FOIA, MAF
udd:Contois:CGL.Glickman

01-01805

Please note that although religious organizations are exempt from the facilities requirements of title III, they are not exempt from the title I requirements for employment. Information about title I can be obtained by writing to the Equal Employment Opportunity Commission, 1801 L Street, N.W., Washington, D.C. 20501.

For information regarding voluntary measures by religious organizations to improve access for persons with disabilities, you may wish to direct Mr. Nelson's attention to a handbook published by the National Organization on Disability entitled "That All May Worship: An Interfaith Welcome to People with Disabilities." A copy of the handbook can be obtained by writing to the National Organization on Disability, Religion and Disability Program, 910 16th Street N.W., Suite 600, Washington, D.C. 20006.

I hope this information is useful to you in responding to your constituent.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

Dear John:

I am writing this letter in regard to a request for assistance from Roy Nelson, Pastor of the 10th Avenue United Methodist Church in Hutchinson, Kansas.

Rev. Nelson would like information regarding the ADA requirements for churches. He wants to know if there is a timeline in which churches will be required to comply with the ADA guidelines in regard to elevators. If so, if a church already has an elevator, what will be required to comply with the guidelines? If a new elevator is to be installed, what is required? I would greatly appreciate any information you could share with me regarding Rev. Nelson's concerns. If you have questions or desire additional information, please feel free to contact Janet Anderson in my Wichita office as she is assisting me in this matter.

Dear Mr. Murphy:

This letter is in response to your request for information concerning the responsibilities of theatres under the Americans with Disabilities Act (ADA).

Enclosed is our Department of Justice regulation promulgated under title III of the ADA, which applies to places of public accommodation and commercial facilities. Theatres, as places of public accommodation, must comply with all of the relevant

requirements in this regulation.

The title III requirements for wheelchair locations and auxiliary aids in existing theatres may be found in sections 36.308 and 36.303 of the enclosed regulation, pages 35598 and 35597, respectively. In addition, section 4.33 of the ADA Accessibility Guidelines, which begins on page 35662 of the enclosed regulation, contains the requirements for wheelchair locations and assistive listening systems in newly constructed or altered theatres.

I have also enclosed our Title III Technical Assistance Manual, which explains the regulation and provides examples. If after you review this information you have specific questions, you may call our information line on weekdays between 1:00 p.m. and 5:00 p.m. at (202) 514-0301 (voice) or (202) 514-0838 (TDD).

The Honorable Harris Wofford
United States Senator
9456 Federal Building
600 Arch Street
Philadelphia, Pennsylvania 19106

Attention: Allen Wolinsky

Dear Senator Wofford:

This letter responds to your inquiry on behalf of XX (b)(6)xx concerning the installation of a ramp and accessible parking at the Cedarhook Hill Apartments and an adjacent building that contains a doctor's office in Wyncote, Pennsylvania.

The Americans with Disabilities Act ("ADA") authorizes this Department to provide technical assistance to individuals and entities that have rights or responsibilities under the ADA. Therefore, this letter provides informal guidance to assist you in responding to XX . However, this technical assistance does not constitute a legal interpretation and it is not binding on the Department of Justice.

Under title III of the ADA, strictly residential facilities are expressly exempt from ADA coverage, unless they also include one of the 12 categories of places of public accommodation (see pages 35551 and 35594 of the enclosed title III rule). If a residential facility includes a social service center, for example, the facility would be considered a place of public accommodation.

Places of public accommodation, including doctors' offices and other health care facilities, are required to remove architectural barriers to access by individuals with disabilities in existing facilities where such removal is readily achievable. Example of steps to remove barriers include the installation of ramps and the relocation of designated accessible parking spaces. For a fuller discussion of this issue, please refer to section 36.304 of the enclosed title III regulation and pages 28-39 of the enclosed Title III Technical Assistance Manual.

DEC 23 1992

The Honorable Tom Harkin
United States Senate
531 Senate Hart Building
Washington, D.C. 20510-6025

Dear Senator Harkin:

This letter is in response to your inquiry on behalf of Richard J. Lewis, who expressed concern about several statements made at a seminar by Thomas Youngblood, a representative of the American Hotel and Motel Association, concerning the provision auxiliary aids by places of lodging under the Americans with Disabilities Act (ADA).

Mr. Lewis has separately addressed his concerns to this Department. A copy of the Department's response to Mr. Lewis is attached. As we advised him, the American Hotel and Motel Association received a grant from this Department to develop technical assistance materials under the ADA. However, the presentation by Mr. Youngblood at the seminar was not a grant-sponsored event, and, accordingly, we had no occasion to review his remarks.

Our letter also set forth the ADA requirements for hotels and motels to provide auxiliary aids and services for persons who are deaf or hearing impaired. Finally, we provided information about our complaint processing procedures and confirmed our strong commitment to enforcement of the ADA.

I hope this information will be useful to you in responding to Mr. Lewis.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

01-01815

DEC 23 1992

Richard J. Lewis
Language Seminars, Inc.
13614 N.W. 14th Place
Vancouver, Washington 98685

Dear Mr. Lewis:

This letter is in response to your inquiry about the Americans With Disabilities Act (ADA). Your letter expresses concern about the correctness of several statements about auxiliary aids made at a recent ADA seminar in Oregon by Tom Youngblood, a representative of the American Hotel and Motel Association.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation or legal advice, and it is not binding on the Department.

As you know, the American Hotel and Motel Association received a grant from the Department of Justice to develop technical assistance materials to assist hotel and motel operators in understanding their obligations under the ADA. The written materials produced pursuant to the grant were carefully reviewed by the Department. However, Mr. Youngblood's presentation at the Oregon seminar was not a grant-sponsored activity and, accordingly, we had no occasion to review his remarks.

The ADA requires several types of communication aids for persons who are deaf or hard of hearing in places of transient lodging. The standards for new construction and alteration of these facilities can be found in section 9.1.3 of the Accessibility Guidelines, which are appended to the Department's title III regulation (copy enclosed), which requires a percentage of sleeping rooms to be equipped with visual alarms, notification devices, telephones with volume control, and accessible outlets for telecommunication devices for person who are deaf (TDD's). Section 36.303 of the title III regulation requires that hotels

cc: Records, Chrono, Wodatch, McDowney, Novich, Friedlander,
FOIA
Udd:Novich:policy:PL.375

provide closed-caption decoders and TDD's on request to persons with hearing impairments, and that the hotel have a TDD at the front desk for communication with rooms lodging persons who are using a TDD.

In addition to communication aids in sleeping rooms, the Accessibility Guidelines, at sections 4.1.3(17)(b) and (c), contain requirements for public phone banks in lobbies and other public areas. Finally, enclosed is a copy of this Department's title III Technical Assistance Manual, which addresses auxiliary aids at pages 25-29 and 54.

The Department of Justice has received and is investigating over 700 complaints under title III of the ADA. A number of the complaints concern hotels and motels and allege failure to provide auxiliary aids for patrons who are deaf or hearing impaired. When possible in our investigations, we attempt to negotiate a resolution of the complaints short of litigation. In the case of a number of complaints relating to hotels and motels, we have been successful in obtaining commitments to purchase and install various auxiliary aids as required under the ADA. Our files on these complaints will not be closed until we are satisfied that the entities have followed through with their commitments.

I hope this information is responsive to your inquiry.

Sincerely,

John L. Wodatch
Chief
Public Access Section

October 22, 1992

Ms. Joan Magagna
Asst. Director, Civil Rights Division
OFFICE OF AMERICANS WITH DISABILITIES ACT
Department of Justice.
P.O. Box 66738
Washington, D.C. 20035-9998

Dear Ms. Magagna:

This letter is in reference to a speech made at the Oregon Lodging Association annual convention by Mr. Tom Youngblood, on October 20, 1992. You may recall that my business partner, Mr. Dominick Faraca, discussed our concerns with you by telephone yesterday. We have differing views with Mr. Youngblood regarding interpretation of the ADA law. It is these differing views that we wish to discuss with you and your department.

First of all, let me explain what our company is all about. One of our areas of expertise is providing assistive listening devices for the hearing impaired. We also teach deaf awareness seminars to various businesses, in an attempt to show businesses how to effectively communicate with the hearing impaired/deaf employee. We teach sign language courses to hospitals, police organizations, and others that have expressed concerns regarding effective communication with the hearing impaired/deaf population. We teach a college course in deaf awareness. Deaf awareness is our only business and we feel that we are very professional at what we do.

It is in the context of our assistive listening devices that we met Mr. Tom Youngblood. We had a booth at the Oregon Lodging Association convention in which we displayed our array of assistive listening devices for the hearing impaired. (I enclose a brochure on our products for your perusal). Mr. Youngblood came by our booth and introduced himself to us. He explained to us that he was to be the guest speaker the next day and would be giving his views on the ADA law. In previewing with Tom some of the topics that he was going to discuss, we realized that there were some differences between how he interpreted the ADA law and how

we interpreted it. As our conversation with Tom continued, it became very apparent that he was going to espouse some interpretations of the ADA law that were contrary to ours. He invited us to come to his lecture, but admonished us to not ask questions as he did not want "to provide a forum for marketing our products".

COMMUNICATION WITH THE DEAF IS GOOD BUSINESS
1-800-322-KAYE

01-01819

During Tom's speech he said the following things that we strongly question.

1. THE ADA LAW HAS VERY LITTLE TEETH. THE CHANCE OF HAVING A FINE LEVIED IS NEXT TO ZERO. THE WORST THAT COULD HAPPEN WOULD BE THAT A CITIZEN MAY SUE THE HOTEL AND THAT THE ONLY PENALTY TO THE HOTEL WOULD BE THAT THE HOTEL WOULD HAVE TO COMPLY WITH WHATEVER IT WAS THAT WAS IN DISPUTE. IN ADDITION, THE CITIZEN MAY OR MAY NOT BE AWARDED ATTORNEYS FEES.

   IN ADDITION, SHOULD THE DEPARTMENT OF JUSTICE GET INVOLVED, THE WORST THAT WOULD HAPPEN IS THAT THE HOTEL "MAY" GET A LETTER AND A SLAP ON THE WRIST. THE CHANCES OF THE "DOJ" LEVYING ANY FINES ARE ABOUT ZERO.

   MR. YOUNGBLOODS COMMENT WAS, QUOTE, "DON'T WORRY ABOUT THE TERMS OF THE ADA LAW, AND LET YOUR HEART BE YOUR GUIDE". End quote. (I submit to you, Ms. Magagna, that if it were left to people to settle these matters with their "hearts" that there would have been no necessity for the ADA legislation.)

2. THE ONLY ASSISTIVE LISTENING DEVICES REQUIRED BY ADA ARE TWO TDD TELEPHONES, AND ONE CLOSED CAPTION TELEVISION DECODER PER HOTEL LOCATION. (On pages 30 & 31, in Mr. Youngbloods own handbook on ADA, are listed text telephones, closed caption TV decoders, visual alarm smoke detectors, visual door knock alerting devices, and visual devices available or in-place so that guests with hearing disabilities are afforded the effective communication services and benefits equal to those provided to other guests.) THESE PAGES ARE IN DIRECT CONFLICT WITH TOM'S SPEECH. WHEN WE ASKED TOM TO EXPLAIN THIS DISCREPANCY, HIS RESPONSE WAS THAT "YOU GUYS ARE JUST ASKING THIS QUESTION BECAUSE YOU WANT TO SELL MORE EQUIPMENT", AND ENDED HIS LECTURE ON THAT POINT.

COMMUNICATION WITH THE DEAF IS GOOD BUSINESS

SEMINARS, INC.

3. THERE HAS YET TO BE A SINGLE COMPLAINT FILED UNDER TITLE III OF ADA. FURTHER, THERE HAVE ONLY BEEN A HAND FULL OF COMPLAINTS FILED UNDER TITLE I. DON'T WORRY FOLKS, NOT MUCH CHANCE OF GETTING CAUGHT.

4. THERE ARE NO REGULATIONS WITH REFERENCE TO THE NUMBER OF ROOMS IN AN EXISTING HOTEL THAT MUST BE EQUIPPED WITH ASSISTIVE LISTENING DEVICES. (I refer you to the chart on page 54 of his own book, in which definite numbers of rooms are stated. Further, on page 59 of his book, there is a check-list for rooms for guests with hearing disabil-ities. This check list refers directly to auxiliary devices, that Tom said aren't provided for under the ADA law.)

It is not my intention, Ms. Magagna, to make an example or cause any "heat" for Mr. Tom Youngblood, or anyone else. Tom just happens to have been the one that was purporting to hotel owners and managers in my State that what he had to say was in fact the law. I am merely trying to get at what this ADA legislation is all about. Does the law have "teeth"? Have there been any complaints filed with DOJ under Title III? If so, to what end. Is it extremely unlikely that a non-complier will ever be subject to enforcement? Are there regulations for the number of assistive listening devices to be provided in a hotel, or are they not? We have been in this business for a long time, and I like to think that we have a reputation for honesty and professionalism. We have a long list of clients that spread nationwide, and we are proud of that. We do not wish to misrepresent any provision that is contained in the ADA law. However, as you can see, we are somewhat in a quandary having heard Mr. Youngbloods version of the law. We are extremely uncomfortable, as advocates for the deaf, with the idea of letting companies determine compliance with the ADA law with their "hearts".

COMMUNICATION WITH THE DEAF IS GOOD BUSINESS
1-800-322-KAYE

13614 N.W. 14th Place * ILLEGIBLE

01-01821

It is my hope that you will give this letter careful consideration. We are seeking guidance from your office as to how this ADA legislation should be interpreted with regard to our business. I feel that we have been operating under the correct interpretation of the law. That feeling has now been challenged by Mr. Tom Youngblood. So, again, we seek your guidance.

One more thing. Prior to his lecture, Mr. Youngblood handed out a booklet entitled "Accommodating All Guests", by John Salmen, made possible by a grant from the US Department of Justice, Civil Rights Division. We feel that this book is correct in its interpretation of ADA. What we do not understand is how the person that handed out the book could differ so widely with its views. I hope that Mr. Youngblood's wages are not subsidized by a grant. Are they?

Thank you, Ms. Magagna, for your attention. I look forward to your reply.

Sincerely,

Richard J. Lewis
Vice President/Mktng.

RE: Complaint Number XX

Dear Ms. XX

This letter responds to the complaint you filed against the California State Department of Corporations, alleging discrimination on the basis of disability. Your complaint was forwarded to us by the U.S. Department of Health and Human Services, Office for Civil Rights, because the Department of Justice is the agency responsible under title II of the Americans with Disabilities Act of 1990 (ADA) for investigating this complaint.

Your complaint alleges that the California Health and Safety Code discriminates against individuals with mental impairments by failing to require health insurance plans to continue coverage of dependent children with mental impairments, other than mental retardation, beyond the limiting age for dependent children specified in the policy, while requiring such continued coverage for children with mental retardation or physical handicaps. The Civil Rights Division has completed its review of this issue and has determined that the California State Department of Corporations is not in violation of title II of the ADA for the reasons explained below.

Title II prohibits public entities from enforcing regulatory requirements that would require private entities to discriminate against individuals with disabilities. However, title II generally permits State and local governments to provide benefits to certain classes of individuals with disabilities that they do not provide to individuals with different disabilities. 28 C.F.R. 35.130(c). Where a benefit is limited to a particular class of individuals with particular types of

disabilities (here, those with mental retardation and physical disabilities), discrimination is determined by comparing the treatment of all individuals with disabilities to the treatment provided to similarly situated individuals without disabilities.

cc: Records CRS Friedlander Keenan Kaltenborn djh
udd:Keenan. XX .LOF
01-01823

In this case, adult children without disabilities are not eligible for continued coverage under their parents' health insurance policies. In addition, adult children with mental impairments other than mental retardation are also ineligible for continued coverage. Therefore, the situation you have raised does not constitute discrimination under the Americans with Disabilities Act.

Please be advised that your right to file a complaint is protected by Federal law. A State or local government may not intimidate, threaten, coerce, or engage in other discriminatory conduct against anyone who has either taken action or participated in an action to secure rights protected by the ADA. If at any time you feel you are being harassed or intimidated because of your dealings with the Department of Justice, we urge you to let us know immediately. This office would investigate such a complaint if the situation warrants.

Under the Freedom of Information Act, it may be necessary to release this document and related correspondence and records upon request. In the event that we receive such a request, we will seek to protect, to the extent provided by law, personal information which, if released, could constitute an unwarranted invasion of privacy.

This letter constitutes our letter of findings with respect to your allegations of discrimination in your administrative complaint. If you are dissatisfied with our determination, you may file a private complaint in the United States District Court.

Sincerely,

Stewart B. Oneglia

JAN 12 1993

XX
XX
XX

Dear Mrs. XX

This letter is in response to an inquiry on your behalf from Ms. Kathleen F. Rush about the requirements of the Americans with Disabilities Act ("ADA") for gasoline stations.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation or legal advice, and it is not binding on the Department of Justice.

Title III of the ADA and its implementing regulation include provisions relating to accessibility of privately owned or operated places of public accommodation, including gasoline stations. I have enclosed copies of the Department of Justice's title III implementing regulation, 28 C.F.R. Part 36, and a copy of the Department's Title III Technical Assistance Manual. The requirements for removing architectural barriers or providing alternative access are set out in sections 36.304 and 36.305 of the title III regulation, at pages 35,597 and 35,598 of the Federal Register, and are explained in the Technical Assistance Manual at pages 28-34 and 37-38. Please note especially Illustration 3 at the top of page 38, and Illustration 1 in the middle of that page, both of which deal specifically with self-service gasoline stations. Finally, you may also find useful some additional explanatory material regarding alternatives to

barrier removal in the Preamble to the title III regulation, at page 35,570 of the title III regulation.

cc: Records, Chrono, Wodatch, Bowen, McDowney, Contois, MAF, FOIA
Udd:Contois:policyletters:rush

01-01825

I hope this information is useful to you in understanding the requirements of the ADA.

Sincerely,

John L. Wodatch
Chief
Public Access Section

Washington, D.C. 20530

Dear Mr. Barr:

Re: Gasoline Station Accessibility

I am writing on behalf of a resident of the Village of Woodridge who cannot pump her own gasoline. Please provide any information available which you may have regarding the gas stations' ability to require premium payment for full service. Who would regulate the premium? Are gas stations required to provide services without a premium service charge?

Please direct your response to XX XX , with a copy to my attention, 1900 West 75th Street, Woodridge, IL 60517. Thank you.

Very truly yours,

VILLAGE OF WOODRIDGE

c: ADA File
Tickler File: 1/15/93

01-01827

JAN 12 1993

The Honorable Mark O. Hatfield
United States Senator
Special Districts Center
727 Center Street, N.E.
Suite 305
Salem, Oregon 97301

Dear Senator Hatfield:

This letter is in response to your inquiry on behalf of XX regarding the effects of the Americans with Disabilities Act (ADA) on small organizations. Specifically, XX XX stated his concern that implementation of the Act had forced the discontinuance of guided tours at the XX XX .

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities with rights or obligations under the Act. This letter provides informal guidance to assist you in answering XX inquiry. However, this technical assistance does not constitute a legal interpretation of the statute, and it is not binding on the Department.

Title III of the ADA requires existing public accommodations, like the gallery at the XX to remove barriers to access by individuals with disabilities, including those who use wheelchairs, to the extent that it is readily achievable to do so. Such barrier removal may include installation of ramps or wheelchair lifts. In situations where barrier removal is not readily achievable, an entity must make its goods and services available through alternative methods. With regard to the provision of public tours of facilities like the XX , if barrier removal is not readily achievable, an acceptable alternative may include a presentation by a tour guide using photographs or videotape of the areas observed during the tour.

Senator Mark Hatfield
711 Hart
Senate Office Building
Washington, D.C. 20510

Dear Senator Hatfield,

For the past twenty years I had the pleasure of escorting visiting friends and relatives from the more eastern parts of the United States through the XX local sawmill. They have built a fine gallery and stairway so that visitors can look down on the mill floor and see the whole operation. They do not have a guide service, but allow visitors to conduct themselves at their own leisure. I am personally acquainted with the owner of the mill and many of his old time employees.

Just this week I was informed that they can no longer allow visitors to enter the mill due to a federal anti-discrimination law that in affect says that they cannot allow visitors unless they modify the mill at their expense so that visitors in wheel chairs can visit any place in the mill that other visitors are allowed. The XX people were very apologetic, but felt that they could not justify rhis expense.

As we left I personally felt that I, as a member of the majority had been discriminated against by a minority. I certainly cannot find fault with the XX people since they were very generous in building the stairway and gallery for the visitors benefit.

I feel so affected by that I thought that I should write to you about this. Perhaps this is a mis-interpretation of the law. Perhaps it is a mis-application of the intentions of the law.

I don't know if there is anything that you can do about this, but I thought that it is something that you should be aware of.

Thanks for your consideration.

XX

JAN 13 1993

The Honorable Larry E. Craig
United States Senate
302 Hart Senate Office Building
Washington, D. C. 20510

Attention: Nicole L. Gaul

Dear Senator Craig:

This is in response to your inquiry on behalf of Dr. J. Roger Curran concerning applicability of the Americans with Disabilities Act to the Federal government.

The Americans with Disabilities Act, which became effective on January 26, 1992, does not cover the executive branch of the Federal government, primarily because an earlier law, the Rehabilitation Act of 1973, prohibits discrimination on the basis of disability in employment and in programs and activities conducted by Federal executive agencies. The Architectural Barriers Act of 1968 also imposes accessibility requirements for buildings and facilities constructed or leased by the United States. The United States Congress and agencies of the legislative branch are, however, covered by section 509 of the Americans with Disabilities Act.

I hope this information is helpful in responding to your constituent.

Sincerely,

John R. Dunne

The Honorable E. Clay Shaw
U. S. House of Representatives
2338 Rayburn Building
Washington, D.C. 20515-0915

Dear Congressman Shaw:

This letter responds to your inquiry on behalf of Mr. John Hume of Coral Springs, Florida, concerning a "notice of noncompliance" issued by a group describing itself as "Americans with Disabilities Act Specialists, Inc."

The Americans with Disabilities Act gives the Attorney General the authority to investigate complaints under the Act and to initiate litigation in cases involving a pattern of discrimination or raising issues of general public importance. The Act gives no legal effect to notices made by private individuals or groups.

It is unclear whether this notice was transmitted through the United States Postal Service. If it was, there is the possibility that postal fraud is involved. In that regard, your constituent may wish to contact the Postal Service, as follows: Mr. Al Holmes, Branch Manager, Fraud and Prohibited Mailings Branch, United States Postal Service, 475 L'Enfant Plaza West, S.W., Washington, D.C. 20260-2166.

Your constituent may also wish to contact the Council of Better Business Bureaus Foundation, at 703-247-3655, or his local Better Business Bureau. The Council of Better Business Bureaus is coordinating the investigation of complaints about questionable business practices relating to the Americans with Disabilities Act, and publicizing the results of its investigations.

Urgent: Notice of Non-Compliance

We have been notified that your facilities are not in compliance with title III of the "Americans With Disabilities Act" (ADA). The ADA is equal rights legislation that has been in effect since January 26, 1992. This means that you should have taken action by now. Failure to comply with the ADA can result in violations of up to $100,000.00. Such violations are levied by the Department of Justice (DOJ) and they act on behalf of the 1 in twelve Americans with some form of disability.

Advocacy groups for the disabled report violators to us before contacting the DOJ so that an evaluation may be performed and unwarranted civil suits may be avoided. We inform these groups of your efforts toward compliance. If you have already taken steps, inform us promptly so that your file may be updated.

Dear Senator DeConcini,

It is our understanding that your office may be of assistance in determining our legal obligations to the visually impaired.

We are a computer software developer in Scottsdale with eighteen employees. We produce a text conversion utility called Word For Word. The text conversion filters that we develop are supplied on diskette and are accompanied by a printed user manual.

Recently we have been repeatedly contacted by XX
XX has angrily demanded that we provide our now printed user manual in diskette form, in compliance with "recent legislation". He is also threatening legal action if we do not provide this service immediately. There has been no prior demand for this, and before undertaking such an expense, we would like more information.

What legal obligations, if any, do we have as a product manufacturer under the mandates of the Americans With Disabilities Act and related legislation. Any information you are able to provide will be greatly appreciated. We would also like to forward any available material to XX

Thank you very much for your assistance in this matter.

Respectfully,

Susan Taylor

RML/R
01-01841

JAN 15 1993

W. Yates Trotter, M.D.
The Internal Medicine Group, Ltd.
National Avenue Medical Building
1900 S. National Avenue
Suite 2200
Springfield, Missouri 65804-2275

Dear Dr. Trotter:

This letter is in response to your inquiry concerning the responsibilities of medical offices under the Americans with Disabilities Act of 1990 (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

Title III of the ADA requires public accommodations, including medical offices, to ensure effective communication with persons with disabilities. To ensure effective communication, a medical office may be required to provide auxiliary aids to an individual with a disability.

Medical offices must provide the above auxiliary aids or services to persons with disabilities, if such an auxiliary aid or service is necessary for effective communication, unless doing so would constitute a fundamental alteration of the service or an undue burden to the public accommodation. In cases involving medical treatment, writing and notetaking may provide effective communication in routine situations, but a qualified interpreter or other auxiliary aid may be necessary in others to allow for informed treatment recommendations and decisions. While the ultimate choice of the means of communication rests with the physician the regulation strongly encourages a doctor to consult with a patient before providing a particular aid or service, to

cc: Records; Chrono; Wodatch; McDowney; Novich; FOIA; MAF.
:udd:novich:hancock

01-01842

determine the most appropriate way to ensure that communications are in fact effective. The medical office may be held liable for an ADA violation if the communication is not effective for that person with a disability. A medical office may require reasonable prior notice of the need for an auxiliary aid or service, depending, among other things, on the exigency of the treatment.

Further discussion of provision of auxiliary aids and services appears in section 36.303 of the enclosed title III regulation, at page 35597, and in the preamble discussion of that section, at pages 35566-68. Further explanation appears at pages 25-27 of the enclosed Title III Technical Assistance Manual. Please also consult the definition of "qualified interpreter" in section 36.104 of the regulation, at page 35594, and in the preamble discussion at page 35553.

I hope this information is helpful to you in responding to your constituent.

Sincerely,

John L. Wodatch

September 25, 1992

Melton D. Hancock
318 Cannon House Office Building
Washington, D.C. 20515

Dear Representative Hancock:

I am writing you in regard to the recent Federal Disability Act. You will see a copy of a bill sent to me by an interpreter service related to a deaf mute patient, XX I took care of XX (b)(6) for eight or ten years without the benefit of an interpreter. When XX was recently in the hospital with a perforated bowel it was necessary to have an interpreter because matters were very complex. Recently XX had shown up with an interpreter and I am being billed $50.00 for a 15-20 minute office call, whereas my charges to the patient are $39.00. My attorneys tell me that if I refuse to see the patient or attempt to get other reimbursement that I am subject to federal penalty. Obviously this is a flaw in the bill which should be corrected, as in the long term it will have a negative rather than a positive effect on disabled people. My only recourse at present is to refuse to have the interpreter unless I have prearranged some payment agreement ahead of time. As you will note in my reply, I am paying the bill simply to avoid trouble which such a bureaucratic entanglement could bring about.

Incidentally, I would very much appreciate your supporting the movement to make English the official language of the United States. If this is not done we will have the same problem with all sorts of nationalities including Turks, Vietnamese, Japanese, et cetera, who might appear in our office and demand interpreter service because they would be considered disabled in that they could not speak the English which I ordinarily use with my patients. We are long overdue in making English our official language as it is essentially the official second language of an entire World now. The cost to our government and to citizens if we do otherwise will be disastrous. Furthermore, the tendency for Hispanics and other minority groups to demand their elementary and secondary education in their own tongue can only be disruptive to the melting pot effect which our country should achieve.

Sincerely,

DEPARTMENT OF JUSTICE

W. Yates Trotter, M.D.

JAN 19 1993

The Honorable Lane Evans
Member, U. S. House of Representatives
1640 North Henderson Street, Suite 1
Galesburg, Illinois 61401

Dear Congressman Evans:

This letter is in response to your inquiry on behalf of Allan Smith, who asks whether a public entity must comply with the Americans with Disabilities Act of 1990 (ADA) in existing buildings.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's requirements. However, it does not constitute a legal interpretation, or legal advice, and it is not binding on the Department.

Your constituent asks whether public entities have ADA responsibilities in existing buildings. He states that he believes public entities have no ADA responsibilities unless an existing building undergoes "substantial remodeling." This understanding of the ADA is incorrect. The ADA has provisions that affect existing public facilities, and it has additional provisions that apply when a public facility is altered.

Title II of the ADA applies to the programs and facilities of state or local government, or "public entities." Title II, and the Department's regulation promulgated under that title, contain many provisions with which public entities must comply in existing facilities, affecting structural and non-structural aspects of each public entity's operations. The title II regulation and a Technical Assistance Manual interpreting the

regulation are enclosed with this letter. Some of the obligations of public entities in existing facilities may be found in the title II regulation in sections 35.140, 35.149-35.150, and 35.160-35.164, at pages 35719-35721, and in the corresponding preamble sections on pages 35707-35713. In the Technical Assistance Manual, discussion of obligations in existing facilities may be found at pages 9-22, and 35-39.

cc: Records, Chrono, Wodatch, Bowen, McDowney, Novich, FOIA, MAF
Udd:Novich:congress:evans

01-01846

With regard to structural aspects of existing public facilities, title II requires that programs of public entities be accessible to people with disabilities. This means that each program, when viewed in its entirety, must be accessible. It does not necessarily mean that each building must be made accessible. These provisions apply to public facilities even if no alterations are planned. You may consult section 35.150 of the enclosed regulation, at pages 35719-35720 and 35708-35709, for a discussion of the program accessibility requirement. In addition, when public facilities are altered, section 35.151 of the title II regulation requires that alterations affecting usability be done so as to make the altered area accessible, to the maximum extent feasible. Section 35.151 appears at pages 35720-35721 of the title II regulation, with corresponding preamble discussion at pages 35710-35711.

I hope this information is helpful to you in responding to your constituent.

Sincerely,

John R. Dunne
Assistant Attorney General
Civil Rights Division

SECOND: WOULD YOU PLEASE DIRECT THE FOLLOWING REQUEST FOR INFORMATION TO THE PROPER AGENCY?

WE REQUIRE A LETTER FROM THE AGENCY RESPONSIBLE FOR ENFORCEMENT OF THE AMERICANS WITH DISABILITIES ACT THAT CLEARLY STATES WHETHER OR NOT A PUBLIC BODY CAN EVER BE FORCED TO COMPLY WITH THE PROVISIONS OF THE AMERICANS WITH DISABILITIES ACT IN AN EXISTING BUILDING.

WE BELIEVE THAT THE ONLY TIME A PUBLIC BODY CAN BE REQUIRED TO COMPLY WITH THE PROVISIONS OF THE AMERICANS WITH DISABILITIES ACT IN AN EXISTING BUILDING IS DURING A PERIOD OF "SUBSTANTIAL REMODELING".

WE ALSO UNDERSTAND THAT "GOOD FAITH" EFFORTS MUST BE MADE TO CORRECT NON COMPLIANT AREAS. AN EXAMPLE OF "GOOD FAITH" EFFORT WOULD BE TO REPLACE AN EXISTING DEFECTIVE DRINKING FOUNTAIN WITH A TYPE SUITABLE FOR USE BY THE ENTIRE PUBLIC.

THANK YOU FOR YOUR ASSISTANCE.

ALLAN L. SMITH

(b)(6)
XX
Columbia, South Carolina 29224

Dear XX

This letter responds to your inquiry concerning the regulatory requirements of the Americans with Disabilities Act (ADA) for slip resistance of floors.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities with rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA accessibility standards. However, this technical assistance does not constitute a legal interpretation of the statute and it is not binding on the Department.

Section 4.5.1 of the Americans with Disabilities Act Accessibility Guidelines (page 35628 of the enclosed document) requires ground and floor surfaces along accessible routes and in accessible rooms and spaces to be stable, firm, and slip-resistant. There are no enforceable standards for coefficients of friction in the regulations. The Appendix to the Guidelines, which is advisory only, discusses recommended coefficients of friction in section A4.5.1 (page 35678). Because coefficients of friction for flooring materials in place can be affected by water, cleaning compounds, or other factors, and because it is difficult to measure these coefficients under varying environmental conditions, the recommended coefficients are provided only as advisory guidance and not as regulatory requirements.

cc: Records; Chrono; Wodatch; McDowney; Harland; FOIA; MAF.
:udd:mercado:congltrs:hollings.ewh

01-01850

Additional information regarding slip-resistance is available from the Access Board by calling 800-USA-ABLE and requesting its publication titled "Slip-Resistant Surfaces." In addition, the Department of Justice maintains a telephone information line to provide technical assistance regarding the rights and obligations of individuals, businesses, agencies, and others covered or protected by the ADA. This technical assistance is available by calling 202-514-0301 (voice) or 202-514-0383 (TDD) between 1:00 p.m. and 5:00 p.m., Monday through Friday.

I hope the information we have provided is helpful to you.

Sincerely,

John L. Wodatch
Chief
Public Access Section

The Honorable William Barr
U.S. Attorney General
U.S. Department of Justice, Room 5111
10th and Constitution Ave. N.W.
Washington, D.C. 20530 November 10, 1992

Dear Sir:

We are greatly concerned about the apparent lack of enforcement by the Justice Department of the slip-resistant floor requirement of the Americans With Disabilities Act of 1990. XX has called on hundreds of businesses throughout the eastern part of South Carolina (Columbia to Charleston) in an effort to bring a safer environment to these organizations XX(b)(6) In many cases XX tested the floors for the coefficient of friction with a slip meter. Virtually none of the floors tested comply with the ADA 0.6 coefficient of friction standard for public-access facilities set forth in the Act and most are not even close. Even though the law called for all work to have been completed by January of 1992, XX have been told by businessmen that they will only correct their problems when it becomes expedient to do so. (meaning enforcement by your organization.) Several have even gone so far as to XX .

It is difficult for me to write this letter XX
XX problem and we would
XX these businesses to comply with the law. The complete lack of response on the part of the business community however, has prompted me to write. XX
XX

We would appreciate knowing what plans you have for enforcing the law.

Sincerely,
(b)(6)
XX

01-01853

JAN 19 1993

Mr. John Ness
Vice President
Merrimack Engraving and Marking Company, Inc.
P.O. Box 424
Methuen, Massachusetts 01844

Dear Mr. Ness:

This letter is in response to your letter concerning requirements for permanent signs under title III of the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that are subject to the Act. Therefore, this letter provides informal guidance to assist you in understanding the ADA's requirements. However, this technical assistance does not constitute a legal interpretation by the Department and it is not binding on the Department.

In general, the Department's standard for accessible design, contained as Appendix A to our title III regulation, does not require that signs be provided in buildings and facilities. When signs are provided in a building, section 4.1.3(16) of the standard requires that certain types of signs comply with specific characteristics intended to accommodate persons with varying degrees of visual impairments. Signs designating permanent rooms and spaces are required to have raised and Brailled numbers and characters, making them tactually readable. In addition, elevator car controls, floor markings on elevator hoistways, and elevator identification adjacent to emergency communication, are also required to be tactually readable.

