For a side approach, where the depth of the alcove is equal to or less than 15 inches (380 mm), the required clear floor space is 30 inches by 48 inches (760 mm by 1220 mm).

Fig. 4(e) Additional Maneuvering Clearances for Alcoves. For a front approach, if the depth of the alcove is greater than 24 inches (610 mm), then in addition to the 30 inch (760 mm) width, a maneuvering clearance of 6 inches (150 mm) in width is required.

For a side approach, where the depth of the alcove is greater than 15 inches (380 mm), then in addition to the 48 inch (1220 mm) length, an additional maneuvering clearance of 12 inches in length (305 mm) is required.

51-20-3112 (c) 4. Elevators. Elevators shall comply with Chapter 296-81, Washington Administrative Code.

Comment: Issue 32. See comment on Issue No. 16, above.

[E.]

47 ADA/Washington State July 12, 1994

01-03246
4.1.6 (3) (e) Toilet Rooms:

(i) Where it is technically infeasible to comply with 4.22 or 4.23, the installation of at least one unisex toilet/bathroom per floor, located in the same area as existing toilet facilities, will be permitted in lieu of modifying existing toilet facilities to be accessible. Each unisex toilet room shall contain one water closet complying with 4.16 and one lavatory complying with 4.19, and the door shall have a privacy latch.

(ii) Where it is technically infeasible to install a required standard stall (Fig. 30(a)), or where other codes prohibit reduction of the

fixture count (i.e., removal of a water closet in order to create a double-wide stall), either alternate stall (Fig.30(b)) may be provided in lieu of the standard stall.

(iii) When existing toilet or bathing facilities are being altered and are not made accessible, signage complying with 4.30.1, 4.30.2, 4.30.3, 4.30.5, and 4.30.7 shall be provided indicating the location of the nearest accessible toilet or bathing facility within the facility.

4.1.7 Accessible Buildings: Historic Preservation.

(1) Applicability:

(a) General Rule. Alterations to a qualified historic building or facility shall comply with 4.1.6 Accessible Buildings: Alterations, the applicable technical specifications of 4.2 through 4.35 and the applicable special application sections 5 through 10 unless it is determined in accordance with the procedures in 4.1.7(2) that compliance with the requirements for accessible routes (exterior and interior), ramps, entrances, or toilets would threaten or destroy the historic significance of the building or facility in which case the alternative requirements in 4.1.7(3) may be used for the feature.

51-20-3112 (c) 7. Toilet Rooms. A. Shared Facilities. The addition of one unisex toilet facility accessible to all occupants on the floor may be provided in lieu of making existing toilet facilities accessible when it is technically infeasible to comply with either part of Chapter 31.
B. Number. The number of toilet facilities and water closets required by the Uniform Plumbing Code may be reduced by one, in order to provide accessible features.

[C. Signage. When existing toilet facilities are altered and not all are made accessible, directional signage complying with Section 3106(p)3 and 4 shall be provided indicating the location of the nearest accessible toilet facility.]

51-20-3113 Historic Preservation (a) General. Generally, the accessibility provisions of this part shall be applied to historic buildings and facilities as defined in Section 104 (f) of this code. The building official, after consultation with the appropriate historic preservation officer, shall determine whether provisions required by this part for accessible routes of travel (interior or exterior), ramps, entrances, toilets, parking or signage would threaten or destroy the historic significance of the building or facility.

If it is determined that any of the accessibility requirements listed above would threaten or destroy the historic significance of a building or facility, the modifications of Section 3112 (c) for that feature may be utilized.

[N.E. Need to address placement of the unisex toilet in the same area as existing facilities.]

4.1.7 (1) (b) Definition. A qualified historic building or facility is abuilding
or facility that is:

(i) Listed in or eligible for listing in the National Register of Historic Places; or

(ii) Designated as historic under an appropriate State or local law.

4.1.7 (2) Procedures: (a) Alterations to Qualified Historic buildings and Facilities Subject to Section 106 of the National Historic Preservation Act:

4.1.7 (2) (a) (i) Section 106 Process. Section 106 of the National Historic Preservation Act (16 U.S.C. 470 f) requires that a Federal agency with jurisdiction over a Federal, federally assisted, or federally licensed undertaking consider the effects of the agency's undertaking on buildings and facilities listed in or eligible for listing in the National Register of Historic Places and give the Advisory Council on Historic Preservation a reasonable opportunity to comment on the undertaking prior to approval of the undertaking.

4.1.7 (2) (a) (ii) ADA Application. Where alterations are undertaken to a qualified historic building or facility that is subject to section 106 of the National Historic Preservation Act, the Federal agency with jurisdiction over the undertaking shall follow the section 106 process. If the State Historic Preservation Officer or Advisory Council on Historic Preservation agrees that compliance with the requirements for accessible routes (exterior and interior), ramps, entrances, or toilets would threaten or destroy the historic significance of the building or facility, the alternative requirements in 4.1.7(3) may be used for the feature.

51-20-0104 (f) Historic Buildings. Repairs, alterations and additions necessary for the preservation, restoration, rehabilitation or continued use of a building or structure may be made without conformance to all the requirements of this code when authorized by the building official, provided:
1. The building or structure has been designated by official action of the legally constituted authority of this jurisdiction as having special historical or architectural significance.
2. Any unsafe conditions as described in this code are corrected.
3. The restored building or structure will be no more hazardous based on life safety, fire safety and sanitation than the existing building.

4.1.7 (2) (b) Alterations to Qualified Historic Buildings and Facilities Not Subject to Section 106 of the National Historic Preservation Act. Where alterations are undertaken to a qualified historic building or facility that is not subject to section 106 of the National Historic Preservation Act, if the entity undertaking the alterations believes that compliance with the requirements for accessible routes (exterior and interior), ramps, entrances, or toilets would threaten or destroy the historic significance of the building or facility and that the alternative requirements in 4.1.7(3) should be used for the feature, the entity should consult with the State Historic Preservation Officer. If the State Historic Preservation Office agrees that compliance with the accessibility requirements for accessible routes (exterior and interior), ramps, entrances or toilets would threaten or destroy the historical significance of the building or facility, the alternative requirements in 4.1.7(3) may be used.

4.1.7 (2) (c) Consultation With Interested Persons. Interested persons should be invited to participate in the consultation process, including State or local accessibility officials, individuals with disabilities, and organizations representing individuals with disabilities.

4.1.7 (2) (d) Certified Local Government Historic Preservation Programs. Where the State Historic Preservation Officer has delegated the consultation responsibility for purposes of this section to a local government historic preservation program that has been certified in accordance with section 101(c) of the National Historic Preservation Act of 1966 (16 U.S.C. 470a (c)) and implementing regulations (36 CFR 61.5), the responsibility may be carried out by the appropriate local government body or official.

51-20-3113 (a) ... The building official, after consultation with the appropriate historic preservation officer, shall determine whether provisions required by this part for accessible routes of travel (interior or exterior), ramps, entrances, toilets, parking or signage would threaten or destroy the historic significance of the building or facility.

If it is determined that any of the accessibility requirements listed above would threaten or destroy the historic significance of a building or facility, the modifications of Section 3112 (c) for that feature may be utilized.

4.1.7 (3) Historic Preservation: Minimum Requirements:

(a) At least one accessible route complying with 4.3 from a site access point to an accessible entrance shall be provided.

EXCEPTION: A ramp with a slope no greater than 1:6 for a run not to exceed 2 ft (610 mm) may be used as part of an accessible route to an entrance.

51-20-3113 (b) Special Provisions. Where removing architectural barriers or providing accessibility would threaten or destroy the historic significance of a building or facility, the following special provisions may be used; 51-20-3113 (b) 1. At least one accessible route from a site access point to an accessible route shall be provided.

51-20-3112 (c) Modifications. 1. General. The following modifications set forth in this section may be used for compliance where the required standard is technically infeasible or when providing access to historic buildings

51-20-3112 (c) 2. Ramps. Curb ramps and ramps constructed on existing sites, or in existing buildings or facilities, may have slopes and rises as specified for existing facilities in Chapter 31, where space limitations prohibit the use of 1 vertical in 12 horizontal slope or less provided that:
A. A slope of not greater than 1 vertical in 10 horizontal is allowed for a maximum rise of 6 inches.
B. A slope not greater than 1 vertical in 8 horizontal is allowed for a maximum rise of 3 inches.
C. Slopes greater than 1 vertical in 8 horizontal are prohibited.

51-20-3114 Appeal (a) Request for Appeal. An appeal from the standards for accessibility for existing buildings may be filed with the building official in accordance with Section 204, when

Existing structural elements or physical constraints of the site prevent full compliance or would threaten or destroy the historical significance of a historic building.
51-20-3114 (b) Review. 1. Consideration of Alternative Methods. Review of appeal requests shall include consideration of alternative methods which may provide partial access.
51-20-3114 (b) 2. Waiver or Modification of Requirements. The appeals board may waive or modify the requirements of this section when it is determined that compliance with accessibility requirements would threaten or destroy the historic significance of a building or facility.

Comment: Issue 33. The Washington request is for a determination of equivalency of the design and construction standards between the Washington Building Code and the ADA provisions. In the commentary to the final rule publication (page 35591, Federal Register, Volume 56, No 144); the Department of Justice implies that it will not be reviewing procedures as part of the certification process. The Washington procedure is only at slight variance from those contained in the ADA. The Washington law requires that the building official consult with the appropriate preservation officer. Therefore, if the building is on the National Register of Historic Places, the national process will have to be consulted. If it is a State or local landmark, that state or local process will be followed.

Under the building code, the ultimate authority for review and issuance of permits lies with the building official. That duty technically can't be delegated to another agency or person outside of the direct authority of the building official. This is the main reason behind the difference in the Washington procedure. The net effect may actually be more accessibility, in that a building official may be less likely to waive accessibility standards and requirements because of perceived impacts on historic significance than the specific historic preservation officer.

Comment: Issue 34. See comment on Issue No. 33, above.

[Because the historic preservation provisions of WAC constitute a waiver, they are not covered by the certification determination.]

01-03252

3/23/94 letter from Washington State Building Code Council. Issue 33 - Historic Buildings. The Washington State Building Code requires local building officials to consult with the appropriate preservation officer prior to approving use of alternative standards for accessibility for an historic building. Questions were raised whether the state process was similar to the national process. According to Mary Thompson, Assistant Director of the Washington State Office of Archeology and Historic Preservation, state and local historic offices are required to parallel the national process. See attached letter.

Thompson letter. This letter is written to describe the process for entering properties onto the Washington State Register of Historic Places. The State Register is intended to give recognition and encourage protection to places having historic significance in the State of Washington.

The State Register process closely parallels the National Register process. Nominations are accepted by this office and are reviewed against the State Register Criteria (copy enclosed). That review takes place first at a staff level and then before the Washington State Advisory Council on Historic Preservation. If, in the judgment of the Advisory Council, a property meets the outlined criteria, they may recommend it to the State Historic Preservation Officer that it be placed on the State Register. The final decision on whether the property is listed belongs to the State Historic Preservation Officer.

Properties that are reviewed and recommended for the National Register of Historic Places are automatically included on the State Register. Separate votes of the Advisory Council are taken for each listing....

01-03253

4.2.3* Wheelchair Turning Space. The space required for a wheelchair to make a 180-degree turn is a clear space of 60 in (1525 mm) diameter (see Fig. 3(a)) or a T-shaped space (see Fig. 3(b)).

Fig. 3 Wheelchair Turning Space.

Fig. 3(b) T-Shaped Space for 180 degree Turns. The T-shape space is 36 inches (915 mm) wide at the top and stem within a 60 inch by 60 inch (1525 mm by 1525 mm) square.

51-20-3106 (b) 2. Wheelchair Turning Spaces. Wheelchair turning spaces shall be designed and constructed to satisfy one of the following requirements:

A. A turning space not less than 60 inches in diameter; or,

B. A turning space at T-shaped intersections or within a room, where the minimum width is not less than 36 inches. Each segment of the T shall be clear of obstructions not less than 24 inches in each direction.

[Wheelchair turning space may include knee and toe clearance in accordance with Section 3106(b)4C.]

[Amendment: E.]

01-03254

4.3.2 Location.

(1) At least one accessible route within the boundary of the site shall be provided from public transportation stops, accessible parking, and accessible passenger loading zones, and public streets or sidewalks to the accessible building entrance they serve. The accessible route shall, to the maximum extent feasible, coincide with the route for the general public.

(2) At least one accessible route shall connect accessible buildings, facilities, elements, and spaces that are on the same site.

(3) At least one accessible route shall connect accessible building or facility entrances with all accessible spaces and elements and with all accessible dwelling units within the building or facility.

(4) An accessible route shall connect at least one accessible entrance of each accessible dwelling unit with those exterior and interior spaces and facilities that serve the accessible dwelling unit.

51-20-3103 (b) 2. Accessible Route of Travel. When a building, or portion of a building, is required to be accessible, an accessible route of travel shall be provided to all portions of the building, to accessible building entrances and connecting the building and the public way. The
accessible route of travel to areas of primary function may serve but shall not pass through kitchens, storage rooms, toilet rooms, bathrooms, closets or other similar spaces.

[EXCEPTIONS: 1. A single accessible route shall be permitted to pass through a kitchen or storage room in an accessible dwelling unit. 2. Floors above and below accessible levels that have areas of less than 3,000 square feet per floor, need not be served by an accessible route of travel from an accessible level. This exception shall not apply to: A. The offices of health care providers; or, B. Transportation facilities and airports; or, C. Buildings owned or leased by government agencies; or, D. Multi-tenant Group B, Division 2, retail and wholesale occupancies of five tenant spaces or more.
Accessible routes of travel serving any accessible space or element shall also serve as a means of egress for emergencies or connect to an area of evacuation assistance.]
When more than one building or facility is located on a site, accessible routes of travel shall be provided connecting accessible buildings and accessible site facilities. The accessible route of travel shall be the most practical direct route connecting accessible building entrances, accessible site facilities and the accessible site entrances.
EXCEPTION [3] [Move up]: For sites where natural terrain or other unusual property characteristics do not allow the provision of an accessible route of travel from the public way to the building, the point of vehicular debarkation may be substituted for the accessible entrance to the site.
[(For Group R, Division 1 occupancies, see Section 3105(c)1.)]
[Amendment: E.]
56 ADA/Washington State July 12, 1994
01-03255
4.3.8 Changes in Levels. Changes in levels along an accessible route shall comply with 4.5.2. If an accessible route has changes in level greater than 1/2 in (13 mm), then a curb ramp, ramp, elevator, or platform lift (as permitted in 4.1.3 and 4.1.6) shall be provided that complies with 4.7, 4.8, 4.10, or 4.11, respectively. An accessible route does not include stairs, steps, or escalators. See definition of "egress, means of" in 3.5.

4.3.11.3* Stairway Width. Each stairway adjacent to an area of rescue assistance shall have a minimum clear width of 48 inches between handrails.

4.3.11.4* Two-way Communication. A method of two-way communication, with both visible and audible signals, shall be provided between each area of rescue assistance and the primary entry. The fire department or appropriate local authority may approve a location other than the primary entry.

51-20-3106 (d) 4. Changes in Level. Changes in level along an

accessible route of travel shall comply with Section 3106 (f). Stairs shall not be part of an accessible route of travel. Any raised area within an accessible route of travel shall be cut through to maintain a level route or shall have curb ramps at both sides and a level area not less than 48 inches long connecting the ramps.

51-20-3106 (f) Changes in Level. Accessible routes of travel and accessible spaces within buildings shall have continuous common floor or ramp surfaces. Abrupt change in height greater than 1/4 inch shall be beveled to 1 vertical in 2 horizontal. Changes in level greater than 1/2 inch shall be accomplished by means of a ramp meeting the requirements of Section 3106 (h) [a curb ramp meeting the requirements of Section 3106(d)7, or an elevator or platform lift meeting the requirements of Section 3105(c)]. For Type B dwelling units, see also Section 3106 (aa).

51-20-3104 (b) 3. Stairway Width. Each stairway adjacent to an area for evacuation assistance shall have a minimum clear width of 48 inches [between handrails].

Comment: Issue 35. Section 3104(b)3 has been amended to read in part ". . .shall have a minimum clear width of 48 inches between handrails." See page 602 of the Published Code.

51-20-3104 (b) 4. Two-way Communication. A telephone with controlled access to a public telephone system or another method of two-way communication shall be provided between each area for evacuation assistance and the primary entry. [The telephone or other two-way communication system shall be located with the reach ranges specified in Section 3106(b)4.] The fire department may approve location other than the primary entrance. [The communication system shall not require voice communication.]

Comment: Issue 36. Section 3104(b)4 has been amended to include the following sentence: "The communication system shall not require voice communication." See page 602 of the Published Code.

[Amendment: E.]

[E.]

[E.]

57 ADA/Washington State July 12, 1994

01-03257

4.4 Protruding Objects.

4.4.1* General. Objects projecting from walls (for example, telephones) with their leading edges between 27 in and 80 in (685 mm and 2030 mm) above the finished floor shall protrude no more than 4 in (100 mm) into walks, halls, corridors, passageways, or aisles (see Fig. 8(a)). Objects mounted with their leading edges at or below 27 in (685 mm) above the finished floor may protrude any amount (see Fig. 8(a) and (b)). Free-standing objects mounted on posts or pylons may overhang 12 in (305 mm) maximum from 27 in to 80 in (685 mm to 2030 mm) above the ground or finished floor (see Fig. 8(c) and (d)). Protruding objects shall not reduce the

clear width of an accessible route or maneuvering space (see Fig. 8(e)).

Fig. 8 Protruding Objects.

Fig. 8(c-1) Overhead Hazards. As an example, the diagram illustrates a stair whose underside descends across a pathway. Where the headroom is less than 80 inches, protection is offered by a railing (2030 mm) which can be no higher than 27 inches (685 mm) to ensure detectability.

Fig. 8(d) Objects Mounted on Posts or Pylons. The diagram illustrates an area where an overhang can be greater than 12 inches (305 mm) because the object cannot be approached in the direction of the overhang.

Fig. 8(e) Example of Protection around Wall-Mounted Objects and Measurements of Clear Widths. The minimum clear width for continuous passage is 36 inches. Thirty two (32) inches is the minimum clear width for a maximum distance of 24 inches (610 mm). The maximum distance an object can protrude beyond a wing wall is 4 inches (100 mm).

51-20-3106(e) Protruding Objects. Protruding objects shall not reduce the clear width of an accessible route of travel or maneuvering space. Any wall- or post-mounted object with its leading edge between 27 inches and 79 inches above the floor may project not more than 4 inches into a [an accessible route of travel, corridor, passageway, or aisle]. Any wall-or post-mounted projection greater than 4 inches shall extend to the floor.

[Amendment: N.E. It needs to be clear that "accessible" refers only to "route of travel" and not to "corridor, passageway, or aisle." Objects may not protrude into pathways even if those pathways are not otherwise "accessible". However, because WAC seems to require all routes in new construction to be accessible, this is only a potential problem in alterations.]

4.5.2 Changes in Level. Changes in level up to 1/4 in (6 mm) may be vertical and without edge treatment (see Fig. 7(c)). Changes in level between 1/4 in and 1/2 in (6 mm and 13 mm) shall be beveled with a slope no greater than 1:2 (see Fig. 7(d)). Changes in level greater than 1/2 in (13 mm) shall be accomplished by means of a ramp that complies with 4.7 or 4.8.

4.5.3* Carpet. If carpet or carpet tile is used on a ground or floor

surface, then it shall be securely attached; have a firm cushion, pad, or backing, or no cushion or pad; and have a level loop, textured loop, level cut pile, or level cut/uncut pile texture. The maximum pile thickness shall be 1/2 in (13 mm) (see Fig. 8(f)). Exposed edges of carpet shall be fastened to floor surfaces and have trim along the entire length of the exposed edge. Carpet edge trim shall comply with 4.5.2.

51-20-3106 (f) Changes in Level. Accessible routes of travel and accessible spaces within buildings shall have continuous common floor or ramp surfaces. Abrupt change in height greater than 1/4 inch shall be beveled to 1 vertical in 2 horizontal. Changes in level greater than 1/2 inch shall be accomplished by means of a ramp meeting the requirements of Section 3106 (h) [, a curb ramp meeting the requirements of Section 3106(d)7, or an elevator or platform lift meeting the requirements of Section 3105(c)]. For Type B dwelling units, see also Section 3106 (aa).

51-20-3106 (g) 2. Carpeting. Carpeting and floor mats in accessible areas shall be securely fastened to the underlying surface, and shall provide a firm, stable, continuous and relatively smooth surface.

Comment: Issue 37. The Washington State Building Code Council did not feel that it was appropriate to include carpet pile height (thickness) in a building code, nor would it be appropriate to expect building inspectors to inspect for carpet pile height. Instead the WSR provides performance rather than prescriptive standards which have a better chance of resulting in accessible surfaces. In addition it allows greater design flexibility than the simplistic pile thickness standard.
The Washington accessibility regulations have contained the requirement that carpeting provide a firm, stable, continuous and relatively smooth surface since 1976. Experience with this performance provision is that is adequate for the purpose. While carpet pile height may be important, the density of carpet piles is more critical and whether a surface is provided on which a person in a wheelchair can move and maneuver. The Washington regulation actually provides a more stringent, more accessible standard than the ADA.
[Amendment: E.]
[E.]
59 ADA/Washington State July 12, 1994
01-03259
4.6.2 Location. Accessible parking spaces serving a particular building shall be located on the shortest accessible route of travel from adjacent parking to an accessible entrance. In parking facilities that do not serve a particular building, accessible parking

shall be located on the shortest accessible route of travel to an accessible pedestrian entrance of the parking facility. In buildings with multiple accessible entrances with adjacent parking, accessible parking spaces shall be dispersed and located closest to the accessible entrances.

4.6.3* Parking Spaces. Accessible parking spaces shall be at least 96 in (2440 mm) wide. Parking access aisles shall be part of an accessible route to the building or facility entrance and shall comply with 4.3. Two accessible parking spaces may share a common access aisle (see Fig. 9). Parked vehicle overhangs shall not reduce the clear width of an accessible route. Parking spaces and access aisles shall be level with surface slopes not exceeding 1:50 (2%) in all directions.

Fig. 9 Dimensions of Parking Spaces.

The access aisle shall be a minimum of 60 inches (1525 mm) wide for cars or a minimum of 96 inches (2440 mm) wide for vans. The accessible route connected to the access aisle at the front of the parking spaces shall be a minimum of 36 inches (915 mm).

51-20-3107 (a) . . .[6] Accessible parking spaces shall be located on the shortest possible accessible route of travel to an accessible building entrance. In facilities with multiple accessible building entrances with adjacent parking, accessible parking spaces shall be dispersed and located near the accessible entrances. Wherever practical, the accessible route of travel shall not cross lanes of vehicular traffic. Where crossing traffic lanes is necessary, the route of travel shall be designated and marked as a crosswalk.
[EXCEPTION: In multilevel parking structures, all accessible van parking spaces may be located on the same level.
Where a parking facility is not accessory to a particular building, accessible parking spaces shall be located on the shortest accessible route to an accessible pedestrian entrance to the parking facility.]

51-20-3107 (b) 2. Size. Parking spaces shall be not less than 96 inches in width and shall have an adjacent access aisle not less than 60 inches in width. [Van accessible parking spaces shall have an adjacent access aisle not less than 96 inches in width.] Where two adjacent spaces are provided, the access aisle may be shared between the two spaces. Boundaries of access aisles shall be marked so that aisles will not be used as parking space.

51-20-3107 (b) 4. Slope. Accessible parking spaces and access

aisles shall be located on a surface with a slope not to exceed 1 vertical in 48 horizontal.
51-20-3107 (b) 5. Surface. Parking spaces and access aisles shall be firm, stable, smooth and slip-resistant.

[Amendment: E]

[Amendment: E]

01-03260

4.6.4* Signage. Accessible parking spaces shall be designated as reserved by a sign showing the symbol of accessibility (see 4.30.7). Spaces complying with 4.1.2(5)(b) shall have an additional sign "Van-Accessible" mounted below the symbol of accessibility. Such signs shall be located so they cannot be obscured by a vehicle parked in the space.
4.6.5* Vertical Clearance. Provide minimum vertical clearance of 114 in (2895 mm) at accessible passenger loading zones and along at least one vehicle access route to such areas from site entrance(s) and exit(s). At parking spaces complying with 4.1.2(5)(b), provide minimum vertical clearance of 98 in (2490 mm) at the parking space and along at least one vehicle access route to such spaces from site entrance(s) and exit(s).

51-20-3107 (c) Signs. Every parking space required by this section shall be identified by a sign, centered between 3 and 5 feet above the parking surface, at the head of the parking space. The sign shall include the International Symbol of Access and the phrase "State Disabled Parking Permit Required." [Van accessible parking spaces shall have an additional sign mounted below the International Symbol of Access identifying the spaces as "Van Accessible."
EXCEPTION: Where all of the accessible parking spaces comply with the standards for van accessible parking spaces. (See also Section 3106(aa)2.)]

Comment: Issue 38. Section 3107(c) has been amended to require the additional van accessible signage. See page 604t of the Published Code.

51-20-3107 (b) 3. Vertical Clearance. Where accessible parking spaces are provided for vans, the vertical clearance shall be not less than 114 inches [at the parking space and along at least one vehicle access route to such spaces from site entrances and exits].

Comment: Issue 39. Section 3107(b)3 has been amended to read in part ". . . the vertical clearance shall be not less than 114 inches at the parking space and along at least one vehicle access route to such spaces from site entrances and exits." (See page 604s of the Published Code.) It should be noted that the Washington van height provides greater accessibility than the ADA.
The intent of the WSR van parking height requirement was to apply to loading zones as well because these are essentially

temporary parking spaces for all types of vehicles. To clarify the intent of the Code, the Council has issued interpretation No. 93-33.
[E.]
[Amendment: E.]
[E.]
61 ADA/Washington State July 12, 1994
01-03261
4.6.6 Passenger Loading Zones. Passenger loading zones shall provide an access aisle at least 60 in (1525 mm) wide and 20 ft (240 in)(6100 mm) long adjacent and parallel to the vehicle pull-up space (see Fig. 10). If there are curbs between the access aisle and the vehicle pull-up space, then a curb ramp complying with 4.7 shall be provided. Vehicle standing spaces and access aisles shall be level with surface slopes not exceeding 1:50 (2%) in all directions.

4.7.5 Sides of Curb Ramps. If a curb ramp is located where pedestrians must walk across the ramp, or where it is not protected by handrails or guardrail, it shall have flared sides; the maximum slope of the flare shall be 1:10 (see Fig. 12(a)). Curb ramps with returned curbs may be used where pedestrians would not normally walk across the ramp (see Fig. 12(b)).

Fig. 12 Sides of Curb Ramps.

Fig. 12(a) Flared Sides. If the landing depth at the top of a curb ramp is less than 48 inches, then the slope of the flared side shall not exceed 1:12.

Interpretation No. 93-33
Question: Are there any height (clearance) requirements for passenger load zones?
Answer: The intent of the code, as provided in Sec. 3101(a), is to provide standards equivalent to the ADA Accessibility Guidelines. Accessible passenger load zones are essentially temporary parking spaces. The loading zones and the vehicular route to and from the load zones must have a clear height of 114 inches, as is required for van parking spaces.

51-20-3108 Passenger Drop-off and Loading Zones. (a) Location. Where provided, passenger loading zones shall be located on an accessible route of travel.

51-20-3108 (b) [2] Size.
Passenger loading zones shall provide an access aisle not less than 5 feet in width by 20 feet in length with the long dimension abutting and parallel to: (1) the vehicle space on one side and (2)

an accessible route of travel on the other.

51-20-3108 (b) 3. Slope. Such zones shall be located on a surface with a slope not exceeding 1 vertical in 48 horizontal.

51-20-3106 (d) [7] C. Side Slopes of Curb Ramps. Curb ramps located where pedestrians must walk across the ramp, or where not protected by handrails or guardrails, shall have sloped sides. The maximum side slope shall be 1 vertical in 10 horizontal. Curb ramps with returned curbs may be used where pedestrians would not normally walk across the ramp.

[EXCEPTION: Where the width of the walking surface at the top of the ramp and parallel to the run of the ramp is less than 48 inches, the maximum side slope shall be 1 vertical in 12 horizontal.]

[E.]

[Amendment: E.]

4.7.7 Detectable Warnings. A curb ramp shall have a detectable warning complying with 4.29.2. The detectable warning shall extend the full width and depth of the curb ramp.

4.7.10 Diagonal Curb Ramps. If diagonal (or corner type) curb ramps have returned curbs or other well-defined edges, such edges shall be parallel to the direction of pedestrian flow. The bottom of diagonal curb ramps shall have 48 in (1220 mm) minimum clear space as shown in Fig. 15(c) and (d). If diagonal curb ramps are provided at marked crossings, the 48 in (1220 mm) clear space shall be within the markings (see Fig. 15(c) and (d)). If diagonal curb ramps have flared sides, they shall also have at least a 24 in (610 mm) long segment of straight curb located on each side of the curb ramp and within the marked crossing (see Fig. 15(c)).

Comment: Issue 40. Section 3106(d)7C has been amended to add the following additional provision: ... [see above]. See page 604b of the Published Code.

51-20-3106 (d) 5. B. Detectable Warnings. Curb ramps shall have detectable warnings complying with Section 3106 (q). Detectable warnings shall extend the full width and depth of the curb ramp.

51-20-3106 (d) [8]. Vehicular Areas. Where an accessible route of travel crosses or adjoins a vehicular way, and where there are no curbs, railings or other elements [which separate the pedestrian and vehicular areas, and which are] detectable by a person who has severe vision impairment
the boundary between the areas shall be defined
by a continuous detectable warning not less than 36 inches wide, complying with Section 3106 (g).

Comment: Issue 41. See comment on Issue No. 24, above.

Comment: Issue 42. Diagonal curb ramp standards are not included in the WSR. Therefore, diagonal curb ramps are not directly permitted by the Washington Code. This design is rarely seen in designs for private development, but is more typically found at street intersection designs. The Washington Building Code does not apply to public rights of way, but only to development off of public rights of way. If someone wishes to use it, it could be approved by the local building official as an alternate design (equivalent facilitation).

[E.]

[E.]

NE No equivalent provisions.

[N.E. WSR does not prohibit use of diagonal curb ramps and leaves regulation of such ramps completely up to the discretion of the inspector. The special provisions for diagonal curb ramps are necessary to allow people enough space to maneuver out of the way of traffic and to lessen pedestrian traffic on the ramp so that individuals in wheelchairs can use it.]

4.8.2* Slope and Rise. The least possible slope shall be used for any ramp. The maximum slope of a ramp in new construction shall be 1:12. The maximum rise for any run shall be 30 in (760 mm) (see Fig. 16). Curb ramps and ramps to be constructed on existing sites or in existing buildings or facilities may have slopes and rises as shown as allowed in 4.1.6(3)(a) if space limitations prohibit the use of a 1:12 slope or less (see 4.1.6).

Fig. 16 Components of a Single Ramp Run and Sample Ramp Dimensions.

If the slope of a ramp is between 1:12 and 1:16, the maximum rise shall be 30 inches (760 mm) and the maximum horizontal run shall be 30 feet (9 m). If the slope of the ramp is between 1:16 and 1:20, the maximum rise shall be 30 inches (760 mm) and the maximum horizontal run shall be 40 feet (12 m).

51-20-3106 (h) 2. Slope and Rise. The maximum slope of a ramp shall be 1 vertical in 12 horizontal. The maximum rise for any run shall be 30 inches.

51-20-3315 (e) Ramp Slope. The slope of ramped aisles shall not be more than 1 vertical in 8 horizontal. Ramped aisles shall have a slip-resistant surface.

EXCEPTION: When provided with fixed seating, theaters may have a slope not steeper than 1 vertical to 5 horizontal.

Comment: Issue 43. The ramped aisles allowed by Section 3315(e) of the UBC are not allowed as part of an accessible route. Specifically Section 3315(a) states: "Aisles located within an accessible route of travel shall also comply with Chapter 31." Chapter 31 limits slope on accessible routes to a maximum rise of 1 in 12.

[E.]

01-03264

4.8.5* Handrails. If a ramp run has a rise greater than 6 in (150 mm) or a horizontal projection greater than 72 in (1830 mm), then it shall have handrails on both sides. Handrails are not required on curb ramps or adjacent to seating in assembly areas. Handrails shall comply with 4.26 and shall have the following features:

(1) Handrails shall be provided along both sides of ramp segments. The inside handrail on switchback or dogleg ramps shall always be continuous.

51-20-3106 (h) 5. Handrails. Ramps having slopes steeper than 1 vertical in 20 horizontal shall have handrails as required for stairways, except that intermediate handrails as required in Section 3306 (i) are not required. Handrails shall be continuous provided that they shall not be required at any point of access along the ramp, nor at any curb ramp. Handrails shall extend at least 12 inches beyond the top and bottom of any ramp segment.

EXCEPTION: Ramps having a rise less than or equal to 6 inches or a run less than or equal to 72 inches need not have handrails.

51-20-3306 (i) Handrails. Stairways shall have handrails on each side, and every stairway required to be more than 88 inches in width shall be provided with not less than one intermediate handrail for each 88 inches of required width. Intermediate handrails shall be spaced approximately equally across the entire width of the stairway.

EXCEPTION: 1. Stairways less than 44 inches in width or stairways serving one individual dwelling unit in Group R, Division 1 or 3 Occupancies, or a Group R, Division 3 congregate residence may have one handrail.
2. Private stairways 20 inches or less in height may have handrails on one side only.
3. Stairways having less than four risers and serving one individual dwelling unit in Group R, Division 1 or 3, or a Group R. Division 3 congregate residence or serving Group M. Occupancies need not have handrails.

01-03265

(2) If handrails are not continuous, they shall extend at least 12 in (305 mm) beyond the top and bottom of the ramp segment and shall be parallel with the floor or ground surface (see Fig. 17).

(3) The clear space between the handrail and the wall shall be 1 - 1/2 in (38 mm).

(4) Gripping surfaces shall be continuous.

(5) Top of handrail gripping surfaces shall be mounted between 34 in and 38 in (865 mm and 965 mm) above ramp surfaces.

(6) Ends of handrails shall be either rounded or returned smoothly to floor, wall, or post.

(7) Handrails shall not rotate within their fittings.

The top of handrails and handrail extensions shall be placed not less than 34 inches or more than 38 inches above the nosing of treads and landings. Handrails shall be continuous the full length of the stairs and, except for private stairways, at least one handrail shall extend in the direction of the stair run not less than 12 inches beyond the top riser or less than 23 inches beyond the bottom riser. Ends shall be returned or shall terminate in newel posts or safety terminals.

The handgrip portion of handrails shall be not less than 1 1/2 inches or more than 2 inches in cross-sectional dimension or the shape shall provide an equivalent gripping surface. The handgrip portion of handrails shall have a smooth surface with no sharp corners.

Handrails projecting from a wall shall have a space of not less than 1 1/2 inches between the wall and the handrail. Any recess containing a handrail shall allow a clearance of not less than 18 inches above the top of the rail, and shall be not more than 3 inches in horizontal depth.

Handrails shall not rotate within their fittings.

Comment: Issue 44. The reference to Section 3306(i) for handrail requirements could be construed to allow single handrails in some circumstances. Since the exceptions only specifically state stairways, it was the intent of the Council that these exceptions not apply to ramps. The Council has issued Interpretation No. 93-35 to clarify this limitation.

[E.]

66 ADA/Washington State July 12, 1994

01-03266
Interpretation No. 93-35.
Question: Do the exceptions in Section 3306(i) allowing only one handrail apply to ramps and stairways required to be accessible by Chapter 31?
Answer: The intent of the code, as provided in Sec. 3101(a) is to provide standards equivalent to the ADA Accessibility Guidelines.
Ramps. The exceptions do not apply to ramps designed for compliance with Chapter 31. Such ramps must provide handrails on both sides.
Stairways. For stairways which provide access to areas of buildings where the accessible route exceptions have been used and no elevator or ramp is provided (per Sec. 3103(b)), handrails

must be provided on both sides of the stairway regardless of the occupant load served.

01-03267

4.8.7 Edge Protection. Ramps and landings with drop-offs shall have curbs, walls, railings, or projecting surfaces that prevent people from slipping off the ramp. Curbs shall be a minimum of 2 in (50 mm) high (see Fig. 17).

[51-20-3106(h)7. Edge Protection. Any portion of the edge of a ramp with a slope greater than 1 vertical in 20 horizontal, or landing which is more than 1/2 inch above the adjacent grade or

floor, shall be provided with edge protection in accordance with the following: A. Walls and Curbs. When used, walls or curbs shall be not less than 2 inches in height above the surface of the accessible route of travel. B. Railings. When used, railings shall comply with Section 3106(h)5 and also shall have one of the following features: (i) An intermediate rail mounted 17 to 19 inches above the ramp or landing surface, or (ii) A guardrail complying with Section 1712.]

[Amendment: E.]

01-03268

4.9.4 Handrails. Stairways shall have handrails at both sides of all stairs. Handrails shall comply with 4.26 and shall have the following features:

(1) Handrails shall be continuous along both sides of stairs. The inside handrail on switchback or dogleg stairs shall always be continuous (see Fig. 19(a) and (b)).

(2) If handrails are not continuous, they shall extend at least 12 in (305 mm) beyond the top riser and at least 12 in (305 mm) plus the width of one tread beyond the bottom riser. At the top, the extension shall be parallel with the floor or ground surface. At the bottom, the handrail shall continue to slope for a distance of the width of one tread from the bottom riser; the remainder of the extension shall be horizontal (see Fig. 19(c) and (d)). Handrail extensions shall comply with 4.4.

(3) The clear space between handrails and wall shall be 1-1/2 in (38 mm).

(4) Gripping surfaces shall be uninterrupted by newel posts, other construction elements, or obstructions.

(5) Top of handrail gripping surface shall be mounted between 34 in and 38 in (865 mm and 965 mm) above stair nosing.

(6) Ends of handrails shall be either rounded or returned smoothly to floor, wall or post.

(7) Handrails shall not rotate within their fittings.

51-20-3306 (i) Handrails. Stairways shall have handrails on each side, and every stairway required to be more than 88 inches in width shall be provided with not less than one intermediate handrail for each 88 inches of required width. Intermediate handrails shall be spaced approximately equally across the entire width of the stairway.

EXCEPTION: 1. Stairways less than 44 inches in width or stairways serving one individual dwelling unit in Group R, Division 1 or 3 Occupancies, or a Group R, Division 3 congregate residence may have one handrail.
2. Private stairways 20 inches or less in height may have handrails on one side only.
3. Stairways having less than four risers and serving one individual dwelling unit in Group R, Division 1 or 3, or a Group R, Division 3 congregate residence or serving Group M. Occupancies need not have handrails.

3306 (i) Handrails. ... The top of handrails and handrail extensions shall be placed not less than 34 inches or more than 38 inches above the nosing of treads and landings. Handrails shall be

continuous the full length of the stairs and, except for private stairways, at least one handrail shall extend in the direction of the stair run not less than 12 inches beyond the top riser or less than 23 inches beyond the bottom riser. Ends shall be returned or shall terminate in newel posts or safety terminals.

The handgrip portion of handrails shall be not less than 1 1/2 inches or more than 2 inches in cross-sectional dimension or the shape shall provide an equivalent gripping surface. The handgrip portion of handrails shall have a smooth surface with no sharp corners.

Handrails projecting from a wall shall have a space of not less than 1 1/2 inches between the wall and the handrail. Any recess containing a handrail shall allow a clearance of not less than 18 inches above the top of the rail, and shall be not more than 3 inches in horizontal depth.

Handrails shall not rotate within their fittings.

4.10 Elevators.
4.10.1 General. Accessible elevators shall be on an accessible route and shall comply with 4.10 and with the ASME A17.1-1990, Safety Code for Elevators and Escalators. Freight elevators shall not be considered as meeting the requirements of this section unless the only elevators provided are used as combination passenger and freight elevators for the public and employees.

Comment: Issue 45. Section 3306(a) requires all stairways to be 44 inches wide or more unless the occupant load served is less than 50. These are all fairly small buildings, and typically stairways less than 44 inches only occur in residential (non transient) apartment buildings. Use in commercial, educational or assembly buildings is very rare. To clarify that handrails on accessible stairs must have two handrails, the Council has issued Interpretation No. 93-35.

Interpretation No. 93-35.
Question: Do the exceptions in Section 3306(i) allowing only one handrail apply to ramps and stairways required to be accessible by Chapter 31?
Answer: The intent of the code, as provided in Sec. 3101 (a) is to provide standards equivalent to the ADA Accessibility Guidelines.
Ramps. The exceptions do not apply to ramps designed for compliance with Chapter 31. Such ramps must provide handrails on both sides.
Stairways. For stairways which provide access to areas of buildings where the accessible route exceptions have been used and no elevator or ramp is provided (per Sec. 3103(b)), handrails must be provided on both sides of the stairway regardless of the occupant load served.
51-20-3105 (c) Elevators. 2-[B] Design. All elevators shall be accessible.

EXCEPTION: 1. Private elevators serving only one dwelling unit.
2. Where more than one elevator is provided in the building, elevators used exclusively for movement of freight.

Elevators required to be accessible shall be designed and constructed to comply with Chapter 296-81 of the Washington Administrative Code.

[296-81-007 (5) The American National Standard Safety Code for Elevators, Dumbwaiters, Escalators, and Moving Walks, ANSI

A17.1, 1990 Edition is adopted as the standard for elevators, dumbwaiters, escalators and moving walks installed on or after July 1, 1992, with the exceptions of ANSI A17.1, part XIX, and ANSI A17.1, part V, Section 513, which is replaced by chapter 296-94 WAC.]
[E.]
70 ADA/Washington State July 12, 1994
01-03861
4.10.2 Automatic Operation. Elevator operation shall be automatic.

Each car shall be equipped with a self-leveling feature that will automatically bring the car to floor landings within a tolerance of 1/2 in (13 mm) under rated loading to zero loading conditions. This self-leveling feature shall be automatic and independent of the operating device and shall correct the overtravel or undertravel.

4.10.3 Hall Call Buttons. Call buttons in elevator lobbies and halls shall be centered at 42 in (1065 mm) above the floor. Such call buttons shall have visual signals to indicate when each call is registered and when each call is answered. Call buttons shall be a minimum of 3/4 in (19 mm) in the smallest dimension. The button designating the up direction shall be on top. (See Fig. 20.) Buttons shall be raised or flush. Objects mounted beneath hall call buttons shall not project into the elevator lobby more than 4 in (100 mm).

4.10.4 Hall Lanterns. A visible and audible signal shall be provided at each hoistway entrance to indicate which car is answering a call. Audible signals shall sound once for the up direction and twice for the down direction or shall have verbal annunciators that say "up" or "down." Visible signals shall have the following features:

(1) Hall lantern fixtures shall be mounted so that their centerline is at least 72 in (1830 mm) above the lobby floor. (See Fig. 20.)

(2) Visual elements shall be at least 2-1/2 in (64 mm) in the smallest dimension.

(3) Signals shall be visible from the vicinity of the hall call button (see Fig. 20). In-car lanterns located in cars, visible from the vicinity of hall call buttons, and conforming to the above requirements, shall be acceptable.

Comment: Issue 46. See comment on Issue No. 16, above. Also see attached side by side analysis of the adopted Washington elevator standards and ADAAG standards.

[296-81-300. Operation and leveling. The elevator shall be automatic and be provided with a self-leveling feature that will automatically bring the car to the floor landings within a tolerance of plus or minus 1/2 inch under normal loading and unloading conditions. This self-leveling shall within its zone, be entirely automatic and independent of the operating device and shall correct for overtravel or undertravel. The car shall also be maintained approximately level with the landing irrespective of load.]

[296-81-355. Hall Buttons. The centerline of the hall call buttons shall be a nominal (42) inches above the floor. The button designating the UP direction shall be on top.
Direction buttons, exclusive of border, shall be a minimum of (3/4) inch in size, raised or flush. Visual indication shall be provided to show each call registered and extinguished when the call is answered. Depth of flush buttons when operated shall not exceed (3/8) inch.]

[296-81-360. Hall lantern. A visual and audible signal shall be provided at each hoistway entrance, indicating to the prospective passenger which car is answering the call and its direction of travel.

The visual signal for each direction shall be at least two and one-half inches in size and visible from the vicinity of the hall call button. The audible signal shall sound once for the up direction and twice for the down direction.

The centerline of the fixture shall be located at least six feet from the floor.

The lanterns may be located in the jamb or in the car.]

[See below]

[Amendment: E.]

[Amendment: E.]

[Amendment: E.]

4.10.5 Raised and Braille Characters on Hoistway Entrances. All elevator hoistway entrances shall have raised and Braille floor designations provided on both jambs. The centerline of the characters shall be 60 in (1525 mm) above finish floor. Such characters shall be 2 in (50 mm) high and shall comply with 4.30.4. Permanently applied plates are acceptable if they are permanently fixed to the jambs. (See Fig. 20).

4.10.6* Door Protective and Reopening Device. Elevator doors shall open and close automatically. They shall be provided with a reopening device that will stop and reopen a car door and hoistway door automatically if the door becomes obstructed by an object or person. The device shall be capable of completing these operations without requiring contact for an obstruction passing through the opening at heights of 5 in and 29 in (125 mm and 735 mm) above finish floor (see Fig. 20). Door reopening devices shall remain effective for at least 20 seconds. After such an interval, doors may close in accordance with the requirements of ASME A17.1-1990.

4.10.7* Door and Signal Timing for Hall Calls. The minimum acceptable time from notification that a car is answering a call until the doors of that car start to close shall be calculated from the following equation:

$$T = D/(1.5 \text{ ft/s}) \text{ or } T = D/(445 \text{ mm/s})$$

where T total time in seconds and D distance (in feet or millimeters) from a point in the lobby or corridor 60 in (1525 mm) directly in front of the farthest call button controlling that car to the centerline of its hoistway door (see Fig. 21). For cars with in-car lanterns, T begins when the lantern is visible from the vicinity of hall call buttons and an audible signal is sounded. The

minimum acceptable notification time shall be 5 seconds.

4.10.8 Door Delay for Car Calls. The minimum time for elevator doors to remain fully open in response to a car call shall be 3 seconds.

[296-81-350. Door jamb marking. The floor designation shall be provided at each hoistway entrance on both sides of jamb visible from within the car and the elevator lobby at a centerline height of (60) inches above the floor. Designations shall be on contrasting color background (2) inches high and raised (.30) inch, and shall be accompanied by Grade 2 Braille. Applied plates permanently attached shall be acceptable.]

[296-81-310 Door delay. (1). Hall call. The minimum acceptable initial transfer time from notification that a car is answering a call (lantern and audible signal) until the doors of the car start to close shall be 0 to 5 ft.-4 sec.; 10 ft.-7 sec.; 15 ft.-10 sec.; 20 ft.-13 sec. The distance shall be established from a point in the center of the corridor or lobby (maximum 5 feet) directly opposite the farthest hall button controlling that car to the centerline of the hoistway entrance.]

[296-81-310 Door delay. (2). Car call. The minimum acceptable initial transfer time for doors to remain fully open shall be not less than 3 seconds.]

[Amendment: E.]

[Amendment: E.]

[Amendment: E.]

72 ADA/Washington State July 12, 1994

01-03863

4.10.9 Floor Plan of Elevator Cars. The floor area of elevator cars shall provide space for wheelchair users to enter the car, maneuver within reach of controls, and exit from the car. Acceptable door opening and inside dimensions shall be as shown in Fig. 22. The clearance between the car platform sill and the edge of any hoistway landing shall be no greater than 1-1/4 in (32 mm).

Fig. 22 Minimum Dimensions of Elevator Cars.

Diagram (a) illustrates an elevator with a door providing a 36 inch (915 mm) minimum clear width, in the middle of the elevator. The width of the elevator car is a minimum of 80 inches (2030 mm). The depth of the elevator car measured from the back wall to the elevator door is a minimum of 54 inches (1370 mm). The depth of the elevator car measured from the back wall to the control panel is a minimum of 51 inches (1291 mm).

Diagram (b) illustrates an elevator with door providing a minimum 36 inch (915 mm) clear width, located to one side of the elevator. The width of the elevator car is a minimum of 68 inches (1730 mm). The depth of the elevator car measured from the back wall to the elevator door is a minimum of 54 inches (1370 mm). The depth of the elevator car measured from the back wall to the

control panel is a minimum of 51 inches (1291).

4.10.10 Floor Surfaces. Floor surfaces shall comply with 4.5.

4.10.11 Illumination Levels. The level of illumination at the car controls, platform, and car threshold and landing sill shall be at least 5 footcandles (53.8 lux).

[296-81-315 Car interior. The car interior shall provide space for wheelchair users to enter the car, maneuver within reach of controls and exit the car. (1) Doors shall provide (36) inches clear minimum width. (2) Car depth (51) inches minimum from rear wall to return panel, with (54) inches minimum from rear wall to inside face of cab door. (3) Cab width of cab for side opening door (68) inches minimum, center opening door cab width (80) inches minimum.

Clearance between car platform sill and edge of hoistway landing sill shall be (1 1/4) inches maximum.

EXCEPTION: Elevators provided in existing schools, institutions, or other buildings specifically authorized by local authorities may have a minimum clear distance between walls or between wall and door including return panels of not less than 54 X 54 inches. Minimum distance from wall to return panel shall be not less than 51 inches.]

[296-81-335 Floor covering. Floor covering should have a nonslip hard surface which permits easy movement of wheelchairs. If carpeting is used, it should be securely attached, heavy duty, with a tight weave and low pile, installed without padding.]

[296-81-345 Minimum illumination. The minimum illumination shall be in accordance with the latest edition of ANSI A17.1.]

[Amendment: E.]

[Amendment: E.]

[Amendment: E.]

4.10.12* Car Controls. Elevator control panels shall have the following features:

(1) Buttons. All control buttons shall be at least 3/4 in (19 mm) in their smallest dimension. They shall be raised or flush.

(2) Tactile, Braille, and Visual Control Indicators. All control buttons shall be designated by Braille and by raised standard alphabet characters for letters, arabic characters for numerals, or standard symbols as shown in Fig. 23(a), and as required in ASME A17.1-1990. Raised and Braille characters and symbols shall comply with 4.30. The call button for the main entry floor shall be designated by a raised star at the left of the floor designation (see Fig. 23(a)). All raised designations for control buttons shall be placed immediately to the left of the button to which they apply. Applied plates, permanently attached, are an acceptable means to provide raised control designations. Floor buttons shall be provided

with visual indicators to show when each call is registered. The visual indicators shall be extinguished when each call is answered.

(3) Height. All floor buttons shall be no higher than 54 in (1370 mm) above the finish floor for side approach and 48 in (1220 mm) for front approach. Emergency controls, including the emergency alarm and emergency stop, shall be grouped at the bottom of the panel and shall have their centerlines no less than 35 in (890 mm) above the finish floor (see Fig. 23(a) and (b)).

Fig. 23 Car Controls.

Fig. 23(a) Panel Detail. The diagram illustrates the symbols used for the following control buttons: main entry floor, door closed, door open, emergency alarm, and emergency stop. The diagram further states that the octagon symbol for the emergency stop shall be raised but the X (inside the octagon) is not.

(4) Location. Controls shall be located on a front wall if cars have center opening doors, and at the side wall or at the front wall next to the door if cars have side opening doors (see Fig. 23(c) and (d)).

[296-81-320 Car controls. At least one set of controls shall be readily accessible from a wheelchair upon entering an elevator.

The centerline of the alarm button and emergency stop switch shall be at nominal (35) inches and the highest floor buttons no higher than (54) inches from the floor where side approach is provided. (48) inches maximum where forward approach is required. Floor registration buttons, exclusive of border, shall be a minimum of (3/4) inch in size, raised or flush. Visual indication shall be provided to show each call registered and extinguished when call is answered. Depth of flush buttons when operated shall not exceed (3/8) inch.

Markings shall be adjacent to the controls on a contrasting color background to the left of the controls. Letters or numbers shall be a minimum of (5/8) inch high and raised (.030) inch. All control buttons shall be designated by Braille. Applied plates permanently attached shall be acceptable. Emergency controls shall be grouped together at the bottom of the control panel. Symbols as indicated shall be used to assist in readily identifying essential controls (see ANSI A17.1, page 114, Rule 211.1). Controls not essential to the operation of the elevator may be located as convenient.]

[Amendment: E. Although the ADA requires all panels to be at wheelchair-accessible height and WAC only requires 1, having several control panels at different heights can serve more people (higher panels help people who have difficulty bending). As long as all panels are accessible to people with visual impairments, this is alright.]

NE

74 ADA/Washington State July 12, 1994

01-03865

4.10.13* Car Position Indicators. In elevator cars, a visual car position indicator shall be provided above the car control panel or over the door to show the position of the elevator in the hoistway. As the car passes or stops at a floor served by the elevators, the corresponding numerals shall illuminate, and an audible signal shall sound. Numerals shall be a minimum of « in (13 mm) high. The audible signal shall be no less than 20 decibels with a frequency no higher than 1500 Hz. An automatic verbal announcement of the

floor number at which a car stops or which a car passes may be substituted for the audible signal.

4.10.14* Emergency Communications. If provided, emergency two-way communication systems between the elevator and a point outside the hoistway shall comply with ASME A17.1-1990. The highest operable part of a two-way communication system shall be a maximum of 48 in (1220 mm) from the floor of the car. It shall be identified by a raised symbol and lettering complying with 4.30 and located adjacent to the device. If the system uses a handset then the length of the cord from the panel to the handset shall be at least 29 in (735 mm). If the system is located in a closed compartment the compartment door hardware shall conform to 4.27. Controls and Operating Mechanisms. The emergency intercommunication system shall not require voice communication.

[296-81-325 Car position indicator signal. A visual car position indicator shall be provided above the car control panel or above the door.

(1) As the car passes or stops at a floor, the corresponding numbers shall illuminate and an audible signal shall sound.
(2) Numerals shall be a minimum (1/2) inch high.
(3) Audible signal shall be no less than (20) decibels with frequency no higher than 1500 Hz.
(4) An automatic verbal announcement of the floor number may be substituted for the audible signal.]

[296-81-330 Telephone or intercommunicating system. An emergency two-way communication system shall be provided between the elevator and a point outside the hoistway that shall comply with ASME/ANSI A17.1-1990, and the following:
(1) Highest operable part of system shall be maximum (48) inches from the floor.
(2) System shall be identified by raised symbol and lettering located adjacent to the device. Characters shall be (5/8) inch to (2) inches high, raised (1/32) inch, upper case, sans serif or simple serif type, and shall be accompanied by Grade 2 Braille.
(3) If system uses a handset, minimum cord length shall be (29) inches.
(4) If located in a closed compartment, door shall be operable with one hand, shall not require tight grasping, pinching, or twisting of the wrist, and shall require a maximum force of (5) lbf.
(5) The emergency communication system shall not require voice communication. (Voice only system is inaccessible to persons with speech or hearing impairments.)]

[296-81-340 Handrails. A handrail shall be provided on all walls of

the car that are not used for normal exits. There shall be a space of one and one-half inches between the wall and the rail. The rail shall be at a nominal height of between thirty-two and thirty-five inches from the floor. The hand grip portion of handrails shall be not less than one and one-quarter inches or more than two inches in width, shall be basically oval or round in cross-section, and shall have smooth surfaces with no sharp corners. Handrails that approach each other or a blank car wall in the interior corners of the car need not be returned to the wall. If the end of the handrail presents an abrupt end on the closing jamb wall to persons entering a car that has a single-slide or two-speed entrance, the handrail end shall be returned to the wall.]

[Amendment: E.]

[Amendment: E.]

75 ADA/Washington State July 12, 1994

01-03866

4.11 Platform Lifts (Wheelchair Lifts).

4.11.1 Location. Platform lifts (wheelchair lifts) permitted by 4.1 shall comply with the requirements of 4.11.

4.11.2* Other Requirements. If platform lifts (wheelchair lifts) are used, they shall comply with 4.2.4, 4.5, 4.27, and ASME A17.1 Safety Code for Elevators and Escalators, Section XX, 1990.

4.11.3 Entrance. If platform lifts are used then they shall facilitate unassisted entry, operation, and exit from the lift in compliance with 4.11.2.

See below.

Comment: Issue 47. See comment on Issue No. 18, above.

51-20-3105 (c) 3. All platform lifts used in lieu of an elevator shall be capable of independent operation and shall comply with Chapter 296-81 of the Washington Administrative Code.

[296-81-007. National Elevator Code Adopted. ... (5) The American National Standard Safety Code for Elevators, Dumbwaiters, Escalators, and Moving Walks, ANSI A17.1, 1990 Edition is adopted as the standard for elevators, dumbwaiters, escalators, and moving walks installed on or after July 1, 1992, with the exceptions of ANSI A17.1, Part XIX, and ANSI A17.1, Part V, Section 513, which is replaced by chapter 296-94 WAC.]