Because tactual signs are intended to be used by persons who are blind or severely visually impaired, strict requirements for the location and placement of such signs exist to ensure ease of location and use. The requirements apply to the room numbers portions of all permanent signs, including those for offices, kitchens, hotel rooms, classrooms, and any other type of room

cc: Records, Chrono, Wodatch, Lusher, McDowney, FOIA, MAF
Udd:Mercado:congltrs:kerry.rhl

that has a room number, as well as signs at exits and toilet rooms. The requirements for tactual signs do not apply to signs that provide information about the room or space such as the function or purpose nor to temporary signs that may provide the name of the current occupant or user of a space.

The signage requirements contained in the Department's standard apply to new buildings intended for first occupancy after January 26, 1993 or any building for which alterations were initiated after January 26, 1992. Further, existing public accommodations must undertake barrier removal in existing facilities where it is readily achievable. The Department's recommended priority list includes providing raised character and Brailled signs in its second highest category.

I hope that this information is helpful to you.

Sincerely,

John L. Wodatch
Chief
Public Access Section

November 23, 1992

Bonnie Cronin
Office of Senator John Kerry
1 Bowdoin Square 10th Floor
Boston, MA 02114

Dear Bonnie,

In response to our telephone conversation last Friday, I am enclosing the information I received about permanent room sign requirements for the Americans with Disabilities Act.

A problem has risen due to a letter written by Assistant Attorney General John Dunne. In a letter he wrote to Michael J. Davis, Editor of the Engravers Journal (a trade publication), Mr. Dunne states that the only rooms and areas considered permanent are: mens and womens restrooms, room numbers and exits. Mr. Dunne refers Mr. Davis to page 59 of the Title 3 Technical Assistance Manual. When you look at that page, it clearly states that what Mr. Dunne has listed as the only permanent rooms are merely some examples of permanent rooms and areas. Mr. Dunne neglected to include the eg. before his list of rooms and areas.

I question as to why elevators, stairwells, business offices, kitchens, etc. would not be considered permanent rooms or areas. Section 4.30.4 of the Federal Register Vol. 56, No. 144 Part 3 of the Americans with Disabilities Act requires that all permanent rooms or areas be designated with a sign that contains raised lettering, grade 2 braille and, when applicable, the appropriate international symbol.

All the information I have heard and read about the A.D.A. has been stressing the fact that this law is intended to allow all handicapped people become more independent by removing physical and communication barriers. If that is the case, then wouldn't it make sense to identify all rooms and areas with raised lettering and grade 2 braille? This would allow a handiapped person to move independently throughout hospitals, hotels, restaurants and the like.

This matter greatly concerns me due to the fact that my company is a small family-run business and we have invested a great deal of time and money to manufacture signs to comply with the A.D.A. If it were a case of the law being amended, we could understand Mr. Dunne's letter, but it is his error that now has the Justice Department considering just three types of rooms to be permanent
rooms.

I hope that something can be done to correct this error and I will look forward to hearing from you regarding this matter. Thank you for your time and cooperation.

Respectfully,

John Ness
Vice President

01-01856

(STAMP) JAN 26 1993

DJ 202-PL-16

Mr. J. Keith Ausbrook
Collier, Shannon & Scott
3050 K Street, NW
Washington, DC 20007

Dear Mr. Ausbrook:

This letter is in response to your inquiry on behalf of the American Car Rental Association ("ACRA") to determine whether its members must provide vehicles equipped with hand controls when doing so would be readily achievable, and to identify the circumstances under which providing vehicles equipped with hand controls would be readily achievable.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation or legal advice and it is not binding on the Department of Justice.

Title III of the ADA imposes certain obligations on places of public accommodation. The Act lists twelve types of entities as places of public accommodation, including the category of rental establishments. Please see the enclosed title III regulation at section 36.104 on pages 35594 and 35551 for more on the definition of a place of public accommodation.

The owners and operators of places of public accommodation may not discriminate on the basis of an individual's disability when providing goods and services to that person. To prevent such discrimination, the owners and operators must remove barriers to accessibility of their goods and services if removal is readily achievable, i.e., easily accomplished and able to be carried out without much difficulty or expense. Installation of

vehicle hand controls is an example included in the title III regulation of a step towards barrier removal. Please see the regulation at section 36.304 on page 35597 and pages 35568-70 for further discussion.

cc: Records, Chrono, Mobley, Wodatch, FOIA, Friedlander, Breen
udd:Mobley:ACRA.Letter

01-01857

The failure to provide hand controls is considered a barrier that must be removed if providing hand controls is readily achievable. Whether it is readily achievable depends on a host of factors such as those mentioned in your letter at page two. Your main concern appears to be the cost of obtaining and installing hand controls. As cited above, expense is one factor that may properly be weighed in determining whether ACRA's members must obtain and install hand controls on rental cars. The Department has declined to establish any kind of numerical formula for determining whether an action is readily achievable. Instead, the Department has approved a flexible case-by-case balancing of the listed factors. Please see the enclosed title III regulation at section 36.104 on pages 35594 and 35554 for further discussion.

The readily achievable standard also addresses legitimate safety considerations. To the extent that certain vehicle models cannot safely be fitted with hand controls, provision of hand controls on those vehicles is not readily achievable. However, for a safety concern to be considered legitimate it must be based on actual risks and must be necessary for the safe operation of the services provided.

Another factor to be considered under the readily achievable standard is whether or not the customer has provided the rental car company with adequate notice. What constitutes adequate notice will vary depending on factors such as the remoteness of the location, the availability of trained mechanics, the availability of hand controls, and the size of the fleet. For example, notice of an hour or less may be adequate at a large city site where it is readily achievable to stock hand controls and to train mechanics in how to install them properly. On the other hand, notice of two days might be inadequate for a small, rural site where it is not readily achievable to keep hand controls in stock and where there is only a part-time mechanic who has been trained in the proper installation of controls. These examples should not be construed as hard and fast rules; in any given situation, a wide variety of factors must be weighed to determine whether barrier removal is readily achievable.

ACRA members should note that the obligation to engage in readily achievable barrier removal is a continuing one. Over time, barrier removal that initially was not readily achievable may later be required because of changed circumstances. For example, a site that has a full-time trained mechanic only during the summer months may have to shorten the notice period it requires of its customers during those months.

I have also enclosed this Department's Title III Technical Assistance Manual which was written to guide individuals and entities having rights and obligations under the Act toward a
01-01858

fuller understanding of the law. Pertinent discussion is found at page two (definition of a place of public accommodation) and pages 28-32 (readily achievable barrier removal).

I hope this information is useful to you in understanding the requirements of the ADA.

Sincerely,

John L. Wodatch
Chief

Mr. Phillip Breen
Office on the Americans with Disabilities Act
Civil Rights Division
United States Department of Justice
Washington, D.C. 20530

Dear Mr. Breen:

The American Car Rental Association ("ACRA") respectfully requests

that the Department of Justice ("DOJ") provide technical assistance in ensuring that its members comply with certain provisions of the public accommodations section of the Americans with Disabilities Act, Pub. L. 101-336, 104 Stat. 327 (1990) ("ADA") and the regulations issued thereunder, which became effective on January 26, 1992. 56 Fed. Reg. 35,543 (1991). Specifically, ACRA seeks (1) to determine whether its members must provide vehicles equipped with hand-controls when doing so would be readily achievable and (2) to identify the circumstances under which providing vehicles equipped with hand-controls would be readily achievable.

First, conflicting provisions of the regulations raise the question of whether car rental companies must provide vehicles equipped with hand-controls even if doing so would be readily achievable. On the one hand, Section 36.304(b)(21) identifies the installation of vehicle hand-controls as a barrier removal that is required if readily achievable. On the other hand, Section 30.307 specifically states that a public accommodation is not required to alter its inventory to include special goods that facilitate use by individuals with disabilities. Rental cars equipped with hand-controls could be considered altered inventory that facilitate use by individuals with disabilities. While car rental companies have historically made vehicles equipped with hand-controls

available whenever possible, the extent of the obligation to provide such vehicles is rendered uncertain by these two provisions of the regulations. ACRA seeks your assistance in resolving this uncertainty.

Second, if providing vehicles equipped with hand-controls is required if readily achievable, ACRA seeks to identify the relevant factors that apply to this industry in determining whether providing vehicles equipped with hand- controls is readily achievable. The ADA and the final regulations state that in determining whether any action is readily achievable the factors to be considered include:

> (1) the nature and cost of the action;
> (2) the overall financial resources of the site or sites involved in the action; the number of persons employed at the site; the effect on expenses and resources; legitimate safety requirements that are necessary for safe operation, including crime prevention measures; or the impact otherwise of the action upon the operation of the site;
>
> (3) the geographic separateness, and the administrative or fiscal relationship of the site or sites in question to any parent corporation or entity;
>
> (4) if applicable, the overall financial resources of any parent corporation or entity; the overall size of the parent corporation or entity with respect to the number of its employees; the number, type, and location of its facilities; and
>
> (5) if applicable, the type of operation or operations of any parent corporation or entity, including the compensation, structure, and functions of the workforce of the parent corporation.

56 Fed. Reg. at 35,594 (1991) (to be codified at 28 C.F.R. S 36.104). Under these requirements, ACRA seeks to identify with greater specificity the factors that are most relevant to providing vehicles equipped with hand-controls by car rental companies.

Clearly, cost is a significant factor. The equipment costs approximately $200 and the installation and removal by a trained mechanic cost about $28, which is the average daily rental charge. While the cost of the equipment may be spread over many rentals, the installation and removal costs are incurred every time the vehicle must be so equipped. These recurring costs differentiate this type of accommodation from other "barrier removals" such as widening doors or removing carpeting. Thus, ACRA seeks to determine whether the length of the rental is relevant in evaluating whether providing a vehicle equipped with hand- controls is readily achievable. What

is readily achievable for a week-long rental may not be readily achievable for a day's rental.

01-01861

Similarly, an additional cost of providing the hand-controls may include the cost of delivery of the equipment from another location. May ACRA members properly consider this cost in determining whether providing the vehicle is readily achievable?

ACRA is further concerned that even if the cost is not prohibitive, the availability of the equipment may be limited. With notice of at least 48 hours, most car rental companies believe that they would be able to obtain the equipment by overnight delivery. However, if ACRA members receive no notice or less than 48 hours notice, they may not be able to provide the equipment at all because the equipment is not kept on site or is already in use by another customer. Moreover, at least 48 hours notice assures that a mechanic is available to install the equipment; many locations, usually the smaller ones, do not have a mechanic continuously on-site or immediately available to perform the installation. Thus, ACRA seeks to determine whether notice is relevant in evaluating whether such an accommodation is readily achievable.

Finally, ACRA seeks to determine how many hand-controls a location must have on site based on all the relevant factors. ACRA members vary greatly in their operations. However, the availability of a mechanic, the overall financial resources, the impact on expenses of making the accommodation are almost all dependent upon the number of vehicles at a location and the historical frequency of requests for this equipment. Is there a specific number of hand-controls that ACRA members should have immediately available based on the size of the location and the historical frequency of requests?

ACRA looks forward to working with you to resolve these issues. Thank you for your consideration.

Sincerely,

J. KEITH AUSBROOK
Counsel for the
American Car Rental Association

01-01862

DJ 202-PL-332 JAN 1993

Mr. C. Todd Jones
Assistant Counsel for
Industrial Rehabilitation and ADA Issues
National Association of Rehabilitation Facilities
Post Office Box 17675
Washington, D.C. 20041

Dear Mr. Jones:

This letter is in response to your inquiry of September 21, 1992, about the definition of "public entity" under the Americans with Disabilities Act ("ADA") and the application of that definition to institutions providing medical, vocational, and residential services.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation or legal advice, and it is not binding on the Department of Justice.

Your letter inquires whether public funding alone converts an otherwise private entity into a public entity for purposes of the ADA, and what other factors the Department of Justice might consider in determining whether a particular entity is public or private. In response, I wish to confirm that the answer you received over the ADA Information Line is correct: public funding alone does not convert an otherwise private entity into a public entity.

In general, the Department of Justice looks to several factors in determining whether an entity that has both public and private features is covered by title II or title III. These

include, but are not necessarily limited to:

cc: Records, Chrono, Wodatch, Breen, Contois, Frieldander, FOIA
Udd:Contois:policyletters:jones

01-01863

1) whether the entity is operated with public funds;

2) whether the entity's employees are considered government employees;

3) whether the entity receives significant assistance from the government by provision of property or equipment; and

4) whether the entity is governed by an independent board selected by members of a private organization, or a board elected by the voters or appointed by elected officials.

In many cases, different entities engaged in providing the same service may have different obligations. For instance, if a public entity, such as a State or local government, provides a service or program through a contract with a private entity, the public entity would be required to make sure that the program or service is accessible to persons with disabilities under the requirements of title II, while the private entity, if it qualifies as a public accomodation, would have to comply with the requirements of title III.

I have enclosed a copy of the Department of Justice's Title II Technical Assistance Manual. The definition of a public entity is discussed on page one, and examples of its application to particular situations are given on page two.
I hope this information is useful to you in understanding the requirements of the ADA.

Sincerely,

John L. Wodatch
Chief
Public Access Section

Enclosure
Title II Technical Assistance Manual

01-01864

NATIONAL ASSOCIATION OF REHABILITATION FACILITIES
James S. Liljestrand, M.D. Robert E. Brabham, Ph.D.
President Executive Director

September 21, 1992

John Wodatch, Director
Office of the Americans with
Disabilities Act
Civil Rights Division
United States Department of
Justice
P.O. Box 66118
Washington, DC 20035

Dear Mr. Wodatch,

I am writing to confirm my telephone conversation on September 14, 1992 with Lucille Johansen on the Americans with Disabilities Act Information Line. She asked me to write to the Office to receive an official response to my query.

The National Association of Rehabilitation Facilities (NARF) is the principal national membership organization of institutions providing medical, vocational, and residential services. I am writing on their behalf to confirm an interpretation of the Americans with Disabilities Act as it relates to our facilities that work with state and local entities.

ADA and its implementing regulations define a "public entity" as "any department, agency, special purpose district, or other instrumentality of a State or States or local government." (emphasis added) ADA S 201(1)(B), 28 C.F.R. SS 35.104, 36.104. Many NARF service providers receive funding and other support from state and local governments and agencies. The issue for those providers is whether they are "other instumentalit[ies]" based on state or local funding or any other support, making them public entities, or whether they are private entities, being defined as an entity other than a public entity. ADA S 301(6), 28 C.F.R. S 36.104. As you know, this distinction is critical for determining if an entity is governed by ADA Title II as a public entity or ADA Title III as a private entity.

During our telephone conversation, Ms. Johansen assured me that funding alone would not give rise to "public entity" status for a service provider as an "other instrumentality." She stated that this section was intended to apply to corporations owned by governments. NARF agrees with this interpretation of the law. The point in need of guidance, however, is in this principle's application.

P.O. Box 17675, Washington, D.C. 20041 * (703) 648-9300 * Fax: (703) 648-0346

01-01865

For example, a corporation to promote and market services and products created by providers for use by state agencies might be created with the State itself as a minority or majority shareholder. The question to be determined in that case and, more generally, is at what point does an organization become an instrumentality and what factors would the Department of Justice examine in making that determination.

I realize that this determination could also have implications for the application of section 504(B)(1)(A) of the Rehabilitation Act, which has language similar to that used in ADA. Your comments on the relationship between these two provisions would also be of service to our providers.

NARF wishes to provide guidance to NARF member institutions based the Department of Justice's interpretation of ADA. If any further information is required for your response, please let me know.

Cordially,

C. Todd Jones
Assistant Counsel for
Industrial Rehabilitation
and ADA Issues

Mr. Ed Semchenko
Lockwood Greene Engineers, Inc.
1500 International Drive
P.O. Box 491
Spartanburg, South Carolina 29304

Dear Mr. Semchenko:

This letter is in response to your inquiry about employee work areas under the Americans with Disabilities Act (ADA).

You asked whether section III-7.3110 of the Title III Technical Assistance Manual, which provides that building owners may not construct inaccessible employee areas in new buildings based on a belief that persons who use wheelchairs cannot perform the types of job that will be performed in those areas, is inconsistent with ADA provisions.

The discussion to which you refer relates only to new construction and alterations of work areas in places of public accommodation and commercial facilities. The ADA regulation and accessibility guidelines require that work areas be designed and constructed so that persons with disabilities may approach, enter, and exit the areas. They do not require that each individual work station be made fully accessible at the design and construction phase.

The ADA sections that you cite as potentially inconsistent with the statement in the Technical Assistance Manual focus on employment discrimination and barrier removal in existing facilities. Individual capabilities, of course, are relevant in determining whether with reasonable accommodation an individual with a disability is qualified for a particular job. In some cases, existing work areas and individual work stations will need to be made accessible as a reasonable accommodation.

August 6, 1992

Mr. John R. Dunne
Assistant Attorney General
Civil Rights Division
U. S. Department of Justice
P. O. Box 66118
Washington, DC 20035-6118

Dear Mr. Dunne:

Thank you for sending me a copy of your Title III Technical Assistance Manual. It has been a great aid to us. I do however have an issue that I would like clarified.

Article III-7.3110 Paragraph 5 of the Technical Assistance Manual reads in part as follows:

> What if an owner of a building believes that an individual who uses a wheelchair could never do the kind of job that will be performed in the particular area? Does the area still have to be made accessible? Yes. The ADA does not permit such assumptions to be made about the capabilities of individuals with disabilities.

As an architect dealing primarily with industrial clients, I often deal with work areas which require very heavy manual labor in wet or otherwise difficult working conditions. These areas are found in some textile and food processing facilities and do not appear to be practical for wheelchair employees.

ADA Title I Sec. 102(b)6 reads as follows:

> (6) using qualification standards, employment tests or other selection criteria that screen out or tend to screen out an individual with a disability or a class of individuals with disabilities unless the standard, test or other selection criteria, as used by the covered entity, is shown to be job-related for the position in question and is consistent with business necessity;. . .

ADA Title I Sec 103(a) says that screening which is ". . .job related and consistent with business necessity..." may be a defense to a charge of discrimination.
01-01869

ADA Title III Sec 301(9) reads in part as follows:

> In determining whether an action is readily achievable, factors to be considered include--...(D) the type of operation or operations of the covered entity, including the composition, structure and functions of the workforce of such entity;...

To me, the wording in the Technical Manual is not fully consistent with the provisions of the law. It appears that the ADA does provide for an evaluation of the capabilities of individuals with disabilities. Please clarify this issue so we can properly carry out the intent of the ADA.

Thank you for your service. We appreciate your response in this matter.

Sincerely,

LOCKWOOD GREENE

Ed Semchenko

ADADUNNE.LTR

T. 12-18-92

DJ 202-PL-153 JAN 26 1993

Mr. Donald E. Sievers
D.E. Sievers & Associates, Ltd.
National Association of the Deaf
6309 Bradley Boulevard
Bethesda, Maryland 20817-3243

Dear Mr. Sievers:

This letter responds to your correspondence expressing concern about a specific product that is being marketed as a way to accommodate persons with hearing impairments as required by the Americans with Disabilities Act.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that are subject to the Act. This letter provides informal guidance to assist you in understanding the ADA accessibility standards. However, this technical assistance does not constitute a legal interpretation of the application of the statute, and it is not binding on the Department.

We appreciate your concern about this product and the material that you forwarded with your letters. However, as Ms. Ruth Hall Lusher of my staff informed you by telephone, we are unable to comply with your request to contact the manufacturer of this product. The Department does not evaluate or rule on the legality of particular products. Further, it is important to point out that requirements contained in section 9.3.1 of the ADA Accessibility Guidelines (cited in your letter), like all provisions contained in the Guidelines, apply only to elements that are "built-in" as part of a building or facility. The product that you discuss is a portable device provided as an auxiliary aid and is therefore not covered by section 9.3.1 of

the Guidelines.

The Department may, however, as part of a complaint investigation, determine that discrimination has occurred because a portable device provided by a public accommodation is not effective in providing equivalent service to persons with

cc: Records, Chrono, Wodatch, Breen, Lusher, FOIA, Library
udd:mercado:policy.letters.certif:lusher.wodatch.sievers

01-01871

disabilities. Although the requirements of the Guidelines do not apply to portable devices provided as auxiliary aids, the Guidelines can provide helpful guidance in determining whether particular devices are as effective as built-in equipment.

I hope that the above information is helpful.

Sincerely,

John L. Wodatch
Chief
Public Access Section

01-01872

D.E. SIEVERS & ASSOCIATES, LTD.
Fire Safety Consultants
National Association of the Deaf

April 17, 1992

Mr. John Wodatch
Director, Office on ADA
Civil Rights Division
Department of Justice
320 First Street N.W.
Washington, D.C. 20001

Dear Mr. Wodatch:

Enclosed please find our letter of March 11,1992, addressed to Mr. James Raggio, General Counsel for the ATBCB. During a conversation today, discussing the subject of that letter, he suggested that we contact you, because he considered it a matter for the Department of Justice.

A subsequent conversation with the very knowledgeable, Ms. Ellen Harland, of the Department's staff, concluded with a suggestion of a review of the letter and its enclosure and a determination by you.

A false sense of security is generated to both the owner of the place of public accommodation and the deaf patron when safety in accordance with the ADA is expressly implied. The Final Rule prohibits the connection of visual notification with visual alarm appliances. Auxilliary aids not meeting the requirements of the Final Rule or Guidelines, and absent standards, do not comply with the ADA, and provide a false sense of security to people who think they do.

In as much as we are very much concerned with effective early warning to deaf persons, the danger of loss of life, and compliance with the ADA, in places of public accommodation, we request that you direct American Phone Products, Inc. to cease and desist communicating, in any way, that their product "Alert-Plus" provides compliance with the ADA. In addition, we request that you further direct American Phone Products, Inc. to contact all places of public accommodation where "Alert-Plus" has been sold, and inform each, in writing, that "Alert-Plus" does not, in fact, provide compliance with the ADA.

We respectfully ask that you take immediate action in this matter because of the very real danger of loss of life, as well as noncompliance with the ADA. We would appreciate a copy of your ac-

tion at your earliest possible convenience.

Sincerely,

Donald E. Sievers

D.E. SIEVERS & ASSOCIATES, LTD.
Fire Safety Consultants
National Association of the Deaf

March 11, 1992

Mr. James Raggio
General Counsel
Architectural & Transportation Barriers Compliance Board
1111 Eighteenth Street N.W.
Washington, D.C. 20036

Dear Mr. Raggio:

36 CFR Part 1191 Americans With Disabilities Act (ADA) Accessibility Guidelines for Buildings and Facilities; Final Guidelines Section 9.3.1 and 28 CFR Part 36 Nondiscrimination on the Basis of Disability by Public Accommodations and in Commercial Facilities; Final Rule Section 9.3.1 both state "In sleeping rooms required to comply with this section, auxillary visual alarms shall be provided and comply with 4.28.4. Visual notification devices shall be provided in units, sleeping rooms and suites to alert room occupants of incoming telephone calls and a door knock or bell. Notification devices shall not be connected to auxillary visual alarm signal appliances. ..."

Some manufacturers, in attempts to convince members of the lodging industy to purchase products allegedly complying with the ADA Guidelines and Final Rule, needlessly risk the lives of deaf and hard of hearing persons. People who depend on visual alarms warning them of the danger of death or injury due to fire do not have time, in an emergency, to determine which feature of an combination device is activating, if it is correct, and working properly. Such devices threaten the life safety of deaf people who rely upon visual alarms which are duly tested and listed by a nationally recognized testing laboratory for the purpose of warning of fire.

We have a compelling concern that products combining door knock and telephone notification with visual alarms in one unit violates Section 9.3.1 above. Conversations with members of the ATBCB technical staff concur with our findings and recommended this letter requesting an official ruling from you.

Enclosed please find literature describing a product called "Alert-Plus" which expressly implies compliance with the ADA while at same time pictures and describes the combined features of smoke detector alarm activation with telephone and door knocking notifi-

cation. We therefore request that you rule whether this device is in compliance with section 9.3.1 of the Guidelines and Final Rule and advise us accordingly. In addition, if you find that the device does not meet the qualifications of the Guidelines and Final Rule, we request that you also notify the manufacturer of your findings and direct the manufacturer to cease and desist communicating that the product enables the transient lodging facility to comply with the ADA.

6309 Bradley Blvd. * Bethesda, MD 20817-3243 * Voice (301) 469-0278 * TDD (301) 469-0524

01-01874

We realize that you are faced with many issues dealing with the ADA and its compliance requirements. At the same time, the life safety of deaf people is threatened. We would appreciate your ruling as soon as possible.

Sincerely,

Donald E. Sievers

D.E. SIEVERS & ASSOCIATES, LTD.
Fire Safety for Deaf and Hard of Hearing People

November 24,1992

Philip L. Breen, Esquire
Special Legal Counsel
Office on the Americans with Disabilities Act
Civil Rights Division
U.S. Department of Justice
320 First Street N.W.
Washington, D.C. 20001

Dear Mr. Breen:

On April 17, 1992 we addressed our concerns to Mr. John Wodatch regarding the compelling issue of potential loss of life by deaf and hard of hearing people and Section 9.3.1 of the Final Rule as it relates to the prohibition of linking notification devices with fire alarms.

In your letter of May 20, 1992, you assured us of an expeditious response. It has now been six months since your letter arrived. We are enclosing copies of our original correspondance and formally request a written response, within 10 working days, which would also address the concerns raised below.

Recognizing that Section 9.3.1 prohibits the combining of notification devices with visual alarms in new construction and alterations, and the absence of standards for existing buildings and auxillary aids, how can the Department allow the risk to life in existing buildings while prohibiting that risk in new construction and alterations? Does the Department intend to at least protect the hearing impaired public with a requirement that such products be tested and Listed by a nationally recognized testing laboratory (such as Underwriters Laboratories) if any feature includes visual warning for fire protection, for those products claiming compliance with the ADA?

This is a matter of compelling importance to deaf and hard of hearing people. May we please have your written response as indicated?

Very truly yours,
Donald E. Sievers

The Honorable Conrad Burns
United States Senator
2708 First Avenue North
Billings, Montana 59101

Dear Senator Burns:

This letter is in response to your inquiry on behalf of a constituent who has a family member with a vision impairment who resides in a nursing home. The constituent reports that it is difficult for the resident to navigate from his bed to the bathroom due to his impairment and the location of the bathroom door in relation to his bed. You have inquired whether the Americans with Disabilities Act (ADA) has any applicability in this circumstance.

The ADA authorizes the Department of Justice to provide technical assistance to individuals or entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

The Department's ADA regulation includes many requirements intended to increase accessibility for persons with vision impairments, such as the provision of certain tactile and braille signs, audible alarms, and detectible warnings at transit platforms and hazardous areas. However, although the ADA does require that certain elements of a physical space be accessible, it does not mandate a specific floor layout. Instead, architects are allowed flexibility to conform to the needs of the space, while incorporating accessible elements.

cc: Records; Chrono; Wadatch; McDowney; Magagna; FOIA; MAF.
:udd:magagna:congress:burns

I have enclosed the Department's title III regulation implementing the ADA, which includes the ADA Accessibility Guidelines, for your reference. I have also included a copy of the Department's Title III Technical Assistance Manual. I hope this information will assist you in responding to your constituent.

Sincerely,

James P. Turner
Acting Assistant Attorney General
Civil Rights Division

Mr. John Wodatch, Director
Americans with Disabilities Act
Post Office Box 66738
Washington, DC 20035-9998

Dear John,

One of my constituents has contacted my office requesting information on barrier removal as it relates to the "Americans with Disabilities Act".

This constituent has informed my staff that a family member has recently been admitted to a nursing home. He apparently has a number of physical limitations, including limited eyesight. Our constituent tells us that the bathroom door enters into the room and towards the patient's bed; therefore, it is very difficult for him to see his way to the bathroom. They would like to know if the "Americans with Disabilities Act" has any rules or regulations that apply to this type of situation.

Any information or help you can provide my staff to enable us to assist in reaching a favorable solution will be greatly appreciated. Please direct any correspondence or questions regarding this inquiry to my office at:

Senator Conrad Burns

01-01882

FEB 1 1993

The Honorable Sam Nunn
United States Senator
75 Spring Street, S.W.
Suite 1700
Atlanta, Georgia 30303

Dear Senator Nunn:

This letter is in response to your inquiry on behalf of James L. Cherry, concerning the American National Standards Institute's technical specifications for the design of accessible buildings and facilities (ANSI A117.1-1992).

The Americans with Disabilities Act (ADA) authorizes the Department to provide technical assistance to individuals and entities that have rights or responsibilities under the Act. This letter provides informal guidance to assist you in responding to Mr. Cherry. However, this technical assistance does not constitute a determination by the Department of Justice of the rights or responsibilities of any individual under the ADA, and it is not binding on the Department of Justice.

The Department of Justice regulation implementing title III of the ADA establishes the requirements that govern the new construction of facilities subject to title III. The regulation adopts the ADA Accessibility Guidelines as the Federal accessibility standard for places of public accommodation and commercial facilities. The ADA does not require States to amend their building codes to incorporate the ADA Accessibility Guidelines, but it does establish a procedure by which States can request the Department to certify that their accessibility codes meet or exceed the ADA's requirements.

The ADA does not authorize the Department to certify model codes or other private sector standards, such as the American National Standards Institute, but the title III regulation provides that the Department will, upon request, provide

cc: Records; Chrono; Wodatch; McDowney; Blizard; FOIA; MAF.
:udd:blizard:control:nunn

01-01883

technical assistance to the ANSI committee and other private sector organizations that develop model accessibility standards and model codes to assist them in determining if their models are consistent with the requirements of the ADA. Even though we are reviewing a June draft of the ANSI A117.1 Standard at the request of the Council of American Building Officials, which serves as the secretariat for the ANSI A117.1 Committee, the Department has not received the Committee's final proposal so that it is not possible to determine whether the draft Standard will be consistent with ADA requirements. We plan to respond to the Council of American Building Officials inquiry as promptly as our resources permit.

In his letter, Mr. Cherry noted that he wants to recommend the adoption of the 1992 ANSI standard as the Georgia accessibility code because, in his view, it appears "to correct some glitches" in ADA Accessibility Guidelines. Mr. Cherry should be aware that compliance with the ADA Accessibility Guidelines is required by Federal law. The ANSI A117.1 committee is free to comment on, or request amendments to, the ADA Accessibility Guidelines; but no action by the ANSI committee, or by any State adopting the ANSI technical requirements, can relieve any individual of the obligation to comply fully with the requirements of the ADA. Any State Government that plans to seek certification of its accessibility code must ensure that its code requirements meet or exceed the requirements of the ADA established in the title III regulation.

I have enclosed a copy of the title III regulation and the Department's Technical Assistance Manual. The new construction and alteration requirements are addressed at pages 35599-35602 and 35574-35589 of the regulation, and pages 43-64 of the Manual. Certification is discussed at pages 35603-04 and 35590-35592 of the regulation, and pages 68-73 of the Manual.

I hope that this information is helpful to you in responding to your constituent.

Sincerely,

James P. Turner
Acting Assistant Attorney General
Civil Rights Division

AMERICANS WITH
DISABILITIES
ASSOCIATION INC. James L. Cherry, J.D., Ph.D.
Founder - National Chairman
November 10, 1992

Honorable San Nunn
United States Senator
United States Senate
Washington, D. C.

RE: Department of Justice
Office of Americans With Disabilities Act

Dear Senator Nunn:

I am working with the Georgia Safety Fire Commissioner, State Fire Marshal and Department of Vocation Rehabilitation to craft some state legislation that would bring the state accessibility code for people with disabilities into conformity with the federal Americans With Disabilities Act of 1990 (ADA).

The existing Georgia access code incorporates by reference the 1986 version of the American National Standards Institution (ANSI - A117.1-1986) specifications for making buildings accessible to and usable by people with disabilities. Georgia's code for disability access does not conform with the federal law, and state or local officials are only authorized by law to approve construction plans based upon state law that is not in conformity with the ADA.

Since we had ANSI A-117.1-1986 standards placed in state law in 1987, the Americans with Disabilities Act was enacted in 1990 and the Americans with Disabilities Act Accessibility Guidelines (ADAAG) were promulgated by the DOJ and became effective on July 26, 1991. The ADAAG was an improvement over the 1986 accessibility standards developed by ANSI.

ANSI is a national consensus standard that is preferred by many construction officials, and now ANSI has revised its standards on accessibility to reflect and improve upon the ADAAG. Coincidentally, ANSI has a policy of reviewing ANSI accessibility standards every six years. Therefore, the 1992 ANSI revisions are in line with their review policy.

The revised ANSI A117.1-1992 version of the standards will be published in December, 1992. I reviewed an advance copy of the new ANSI A117.1-1992 and have determined that those standards

ADA-PAC
America's First Political Action Committee For People With Disabilities
625 Reds Circle Lilburn, Georgia 30247 (404) 921-5822
01-01885

may be superior to the ADAAG, since the ANSI accessibility standards appear to correct some glitches identified within the ADAAG that have now been in effect since 1991.

I am inclined to craft Georgia state legislation to incorporate the 1992 version of ANSI-A117.1 into state law, provided the U.S. Department of Justice determines that ANSI-A117.1-1992 standards are substantially equivalent to ADAAG, thereby establishing that compliance with ANSI-A117.1-1992 would constitute compliance with the accessibility requirements of the Americans with Disabilities Act of 1990.

The Department of Justice, Office of the Americans With Disabilities Act, has been reviewing this question since the advance copy of the 1992 ANSI A117.1 standards were made available in July 1992, but no findings have been reported.

To expedite our decision on which standard to use in a proposed new state law, we need a decision from the DOJ on two questions:

1. In the opinion of DOJ, does the ANSI A117.1-1992 accessibility standards meet or exceed the ADAAG standards?

2. Will the DOJ Certify that ANSI A117.1-1992 is substantially equivalent to the ADAAG for purposes of complying with the ADA? If so, when?

These decisions are needed soon in Georgia, because we are preparing legislation to be presented to the 1993 Georgia General Assembly. Specifically, I am asking for your timely help with an inquiry to the DOJ, Office of ADA to determine an answer to the above questions.

Thank you in advance for your assistance in this matter. Please call me at any time if you need further explanation of this situation.

Very truly,

James L. Cherry, J.D., Ph.D.
Chairman

JLC/rsc

FEB 1

The Honorable Leon E. Panetta
Member, U. S. House of Representatives
380 Alvarado Street
Monterey, California 93940

Dear Congressman Panetta:

This is in response to your letter requesting information on behalf of (b)(6) concerning the applicability of the Americans with Disabilities Act (ADA) to restaurants.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's requirements. It does not, however, constitute a legal interpretation and it is not binding on the Department.

As a place of public accommodation, restaurants are required to have nondiscriminatory policies and procedures, to make reasonable modifications in their policies, practices, and procedures to avoid discrimination against persons with disabilities, to provide effective communication with persons with disabilities, and to remove architectural barriers in existing facilities where it is readily achievable to do so. These requirements are set forth in Subparts B and C of the enclosed title III regulations, at pages 35595 to 35599.

The ADA imposes further accessibility requirements for new construction or alterations to existing facilities. For this purpose, the title III regulations adopt the ADA Accessibility Guidelines (Guidelines) promulgated by the Architectural and Transportation Compliance Board (Access Board). While the Guidelines apply to all new construction and alterations affected by the ADA, section 5.1 through 5.9 of the Guidelines also include specific provisions for restaurants and cafeterias.

cc: Records; Chrono; Wodatch; McDowney; Nakata; Magagna; FOIA;

MAF. :udd:nakata:congress.letters:panetta.3

01-01887

Subpart D of the title III regulations includes requirements for new construction and alterations of places of public accommodations at pages 35599 to 35602. The Accessibility Guidelines begin on page 35605. Section 5 dealing with the special design and building requirements for restaurants and cafeterias begins at page 35665 and section 2.2 dealing with equivalent facilitation is at page 35607.

Also enclosed is the Department's Title III Technical Assistance Manual, which may provide further assistance to your constituent.

I hope this information will be useful to you in responding to your constituent.

Sincerely,

James P. Turner
Acting Assistant Attorney General
Civil Rights Division

FEB 1 1993

The Honorable Charles S. Robb
United States Senator
1001 East Broad Street
Richmond, Virginia 23219

Dear Senator Robb:

This responds to your inquiry on behalf of your constituent, (b)(6) , concerning a Virginia statute that authorizes issuance of a special hunting permit that allows individuals with disabilities to shoot game animals from a stationary vehicle. Eligibility for the special permit is limited to individuals who are permanently unable to walk. XX asked whether, under the Americans with Disabilities Act (ADA), eligibility for the special permit would be extended to all individuals with mobility impairments.

The ADA authorizes the Department to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you in understanding how the ADA may apply to the question raised by your constituent. This technical assistance, however, does not constitute a determination by the Department of Justice of your constituent's rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

The Department's regulation implementing title II of the ADA, which applies to all programs, services, and activities of State and local governments, prohibits a public entity from discriminating against qualified individuals with disabilities in the benefits and services that it provides. 28 C.F.R. pt. 35. Section 35.130(c) of the regulation, however, permits a public entity to offer benefits to individuals with disabilities, or a particular class of individuals with disabilities, that it does not offer to individuals without disabilities. The purpose of this provision is to allow State and local governments to provide special benefits, beyond those required by the ADA, that are limited to individuals with disabilities or a particular class of individuals with disabilities, without thereby incurring

additional obligations to persons without disabilities or to other classes of individuals with disabilities.

cc: Records, CRs Friedlander, Kaltenborn.robb, FOIA, Breen, McDowney

01-01890

Where a benefit is limited to individuals with disabilities or a particular class of individuals with disabilities, discrimination is determined by comparing the treatment of an individual with a disability to the treatment provided to similarly situated individuals without disabilities. Because individuals without disabilities are not eligible for the special permit, denial of that permit to individuals with disabilities who are not permanently unable to walk does not constitute discrimination prohibited by title II. The State is free to limit eligibility for the special permit to the particular class of individuals with disabilities who are permanently unable to walk, because the limitation does not deny a benefit to individuals with disabilities that is provided to similarly situated individuals without disabilities.

I hope this information is helpful to you in responding to (b)(6).

Sincerely,

James P. Turner
Acting Assistant Attorney General
Civil Rights Division

01-01891

Dear Senator Robb,

This is in reference to
a disabile permit. The virginia game commision
has such a permit, but it states that
you must be unable to walk. Under the
new Americans with disabilty Act
wouldn't this intitle people that are
disabled due to a mobility impartment.
Under the new law could some one
get this permit if they were disabled.

Thank you

14. Shooting wild birds and wild animals from stationary vehicle by disabled person.

Any person, upon application to a game warden and the presentation of a medical doctor's written statement that such person is permanently unable to walk, may, in the discretion of such game warden, be issued a permit to shoot wild birds and wild animals from a stationary vehicle during established open hunting seasons and in accordance with other existing laws and regulations. Such permit will be issued on a form provided by the commission, which may authorize shooting from a stationary vehicle not less than 300 feet from nor across any public road or highway, and only when the bearer is properly licensed to hunt. Such permit shall be nontransferable, and any permit found in the possession of any person not entitled to such permit shall be subject to immediate confiscation by a game warden. Deer of either sex may be taken under the provisions of this permit in those counties where deer hunting is permitted. (Added 5-3-74: amended 5-7-76: 5-3-85, effective 7-1-85.)
01-01892

FEB 1 ILLEGIBLE

The Honorable Robert F. Smith
U.S. House of Representatives
118 Cannon House Office Building
Washington, D.C. 20515

Dear Congressman Smith:

This letter is in response to your inquiry on behalf of your constituent, (b)(6) concerning the effects of the Americans with Disabilities Act ("ADA") on small businesses.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the provisions of the ADA. It does not, however, constitute a legal interpretation, and it is not binding on the Department of Justice.

The ADA carefully balances the rights of persons with disabilities with the costs to businesses of providing access. The regulations formulated by the Department of Justice maintain the law's careful balance and recognize the legitimate needs of the business community for efficiency and profitability.

The smallest employers are exempt from title I of the ADA. Therefore, as long as XX continues to employ fewer than 15 employees, he has no obligations with respect to his employment practices under the Act. Although XX letter doesn't

specifically describe the nature of his business, it does not appear to be a public accommodation. Accordingly, his business would be considered a commercial facility and would have obligations under title III of the ADA only insofar as the business chooses to make alterations to its existing buildings and facilities or to undertake new construction of buildings or facilities.

MAF. :udd:perley:congress:smith.ada

01-01893

Restriping a parking lot would be considered an alteration and therefore must conform to the ADA Accessibility Guidelines which set the number of accessible parking spaces required according to the total number of spaces in the lot. See page 35612 of the enclosed Federal Register publication. In a lot with 25 or fewer spaces, one accessible space is required. The Guidelines permit the accessible space to be provided in a different location if equivalent or greater accessibility, in terms of distance from an accessible entrance, cost and convenience is ensured. If a lot is limited to the exclusive use of employees, and none of the employees are individuals with disabilities requiring accessible parking, accessible spaces may be assigned to employees without disabilities.

I have enclosed copies of the Department's implementing regulation for Title III of the ADA and the Title III Technical Assistance Manual. You may wish to pass these on to (b)(6) for his further reference. I hope this information is helpful to you in responding to your constituent.

Sincerely,

James P. Turner
Acting Assistant Attorney General
Civil Rights Division

SELECT COMMITTEE ON HUNGER

Mr. John L. Wodatch
Chief
Office of Public Access
Department of Justice
PO Box 66738
Washington, D.C. 20035-6738

Dear Mr. Wodatch:

I am forwarding to you a letter from my constituent, (b)(6)
As a small businessman, XX has made every effort to comply with the Americans with Disabilities Act and still provide benefits for his employees. I would appreciate any assistance you could provide in solving his apparent conflict.

Thank you for your help in this matter.

Sincerely,

ROBERT F. (BOB) SMITH
Member of Congress

THIS STATIONERY PRINTED ON PAPER MADE OF RECYCLED FIBERS

01-01895

Congressman Robert Smith
259 Barnett, Suite E
Medford, Oregon 97504

Dear Congressman Smith;

During a recent telephone call, my opening question to Mr. Mike Durman of your staff in Medford was: How did Congressman Smith vote on the Americans with Disabilities Act? His answer was that you, along with an overwhelming majority of all congressmen and senators voted in favor of it.

My response to his answer was that I would therefore be voting for and financially supporting your opponent, even though I know nothing about your opponent.

He reacted, professionally, but with great disbelief that I would make such a decision based on one vote, and encouraged me to "see the bigger picture". What ensued was a lively discussion in which I gained an admiration for your staff member, but nonetheless persist in my course.

As we concluded our conversation, Mr. Durman suggested that I write this letter expressing my views.

Mr. Congressman, the fact is that we are losing jobs in this country. I don't think anyone disputes that. What I think most people don't fully understand is the reason for the loss.

The loss of jobs is not being caused by the Federal Deficit. Most of us in business are only intellectually affected by the deficit and in fact most of us could not point to a single factor which adversely affects us because of it. There may be disaster awaiting around the door, but that's not causing us to ship jobs overseas.

The loss of jobs overseas is also not being caused by taxes. The fact is that many of the alternative locations for most American businesses have taxes which rival ours in actual impact and some which approach being confiscatory. As long as the playing field is level, and we feel like our tax dollars are being well spent, we have no complaint with paying our fair share.

Instead, the loss of jobs overseas comes from the burden imposed by our treacherous tangle of laws and regulations.

You, better than I, know the number of laws on the books and the number of new laws, bills, rules, and regulations proposed each year in congress. Since virtually all of these, by their nature, impose some sort of restricted or prescribed behavior, and since restricting or modifying ones' own behavior is not possible unless you know what the law prescribes as proper behavior, it

doesn't take a Lewis Carroll to project a day when

01-01896

it will not be possible for us to do anything because of either the certain knowledge that we will violate a specific law or the fear that we will unknowingly violate some law.

This sounds like some wild-eyed doom-sayer, right?

Well, Mr. Smith, I'm not. I'm a small businessman in Bend, Oregon. (b)(6) XX I have been in business since 1975 and XX small Bend office. I own my own home, XX,
XX

I'm not a wild-eyed fanatic.

But I'm scared to death of the strangle-hold which government ... at all levels ... has on business. And worse, I'm scared because nobody seems to realize that if you kill business, you kill the country.

Mr. Smith, with the ADA, government has crossed the line where businesses all over are quietly deciding that the USA is not a good place to do business.

The three presidential candidates stand and wonder about the loss of jobs overseas. Clinton thinks its because of tax advantages. Bush doesn't think about it and Perot is hung up on the deficit.

Somebody's got to pay attention. It is not any coincidence that the major outflow of jobs began in this country with the passage of ADA. By the time the bill went into effect, the outflow was a steady flow.

Now the ADA, alone probably wouldn't have caused the dike to break, but that's just the most recent in a thirty-year attack on business.

There are laws everywhere and about everything. ADA was just the one that pushed us over the top.

What prompted my call to your office would have been funny if it wasn't so tragic. XX that small building XX. If you've been to our city you know that parking downtown is at a premium, so I looked for quite a while until I found a building which would XX and also have room for parking. I found one. It was built in 1911 and was originally the XX I'm told.

Our business has been growing, and we are about to add our XX. This will fill up our little parking lot, so to make life easier for everyone, I decided we should have (b)(6) like the big-boy parking lots at super markets.

I called a painter and was told that there might be some sort of a law which said that I had to make one of the parking slots bigger to allow for disabled persons. Well, that

01-01897

I asked him if I could just disinvite visitors and he said that "as long as there is a possibility that someone MIGHT visit [me]...even uninvited ...provision has to be made...".

I tried to point out to him that if I disinvite someone and they visited me anyway that that would be trespassing and that making special provisions to make a trespasser more comfortable seemed a bit stupid, but he protested that he was just telling me what the law said. Somehow it seems patently absurd that you can have a person arrested for trespassing but you have to make sure they have adequate access before you do it.

In fairness to (b)(6) , he did an excellent job and I gave him an inordinately hard time. The problem is, it wasn't his fault.

It's yours Mr. Smith.

The ADA was horrible legislation. A law proposed by special interests, promoted by a liberal press, and passed by congressmen eager to do something which would read well in the newspapers and hopefully gain them votes, but who didn't have time to read the bill.

I stated to Mr. Durman that I was upset because the ADA is having such a devastating effect on small businesses and that was a major reason for my deciding to support your opponent.

He said something to the effect that there are thousands of bills and each one has thousands of pages and that I couldn't reasonably expect you to read every one. My response is: yes I can expect that. I do expect that. It's like a child telling me he doesn't have time to look both ways before crossing the street...and its just as dangerous.

How many laws have you voted for that you didn't read?

I suggested to Mr. Durman that perhaps you should make a rule that you just vote NO on a bill unless you have time to read it and understand it.

Because when you add this one more bad law to the affirmative action programs, the EEOC regulations, OSHA, unions laws, out-of-control liability lawsuits, environmentalists committing genocide on an entire sector of our society,

capricious judicial decisions with major different impact in different parts of the country, and now the threat of a sex discrimination suit fad ... the businessman can't move without being afraid he's going to step in something.

And the environment which the Federal Government endorses affects the attitudes of the states. Oregon currently has proposition 7 and the legislature will almost certainly

install some sort of sales tax in this next session, probably modeled after the disastrous California example.

When Mr. Durman asked me to "see the bigger picture", I responded that "for me this is the bigger picture".

When a small businessman in my community loses a job because I can't paint lines in a parking lot which I bought and paid for and which I pay taxes on...we've gotten awfully close to the Lewis Carroll scenario we thought was so idiotic. When I have to consult a lawyer before I paint lines in my parking lot its time to change how these laws come into being.

Now Mr. Smith, consider that the regulations which I face are the same regulations which the larger corporations face. I am on retainer to over 300 corporations. About sixty percent of my clients are manufacturing companies and the rest include radio stations, newspapers, food chains, advertising companies...just about every industry you can think of. We talk. We're not happy.

The only difference between my small business and theirs is that they feel it worse...one of my clients pays employees in 48 states and has 32 different OSHA 101 equivalents to file..... and they have no emotional ties to this country.

Adhering to the letter of the law is mandatory for businesses. You can't risk your business because you overlooked something. The result is that we spend an enormous amount of resources just making sure that the government doesn't take our businesses away from us because of oversight. We have tons of computers, buildings full of administrators, and herds of lawyers.

This makes us less competitive. When our resources are directed away from production and toward protecting our backsides, the competition eats us alive. So, I guess its not surprising that so many of the larger companies are shifting jobs overseas. After my introduction to your ADA, I'm going to send for some Mexico Chamber of Commerce literature myself.

I asked Mr. Durman why I shouldn't fire my employees and take my small business to Mexico and his only response was that he thought I might sleep with a shotgun under my pillow.

Mr. Smith, that might be a good trade. At least I'd be a free man in Mexico with a shotgun under my pillow rather than a puppet in a state-run society having to adhere to every idiotic rule coming out of Washington.

So my message to you is that you really screwed up.

01-01899

We need... desperately ...fewer, more well thought out laws. We particularly need fewer laws which help one sector of society at the cost of another sector.

It is claimed that there are 43 million handicapped people in the United States. That must mean that everyone with an ear-ache qualifies as being handicapped. If you subtract the blind, deaf, and mentally handicapped, and count only those who require wheel-chairs... those who could use the extra-wide parking space I am supposed to provide... you come up with a figure substantially less than 10 million. Now that's a lot of people, but it is still only 1/25 th of our population. And for that, every business in every corner of our country suffers, becomes less competitive, and has more reason to send jobs overseas.

More fundamentally, Mr. Smith, is the question of whether it is right to take a small group who "should" have access to anywhere they want to go and turn it into a "right" to access which then forces everyone else to give up some of their rights. Mr. Smith, that's simply not fair. My building is a private place of business. I do not invite the public. You have placed the perceived benefits of one small segment of society above mine. More importantly, you have placed their interests above the interests of business, and, ultimately above all other Americans.

Mr. Durman sounded incredulous that I would vote for a Democrat. Mr. Smith, the way I see it, my choice is between two Democrats.

So, while every bone in my body says your opponent shouldn't be in office, I have only a few tools to use to register my protest. One is this letter...and another is my vote.

You have my letter. If you want my vote, and the vote of businessmen like me, you've somehow got to convince us that you are on our side. And right now,

Mr. Smith you are not my friend.

Very truly yours,

(b)(6)

Re: Complaint Number XX

Dear Ms. XX

This letter constitutes the Department of Justice's Letter of Findings in response to your complaint filed with our office on August 3, 1992, against the State of Colorado under title II of the Americans with Disabilities Act (ADA).

Your complaint alleges that the State of Colorado requires that all individuals, including individuals with disabilities, who wish to vote absentee, must apply for an absentee ballot before each election. You state that you are unable to go to the polling place because of your disability and must use an absentee ballot. (You did not allege that your polling place is inaccessible, and the El Paso County Clerk and Recorder alleges that all polling places are accessible and that the Election Judges can bring the voting unit outside to the voter's car to assist an individual with a disability.) You allege that it is unfair that you must apply for an absentee ballot before each election.

The Civil Rights Division has completed its investigation of your complaint. Our investigation revealed that Colorado recently amended its absentee ballot law. The revised law permits an individual to file one application at the beginning of the year for absentee ballots for all of the elections to be held during the year.(1-8-103 (1) and (4), Colorado Revised Statutes, 1980 Repl. Vol., as amended)

Section 35.149 of the Department of Justice's regulation implementing title II (28 C.F.R. pt. 35) states that no qualified individual with a disability shall, on the basis of disability, be excluded from participation in or be denied the benefits of the services, programs, or activities of a public entity, or be subjected to discrimination by any public entity because the public entity's facilities are inaccessible to or unusable by individuals with disabilities. Your complaint, however, alleges that you are unable to vote at the poll because you are unable to

cc: Records CRS Friedlander Kaltenborn.(b)(6)

go to the poll, rather than because your polling place is inaccessible. The procedures utilized by the State of Colorado provide an equal opportunity to participate in elections for all individuals who are unable to get to the polling places. Accordingly, the Colorado staute does not discriminate against individuals with disabilities and does not violate title II of the Americans with Disabilities Act.

This letter constitutes our letter of findings with respect to your allegations of discrimination in your administrative complaint. If you are dissatisfied with our determination, you may file a private complaint in the United States District Court under title II of the ADA.

Under the Freedom of Information Act, 5 U.S.C. 522, we may be required to release this letter and other correspondence and records related to your complaint in response to a request from a third party. Should we receive such a request, we will safeguard, to the extent permitted by the Freedom of Information Act and the Privacy Act, the release of information which could constitute an unwarranted invasion of your or other's privacy.

Sincerely,

Stewart B. Oneglia
Chief
Coordination and Review Section
Civil Rights Division

T. 2-1-93

DJ 202-PL-00055

FEB 9 1993

Ms. Melanie Brown, AIA
Burt Hill Kosar Rittelmann Associates
1056 Thomas Jefferson Street, N.W.
Washington, D.C. 20007

Dear Ms. Brown:

This letter is in response to your inquiry regarding the requirements for detectable warnings applicable under title III of the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that are subject to the Act. This letter provides informal guidance to assist you in understanding the ADA accessibility standards. However, this

technical assistance does not constitute a legal interpretation of the application of the statute, and it is not binding on the Department.

In developing the ADA Accessibility Guidelines for Buildings and Facilities (ADA Guidelines), the Architectural and Transportation Barriers Compliance Board (Access Board) considered extensive public comment (14 public hearings and more than 10,000 pages of written comments submitted to the docket). It also considered research studies and documented field experience with detectable warnings materials. Comments submitted to the docket, available research, and the rationale for requiring the type of detectable warning surfaces specified in the guidelines are detailed on pages 35,437-38 of the preamble to the Access Board's ADA Guidelines. Copies of these pages are enclosed.

Your letter states there should "be some provision for an alternative means of providing a detectable warning surface." Section 2.2 of the ADA Guidelines contains a general equivalent facilitation provision that allows departures from particular technical and scoping requirements by the use of other designs and technologies that provide substantially equivalent or greater

cc: Records, Chrono, Wodatch, Breen, Lusher, FOIA, Library
udd:mercado:policy.letters.certif:lusher.wodatch.brown

01-01903

accessibility. This provision is discussed at pages 54-55 of the enclosed Title III Technical Assistance Manual. However, it is important to point out that the detectable warning surface required by the ADA Guidelines has unique characteristics that make it readily identifiable as a warning surface.

For projects undertaken by State or local government, title II of the ADA allows a public entity to use either the Uniform Federal Accessibility Standards (UFAS) or the ADA Guidelines without the elevator exemption. Both UFAS and the ADA Guidelines are enforceable standards under title II of the ADA.

Furthermore, since many cities and towns also receive Federal funds in one form or another, it is possible that section 504 of the Rehabilitation Act of 1973 may also be applicable.

Regulations issued by most agencies under section 504 identify UFAS as the operative standard to signify compliance with new construction and alteration provisions.

There are specific differences between the two standards with regard to detectable warnings. UFAS does not require any type of detectable warnings on curb ramps or other walking surfaces, whereas the ADA Guidelines, as you discussed in your letter, require a very specific pattern of raised truncated domes on curb ramps and at hazardous vehicular areas. However, when a public entity chooses to use either standard for a building, facility or project, it must follow that standard completely. Please refer to the Department's Title II Technical Assistance Manual (enclosed) to review other major differences between UFAS and ADAAG.

The Access Board issued proposed accessibility guidelines for newly constructed or altered facilities covered by title II of the ADA on December 21, 1992 (57 FR 60612). Final adoption of these guidelines by the Department of Justice will eliminate the current choice under title II between UFAS and the ADA Guidelines. In this notice, the Access Board briefly discusses the issue of detectable warnings (57 FR 60645) and announces the Access Board's intention to issue a separate notice proposing to suspend certain ADAAG provisions for detectable warnings. The public comment period for this proposed change to the guidelines will provide an excellent opportunity to address your concerns about detectable warnings and we encourage you to participate. For further information about the Access Board's efforts, please contact Mr. James J. Raggio, General Counsel, Access Board, 1331 F Street, N.W., Suite 1000, Washington, D.C. 20004-1111, (202) 272-5434.

I hope that you find the above information helpful. If you have further questions about the application of the Department's ADA regulations, please call our ADA Information Line on (202) 514-0301.

Sincerely,

John L. Wodatch
Chief

Public Access Section

John Wodatch, Director
Office on the Americans with Disabilities Act
Civil Rights Division
U.S. Department of Justice
Washington, D.C. 20530

Dear Mr. Wodatch;

I am an architect at the firm of Burt Hill Kosar Rittelmann Associates in Washington, D.C. Our firm designs large mixed-use commercial projects as well as institutional, health-care and residential projects. Our expertise also includes commercial renovation and historic preservation. Much of our work is subject to Title III of the Americans with Disabilities Act and the associated Accessibility Guidelines (ADAAG).

The ADAAG contain a requirement for detectable warnings (Ref. 4.29) which I wish to discuss. The specifications require raised truncated domes, about 1" in diameter, with a height of about 1/4", spaced approximately 2 1/2" on center. This detectable warning surface is to be installed at areas which generally occur within pedestrian walkways and sidewalks. I have received samples of materials which meet the specified criteria. Based upon these samples it is my belief that these materials pose a hazard to able-bodied pedestrians, especially those who wear heeled shoes, due to tripping or stumbling over the irregular relief surface.

As an architect who practices in a litigious society, I am concerned about the ADAAG specifications for detectable warnings. It is common experience within my profession that individuals have filed lawsuits against architects claiming injury resulting from tripping on sidewalks with less textural relief than specified in the ADAAG. For this reason, I would not have recommended such a paving material to my clients. However, it is now required by the ADAAG.

We find ourselves in a compromising situation: advise our clients to comply to the letter of the ADAAG and risk an injury lawsuit or not to comply and risk civil suit? For the time-being, we have been advising our clients to pose the question to their counsel and advise us accordingly in an effort to address the issue as best as possible. I have discussed these issues with various people at both the ADA Information Line and the Architectural and Transportation Barrier Compliance Board. All agree that the detectable warnings are a potential hazard. It was their advice that you be consulted on this matter.

There must be a more direct way to handle this issue. There should also be some provision for an alternate means of providing a detectable warning surface. Your response to this issue and any advice, interpretation or direction you can offer would be most appreciated.

Very truly yours,

BURT HILL KOSAR RITTELMANN ASSOCIATES

Melanie Brown, AIA
Associate

01-01907

T. 2/2/93
SBO:AMP:ca
DJ 204-11E-0

FEB 16 1993

The Honorable Wally Herger
Member, United States House of
Representatives
2400 Washington Avenue, Suite 104
Redding, California 96001

Dear Congressman Herger:

This letter is in response to your inquiry on behalf of your constituent, Diane Garcia, regarding her request for a waiver under the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that are subject to the Act. This letter provides informal guidance to assist you in responding to your constituent. However, this technical assistance does not constitute a determination by the Department of Justice of your constituent's rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

The ADA does not provide for the waiver of any of its requirements whether by Federal, State or local authorities. All covered entities are expected to fully comply with all applicable provisions. We are unaware of any waiver granted to San Francisco, but, as stated above, any such waiver would not be valid.

In response to Ms. Garcia's concern regarding the requirement for accessible restrooms in State offices, please note that, with respect to existing facilities, title II of the ADA (which covers State and local governments) does not contain any specific requirements for the number of restrooms that must be made accessible. Under title II, a State or local governmental entity must operate its programs and activities so that, when viewed in their entirety, such programs and activities are readily accessible to and usable by individuals with disabilities.

The concept of "program access" is discussed in sections 35.149 and 35.150 of this Department's title II regulation, 28 C.F.R. Part 35, and on pages 19-22 of the title II Technical Assistance Manual (copies enclosed). As stated in section

cc: Records CRS Friedlander Pecht.herger.ltr McDowney, FOIA, Breen

01-01908

35.150(a)(3) of the title II regulation, a title II entity is not required to take any actions that it can demonstrate would result in a fundamental alteration of its services, programs, or activities, or in undue financial and administrative burdens. In this instance, the public entity should ensure that accessible restroom facilities are available when restrooms are available to other members of the public.

In determining how to meet its responsibility to provide "program access", a public entity may look to the requirements of either the Uniform Federal Accessibility Standards (UFAS) (copy enclosed) or the ADA Accessibility Guidelines (Guidelines) for guidance. The Guidelines are attached as Appendix A to the title III regulation (copy enclosed). We would direct your attention to section 4.1.6(3)(e) of the Guidelines, which permits the installation of at least one unisex toilet/bathroom per floor in the same areas as existing toilet facilities where it is technically infeasible to comply with the new construction requirements in an existing facility. It is important, however, to keep in mind that, under title II, program access is the goal and that full compliance with UFAS or the Guidelines is only mandated in the case of new construction or where alterations are being undertaken independently from the requirement for achieving program access.

I hope this information is helpful to you in responding to your constituent's inquiry.

Sincerely,

James P. Turner
Acting Assistant Attorney General
Civil Rights Division

01-01909
October 28, 1992

Wally Herger, Congressman
2400 Washington Avenue Suite 410
Redding, CA 96001

Dear Congressman Herger:

Re: American Disability Act.
State Board of Equalization Lease.

I represent the owner of the building located at 2400 Washington Avenue and I am currently negotiating an extension of a lease for the State Board of Equalization at 2400 Washington Avenue.

The State Board of Equalization has been in this building since January 1977 and wishes to remain. The problem with the negotiations is complying with the American Disability Act. According to the State the ADA requires that we create Handicap restrooms.

On the floor in which the State Board of Equalization's offices are located, we have Men's and a Women's restrooms with two non-Handicap stalls in each. The owner is prepared to remove one stall in each of the existing restrooms and create Handicap restrooms; one for Men and one for Women. However, we are told by the State that in order to comply with the ADA and local codes, we need 2 stalls in each restroom and one has to be handicap. We do not have the space in the building to do this because tenants occupy the spaces on either side of the restrooms.

We understand that in San Francisco an exception to the ADA Regulations was given in order to keep the State in a building where stairs were unacceptable, so it appears that exceptions can be made.

We need your help in this matter urgently. It is our desire to cooperate and comply with the ADA Regulations to allow equal access to this private building, in which a public entity is located, but the requirement has to be realistic in view of the fact that this is an existing building.

01-01910

October 28, 1992
Page 2 Re: American Disability Act.

To create a Men's and Women's one stall Handicap accessible restroom the costs are prohibitive, approximately $6,000.00. However, the owner has indicated a willingness to cooperate. We need an exception to ADA Regulations from the State and Federal Government to allow the building to have one Men's and one Women's handicap stall only in each restroom with a side transfer in the space available in the building.

To reiterate, the State does not have the monies to relocate the State Board of Equalization. They have occupied this space for Sixteen (16) years and wish to continue their occupancy in this building.

We request that you give this matter your prompt attention.

Respectfully,

Diane Garcia, Broker
Property Manager

REF:ADA1092

01-01911

FEB 16 1993

The Honorable Craig Thomas
Member, U.S. House of Representatives
2632 Foothill Boulevard, Suite 101
Rock Springs, Wyoming 82901

Dear Congressman Thomas:

This letter responds to your inquiry on behalf of your constituent, XX regarding the enforcement of titles II and III of the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation or legal advice and it is not binding on the Department of Justice.

Please be advised that our staff has already contacted (b)(6) and spoken with XX directly on several occasions. XX has been advised that the provisions of both title II and title III of the ADA may be enforced by either private litigation or through action by the Department of Justice. XX has stated that XX does not intend to file a complaint with the Department at this time.

As (b)(6) was informed, title II of the ADA forbids discrimination against people with disabilities in the operations

of State and local governments. Although the provisions are similar to those of section 504 of the Rehabilitation Act of 1973, the ADA extends to all agencies or entities run by State and local governments regardless of whether they receive Federal financial assistance. Generally, the Act requires that programs, services, and activities operated by a public entity be accessible to persons with disabilities. This requirement includes the maintenance of accessible parking spaces as well as

cc: Records; Chrono; Wodatch; McDowney; Foran; FOIA; MAF.
:udd:pinckney\thomas2.cgl

other accessibility features. The Department of Justice is currently handling over 800 complaints against State and local governments alleged to be in non-compliance with the ADA.

A State or local government found violating the ADA may lose all Federal financial assistance. In addition, the Department of Justice may file suit in Federal district court. Private plaintiffs may also bring court action and, in addition to all of the remedies available to the Department, may receive an award of attorney's fees including litigation costs and expenses. For further discussion of the compliance procedures for title II see Subpart F of the enclosed title II regulation at pages 35721-35722 and 35713-35715.

We also explained to (b)(6) the provisions of title III of the ADA which prohibits discrimination against people with disabilities by private entities, including places of public accommodation and commercial facilities. The Department of Justice is currently handling over 850 title III complaints. Each complaint is assigned to an attorney to head an investigation of the matter, which may include document requests as well as on-site visits to establish whether a violation has occurred. In cases where a violation has been found, the Department of Justice is authorized to bring suite in Federal court. For further discussion of the remedies available under title III see section 36.504 of the enclosed title III regulation

at pages 35603 and 35589-35590.

Enclosed for your reference are copies of the titles II and III regulations and technical assistance manuals. In addition, you may refer your constituent to the ADA Information Line for more guidance on the provisions of the ADA. That number is (202) 514-0301.

I hope this information is useful to you in responding to your constituent.

Sincerely,

James P. Turner
Acting Assistant Attorney General
Civil Rights Division

Civil Rights Division
Department of Justice
P.O. Box 66738
Washington, D.C. 20035-9998

Dear Miss Foran:

I promised a FAX concerning the specific inadequacies I see in Sweetwater County pertaining to the adherence to the ADA law as passed by the United States Congress.

I have been requested by Wyoming State Senator Mark Harris to ask for a delay of any pending action

until our Sweetwater delegation has had a chance to introduce a law or laws to the Wyoming Legislature to clarify the State's position and provide a means of enforcing the law(s). He informed me he had contacted you with this proposal and I have agreed to request that delay.

I will keep you informed of the progress that is made and attempt to keep you informed of any violations I become aware of in the meantime, should action be needed by you.

Thanks for your help and rest assured I will remain vigilant to deliberate infractions of the law and will keep you updated on any future actions taken by the legislature.

Sincerely,

(b)(6)

01-01914

JAN 04 1992

December 29, 1992
(b)(6)
Rock Springs, WY 82901

The Honorable Richard Stacey
U.S. Department of Justice
United States Attorney District of Wyoming
P. O. Box 668
Cheyenne, WY 82003

Dear Sir:

I am writing this letter to clarify partial misinterpretation of my letter of December 2, 1992, to you concerning Rock Springs, Wyoming's apparent violations of sections of the ADA law.

Copies of news articles contain copies of the emergency ordinance that allowed enforcement of handicapped parking violations in all legally posted areas in Rock Springs. The city's parking control

officer is doing a very effective job. However, after such a long period had gone by when handicapped parking violations were not enforced due to a ruling by the Rock Springs City Attorney and adherence to his interpretation by the city council, conditions deteriorated severely.

The main problem that now exists concerning handicapped parking is that many of the businesses have let their restricted parking spaces deteriorate or never set them aside in the first place. The Plaza Mall, mentioned in my previous letter had four inches of snow pack and ice covering the markings on the tarmac. The manager had a streak of good luck and two days later the upright handicapped "vandalized" signs were back in place.

My statement concerning lack of knowledge, information or copies of the new emergency handicapped ordinance to key personnel in the Rock Springs Police Department could be attributable to administration or communication problems.

The problem I wish addressed is that no one wishes to accept the responsibility of enforcement set forth in Section III of the ADA law. The Rocket Miner, reporting on the last meeting of the mayor's ADA committee stated the committee was told to go back to basics and assume their ADA responsibilities as concerns only the city property. No one acknowledges the awareness of the existence, and few are aware of the definitions set forth in Public Law No. 101-336, Section 301, Paragraphs 6 and 7 regarding Private Entity and Public Accommodations. The many facets set forth in this same public law, according to my understanding, covering the needs of the handicapped, are not being fully enforced in the Southwest Wyoming area.

WHO IS RESPONSIBLE FOR ENFORCEMENT OF THESE LAWS?
01-01915

Penny Harvey, Rock Springs ADA Coordinator, in a Rocket Miner news release said, "We need to get back on track on what we are here for." She also said Mayor Oblock wants the committee to review and advise the city only on city buildings and city projects where ADA is involved. Mrs. Harvey said the committee should not be reviewing others people's buildings and applications. (Meaning, I presume, anything other than city or city related projects.)

No one has been willing to assume responsibility for meeting the requirements of enforcement of ADA Public Law No. 101-336 July 26, 1990, enacted by the Senate and House of Representatives of the United States of America.

Handicapped parking is but a small part of the ADA law and many more problems need to addressed.

I have made numerous attempts to contact the ADA Representative to whom you forwarded my information in the Department of Justice, to advise them of this information. No one has returned my telephone messages. Please see what the bottleneck is and advise me.

Sincerely,

(b)(6)

Palm Beach, Florida 33480

Dear Mr. Lavenhar:

In accordance with our telephone conversation of February 12, 1993, I enclose the regulation promulgated pursuant to title III of the Americans with Disabilities Act of 1990 (ADA), and a Title III Technical Assistance Manual and Supplement, which help explain the regulation.

I call your attention to page 3 of the main volume of the Technical Assistance Manual and pages 1-2 of the Supplement, which discuss some of the provisions concerning ADA coverage of your condominiums that we discussed.

I hope this information is helpful to you.

Sincerely,

Bebe Novich

Dear Sirs:

I shall appreciate your informing me whether any rules or laws have been enacted regarding the construction of physical improvements or facilities to assist handicapped or disabled persons.

Are these rules applicable to buildings owned by condominium associations ? And do they apply to all buildings regardless as to when they were constructed ?

Thank you for your assistance.

Yours truly,

Arthur Lavenhar

President, Mayfair House Condominium Asso. ,Inc.

T. 2/18/93
SBO:WRW:rjc
XX

FEB 26 1993

(b)(6)

Dear Mr. XX

This is in response to your letter to the Department of Justice concerning accessibility of hotels under the Americans with Disabilities Act (ADA). We apologize for the delay in responding.

The ADA authorizes the Department to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you in understanding how the ADA may apply. However, this technical assistance does not constitute a determination by the Department of Justice of your rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

Your letter describes a situation in which the only accessible rooms of a hotel are located in the more expensive new wing. You asked whether this violates the ADA because a disabled individual is not given the same choice of rates as is given to able-bodied individuals.

Title III of the ADA requires places of public accommodation such as hotels to remove barriers that are "readily achievable". Readily achievable means easily accomplishable and able to be carried out without much difficulty or expense. A hotel would not have to make every room accessible under the readily achievable standard. The duty to make readily achievable changes never extends to more rooms than the number of rooms that would be required to made accessible under the new construction standards contained in the ADA Accessibility Guidelines ("Guidelines"). Under the Guidelines, the number of accessible rooms that are required depends on the number of rooms in the hotel. See section 9.1.2 of the Guidelines, which is an appendix to the enclosed Department of Justice title III regulation.