[Amendment: E.]

01-03867

4.13.6 Maneuvering Clearances at Doors. Minimum maneuvering clearances at doors that are not automatic or power-assisted shall be as shown in Fig. 25. The floor or ground area within the required clearances shall be level and clear.

Fig. 25 Maneuvering Clearances at Doors. NOTE: All doors in alcoves shall comply with the clearances for front approaches.

Diagram (a) Front Approaches--Swinging Doors. Front approaches to pull side of swinging doors shall have maneuvering space that extends 18 in (455 mm) minimum beyond the latch side of the door and 60 in (1525 mm) minimum perpendicular to the doorway.

Front approaches to push side of swinging doors, equipped with both closer and latch, shall have maneuvering space that extends 12 in (305 mm) minimum beyond the latch side of the door and 48 in (1220 mm) minimum perpendicular to the doorway.

Front approaches to push side of swinging doors, not equipped with latch and closer, shall have maneuvering space that is the same width as door opening and extends 48 in (1220 mm). minimum perpendicular to the doorway.

Diagram (b) Hinge Side Approaches. Hinge-side approaches to pull side of swinging doors shall have maneuvering space that extends 36 in (915 mm) minimum beyond the latch side of the door if 60 in (1525 mm) minimum is provided perpendicular to the doorway or maneuvering space that extends 42 in (1065 mm) minimum beyond the latch side of the door shall be provided if 54 in (1370 mm) minimum is provided perpendicular to the doorway.

Hinge-side approaches to push side of swinging doors, not equipped with both latch and closer, shall have a maneuveringspace of 54 in (1370 mm) minimum, parallel to the doorway and 42 in (1065 mm) minimum, perpendicular to the doorway.

51-20-3106 (j) 3. Maneuvering Clearances at Doors. Except as provided in Section 3106 (aa) (3106 (aa) is dwelling units), all doors shall have minimum maneuvering clearances as follows:

A. Where a door must be pulled to be opened, an unobstructed floor space shall extend at least 18 inches beyond the strike jamb.

B. Where a door must be pushed to be opened and is equipped with a closer and a latch, an unobstructed floor space shall extend at least 12 inches beyond the strike jamb.

[...
D. Where a door must be pulled to be opened, an unobstructed floor space shall be provided that extends 60 inches, perpendicular to the doorway.
E. Where a door must be pushed to be opened an unobstructed floor space shall extend 48 inches perpendicular to the doorway.]

NE Provisions do not contain enough detail to ensure access at doors. For example, ADAAG Fig. 25 requires maneuvering clearances that range in size from 60 inches by 52 inches to 48 inches by 32 inches, depending on door swing, approach, etc. Although provisions in sections 51-20-3304 (i) and (j) compensate in some ways, the provisions are still inadequate.

77 ADA/Washington State July 12, 1994

01-03868

Hinge side approaches to push side of swinging doors, equipped with both latch and closer, shall have maneuvering space of 54 in (1370 mm) minimum, parallel to the doorway, 48 in (1220 mm) minimum perpendicular to the doorway.

Diagram (c) Latch Side Approaches--Swinging Doors. Latch-side approaches to pull side of swinging doors, with closers, shall have maneuvering space that extends 24 in (610 mm) minimum beyond the latch side of the door and 54 in (1370 mm) minimum perpendicular to the doorway.

Latch-side approaches to pull side of swinging doors, not equipped with closers, shall have maneuvering space that extends 24 in (610 mm) minimum beyond the latch side of the door and 48 in (1220 mm) minimum perpendicular to

EXCEPTION: Entry doors to acute care hospital bedrooms for in-patients shall be exempted from the requirement for space at the latch side of the door (see dimension "x" in Fig. 25) if the door is at least 44 in (1120 mm) wide.

51-20-3304 (i) Floor Level at Doors. Regardless of the occupant load, there shall be a floor or landing on each side of a door. When access for persons with disabilities is required by Chapter 31, the floor or landing shall not be more than 1/2 inch lower than the threshold of the doorway. When such access is not required, such dimension shall not exceed 1 inch. Landings shall be level except for exterior landings, which may have a slope not to exceed 1/4 inch per foot.

51-20-3304 (j) Landings at Doors. Landings shall have a width not less than the width of the stairway or the width of the door, whichever is the greater. Doors in the fully open position shall not reduce a required dimension by more than 7 inches. when a landing serves an occupant load of 50 or more, doors in any position shall not reduce the landing dimension to less than one-

half its required width. Landings shall have a length measured in the direction of travel of not less than 44 inches.

Comment: Issue 48. The provisions of Section 3106(j)3 were amended in November 1992 to provide clear areas measured perpendicular to the door. (See page 604e of the Published Code.) In developing the Washington regulations, it was felt that the 11 different approach requirements were confusing and unnecessary. Most doors are hinged swing doors. Few manually operated doors are slide opening doors. With the 1992 amendments, we believe that the maneuvering clearance standards are comparable. The Washington Code simplifies the doors and maneuvering clearances from the variety in ADA. This simplifies compliance and enforcement and is more likely to result in accessible construction of doorways. The ADA and ANSI standards are still available as alternate designs which can be approved by the building official.

NE See above.

[N.E. WAC fails to address hinge-side approaches and latch-side approaches. WAC still does not address sliding/folding doors.]

3/23/94 letter from Washington State Building Code Council Issue 48 - In order to simplify the Washington regulations, the maneuvering clearance requirements were condensed into three basic requirements contained in Section 3106(j). These three are the forward approach to a door where the door swings toward the user, a forward approach to a door where the door swings away from the user, and two doors in series. As stated in our response of August 20, 1993, our regulations simplify compliance and enforcement and is more likely to result in accessible construction of doorways. We have recently issued a specific interpretation, number 94-02, that allows the use of ANSI A117.1-1992 door clearances as alternatives to the three standards in the code.

Maneuvering clearances at doors must be looked at in conjunction with other requirements of the State Building Code which are provided in Chapter 33 on Exiting (egress). The primary provisions which will affect maneuvering clearances are the requirements for minimum corridor widths (Sec. 3305). Most corridors must be a minimum of 44 inches in width, unless the occupant load is less than 49 persons. In addition, the code prohibits doors in any position from reducing the width of a corridor by more than half of the required width. We assume that you understand that if a door is in the wall of a room, that adequate maneuvering clearances will always be present unless the door is in a corner. We have therefore focused our comparison on where maneuvering clearances might be most restricted and that is where a door is located on a corridor wall.

Figure 25 of the ADAAG illustrates 9 different maneuvering clearances for doors. We have compared the effect of the

Washington State Code in comparison to the ADAAG diagrams and provide the following analysis. It should be noted that the footnote in Figure 25 states that doors in alcoves must comply with clearances for a front approach. The ADAAG does not define an alcove. The Washington Code presumes a forward approach in all situations, in which case it is completely consistent with the ADAAG.

79 ADA/Washington State July 12, 1994

01-03870

A. Front Approaches - Swinging Doors: The front approaches as diagrammed in Figure 25(a) are reflected specifically in the Washington language in Section 3106(j).

B. Hinge Side Approaches - Swinging Doors: Two basic conditions are noted: 1. Doors swing into the approach. Please refer to attached Diagram A. Under the Washington code this would be treated as a forward approach door and the required maneuvering clearance is shown in black. In this case ADA would require additional clearance on the latch side of the door. If the design of the building is such that this door was at the end of a corridor, the additional clearance would be missing. If the corridor continues, then only the crosshatched area labeled A would not be provided. It should be noted that the maneuvering clearance required for this door when approached in a forward approach is deemed adequate with only 18 inches on the latch side, but if the approach is from behind the door 18 inches is not sufficient, even though a person would have to turn and essentially make a forward approach to this door. While it appears that the Washington code is not identical to the ADAAG, there is no loss in maneuverability.

2. Doors swing away from approach: Two conditions are noted in Figure 25(b), doors with, or without, closers. For doors without

both a closer and a latch, a smaller maneuvering clearance is shown in ADAAG. See Diagram B. Again the Washington regulations for this door are shown in black, the comparable ADAAG design is shown in red. In this instance, the overall maneuvering space required by the Washington Code is greater than ADAAG. If the approaching corridor is only 36 inches in width, a small area shown crosshatched (A) would not be present, but the area labeled (B) would be present which is substantially greater.

Where a door in this condition has both a closer and a latch, a greater width is required. Again, as illustrated in Diagram C, the potentially lost space (A) is more than compensated by the Washington required maneuvering space (B).

[#B.1. N.E. ADA Standards require a space 60" by 72" for a hinge side parallel approach. Washington only requires 60" by 54". There is a loss of maneuverability because the person does not make simply a front approach, as Washington assumes, but rather, the person has to continue beyond the door before attempting to maneuver into a forward approach position. The cross-hatched area is an essential part of the minimum maneuvering space because it allows the person room to move from the side of the door into the forward approach position.

#B.2. N.E. For a hinge side parallel approach on the push side of a door, the ADA Standards require a space 48" by 54". Also, the ADA requires the 54" dimension to begin at the latch side of the door. The Washington requirement overlaps the ADA requirement only partially because it does not require the 54" dimension to begin at the latch side. Therefore, Washington allows the maneuvering space to be in a different place than the ADA requires.

Washington assumes that the size of the maneuvering space is all that matters. In fact, the size, the shape, and the position of the maneuvering space all matter and different sizes, shapes and positions are needed depending on the direction of approach to the door.]

C. Latch Side Approaches - Swinging Doors: 1. Doors swing into approach: Two conditions are noted in the left hand portion of Figure 25(c), doors with, or without, closers. For doors without a closer a smaller maneuvering clearance is shown in ADAAG. See Diagram D. Where the approaching corridor is only 36 or 44 inches wide, a minor portion of maneuvering space would not be present as shown in the crosshatched area (A), however a substantially greater area of maneuvering space is provided in the area shown as (B).

Where the door has a closer, See Diagram E, the potentially missing space (A) is slightly larger than noted in the preceding case, but it is still compensated by a significant increase in maneuvering space at (B).

2. Doors swing away from approach: Again two conditions are

noted depending on whether or not a closer is present. Where a door does not have a closer, (See Diagram F) a small area of ADAAG maneuvering clearance (A) would not be present where a corridor is only 36 inches in width, which would be compensated for by the additional area (B) which results from compliance with the Washington requirements.

Where the door does have a closer a minor amount of space may not be provided as shown by the crosshatched area A in Diagram G.

D. Sliding Doors: 1. Forward approach. The maneuvering space will be adequate in all cases since the minimum corridor widths of 36 or 44 inches are equal to or greater than the width of shown in the ADAAG Figure 25(d). The depth will be provided, or else this would not be a forward approach of someone traveling down a corridor or across a room to this door.

2. Slide or latch side approaches. For doors located on a typical corridor of 44 inches, the maneuvering space shown in ADAAG Figures 25(e) and 25(f) will be present, or the corridor will not be in compliance with other provisions of our code.

4.13.7 Two Doors in Series. The minimum space between two hinged or pivoted doors in series shall be 48 in (1220 mm) plus the width of any door swinging into the space. Doors in series shall swing either in the same direction or away from the space between the doors (see Fig. 26).

4.13.8* Thresholds at Doorways. Thresholds at doorways shall not exceed 3/4 in (19 mm) in height for exterior sliding doors or 1/2 in (13 mm) for other types of doors. Raised thresholds and floor level changes at accessible doorways shall be beveled with a slope no greater than 1:2 (see 4.5.2).

Interpretation No. 94-02. Question: Do the requirements for door clearances as defined in this section apply to all approaches including parallel, or are they applicable only to a forward approach?

Answer: In order to simplify all potential options into a concise format, the door standards were written for the most stringent conditions with the reasoning that if doors always met these standards full compliance would also be met.
Section 3101(d) allows the approval of alternate methods of construction, design, or technologies provided that they supply equivalent or greater accessibility. The CABO/ANSI A117.1-1992 Section 4.13 provides description and diagramming of suitable alternate standards for all types of door operations. It was not the intent of the code to prohibit the use of these alternatives.

51-20-3106 (j) 3.C. Where two doors are in a series, the minimum distance between two hinged or pivoted doors shall be 48 inches in addition to any needed for door swing. [Doors in series shall swing either in the same direction or away from the space between the doors.]

Comment: Issue 49. Section 3106(j)3C was amended to add the following sentence: "Doors in series shall swing either in the same direction, or away from the space between the doors." (See page 604e of the Published Code.) With this addition the provisions are equivalent to the ADAAG.

51-20-3106 (j) 4. Thresholds at Doors. Thresholds at doors shall comply with Section 3106.

51-20-3106 (f) Changes in Level. Accessible routes of travel and accessible spaces within buildings shall have continuous common floor or ramp surfaces. Abrupt change in height greater than 1/4 inch shall be beveled to 1 vertical in 2 horizontal. Changes in level greater than 1/2 inch shall be accomplished by means of a ramp meeting the requirements of 3106 (h) [a curb ramp meeting the requirements of Section 3106(d)7, or an elevator or platform lift meeting the requirements of Section 3105(d)]. For Type B dwelling units, see also Section 3106(aa).

Comment: Issue 50. Section 3106(j)4 was amended to simplify the reference to Section 3106. See page 604e of the Published Code.

[N.E. Front approach is not the "most stringent." It is only different from the requirements for the other approaches.]

[Amendment: E.]

[Amendment: E.]

4.15.3 Spout Location. The spouts of drinking fountains and water coolers shall be at the front of the unit and shall direct the water flow in a trajectory that is parallel or nearly parallel to the front of the unit. The spout shall provide a flow of water at least 4

in (100 mm) high so as to allow the insertion of a cup or glass under the flow of water. On an accessible drinking fountain with a round or oval bowl, the spout must be positioned so the flow of water is within 3 in (75 mm) of the front edge of the fountain.

51-20-3106 (m) 3. ...Spouts shall be located in the front of the unit and shall direct a water flow not less than 4 inches in height, in a trajectory parallel to the front of the unit. [Recessed units shall be installed such that the spout is not recessed beyond the plane of the wall.]

Comment: Issue 51: There is a typographical error in the side by side analysis and the text in ADAAG and WSR regulations is the same that the spout must be "at" the front of the unit. To clarify the application to round or oval bowls, the Council has issued Interpretation No. 93-34.

Interpretation No. 93-34.
Question: For water fountains with round or oval bowls, how far back can the spout be located and still be considered "at the front" of the unit?
Answer: The intent of the Code, as provided in Sec. 3101(a), is to provide standards equivalent to the ADA Accessibility Guideline. On round or oval bowls, the spout must be positioned so the flow of water is within three (3) inches of the front edge of the fountain.

[Amendment: E.]

[E.]

4.15.5 Clearances.

(1) Wall- and post-mounted cantilevered units shall have a clear knee space between the bottom of the apron and the floor or ground at least 27 in (685 mm) high, 30 in (760 mm) wide, and 17 in to 19 in.
(430 mm to 485 mm) deep (see Fig. 27(a) and (b)). Such units shall also have a minimum clear floor space 30 in by 48 in (760 mm by 1220 mm) to allow a person in a wheelchair to approach the unit facing forward.

(2) Free-standing or built-in units not having a clear space under them shall have a clear floor space at least 30 in by 48 in (760 mm by 1220 mm) that allows a person in a wheelchair to make a parallel approach to the unit (see Fig. 27(c) and (d)). This clear floor space shall comply with 4.2.4.

51-20-3106 (m) Water Fountains. 1. Clear Floor Space. Wall- and post-mounted cantilevered units shall have a minimum clear floor space in front of the units 30 inches in width by 48 inches in depth to allow a forward approach.

Free-standing or built-in units not having a clear space under them shall have a clear floor space at least 30 inches in depth by 48 inches in width in order to allow a person in a wheelchair to make a parallel approach to the unit.

2. Knee space. Wall- and post-mounted cantilevered units shall have knee space in accordance with Section 3106(b) 2. B. The knee space shall be not less than 19 inches in depth.

51-20-3106 (m) 5. Water Fountains in Alcoves. Where a unit is installed in an alcove greater than 3 inches in depth, the alcove shall be not less than 48 inches in width. A minimum 24 inches of clear space shall be provided from the spout to the nearest side wall of the alcove.
[Moved to
3106(m)3.]

Comment: Issue 52. This reference in Sec. 3106(m)2 was corrected to a reference to Sec. 3106(b)4C. See page 604k of the Published Code.

[P.E. but 3106(b)4C addresses when knee clearance can be included in clear floor space. 3106(m) is addressing what knee/toe clearance is required at water fountains. The connection is not entirely clear but the specifications are equivalent.]

01-03875

4.16.2 Clear Floor Space. Clear floor space for water closets not in stalls shall comply with Fig. 28. Clear floor space may be arranged to allow either a left-handed or right-handed approach.
Fig. 28 Clear Floor Space at Water Closets.

For a front transfer to the water closet, the minimum clear floor space at the water closet is a minimum 48 inches (1220 mm) in width by a minimum of 66 inches (1675 mm) in length. For a diagonal transfer to the water closet, the minimum clear floor space is a minimum of 48 inches (1220 mm) in width by a minimum of 56 inches (1420 mm) in length. For a side transfer to the water closet, the minimum clear floor space is a minimum of 60 inches (1525 mm) in width by a minimum of 56 inches (1420 mm) in length. (4.16.2, A4.22.3)

51-20-3106 (k) 5.A. Clear Floor Space. The lateral distance from the center line of the water closet to the nearest obstruction [excluding] grab bars, shall be 18 inches on
one side and [not less than 42] inches on the other side. In other than stalls, a clear floor space not less than 32 inches measured perpendicular to the wall on which the water closet is mounted, shall be provided in front of the water closet.
EXCEPTION: A lavatory may be located within the clear floor space required for a water closet provided that knee and toe clearances for the lavatory comply with subsection 7 below and:
A. In Type B dwelling units the edge of the lavatory shall be located not less than 15 inches from the centerline of the water closet; or
B. In all other occupancies the edge of the lavatory shall be located not less than 18 inches from the centerline of the water closet.
Comment: Issue 53. Section 3106(k)3A provides the dimension requirements for Wheelchair Accessible Toilet Stalls. This section requires such stalls to be at least 60 inches in width. This provision must also be complied with in addition to the clear floor space requirements for the water closet which happens to be in the toilet stall. Therefore if a lavatory were to be installed in the clear floor space of a water closet in a toilet stall, the toilet stall would not comply with the minimum width of 60 inches.

PNE A clarification is needed as to where the lavatory is allowed to be in clear floor area. The ADA does not allow a lavatory in the clear floor area in stalls.
[N.E. The stall would still be 60 inches wide, it would just have a lavatory in it. That lavatory will inhibit a side

transfer to the water closet, even if there is knee space under it. The problem raised has not been addressed. In addition, 32" in front of the water closet will not make a total of 66" depth of clear space, as required by ADA (it will only be 61-62").]

85 ADA/Washington State July 12, 1994
01-03876
4.16.4* Grab Bars. Grab bars for water closets not located in stalls shall comply with 4.26 and Fig. 29. The grab bar behind the water closet shall be 36 in (915 mm) minimum.

Fig. 29(a) Back Wall. A 36 inch (915 mm) minimum length grab bar is required behind the water closet mounted at a height between 33 and 36 inches (840-915 mm). The grab bar must extend a minimum of 12 inches (305) beyond the center of the water closet toward the side wall and a minimum of 24 inches (610 mm) toward the open side for either a left or right side approach.

Fig. 29(b) Side Wall. A 42 inch (1065 mm) minimum length grab bar is required to the side of the water closet spaced 12 inches (305 mm) maximum from the back wall and extending a minimum of 54 inches (1370 mm) from the back wall at a height between 33 and 36 inches (840-915 mm). The toilet paper dispenser shall be mounted at a minimum height of 19 inches (485 mm). (4.16.3, 4.16.4, 4.16.6)

4.16.5* Flush Controls. Flush controls shall be hand operated or automatic and shall comply with 4.27.4. Controls for flush valves shall be mounted on the wide side of toilet areas no more than 44 in (1120 mm) above the floor.

4.16.6 Dispensers. Toilet paper dispensers shall be installed within reach, as shown in Fig. 29(b). Dispensers that control delivery, or that do not permit continuous paper flow, shall not be used.

Fig. 29(b)...The toilet paper dispenser shall be mounted at a minimum height of 19 inches (485 mm). (4.16.3, 4.16.4, 4.16.6)

51-20-3106 (k) 5. C. Grab Bars. Grab bars shall be installed at one side and the back of the water closet. The top of grab bars shall be not less than 33 inches and not more than 36 inches above and parallel to the floor. Grab bars located at the side shall be a minimum 42 inches in length with the front end positioned not less than 18 inches in front of the water closet.
Grab bars located at the back shall be a minimum of 36 inches in length. Grab bars shall be mounted not more than 9 inches behind

the water closet seat. See also Section 3106(k)11.

51-20-3106 (k) 5. D. Flush Controls. Flush controls shall be mounted for use from the wide side of the water closet area and not more than 44 inches above the floor. [Flush valves shall comply with Section 3106(c).]

51-20-3106 (k) 5. E. Dispensers and Receptacles. Toilet paper and other dispensers or receptacles shall be installed within easy reach of the water closet, and shall not interfere with [unobstructed floor space] grab bar utilization.

Comment: Issue 54. While the WSR standards limit the location of toilet paper dispenser, the actual design of those dispensers is considered to be outside the scope of equipment regulated by the building code. The WSR standards do prohibit placement of dispensers so as to preclude interference with use of the grab bars.

[Amendment: N.E. The requirements for placement of the side grab bar are insufficient. WAC's requirement that the front of the bar be 18" in front of the water closet would make the bar extend only 48" from the back wall, whereas ADA requires it to extend 54" from the back wall. This extra extension is needed by people who need to reach forward to pull to a standing position. Also, WAC does not specify placement of the back grab bar in relation to the side wall. The ADA's placement requirements ensure that a diagonal transfer will be possible if needed.]

[Amendment: E.]

[E.]

86 ADA/Washington State July 12, 1994

01-03877

4.17.6 Grab Bars. Grab bars complying with the length and positioning shown in Fig. 30(a), (b), (c), and (d) shall be provided. Grab bars may be mounted with any desired method as long as they have a gripping surface at the locations shown and do not obstruct the required clear floor area. Grab bars shall comply with 4.26.

4.19.3 Clear Floor Space. A clear floor space 30 in by 48 in (760 mm by 1220 mm) complying with 4.2.4 shall be provided in front of a lavatory to allow forward approach. Such clear floor space shall adjoin or overlap an accessible route and shall extend a maximum of 19 in (485 mm) underneath the lavatory (see Fig. 32).

Fig. 32 Clear Floor Space at Lavatories.

The minimum depth of the lavatory is 17 inches (430 mm). (4.19.3, 4.24.5)

4.19.5 Faucets. Faucets shall comply with 4.27.4. Lever-operated, push-type, and electronically controlled mechanisms are examples of acceptable designs. If self-closing valves are used the faucet shall remain open for at least 10 seconds.

4.20 Bathtubs.

4.20.1 General. Accessible bathtubs shall comply with 4.20.

51-20-3106 (k) 5. C. Grab Bars. Grab bars shall be installed at one side and the back of the water closet. The top of grab bars shall be not less than 33 inches and not more than 36 inches above and parallel to the floor. Grab bars located at the side shall

be a minimum 42 inches in length with the front end positioned not less than 18 inches in front of the water closet.
Grab bars located at the back shall be a minimum of 36 inches in length. Grab bars shall be mounted not more than 9 inches behind the water closet seat. See also Section 3106 (k) 11.

51-20-3106 (k) 7. A. Clear Floor Space. A clear floor space not less than 30 inches (in width) by 48 inches (in depth) shall be provided in front of lavatories and sinks. [The clear floor space may include knee and toe clearances not to exceed 19 inches extending under the lavatory or sink.]

51-20-3106(k) 7. E. Faucets. Faucet control handles shall be located not more than 17 inches from the front edge of the lavatory, sink or counter, and shall comply with Section 3105 (c). Self-closing valves shall remain open for at least 10 seconds per operation.

51-20-3106 (c) Controls and Hardware 1. Operation. Handles, pulls, latches, locks and other operating devices on doors, windows, cabinets, plumbing fixtures and storage facilities shall have a lever or other shape which will permit operation by wrist or arm pressure and does not require tight grasping, pinching or twisting to operate. Doors shall comply with Section 3304.
[The force to activate controls on lavatories and water fountains and flush valves on water closets and urinals shall not be greater than 5 pounds.]

51-20-3106 (k) 9. Bathtubs.

[Amendment: See above.]

[Amendment: E.]

[Amendment: E.]

PNE See below.

4.20.2 Floor Space. Clear floor space in front of bathtubs shall be as shown in Fig. 33.

Fig. 33 Clear Floor Space at Bathtubs. (4.20.2, 4.20.3, 4.20.4)

Fig. 33(a) With Seat in Tub. If the approach is parallel to the bathtub, a 30 inch (760mm) minimum width by 60 inch (1525 mm) minimum length clear space is required alongside the bathtub. If the approach is perpendicular to the bathtub, a 48 inch (1220 mm) minimum width by 60 inch (1525 mm) minimum length clear space is required.

Fig. 33(b) With Seat at Head of Tub. If the approach is parallel to the bathtub, a 30 inch (760 mm) minimum width by 75 inch (1905 mm) minimum length clear space is required alongside the bathtub. The seat width must be 15 inches (380 mm) and must extend the full width of the bathtub.

51-20-3106 (k) 9. A. Clear Floor Space. A clear floor space not less than 60 inches in length shall be provided along the tub. Where the required seat is located at the end of the tub, the clear floor space shall be not less than 75 inches in length. The clear floor space shall be not less than 30 inches in width where access to the space is parallel to the tub and not less than 48 inches in

width where access to the space is at right angles to the tub. A lavatory which complies with Subsection 5, above, may be located in the clear floor space of the tub.

PNE This appears to be generally equivalent in intent but language must be more precise. As written, the lavatory could be located anywhere within the clear floor area, where as ADAAG only allows a complying lavatory at the end of the tub where the controls are located.

01-03879

Comment: Issue 55. Section 3102 defines clear floor space as unobstructed ground or floor space. Section 3106(b)4A requires a minimum clear floor space of 30 by 48 inches. In addition, the Washington regulations provide standards clarifying that which is unobstructed floor space in Section 3106(b)3. This last provision clarifies that a space can be clear and unobstructed even where fixtures such as counters or lavatories project into the clear floor space at minimum heights above the floor.
The provisions in Sections 3106(k)9A and (k)10B which allow lavatory complying with Section 3106(k)7 to be located in the clear floor space of an accessible bathtub or roll-in shower is limited by the provisions of 3106(k)7 and those sections cited in the preceding paragraph. If a lavatory was located in the clear floor space of a tub or shower in such a way to eliminate the unobstructed floor space, the net result would be that the required floor space would not be provided. The combinations of provisions forces the lavatory to the end of the clear floor space. Further if the lavatory was positioned in a manner that obstructed access to the grab bars and/or the controls, one purpose of the clear floor space would again be defeated.

Finally, it should be noted again, that the lavatory allowed by the Washington regulations must be an accessible lavatory, one which provided knee and toe clearances. The ADAAG has no such limit on the lavatory, and it could easily obstruct access to grab bars and controls.

[N.E. The problem is that WAC allows the lavatory to be at either end of the tub. The ADA requires it to be at the foot end of the tub, because if it were at the head end of the tub, it would obstruct transfer onto the seat.]

89 ADA/Washington State July 12, 1994

01-03880

4.20.5 Controls. Faucets and other controls complying with 4.27.4 shall be located as shown in Fig. 34.

Fig. 34 Grab Bars at Bathtubs. (4.20.3, 4.20.4, 4.20.5)

Fig. 34(a) With Seat in Tub. At the foot of the tub, the grab bar shall be 24 inches (610 mm) minimum in length measured from the outer edge of the tub. On the back wall, two grab bars are required. The grab bars mounted on the back (long) wall shall be a minimum 24 inches (610 mm) in length located 12 inches (305 mm) maximum from the foot of the tub and 24 inches (610 mm) maximum from the head of the tub. One grab bar shall be located 9 inches (230 mm) above the rim of the tub. The others shall be 33 to 36 inches (840 mm to 910 mm) above the bathroom floor. At the head of the tub, the grab bar shall be a minimum of 12 inches (305 mm) in length measured from the

outer edge of the tub.

Fig. 34(b) With Seat at Head of Tub. At the foot of the tub, the grab bar shall be a minimum of 24 inches (610 mm) in length measured from the outer edge of the tub. On the back wall, two grab bars are required. The grab bars mounted on the back wall shall be a minimum of 48 inches (1220 mm) in length located a maximum of 12 inches (305 mm) from the foot of the tub and a maximum of 15 inches (380 mm) from the head of the tub. Heights of grab bars are as described above.

Figure 34 Grab Bars at Bathtubs. (a) and (b) require controls to be "offset," located in an area between the open edge and the midpoint of the tub.

51-20-3106 (c) Controls and Hardware 1. Operation. Handles, pulls, latches, locks and other operating devices on doors, windows, cabinets, plumbing fixtures and storage facilities shall have a lever or other shape which will permit operation by wrist or arm pressure and does not require tight grasping, pinching or twisting to operate. ...[The force to activate controls on lavatories and water fountains and flush valves on water closets and urinals shall not be greater than 5 pounds.]

51-20-3106 (k) 9. D. Controls and Fixtures. Faucets and other controls shall be located above the tub rim and below the grab bars, shall be not more than 24 inches laterally from the clear floor space and shall comply with Section 3105 (c).

Comment: Issue 56. The intent of the WSR provisions was to provide equivalent facilitation to that of the ADA. The allowed distance is within the reach ranges specified in Sec. 4.2 of the ADA. In addition, under the Washington Code, any lavatory installed next to the controls must meet accessibility standards and have knee and toe clearance underneath, these controls will be reachable, whereas under ADAAG which does not require the provision of knee and toe clearance, the controls will not be as accessible as those provided in compliance with the Washington Code.

NE ADA drawing requires controls to be offset between the open edge of the tub and the centerline.

[N.E. The 24 inch measurement to the controls is not equivalent. ADA requires the controls to be offset between the midpoint of the tub and the outer edge of the tub, so they can be reached from a wheelchair at the outer edge of the tub. 24 inches is too far into the tub. The

midpoint of the tub is likely to be 15-16 inches from the edge.]

4.21.2 Size and Clearances. Except as specified in 9.1.2, shower stall size and clear floor space shall comply with Fig. 35(a) or (b). The shower stall in Fig. 35(a) shall be 36 in by 36 in (915 mm by 915 mm). Shower stalls required by 9.1.2 shall comply with Fig. 57(a) or (b). The shower stall in Fig. 35(b) will fit into the space required for a bathtub.

Fig. 35 Shower Size and Clearances.

Fig. 35(a) 36 inches by 36 inches (915 mm by 915 mm) Stall (Transfer Shower). The clear floor space shall be a minimum of 48 inches (1220 mm) in length by a minimum of 36 inches (915 mm) in width and allow for a parallel approach. The clear floor space shall extend 1 foot beyond the shower wall on which the seat is mounted.

Fig. 35(b) 30 inches by 60 inches (760 mm by 1525 mm) Stall (Roll-in Shower). The clear floor space alongside the shower shall be a minimum of 60 inches (1220 mm) in length by a minimum of 36 inches (915 mm) in width.

51-20-3106 (k) 10. A. Configuration. Shower stalls shall have one of the following configurations.

(i) Transfer shower stalls shall be 36 inches by 36 inches, nominal, and shall have a seat; or,

(ii) Roll-in shower stalls shall be not less than 30 inches in depth by 60 inches in length.

51-20-3106 (k) 10 B. Clear Floor Space. A clear floor space not less than 48 inches in length shall be provided adjacent to shower stalls. For roll-in shower stalls, the clear floor space shall be not less than (60) inches in [length]. [A clear floor space shall not be less than 36 inches in width.] A lavatory which complies with Subsection [7] above, may be located in the clear floor space of a roll-in shower.

91 ADA/Washington State July 12, 1994

01-03882

4.21.3 Seat. A seat shall be provided in shower stalls 36 in by 36 in (915 mm by 915 mm) and shall be as shown in Fig. 36. The seat shall be mounted 17 in to 19 in (430 mm to 485 mm) from the bathroom floor and shall extend the full depth of the stall. In a 36

in by 36 in (915 mm by 915 mm) shower stall, the seat shall be on the wall opposite the controls. Where a fixed seat is provided in a 30 in by 60 in minimum (760 mm by 1525 mm) shower stall, it shall be a folding type and shall be mounted on the wall adjacent to the controls as shown in Fig. 57. The structural strength of seats and their attachments shall comply with 4.26.3.

Fig. 36 Shower Seat Design.

The diagram illustrates an L-shaped shower seat extending the full depth of the stall. The seat shall be located 1-1/2 inches (38 mm) maximum from the wall. The front of the seat (nearest to the opening) shall extend a maximum 16 inches (330 mm) from the wall. The back of the seat (against the back wall shall extend a maximum of 23 inches (582 mm) from the side wall and shall be a maximum of 15 inches (305 mm) deep.

Comment: Issue 57. The printing of Section 3106(k) 10B in the side by side analysis is incomplete, thus the analysis is in error. The complete section reads as follows: [see above]. See also comment on Issue No. 55, above.

51-20-3106 (k) 10 C. Seats. In transfer shower stalls, a seat shall be mounted not less than 17 inches and not more than 19 inches above the floor, and shall extend the full depth of the stall. The seat shall be located on the wall opposite the controls and shall be mounted not more than 1-1/2 inches from the shower walls. The seat shall be not more than 16 inches in width.

EXCEPTION: A section of the seat not more than 15 inches in length and adjacent to the wall opposite the clear space, may be not more than 23 inches in width.

In roll-in shower stalls, a fold down seat complying with the dimensional requirements of this subsection, may be installed.
Comment: Issue 58. Clarification of seat and control location in showers as regulated by the WSR in Sec. 3106(k)10 has been clarified by Council Interpretation No. 93-36.

[N.E. For transfer shower, the clear floor space must be configured so that it extends 12 inches beyond the seat wall.]

[N.E. WAC does not require that the seat be L-shaped. The seat needs to be L-shaped so that people can sit in the corner and use the two walls for support.]

4.21.5 Controls. Faucets and other controls complying with 4.27.4 shall be located as shown in Fig. 37. In shower stalls 36 in by 36 in (915 mm by 915 mm), all controls, faucets, and the shower unit shall be mounted on the side wall opposite the seat.
Fig. 37 Grab Bars at Shower Stalls.

Fig. 37(a) 36 inches by 36 inches (915 mm by 915 mm) Stall. The diagram illustrates an L-shaped grab bar that is located along the full depth of the control wall (opposite the seat) and halfway along the back wall. The grab bar shall be mounted between 33 to 36 inches (840-915 mm) above the shower floor. The bottom of the control area shall be a maximum of 38 inches (965 mm) high and the top of the control area shall be a maximum of 48 inches (1220 mm) high. The controls and spray unit shall be within 18 inches (455 mm) of the front of the shower.

Fig. 37(b) 30 inches by 60 inches (760 mm by 1525 mm) Stall. The diagram illustrates a U-shaped grab bar that wraps around the stall. The grab bar shall be between 33 to 36 inches (840-915 mm) high. The controls are placed in an area between 38 inches and 48 inches (965 mm and 1220 mm) above the floor. If the controls are located on the back (long) wall they shall be located 27 inches (685 mm) from the side wall. The shower head and control area may be located on either side wall.

Interpretation No. 93-36.
Question: Can the controls of a shower be located on any wall of the enclosure of an accessible shower? What is the relationship between the controls and the seat installed in a shower?
Answer: The intent of the code, as provided in Sec. 3101(a), is to provide standards equivalent to the ADA Accessibility Guideline.
In a transfer shower stall, the seat must be located along a side wall. The controls must be located on the other side wall opposite to the seat.
For a roll-in shower stall, the controls must be located on the back, or long, wall opposite the clear floor area and located to one side or the other of the midpoint of the wall. Where a seat is installed in a roll-in shower, it must be located along the end wall closest to the controls.

51-20-3106 (k) 10 E. Controls and Fixtures. Faucets and other controls shall be located on the same wall as the shower spray unit, and shall be installed not less than 38 inches or more than 48 inches above the shower floor and shall comply with Section 3106(c)...

NE Language should be more precise here to ensure that controls are useable. ADAAG is very specific about location of

controls when placed on back wall and location of controls adjacent to a fold down seat in a roll-in/transfer shower.
93 ADA/Washington State July 12, 1994
01-03884
4.22.6 Lavatories and Mirrors. If lavatories and mirrors are provided, then at least one of each shall comply with 4.19.
Comment: Issue 59. Clarification of seat and control location in showers as regulated by the WSR in Sec. 3106(k) 10 has been clarified by Council Interpretation No. 93-36.
Interpretation No. 93-36.
Question: Can the controls of a shower be located on any wall of the enclosure of an accessible shower? What is the relationship between the controls and the seat installed in a shower?
Answer: The intent of the code, as provided in Sec. 3101(a), is to provide standards equivalent to the ADA Accessibility Guideline.
In a transfer shower stall, the seat must be located along a side wall. The controls must be located on the other side wall opposite to the seat.
For a roll-in shower stall, the controls must be located on the back, or long, wall opposite the clear floor area and located to one side or the other of the midpoint of the wall. Where a seat is installed in a roll-in shower, it must be located along the end wall closest to the controls.

51-20-3105 (b) 3. Lavatories, Mirrors and Towel Fixtures. At least one accessible lavatory shall be provided within any toilet facility. Where mirrors, towel fixtures and other toilet and bathroom accessories are provided, at least one of each shall be accessible.

51-20-3106 (k) 7. Lavatories and Sinks. A. Clear Floor Space. A clear floor space not less than 30 inches [in width] by 48 inches [in depth] shall be provided in front of lavatories and sinks [to allow a forward approach. The clear floor space may include knee and toe clearances not to exceed 19 inches extending under the lavatory or sink].

51-20-3106 (k) 8. Mirrors, Dispensers and Other Fixtures. Mirrors or shelves shall be installed so that the bottom of the mirror or the top of the shelf is within 40 inches of the floor...

[N.E. This interpretation does not provide specifications for placement of controls in relation to side wall/front of shower (i.e. 18 in for transfer: 27 in for roll-in.) Merely offsetting them may not put them close enough to the seat. This is a real problem because the accessibility requirements provide only

minimum dimensions. If someone were to build a roll-in shower with a back wall 84 inches long and simply offset the controls at 40 inches from the seat wall, the controls would not be reachable from the seat.]
[Amendment: E.]
94 ADA/Washington State July 12, 1994

01-03885
4.23.4 Water Closets. If toilet stalls are provided, then at least one shall be a standard toilet stall complying with 4.17; where 6 or more stalls are provided, in addition to the stall complying with 4.17.3, at least one stall 36 in (915 mm) wide with an outward swinging, self-closing door and parallel grab bars complying with Fig. 30(d) and 4.26 shall be provided. Water closets in such stalls shall comply with 4.16. If water closets are not in stalls, then at least one shall comply with 4.16.

4.24.5 Clear Floor Space. A clear floor space at least 30 in by 48 in (760 mm by 1220 mm) complying with 4.2.4 shall be provided in front of a sink to allow forward approach. The clear floor space shall be on an accessible route and shall extend a maximum of 19 in (485 mm) underneath the sink (see Fig. 32).

4.26.3 (5) Grab bars shall not rotate within their fittings.

51-20-3105 (b) 2. Toilet Facilities. ...In each toilet facility in other occupancies, at least one wheelchair accessible toilet stall with an accessible water closet shall be provided. In addition, when there are 6 or more water closets within a toilet facility, at least one other accessible toilet stall complying with Section 3106 (k) 4. also shall be installed.

51-20-3106 (k) 3. Wheelchair Accessible Toilet Stalls. A. Dimensions. Wheelchair accessible toilet stalls shall be at least 60 inches in width. Where wall-hung water closets are installed, the depth of the stall shall be not less than 56 inches. Where floor-mounted water closets are installed, the depth of the stall shall be not less than 59 inches. Entry to the compartment shall have a clear width of 32 inches. Toilet stall doors shall not swing into the clear floor space required for any fixture. Except for door swing, a clear unobstructed access not less than 48 inches in width shall be provided to toilet stalls.

EXCEPTION: [Moved to B]
[Partitions may
project not more than one inch, in the aggregate, into the required width of the stall]

51-20-3106 (k) 4. Ambulatory Accessible Toilet Stalls. ambulatory accessible toilet stalls shall be at least 36 inches in width, with an outward swinging, self-closing door. Grab bars shall be installed on each side of the toilet stall and shall comply with Sections 3106 (k) 4. C. and 3106 (k) 9.

51-20-3106 (k) 7. Lavatories and Sinks. A. Clear Floor Space. A clear floor space not less than 30 inches [in width] by 48 inches [in depth] shall be provided in front of lavatories and sinks [to allow a forward approach. The clear floor space may include knee and toe clearances not to exceed 19 inches extending under the lavatory or sink].

Comment: Issue 60. In order for grab bars to meet the loading requirement, rotation in the fittings is not feasible because it is physically impossible for grab bars to rotate and still meet the structural standards in Sec. 3106(k)11.

[Amendment: E.]

[Amendment: E.]

[E.]

95 ADA/Washington State July 12, 1994

01-03886

4.27.4 Operation. Controls and operating mechanisms shall be operable with one hand and shall not require tight grasping, pinching, or twisting of the wrist. The force required to activate controls shall be no greater than 5 lbf (22.2 N).

4.28.2* Audible Alarms. If provided, audible emergency alarms shall produce a sound that exceeds the prevailing equivalent sound level in the room or space by at least 15 dbA or exceeds any maximum sound level with a duration of 60 seconds by 5 dbA, whichever is louder. Sound levels for alarm signals shall not exceed 120 dbA.

51-20-3106 (c) 1. Operation. Handles, pulls, latches, locks and other operating devices on doors, windows, cabinets, plumbing fixtures and storage facilities, shall have a lever or other shape which will permit operation by wrist or arm pressure and does not require tight grasping, pinching or twisting to operate.
[The force to activate controls on lavatories and water fountains and flush valves on water closets and urinals shall not be greater than 5 pounds.]

51-20-3106 (o) Alarms. 1. Audible Alarms. Audible alarms shall produce a sound in accordance with
[the Fire Code].

Appendix. Chapter 31 Division IV. 51-20-92118 (b) Audible Alarms. Audible alarms shall exceed the prevailing equivalent sound level in the room or space by at least 15 decibels, or shall exceed any maximum sound level with a duration of 30 seconds by 5 decibels, whichever is louder. Sound levels for alarm signals shall not exceed 120 decibels.

[Uniform Fire Code, Article 14, S 14.103(b). System Design. Fire alarm systems, automatic fire detectors, emergency voice alarm communication systems and notification devices shall be designed, installed and maintained in accordance with U.F.C. Standards Nos. 14-1 and 14-2 and other nationally recognized standards.
U.F.C. Appendix S A-2-8-4. To ensure that audible evacuation signals are clearly heard, it is recommended that their sound level be at least 15 dBA above the equivalent sound level or 5 dBA above the maximum sound level having a duration of at least 60 seconds (whichever is greater) measured 5 ft (1.5 m) above the floor in the occupiable area.]

[Amendment: E:]

96 ADA/Washington State July 12, 1994

01-03887

Comment: Issue 61. The provision has been amended to read: "Audible alarms shall produce a sound in accordance with the Fire Code."
The Uniform Fire Code and the Uniform Fire Code Standards are part of the adoption of the Washington State Building Code. They are not appendix provisions which local jurisdictions have an option to enforce. These regulations are enforced on an equal basis with all other construction codes in the state. The audible standards in the Fire Code are equivalent to the ADA standards. Attached is a copy of the adopting action which was taken concurrently with the original adoption of WAC 51-20. The Fire Code was a referenced document and part of the overall hearing process for these regulations.
It should be noted that the Fire Code gives the Fire official authority to regularly inspect buildings and if a system is not meeting a performance standard, the official can require the system to be changed. In this case if the building is occupied by a use which is noisier than anticipated, or ambient sound levels change over time, the fire official can have the sound level of the audible alarms raised to be above the ambient levels.

[The sound level provisions are only in an Appendix in the Fire Code. They are merely a "recommendation" and, therefore, unenforceable. However, these are "non-code" items and such omissions are not covered by the certification determination. 28 C.F.R. S 36.607(a)(1).]

4.28.3* Visual Alarms. Visual alarm signal appliances shall be integrated into the building or facility alarm system. If single station audible alarms are provided then single station visual alarm signals shall be provided. Visual alarm signals shall have the following minimum photometric and location features:

(1) The lamp shall be a xenon strobe type or equivalent.

(2) The color shall be clear or nominal white (i.e., unfiltered or clear filtered white light).

(3) The maximum pulse duration shall be two-tenths of one second (0.2 sec) with a maximum duty cycle of 40 percent. The pulse duration is defined as the time interval between initial and final points of 10 percent of maximum signal.

(4) The intensity shall be a minimum of 75 candela.

(5) The flash rate shall be a minimum of 1 Hz and a maximum of 3 Hz.

(6) The appliance shall be placed 80 in (2030 mm) above the highest floor level within the space or 6 in (152 mm) below the ceiling, whichever is lower.

(7) In general, no place in any room or space required to have a visual signal appliance shall be more than 50 ft (15 m) from the signal (in the horizontal plane). In large rooms and spaces exceeding 100 ft (30 m) across, without obstructions 6 ft (2 m) above the finish floor, such as auditoriums, devices may be placed

around the perimeter, spaced a maximum 100 ft (30 m) apart, in lieu of suspending appliances from the ceiling.

(8) No place in common corridors or hallways in which visual alarm signalling appliances are required shall be more than 50 ft (15 m) from the signal.

51-20-3106(o) 2. Visible Alarms. Visible alarms shall be located not less than 80 inches above floor level, or 6 inches below the ceiling, whichever is lower, and at an interval of not less than 50 feet horizontal, in rooms, corridors and hallways. In rooms or spaces exceeding 100 feet in horizontal dimension, with no obstructions exceeding 6 feet in height above the finished floor, visible alarms may be placed around the perimeter at intervals not to exceed 100 feet horizontally.

01-03889

4.28.4* Auxiliary-Alarms. Units and sleeping accommodations shall have a visual alarm connected to the building emergency alarm system or shall have a standard 110-volt electrical receptacle into which such an alarm can be connected and a means by which a signal from the building emergency alarm system can trigger such an auxiliary alarm. When visual alarms are in place the signal shall be visible in all areas of the unit or room. Instructions for use of the auxiliary alarm or receptacle shall be provided.

[Visible alarm signals shall comply with the following criteria:
[A]. The lamp shall be a xenon strobe type [or equivalent].
[B]. The color shall be clear [or] unfiltered white light.
[C]. The maximum pulse duration shall be two-tenths of one second (0.2 sec) with a maximum duty cycle of 40 percent. The pulse duration is defined as the time interval between initial and final point of 10 percent of maximum signal.]
[D]. The intensity shall be a minimum of 75 candela
4[E]. The flash rate shall be a minimum of 1 Hz and a maximum of 3 Hz.

Comment: Issue 62. The performance standards for visible alarms have been moved from the appendix to the main body of the code at Section 3106(o) as part of the amendments of November 1992. See page 6041 of the Published Code.

51-20-3105 (d) 9. Alarms. [Where provided] Alarm systems shall include both audible and visible alarms.
[Visible] alarm devices shall be located in all [assembly areas;] common-use areas
including toilet rooms and bathing facilities[;] hallways, and lobbies [; and hotel guest rooms as required by Section 3103(a)8C.
EXCEPTIONS: 1. Alarm systems in Group I, Division 1.1 and 1.2 Occupancies may be modified to suit standard health care design practice 2. Visible alarms are not required in Group R, Division 1 apartment buildings].

[Amendment: E.]

[Amendment: E.]

99 ADA/Washington State July 12, 1994

01-03890

4.29.3 Detectable Warnings on Doors To Hazardous Areas. (Reserved).

4.29.5 Detectable Warnings at Hazardous Vehicular Areas. If a walk crosses or adjoins vehicular way, and the walking surfaces are not separated by curbs, railings, or other elements between the pedestrian areas and vehicular areas, the boundary between the areas shall be defined by a continuous detectable warning which is 36 in (915 mm) wide, complying with 4.29.2.

4.29.6 Detectable Warnings at Reflecting Pools. The edges of reflecting pools shall be protected by railings, walls, curbs, or detectable warnings complying with 4.29.2.

51-20-3106 (d) [8]. Vehicular Areas. Where an accessible route of travel crosses or adjoins a vehicular way, and where

there are no curbs, railings or other elements [which separate the pedestrian and vehicular areas, and which are] detectable by a person who has severe vision impairment
the boundary between the
areas shall be defined by a continuous detectable warning not less than 36 inches wide, complying with Section 3106 (
[o]).

Comment: Issue 63. The reference has been corrected to 3106(q) in the November 1992 amendments.

[Amendment: E.]

[Amendment: E.]

[Amendment: E. because ADA requirement has been suspended until July 26, 1996.]

100 ADA/Washington State July 12, 1994

01-03891

4.30.4* Raised and Brailled Characters and Pictorial Symbol Signs (Pictograms). Letters and numerals shall be raised 1/32 in, upper case, sans serif or simple serif type and shall be accompanied with Grade 2 Braille. Raised characters shall be at least 5/8 in (16 mm) high, but no higher than 2 in (50 mm). Pictograms shall be accompanied by the equivalent verbal description placed directly below the pictogram. The border dimension of the pictogram shall be 6 in (152 mm) minimum in height.

51-20-3106 (p) 5. Raised and Brailled Characters and Pictorial Symbol Signs (Pictograms).

[Characters and symbols on tactile signs shall be raised at least 1/32 inch. Raised characters and symbols shall be upper case characters. Raised characters and symbols shall be between 5/8 inch and 2 inches in height. Raised characters shall be accompanied by Braille in accordance with this section.
B. Braille. Braille shall be separated from the corresponding raised characters or symbols. Braille shall be Grade 2.
C. Pictograms. Where provided, pictograms shall be accompanied by the equivalent verbal description placed directly below the pictogram. The border dimension of the pictogram shall be not less than 6 inches in height.]

[Amendment: N.E. No longer requires simple typeface.]

01-03892

4.30.7* Symbols of Accessibility.
(1) Facilities and elements required to be identified as accessible by 4.1 shall use the international symbol of accessibility. The symbol shall be displayed as shown in Fig. 43(a) and (b).
Fig. 43 International Symbols.
Fig. 43(a) Proportions, International Symbol of Accessibility.
The diagram illustrates the International Symbol of Accessibility on a grid background.

Fig. 43(b) Display Conditions, International Symbol of Accessibility. The symbol contrast shall be light on dark, or dark on light.

(2) Volume Control Telephones. Telephones required to have a volume control by 4.1.3(17)(b) shall be identified by a sign containing a depiction of a telephone handset with radiating sound waves.

(3) Text Telephones. Text telephones required by 4.1.3(17)(c). shall be identified by the international TDD symbol (Fig 43(c)). In addition, if a facility has a public text telephone, directional signage indicating the location of the nearest text telephone shall be placed adjacent to all banks of telephones which do not contain a text telephone. Such directional signage shall include the international TDD symbol. If a facility has no banks of telephones, the directional signage shall be provided at the entrance (e.g., in a building directory).

(4) Assistive Listening Systems. In assembly areas where permanently installed assistive listening systems are required by 4.1.3(19)(b) the availability of such systems shall be identified with signage that includes the international symbol of access for hearing loss (Fig 43(d)).

51-20-3103 (b) 4. Signs. A. International Symbol of Access.

1. International Symbol of Access. A. General. The International Symbol of Access shall be as shown below. (Note: picture of International Access Symbol.)[This is now 3106(p) 1 A]

51-20-3106 (p) 1. B. Text Telephones. Text Telephones required by Section 3105 (d) 2. shall be identified by the International Text Telephone symbol as shown below: (Note International TDD Symbol pictured.)

51-20-3106 (p) 1. C. Assistive Listening Systems. Permanently installed assistive listening systems that are required by Section 3103 (a) 2. B. shall be identified by the International Symbol of Access for Hearing Loss as shown below: (Note: International Symbol of Access for Hearing Loss pictured.)

51-20-3106 (p) 1. D. Volume Control Telephones. Telephones required by Section 3105 (d) 2. to have volume controls shall be identified by a handset with radiating sound waves.

Comment: Issue 64. To clarify the application of the WSR, the Council has issued Interpretation No. 93-37.

102 ADA/Washington State July 12, 1994

01-03893

4.31.3 Mounting Height. The highest operable part of the telephone shall be within the reach ranges specified in 4.2.5 or 4.2.6.

4.31.7 Telephone Books. Telephone books, if provided, shall be located in a position that complies with the reach ranges specified in 4.2.5 and 4.2.6.

4.32.3 Knee Clearances. If seating for people in wheelchairs is provided at tables or counters, knee spaces at least 27 in (685 mm) high 30 in (760 mm) wide, and 19 in (485 mm) deep shall be provided (see Fig. 45).

Interpretation No. 93-37.
Question: If public telephones are provided in more than one location in a building, or at a building and its site, and Sec. 3105(d)2 requires the provision of a text telephone (TDD), is any signage required to indicate the location of the text telephone?
Answer: Yes. The intent of the code, as provided in Sec. 3101(a), is to provide standards equivalent to the ADA Accessibility Guideline. Directional signage indicating the location of the nearest text telephone shall be placed next to all banks of public telephone which do not include a text telephone. If there are no banks of telephones (i.e., only single telephone), this directional signage must be posted at the entrance.

51-20-3106 (n) 2. Height. The highest operable part of a telephone shall be within the reach ranges specified in Sections 3106 (b) 2.D. or 3106 (b) 2.E.

Comment: Issue 65. The references in Sec. 3106(n)2 have been changed to Sec. 3106(b)4 in the November 1992 amendments. See page 604k of the Published Code.

Comment: Issue 66. Since telephone books are neither building construction or equipment, their location is not included in the Washington State Building Code.

51-20-3106 (s) 2. Knee Clearances. Knee space at tables, counters, and sinks shall be provided in accordance with Section 3106 (b) 2. B. No projection which might obstruct the arm of a wheelchair may intrude into this clearance height, within 24 inches horizontally from the table edge.

Comment: Issue 67. The reference has been changed to Sec. 3106(b)4C in the November 1992 amendments. See Section 3106(s)2 on page 604o of the Published Code.

[E. as interpreted.]

[Amendment: E.]

[Such omissions of non-code items are not covered by the certification determination.]

[N.E. WAC fails to require 19 inch minimum depth. (Also, 3106(b)4C addresses when knee clearance can be treated as part of clear space. It doesn't address knee clearance requirements generally.)]

103 ADA/Washington State July 12, 1994

01-03894

4.33.3 Placement of Wheelchair Locations. Wheelchair areas shall be an integral part of any fixed seating plan and shall be provided so as to provide people with physical disabilities a choice of admission prices and lines of sight comparable to those for members of the general public. They shall adjoin an accessible route that also serves as a means of egress in case of emergency. At least one companion fixed seat shall be provided next to each wheelchair seating area. When the seating capacity exceeds 300, wheelchair spaces shall be provided in more than one location. Readily removable seats may be installed in wheelchair spaces when the spaces are not required to accommodate wheelchair users.
EXCEPTION: Accessible viewing positions may be clustered for bleachers, balconies, and other areas having sight lines that require slopes of greater than 5 percent. Equivalent accessible viewing positions may be located on levels having accessible egress.

4.33.5 Access to Performing Areas. An accessible route shall connect wheelchair seating locations with performing areas, including stages, arena floors, dressing rooms, locker rooms, and other spaces used by performers.

4.34 Automated Teller Machines.

4.34.1 General. Each automated teller machine required to be accessible by 4.1.3 shall be on an accessible route and shall comply with 4.34.

4.34.2 Clear Floor Space. The automated teller machine shall be located so that clear floor space complying with 4.2.4 is provided to allow a person using a wheelchair to make a forward approach, a parallel approach or both, to the machine.

51-20-3106 (u) 1. A. Location. Wheelchair spaces shall be an integral part of any fixed seating plan and shall be dispersed throughout the seating area. Spaces shall adjoin an accessible route of travel that also serves as a means of egress and shall be located to provide lines of sight comparable to those for all viewing areas.

EXCEPTION: Accessible viewing positions may be clustered for bleachers, balconies, and other areas having sight lines that require slopes of greater than 5 percent. Equivalent accessible viewing positions may be located on levels having accessible egress.

Comment: Issue 68. The intent of the WSR provision is for wheelchair spaces to be "an integral part of any fixed seating plan" and has to be adjacent to companion seating in order to be considered integral.