Records, CRS, Worthen, Friedlander, Breen, FOIA
:UDD:Worthen:Letters.Gen.HotelADA

01-01919

Section 9.1.4(1) is particularly important in determining what the Guidelines require in new construction of hotels. That section requires that accessible hotel rooms be dispersed among the various types of available accommodations. Cost is specifically identified as one of the factors. Section 9.1.4(2) provides, however, that it will be deemed equivalent facilitation if all of the accessible rooms are multiple occupancy rooms, provided that such rooms are available at the cost of a single-occupancy room to an individual with disabilities who requests a single-occupancy room.

Based on the above, the hotel should make an adequate number of accessible rooms available at both the lower and higher prices, if it is readily achievable to do so. If it is not readily achievable to remove barriers in the lower priced rooms, then the hotel must permit a disabled patron to stay in the higher priced room at the less expensive rate, if the patron has requested the less expensive room. Such a system would constitute an alternative to barrier removal and would be required by 28 C.F.R. 336.305, if readily achievable.

I hope this information is helpful to you.

Sincerely,

Stewart B. Oneglia
Chief
Coordination and Review Section
Civil Rights Division

Enclosure

01-01920

(b)(6)
January 8, 1992

U.S. Department of Justice
Civil Rights Division
Coordination & Review Section
P.O. Box 66118
Washington, D.C. 20035-6118
ATTN: Stewart B. Oneglia

Dear Mr. Oneglia:

I have a question for you on the ADA!

A hotel in Las Vegas will advertise their room rates as follows:

A room in the new section is $55. for Friday/Saturday night.
That same room in the new section Sunday/Thursday is $45. per night.

A room in the old section Friday/Saturday is $35. per night.
That same room in the old section Sunday/Thursday is $20. per night.

The problem is: only the new section has the handicap wheelchair accessible room. The Las Vegas bound person thats a wheelchair user and must have a wheelchair accessible room doesn't have the choice as the ablebodied person has.

Is this a violation of the ADA? Seems like it is to me. Section 36.202(b) states: "prohibits services or accommodations that are not equal to those provided others."

The wheelchair user has no choice. Pay the higher rate or don't stay at that hotel. The ablebodied person has the choice, the high rate or the low rate.

It seems this is a case of 100% discrimination.

Your comments on this issue would greatly be appreciated.

Sincerely yours

(b)(6)

01-01921

MAR 2 1993

The Honorable Robert Dole
United States Senator
636 Minnesota Avenue
Kansas City, Kansas 66101

Dear Senator Dole:

This letter is in response to your inquiry on behalf of your constituent, Laurence M. Silver, who seeks information about the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

Mr. Silver's letter states that his company markets a restaurant table that can be adjusted to different heights to accommodate persons who use wheelchairs. It appears, from the diagram of the table Mr. Silver enclosed with his letter, that the table is free-standing. Mr. Silver asks whether the ADA requires or permits his company's table to be used. He states that one potential buyer claimed that using such tables would violate the ADA, because the table's height adjustment controls would be inaccessible to persons with disabilities.

The ADA regulation issued by this Department (enclosed) contains height requirements for fixed tables in newly constructed restaurants, if fixed tables are provided. Sections 5.1 and 4.32.4 of the enclosed ADA Accessibility Guidelines (ADAAG), at pages 35517 and 35514, require at least 5% of fixed tables to be between 28 and 34 inches from the finish floor. A table like Mr. Silver's may meet these height requirements, but the Department of Justice cannot certify or endorse any specific

products.

cc: Records; Chrono; Wodatch; McDowney; Bowen; Novich; FOIA;
MAF. \udd\novich\congress\dole

01-01922

The ADA regulation also includes requirements for controls and operating mechanisms. Section 4.27 of ADAAG requires operating controls to be accessible to persons with disabilities. Mr. Silver's tables appear to have height adjustment controls under the table, in a location that would be inaccessible to many persons with mobility impairments. However, as long as Mr. Silver's tables are free-standing, their installation should not violate the ADA, because the requirements for controls do not apply to free-standing tables. Section 5.1 of ADAAG, at page 35517 of the enclosed volume, states only that "fixed tables .. . shall be accessible." The ADAAG preamble (page 35415) further states that only equipment "fixed or built into the structure of the building" must comply with ADAAG standards. Therefore, the ADA's control standards should not bar use of Mr. Silver's tables.

I hope this information is helpful to you in responding to your constituent.

Sincerely,

James P. Turner
Acting Assistant Attorney General
Civil Rights Division

NATIONAL RESTAURANT ASSOCIATION
1200 17th Street N.W.
Washington D.C. 20036-=3097

11/17/92

Dear N.R.A.

I am the National Marketing Agent for a company dedicated to help alleviate some of the problems that a handicapped person faces on a daily basis.

The manufacturer, T.F.S. Inc. of Neodesha, Ks., has made available to the Food Service Industry, a very well built, pneumatically adjustable base capable of elevating the top from the standard 29" to a clearance of 33". The unit is designed in a fashion to prevent tipping if leaning occurs. The "A-Just-Rite" unit is a simple, relatively inexpensive, and cost effective solution to one of many changes made in the new laws. This unit is now available on a national basis via independent Representatives throughout the nation.

Here's the problem. While in contact with the Marriott Corp. in Baltimore, they claimed that they were in compliance with the new ADA regulations according to the information they received from you. They, in fact, were kind enough to send us the information. According to the diagrams enclosed, authorized by the N.R.A. and very directly indicated by your drawing, a table with a clearance height of 27" is acceptable. Obviously, this

was a guess, without any in depth research on your part.

After speaking with several manufactures of wheel chairs, the average height of an adult wheel chair to the armrest is 30" to 30-1/2". This is without padding or motors. According to manufacturers, the only wheel chair that will fit under 27" is a child size unit.

To put it bluntly, your misinformation has created havoc with many, many organizations that we have been in contact with. I am upset to know that an organization, with your great impact upon our industry, could print this useless and misrepresented information. It is very obvious, the people related to this article do not have the physical problems I relate to.

01-01924

In conclusion, as you are aware, the initiation of a new product line into the industry is very difficult and very expensive. Now, along with the information you have released, have created a new dimension in sales. One of discounting the so-called reliable information already in the Market Place.

Sincerely,

Laurence M. Silver CFSP

A-JUST-RITE ADJUSTABLE COLUMNS

(ILLUSTRATIONS OMITTED)

TFS
Quality Products - Quality Service
The model 2020 "A-JUST-RITE" columns with the turn of a knob, allows you to adjust the table height from 28" to 33", giving you the freedom to accommodate a number of seating requirements.

Strength by design features a 34" die cast aluminum base, 3" diameter aluminum column and 14" cast aluminum table base.

The spring tension column easily adjusts downward by simply loosening the knob on the side of the column and lightly pushing down in the center of the table. When knob is loosened in down position the top will automatically raise.

ONE YEAR WARRANTY:
T.F.S. warrants its products to be free from

defects in materials and workmanship for ONE YEAR from the date of delivery. During this period, at its option, T.F.S. will repair or replace, free of charge, products that prove to be defective.

The Model #2020 table column may be used with custom round tops up to 52" and square tops up to 48". By purchasing only the base, you can economically convert all of your existing tops to a "A-JUST-RITE" table. When ordering the #2020 for your custom tops or to convert your existing standard tables, all you need to give us is the weight and dimensions of your tops and we will adjust our column to your specifications accordingly.

T. 2/17/93
SBO:SHK:ca
XX

MAR 2, 1993

The Honorable Bob Graham
United States Senator
Post Office Box 3050
Tallahassee, Florida 32315

Dear Senator Graham:

This responds to your inquiry on behalf of your constituent, Mrs. (b)(6) concerning persons with disabilities and their use of rest area facilities on highways. Her specific concern has to do with the Americans with Disabilities Act (ADA) as it relates to the use of toilet facilities by individuals who need assistance when their only companion is a person of the opposite sex.

The ADA authorizes the Department to provide technical assistance to individuals and entities that have rights and

responsibilities under the Act. This letter provides informal guidance to assist you in responding to your constituent. However, this technical assistance does not constitute a determination by the Department of Justice of specific rights or responsibilities under the ADA and is not a binding determination by the Department of Justice.

Federal law establishes strict architectural accessibility requirements for new construction and alterations, including specifications for accessible toilet rooms. The Americans with Disabilities Act Accessibility Guidelines for Buildings and Facilities (ADAAG) is the standard for private buildings that was issued by the Architectural and Transportation Barriers Compliance Board (the Access Board) under title III of the ADA and has been adopted by the Department of Justice as the standard for places of public accommodation and commercial facilities covered by the Department of Justice's regulation implementing title III of the ADA. The ADAAG is published as Appendix A to the Department's title III regulation, 28 CFR Part 36.

Another federal provision, Section 504 of the Rehabilitation Act of 1973, as amended, requires that newly constructed or altered buildings and facilities of federal executive agencies comply with the Uniform Federal Accessibility Standards (UFAS), and the Department's regulation under title II of the ADA provides that State and local governments can follow either ADAAG or UFAS in new construction and alterations.

cc: Records CRS Friedlander Kaltenborn.grahm.con, FOIA, Breen McDowney
01-01927

However, neither ADAAG nor UFAS requires "unisex" restrooms. In issuing ADAAG, the Access Board considered recommendations that such facilities should be required in newly constructed buildings for individuals with disabilities who need assistance from another person. Although it did not adopt that recommendation, the Board included specifications for accessible unisex toilet rooms in the Appendix to ADAAG at A4.22.3, and suggested that they be provided in certain facilities, in addition to the accessible stalls required in multi-stall toilet rooms.

As explained in the enclosed Technical Assistance Manuals for titles II (II-3.6000) and III (III-4.2000), however, the ADA does require that covered entities make reasonable

modifications to policies, practices, and procedures where necessary to enable individuals with disabilities to participate, and this requirement would require a covered entity (a State or local government under title II or a public accommodation under title III) to permit a person of the opposite sex to assist an individual with a disability in a toilet room designated for one sex. Federal agencies are subject to the same requirement under section 504.

I hope this information is helpful to you in responding to (b)(6)

Sincerely,

James P. Turner
Acting Assistant Attorney General
Civil Rights Division

01-01928

(Handwritten)

Dec. 30, 1992

Dear Senator,

I am not aware of the new laws for the handicapped so perhaps this situation is addressed - if it is not. I want to make you aware so you can help eliminate the situation. We do

traveling on the Parkway Turnpikes
and Interstate Highways
of the state and the
U.S. When we stop
at the rest areas facilities
are available for the
physically handicapped,
however, there are no

01-01930

facilities for the
mentally impaired
who need help or
assistance from
a spouse or family
member of the
opposite sex. I

would appreciate any
help you can give
to those of us who
find this a real
problem while
traveling where rest areas
are crowded.

Sincerely,
(b)(6)

MAR 2 1993

The Honorable Tony P. Hall

U.S. House of Representatives
2264 Rayburn House Office Building
Washington, D.C. 20515-3503

Dear Congressman Hall:

This letter responds to your inquiry on behalf of your constituent, Ronald D. Martin, who asks whether the Americans with Disabilities Act of 1990 (ADA) requires his fitness center to provide membership to an individual who has HIV disease.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's requirements. However, it does not constitute a legal interpretation or legal advice, and it is not binding on the Department.

Gymnasiums, health spas, and other places of recreation are places of public accommodation covered by the ADA. For further discussion of the definition of a public accommodation, see section 36.104 of the enclosed title III regulation at pages 35594 and 35551.

As a place of public accommodation, a fitness center may not deny an individual, on the basis of a disability, such as HIV disease, the opportunity to participate in or benefit from its goods, services, or facilities. For further discussion of the definition of a disability, see section 36.104 of the enclosed regulation at pages 35593 and 35548-35550. For more information on the denial of participation from a public accommodation, see section 36.202 of the title III regulation at pages 35595 and 35556-35558.

Although a public accommodation is generally barred from excluding people with disabilities, a person may be excluded from the activities of a public accommodation if that person poses a direct threat, or significant risk, to the health and safety of others that cannot be eliminated by a reasonable modification of

cc: Records, Chrono, Wodatch, McDowney, Bowen, Novich, FOIA
Udd:Novich:congress:hall

01-01931

policies, practices, or procedures. However, the determination that an individual poses a direct threat to others may not be based on generalizations or stereotypes about the effects of a particular disability. Such a determination must rely on current medical evidence or the best available objective criteria. For further discussion, see section 36.202 of the title III regulation at pages 35595-35596 and 35560-35561.

The current medical evidence does not suggest that HIV can be contracted through casual contact, perspiration, or urine in an exercise room, sauna room, or pool. For this reason, a person with HIV disease should not pose a direct threat to others in a health club, and therefore cannot be denied membership on the basis of that disability. For more information about HIV transmission and prevention, you may call the U.S. Public Health Service Hotline, open 24 hours daily, at (800) 342-AIDS.

Mr. Martin expressed concern for the "disastrous effect" he believes admitting a person with HIV would have on his business. He claims that fitness center members and employees will be fearful of sharing facilities with such a person, although he presents no medical foundation for such fears. We suggest that Mr. Martin inform the center's employees and members, through training or dissemination of information, that a person with HIV or AIDS does not pose a serious risk to them in a fitness center setting. In any event, the ADA prohibits the use of unfounded fears as an excuse to exclude people with disabilities.
I hope this information is useful to your constituent in understanding the requirements of the ADA.

Sincerely,

James P. Turner
Acting Assistant Attorney General
Civil Rights Division

NEW FITNESS CENTERS, INCORPORATED
LIFE EXECUTIVE OFFICES: 7805 N. DIXIE DRIVE DAYTON, OH 45414
(513)890-9800

The Honorable Tony P. Hall
Rayburn House Office Building
Room 2264
Washington, D.C. 20515

December 23, 1992

Dear Congressman Hall,
We are faced with a tremendous problem that at present seems impossible to overcome. I am, and have been, in the fitness business for the past 25 years. The recent passing of the Americans With Disabilities Act (ADA) has resulted in our being placed in a very difficult position. We have been approached by a young man who has advised us that he has tested HIV Positive. He wants to purchase a membership in our facility and I am afraid his use and contact with other members will result in the total loss of our business.

Please understand that I am not without sympathy for this young man. Fourteen months ago I lost my 31 year old son to cancer, and I watched him suffer for almost seven years. His passing was the most horrible experience our family will ever face.

I tell you this because his weight loss, color, and general appearance was very close to those that have AIDS, and I am very familiar with the reception he received when we would be in public together. People would avoid sitting next to us in restaurants, stare at him as we would walk through stores, etc. The public is simply not ready to accept people who have even a vague look of the AIDS disease.

I talked to your office today and asked for any help or advise that could help in this situation. I realize that fitness centers (health spas) are covered under the ADA, but I do not believe that those that considered the bill were aware of the disastrous effects it will have on our business and industry. No member is going to swim in a pool or sit in a whirlpool with a person who is HIV positive. No member is going to sit in a steam room or sauna, or even exercise with a person who looks like he is very ill, or who advises those that ask that he/she is HIV

positive.

The result, if we are required to sell a membership to this man, will undoubtedly be a boycott of our business, by the public. Staff, who were told of his condition when he came into the facility to submit an application took a shower immediately

01-01933

after he left. I'm told they may all quit. Members, who will have to share the facilities, will quit coming and cancel their memberships. After 25 years of service to the communities, we will undoubtedly lose our business because the public is simply not going to accept this without reacting.

I do not know what, if anything, can be done but I find it very difficult to believe that my government has passed a law that is about to make me lose a lifetime of work. That my future, my livelihood, my life investment, and the employment of our employees, is dependent on a person or persons who we never even heard of a week ago. Where is the fairness and common sense?

Your office has agreed to send me additional information on the ADA. Lawyers we have talked to have indicated that there is probably nothing we can do because the law has been written. Your office did not disagree, so it appears my choice is to allow the purchase, and go out of business, or deny the membership and defend myself with the only guarantee that it will probably cost more than we can afford, and we will go out of business. Some choice. (b)(6)
XX

I realize, Congressman Hall, that you are very busy and certainly other matters are equally important. I am asking for you consideration in this matter, and possibly a ruling by whatever agency that oversees the administration of the ADA. While I know and understand the chances of infection are limited, that is NOT the perception the general public has and the reality is that they will not support my facility by buying memberships, they will not renew their memberships, and we (my Company and employees) will suffer the consequences. The public hysteria is real and alive across the Country, and I believe our entire industry will eventually be lost if common sense does not prevail, and prevail quickly.

Sincerely,

Ronald D. Martin
President

DOJ 202-PL-419

Douglas K. Smith, CPCA
City of Virginia Beach
Department of Permits and Inspections
Municipal Center
Virginia Beach, Virginia 23456-9039

Dear Mr. Smith:

This letter responds to your correspondence regarding the application of the Americans with Disabilities Act (ADA) regarding accessibility requirements for new construction of a self-storage facility.

The ADA authorizes the Department of Justice to provide technical assistance and information to individuals and entities who have questions about the Act or the Americans with Disabilities Act Accessibility Guidelines (ADAAG). This letter provides informal guidance to assist you in understanding and complying with the ADA accessibility standards. However, this technical assistance should not be viewed as legal advice or a legal opinion about your rights or responsibilities under the ADA.

All self-storage units in a newly constructed single story storage facility are required to be accessible in compliance with ADAAG minimum standards. Section 4.1.1 establishes the application of the minimum standards and also lists limited specific instances where full compliance is not required. Design and construction of all spaces and elements of public accommodations and commercial facilities must comply with all

applicable standards unless specifically allowed as exceptions.

Please feel free to contact the Public Access Section any time you have questions or need information. The Department maintains a telephone information line to provide technical assistance regarding the rights and obligations of individuals, businesses, agencies, and others covered or protected by the ADA.

Ms. Mary C. Becker
Administrator
17th Congressional District Office
380 Alvarado Street
Monterey, California 93940

Dear Ms. Becker:

This is in response to your inquiry on behalf of your constituent, (b)(6)

XX has requested a copy of the implementing regulations for the Americans with Disabilities Act (ADA) that pertain to medical care services. Please find enclosed a copy of the regulations for title II of the ADA, which apply to medical services provided by public clinics, public hospitals, and other public agencies and for title III of the ADA, which apply to

private health care providers. I have also enclosed a copy of this Department's Title II and Title III Technical Assistance Manuals, documents that provide further information about the requirements of the ADA.

(b)(6) has specifically inquired whether anything in the ADA regulations guarantees to people with disabilities the right to stay at home and receive medical care there rather than enter a long-term care facility. Neither the ADA nor the Department's regulations specifically address this issue.

If XX has further questions after reviewing the enclosed materials, she may call the Department's ADA Information Line at 202/514-0301 (Voice) or 202/514-0383 (TDD).

DJ 202-PL-476

MAR 1 0 1993

(b)(6)
Salem, Virginia 24153

Dear XX

Thank you for your recent letter in which you requested information regarding fire alarm system requirements under the Americans With Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that are subject to the Act. This letter provides informal guidance to assist you in understanding the ADA accessibility standards. However, this technical assistance does not constitute a legal interpretation of the application of the statute and it is not binding on the Department.

The ADA's requirements for public accommodations and commercial facilities generally became effective on January 26, 1992. Further discussion of the ADA's effective dates may be found in sections III-5.1000, III-6.1000, and III-8.8000 of the enclosed ADA Title III Technical Assistance Manual at pages 43, 48, and 67, respectively.

The ADA requires that visual alarms be provided in existing places of public accommodation that have alarm systems if it is readily achievable. For further discussion of this requirement, please consult section III-4.4000 of the enclosed Manual at pages 28-35.

In newly constructed or altered places of public accommodation and commercial facilities, alarm systems must meet the standards specified in section 4.28 of the ADA Accessibility Guidelines, which may be found on page 35,658 of the enclosed Department of Justice ADA Title III Regulation.

While the ADA does not require installation of fire alarms, if your local jurisdiction requires fire alarms in a specific

cc: Records, Chrono, Wodatch, Breen, Johansen, FOIA, Library
n:\udd\mercado\plcrtltr\(b)(6) .lkj

01-01941

building, you must install them in accordance with the enclosed regulation.

Title III of the ADA is enforced by the Department of Justice. State and local officials are responsible for enforcing local building codes, but are not authorized to enforce the ADA

on behalf of the Federal Government. For further information on enforcement and the relationship of the ADA to local codes, please consult sections III-8.0000 and III-9.2000 of the enclosed Manual at pages 64-67 and 68-69, respectively.

We hope this information is helpful to you.

Sincerely,

Philip L. Breen
Special Legal Counsel
Public Access Section

Salem, VA 24153

To Whom It May Concern,

I presently install fire alarm systems in various types of buildings including nursing homes under construction and existing. It has come to my attention that in 1994 the American Disabilities Act will go into effect with new guidelines for existing and new construction or alterations of nursing homes pertaining to fire alarm systems.

I need to find out how to obtain proper information on the new laws as well as to the dates that they will go into effect. I also need to know what structures will be effected or will "grandfather" into conformance and not have to upgrade. It would also be helpful to know exactly what jurisdiction that the inspections of life saftey programs (fire alarm system) fall under, as in Local, State or Federal Governments.

I am in urgent need of your response and it will be greatly appreciated.

Sincerely,
(b)(6)

01-01943

MAR 10 1993

The Honorable Charles S. Robb
United States Senate
493 Russell Senate Office Building
Washington, D.C. 20510-4603

Dear Senator Robb:

This letter is in response to your inquiry on behalf of your constituent, XX who seeks information about the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

(b)(6) expresses concern about the failure of his condominium board to install accessibility features, such as Brailled elevator buttons, accessible restroom stalls, and ramp handrails, at the condominium in which he lives. (b)(6) states that, in addition to its residential spaces, his condominium building houses at least five businesses that are open to the public.

Title III of the ADA, which covers places of public accommodation and commercial facilities, does not apply to strictly residential facilities. However, within residential buildings, areas that function as one of the ADA's twelve categories of places of public accommodation, and that are not intended for the exclusive use of tenants and their guests, constitute "places of public accommodation" within the meaning of title III, and must comply with the ADA. For instance, all of the establishments XX cites as being located in his condominium building, a retail store, beauty salon, dry cleaner, attorney's office, and real estate office, are covered by title III. The twelve categories of places of public accommodation are discussed in section 36.104 of the enclosed title III regulation, at page 35594, with corresponding preamble discussion at pages 35551-35552.

cc: Records, Chrono, Wodatch, Breen, McDowney, Novich, FOIA
Udd:Novich:congress.Robb

The parking, entrances, access routes, and restrooms serving those places of public accommodation would also be subject to ADA jurisdiction. However, areas and routes that serve only the residential areas of the facility are not covered by title III.

Title III of the ADA can be enforced by private litigation or by filing a complaint with the Department of Justice. If (b)(6) XX would like to file a complaint against any places of public accommodation in his condominium building, he should send any relevant information, including the names and addresses of the businesses he alleges to be in violation of the ADA, to:

Public Access Section
Civil Rights Division
U.S. Department of Justice
P.O. Box 66738
Washington, D.C. 20035-6738

All complaints should be in writing and should set forth, in as complete a manner as possible, the factual circumstances surrounding the complaint.

In addition, the Fair Housing Act, which contains nondiscrimination and accessibility requirements relating to persons with disabilities, may apply to both the residential and the common-use areas in XX condominium. For more information on the Fair Housing Act, (b)(6) may contact:

U.S. Department of Housing and
Urban Development
Office of Fair Housing
451 Seventh St., S.W.
Washington, D.C. 20410-2000
(202) 708-8041

I hope this information is useful to your constituent in understanding the requirements of the ADA.

Sincerely,

James P. Turner
Acting Assistant Attorney General
Civil Rights Division

(HANDWRITTEN) (b)(6)
McLean Virginia XX
Senator Charles S. Robb 19 January 1993
State Office
Old City Hall
1001 East Broad Street
Richmond Virginia 22102-1815

Sir:

I am writing to you on matters different than the past. They affect me and others on a daily basis. Specifically, that have to do with the handicap adaptability of the Condominium in which I live. Theoretically, the Condominium Board claims this is a private building. I claim no since there is a commercial member on the Board and at least five businesses interior to the building which are used by the public (store, beauty, salon, dry cleaners, attorney, real estate agents). There are no braille buttons on the elevators; interior and exterior doors are difficult to open regardless of age or disability; there are no handicap stalls in the bathrooms; and their are no handrails up ramps leading to the parking garages. I would have hoped that the Board and the people who live here would want to make these repairs because its the right thing to do not because they have to do it. During a recent condo election I was appalled to find people insensitive to the fact that the only exterior ramps are exposed to bad weather. A recent effort on my part to raise money for handicap improvements raised zero. Many of the condo board members are past and current state and federal government employees. I have refused to pay condo fees since this situation exists and asked for a rebate of moneys paid since the law was passed. I ask you and the other government officials below to assist me in finding those cognizant agencies relevant to enforcement

of the law. XX

MAR 11 1993

Mr. W. E. Olson
Engineering Supervisor
CR/PL, Inc.
P.O. Box 389
Nevada, Missouri 64772

Dear Mr. Olson:

At the Access Board hearings in Washington on March 9, your representative stated in her testimony that I had said at the American Society of Plumbing Engineers (ASPE) conference last year that a toilet seat height of 19 1/4" was acceptable under the Americans with Disabilities Act (ADA). I spoke to her afterwards to clarify, as I had explained to you at our two-hour meeting in December 1992, what I had actually said: an owner of a recently-constructed building that is not subject to the new construction requirements is not necessarily required to replace all 19 1/4" toilet seats for purposes of complying with the ADA's barrier removal requirement.

This issue had been raised at the ASPE conference by a member of the audience. He mentioned that the owner of a building constructed in 1990 or 1991 had just replaced all the toilets in the building, because they had seats at 19 1/4", rather than 19", and he was bringing the building up to new construction standards. In response, I said that existing buildings are subject to the requirement that barriers be removed if it is readily achievable to do so; and that, most likely, it would have been a wiser use of funds to make other types of changes to the building than to remove all the toilets when they

were only 1/4" off the new construction standard. This statement does not relate to requirements or tolerances for new construction.

Your representative seemed to understand my explanation after her testimony at the hearings. (An Access Board staff member who had also been at the ASPE meeting was present and

cc: Records; Chrono; Wodatch; Blizard; Bowen.
\udd\bowen\olson.ltr

confirmed my statements.) I would appreciate it if you would clarify this issue with other representatives of your company or your industry, if they are under the impression that this Department has stated that 19 1/4" height toilet seats are acceptable in new construction.

At our meeting with you and others in December, we had also answered several of the same questions your company raised in your two letters and at the Access Board hearings. As our staff has explained to you recently, we will answer the remaining questions that you have posed, to the extent we are authorized to do so, as soon as our resources and workload allow.

Sincerely,

L. Irene Bowen
Deputy Chief

01-01948

MAR 22 1993

Ms. Mary C. Becker
Administrator
17th Congressional District of California
380 Alvarado Street
Monterey, California 93940

Dear Ms. Becker:

This letter is in response to your inquiry on behalf of your constituent, Merlyn McAlister.

Ms. McAlister asked two questions about the Americans with Disabilities Act. She wanted to know the number and exact title of the law. The public law number is P.L. 101-336, and the title is the "Americans with Disabilities Act of 1990" (ADA). It appears in the United State Code at 42 U.S.C. 12101. She also wanted to know which government offices and private businesses must provide information or signs in braille.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's

requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

Title II of the ADA sets forth the obligations for state and local governments. Title II prohibits discrimination against persons with disabilities in all services, programs, and activities provided or made available by public entities. A public entity includes any department, agency, special purpose district, or other instrumentality of a state or local government.

cc: Records; Chrono; Wodatch; McDowney; Magagna; Burch; FOIA.
\udd\bethea\burch.pan

01-01949

Any newly constructed facility of a state or local government must be designed and constructed so that it is readily accessible to and usable by people with disabilities. In new construction, public entities have the choice of two accessibility standards to follow in constructing or altering a facility: the Uniform Federal Accessibility Standards (UFAS) or the ADA Accessibility Standards for Buildings and Facilities (ADAAG).

UFAS requires that: (1) signs designating permanent rooms and spaces be raised (Braille is not required) and must be mounted at a certain height and location; (2) all other signs (including temporary signs) must comply with requirements for letter proportion and color contrast, but not with requirements for raised letters or mounting height. See 4.30 of enclosed copy of UFAS at p. 47

ADAAG requires that: (1) signs designating permanent rooms and spaces (men's and women's rooms; room numbers; exit signs) have raised and Brailled letters; comply with finish and contrast standards; and be mounted at a certain height and location; (2) signs that provide direction to or information about functional spaces of a building (e.g. "cafeteria this way;" "copy room")

need not comply with requirements for raised and Brailled letters, but they must comply with requirements for character proportion, finish, and contrast. If suspended or projected overhead, they must also comply with character height requirements; (3) building directories and other signs providing temporary information (such as current occupant's name) do not have to comply with any ADAAG requirements. See section S 4.30 in enclosed copy of ADAAG, which can be found on p. 53.

State and local governments are required to operate each program so that, when viewed in its entirely, the program is readily accessible. While new buildings must be built in accordance with UFAS or ADAAG as explained above, existing buildings need not be modified (and braille signage need not be added) if a program as a whole can be made accessible by some method other than providing architectural access -- moving it to an accessible location, for example. Program access is required unless the state or local government can show that it would result in a fundamental alteration of the program or undue financial or administrative burden.

Title III of the ADA prohibits discrimination against persons with disabilities by any public accommodation or commercial facility. A public accommodation is any private entity that owns, leases or leases to, or operates a place of public accommodation. The following twelve categories of entities are places of public accommodations:
01-01950

1. Places of lodging.
2. Establishments serving food or drink.
3. Places of exhibition or entertainment
4. Places of public gathering.
5. Sales or rental establishments.
6. Service establishments.
7. Stations used for specified public transportation.
8. Places of public display or collection.
9. Places of recreation.
10. Places of education.
11. Social service center establishments.
12. Places of exercise or recreation.

A commercial facility is a facility intended for nonresidential use by a private entity and whose operations affect commerce. Factories, warehouses, office buildings and other buildings in which employment may occur would be included in this category.

For new construction and alterations of places of public accommodations and commercial facilities, the ADAAG requires that signs of different types comply with specific characteristics to accommodate persons with visual impairments. Signs designating permanent rooms and spaces are required to have raised and Brailled numbers and characters, making them tactually readable. In addition, elevator car controls, floor markings on elevator hoistways, and elevator identification adjacent to emergency communication are required to be tactually readable.

In existing buildings, ADA requires that public accommodations remove structural communication barriers where such removal is readily achievable. Readily achievable means easily to accomplish without much difficulty or expense. Adding braille designations in an elevator is an example of a change that will usually be readily achievable.

I have also enclosed a copy of the Department's Title II and Title III Technical Assistance Manuals with the current supplements which may be of further assistance in understanding the signage requirements under the ADA.

Sincerely,

James P. Turner
Acting Assistant Attorney General
Civil Rights Division

CONSTITUENT REQUEST

DATE: 1/25/93

STAFF MEMBER: kwc

CONSTITUENT NAME: Ms. Merlyn McAlister

ADDRESS: S & S Trophies
3112 Porter St.
Soquel, CA 95073

PHONE: 475-5512

Position/A Information/B B Bill Status/C Document/D

VIEWPOINT OR REQUEST

Issue/Subject The Americans with Disabilities Act.

Ms. McAlister has some questions about the Americans with Disabilities Act (ADA):

1. She would like to know the number of the ADA law, and the exact title of the law (is it still known as the Americans with Disabilities ACT now that it is a law, in other words?).

2. Ms. McAlister understands that certain businesses and public offices must, as a result of the ADA, begin posting signs in braille. She would like to know exactly what offices must provide information or signs in braille, please. This would include both the types of private businesses and public/government offices that would be required to do so.

01-01952

Mar 22, 1993

The Honorable Pete V. Domenici
United States Senate
427 Dirksen Senate Office Building
Washington, D.C. 20510

Dear Senator Domenici:

This letter is in response to your inquiry on behalf of (b)(6)

XX expressing her concerns about the potential dangers posed to persons with multiple chemical sensitivities by pesticides used by Terminix International.

The Americans with Disabilities Act of 1990 ("ADA") authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

(b)(6) suggests that when Terminix International applies pesticides to some area or facility, it place signs indicating what pesticides it has applied in order to warn persons with multiple chemical sensitivities. The obligations of title III of the ADA regarding existing facilities are imposed on private entities who own, operate, lease, or lease to places of public accommodation. One of those obligations is to make reasonable modifications in policies and practices when necessary to afford an individual with a disability an opportunity to participate in, or benefit from, the goods and services offered by a place of public accommodation.

The obligations of title III, however, do not apply to religious entities like the Paradise Hills United Methodist Church mentioned by XX While many churches and other religious organizations have voluntarily chosen to comply with the ADA, they are not required to do so.

cc: Records; Chrono; Wodatch; McDowney; Magagna; Contois; FOIA.
\udd\contois\cgl\domenici

01-01953

For your information, I am enclosing a copy of this Department's regulation implementing title III of the ADA and the Technical Assistance Manual that was developed to assist individuals and entities subject to the ADA to understand the requirements of title III. Section 36.102(e) of the regulation sets out the exemption for churches and religious organizations,

and this exemption is discussed at pages 4-5 of the Technical Assistance Manual. The requirement that public accommodations make reasonable modifications in their policies and practices to avoid discriminating against individuals with disabilities is set out in section 36.302 of the regulation, and is discussed at pages 22-24 of the Technical Assistance manual. In addition, there is some discussion of the issues related to persons with multiple chemical sensitivities in the preamble to the title III regulation, at page 35549.

I hope this information is useful to you in responding to (b)(6)

Sincerely,

James P. Turner
Acting Assistant Attorney General
Civil Rights Division

The Honorable Pete V. Domenici
United States Senate
Washington, D.C. 20510

Dear Senator Domenici:

Enclosed is a copy of a letter sent to Terminix International. Is there any thing you can do to lead to the two changes needed so those of us who are disabled by chemicals can have safe access to public places?

I will be glad to answer any questions you may have or provide more information.

Sincerely,

(b)(6)

01-01955

October 23, 1992
(b)(6)
Albuquerque, New Mexico 87114
XX

Dick Fagerlund, Inspector
Terminix International
5308 Coal SE.
Albuquerque, New Mexico 87108

Dear Mr. Fagerlund:

On August 12, 1992, I contacted your office regarding pesticides applied by your company at Paradise Hills United Methodist Church before August 7, 1992. You informed me you had used Demon 40 WP inside the building and Gold Crest Dursban 2.5 G granules outside. I sincerely appreciate the kind and helpful attitude shown by you and your staff when I called. I received the data sheets the following day (Enc. 1 and 2). Thank you for your prompt attention.

I am disabled as a result of chemical exposures, (including pesticides) and have Environmental illness also known as Multiple Chemical Sensitivity (Enc. 3 and 4). I am involved in an 18 year struggle to regain my health and achieve my goal to once again be gainfully employed. According to the American Disabilities Act of 1990, all of us who are disabled have the right to "full and equal enjoyment" of the goods, facilities, and services in public places. For me to safely access public places, I need the following:

1. Both public buildings and grounds to be posted with easily visible signs with the date of spraying and the chemicals used.
2. Use of Integrated Pest Management (Enc. 5).

The severe reaction experienced as a result of the pesticide exposure I received at the church on August 7, 1992, has made me realize I need to ask for safe access to public buildings and grounds and those private buildings being used for public service. For five years I have assisted in unloading the PHUMC Buying Club food truck at the church. To my knowledge during that period of time the church grounds and buildings were never treated with any chemical applied by a commercial pest control company.

On August 7, I spent 60 to 75 minutes at the church working predominately on the grounds, making numerous trips to and from the church storage room. I was wearing a cotton mask as protection from airborne chemicals and pollutants. After leaving the church, I developed a severe headache, muscle aches, extreme fatigue and was forced to go to

bed. I took a detoxify sauna and showered to try to feel better. I didn't. On Saturday morning, August 8, I went to Buying Club food distribution, I learned at that time the building we were using had been sprayed with pesticide recently, so I used great caution and stayed out of the building. However, I did walk on the grounds.

By Wednesday, August 12, I had not improved. I needed more information about what I had possibly been exposed to. The church secretary informed me that Terminix had serviced the church. After several phone calls to the church and the Terminix office I learned pesticides, besides being used inside the building, were also applied on the grounds.

I called the office of Jacqueline A. Krohn, M.D. in Los Alamos, the specialist treating me. She informed me I was doing all that could be done and there was not a way to quickly recover from pesticide exposure.

Later in the day during a phone conversation with a friend I realized I was still wearing the same shoes that I had been wearing at the church. They were soaked with pesticide and continued to expose me every time I wore them. I then knew why I did not get a decrease in symptoms after I took my detoxify saunas and showers. This pair of shoes had to be removed from the house and I may never wear them again. Two days later, the severe headache was gone. The muscle aching and severe fatigue continued for two more weeks. The only way I got any relief was to stay in bed.

During that period of time, I could do no housework, work in the yard or my vegetable garden. Also, my oldest daughter had extensive oral surgery. I was unable to care for her.

My husband, daughters and I have made many difficult, expensive and time consuming changes in our home and life style in order to improve my health and to allow me to live within our community. To say the least, it is painful and demoralizing to spend so much time, money, and energy to regain my health, then unknowingly be exposed to pesticides for such a short time and be forced to bed as a result.

If the two measures I have listed at the beginning of this letter would have been in place on August 7, I would have not been exposed to pesticides. I have every confidence that Terminix will assist those of us with chemical disabilities by being on the cutting edge in leading the way to set chemically safe standards for all commercial pest control companies. I want to take one last opportunity to thank you for your interest and caring cooperation in this matter.

Sincerely,

(b)(6)

Control No. X93021001461

Mar 22 1993

The Honorable Richard E. Neal
Member, U.S. House of Representatives
1550 Main Street
Federal Building
Springfield, Massachusetts 01103

Dear Congressman Neal:

This letter responds to your inquiry on behalf of your constituent, Mr. Dave Canegallo, regarding the percentage of accessible portable toilets required under title III of the ADA.

The ADA authorizes the Department of Justice to provide technical assistance to individuals or entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

The standards for accessible design that apply to accessible portable toilets are contained in the ADA Accessibility Guidelines for Buildings and Facilities (ADAAG), published as Appendix A of the Department of Justice's ADA Regulation under title III. ADAAG section 4.1.2(6) specifically addresses this issue. It states: ". . . For single user portable toilet or bathing units clustered at a single location, at least 5% but no less than one . . . unit complying with 4.22 . . . shall be installed at each cluster whenever typical inaccessible units are provided. . . . " Section 4.22 contains design requirements for accessible toilet rooms. Portable toilet units at construction

sites used exclusively by construction personnel are not required to be accessible.

Two copies of the Department's title III regulation are enclosed for the use of your constituent and your staff. Tabs have been inserted on the pages containing ADAAG sections

cc: Records, Chrono, Wodatch, Lusher, McDowney, FOIA, MAF
n:\udd\mercado\congltrs\neal.rhl

01-01961

MAR 22 1993

The Honorable Fred Upton
U.S. House of Representatives
1713 Longworth Office Building
Washington, D.C. 20515-2204

Dear Congressman Upton:

This letter is in response to your inquiry on behalf of (b)(6) , concerning the possibility of providing unisex toilet rooms in places of public accommodation.

The Americans with Disabilities Act of 1990 ("ADA") authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's requirements. However, it does not constitute a legal interpretation, and it is not binding on the Department.

Although the regulations issued by this Department under title III of the ADA (enclosed) do not require unisex toilet rooms, the regulations do allow provision of one accessible unisex room instead of accessible restrooms for each sex in some situations. For instance, under title III of the ADA, places of public accommodation are required to do whatever is readily achievable to make their facilities accessible to individuals with disabilities. If it is not readily achievable for some places of public accommodation to provide two accessible toilet rooms, then it may be sufficient to provide one accessible, unisex toilet room.

cc: Records, Chrono, Wodatch, McDowney, Bowen, Contois, FOIA.
Udd\Contois\cgl\upton

01-01962

Similarly, when places of public accommodation undertake alterations to their facilities, they are generally required to comply with the architectural standards set out in the appendix to the Department's title III regulation. These standards, known as the ADA Accessibility Guidelines ("ADAAG"), generally require that any room that is altered must be made accessible; however, at section 4.1.6(3)(e) they also provide that if it is technically infeasible to make a restroom that is being altered accessible, an accessible, unisex toilet room may be provided.

The Architectural and Transportation Barriers Compliance Board, also known as the Access Board, is the organization that is initially responsible for drafting and amending ADAAG. We have taken the liberty of forwarding (b)(6) letter to the Access Board, so that they may consider her comments and the possibility of proposing that ADAAG be altered or amended.

I have enclosed for your information a copy of the

Department of Justice's title III implementing regulation, which contains ADAAG, and a copy of the Department's Technical Assistance manual for title III, which contains a section discussing the requirements of ADAAG. I hope this information is useful to you in responding to your constituent.

Sincerely,

James P. Turner
Acting Assistant Attorney General
Civil Rights Division

XX

MAR 23 1993

(b)(6)
San Antonio, Texas 78212

Dear XX

I am writing in further response to your March 31, 1992, letter requesting information about the Americans with

Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements; however, it does not constitute a legal interpretation and it is not binding on the Department.

Your letter requests guidance in determining whether your organization, the Eastern Star Chapters, is exempt as a "private club" under Section 307 of the ADA. Your letter also states that this organization intends to meet occasionally in a two-story brick building.

In general, the ADA requires places of public accommodations to remove access barriers, such as entrance steps or stairs, where such removal is "readily achievable." The ADA defines readily achievable to mean easily accomplishable without much difficulty or expense. A number of factors are considered in determining whether barrier removal is readily achievable, including the nature and cost of the action required and the size and resources of the business involved.

Section 307 of the ADA exempts "private clubs" from the ADA's requirements. The Department's implementing regulation, 28 C.F.R. pt. 36 (enclosed), defines a private club as a "private club or establishment exempted from coverage under title II of the Civil Rights Act of 1964." 28 C.F.R. 36.104. Courts have considered a number of factors in determining whether a private entity qualifies as a private club under title II, including the degree of member control of the club's operations, the selectivity of the membership selection process, whether substantial membership fees are charged, whether the entity is

cc: Records, Chrono, Wodatch, Bowen, Nakata, FOIA, XX
Udd:Nakata:202.PL.237. (b)(6)

01-01965

operated on a nonprofit basis, the extent to which the facilities are open to the public, the degree of public funding, and whether the club was created specifically to avoid compliance with the Civil Rights Act. Even if a private entity is exempt as a "private club" under the ADA, however, the entity's facilities are still subject to the requirements of the ADA to the extent

that such facilities are made available for use by nonmembers as places of public accommodation. 56 Fed. Reg. 35552-53 (1991).

I have enclosed a copy of the Department's Title III Technical Assistance Manual, which may further assist you in understanding your obligations under the ADA. Private clubs are discussed at pages 5-6 of the manual. I hope this information is useful to you.

Sincerely,

L. Irene Bowen
Deputy Director
Public Access Section

Gentlemen:

Reference section 307 of the "Americans with Disabilities Act of 1990", please let me know if Eastern Star Chapters meeting in a two story brick building are exempt from provisions of said Act. Each Chapter meets on different days and times. Private "Clubs" I believe Eastern Star and Masonic organizations are exempt under 503(ILLEGIBLE) of this code

Do they not come under said section 307 and are exempt from the Act?

I certainly agree that anyone with a disability should be provided for to the extent of laws but was interested to see if the said law exempted disabilities.

May I hear from you?

Thank You

Sincerely,

(b)(6)

Dear XX

The Civil Rights Division of the Department of Justice has received your request for an interpretation of the Americans with Disabilities Act (ADA). The ADA authorizes the Department of Justice to provide technical assistance to entities that have rights or responsibilities under the Act. The Civil Rights Division will treat your inquiry as a request for technical assistance and will provide informal guidance to you. However, because of the large volume of requests for interpretations of the ADA, we are unable to answer your letter at this time.

Please be assured that the Division will respond to your letter expeditiously. We regret any inconvenience caused by our delay in responding and have enclosed for your information two documents on the ADA: "Title II Highlights" and "Title III Highlights."

Sincerely,

L. Irene Bowen
Deputy Director
Office on the Americans with Disabilities Act
Civil Rights Division

DJ 202-PL-81

MAR 30 1993

Mr. Lawrence P. Postol, Esq.
Seyfarth, Shaw, Fairweather & Geraldson
815 Connecticut Avenue, N.W.
Washington, D.C. 20006-4004

Dear Mr. Postol:

This letter is in response to your inquiry of February 3, 1992, regarding section 309 of the Americans with Disabilities Act ("ADA"), and its application to continuing legal education courses.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation or legal advice, and it is not binding on the Department of Justice.

Among other things, section 309 of the ADA applies broadly to all examinations or courses related to applications, licensing, certification, or credentialing for professional or trade purposes. Because continuing legal education courses are courses related to licensing, certification, and credentialing of attorneys, they fall within the ambit of section 309 whether or not they are required by a State bar. In addition, and independently of the requirements of section 309, if a continuing legal education course is offered by a private entity that owns, operates, leases, or leases to a place of public accommodation, the entity offering that course would have to meet all of the requirements generally applicable to public accommodations.

The basic requirement of section 309 is that examinations and courses be offered in a place and manner that is accessible to persons with disabilities. The specific requirements that a

course covered by section 309 may have to meet are set out in section 36.309(c) of the Department of Justice's regulation implementing title III. Any private entity that offers a course covered by section 309 must 1) provide the course in a facility that is accessible to individuals with disabilities or make

cc: Records, Chrono, Wodatch, Breen, Contois, FOIA
Udd:Contois:PL:postol

01-01970

alternative accessible arrangements, 2) make such modifications as may be needed to ensure that the place and manner in which the course is given are accessible to persons with disabilities, and 3) provide appropriate auxiliary aids and services for persons with impaired sensory, manual, or speaking skills.

I have enclosed copies of the Department of Justice's regulation implementing title III and its Technical Assistance Manual for title III. Section 36.309 of the regulation is set out at pages 35598-35599, and the requirements applicable to private entities offering examinations and courses are discussed in the Technical Assistance Manual at pages 39-41.

I hope this information is useful to you in understanding the requirements of the ADA.

Sincerely,

John L. Wodatch

Re: Section 309 of Title III

Dear Mr. Wodatch:

I would appreciate an informal opinion as to Section 309 of Title III of the Americans with Disabilities Act. My question is whether this provision covers continuing legal education ("CLE") courses? As you know, many professional groups and trade associations put on such courses to help keep their members, e.g. the District of Columbia bar. The question arises as to whether such courses are covered by Section 309 of the ADA.

In addition, does the answer change if the professional must have a certain number of CLE credits a year, although he need not take any particular CLE course? For example, the Virginia bar requires 12 hours of CLE credits. There are literally hundreds of approved courses. Does section 309 of the ADA cover such courses?

I would appreciate an informal opinion on this matter

as soon as possible.

APR 9 1993

The Honorable Austin J. Murphy
Member, U.S. House of Representatives
96 North Main Street
Washington, Pennsylvania 15301

Dear Congressman Murphy:

This letter is in response to your inquiry on behalf of your constituent, XX regarding the difficulty he has had in locating a nursing facility which will accept his XX as a patient. He requests information about (b)(6) rights under the Americans with Disabilities Act.

The Americans with Disabilities Act of 1990 ("ADA") authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

The ADA defines "disability" to include any mental or

physical condition that substantially limits a major life activity like walking, seeing, hearing, working, or caring for oneself. Thus, from the description provided by XX , it appears that his XX is a person with a disability. As an individual with a disability, (b)(6) is entitled to the protections of the ADA.

Among other things, title II of the ADA requires that all of the facilities and services operated by a state or local government be accessible to persons with disabilities, forbids the use of any eligibility criteria that screen out or tend to screen out persons with disabilities, unless such criteria are necessary for the operation of the facility or service, and requires reasonable modification of policies, practices and procedures unless it would result in a fundamental alteration of its program. Thus, if a privately owned health care facility were to maintain a rule against accepting persons with disabilities, it would violate title II of the ADA.

cc: Records, Chrono, Wodatch, McDowney, Magagna, Contois, FOIA
Udd:Contois:CGL:Murphy
01-01978

Title III of the ADA, which applies to privately owned places of public accommodation, including health care facilities, contains similar provisions. For instance, title III also forbids the use of eligibility criteria that screen out individuals with disabilities from fully and equally enjoying the goods and services offered by a public accommodation, unless such criteria are necessary for the operation of the public accommodation. Title III also requires reasonable modification of policies, practices, and procedures unless it would result in a fundamental alteration of the program.

If Mr. (b)(6) believes that his XX rights under the ADA have been violated, he may either file a complaint in Federal court to enforce the Act, or may file a complaint with the Department of Justice, which is authorized to investigate allegations of violations of both titles II and III. If wishes to file a complaint under title II against a publicly owned health care facility, he may address it to the Coordination and Review Section, Civil Rights Division, Department of Justice, Post Office Box 66118, Washington, D.C. 20035-6118. If wishes to file a complaint against a privately owned health care facility under title III, he may address it to the Public Access Section, Civil Rights Division, Department of Justice, Post Office Box 66738, Washington, D.C. 20035-6738.

For your information, I am enclosing a copy of this Department's regulations implementing titles II and III of the ADA and the Technical Assistance Manuals that were developed to assist individuals and entities subject to the ADA to understand the requirements of titles II and III. The ADA's definition of disability can be found in section 35.104 of the Department's title II regulation (page 35717), and is discussed on pages 3-4 of the title II Technical Assistance Manual. Title II's proscription of discriminatory eligibility criteria is set out in section 35.130(b)(8) of the regulation (page 35719), and is discussed on page 12 of the title II Technical Assistance Manual. Title III's proscription of discriminatory eligibility criteria is set out in section 36.301 of the regulation (page 35596), and is discussed on pages 21-22 of the title III Technical Assistance Manual.

Courthouse Square Building
Room 702
Washington, PA 15301

RE: (b)(6)

Dear Commissioner Ford:

I am in receipt of your letter of January 20, 1993, regarding XX . We did, in fact, review XX application for admission to the Health Center and had determined that we do not have the resource to adequately care for XX needs. In gathering pre-admission information in order to make the determination, it was learned that XX does have needs which require attention; however, we also determined that we do not have the resources to meet XX needs. At the time of referral, XX weight was such that we do not have beds which are able to accommodate XX . Additionally, other requirements on us, as a nursing home, would prevent us from meeting XX needs. We are required to, when people are alert, to get them up daily and out-of-bed for posturing purposes and also for participation in various activities and dining. This would require repeated transfer from bed to wheelchair and we, in fact, do not have beds, wheelchairs, or transfer equipment that would safely accommodate XX . I do realize that this individual has legitimate needs for care, but it was our determination that we could not adequately meet these needs. We would, in fact, have the same difficulties in attempting to deal with XX that the other nursing homes, who were asked to assess XX for admission, have determined that they are unable to meet XX needs.

We were informed that a recommendation had been made by Canonsburg Hospital that an aggressive weight reduction program be instituted for XX health and so that health care providers are able to better care for XX effectively. It is my understanding that XX was receiving in-home services through the Visiting Nurse Agency and I would trust that this resource would still be available. Hopefully, the recommendation from Canonsburg Hospital is being followed. We are certainly willing to reassess this individual for admission if there is a notable change in XX weight, which would allow us to adequately care for XX . At such point as this has been accomplished, we are more than willing to re-evaluate (b)(6) appropriateness for admission and would be willing to consult with the Visiting Nurse Agency and if indicated, to have

our staff do an in-home evaluation of this individual in order to assess our ability to care for (b)(6)

Should you have any additional questions, please feel free to contact me.

Sincerely yours,

Barry W. Parks, D.Ed., NHA

APR 9 1993

The Honorable Austin J. Murphy
Member, U.S. House of Representatives
96 North Main Street
Washington, Pennsylvania 15301

Dear Congressman Murphy:

This letter is in response to your inquiry on behalf of your constituent, XX regarding the difficulty he has had in locating a nursing facility which will accept his XX as a patient. He requests information about (b)(6) rights under the Americans with Disabilities Act.

The Americans with Disabilities Act of 1990 ("ADA") authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

The ADA defines "disability" to include any mental or physical condition that substantially limits a major life activity like walking, seeing, hearing, working, or caring for oneself. Thus, from the description provided by XX , it appears that his XX is a person with a disability. As an individual with a disability, (b)(6) is entitled to the protections of the ADA.

Among other things, title II of the ADA requires that all of the facilities and services operated by a state or local government be accessible to persons with disabilities, forbids the use of any eligibility criteria that screen out or tend to screen out persons with disabilities, unless such criteria are necessary for the operation of the facility or service, and requires reasonable modification of policies, practices and procedures unless it would result in a fundamental alteration of its program. Thus, if a privately owned health care facility

were to maintain a rule against accepting persons with disabilities, it would violate title II of the ADA.

cc: Records, Chrono, Wodatch, McDowney, Magagna, Contois, FOIA
Udd:Contois:CGL:Murphy
01-01978

Title III of the ADA, which applies to privately owned places of public accommodation, including health care facilities, contains similar provisions. For instance, title III also forbids the use of eligibility criteria that screen out individuals with disabilities from fully and equally enjoying the goods and services offered by a public accommodation, unless such criteria are necessary for the operation of the public accommodation. Title III also requires reasonable modification of policies, practices, and procedures unless it would result in a fundamental alteration of the program.

If Mr. (b)(6) believes that his XX rights under the ADA have been violated, he may either file a complaint in Federal court to enforce the Act, or may file a complaint with the Department of Justice, which is authorized to investigate allegations of violations of both titles II and III. If wishes to file a complaint under title II against a publicly owned health care facility, he may address it to the Coordination and Review Section, Civil Rights Division, Department of Justice, Post Office Box 66118, Washington, D.C. 20035-6118. If wishes to file a complaint against a privately owned health care facility under title III, he may address it to the Public Access Section, Civil Rights Division, Department of Justice, Post Office Box 66738, Washington, D.C. 20035-6738.

For your information, I am enclosing a copy of this Department's regulations implementing titles II and III of the ADA and the Technical Assistance Manuals that were developed to assist individuals and entities subject to the ADA to understand the requirements of titles II and III. The ADA's definition of disability can be found in section 35.104 of the Department's title II regulation (page 35717), and is discussed on pages 3-4 of the title II Technical Assistance Manual. Title II's proscription of discriminatory eligibility criteria is set out in section 35.130(b)(8) of the regulation (page 35719), and is discussed on page 12 of the title II Technical Assistance Manual. Title III's proscription of discriminatory eligibility criteria is set out in section 36.301 of the regulation (page 35596), and is discussed on pages 21-22 of the title III Technical Assistance Manual.

01-01981

MAR 10 1993

The Honorable Charles S. Robb
United States Senate
493 Russell Senate Office Building
Washington, D.C. 20510-4603

Dear Senator Robb:

This letter is in response to your inquiry on behalf of your constituent, XX who seeks information about the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

(b)(6) expresses concern about the failure of his condominium board to install accessibility features, such as Brailled elevator buttons, accessible restroom stalls, and ramp handrails, at the condominium in which he lives. (b)(6) states that, in addition to its residential spaces, his condominium building houses at least five businesses that are open to the public.

Title III of the ADA, which covers places of public accommodation and commercial facilities, does not apply to strictly residential facilities. However, within residential buildings, areas that function as one of the ADA's twelve categories of places of public accommodation, and that are not intended for the exclusive use of tenants and their guests, constitute "places of public accommodation" within the meaning of title III, and must comply with the ADA. For instance, all of the establishments XX cites as being located in his condominium building, a retail store, beauty salon, dry cleaner, attorney's office, and real estate office, are covered by title III. The twelve categories of places of public accommodation are

discussed in section 36.104 of the enclosed title III regulation, at page 35594, with corresponding preamble discussion at pages 35551-35552.

cc: Records, Chrono, Wodatch, Breen, McDowney, Novich, FOIA
Udd:Novich:congress.Robb

01-01944

The parking, entrances, access routes, and restrooms serving those places of public accommodation would also be subject to ADA jurisdiction. However, areas and routes that serve only the residential areas of the facility are not covered by title III.

Title III of the ADA can be enforced by private litigation or by filing a complaint with the Department of Justice. If (b)(6) XX would like to file a complaint against any places of public accommodation in his condominium building, he should send any relevant information, including the names and addresses of the businesses he alleges to be in violation of the ADA, to:

Public Access Section
Civil Rights Division
U.S. Department of Justice
P.O. Box 66738
Washington, D.C. 20035-6738

All complaints should be in writing and should set forth, in as complete a manner as possible, the factual circumstances surrounding the complaint.

In addition, the Fair Housing Act, which contains nondiscrimination and accessibility requirements relating to persons with disabilities, may apply to both the residential and the common-use areas in XX condominium. For more information on the Fair Housing Act, (b)(6) may contact:

U.S. Department of Housing and
Urban Development
Office of Fair Housing
451 Seventh St., S.W.
Washington, D.C. 20410-2000
(202) 708-8041

I hope this information is useful to your constituent in

understanding the requirements of the ADA.

Sincerely,

James P. Turner
Acting Assistant Attorney General
Civil Rights Division

(HANDWRITTEN) (b)(6)
McLean Virginia XX
Senator Charles S. Robb 19 January 1993
State Office
Old City Hall
1001 East Broad Street
Richmond Virginia 22102-1815

Sir:

I am writing to you on matters different than the past. They affect me and others on a daily basis. Specifically, that have to do with the handicap adaptability of the Condominium in which I live. Theoretically, the Condominium Board claims this is a private building. I claim no since there is a commercial member on the Board and at least five businesses interior to the building which are used by the public (store, beauty, salon, dry cleaners, attorney, real estate agents). There are no braille buttons on the elevators; interior and exterior doors are difficult to open regardless of age or disability; there are no handicap stalls in the bathrooms; and their are no handrails up ramps leading to the parking garages. I would have hoped that the Board and the people who live here would want to make these repairs because its the right thing to do not because they have to do it. During a recent condo election I was appalled to find people insensitive to the fact that the only exterior ramps are exposed to bad weather. A recent effort on my part to

raise money for handicap improvements raised zero. Many of the condo board members are past and current state and federal government employees. I have refused to pay condo fees since this situation exists and asked for a rebate of moneys paid since the law was passed. I ask you and the other government officials below to assist me in finding those cognizant agencies relevant to enforcement of the law. XX

APR 9 1993

The Honorable Larry Pressler
United States Senate
133 Hart Senate Office Building
Washington, D.C. 20510-4101

Dear Senator Pressler:

This letter is in response to your inquiry on behalf of Ms. (b)(6) concerning the Americans with Disabilities Act (ADA). XX has asked about the nondiscrimination requirements applicable to transportation provided by hotels, motels, and airports.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that have rights or responsibilities under the Act. This letter provides informal guidance to assist you in responding to Ms. XX However, this technical assistance does not constitute a determination by the Department of the rights or responsibilities of any individual under the ADA, and it is not binding on the Department.

Under the ADA, a transportation provider's obligations vary according to whether the service provider is a public or private entity, whether it offers fixed route or demand responsive

service, and whether it is primarily engaged in the business of providing transportation. A hotel or motel is a "place of public accommodation" subject to the requirements of title III of the ADA, the Department of Justice regulation implementing title III (28 C.F.R. Part 36), and the applicable sections of the Department of Transportation regulation implementing titles II and III (49 C.F.R. Part 37). Places of public accommodation that provide transportation to their clients or customers must remove transportation barriers in existing vehicles to the extent that it is readily achievable to do so, but they are not required to retrofit existing vehicles with hydraulic lifts.

cc: Records; Chrono; Wodatch; McDowney; Bowen; Blizard; FOIA.
n:\udd\blizard\control\pressler

01-01988

If a place of public accommodation that provides transportation for its customers or clients acquires new vehicles, it must comply with the requirements established by the Department of Transportation. These requirements vary depending on both the capacity of the vehicle and its intended use, as follows:

1) Fixed route system: Vehicle capacity over 16. Any vehicle with a capacity over 16 that is purchased or leased for a fixed route system must be "readily accessible to and usable by individuals with disabilities, including those who use wheelchairs."
2) Fixed route system: Vehicle capacity of 16 or less. Vehicles of this description must meet the same "readily accessible and usable" standard described in (1) above, unless they are part of a system that already meets the "equivalent service" standard.
3) Demand responsive system: Vehicle capacity over 16. These vehicles must meet the "readily accessible and usable" standard, unless they are part of a system that already meets the "equivalent service" standard.
4) Demand responsive system: Vehicle capacity of 16 or less. Vehicles of this description are not subject to any

requirements for purchase of accessible vehicles. However, "equivalent service" standard.

A system is deemed to provide equivalent service if, when the system is viewed in its entirety, the service provided to individuals with disabilities, including those who use wheelchairs, is provided in the most integrated setting appropriate to the needs of the individual and is equivalent to the service provided other individuals. The Department of Transportation regulation lists eight service characteristics that must be equivalent. These include schedules/response time, fares, and places and times of service availability.

An airport's obligations will vary according to whether it is publicly or privately operated. An airport operated by a public entity is subject to title II of the ADA, and this Department's regulation implementing title II (28 C.F.R. Part 35), which prohibit discrimination on the basis of disability in the programs, activities, and services of public entities. A privately operated airport is subject only to title III's requirement that new construction or alterations at the airport facility are accessible. A privately owned airport is not a "place of public accommodation"; therefore, it is not subject to the nondiscrimination requirements of title III.

Both public and private airports may also be recipients of Federal financial assistance, which would make them subject to the nondiscrimination requirements of section 504 of the Rehabilitation Act of 1973. In addition, airline operations at both public and private airports may be subject to the nondiscrimination requirements of the Air Carrier Access Act. The Department of Transportation has the primary responsibility for enforcing section 504 as it applies to airports, and has the sole Federal enforcement responsibility for the Air Carrier Access Act.

Title II of the ADA requires all public entities, including airports, to ensure that each program, activity, or service offered, when viewed in its entirety, is readily accessible to and usable by people with disabilities, unless the public entity can demonstrate that the changes required to provide accessibility will constitute a fundamental alteration of the entity's program or activity, or will result in undue financial or administrative burdens. Covered services offered at a public

airport may include services such as "off-airport" transportation provided through franchises or other contractual arrangements, as well as services provided directly by public employees at the airport.

For your information, I have enclosed copies of the Department's Technical Assistance Manuals for titles II and III of the ADA. These manuals contain additional information about the requirements of the ADA and the Act's enforcement procedures.

I hope that this information is helpful to you in responding to your constituent.

Sincerely,

James P. Turner
Acting Assistant Attorney General
Civil Rights Division

Enclosures (2)

01-01990

APR 9, 1993

The Honorable Jim Saxton
Member, U.S. House of Representatives
7 Hadley Avenue
Toms River, New Jersey 08753

Dear Congressman Saxton:

This letter is in response to your inquiry on behalf of your constituent, XX who seeks information about the Americans with Disabilities Act ("ADA"), the provision of public housing, and the provision of job training.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's provisions. It does not, however, constitute a legal interpretation, and it is not binding on the Department.

(b)(6) expresses concern that title II of the ADA is geared more towards protecting the rights of individuals who use wheelchairs than towards protecting the rights of individuals who have mental disabilities. This is not the case. Title II of the ADA prohibits discrimination on the basis of disability by any public entity. Section 35.103 of the enclosed title II regulation defines "disability" as any "physical or mental impairment that substantially limits one or more of the major life activities of such individual; a record of such an impairment; or being regarded as having such an impairment." The rights of those with mobility impairments and those with mental impairments are, therefore, equally protected under title II of the ADA.

cc: Records, Chrono, Wodatch, McDowney, Perley, FOIA, Magagna.
udd\perley\congress\saxton

01-01991

If (b)(6) is aware of any person who the State of New Jersey may be discriminating against because of his or her mental disability, he may file a complaint with the Department of Justice. XX should send any relevant information, including the names and addresses of the agencies he alleges to be in violation of the ADA, to:

Coordination and Review Section
Civil Rights Division
U.S. Department of Justice

P.O. Box 66118
Washington, D.C. 20035-6118

In addition, the Fair Housing Act, which contains nondiscrimination and accessibility provisions relating to people with disabilities, may apply to XX housing situation. For more information on the Fair Housing Act, XX may contact:

U.S. Department of Housing and Urban Development
Office of Fair Housing
451 Seventh St., S.W.
Washington, D.C. 20410-2000
(202) 708-8041

Nevertheless, (b)(6) should be advised that there are no affirmative obligations under the ADA to provide services or housing to those with disabilities. The Act was drafted to prohibit discrimination; there are no requirements regarding the provision of additional or specialized programs. To the extent that the State of New Jersey provides public housing and public job training programs, it may not discriminate against an individual on the basis of his or her particular disability. However, the State of New Jersey has no ADA obligation to provide additional or specialized programs for individuals with disabilities.

I hope that this information will be useful to you in responding to your client.

Sincerely,

James P. Turner
Acting Assistant Attorney General
Civil Rights Division

T. 3-31-93

APR 15, 1993

John C. Fannin III
President
Fire Protection Electronics, Inc.
2106 Silverside Road
Wilmington, Delaware 19810

Dear Mr. Fannin:

This letter responds to your request for information regarding the application of the Department of Justice's standards for accessible design under the Americans with Disabilities Act (ADA) to installation heights for visual alarm devices.

The ADA authorizes the Department of Justice to provide technical assistance and information to individuals and entities who have questions about the Act. This letter provides informal guidance to assist you in understanding and complying with the ADA's standards for accessible design. However, this technical assistance should not be viewed as legal advice or a legal opinion about your rights or responsibilities under the ADA.

You requested clarification of section 4.28.3 (6) of the standards for accessible design, found at Appendix A to the Department of Justice's regulation. This section provides technical requirements for the visual components of alarms and alarm systems. Specifically, this provision requires that the visual appliances of the alarm system be located 80 inches above the highest floor level within the space or 6 inches below the ceiling, whichever is lower. This requirement was based on data indicating that 80 inches was the most effective height for a 75-candela lamp. The additional requirement that the lamp of ceiling mounted devices be below the ceiling, rather than recessed into or flush with the ceiling, was included because the reflection of the flash on the ceiling surface is an important factor affecting the visibility of the visual alarm device. This data and reasoning is explained in the enclosed technical bulletin on visual alarms that was developed by the Architectural and Transportation Barriers Compliance Board.

cc: Records, Chrono, Wodatch, Magagna, Harland, FOIA, Library

The standards do not constitute a strict formula for design, nor are they intended to constrain design innovations that provide equal or greater access. Section 2.2 of the ADA accessibility standards, for example, expressly provides that "[d]epartures from particular technical and scoping requirements of this guideline by the use of other designs and technologies used will provide substantially equivalent or greater access to and usability of the facility." However, the ADA does not provide for a mechanism through which the Department of Justice, the Access Board, or any other entity may certify any specific variation from the standards as being "equivalent." Proposed alternate designs, when supported by available data, are not prohibited, but in any ADA enforcement action, the covered entity would bear the burden of proving that any alternative design provides equal or greater access.

We hope that the information above is of help to you. Please feel free to contact the Public Access Section any time you have other questions or need further information. The Department maintains a telephone information line to provide technical assistance regarding the rights and obligations of individuals, businesses, agencies, and others covered or protected by the ADA. This technical assistance is available by calling 202-514-0301 (voice) or 202-514-0383 (TDD) between 1:00 p.m. and 5:00 p.m., Monday through Friday.

Sincerely,

John L. Wodatch
Chief
Public Access Section

Enclosure

01-01996

The landmark Americans with Disabilities Act (ADA), enacted on July 26, 1990, provides comprehensive civil rights protections to individuals with disabilities in the areas of employment (title I), State and local government services (title II), public accommodation and commercial facilities (title III), and telecommunications (title IV). Both the Department of Justice and the Department of Transportation, in adopting standards for new construction and alterations of places of public accommodation and commercial facilities covered by title III and public transportation facilities covered by title II of the ADA, have issued implementing rules that incorporate the Americans with Disabilities Act Accessibility Guidelines (ADAAG), developed by the Access Board.

U.S. Architectural and Transportation Barriers Compliance Board

BULLETIN #2: VISUAL ALARMS

WHY are visual alarms required?
One American in a hundred has a severe hearing loss; nearly one in ten has a significant loss. Those who are deaf or hard-of-hearing--a growing percentage of our population, due largely to the growth in the numbers of older persons--depend upon visual cues to alert them to emergencies. A visual alarm provides them with the warning delivered to hearing persons by an audible alarm.

Audible fire alarms have been a standard feature of building construction since the life safety codes of the early 1900s. However, visible signals did not appear even in accessibility codes until 1980. Early standards required relatively dim flashing lights at exit signs--an alarm system that was effective only along an exit route.

As accessibility, life safety, and building codes were revised, however, they began to incorporate alarm technology that was developed for use in schools for persons who are deaf and in factories where ambient noise levels made audible alarms ineffective.

In passing the Americans with Disabilities Act in 1990, Congress specifically directed the Access Board to provide greater guidance regarding communications accessibility. Thus the ADA Accessibility Guidelines (ADAAG) require that where emergency warning systems are provided in new or altered construction, they must include both audible and visible alarms that meet certain technical specifications.

WHAT are visual alarms?
Visual alarms are flashing lights used as fire alarm signals. The terms visual alarm signal, visible signal device, and visible signaling appliance are used relatively interchangeably within the fire protection community; the National Fire Protection Association (NFPA) calls them visual notification appliances. There is no practical distinction between a visual signal and a visible signal. Although visual signals may be used for other purposes, the type described in this Bulletin is appropriate only for use as an emergency alarm signal.

(THE FOLLOWING APPEARS IN THE LEFT MARGIN OF PAGE ONE)

"The severity of hearing problems was strongly associated with age. Persons 65 and older constituted 69 percent of the population with the most severe hearing trouble...but only 8.7 percent of the population without hearing trouble."
Digest of Data on Persons with Disabilities (1984)

(A HAND DRAWN SKETCH OF A FIRE ALARM HAS BEEN OMITTED)

1

01-01997

There are two major categories of fire alarms:

* self-contained units, as exemplified by the single-station residential smoke detector unit-battery-operated or hard-wired to building electrical power--which produces an alarm signal at the fixture itself when activated by an integral sensing device, and

* building-wide systems, integrated--often zoned--alarms whose local signals are remotely initiated, either automatically from detectors or manually from pull-stations spread throughout a facility.