Appendix 51-20-93120. See below.

Comment: Issue 69. See comment on Issue No. 27, above.

Appendix 51-20-93120(c) Clearance and Reach Range. Free standing or built-in units not having a clear floor space under them shall comply with Sections 3106(c)2 and 3, and provide for parallel approach and both a forward and side reach to the unit allowing a person with a wheelchair to access the controls.

PNE No specific provision for companion seating adjacent to accessible wheelchair locations.

[N.E. It is not clear that "integral" means wheelchair seats must have adjacent companion seats.]

[Still no scoping. However, as discussed above, the fact that an item is not addressed in a submitted code means it is not considered for purposes of certification.]

[E.]

01-03896

4.34.3 Reach Ranges.

(1) Forward Approach Only. If only a forward approach is possible, operable parts of all controls shall be placed within the forward reach range specified in 4.2.5.

(2) Parallel Approach Only. If only a parallel approach is possible, operable parts of controls shall be placed as follows:

(a) Reach Depth Not More Than 10 in (255 mm). Where the reach depth to the operable parts of all controls as measured from the vertical plane perpendicular to the edge of the unobstructed clear floor space at the farthest protrusion of the automated teller machine or surround is not more than 10 in (255 mm), the maximum height above the finished floor or grade shall be 54 in (1370 mm).

(b) Reach Depth More Than 10 in (255 mm). Where the reach depth to the operable parts of any control as measured from thevertical plane perpendicular to the edge of the unobstructed clear floor space at the farthest protrusion of the automated teller machine or surround is more than 10 in (255 mm), the maximum height above the finished floor or grade shall be as follows:

Reach Depth		Maximum Height	
In	Mm	In	Mm
10	255	54	1370
11	280	53 1/2	1360
12	305	53	1345
13	330	52 1/2	1335
14	355	51 1/2	1310
15	380	51	1295
16	405	50 1/2	1285
17	430	50	1270
18	455	49 1/2	1255
19	485	49	1245
20	510	48 1/2	1230

21	535	47 1/2	1205
22	560	47	1195
23	585	46 1/2	1180
24	610	46	1170

Appendix 51-20-93120(c) Clearance and Reach Range. Free standing or built-in units not having a clear floor space under them shall comply with Sections 3106(c)2 and 3, and provide for parallel approach and both a forward and side reach to the unit allowing a person with a wheelchair to access the controls.

[WAC should adopt the new language.]

106 ADA/Washington State July 12, 1994
01-03897
4.34.3 (3) Forward and Parallel Approach. If both a forward and parallel approach are possible, operable parts of controls shall be placed within at least one of the reach ranges in paragraphs (1) or (2) of this section.

(4) Bins. Where bins are provided for envelopes, waste paper, or other purposes, at least one of each type provided shall comply with the applicable reach ranges in paragraph (1), (2), or (3) of this section.

EXCEPTION: Where a function can be performed in a substantially equivalent manner by using an alternate control, only one of the controls needed to perform that function is required to comply with this section. If the controls are identified by tactile markings, such markings shall be provided on both controls.

4.34.4 Controls. Controls for user activation shall comply with 4.27.4.
4.34.4 5 Equipment for Persons with Vision Impairments. Instructions and all information for use shall be made accessible to and independently usable by persons with vision impairments.

5.3 Access Aisles. All accessible fixed tables shall be accessible by means of an access aisle at least 36 in (915 mm) clear between parallel edges of tables or between a wall and the table edges.

Appendix 51-20-93120(b) Controls. Controls for user activation shall comply with Section 3106(c).

Appendix 51-20-93120(d) Equipment for Persons with Vision Impairments. Instructions and all information for use shall be

made accessible to and independently usable by persons with vision impairments.
51-20-3106(v) 1. Restaurants and Cafeterias. 1. Aisles. Aisles to fixed tables required to be accessible shall comply with 3106 (s).

51-20-3106 (t) Aisles. All aisles [required to be accessible]. including check out aisles, food service lines and aisles between fixed tables, shall be not less than 36 inches in width.
Comment: Issue 70. The reference has been changed to Sec. 3106(t) in the November 1992 amendments. See page 604o of the Published Code (Sec. 3106(v)).

[See above.]
[See above.]
[Amendment: E.]
107 ADA/Washington State July 12, 1994

01-03898
5.5 Food Service Lines. Food service lines shall have a minimum clear width of 36 in (915 mm), with a preferred clear width of 42 in (1065 mm) to allow passage around a person using a wheelchair. Tray slides shall be mounted no higher than 34 in (865 mm) above the floor (see Fig. 53). If self-service shelves are provided, at least 50 percent of each type must be within reach ranges specified in 4.2.5 and 4.2.6.

51-20-3106 (v) 2. Food Service Lines A. Clear Floor Space. Food service lines shall comply with Section 3106 (t) (3106 (t) requires 36 inch aisle width).

51-20-3106 (v) 2. B. Height. Tray slides shall be mounted not more than 34 inches in height above the floor.

51-20-3105 (d) 6. Storage.
[Facilities]. In other than Group R, Division 1 apartment buildings, where fixed or built-in storage facilities such as cabinets, shelves, closets and drawers are provided in accessible spaces, at least one of each type provided shall contain storage space complying with Section 3106 (r).

Comment: Issue 71. To clarify these provisions the Council has issued Interpretations No. 93-38 and 93-42.

Interpretation No. 93-38
Question: How many shelves must be in reach ranges where the code states "Not all self-service shelves and display units

need be located within reach ranges required by Sec. 3106(b)4?" In Sec. 3106(v)2D, is the reference to Sec. 3106(s) correct in establishing the location of shelves and dispensing devices for tableware, dishware, food, beverages, and condiments in restaurants and cafeterias?
Answer: The intent of the code, as provided in Sec. 3101(a), is to provide standards equivalent with the ADA Accessibility Guidelines. Where self-service shelves are provided in restaurants and cafeterias, at least 50 percent of each type shall be within the reach ranges of Sec. 3106(b). The proper reference in Section 3106(v)2D is to Sec. 3106(r).

NE ADAAG requires 50% of self service shelves in food service lines to be accessible. WSR has no specific provision, only a general provision (see 3105 (d) 6).

[N.E. The code says 1 has to be accessible. When an interpretation contradicts the code, the code will be given priority.]
[Amendment: The removal of the requirement that self-service shelves be on an accessible route seems to be a problem. The interpretation helps, but is not sufficient.]
108 ADA/Washington State July 12, 1994
01-03899
5.6 Tableware and Condiment Areas. Self-service shelves and dispensing devices for tableware, dishware, condiments, food and beverages shall be installed to comply with 4.2 (see Fig. 54).

Fig. 54 Tableware Areas.
The maximum height is 54 inches (1370 mm).
Interpretation No. 93-42.
Question: Self-service shelving and display units in retail occupancies are required to be located on an accessible route. See also wording of 3106(r)2.
1. Does this mean each and every clothing rack at Nordstroms or Target must be on an accessible route or just the area where racks may be installed?
2. The Section is unclear as to how many of the shelves in these self-service areas, must be within the reach ranges.
Answer: 1. Access is required between permanent fixtures or furniture which are shown on the plans and to the area where portable racks may be located.
2. Except in restaurant and cafeterias, the number of shelves which are in reach ranges is not limited. Some must be, but there is no set minimum percentage. For restaurants and cafeterias, see interpretation No. 93-38.

51-20-3106 (v) 2. D. Tableware and Condiment Areas. Self-

service shelves and dispensing devices for tableware, dishware, condiments, food and beverages shall be installed to comply with Section 3106 (s).

Comment: Issue 72. The intent was to refer to Section 3106(r). To correct this reference the Council has issued Interpretation No. 93-38.
Interpretation No. 93-38
Question: How many shelves must be in reach ranges where the code states "Not all self-service shelves and display units need be located within reach ranges required by Sec. 3106(b)4?" In Sec. 3106(v)2D, is the reference to Sec. 3106(s) correct in establishing the location of shelves and dispensing devices for tableware, dishware, food, beverages, and condiments in restaurants and cafeterias?
Answer: The intent of the code, as provided in Sec. 3101(a), is to provide standards equivalent with the ADA Accessibility Guidelines. Where self-service shelves are provided in restaurants and cafeterias, at least 50 percent of each type shall be within the reach ranges of Sec. 3106(b). The proper reference in Section 3106(v)2D is to Sec. 3106(r).

PNE Clarification needed. 3106 (s) is not correct section. [N.E. It is not sufficient to correct an error in the code by issuing an interpretation.]
109 ADA/Washington State July 12, 1994

01-03900
5.8 Vending Machines and Other Equipment. Spaces for vending machines and other equipment shall comply with 4.2 and shall be located on an accessible route.

6. MEDICAL CARE FACILITIES.

6.1 General. Medical care facilities included in this section are those in which people receive physical or medical treatment or care and where persons may need assistance in responding to an emergency and where the period of stay may exceed twenty-four hours. In addition to the requirements of 4.1 through 4.35, medical care facilities and buildings shall comply with 6.

(1) Hospitals - general purpose hospitals, psychiatric facilities, detoxification facilities - At least 10 percent of patient bedrooms and toilets, and all public use and common use areas are required to be designed and constructed to be accessible.

(2) Hospitals and rehabilitation facilities that specialize in treating conditions that affect mobility, or units within either that

specialize in treating conditions that affect mobility - All patient bedrooms and toilets, and all public use and common use areas are required to be designed and constructed to be accessible.

(3) Long term care facilities, nursing homes - At least 50 percent of patient bedrooms and toilets, and all public use and common use areas are required to be designed and constructed to be accessible.

Comment: Issue 73. ADAAG does not specifically regulate the vending machines, only the spaces in which they are located. The machines themselves and their location and installation are viewed as beyond the scope of building code regulation. Since the Washington code requires universal accessibility in all spaces regardless of function, and does not allow spaces to be inaccessible, the locations available for vending machine installation are accessible on accessible routes.

51-20-3103 (a) 6. Group I Occupancies. All Group I Occupancies shall be accessible in all public use, common use and employee use areas, and shall have accessible patient rooms, cells and treatment or examination rooms as follows:
51-20-3103(a) 6. A. In Group I Division 1.1 hospitals which specialize in treating conditions that affect mobility, all patient rooms in each nursing unit, including associated toilet rooms and bathrooms.

51-20-3103 (a) 6. B. In Group I, Division 1.1 hospitals which do not specialize in treating conditions that affect mobility, at least 1 in every 10 patient rooms in each nursing unit, including associated toilet rooms and bathrooms.
51-20-3103 (a) 6. C. In Group I, Division 1.1 and Division 2 nursing homes and long-term care facilities, at least 1 in every 2 patient rooms, including associated toilet rooms and bathrooms.
51-20-3103 (a) 6. D. In Group I, Division 3, mental health Occupancies, at least 1 in every 10 patient rooms, including associated toilet rooms and bathrooms.

Comment: Issue 74. Section 3103(a)6 has been amended to add a new Section F which reads: "In Group I Occupancies, all treatment and examination rooms shall be accessible." See page 600 of the Published Code.

[Amendment: E.]

7.4 Security Bollards. Any device used to prevent the removal of shopping carts from store premises shall not prevent access or egress to people in wheelchairs. An alternate entry that is equally convenient to that provided for the ambulatory population is acceptable.

8.5 Stacks. Minimum clear aisle width between stacks shall comply with 4.3, with a minimum clear aisle width of 42 in (1065 mm) preferred where possible. Shelf height in stack areas is unrestricted (see Fig. 56).

Comment: Issue 75. The Washington State Regulations did

not include specific regulation of security bollards because it was believed that special attention was not necessary. Such bollards are simply one item which could interfere with an accessible route or accessible route of egress and would be prohibited.

See 51-20-3106 (x) 3. Above.

Comment: Issue 76. Section 3106(y)3 was amended in November 1992 to delete the word "reference" so that the accessible aisle requirements apply to all stacks. See page 604q of the Published Code.

[E.]

[E.]

111 ADA/Washington State July 12, 1994

01-03902

9.1 Hotels, Motels, Inns, Boarding Houses, Dormitories, Resorts and Other Similar Places of Transient Lodging.
9.1.1 General. All public use and common use areas are required to be designed and constructed to comply with section 4 (Accessible Elements and Spaces: Scope and Technical Requirements).
EXCEPTION: Sections 9.1 through 9.4 do not apply to an establishment located within a building that contains not more than five rooms for rent or hire and that is actually occupied by the

proprietor of such establishment as the residence of such proprietor.

51-20-3103(a) 8. Group R. Occupancies. A. General. All Group R Occupancies shall be accessible as provided in this chapter. Public-and common use areas and facilities such as recreational facilities, laundry facilities, garbage and recycling collection areas, mailbox locations, lobbies, foyers and management offices, shall be accessible.
[EXCEPTION: Common- or public-use facilities accessory to buildings not required to contain either Type A or Type B dwelling units in accordance with Section 3103(a)8B.]
B. Number of Dwelling Units. In all Group R, Division 1 apartment buildings the total number of Type A dwelling units shall be as required by Table No. 31-B. All other dwelling units shall be designed and constructed to the requirements for Type B units as defined in this chapter.
EXCEPTIONS: 1. Group R Occupancies containing [no more than] three dwelling units....
51-20-3103 (a)8.C. Hotels and Lodging Houses. In all hotels and lodging houses, accessible guest rooms, including associated bathing, shower and toilet facilities, shall be provided in accordance with Table No. 31-C....

....In addition public-use and common-use areas of all hotels and lodging houses shall be accessible.
EXCEPTION: Group R, Division 3 lodging houses that are occupied by the owner or proprietor of the lodging house.

51-20-3103 (a) 8. E. Congregate Residences. In congregate residences with multi-bed rooms or spaces, a percentage equal to the minimum number of accessible rooms required by Table No. 31-C shall be accessible in accordance with Section 3106 (z).
EXCEPTION: Congregate residences with 10 or fewer occupants need not be accessible.

Comment: Issue 77. Congregate residences as intended by the UBC definition have non transient residents. The exemption in WSR has no effect on equivalency with the ADA. See also Council Interpretation No. 93-39.

01-03903
Interpretation 93-39:
Question: For purposes of accessibility requirements of Chapter 31, how should buildings such as homeless shelters, halfway houses, transient group homes, and similar social

service establishments where people may sleep or temporarily reside be classified? Similarly, how should apartments or condominium complexes be classified where some or all of the units are rented to short term quests.
Answer: The intent of the code, as provided in Sec. 3101(a), is to provide standards equivalent with the ADA Accessibility Guidelines.

For the purpose of determining accessibility requirements per Chapter 31, uses such as homeless shelters, halfway houses, transient group homes, and similar facilities should be reviewed on a case be case basis. While these uses are "residential" in nature, if the residents are considered transient, classification as R-1 hotel, or R-3 lodging house is more appropriate. Some may need to be classified either in an I (Institutional) or B (Business) category. If services are provided at the site such as job or health counseling, classification should be in a category which requires accessibility. These uses should not be categorized as congregate residence when the residents are essentially transient.

Apartments or condominiums which are rented on a short term basis to transient guests should be categorized as either a Group R-1, hotel, or Group R-3 lodging house with appropriate accessibility provided.

9.1.2 Accessible Units, Sleeping Rooms, and Suites. Accessible sleeping rooms or suites that comply with the requirements of 9.2 (Requirements for Accessible Units, Sleeping Rooms, and Suites) shall be provided in conformance with the table below. In addition, in hotels, of 50 or more sleeping rooms or suites, additional accessible sleeping rooms or suites that include a roll-in shower shall also be provided in conformance with the table below. Such accommodations shall comply with the requirements of 9.2, 4.21, and Figure 57(a) or (b).

Fig. 57 Roll-in Shower with Folding Seat.

Diagram (a): Where a fixed seat is provided in a 30 inch minimum by 60 inch (716 mm by 1220 mm) minimum shower stall, the controls and spray unit on the back (long) wall shall be located a maximum of 27 inches (685 mm) from the side wall where the seat is attached. (4.21.2, 9.1.2)

Diagram (b): An alternate 36 inch minimum by 60 inch (915 mm by 1220 mm) minimum shower stall is illustrated. The width of the stall opening stall shall be a minimum of 36 inches (915 mm) clear located on a long wall at the opposite end of the shower from the controls. The shower seat shall be 24 inches (610 mm) minimum in length by 16 inches (330 mm) minimum in width and may be rectangular in shape. The seat shall be located next to the opening to the shower and adjacent to the end wall containing the shower head and controls. (4.21.2, 9.1.2, A4.23.3)

Number of Rooms	Accessible Rooms	Rooms with Roll-in Showers
1 to 25	1	
26 to 50	2	
51 to 75	3	1
76 to 100	4	1
101 to 150	5	2
151 to 200	6	2
201 to 300	7	3
301 to 400	8	4
401 to 500	9	4, plus one for each additional 100 over 400
501 to 1000	2% of total	
1001 and over	20 plus 1 for each 100 over 1000	

51-20-3103 (a) 8:C. Hotels and Lodging Houses. In all hotels and lodging houses, accessible guest rooms, including associated bathing, shower and toilet facilities, shall be

provided in accordance with Table No. 31-C...

...In addition public-use and common-use areas of all hotels and lodging houses shall be accessible.

EXCEPTION: Group R, Division 3 lodging houses that are occupied by the owner or proprietor of the lodging house.

Table No. 31-C-Number of
Accessible Rooms and Roll-in Showers

Total Number of Rooms1	Minimum Required Accessible Rooms1	Rooms With Roll-in Showers
1 to 25	1	
26 to 50	2	
51 to 75	3	1
76 to 100	4	1
101 to 150	5	2
151 to 200	6	2

301 to 400	8	4
401 to 500	9	4, plus 1 for every 100 rooms or fraction thereof, over 400.
501 to 1000	2% of total	
Over 1000	20 plus 1 for every 100 rooms or fraction thereof, over 1000	

1 For congregate residences the numbers in these columns shall apply to beds rather than rooms.

9.2 Requirements for Accessible Units, Sleeping Rooms and Suites.

9.2.1 General. Units, sleeping rooms, and suites required to be accessible by 9.1 shall comply with 9.2.

Comment: Issue 78. The Council has issued Interpretation No. 93-40 to clarify the requirements for the three accessible rooms standards.

Interpretation No. 93-40.
Question: The code seems to require three different types of accessible rooms: an accessible room with roll-in type showers: an accessible room with another type of bathing facility; and rooms with features to assist persons with hearing impairments. Must the three categories be satisfied independently, or can the various requirements be combined in the same room?

Answer: The intent of the code, as provided in Sec. 3101(a), is to provide standards equivalent with the ADA Accessibility Guidelines. Each requirement for the three categories of rooms must be complied with independently of the other requirements. For example, in a 100 guest room motel, four (4) rooms must be wheelchair accessible, one (1) more room must be wheelchair accessible and provide a roll-in shower, and four (4) more rooms must provide equipment for persons with hearing impairments. In addition, the five wheelchair accessible rooms must also provide the equipment for persons with hearing impairments.

51-20-3106 (z) [H]otels and Congregate Residences. See below.

Comment: Issue 79. The DOJ analysis contains a typographical error in translating the provisions of WSR Section 3106(z), the correct title is "Hotels and Congregate Residences." See the comment on to Issue No. 19, above.

[E.]

9.2.2(6) Where provided as part of an accessible unit, sleeping room, or suite, the following spaces shall be accessible and shall be on an accessible route:

(a) the living area.

(b) the dining area.

(c) at least one sleeping area.

(d) patios, terraces, or balconies.

EXCEPTION: The requirements of 4.13.8 and 4.3.8 do not apply where it is necessary to utilize a higher door threshold or a change in level to protect the integrity of the unit from wind/water damage. Where this exception results in patios, terraces or balconies that are not at an accessible level, equivalent facilitation shall be provided. (e.g., Equivalent facilitation at a hotel patio or balcony might consist of providing raised decking or a ramp to provide accessibility).

(e) at least one full bathroom (i.e., one with a water closet, a lavatory, and a bathtub or shower).

(f) if only half baths are provided, at least one half bath.

(g) carports, garages or parking spaces.

51-20-3103 (a) 8. C. Hotels and Lodging Houses. In all hotels and lodging houses, accessible guest rooms, including associated bathing, shower and toilet facilities, shall be provided in accordance with Table No. 31-C. Where provided in accessible guest rooms the following facilities shall be accessible: dining areas; kitchens; kitchenettes, wet bars; patios; balconies; terraces; or similar facilities.

EXCEPTION: Kitchens in Type B dwelling units need not comply with Section 3106 (1) 1.

51-20-3106 (z) 2. Accessible Route of Travel. An accessible route complying with Section 3103 (b) 2. shall connect all accessible spaces and elements including telephones, patios, terraces, balconies, carports, garages or parking spaces with all accessible sleeping rooms.

Comment: Issue 80. See the comment on Issue No. 19, above. Also, Section 3103(a)BA requires all public and common use areas of a Group R occupancy to be accessible. The definition of hotel contained in Section 409 of the UBC should also be noted.

PNE Although carports, parking garages, or parking spaces must be connected by an accessible route to the unit, it doesn't specifically state they must be accessible. Interpretation needed.

[E.]

116 ADA/Washington State July 12, 1994

01-03907
9.2.2(8) Sleeping room accommodations for persons with hearing impairments required by 9.1 and complying with 9.3 shall be provided in the accessible sleeping room or suite.

9.4 Other Sleeping Rooms and Suites. Doors and doorways designed to allow passage into and within all sleeping units or other covered units shall comply with 4.13.5.
Comment: Issue 81. Section 3107 states the parking requirement. If the parking is provided in garages or carports (a B-1 or B-3 or M-1 occupancy) then that occupancy must also be accessible per section 3103(a). Like ADAAG, the WSR do not require parking to be provided, but where provided, it must be accessible according to Section 3107. Sec. 3107(a)6 states that accessible parking must be the closest to the accessible entrance and where there are multiple accessible entrances, the accessible parking must be distributed at the various entrances. As a result, if a hotel design includes parking located at individual units, those units which are required to be accessible will have to have accessible entrances and the parking nearest those entrances will need to be the location of accessible parking.
Comment: Issue 82. See comment on Issue No. 78, above.
51-20-3106 (z) 3. Doors. Doors within all sleeping rooms, suites or other covered units shall comply with Section 3106 (j).
Comment: Issue 83. The intent of the WSR regulations is to apply to all the doors of the guest rooms - including entry to the room - not just those "within" the room. To clarify the application of the WSR the Council has issued Interpretation No. 93-41.
Interpretation No. 93-41.
Question: What doors are covered by this requirement

[Section 51-20-3106(z)3]?
Answer: The intent of the code, as provided in Sec. 3101(a), is to provide standards equivalent to the ADA Accessibility Guideline. All doors which enter a guest room from common corridors or spaces and doors within the guest room providing access to other rooms in the guest room unit, or to adjacent units, must meet the standards for accessible doors. This requirement applies to all of the guest rooms in a hotel, not just those which must meet other accessibility standards. [N.E. S3103(a)7 requires accessibility of M-1 occupancies only if they are "private garages and carports which contain accessible parking serving Type A dwelling units." Accessible hotel rooms are not Type A dwelling units. The ADA would require a carport that was designated for an accessible hotel room to be accessible. WAC would not.]

01-03908

9.5 Transient Lodging in Homeless Shelters, Halfway Houses, Transient Group Homes, and Other Social Service Establishments.

9.5.1 New Construction. In new construction all public use and common use areas are required to be designed and constructed to comply with section 4. At least one of each type of amenity (such as washers, dryers and similar equipment installed for the use of occupants) in each common area shall be accessible and shall be located on an accessible route to any accessible unit or sleeping accommodation.

EXCEPTION: Where elevators are not provided as allowed in 4.1.3(5), accessible amenities are not required on inaccessible floors as long as one of each type is provided in common areas on accessible floors.

51-20-3108 (a) 8. Group Occupancies. A. General. All Group R Occupancies shall be accessible as provided in this chapter. Public- and common-use areas and facilities such as recreational facilities, laundry facilities, garbage and recycling collection areas, mailbox locations, lobbies, foyers and management offices, shall be accessible.

51-20-3103 (a) 8. E. Congregate Residences. In congregate residences with multi-bed rooms or spaces, a percentage equal to the minimum number of accessible rooms required by Table No. 31-C shall be accessible in accordance with Section 3106 (z).

EXCEPTION: Congregate residences with 10 or fewer occupants need not be accessible.

9.5.2 Alterations.

(1) Social service establishments which are not homeless shelters:

(a) The provisions of 9.5.3 and 9.1.5 shall apply to sleeping rooms and beds.

(b) Alteration of other areas shall be consistent with the new construction provisions of 9.5.1.

(2) Homeless shelters. If the following elements are altered, the following requirements apply:

(a) at least one public entrance shall allow a person with mobility impairments to approach, enter and exit including a minimum clear door width of 32 in (815 mm).

(b) sleeping space for homeless persons as provided in the scoping provisions of 9.1.2 shall include doors to the sleeping area with a minimum clear width of 32 in (815 mm) and maneuvering space around the beds for persons with mobility impairments complying with 9.2.2(1).

(c) at least one toilet room for each gender or one unisex

toilet room shall have a minimum clear door width of 32 in (815 mm), minimum turning space complying with 4.2.3, one water closet complying with 4.16, one lavatory complying with 4.19 and the door shall have a privacy latch; and, if provided, at least one tub or shower shall comply with 4.20 or 4.21, respectively.

(d) at least one common area which a person with mobility impairments can approach, enter and exit including a minimum clear door width of 32 in (815 mm).

(e) at least one route connecting elements (a), (b), (c) and (d) which a person with mobility impairments can use including minimum clear width of 36 in (915 mm), passing space complying with 4.3.4, turning space complying with 4.2.3 and changes in levels complying with 4.3.8.

(f) homeless shelters can comply with the provisions of (a)-(e) by providing the above elements on one accessible floor. See comments above.

119 ADA/Washington State July 12, 1994
01-03910

Comment: Issue 84. See comment on Issue No. 19, above.

Interpretation 93-39:
Question: For purposes of accessibility requirements of Chapter 31, how should buildings such as homeless shelters, halfway houses, transient group homes, and similar social service establishments where people may sleep or temporarily reside be classified? Similarly, how should apartments or condominium complexes be classified where some or all of the units are rented to short term guests.
Answer: The intent of the code, as provided in Sec. 3101(a), is to provide standards equivalent with the ADA Accessibility Guidelines.

For the purpose of determining accessibility requirements per Chapter 31, uses such as homeless shelters, halfway houses, transient group homes, and similar facilities should be reviewed on a case be case basis. While these uses are "residential" in nature, if the residents are considered transient, classification as R-1 hotel, or R-3 lodging house is

more appropriate. Some may need to be classified either in an I (Institutional) or B (Business) category. If services are provided at the site such as job or health counseling, classification should be in a category which requires accessibility. These uses should not be categorized as congregate residence when the residents are essentially transient.

Apartments or condominiums which are rented on a short term basis to transient guests should be categorized as either a Group R-1, hotel, or Group R-3 lodging house with appropriate accessibility provided.

[E.]

9.5.3. Accessible Sleeping Accommodations in New Construction. Accessible sleeping rooms shall be provided in conformance with the table in 9.1.2 and shall comply with 9.2 Accessible Units, Sleeping Rooms and Suites (where the items are provided). Additional sleeping rooms that comply with 9.3 Sleeping Accommodations for Persons with Hearing Impairments shall be provided in conformance with the table provided in 9.1.3.

In facilities with multi-bed rooms or spaces, a percentage of the beds equal to the table provided in 9.1.2 shall comply with 9.2.2(1).

10. TRANSPORTATION FACILITIES.

10.1 General. Every station, bus stop, bus stop pad, terminal, building or other transportation facility, shall comply with the

applicable provisions of 4.1 through 4.35, sections 5 through 9, and the applicable provisions of this section. The exceptions for elevators in 4.1.3(5) exception 1 and 4.1.6(1)(k) do not apply to a terminal, depot, or other station used for specified public transportation, or an airport passenger terminal, or facilities subject to Title II.

51-20-3103 (a) 8. C. Hotels and Lodging Houses. In all hotels and lodging houses, accessible guest rooms, including associated bathing, shower and toilet facilities, shall be provided in accordance with Table No. 31-C. In addition, sleeping rooms or suites for persons with hearing impairments shall be provided in accordance with Table No. 31-D. In addition, public-use and common-use areas of all hotels and lodging houses shall be accessible.

51-20-3103 (a) 8. E. Congregate Residences. In congregate residences with multi-bed rooms or spaces, a percentage equal to the minimum number of accessible rooms required by Table No. 31-C shall be accessible in accordance with Section 3106 (z).

EXCEPTION: Congregate residences with 10 or fewer occupants need not be accessible.

[E. See Interpretation 93-39.]

[Washington does not address transportation facilities separately.]

10.2 Bus Stops and Terminals.

10.2.1 New Construction.

(1) Where new bus stop pads are constructed at bus stops, bays or other areas where a lift or ramp is to be deployed, they shall have a firm, stable surface; a minimum clear length of 96 inches (measured from the curb or vehicle roadway edge) and a minimum clear width of 60 inches (measured parallel to the vehicle roadway) to the maximum extent allowed by legal or site constraints; and shall be connected to streets, sidewalks or pedestrian paths by an accessible route complying with 4.3 and 4.4. The slope of the pad

parallel to the roadway shall, to the extent practicable, be the same as the roadway. For water drainage, a maximum slope of 1:50 (2%) perpendicular to the roadway is allowed.

(2) Where provided, new or replaced bus shelters shall be installed or positioned so as to permit a wheelchair or mobility aid user to enter from the public way and to reach a location, having a minimum clear floor area of 30 inches by 48 inches, entirely within the perimeter of the shelter. Such shelters shall be connected by an accessible route to the boarding area provided under paragraph (1) of this section.

(3) Where provided, all new bus route identification signs shall comply with 4.30.5. In addition, to the maximum extent practicable, all new bus route identification signs shall comply with 4.30.2 and 4.30.3. Signs that are sized to the maximum dimensions permitted under legitimate local, state or federal regulations or ordinances shall be considered in compliance with 4.30.2 and 4.30.3 for purposes of this section.

EXCEPTION: Bus schedules, timetables, or maps that are posted at the bus stop or bus bay are not required to comply with this provision.

(Not addressed.)

10.2.2 Bus Stop Siting and Alterations.

(1) Bus stop sites shall be chosen such that, to the maximum extent practicable, the areas where lifts or ramps are to be deployed comply with section 10.2.1(1) and (2).

(2) When new bus route identification signs are installed or old signs are replaced, they shall comply with the requirements of

10.2.1(3).

(Not addressed.)

10.3 Fixed Facilities and Stations.

10.3.1 New Construction. New stations in rapid rail, light rail, commuter rail, intercity bus, intercity rail, high speed rail, and other

fixed guideway systems (e.g., automated guideway transit, monorails, etc.) shall comply with the following provisions, as applicable.

(1) Elements such as ramps, elevators or other circulation devices, fare vending or other ticketing areas, and fare collection areas shall be placed to minimize the distance which wheelchair users and other persons who cannot negotiate steps may have to travel compared to the general public. The circulation path, including an accessible entrance and an accessible route, for persons with the circulation path for the general public. Where the circulation path is different, signage complying with 4.30.1, 4.30.2, 4.30.3, 4.30.5, and 4.30.7(1) shall be provided to indicate direction to and identify the accessible entrance and accessible route.

(2) In lieu of compliance with 4.1.3(8), at least one entrance to each station shall comply with 4.14, Entrances. If different entrances to a station serve different transportation fixed routes or groups of fixed routes, at least one entrance serving each group or route shall comply with 4.14, Entrances. All accessible entrance shall, to the maximum extent practicable, coincide with those used by the majority of the general public.

(3) Direct connections to commercial, retail, or residential facilities shall have an accessible route complying with 4.3 from the point of connection to boarding platforms and all transportation system elements used by the public. Any elements provided to facilitate future direct connections shall be on an accessible route connecting boarding platforms and all transportation system elements used by the public.

(4) Where signs are provided at entrances to stations identifying the station or the entrance, or both, at least one sign at each entrance shall comply with 4.30.4 and 4.30.6. Such signs shall be placed in uniform locations at entrances within the transit to the maximum extent practicable.

EXCEPTION: Where the station has no defined entrance, but signage is provided, then the accessible signage shall be placed in a central location.

51-20-3101 (a) General. Buildings or portions of buildings shall be accessible to persons with disabilities as required by this chapter.

51-20-3101 (a) 1. General. Accessibility to temporary or permanent buildings or portions thereof shall be provided for all occupancy classifications except as modified by this

chapter.

(P.E. to the extent transportation stations are buildings. WAC does not address minimizing distance. WAC does not address accessible entrances for different fixed routes. WAC does not address accessible direct connections.)

124 ADA/Washington State July 12, 1994
01-03915

(5) Stations covered by this section shall have identification signs complying with 4.30.1, 4.30.2, 4.30.3, and 4.30.5. Signs shall be placed at frequent intervals and shall be clearly visible from within the vehicle on both sides when not obstructed by another train. When station identification signs are placed close to vehicle windows (i.e., on the side opposite from boarding) each shall have the top of the highest letter or symbol below the top of the vehicle window and the bottom of the lowest letter or symbol above the horizontal mid-line of the vehicle window.

(6) Lists of stations, routes, or destinations served by the station and located on boarding areas, platforms, or mezzanines shall comply with 4.30.1, 4.30.2, 4.30.3, and 4.30.5. A minimum of one sign identifying the specific station and complying with 4.30.4 and 4.30.6 shall be provided on each platform or boarding area. All signs referenced in this paragraph shall, to the maximum extent practicable, be placed in uniform locations within the transit system.

(7)* Automatic fare vending, collection and adjustment (e.g., add-fare) systems shall comply with 4.34.2, 4.34.3, 4.34.4, and 4.34.5. At each accessible entrance such devices shall be located on an accessible route. If self-service fare collection devices are provided for the use of the general public, at least one accessible device for entering, and at least one for exiting, unless one device serves both functions, shall be provided at each accessible point of entry or exit. Accessible fare collection devices shall have a minimum clear opening width of 32 inches; shall permit passage of a wheelchair; and, where provided, coin or card slots and controls necessary for operation shall comply with 4.27. Gates which must be pushed open by wheelchair or mobility aid users shall have a smooth continuous surface extending from 2 inches above the floor to 27 inches above the floor and shall comply with 4.13. Where the circulation path does not coincide with that used by the general public, accessible fare collection systems shall be located at or adjacent to the accessible point of entry or exit.

(8) Platform edges bordering a drop-off and not protected by platform screens or guard rails shall have a detectable warning. Such detectable warnings shall comply with 4.29.2 and shall be 24 inches wide running the full length of the platform drop-off.

(9) In stations covered by this section, rail-to-platform height in new stations shall be coordinated with the floor height of new vehicles so that the vertical difference, measured when the vehicle is at rest, is within plus or minus 5/8 inch under normal passenger load conditions. For rapid rail, light rail, commuter rail, high speed rail, and intercity rail systems in new stations, the horizontal gap, measured when the new vehicle is at rest, shall be no greater than 3 inches. For slow moving automated guideway "people mover" transit systems, the horizontal gap in new stations shall be no greater than 1 inch.

EXCEPTION 1: Existing vehicles operating in new stations may have a vertical difference with respect to the new platform within plus or minus 1-1/2 inches.

EXCEPTION 2: In light rail, commuter rail and intercity rail systems where it is not operationally or structurally feasible to meet the horizontal gap or vertical difference requirements, mini-high platforms, car-borne or platform-mounted lifts, ramps or bridge plates, or similar manually deployed devices, meeting the applicable requirements of 36 C.F.R. part 1192, or 49 C.F.R. part 38 shall suffice.

(10) Stations shall not be designed or constructed so as to require persons with disabilities to board or alight from a vehicle at a location other than one used by the general public.

(11) Illumination levels in the areas where signage is located shall be uniform and shall minimize glare on signs. Lighting along circulation routes shall be of a type and configuration to provide uniform illumination.

[Not addressed.]

(12) Text Telephones: The following shall be provided in accordance with 4.31.9:

(a) If an interior public pay telephone is provided in a transit facility (as defined by the Department of Transportation) at least one interior public text telephone shall be provided in the station.

(b) Where four or more public pay telephones serve a particular entrance to a rail station and at least one is in an interior location, at least one interior public text telephone shall be provided to serve that entrance. Compliance with this section constitutes compliance with section 4.1.3(17)(c).

(13) Where it is necessary to cross tracks to reach boarding platforms, the route surface shall be level and flush with the rail top at the outer edge and between rails, except for a maximum 2-1/2 inch gap on the inner edge of each rail to permit passage of wheel flanges. Such crossings shall comply with 4.29.5. Where gap reduction is not practicable, an above-grade or below-grade accessible route shall be provided.

(14) Where public address systems are provided to convey information to the public in terminals, stations, or other fixed facilities, a means of conveying the same or equivalent information to persons with hearing loss or who are deaf shall be provided.

(15) Where clocks are provided for use by the general public, the clock face shall be uncluttered so that its elements are clearly visible. Hands, numerals, and/or digits shall contrast with the background either light-on-dark or dark-on-light. Where clocks are mounted overhead, numerals and/or digits shall comply with 4.30.3. Clocks shall be placed in uniform locations throughout the facility and system to the maximum extent practicable.

(16) Where provided in below grade stations, escalators shall have a minimum clear width of 32 inches. At the top and bottom of each escalator run, at least two contiguous treads shall be level

beyond the comb plate before the risers begin to form. All escalator treads shall be marked by a strip of clearly contrasting color, 2 inches in width, placed parallel to and on the nose of each step. The strip shall be of a material that is at least as slip resistant as the remainder of the tread. The edge of the tread shall be apparent from both ascending and descending directions.

51-20-3105 (d) 2. Telephones. ...Where four or more public telephones are provided at a building site, and at least one is in an interior location, at least one interior telephone shall be a text telephone in accordance with Section 3106 (n). Where interior public pay phones are provided in transportation facilities ... at least one interior text telephone shall be provided.

[E.]

[Not addressed.]

127 ADA/Washington State July 12, 1994
01-03918

(17) Where provided, elevators shall be glazed or have transparent panels to allow an unobstructed view both in to and out of the car. Elevators shall comply with 4.10.

EXCEPTION: Elevator cars with a clear floor area in which a 60 inch diameter circle can be inscribed may be substituted for the minimum car dimensions of 4.10, Fig. 22.

(18) Where provided, ticketing areas shall permit persons with disabilities to obtain a ticket and check baggage and shall comply with 7.2.

(19) Where provided, baggage check-in and retrieval systems shall be on an accessible route complying with 4.3, and shall have space immediately adjacent complying with 4.2. If unattended security barriers are provided, at least one gate shall comply with 4.13. Gates which must be pushed open by wheelchair or mobility aid users shall have a smooth continuous surface extending from 2 inches above the floor to 27 inches above the floor.

10.3.2 Existing Facilities: Key Stations.
Not reproduced because key stations are covered by title II of the ADA only and, therefore, section 10.3.2 is inapplicable to title III entities.

10.3.3 Existing Facilities: Alterations.

(1) For the purpose of complying with 4.1.6(2) Alterations to an

Area Containing a Primary Function, an area of primary function shall be as defined by applicable provisions of 49 C.F.R. 37.43(c) (Department of Transportation's ADA Rule) or 28 C.F.R. 36.403 (Department of Justice's ADA Rule).

51-20-3105 (d) 7. C. Counters and Windows. Where customer sales and service counters or windows are provided, a portion of the counter, or at least one window, shall be accessible in accordance with Section 3106 (x) 2.

[Not addressed.]

[P.E.]

[Not addressed.]

[See above discussion of path of travel at Standard 4.1.6 (2).]

10.4 Airports.

10.4.1 New Construction.

(1) Elements such as ramps, elevators or other vertical circulation devices, ticketing areas, security checkpoints, or passenger waiting areas shall be placed to minimize the distance which wheelchair users and other persons who cannot negotiate steps may have to travel compared to the general public.

(2) The circulation path, including an accessible entrance and an accessible route, for persons with disabilities shall, to the maximum extent practicable, coincide with the circulation path for the general public. Where the circulation path is different, directional signage complying with 4.30.1, 4.30.2, 4.30.3 and 4.30.5 shall be provided which indicates the location of the nearest accessible entrance and its accessible route.

(3) Ticketing areas shall permit persons with disabilities to obtain a ticket and check baggage and shall comply with 7.2.

(4) Where public pay telephones are provided, and at least one is at an interior location, a public text telephone shall be provided in compliance with 4.31.9. Additionally, if four or more public pay

telephones are located in any of the following locations, at least one public text telephone shall also be provided in that location:

(a) a main terminal outside the security areas;

(b) a concourse within the security areas; or

(c) a baggage claim area in a terminal.

Compliance with this section constitutes compliance with section 4.1.3(17)(c).

(5) Baggage check-in and retrieval systems shall be on an accessible route complying with 4.3, and shall have space immediately adjacent complying with 4.2.4. If unattended security barriers are provided, at least one gate shall comply with 4.13. Gates which must be pushed open by wheelchair or mobility aid users shall have a smooth continuous surface extending from 2 inches above the floor to 27 inches above the floor.

51-20-3103 (a) 1. General. Accessibility to temporary or permanent buildings or portions thereof shall be provided for all occupancy classifications except as modified by this chapter.

51-20-3105 (d) 7. C. Counter and Windows. Where customer sales and service counters or windows are provided a portion of the counter or at least one window, shall be accessible in accordance with Section 3106 (x) 2.

51-20-3105 (d) 2. Telephones. ...Where four or more public telephones are provided at a building site, and at least one is in an interior location, at least one interior telephone shall be a text telephone in accordance with Section 3106 (h). Where interior public pay phones are provided in transportation facilities ... at least one interior text telephones shall be provided.

[Washington does not specifically address airports.]

[P.E. if airports are considered buildings.]

[Does not address minimizing distance.]

[P.E.]

[E.]

[Not addressed.]

(6) Terminal information systems which broadcast information to the general public through a public address system shall provide a means to provide the same or equivalent information to persons with a hearing loss or who are deaf. Such methods may include, but are not limited to, visual paging systems using video monitors and computer technology. For persons with certain types of hearing loss such methods may include, but are not limited to, an assistive listening system complying with 4.33.7.

(7) Where clocks are provided for use by the general public the clock face shall be uncluttered so that its elements are clearly visible. Hands, numerals, and/or digits shall contrast with their background either light-on-dark or dark-on-light. Where clocks are mounted overhead, numerals and/or digits shall comply with 4.30.3. Clocks shall be placed in uniform locations throughout the facility to the maximum extent practicable.

130 ADA/Washington State July 12, 1994
01-03921

. 7-8-94 DATE ILLEGIBLE
AF:MM:NM
J 204-8-0

The Honorable John McCain
United States Senate
111 Russell Senate Office Building
Washington, D.C. 20510-0303

Dear Senator McCain:

This is in response to your letter on behalf of your

constituent, Ms. Susan Webb, regarding the implementation of title II of the Americans with Disabilities Act (ADA) by the Department of Justice. We apologize for the delay in responding.

On June 20, 1994, the Architectural and Transportation Barriers Compliance Board (Access Board) published an Interim Rule that added four new sections to the ADA Accessibility Guidelines. On the same date, the Department of Justice published a Notice of Proposed Rulemaking to amend the Department's title II regulation to adopt the Access Board's new Guidelines. The Access Board's rule is only effective on the Departments of Justice and Transportation, which must use the Guidelines as the basis for issuing standards. Therefore, the new Guidelines are unenforceable until such time as the Department of Justice issues a final rule adopting them as standards.

Ms. Webb is concerned that the publishing of a Notice of Proposed Rulemaking, along with the concomitant comment period, will delay the effective date of the new Guidelines. Ms. Webb should be aware, however, that the Department of Justice is under a legal obligation to propose new rules and request public comment. Section 553 of the Administrative Procedure Act requires Federal agencies to publish general notice of proposed rulemaking in the Federal Register and to give interested persons an opportunity to participate in the rulemaking through submission of written data, views, or arguments (5 USC S 553(b), (c)). Because the Department has not previously given notice of our intent to adopt the Access Board's new Guidelines, we are

cc: Records CRS Chrono NM McDowney FOIA MAF NM
udd:Milton Congress NPRMVFIN.MCC

01-03330

obligated to do so now. Ms. Webb should be assured, however, that we intend to publish a final rule as soon as possible after the comment period has ended and the comments have been thoroughly considered.

I hope this information is helpful to you in responding to your constituent.

Sincerely,

Sheila F. Anthony
Assistant Attorney General

June 14, 1994

Senator John McCain
111 Russell Senate Office Bldg.
Washington DC 20510

Dear Senator McCain,

I am writing to express concern about the Americans with Disabilities Act Title II regulations for State and Local Government Services (28 CFR Part 35). The ADA mandates that the Access Board and the Department of Justice issue regulations for access to public buildings and facilities. The Department of Justice issued a Final Rule on July 26, 1991 that allowed these entities to use either the newly developed ADA Accessibility Guidelines (ADAAG) or the old Uniform Federal Accessibility Standards (UFAS).

It was the intent that Government entities use ADAAG; however, since certain facilities (e.g. public housing) were not yet addressed in ADAAG, UFAS was allowed as an alternate for guidance. Unfortunately, that has not been the way State and Local Government entities interpret the requirements. Generally, they feel that UFAS is a lesser standard and, therefore, a loophole. Because of this interpretation, some State and Local Government entities have been using a less stringent standard than that required of the private sector under Title III.

In November, 1993 The Access Board approved four new sections of ADAAG targeted specifically at Title II entities. These rules will be published in the Federal Register on June 20, nearly three years late! However, it is only an INTERIM rule as DOJ must adopt the Access Board's guidelines for them to have the force of law.

According to a source at the Access Board, DOJ will publish a Notice of Proposed Rulemaking on June 20 with a 60-day comment period for their own Title II accessibility rules. This translates into more delay of these new sections of ADAAG. While I realize and concur that perhaps there are some additional requirements that DOJ would like to include, I see no reason to delay adopting the Board's guidelines while DOJ works on some of the other details.

(602) 256-2245 Voice/TDD * (602) 254-6407 FAX * 1-800-280-2245

These delays are especially problematic as government buildings and facilities are still not being built or renovated to be fully accessible to the same extent that privately owned facilities are required to be accessible. Your help would be appreciated in urging the DOJ to publish the Board's interim rule as their own and continue to work on the other issues separately.

Sincerely,

Susan Webb
Executive Director

XX

Dear XX

I am responding to your letter requesting assistance in obtaining a ramp at the Royal Oak, Michigan Post Office. I apologize for the delay in responding.

You stated that you have been attempting to get the Post Office to comply with the Americans With Disabilities Act (ADA). However, the U.S. Postal Service, as a Federal agency, is not covered by the ADA. It is covered by the Architectural Barriers Act of 1968, which requires Federal buildings to meet accessibility standards, and by the Rehabilitation Act of 1973, as amended, which prohibits discrimination on the basis of disability by Federal Executive Agencies and the U.S. Postal Service.

The Architectural Barriers Act is enforced by the Architectural and Transportation Barriers Compliance Board (Access Board). You can contact them for assistance at:

U.S. Architectural and Transportation
Barriers Compliance Board
1331 F Street, N.W., Suite 1000
Washington, D.C. 20004-1111
1-800-872-2253 (Voice and TDD)

Additionally, you can contact the U.S. Postal Service directly concerning compliance with the Rehabilitation Act, as amended. You can direct your correspondence to:

Mr. Chuck Baker
Architectural Barriers Compliance Program

U.S. Postal Service
475 L'Enfant Plaza, N.W., Room 4130

Department of Justice
Constitution Ave. & Tenth St. N.W.
Washington, D.C. 20530

To whom this may concern;

I am writing to you for your assistance regarding the Americans Disabilities Act.

After many attempts of trying to get the Royal Oak, Michigan Post Office 48067 to adhere to the American Disabilities Act and become accessible to the disabled my attempts have gone in vain.

I would appreciate your assistance in resolving this matter.

The Royal Oak Post Office needs a ramp to the main entrance, curb cuts and parking for the disabled in the front of the building.

If you need any further information please contact me.

Thank you for your attention to this important need.

Respectfully,

XX

Ms. Belinda Gilzow-Carlton
Executive Director
Coalition of Texans with Disabilities
316 W. 12th Street, Suite 405
Austin, Texas 78701

Dear Ms. Gilzow-Carlton:

The Attorney General has asked me to respond to your letter alleging that the Houston, Texas office of Representative Craig Washington does not comply with the Americans with Disabilities Act (ADA).

Section 509(b)(3) of the ADA provides that the rights and protections of the ADA apply to the conduct of the House of Representatives. However, this provision is implemented and enforced exclusively through regulations and procedures established by the Architect of the Capitol. The Department of Justice has no authority to investigate alleged violations of section 509.

In addition, the space used as Representative Washington's office may be required to comply with the Architectural Barriers Act of 1968. That statute is enforced by the U.S. Architectural and Transportation Barriers Compliance Board (Access Board). Alleged violations of the Architectural Barriers Act may be reported to the Access Board at 1331 F Street, N.W., Washington, D.C. 20004-1111.

I hope that this information is helpful to you.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

Coalition of Texans with Disabilities
316 W. 12th St., Suite 405
Austin, Texas 78701
(512) 478-3366 V/TDD
FAX (512) 478-3370

June 14, 1994

The Honorable Craig Washington
United States House of Representatives
Washington, DC 20515

Dear Congressman Washington:

Members of the Coalition of Texans with Disabilities have tried four times within the past two years to visit you or your staff at your Houston office, but have been unable to enter your offices because there is no accessible entrance and there is not accessible parking places. These are two known violations of the Americans with Disabilities Act. Because we were unable to enter the premises the violations inside your offices are unknown.

Your staff member, Greg White, promised us that a ramp would be installed immediately when on our appointment to discuss healthcare reform on April 8, 1994 Glen Baker, who uses an electric wheelchair, feel backwards onto the concrete when he attempted to use a makeshift ramp of a piece of plywood placed against the curb by your staff. Steve Strubbe, of the CTD staff was able to clasp Mr. Baker's head and follow it to the ground preventing a head injury.

Two months have passed, Mr. Washington, and there is no ramp and no attempt to come into compliance with the Americans with Disabilities Act. Today, Natalie Warner, of your Washington, D.C. office has advised me that you have stated that you have no intention to comply with the law and that our organization may take whatever action we deem necessary.

Mr. Washington, we believed you to be a supporter of the civil rights of Texans with disabilities. You have been a Texas Representative; you voiced your support of disability rights at our conference ten years ago and you have been at the same Houston office since at least that year. Mr. Washington hold yourself out to be a civil rights advocate. Your failure to recognize our civil rights is incomprehensible.

Before filing suit, Mr. Washington, we will give you 10 days to make the corrections.

Please note that this letter does not intend to inform you of your legal rights, but to state our position with respect to your substantial lack of compliance with the Americans with Disabilities Act.

We are also asking U.S. Attorney General Janet Reno and the head of the Civil Rights Division, Devon Patrick, to investigate.

DATE ILLEGIBLE

The Honorable Tony P. Hall
Member, U.S. House of Representatives
501 Federal Building
200 West Second Street
Dayton, Ohio 45402

Dear Congressman Hall:

This is in response to your letter on behalf of your constituent, XX , who is concerned about the opening force of doors to public restrooms. We apologize for the delay in responding.

The Americans with Disabilities Act (ADA) authorizes the Department of Justice to provide technical assistance to individuals and entities that are subject to the Act. This letter provides informal guidance to assist you in understanding provisions applicable to your constituent. However, this technical assistance does not constitute a legal interpretation of the application of the statute and it is not binding on the Department.

The Department of Justice's regulation implementing title II of the ADA prohibits discrimination against qualified individuals with disabilities on the basis of disability by State and local governments. The Department of Justice's regulation implementing title III of the ADA prohibits discrimination on the basis of disability by privately owned places of public accommodation and commercial facilities. The title III regulation requires that all newly constructed or altered facilities comply with the ADA Standards for Accessible Design (ADA Standards). The title II regulation requires that all newly constructed or altered facilities comply with either the ADA Standards or the Uniform Federal Accessibility Standards (UFAS). Both the ADA Standards and UFAS require that all interior doors have a maximum opening force of five pounds. Thus, in any restroom facilities constructed or altered after January 26, 1992, interior doors would be required to meet this maximum door opening force requirement.

Records, CRS, Chrono, Friedlander, Milton, FOIA
udd\Milton\Congress\Doors.Hal

01-03342

In existing facilities (facilities that were not constructed or altered after January 26, 1992) covered by title II, State and local governments are required to make all programs, services, and activities in the facility accessible to people with disabilities. If a State or local government facility, such as a publicly owned highway rest area, contained restrooms that were open to the public, the government would be providing a service to the public that they would therefore have to provide to people with disabilities. If the doors to the restrooms were too heavy for someone with a disability to open, the government entity would either have to make some of the doors accessible by making them lighter or would have to find some other way to make some of the restrooms accessible.

In existing facilities covered by title III, privately owned places of public accommodation must remove architectural barriers to access where such removal is readily achievable (easy to accomplish without much difficulty or expense). Where barrier removal is not readily achievable, a public accommodation must make its services available through alternative methods.

Please note that the provisions requiring a maximum of five pounds of force for opening doors apply only to interior doors. Neither UFAS nor the ADA Standards set a limit for the maximum door opening force for exterior hinged doors. Thus, exterior hinged doors, including entrances to restrooms from exterior areas, need not be built in compliance with any specific design standards. Nevertheless, exterior doors to State and local restroom facilities are not exempt from the ADA. Title II of the ADA requires that qualified individuals with disabilities be given an equal opportunity to participate in the programs and services of covered entities, and title III likewise requires equal opportunity. Providing an equal opportunity may entail provision of fully accessible restrooms, including accessible exterior doors that can be opened using less than five pounds of force.

Finally, the Architectural and Transportation Barriers Compliance Board (Access Board) is in the process of developing guidelines for automated doors under the ADA. (Currently, automated doors are not required either by UFAS or the ADA Standards.) Preliminary research on automated doors has been completed and is being studied by the Access Board's ADA Accessibility Guidelines Review Committee, which was established to provide advice on issues related to amending the ADA Accessibility Guidelines. Once the Access Board has completed developing its guidelines for automated doors, it is anticipated

that the ADA Standards will be amended to incorporate those new guidelines.

01-03343

If XX wishes to file a complaint against a specific State or local government entity that maintains inaccessible restrooms, she should send her complaint to Merrily A. Friedlander, Acting Chief, Coordination and Review Section, Civil Rights Division, U.S. Department of Justice, P.O. Box 66118, Washington, D.C. 20035-6118. If she wishes to file a complaint against a specific privately owned place of public accommodation that maintains inaccessible restrooms, she should send her complaint to Mr. John Wodatch, Chief, Public Access Section, Civil Rights Division, U.S. Department of Justice, P.O. Box 66738, Washington, D.C. 20035-6738.

We hope this information is helpful to you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

HANDWRITTEN ILLEGIBLE

May 20, 1994

Honorable Tony Hall,

I'd like to call your attention to a difficulty for handicapped people who must use public restrooms. The pressure mechanism is set so heavy that handicapped people have difficulty entering and leaving the restroom. Some are so heavy if some one doesn't open the door for us we could not go in or leave.

Im sure you or whoever is responsible for the inspection of the public restrooms and doors do not think of this problem. I never did until four years ago when we were hit by a DUI driver and I was handicapped with walking ILLEGIBLE go in wheelchair or very short dist-ance with my walker ILLEGIBLE I must have someone open them

01-03345

for me.

We must travel to visit our children in Florida, Louisiana, Indiana, Tennessee - So we do get into a many different rest rooms. Last trip we stopped in a State at Welcome Station and the pressure on the door was so light I could open the door by myself. So I know it can be remedied if it is brought to the right persons attention.

The ILLEGIBLE in your Dayton Office said to write to you and you'd see it would get to the correct person.

Thank you for your attention and help.

Sincerely

T. 7-13-94

AUG 8 1994

The Honorable Kent Conrad
United States Senator
104 Federal Building
102 North Fourth Street
Grand Forks, North Dakota 58203

Dear Senator Conrad:

This is in response to your inquiry on behalf of your constituent, XX regarding his complaint about transportation for individuals with disabilities between terminals in an airport.

Title III of the Americans with Disabilities Act of 1990 (ADA), for which this office has implementation responsibility, requires readily achievable removal of architectural barriers and reasonable modification of policies where necessary to facilitate access by individuals with disabilities to places of public accommodation. Places of public accommodation include terminals for specified public transportation. However, the Act explicitly exempts air transportation from coverage. 42 U.S.C. S12181(10).