ADAAG requires that when either type is installed, it must have a visual alarm component.

WHERE are visual alarms required?
Facility design is subject to State and local ordinances that may both require and specify standards for emergency alarm systems. These regulations--building codes, life safety codes, accessibility codes, technical standards--are typically derived from national model codes and standards. The requirement for an emergency alarm system in new construction will be established by the applicable State or local building, life safety, or fire protection regulation. ADAAG does not mandate an emergency alarm system: its scoping provision at 4.1.3(14) simply requires that when emergency warning systems are provided, they shall include both audible and visual alarms that comply with 4.28.

Thus the requirement for an alarm system in a facility will trigger the

ADAAG technical specifications for alarms. ADAAG 4.1.3(14) Accessible Buildings: New Construction requires that visual alarms be installed if emergency warning systems are provided in a new facility. In existing buildings, the upgrading or replacement of a fire alarm system would also require compliance with ADAAG technical provisions for alarms.

Where the need for a visual alarm is not predictable, as in spaces used in common by building occupants or those generally available for use by the public, equivalent warning must be provided to every potential user. This is particularly important in those common use spaces where a persons may be alone. Because it is not always possible to fix the occupancy of a room or space or anticipate its use by a person with a hearing impairment, every common use room or space required to have an emergency alarm system must be served by both audible and visible signals.

ADAAG 4.28.1 General stipulates that alarm systems required to be accessible shall provide visible signals in restrooms, other general and common use areas, and hallways and lobbies. Common use areas include meeting and conference rooms, classrooms, cafeterias, photocopy rooms, employee break rooms, dressing, examination, and treatment rooms, and similar spaces that are not the assigned work areas of specific employees.
Where audible alarm signal appliances are installed in corridors and lobbies to serve adjacent public or common use rooms, individual visual alarm signal appliances must be installed in those rooms, since

(THE FOLLOWING APPEARS IN THE LEFT MARGIN OF PAGE TWO)

4.1.3 (14) New Construction.
If emergency warning systems are provided, then they shall include both audible and visual alarms complying with 4.28. Emergency warning systems in medical care facilities may be modified to suit standard health care alarm design practice.

4.28 Alarms.
4.28.1 General.
Alarm systems required to be accessible by 4.1 shall comply with 4.28. At a minimum, visual signal appliances shall be provided in buildings and facilities in each of the following areas: restrooms and any

other general usage areas (e.g., meeting rooms), hallways, lobbies, and any other area for common use.

3.5 Definitions.
Common Use.
Refers to those interior and exterior rooms, spaces, or elements that are made available for the use of a restricted group of people (for example, occupants of a homeless shelter, the occupants of an office building, or the guests of such occupants).

the warning provided by a visual signal, unlike that of a bell or other annunciation system, can only be observed within the space where it is installed. System designers and specifiers must therefore be especially sensitive to coverage issues. Dressing, fitting, and examination rooms for example, can be easily protected by an audible alarm outside the room or space. However, the customer or patient who has a hearing impairment will not be alerted unless the dressing room he/she is using is protected with a visual alarm in (or above, where partitions are not full height) the space. In general, it will not be sufficient to install visual signals only at audible alarm locations.

WHERE are visual alarms not required?
ADAAG does not require that areas used only by employees as work areas be constructed or equipped to be accessible. Thus, visual alarms are not required in individual employee offices and work stations. However, the provision of a visual alarm in the work area of an employee who is deaf or hard-of-hearing may be--like other elements of workplace accessibility--a reasonable accommodation under title |** of the ADA, which addresses employment issues. The potential for such future employee accommodations should be

considered when facility wiring is planned to facilitate a later connection to the building alarm system.

Mechanical, electrical and telephone closets, janitor's closets, and similar non-occupiable spaces that are used by employees but are not common use facilities nor assigned work areas are not required to have visual alarms.

WHAT technical provisions apply to visual alarms?
The technical provisions of ADAAG 4.28 Alarms include minimum standards for the design and installation of single-station and building-wide visual alarm systems. They are based upon research sponsored by the Access Board and other groups, principally Underwriters Laboratories (UL).

To be effective, a visual signal--or its reflection from adjacent walls and ceiling--must be of an intensity that will raise the overall light level sharply, but not so intense as to be unsafe to direct viewing at a specified mounting height. Technical criteria for visual alarm signal appliances are established in ADAAG 4.28.3 Visual Alarms (See sidebars).

In research sponsored by the Access Board, a high-intensity xenon strobe lamp was found to be the most effective in alerting persons with hearing impairments. White light was judged to be the most discernible; colored lamps (particularly red) were not effective even at extreme intensities. Lamp intensity is given in effective candela, measured at the source rather than at the receiving location.

Like a camera flash, the strobe produces a short burst of high-intensity light. The repetition of this pulse at a regular interval is the flash rate. Pulse duration--the interval between initial signal build-up and decay, measured across the lamp bell curve at a fixed intensity--is limited so that the signal flash is not temporarily blinding.

In the Access Board's research, ninety percent of the subjects in standard daylit rooms were alerted by a 75 candela signal mounted 50

(THE FOLLOWING APPEARS IN THE LEFT MARGIN OF PAGE THREE)

For information on employee accommodation under title I of the ADA, contact the Equal Employment Opportunity Commission (EEOC) ADA information line at
(800)669-3362 (Voice)
(800)800-3302 (TDD)

4.28.3 Visual Alarms.

Visual alarm signal appliances shall be integrated into the building or facility alarm system. If single station audible alarms are provided then single station visual alarm signals shall also be provided. Visual alarm signals shall have the following minimum photometric and location features:

(1)

The lamp shall be a xenon strobe type or equivalent.

(2)

The color shall be clear or nominal white (i.e., unfiltered or clear filtered white light). (see sidebars).

(3)

The maximum pulse duration shall be two-tenths of one second (0.2 sec) with a maximum duty cycle of 40 percent. The pulse duration is defined as the time between initial and final points of 10 percent of maximum signal.

(4)

The intensity shall be a minimum of 75 candela.

(5)

The flash rate shall be a minimum of 1 Hz and a maximum of 3 Hz.

3

01-01999

feet away. Thus a single visual signal meeting these ADAAG specifications could be expected to serve a large rectangular room or a 100-foot length of corridor if optimally located in the center of the space. Its lamp must be installed and oriented so that the signal or its reflection can spread throughout the space. To be effective, the signal must not be obstructed by furnishings, equipment, or room geometry.

Testing further indicated that flash rate cycles between one and three Hertz (flashes per second) successfully alerted subjects with hearing impairments; a 3 Hz signal appeared to be somewhat more effective. ADAAG thus requires flash rates within the 1 to 3 Hz range. Rates that exceed 5 Hz may be disturbing to persons with photosensitivity,

particularly those with certain forms of epilepsy. Information received during the development of the standards suggested that multiple unsynchronized visual signals within a single space may produce a composite flash rate that could trigger a photoconvulsive response in such persons. A rate in excess of 5 Hz should be avoided, either by raising the intensity and decreasing the number of fixtures or by synchronizing the flash rates of the fixtures. This is particularly important in schools, since children are more frequently affected by photosensitivity than are adults.

Mounting provisions were developed from NFPA signal criteria and UL smoke test findings. Strobes--whether projected from a wall or suspended from the ceiling--must be a minimum of 6 inches below the ceiling plane and at least 80 inches above the finished floor. To minimize the effect of smoke obscuration in the event of a fire, the lamp itself may not be mounted directly to the ceiling.

Provisions governing the spacing of visual alarms in hallways and corridors will generally require one fixture every 100 feet in linear corridors and hallways; somewhat closer spacing may result in enclosed rooms. In large-volume spaces, visual alarms may be suspended overhead or installed on perimeter walls if sightlines are unobstructed. In lengthy corridors, such as in shopping malls and large buildings, it is recommended that appliance spacing be maximized within the limits of the technical provision to minimize the effect of a composite flash rate on persons with photosensitivity. It is further recommended that the placement of visual signals along a corridor alternate between opposing walls to minimize the number of signals in a field of view.

In multipurpose facilities where bleacher seating, athletic equipment, backdrops, and other movable elements may at times be deployed or in warehouses and similar building types where devices would not be visible when installed at specified heights, optimal signal placement may require considerable study.

WHAT criteria affect the design of visual alarm systems?
Figures 1, 2, and 3 illustrate general fixture replacement and lamp coverage in schematic form. In general, it is recommended that visual alarm lamp intensity be maximized so as to require the minimum number of fixtures. Large, high-ceilinged spaces may best be served by suspended flash tubes of very high intensity (lamps up to 1000 candela are available). Smaller rooms--less than 75 feet in their maximum dimension--can be covered by a single, centrally located

(THE FOLLOWING APPEARS IN THE LEFT MARGIN OF PAGE FOUR)

The appliance shall be placed 80 in (2030 mm) above the highest floor level within the space or 6 in (152 mm) below the ceiling, whichever is lower.

(7)

In general, no place in any room or space required to have a visual signal appliance shall be more than 50 ft (15 m) from the signal (in the horizontal plane). In large rooms and spaces exceeding 100 ft (30 m) across, without obstructions 6 ft (2 m) above the floor, such as auditoriums, devices may be placed around the perimeter, spaced a maximum 100 ft (30 m) apart, in lieu of suspending appliances from the ceiling.

(8)

No place in common corridors or hallways in which visual alarm signalling appliances are required shall be more than 50 ft (15 m) from the signal.

Figure 1

Strobe lamp coverage

(FIGURE OMITTED)

Recommended

(FIGURE OMITTED)

Not recommended

visual alarm meeting ADAAG intensity specifications. For very small rooms, such as dressing rooms, a strobe of lesser intensity may well be sufficient as an equivalent facilitation.

Signal intensity and placement in very small and very large rooms and in spaces with high ceilings, irregular geometry, dark or non-reflective walls, or very high ambient lighting levels may best be determined by specialized consultants employing photometric calculation for system design rather than by a literal application of ADAAG specifications. For these reasons, ADAAG 2.2 Equivalent Facilitation permits alternative designs that achieve substantially equivalent or greater accessibility.

Lamp intensity (like sound) decreases in inverse relation to the square of its distance from the viewer. Thus, by varying lamp intensity and spacing, system designers can tailor an installation to the physical conditions of the space being served. It is impossible to provide specific guidance for the design of non-standard installations based upon the photometric calculations necessary to demonstrate equivalent facilitation. Such applications should generally be designed by experienced electrical engineers or fire alarm consultants under performance specifications for coverage and illumination levels derived from the technical provisions of ADAAG 4.28. As there is no process for certifying alternative methods (except in transportation facilities under DOT enforcement), the responsibility for demonstrating equivalent facilitation in the event of a challenge rests with the covered entity.

The American National Standard for Accessible and Usable Buildings and Facilities (CABO/ANSI A117.1-1992), reflecting current NFPA performance recommendations for visual alarms, stipulates lamp, installation, and spacing criteria at some variance with ADAAG technical specifications for visual alarms and with this advisory. ANSI Table 4.26.3.2(a), Room Spacing Allocation, suggests that an alarm installation of several low-intensity lamps within a room is the practical equivalent of a single high-intensity lamp serving that space. Given concerns for economy (lower-candela lamps are less expensive to purchase and connect) and lamp standardization within a building (lower-candela lamps are more available and simplify inventorying), specifiers may be motivated to standardize on a minimum-candela fixture, achieving coverage in large rooms by close spacing of low-intensity lamps. The Access Board strongly discourages this practice.
Where a single lamp can provide the necessary intensity and coverage, multiple lamps should not be installed because of their potential effect on persons with photosensitivity.

WHAT types of visual alarms are available?
All major suppliers to the fire protection industry manufacture visual signals, which are readily available to electrical contractors and others responsible for the installation of building alarm systems. Visual alarms incorporating smoke detectors and lamp-only signal appliances are supplied through standard sources, although some lamp intensities and visual alarm fixtures may not be commonly stocked.

Strobe lamps are commercially available in varying intensities up to 100 candela. Higher intensities can be provided by specialized manufacture.

(THE FOLLOWING APPEARS IN THE LEFT MARGIN OF PAGE FIVE)

2.2 Equivalent Facilitation. Departures from particular technical and scoping requirements of this guideline by the use of other designs and technologies are permitted where the alternative designs and technologies used will provide substantially equivalent or greater access to and usability of the facility.

Recommended placement in irregular room configuration

(FIGURE OMITTED)

Although an integrated audible and visual signal is available at about the same cost as an audible or visual signal alone, more visual signals than audible signals will be necessary for most applications. Careful attention to reflection from surfaces can increase light dispersion and coverage in both new and renovated structures.

WHAT visual alarm requirements apply to sleeping rooms in transient lodging facilities?
ADAAG 9.3.1 requires the installation of a visual alarm--or power outlet for a portable device--connected to the building alarm system in the sleeping rooms of units requires to be accessible under Section 9 Accessible Transient Lodging. Because guest room sizes are not large in such occupancies, the technical specification of 4.28.4 Auxiliary Alarms requires only that the signal--intended to alert persons who are awake--be visible in all areas of the room or unit. Portable units with a standard 110 volt electrical cord can be acquired from retailers of products for persons who are deaf and hard-of-hearing.

Visual alarms are not the technology of choice for awakening sleeping persons, however. A UL study concluded that a flashing light more than seven times brighter than that needed to alert office workers (110 candela vs. 15 candela at 20 feet) would be required to arouse a person who was asleep. Alarm system designers are advised to consider the UL findings if visual alarms are to be employed to warn sleeping persons of emergencies.

ADAAG does not establish standards for portable items or auxiliary aids. However, devices that employ technologies other than visual signalling may offer equivalent or superior warning for sleeping guests who have hearing impairments. For example, a signal-activated vibrator was found to be much more effective in alerting sleepers than were the visual signals tested in the UL research. Such devices are commonly available and may be connected to or activated by a building alarm system. Care must be taken that notification devices intended to signal a door knock or bell are separately wired.

WHY is there an exception in the scoping requirements of 4.1.3(14) for "standard health care alarm design practice"?
In medical care settings where a supervised emergency evacuation plan is in place, it is usually not desirable to install alarms in patient rooms or wards. In such occupancies, personnel responsible for ensuring the safe egress of patients will respond to an intercom message or other signal that is not intended to alert or alarm patients incapable of independent evacuation. The requirements for visual and

audible alarms may be modified to suit industry-accepted practices for such facilities.

Bulletin #2 December 1992

U.S. Architectural and Transportation Barriers Compliance Board
The Access Board/1331 F St., NW #1000/Washington, DC 20004
TEL:(800)USA-ABLE (202)272-5434 TDD: (202) 272-5449

(THE FOLLOWING APPEARS IN THE LEFT MARGIN OF LAST PAGE)

4.28.4 Auxiliary Alarms.
Units and sleeping accommodations shall have a visual alarm connected to the building emergency alarm system or shall have a standard 110-volt electrical receptacle into which such an alarm can be connected and a means by which a signal from the building emergency alarm system can trigger such an auxiliary alarm. When visual alarms are in place the signal shall be visible in all areas of the unit or room. Instructions for use of the auxiliary alarm or receptacle shall be provided.

9.3 Visual Alarms, Notification Devices and Telephones.
9.3.1 General.
In sleeping rooms required to comply with this section, auxiliary visual alarms shall be provided and shall comply with 4.28.4. Visual notification devices shall also be provided in units, sleeping rooms and suites to alert room occupants of incoming telephone calls and a door knock or bell. Notification devices shall not be connected to auxiliary visual alarm signal appliances [...].

9.3.2 Equivalent Facilitation.
For purposes of this section, equivalent facilitation shall include the installation of electrical outlets (including outlets connected to a facility's central alarm system) and telephone wiring in

sleeping rooms and suites to enable persons with hearing impairments to utilize portable visual alarms and communication devices provided by the operator of the facility.

This technical assistance is intended solely as informal guidance; it is not a determination of the legal rights or responsibilities of entities subject to titles II and III of the ADA.

DJ 202-PL-320

APR 19 1993

Mr. Joseph A. DiCicco
Office of Building Inspector
1 Turner Lane
Randolph, Massachusetts 02368-3927

Dear Mr. DiCicco:

This letter is in response to your inquiry of August 31, 1992, about the application of the Americans with Disabilities Act to certain rooms and meeting halls owned or operated by the Town of Randolph.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation or legal advice, and it is not binding on the Department of Justice.

In general, title II of the ADA requires all State and local governments to make all of the programs and services that they provide to their citizens accessible to persons with disabilities. This requirement, commonly referred to as "program access," means that a State or local government must operate each service, program, or activity so that when it is viewed in its entirety, it is accessible to persons with disabilities.

In addition, in order to ensure that State and local governments take the necessary steps to make their programs and services accessible to persons with disabilities, title II of the ADA and its implementing regulation (enclosed) require all State and local governments to complete, by January 26, 1993, a self-evaluation of all of their current services, policies and practices. Among other things, as part of this self-evaluation State and local governments must determine whether any physical

barriers to access bar individuals with disabilities from any of the programs or services it provides to its citizens.

cc: Records, Chrono, Wodatch, Magagna, Contois, FOIA
Udd: Contois:PL:Dicicco

The requirements relating to the basic requirement of program access are discussed on pages 35,708-35,709 of the enclosed title II regulation. This requirement is also discussed in the enclosed title II technical assistance manual on pages 19-20. The self-evaluation requirements are discussed on pages 35,701-35,702 of the enclosed title II regulation, and on pages 40-43 of the technical assistance manual.

In regard to your question about whether the ADAAG or UFAS requirements apply to your facilities, the title II regulation, section 35.151, allows public entities to choose which set of standards to follow. Moreover, you may choose to follow one set of standards in one building, and the other in another building. Section 35.151 is discussed in more detail on pages 35,710-35,711 of the title II regulation. The technical assistance manual also discusses the choice you may make, and the differences between ADAAG and UFAS, on pages 23 through 32.

I hope this information is useful to you in understanding the requirements of the ADA.

Sincerely,

Joan A. Magagna
Deputy Chief
Public Access Section

The Access Board

Town of Randolph
Office of
BUILDING INSPECTOR

1 TURNER LANE
RANDOLPH, MASS. 02368-3927
(617) 963-4540

August 31, 1992

U.S. Architectural and Transportation Barriers Compliance Board
1111 18th Street, N.W.; Suite 501
Washington, D.C. 20036-3894

Gentlemen and Ladies:

In the Town of Randolph, Massachusetts, the writer has been appointed to act as the A.D.A. coordinator.

After discussion with individuals of the Boston Office of H.U.D. and the Commonwealth's office Communities and Development , many questions remain unanswered regarding facilities in the Town of Randolph.

The following facts are presented for review and historical purposes so that you may answer, or refer, the questions enumerated further along in this letter.

1. The Town of Randolph employs about 220 employees, plus the school department employs 400 persons, and the Randolph Housing Authority (which has three facilities at three different locations) employs an additional six persons. The housing authority buildings are 100% subsidized by the Commonwealth of Massachusetts, who also pay the salaries of the said six persons.

2. In the three different and separate complexes are four miscellaneous halls whose occupancy capacities vary. One room has a maximum capacity of 180 persons; another has 200 persons; another 60 persons; and the last has a capacity of 75 persons for the meeting rooms/halls. Two of these places of assembly are open to the public and two are not.

Question 1:

Under the ADA or any other federal law or laws, must the two miscellaneous halls, open to the public be surveyed for ADA or any other applicable accessible requirements?

Question 2:

Under the ADA or any other federal law or laws, must the two remaining miscellaneous hall not open to the public be surveyed for ADA or any other accessibility requirements?

Question 3:

Is Title II of the A.D.A. in force in these four meeting rooms?

Question 4:

If these four meeting rooms or any lesser amount must be inspected, which requirements are applicable - A.D.A.A.G. or U.F.A.S. - and under which authority, law, rule, etc.?

If you do not have jurisdiction over any of these questions, etc., please forward this letter to the proper authority having jurisdiction. An early reply would be greatly appreciated. If you wish any further information., please call the Randolph Building Department, at (617) 963-4540 between the hours of 8:00 AM to 9:30 AM or 3:00 PM to 4:30 PM, Monday thru Friday. These are the hours when you would be

able to speak directly with Mr. Joseph L. Pace, Building Commissioner, Ms. Mary C. McNeil, Local Inspector, or the writer, Local Inspector; at other times, we may not be in the office.

Thank you very much for your cooperation in this matter.

Very truly yours,

Joseph A.DiCicco,
Architectural Access and
American Disabilities Act Surveyor

JAD/mcm

Office Manager/Clerk, B. of Selectmen,
Municipal Space Needs Committee,
Randolph Housing Authority and Director,
Building Department (4).

APR 26 1993

The Honorable J. James Exon
United States Senate
528 Hart Senate Office Building
Washington, D.C. 20510

Dear Senator Exon:

This letter is in response to your inquiry on behalf of your constituent, XX concerning the Americans with Disabilities Act ("ADA") that was sent to this office and to the Equal Employment Opportunity Commission. (b)(6) requested information about the ADA and expressed some concerns about the financial impact that the ADA may have on the resources

of the Ponca School Board in Ponca, Nebraska.

The ADA authorizes this Department to provide technical assistance to individuals and entities that have rights or responsibilities under the ADA. Therefore, this letter provides informal guidance to assist you in responding to XX . However, this technical assistance does not constitute a legal interpretation, and it is not binding on the Department of Justice.

Title II of the ADA, which became effective on January 26, 1992, prohibits discrimination on the basis of disability and governs the operations of local and State governments. Accordingly, the Ponca School Board is covered by title II and is required to comply with its provisions. If the Ponca School system receives Federal financial assistance from any Federal agency, then the school system also is subject to section 504 of the Rehabilitation Act of 1973, which prohibits discrimination on the basis of handicap in federally assisted programs and activities.

cc: Records; Chrono; Wodatch; McDowney; Bowen; Delaney; FOIA.
\udd\delaney\congress\exon

01-02008

Title II requires that all programs, services, and activities of a public entity be made available without discrimination on the basis of disability. A public entity is not necessarily required to make each of its existing facilities accessible but it must ensure that its services, programs, or activities, when viewed in their entirety, are readily accessible to and usable by individuals with disabilities. See section 35.150(a) of the enclosed title II regulation. Accordingly, it may be possible for the Ponca School Board to comply with this obligation without necessarily making all of its existing buildings physically accessible. Services and programs may be made available in alternate locations, or special arrangements

can be made to afford services to persons with disabilities in accessible parts of a building. See also section 35.150(b).

The title II regulation requires all public entities, regardless of size, to conduct a self-evaluation or review of its services, policies, and practices by January 26, 1993, to identify inaccessible facilities and to develop solutions to make the programs, services, and activities accessible. See section 35.105. In the event that structural changes to existing facilities are necessary in order to make a program, service, or activity accessible to persons with disabilities, a public entity that employs fifty or more employees must develop a transition plan by July 26, 1992, setting forth the steps necessary to complete those changes. Any structural changes outlined in the transition plan must be completed as expeditiously as possible but no later than January 26, 1995. See section 35.150(d) of the title II regulation.

The title II regulation, like the section 504 rule, does not require a public entity to take action that it can demonstrate would result in a fundamental alteration in the nature of its programs or activities or in undue financial and administrative burdens. The decision that compliance would result in such burdens must be made by the head of a public entity after considering all resources available for use in the funding and operation of the service, program, or activity, and must be documented by a contemporaneous written statement of the reasons for reaching that conclusion. If making a program fully accessible would result in such burdens, a public entity is required to take any other action that would not result in such burdens but would nevertheless ensure that individuals with disabilities receive the benefits or services provided by the public entity.

The title II regulation makes it clear that all facilities designed, constructed, or altered by, on behalf of, or for the use of a public entity, must be readily accessible and usable by individuals with disabilities if the construction or alteration began after January 26, 1992. See section 35.151. Section 35.151(c) of the title II rule permits a public entity, when

altering or constructing a building or facility, to use either the Uniform Federal Accessibility Standards (UFAS) or the ADA Accessibility Guidelines (ADAAG), which are an appendix to the enclosed title III regulation.

I hope this information is helpful in responding to your constituent.

Sincerely,

James P. Turner
Acting Assistant Attorney General
Civil Rights Division

Enclosures (2)

01-02010

APR 26, 1993

The Honorable Dan Glickman

Member, U.S. House of Representatives
401 N. Market St., Room 134
Wichita, Kansas 67202

Dear Congressman Glickman:

This letter responds to your inquiry on behalf of your constituent, Jim Lauterbach, regarding the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation or legal advice and it is not binding on the Department of Justice.

In your letter, you indicated that Mr. Lauterbach plans to renovate an existing building for purposes of turning it into a private club, and needs information regarding his responsibility to make the restroom accessible under the ADA. Title III of the ADA prohibits discrimination against people with disabilities by private entities, including places of public accommodation and commercial facilities. Private clubs are exempt from title III of the Act. 28 C.F.R. Sec. 36.102(e).

Before your constituent concludes that his planned renovations are exempt from ADA requirements, however, he should be certain that the anticipated occupant of the renovated site is a private club as that term is defined by the ADA. Under the title III regulation (28 C.F.R. Sec. 36.104), the term "private club" is defined as a private club or establishment exempted from coverage under title II of the Civil Rights Act of 1964 (42

cc: Records; Chrono; Wodatch; McDowney; Magagna; Foran; FOIA.
\udd\foran\glickman.con

01-02011

U.S.C. 2000a(e)). In determining whether a private entity qualifies as a private club under title II, courts have considered such facts as the degree of member control of club operations, the selectivity of the membership selection process, whether substantial membership fees are charged, whether the entity is operated on a nonprofit basis, the extent to which the facilities are open to the public, the degree of public funding, and whether the club was created specifically to avoid compliance with the Civil Rights Act. See Title III Technical Assistance Manual at pages 5-6; preamble to title III regulation at 35552-35553 (enclosed).

If your constituent concludes that the renovated site will not be operated as a private club, but instead as a public accommodation as that term is defined in the Act (see 28 C.F.R. Sec. 36.104; preamble to title III regulation at 35551-35552), alterations undertaken at the site must conform to the ADA standards for accessibility which appear as Appendix A to the title III regulation. Thus, if Mr. Lauterbach's club is actually a public accommodation, and he alters the restroom, such alterations must conform to these standards. Title III places an additional accessibility requirement when alterations are made to a "primary function" area. The law requires that 20% of the cost of all alterations made to a "primary function area" is to be applied to making an "accessible path of travel" to the altered area and to restrooms, water fountains, and telephones serving the altered area. Therefore, even if Mr. Lauterbach did not initially renovate the restroom area, it is possible that he would have to apply some of this 20% figure to making the restroom accessible. This requirement is discussed more fully in the enclosed materials. See Title III Technical Assistance Manual at 48-53; preamble to title III regulation at 35580-35584.

I hope this information is useful to you.

Sincerely,

James P. Turner
Acting Assistant Attorney General
Civil Rights Division

WASHINGTON, DC 20515-1604

March 9, 1993

Office on the ADA
Civil Rights Division
U.S. Department of Justice
P.O. Box 66118
Washington, D.C. 20035

Dear To Whom It May Concern:

I am writing this letter in regard to a request for assistance from Jim Lauterbach, a constituent of mine.

Mr. Lauterbach has been unable to reach your office by phone, therefore he has contacted my office for assistance. Mr. Lauterbach would like to turn a preexisting building that houses a craft store into a private club. He needs information as to what the ADA accessibility guidelines are in terms of building accessible restrooms. According to Mr. Lauterbach, there is one restroom in the building and it is not handicapped accessible. He contends the cost to upgrade the restroom will be too great at the moment, and would like a waiver to open the club as soon as possible, with the intention of upgrading the restroom when he receives a cash flow from the use of the club.

I would greatly appreciate any information you could share with me regarding Mr. Lauterbach's concerns. Please feel free to contact Janet Anderson in my Wichita office if you have further questions as she is assiting me in this matter.

With best regards,

DAN GLICKMAN
Member of Congress

DG:joa
01-02013

APR 26, 1993

The Honorable John Tanner
U.S. House of Representatives
1427 Longworth House Office Building
Washington, D.C. 20515-4208

Dear Congressman Tanner:

This letter responds to your inquiry on behalf of your constituent, (b)(6) regarding the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation or legal advice and it is not binding on the Department of Justice.

In your letter, you indicated that (b)(6) is studying to be an emergency medical technician. According to your letter, due to XX disability, XX performs a specific skill (insertion of the Pharyngeo Tracheal Lumen Airway, or PTL) from a different position than is typical. The Tennessee EMS Board has ruled that this method is unacceptable for purposes of certifying XX as a licensed emergency medical technician.

Under title II of the ADA, public entities are prohibited from discriminating against qualified individuals with disabilities on the basis of disability in the granting of licenses or certification. A person is a "qualified individual with a disability" with respect to licensing or certification if he or she can meet the essential eligibility requirements for receiving the license or certification. See section 35.130(b)(6) of the enclosed title II regulation at pages 35704 and 35705. Whether a particular requirement is "essential" depends on the facts of the case. As discussed in the Justice Department's preamble, or interpretive commentary, to the title II regulation,

cc: Records, Chrono, Wodatch, Bowen, Foran, McDowney, FOIA
Udd:Foran:Tanner.Con

01-02014

the phrase "essential eligibility requirements" is taken from the definitions in the regulations implementing section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), so caselaw under section 504 is applicable to its interpretation. See preamble to title II regulation at 35704.

Generally, a public entity is prohibited from applying eligibility criteria that screen out or tend to screen out individuals with disabilities from fully and equally enjoying any service, program, or activity. A public entity may, however, impose neutral rules and criteria that screen out, or tend to screen out, individuals with disabilities if the criteria are necessary for the provision of the service, program, or activity being offered. See 28 C.F.R. 35.130(b)(8). With respect to XX particular inquiry, the Tennessee EMS Board is permitted to impose eligibility criteria (i.e., require a skill be performed in a certain way) that screen out, or tend to screen out, individuals with disabilities if the criteria are "necessary" to ensure that the Board is licensing persons who can safely perform the duties of emergency medical technicians. At the same time, however, public entities are obligated under section 35.130(b)(8) to make reasonable modifications in policies, practices, or procedures when the modifications are necessary to avoid discrimination on the basis of disability, unless the public entity can demonstrate that making the modifications would fundamentally alter the nature of the service, program or activity.

The ADA establishes two avenues for enforcement of the requirements of title II: private suits by individuals and suits by the Department of Justice after investigation by one of eight designated agencies. If XX believes that XX rights under the ADA have been violated, XX may file a private suit pursuant to section 203 of the Act, or file a complaint with the Department of Health and Human Services. In addition to

contacting a private attorney, there are a number of avenues that XX could pursue in order to resolve privately the issues raised in his letter, including consulting State or local authorities, disability rights organizations, or organizations that provide alternative dispute resolution services (such as arbitration or negotiation). For your convenience, we have enclosed a list of organizations serving XX area. These listings come from various sources, and the Department cannot guarantee that the listings are current and accurate. These groups may be able to refer XX to national or regional groups with a focus on a particular type of disability. XX local or State bar associations may be able to give (b)(6) names of private attorneys or mediation services.

01-02015

I hope this information has been useful to you.

Sincerely,

James P. Turner
Acting Assistant Attorney General
Civil Rights Division

Enclosures (2)

01-02016

Congress of the United States
House of Representatives

March 22, 1993

Honorable Janet Reno
Attorney General
Department of Justice
Main Justice Building
Washington, D.C. 20530

Dear Madam Attorney General:

I am enclosing copies of the information that has been shared with me by my constituent, XX . Please review this and respond with any information you feel may be helpful in responding to XX .

As you will note, (b)(6) XX is currently enrolled in a local community college studying to be an Emergency Medical Technician. Since XX than many of the students, XX also performs some of the skills differently. This had not proven to be a problem until a specific skill known as the insertion of the Pharyngeo Tracheal Lumen Airway (PLT).

Apparently, the accepted, but not mandated, position for doing this is for the technician to be at the top of the patient's head. XX

patient's head. The Tennessee EMS Board has XX . XX If they do not accept performance, he can not become a licensed EMT. The full details and descriptions of this case are included in the information that XX has provided.

Is there anything in the Americans With Disabilities Act or its regulations that would address this situation? Is Tennessee's EMS Board acting within its rights to exempt XX from service as an EMT based solely on his performance of this one skill, or has XX been the victim of discrimination based on (b)(6) needs to know how to proceed by XX , since that is when the current semester ends. It would be most helpful if you could respond to my inquiry on XX behalf so that I might get this information to XX well before that date.

Congratulations on your confirmation! I look forward to working with you and hope that you will feel free to call upon me whenever I may be of assistance. Additionally, I hope that you or 01-02017

your staff will not hesitate to contact me if I may provide additional information about (b)(6). Thank you for your time and attention to this matter.

Sincerely,

John Tanner, M. C.

JT/gw

(b)(6)

December 31, 1992

To Whom It May Concern:

I am currently enrolled at XX as an Emergency Medical Technician. Having been XX I have to perform some skills differently than other people. The Tennessee Emergency Medical Service, so far, has been unwilling to accept this difference on one skill. That skill is the insertion of the Pharyngeo Tracheal Lumen Airway (PTL).

A description of the PTL and technique for insertion is enclosed. One thing that is not mentioned in the description or technique for insertion is the position the EMT is to be in when inserting the PTL. The accepted position is for the EMT to be positioned at the top of the patient's head. XX

Tom Coley, EMT-P, and director of the EMT program at (b)(6) requested that he be allowed to video tape me doing this skill. He also asked that the Tennessee EMS board be allowed to see this tape in order to make a decision. I had no problem with this and on XX the Tennessee EMS Board reviewed the tape.

On XX I asked Tom Coley what conclusion the EMS Board had come to. Tom said that he did not have time to discuss it with me but for me not to worry about it. On XX , the XX of class for the XX semester, Tom discussed it with me. Tom said that the EMS Board would not accept the way that I perform this skill. He also said that he was in agreement with the state.

Within the next day or two I contacted Judy Gaffron of the State EMS Board to discuss it with her. She stated that their lawyers advised her not to tell me if they would accept the way that I do this skill. She did not come right out and tell me but she did lead me to believe that they would turn it down, I know that they will. Since time was up for the XX semester, the EMS Board and Tom Coley decided to let me wait until next semester to perform the PTL skill for a grade. They said it would give

me time to practice doing it their way. The next semester runs from (b)(6)

01-02019

On (b)(6) I contacted the Tennessee State Representative Roy Herron's office in Nashville. They said that they would look into it. As of this date I have not heard from his office.

The way that I perform this skill does not in any way compromise the patient. The only reason the EMS Board has given me is that it is not the accepted way.

Two other questions that I have been asked by Tom Coley and Judy Gaffron are: How will I be able XX and how will I be able at the same time? After hearing these two questions I am expecting more trouble in the future.

Below is a list of the names and phone numbers of the people that I have mentioned.

Tom Coley - (901)425-2612
Judy Gaffron - (615)367-6262
Roy Horron - (615)741-4576

Ann Hirsch at J.A.N. is the person who advised me to contact your office. Any help that you can provide will be appreciated.

Thank You,

(b)(6)

JV:po

01-02020

DJ 202-PL-260

APR 27 1993

(b)(6)
Boynton Beach, Florida 33435

Dear XX

This letter responds to your inquiry regarding the application of title III of the Americans with Disabilities Act (ADA) to the provision of biohazardous waste containment systems at hotels.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation or legal advice, and it is not binding on the Department of Justice.

Your letter asks about the responsibility of hotels to provide Sharps Containment Systems for use by persons with diabetes. Your question raises a number of issues under the Department of Justice's regulation implementing title III of the ADA (enclosed).

Under section 36.202 of the title III regulation, public accommodations, including hotels or motels, are required to provide individuals with disabilities with an equal opportunity to enjoy the services that they offer. Housekeeping services, including garbage disposal, are among the services traditionally provided by places of lodging.

Places of lodging are not required by Occupational Health and Safety Administration regulations to utilize biohazardous

waste systems in garbage disposal, although use of such systems may be advisable. Because the use of biohazardous waste containment systems in the hotel setting is optional, the failure to provide such systems does not exclude individuals with disabilities from equal access to the enjoyment of lodging services. Thus, section 36.202 of the ADA title III regulation does not require hotels to provide such systems.

cc: Records, Chrono, Wodatch, Breen, Novich, FOIA
Udd:Flynnsm:policy:sharps.let

01-02021

Moreover, under section 36.302 of the title III regulation, places of lodging must make reasonable modifications in policies, practices, and procedures when such modifications are necessary to afford the goods or services of the place of lodging to an individual with a disability. As stated above, although the use of biohazardous waste disposal systems may be advisable in hotels, it is not required by law. Modifications of waste disposal policies to provide Sharps containment systems at places of lodging are not required by section 36.302, then, because such systems are not necessary to afford lodging services to persons with disabilities.

I hope this information is useful to you in understanding the requirements of the ADA.

Sincerely,

John L. Wodatch
Chief
Public Access Section

Enclosures (2)
Title III Technical Assistance Manual
Title III Regulation

01-02022

MAY 5, 1993

The Honorable Tom Harkin
Chairman, Subcommittee on Disability
Policy
Committee on Labor and Human Resources
United States Senate
531 Hart Senate Office Building
Washington, D.C. 20510-1502

Dear Mr. Chairman:

This letter is in response to your inquiry regarding the rights of persons with memory impairments under the Americans with Disabilities Act.

Titles II and III of the ADA and the Department of Justice's regulations implementing those titles define the term disability quite broadly. For purposes of the ADA, "disability" includes any mental or physical condition that substantially limits one or more major life activities, like walking, seeing, hearing, working, or learning. Thus, if a particular memory impairment substantially limits a major life activity, then a person with that impairment would be entitled to the protections of the ADA.

In regard to your specific inquiry about provision of audio tapes or written transcripts of proceedings, both titles II and

III of the ADA may require State or local governments and places of public accommodation to provide such aids in some cases. Title II of the ADA requires a State or local government to operate each of its programs, services, and activities so that its programs, services, and activities, when viewed in their entirety, are readily accessible to and usable by individuals with disabilities, unless doing so would either fundamentally alter the nature of program, service, or activity, or would constitute an undue financial or administrative burden on the public entity. In addition, title II requires State and local

cc: Records, Chrono, Wodatch, McDowney, Bowen, Contois, FOIA
Udd:Contois:CGL:Harkin

governments to furnish appropriate auxiliary aids and services when necessary to afford individuals with disabilities equal opportunities to participate in, and enjoy the benefits of, a program, service, or activity conducted by a public entity. Thus, if audio tapes or written transcripts of proceedings were necessary to allow an individual with a disability to participate equally in some program, service, or activity conducted by a state or local government, then the State or local government would have to provide such aids.

Similarly, title III of the ADA requires places of public accommodation to provide auxiliary aids and services when necessary to insure that no individual with a disability is excluded, denied services, segregated, or otherwise treated differently than other individuals. A place of public accommodation need not provide an auxiliary aid or service if providing that aid or service would fundamentally alter the nature of the goods or services provided by that place of public accommodation, or if providing that aid or service would constitute an undue burden, in terms of significant difficulty or expense, on the place of public accommodation.

For your information, I am enclosing a copy of this Department's regulations implementing titles II and III of the ADA and the Technical Assistance Manuals that were developed to assist individuals and entities subject to the ADA to understand the requirements of titles II and III. I hope this information is useful to you in understanding the requirements of the ADA.

Sincerely,

M. Faith Burton
Acting Assistant Attorney General

Civil Rights Division
Department of Justice
Tenth and Pennsylvania Avenue N.E.
Washington, D.C. 20530

Dear Mr. Wodatch:

The purpose of this letter is to clarify the rights of persons with memory impairments, such as individuals with traumatic brain injury, under the Americans with Disabilities Act of 1990.

Specifically, I would like to know whether the provision of audio tapes and written transcripts of proceedings can be required under title II and title III if necessary to provide meaningful access to state and local government and public accommodations for persons with memory impairments. I would also like to know under what circumstances cost can be used as a reason for not supplying such access.

Your prompt attention to this matter would be greatly appreciated. Thank you in advance for your assistance.

Sincerely,

Tom Harkin, Chair
Subcommittee on
Disability Policy

Civil Rights Division

Public Access Section

XX P.O. Box 66738
Washington, D.C. 20035-6738

APR 27 1993

(b)(6)

XX
West Jordan, Utah XX

Dear XX:

This is in response to your request for a "right to sue" letter under the Americans with Disabilities Act and your request for information as to the obligation of a public accommodation to modify its policies and practices in order to be accessible to you because of the effect of smoking on your ability to breathe.

The Americans with Disabilities Act authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the Act's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

You do not need a "right to sue" letter in order to institute a civil action to redress your rights under title III of the Americans with Disabilities Act. The Americans with Disabilities Act contains a private right of action under title III. Any person who is being subjected to discrimination on the basis of disability in violation of the Act may institute a civil action for preventive relief, such as an injunction or other order. The Department of Justice does have the authority to investigate complaints under title III; however, it is not necessary to file a complaint with the Department prior to exercising your private right of action.

The Americans with Disabilities Act prohibits discrimination on the basis of a disability, which is defined as a physical or mental impairment that substantially limits one or more major life activities, including breathing. With respect to an impairment affected by cigarette smoke, the preamble to the Department's implementing regulation states,

> Sometimes respiratory or neurological functioning is so severely affected that an individual will satisfy the requirements to be considered disabled under the regulation. Such an individual would be entitled to all of the protections afforded by the Act and this part. In other cases, individuals may be sensitive to

> environmental elements or to smoke but their sensitivity will not rise to the level needed to constitute a disability. For example, their major life activity of breathing may be somewhat, but not substantially, impaired. In such circumstances, the individuals are not entitled to the protections of the statute despite their sensitivity to environmental agents.
>
> In sum, the determination as to whether allergies to cigarette smoke, or allergies or sensitivities characterized ... as environmental illness are disabilities must be made using the same case-by-case analysis that is applied to all other physical or mental impairments.

This discussion of environmental sensitivities can be found at page 35549 of the enclosed title III regulation. I also have enclosed a copy of the Department of Justice's Title III Technical Assistance Manual. There is an explanation of what is meant by the phrase "individuals with disabilities" on pages 8 - 12 of the manual.

After reviewing this material, if you wish to file a complaint under the Americans with Disabilities Act against a specific public accommodation, you may write to the Public Access Section, Civil Rights Division, U.S. Department of Justice, Post Office Box 66738, Washington, D.C. 20035-9998. Please bear in mind that the Department is not able to investigate all the complaints it receives and that it can take enforcement action where there is a pattern or practice of discrimination or discrimination involving an issue of general public importance.

I hope this information is helpful to you.

Sincerely,

John L. Wodatch
Chief
Public Access Section

Enclosures (2)

01-02028

U.S. Department of Justice
Civil Rights Division

MAY 6 1993

The Honorable Amo Houghton
Member, United States House of
Representatives
P.O. Box 908
Jamestown, New York 14702-0908

Dear Congressman Houghton:

This letter is in response to your inquiry on behalf of your constituent, XXXXXXXX requesting information on the requirements of the Americans with Disabilities Act (ADA) that relate to the needs of individuals who are deaf or have hearing impairments.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that are subject to the Act. This letter provides informal guidance to assist you in responding to your constituent. However, this technical assistance does not constitute a determination by the Department of Justice of your constituent's rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

Title II of the ADA prohibits discrimination against qualified individuals with disabilities by State and local governmental entities. Section 35.160 (a) of this Department regulation implementing title II (copy enclosed) specifically requires such entities to ensure that their communication with individuals with disabilities is as effective as communication with others.

To accomplish this goal, public entities are required to furnish appropriate auxiliary aids and services (such as sign language interpreters) , and to give primary consideration to the requests of individuals with disabilities in the selection of such aids and services. See section 35.160(b) of the title II

regulation, as discussed on pages 35 through 37 of the enclosed title II Technical Assistance Manual. The ADA does not, however, require a public entity to take any measures that would result in a fundamental alteration in the nature of its programs, services, or activities or in undue financial and administrative burdens. See section 35.164 of the title II regulation.

If effective communication can be accomplished through other methods, title II does not require, as your constituent seems to assume, that all existing public facilities be equipped with special sound systems. Newly constructed or altered facilities are, however, subject to requirements related to assistive listening systems. At present, public entities have a choice of following the requirements for such systems set forth in either the Uniform Federal Accessibility Standards (UFAS) or in the ADA Accessibility Guidelines (Guidelines), which are located at Appendix A to this Department's title III regulation (copies enclosed).

Please note, however, that the Architectural and Transportation Barriers Compliance Board has issued a proposed regulation that would amend the Guidelines to include standards applicable to a variety of title II facilities. It is anticipated that the Department of Justice will, after notice and comment, adopt the proposed amendment as the standard for title II entities. At such time, title II entities will be required to use the revised Guidelines for new construction and alterations, and will no longer have the option of following UFAS.

With respect to sign language interpreters, the ADA only requires the use of interpreters when necessary to ensure effective communication. Therefore, interpreters are not required to be present at all meetings of a governmental entity. If, for example, an individual with a hearing impairment prefers to use an assistive listening system, an interpreter would not be required. It is important, however, for each governmental entity to establish efficient procedures for obtaining interpreter services when needed, because, as your constituent points out, the supply of interpreters within a given geographic area may be limited.

The cost of all assistive listening systems, interpreters, and any other expenses required to meet ADA requirements are the responsibility of the State or local government and may not be passed along to any individual or group of individuals with disabilities. (The ADA does not, however, require such entities

to purchase personal aids and devices such as hearing aids.) See sections 35,130(f) and 35.135 of the title II regulation.

3

We appreciate your constituent's comments regarding the importance of good lighting and good speech-making practices. Although these issues are beyond the scope of our regulations, we will certainly keep them in mind in our future technical assistance efforts.

I hope this information will be useful to your constituent.

Sincerely,

James P. Turner
Acting Assistant Attorney General
Civil Rights Division

Enclosures (3)

The Honorable John C. Danforth
United States Senator
8000 Maryland Avenue
Suite 440
Clayton, Missouri 63105

MAY 10 1993

Dear Senator Danforth:

This letter is in response to your inquiry on behalf of your constituent, Sarah Holbert, and her concern about the Americans with Disabilities Act (ADA) and service animals in hospitals.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist Ms. Holbert in understanding the ADA's requirements. This technical assistance, however, does not constitute a determination by the Department of Justice of rights or responsibilities under the ADA, and does not constitute a binding determination by the Department of Justice.

Unless it is a religious entity or under the control of a religious organization, a health care facility, such as a hospital, is covered by the provisions of title III of the ADA and the Department's title III regulation as a place of public accommodation (see section 36.104 of the enclosed regulation). According to section 36.302(c), a public accommodation is' required to modify policies, practices, or procedures to permit the use of a service animal by an individual with a disability. The intent of this regulation is to ensure that the broadest feasible access be provided to service animals in all public accommodations, including hospitals and nursing homes. This regulation also acknowledges that in rare circumstances, if the nature of the goods and services provided or accommodations offered would be fundamentally altered, or if the safe operation of a public accommodation would be jeopardized, a service animal need not be allowed to enter.

cc: Records; Chrono; Wodatch; McDowney; Bowen; Barrett; FOIA.
\udd\barrett\danfort.cg

A showing by appropriate medical personnel that the presence or use of a service animal would pose a significant health risk in certain areas of a hospital may serve as a basis for excluding service animals in those areas. In developing a list of areas from which service animals may be excluded, a hospital facility must designate only the exact areas where exclusion is appropriate. For example, if a hospital facility does not allow the presence of a service animal used by an individual receiving out-patient care, this decision must be based on a medical determination that the presence of the service animal would pose a significant health risk, or that the services provided by the hospital would be fundamentally altered. If a service animal must be separated from an individual with a disability, in order to avoid a fundamental alteration or a threat to safety, it is the responsibility of the individual with a disability to arrange for the care and supervision of the animal during the period of separation. See section 36.302(c)(2).

For your information, we have also enclosed a copy of a 1988 memorandum interpreting the application of section 504 of the Rehabilitation Act of 1973, as amended, to the presence of service animals in health care facilities. As you can see, the Federal government's policy on this issue has been consistently applied for a lengthy time period.

I hope this information is helpful in responding to Ms. Holbert's concerns.

Sincerely,

James P. Turner
Acting Assistant Attorney General
Civil Rights Division

DEPARTMENT OF HEALTH & HUMAN SERVICES
Memorandum

Date MAR 24 1988

From Audrey F. Morton
Director
Office for Civil Rights

Subject Clarification of OCR Policy on the Use of Dog Guides by Visually Impaired Persons in Federally Assisted Health and Human Services Facilities

To Senior Staff
Regional Managers, Regions I - X

The following is a clarification of OCR's policy concerning the use of Dog Guides by visually impaired persons in federally assisted health and human services facilities. While the policy refers mainly to hospitals, it is also applicable to any other recipient of Federal financial assistance from HHS.

ISSUE

Under Section 504, what are the rights of blind or visually impaired persons to use dog guides in hospitals, nursing homes and other health and human service facilities and what are acceptable circumstances for prohibiting their use?

DISCUSSION

A number of complaints have been made against hospitals and other health or human services agencies by blind or visually

impaired persons who have been denied admission to one or more parts of a recipient's facility because they wanted to be admitted with their dog guides. Some recipients have established total prohibitions against the admission of dogs in any part of their facilities, others have limited dogs to the lobby, cafeteria, gift shop and similar public areas, while yet others have imposed other restrictions.

In seeking regulatory authority for a finding of violation of Section 504, OCR staff at both the headquarters and regional offices have looked to Subpart C, Program Accessibility, of 45 CFR Part 84, for support. This Is incorrect. The program accessibility standard was developed for and intended to apply where problems exist in the design and physical structure of a facility. It was intended to insure that handicapped persons could physically get around in a facility and, where architectural barriers prevented this, to develop some administrative or programmatic modification which permitted the handicapped person to participate effectively in the recipient's program.

A dog guide is an auxiliary aid that many blind or visually impaired persons use to permit them independent mobility (45 CFR 84.41(b)(iv)). Any refusal to admit a visually impaired person to a facility because that person is using a dog guide is, in effect, prohibiting the use of an auxiliary aid. There is no question in this situation of the recipient having to provide the auxiliary aid, nor is the matter of whether the aid is or is not appropriate at issue. What is at issue is the establishment of criteria or procedures that limit blind or visually impaired persons from enjoying the same rights and privileges as others because they have chosen dog guides as auxiliary aids.

Hospitals, nursing homes or other health and human service agencies that employ the visually handicapped or that permit, invite and regularly encourage visitors to their programs may not establish a policy that, in general, prohibits the use of auxiliary aids by employees and visitors unless it can be shown that the use of the auxiliary aid would endanger others or prevent them from benefitting from the recipient's program.

DECISION

Unless there is evidence that the presence or use of a dog guide would pose a significant health risk or that the dog's behavior would be disruptive to the recipient's program, the

assumption should be made that a clean, well cared for and well-behaved dog guide should be permitted to accompany its owner wherever that person goes.

A medical justification showing that the presence or use of a dog guide would pose a significant health risk in certain parts of the hospital can serve as the basis for the exclusion of dog guides, but only from the hospital areas directly involved. Such areas might include operating room suites, burn units, coronary care units, intensive care units, oncology units, psychiatric units and isolation (infectious disease) areas. In developing the list designating those parts of a facility from which dog guides will be excluded, the recipient must specify the exact areas, and clearly identify them. Where the reason for exclusion of dog guides is not self-evident, the recipient must explain what hazards a dog would impose that a human will not. This applies to all areas of the hospital, not just those open to the public.

OCR should be aware of, and guard against, the occasional tendency of medically qualified personnel to take a super-cautious approach. In such instances, what is essentially a blanket prohibition is made on the theory that extending as far as possible the areas from which dogs may be barred will minimize difficulties. Cases in which there is doubt on this and other grounds should be referred to Headquarters which will consult the Hospital Infections Program at CDC for an expert opinion.

Only medically qualified personnel should participate in the development of the list, and decide, on a case-by-case basis in situations not clearly covered by the list, if dog guides may or may not enter areas where questions of risk to patients arise. Administrators, security personnel and admissions clerks should not make those decisions, but may assist in implementing them.

Dog guides may be restricted from rooms of patients suffering from strong allergic reactions to dogs, irrational fears and phobias about dogs, or psychotic or drug related distortions of reality where it is impossible to reassure the patients

that the dog is harmless. There may be situations in which a patient with a visitor using a dog guide shares a room with a person to which one of the above circumstances applies. In such instances either person may request and should be granted another room.

If a request for a room change is based simply on personal preference, a comparably priced room may be arranged for on a space available basis. If the room change is recommended by a physician for sound medical reasons, the patient changing the rooms may not be charged more if a comparably priced room is not available.

All of the foregoing applies to trained dog guides, which have been maintained as dog guides by their users and are clear, well-cared for and well-behaved. Individual dog guides which do not meet these criteria may be restricted or excluded by any reasonable staff member for good cause shown. When a dog is excluded for any of the above reasons, the facility should provide a suitable temporary location where the dog can be secured.

This policy applies primarily to visitors, out-patients, and employees. In the case of in-patients, those who are confined to their beds should ordinarily have no use for dog guides; the dogs in question should not be kept around just for company. Ambulatory patients whose movement within the hospital is sufficiently varied and distant that significant use of the services of dog guides may be made should have the benefit of this policy. The recipient, however, is under no obligation to feed, groom, exercise, or in other ways care for the animals in question.

The foregoing also applies to dogs used by the hearing impaired, when such dogs are being used as auxiliary aids.

In some areas, regulations promulgated under State or local authority may prohibit or appear to prohibit a health or human services facility from following this policy. We refer you to 45 CFR 84.10(a) which covers this situation and would require

corrective measures to be taken if the State or local agency which has issued the regulation is itself a recipient of Federal financial assistance.

If you have any questions, please contact Marcella Haynes on 245-6671 or Frank Weil on 245-6700.

2-2-93

Dear Sen. Danforth,

Last Nov. 10, 1992 you received a letter from Mr. B.J. Jones on the Missouri Attorney General's office regarding on of our students, XXXXXX and his service dog.

After visiting with Mr. Jones about the correction of his Nov. 10 letter informing you there was not a section in the Missouri law pertaining to access for service dogs, he assured us he would send both you and us a copy of the amendments. Since we have not heard from Mr. Jones, I felt I should follow-up and make sure you had the correct information. I have also enclosed a copy of the policy used in the hospital associated with Mayo Clinic.

I can also assure you that XXXXX is in fact XXXXXX service dog and they completed our training with outstanding results. XXXXX has returned to XXXXX for out-patient care without being able to take XXXXXX Not only is this a violation of the Missouri law, but the ADA as well.

We appreciate any and all help you can give us in this matter, since we have other graduates that are also going to XXXXX but not able to take their service dogs. If you would like any other information we have, I would be glad to share that with you.

Sincerely,

XXXXXXXXXX

T. 4-23-93
Control No. X93032203939

MAY 10 1993

The Honorable Jim Kolbe
Member, U.S. House of Representatives
1661 North Swan Road, Suite 112
Tucson, Arizona 85712

Dear Congressman Kolbe:

This letter responds to your inquiry on behalf of your constituent, Stewart R. Palmer, concerning the regulatory

requirements of the Americans with Disabilities Act (ADA) for urinals and for drinking fountains.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities with rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA accessibility standards. However, this technical assistance does not constitute a legal interpretation of the statute and it is not binding on the Department.

The technical provisions for accessible urinals in section 4.19 of the Department's standards for accessible design do not specify a dimension for the required "elongated rim." Many commonly available urinals, including the one shown on the catalog sheet that Mr. Palmer enclosed with his inquiry, are acceptable if installed in compliance with all the applicable technical provisions.

Drinking fountains that allow a front approach by a person using a wheelchair must have a knee space at least 27 inches high (see section 4.15.5 of the standards). Section 4.4.1 says that an object mounted with the leading edge at or below 27 inches above the floor may protrude any amount. Therefore, if the bottom edge of the drinking fountain is 27 inches above the floor, both these height requirements are satisfied.

cc: Records, Chrono, Wodatch, Harland, McDowney, FOIA, MAF
n:\udd\mercado\congltrs\kolbe.ewh

If there are state or local accessibility requirements that are more stringent than those required by the ADA, these must also be addressed.

Your constituents may contact the Public Access Section when they have questions or need information. The Department

maintains a telephone information line to provide technical assistance regarding the rights and obligations of individuals, businesses, agencies, and others covered or protected by the ADA. This technical assistance is available by calling (202) 514-0301 (voice) or (202) 514-0383 (TDD) between 1:00 p.m. and 5:00 p.m., Monday through Friday.

I hope the information we have provided is helpful to you and your constituent.

Sincerely,

James P. Turner
Acting Assistant Attorney General
Civil Rights Division

Stewart R. Palmer Consulting Engineers, Inc.

January 26, 1993

The Honorable Jim Kolbe

U.S. Congressman
1661 North Swan
Tucson, Arizona 85712

Dear Mr. Kolbe:

I am trying to get an official interpretation of the "American for Disability Act." Will you please help.

My paragraph numbers refer to the Federal Register/Vol. 56 No. 144/Friday, July 26, 1991/Rules and Regulations (copies of the pages a-re attached).

4.18.2 Height, Urinals shall be stall-type or wall hung with an elongated rim.... What is meant by elongated rim? The normal wall hung urinal has about a 12" rim. See attached catalog sheet.

4.15 Drinking Fountains. This paragraph details the clearances required for wheelchair access. Paragraph 4.4 Protruding objects: has requirement for items to project into the walking area. This is to assist the visually handicapped. . In accordance with Figure 8(2) it appears a drinking fountain can only project 4" into the walking area unless the bottom is 27" or lower. Drinking fountain bottoms may comply with the 27" but the rim projects further into the space. (See attached catalog sheet.)

My questions are:

1. Does the normal urinal meet the ADA requirement?
2. Do the normal drinking fountains meet the requirements or must they be recessed so only 4" project into the walking area?

Sincerely,

Stewart R. Palmer

MAY 10 1993

The Honorable Richard G. Lugar
United States Senate
306 Hart Senate Office Building
Washington, D.C. 20510

Dear Senator Lugar:

This letter is in response to your inquiry on behalf of your constituent, XXXXXX concerning the possibility of providing both ramps and stairs at the entrances to places of public accommodation.

The Americans with Disabilities Act of 1990 ("ADA") authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's requirements. However, it does not constitute a legal interpretation, and it is not binding on the Department.

While current law does not require stairs at any entrance, XXXXXX should be pleased to know that the ADA's Standards for Accessible Design do include certain requirements regarding stairways. In promulgating a regulation to implement title III of the ADA, the Department of Justice included a set of architectural standards -- the Standards for Accessible Design -- with which all places of public accommodation must comply whenever they alter an existing facility or build a new facility. These Standards set precise limits for stair treads, risers, and nosings, and require continuous handrails at specified heights. Thus, whenever there are stairs in an altered or newly constructed facility, they will be as accessible to persons with disabilities as possible.

cc: Records; Chrono; Wodatch; Bowen; Contois; FOIA.
\udd\contois\cgl\lugar

The Architectural and Transportation Barriers Compliance Board, also known as the Access Board, is the organization that is initially responsible for drafting and amending the ADA Accessibility Guidelines, which are the guidelines on which title III's Standards for Accessible Design are based. We have taken the liberty of forwarding XXXXX letter to the Access Board, so that the Board may consider her comments and the possibility of proposing that the ADA Accessibility Guidelines be altered or amended.

I have enclosed for your information a copy of the Department of Justice's title III implementing regulation, which contains the Standards for Accessible Design as Appendix A, and a copy of the Department's Technical Assistance manual for title III, which contains a section discussing the requirements of the ADA Accessibility Guidelines. I hope this information is useful to you in responding to your constituent.

Sincerely,

James P. Turner
Acting Assistant Attorney General
Civil Rights Division

\udd\contois\cgl\accessbd.ltr

XXXXXXX
Logansport, Indiana 46947

February 5, 1993

The Honorable Richard Lugar
United States Senate
Washington D.C. 20510

Dear Mr. Lugar,

I am writing to you about the issue of accommodating public buildings for the handicapped. I think that it is good that buildings were remodeled for those in wheelchairs.

Last year, when buildings were remodeled, ramps were out in so that they were accessible to those people who are in wheelchairs. But, there are also those who are handicapped but are not in wheelchairs to think about.

In 1989, my grandmother had hip replacement surgery. Unfortunately, there were complications so she now uses a walker to get around. Occasionally, she will use a wheelchair, so then she is able to use the ramps. However, when she uses her walker, which is most of the time, the ramps are difficult for her to use. Ramps are very hard for her to walk up with her walker. She cannot walk up them alone, but she can walk up stairs by herself.

A possibility to consider would be to have two doors into these buildings, such as restaurants, with a ramp at one door, and a set of steps at the other door.

Thank you for taking the time to read my letter. I hope you will consider my ideas and discuss them with your fellow representatives.

Sincerely

XXXXXXXX

The Honorable George J. Mitchell
United States Senate
Washington, D.C. 20510-1902

MAY 10 1993

Dear Senator Mitchell:

This letter is in response to your inquiry on behalf of your constituent, Dr. John W. Wickenden of Rockland, Maine, regarding the cost of providing auxiliary aids or services for persons with disabilities.

The Americans with Disabilities Act (ADA) authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's requirements. It does not, however, constitute a legal interpretation, and it is not binding on the Department.

The ADA requires physicians to furnish appropriate auxiliary aids and services where necessary to ensure effective communication with individuals with disabilities. A physician may not impose a surcharge on any particular individual with a disability to cover the costs of measures, such as providing auxiliary aids, that are required by the ADA. These provisions appear in sections 36.301(c) and 36.303 of the enclosed ADA title III regulation, at pages 35596 and 35597, respectively. Also enclosed is the Department's Title III Technical Assistance Manual, which may provide further assistance to your constituent. Pertinent discussion may be found at pages 22 (surcharges) and 25-28 (auxiliary aids).

What constitutes an effective auxiliary aid or service will depend on the unique facts of each situation, including the length and complexity of the communication involved. A doctor may satisfy the auxiliary aid or service requirement by using a note pad and written materials where a deaf patient is making a routine office visit. By contrast, a discussion of whether to undergo major surgery may require the provision of a sign language interpreter. Further discussion of this point may be found on page 35567 of the enclosed regulation.

cc: Records, Chrono, Wodatch, McDowney, Magagna, Mobley, FOIA
udd\Mobley\Congress\Mitchell

Under section 36.301(c) of the regulation, the cost of an interpreter must be absorbed by the doctor in the limited circumstances when an interpreter is necessary. However, as provided in section 36.303(f), a doctor is not required to provide any auxiliary aid that would result in an undue burden. The flexibility of the auxiliary aids requirement, the undue burden limitation, and the ability to spread costs over all patients should minimize any burden on the medical profession.

Dr. Wickenden's letter raises a specific question involving the use of interpreters. On one occasion, the family of a deaf patient made its own arrangements for a sign language interpreter, without giving the doctor the opportunity to make his own contractual arrangements for a qualified interpreter. Dr. Wickenden reports that the Maine Department of Human Services told him that he had no alternative but to accept, and pay for, the interpreter for whom the family had arranged. Of course, if that is a requirement of state law, the constraints experienced by Dr. Wickenden would have emanated from state and not federal law and, thus, should be taken up with appropriate state officials.

However, if the Maine Department of Human Services was purporting to describe the requirements of federal law, it did so incorrectly. The title III regulation does not contemplate that patients who are deaf may unilaterally decide on the appropriate

type of auxiliary aid, make arrangements for a particular deaf services provider to furnish the aid, and then bill the public accommodation for the services. Instead, doctors may determine how best to provide effective communication to their patients, and may themselves arrange for the necessary auxiliary aids or services. Of course, the needs and wishes of the patients should be taken into account in determining what kind of auxiliary aid is necessary to provide effective communication. Please refer to the enclosed January 1993 Supplement to the Department's Title III Technical Assistance Manual at page 5 for further discussion.

I hope this information will be helpful to you in responding to your constituent. We will also provide the Maine Department of Human Services this information regarding the ADA.

Sincerely,
James P. Turner
Acting Assistant Attorney General
Civil Rights Division

Enclosures (2)

MAY 10 1993

Maine Department of Human Services
360 Old Country Road
Rockland, Maine 04102

Dear Sir or Madam:

We received an inquiry from The Honorable George J. Mitchell on behalf of his constituent, Dr. John W. Wickenden of Rockland, Maine, regarding the cost of providing auxiliary aids or services for persons with disabilities.

The Americans with Disabilities Act (ADA) authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. It does not, however,

constitute a legal interpretation, and it is not binding on the Department.

Dr. Wickenden had informed Senator Mitchell that your office had advised him that where the family of a deaf patient made its own arrangements for a sign language interpreter, without giving the doctor the opportunity to make his own contractual arrangements for a qualified interpreter, he had no alternative but to accept, and pay for, the interpreter for whom the family had arranged. Of course, that advice may comport with state law. However, it is an incorrect interpretation of the ADA.

The ADA requires physicians to furnish appropriate auxiliary aids and services where necessary to ensure effective communication with individuals with disabilities. A physician may not impose a surcharge on any particular individual with a disability to cover the costs of measures, such as providing auxiliary aids, that are required by the ADA. These provisions appear in sections 36.301(c) and 36.303 of the enclosed ADA title III regulation, at pages 35596 and 35597, respectively. Also enclosed is the Department's Title III Technical Assistance Manual, which may provide you with further assistance. Pertinent discussion may be found at pages 22 (surcharges) and 25-28 (auxiliary aids).

What constitutes an effective auxiliary aid or service will

cc: Records, Chrono, Wodatch, McDowney, Magagna, Mobley, FOIA
udd\Mobley\Congress\Mitchell

---

depend on the unique facts of each situation, including the length and complexity of the communication involved. A doctor may satisfy the auxiliary aid or service requirement by using a note pad and written materials where a deaf patient is making a routine office visit. By contrast, a discussion of whether to undergo major surgery may require the provision of a sign language interpreter. Further discussion of this point may be found on page 35567 of the enclosed regulation.

Under section 36.301(c) of the regulation, the cost of an interpreter must be absorbed by the doctor in the limited circumstances when an interpreter is necessary. However, as provided in section 36.303(f), a doctor is not required to provide any auxiliary aid that would result in an undue burden. The flexibility of the auxiliary aids requirement, the undue burden limitation, and the ability to spread costs over all patients should minimize any burden on the medical profession.

The title III regulation does not contemplate that patients who are deaf may unilaterally decide on the appropriate type of auxiliary aid, make arrangements for a particular deaf services provider to furnish the aid, and then bill the public accommodation for the services. Instead, doctors may determine how best to provide effective communication to their patients, and may themselves arrange for the necessary auxiliary aids or services. Of course, the needs and wishes of the patients should be taken into account in determining what kind of auxiliary aid is necessary to provide effective communication. Please refer to the enclosed January 1993 Supplement to the Department's Title III Technical Assistance Manual at page 5 for further discussion.

I hope this information has helped you to achieve a fuller understanding of the law.

Sincerely,

John L. Wodatch
Chief, Public Access Section
Civil Rights Division

Enclosures (2)

MAY 10 1993

The Honorable C. W. Bill Young
U.S. House of Representatives
2407 Rayburn Building
Washington, D.C. 20515-0910

Dear Congressman Young:

This letter is in response to your inquiry on behalf of your constituent, XXXXXX concerning his rights as a deer hunter with a mobility impairment, and his experience with the XXXXXXXX

The Americans with Disabilities Act of 1990 ("ADA") authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or

obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's requirements. However, it does not constitute a legal interpretation, and it is not binding on the Department.

XXXXXX expresses his concern that the XXXXX has discriminated against him by refusing to allow him to cross their property on his ATV, although other hunters are allowed to do so. In general, title III of the ADA forbids discrimination against individuals with disabilities by places of public accommodation. However, in many circumstances title III does not apply to private clubs. It is not clear from XXXXXX letter whether the XXXXX qualifies as a private club under the prevailing Federal law. Over the years, the Federal courts have looked to several factors to determine whether a particular entity is a private club. Some of the more significant factors include the degree of member control of club operations, the selectivity of the membership process, whether substantial membership fees are charged, whether the entity is operated on a nonprofit basis, and the extent to which the facilities are open to the public.

cc: Records, Chrono, Wodatch, Breen, Contois, McDowney, FOIA
Udd:Contois:CGL:Young

The only exception to private clubs' exemption from title III arises when a private club opens its facilities to the public. In such a case, to the extent that the private club opens its facilities to the public, it must comply with all of the applicable requirements of title III. Thus, even if the XXXX XXXX does qualify as a private club, and therefore is not covered by the ADA, if the club is allowing members of the public to use its land or facilities, then it must do so in a nondiscriminatory manner.

Finally, it appears that XXXXX circumstances may raise questions of State property law relating to easements or other issues. The Department of Justice is not able to offer any guidance on issues of State law.

If XXXXX feel that the XXXXX is not a private club, or if he feels that it is a private club that has opened its facilities to the public such that it is covered by title III of the ADA, he may either file a lawsuit against the XXXXX or he may file a complaint against the club with the Department of Justice, or he may do both. If he wishes to file a complaint with the Department, he should write to the Public Access Section, Civil Rights Division, U.S. Department of Justice, Post Office Box 66738, Washington, D.C., 20035-6738.

I have enclosed for your information a copy of the Department of Justice's title III implementing regulation, and a copy of the Department's Technical Assistance manual for title III. The exemption for private clubs is contained in section 36.102(e) of the regulation, at page 35593, and the definition of a private club is discussed in the preamble to the regulation, at pages 35552-53. The rules regarding private clubs are further discussed in the Technical Assistance manual at pages 5-6.

I hope this information is useful to you in responding to your constituent.

Sincerely,

James P. Turner
Acting Assistant Attorney General
Civil Rights Division

Enclosures (2)

January 22, 1993
XXXXXXXX
St. Petersburg, Florida 33702

The Honorable C. W. "Bill" Young
United States House of Representatives
Room 627, Federal Building
144 First Ave. South

St. Petersburg, Florida 33701

Dear Sir,
I contacted your St. Petersburg office on 10/28/92, to get some information on The Americans With Disabilities Act. Your office promptly mailed PL-101-336 to me, and I called your office again, at which time I spoke to Greg Lankler, who advised me to present my case to your office and that The Justice Department would look at my evidence in light of filing Discrimination charges against the party envolved, based on PL 101-336, July 26, 1990.