To the extent an airport is operated by an instrumentality of a State or local government, it may be covered by title II of the ADA. Such an airport may be considered a program of a public entity. Therefore, the public entity may be required to design and construct alterations and new construction of its facilities so they are fully accessible, to ensure program accessibility in existing facilities, and to reasonably modify its procedures to accommodate individuals with disabilities. Responsibility for enforcement of title II in the context of transportation lies with the Department of Transportation. 28 C.F.R. S35.190(b)(8).

In addition, if an airport receives Federal funding or serves a certificated air carrier, it may be covered by Section 504 of the Rehabilitation Act of 1973. 29 U.S.C. S794. The Department of Transportation has issued regulations under Section 504 to specifically address accessibility of both new and existing airport facilities. 49 C.F.R. part 27.

cc: Records, Chrono, Wodatch, Hill, McDowney, FOIA, Friedlander
n:\udd\hille\policylt\conrad.ltr

01-03347

Finally, the Air Carrier Access Act may be applicable to XX complaint. The Air Carrier Access Act prohibits air carriers from discriminating against people with disabilities in the provision of air transportation. 49 U.S.C. S1374(c). The Department of Transportation has responsibility for the implementation of the discrimination provisions of the Air Carrier Access Act.

Thus, it appears that all of the issues raised by XX complaint are within the jurisdiction of the Department of Transportation. Because you have already contacted the Department of Transportation, it is likely that the review process pursuant to the applicable legal standards is already being undertaken. If XX wishes to have further information about the requirements of the ADA, he may contact our ADA information line at 800/514-0301 (voice) or 800/514-0383 (TDD).

I hope this information will be useful to you in responding to your constituents.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

PO Box 66738
Washington, DC 20035

Dear Mr. Wodatch:

I am writing on behalf of Dr. XX of Grand Forks, North Dakota. He has contacted my office about his wife's difficulties when a flight was cancelled and she had to change terminals at Newark Airport due to rerouting.

He indicates that his wife's mobility is impaired; she had to walk from one airport terminal to another at the Newark (NJ) Airport because the airport shuttle system was too slow to get her to her connecting flight and the airlines did not make any arrangement to assist her. Copies of correspondence from Dr. XX are enclosed.

I am writing to you in the Department of Justice and to the Department of Transportation with the hope that this case will be thoroughly reviewed. I would like to know whether action will be taken by the airport, or by the airline companies, to prevent this kind of problem in the future for those who cannot easily walk between terminals. I would appreciate it if you would see that a response is forwarded to me at my Grand Forks office at:

The Honorable Richard Bilirakis
Member, U.S. House of Representatives
4111 Land O'Lakes Boulevard, Suite 306
Land O'Lakes, Florida 34639

Dear Congressman Bilirakis:

This is in response to the questions regarding accessibility for individuals with disabilities raised by your constituent, XX of Tampa, Florida. The Americans with Disabilities Act (ADA) covers all of the barriers encountered by XX heavy doors, location of parking spaces, steep incline from accessible parking to entrance of building, and inaccessible bathrooms. For existing facilities, the ADA requires that barriers be removed if it is readily achievable to do so. Please refer to section 36.304 of the title III regulations for information regarding readily achievable barrier removal in existing facilities. I am enclosing a copy of these regulations and a copy of our Title III Technical Assistance Manual.

The Department of Justice has established a free telephone information service that provides technical assistance on title III of the ADA. The number is 800-514-0301 (voice) or 800-514-0383 (TDD). Publications are available for entities covered by the ADA and for individuals with disabilities protected by the ADA.

I hope this information is useful to you in responding to your constituent.

Sincerely,

Deval L. Patrick

XX
XX
Tampa, FL 33624

Sam M. Gibbons - Congressman
2002 N. Lois Avenue
Suite 260
Tampa, FL

Dear Congressman Gibbons:

Have you, personally, ever had to deal with problems such as these?

I had an appointment in 5 minutes, and I thought, "just enough time to go into the ladies/men's room" "Wonderful! Special provisions have been made for the handicapped." However, when I tried to go in, the door was so hard to open it took both arms and all my weight to push the door open. My walker was there between me and the door. I struggled to keep the door open while inching the walker in. Finally, I was in but I thought, "What's this? A baby's dressing table?" The walker can't be put to one side so that I can get out of the way of the door when it closes. The door is so heavy it will knock me down when it closes, I have to get out of the way. I have a few other problems, like getting out of here. The 5 minutes will be long gone. So much for being on time.

Again, I had an appointment. It's in a beautiful new professional building. The handicapped parking spaces are in the front - - near the drive - - out of the way. They are on such an incline that a walker is difficult to maneuver, a manual wheelchair could prove to be hazardous. The office I had business in, has no handicapped provisions in the bathroom.

A popular fast food restaurant I frequent with a handy drive-thru has two handicapped parking spaces - - out of the way!! The drive-thru goes through the parking lot. I would love to walk faster so that I could get out of harm's way; however, I cannot. I move as fast as I can with my walker to reach those heavy double doors - - my next challenge of the day.

01-03354

U.S. Department of Justice

Civil Rights Division

Coordination and Review Section

P.O. Box 66118
Washington, D.C. 20035-6113

The Honorable Wellington E. Webb
Mayor of the City and County of Denver
City and County Building
Denver, Colorado 80202

RE: Complaint Number XX

Dear Mayor Webb:

This letter constitutes the Department of Justice's (the Department) Letter of Findings with respect to allegations received by this office concerning violations of Title II of the Americans with Disabilities Act of 1990 (ADA) by the City and County of Denver (the City). Title II of the ADA, 42 U.S.C. SS 12131-12134, prohibits discrimination against qualified individuals with disabilities on the basis of disability by State and local governments. The allegations concern the denial of reasonable accommodations provided to XX and his subsequent termination from the Denver Police Department in XX

The regulation implementing Title II, at 28 CFR S 35.140(a), prohibits employment discrimination against qualified individuals with disabilities. Title II adopts the legal standards of Title I of the ADA, 29 CFR Part 1630, which took effect in July 1992, and which also prohibits employment discrimination. 28 CFR S 35.140(b). The Coordination and Review Section of the Civil Rights Division is responsible for the investigation and resolution of administrative complaints alleging violations of Title II by components of State and local governments in all programs, services, and regulatory activities relating to law enforcement and public safety. 28 CFR S 35.190(b)(6).

As discussed in detail below, the Department finds that the City has violated Title II by its failure to provide a reassignment or transfer as a reasonable accommodation for

XX , and by terminating him from the Police Department. Pursuant to 28 CFR S 35.172, the Department is issuing this Letter of Findings and hereby informing the City that the Department is prepared to enter into negotiations in order to secure compliance by voluntary means, as provided in 28 CFR S 35.173.

FINDINGS OF FACT

COMPLAINANT'S POSITION

Officer XX alleged that the Denver Police Department violated Title II by failing to reassign or transfer him as a reasonable accommodation for his disability. He further alleges that this failure resulted in his termination from the City in XX

XX was a patrol officer in the Denver Police Department from XX . During this period, he was seriously injured on three separate occasions while on duty. These injuries resulted in herniated and ruptured spinal disks in his back, pain in his legs, hip and heel, and loss of coordination in his legs, among other things. He sustained his most recent injury after a high speed chase and collision in 1991. As a result, he was diagnosed with multiple degenerative disk disease, left shoulder scapular winging, and thoracic disk protrusion. These injuries, for which he has received ongoing medical treatment, restrict XX from walking up stairs, repetitive bending or lifting, standing for any length of time, engaging in physical recreation or sports, and many physical activities those without disabilities can engage in. The injuries have resulted in chronic ongoing pain and discomfort. Physicians have told XX that he risks permanent paralysis if he reinjures his back.

Based on the medical evaluations of City physicians, XX was deemed unable to return to full duty in May 1992. XX has a record of this impairment dating back to 1987, when he first injured himself severely in the line of duty. His disability prevents him from performing law enforcement work as an officer (e.g., security guard or correctional officer) and any work involving heavy labor or lifting (e.g., construction).

Officer XX was placed in a "light duty" desk job following his most recent injuries, which he sustained in January 1991. Under the Police Department's personnel policies, injured officers must be able to return to "full duty" within 365 days or they are required to retire (usually on a disability pension). There are no permanent light duty positions provided to officers

injured in the line of duty, nor are reassignments or transfers to other positions permitted.
01-03356

Officer XX was a police officer for 20 years. He worked as a patrol officer and a detective, and in a variety of other assignments. He has no other professional or specialized vocational training. Officer XX believes he is qualifed to perform many other jobs within the Police Department (e.g., investigator, lab technician, firearms instructor, or dispatcher) and that he should be able to remain in some capacity. His salary as a police officer was $37,000 when he retired on disability. His disability pension is $14,800. In addition, his health insurance is no longer paid by the City.

During his final months on the police force, from XX XX , Officer XX made several requests to be permanently placed in a related position that did not require the ability to make a forcible arrest. These transfer or reassignment requests were requests for a reasonable accommodation for his disability. Because Police Department policies preclude reassignment or transfer, XX was terminated in XX XX , on the grounds that he did not recover sufficiently to resume his duties as a patrol officer, and was directed to apply for disability retirement. Officer XX alleges that the City's failure to reassign or transfer him to another position within the Police Department constituted a denial of a reasonable accommodation and discrimination against him on the basis of disability. He alleges that the City had ample opportunity to make a reasonable accommodation through reassignment or transfer, but refused to do so, in violation of his rights under Title II. He seeks reinstatement to a position that is equivalent in terms of salary, benefits and seniority.

THE CITY'S POSITION

The Denver Police Department's policy permits a police officer 365 days at full salary to recover from a line-of-duty injury. Officers who are expected to be off duty for more than 30 days are assigned to the "limited duty section" where they perform clerical assignments; however, permanent reassignments to so-called "light duty" positions are not available. If injured officers who are temporarily reassigned because of injury do not reach "maximum medical improvement" within one year, and they are deemed unable to return to full time duty, they are removed from the payroll and can apply for a disability retirement. Transfer or reassignment to a non-police officer position within the

Police Department, the Department of Safety, or elsewhere in the City and County government is not an option. The City maintains that a transfer to a non-police officer position is unreasonable, is not an accommodation required by the ADA, and is a violation of the Denver City Charter, which mandates two separate and distinct personnel systems.

The City of Denver has two legally separate employment systems within the Department of Safety. The Classified Service consists of all police and fire officers and is administered by the Civil Service Commission. The Career Service consists of all other City employees, except members of the Classified Service, and is administered by the Career Service Authority. The Manager of Safety is responsible for all public safety employees in the City of Denver, in both the police and fire departments, including classified and career employees.

Police officers, as part of the Classified Service, are classified as "Patrol Officers"; only their rank or assignment differs (e.g., detective, firearms instructor, Sergeant, etc.). The positions, such as lab technician and dispatcher, that are supervised by the Manager of Safety are within the Career Service, which is the civilian segment of the police workforce. Career Service employees perform duties designated by the Manager of Safety through the Chief of Police, and work under the direct supervision of police managers and alongside police officers in support roles.

Because of personnel and budget considerations, the Police Department does not provide permanent inside, or "light duty," positions for anyone. The City believes that if it created a permanent light duty position, this would change the essential functions of the Patrol Officer's position. Police officers performing in any capacity are expected to perform the essential functions of their job, which include the ability to fire a weapon and make a forcible arrest, if necessary. All police officers are theoretically on duty 24 hours a day, carry a badge and weapon, and may be required to act in their law enforcement capacity at any time. If an injured officer is unable to resume "full duty" within 365 days (i.e., be able to make a forcible arrest and fire a weapon), he or she is removed from the force and can apply for disability retirement. The City considers such officers no longer "qualified" to perform the essential functions of their job.

Reassignment to positions in the Career Service of the Department of Safety (e.g., dispatcher or lab technician) is not an option. According to the City, the Career Service is an entirely different personnel system, in which the positions have their own unique experience requirements and qualification standards. The City contends that the Police Department has no authority over the Career Service. In summing up its position, the City states:

> ... the City's interpretation of the ADA requirements regarding accommodations is that the accommodation (a transfer) should be related to the job of a police person, not an entirely different job. More specifically, our interpretation of the ADA requirement is that the accommodation would be to his physical limitation (back problem), and for XX to be a 'qualified' individual of [sic] a disability he should be capable of performing the essential functions of the job of police person with an accommodation, to that disability. Here, XX seeks to be accommodated into a non-police position without meeting the qualification standards, test requirements and other selection criteria for a Career Service position. ... our position is grounded in a good faith belief that the transfer requested is unreasonable and not an accommodation compelled by the ADA...

ANALYSIS

Under Title II of the ADA, which adopts the legal standards of Title I, reassignment to a vacant position is a right of qualified individuals with disabilities, and is permitted as a form of reasonable accommodation. 29 CFR Part 1630.2(o). The legislative history of Title I explains the intent of this aspect of the ADA. The Senate Report states: "If an employee, because of disability, can no longer perform the essential functions of the job that he or she has held, a transfer to another job for which the person is qualified may prevent the employee from being out of work and the employer from losing a valuable worker." S. Rep. No. 101-116, 101 Cong., 1st Sess. 129-130 (1989). Consideration of reassignment is only required for persons who are already employees, and to the extent possible, employers should reassign individuals to equivalent positions in terms of pay and benefits.

The City asserts that one of the essential functions of a patrol officer's job is the ability to make a forcible arrest, and that its only obligation is to accommodate XX in police positions that require the ability to make a forcible arrest. The complainant concedes that he is unable to make a forcible arrest because of the seriousness of the damage to his spinal disks. However, the fact that the complainant may not meet the essential functions of a patrol officer's job does not mean that the City's obligations under the ADA have been met. The statutory obligation to "reassign" would have no meaning if it only applied to those individuals who meet the essential functions of the job they were occupying. Indeed, if they could meet the essential functions of that job, they would have no need

to be accommodated by being reassigned. In other words, the concept of "reassignment" as interpreted by the City has no meaning.

The statute and regulations make clear that when an accommodation in an employee's present position is not possible, reassignment to another position must be considered as a reasonable accommodation. Reassignment assumes that an essential function (such as the ability to make a forcible arrest) cannot be met.

Despite the City's contention that it is impossible to consider reassignment of police officers with disabilities to support positions, inter alia, within the department, the City has not adequately explained its reasoning. The Manager of Safety, who in fact has direct administrative control over all employees in the Police Department, has stated in interviews with DOJ personnel and others in the City that she has given thought to arranging for transfers, reassignments or alternative placements for officers with disabilities, like XX Officer XX 20 years of experience in police work, in which he performed a variety of duties including detective, firearms instructor, dispatcher and other support services, demonstrates that he is apparently qualified for a number of positions in the Police Department. The duty to reassign extends to other related positions in the City for which the complainant is qualified and that were vacant at the time it was determined that he would not be able to return to full duty as a patrol officer. 29 CFR 1630.2(o).

How far beyond the employee's immediate job classification ("patrol officer") the employer must look to meet its obligation

to reassign is a case-by-case decision, taking into consideration the totality of circumstances, including the employer's size, structure, general policies and procedures, and the frequency and location of available positions. In this case there were, in fact, many vacancies in the Police Department that were available during the period when Officer XX was on "light duty" for which he could have been considered, given his years of police experience and training. The Police Department listed 221 positions that were filled between January 1992 and March 1993; an additional 13 positions were filled through transfers. Mr. XX could have been considered for positions such as Emergency Service Dispatcher, Code Investigator, Staff Probation Officer, Criminal Justice Technician, Senior Clerk and Specialty Clerk, among others.

As a further example, the data show that in every month from March 1992, when the complainant filed his charge, through February 1993, one or more Emergency Service Dispatcher positions were vacant and available for reassignment. Generally speaking,

reassignment should be made to a position equivalent to the one presently held in terms of pay and job status, if the individual is qualified for the position and the position is vacant or will be vacant. Officer XX appeared at that time to possess the requisite skills and experience to work as a "Dispatcher" and identified this as an appropriate transfer or reassignment. Officer XX salary as a patrol officer, approximately $37,000 per year, exceeded the salary of Emergency Service Dispatcher (a maximum of $2,551 per month, or $30,612 per year). While such a reassignment would not result in entirely equivalent pay and benefits, it would not be the obligation of the City to make up the difference between this position and Officer XX position of patrol officer, if it appears that this is the most closely equivalent vacant position to which Officer XX could have been reassigned. If there were other positions available, the Police Department should have also considered them as options.

CONCLUSIONS

Based on the information provided by the City, the Department of Justice concludes that the City's failure to consider a reassignment or transfer option for police officers with disabilities to other positions with the City constitutes a violation of the ADA and the implementing Title II regulation at 28 CFR S 35.140(b). The current policies and procedures

implemented by the City as regards officers with disabilities who are no longer able to carry out a forcible arrest discriminate against the complainant and others similarly situated, in violation of Title II. In addition, the City's failure to reassign Officer XX as a reasonable accommodation for his disability and its termination of him based on his disability constitute violations of Title II.

In order to resolve this case, it will be necessary to enter into a formal written voluntary compliance agreement that will provide appropriate remedies for the complainant and others similarly situated, and ensure that the City's policies and practices conform to the requirements of the ADA. Accordingly, the Department hereby offers the City an opportunity to negotiate a voluntary compliance agreement, as provided in 28 CFR S 35.173. The Department is open to discussing the violations cited in this letter and remedies that could lead to a satisfactory resolution. In that regard, Thomas Esbrook, the investigator assigned to this case, will contact Mr. J. Wallace Wortham, Assistant City

Attorney, within 15 days to determine whether the City is interested in entering into voluntary compliance negotiations. Please be advised that if you choose not to enter into good faith negotiations within 15 days, or if negotiations are unsuccessful, we will refer this matter to our litigating unit for appropriate action. If you or your staff have any questions or need further information, please contact Mr. Esbrook at (202) 307-2940.

The Honorable Bill Bradley
United States Senator
1 Greentree Centre
Suite 303
Marlton, New Jersey 08053

Dear Senator Bradley:

This is in response to your inquiry on behalf of your constituent, XX She states that she is a person with a disability who has difficulty gaining access to her physician's office because of steps, doors, and curbs that impede access. She also complains that she has difficulty in other places where wheelchairs, especially wheelchairs for large people, are not provided, and in restaurants that do not have chairs with rollers along with booths.

The Americans with Disabilities Act (ADA) imposes certain obligations on places of public accommodation to make their goods and services accessible to persons with disabilities. Existing facilities, such as the doctor's office and restaurants mentioned, must remove barriers to access to the extent it is readily achievable to do so. Readily achievable is defined in the statute to mean easily accomplishable without much difficulty or expense. An examination of the barriers involved and the resources of the public accommodation is necessary to determine whether a particular action is readily achievable. In restaurants that have fixed seating, such as booths, the restaurant must, if readily achievable, make 5% (or not less than one) of such seating accessible to persons who use wheelchairs. There is no requirement for chairs with rollers. Nor is there a requirement in the ADA that public accommodations provide wheelchairs for the use of their customers with disabilities.

The Honorable Christopher Cox
Member, U.S. House of Representatives
4000 MacArthur Blvd.
East Tower, Suite 430
Newport Beach, California 92660

Dear Congressman Cox:

This is in response to your inquiry on behalf of your constituent, XX who seeks information about the Americans with Disabilities Act (ADA).

XX asks whether the Leisure World community she lives in is subject to the ADA. As her letter indicates, strictly residential facilities are not subject to the ADA. However, some facilities include residential units along with places of public accommodation that are covered by the ADA, such as a doctor's office, retail store, or social service center establishments. In those circumstances, the portions of the facility that comprise the public accommodations and common areas, such as parking, entrances, lobbies, and restrooms, that serve the public accommodations are subject to the ADA.

This Department does not make determinations about the specific ADA obligations of particular facilities except in the context of complaint investigations. We therefore cannot say whether or to what extent the Leisure World facility in question is subject to the requirements of the ADA.

XX should also be advised that regardless of the applicability of the ADA, residential facilities are subject to the Fair Housing Act, as amended, which also prohibits discrimination on the basis of disability. Further information about the Fair Housing Act can be obtained from the Department of Housing and Urban Development, 451 Seventh Street S.W., Washington, D.C. 20410, 202-208-1422.

FOIA

01-03367

I hope this information is useful to you in responding to your constituent. If XX has further questions about the ADA, she may contact the Department's ADA information line at 1-800-514-0301 between 10:00 a.m. and 6:00 p.m. EDT.

Sincerely,

Deval L. Patrick
Assistant Attorney General

RECEIVED
JUN 24 1994

Dear Ann -

I rewrote letter as copy was too faint - Perhaps I did not make my request properly -

In reading some Questions & Answers I received from Consumer Information Center, this pamphlet states

Question: Does the ADA cover private apartments and private homes?

Answer - The ADA does not cover XX residential private apartments and homes - If, however, a place of public accomodation, such as a doctor's office or day care center, is located in a private residence, those portions of the residence used for that purpose are subject to the ADA's requirements.

My question is - are we in Leisure World in that category?

Would appreciate your finding the answer.

Thank you,

XX

Department of Justice
Mr James P Turner
Constitution Ave & 10th ST. NW.
Washington, D.C. 20530

Dear Mr. Turner:

I am writing to ask you to look into some of the "Abstracts" in regards to the ADA act of 1992

It seems when this Act was passed, the main purpose was mostly for the public at large, and did not pertain to private communities.

We moved here 13 years ago knowing it to be a Senior Active Community (Private) There are over 17,000 residents living here, 95% are active seniors, and 5% became disabled after moving in.

We pay a monthly maintenance fee, paid in and bought a share in the United Mutual Co-op - therefore I believe it not fair to ask 95% of residents to contribute to the 5% disabled. I am not an uncaring person but do believe in sharing what I entered into L.W for - an active senior community, and being a private community should not

01-03370

be made to adhere to the ADA act.

Please send me information that would clarify whether Leisure World is subject to the ADA act.

Thanking you in advance,

XX

AUG 2ILLEGIBLE 1994

Mr. John Murdoch
U.S. Architectural and Transportation
Barriers Compliance Board
1331 F Street, NW
Suite 1000
Washington, D.C. 20004

Dear Jay:

This letter is to provide the Department of Justice's comments on the proposed text of the accessibility guidelines for children's environments that were discussed by the Children's Environments Work Group in July, so that you may address these concerns in the revisions to the draft rule that you are planning to present at the next meeting of the Board.

In general, we think that the draft presented at the last meeting is good; however, we do have some concerns. Because the draft was presented to the Board without an accompanying rationale, it is unclear whether the proposed guidelines would (1) make provision of accessible child-sized elements mandatory in children's facilities, (2) make provision of accessible child-sized elements mandatory whenever inaccessible child-sized elements are provided, or (3) simply provide advisory guidance regarding what will be considered equivalent facilitation for those instances where a children's facility chooses to provide accessible child-sized elements. It is unclear which approach is preferable. For example, the first approach provides greater access for children with disabilities, yet may conflict with the facility's need to teach children, both with and without disabilities, to function in a world where child-sized facilities will not generally be available. We recommend that this issue be raised in the preamble to the NPRM. The preamble should also make clear that these requirements apply only to elements that are used primarily by children. Elements (e.g., tables) that are used primarily by adults must meet adult accessibility standards, even if they are in areas used primarily by children.

cc: Records, Chrono, Wodatch, Hill, FOIA, Friedlander
n:\udd\hille\kid.ltr

In addition, because it is not possible to fully assess the proposed text without having the background data on which it is based, the preamble should address how the Board resolved such issues as reconciling the needs of children who use differing types and sizes of mobility aids. For example, the proposed text appears to assume that most children with mobility impairments use child-sized mobility aids. Yet there are a variety of types of wheelchairs, some of which place children at heights similar to adults. It is unclear how the proposed text addresses these differences.

The following are more specific comments regarding particular provisions of the proposed text:

- S15.2 should address requirements for reach ranges over obstructions.

- S15.2 provides the same reach range requirements for both front and side reaches, yet addresses them in two separate subsections. The rationale for this should be explained in the preamble.

- S15.3 provides a lesser standard than S4.4.1 regarding protruding objects. S15.3 only addresses protrusions into "circulation paths required to be accessible," while S4.4.1 applies to all "walks, halls, corridors, passageways, or aisles." This should be corrected.

- S15.3 should refer to Figure 8(d) to illustrate the 12-inch overhang permitted for forward approach.

- S15.4 does not change the requirement of S4.8.5 and S4.9.4 for a 1.5 inch clear space between rail and wall. We are concerned that a smaller space may be needed to prevent children's smaller arms from slipping through.

- S15.4.1 needs to be edited to make clear that two sets of handrails are required; one that complies with S4.8 or S4.9, and one that complies with S4.8.5 or S4.9.4 as modified by S15.4.2 and S15.4.3.

- S15.6 requires compliance "to the maximum extent practicable." This appears to create a new compliance standard. How does the Board intend this test to relate to the current ADA standards ("structurally impracticable" and "maximum extent feasible")?

- S15.6.1 needs to include S4.26.2 (grab bar dimension) as one of the requirements being modified.

- S15.6.3 raises a number of issues about the table of toilet seat heights:

(1) How should a builder determine who the "primary users" are?

(2) Should the metric measurements should be rounded to the nearest '0' or '5' mm to be consistent with other dimensions?

(3) Won't the flush valve or toilet tank interfere with placement of the back grab bars at the heights required by the table?

- S15.6.5 should specify that the toilet paper dispenser must be below the grab bar and a specific distance from the back wall.

- S15.7.2 requires a toilet stall to be configured according to Figure 30(a-1) if the door swings inward. Figure 30(a-1) shows the door on the side wall. However, that precise configuration may not necessarily be required. As long as the door does not encroach on the clear floor space, the door can be on the end wall.

- S15.7.3 should be edited to apply to standard stalls of minimum dimensions, rather than to all standard stalls. In larger stalls, toe clearance may not be necessary.

- S15.8.1 should simply refer to all lavatories (without limitation to "lavatory fixtures, vanities, built-in lavatories"). An accessible lavatory cannot have a vanity cabinet beneath it.

- S15.8.3 should provide both a maximum and a minimum depth for clear space under lavatories.

- S15.9.2 provides a maximum 36 inch height for clothes rods, hooks, and shelves. We are concerned that this may be unworkable for older children, whose dresses and long coats will drag on floors from that height. We suggest that the preamble to the NPRM should ask for suggestions about using ranges of mounting heights for children of different ages.

- S15.10.3 requires knee clearance to be 24 inches deep. This exceeds the 19 inches required for adults. What is the reason for the increase?

I hope these comments are helpful in drafting the next version and I look forward to discussing the proposed text at the next meeting of the Children's Environments Work Group.

01-03376

If you have any questions about this letter, please call Janet Blizard at (202) 307-0847, or Eve Hill at (202) 307-0982.

AUG 29 1994

The Honorable Benjamin A. Gilman
U.S. House of Representatives
2185 Rayburn Building
Washington, D.C. 20515-3220

Dear Congressman Gilman:

This is in response to your inquiry on behalf of your constituent, Dr. XX who has a question about the Americans with Disabilities Act (ADA).

Dr. XX has inquired whether the ADA requires insurance companies to make direct deposit of monthly benefit payments for people with vision impairments who have difficulty handling checks because of their disability.

The ADA requires public accommodations to make "reasonable modifications" in their policies, practices, and procedures in order to make their goods and services available to persons with disabilities, unless a modification would "fundamentally alter" the nature of the goods and services offered. Absent an investigation, we are unable to determine in this particular situation whether the insurance fund would be required to modify its practices to enable Dr. XX checks to be deposited directly.

In reference to Dr. XX letter about his 1989 and 1990 Federal Income Tax Returns, we suggest that you contact the Internal Revenue Service. The Department of Justice does not have jurisdiction over these matters.

We hope that this information is useful to you and your constituent.

Sincerely,

Stuart J. Ishimaru
Acting Assistant Attorney General
Civil Rights Division

ATTN: Jason Epstein

Dear Mr. Gilman,

Since I have become disabled from my work I have contacted the three insurance companies with which I have disability income insurance. At this time all three companies are either paying me by benefits or are making final decisions.

Because of my vision impairment I find it very difficult to handle any object without risking misplacing it. This is a very serious problem and while at times it is almost comical to see me scurrying around trying to determine where I put something down, it is emotionally very depressing. That is why I have requested of all three insurance companies to provide me with wire direct deposit of my monthly benefits checks. All have refused, while one is considering providing me with a mail deposit. I made those requests to simplify my life, and the insurance companies will not comply. I assume their refusal is based on their desire to have the money paid to me, "float," for their benefit.

I have no concern regarding the insurance companies finances, I paid insurance premiums for up to 23 years so that I could protect myself. Please ask the Equal Employment Opportunity Commission if they would consider ordering a public company to wire transfer money into the account of an insured who cannot handle checks because of a disability. The Americans with Disabilities Act (ADA) orders businesses that serve the public to make accommodations for the benefit of disabled persons.

I would rather not be disabled, but since the EEOC was unable to assist me, I am now at home attempting to live on my insurance benefits. Your prompt action in forwarding this request to the EEOC for a decision is appreciated. Thank you very much.

XX

Yours truly,
XX

ATTN: Jason Epstein

Dear Mr. Gilman,

Despite my poor vision I have been fortunate to find parts of our 1989 Form 1040 and some of the correspondence with the IRS that relates to our payment of approximately $9,200 last spring, payment that was coerced from us despite our having paid that money in a timely manner in 1989 and 1990.

The reason for the IRS demanding the principal, interest and penalties is that one of their employees incorrectly keyed our tax form into their computer. I entered on our 1989 Form 1040 that I had paid $7,000 with a request for an extension that was filed on time in 1990. I have even provided you with copies of both sides of that check. What happened is the IRS employee entered the $7,000 on line 60, rather than line 59 where we correctly entered it. That is why the IRS could not find the money that we claimed as having paid. Revenue Agent Anthony J. Stabile, had in front of him the Form 1040 as well as the computerized print out. He was either too stupid to compare the Form 1040 with the computer print out, or he did and didn't care to act properly by correcting the computer print out. What is most interesting is that all his supervisors and superiors had the same opportunity to see the glaring error, but they also let it pass through undetected.

It should have been evident to all the personnel involved in our audit and to the personnel who prepared Mr. Alexander's June 22, 1993 letter to you, which you forwarded to us, that entering $7,000 as a claim for overpayment of FICA taxes is very unusual, and perhaps there was an error. No one, including the District Director, had the least discomfort with accusing us of entering $7,000 as a claim for overpayment of FICA taxes. No one made the effort to determine if there was an error. Only the IRS had the

original Form 1040, we had already notified Mr. Stabile that we could no longer locate our copy.

In the letter dated June 22, 1993 Mr. Alexander repeated the idiotic statement that we had entered $7,000 on line 60. Anyone with half a brain should have recognized the stupidity of that statement. If the IRS wishes to confirm my statements your
01-03383
office can provide Mr. Alexander with a copy of his letter and they can review the copy of our Form 1040 in the possession of Mr. Hank Rummell the accountant who prepared our return that year. Mr. Rummell has not cooperated with us in any manner during this matter and he demanded and received his fee before he would meet with the Revenue Agent. Mr. Rummell was party to an error in a prior year tax return and that was why he no longer did our returns in January 1993.

I am overwhelmed that even with your assistance in this matter the District Director was incapable of recognizing the nonsense that was published over his signature. I would like you to contact the IRS in its national headquarters and ask them to investigate the whole matter of our 1989 Form 1040 and the manner in which we were coerced into paying money that we had already paid. Each employee is responsible for the quality of his/her work output and I have now identified a whole chain of employees, including the District Director who were careless, perhaps even intentionally in error, and who allowed this injustice to be perpetrated on us.

We deserve an apology as well as a refund of our money and interest on it. I am very concerned that we will become targets of the IRS with perpetual audits and other forms of harassment. We overpaid our 1989 taxes, and there were no adjustments in our 1990 and 1991 taxes after the audit by Agent Stabile. I seek your assistance in providing us a barrier from future harassing actions.

I remain available to assist the IRS in disciplining any employee who was involved in our 1989 Form 1040 key entry and the audit and was party to the repeated errors made at many levels. This is not a matter which I am willing to forget. We were subjected to coercion, harassment, stupidity, ridicule, and the denial of access to a considerable amount of money for more than one year. Ms. Sabb of the Manhattan Problem Resolution Office of the IRS told me that in 30 years of working for the IRS she had never heard of a complete file being lost, everything is gone into some, "Black Hole," at the IRS. I remain suspicious that some IRS employee intentionally trashed our file realizing that

an error of monumental stupidity had been made, and the loss of the file would prevent us from recognizing what had happened. I wish the IRS Inspector General be provided with all our letters to you. With whatever the Manhattan and White Plains IRS offices can provide he should investigate whether the loss of our file may have been intended to prevent anyone from learning of the chain of errors that resulted in our being forced to pay money that had already been collected. The Inspector General should review whether the IRS should have acted more aggressively to subpoena files, checks, banking records, etc., in order to have brought this matter to an earlier conclusion. I would like to discuss these matters with the Inspector General in a face to face meeting to be able to provide him/her with my experiences and feelings about this case. I suspect a criminal conspiracy to cover up the chain of significant errors surrounding our 1989

01-03384

Form 1040 handling.

What adds to my belief that our experience in 1993 was a criminal conspiracy is the actions NOT taken by the IRS. If I had claimed the $7,000 as an overpayment of FICA taxes in 1989 then the IRS should have referred this case for a criminal investigation. If I had made such a ridiculous claim, that would have been perjury and should have been construed as a criminal attempt to defraud the IRS of taxes owed. The lack of a criminal referral further adds to my suspicions that there was more than one IRS employee who conspired to defraud us of our money. Certainly many employees were careless, including the District Director, and did not perform their duties properly. Perhaps the District Director will contact the office that would have been requested to initiated a criminal investigation to learn if our 1989 Form 1040 file was forwarded to them. I am unable to express in words the anger I feel.

Now I better understand why my former employers had no concern regarding my charges to the EEOC. They had prior experience dealing with the EEOC and they could reliably predict that the EEOC would never be able to act to protect me because it is staffed with personnel who had previously been employed at the IRS. The Americans with Disabilities Act (ADA) contains Section 503 and 504 that require the withholding of all federal funds if an employer is found guilty of discrimination in defiance of the ADA. Please remember that my EEOC file was in a black hole at the EEOC for more than two months and would have remained there forever if I hadn't called to seek action. Perhaps I misunderstand, maybe EEOC employees are subsequently transferred to the IRS after they prove that they can successfully misplace whole files. The two agencies used to be housed together at 90 Church Street and I can now see that an employee at one agency could feel perfectly comfortable if they got off the elevator at the other agency's floor. Considering the quality of work and the non-existent review of the quality of employee work output demonstrated by both agencies in my recent interactions, I am not even sure that the employee would realize that they hadn't arrived at their proper work location.

I am enclosing another copy of both sides of the check that I used to pay the IRS $7,000 when we applied for an extension to file our 1989 Form 1040.

Please forward to me a copy of your letter to the EEOC Inspector General so that I will have a better understanding of how they cover over their mistakes. Perhaps the only instance when something comes out of a, "Black Hole," at one Federal Agency is when the Inspector General seeks answers to questions, and perhaps not even then.

XX

2185 Rayburn Building
Washington, D.C. 20515-3220

Dear Congressman Gilman:

This is in response to your inquiry on behalf of your constituent, Dr. XX who has a question about the Americans with Disabilities Act (ADA).

Dr. XX has inquired whether the ADA requires insurance companies to make direct deposit of monthly benefit payments for people with vision impairments who have difficulty handling checks because of their disability.

The ADA requires public accommodations to make "reasonable modifications" in their policies, practices, and procedures in order to make their goods and services available to persons with disabilities, unless a modification would "fundamentally alter" the nature of the goods and services offered. Absent an investigation, we are unable to determine in this particular situation whether the insurance fund would be required to modify its practices to enable Dr. XX checks to be deposited directly.

In reference to Dr. XX letter about his 1989 and 1990 Federal Income Tax Returns, we suggest that you contact the Internal Revenue Service. The Department of Justice does not have jurisdiction over these matters.

We hope that this information is useful to you and your constituent.

Sincerely,

Stuart J. Ishimaru
Acting Assistant Attorney General
Civil Rights Division

ATTN: Jason Epstein
Dear Mr. Gilman,

Since I have become disabled from my work I have contacted the three insurance companies with which I have disability income insurance. At this time all three companies are either paying me by benefits or are making final decisions.

Because of my vision impairment I find it very difficult to handle any object without risking misplacing it. This is a very serious problem and while at times it is almost comical to see me scurrying around trying to determine where I put something down, it is emotionally very depressing. That is why I have requested of all three insurance companies to provide me with wire direct deposit of my monthly benefits checks. All have refused, while one is considering providing me with a mail deposit. I made those requests to simplify my life, and the insurance companies will not comply. I assume their refusal is based on their desire to have the money paid to me, "float," for their benefit.

I have no concern regarding the insurance companies finances, I paid insurance premiums for up to 23 years so that I could protect myself. Please ask the Equal Employment Opportunity Commission if they would consider ordering a public company to wire transfer money into the account of an insured who cannot handle checks because of a disability. The Americans with Disabilities Act (ADA) orders businesses that serve the public to make accommodations for the benefit of disabled persons.

I would rather not be disabled, but since the EEOC was unable to assist me, I am now at home attempting to live on my insurance benefits. Your prompt action in forwarding this request to the EEOC for a decision is appreciated. Thank you very much.

ATTN: Jason Epstein
Dear Mr. Gilman,

Despite my poor vision I have been fortunate to find parts of our 1989 Form 1040 and some of the correspondence with the IRS that relates to our payment of approximately $9,200 last spring, payment that was coerced from us despite our having paid that money in a timely manner in 1989 and 1990.

The reason for the IRS demanding the principal, interest and penalties is that one of their employees incorrectly keyed our tax form into their computer. I entered on our 1989 Form 1040 that I had paid $7,000 with a request for an extension that was filed on time in 1990. I have even provided you with copies of both sides of that check. What happened is the IRS employee entered the $7,000 on line 60, rather than line 59 where we correctly entered it. That is why the IRS could not find the money that we claimed as having paid. Revenue Agent Anthony J. Stabile, had in front of him the Form 1040 as well as the computerized print out. He was either too stupid to compare the Form 1040 with the computer print out, or he did and didn't care to act properly by correcting the computer print out. What is most interesting is that all his supervisors and superiors had the same opportunity to see the glaring error, but they also let it pass through undetected.

It should have been evident to all the personnel involved in our audit and to the personnel who prepared Mr. Alexander's June 22, 1993 letter to you, which you forwarded to us, that entering $7,000 as a claim for overpayment of FICA taxes is very unusual, and perhaps there was an error. No one, including the District Director, had the least discomfort with accusing us of entering $7,000 as a claim for overpayment of FICA taxes. No one made the effort to determine if there was an error. Only the IRS had the

original Form 1040, we had already notified Mr. Stabile that we could no longer locate our copy.

In the letter dated June 22, 1993 Mr. Alexander repeated the idiotic statement that we had entered $7,000 on line 60. Anyone with half a brain should have recognized the stupidity of that statement. If the IRS wishes to confirm my statements your
01-03383
office can provide Mr. Alexander with a copy of his letter and they can review the copy of our Form 1040 in the possession of Mr. Hank Rummell the accountant who prepared our return that year. Mr. Rummell has not cooperated with us in any manner during this matter and he demanded and received his fee before he would meet with the Revenue Agent. Mr. Rummell was party to an error in a prior year tax return and that was why he no longer did our returns in January 1993.

I am overwhelmed that even with your assistance in this matter the District Director was incapable of recognizing the nonsense that was published over his signature. I would like you to contact the IRS in its national headquarters and ask them to investigate the whole matter of our 1989 Form 1040 and the manner in which we were coerced into paying money that we had already paid. Each employee is responsible for the quality of his/her work output and I have now identified a whole chain of employees, including the District Director who were careless, perhaps even intentionally in error, and who allowed this injustice to be perpetrated on us.

We deserve an apology as well as a refund of our money and interest on it. I am very concerned that we will become targets of the IRS with perpetual audits and other forms of harassment. We overpaid our 1989 taxes, and there were no adjustments in our 1990 and 1991 taxes after the audit by Agent Stabile. I seek your assistance in providing us a barrier from future harassing actions.

I remain available to assist the IRS in disciplining any employee who was involved in our 1989 Form 1040 key entry and the audit and was party to the repeated errors made at many levels. This is not a matter which I am willing to forget. We were subjected to coercion, harassment, stupidity, ridicule, and the denial of access to a considerable amount of money for more than one year. Ms. Sabb of the Manhattan Problem Resolution Office of the IRS told me that in 30 years of working for the IRS she had never heard of a complete file being lost, everything is gone into some, "Black Hole," at the IRS. I remain suspicious that some IRS employee intentionally trashed our file realizing that

an error of monumental stupidity had been made, and the loss of the file would prevent us from recognizing what had happened. I wish the IRS Inspector General be provided with all our letters to you. With whatever the Manhattan and White Plains IRS offices can provide he should investigate whether the loss of our file may have been intended to prevent anyone from learning of the chain of errors that resulted in our being forced to pay money that had already been collected. The Inspector General should review whether the IRS should have acted more aggressively to subpoena files, checks, banking records, etc., in order to have brought this matter to an earlier conclusion. I would like to discuss these matters with the Inspector General in a face to face meeting to be able to provide him/her with my experiences and feelings about this case. I suspect a criminal conspiracy to cover up the chain of significant errors surrounding our 1989

Form 1040 handling.

What adds to my belief that our experience in 1993 was a criminal conspiracy is the actions NOT taken by the IRS. If I had claimed the $7,000 as an overpayment of FICA taxes in 1989 then the IRS should have referred this case for a criminal investigation. If I had made such a ridiculous claim, that would have been perjury and should have been construed as a criminal attempt to defraud the IRS of taxes owed. The lack of a criminal referral further adds to my suspicions that there was more than one IRS employee who conspired to defraud us of our money. Certainly many employees were careless, including the District Director, and did not perform their duties properly. Perhaps the District Director will contact the office that would have been requested to initiated a criminal investigation to learn if our 1989 Form 1040 file was forwarded to them. I am unable to express in words the anger I feel.

Now I better understand why my former employers had no concern regarding my charges to the EEOC. The Honorable Michael R. McNulty
U.S. House of Representatives
217 Cannon Building
Washington, D.C. 20515-3221

Dear Congressman McNulty:

This letter is in response to your inquiry on behalf of your constituent, Kristin L. Woodward, workshop coordinator for the Colonie Art League, Inc. Ms. Woodward requested guidelines for the provision of interpreter services by her organization for workshops and courses. She further sought to clarify if this responsibility would extend to the group's regular monthly meetings.

Ms. Woodward's query relates most directly to the auxiliary aids and services provisions of title III. Such aids and services must be provided by public accommodations to ensure "effective communication" for individuals who are deaf or hard of hearing or who have impaired vision or speech. Under title III of the ADA, "public accommodations" are private entities who own, operate, lease, or lease to, a place of public accommodation. In the present instance, it would appear that both the Colonie Art League, Inc., and the contracted artist would have obligations as covered entities under title III for the proposed workshop.

The auxiliary aids requirement is intended to be flexible, reflecting the variable nature of what constitutes effective communication. In addition to the specific nature of the disability involved, factors used to determine communication effectiveness in any given circumstance include the length, complexity, and significance of the information being exchanged.

Under section 36.301(c) of the title III regulation, when an interpreter or other auxiliary aid or service is necessary to ensure effective communication, the covered entity must absorb the cost of this aid or service, unless it would result in an undue burden. The term "undue burden" means "significant difficulty or expense." In determining whether the provision of an interpreter or other aid or service would result in an undue burden, covered entities should consider their overall financial

resources.

FOIA

01-03386

Ms. Woodward states that the provision of interpreter services for the workshop would place her organization in the position of operating at a financial loss. One should consider, however, the extent to which the interpreter costs could be shared contractually with the artist, who also has an independent obligation to provide auxiliary aids. Failure of the artist though, to fulfill his or her ADA or contractual obligations does not in any way relieve Colonie Art League, Inc., of its ADA responsibilities.

In addition to cost-sharing, another option might be to consider raising the workshop fees slightly for all registrants to cover the cost of auxiliary aids and other measures to remove barriers to participation by people with disabilities. This same principle could be applied to monthly meetings.

Another avenue to explore would be the availability of outside funding sources for interpreter services. Some states have monies available through health care or education funds that may be applied to interpreter services, if the activities are either therapeutic or educational in nature.

The auxiliary aids provisions of title III of the ADA do not compel covered entities to comply with a unilateral determination of an individual with a disability that a particular interpreter, or any auxiliary aid, is essential to effective communication. Ideally, the covered entities and the individual would arrive at a mutually acceptable choice through a process of consultation. This specific point is illustrated in section III-4.3200 on page 28 of the Department of Justice's Title III Technical Assistance Manual. Additional relevant information may be found in the preamble discussion of section 36.303 on pages 35567-35568 of the title III regulation. These documents are enclosed.

I trust that this information will be helpful in your response to your constituent.

Sincerely,

Stuart J. Ishimaru

Mr. David Torian
Congressman McNulty's Office
217 Cannon House Office Building
Washington, D. C. 20515

Dear David:

Thank you for returning my call so quickly this evening. As promised, I am detailing the general information for you regarding the American's for Disability Act as it relates to our not-for-profit group. I appreciate your clarifying this issue thru the Department of Justice.

We are a 200 +- art group, meeting monthly for the purpose of artists associating with other artists, presenting demonstrations, exhibitions, etc. Anyone interested in art may join for $25. yearly to participate in regular meetings and activities.

We have a member who is hearing and speech impaired. He referred the Capital District Center for Independence to us and they informed us that we should supply an interpreter for Bill at all meetings so that he may "hear" the demonstrator and business meeting. If we did that at each meeting, we would be operating at a loss (using this year as a prime example).

We are contracting an international artist to come and run a 5-day workshop for anyone interested in intensive study. We do not profit from his being here, we just offer this workshop to save our members the extensive costs of travel and lodging elsewhere to study with him. Anyone participating pays his own way in full. The workshop includes lectures and demonstrations and individual instruction to the participants for the five day period. This is a service we provide to our members whenever we can do this...once or twice a year. It is an individual decision as to whether or not a member would like to participate.

The CDCI suggested an interpreter for the first two hours of the demo/lecture/and private instruction, for each day, totaling $300 in fees.

CDCI told me that the contracted artist should pay since he
TO FURTHER ART APPRECIATION
01-03388
Page 2

since it is the individual who wants to take this one week course, and suggests that the CDCI naturally would want to get all the financial help for it's members that it can if it can coerce us into it.

We need to know...Are we responsible for an interpreter for the special workshops that we run that an individual contract for his personal benefit?

What are the guidlines for meetings on a monthly basis?

We want to do all we can, but not go in the hole doing it. We thank you in advance for your advice on this matter and appreciate a timely response as our decision will be needed soon.

Kindest regards,

COLONIE ART LEAGUE, INC.

XX

RE: Complaint Number XXXXXX

Dear Mr. Modica:

This letter constitutes our Letter of Findings in response to the complaint filed by XX against the Town of Henrietta, New York, under Title II of the Americans with Disabilities Act of 1990 (ADA). Title II protects qualified individuals with disabilities from discrimination on the basis of disability in the services, programs and activities of a State or local government. XX is alleged that the programs, services, and activities provided in the Henrietta Town Hall are not readily accessible to and usable by individuals with disabilities. XX also alleged that the Town retaliated against him because he complained about the lack of accessible facilities. Specifically, XX alleged that his job description was changed and he was moved to another work site, which was allegedly inaccessible. In conducting this investigation we reviewed information supplied by XX , as well as information provided by the Town of Henrietta.

Section 35.140 of the regulation implementing Title II states that no qualified individual with a disability shall, on the basis of disability, be subjected to discrimination in employment under any service, program, or activity conducted by a public entity. This section requires an employer to provide a reasonable accommodation for any qualified employee with a disability.

Section 35.149 of the Title II regulation requires a public entity to ensure that no qualified individual with a disability shall, because the facilities are inaccessible to or unusable by such individuals, be excluded from receiving the benefits of the services, programs or activities.

01-03390

Section 35.150(a) of the Title II regulation requires that a public entity operate each of its programs so that, when viewed in its entirety, the program is readily accessible to and usable by individuals with disabilities. Section 35.150(b) lists a number of methods that a public entity may use to make its programs accessible. These methods include reassignment of services to accessible buildings, assignment of aides to beneficiaries, home visits, and alteration of existing facilities. Structural changes in existing facilities are required only when there is no other feasible way to make the program accessible. Section 35.150(a) states that actions are not required if they would result in undue financial and administrative burdens or in a fundamental alteration in the nature of the program or activity.

Section 35.134 of the Department of Justice's implementing regulation prohibits retaliation against any individual because that individual has opposed any practices alleged to be unlawful by Title II or for participating in a complaint investigation.

This Department has completed its investigation of the complainant's allegations. The issues raised have been successfully resolved based on the actions taken by the Town of Henrietta to comply voluntarily with the requirements of Title II. The results of the investigation are summarized below.

Issue I: Alleged Retaliation

XX worked as an employment counselor for the Town of Henrietta. In November 1992, he was reassigned from his worksite at the Town Hall to a new location in a local high school. XX viewed this reassignment of his worksite as a form of retaliation. He alleged that his activism in seeking to bring the Town of Henrietta into full compliance with the ADA and his advocacy of issues important to persons with disabilities led to the reassignment. XX alleged that he encountered serious problems entering the local high school building and that, once inside, he did not have access to his office or to restrooms. He added that it was difficult to move about the facility because of the building's layout and that the doorknobs prevented access to the offices he used.

The Town denied that XX reassignment was in retaliation for asserting rights protected by the ADA. The Town stated that it made the transfer to a new worksite as a means of providing counseling services at a location closer to the clients

XX served. Since XX clients were primarily high school students, Town officials believed that he would be

more effective working in the local high school, as opposed to the Town Hall.

The Town also moved immediately to resolve the accessibility problems XX is encountered at his new worksite. Based upon documentation submitted by the complainant and the Town, and as clarified in interviews with XX, these problems were resolved. XX expressed satisfaction with the Town's response and the adjustments to make his worksite readily accessible.

Before this aspect of the investigation was finished, XX passed away on May 25, 1993. However, in response to his allegations, the Department examined fully the other issues raised in his complaint. These issues follow:

Issue II: Access to the Henrietta Town Hall

The complainant alleged that several areas of the Town Hall were not readily accessible to persons with disabilities. The balance of this letter describes the alleged problems, the actions taken by the Town to address them, and the resolution of each.

A. Entrance to Town Hall

The complainant alleged that the doors to the Town Hall were too heavy to open unassisted. Because of weather conditions, lighter doors were not an option. The Town recognized this and made plans to install power-assisted doors. Power-assisted doors were installed at all entrances to the Town Hall in October 1993, providing accessibility to the building for individuals with mobility impairments and others who have difficulty opening doors.

The Town also redesigned and altered the sidewalk area and ramps leading to the building at the rear entrance, making it easier for individuals with disabilities to enter.

B. Programs, Services and Activities

Although the investigation determined that the programs, services and activities conducted inside the Town Hall are

accessible to persons with disabilities, the complainant described problems with the counters at which business is carried out, stating that some counters are too high for persons in wheelchairs. As a consequence, the Town built what it describes as "knee holes" that allow individuals in wheelchairs to see over the counter and to access the services provided in the Town Hall.

C. Water Fountain

The complainant alleged that there was an inaccessible water fountain outside the Town Supervisor's office. The Town installed a cup dispenser to provide access. The complainant asserted that because the dispenser next to the water fountain was frequently out of cups, it was often inaccessible to individuals with disabilities. The Town acknowledged that cups are frequently taken by employees or others who are not disabled, and said it would monitor the cup supply. As a permanent solution, the Town installed a new, accessible water fountain.

D. Restrooms

The complainant alleged that the Town Hall's bathrooms were inaccessible. The investigation disclosed that there are two bathrooms for employees on the main floor. Persons with disabilities may use these. The Town has made some adjustments to make them accessible and plans to post signage to clearly indicate that they are available to persons with disabilities, as well as employees. A consultant who evaluated the Town Hall's facilities made several recommendations for improving the restroom services, which have been accepted. The consultant's report and recommendations are discussed below.

E. Town Supervisor's Office

The complainant alleged that the entrance to this office is too narrow for someone in a wheelchair to enter. The Town does, however, provide access to the programs in the office. The door is always open and the staff person sitting in the outer office is available to respond to the needs of persons who use wheelchairs, as well as arrange for direct contacts with the Town Supervisor, which are held in an accessible room.

F. Access to Town Park Baseball Fields

The complainant alleged that because of the installation of a one foot-high curb surrounding the baseball fields, without

curb cuts, he was unable to attend local games played in this location. Before the curb was installed, XX was able to roll up the grassy slope to the baseball diamonds. With the new curbs, it became difficult, if not impossible, for him to continue attending these activities. The Town acknowledged that some of the fields were inaccessible to individuals using wheelchairs or those with other mobility impairments. The Town has made plans, and budgeted funds, for providing direct access to the ballfields. It will construct several five foot-wide paths going from the parking lot, which has accessible parking,

to the ballfields. Once there, an individual in a wheelchair will approach a pad wide enough for viewing all activities conducted on the ballfields. The Town planned to have this project completed in November 1993. Because of the weather, lack of staff and other priorities, the Director of Parks and Facilities has now committed to completing this alteration by the Fall of 1994.

G. Other Activities

The Town of Henrietta commissioned a study of the Town Hall's accessibility by the Rochester Center for Independent Living. The study examined all public and common use areas of the building for adherence to the Americans with Disabilities Act Accessibility Guidelines for Buildings and Facilities (ADAAG). Although strict adherence to ADAAG is not necessarily required in existing facilities where the standard is one of "program accessibility" (i.e., ensuring that programs rather than individual facilities are accessible), the Town has nevertheless made plans to implement the recommendations of this study.

In response to suggestions by the Department, the Town of Henrietta has taken steps to notify members of the public and its employees regarding their rights and the protections afforded by the ADA. The notice describes the accommodations available for individuals with disabilities who wish to use the services offered or participate in activities conducted in the Town Hall. The notification includes steps to effectively communicate with individuals with hearing and visual impairments and describes the availability of services, e.g., interpreters, for qualified individuals seeking services. The notice identifies the person(s) responsible for ADA matters, and the availability of grievance procedures for prompt and equitable resolution of complaints alleging any actions prohibited by the ADA. The Town will also ensure that appropriate signage is installed in and

around the Town Hall directing individuals with disabilities into the facility. The Town has taken steps to consult with persons with disabilities whenever program changes or construction are planned, to identify any accessibility problems.

Conclusion

This letter contains our determination with respect to the allegations raised in the administrative complaint filed by XX . We find that the Town of Henrietta is in compliance with the ADA because it has taken appropriate steps to provide access to its programs, services and activities and will communicate these efforts to the community. These actions, when completed, successfully resolve the issues raised in the complaint to the Department of Justice. The Town will submit a written report to the Department no later than October 15, 01-03394

1994, describing the progress of the actions planned above to provide accessibility to individuals with disabilities.

If you are dissatisfied with our determination, you may file a complaint presenting your allegations of discrimination in an appropriate United States District Court under Title II of the ADA.

You should be aware that no one may intimidate, threaten, or coerce anyone or engage in other discriminatory conduct against anyone because he or she either has taken action or participated in an action to secure rights protected by the ADA. Any individual alleging such harassment or intimidation may file a complaint with the Department of Justice. We would investigate such a complaint if the situation warrants.

Under the Freedom of Information Act, 5 U.S.C. 552, we may be required to release this letter and other correspondence and records related to the complaint in response to a request from a third party. Should we receive such a request, we will safe-guard, to the extent permitted by law, release of information that could constitute an unwarranted invasion of your or another's privacy.

If you have any questions regarding this letter, please contact Thomas Esbrook at (202) 307-2940.

Sincerely,

Merrily A. Friedlander

RE: Complaint Number XX

Dear Mr. Breese:

Enclosed is the Letter of Findings (LOF) resolving a complaint filed with the Department of Justice by XX XX under Title II of the Americans with Disabilities Act. We appreciate your willingness to resolve this matter in a voluntary manner. As discussed with Mr. William Walker, Town Attorney, and Mr. William Dykstra, Director of Parks and Facilities, the Department requires a written report that describes your progress in completing all projected improvements to provide access to the Town's programs, services, and activities for individuals with disabilities. Please submit a report to the Department no later than October 15, 1994, that includes information on the following planned activities that are referenced in the LOF:

- Installation of a new, accessible water fountain in the Town Hall.

- Construction of accessible paths to the Town ballfields.

- Signage for the accessible restrooms.

- A description of all actions taken in response to the recommendations of the study conducted for the Town by the Rochester Center for Independent Living.

01-03396

The Department will monitor your adherence to the proposed changes until they are completed. If you have any questions or need further information, please contact Mr. Thomas Esbrook of my staff at (202) 307-2940.

Sincerely,

Merrily A. Friedlander

01-03397

AUG 29 1994

The Honorable Dick Zimmer
Member, U.S. House of Representatives
133 Franklin Corner Road
Lawrenceville, New Jersey 08648

Dear Congressman Zimmer:

This is in response to your inquiry on behalf of your constituent, XX The Civil Rights Division has no record of having received your previous inquiry.

XX complains that shopping malls in his community during winter storms have plowed snow into parking spaces designated for persons with disabilities. XX wants to have malls ticketed for failure to comply with the requirements of the Americans with Disabilities Act (ADA) to maintain accessible parking.

Retail shopping facilities are subject to title III of the ADA. The Department's regulation implementing title III does provide that retail shopping facilities maintain their accessible features in operable working condition. This requirement includes keeping accessible spaces free of snow during the winter. However, the ADA does not provide for automatic ticketing or fines as XX seems to believe. Congress created two enforcement tracks under title III. First, private individuals may file suit in Federal court to obtain relief. Second, the Department of Justice may file suit in circumstances where the Attorney General believes there is a pattern or practice of discrimination or discrimination raising an issue of general public importance. A report summarizing the Department's ADA enforcement efforts is enclosed.

The Department does not have the resources to pursue every meritorious complaint it receives and we have determined not to investigate XX complaint. We have enclosed a list of organizations in New Jersey that may be able to assist XX

in pursuing his complaint.

01-03398

I hope this will assist you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

February 22, 1994

Congressman Pallone
67 Church Street
New Brunswick, NJ 08901

Dear Congressman Pallone:

A severe injustice against disabled people is being committed and I would like someone to step in and speak up on our behalf. On Valentine's Day, (2/14/94), I went shopping at the East Brunswick mall and found the problem of snow removal in handicapped spaces intolerable. This is not the first time. Every storm we have had, the scenario remained the same. Parking spaces reserved for needy people are empty because most of us can't go out when weather is inclement. Snow plowers take advantage of this opportunity to plow excessive snow into these spots. (where it stays until final snow removal chores are finished or until it melts). This is not an isolated incident; 13 storms in the past three months and everytime the same thing.

I went to three malls on Valentine's Day and finally went to the managers office to file a complaint. I parked sideways (I drive a pick up truck, am paralyzed, and need extra room when exiting my truck) in a reserved zone so no one could "block me in", went into the office and filed a complaint. When I came out I found a "violation" on my windshield. I was mad! Being paralyzed I could not reach the ticket on the windshield.

I would like to see malls ticketed for not complying with minimum ADA standards. They must have a correct ratio of parking spaces at all times!

Thank you.

Very truly yours,

XX
XX

01-03400

(FORM) TRAFFIC VIOLATION

01-03401

AUG 30 1994

J. Keith Ausbrook
Counsel to the Municipal Castings
Fair Trade Council
Collier, Shannon, Rill & Scott
3050 K. Street, N.W., Suite 400
Washington, D.C. 20007

Dear Mr. Ausbrook:

I am writing in response to your letter and as a follow up to our meeting in which you requested guidance on how the Standards for Accessible Design (Standards) issued under the Americans with Disabilities Act apply to various types of gratings used on streets and sidewalks. I apologize for our delay in responding.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that have rights or responsibilities under the Act. Pursuant to that authority, this letter provides informal guidance to assist you in understanding the ADA. However, this technical assistance does not constitute a legal interpretation of the statute, and it is not binding on the Department.

The Standards for Accessible Design contain specific requirements that apply to gratings that are located in walking surfaces that are part of an accessible route. These provisions also apply to walking surfaces that are located in the accessible route at cross walks or curb ramps. Section 4.5.4 of the Standards requires that these gratings shall have spaces no greater than 1/2 inch wide as measured in the direction that is parallel to the dominant direction of travel. Grates may have elongated openings as long as the longer dimension is perpendicular to the dominant direction of travel. There is no restriction on the length of elongated openings perpendicular to the dominant direction of travel.

Gratings that do not meet the requirements of the Standards may be used in any areas that are not part of an accessible route or in any area adjacent to an accessible route as long as the accessible route is at least 36" wide and provides an accessible

path around the grate and meets all the requirements of an accessible route including slope and cross slope.

01-03402

Gratings that do not meet the requirements of the Standards may not be used within the accessible route. This requirement addresses the needs of wheelchair users as well as the needs of persons who walk with crutches, canes, and other mobility devices.

The Department's Standards for Accessible Design are based on the ADA Accessibility Guidelines (ADAAG) as adopted by the U.S. Architectural and Transportation Barriers Compliance Board (Access Board), 1331 F Street, N.W., Suite 1000, Washington, D.C. 20004-1111.

Proposals for changes to the ADAAG should be forwarded to Mr. David Capozzi, Director of the Office of Technical and Information Services at the Access Board.

The Access Board recently issued an interim final rule containing new guidelines for public rights-of-way. The Department of Justice issued a notice of proposed rulemaking (NPRM) on June 20, 1994, seeking comments on the Board's guidelines prior to adopting them as new Standards for State and local governments under title II. These changes may result in changes to the requirements that apply to gratings. We have enclosed a copy of the NPRM and the Access Board's interim final rule; additional copies are available to the public from the Department through calling our toll free number, 1-800-514-0301.

We hope this information is helpful to you and the Municipal Castings Fair Trade Council. I look forward to working with you in the future.

Sincerely,

John L. Wodatch
Chief
Public Access Section

01-03403

(Handwritten) 8/30/94

The Honorable Rick Boucher
Member, U.S. House of Representatives
188 East Main Street
Abingdon, Virginia 24210

Dear Congressman Boucher:

This letter is in response to your inquiry on behalf of your constituent, XX who seeks information about the Americans with Disabilities Act (ADA).

XX states that he is a quadriplegic and is unable to sign his own name, but his father has full power of attorney to sign XX name for him. XX asks whether a securities firm that has a policy of refusing to accept clients who cannot sign their own names is in violation of the ADA.

Title III of the ADA prohibits discrimination on the basis of disability in commercial facilities and places of public accommodation, including financial institutions. Title III requires, among other things, that owners and operators of places of public accommodation make reasonable modifications to their policies, practices, and procedures, if those modifications are necessary to provide services to persons with disabilities. The only limits on this obligation are that the required modification must be reasonable and may not fundamentally alter the nature of the services provided at the place of public accommodation.

A securities firm policy of accepting only clients who can sign their own names would be subject to the reasonable modification requirement. Absent an investigation, the Department cannot render an opinion on XX specific situation. The securities firm, however, would be required to modify its policy to allow a person with a valid power of attorney to sign a document on behalf of an individual who is unable to sign his or her own name because of a disability, if such a modification is reasonable and would not fundamentally alter the nature of the firm's services.

cc: Records, Chrono, Wodatch, McDowney, Bowen, Novich, FOIA, MAF
Udd:Novich:Congress:Boucher

Title III can be enforced by private litigation, alternate dispute resolution such as mediation, or by filing a complaint with the Department of Justice. The Department is not able to investigate all the complaints of title III violations that it receives, and we have determined not to investigate this complaint. However, there are other entities that may be able to assist XX in resolving his complaint. We have enclosed a list of such entities located in Virginia.

In addition, we are enclosing copies of two status reports that detail the actions that the Civil Rights Division has undertaken to enforce titles II and III of the ADA. These reports illustrate that, although the Department of Justice is unable to investigate every complaint that it receives, we are taking strong action to enforce the law. I hope this information is useful to you in responding to your constituent.

If XX wishes to have further information about the requirements of the ADA, he may contact our ADA information line at (800) 514-0301/T.D.D. (800) 514-0383, weekdays from 10:00 a.m. to 6:00 p.m. EST.

I hope this information is useful to your constituent.

Sincerely,

Stuart J. Ishimaru
Acting Assistant Attorney General
Civil Rights Division

Public Access Section
P.O. Box 66738
Washington, D.C. 20035

Dear Sir or Madam:

Enclosed please find correspondence I received from Mr. XX of Marion, Virginia, concernign his inability to open an account with Waterhouse Securities, Inc. of New York.

XX contacted my office on June 10, 1994, and advised that he was a paraplegic, therefore, his father has his full power-of-attorney. He had been attempting to open an account with the above-mentioned company, but was told that they would not accept a full power-of-attorney and that is was necessary for him to sign his name in order to open an account.

I am concerned that XX is not being afforded the

rights of other individuals based upon his inability to use his arms. I am further concerned that a company such as Waterhouse Securities, Inc. does not have in place contingency plans to allow disabled individuals to do business with their company.

I would greatly appreciate your immediate and thorough review of this matter, and advising me of the Department's findings. Please direct your reply to my Abingdon district office.

Thanking you for your time and attention to this request, I am

Sincerely,

Rick Boucher

Marion, VA XX
June 16, 1994

U.S. Department of Justice
Civil Rights Division
Public Access Section
P.O. Box 66738
Washington, D.C. 20035

To Whom It May Concern:

I am writing this letter at the request of Ms. Johanssen, Congressional Liaison with the Department of Justice. Congressman Rick Boucher's office had spoken to her after I contacted him concerning the following matter.

My name is XX . I was paralyzed in an auto accident in 1972. I have absolutely no use of my arms or legs, but my mind is very alert. Since the accident my father has had my full power of attorney. We have a legal document drawn up by a lawyer, notarized by a notary public, and signed by witnesses. I take care of my own business decisions and my father signs all related material, XX for XX XX Power of Attorney.

I wanted to open an account with the discount brokerage firm, Waterhouse Securities, based in New York, NY. They sent me an application, but since I cannot sign it myself, I called their customer service department several times between May 31, 1994 and June 10, 1994 to ask for advice on how to fill out the application properly. Every customer representative I spoke with asked their supervisor what I should do, and they all came back with the answer, "If you cannot sign your own name, you cannot open an account with us. We do not accept your full power of attorney." Waterhouse Securities has their own limited power of attorney, but one has to be able to sign that form himself or it will not be accepted either.

On June 10, 1994 I talked with a Regional Vice President, Mr. Eric Gerardi. I told him of the problem I was having in trying to open an account with the firm and asked if he could help. I explained to him that because of a physical disability I was unable to sign my own name. I told him my father has my full power of attorney. He gave me the same answer as before. It is not their policy to accept any full power of attorney. Therefore, I could not open an account with Waterhouse Securities, and he suggested

I try another brokerage firm.

01-03407

By this time I was frustrated and angry, so I called Congressman Rick Boucher's office to inquire about the legality of this type of treatment. They felt it was a violation of the Americans with Disabilities Act and offered to help.

I received a letter on June 15 from Congressman Boucher informing me that Ms. Johanssen requested I provide the Department of Justice with a statement that describes the conversation between the individual at Waterhouse Securities and myself, when it transpired, my physical limitations, and the manner in which I handle my financial matters.

Should a person be discriminated against because a physical disability renders him unable to sign his own name? If this is considered discrimination under the Americans with Disabilities Act can anything be done to resolve it?

The only reason I am pursuing this matter is the principle. If you would wish to contact me by phone my number is XX
Thank you for any assistance you may offer.

Respectfully Yours,
XX

DJ 202-PL-819

AUG 30 1994

State of Missouri
Department of Natural Resources
Division of State Parks
P.O. Box 176
Jefferson City, Missouri 65102-0176

Dear Mr. Miles:

This is in response to your letter regarding the application of the Americans with Disabilities Act (ADA) in the context of the preservation of historic buildings.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that have rights or responsibilities under the Act. Pursuant to that authority, this letter provides informal guidance to assist you in understanding the ADA. However, this technical assistance does not constitute a legal interpretation of the statute and it is not binding on the Department.

Your letter indicates that the Missouri Department of Natural Resources Historic Preservation Program is developing a method for addressing accessibility requirements in historic buildings. As you are aware, title III of the ADA does apply to qualified historic buildings that constitute places of public accommodation or commercial facilities. Section 4.1.7 of the ADA Standards for Accessible Design (Standards), 28 C.F.R. part 36, Appendix A, specifically addresses alterations to historic buildings. The ADA Standards, which were adopted as a final rule on July 26, 1991, are based on the ADA Accessibility Guidelines (ADAAG) initially published by the U.S. Architectural and Transportation Barriers Compliance Board.

Section 4.1.7(1) of the ADA Standards provides that, when an alteration is made to a qualified historic building, the alteration must fully comply with the requirements of the ADA Standards. Only in special circumstances may an alteration to a historic building be done according to a less accessible

standard. Such special circumstances may be found to exist only if, upon completion of the applicable process outlined in section 4.1.7(2), the State Historic Preservation Officer finds that full

cc: Records, Chrono, Wodatch, Blizard, Hill, FOIA, Friedlander
n:\udd\hille\policylt\miles2.ltr

01-03409

compliance with the ADA Standards would threaten or destroy the historic significance of the building. Only if such a finding is made may the alternative requirements of section 4.1.7(3) be used. See also 28 C.F.R. S36.405.

Your letter also raises the application of the ADA to historic buildings temporarily owned by the State of Missouri through its Historic Preservation Revolving Fund program, when no programs are being offered in those facilities.

Title II of the ADA addresses the services, programs, and activities of State and local governmental entities and instrumentalities. For existing buildings, to which no alterations are being made, title II requires that programs, services, and activities be operated so that, when viewed in their entirety, they are accessible. This standard of program accessibility does not necessarily require a public entity to alter its existing facilities if program accessibility can be achieved through other means. 28 C.F.R. S35.150. If the State of Missouri does not operate any program, service, or activity in the historic buildings it owns, title II may not require any changes to those buildings.

If, however, the State undertakes an alteration to a qualified historic building, title II may require that, to the maximum extent feasible, the altered portion of the building comply with either section 4.1.7 of the Uniform Federal Accessibility Standards (UFAS), 41 C.F.R. part 101, or section 4.1.7 of the ADA Standards.

For your further information, I am enclosing copies of the regulations implementing titles II and III of the ADA. I hope that this information is helpful to you and that this letter fully responds to your inquiry.

Sincerely,

John L. Wodatch

Chief
Public Access Section

01-03410

T. 8-10-94

AUG 30 1994

Mr. Robert C. Sweitzer
R.C. Sweitzer Enterprises Inc.
840 Alexandria Park
Fort Thomas, Kentucky 41075

Dear Mr. Sweitzer:

This is in response to your letter to Attorney General Reno regarding the Americans with Disabilities Act of 1990 (ADA). Your letter addresses two separate issues: the obligation of places of public accommodation to provide auxiliary aids to customers or clients who have vision impairments, and the clients' need for ADA education. With respect to the latter issue, you have requested the assistance of this Department in funding a non-profit association to provide ADA education and to certify "ADA inspectors."

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that have rights or responsibilities under the Act. Pursuant to that authority, this letter provides informal guidance to assist you in understanding the ADA. However, this technical assistance does not constitute a legal interpretation of the statute, and it is not binding on the Department.

The Attorney General shares your concern that the ADA be effectively enforced and appreciates your desire to assist in such enforcement. As you noted in your letter, title III of the ADA, which covers private entities that own, operate, lease, or lease to places of public accommodation, may require covered entities to provide auxiliary aids and services if such aids and services are necessary to ensure the participation of individuals

with disabilities, unless such aids and services would fundamentally alter the nature of the entities' programs or would result in an undue burden. 28 C.F.R. S 36.303. Auxiliary aids and services for people with vision impairments may include qualified readers, taped texts, audio recordings, or Brailled or large print materials. 28 C.F.R S 36.303(b)(2).

Which auxiliary aid or service is appropriate will depend on the particular circumstances of each individual case. For example, it will depend on the needs of the individual requesting

cc: Records, Chrono, Wodatch, Blizard, Hill, FOIA, Friedlander
n:\udd\hille\policylt\sweitzr2.ltr

01-03411

an auxiliary aid. It will also depend on the particular information being communicated. Short, simple information may be adequately conveyed by simply reading the information, while lengthy or complex information may need to be conveyed by means of audiotape or Braille. In determining what type of auxiliary aid is appropriate, a public accommodation should consult with individuals with disabilities. However, the ultimate decision as to which type of auxiliary aid or service to provide is up to the public accommodation, as long as the chosen method results in effective communication.

The Attorney General also shares your concern that the public may not be sufficiently aware of the ADA's requirements. To ensure that the public has the opportunity to become educated about the ADA, the Attorney General has established a toll-free ADA information line at 800/514-0301 (voice), 800/514-0383 (TDD) and an ADA electronic bulletin board at 202/514-6193. In addition, the Department has published a Title III Technical Assistance Manual, an ADA Handbook, and an ADA Questions and Answers booklet.

The Department has also awarded technical assistance grants to direct specialized information to target audiences. To address the concerns of people who need auxiliary aids, the Department has awarded a grant to the American Foundation for the Blind and Gallaudet University - National Center for Law and Deafness to provide technical assistance regarding effective communication with persons who have vision and/or hearing impairments. Under this grant, the two organizations established telephone information lines and produced several booklets and a videotape. Those materials can be obtained by contacting the National Center for Law and Deafness at 202/651-5373. Under another grant, the National Federation of the Blind undertook a project to assist covered entities to find methods to convert visual materials into formats that are accessible to people who are visually impaired. They also produced a booklet on effective communication with people who have visual impairments.

Your proposal to establish a privately trained and funded group of ADA inspectors is innovative, but not feasible. The ADA has established a two-tiered enforcement scheme under which the Department of Justice is authorized to enforce title III through investigations, compliance reviews, and lawsuits; and private individuals are independently authorized to file their own lawsuits. The ADA does not provide any mechanism for "certifying" that places of public accommodation are in

compliance. Any purported certification by a private inspector would have no legal validity.

01-03412

While much remains to be done, the Department has made serious efforts to fulfill its goal of widespread understanding of, and full compliance with, the ADA. I hope this information is of assistance to you.

Sincerely,

John L. Wodatch
Chief
Public Access Section

01-03413

T. 9/1/94

DJ XX

SEP 6 1994

XX
XX
XX
XX
XX

Dear XX

Your letter to the Department of Health and Human Services regarding the rights of non-smokers was referred to this office for reply.

The Americans with Disabilities Act (ADA) authorizes the Department of Justice to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you in understanding how the ADA may apply to you. However, this technical assistance does not constitute a determination by the Department of Justice of your rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

There is currently no Federal statute that absolutely bans smoking in public buildings. The ADA, however, may protect certain individuals from being denied access to a program, service, or activity because of the presence of smoke.

Under the ADA, the Department of Justice declined to state categorically that allergy or sensitivity to cigarette smoke should be recognized as a disability because, in order to be viewed as a disability under the ADA, an impairment must substantially limit one or more major life activities. An individual's respiratory or neurological functioning may be so severely affected by allergies or sensitivity to cigarette smoke that he or she will be considered disabled. Such an individual would be entitled to all of the protections afforded by the ADA.

In other cases, however, an individual's sensitivity to smoke or other environmental elements will not constitute a disability. If, for instance, an individual's major life activity of breathing is somewhat, but not substantially, impaired, the individual is not disabled and is not entitled to the protections of the statute. Thus, the determination as to whether allergies or sensitivity to smoke are disabilities covered by the

Records, CRS, Chrono, Milton, Morrow, Friedlander, FOIA
:UDD\Milton\Letter\Smoking.XX

01-03414

regulation must be made using the same case-by-case analysis that is applied to all other physical or mental impairments. (See the enclosed Title II regulation at page 35699.)

Because of the case-by-case nature of the determination, the Department of Justice ADA regulations do not mandate restrictions on smoking. It is important to note that section 501(b) of the statute merely states that the prohibition of, or the imposition of restrictions on, smoking in places of employment, transportation, and public accommodation is not precluded by the ADA. The statute does not mandate imposition of any restrictions.

If you believe that you are disabled as defined under the ADA and you can identify a particular program, service, or activity from which you are denied access because of the presence of smoke, you may either file a private suit in Federal court or send a complaint to this office for investigation.

I hope this information has been helpful to you.

Sincerely,

Merrily Friedlander
Acting Chief
Coordination and Review Section
Civil Rights Division

The Honorable Patsy T. Mink
U.S. House of Representatives
2135 Rayburn House Office Building
Washington, D.C. 20515-1102

Dear Congresswoman Mink:

I am responding to your inquiry regarding the requirements of the Americans with Disabilities Act (ADA) for television stations. Specifically, you ask whether television stations are required to provide voice enhancement broadcasts for persons with visual impairments and closed-captioned broadcasts for persons with hearing impairments.

The only provision of the ADA that addresses television broadcasts is Section 402, which requires television public service announcements produced or funded in whole or in part by any Federal agency or instrumentality to include closed captioning. Section 402 also provides that a television broadcast station licensee is not required to supply closed captioning for any such announcement that fails to include it. Nor can a broadcast station licensee be held liable for broadcasting such an announcement without closed captioning unless the closed caption was included with the announcement and the licensee intentionally fails to broadcast it.

I hope this information is helpful to you.

Sincerely,

Sheila F. Anthony
Assistant Attorney General

10th & Constitution, N.W.
Washington, D.C. 20530

Dear Ms. Anthony:
I am writing to inquire if the Americans with Disabilities Act (ADA) requires television stations to provide voice enhancement broadcasts for visually-impaired consumers.

Most television stations have closed-caption options for the hearing-impaired. Is this mandated by ADA or is this something that television stations provide voluntarily ?

Your assistance in clarifying what, if any, requirements exist for television broadcasts under the ADA is greatly appreciated.

Very truly yours,

PATSY T. MINK
Member of Congress

01-03418

SEP 7 ILLEGIBLE

DJ 202-PL-817

XX
Brooklyn Park, Minnesota XX

Dear XX

This letter responds to your letter regarding accessibility in multiscreen cinemas under the Americans With Disabilities Act (ADA). Specifically, your letter asks the Department to provide a legal analysis of the obligations of a multiscreen cinema in various situations.

The ADA authorizes the Department of Justice to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you in understanding the ADA. However, this technical assistance does not constitute a determination by the Department of Justice of your rights or responsibilities under the ADA, and it is not binding on the Department.

The Department will not provide legal analysis of hypothetical problems. We can, however, provide you with general guidance about the obligations of places of public accommodation in general, and movie theaters in particular, under title III of the ADA. The Department's regulation implementing title III prohibits discrimination on the basis of disability by a place of public accommodation. Thus, places of public accommodation are subject to a range of nondiscrimination obligations, including requirements to make reasonable modifications in policies, practices, and procedures; to provide auxiliary aids; to remove architectural and communication barriers in existing facilities to the extent that it is readily achievable; and to design, construct, and alter facilities in compliance with the ADA Standards for Accessible Design.

In addition, section 36.305 of the Department's regulation provides that if it is not readily achievable to remove barriers in an existing facility, a place of public accommodation is required to make its goods or services accessible through any alternative method that is readily achievable. With respect to

FOIA

01-03419

multiscreen cinemas, section 36.305(c) expressly provides that if it is not readily achievable for an existing multiscreen cinema to provide physical access to all of its theaters, the cinema shall establish a film rotation schedule that provides reasonable access to all films for people who use wheelchairs, and the cinema shall provide public notice about the schedule for accessible showings.

With respect to parking facilities, any public accommodation that operates in an existing facility is subject to the requirement to remove barriers to the extent that it is readily achievable. Generally, providing accessible parking is a high priority for barrier removal. However, if it is not readily achievable for the cinema to provide accessible spaces or an accessible route from its parking lot, an alternative method of providing access may be utilized. Determination of what is readily achievable requires a case-by-case assessment of the resources available to the place of public accommodation.

Finally, you have asked if the ADA considers the safety of individuals with disabilities in making barrier removal determinations. Section 36.304(d)(2) provides that "no [barrier removal] measure shall be taken... that poses a significant risk to the health or safety of individuals with disabilities or others."

I hope this information is helpful to you.

Sincerely,

Janet L. Blizard
Supervisory Attorney

Public Access Section
P.O. Box 66738
Washington, D.C. 20035

Dear Sir or Madam:

My discussions with your personnel today on the ADA Information Line provided some very helpful information regarding access to multiscreen cinemas. The specialist I spoke to today confirmed that you will respond to written questions regarding ADA issues when presented for your analysis.

Your answers to the following questions would be instructive in interpreting Nondiscrimination on the Basis of Disability by Public Accommodations and in Commercial Facilities: Final Rule, 28 CFR Part 36.

GENERAL FACT SITUATION 1

The public accommodation is a multiscreen cinema with a total of four separate auditoriums. The theater is located inside a mall with approximately twenty other public accommodations. The entrance to the theater is located at ground level of the mall. Two of the theater auditoriums are accessible through the main entrance. The other two auditoriums are located on the basement level of the mall. These auditoriums are accessible from within the theater by a staircase. Disabled users are required to purchase tickets at the box office and travel through the mall to a public elevator, which does not meet ADA standards, (some 150 feet) ride the elevator to the basement and travel some 125 feet to the lower level theater fire doors where the individual must wait for an usher to turn off the alarm system and open the fire doors.

There are no restrooms located upstairs for upper level patrons, although there are public restrooms located in the mall proper. There is no concession stand downstairs requiring all downstairs patrons to summon help (impossible because there is no usher on duty at all times and there is no intercom system) to get back upstairs. None of the auditoriums are accessible by ADA standards.

01-03421

Question 1

Specific facts

The public accommodation was asked to make one of the upstairs auditoriums accessible to the disabled (they were free to choose the auditorium) by adding two wheelchair seating locations and one aisle side seat with a removable or retractable aisle side armrest, to rotate the movies through the accessible theater and to give notice of the movies shown in the theater.

Public accommodation response

The public accommodation responded that the changes sought were "not readily achievable" and the rotation of films was contractually impossible because movies such as Jurassic Park cannot be screened in auditoriums with less than 400 seats. (The only auditorium in the theater that has 400 seats is also the most inaccessible).

Question

Can a multiscreen cinema abrogate the requirements of Section 36.305(c) by language in a distribution contract limiting the showing of films in specific size theaters? Please explain.

GENERAL FACT SITUATION 2

The public accommodation is a multiscreen cinema with a total of four separate auditoriums. The theater is located in a free standing building constructed exclusively for that purpose. The only entrance to the building is on the west side. A 600 space parking lot is located on the south side of the building. There is a sidewalk from the parking lot to the entrance, but there is no curb cut where the sidewalk begins at the parking area. The general public uses the sidewalk for access to the theater.

There is a curb cut in front of the theater entrance located on a narrow fire road which goes around the front of the theater. The fire road is heavily used to pick up and drop off people using the theater. The only way wheelchair users can independently gain access to the theater is to follow the parking lot access to the fire road, take the fire road to the curb ramp in front on the theater (some 400 feet) and follow the sidewalk to the entrance (there is a continuous 7" curb all

the way around the parking area and adjacent to the fire access road). The dangerous nature of using the access road when traffic is present is obvious. (Please see attached drawing).

Public accommodation response

The public accommodation responded that the changes sought are "not readily achievable" and moreover that the need for a second curb ramp is unnecessary.

Question 2

Can a public accommodation be held responsible for failing to provide a curb ramp as part of an accessible route from a single parking area to the only entrance to the accommodation under these circumstance? Please explain.

Question 3

Does the ADA consider the safety of the disabled person in making accessibility determinations?

Your assistance in answering these questions is greatly appreciated.

Very truly yours

XX

01-03424

T. 9-1-94

DJ 202-PL-842

SEP 7 1994

Judge Craig S. Albert
Chardon Municipal Court
108 South Hambden Street
Chardon, Ohio 44024-1285

Dear Judge Albert:

This is in response to your letter regarding application of the Americans with Disabilities Act of 1990 (ADA) to renovation of the Chardon Municipal Court of Geauga County, Ohio.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that have rights or responsibilities under the Act. Pursuant to that authority, this letter provides informal guidance to assist you in understanding the ADA. However, this technical assistance does not constitute a legal interpretation of the statute, and it is not binding on the Department.

Title II of the ADA applies to all services, programs, and activities provided or made available by a State or local government, including the operation of courts. Title II requires that whenever a covered facility, or part thereof, is altered, the altered portion of the facility must, to the maximum extent feasible, be made accessible to people with disabilities. 28 C.F.R. S 35.151(b). A public entity may choose to apply either the ADA Standards for Accessible Design (Standards), 28 C.F.R. pt. 36, Appendix A (except that the elevator exception of the ADA Standards does not apply to title II entities), or the Uniform Federal Accessibility Standards (UFAS), 41 C.F.R. pt. 101-19.6, Appendix A, as the standard for accessibility of alterations. 28 C.F.R. S 35.151(c).

Under title II, therefore, all renovated areas of the Chardon Municipal Court building must be made accessible. In addition, if the ADA Standards are applied, whenever a primary function area of the building is renovated, the path of travel to that area must also be made accessible unless the cost would be disproportionate to the cost of the alteration to the primary function area. 28 C.F.R. pt. 36, Appendix A, S 4.1.6(2). If, on

the other hand, UFAS is applied, and if the renovation is a substantial alteration, then a public entity must, in addition to

cc: Records, Chrono, Wodatch, Blizard, Hill, FOIA, Friedlander
n:\udd\hille\policylt\albert.ltr

01-03425

making the altered area accessible, provide at least one accessible route, at least one accessible entrance, and accessible toilet facilities. 41 C.F.R. pt. 101-19.6, S 4.1.6(3).

The Department of Justice does not grant waivers or exemptions from the accessibility standards. However, in applying the chosen accessibility standard to alterations, some flexibility is permitted. Under the ADA Standards, strict compliance is not required where it would be technically infeasible (i.e, where it would require removal of a load-bearing structural member or where existing physical or site constraints prevent compliance). 36 C.F.R. pt. 36, Appendix A, S 4.1.6(1)(j). Under UFAS, strict compliance is not required where it would be structurally impracticable (i.e., it would require removal of a load-bearing structural member or it would result in increased cost of 50% or more of the value of the element involved). 41 C.F.R. pt. 101-19.6, Appendix A, S 4.1.6(3). In addition, departures from the ADA Standards are permitted where the alternatives will provide substantially equivalent or greater access. 28 C.F.R. pt. 36, Appendix A, S 2.2.

For areas that are not being altered, title II requires a public entity to ensure that the services, programs, or activities provided in those areas, when viewed in their entirety, are accessible. This requirement does not necessarily require a public entity to make structural changes to unaltered areas if there are other effective means of providing program access. In choosing among means of providing program access, however, a public entity must give priority to methods that provide the most integrated setting appropriate. 28 C.F.R. S 35.150(b).

The requirements applicable to your particular situation can be found in the enclosed regulation implementing title II. I am also enclosing the regulation implementing title III of the ADA, which includes the ADA Standards for Accessible Design.

I hope that this information is helpful to you.

Sincerely,

John L. Wodatch
Chief
Public Access Section

T. 9-1-94

DJ 202-PL-650

SEP 7 1994

Ms. Linda Hoke
Assistant Director
Council for Disability Rights Legal Center
208 South LaSalle, Suite 1330
Chicago, Illinois 60604

Dear Ms. Hoke:

I am writing to respond to your letter requesting a policy statement from the Department of Justice on the issue of whether carrying of a person with a mobility impairment by a place of public accommodation is a permitted alternative to readily achievable barrier removal under title III of the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to entities that are subject to the Act. This letter provides informal guidance to assist you and others in understanding the rights and responsibilities of covered individuals or entities under the Act. However, this technical assistance does not constitute a determination by the Department of Justice of a particular individual's or entity's rights or responsibilities under the ADA and does not constitute a binding determination by the Department of Justice.

Title III clearly states that if barrier removal is readily achievable, then a public accommodation must remove the barrier. Where barrier removal is not readily achievable, readily achievable alternatives must be considered. Carrying an

individual with mobility impairments is permitted as an alternative to barrier removal only in manifestly exceptional cases where carrying is the only means by which accessibility may be achieved, if carrying is provided in a reliable manner, and only if all personnel who are permitted to participate in carrying an individual with a disability are formally instructed on the safest and least humiliating means of carrying. Carrying is not permitted as an alternative to structural modifications such as installation of a ramp or a chairlift in any situation where such measures would be readily achievable.

SEP 8 1994

The Honorable Barbara Boxer
United States Senator
1700 Montgomery Street
Suite 240
San Francisco, California 94111

Dear Senator Boxer:

This letter is in response to your inquiry on behalf of your constituent, XX , who asked about the applicability of the Americans with Disabilities Act (ADA) to the San Rafael Elk's Club. XX letter states that there are no ramps, handrails or other accessibility features and that he has asked the Board of Trustees to install a handrail, but they have not done so. XX also stated that he believes the Elks Club is in violation of the Americans with Disabilities Act for failing to install the items he listed.

Under title III of the ADA, an entity that owns, operates, or leases a place of public accommodation, must ensure that they remove barriers to accessibility where readily achievable to do so. Readily achievable is defined as, "easily accomplishable and able to be carried out without much difficulty or expense."

If this organization is a private club, however, it may be exempt from title III coverage. Whether a particular facility is a private club is a case-by-case determination, based on a variety of factors that have been recognized by courts. We cannot make a particular determination of whether this particular Elk's club is a private club, but some of the factors to be considered in such a determination are the following:

(1) whether the club is highly selective in choosing members;

(2) whether the club membership exercises a high degree of control over the establishment's operations;

(3) whether the organization has historically been intended to be a private club;

(4) the degree to which the establishment is opened up to non-members;

(5) the purpose of the club's existence;

(6) the breadth of the club's advertising for members;

(7) whether the club is non-profit;

(8) the degree to which the club observes formalities;

(9) whether substantial membership fees are charged;

(10) the degree to which the club receives public funding; and

(11) whether the club was created or is being used to avoid compliance with a civil rights act.

Nonetheless, private clubs are still covered by title III to the extent that they open up their establishments to the general public for a purpose that falls within one of the categories of places of public accommodation. Thus, if the Elk's Club hosts events that are open to persons other than the members and their guests, then they must make the public areas accessible during those events, to the extent it is readily achievable to do so.

I hope this information is useful to your constituent. If XX thinks that this particular Elks Club meets the criteria of a public accommodation rather than a private club, as stated above, he may file a complaint with the Department by writing a letter to the Public Access Section, P.O. Box 66738, Washington, D.C. 20035.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

June 14, 1994

Mr. John Hess
% Senator Boxer
1700 Montgomery St. #240
San Francisco, Ca. 94111

Dear Mr. Hess:

Thank you for your phone conversation of June 1st and timely advice. By the way, I got a nice letter from Senator Boxer expressing her willingness of being of assistance.

The following is a short synopsis of the situation as per request.
The San Rafael Elks occupy a very steep hillside site and in order to use their facility you must go from one level to another. There are no handrails, ramps, or other safety features. If somebody slips there is not a tree, a bush, or anything to grab on to. Your could roll on concrete 20 feet and kill yourself.

On January 27, 1994, I attended a Board of Trustee meeting and at which time I apprised them of the situation and proposed installing a handrail especially between the lodge and swimming pool. They thanked me and said they would study the matter.

I attended their February meeting to ascertain the progress. No progress. They thanked me and said they still are studying the matter. I told them I hoped would comply with my wishes by May 1st.

I decided to give them a month or so to work on it. Since that time they've cancelled meetings with no prior notice, have not responded to my calls, nor have future meetings been listed. I believe they're stonewalling the issue.

It's been six month now and no action. I believe I've been reasonable and have acted in good faith. I believe they are irresponsible and negligent and also in violation of the Americans with Disability Act, specifically the part that pertains to public accommodation. They do invite the public in on a continuous basis and at a charge.

Upon your request, I respectfully ask Senator Boxer to send a letter to the Department of Justice, the enforcing agency, asking them to expedite a violation application for the ADA to me.

Thank you and Senator Boxer for being so sensitive in this matter. I sure makes me feel proud to get such service.

Yours truly,
XX

T. 9-7-94

SEP 2(illegible) 1994

The Honorable Bob Graham
United States Senator
Post Office Box 3050
Tallahassee, Florida 32315

Dear Senator Graham:

This is in response to your inquiry on behalf of your constituent, Ms. Silvia Garcia, Program Coordinator of the Deaf Service Center of Palm Beach County, Inc. Ms. Garcia is concerned that health care providers are not meeting their obligation under title III of the Americans with Disabilities Act

(ADA) to provide auxiliary aids or services to persons with hearing impairments.

The Department of Justice is committed to ensure the effective implementation of the auxiliary aids requirements of title III by health care providers. We are concerned, however, that there are some significant misperceptions of the scope of these requirements that may be deterring compliance.

One of the most common misconceptions about the ADA is that health care providers are required to provide interpreters whenever they are requested. In fact, title III of the ADA requires public accommodations, including health care providers, to furnish appropriate auxiliary aids and services, including sign language interpreters, where necessary to ensure effective communication with individuals with disabilities. Health care providers should consult with their patients to determine what type of auxiliary aid or service is appropriate for particular circumstances. However, health care providers are not required to provide sign language interpreters for deaf patients upon demand. Title III of the ADA does not require a provider to accede to a patient's specific choice of auxiliary aid or service as long as the provider satisfies his or her obligation to ensure effective communication.

cc: Records, Chrono, Wodatch, Blizard, McDowney, FOIA, Friedlander
n:\udd\blizard\control\graham
01-03432

In determining what constitutes an effective auxiliary aid or service, health care providers must consider, among other things, the length and complexity of the communication involved. For instance, a note pad and written materials may be sufficient means of communication in some routine appointments or when discussing uncomplicated symptoms resulting from minor injuries. Where, however, the information to be conveyed is lengthy or complex, the use of handwritten notes may be inadequate and the use of an interpreter may be the only effective form of communication. Use of interpreter services is not necessarily

limited to the most extreme situations -- for example, a discussion of whether to undergo surgery or to decide on treatment options for cancer.

Health care professionals cannot use an unsubstantiated fear of economic loss as a basis on which to refuse to provide auxiliary aids or to refuse treatment for a person with a disability. A health care provider may not impose a surcharge on any particular individual with a disability to cover the costs of providing auxiliary aids and services. Instead, the costs should be treated like other overhead expenses that are passed on to all patients. However, the obligation to provide auxiliary aids and services is not unlimited and a health care provider is not required to provide auxiliary aids and services if doing so would result in an undue burden, that is, a significant difficulty or expense. The factors to be considered in determining whether there is an undue burden include the nature and cost of the action, the type of entity involved, and the overall financial resources of the entity.

Finally, as amended in 1990, the Internal Revenue Code permits small businesses to receive a tax credit for certain costs of compliance with the ADA. An eligible small business is one whose gross receipts do not exceed $1,000,000 or whose work force does not consist of more than 30 full-time workers. Qualifying businesses may claim a credit of up to 50 percent of eligible access expenditures that exceed $250 but do not exceed $10,250. Eligible access expenditures may include the costs of providing auxiliary aids and services to persons with disabilities.

The flexibility of the auxiliary aids requirement, the undue burden limitation, the ability to spread costs over all patients, and the small business tax credit should minimize any burden on health care professionals.

01-03433

I hope this information will be helpful to you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

June 16, 1994

Senator Bob Graham
44 W. Flagler St.
Suite 1715
Miami, FL 33130

Dear Senator Graham:

On behalf of our deaf population, I am writing to you with a concern about enforcement of the Americans with Disabilities Act of 1990 (ADA) as it applies to the use of sign language interpreters as an accommodation at a private physician's office.

As a private, non-profit agency advocating for the rights of hearing impaired individuals, the Deaf Service Center of Palm Beach County, Inc. has been contacted by many deaf individuals with the above concern. We have also been contacted by medical doctors seeking information about their compliance obligations for deaf individuals under the ADA.

Fifty per cent of the calls we receive daily in reference to ADA and communications needs for deaf individuals are related to medical situations. Our efforts to educate the general population about the ADA include the provision of telephone numbers and addresses where they can seek more specific information. One of those referral sources is the U.S. Civil Rights Office in Washington.

We continuously provide information to medical doctors in the county in reference to their obligation to deaf patients under the ADA. Nevertheless, the requests for interpreters from deaf patients have received strong resistance from the medical doctors, resulting in cancellation of appointments, cancellations of scheduled surgeries, and even some physicians dismissing their deaf patients of many years. The ADA states that covered entities shall give primary consideration to the request of the individual with the disability. The fact is that many physicians are deciding themselves that their deaf patients do not need interpreting services, disregarding the deaf patient's request.

The real issue for the physicians seems to be avoiding the cost of providing this accommodation, rather than assuring accurate communication. Many physicians claim that they cannot afford the cost of an interpreter because sometimes this cost is higher than the fee or reimbursement they will receive for the deaf patient on the one individual appointment. The ADA states that the overall revenue of the business and several other factors must be taken into consideration when determining undue burden. In addition, the tax credits and deductions available for improving accessibility should be considered.

A United Way Agency

01-03436

SEP 20 1994

Ms. Silvia R. Garcia
Program Coordinator
Deaf Service Center of Palm Beach County, Inc.
5730 Corporate Way #230
West Palm Beach, Florida 33407

Dear Ms. Garcia:

This letter is in response to the concerns raised in your recent letter about the requirements of the Americans with Disabilities Act (ADA) as they relate to the provision of qualified interpreters.

Both title II and title III of the ADA have specific language relating to the provision of auxiliary aids. Under section 36.303(c) of the title III regulation, public accommodations are required to provide appropriate auxiliary aids and services to ensure effective communications with individuals with disabilities. The language of the title II regulation is similar and has the additional requirement of giving primary consideration to the requests of individuals with disabilities as to the particular kind of auxiliary aid or service to be provided.

The auxiliary aids requirements are intended to be flexible, reflecting the variable nature of what constitutes "effective communication." In addition to the specific nature of the disability involved, factors used to determine communication effectiveness in any given circumstance include the length, complexity and significance of the information exchanged.

The definition of "qualified interpreter" contained in both the title II and title III regulations requires the ability to interpret effectively, accurately, and impartially, both receptively and expressively, using any necessary specialized vocabulary. The ADA does not require the use of a certified interpreter as long as the interpreter is "qualified."

As your letter correctly points out, certification ensures

that consumers and covered entities are utilizing the services of

FOIA

01-03437

a highly trained and skilled professional. However, interpreter services are increasingly required in settings demanding a highly specialized vocabulary. For example, course work in a computer-aided design curriculum requires facility in technological, construction and design vocabularies. Certification alone would not necessarily ensure that the standard for interpreter effectiveness would be met. There are other situations where a certified interpreter might not be qualified. For example, a family member or friend who is a certified interpreter might be available and willing to interpret, but would not be able to satisfy the impartiality requirements that are so critical in medical and legal settings. Additional discussion of this issue may be found in the enclosed Department of Justice Technical Assistance Manuals for title II (II-7.1200) and title III (III-4.3200).

I thank you for your letter and trust that this information will be useful to you and to Deaf Service Center consumers.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

Enclosures
01-03438

DJ 202-PL-874

September 23, 1994

Ms. Elizabeth M. Adler
Tedeschi, Grasso and Mortensen
100 Summer Street
Boston, Massachusetts 02110

Dear Ms. Adler:

This letter is in response to your inquiry of September 20, 1994, about the application of the Americans with Disabilities Act to amphibious vehicles and private entities that conduct tours of or on such vehicles.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation or legal advice, and it is not binding on the Department of Justice.

Generally speaking, title III of the ADA applies to private entities that own, operate, lease, or lease to any facility or business included within one of the twelve categories of public accommodations identified in the ADA. From your description of the intended use of the vehicle in question, it appears that that the vehicle may fall into one or more of the ADA's categories of public accommodations, including the categories of places of public gathering, places of exhibition or entertainment, or places of public display or collection. See 42 U.S.C. S 12181(7)(C), (D), and (H); 28 C.F.R. S 36.104.

If the vehicle is a public accommodation, then any entity which owns or operates it must comply with the requirements of title III applicable to the owners and operators of public accommodations. Among other things, these include removing architectural barriers to access in existing facilities (including equipment, rolling stock, and other conveyances) where it is readily achievable to do so. 42 U.S.C. S 12182(b)(2)(A)(iv); 28 C.F.R. S 36.304. The steps you have described that the owner of the vehicle has already taken --

cc: Records, Chrono, Wodatch, Bowen, Contois, FOIA, MAF
Udd:Contois:PL:Adler

01-03439

widening the opening into the vehicle, and providing seats that can be removed to make space for wheelchairs -- appear to the kind of steps to remove barriers required by the ADA.

You indicated that the entrance to the vehicle is approximately six feet above the ground. The ADA does not require that any existing vehicle be retrofitted with a hydraulic or other lift. 28 C.F.R. S 36.310(b). However, if there is some alternative means of providing access into the vehicle -- by means of a ramp or otherwise -- that is readily achievable, then the owner and operator of the facility are required to provide that alternative means of access. 28 C.F.R. S 36.305. As a last resort -- and only as a last resort -- if it is readily achievable for the owner or operator of the tour to carry or otherwise assist individuals with disabilities into the vehicle safely and with dignity, then providing such assistance may be required. (Before undertaking to carry or otherwise assist individuals with disabilities into the vehicle, the owner or operator should insure that the personnel who will provide such assistance are thoroughly trained or instructed in how to provide such assistance safely and with dignity.)

Finally, you should be aware that in addition to the Department of Justice, the U.S. Department of Transportation has also promulgated regulations implementing the ADA, and that the owner and operator of the vehicle may be subject to those regulations as well. See 49 C.F.R. Part 37.

I hope this information is helpful to you in understanding the requirements of title III of the ADA.

Sincerely,

John L. Wodatch
Chief

Washington, D.C. 20035-6738

Re: Technical Advisory Assistance

Dear Atty. Contois:

Thank you again for your time on the telephone this morning during which we discussed an amphibious vehicle tour operator.

I understand that the Standards for Accessible Design do not apply to such vehicles. I further understand that the Coast

Guard or some other federal entity is currently developing applicable standards but that such standards are not yet available or effective and it is unclear when they will be available or effective. The operator in question will comply with such standards as soon as they become available.

This shall constitute a formal request for a letter from the Justice Department providing indication of the Justice Department's view of said operator's obligations, regarding the amphibious vehicles, under the Americans with Disabilities Act given that currently there are no available standards. As we discussed, local officials, from whom the operator requires approval, have indicated that they will follow the lead of the Justice Department with regard to this issue.

Time is of the essence, and I greatly appreciate your willingness to assist me to the extent possible.

Very truly yours,

Elizabeth Adler

01-03441

SEP 26 1994

The Honorable Dan Coats
United States Senator
1180 Market Tower
10 West Market Street
Indianapolis, Indiana 46204-2964

Dear Senator Coats:

This letter is in response to your inquiry on behalf of your constituents, XX , concerning alleged architectural barriers to access for persons with disabilities at a local branch of the U.S. Postal Service, fairgrounds, and restaurants and other private companies in Indiana. Each of these is subject to different Federal civil rights laws. They are discussed in turn, below.

The U.S. Postal Service, as a Federal agency, is not covered

by the Americans with Disabilities Act ("ADA"). Instead, it is covered by the Architectural Barriers Act of 1968, which requires Federal buildings to meet accessibility standards, and by the Rehabilitation Act of 1973, as amended, which prohibits discrimination on the basis of disability by Federal Executive agencies and the U.S. Postal Service.

The Architectural Barriers Act is enforced by the Architectural and Transportation Barriers Compliance Board ("Access Board"). XX can contact them for assistance at:

Architectural and Transportation Barriers
Compliance Board
1331 F Street, N.W.
Washington, D.C. 20004-1111
1-800-872-2253 (voice and TDD)

Additionally, your constituents can contact the U.S. Postal Service directly concerning compliance with the Rehabilitation Act, as amended, or the Architectural Barriers Act. They may address their correspondence to:

cc: Records; Chrono; Wodatch; Bowen; Mobley; McDowney; MAF;
FOIA.
udd\mobley\congress\lugar

01-03442

Architectural Barriers Compliance Program
U.S. Postal Service
475 L'Enfant Plaza, N.W., Room 4130
Washington, D.C. 20260-6422
(202) 268-3139

Assuming that the fairgrounds mentioned by your constituents are owned and operated by a State or local government, the governmental entity must comply with title II of the ADA. Title II requires governmental entities to provide access to persons with disabilities to all of its programs. This "program access" requirement means that each service provided by the government, when viewed in its entirety, must be readily accessible to and usable by persons with disabilities. In many cases, but not all, it is necessary for a governmental entity to remove architectural barriers in existing facilities to achieve program access.

If XX wish to file a complaint about the

fairgrounds or other facilities owned or operated by a State or local government, they may send their correspondence to:

Coordination and Review Section
Civil Rights Division
U.S. Department of Justice
P.O. Box 66118
Washington, D.C. 20035-6118

The restaurants mentioned by the XX as well as some other categories of private companies, are "public accommodations" as defined in title III of the ADA. Title III requires that, with respect to existing facilities, public accommodations remove barriers to access for persons with disabilities, if removal is "readily achievable," i.e., relatively inexpensive and easily accomplishable. For new construction and alterations, places of public accommodation must comply with the Standards for Accessible Design promulgated by the Department of Justice. Discussion of the title III requirements appears in the enclosed regulation at sections 36.401-402 on pages 35599-600 and 35574-75 (new construction and alterations), section 36.104 on page 35594 and pages 35553-54 (definition of "readily achievable"). There is further discussion of these issues in the enclosed Title III Technical Assistance Manual at pages 29, 43, 48, and 57.

If XX wish to file a complaint against the restaurants and other public accommodations mentioned in their letter, they may send complaints to:

Public Access Section
Civil Rights Division
U.S. Department of Justice
P.O. Box 66738
Washington, D.C. 20035-6738

XX should include as much information as possible in their complaints, regardless of where they are filing their complaints. At a minimum, they should give the names, addresses, and telephone numbers for the entities they feel have discriminated against people with disabilities, describe the architectural barriers or other problems as fully as possible, give relevant dates, and, if known, the names of managers or owners to whom investigative correspondence should be addressed.

It would also be helpful to include photographs or drawings of the architectural barriers, if possible.

Further information about titles II and III of the ADA is available through the Department's toll-free ADA Information Line, (800) 514-0301 (voice), or (800) 514-0383 (TDD). I hope this information is useful to you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

The Honorable J. Bennett Johnston
United States Senator
1510 One American Place
Baton Rouge, Louisiana 70825

Dear Senator Johnston:

I am writing in response to your letter on behalf of your constituent, XX , who wrote to you about a letter that he sent to the Civil Rights Division asking if the Americans with Disabilities Act (ADA) applies to State judicial proceedings.

On September 8, 1994, a member of my staff contacted XX by telephone to discuss his letter. In that conversation, we advised XX that title II of the Americans with Disabilities Act prohibits discrimination on the basis of disability in all programs, services, and activities of public entities. Therefore, title II does prohibit discrimination in the operation of a State judicial system. In addition, we told XX that if he believes that his rights under title II of the ADA have been violated, he may file a complaint by writing to the Coordination and Review Section, Civil Rights Division, U.S. Department of Justice, P.O. Box 66118, Washington, D.C. 20035-6118.

I hope that this information will be helpful to you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General

The Hon. J. Bennett Johnston re: ADA/Civil Rights

Senator, United States Congress Information/Inquiry
State of Louisiana
1510 One American Place
Baton Rouge, LA 70825

Dear Sen. Johnston:

Enclosed, please find a copy of a letter dated July 16, 1994, and its attached enclosure, which I sent to the Office of the Americans with Disabilities Act (ADA) Civil Rights Division, at the U.S. Department of Justice in Washington, D.C.

I may not have had the right address for them or they may just be very busy, but I've never received any reply from them despite having mailed the letter over six weeks ago.

The matter I was attempting to inquire of them about is very important. Thus, if there's anyway your office can follow-up with the ADA Dept. of Justice division or other appropriate agency or person, to see if they got this mailing or if I need to remail it to another address or if a reply has already been sent me, etc., I would be most appreciative.

Thanking you in advance for your courtesies, I remain,

Sincerely yours,
XX

Baton Rouge, LA XX

The Honorable John R. Kasich
Member, U.S. House of Representatives
200 North High Street, Suite 400
Columbus, Ohio 43215

Dear Congressman Kasich:

This letter is in response to your inquiry on behalf of your constituent, XX , concerning an alleged failure of United Student Aid Funds, Inc. ("USAF"), to forgive XX student loan. XX suggests that his loan should have been forgiven as he is permanently unemployable due to a disability.

Although XX stated in his letter that he is alleging a violation of the Americans with Disabilities Act ("ADA"), the ADA does not address the issues raised by him. Instead, he alleges that USAF has failed to comply with student loan regulations promulgated by the U.S. Department of Education. Accordingly, we suggest that XX continue to pursue this matter with the Department of Education. If he has not already done so, he may wish to call (202) 732-1213 (voice) or (202) 732-1663 (TDD), or write to the following address:

U.S. Department of Education
Office for Civil Rights
400 Maryland Avenue, S.W.
Washington, D.C. 20202-2572

Further information about titles II and III of the ADA is available through the Department's toll-free ADA Information Line, (800) 514-0301 (voice), or (800) 514-0383 (TDD). I hope this information is useful to you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

Wednesday, July 20, 1994

The Honorable John R. Kasich
200 North High, Fifth Floor
Columbus, OH 43215

Dear Mr. Kasich:

This letter is to seek your assistance with a case involving a violation of the Americans with Disabilities Act. This case is between myself, XX and The United Student Aid Funds Inc. I am seeking your help after exhausting other resources available to me. The following is a summary of the problem, how that problem has impacted me, and what I believe would be an equitable resolution.

I had attended Trinity Lutheran Seminary for two (2) years concluding in 1989. On July 13, 1990 I was told by my doctor that I was disabled. I made application to The Social Security Administration and was approved for disability payments on March 9, 1992. On June 25, 1991, I filled the US Department of Education physician's certification of borrower's total and permanent disability, Form 1172, with the Ohio Student Aid Commission, United Student Aid Funds, Inc., Kent State University (N.D.S.L.), and Trinity Lutheran Seminary. All of those with whom I had an outstanding student loan eventually canceled the loans based on this information and letters from my physician on his letterhead, except for United Student Aid Funds, Inc. Initially the USA Funds, Inc. rejected the Ed Form 1172, stating that my physician had checked item number 5 as no my condition was not static. They interpreted my physician's statement to mean my condition would improve. However, inspection of this form clearly indicates that my condition would become worse with standing and ambulation. In a phone conversation with USA Funds Post Claims Department. They requested me to send them a statement from my physician stating that I was permanently and totally disabled. The letter my doctor sent stated in part: " It is my opinion that the patient is unemployable at this time ... [and is] totally and permanently disabled for employment". This letter was also rejected; the reason given being that the doctors use of the phrase, " at this time", indicated that my condition would improve. Again they requested another letter from my doctor. This was sent with the offending phrase changed to: "...unemployable in any foreseeable future". Again USA Funds rejected the request to forgive the loan. Their reasoning this time was that they could only accept ED Form 1172. However according to the Request for Review Form that was sent to me by USA Funds Inc. clearly shows under section II number 6. that a physician's letter is acceptable. Further it would appear that USA Funds is attempting to collect

twice on this loan, as they state in a letter dated September 30, 1993 "This loan was guaranteed by the UNITED STUDENT AID FUNDS, ...Ed has reimbursed the UNITED STUDENT AID FUNDS for its payment on this loan". In the meantime USA Funds has submitted

the loans to numerous collection agencies and law firms. In each case I have tried to comply with both USA Funds and their collection agencies.

All these actions have adversely affected my credit rating and the ongoing harassment has contributed to my ill health. In addition to my disability, I am also a diabetic. The effects of the monumental stress this has placed me under has, according to doctors and diabetes experts, hastened the degenerative effects of the disease on organ tissue such as the eyes, liver, muscles, heart, nerve tissue and others. Finally I also have chronic clinical depression and a chemical imbalance of the brain. This condition has also been severely and adversely effected by the actions of USA Funds, Inc. In short, I believe that my life has been shortened by their harassment and discrimination.

I have sought legal advice and was told by an attorney that while I can sue under the Americans With Disabilities Act, the most that the law provides for me is to have the debt canceled and legal fees reimbursed. My lawyer also informed me that the basic cost would be $2500.00. I have as income a total of $446,00 per month from Social Security. I can barely afford to live from month to month. It is therefore impossible for me to come up with the legal fees in the first place. I also believe that to a company such as USA Funds, $2500.00 is as nothing and therefore insufficient as a punitive measure. Unless more stringent measures and higher punitive damages are levied against such companies practicing discrimination and harassment, I believe that they will continue to do what is in effect, murder the disabled citizens of this country.

I therefore would request that as resolution of this case the following would be acceptable: 1) the loans be canceled, 2) any court costs and legal fees be recovered, and 3) substantial monetary punitive damages be levied.

Should you need verification of any of this information My Social Security Number is XX . You have my permission to access any and all files pertaining to these matters. Please see enclosures for documentation of my statements. Should you have any questions, please feel free to contact me at XX
or by mail at: XX Worthington, Ohio XX Thank you for your prompt consideration and
action on this matter.