BACK GROUND
XXXXXXXXX in the middle 1920's, was a founding member of the than XXXXXXX, now known as XXXXXX. His best friend , XXXXXXX asked XXXX to sell his membership, and come as his guest. Being a coal miner in the twenties, $150.00 was a lot of money, and XXXXX had a nice cabin, so sold his share. XXXXXX died several years ago, and was an honorary member until his death In XXXXXX plus. Over the years, we ate at the club's cook cabin (paid $65.00 per person) , hunted on club land, but mostly in the Dickenson Ridges of The George Washington National Forest. Though I had been going to the camp since I was XXX years old, my first hunting experience there was in XXXX.

By 1958, XXXX and two XXXXXX (Both diseased) , purchased an acre plus of land, and built a cabin about one mile from XXXXX main cabin area. Our land joined the XXXXXX property, XXXXX of the Dickenson, so we were allowed to hunt on the portion (approx. 80 acres) of land off of the main club property, and we had PERPETUAL access to The National Forest, and Club property behind our cabin. That portion of the National Forest is LAND LOCKED Encl: (1) and (2) with no other access easement except through XXXXX XXXXX property. There had been a motorcycle trail, but in recent years, ATV'S have taken over, so there is a well established trail, used all year long, by XXXXXXX XXXXX and the family members of these men use this trail all year long to access The National Forest with ATVs. Consequently, from that stand point, the easement is used by the Public at large. The XXXXXXX properties join each other, and enclosed pictures of the property shows

---

(2)

the trail easement on the XXXXXX property actual being used by XXXXXX on the ATV trail 11/15/92, as

Encl; (3). My hand drawn map Encl (4), is an illustration of roughly how the easement runs, why the ATVs are necessary, and why as a disabled person, I cannot access the National Forest land on foot or without a mechanical means through the steep mountains. NONE of the members of the camps, XXXXX access the National Forest without ATVs, so why, as a Disabled Person should I be expected to WALK TO places that other people have to ride to.

MY MEDICAL HISTORY

XXXXXX to my stand by a Honda 250 TRX in The Dickenson Ridge area over the ATV easement. The party who provided my ride, has not hunted with us since 1986, so in 1987, I reluctantly purchased a Honda 250 TRX on XXXXX Encl, (5). It was quite some time before I became proficient at operating my machine since I had no previous experience in this area. I was placed on Social Security Disability as of XXXXXX of XXXXX The State of Florida retired me Disabled from the Teaching Profession. Proir to these decisions, as a result of injuries received in XXXXX The Veterans Administration granted me a waiver of premiums as of XXXXX shortly after the date of my accident on XXXXX and I have not worked a day since Encl; (6), (7), (8), (9) and (10). With my Disability, the only way I could continue to enjoy life (a nearly complete shut down) , was to try and continue in the sport of hunting which I dearly love, and it adds meaning to my life. The hunting also kept our family together, XXXXX and I. XXXXX XXXX a 250 at the same time that I did, and a special all steel trailer was constructed for easy on and off loading, plus hook-up. XXXXXXXXX the ATVs to the state of Virginia and XXXXX We in sharing expenses, have spent a considerable amount of money on equipment, and in time XXXXXXXXXXXXXXX, for the sole purpose of hunting deer in the Dickenson Ridges. No matter where I hunt, I have to have someone with me or close by to assist me should I shoot something.

PAST EVENTS

A few years back, in XXXXX Encl (11) the than West Virginia Hunt Club, had expanded their hunting crew, and could no longer accommodate us, sometimes as many as nine people, to eat in their cook cabin ($65.00) per person for one week, so they advised us by letter of the change. This was tradition XXXXXXX XX, however, we had kitchen facilities in our cabin, so this worked out for us. XXXXXXX had sold the cabin, so when it went back on the market, XXXXXXXX it for remodeling into a XXXXXXX The cabin was a one room 14 x 28 feet,

but it is now a XXXXXX.

We were subsequently advised that the increased number of hunters, necessitated that we could no longer hunt on the land directly behind the cabin, which XXXXXX had done for some sixty five years. This was an imposition on us, but we had good stands in the Dickenson Ridge of The National Forest, just at the end of XXXXXX property, and we understood their problems. This did however, start our letter

---

(3)

writing, which up to that time, was a Sportsman's agreement based on XXXXX being a long time, and sole surviving XXXX XXXXXX of their club. We at this time went through a Yes you can, No you cannot cross the property this year, in an inconsistent manner. The Encl;(12-17) for 1986-92, tell the story. 1988 and 1989, we were notified by WORD OF MOUTH, after their annual club meeting on Sunday evening at about 8 to 9 PM as whether we could access The National Forest, via ATV over their easement. With the deer season opening at day light the next morning, they literally wrecked our hunting season time and time again, causing us to scramble as to where to go for that all important first day of the Virginia deer season. The 1990 - 91 deer season came in Encl; (16), and they let us use our ATVs on the ATV easement, so when the 1991-92, muzzle loading season came in, the Club president, XXXXXX let us use our ATVs from Monday through Saturday, and on Sunday evening, the Club Board voted that we could not use ATVs on Monday morning the first day of the regular deer season, which was a 180 degree turn over night . The three times that they did this to me, I cut my hunting time short, and returned south in disgust, disappointmant, and depressed. Enclosure (18) is a report by XXXXXXX XXXXX that states, I suffer from XXXXXXXXXXXXX whuch I try to keep under control , however, when you get all built up to do one of your favorite activities, and the rug is pulled out from under you, your whole world gets blown apart. I suffer XXXXXX, tense up and my pain level increases, I become moody, loose sleep, have to take more medication, and it takes a good while before I get everything under control again. My trip has been ruined, my whole body suffers, and I do not function well under stress. Therefore, to try an get as an early answer this year of yes or no, from the club XXXXXXX in the club that had an XXXXXXX on or could get one for, in hopes of XXXXXXX in my favor. I will be XXXXXXX in XXXXX of this year, so it

is too late in life for me to start over. The XXXXXXX are some what personal, and little redundant, but there was information that I felt they needed to know in XXXXX XXXXXXXXXX at any meeting.

Some members of the club did XXXXXXXX but most did not. Enclosure (17) advised me of a SPECIAL MEETING CALLED for this purpose, at which time I was giving permission to WALK through the mountains, XXXXXXXXXXXXXXXXX XXXXXXXXXXXXXXXXXXXXXXXX to reach The National Forest) XXXXXXXXX use my ATV. No one in the XXXXXXXXX camp had any restrictions placed on them whatsoever. To me this is BLATANT DISCRIM-INATION XXXXXXXXXXXXX as a disabled Hunter, and in my XXXXXX which surely were XXXXXXXXXXXX XXXXX because XXXXXXXX got a copy of every letter that I sent out.

XXXXXXXXXXXXXX I walked to the XXXXXXX cabin, and tried to get pictures of the very well used ATV ease-ment behind his cabin even though the general deer season did not come in until Monday, XXXXXXXX. Than on XXXX XXXXXXXX I caught the XXXXXXXXXX coming down the ATV easement on their ATVs from a scouting trip Encl (3)

When XXXXX passed away, I sent a letter to XXXXX of Mt. Hope W. Va, our home town of record, Encl (19), and this could well have been their reason for allowing passage on the ATV easement in 1990. Enclosures (20 -37) show my attempt at literally begging to use my ATV on XXXXXXXXX ease-ment in the easiest way that knew how to do it, and they still singled me out, killing my chance of an enjoyable hunt. I would not have gone at all this year had it not been for a local land owner in the area, Encl (38), who gave us permis-sion in advance by phone, to hunt on their property. This al-lowed me to sit on the edge of their fields, thereby not re-quiring any Mechanical means to get there other than XXXX XXXXXXXX.

MISCELLANEOUS INFORMATION

Enclosures (39-43) are pictures taken at various times in, around, and on XXXXXXXXXXX property easement. Encl (44) letter to XXXXXXXX, who when I could not use XXXXXXXXXXX easement to access the National Forest

on my ATV, allowed me to hunt on their land.

PUNITIVE

Based on PL 101-336, July 26, 1990, XXXXXXXXXXX BLATANT Discrimination against me as a Disabled Person in preventing me from entering on Federal land, By ATV over an established public access easement by necessary mechanical means, the great expense in purchasing the XXXXXXX the specially modified trailer, the ruining of at least three two week deer hunting trips, the mental, emotional strain, and disruption of my personal life through Post Traumatic Stress, and the expense in marking those 2000 mile round trips, I feel that I should be awarded PUNITIVE DAMAGES from XXXXXXXXXXXXX.

I will deeply appreciate it if you could present my case to The Justice Department as it relates to this National Law to project the rights of Disabled People.

When this material has served it's purpose, please return it to me as the pictures have a lot of meaning to me personally.

Sincerely,

XXXXXXXXXXXXXX

DJ 202-PL-521

MAY 14 1993

Mr. Garritt Toohey
Vice President
Tamar Inns, Inc.
9000 International Drive
Orlando, Florida 32819

Dear Mr. Toohey:

I am responding to your letter asking about the application of the requirements of title III of the Americans with Disabilities Act (ADA) to the construction of parking facilities at a convention hotel that will be built by Tamar Inns, Inc.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that have rights or responsibilities under the Act. This letter provides informal guidance to assist you in understanding the ADA and the Department's regulation. However, this technical assistance does not constitute a determination by the Department of your rights or responsibilities under the ADA, and it is not binding on the Department.

You have asked the Department to comment on the petition to the State of Florida Board of Building Codes and Standards filed by Tamar Inns to seek a waiver from the State's requirement to provide reserved accessible parking spaces. This petition is based on your company's plan to provide parking for people with disabilities through the use of a valet parking service. The State has deferred action on your petition until the Department responds to your inquiry.

The first issue that we must address is the relationship between State and Federal law in this area. The ADA does not

preempt State authority in the area of accessible design. When the State and Federal requirements differ, an entity that is subject to both State and Federal requirements must comply with the more stringent requirement applicable to each element of the facility that is being constructed. The State is not authorized to enforce the ADA or to grant waivers from its requirements.

cc: Records, Chrono, Wodatch, Breen, Blizard, FOIA, Library
i:\udd\mercado\plcrtltr\toohey.jlb

With respect to your specific question, we note that a convention hotel is a place of lodging subject to the requirements of title III of the ADA, which requires, among other things, that all new construction must meet the requirements of the Standards for Accessible Design ("Standards") that were adopted by the Department of Justice regulation implementing title III, 28 C.F.R. Part 36. The Standards are reprinted as Appendix A to the regulation.

The requirements for accessible parking in a newly constructed facility are contained in section 4.1.2(5) of the Standards. If self-parking is provided for employees or guests of a facility, accessible parking spaces must be provided in compliance with the requirements of 4.1.2(5). If a facility provides only valet parking, then it is required to comply with sections 4.1.2(5)(c) and 4.1.2(5)(e) . The ADA does not permit a waiver of the requirements established by the Standards.

For your information, I am enclosing a copy of the Department's regulation implementing title III and the Title III Technical Assistance Manual. I hope that this information is helpful to you.

Sincerely,

John L. Wodatch
Chief
Public Access Section

Enclosures

TAMAR, INNS, INC.

April 6, 1993

Chief John L. Wodatch
Public Access Section
Civil Rights Division
Department of Justice
P.O. Box 66738
Washington, D.C. 20035-6730

Dear Chief Wodatch:

I recently had several conversations with your technical hotline and finally ended up speaking with Tito Mercado in your office on April 5, 1993. Attached, please find a copy of our petition to the State of Florida Board of Building Codes and Standards requesting a waiver from the Handicapped Parking Requirement specifically, the number of spaces to be provided. We propose to provide zero spaces and replace that with a service that is intended to be superior. A summary of that service is as follows:

1. All guests of the hotel drive under the porte-cochere as their first order of business. At the porte-cochere, we have a 24 hour staff inclusive of doorman, bellman and valet parking attendants.

2. At that time, a person, or, persons requiring handicapped parking services would be identified and without charge and no gratuities allowed, our staff would assist this person in any manner they desired.

3. The valet parking service would be available at no gratuity and no charge, and all baggage services will be available at no gratuity and no charge.

4. Anyone wishing to operate their own automobile would be accommodated by an escort to our valet parking area where space will be cordoned off for their vehicle according to their needs, and any additional assistance provided according to their needs.

Chief Wodatch, it is our intention to provide this service in lieu of the traditional parking spaces for several reasons:

The property is quite large .... 20 acres inclusive of an eight story parking garage (enclosed, please find a proposed site plan.). Out of 2,000 spaces, approximately 1,300 will be in the garage and 700 surface parking.

We feel it is more convenient for those who require handicapped parking to utilize our services under the porte-cochere in lieu of having to find handicapped parking space either in the garage or on the surface. Neither of which will be convenient to the main entry point. Furthermore, from our experience, the need for handicapped parking spaces fluctuates quite considerably. There are times when we need very few and there are other times when we might not have enough.

The code penalizes the owner if he is trying to maximize parking and handicapped utilization is low, and the code penalizes the owner and user of handicapped parking when the demand is greater than the number of spaces available. Under our proposed scenario, every guest requiring handicapped parking services will be provided the same amenity in whatever quantity is required.

The issue for our company is relative to the level of service we wish to provide. We would. like our clients to be happy with the services and the facilities and most importantly, return to utilize them again and again. We are sensitive towards our guest's individual needs instead of the collective requirements of all.

The Omni Rosen will be a headquarters convention hotel dedicated towards a greater level of service than all of its competitors and providing the same for as much as half of what its competitors charge. Our policy towards those persons with disabilities is only one of many policies that set us apart from the industry standards.

Based upon the recommendation of the Florida Building Codes Standards Board, we respectfully request a determination by the Justice Department as to whether or not this would meet the intent of the Americans With Disabilities Act.

I would appreciate a quick response as we will be submitting our plans for building permit in the near future. If however, there is any further information you need at this time, please let me know and I will forward along posthaste.

Sincerely,

Garritt Toohey
Vice President

MAY 14 1993

XXXXXXXXXXXX
XXXXXXXXXXXXX
XXXXXXXXXX

Dear Mr. XXXX,

This letter responds to your inquiry regarding the applicability of the Americans with Disabilities Act (ADA) to amusement parks.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal

guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation or legal advice and it is not binding on the Department of Justice.

Your letter inquires into the intent of the ADA and its application to lines for attractions at amusement parks. You state that you witnessed individuals with disabilities being permitted to avoid attraction lines and inquire as to whether this policy is consistent with the ADA.

The intent of the Americans with Disabilities Act is to set a national mandate for the elimination of discrimination against individuals with disabilities. To further this goal, the Act contains specific provisions designed to assure that individuals with disabilities may enjoy the full range of goods, services, privileges and advantages offered by public accommodations.

Title III of the ADA imposes certain obligations on places of public accommodation to ensure that their services are provided to individuals with disabilities. The Act specifically includes amusement parks and other places of recreation in its definition of a public accommodation. See section 36.104 of the enclosed title III regulation at page 35594.

cc: Records, Chrono, Wodatch, Breen, Foran, FOIA
Udd:Foran:Disney.XXXX

The ADA does not require affirmative action or preferential treatment of individuals with disabilities. Public accommodations, however, are required in certain cases to make reasonable modifications to their policies, practices, or procedures when modifications are necessary to afford goods, services, facilities, privileges or advantages to individuals with disabilities. See section 36.302 of the title III regulation at page 35596-97, and preamble at 35564-65. In light of this requirement, an amusement park may be required to modify its policies to allow an individual with a disability to be

admitted to an attraction without waiting in line, if delay would prevent the individual from participating in the service because of the nature of the disability.

I hope this information is useful to you in understanding the requirements of the ADA.

Sincerely,

John L. Wodatch
Chief
Public Access Section

Title III Technical Assistance Manual
Title III Regulation

August 21, 1992

John L. Wodatch, Director
Office of Americans With
Disabilities Act
Department of Justice
PO Box 66738

Washington, DC 20035

Dear Mr. Wodatch:

In my daily job with an occupational licensing board I have bumped into the Americans With Disabilities Act more than once. While it has many positive features, this measure may also have some unexpected consequences.

During a recent visit to a theme park in Orlando I observed several instances of one kind of conduct that is worthy of inquiry. we were standing in line for over 30 minutes at an attraction as a person in a wheelchair was pushed past several hundred pedestrians to the front of the line and admitted to the show, along with 6 fully able people in the party, without delay. Two such groups were seated within five minutes while hundreds watched. Among the comments from observers were several that I doubt were part of the legislative history of the Americans With Disabilities Act.

The reason for this letter is to inquire of you or your staff as to the intent of the statute in this situation. Apart from preferential parking places, did Congress really intend for citizen with disabilities, and their companions, to receive this kind of treatment? Or did Congress mean that the disabled should be free of artificial barriers and have the same access and opportunity as all other citizens to experience the August Orlando sun?

Very truly yours,

XXXXXXXXXXXX

copy: Michael Eisner, Walt Disney Company

202-PL-00057

MAY 17 1993

Ms. Nancy Husted-Jensen

Chairperson & State ADA Coordinator
Governor's Commission on the Handicapped
Building 51,3rd Floor
555 Valley Street
Providence, Rhode Island 02908-5686

Dear Ms. Husted-Jensen:

This letter responds to your inquiry regarding the Americans With Disabilities Act (ADA) . Specifically, you asked for guidance regarding the State of Rhode Island's proposed system for providing emergency and non-emergency telephone services. We regret the delay in responding.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

In your letter, you asked several questions on behalf of the Governor's Commission on the Handicapped about the State of Rhode Island's duty to provide accessible emergency and non-emergency telephone services to persons with hearing and speech impairments. The responses below are based on information provided in your letters of March 4 and July 30, 1992, and on discussions with Mr. Bob Cooper, Executive Secretary of the Rhode Island Governor's Commission on the Handicapped.

Emergency Telephone Services: Question 1

> "Is it permissible under 28 C.F.R. 35.162 to have all TDD emergency calls be directed through the E 911 [Enhanced 911] system?"

cc: Records, Chrono, Wodatch, Magagna, Foran, FOIA
Udd:Foran:RI.911

Short Answer

The short answer is generally yes -- under the following conditions.

- The E 911 system must receive and process nonvoice calls as promptly and effectively as voice calls.

- Nonvoice callers whose calls are directed through E 911 must receive emergency attention as quickly as voice callers who dial local seven-digit numbers for emergency assistance instead of E 911.

- Any emergency services provided by the State or local government entity not connected to the E 911 system must provide direct access to nonvoice callers (i.e., have their own TDD's and be compatible with computer modems).

Discussion

The applicable regulation states:

> Telephone emergency services, including 911 services, shall provide direct access to individuals who use TDD's and computer modems.

28 C.F.R. 35.162. "Direct access" means that emergency telephone services can directly receive calls from TDD and computer modem users without relying on outside relay services or third party services. Where 911 service is available, direct access must be provided to individuals who use TDD's and computer modems. The requirement for direct access disallows the use of a separate seven-digit number for persons with hearing impairments where 911 service is available. See preamble to title II regulation at 35713.

According to your letter, 911 service is available in the State of Rhode Island, and -- consistent with the above-discussed requirement -- the State proposes using an Enhanced 911 (E 911) system that provides direct access to nonvoice callers. As we understand the facts, Rhode Island proposes to direct all nonvoice callers through this E 911 service. In contrast, voice callers in Rhode Island have the option of dialing 911 or a variety of other seven-digit numbers to reach emergency services. Your question is whether channeling all nonvoice emergency calls

through this E 911 system -- and not providing nonvoice callers with the additional option of dialing a local seven-digit emergency number -- is consistent with the ADA.

As noted above, this arrangement is permitted under the ADA, but only under certain conditions. First, any emergency service provided by the State or local government entity which is not tied into the E 911 system would have to provide direct access to nonvoice callers. If, for example, the State of Rhode Island offered emergency poison control information which could not be accessed through E 911, that telephone emergency service would have to be equipped with a TDD to provide direct access to nonvoice callers. The State could provide two separate lines to reach this service -- one for voice calls, and another for nonvoice calls -- but it would have to ensure that the service for nonvoice calls was as effective as that offered for voice calls in terms of response time and availability in hours. Also, the nonvoice number would have to be publicized as effectively as the voice number, and displayed as prominently as the voice number wherever such emergency numbers are listed. See Title II Technical Assistance Manual at pages 38 and 39.

Second, Rhode Island's proposed system would have to operate fairly. The system would be acceptable only if the State's emergency telephone services received and processed nonvoice calls promptly and effectively. The State would also have to ensure that nonvoice callers whose calls were directed through E 911 received emergency attention as quickly as voice callers who could dial local emergency seven-digit numbers for assistance. If the voice caller who dials a local seven-digit number for an emergency service receives more immediate attention than a person who is deaf or has a speech or hearing impairment dialing E 911, the system would be operating in violation of the ADA. See preamble to title II regulation at 35713.

Rhode Island also proposes to use the Rhode Island State Police as the backup system for emergency TDD calls if the E 911 system is ever disrupted. Although it is not clear how often or in what circumstances such a disruption would occur, we assume that you have proposed this backup system for nonvoice callers because voice callers would have the option of dialing a seven-digit local emergency number should the E 911 system fail. The same principles discussed above are applicable here: The State would have to ensure that nonvoice callers whose calls were directed through the State Police as the backup to E 911 received emergency attention as quickly as voice callers who could dial local emergency seven-digit numbers for assistance if E 911 service was disrupted.

Your letter indicates that part of the impetus for centralizing nonvoice emergency calls stems from practical difficulties in retaining trained, experienced personnel to handle TDD calls. Public entities are required to take steps that are necessary to promptly receive and respond to a call from users of TDD's and computer modems. No matter which system Rhode Island ultimately implements, and despite any difficulties the

---

State may encounter with high staff turnover, it is the State's responsibility to ensure that emergency desk or dispatch personnel are trained to receive and respond to TDD calls effectively.

Non-Emergency Telephone Services: Questions 2 and 3

"If it is permissible to centralize emergency calls, then for non-emergency calls would it be permissible under 28 CFR 35.162:

2. for several public safety agencies of the same municipality to 'share' a TDD even if they do not have a central dispatch?

3 . for small volunteer fire companies to 'share' a TDD even if they do not have a central dispatch?"

Short Answer

The answer is yes, so long as the "messenger-type" system proposed works at least as effectively for persons using the TDD-system as for those using seven-digit non-emergency calls.

Discussion

Where a public entity communicates with applicants and beneficiaries by telephone in non-emergency situations, the public entity does not have to provide "direct access." Instead, public entities have the option of using TDD's or "equally effective telecommunication systems" to communicate with individuals with impaired speech or hearing. See 28 C.F.R. 35.161. Under the regulation, relay services such as those required by title IV (involving a relay operator who uses both a standard telephone and a TDD to type the voice messages to the TDD user and read the TDD messages to the standard telephone user) constitute equally effective telecommunication systems.

Title IV of the ADA requires all common carriers (i.e., the

telephone companies) to provide telephone relay services by July 26, 1993. Thus, after that date, most State and local government entities in Rhode Island could choose to rely on relay services provided by the phone companies for non-emergency communications with individuals with impaired speech or hearing. Even after that date, however, the entities which have extensive telephone contact with the public such as city halls, public libraries and public aid offices, are strongly encouraged to have TDD's to ensure more immediate access. See preamble to title II

---

regulation at 35712 ("The Department encourages those entities that have extensive telephone contact with the public. . . to have TDD's to insure more immediate access. Where the provision of telephone service is a major function of the entity, TDD's should be available.")

As we understand it, your question is whether in the interim period before the relay system is operational (July 26, 1993), public service agencies providing non-emergency services in a given locality can meet their obligation under the ADA to provide equally effective telecommunication service by "sharing" a TDD. The system works as follows: the TDD operator transcribes a TDD user's request, contacts the relevant agency, and upon receiving an answer, returns the person's TDD call. Or, the individual agency official would go to where the TDD is housed and answer the deaf person's inquiry directly.

Rhode Island's interim system for most non-emergency communications provided by public entities would be satisfactory only if it provides "equally effective telecommunication service." TDD operators must be properly trained, and public employees must be instructed to accept and handle relayed calls in the normal course of business. See Title II Technical Assistance Manual at 38. Of course, once the relay system is operational in Rhode Island, you should use it instead of the shared TDD system described in your letter. Also, as stated above, we still strongly encourage those entities that have extensive telephone contact with the public to have their own TDD's to insure more immediate access.

Finally, you asked for information regarding computer modem/ E 911 compatibility. Under the title II regulation, at present, telephone emergency services must only be compatible with the Baudot format. Until it can be technically proven that

communications in another format can operate in a reliable and compatible manner in a given telephone emergency environment, a public entity would not be required to provide direct access to computer modems using formats other than Baudot. See Title II Technical Assistance Manual at 38. We do not have further information available regarding computer modem/ E 911 compatibility. However, your E 911 system should, at a minimum, be compatible with computer modems that use the Baudot format to be in compliance with the Department's title II regulation.

I hope that this information has been helpful to you. If you have any questions, please contact Sheila M. Foran at (202) 616-2314.

Sincerely,
John L. Wodatch
Chief
Public Access Section

March 4, 1992

John Wodatch, Director
Office of Americans With Disabilities Act
Civil Rights Division
US Department of Justice
Washington, DC 20530

Dear Mr. Wodatch:

I am seeking an opinion on behalf of the State of Rhode Island with regards to 28 CFR 35.162 Telephone emergency service provision of the ADA's Government Service Regulation. Rhode Island has a state wide Enhanced 911 system that all public safety, agencies (police, fire, and rescue) are tied into. The system is equipped with telecommunication devices for the deaf. E 911 operators undergo training on the use of TDDs annually. The local police, fire, and rescue units have their own phone lines in addition to the E 911 system, for non-emergency communications and as a backup in case the E 911 system should ever be disrupted.

At present the larger cities have their own TDDs, often shared by all municipal public safety agencies. Many of the smaller fire districts are relying on E 911 for emergency communications, including TDD calls.

1. Is it permissible under 28 CFR 35.162 to have all TDD emergency calls be directed through the E 911 system ?

If it is permissible to centralize emergency calls, then for non-emergency calls would it be permissible under 28 CFR 35.162:

2. for several public safety agencies of the same municipality to "share" a TDD even if they do not have a central dispatch ?

3. for small volunteer fire companies to "share" a TDD with a local municipal government, even if the TDD is not "housed" in the same building as the fire company, if the fire company has access to the TDD and the local government will act as a "relay service" ?

If it is not permissible to centralize emergency calls , then would it be permissible under 28 CFR 35.162:

4. for several public safety agencies of the same municipality to "share" a TDD even if they do not have a central dispatch ?

---

5. for several public safety agencies in the same geographic area to "share" a TDD even if they do not have a central dispatch ?

I raise these points for a couple of reasons. During the last several years a number of local and state public safety agencies have gained experience with TDDs. Their experiences have shown

that the frequency of TDD calls to a rural or suburban fire or police department is very low, averaging less than 1 call per year. Personnel in agencies with very few TDD calls, do not recognize TDD calls when they are finally made. Unlike the E 911 system, local calls are not being automatically traced so even when no communication takes place, a police officer can not be dispatched directly to the source of the phone call. The turnover in desk/dispatch personnel at the smaller public safety agencies makes it very difficult to ensure that the operators are experienced in "deaf language syntax and culture", an essential in any high stress situation. From a public safety standpoint the individual with a communication impairment has a much better chance of connecting with a highly trained "TDD friendly" operator at the statewide E 911 facility than they would have even at the larger urban public safety agencies.

As State ADA Coordinator I would like to propose that:

1. Rhode Island utilize its E 911 system as the Telephone Emergency Service for all TDD calls and the State Police be the backup system for emergency TDD calls if the E 911 system is ever disrupted (the state police have over 20 years experience with (TDDs,TTYs);

2. Urban & suburban public safety agencies establish a centralized TDD for non-emergency communications in each municipality; and
3. Rural public safety agencies establish a "shared" TDD system for non-emergency communications in each town.

I would appreciate your opinion on the legality of this proposed system so I can ensure that Rhode Island has an accessible telephone emergency system in place as soon as possible.

At present our E 911 system is compatible with TDDs but not with computer modems, we would be interested in any information your office has on computer modem/E 911 compatibility, so we can adjust our system to meet the new requirements.

Sincerely,

Nancy Husted-Jensen
Chairperson & State ADA Coordinator

(ORIGINAL OF LETTER SENT IN LARGE PRINT FORMAT)

MAY 18 1993

XXXXXXXXXXXX
XXXXXXXXXXXX
Boardman, Oregon 97818 {b)(6)

Dear XXXXXX,

This letter is in response to your letter to President Clinton requesting an official form to petition for a redress of grievances and a copy of the procedures for filing the form. Your letter indicates that you may have certain grievances concerning your physical and/or mental disabilities and other matters.

The Americans with Disabilities Act ("ADA") authorizes this Department to provide technical assistance to individuals and entities that have rights or responsibilities under the ADA.

Accordingly, this letter provides informal guidance to assist you in understanding the ADA requirements. However, this technical assistance does not constitute a legal interpretation and is not binding on the Department of Justice.

Generally speaking, the executive branch of the Federal government does not have a specific form for individuals who wish to file a grievance with a department or agency. Although there are some exceptions to that statement, it generally is sufficient to write a letter to the department or agency involved explaining the nature of your grievance and to explain your request for redress. If a particular department or agency does require a specific form, it will notify you about its particular requirements.

I am enclosing a brochure entitled "The Americans with Disabilities Act: Questions and Answers" and copies of the "Title II Highlights" and "Title III Highlights" that provide a brief explanation of the ADA. The ADA authorizes the Department of

cc: Records, Chrono, Wodatch, Magagna, McDowney, Delaney, FOIA
udd\Delaney\XXXXX

Justice to investigate alleged violations of titles II and III, which ban discrimination on the basis of disability by state and local governments and by public accommodations, respectively. If you wish to file a complaint about an alleged violation of title III of the ADA, you may send a letter to the following address:

Public Access Section
Civil Rights Division
P.O. Box 66738
Washington, D.C. 20035-6738

A complaint about an alleged violation of title II may be sent to the Coordination and Review Section which has the same address except that the Post Office Box is 66118 and the zip code is

20035-6118. Addresses for other Federal resources are listed on page 42 of the enclosed brochure. You should be aware that any actions taken pursuant to the ADA under titles II or III would be taken on behalf of the United States. We do not act as an attorney for, or representative of, any complainant.

With respect to the other grievances that you have, you may wish to contact the Oregon Bar Association to determine if there is a list of attorneys who may provide pro bono assistance in the State and whether the bar association has a lawyer referral service. You also may wish to contact one or more of the offices an the enclosed list that handle disability issues in Oregon.

I hope this information has been helpful to you.

Sincerely,

John L. Wodatch
Chief
Public Access Section

MAY 20 1993

Lee A. Barkan
General Counsel
American Vision Centers
90 John Street
New York, New York 10038

Dear Mr. Barkan:

This letter responds to your correspondence regarding the application of the Americans with Disabilities Act (ADA) to face lift modifications to an "American Vision Center" retail store in Stratford Square Mall, Bloomingdale, Illinois.

The ADA authorizes the Department of Justice to provide technical assistance and information to individuals and entities who have questions about the Act or the Department's Standards for Accessible Design. This letter provides informal guidance to assist you in understanding and complying with the ADA. However, this technical assistance should not be viewed as legal advice or a legal opinion about your rights or responsibilities under the ADA.

Section 36.304 of the title III regulations requires a public accommodation to remove architectural barriers in existing facilities where such removal is readily achievable. The preamble (page 35568 of the enclosed document) explains that the obligation to remove barriers under 36.304 does not extend to areas of a facility that are used exclusively as employee work areas.

When alterations to an area containing a primary function are undertaken, section 36.403 requires that, in addition to each altered element being accessible, the path of travel to the altered area, including the restrooms, telephones, and drinking fountains serving the altered area, must be readily accessible to and usable by individuals with disabilities, unless the cost and scope of the path of travel modifications are disproportionate to the cost of the alteration.

cc: Records, Chrono, Wodatch, Breen, Harland, FOIA, Library
n:\udd\mercado\plcrtltr\barkan.ewh

Alterations are defined as changes to a place of public accommodation or a commercial facility that affect or could affect the usability of the building or facility. Normal maintenance, such as repainting, or changes to electrical or mechanical systems, are not alterations (unless they affect the usability of the building or facility) and do not trigger the path of travel requirements.

Referring to your list of proposed face-lift modifications, the replacement of carpeting would be considered an alteration. The new carpeting would have to comply with section 4.5.3 of the Americans with Disabilities Act Accessibility Guidelines (ADAAG) and path of travel accessibility modifications within the limits of disproportionality also would be required.

We hope this information is helpful to you. Please contact the Public Access Section any time you have questions or need information. The Department maintains a telephone information line to provide technical assistance regarding the rights and obligations of individuals, businesses, agencies, and others covered or protected by the ADA. This technical assistance is available by calling 202-514-0301 (voice) or 202-514-0383 (TDD) between 1:00 p.m. and 5:00 p.m., Monday through Friday.

Sincerely,

John L. Wodatch
Chief
Public Access Section

Enclosures

AMERICAN VISION CENTERS

March 17, 1993

Via Certified Mail Return
Receipt Requested

John Wodatch, Esq.
Chief, Public Access Section
Civil Rights Division
P. 0. Box 66738
Washington, DC 20035-6738

Dear Mr. Wodatch:

On behalf of American Vision Centers, Inc. ("AVC"), and at the suggestion of Ms. Sheila Delaney of your office, I am writing to request a technical assistance opinion.

The Facts

There is presently an "American Vision Center" retail optical store in Stratford Square Mall, Bloomingdale, Illinois. AVC has been the tenant under the lease to the store since 1981, and has been subletting the premises to one of its franchisees since 1987.

In 1991, when the lease was renewed, the landlord required that the store receive a face-lift to make it look cleaner and new. In accordance with the lease, the franchisee retained a contractor to perform the following work:

(1) Replace the mirrors on the storefront;

(2) Replace the plastic letters in the exterior store sign;

(3) Relaminate counter-tops and replace fluorescent bulbs where needed;

(4) Replace lay-in ceiling tiles and repaint grid;

(5) Replace fluorescent ceiling fixtures, per code;

(6) Provide a new air balance report on the HVAC unit;

(7) Repaint all the walls;

(8) Replace carpeting;

(9) Drain the fire sprinkler system and recharge when work is done; and

(10) Install a drain pan under the existing hot water heater.

As you can see, the store is not going to be altered in any way.

When the plans for the face-lift were submitted to the Village of Bloomingdale for approval, the building commissioner refused to approve them. According to him, the ADA requires that the bathroom at the store be reconstructed to make it wheelchair accessible. Such reconstruction is cost prohibitive. It would require the moving of an entire wall.

I spoke with the building commissioner and explained that, based upon AVC's reading of the ADA, no such reconstruction is necessary.

The bathroom is not (nor has it ever been) available to the public. It is only used by employees of the franchisee.

The Bloomingdale building commissioner agreed to approve the plans, without a reconstruction of the bathroom, provided he received letters from AVC and the landlord absolving him from any possible claim. Although AVC is willing to provide such a letter, the landlord refuses to become involved -- except to the extent of threatening eviction if the face-lift work is not done.

The Opinion Sought

I believe the Bloomingdale building commission will agree to approve the tenant's plans and will not insist upon a reconstruction of the bathroom, if AVC can present him with a letter from your division stating that such reconstruction is not mandated by the ADA.

Accordingly, on behalf of AVC, I hereby request that you provide AVC with a technical assistance opinion as to whether the bathroom at the store needs to be reconstructed where the only work scheduled to be performed at the premises is the face-lift work set forth above.

Thank you very much for your assistance.

Very truly yours,

Lee A. Barkan
General Counsel