Sincerely,
XX

Ionia, Michigan 48846

Dear XX

I am writing in response to your letter requesting information about your rights as a prisoner with a disability under the Americans With Disabilities Act (ADA).

The Americans With Disabilities Act (ADA) authorizes the Department of Justice to provide technical assistance regarding rights and responsibilities under the Act. This letter provides informal guidance to assist you in understanding how the ADA might apply to your situation. However, this technical assistance does not constitute a determination by the Department of Justice of your rights under the ADA, and does not constitute a binding determination by the Department of Justice.

Enclosed please find informational materials relating to the rights of individuals with disabilities in state and local government programs, including prisons. Section 35.160 addresses specific requirements related to communication with people who have vision impairments.

You also asked what items prisoners can purchase under the ADA. The ADA is a civil rights law which prohibits discrimination on the basis of disability. As such, it does not set forth specific items that individuals can purchase. Rather, it requires public entities to provide an equal opportunity for people with disabilities to benefit from their programs,

services, and activities. For people with vision impairments, this is sometimes achieved through the provision of auxiliary aids and services (e.g. disability-related technology).

Finally, I have enclosed some information on the Civil Rights of Institutionalized Persons Act, for your reference.

FOIA

The Honorable Gary L. Ackerman
Member, U.S. House of Representatives
218-14 Northern Boulevard
Bayside, New York 11361

Dear Congressman Ackerman:

I am responding to your inquiry on behalf of your constituent, XX regarding his rights under the Americans with Disabilities Act (ADA).

XX states that he has chronic bipolar mood disorder. He indicates that his insurance company does not provide adequate coverage for chronic mental health conditions. The company has apparently denied some of his benefit claims and has advised him that he has already received the maximum yearly benefits for mental health care.

Section 501(c) of the ADA permits insurance practices that are based on or consistent with State law so long as they are not used as a subterfuge to evade the purposes of the Act. Most State laws permit companies to afford lower benefits for mental health conditions than physical health conditions. In construing another Federal statute that prohibits discrimination on the basis of disability, Section 504 of the Rehabilitation Act, the courts have held that it is not discriminatory to provide lower benefits for mental health conditions as compared to physical health conditions. See, e.g., Doe v. Colautti, 592 F.2d 704 (3d Cir. 1979). Doe v. Devine, 545 F. Supp. 576 (D.D.C. 1982), aff'd on other grounds, 703 F.2d 1319 (D.C. Cir. 1983).

I hope this information is useful to you in responding to your constituent. If he has further questions, he may wish to

15 July 1994

Hon. Gary L. Ackerman
Member of Congress
229 Main Street
Huntington, NY 11743

Dear Representative Ackerman:

It has been three months since my last correspondence. Not because there is any less urgency, import or concern, not by choice, but because I have been

ill. Ill with a life threatening disease of the brain. Ill with a chronic, potentially fatal disease. Symptoms include lethargy, fatigue, physical deterioration, difficulty concentrating and remembering, impediments to productivity, inability to complete tasks, chronic pain, sleep disturbance, and financial ruin. I have become disabled, no longer able to perform major life activities including fine motor skill manual tasks, continuing education, caring for myself, and pursuit of my profession at a pre-morbid level. I require daily medication, and regular examinations and treatments by my specialty physician. I have experienced first hand the discriminatory effects of economic health care rationing. Now I am better. I can maintain a productive life at a high level of functioning given the proper treatment. But I fear a relapse, the natural history of my disease if left untreated, because my insurance company refuses to pay for medically necessary continuing care. My disease is a chronic, occasional remitting but unrelenting condition. Symptoms are present 24 hours a day, 365 days a year yet my managed care entity claims "my benefits have run out". The pain and agony are intense. The economic costs are devastating. The response is probably illegal. XX

So now we have XX as patient, who supposedly has the knowledge, skills, experience and resources to "manage" a "managed-care system". Yet it appears all for naught. Empire Mental Health Choice (EMHC) and Empire Blue Cross/Blue Shield want to deprive me of my livelihood, deny me the care necessary to maintain my health. If I don't get insurance coverage, I can no longer afford medically necessary therapy. Without proper treatment the possibility of a severe relapse is great with danger to my physical health, psychological well-being, health and safety of my family, and economic well-being. My patients may suffer as well.

01-03456

XX
XX
Port Washington, NY XX
XX

Add to this the stigmatization of my illness, chronic bipolar mood disorder

otherwise known as manic-depressive illness and it is not a pretty sight. On top of the meddling micromanagement by nameless faceless 1-800 factotums who never take responsibility or care for patients there is the unconscionable

limits on mental health care. The general arguments concerning mental health care are beyond the present scope. For my disease, indeed for any major mood disorder there is no question of the biological basis and need for parity in care with all chronic illnesses. Depression kills more people than heart attacks. As always, prevention is truly cost effective when viewed against the staggering cost of untreated illness.

So what to do? On the national level, mental health services must be included in the basic package of benefits of any health care reform. Please inform me as to what the provision of the American Health Security Act (H.R. 1200) are in this regard. Second, the Americans with Disabilities Act is a federal statute that can and should be construed to serve as an important safeguard against discriminatory effects of health care rationing. EMHC is a prototypical self-aggrandizing managed care entity, operating under a cloud of secrecy, disinformation duplicity and deceit. Representatives and employees of EMHC and Empire BC/BS have repeatedly misinformed me concerning my contract and its benefits. The sanctimonious, oft-quoted platitude; "With this payment the patient has received the maximum benefits for this type of care in this calendar year" is unfairly restrictive. It belies any knowledge of the well documented biological basis of bipolar disease, its chronicity and tendency for recurrence as well as the proven effectiveness of combined pharmacologic and psychotherapeutic treatment. People with chronic illnesses need more health care. The response is probably illegal as well. I am asking you to please investigate as to whether EMHC and Empire BC/BS are guilty of violations of the Americans with Disabilities Act, and to proceed accordingly.

Thank you again for your time and concern.

Cordially,
XX
XX

OCT 6 1994

The Honorable Dan Coats
United States Senator
1180 Market Tower
10 West Market Street

Indianapolis, Indiana 46204-2964

Dear Senator Coats:

This is in response to your inquiry on behalf of your constituent, Mr. Wallace Young of the Vincennes Aerie No. 384, Fraternal Order of the Eagles, in Vincennes, Indiana. Mr. Young has asked about requirements for accessible parking at the Vincennes Aerie.

The Vincennes Aerie may be subject to title III of the Americans with Disabilities Act (ADA), which applies to places of public accommodation. However, the Vincennes Aerie may constitute a private club and may, therefore, be exempt from the requirements of the ADA, except to the extent its facilities are made available to nonmembers as places of public accommodation. Whether the Vincennes Aerie constitutes a private club will depend on such factors as whether the members exercise a high degree of control over club operations, whether the membership selection process is highly selective, whether substantial membership fees are charged, and whether the organization is operated on a nonprofit basis.

To the extent the Vincennes Aerie may be covered by the ADA, the requirements of title III regarding existing facilities would apply. Title III requires public accommodations in existing facilities to remove architectural barriers to access if it is readily achievable to do so. Providing accessible parking spaces is a type of barrier removal that is likely to be readily achievable for many public accommodations. The ADA Standards for Accessible Design, Appendix A to the enclosed title III regulation, S 4.1.2(5), provide a table for use in determining the number of accessible parking spaces that should be provided. The number of accessible spaces needed depends upon the total number of parking spaces in the lot.

cc: Records, Chrono, Wodatch, Hill, McDowney, FOIA, Friedlander
:\udd\hille\policylt\lugar.ltr

01-03458

Mr. Young's letter indicates that the Vincennes Aerie has provided some accessible parking spaces, but has prevented people

with disabilities from parking in those spaces. The ADA requires that accessible parking spaces be designated as reserved for the use of people with disabilities. The ADA further requires covered entities to make reasonable modifications in policies, practices, or procedures when necessary to afford services to individuals with disabilities. Therefore, a covered entity may be required to alter a policy of preventing people with disabilities from using accessible spaces and to institute a policy reserving accessible spaces for the exclusive use of people with disabilities.

In addition to the ADA's requirements, the State of Indiana may have laws regarding accessible parking.

If Mr. Young wishes to have further information about the requirements of the ADA, he may contact our ADA information line at (800) 514-0301 (voice) or (800) 514-0383 (TDD).

I hope this information is useful to you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

Gentlemen:

I am asking for assistance in a matter of handicapped parking. We are having problems with the Board of Trustees telling our members where to park and ordering handicapped members to move their vehicles from spaces marked for that purpose. The Trustees are the Officers who are engaging in this illegal discriminatory practice. Our Grand Aerie, or Parent Lodge, has told me that they agree with me that, since we are incorporated into a corporation that we each own this organization equally can have and are entitled to equal rights and that the Trustees cannot assume the sole jurisdiction of any of the property. I would like to know the procedure to follow if the persist in their discriminating ways.

Thank you in advance for your assistance and I am,

Sincerely,

Wallace Young, Secretary
Aerie #384, F.O.E.

01-03460

OCT 6 1994

The Honorable John R. Kasich
Member, U.S. House of Representatives
200 North High Street
Suite 400
Columbus, Ohio 43215

Dear Congressman Kasich:

This is in response to your inquiry on behalf of your constituent, XX , regarding her complaint that the Uniglobe travel agency in Columbus, Ohio, refuses to provide sign language interpreters for its customers' office visits.

Title III of the Americans with Disabilities Act (ADA) requires public accommodations, including service establishments such as travel agencies, to furnish appropriate auxiliary aids and services, including sign language interpreters, where necessary to ensure effective communication with individuals with disabilities.

Covered entities should consult with their customers to determine what type of auxiliary aid or service is appropriate for particular circumstances. However, covered entities are not required to provide sign language interpreters for deaf customers upon demand. Title III of the ADA does not require a covered entity to accede to a customer's specific choice of auxiliary aid or service as long as the entity satisfies its obligation to ensure effective communication. Often, exchanging notes or providing written materials may suffice. In determining what constitutes an effective auxiliary aid or service, covered entities must consider, among other things, the length and complexity of the communication involved.

A covered entity may not impose a surcharge on any particular individual with a disability to cover the costs of providing auxiliary aids and services. Instead, the costs should be treated like other overhead expenses that are passed on to all customers. Nor may a covered entity use a customer's request for an auxiliary aid or service as the basis for refusing to serve that individual.

cc: Records, Chrono, Wodatch, Hill, McDowney, FOIA, Friedlander
:\udd\hille\policylt\kasich.ltr

01-03461

However, the obligation to provide auxiliary aids and services is not unlimited and a covered entity is not required to provide auxiliary aids and services if doing so would result in an undue burden, that is, a significant difficulty or expense. The factors to be considered in determining whether there is an undue burden include the nature and cost of the action, the type of entity involved, and the overall financial resources of the entity. The requirements for provision of auxiliary aids and services are discussed further in the enclosed regulation implementing title III of the ADA.

If Ms. Thompson wishes to have further information about the requirements of the ADA, she may contact our ADA information line at (800) 514-0301 (voice) or (800) 514-0383 (TDD).

I hope this information will be useful to you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

01-03463

OCT 12 1994

The Honorable Gary L. Ackerman
Member, U.S. House of Representatives
218-14 Northern Boulevard
Bayside, New York 11361

Dear Congressman Ackerman:

This letter is in response to your inquiry on behalf of your constituent, Dr. Leon J. Cantor of Fresh Meadow, New York. Dr. Cantor has expressed concern over Metlife Empire Plan's decision to deny reimbursement for one of Dr. Cantor's patients, XX .

Under the terms of the Americans with Disabilities Act (ADA), insurance offices are places of public accommodation and, as such, may not discriminate on the basis of disability in the sale of insurance contracts or in the terms or conditions of the insurance contracts they offer. Because of the nature of the insurance business, however, consideration of disability in the sale of insurance contracts does not always constitute discrimination. An insurer or other public accommodation may underwrite, classify, or administer risks that are based on or not inconsistent with State law, provided that such practices are not used as subterfuge to evade the purposes of the ADA.

Under the ADA, an insurance company may not refuse to insure, or refuse to continue to insure, or limit the amount,

extent, or kind of coverage available to an individual, or charge a different rate for the same coverage solely because of a physical or mental impairment, except where the refusal, limitation, or rate differential is based on sound actuarial principles or is related to actual or reasonably anticipated experience.

While it is unfortunate that Metlife has refused to reimburse XX for a portion of her treatment, there is no evidence to suggest here that Metlife is violating the Americans with Disabilities Act as it relates to XX insurance coverage.

01-03464

I hope the information provided above will assist you in responding to Dr. Cantor's concerns.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

01-03465

JULY 26, 1994

METLIFE EMPIRE PLAN
GROUP NUMBER 30500
INSURED: **********
I.D. *********
DEPENDENT: SELF
MAIL NUMBERS: 4052653095 and 4062361506

ATTN: TRISH KAYSER

DEAR MS. KAYSER:

We are in receipt of your letter dated July 15, 1994, for which the Empire plan of the Metlife has declined reimbursement for the visits of March 23, 30th, April 6th,20th, May 4th and May 11th, for patient XX , who suffers with frequent sore throats. These have been documented by Strep cultures done in this office.

XX is not a Strep carrier and she has a child for which she takes care of this child. She is currently under the care of this office for her frequent sore throats and Strep Pharyngitis. In the past she has done very well medically, unfortunately at this time she is not doing well and may need more definative medical benefits in the form of surgery. At this moment she is being treated medically and necessitates follow-up care.

We feel that no insurance company should justify what is necessary or what is unnecessary when a patient participates in a insurance plan. Metlife does not negate the need for XX to see her doctor they negate the need to reimburse her appropriately. My question is: Why should a party partake in a insurance coverage when they are not reimbursed for the necessity of there visits. Nobody should dictate to a patient when, how and how frequently they see a doctor for a diagnosis and for treatment.

We feel that all reimbursements to this patient should be forthcoming and we have taken the liberty of sending a copy of this letter to Congressman Ackerman as well as the Governor of the state of New York, awaiting there reply on the behalf of XX . I remain,

Sincerely yours,

LEON J. CANTOR,M.D.,P.C.
LJC/dr

OCT 12 1994

The Honorable Howell Heflin
United States Senate
Washington, D.C. 20510-0101
Dear Senator Heflin:

This letter is in response to your inquiry on behalf of XX . The XX inquired as to whether certain tax credits are available to dentists who participate in a pilot program to provide home-based care to persons with disabilities who are unable to leave their residences. These dentists must acquire portable equipment for the program. They would like to receive tax credits to offset the high cost of the equipment. The XX have already directed their inquiry to the Internal Revenue Service ("IRS"), who responded that the tax credits are available only for expenses incurred in complying with the Americans with Disabilities Act ("ADA"). The IRS was unable to determine whether the proposed in-home services were required by the ADA and so was unable to determine whether the credit applied to expenses related to the in-home services.

The tax provision about which the XX inquire applies to "Expenditures to Provide Access to Disabled Individuals" ("Access Credit"). The Access Credit, established at 26 U.S.C. S 44, allows an eligible small business1 to claim a credit worth up to $5,000, to be reimbursed for fifty percent of certain expenditures associated with meeting the requirements of the ADA.

"Eligible access expenditures" are costs incurred, inter alia, to remove architectural barriers that would prevent a facility from being accessible to, or usable by, persons with disabilities, and to acquire or modify equipment or devices for individuals with disabilities. 26 U.S.C. SS 44 (c)(1), 4 (c)(2)(A), 44 (c)(2)(D). Expenditures are eligible, however, only to the extent that they are paid or incurred by an eligible

_____

1 A business is eligible for the Access Credit if, during the preceding taxable year, it (a) had gross receipts not exceeding $1,000,000, or (b) employed not more than 30 full-time employees.

business "for the purpose of enabling such eligible small business to comply with [the ADA]." 26 U.S.C. S 44 (c)(1). The question underlying the XX inquiry, therefore, is whether private dentists must purchase portable dental equipment and offer in-home dental care to comply with the ADA. For the reasons given below, only in limited circumstances can this question be answered in the affirmative.

Generally, title III of the ADA prohibits public accommodations, such as dentists and other health care providers, from discriminating on the basis of disability. Please see the enclosed title III regulation at sections 36.104 and 36.201, pages 35594-95, for further discussion of this issue. This prohibition of discrimination entails several specific requirements, two of which are particularly relevant here.

First, public accommodations are required to remove architectural barriers to accessibility if the barrier removal is readily achievable, i.e. easily accomplished and able to be carried out without much difficulty or expense. Please see the enclosed title III regulation at section 36.304, page 35597.

Whether barrier removal is readily achievable depends on a host of factors which include, but are not limited to, the nature and cost of the action, the overall financial resources of the site involved, the number of persons employed at the site, the existence of a parent organization, and the type of activity conducted at the site. The Department has declined to establish any kind of numerical formula for determining whether an action is readily achievable. Instead, the Department has approved a flexible case-by-case balancing of the listed factors. Please refer to the regulation at section 36.104, pages 35594 and 35553-54, for further discussion.

Second, public accommodations are required to utilize readily achievable alternatives to barrier removal when removal of barriers is itself not readily achievable. Please refer to the regulation at section 36.305, page 35598. For instance, if it were not readily achievable for the owners of a drug store to install a ramp to make the store accessible to people with mobility impairments, they could satisfy their ADA obligations by

providing home delivery of prescription drugs and other items. Please see the enclosed regulation at section 36.305, pages 35598 and 35570-71.

Generally, the ADA does not require public accommodations to provide home delivery services to their customers. However, as the prescription drug example illustrates, public accommodations may engage in home-based services as a readily achievable alternative to removing existing architectural barriers at the service providers' facility, when removing existing architectural barriers at the facility is itself not readily achievable. While
01-03468

the ADA does not require dentists to purchase portable dental equipment or to provide in-home dental care to persons with disabilities, expenses related to in-home care may be eligible for the Access Credit if they are incurred as a readily achievable alternative to removing barriers at the dentists' offices.

I have also enclosed this Department's Title III Technical Assistance Manual which was written to guide individuals and entities having rights and obligations under the Act toward a fuller understanding of the law. Pertinent discussion is found at page two (definition of a place of public accommodation), pages 28-32 (readily achievable barrier removal), and pages 37-42 (readily achievable alternatives to barrier removal).

I hope this information is useful to you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

Enclosures

July 17, 1994

The Honorable Howell Heflin
United States Senate
Washington, D.C.

Dear Senator Heflin,

I have been directed to your office by the IRS concerning legislative definition about tax codes and credits covering the removal of architectural barriers as defined under the Americans with Disabilities Act tax advantages for compliance with the mandate of the Act to seek to make available services for the entire handicapped population.

The First District Dental Chapter of Mobile presided over this year by Dr. Langly D.M.D. asked Dr. George Allen D.M.D. to begin the process of organizing a Dental Access Program for the homebound handicapped in our area. Dr. Allen contacted me and my husband as interested consumers to participate in formulating a design for an access program which would attempt to best address our community's particular needs in this area of outreach.

As we have begun tackling this challenge to develop a dental access program for our homebound handicapped, we have discovered that purchasing the special portable equipment, incurring the maintenance and management cost of this effort, and the calculated out of office time required to reach the homebound handicapped with dental care is an expense not specifically addressed or defined under the tax credits allotted under the Americans with Disabilities Act for the removal of architectural barriers.

For the homebound handicapped the home is the architectural barrier which denies access to dental care. To remove this architectural barrier for these handicapped citizens, home services must be provided. In the case of dental care there is completely portable dental equipment available capable of providing comprehensive dental treatment to the homebound. With this portable dental equipment and the service to attend a patient in the home, the architectural barrier to this specific group of handicapped citizen is removed. This certainly appears to comply with the intent of the Americans with Disabilities Act under the provisions outlined regarding the removal of architectural barriers. The IRS representative assigned my inquiry regarding this matter conceded our position had merit and if only under the intent of the Act might certainly qualify. But, because of lack of legislative definition and prescription concerning the issue of architectural barriers and the homebound, IRS would have to have legislative determination. I was referred to my senior representative.

01-03470

According to IRS we need a few definitions:

1) What specifically constitutes the removal of architectural barriers for the homebound handicapped with regard to tax codes and credits as outlined under the Americans with Disabilities Act?

2) What tax credits will apply for services rendered which are provided in the home for the purpose of meeting the specific needs of the homebound handicapped under the tax incentives for removal of architectural barriers as outlined in the Americans with Disabilities Act?

3) How will equipment be defined as necessary for the removal of architectural barriers for the homebound handicapped as mandated under the Americans with Disabilities Act?

In our own local effort we are finding that the reference to 'homebound handicapped' is a large umbrella which can eventually include patients from many if not all disabling conditions, particularly those which are by nature progressive.

Though our local dental chapter is being responsive to the community's need for dental care for all its handicapped citizens and all involved surely want this effort to be a success, it is to be noted that not every dentist is necessarily eager to participate in a program for the homebound handicapped. To provide care to this

special group of citizens can be time consuming reducing in office opportunities for patients and income and costly in other areas of supplies and equipment.

We have many homebound citizens in our area and though our numbers are not fully compiled, our Area Agency on Aging gives a rough estimate of 500 to 600 homebound elderly and handicapped now receiving some services through their agency alone. This, as you can see, is not an insignificant number. And though not all of these citizens are immediate candidates necessarily for homebound dental services, the number is felt to be a reasonable reflection of the kind of large numbers of patients who could ultimately benefit from homebound dental care in some capacity. To have a few dentists trying to meet such a load is a burden so great as to swamp this effort and doom it to failure quickly. As an inducement to increase participation in the effort and encourage all the dentists in our area to consider providing homebound care for some patients, permitting dentists full and fair use of tax credits offered under the already established tax credits for the removal of architectural barriers might well provide that balance and incentive to make participation cost effective.

One of the considerations mentioned by the IRS representative was a concern that such tax credits would be more costly to the public than cost effective. There are anecdotes to illustrate the cost advantages of providing ongoing preventive dental care. The mouth being a part of the body when left unattended simply does not heal itself. Disease of teeth and gums usually becomes progressively worse when untreated, and ultimately more than dental health can be compromised.
01-03471

The ensuing health problems can often be of great expense to public and private institutions, hospitals, private citizens and insurance companies forced to pay for complex treatments which could have been avoided had timely attention to the problem been available. All information to which laypeople are privy seem to consistently prove that prevention is indeed cheaper when bought by the ounce than when the pound price is extracted for the cure.

If IRS is correct in its assessment of the tax law as it stands, the special architectural barriers and considerations of the homebound handicapped seem to have been utterly overlooked in the present tax code, though stated in essense in the Americans with Disabilities Act itself. This neglect is perhaps fostered by the reality of the seclusion of the members of the homebound handicapped population who cannot be physically present during debates and organizational activities to let their unique limitations and restrictions be known. Individual health issues of the homebound handicapped population are carefully covered under the many banners provided for in the Act. But when a citizen under any of these banners becomes homebound, all become restricted by the same architectural barrier, the home

or place of residence. We truly feel we need the tax code to reflect an awareness of this particular architectural barrier and open the tax credits to include responsible and on-going efforts organized beyond regular and standard business practices to meet the needs of the homebound.

I hope this letter is satisfactory in explaining our request. If not please call XX and we will try to do better. Thanks so much for your help. We await hearing from your office on this matter.

Sincerely,
XX

Mobile, AL XX

01-03472

The Honorable Dianne Feinstein
United States Senate
331 Hart Senate Office Building
Washington, D.C. 20510

Dear Senator Feinstein:

This is in response to your inquiry on behalf of your constituent, XX , who is seeking information on the accessibility requirements for Automated Teller Machines (ATM) under the Americans with Disabilities Act (ADA).

XX indicated that, when using a new, accessible ATM at the Wells Fargo Bank in San Francisco, he experienced great difficulty in that he hit his head and hurt his back. He further stated that, because the ATM was accessible to persons with

disabilities, it was inaccessible to him.

Following a public comment period during which hundreds of individuals participated, the Department issued and adopted the ADA Standards for Accessible Design, the yardstick against which minimum accessibility is measured. As such, the Standards are based on a variety of individual reach ranges, heights, and functional levels and are a composite of the needs of the estimated 49 million persons with disabilities in the United States. Because people are so diverse, the Standards do not purport to meet the specific needs of every individual, with or without a disability. Generally speaking, the maximum height requirements specified in the ADA Standards (48 inches or 54 inches) will allow the vast majority of persons with disabilities to use an ATM, many perhaps for the first time. The Standards also permit most people without disabilities to continue to use an ATM.

The Standards also accommodate people who have less obvious disabilities such as difficulty stooping or bending. In doing so, the Standards promote a universal design approach which

addresses the needs of most people. For example, at locations where there are two or more ATM machines, only one must meet the accessibility requirements of the Standards for Accessible Design, thereby giving every consumer the choice of using whichever machine works best for him or her. It is exactly the concern expressed by XX that was a driving force in the creation of the Standards for Accessible Design and for implementing a universal design approach. The Department believes that the ADA Standards for Accessible Design provide equal opportunity for people with disabilities without denying

access for persons without disabilities.

I hope this information is useful in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

01-03474

Senator Diane Feinstein May 17, 1994
Room 331
Hart Senate Office Building
Washington, D.C. 20510-0501

Dear Senator Feinstein,

Encolsed is a copy of a letter that I have sent to Wells Fargo Bank

concerning their compliance to federal laws concerning handicapped accessibility of ATM's.

Why are special interest groups accomodated at the expense of the vast majority of others? I agree that some needs have to be worked into the design of things, but when it causes severe discomfort and possible medical expenses to others, perhaps the solution is similar to that done to adapt vehicles for paraplegic use of motor vehicles. Who pays for that modification? The end user, that's who. Why should the general public pay for the inconvenience of stooping to use a machine and risk head injuries at the same time when the number and percentage of people targeted to benefit is small?

We need to bring sanity back to our legislation and consider the negative impacts to all involved. On the surface, I would vote for the handicapped accessible act, but after suffering the impact in this case I feel we should be realistic and not go overboard in the implementation and forcing unneeded requirements on everybody just to accomodate a few.

XX

Orange, CA XX

01-03475

Wells Fargo Bank
P.O. Box 63107
San Francisco, CA 94163

May 17, 1994

Attn: Mr. Michael Sczuka:

Dear Mr. Sczuka,

I have just used your new handicapped accessible ATM's and would like to express my extreme displeasure with the machine. I inserted my card to activate the system and hit my forehead on the corner of the top frame causing a small abrasion on my scalp. Then, having to bend over to read the messages on the screen to do my transactions, my back became sore due to the excessive bending required just to operate the ATM. I am 6'-2" and do not consider myself to be extremely tall, just above average height.

I realize that you are probably just following government mandates for compliance to special interest groups, but why have the vast majority of people be inconvienced just to accomodate a few?

Is there anything that can be done to make the ATM's more useful to the average person to reduce the chances of chiropractic services being required? Maybe provide milk stools to take the strain off people's backs.

XX

Orange, CA XX

01-03476

The Honorable Phil Gramm
United States Senator
2323 Bryan Street, #1500
Dallas, Texas 75201

Dear Senator Gramm:

This letter is in response to your inquiry on behalf of your constituent, XX , concerning her experience with a dentist who allegedly refused to treat her brother, because he has tested positive for HIV. Title III of the Americans with Disabilities Act (ADA) prohibits discrimination on the basis of disability, which includes discrimination on the basis of being HIV+.

The Public Access Section of the Civil Rights Division investigates complaints brought under title III. However, we are not able to pursue each complaint to resolution or litigation, because of the large numbers of complaints we receive, and because we are authorized to seek judicial relief only in instances where there appears to be a pattern or practice of discrimination or where an issue of general public importance is involved. After thorough review and careful consideration, in light of our resources and priorities, we have decided not to open an investigation of XX complaint.

It may be helpful for XX to know that the Department recently obtained compensatory damages and civil penalties from the owners and operators of a dental office, for allegedly refusing to treat patients on the basis of their being HIV+. For your and XX information, we have attached copies of the consent order, settling that litigation, and the press release announcing the consent order.

cc: Records, Chrono, Wodatch, McDowney, Bowen, Novich, FOIA, MAF
Udd:Novich:Congress:Gramm.2

01-03477

XX should be aware that title III can be enforced through a number of other methods, including private litigation and alternative dispute resolution, such as mediation. Thus, although the Department will be unable to assist XX with her complaint, there are other entities that may be able to assist her in resolving this matter. We have enclosed a list of such entities located in Texas.

In addition, we are enclosing copies of two status reports that detail the actions that the Civil Rights Division has undertaken to enforce titles II and III of the ADA. These reports illustrate that, although the Department of Justice is unable to investigate every complaint that it receives, we are taking strong action to enforce the law.

I hope this information is of assistance to you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

Senator
Phil Gramm
Senate Russell Office Building, Room 370
Washington, DC 20510-4302

Dear Phil Gramm,

I regret to you to inform you of a medical professional, who seems to be picking and choosing who he would like to treat. My brother went to this so-called dentist to have his braces adjusted. My brother had the guts and honesty to tell this doctor that he was HIV positive, and the doctor paid my brother for his honesty by refusing to remove his braces! Isn't this discrimination? Don't I remember something about dentists being prosecuted for refusing to treat HIV patients in New Orleans?? What kind of world is this? Didn't this man take the same oath as every other doctor in this country? I am writing to you to plead that this dentist be punished to the fullest extent of the law!! My brother means everything to me, and for anyone to treat him in this manner is appalling to me!!!!!!!! You are the people that I am appealing to do something, anything, everything, to make this man pay for his ignorance! I would appreciate any and all help you can give to me, to help my brother receive the justice he deserves!!!!!!!!!

Respectfully,

XX

OCT 20 1994

XX
Nashville, Tennessee XX

Dear XX

Your letter to Mr. George Stephanopoulus has been referred to me for response. Your letter questions whether the use of medical records in the investigation and defense of claims by insurance companies constitutes discrimination on the basis of disability in violation of the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that have rights or responsibilities under the Act. Pursuant to that authority, this letter provides informal guidance to assist you in understanding the ADA. However, this technical assistance does not constitute a legal interpretation of the statute, and it is not binding on the Department.

The ADA prohibits discrimination on the basis of disability by places of public accommodation, including service establishments such as insurance companies. Included within this prohibition is a ban on unnecessary inquiries into the nature or existence of a disability. Examination of medical records when determining a claimant's right to compensation for an injury allegedly sustained in an automobile accident would appear to be necessary to determine the extent of injury and whether the injury was actually caused by the automobile accident or whether it was pre-existing. The policy of reviewing medical files, therefore, would not appear to violate the ADA unless medical

records were requested only from claimants with disabilities and not from claimants without disabilities.

July 19-21 Confidential

Mr. George Stephanopolus
Presidential Advisor
Room 39 Executive Offices
The White House
Washington, DC 20500

Dear Mr. Stephanopolous:

Thank you for your response to my letter of April, 1994. I never expected an answer back, but am delighted you took the time to write.

Despite the issues I wrote you about earlier, I have a much more compelling issue to bring to your attention, due to recent experiences I have encountered, which could involve millions of Americans. One matter involves the most blatant, outrageous discrimination due to disability I have ever heard of, and American insurance companies' vulgar exploitation of it. I have heard of things like this, but never encountered it personally until recently, when I was involved in a car wreck, and when I was told of a similar experience a disabled friend of mine has had with insurance companies, after she was hit in a car wreck, and the common insurance practice of targeting the disabled in a manner which I am about to relay to you.

I have reported this matter to the National Council on Disability in Washington, in hopes that this practice can be investigated and corrected. I bring it to your attention as well, because, despite the Americans with

Disabilities Act, blatant discrimination still plagues the disabled in ways you cannot imagine. Let me explain.

Recently I purchased a video at a mall a couple of blocks from where I live. I walked back out to my my car, started it up, put it in gear, and whack...

Some lady who was doing 30-35 mph cut across and through the parking zones and blindsided my car with her van. She came from exactly my blind spot, from a direction I could not have detected and came from a path that no one with any sense would have taken; she must have passed over and thru 2 parking spaces and crossed 50 or so yellow lines (breaking EVERY POSSIBLE rule of parking lot protocol) before she hit me. After reporting the incident to the police and my insurance company, by phone, I got back out to my car to find her telling the police officer that SHE was the one sitting still, and claiming that I WAS THE ONE WHO WAS SPEEDING THRU THE LOT! She had carefully re-parked her van to make it look like she was lawfully proceeding down a driving aisle. When he refused to ticket ME for reckless driving, as she wanted, she stated her intention to sue me for damages and injury. FOR A WRECK SHE, AND HER POOR DRIVING, CAUSED. This is plain evidence that litigation reforms need to take place in this country as well. But it gets worse.

The odd thing was she had her mother, (and a neighbor) with her, to corroborate her little fabricated story. I had no (convenient) ILLEGIBLE favorable witnesses, who could testify as to what really happened so if this goes to court, she would probably win due to the lack of any witnesses for me. She almost convinced the cop to write my a reckless driving ticket (until I showed the policeman the skid marks showing she was not where she told him she was, and pointed out to him that MY CAR was the one that was slammed a yard over due to the impact). He still believed most of her story because it was the word of the three of them, against my word. ILLEGIBLE ILLEGIBLE terribly outnumbered.

01-03482

surgery site, but also probably ruptured my L-5/S-1 spinal disk as well. Whatever pain I was in at the time was quadrupled by the wreck. You should have seen me; I was doubled over like a 95 year old for weeks. I now have sciatica again, and my right leg goes out from under me now and then. Since my physicians utterly refuse to allow me pain medication to control the pain, I am authorizing my neurologist to freeze my spinal nerves to death with liquid nitrogen cryogenic compounds. This, he will do over the next 12 weeks.

Unfortunately, I let it slip to my auto insurance company that my doctor insisted I get an MRI after the wreck, and when they discovered I have a disability, the insurance companies demanded to see all my confidential files from every doctor I ever saw, every pain center I've been to. Including group therapy, psych files, internists files, surgeons' records, everything. Nosy xxx's.

Do you know what they do with the confidential files, Mr. Stephanopolous? They look for dirt on the patient. NOT medical records. They are not even remotely interested in the medical data. I know. A friend of mine was just in a motor vehicle accident trial, where the insurance co's demanded all

her confidential records for a wreck that nearly killed her, and left her with permanent disability. The insurance companies shared her confidential files with the lawyers.

(Some teenage punk with a record of speeding tickets, and reckless driving tickets in 4 counties had run a stop sign doing 20+ over the speed limit and totalled her car, nearly killing her). The insurance company lawyers summoned her doctors, including her psychologist, in to court to read their entire charts on her, page by page, appointment by appointment, note by note, out loud, in court, in order to dig up any dirt they could get on her, make her look bad. For a wreck that was not her fault. Naturally they came up with some spicy stuff, because us patients think we're telling our doctors our problems in confidentiality, when they demand to know all the SCOOP on us.

What this amounts to is this: I have accumulated well over $100,000 in medical bills with all my surgeries, rehab's, etc. Doctors and rehab units have been paid major money to 'help' me. However, what this little sneaky insurance technique does is hijack MY doctors (and their records) to be used as THEIR private eyes, to suit their ends. The insurance companies use our paid professionals and their charts and files, to betray their own patients, in order to defame us and suit their own purposes. This little procedure uses the people disabled people pay major money to, to dig up the dirt on us.

What's wrong with this picture? They put my friend on trial, not the guy who nearly killed her. They put HER MEDICAL RECORDS ON TRIAL, not the reckless driver. They used her problems and medical records and disability AS A WEAPON AGAINST HER, to exonerate the teenager, and his reckless dangerous driving. The insurance companies used her disability as a weapon, a means to get at personal information to discredit, humiliate, and defame her. They used her disability as a means to assassinate her personality and credibility. In the process, they betrayed her doctors' and her privacy, comprised her confidential treatment, and violated several codes of ethics in the execution of this injustice. Worse, they took what little they found on her personal life, blew it way out of proportion, distorted it, and made up all sorts of bizarre conclusions, concocting all sorts of bizarre allegations to muck up the issue, and get the subject of the trial off the boy's careless driving and focused the trial on my disabled friend's personal life.

01-03483

court by my own words and problems, just like my friend ILLEGIBLE insurance company permission for a release of all medical files, but no personal, confidential data, and they responded with an ugly threatening letter, because they don't want the medical files, they want ability to look for the dirt, not the medical files.

Only the disabled, those with substantial medical files, those with serious diseases or injuries are vulnerable for this mistreatment. (To give you an idea of what all these files entitle them to, let me explain: I have been to 4 spinal cord injury rehab programs. In each one, the doctors & therapists ask you every little detail about your childhood, your family, your parents, their parents, your relationships, your adolescence, your

dating, every possible aspect of your personal and professional life. All sorts of stuff that is no one's business. The rehab's record all this in precise, incredible detail in the clinic charts. In essence, I have 4 unauthorized biographies floating about in these rehab programs.) Biographies that the insurance companies know contain enough stuff to stir up that their lawyers can make the disabled look like the bad guy and serve any purpose they please, whether to get their bad client off the hook, or to get a judgment placed against the patient, as in my case, for a wreck I did not cause.

The non-disabled have NO SUCH FILES that can be hijacked, and insurance companies know it. Only the disabled are subject to this kind of underhandedness. This sneaky subversion. Only the disabled are vulnerable to this kind of duplicitous sneak attack.

Regular, non-disabled folks need not fear this abuse, would never imagine that it can happen, but the disabled are set up. We are fair game for this type of technique, and that is why the insurance companies leap to get our confidential files. We are perfect stooges for them. Powerless, defenseless. It is what we get for trusting our private data with doctors.

In my case the insurance companies threatened me, to get me to sign release forms to get the files, but even if I refused to sign releases, they notified me they could obtain the files by subpoena, so I, as other disabled people, had no chance from the beginning moment I slipped and let them know I have a disability. I had no chance from the moment that woman hit my car.

It is bad enough to have been struck down by spinal disease, to lose a career, to lose my salary, be in constant pain, but to have this disgrace heaped upon you as well...like I said, I believe this is the lowest form of discrimination possible. I feel the disabled need to have someone to investigate this vile, cynical practice and its appropriateness. I ask you, sir, and our government to check into this, and its legality. This is discriminatory as all get out, and it singles out the disabled in the most gross and despicable manner. And in court, it can turn a trial of a guilt party upside down, and transform it into a trial of the victim. Our system has enough of that already. I ask you and the President to investigate this situation, not for me, but for every single disabled person in this country. The people who this game is targeted against. This is not right.

Again, thank you very much for your personal response to my letter. certainly appreciate your taking the time to write me. Best wishes for the future, and for the President's health reforms..

Regards,
XX

OCT 26 1994

The Honorable David E. Bonior
U.S. House of Representatives
2207 Rayburn House Office Building
Washington, D.C. 20515-2210

Dear Congressman Bonior:

This letter is in response to your inquiry on behalf of your constituent, XX . XX is an individual with a disability who asserts that individuals with disabilities should have the right to receive discounts from places of public accommodation, e.g., stores, restaurants, and movie theaters, that are comparable to the discounts frequently offered to senior citizens.

The Americans with Disabilities Act (ADA) is a comprehensive civil rights statute that prohibits discrimination on the basis of disability. Title III of the ADA requires a place of public accommodation to ensure that no individual with a disability is denied an equal opportunity to participate in its activities or to benefit from the goods, services, or advantages that it offers because of that individual's disability. However, nothing in the ADA precludes providing special benefits, similar to senior citizen discounts, for individuals with disabilities or groups of individuals with disabilities.

In the case of a senior citizen discount, eligibility is triggered by the age of the participant. As long as the discount is offered equally to senior citizens who have disabilities and those who do not, such discount programs do not violate the ADA.

I hope that this information is helpful to you in responding to XX

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

MT CLEMENS, MI 48043

RE: HANDICAPPER'S RIGHTS

Dear Sir:

I want to bring something to your attention that I feel NEEDS to be addressed. I speak for myself (I'm totally and permanently disabled) and others like me.

Many stores, restaurants and movie theaters have a "special discount" rate for SENIOR CITIZENS. I don't knock them for doing that. I think that is wonderful.

What bothers me, is that the only difference between myself and the SENIOR CITIZEN is that I am only 39 years old.

Many SENIOR CITIZENs are still able to work, which I cannot do. They also have a much larger Social Security check than the SSD check I receive each month.

I FEEL PEOPLE SUCH AS ME, WHO CANNOT WORK, IS TOTALLY AND PERMANENTLY DISABLED AND RECEIVES A SOCIAL SECURITY CHECK SHOULD BE ENTITLED TO THIS SAME BENEFIT.

Many of the Senior Citizens who get these discounts are very well off financially.

WHAT ABOUT SOMEONE LIKE ME?

PLEASE TAKE THIS MATTER SERIOUSLY. THIS COULD BE A MEMBER OF YOUR VERY OWN FAMILY GOING THROUGH THIS. WOULDN'T YOU WANT TO SEE JUSTICE DONE?

I am thanking you in advance for handling this matter the way it deserves to be handled, by giving me MY rights.

THANK YOU,

XX

01-03486

OCT 26 1994

The Honorable William F. Clinger, Jr.
U.S. House of Representatives
2160 Rayburn House Office Building
Washington, D.C. 20515

Dear Congressman Clinger:

This letter is in response to your inquiry on behalf of your constituent, XX , regarding the requirements of the Americans with Disabilities Act (ADA).

XX appears to be concerned about excessive tax money being spent to make existing public facilities accessible to persons with disabilities who are not likely ever to use them. XX does not provide specifics about any particular facility or costs involved in improving accessibility.

XX appears to misunderstand the scope of the obligations of the ADA which does not require State and local governments to bear undue financial burdens in modifying existing facilities.

Title II of the ADA prohibits State and local governments from discriminating on the basis of disability in all of their programs, services and activities. To fulfill this obligation, State and local governments are not required to make every building accessible. However, the State or local government must insure that all programs and services offered to the public are made accessible. If a particular service is ordinarily offered on the second floor of a building having no elevator, the program access requirement can be met by also offering the service in another accessible location rather than installing an elevator in the building. Even if making structural modifications to an existing building is the only possible means to provide access to a program, the ADA does not require such modifications if the State or local government can demonstrate that doing so will cause an undue administrative or financial burden.

01-03487

I hope the information provided above will assist you in responding to XX concerns.

Sincerely,

Deval L. Patrick

July 14, 1994

Rep William F Clinger Jr
2160 Rayburn House Office Building
Washington, DC 20515

Dear Representative Clinger:

I see an excessive amount of money being spent due to mandates under the A.D.A. Bill. I am not cold hearted, but it seems most of the facilities being created will never see a disabled person and that makes it a waste of a valuable resource - tax dollars. Why do you people always allow a basically good idea go to the overkill stage. We are talking about a very small percentage of our population dictating the expenditures of very large sums of money. It is outrageous to destroy and recreate. New construction-yes, repairing-yes.

What are the chances of Washington recognizing this gross injustice to taxpayers? We can't afford this law.

By the way, we have a wheel chair bound person in our family who shares these views.

Sincerely,
XX

DJ XX

XX
XX
XX
Lakeland, Florida XX

Dear XX

This is in response to your letter regarding the application of the Americans with Disabilities Act of 1990 (ADA) to a life-care non-profit retirement home sponsored by a church.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that have rights or responsibilities under the Act. Pursuant to that authority, this letter provides informal guidance to assist you in understanding the ADA. However, this technical assistance does not constitute a legal interpretation of the statute, and it is not binding on the Department.

Your letter notes that the retirement home is sponsored by a church. Title III of the ADA exempts religious organizations or entities controlled by religious organizations from coverage. If the retirement home is operated by a religious organization, it would be exempt from the requirements of title III.

Your letter specifically questions whether the retirement home's policy of excluding wheelchairs from the common use dining room violates the ADA. Title III of the ADA prohibits discrimination on the basis of disability by places of public

accommodation. Strictly residential facilities are not places of public accommodation under the ADA. Instead, such facilities may be required to meet nondiscrimination and accessibility requirements under the Fair Housing Act. However, the retirement home addressed by your letter may be covered by the ADA if it constitutes a social service center establishment. The home may be considered a social service center establishment if it provides a significant enough level of social services such as medical care, meals, transportation, and counseling. No one of these services will automatically trigger ADA coverage. Rather, the determination of whether an entity provides a significant

cc: Records, Chrono, Wodatch, Hill, FOIA, Friedlander
n:\udd\hille\policylt\XX ltr

01-03490

enough level of social services will depend on the quantity, quality, and combination of these services.

If the retirement home is a social service center establishment covered by the ADA, it may be required to reasonably modify its policies regarding the services it provides in order to afford those services to individuals with disabilities, unless it can demonstrate that such policy modifications would fundamentally alter the nature of the services. 28 C.F.R. S 36.302. Therefore, the dining room may need to modify its policy of excluding wheelchairs. In addition, the dining room may be required to remove physical barriers to wheelchair access to the extent that such barrier removal is readily achievable, i.e., easily accomplishable and able to be carried out without much difficulty or expense.

I hope this information is helpful to you.

Sincerely,

John L. Wodatch
Chief

XX
Charlotte, North Carolina XX

Dear XX :

This is in response to your letter to Sheila Foran regarding the application of the Americans with Disabilities Act of 1990 (ADA) to a denial of medical malpractice insurance.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that have rights or responsibilities under the Act. Pursuant to that authority, this letter provides informal guidance to assist you in understanding the ADA. However, this technical assistance does not constitute a legal interpretation of the statute, and it is not binding on the Department.

You have asked whether a recent decision to reject your application for malpractice insurance would violate the ADA. Absent an investigation, we are unable to determine whether a

violation has occurred. However, title III of the ADA prohibits discrimination on the basis of disability by places of public accommodation, including service establishments such as insurance companies. Therefore, an insurance company may be prohibited by title III from discriminating on the basis of disability in making decisions to grant or deny coverage.

An insurance company will not, however, be prohibited by the ADA from administering its benefit plan in accordance with State insurance laws. 28 C.F.R. S 36.212. Therefore, State law may also play a significant role in the determination of an insurance company's duties regarding individuals with disabilities, but such State law may not be used as a subterfuge to evade the purposes of the ADA.

Mr. Tim Hammonds
Food Marketing Institute
800 Connecticut Avenue, N.W.
Washington, D.C. 20006-2701

Dear Mr. Hammonds:

This is in response to your letter regarding the Americans with Disabilities Act of 1990 (ADA), which prohibits discrimination on the basis of disability by places of public accommodation and commercial facilities.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that have rights

or responsibilities under the Act. Pursuant to that authority, this letter provides informal guidance to assist you in understanding the ADA. However, this technical assistance does not constitute a legal interpretation of the statute, and it is not binding on the Department.

Your letter addresses a possible conflict between the ADA Standards for Accessible Design (Standards) and the rules of the Tennessee Board of Pharmacy regarding the height of service counters in newly constructed pharmacies. According to your letter, the Tennessee Board of Pharmacy requires such service counters to be 40 inches in height from the floor, without exception. In newly constructed pharmacies covered by title III of the ADA, however, the ADA Standards require that, at each service counter that has a cash register, a portion of the counter at least 36 inches in length be no more than 36 inches in height from the floor. 28 C.F.R. pt. 36, Appendix A, § 7.2(1).

The ADA does not preempt all State regulation affecting the accessibility of buildings to people with disabilities. States are free to enact and enforce code provisions that provide equal or greater access than the ADA Standards. 28 C.F.R. S 36.103(c). However, if State code provisions conflict with the ADA requirements in a way that results in less accessibility, the ADA requirements prevail over the conflicting State law.

cc: Records, Chrono, Wodatch, Hill, FOIA, Friedlander

Nov 22 1994

The Honorable Bob Goodlatte
Member, U.S. House of Representatives
2 South Main Street
Suite A, First Floor
Harrisonburg, Virginia 22801

Dear Congressman Goodlatte:

This is in response to the request by your constituent, Mr. George Bergdoll, for information on the availability of Federal funds to assist in the financing of renovations necessary to bring a facility into compliance with laws relating to accessibility for disabled individuals.

Community Development Block Grant (CDBG) funds, awarded to individual communities by the Department of Housing and Urban Development, can be used for the removal of architectural barriers. Activities eligible for assistance include special projects directed to the removal of barriers that restrict the mobility of and accessibility of elderly persons and those with disabilities. Please advise Mr. Bergdoll that each community establishes its own priorities for the use of CDBG funds. Since the funds can be used for a variety of priority projects, it is important that Mr. Bergdoll work with his community to assure that one of its priorities will be the use of some of these funds for barrier removal.

Businesses are also entitled to certain tax benefits to help pay for the cost of compliance with the Americans with Disabilities Act (ADA). As amended in 1990, the Internal Revenue Code allows a deduction of up to $15,000 per year for expenses associated with the removal of qualified architectural and transportation barriers.

The 1990 amendment also permits eligible small businesses to receive a tax credit for certain costs of compliance with the ADA. An eligible small business is one whose gross receipts do not exceed $1,000,000 or whose workforce does not consist of more than 30 full-time workers. Qualifying businesses may claim a credit of up to 50 percent of eligible access expenditures that

exceed $250 but do not exceed $10,250. Examples of eligible access expenditures include the necessary and reasonable costs of removing architectural, physical communications, and transportation barriers; providing readers, interpreters, and other auxiliary aids; and acquiring or modifying equipment or devices.

The Department of Justice has established a free telephone information service that provides technical assistance on title III of the ADA. The number is 800-514-0301 (voice) or 800 (514-9383 (TDD). The hours are 10:00 a.m. to 6:00 p.m. Monday through Friday except for Thursday, with hours of 1:00 p.m. to 6:00 p.m.

I hope this information is useful to you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

Memorandum

To: File

From: Phoebe Orebaugh, District Representative

Date: September 14, 1994

Re: Funds for making buildings handicapped accessible.

Mr. George Bergdoll is the Development Manager of the Massanetta Springs Conference Center, a private nonprofit organization near Harrisonburg, Virginia. He is inquiring as to whether there are any funds available from the federal government to assist in the financing of the renovations necessary in order to bring his facility into compliance with laws relating to accessibility for the handicapped.

01-03498

DJ 202-PL-681

Ms. Abby J. Cohen
Managing Attorney
Child Care Law Center
22 Second Street, Fifth Floor
San Francisco, CA 94105

Dear Ms. Cohen:

This letter is in response to your inquiry into the applicability of title III of the Americans with Disabilities Act ("ADA"), 42 U.S.C. 12181-89, to child care centers. We apologize for the delay in responding to your request.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation or legal advice and it is not binding on the Department of Justice.

You first inquired about small child care centers, such as home-based child care programs, which, because of their small size, may not be licensed or regulated by the state. You ask what level of impact is required before a child care facility affects interstate commerce. Title III has no exemption for small facilities and size alone is not determinative of whether a particular facility affects interstate commerce. Size, however, would likely be one of the factors the court would take into account in determining whether a facility is involved in interstate commerce along with other such factors as the location of the facility, whether the facility offered to serve interstate travelers, whether products that had traveled in interstate commerce were used in the program, the extent and nature of the facility's advertising, and whether the facility was part of an industry that, as a whole, affects interstate commerce.

Your next inquiry concerns the title III exemption for religious organizations. You note that the Preamble to the title III regulation states as follows:

cc: Records; Chrono; Wodatch; Magagna; McDowney; Mobley; MAF; FOIA

When a church rents meeting space, which is not a place of worship, to a local community group or to a private independent day care center, the ADA applies to the activities of the local community group and day care center if a lease exists and consideration is paid.

You are correct that all three of these conditions (a lease, payment of consideration, and space not used for worship) are required for title III coverage of an entity using space in a building owned by a religious organization. Parts of a religious organization's facility that are used for meetings, classes, social events and the like would not be covered by title III if used exclusively by the religious organization. But where such areas are leased by a child care facility not owned or operated by the religious organization, title III applies to the child care facility but not to the religious organization as landlord.

Next, you inquire whether child care centers can maintain a fee structure based upon the level of service to be provided or based upon developmental abilities, without regard to the age of the child. Title III requires public accommodations to make reasonable modifications in policies, procedures, and practices where necessary to insure that individuals with disabilities have an equal opportunity to enjoy the goods and services of the public accommodation. No surcharge may be imposed for such modifications. In our view, a fee structure that charges extra for services that are needed only by children with disabilities -- the extra care and supervision you describe -- is discriminatory unless providing such additional service is not a "reasonable" modification.

Next, you inquire whether it is permissible to maintain an admissions requirement that children be toilet trained. Programs are not required to abandon such a requirement altogether, but must make an exception for children who are not toilet trained due to their disabilities. This does necessarily mean, however, that diapering service must be provided for such children (see discussion below). Requiring parents to identify their children as having disabilities in order to obtain a modifications of general rules is permissible.

You also inquire as to the breadth with which one should read the requirement to provide personal services to persons with disabilities when they are customarily provided to others. For instance, you ask whether school age child care programs must provide diapering services to children with disabilities when they do not provide such extensive personal assistance with toileting but generally provide other types of personal care and

supervision as an integral part of their work. Public accommodations must make reasonable modifications to their policies, practices, and procedures to accommodate persons with

disabilities. In order to determine what modifications are reasonable, one may consider many factors including, but not limited to, the following: (1) whether other non-disabled children in the program are young enough to need intermittent toileting assistance when, for instance, they have accidents; (2) whether providing toileting assistance on a regular basis would require a child care provider to leave other children unattended; and (3) whether the center would have to purchase diapering tables or other equipment. Thus, where a program serves both infants (who require diapering) and school age children, it seems reasonable to provide diapering service for a school age child with a disability even if in another classroom. If the program never provides toileting assistance to any child, however, then such a personal service would not be required for a child with a disability. Please keep in mind that even in these circumstances, the child could not be excluded from the program because he or she was not toilet trained although the program could impose a reasonable surcharge for providing diapering service.

You next inquire about title III's direct threat defense and how a child care program may determine whether the child has a medical condition, such as active infectious tuberculosis, which poses a significant health risk to others. Child care providers may ask of all applicants whether a child has any diseases that are communicable through the type of incidental contact expected to occur in child care settings. Providers may also inquire about specific conditions, such as tuberculosis, that in fact, pose a direct threat. Medical experts may and should be consulted if specific questions are to be asked, and care must be taken to insure that inquiries are made only about specific conditions that in fact pose a direct threat in the type of conditions present in the particular facility in question.

As to whether centers may ask whether children have engaged in behavior that poses a direct threat to others, centers who wish to pose this question should exercise caution when doing so. Providers may not discriminate against a child whose disability manifests itself in behavior which, while not dangerous, differs from that of his or her peers. Inquiries should focus narrowly on behaviors that currently pose a direct threat.

Your final inquiry relates to title III's prohibition against surcharges. You ask whether child care providers may impose surcharges on the parents of children with disabilities

for the additional services necessary to care for their children. Professionals who charge an hourly or daily fee for their services may do so even where it takes longer and thus costs more to service the needs of a person with a disability. In a child care setting, however, where all children are in the facility for the same number of hours, surcharges may not be imposed for providing extra or more time-consuming services if such services
01-03501

are a reasonable modification, that is, do not cause a fundamental alteration or undue burden for the provider.

If you have further questions, you may wish to consult the Arc's All Kids Count, a guide to title III's obligations written especially for child care providers. The development and distribution of this guide was prepared under a grant from the Department of Justice. Copies are available for a nominal fee by calling (817) 261-6003 (voice) or (817) 277-0553 (TDD). You may also call the Department's toll-free ADA Information Line for further guidance, (800) 514-0301 (voice), or (800) 514-0383 (TDD). I hope this information is useful to you in understanding the requirements of the ADA.

Sincerely,

John L. Wodatch
Chief

Elko, Nevada XX

Dear XX

Senator Harry Reid forwarded your letter to this Department and asked us to respond to your concerns.

Your letter indicates that you are paraplegic. You state objections to the passage of gun control legislation that outlaws semi-automatic weapons because such weapons are the only types you can use due to your disability. It appears that congressional action to repeal or modify the legislation is necessary to address your concern.

You also seek a personal exemption from "dumb" wilderness laws. You indicate that you are being denied access to wilderness areas because, due to your disability, the only means of access is via a snowmobile or ATV which apparently are not permitted. It is not clear from your letter whether the areas are national or state parks. If the areas are national parks, Section 504 of the Rehabilitation Act applies and requires modification of policies and procedures where necessary to provide access to persons with disabilities, unless such modifications would create an undue financial or administrative burden or fundamentally alter the nature of the program. The same type of reasonable modification is required under title II of the Americans with Disabilities Act if the areas are state parks. You may wish to inquire of park authorities whether a modification of the vehicle policies will be made for you. We are unfamiliar with the circumstances involved, and take no position on whether the type of modification you seek is reasonable under Section 504 or title II of the ADA.

11 June 1994

Senator Harry Reid
SH-324
Hart Senate Office Bldg.
Washington, DC 20510-2803

Please be advised that the current frenzy for legislating against semi-automatics, pistol grips, barrel shroud and threaded muzzles is sheer stupidity. I am a XX paraplegic who uses a Colt AR-15 for everything from deer hunting to plinking at cans. In as much as I do not have back muscle control, as an outcome of the accident and the paraplegia, the semi-auto with a pistol grip and muzzle break are indispensable for me to be able to hold and shoot a rifle other than one of the "Youth Models" which is single shot, a short and very light weight.

The solution to the problem is to enforce the more than 22,000 existing laws and leave the law abiding citizen alone. Stop passing cosmetic and "feel good" legislation based on looks and functions of firearms, such as semi-auto, by concentrating on criminal usage and putting the scum bags in jail.

Add to that the fact that I am excluded from entering some of the best mountainous areas of my state by the enactment of the dumb wilderness laws. For me to get to some of them, it means either a gasoline powered snowmobile or an ATV. Can I be provided an exemption under the accommodations of the Americans With Disabilities Act to use what ever means necessary to get there. Thank you.

Sincerely,
XX

Dec 13 1994

The Honorable Richard G. Lugar
United States Senator
1180 Market Tower
10 West Market Street
Indianapolis, Indiana 46204-2964

Dear Senator Lugar:

This letter is in response to your inquiry on behalf of your constituents, Mr. and Mrs. Harry Fargo, with regard to their request for a waiver of compliance with the Americans with Disabilities Act (ADA) for a building that they own. Please excuse our delay in responding to your inquiry.

The inquiry that you received from Mr. and Mrs. Fargo describes their property as an "eight unit apartment building," but does not indicate if the property is used strictly for residential purposes or if it contains business operations such as a rental office or the professional office of a health care provider. The use of the building is significant in determining if the ADA applies.

Title III of the ADA prohibits discrimination on the basis of disability by a person who owns, operates, leases, or leases to, a place of public accommodation. The Department of Justice regulation implementing title III identifies twelve categories of places of public accommodation. See, § 36.104 of the enclosed regulation. If a place of public accommodation is operated in a facility, then title III of the ADA applies to the portions of the facility that are used as the place of public accommodation. If title III applies, there is no provision in the ADA that would permit a waiver of its requirements.

If a facility is used strictly for residential purposes, then title III does not apply because strictly residential facilities are not subject to the ADA. However, multi-unit residential facilities are subject to the requirements of the

Fair Housing Act of 1968, as amended. For information about the requirements of the Fair Housing Act, Mr. and Mrs. Fargo should contact: The Office of Fair Housing and Equal Opportunity, U.S. Department of Housing and Urban Development, 451 Seventh Street, N.W., Washington, D.C. 20410-2000.

I hope that this information is helpful to you in responding to your constituents.

Sincerely,

Deval L. Patrick
Assistant Attorney General

Hon. Janet Reno
Attorney-General
U.S. Justice Department
Main Building
Washington, D.C. 20530

RE: AMERICANS WITH DISABILITIES ACT
and SIDEWAYS-SLIDING DOORS

Dear Attorney General Reno:

I just read in today's newspaper of your public information campaign to alert employers to the requirements of the above law, and your Department's effective enforcement of those requirements.

One of the clumsiest things for people in wheelchairs is to open doors. For young people who have long arms which are strong, it is possible to reach up and yank the door open, but not every wheelchair-bound person who is directing his or her own wheelchair can do that. There are people who use mobilized wheelchairs who have little strength in their arms, yet, with the aid of the electric lever, can direct their chair forward/backward, etc.

Is there any discussion, or ballpark figure of the cost to convert ordinary double doors leading to building vestibules and lobbies to automatic sideways-sliding (telescoping, or paralleling into the adjacent panels?) I imagine if some effort is put into this particular type of accommodation, and there are enough potential customers for such installations among public buildings, apartment buildings, etc., enough of them can be made in various standard sizes to make the cost less then it would be if these had to be custom-designed, manufactured and installed.

With the ADA as a spur to change doorways to accommodate wheelchairs, can this particular kind of door be highlighted?

Sincerely,
XX

Shon Merryman
Graduate Traffic Engineer
City of Carrollton
Transportation Department
P.O. Box 110535
Carrollton, Texas 75011-0535

Dear Ms. Merryman:

This letter responds to your letter inquiring about Americans With Disabilities Act (ADA) requirements for accessible residential parking in multi-family dwelling areas. Your question pertains specifically to the residential portions of the parking areas.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that have rights and responsibilities under the Act. This letter provides informal guidance to assist you in understanding the requirements of the ADA. However, this technical assistance does not constitute a determination by the Department of rights or responsibilities under the ADA, and is not binding on the Department of Justice.

The ADA does not cover the residential portions of privately operated residential properties. Coverage may be provided, however, under the Fair Housing Amendments Act, which is enforced by the U.S. Department of Housing and Urban Development (HUD). To obtain further information about this Act, you may want to contact HUD at: (800) 795-7915 (voice) or (800) 927-9275 (TDD); or 202) 708-2618 (voice).

I hope this information is helpful to you.

Re: Accessible Parking Spaces for Multi-Family Residences

Dear Mr. Wodatch:

A citizen of our community phoned our department recently to inquire about accessible parking spaces in a multi-family residential parking area. Apparently, this person was told by the apartment manager prior to moving in that an accessible space would be provided for them near their residence. According to the new tenant, this promise was never carried out.

This call brought up a couple of issues which I have been unable to get resolved. The reason I am writing you is to hopefully get some clarification as to what the ADA requires or does not require as far as multi-family residential units are concerned. In this instance, I am not even sure whether the apartment owner/manager was required to provide accessible parking for residents. I know that for new apartment construction in our City, we require that accessible spaces be provided at the same rate as a retail development having the same number of spaces. However, this requirement is derived more from a strict interpretation of the Uniform Building Code rather than anything I have been able to find in the ADA requirements.

From what I have been able to gather, multi-family residential units are treated under ADA as any other type of residence would be. This type of interpretation means that multi-family parking areas are exempt from such requirements, and therefore, are not required to provide any accessible spaces.

My questions concerning ADA requirements are as follows:

1) Are apartments or any other type of multi-family development required to provide accessible parking spaces based on the overall parking requirement?

2) If so, is the property owner required to put the accessible spaces in any particular location, or can they place them wherever they want?

3) If the answer to question #1 is no, then is the property owner under any obligation to provide accessible spaces if the need arises.

The questions I have are not related to common areas, office or retail space, or any other area that could be construed as publicly accessible within the apartment community. For these areas, I understand that they fall under a different category and are therefore bound by different rules. I am strictly concerned with the ADA as it pertains to the parking provided for the residential portion of the complex only.

To my knowledge, this is the first time a question of this nature has come through our department. I would like to get it sorted out so that I can make a more timely response to our citizens in the future. I would appreciate it if you could look into this matter for me and let me know how the ADA applies to multi-family parking. Please send a written response addressed to me at:

DEC 15 1994

The Honorable Phil Gramm
United States Senator
2323 Bryan Street, Suite 1500
Dallas, Texas 75201-2659

Dear Senator Gramm:

This letter is in response to your inquiry on behalf of your constituent, Richard L. Myers, concerning the lack of accessible parking for people with disabilities at Del Lago Plaza in Montgomery, Texas, where Mr. Myers' business, Lakefront Properties, Inc., is a tenant. He says that over the years he has asked the owners and managers of the office complex to provide accessible parking spaces for himself and his clients and customers. He asks whether all public office buildings are required to provide accessible parking.

Title III of the Americans with Disabilities Act requires that existing places of public accommodations -- including restaurants, stores, sales or rental establishments, travel services, and offices of lawyers or doctors -- remove architectural barriers to access where such removal is readily achievable, i.e., easily accomplishable and able to be carried out without much difficulty or expense. The Department of Justice's regulation under title III offers examples of barrier removal including installing ramps, making curb cuts in sidewalks, and creating designated accessible parking spaces. The cost of these actions and the resources of the covered entity are factors in determining what is readily achievable.

While the exact nature of Mr. Myers' business is unclear, we assume it is a real estate sales or rental office and that parking spaces are provided for his customers. If this is the case, it is possible that the landlord, the tenant, or both will be responsible for providing accessible parking. For further information, please see § III-1.2000, p.3 of the enclosed title III technical assistance manual.

cc: Records, Chrono, Wodatch, McDowney, Bowen, Breen, FOIA, MAF

RE: Disabled Parking at 15001 Walden Road
Montgomery, Texas 77356

Dear Mr. Gramm:

I am confused! My original letter to you was in regard to Handicap Parking, which is not provided in the 15,000 square foot office building at 15001 Walden Road and never has been provided since its inception. We are tenants and have made numerous requests to have "Handicap Marked Parking Spaces" provided. The requests were made to: Phillip LeFevre, Manager and/or Lessor, located in the same building, Suite 203.

I am on "Life Support Systems" and cannot walk any great distance. Many of our clients or customers are also handicapped.

Perhaps my confusion is your letter states you have contacted officials at "The Equal Employment Opportunity Commission". Are they the government agency that handles handicap parking?

Once again, thank you for all your help.

Very truly yours,

Richard L. Myers
Lakefront Properties, Inc.

March 1, 1994

The Honorable Senator Phil Gramm
2323 Bryan Street, Suite 1500
Dallas, TX 75201-2659

RE: Handicap Parking Office Complex
15,000 sq. ft. Air Conditioned Offices

Dear Mr. Gramm:
My corporation "Lakefront Properties, Inc.", is a tenant in the "Del Lago Plaza", 15001 Walden Road, Montgomery, Texas 77356 office complex, with approximately 15,000 square feet of air conditioned offices. We lease approximately 1500 square feet and have for a number of years. We have over the years requested the owners and/or managers of the building provide us with handicap parking spaces and have been ignored or told they are working on it. The bottom line is, we still have none and no reason to believe anything will change. The same management company also manages a shopping center near our office complex and did recently paint handicap spaces in the shopping center.

Am I mistaken, or don't all public office buildings have to provide handicap spaces for the tenants and the public for the benefit of people such as myself who are handicapped?

The manager of our building is LeFever Management Company. One of the principal owners is Henry Brooks - one of the large beer distributors in Conroe, Texas.

Mr. Gramm, any assistance you could give me on this matter would be greatly appreciated, such as what government agency should I contact and if possible, a name of the closest one to Walden, Del Lago, Conroe, Texas or Houston, Texas.

Mr. Gramm, thank you for all your assistance in past years on many matters! I look forward to your usual prompt response.

Your constituent,

Richard L. Myers
RLM/kb

01-03516

DEC 15, 1994

The Honorable Mitch McConnell
United States Senate
Washington, D.C. 20510-1702

Dear Senator McConnell:

This letter is in response to your inquiry on behalf of your constituent, XX , regarding the Americans with Disabilities Act (ADA). XX is concerned that the ADA requires public entities to use the services of interpreters, but that the Federal government does not regulate interpreter services.

The ADA is a comprehensive civil rights statute that prohibits discrimination on the basis of disability. Title II of the ADA prohibits discrimination on the basis of disability in all programs, activities, and services provided or operated by public entities, including the Pulaski County School District.

The Department of Justice regulation implementing title II, 28 C.F.R. Part 35, requires that public entities furnish appropriate auxiliary aids and services where necessary to afford an individual with a disability an equal opportunity to participate in, and enjoy the benefits of, a service, program, or activity conducted by a public entity. Sign language interpreters may be employed to meet this obligation.

In determining whether an interpreter is an appropriate auxiliary aid, factors to consider are the context in which the communication is taking place, the number of people involved, and the importance of the communication. Thus, this provision is somewhat flexible. For example, in many simple transactions, such as paying bills or filing applications, communications provided through written materials and written notes may provide effective communication. However, situations which involve more complex or extensive communications, such as a classroom discussion, may require the use of qualified interpreters, assistive listening systems or other aids or services.

cc: Records Chrono Wodatch Breen Blizard FOIA
McDowney Freidlander

A public entity is not required to take any action that it can demonstrate would result in a fundamental alteration in the nature of a service, program, or activity or in undue financial burden and administrative burdens.

While title II requires that any interpreter used by a public entity must be "qualified," i.e., able to interpret effectively, accurately, and impartially both receptively and expressively, using any necessary specialized vocabulary, the ADA does not require an interpreter to hold a degree or to be "certified." This definition focuses on the actual ability of the interpreter in a particular interpreting context to facilitate effective communication.

XX also expressed concern regarding limited

interpreter services in her area and the expense of these services. Supply and demand in a free market is responsible for interpreter costs. The ADA has no provisions for regulating the fees of interpreting services or any other auxiliary aid or service. However, the title II regulation states that a public entity may not place a surcharge on a particular individual with a disability or any group of individuals with disabilities to cover the costs of measures, such as the provision of auxiliary aids, needed to comply with the ADA.

I hope this information will be helpful to you in responding to your constituent.

Sincerely,

Loretta King
Acting Assisting Attorney General
Civil Rights Division

RE: Interpreters for the Deaf and ADA

Number of pages including cover sheet: 2

Message

Dear Senator McConnell,

For many years, my husband XX and I have been avid supporters of yours. I am deaf, and I met you a few years ago at XX home.

My reasons for contacting you are because I need your help regarding the ADA laws and the deaf. First, I would like to praise all the peacemakers who have brought this law for the disabled about. However, as a deaf individual, I am concerned that some areas have been overlooked and need to be brought to your attention immediately before our future is robbed by misuse of this law.

The problems I would like to discuss with you stem from the question, "How could our federal government enforce such a law when there are not ample resources to fulfill it?"

I am speaking of Interpreters for the deaf. Now that federal law requires agencies and businesses to provide the deaf with Interpreters, I am seeing too many Interpreters taking advantage of this situation by setting their own fees, deciding how they will bill, and charging for travel time and also mileage. Due to the low supply of Interpreters, there is no competition out there and it is becoming aggravating not only to the deaf community, but also those businesses who must pick up the tab. I feel there is a pressing need for the federal government to set this matter straight as it is getting out of hand. There needs to be consistency in this trade because now federal law has enforced the use of Interpreters upon our society. I understand there is a free trade act, enabling those

to run their own businesses, but federal law doesn't force someone to hire a plumber. The trade of Interpreting needs to fall into the governments hands, and not be taken lightly.
01-03519

I would like to share with you some incidents that I have experienced in just this past month. Presently, there is a child in our Pulaski County School District who is deaf and requires an Interpreter. He has been deprived of two months of education because the Interpreter that the district has been negotiating with cannot come to terms with her salary. They are offering her $12.50 per hour for a full time job with benefits. She is saying she is worth $20.00 per hour, and I can guarantee you that she is not even currently certified. If the district were to pay her that, she would be making more than the Principal of the school responsible for 1000 students, while she would be responsible for just one child. It makes me furious that this child cannot speak out for himself.

The Lexington Center has made some very impressive efforts to accommodate the hearing and visually impaired at the Rupp Arena. I worked with them on getting the recent Reba McEntire concert interpreted. It turned out to be a wonderful experience and we are looking forward to future ones as well. I had highly recommended a nationally certified Interpreter to them which they used, and she did a fine job. However, when the Interpreter billed the Center, I questioned many things which I felt were unfair. After discussing the bill with the General Manager at the Center, he decided it was best to let this time go. I have encouraged them to issue a contract for future shows, where they would be setting the rules as the employer. I am anticipating problems from the Interpreters with this idea, but there must be a way where things will not get out of control.

It is my plea that you take a look at what is going on around the ADA law. For most disabilities, the special needs are being installed to meet the requirements and only need to be updated, but with the deaf, Interpreters will always be an ongoing thing. Please set the rules if the law is to be enforced.

Also, I would like to make a suggestion about the supply of Interpreters. Since interpreting has become in such demand, why don't we make it a big part of our school's curriculum, encouraging students to go into that field like we do with other professions? Most Interpreters today know someone who is deaf and acquired their skills from them. We need to treat it as a learned profession and offer programs in colleges where degrees can be given.

Thank you for your time on this matter. I have discussed my concerns with the Kentucky Commission for the Deaf and Hearing Impaired in Frankfort, but was told that since the ADA was a federal law, they as a state agency, could not do anything. Coincidentally, the person I spoke

with was an Interpreter. I hope you will not consider this matter to be petty, as the deaf community considers it to be of utmost importance.

Sincerely,
XX
Somerset, Kentucky

Ms. Adell Betts
Director
Office of Equal Rights
Federal Emergency Management
Agency
Washington, D.C. 20472

Dear Ms. Betts:

This letter is in response to your letter requesting an advisory opinion on various issues dealing with the impact of the Americans with Disabilities Act of 1990 (ADA) on the provision of shelter and mass care during and after a disaster.

In your letter, you describe American Red Cross (ARC) policies that may limit the ability of individuals with disabilities to take advantage of the disaster relief services provided by the ARC to members of the general public. Your concern arises out of the possible relationships that may arise between the ARC and local Emergency Management Agencies, which receive Federal financial assistance through your agency, the Federal Emergency Management Agency (FEMA). Specifically, you ask the following questions:

1. Is the current ARC policy a violation of Section 504 [of the Rehabilitation Act of 1973, as amended] or of Titles II or III? If so, why? If not, why not?

2. What sort of physical or other type of access is legally required in a mass care shelter?

3. Is an Emergency Management Agency in violation of these

statutes or implementing regulations by participating in any portion of shelter operations?

Given the number of interrelationships that may occur among these entities, some of which you describe in your letter, and the fact that your letter does not fully describe the legal responsibilities that apply to each, we are unable to provide a

cc: Records CRS Chrono Pecht Friedlander Breen FOIA
UDD\PECHT\TECHASST.LTR\BETTS.LTR

01-03521

comprehensive answer. We have, therefore, tried to set forth the applicable general requirements.

Emergency shelters set up by the American Red Cross are clearly places of public accommodation subject to Title III of the ADA, which prohibits discrimination against individuals on the basis of disability by any private entity (whether or not established for profit) that owns, leases (or leases to), or operates a place of public accommodation. See § 36.201 of the enclosed Title III regulation. To be considered a "place of public accommodation" under Title III of the ADA, a facility must be operated by a private entity, its operations must affect interstate commerce, and it must fall within one of the 12 categories listed in § 36.104 of the regulation. Each category includes representative examples of covered facilities. However, the examples included are meant to be illustrative, not exhaustive. Thus, a facility does not have to be specifically listed in order to be covered.

Shelters operated by the ARC would be considered "social service center establishment[s]," a category that includes senior citizen centers and homeless shelters. Such shelters may also be considered "service establishment[s]," a category that includes the professional offices of health care providers and hospitals.

As a public accommodation, that is, as an entity that operates a place of public accommodation, the ARC is fully subject to the requirements of Title III. It cannot discriminate against individuals with disabilities on the basis of disability in the full and equal enjoyment of the services it provides. See § 36.201 (a) of the Title III regulation. The ARC is free to define the type of services it will provide during emergencies. Thus, if the ARC defines its mission as providing shelter, basic nutrition, and basic medical care during times of emergency, this policy does not violate the ADA. It would, however, violate the ADA if the ARC refused to provide these same services to individuals with disabilities, such as individuals who use - wheelchairs or persons who are blind or deaf.

The ARC must also make reasonable modifications to its policies, practices, or procedures if those modifications are necessary to make its services available to persons with disabilities. See § 36.302(a) of the Title III regulation. Modifications are not required, however, when the ARC can demonstrate that making such modifications would fundamentally alter the services provided. In practice this could mean that the ARC may be required to perform some additional services for

individuals with disabilities. It is would not, however, be required to convert its shelters into comprehensive, state of the art, medical facilities.

From the ARC's Numbered Notice 5, which you have enclosed with your letter, and from your description of individuals turned away from shelters, it appears that the ARC is failing to distinguish between two classes of individuals, those with disabilities who are medically stable (for example, individuals who use mobility aids, such as wheelchairs, as a result of a past injury or illness) and individuals who may or may not have disabilities, but who are acutely ill. Barring medically stable individuals with disabilities from entrance to ARC shelters solely on the basis of their disability would, in most cases, violate Title III of the ADA.1 Failing to make reasonable modifications to shelter policies, practices, and procedures to accommodate such individuals also violates the ADA, unless the American Red Cross can demonstrate that making such modifications would result in a fundamental alteration to the service provided.

As a practical matter, this means that the ARC should not assume that all people with visible disabilities are ill and require hospitalization or specialized medical care. Shelters should, as a matter of course, be prepared to accept medically stable individuals with disabilities. This group may include, but is not limited to, people with mobility impairments, blind individuals (and their service animals), people who are deaf, individuals who have cerebral palsy, and people with muscular dystrophy and other disorders that may be degenerative, but who are not acutely ill. The ARC should be prepared to make reasonable modifications to its policies in order to accommodate such individuals. For example, shelter staff should be prepared to assist paralyzed individuals in transferring to bed and with basic health care procedures.

With respect to individuals who are acutely ill, as noted above, the ARC is not required to provide comprehensive medical facilities. In most cases, however, it would violate the ADA if ARC shelters were to deny acutely ill individuals with disabilities the right to enter shelters, while permitting acutely ill, non-disabled individuals to enter. Although the ARC may refer such individuals to hospitals or other facilities that are more capable of handling specialized medical care, it may wish to set up systems to ensure that acutely ill individuals

_____

1 The only exception to this requirement arises when an individual poses a direct threat to the health or safety of

others, and that threat cannot be eliminated by a modification of policies, practices, or procedures, or by the provision of auxiliary aids and services. See S 36.208 of the Title III regulation for the definition of the direct threat exception and for a discussion of the very limited circumstances under which it may be applicable.

are, in fact, able to reach such alternative care facilities, and that these facilities are open and operating under disaster conditions.

The American Red Cross is subject to a number of other obligations under Title III of the ADA. For example, it must remove architectural barriers in its facilities, when such removal is readily achievable. It must also provide auxiliary aids and services where necessary to ensure effective communication with individuals who have disabilities. See §§ 36.303 and 36.304 of the Title III regulation. If the ARC is a recipient of Federal financial assistance, it must comply with the funding agency's regulations implementing Section 504 of the Rehabilitation Act of 1973, as amended (Section 504). The requirements of Section 504 are substantially the same as the requirements of Title II of the ADA, which are described below.

The operations of a State or local Emergency Management Agency (EMA) are governed by Title II of the ADA, which prohibits discrimination against qualified individuals with disabilities on the basis of disability in services, programs, or activities conducted by a State or local governmental entity, such as an Emergency Management Agency. A copy of the regulation implementing Title II is enclosed for your convenience. Title II of the ADA is based on Section 504, and the following discussion is applicable to both laws.

The focus of Title II of the ADA and its implementing regulation is to ensure that, to the extent that a State or local governmental entity provides programs, services, and activities to the public, they are readily accessible to and usable by individuals with disabilities. Program access is discussed in Subpart D of the enclosed Title II regulation. Under the "program access" requirement, a public entity must operate each of its services, programs, and activities, so that when viewed in its entirety, that service, program, or activity is readily accessible to and usable by individuals with disabilities. See § 35.150(a) of the Title II regulation.

Your letter does not include a discussion of the scope of the duties legally required to be performed by EMA's or the

statutory framework under which EMA's operate. It also lacks a discussion of the relationship between the ARC and individual EMA's. If EMA's are required to arrange for emergency shelter care in their respective jurisdictions, they may either do so directly, or they may provide such services through third parties, such as the ARC. However, as a covered entity, an EMA must ensure that such third parties comply with the requirements of Title II in delivering services on its behalf.

If, however, EMA's are not obligated to provide shelter services, and do not, in fact, provide such services, they do not

violate the ADA simply by providing assistance to the ARC. However, each aspect of the sheltering process in which an EMA participates, must be performed in a nondiscriminatory manner. For example, your letter states that EMA's may participate in the selection of shelter sites. Under Title II, such sites must be selected in a nondiscriminatory manner. See § 35.130(b)(4). You also include an example in which a Florida EMA agreed to provide medical staff for a "special needs" shelter. In the latter example, the activities of the Florida EMA are basic to the provision of the service, and, consequently, the EMA would have a substantial obligation to ensure that shelter operations did not violate Title II of the ADA (and Section 504, if that EMA is a recipient of Federal financial assistance).

Thus, in response to your question, whether an EMA is in violation of Title II of the ADA is a question of fact that depends on both the EMA's statutory responsibilities and on the degree to which the EMA is involved in shelter operations. This same analysis would apply in determining whether an EMA that receives Federal financial assistance through FEMA is in violation of Section 504.

Finally, you ask what type of access is required in a mass care shelter. You note that the most frequently used facilities are schools, churches, and government buildings, such as civic centers. This question raises a unique issue because of the short-term and sporadic use of facilities.

Title III entities, such as the ARC, are required to eliminate architectural barriers in existing facilities when such barrier removal is readily achievable, that is, easily accomplishable and able to be carried out without much difficulty or expense. See § 36.304 of the Title III regulation. Title III also contains accessibility standards which must be followed when constructing or altering buildings and facilities subject to Title III. However, given the nature of the ARC's use of

buildings for emergency shelters (we are assuming that the ARC does not own or lease most shelter facilities), these portions of the Title III regulation may not be generally applicable.

Even if these specific provisions are not applicable, the ARC is obligated to comply with the general requirements of Title III found in §§ 36.201 through 36.204 of the Title III regulation. Among other things, the general requirements prohibit a public accommodation from denying individuals with disabilities the right to participate in the services the public accommodation provides and from providing such individuals with segregated or inferior services. These issues are best addressed at the planning stages by selecting, to the greatest possible extent, facilities that are physically accessible.

01-03525

If an EMA is responsible, either individually, or with the participation of the ARC, for selecting buildings to be used as shelters, it must comply with Title II of the ADA in doing so. Under the Title II regulation, it is not necessary for a public entity to make each of its existing facilities accessible, as long as it complies with Title II's "program access" requirement and ensures that its programs and activities, when viewed in their entirety, are readily accessible to and usable by individuals with disabilities. However, given the unique nature of disaster relief, it may not be sufficient to have only designated facilities accessible. Under disaster conditions it may be impossible for an individual to reach the "designated" accessible shelter or safety concerns may dictate that the individual take shelter immediately.

Under these circumstances, in selecting shelter sites, public entities (as well as private disaster relief agencies) may wish to follow the guidance for leasing buildings suggested by this Department in the Preamble to its Title II regulation. As noted in the Preamble, existing buildings leased by a public entity are not required to meet accessibility standards simply by virtue of being leased. However, at a minimum, the Department encourages public entities to lease space that complies with the minimum standard applicable to the Federal government when it leases space. That standard is discussed in the Preamble to S 35.151 of the Title II regulation. The three elements of the standard are: (i) an accessible route from an accessible entrance to the areas where the primary activities for which the building was leased take place; (ii) accessible toilet facilities; and (iii) accessible parking facilities. Selecting space that complies with this minimum standard, while not required, will greatly facilitate both a public entity's obligation to provide program access, and a private entity's obligation to avoid discrimination on the basis of disability.

I hope this information has been of assistance to you. If

you require further assistance or advice, please do not hesitate to write. The Department can also be reached through its ADA Information Line at (202) 514-0301 (Voice) and (202) 514-0383 (TDD) 1:00 p.m. to 5:00 p.m., Monday through Friday.

Sincerely,

Merrily A. Friedlander

Ms. Stewart B. Oneglia
Chief, Coordination and Review Section
Civil Rights Division
Department of Justice
P.O. Box 66118
Washington, D.C. 20035-6118

Dear Ms. Oneglia:

This letter is a request from the Federal Emergency Management Agency (FEMA) for an advisory opinion on various issues dealing with the impact of the Americans with Disabilities Act of 1990 (ADA) on the provision of shelter and mass care during and after a disaster.

The American Red Cross (ARC) is charged with responsibility for sheltering and feeding persons displaced by disaster. This service is to be provided regardless of whether the community involved becomes a Presidentially declared disaster area. Indeed, the shelters and mass feeding facilities are open long before the formal process leading to a Presidential declaration has begun. Shelters may be located in a wide variety of buildings. The most-often used facilities are schools, churches, and government buildings such as civic centers. Except as noted below, the ARC is charged with designation of shelters, provision of supplies, and deployment of volunteer and paid staff. Supplies usually consist of a limited variety of food and an even more limited range of medical supplies. Nurses either may be volunteers or ARC professionals, and doctors normally are volunteers.

For the past several years the ARC has followed a policy that has led to the exclusion from shelters of many persons, most of whom would be considered disabled, who are frail or who have serious medical conditions. In Numbered Notice 5 to all chapters, dated March 25, 1987, the national ARC said:

The American Red Cross cannot and should not guarantee comprehensive medical services for the frail elderly, post surgical, home care patients, and others in need of specialized medical care (e.g. stroke victims, dialysis patients, or those

requiring specialized medical equipment, such as oxygen, urinary catheters, tube feeding, intravenous fluids, etc.). The health of the local community and the responsibility for the provision of care for disaster victims with such special needs rests with local public health authorities ... With the reaffirmation of current regulations and procedures affecting Red Cross health

01-03527

services in shelters, the American Red Cross and its individual chapters will not consider, approve or be responsible for the opening of shelters designated as "special needs" shelters.

In Numbered Notice 56 of January 3, 1992, ARC reiterated the policy as follows:

Because the level of care required exceeds Red Cross protocols, responsibility for care of these shelter residents rests with Public Health authorities, who are responsible for the health of the general public. This responsibility MAY NOT (emphasis in original) be delegated to Red Cross. Red Cross may augment public health staff upon request, provided sufficient local Disaster Health Services staff with the appropriate clinical skills are available; however, adequate personnel to cover our own mission must remain our priority.

Both Numbered Notices are attached.
In support of its policy, the ARC argues that these so-called "special needs" persons should go to a hospital or other medical facility instead of a shelter. Many such people, however, are not actually in need of hospitalization, and would not be admitted. Even if they required hospitalization, they might find themselves in a situation in which the medical facilities have evacuated and closed. Not all "special needs" shelters would require comprehensive medical care, but observation and some sort of support. Public health departments rarely have the staff and expertise to deal with large numbers of frail elderly or medically impaired persons.

This letter was drafted prior to the Northridge earthquake of January 1994. This office has been informed by reliable sources that few, if any, Red Cross shelters in greater Los Angeles have been accessible. Reports have come to us of people being turned away from shelters who did not have serious medical conditions, but were simply in wheelchairs.

Our interest in this subject stems from the potential relationship possible between local ARC chapters and the jurisdiction's Emergency Management Agencies (EMA's), most of which receive Federal financial assistance from FEMA through the annual Comprehensive Cooperative Agreement. That relationship varies from community to community. To cite an example from one end of the continuum, the Sarpy County, Nebraska, EMA does not participate in any aspect of sheltering, including the designation of shelter sites. By contrast, the San Francisco Office of Emergency Services is heavily involved in site

selection. The Dade County, Florida, EMA entered into an agreement with the Miami ARC to provide medical staff for "special needs" shelters during Hurricane Andrew.
01-03528

In summary, our questions are:

1. Is the current ARC policy a violation of Section 504 or of Titles II or III? If so, why? If not, why not?

2. What sort of physical or other type of access is legally required in a mass care shelter?

3. Is an EMA in violation of these statutes or implementing regulations by participating in any portion of shelter operations?

If you have questions or require further information, please call Alan Clive, Civil Rights Program Manager, at 646-3957 (V) or 646-3401 (TDD).

Sincerely,

Adell Betts
Director
Office of Equal Rights

N O T I C E

Date: Jan 3, 1992
Number: 56
Originating Department: Disaster Services
Intended Audience: All paid and volunteer Disaster Services staff, Chapter Chairmen and Managers, all ARC 3000 Series recipients
Subject: DISASTER HEALTH SERVICES COVERAGE IN SHELTERS

The purpose of this Numbered Notice is to provide an update and clarify issues surrounding the provision of medical and nursing services in Red Cross operated shelters. This Notice supplements Numbered Notice #5, and will delineate the roles and responsibilities of Red Cross Disaster Health Services and those of Public Health. It also provides an organizational definition of the term "special needs".

A memorandum to Disaster Services from the Office of the General Counsel, National Headquaters, concerning "special needs shelters" states the following:

"In the past we have had several discussions concerning the American Red Cross' responsibility or authority to open special needs shelters. A Numbered Notice dated March 25, 1987 was issued in an attempt to clarify that the Red Cross cannot guarantee comprehensive medical services for the frail elderly, post surgical, home care patients, and others in need of specialized medical care. That Numbered Notice reiterated long-standing Red Cross policy. The Red Cross should assist in the supplementation of these types of health care services when so requested by the local health authorities. However, the Red Cross should not hold itself out as operating special health care shelters. If a Red Cross chapter were to open such a special facility, it would be serving as a pre-hospital facility requiring access to more sophisticated services and products than are typically available at a Red Cross first aid shelter."

DHS Responsibilities in a Shelter

DHA responsibilities are limited to first aid level care of all shelter residents. The limits of this care are spelled out in the Disaster Health Services Protocols (ARC 3050P). These protocols are to be signed yearly by a local doctor, and changed, as necessary, to reflect new research findings and procedures about items listed in ARC 3050P. An example of a protocol that should be changed is the treatment for a snake bite which, in the Advanced First Aid and Emergency Care textbook, is an outdated procedure. The physician signing the Protocols cannot add responsibilities or types of treatment to those issued by national headquarters.

In addition to providing first aid care, DHS workers provide access to medical care and health services by:

* making assessments of the health needs of the shelter population.
* securing the services of a licensed mecical practitioner (M.D., D.O., dentist, opthomologist, etc) for a shelter resident needing such services. Doctors working as Red Cross volunteers in shelters are subject to the same levels of care provision as all other DHS workers, and as described in the current edition of Advanced First Aid and Emergency Care. They may make assessments, and recommend transport to a medical facility for treatment of conditions exceeding the level of care allowed by ARC 3050. Under these guidelines, doctors will be covered by Red Cross general liability insurance. Victims requiring more comprehensive medical services from a doctor should be referred to the doctor's office. If necessary, payment may be made by Red Cross based on the guidance supplied in ARC 3050.

* requesting assistance from the local EMS provider or private ambulance company for a resident who requires emergency transport to a facility which provides direct medical care.

* making arrangements through a licensed medical practitioner for replacement of prescription items needed by a shelter resident.

* through coordination with Mass Care, securing the proper types of food for residents with special dietary needs, either provided by the Mass Care function or through the dietary department of a local hospital.

DHS personnel are also responsible for acting in a liaison capacity between shelter management and nursing home and Public Health administrators.

Disaster Operations
American Red Cross National Sector Washington, D.C. 20006

Notice

Date: March 25, 1987
Number: 5
Originating Department: Disaster Operations
Intended Audience: Field Management, Disaster Services Directors and ARC 3000 Series Recipients
Subject: Policies and Procedures Affecting Health Services in Shelter Situations

A number of current trends in health care are impacting or may soon impact the provision of health services offered in Red Cross shelter situations. The regulations and procedures governing the provision of disaster health services in shelter situations are designed to promote health, to prevent disease, to treat minor illnesses and injuries and to refer for medical care the seriously ill and injured. To accomplish this, twenty-four hour medical and nursing coverage must be established for all Red Cross shelters.

The American Red Cross cannot and should not guarantee comprehensive medical services for the frail elderly, post surgical, home care patients, and others in need of specialized medical care (e.g. stroke victims, dialysis patients, or those requiring specialized medical equipment such as oxygen, urinary catheters, tube feeding, intravenous fluids, etc.).

American Red Cross Form 6470-E
01-03532

The health of the local community and the responsibility for the provision of care for disaster victims with such special needs rests with local public health authorities. At the request of said authorities, the American Red Cross may assist in the supplementation of services at the request of and under the supervision of the local health authorities. When such a request is made, disaster health services provides a professional assessment of the health needs of shelter residents and recommends appropriate Red Cross action.

The director of the disaster relief operation, disaster health services, and the local health authorities then jointly determine the most appropriate plan of action to meet those needs. Should the solution be the opening of a temporary infirmary within the shelter, the procedures in ARC 3050 must be followed. The local public health authority must make such a request and is responsible for the supervision of personnel, provision of care and general operation of the infirmary. The Red Cross assists, supplements, and cooperates to the extent jointly agreed upon.

With the reaffirmation of current regulations and procedures affecting Red Cross health services in shelters, the American Red Cross and its individual chapters will not consider, approve or be responsible for the opening of shelters designated as "special needs" shelters. Red Cross units in areas of the country vulnerable to disasters must ensure that preparedness plans include agreements with the local public health authorities in the event that temporary infirmaries must be established within shelters. Referrals within the local community for specialized care for disaster evacuees should be determined before a disaster strikes. A Red Cross chapter may not assume financial, administrative, or medical responsibility for "special shelters".

For additional information regarding this topic, units may contact the National Director of Disaster Operations, Directors of Disaster Services at the Operations Headquarters or the following individuals:

Judy Isaacson, RN, Chief of Disaster Health Services, MOH and
Functional Lead for DHS

Patricia Snyder, RN, Volunteer Consultant for Disaster Health
Services, WHO

Patricia Watts, RN, Chief of Disaster Health Services, EOH
01-03533

The Honorable Barbara Boxer
United States Senator
1700 Montgomery Street
Suite 240
San Francisco, California 94111

Dear Senator Boxer:

This letter is in response to your inquiry on behalf of your constituent, XX . XX feels that the San Francisco Municipal Railway ("MUNI") has violated the Americans with Disabilities Act ("ADA") by not providing access for persons with disabilities in its light rail system, and by not providing paratransit. Specifically, XX states that there are no wheelchair accessible features at the train station near her home that is on the "N-Judah" line within MUNI's light rail system. In addition, XX apparently has not received any response to requests for paratransit service.

Subtitle B of title II of the ADA establishes accessibility standards for the operation of public transportation systems. The Department of Transportation is responsible for implementing subtitle B of title II and its regulations. Under title II all public entities that provide designated public transportation by means of light or rapid rail must make key stations on its system readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs. See 42 U.S.C. §§ 12141(2), and 12147(b)(1) and (2); 49 C.F.R. § 37.21(a)(1) and (b), and 37.47(a). Under Department of Transportation regulations, all public entities, including MUNI, were required to designate key stations in their system and submit a plan for compliance with the ADA. Key stations include those stations serving major activity areas such as transfer stations. See 49 C.F.R. § 37.51(b). MUNI designated approximately 37 stations in its light rail system as key stations. Only these key stations are required to be accessible for persons with disabilities.

cc: Records; Chrono; Wodatch; Magagna; Pestaina; McDowney; MAF:
FOIA
udd\pestaina\sfmuni\muni.cgl

01-03534

The ADA provides that all key stations were to be accessible, with the exception of the installation of detectable warnings, by July 26, 1993. MUNI, however, received an extension of this deadline until December 1996 for 20 of its key stations because it was determined that extraordinarily expensive structural changes were necessary at these stations to improve station accessibility for riders with disabilities. Seventeen key stations were still required under the ADA to be accessible by July 26, 1993. MUNI did not have these seventeen stations fully accessible by that date. The Department of Transportation has been attempting to negotiate a voluntary compliance agreement with MUNI to bring it into full compliance as soon as possible. If these negotiations are not successful, the Department of Justice may seek relief in court.

XX does not indicate in her letter the name of the station that is located near her home. Thus we cannot determine whether it is one of the key stations required by the ADA to be accessible. If it is a key station, but it is one of the stations that MUNI received an extension on, it is not required to be accessible under the ADA until December 1996. If it is one of the seventeen stations that is presently in noncompliance with the ADA, XX has a private right of action against MUNI for any damages that she has suffered as a result of MUNI's failure to make these stations accessible by July 26, 1993.

Under the title II, every public entity operating a fixed route system must also provide paratransit or other special service to individuals with disabilities that is comparable to the level of service provided to individuals without disabilities who use the fixed route system. This paratransit requirement applies to all public fixed route transportation, with the exception of commuter bus, commuter rail, and intercity rail systems. Public entities were required to begin implementation of their paratransit plan by January 26, 1992. Full compliance is required no later than January 1997.

The Department of Transportation will be able to provide more specific information regarding the current status of MUNI's implementation of its paratransit plan, as well as standards for

eligibility for paratransit service. Accordingly, we have taken the liberty of forwarding a copy of your inquiry to that agency and have requested that they reply directly to you.

I hope this information is helpful to you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

Pg 1 of 7 June 14, 1994-San Francisco Fact Letter

Dear Board of Supervisors and Fellow Citizens:

This letter supports the "rights" and the "laws" of the Americans with Disabilities Act. We must at all cost honor the "basic civil rights," and policy issue it affords, which is "timely transportation.

Transportation is a matter that cuts across all communities needs. As a City, State and Federal Law, now almost three year's into law, it has not been honored, to date. As a board member I have the honor of serving for citizens right's who address issues, ordinary citizens do not have to face on a daily basis. This time our protest unites with fellow San Franciscans, To do no harm and one that does not censure nor present, "unduehardship".

A city's governing leaders and agencies must plan effective lasting measures that fullfill, without discriminating health needs, mentally and physically; which protects individuals which neither "undermines efforts to educate, rehabilitate or offers employment."

As stated above, "this ADA Law, gives civil rights," and protections to individuals w/disabilities-on the basis of race, color, sex, national origin, age and religion. It guarantees equal opportunity in public accommodations, employment, 'transportation.' Also to State and local gov't services and telecommunications. This measure of this Federal Law, enforces, fair, swift effective enforcement of a "high priority

For over one year I have had my civil right's taken from me. Three blocks from my home my local tram, "N Judah" has no wheelchair accessible feature like the N,L,M,J,K, and other city electrical buses, there is no assuredness that my city favorably and legally meet my needs as a person with disabilities: Not all lines througout my city can be accessed, nor do all public transportation systems accord me safe ILLEGIBLE for my safety from the elements of

01-03537

stops discriminates even further, as they are not wheel-chair accessible
The non-existence of public phones which was once available at these stops,
further takes away my rights, which are accorded citizens on every street
block, who are able to stand, and may post haste, dial to receive any
degree of interface, including for "emergency"; for medical or legal
or law enforcement, certainly life-threatning issues. This basic need
curtails or needs just as much as public accessability to any
and all needs, are accorded the public at large.)

I have this last year not been idle, although this lack of transportation
has been at a terrible loss. It has denied me, spiritual uplift, follow-thru
for physical therapy since last March for major back surgery, and present
final diagnosis of multiple sclerosis, thorough interface with support
services
of my physicians, my therapist's, certainly the right to any health or mental
health accord, and my ability to serve appreciatively on this board, the
S.F. General Hospital Advisory Board, the Sunset Coalition (Neighborhood),
adequately raising awarness and funding for my own non-profit foundation
The Center For AND BY Victims And Survivors of Violent Trauma (& Abuse).

Para-transit, an agency under the Municipal Railway Transportation
in San Francisco, is legally bound, to answer to those within 21 days.
My initial communication, w/paratransit, stressed the priority of my
gaining any such access, with having a terminal illness, such as cancer
Aids, etc. To have to disclose any such information seems demeaning,
discriminating and "medically invasive." To be told w/o apology, and
sensitivity, that, "one only," has a disability, such as MS, and forced
to wait anywhere from 3 months to 21/2 years, is unforgiveable.
To be kept w/o the knowledge and actual situation (due to added

ILLEGIBLE
01-03538

avenues as well.) Much more injurious has been the final cut from long-term friend's, associates, and family, and extended family. I am punished by the knowledge, I cannot vote, and am put in the undignified position of being w/o just cause, a prisoner, in my own home, and community.

The final blow came from Mayor Jordan's office, and his Security Police person for City Hall, for the Mayor himself. It is especially that much more irreprehensible, as I had worked with positive action for Mayor Jordan's campaign. Mike took it upon himself to answer for the Mayor and City Hall. With each statement, he directed to my husband (a medic-and Vietnam Veteran) and myself he ended it with, "Why are you protesting"? His dialogue (not verbatim, but close to) stated:

* Why are you protesting?
    *This is the greatest country in the world!
    You, just got your diagnosis of MS, these last months.

* I told him of the difficulty of crossing a 12 lane intersection
  the difficulty of going up-hill and onto sidewalks that
    were blocked by cars, trucks, motorcycles, and of my having to
    continue out into the street.
    His comment chilled me - "I don't want to hear about
    "your difficulties." "I" just want to know, where you
    can access any bus."
    *When I told him how much our families valued
    freedom, (4 sides of our families endured communism,
    Fascism ILLEGIBLE concentration camps, genocide,

XX

"I know, I've been to Russia.") "You" just can't walk into the Mayor's
office.

* I then stated that I had written Mayor Jordan.
He asked you did? I said, yes by the "Super Highway", as President Clinton had stressed.
His comment, "I don't believe in them, I don't trust them"! He told me I would then have to go home and put into "chronological order every single incident, write down all names, places and all interface
of who or what had, had part, in my last year of "transportation difficulties." Then send it in, -wait for a return call or letter, and then proceed to make an appointment, and wait for that day
I told him people w/MS, have great difficulty with muscle tone and become very fatigued, etc.
He stated, "Oh, you have plenty of time, believe me."
I went on to state that certain public personalities were in belief of my protest and stance. I told him this was not, a political issue, but that people from all continuum were supportive and extremely needful of "Basic Transportation
I told him, that my friend, Senator Kopp had written a letter to Mr. John Stein of Muni, 2 times (once in January and again in April, of which neither were answered, & still to date, nothing
He answered, "Oh, I'm meeting Senator Kopp, tonight, for dinner."
I further told him a copy of my letter had gone to President Clinton Senator Kennedy, and he in turn, sent my letter to Senator Boxer, who sent a letter to, Mayor Jordan.
I lastly told him, I had met with the various Supervisors, Office ILLEGIBLE Hsesh, Halihan, Kennedy, etc., stating they were very supportive of my stance, and protest!
01-03540

XX

His reply -

> "Oh sure, this is election time, go to them, oh, you might even go on Monday afternoon and to the Supervisor's chamber at 4:00 pm. "They", will let you speak for 3 minutes."

Mike went on to say a few more statements, on the mayor's behalf. Mike is a policeman. He did not hit me physically, but he hit me, way past the point of acceptability. To be addressed in such a manner "on the be-half of any public official of whom our taxes, "employ", gives the name "freedom", the worst respect, from an office that enerates, "law and order".

The City Hall press when asked to take up my story, said, "We have more important issues." Again, I am worried as are my constituents, and fellow Americans in regards to the indifference and apathetic total irresponsibility of those who are healthy, are gainfully employed, and w/o the overwhelming difficulties that disabled and "handicapable" citizens face, moment to moment.

Please know that this letter has taken me through the entire night to be readied for this Board to address, with a joint letter of support. To write (handwrite) a letter is very painfull and exhausting. Yet I feel it my responsibility as an American to point out what constitutes the very framework and structure a city, state or country should and must comply with, no matter what the cost. When ILLEGIBLE

The First Amendment guarantees us the freedom to speak,
to write, to be seen, and to be heard, etc.
For 46 years, I remained in silence, to the deafining remainder of violence, abuse, torture, and being buried alive. Yet they could not kill me! I sustained injury far beyond words from infancy to 20 years of age. In the adult years, my life was dedicated to peace, (as it is today) yet, - the insufferable insensitiveness of an - uncaring world, whose abuse was just as bad at all levels of interface. Although, I am self-taught, - to date I am with a remainder of a grave learning disorder, loss of education, employment (in the ordinary sense), economical enjoyment(s), extreme depressive states, and now unable to address the further of my life due to "lack of transportation."

I have been in community outreach and support of all citizen's, since the age of 15. My efforts for the people I serve ILLEGIBLE is to offer an understanding to any/all victims & survivors, (that is stated at the highest regard and integrity) of how to turn around an adversity to positive life full-fillment. I teach people to not cope, not survive, but "live life".

Please use my name for those who are weakened by a system and a law that hold no regard for "human dignity". Use my name when you think this letter serves but one, for it is in the name of all people young and old who have no advocate, no assistance or follow thru of support in any manner, nor have the broadened horizons of health, education, employment, social, friend, or family affiliations.

01-03542

In short, we must not, and cannot curtail the avenues of "peaceful actions."
My success, in this present issue, and venture and journey of this cities life must be an action that represents this city, this state, this country, and in total, is all our success!

In closing, I will not keep silent! I have seen the ILLEGIBLE of abuse from near and far. Regardless of my losses, my lack of education, and or degree. Regardless of the "labels" others, strangers, books and physicians, as a free citizen I have the right to uphold everything that the constitution gurantees us all. At 51, the only disabling feature I feel I have is the action of not "trying to reach people in a "timely manner". Still I cannot be held responsible for any agencies, or person's, "inaction", locally or nationally, ILLEGIBLE.

The conflict comes when we sit on the fence and make no valid choices of fighting for the right's of life, liberty and the pursuit of happiness.

Thanking you, I remain most

Respectfully,
XX

June 14, 1994
San Francisco
XX

UPDATE: San Francisco, Ca. XX

As of 11:30 AM this morning, I received mail from, James Ross - Community Services - Assistant For, The Office of The Mayor of San Francisco.

At a meeting held at the Sunset Coalition this past week, I addressed Mr. Ross and those present, of the overwhelming difficulties the experiences (personally) and the unresponsiveness for the disabled, and to "Handicapable community's, of no "timely transportation".

The added issue of the Security Officer to the Mayor (City Hall & Home, & car) and his insensitivity and callous regard was expressed. I followed up my story with calling Mr. Ross for the receipt of a letter of "apology from the Mayor", and from "Mike", his Police Security Associate.

The enclosed letter is what I received. I find this to be extremely unacceptable to myself and or in receivorship of any San Francisco citizen - Disabled, or not! Please share this info. with all you know & ask them to send letters to me at above address. Please send me your letter of response and support that I may take to the air-waves, and the public at large.
Sincerely,

01-03544

DEC 19 1994

The Honorable Bob Kerrey
United States Senator
7602 Pacific Street
Suite 205
Omaha, Nebraska 68114

Dear Senator Kerrey:

This is in response to your inquiry on behalf of your constituent, XX , who is concerned that the Americans with Disabilities Act (ADA) may require the installation of an elevator in his church.

Title III of the ADA prohibits discrimination on the basis of disability by places of public accommodation. Covered entities may be required, among other things, to remove barriers to access in existing buildings if it is readily achievable to do so. However, the ADA specifically exempts religious organizations and entities from its coverage. 42 U.S.C. §12187. Therefore, the ADA imposes no obligation to install an elevator upon your constituent's church.

For further information regarding the ADA, your constituent may call our ADA information line at (800) 514-0301 (voice) or (800) 514-0383 (TDD). I hope this information is helpful to you in responding to your constituent.

9/23/94. Dear Senator Kerry
It seems all that Congress
does is pass regulations
that create hardships.
Example is DISABILITIES ACT.
We have 8 parking spaces
FOR DISABLED people
8 spaces at our Church
that have not been even
used ONCE in 5 years,
yet we are short of
parking for the non-
disabled. Now we are
compelled to install a
$75,000 elevator for DIS
ABLED of which we have
none. The problem G.D. ILLEGIBLE
is the FEDERAL XX
GOV'T. Please correct. XX

01-03548

DJ 202-PL-820

DEC 19 1994

David I. McCaskey
Attorney at Law
24 West Beverley Street
PO Box 1134
Staunton, Virginia 24402-1134

Dear Mr. McCaskey:

This letter is in response to your inquiry concerning provision of auxiliary aids and services and, more specifically, your request for an individual determination of what constitutes an "undue burden" under title III of the Americans with Disabilities Act.

The Americans with Disabilities Act (ADA) authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. It does not, however, constitute a legal interpretation, and it is not binding on the Department.

As your letter indicates, you are both familiar with, and sensitive to, the need for the provision of auxiliary aids and services in order to ensure effective communication under title III of the ADA. The auxiliary aids requirement is intended to be flexible, reflecting the variable nature of what constitutes "effectiveness" in different circumstances. In addition to the specific nature of the disability involved, factors used to determine effectiveness in any particular situation include the length, complexity, and significance of the information being exchanged. Many lawyer-client discussions, even those which might be characterized as routine, require lengthy, complex communication that has the potential for long-term impact on the client's well-being. Further discussion of the effective communication requirement may be found on page 35567 of the enclosed title III regulation.

You are also familiar with the provisions of section 36.301(c) which require that the public accommodation absorb the costs associated with the provision of auxiliary aids and services, unless this would result in an "undue burden". As

cc: FOIA

01-03549

provided in section 36.303(f), the term "undue burden" means "significant difficulty or expense". In determining whether the provision of an interpreter or other aids or services would result in an undue burden, the legal practitioner should consider the overall financial resources of the practice, not just the fees paid for a particular appointment or service. The practitioner should weigh other factors that would minimize the degree of burden on the practice, such as the ability to spread costs throughout the general client population and the opportunity to exercise alternative measures, such as those you describe, which have the effect of further reducing the financial burden on the practice. Tax incentives, particularly tax credits for small businesses for costs incurred to provide auxiliary aids and services, are also available to you. Eligibility criteria for this credit are found in Publication 907, available from the IRS.

Your letter requests a determination from the Department of Justice that it would be an undue burden for you to provide interpreters in your situation. However, because undue burden must be determined on a case-by-case basis in light of the particular circumstances at issue, the Department of Justice does not make such determinations absent a complaint investigation. It is up to the public accommodation to determine whether providing an auxiliary aid would result in an undue burden and then to justify its determination in the event that an enforcement action is initiated by the Department of Justice or by a private individual.

I hope this information is helpful to you.

Sincerely,

John L. Wodatch
Chief
Public Access Section

01-03550

DJ 202-PL-882

DEC 20, 1994

Mr. Daniel Harkins
Thermal Design, Inc.
P.O. Box 324
Stoughton, Wisconsin 53589

Dear Mr. Harkins:

This is in response to your letter regarding the requirements of the Americans with Disabilities Act of 1990 (ADA) for newly constructed buildings.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that have rights or responsibilities under the Act. Pursuant to that authority, this letter provides informal guidance to assist you in understanding the ADA. However, this technical assistance does not constitute a legal interpretation of the statute, and it is not binding on the Department.

Your letter asks whether the ADA requires installation of an elevator in a planned office building. According to your letter, the planned building would contain three floors containing approximately 5,000 square feet per floor. There would be exterior accessible entrances to the bottom and middle floors. There would be an interior stairway between the middle and top floors. There would be no interior route between the bottom and middle floors. Rather, to get from one floor to the other, a person must exit the building and drive or walk around the exterior of the building to the entrance to the other floor.

The Department of Justice's regulation implementing title III of the ADA requires covered entities to comply with the ADA Standards for Accessible Design (Standards). Section 4.1.3(5) of the Standards requires one accessible passenger elevator to be provided in all "multi-story" buildings unless they fall within the elevator exception. The elevator exception exempts most buildings with less than three stories. Your letter asks whether, because of the lack of an interior route between stories, your proposed building can be treated as two separate buildings; one having two stories and falling within the elevator exception and the other having only one story and not required to include an elevator.

cc: Records, Chrono, Wodatch, Blizard, Hill, FOIA, Friedlander
n:\udd\hille\policylt\harkins.ltr\young-parran

01-03551

Because your proposed office building is a single structure, it must be treated as a single "building" within the ADA definition. That proposed building will include three stories, as defined by the ADA. The ADA's elevator requirement for new construction does not depend on whether an interior route between stories is otherwise planned.

I hope this information is helpful to you and fully responds to your inquiry.

Sincerely,

John L. Wodatch
Chief
Public Access Section

01-03552

DJ 202-PL-728

Ms. Doris Phillips,
Executive Director
Living Independence for Everyone, Inc.
17-19 East Travis Street
Savannah, GA 31406

Dear Ms. Phillips:

This letter is in response to your inquiry into whether rental car companies must provide lift-equipped vans under title III of the Americans with Disabilities Act of 1990, 42 U.S.C. §§ 12181-89, and the Department of Justice's implementing regulation, 28 C.F.R. pt. 36 (enclosed). We apologize for our delay in responding.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation or legal advice and it is not binding on the Department of Justice.

Title III requires public accommodations to remove transportation barriers to access in existing vehicles where it is readily achievable to do so. 42 U.S.C. § 12182(b)(2)(A)(iv); see also 28 C.F.R. § 36.304. Congress specifically stated in the ADA, however, that companies are not required to retrofit vehicles by installing hydraulic or other lifts. Id. Moreover, companies who are in the business of renting vehicles are not required to purchase or lease lift-equipped vehicles.

It is our understanding that some of the nationwide rental companies have entered into cooperative agreements with companies who specialize in renting lift-equipped vans, making these services more generally available than they once were.

cc: Records; Chrono; Wodatch; Breen; Mobley; MAF; FOIA
udd\mobley\pletters\phillips

01-03553

I have enclosed the Department's Title III Technical Assistance Manual which was written to guide individuals and entities having rights and obligations under the Act toward a fuller understanding of the law. Pertinent discussion is found at section III-4.4000 (removal of barriers), et seq.

If you need further assistance, you may call our toll-free information line at (800) 514-0301, 1:00 p.m. to 5:00 p.m., EST, Monday through Friday.

Sincerely,

John L. Wodatch
Chief

Enclosures (2):
Title III Regulation
Title III Technical Assistance Manual

01-03554

DJ 202-PL-919

Mr. Robert E. Mackensen
Department of General Services
State Historical Building Safety Board
400 P Street, 5th Floor
Sacramento, California 95814

Dear Mr. Mackensen:

This is in response to your letter regarding the application of the Americans with Disabilities Act (ADA) to alterations to historic buildings owned by State or local governments.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that have rights or responsibilities under the Act. Pursuant to that authority, this letter provides informal guidance to assist you in understanding the ADA. However, this technical assistance does not constitute a legal interpretation of the statute, and it is not binding on the Department.

Title II of the ADA applies to State and local governments, and the departments, agencies, and instrumentalities of such governments. Title II prohibits discrimination by such public entities on the basis of disability. If a facility is altered by, or on behalf of, or for the use of a public entity in a manner that affects or could affect the usability of the facility, the altered portion of the facility must be made accessible to the maximum extent feasible. The alterations requirement is not dependent on whether the public entity operates a program in the facility. Nor does this general obligation differ according to the type of program offered.

Title II provides that alterations to historic properties must comply, to the maximum extent feasible, with either §4.1.7 of the Uniform Federal Accessibility Standards (UFAS) or §4.1.7 of the ADA Standards for Accessible Design (Standards). Both UFAS and the ADA Standards provide alternative accessibility requirements for some elements in situations where full accessibility would threaten or destroy the historic significance of the building. Neither UFAS nor the ADA Standards look to the

purpose for which the historic building is used in determining

cc: Records, Chrono, Wodatch, Hill, FOIA, Friedlander
n:\udd\hille\policylt\mack.ltr

01-03555

whether application of the alternative accessibility requirements is permissible.

For buildings that are not being altered, title II requires that program access be provided. If a historic building hosts a program of a State or local government, that program must be made accessible. If the program is not one of historic preservation, it may be possible to achieve program access by relocating the program to an accessible site and the historic building may not need to be made accessible. If, however, the program involves the historic preservation of the building itself, relocation of the program would defeat the purpose of the program. In that situation, the building would have to be made accessible unless to do so would threaten or destroy the historic significance of the building.

I hope this information is helpful to you.

Sincerely,

John L. Wodatch
Chief
Public Access Section

XX
Saint Paul, Minnesota 55104
Dear XX

This is in response to your request for an official policy statement by the Department of Justice (the Department) as to whether the Department considers obesity to be a disability. While you have not specified the statute you believe to be applicable to your situation, we have analyzed your question under the Americans with Disabilities Act of 1990 (ADA). The ADA prohibits discrimination against persons with disabilities on the basis of disability by certain private employers (Title I), by State and local governmental entities (Title II), and in places of public accommodation and commercial facilities (Title III). For purposes of convenience we have referred to the provisions of our Title II regulation in responding to your letter; however, the analysis would be the same under Titles I and III.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities with rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the requirements of the ADA. It does not, however, constitute a legal interpretation and is not binding on the Department.

While the following discussion focusses on the ADA, you should also be aware that disability-based discrimination is prohibited by Section 504 of the Rehabilitation Act of 1973, as amended (Section 504). Section 504 covers both recipients of Federal financial assistance and the operations of Federal executive agencies. Our analysis of the questions presented in your letter is the same under both the ADA and Section 504.

To be considered a person with a disability under the ADA, an individual must (i) have a physical or mental impairment that substantially limits one or more major life activities, (ii) have a history of such an impairment, or (iii) be regarded as having such an impairment. See § 35.104 of the enclosed Title II

regulation (Definitions).

Records CRS Chrono MAF Morrow
udd.pecht.techasst.XX .ltr

01-03557

The Title II regulation defines a physical impairment as

> Any physiological disorder or condition, cosmetic disfigurement, or anatomical loss affecting one or more of the following body systems: Neurological, musculoskeletal, special sense organs, respiratory (including speech organs), cardiovascular, reproductive, digestive, genitourinary, hemic and lymphatic, skin, and endocrine.

Generally, normal deviations in height, weight, or strength, that are not the result of an underlying physiological disorder are not impairments. Thus, simply being overweight is not considered an impairment. However, at some point, obesity itself may be considered an impairment. While the point at which this occurs must be considered on a case-by-case basis, it is generally accepted that morbid obesity, which is defined as body weight 100% over normal weight, is an impairment. In addition, an obese individual may have a related physiological disorder, such as hypertension or a thyroid disorder, that either causes or is caused by obesity. These physiological disorders are, by definition, impairments. Thus, an obese individual with such an impairment or impairments meets this threshold requirement without need for further inquiry.

However, it is critical to note that the mere presence of an impairment, such as morbid obesity, does not necessarily mean that a person is considered to be a person with a disability under the Act. Whether an obese individual is considered to be an individual with a disability depends upon whether the obesity substantially limits, has substantially limited, or is regarded as substantially limiting one or more major life activities. See § 35.104 of the Title II regulation. As the Equal Employment Opportunity Commission (EEOC) notes in the interpretive guidance to its regulation implementing Title I of the ADA (employment), "... except in rare circumstances, obesity is not considered a disabling impairment." 29 C.F.R. pt. 1630 app. § 1630.2(j).

If a person whose obesity is considered a disability under the ADA is discriminated against on the basis of his or her disability, that individual is covered by the ADA. But, an obese individual is not protected by the ADA when that person is discriminated against on some other basis, such as his or her appearance. Please note, however, that if an obese individual is discriminated against by an entity covered by the ADA because that entity regards the individual as substantially limited in one or more major life activities, that individual may be protected by the ADA even though he or she does not have a

substantial limitation. The "regarded as" prong of the definition of disability is discussed on page 35699 of the Title II regulation.

01-03558

There is no Federal law that protects obese individuals from discrimination on the basis of appearance. Such discrimination may be protected under State law and we suggest that you contact the appropriate agency in your State to determine the extent of the protection offered to obese individuals. You may also wish to contact the EEOC to request a copy of its Title I Technical Assistance Manual, which covers issues relating to employment and contains a copy of the Title I regulation. The EEOC can be reached at 1-800-669-3362 (voice) or 1-800-800-3302 (TDD).

I hope this information has been helpful to you.

Sincerely,

Merrily A. Friedlander

To Whom It May Concern:

I have been advised that your agency has defined obesity as not being a disability.

Please provide me with an official policy statement for this decision, including the reasons used to make it.

Further, will you please advise me what legal protection a person who is overweight and encounters discrimination in an employment or other situation is afforded? How would an employer be able to use appearance as a factor in not hiring, not promoting, or firing an obese employee?

Thank you.

Sincerely,
XX

Saint Paul, MN 55104

01-03560

DEC 29 1994

The Honorable Phil Gramm
United States Senator
2323 Bryan Street, #1500
Dallas, Texas 75201

Dear Senator Gramm:

This is in response to your inquiry on behalf of your constituent, Dick G. Ellis, M.D., about the obligation of a health care provider, under title III of the Americans with Disabilities Act (ADA), to provide auxiliary aids or services to persons with hearing impairments. Dr. Ellis asks if the ADA requires a physician to provide interpreters on demand for patients who have hearing impairments.

The Department of Justice is committed to ensure the effective implementation of the auxiliary aids requirements of title III by health care providers. We are concerned, however, that there are some significant misperceptions of the scope of these requirements that may be deterring compliance.

One of the most common misconceptions about the ADA is that health care providers are required to provide interpreters whenever they are requested. In fact, title III of the ADA requires public accommodations, including health care providers, to furnish appropriate auxiliary aids and services, including sign language interpreters, where necessary to ensure effective communication with individuals with disabilities. Health care providers should consult with their patients to determine what type of auxiliary aid or service is appropriate for particular circumstances. However, health care providers are not required to provide sign language interpreters for deaf patients upon demand. Title III of the ADA does not require a provider to accede to a patient's specific choice of auxiliary aid or service as long as the provider satisfies his or her obligation to ensure effective communication.

01-03561

In determining what constitutes an effective auxiliary aid or service, health care providers must consider, among other things, the length and complexity of the communication involved. For instance, a note pad and written materials may be sufficient means of communication in some routine appointments or when discussing uncomplicated symptoms resulting from minor injuries. Where, however, the information to be conveyed is lengthy or complex, the use of handwritten notes may be inadequate and the use of an interpreter may be the only effective form of communication. Use of interpreter services is not necessarily limited to the most extreme situations -- for example, a discussion of whether to undergo surgery or to decide on treatment options for cancer.

Health care professionals cannot use an unsubstantiated fear of economic loss as a basis on which to refuse to provide auxiliary aids or to refuse treatment for a person with a disability. A health care provider may not impose a surcharge on any particular individual with a disability to cover the costs of providing auxiliary aids and services. Instead, the costs should be treated like other overhead expenses that are passed on to all patients. However, the obligation to provide auxiliary aids and services is not unlimited and a health care provider is not required to provide auxiliary aids and services if doing so would result in an undue burden, that is, a significant difficulty or expense. The factors to be considered in determining whether there is an undue burden include the nature and cost of the action, the type of entity involved, and the overall financial resources of the entity.

Finally, as amended in 1990, the Internal Revenue Code permits small businesses to receive a tax credit for certain costs of compliance with the ADA. An eligible small business is one whose gross receipts do not exceed $1,000,000 or whose work force does not consist of more than 30 full-time workers. Qualifying businesses may claim a credit of up to 50 percent of eligible access expenditures that exceed $250 but do not exceed $10,250. Eligible access expenditures may include the costs of providing auxiliary aids and services to persons with disabilities.

The flexibility of the auxiliary aids requirement, the undue burden limitation, the ability to spread costs over all patients, and the small business tax credit should minimize any burden on health care professionals.

I hope this information will be helpful to you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

Enclosure

September 6, 1994

Senator Phil Gramm
370 Russell Senate Office Bldg.
Washington, D.C. 20510

Dear Senator:

XX

I was very disturbed today to receive the enclosed three pieces of paper from a lady named Chris Sparks at the Goodrich Center for the Deaf, 2500 Lipscomb Street, Fort Worth, Texas 76110-2625. Her phone number is (817) 926-5305.

She essentially informs me that I must pay her or someone from her group $60.00 every time that they accompany a patient to my office as a result of this Disabilities Act. In view of the fact that my office charge is never more than 67% of this, how am I expected to meet this cost, even if I were to collect 100% of all office visit fees. Does this mean that I could be sued for not being willing to see non-emergency deaf patients in my office?

01-03564

It is my understanding that Federal funding for the Goodrich Center for the Deaf and others has been withdrawn and that the Disabilities Act is basically passing this on to the private sector. Is this correct?

Is it possible that I could get a copy of the vote when this bill passed. I would be interested in knowing not only the ones in Texas but from elsewhere.

XX
XX . Therefore, I really would appreciate an answer from you.

Sincerely,

Dick G. Ellis, M.D.

MEMORANDUM ON THE OBLIGATIONS OF DOCTORS AND OTHER HEALTH CARE PROVIDERS UNDER THE AMERICANS WITH DISABILITIES ACT

Title III of the Americans with Disabilities Act (ADA) prohibits discrimination against deaf and hard of hearing people in places of public accommodation. Included within the definition of places of public accommodation is any "professional office of a health care provider," regardless of the size of the office or the number of employees. 28 C.F.R. § 36.104. The ADA therefore applies to doctors, dentists, psychiatrists and psychologists, hospitals, nursing homes and health clinics, and all other providers of mental and physical health care.

Places of public accommodation must be accessible to individuals with disabilities. For deaf and hard of hearing people, this means that they must remove barriers to communication. Doctors and health care providers must make sure that they can communicate effectively with their deaf patients and clients by providing "auxiliary aids and services" for these individuals:

> (c) Effective communication. A public accommodation shall furnish appropriate auxiliary aids and services where necessary to ensure effective communication with individuals with disabilities.

28 C.F.R. 36.303.

"Auxiliary aids and services" expressly include qualified interpreters, transcription services, and written materials, as well as the provision of telecommunications devices for the deaf (known as TDDs or text telephones), telephone handset amplifiers, television decoders and telephones compatible with hearing aids. 28 C.F.R. 36.303 (b) (1).

For individuals who use sign language, interpreters are often needed to provide safe and effective medical treatment. Unless a doctor can communicate effectively and accurately with a patient, there is a grave risk of not understanding the patient's

Funded by a Grant from the U.S. Department of Justice
01-03566

symptoms, misdiagnosing the patient's problem, and prescribing inadequate or even harmful treatment. Similarly, patients may not understand medical instructions and warnings or prescription guidelines without the provision of an interpreter.

The doctor may not charge the patient for the cost of interpreter service, either directly or by billing the patient's insurance carrier:

> A public accommodation may not impose a surcharge on a particular individual with a disability or any group of individuals with disabilities to cover the costs of measures, such as the provision of auxiliary aids, barrier removal . . . and reasonable modifications . . . that are required to provide that individual or group with the nondiscriminatory treatment required by the Act or this part.

28 C.F.R. 36.301(c).

The Justice Department regulation defines a "qualified interpreter" as follows:

> Qualified interpreter means an interpreter who is able to interpret effectively, accurately and impartially both receptively and expressively, using any necessary specialized vocabulary.

28 C.F.R. 36.104. The Justice Department warns that family members and friends may not be able to provide impartial or confidential interpreting in the medical context, even if they are skilled sign language users:

> In certain circumstances, notwithstanding that the family member or friend is able to interpret or is a certified interpreter, the family member or friend may not be qualified to render the necessary interpretation because of factors such as emotional or personal involvement or considerations of confidentiality that may adversely affect the ability to interpret 'effectively, accurately, and impartially.'

56 Fed. Reg. 35553 (July 26, 1991).

When there is a dispute between the health care provider and the deaf individual as to the appropriate auxiliary aid, the Justice Department strongly urges the doctor to consult with the

deaf person about the effectiveness of a proposed auxiliary aid. It also cautions that complex discussions, such as those about health issues, may require interpreter service if that is the

01-03567

communication method used by the deaf individual:

> The Department wishes to emphasize that public accommodations must take steps necessary to ensure that an individual with a disability will not be excluded, denied services, segregated or otherwise treated differently from other individuals because of the use of inappropriate or ineffective auxiliary aids. In those situations requiring an interpreter, the public accommodations must secure the services of a qualified interpreter, unless an undue burden would result.
>
> . . . It is not difficult to imagine a wide range of communications involving areas such as health, legal matters, and finances that would be sufficiently lengthy or complex to require an interpreter for effective communication.

56 Fed. Reg. 35566-67 (July 26, 1991). Typical examples of situations in which interpreters should be present are obtaining a medical history, obtaining informed consent and permission for treatment, explaining diagnoses, treatment and prognosis of an illness, conducting psychotherapy, communicating prior to and after major medical procedures, explaining medication, explaining medical costs and insurance issues, and explaining patient care upon discharge from a medical facility.

01-03568

DEC 29 1994

The Honorable Sam Nunn
United States Senate
303 Dirksen Senate Office Building
Washington, D.C. 20510-1001

Dear Senator Nunn:

This letter is in response to your inquiry on behalf of your constituent, XX who seeks information about the Americans with Disabilities Act (ADA).

XX states her husband is a quadriplegic and is unable to sign his own name, but that she has power of attorney to sign his name for him. XX seeks to file a complaint under the ADA against First Union Bank for allegedly refusing to recognize her husband as the executor of his mother's estate, because of his inability to sign his own name.

Title III of the ADA prohibits discrimination on the basis of disability in commercial facilities and places of public accommodation, including financial institutions. Title III requires, among other things, that owners and operators of places of public accommodation make reasonable modifications to their policies, practices, and procedures, if those modifications are necessary to provide services to persons with disabilities. The only limits on this obligation are that the required modification must be reasonable and may not fundamentally alter the nature of the services provided at the place of public accommodation.

A bank policy of refusing to transact business with persons who cannot sign their own names would be subject to the reasonable modification requirement. The bank would be required to modify its policy, in order to allow a person with a valid power of attorney to sign a document on behalf of an individual who is unable to sign his or her own name because of a disability, if such a modification is reasonable and would not fundamentally alter the nature of the bank's services.

cc: Records, Chrono, Wodatch, McDowney, Breen, Novich, FOIA, MAF

Title III can be enforced by private litigation, alternate dispute resolution such as mediation, or by filing a complaint with the Department of Justice. The Department is not able to investigate all the complaints of title III violations that it receives, and we have determined not to investigate this complaint. However, there are other entities that may be able to assist XX in resolving her complaint. We have enclosed a list of such entities located in Georgia.

In addition, we are enclosing copies of three status reports that detail the actions that the Civil Rights Division has undertaken to enforce titles II and III of the ADA. These reports illustrate that, although the Department of Justice is unable to investigate every complaint that it receives, we are taking strong action to enforce the law. I hope this information is useful to you in responding to your constituent.

If XX wishes to have further information about the requirements of the ADA, she may contact our ADA information line at (800) 514-0301 (Voice) or (800) 514-0383 (TDD) between 10:00 a.m. and 6:00 p.m. Monday through Friday, except for Thursday between 1:00 p.m. and 6:00 p.m. EST.

I hope this information is useful to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

U.S. Representative Mac Collins
173 N. Main St
Jonesboro, Ga 30236

Dear Sir:

I have been informed that for a complaint to be filed regarding the American Disabilities Act, I start with my congressman, therefore I bring to your attention a complaint regard ing the First Union Bank - Fayette Co, Ga, branch and my quadriplegic husband.

My husband and his brother are co-executors of their mother's will which has been probated and on file in the Fayette Co. Courthouse with me as power of attorney to pay bills, cash checks, etc. since my husband is unable to sign as he has no use of his arms and hands and his brother lives in New York.

This was researched by our lawyer, agreed on by both co-executors, and all three heirs (my husband, his brother, and sister) and accepted in probate.

Under this arrangement, my husband has "handled" all the business of settling the estate and preparing tax payment. We have had dealings with three

01-03571

Finally, on a third trip to the bank, we were able to accomplish our business by having someone hold my husband's hand and making a mark observed by two bank employees.

I hope to help prevent this from happening to anyone else by writing this. I would like to see this banking facility fined and a formal apology issued to my husband. Their inference that he is incompetent is insulting, discriminatory, and wrong. Just having handicap parking places and curb cuts does not make a place "disabled friendly"

Your attention to this matter is greatly appreciated. I have also made copies to send to my senators, my state government representatives, as well as the president of First Union Bank.

XX

DEC 29 1994

The Honorable Pete Peterson
U.S. House of Representatives
426 Cannon Building
Washington, D.C. 20515-0902

Dear Congressman Peterson:

This is in response to your inquiry on behalf of your constituent, Mr. Nathan Lee Head, regarding the Americans with Disabilities Act (ADA).

Mr. Head's letter expresses concern that legislation regarding accessibility of facilities to people with disabilities requires access to areas such as elevator pits, catwalks, below ground storage and lube pits.

While Florida's State law regarding accessibility may differ, the ADA generally does not require such areas to be constructed to be fully accessible. Rather, the Department of Justice's ADA Standards for Accessible Design (Standards) provide that areas used only as work areas need only be constructed to allow individuals with disabilities to approach, enter, and exit the areas. 28 C.F.R. part 36, Appendix A, § 4.1.1(3). In addition, the ADA Standards provide that accessibility is not required in non-occupiable spaces accessed only by ladders, catwalks, crawl spaces, very narrow passageways, or freight elevators and frequented only by service personnel for repair purposes. Such spaces include elevator pits, elevator penthouses, piping or equipment catwalks. 28 C.F.R. part 36, Appendix A, § 4.1.1(5)(b)(ii).

I hope this information is helpful to you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

October 21, 1994

Senator Pat Thomas
220 Senate Office Bldg.
Tallahassee, Fl. 32399-1100

Mr. Thomas,

Please look into our Passage of Legislation under the Handicap Disability Act, which I am totally in favor of. However, some elments of this program should be reviewed as the intent that was written into law such as making it manditory to give handicap access to such normally dangerous areas as elevator pits, catwalks, below ground storage and lube pits. There are other areas which keep coming up in the waiver process that should be looked into as this process will show some of these areas which keep coming up and that keep being waived doing nothing except adding to the cost of doing business in Florida.

Thank You,

Nathan Lee Head,

JAN 10 1995

The Honorable Robert "Bud" Cramer, Jr.
U.S. House of Representatives
1318 Longworth House Office Building
Washington, D.C. 20515-0105

Dear Congressman Cramer:

This letter is in response to your inquiry (code: 1klh) on behalf of your constituent, Robert S. Moorman, Jr. M.D., who wrote to express his concerns over certain provisions of the Americans with Disabilities Act (ADA), specifically those related to the provision of interpreter services for deaf patients.

The issues raised by Dr. Moorman relate most directly to the auxiliary aids and services provisions of title III of the ADA. Such aids and services are measures that are undertaken to ensure "effective communication" for individuals with impaired speech, hearing and/or vision, as well as those who are profoundly deaf. The auxiliary aids requirement is intended to be flexible, reflecting the variable nature of what constitutes "effectiveness" in any particular setting.

In addition to the specific nature of the disability involved, factors used to determine communication effectiveness in any given circumstance include the length, complexity and importance of the information being exchanged. In Dr. Moorman's practice, for example, printed information and the exchange of handwritten notes might provide effective communication during routine appointments to check treatment progress or where relatively minor adjustments are being made to the treatment plan. However, during appointments scheduled to discuss treatment options, particularly those involving invasive procedures; significant alterations to the treatment plan, or protocols requiring specific patient participation or follow-up activities, the use of handwritten notes or other printed materials may not prove to be effective and the use of an interpreter may be necessary. Further discussion of this point is found on page 35567 of the enclosed title III regulation.

cc: FOIA
01-03576

Ideally, the determination of which particular auxiliary aid or service will ensure effective communication in a given situation is reached through a process of consultation between patient and physician. In addition to establishing effective communications requirements, such consultation might well reduce the level of anxiety many people feel where problems with their health are concerned. This may be particularly true for those patients who communicate almost exclusively using their eyes. Not only will consultation ensure that equal services are provided to individuals with disabilities, it may also significantly reduce the costs of providing such auxiliary aids or services. The Department of Justice ADA Title III Technical Assistance Manual provides additional guidance on page 26.

Under section 36.301 (c) of the ADA title III regulation, when an interpreter or other auxiliary aid or service is necessary to ensure effective communication, the medical practitioner must absorb the cost of this aid or service, unless this would result in an undue burden. As provided in section 36.303 (f), the term "undue burden" means "significant difficulty or expense".

In determining whether providing a sign language interpreter or other auxiliary aid or service would result in an undue burden, the practitioner should consider the overall financial resources of the practice, not just the fees paid for a particular procedure or treatment session. Consideration should be given to other factors that would minimize the degree of burden on the practice, such as the ability to spread costs throughout the general patient population and the provision of tax credits for small businesses for costs incurred to provide auxiliary aids. Eligibility criteria for this credit is found in Publication 907, available from the IRS.

Although Dr. Moorman did not raise the issue in his letter to you, it is important to note that in those circumstances where interpreter services are required to ensure effective communication, the interpreter must be "qualified".

As defined in the enclosed regulation, a "qualified interpreter" has the ability to interpret "effectively, accurately, and impartially, both receptively and expressively, using any necessary specialized vocabulary." Further discussion of this issue may be found in the ADA Title III Technical Assistance Manual at III-4.3200.

01-03577

I trust that this information, along with the enclosures, will be helpful in your response to your constituent.

Sincerely,

Kerry Alan Scanlon
Acting Assistant Attorney General
Civil Rights Division

Honorable Representative Robert "Bud" Cramer, Jr.
U. S. House of Representatives
1318 Longworth House Office Bldg.
Washington, D. C. 20510

Dear Bud:

I just received the enclosed letter stating that I must pay for the services of an interpreter on any deaf patient I see who may request it. The letter states that I also may not discriminate, which I presume that I cannot refuse to see such a deaf patient.

In many cases, particularly if it is a Medicare patient, my fee for the service provided would be considerably less than the fee charged by the interpreter. I cannot believe that it is the intent of Congress that I must pay out of my pocket to provide for an interpreter. If that, in deed, is the intent of Congress, I would certainly hope that we could get this part of this legislation repealed. As soon as you are through with your busy campaign, I would appreciate it if you could investigate this issue and give me your interpretation as to what I must do when a deaf patient requests an interpreter.

Sincerely,

Robert S. Moorman, Jr., M. D.

AIDB
Established 1858

October 28, 1994

Dr. Robert S. Moorman, Jr.
303 Williams Avenue, Suite 1411
Huntsville, AL 35801

Dear Dr. Moorman:
On July 26, 1990, the Americans with Disabilities Act (ADA) was passed. This civil rights legislation enables persons with disabilities equal access and opportunity to participate fully in all life activities. For you, this means making your services accessible for all persons with disabilities.

The Alabama Institute for Deaf and Blind has been providing quality. interpreting services in the north Alabama area for the past eight years. During this time, we have been charging agencies/businesses and industry for services rendered. Medical professionals have not been charged for our services. Effective November 1, 1994, all customers will be charged $25.00/hour plus mileage for services rendered. Title III of the ADA, 28 C.F.R. 36.303 states that this charge is not to be passed to the consumer.

A qualified interpreter will help to ensure effective communication between you and the deaf patient, thereby reducing the time required for the visit. We hope you will continue providing quality care and accessibility for your deaf patients.

If you have questions or would like more information regarding services available through AIDB, please contact our office. Thank you for all your support.

Sincerely,
Frances R. Smallwood
Interpreter Coordinator

JAN 10 1995

The Honorable Herb Kohl
United States Senator
14 West Mifflin Street
Suite 312
Madison, Wisconsin 53703

Dear Senator Kohl:

This letter is in response to your inquiry on behalf of your constituent, XX concerning the Americans with Disabilities Act (ADA) and its application to the operations of Holland America cruise lines. We apologize for the delay in responding to your inquiry.

XX letter to you states that Holland America cruise line misrepresented that the ports-of-call, facilities onboard Holland America cruise ships, and transportation services provided to and from airplanes were accessible. XX letter indicates that many of the features were inaccessible or that many accessible services were not provided.

Title III of the ADA prohibits discrimination on the basis of disability in commercial facilities and places of public accommodation. Title III requires, among other things, that owners and operators of places of public accommodation remove architectural barriers in existing facilities, where such removal is readily achievable. The Department's title III regulation, 28 C.F.R. pt. 36, defines the term "readily achievable" to mean easily accomplishable and able to be carried out without much difficulty or expense.

A cruise ship operating in U.S. waters is a place of public accommodation subject to these ADA barrier removal requirements (unless, in the case of a ship registered under a foreign flag, specific treaty prohibitions preclude enforcement). The ADA requires a cruise line to remove barriers in the facilities that they own or operate -- including at U. S. ports-of-call, onboard ships (including guestrooms), and in transportation services -- to the extent that such barrier removal is readily achievable.
01-03581

Determining whether the barrier removal requirement has been met, however, requires an assessment of several factors, including the nature and cost of the actions required, the overall financial resources of the facilities and any parent corporations, and the effect of the action on the facility's expenses and resources. Obviously, a determination of whether a cruise line has satisfied these requirements with respect to a particular vessel must be made on a case-by-case basis.

Title III can be enforced by private litigation, alternate dispute resolution such as mediation, or by filing a complaint with the Department of Justice. The Department is not able to investigate all the complaints of title III violations that it receives, and we have determined not to investigate this complaint. However, there are other entities that may be able to assist XX in resolving her complaint. We have enclosed a list of such entities located in Wisconsin.

In addition, we are enclosing copies of three status reports that detail the actions that the Civil Rights Division has undertaken to enforce titles II and III of the ADA. These reports illustrate that, although the Department of Justice is unable to investigate every complaint that it receives, we are taking strong action to enforce the law. I hope this information is useful to you in responding to your constituent.

If XX wishes to have further information about the requirements of the ADA, she may contact our ADA information line at (800) 514-0301 (Voice) or (800) 514-0383 (TDD) between 10:00 a.m. and 6:00 p.m. Monday through Friday, except for Thursday between 1:00 p.m. and 6:00 p.m. EST.

I hope this information is useful to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

The Honorable Herb Kohl
14 West Mifflin Street
Suite 312
Madison, WI 53703

RE: HELP!!! PLEASE!!!

Dear Senator Kohl:

I was told to contact you about a problem I have with Holland America Line concerning an Alaskan cruise that my handicapped parents and I took aboard the MS Noordam in July, 1994. I was grossly misinformed concerning the accessibility of the facilities for the "physically challenged passengers". Holland America misrepresented their ability to service "physically challenged passengers".

Before making any vacation decisions, I made extensive inquires concerning the availability and accessibility of the handicapped facilities aboard the MS Noordam and during the entire trip. I had my travel agent, Mrs. Michelle Lukens, Cruise Holidays, make numerous inquiries about the accessibility for handicapped passengers on this cruise.

Here is a list of some of the questions that I had Mrs. Lukens ask Holland America:

1.) What are the services available at the ports-of-call

A.) At which ports-of-call will we dock or tender
B.) Are the ports-of-call handicapped accessible
C.) Will there be any steps involved in getting off and on at the ports-of-call where we dock

2.) Is the ship handicapped accessible for someone limited to a wheelchair
A.) Does the stateroom have lips going into the room itself and the bathroom
B.) Will a wheelchair fit through the doors
C.) Is the bathroom equipped with bars for the handicapped

01-03583

D.) What are the bathing facilities in the bathroom
E.) Are the public rooms and areas accessible
F.) Can a wheelchair fit through the elevators doors
G.) Are there stairs involved in getting on and off the ship

2.) What are the services available from the airlines

A.) Are any steps involved in getting on or off the plane
B.) What are the arrangements to make connecting flights
C.) What are the bathroom facilities like

3.) Is the hotel accessibility in Anchorage

A.) Is the bathroom equipped with bars for the handicapped
B.) How do we transfer from the hotel to the airport

As you can see, I did everything in my power to insure that I had the needed information in order for me to make an intelligent decision for our vacation plans. Unfortunately, the information that I received was not actual or factual.

The major complaint I had with our cruise was the inaccessibility of any of the ports-of-call except at Juneau. Prior to making final arrangements, I had to fill out a "Special Requirements Information" Form indicating any special requirements or problems relating to my parents' history. We knew from the beginning that Sitka would be off limits for us because of the tendering service into Sitka. We knew and accepted this limitation when we decided to take the cruise. We were informed the other ports-of-call would be completely handicapped accessible for someone in a wheelchair. I do not feel that it is fair that my mother was not able to leave the MS Noordam due to the types of gang planks used to get off the ship. The gang planks were also very dangerous for my father, who has double leg prostheses.

Ketchikan was a sample of things to come. We were told by the ships' crew that they would take my mother down in her wheelchair but she would have to walk back up two flights of stairs in order to get back aboard the MS Noordam. When I went to the Front Office to check on the conditions for the following ports-of-call, I was told that except for Juneau all the rest of our stops would be made by tender service. Needless to say, by this time we were all very upset. I felt I had to let Holland America know how extremely disappointed we were. I talked to Mr. D. Verhey van Wijk, Hotel Manager. Mr. Verhey van Wijk informed me that we would

dock at Valdez and we would be able to get off the ship there. The gang plank at Valdez turned out to be so steep that my mother was afraid to go down it. I had been warned ahead of time by Mr. Verhey van Wijk that some people might not want to attempt it. Boy!! Was he right.

I found the information furnished about the room equally misleading. Although the bathroom itself was accessible, the entry ramp into the bathroom made it impossible to consider this room adequate. My mother was not able to walk up the very steep ramp into the bathroom without my assistance, even though she is able to do a minimum amount of walking. At home, my mother is able to use the bathroom by herself. Because of this situation, I was unable to leave my mother alone for any length of time. This made her feel bad because not only couldn't she visit the towns but we couldn't leave her alone for any period of time. I, myself, kept tripping over this ramp while walking around the room and I found that I could stand in the bathroom and was able to slide down the incline in my stocking feet - this should give you an idea of how bad the situation was. My father also had trouble getting into the bathroom.

The arrangements that Holland America made for its passengers to get from the hotel in Anchorage to the airport was as equally difficult for the "physically challenged passengers". You had to claim your luggage on the international side of the airport and then walk to the domestic side of the airport which was across the road from each other. Also when Holland America made the reservations for our plane flight back from Anchorage, they put us on a flight that loaded from the runway which involved having to have my mother hand-carried onto the plane. This was the final straw that broke the camel's back. My mother was so upset that she said "That it wasn't worth it. She wouldn't take another vacation." Every time you turned around, you were either upset or angry about something. You are supposed to come back from a vacation all rested up and rejuvenated, not so overjoyed that your vacation is finally over with.

We were not the only ones who felt that Holland America had misrepresented the cruise as being handicapped accessible. Mr. Russell Schmidt, who was totally wheelchair bound, found that he had received the same faulty information from Holland America. Mr. Schmidt was also told that where would be a lift-equipped bus to make the trip from Seward to Anchorage, a two and half hour bus trip. In order to make the departure from the ship an orderly affair, the passengers were assigned bus numbers. When Mr. Schmidt's number came up to leave and he asked about the lift-equipped bus, he was told "Why wasn't he there at 7 o'clock

when the special bus left." This was the attitude that we encountered during the entire trip.

I am sending you copies of the letters that I wrote to Ms Donna Franchimon, Manager Customer Relations, Holland America and Mr. Russell Schmidt concerning the gross misrepresentation of the answers to my specific questions concerning the accessibility of the facilities for the "physically challenged passengers". I am also sending a copy of the letter that my travel agent, Mrs. Lukens, wrote to Holland America listing the names and dates of the people that she talked to in order to get the answers to my questions. I am also sending you a copy of the answer that I received from Ms Judith Foley concerning my letter to Ms Franchimon.

Upon receipt of this letter, I had a very unpleasant telephone conversation with Ms Foley. She felt that "any time the ship was docked at the pier", the port-of-call was considered accessible for a handicapped person. When asked how she would feel if she wasn't able to leave the ship during the stays at the ports-of-call, she told me that we did enjoy the full benefit of all the rest of the services and activities on board the ship so what more did we want!

We made our decisions on the quantity vs quality of information that we received. I feel that Holland America is splitting hairs as far as the information that they are giving out to their prospective passengers. It is bad enough to be handicapped but to be treated this way is unforgivable.

Sincerely,

XX
Montello, WI 53949
XX

JAN 17 1995

The Honorable Benjamin A. Gilman
U.S. House of Representatives
2185 Rayburn Office Building
Washington, D.C. 20515-3220

Dear Congressman Gilman:

This letter is in response to your inquiry on behalf of your constituent, XX concerning a request for information about the amount of time that movie theaters have to comply with the Americans with Disabilities Act (ADA). Your constituent mentions that he uses a wheelchair and feels it is unfair that he has to sit in the back of movie theaters in New City, New York, and is not able to use the rest rooms.

The ADA contains a number of requirements for physical accessibility in movie theaters. First, all new movie theaters built since January 26, 1992, must be accessible. Second, all movie theaters renovated or otherwise altered since January 26, 1992, must be altered in an accessible manner.

Third, if a movie theater is not being renovated or otherwise altered, the manager or owner must do things that are "readily achievable" to eliminate physical barriers that keep people with mobility impairments from being able to use their facilities. Readily achievable is defined as "easily accomplishable and able to be carried out without much difficulty or expense." If barrier removal is not readily achievable, the manager or owner is required to take alternative steps that are readily achievable to enable people with mobility impairments to be their customers. An example of an alternative to barrier removal would be a two-theater complex, with an accessible and an inaccessible theater, that rotates its films so that each film will be shown in the accessible theater.

cc: Records;Chrono;Wodatch;McDowney;Breen;Willis;FOIA;MAF.
N:\UDD\WILLIS\CGGILMAN\secy.johnson

01-03587

The obligation to undertake readily achievable barrier removal in existing facilities went into effect on January 26, 1992, and is a continuing obligation. If a movie theater has a number of barriers, the owner or manager may phase the barrier removal over time, if it is not readily achievable to remove all the barriers at once.

I hope this information will be useful to you in replying to your constituent.

Sincerely,

Kerry Alan Scanlon
Acting Assistant Attorney General
Civil Rights Division

XX
New City, New York 10956
November 16, 1994

Congressman Gilman
223 Route 59
Monsey, New York 10952

Dear Congressman Gilman:

I met you at the Stardust Ball on November 4th at the Atrium Plaza. At that time, I spoke to you briefly about the movie theaters in New City not being wheelchair accessible. I was wondering how long that the theaters have to comply with the A.D.A. Law. I feel that it is unfair that I can only sit in the back of the movie theater and am not able to use the bathrooms.

It makes me feel angry that as a citizen of Rockland County, I am not treated the same way as all other paying customers.

I would appreciate your response to the problems I have outlined.

Sincerely,

XX

JT/da

JAN 27 1995

The Honorable Barbara Boxer
United States Senator
1700 Montgomery Street
Suite 240
San Francisco, California 94111

Dear Senator Boxer:

This letter is in response to your inquiry on behalf of your constituents, XX

XX have complained that their health care insurance provider, CIGNA, has discontinued coverage for the services of a home health care aide for XX . They inquire whether this violates the Americans with Disabilities Act (ADA). It appears from the correspondence that CIGNA generally does not provide coverage for home health care aides for any policyholders, although they provided such coverage to XX for a time just after his coverage was transferred to CIGNA from another company.

The ADA prohibits discrimination on the basis of disability. It does not guarantee that persons with disabilities will be able to obtain insurance coverage for all the medical services that they need. Home health care services are presumably needed and used by persons without disabilities as well as persons with different types of disabilities than XX . An insurance company's decision not to cover home health services in these circumstances would not appear to violate the ADA.

I hope this information will be helpful to you in responding to your constituents.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

RE; Problems with Group Insurance for Insured, XX

Dear Senator Boxer:

My husband, XX , has been ill since February 2, 1992, when he contracted Guillain Barre Syndrome. This is a debilitating virus which paralyses it's victims, from one extreme to another. My husband had a very serious case. He was paralyzed completely for 5 weeks and has been in a recovery stage ever since. He is currently home after having spent nineteen months in the hospital and still is in a wheelchair.

XX insurance company changed from Pacific Mutual to CIGNA last March 1st. At that time CIGNA stated that they do not cover Home Health Aides, which he did have under the Pacific Mutual program. I debated that issue with them successfully, and they have since provided an aide for six hours each weekday although they said that it was an extra-contractural benefit. Now they want to cancel the Home Health Aide for no good reason. There have been some personnel changes with their company and I suspect that someone wants to make points by cutting expenditures. I wrote to them, appealing their decision. My appeal was based on the fact that the situation which was the basis of the decision to provide the service has not changed, as outlined in the excerpt below. All of the criteria used to authorize this service still exist.

* The Home Health Aide still helps XX with exercises. These are routine therapy exercises, not just passive, range of motion-type exercises. They are exercises which the therapists have prescribed, not just of a type which I or XX believe he needs in addition to therapy
* The Home Health Aide still helps XX get into and out of his standing frame on days when he does not have therapy.
* XX still cannot prepare his own lunch and cannot necessarily even feed himself his lunch, depending on what form it may take.
* It still is not safe for XX to be left alone all day. I cannot stay home with him. My paycheck is three-fourths of our income and we cannot make our commitments without it. So far as family help is concerned; my parents are elderly and infirm, and my father has terminal cancer, so they are unable to help; I have no sisters and only one brother who lives in

Northern California, so he is unable to help; XX family all lives out of State and they are unable to help.

* Since it is not safe for XX to be alone all day, it is entirely possible that his Physician would recommend that he go back into a care facility and THAT would COST you a great deal more than a Home Health Aide."

In addition to all of the above, I want to bring to your attention an article recently published in "Money", (October 19, 1994). I don't know if it was "Money Magazine" or something else, I only received a photocopy and it is not clear who published it. The article states that a federal appeals court ruling could prohibit insurance companies from putting caps on benefits for people with disabilities. The article states that the insurance companies could be deemed as the insured's employer because they are a contracted agent of the employer. Therefore the insurance company would be subject to the Americans with Disabilities Act. In addition, insurance carriers could be classified as a public accommodation, also subject to the A.D.A. If true, this could apply not only to the present subject, but to the physical/occupational therapy limitation which CIGNA has of sixty days, as well.

I am writing to you in the hope that you may be able to aid us in this matter. I am hoping that during this appeals process you would be able to bring pressure to bear on them to continue the Home Health Aide services. Their appeals procedure supposed takes 30 days and I mailed my appeal two days ago. CIGNA set a precedent by authorizing the benefit to begin with and now they want to cancel it. If you are able to write to them I would appreciate it. Their address for appeals is:

CIGNA HealthCare of California
Member Services Department
505 North Brand Blvd., Suite 200
Glendale, California 91203

I thank you for your time I reviewing this matter and for any efforts you may be able to make on our behalf. If you do write to them, please send us a copy. My day-time telephone number, should you need it, is XX .

Sincerely,

XX

REPSINS.DOC

JAN 27 1995

The Honorable Corrine Brown
Member, U.S. House of Representatives
75 Ivanhoe Boulevard
Chamber of Commerce
Orlando, Florida 32802

Dear Congresswoman Brown:

This is in response to your inquiry on behalf of your constituent, XX , regarding the application of the Americans with Disabilities Act (ADA) to insurance.

The ADA prohibits discrimination on the basis of disability by places of public accommodation, including service establishments such as insurance companies. Therefore, an insurance company may be prohibited by the ADA from discriminating on the basis of disability in making decisions to grant or deny coverage, and in setting rates for types of coverage.

An insurance company will not, however, be prohibited by the ADA from administering its benefit plan in accordance with State insurance laws. 28 C.F.R. 36.212. Therefore, State law may also play a significant role in the determination of an insurance company's duties regarding individuals with disabilities, but such State law may not be used as a subterfuge to evade the purposes of the ADA.

I hope this information will be helpful to you in responding to your constituent.

Sincerely,

Deval L. Patrick

Assistant Attorney General
Civil Rights Division

01-03593

10-5-94
Honorable Bill McCollum
605 E Robinson - Suite 650
Orlando FL 32801

Dear Congressman McCollum,

I am writing you for the purpose of
seeking your assistance in the area of
disability discrimination.

I was diagnosed with Agoraphobia by my
Doctors in May. I was told that I would
never work again because my condition was
chronic & was a chemical imbalance of the brain.

My Doctors told me that my condition was of
a biological nature & not a mental state.

I took my disability believing that I would
be compensated by my Long Term Disability
Program.

I was later informed by my Ins company
that my condition was coded mental not
physical & that I would only received benefits
for 24 months.

As a mgr. with a Fortune 500 company, my
income was considerable, but my problem got
worse & I had to take my disability, but
my life has been turned around because of
this discrimination.

My belief is that if you are disabled, you
are disabled, regardless of the status -
In 24 months I will be cut off by my
Ins company and will loose everything that I
have worked so hard & long to achieve.

I will not be able to function in society
& the job market because of my disability.

The Ins company stated to me that my
company opted to put this limitation in the
policy because of "higher premiums" that would
have to be paid to cover mental/nervous
disorders - It is simply a money thing with Ins co
but people like me lives are being ruined because of
"so called mental problems" are treated in a
second class situation & are not recognized
as being just as disabling as physical problems -

Mr. Congressman, this discrimination must change. People are being hurt & lives are being destroyed because of higher premiums on Ins policies in lieu of peoples well fair.

I was told by the E.E.O.C. in Washington that this problem is being addressed and the discrimination may be changed in the future - I spoke with: Kathleen Courtney - Attorney of the Day - E.E.O.C. in Washington on 10/4/94 pH: 202-663-4652.

I am a Vietnam veteran that needs the assistance of my congressman to help me & people like me, to overcome this blanton act of discrimination who suffer from a real problem, just the same as people with physical disabilities.

Thanking you in advance for your consideration in this very important matter. We need your support to give us equality in our lives.

Sincerely,

XX

The Honorable Henry A. Waxman
U.S. House of Representatives
2408 Rayburn Office Building
Washington, D.C. 20515-0529
Dear Congressman Waxman:

This is in response to your inquiry on behalf of your constituents, XX . They ask whether the Americans with Disabilities Act (ADA) can be interpreted to require places of public accommodations to provide baby care and diaper-changing facilities in public restrooms.

The ADA is a civil rights statute that prohibits discrimination on the basis of disability. By providing restroom facilities accessible only to able-bodied persons, public accommodations discriminate against persons with disabilities. It is for that reason that the ADA has accessibility requirements for restrooms in places of public accommodations.

Although failing to provide appropriate diapering facilities might similarly be considered discrimination against families with infants and small children, the ADA does not prohibit discrimination against such individuals unless they have

disabilities. There is only one Federal civil rights statute that protects families with children and that is the Fair Housing Act which prohibits discrimination on the basis of familial status, but only in transactions involving housing.

I hope this information will be useful to you in responding to your constituents.

Sincerely,

Deval L. Patrick
Assistant Attorney General

XX

October 29, 1994

The Honorable Henry A. Waxman
Member, U.S. House of Representatives
8436 W. Third Street, #600
Los Angeles, CA 90048

Dear Congressman Waxman:

We are residents of your district, and wanted to relate a recent experience to you in hopes you might be able to help.

We took our eight month-old son to Universal City's CityWalk and were unpleasantly surprised to find there were no facilities in the public restrooms to change his diaper. The only choices were to change him in his stroller, or place him on the unsanitary tile floor. Perhaps some of the restaurants have changing facilities, but we didn't have time to go on a hunting expedition.

After writing to MCA Development Company which operates CityWalk and other Universal facilities, to our local elected officials, and to L.A. PARENT magazine, we received word from CityWalk that they, too, had noticed to oversight and that they plan to install diaper-changing facilities in women's and men's restrooms this fall. Hooray!

This experience got us to thinking, because Universal City is not alone in ignoring the needs of families it's seeking as customers. We've been in many "family" restaurants and other establishments throughout the greater Los Angeles area that lack these facilities, too. Please understand that we see this as a critical matter of health and safety for our children.

We would like to know whether it is possible to apply the Public Accommodations section of the Americans with Disabilities Act to require any public establishment to add baby care and diaper-changing facilities to its restrooms. It's crucial to have wheelchair access in restrooms, but shouldn't infants and children have access to sanitary and safe facilities?

At the bare minimum, establishments could install an ironing-board type "Koala Kare" changing table that folds down when needed, and a trash container to deposit dirty diapers. I'm sure these items are reasonably priced, easy to install, and the upkeep is no more than regular restroom maintenance. The "Koala Kare" boards could easily fit in the smaller restrooms of most restaurants and stores as well.

Most major department stores and shopping centers (and even Dodger Stadium!) have these facilities in the women's restrooms and even the men's restrooms. They post signs advertising the fact on the restroom entrance so customers don't have to search them out. These establishments also have comfortable couches and chairs for nursing and feeding babies. Disneyland has a special facility with all that -- plus facilities to prepare and heat baby food. That day at CityWalk, we'd have been happy to have anything besides the stroller and the dirty floor!

Congressman Waxman, during your distinguished legislative career, you have accomplished so much to improve Americans' health and the quality of our lives.
We really hope you will ask one of your staff members to look into this issue for us.

Sincerely,
XX
XX

And
XX

FEB 1 1995

The Honorable Thomas Daschle
United States Senate
317 Hart Senate Office Building
Washington, DC 20510-4103

Dear Senator Daschle:

This is in response to your inquiry on behalf of your constituents, Senator Jim Lawler and Ms. Karen Shea, regarding the obligation of health care providers, under title III of the Americans with Disabilities Act (ADA), to provide auxiliary aids or services, including sign language interpreters, to persons with hearing impairments.

The Department of Justice is committed to ensuring the effective implementation of the auxiliary aids requirements of title III by health care providers. We are concerned, however, that there are some significant misperceptions of the scope of these requirements that may be deterring compliance.

One of the most common misconceptions about the ADA is that health care providers are required to provide interpreters whenever they are requested. In fact, title III of the ADA requires public accommodations, including health care providers, to furnish appropriate auxiliary aids and services, including sign language interpreters, where necessary to ensure effective communication with individuals with disabilities. Health care providers should consult with their patients to determine what type of auxiliary aid or service is appropriate for particular circumstances. However, health care providers are not required to provide sign language interpreters for deaf patients upon demand. Title III of the ADA does not require a provider to accede to a patient's specific choice of auxiliary aid or service as long as the provider satisfies his or her obligation to ensure effective communication.

In determining what constitutes an effective auxiliary aid or service, health care providers must consider, among other

things, the length and complexity of the communication involved. For instance, a note pad and written materials may be sufficient means of communication in some routine appointments or when discussing uncomplicated symptoms resulting from minor injuries. Where, however, the information to be conveyed is lengthy or

cc: Records; Chrono; Wodatch; McDowney; Hill; MAF; FOIA
n:\udd\hille\policylt\daschle.ltr

01-03601

complex, the use of handwritten notes may be inadequate and the use of an interpreter may be the only effective form of communication. Use of interpreter services is not necessarily limited to the most extreme situations -- for example, a discussion of whether to undergo surgery or to decide on treatment options for cancer.

A health care provider may not impose a surcharge on any particular individual with a disability to cover the costs of providing auxiliary aids and services. Instead, the costs should be treated like other overhead expenses that are passed on to all patients. Nor does the ADA permit assessment of a surcharge to cover the cost of pre-arranged auxiliary aids on a patient with a disability for a cancelled appointment. However, the ADA does not prohibit a health care provider from imposing a deadline for cancellations or from charging a fee for missed appointments if the deadline is not met, as long as the deadline and fee are applied and enforced uniformly against all patients, without singling out patients with disabilities.

Health care professionals cannot use a fear of economic loss as a basis on which to refuse to provide auxiliary aids or to refuse treatment for a person with a disability. However, the obligation to provide auxiliary aids and services is not unlimited and a health care provider is not required to provide auxiliary aids and services if doing so would result in an undue burden, that is, a significant difficulty or expense. The factors to be considered in determining whether there is an undue burden include the nature and cost of the action, the type of entity involved, and the overall financial resources of the entity.

Finally, as amended in 1990, the Internal Revenue Code permits small businesses to receive a tax credit for certain

costs of compliance with the ADA. An eligible small business is one whose gross receipts do not exceed $1,000,000 or whose work force does not consist of more than 30 full-time workers. Qualifying businesses may claim a credit of up to 50 percent of eligible access expenditures that exceed $250 but do not exceed $10,250. Eligible access expenditures may include the costs of providing auxiliary aids and services to persons with disabilities.

The flexibility of the auxiliary aids requirement, the undue burden limitation, the ability to spread costs over all patients, and the small business tax credit should minimize any burden on health care professionals.

01-03602

I hope this information will be helpful to you in responding to your constituents.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

01-03603

United States Senate
Washington, DC 20510-4103

December 12, 1994

The Honorable Janet Reno
Attorney General
United States Department of Justice
Constitution Ave. and 10th St., NW
Washington, DC 20530

Dear Attorney General Reno:

Recently, I have been contacted by several constituents regarding their concerns with the Americans with Disabilities Act (ADA) requirement for interpreter services. Enclosed for your review are copies of some of the correspondence.

As you will note, some specific questions have been posed regarding interpreter services. Judging from the constituent letters, an overriding concern appears to be that when patients insist on having an interpreter, such a professional must be provided regardless of whether a need for the services is demonstrated. Furthermore, according to my constituents, an interpreter often appears for an appointment, but, without notification, the patient does not show up. In those instances, the service provider is obligated to pay the interpreter. As you might imagine, there is great concern over the costs being incurred by the providers in such instances.

According to my constituents, many providers had used alternative methods,

such as lip reading or writing instructions, which reportedly were acceptable to the clients, but now must provide an interpreter on demand. It is mentioned in the correspondence that requiring an interpreter may be viewed as an unfunded mandate and prompt providers to try and avoid treating the disabled.

I would urge your careful consideration of these concerns and comments. In addition, I would greatly appreciate your input and suggestions regarding any possible solutions. I look forward to hearing from you.

With best wishes, I am

Sincerely,

Tom Daschle

November 26, 1994

Senator Thomas A. Daschle
317 Hart Senate Office Building
Washington, DC 20510-4103

Dear Senator Daschle:

This letter seeks information regarding the Americans with Disabilities Act and specifically if it has placed an undue burden on certain providers where there are clusters of consumers because of availability to schools or other services. I am enclosing a copy of a letter I received from Ms. Karen Shea, Central Plains Clinic in Sioux Falls, South Dakota. I also serve on the Mayor's Committee for People with Disabilities in Aberdeen. There has been discussion about this matter at these committee meetings as well.

Specifically, I would like to propose some questions about interpreter services for your consideration. Perhaps, there should be some fine tuning to this Act so it is more acceptable to the providers and still assure safety for the consumers.

1) Is it fair that providers must pay for two hours of interpreter service with no way to expense it off or to bill for recovery?

2) Many providers had a system in place such as lip-reading or writing instructions which reportedly was acceptable to many clients. Although this was working, they must now pay for an interpreter whether needed or not.

3) Is there any concern that the clients are being coached by the interpreters to request an interpreter, thus assuring full time employment for the interpreter? There are instances reported that the interpreter shows up for an appointment and the client does not and the provider still must pay for the minimum two hours of interpreter time.

4) If there are abuses, it could create a climate where the providers will be reluctant to serve the clients because they feel they are being made to pay for services that may not always be indicated. I understand they can take a write-off from their Federal Income Tax return once a minimum level of charges is reached.

I believe one must assure disadvantaged people are fully protected and that medical instructions are understood, but I also believe the providers should not be expected to absorb expenses, especially unnecessary expenses, when they cannot recover. This is another unfunded mandate on private vendors and could provide the incentive for finding ways to avoid treating the disabled.

I would appreciate if you would correspond directly with Ms. Shea and send copies to me of any information or transmittals. It just seems the Act could use some amendments and make it a better law.

Thanks for taking time to read and to respond.

Sincerely,

Senator Jim Lawler

Senator Jim Lawler
2704 NW 30th
Aberdeen, SD 57401

Dear Senator Lawler:

On April 22, 1994 in Aberdeen at the South Dakota Clinic Managers State Meeting I visited with you regarding a problem Physician's offices have with "interpreters for the deaf." You asked that I send you some information regarding this and that you would look in to this for us.

We are told that we must have an interpreter for our deaf patients whether we feel that one is needed or not if the patient wants it. Many of our deaf patients do not need one, but a lot of our deaf patients insist on having an interpreter.

In one week in June we had four patients not show up for their appointments. None of them notified us before the appointment and the interpreter was already here. Each time we had to pay the interpreter $30 for coming to our office. Many times the office visit is not much more than the price of the interpreter.

I would appreciate it very much if you could tell me what you found out about the situation.

Sincerely,

Karen Shea

The Honorable Phil Gramm
United States Senator
2323 Bryan Street, #1500
Dallas, Texas 75201

Dear Senator Gramm:

This is in response to your letter on behalf of your constituent, XX , regarding the Americans with Disabilities Act (ADA).

XX is seeking your assistance because a prospective tenant of a commercial space that he leases has requested that a survey of the facility be conducted to assess "ADA compliance." The survey, which was enclosed with XX letter, is based on the ADA requirements applicable to the design and construction of new facilities. XX apparently believes that the ADA requires his building to meet this standard, and he is concerned that providing full accessibility in his building would be burdensome.

It appears that XX is somewhat confused about the requirements of the ADA. Title III of the ADA prohibits discrimination on the basis of disability by places of public accommodation and it requires new or altered commercial facilities to be made accessible. Because XX has described the property in question as a "commercial space," we are assuming, for the purposes of this letter, that it is subject to title III.

With regard to buildings covered by title III, the ADA provides for three different levels of accessibility. For new construction, the ADA requires full and strict compliance with the ADA Standards for Accessible Design (Standards), 28 C.F.R. pt. 36, Appendix A. This requirement for full accessibility to newly constructed buildings and facilities is based on the fact that incorporation of accessible elements into design and

construction at the very beginning of the process, before inaccessible elements are set in concrete and wood, is relatively easy and inexpensive.

cc: FOIA

When alterations take place in an existing building, the ADA provides a somewhat less stringent standard. The ADA requires that the altered portion of the building be made accessible in accordance with the ADA Standards. This requirement is based on the fact that incorporation of accessible features into an area that is already being rebuilt is relatively simple and inexpensive. However, the ADA recognizes that structural constraints in existing buildings may prevent full compliance with the ADA Standards. Therefore, the ADA provides lesser accessibility requirements for alterations when full compliance with the ADA Standards is technically infeasible.

The ADA imposes requirements for existing buildings that are not otherwise being altered only if they fall within the twelve statutory categories of places of public accommodation. The owner or operator of such an existing place of public accommodation is only required to remove structural barriers to access to the extent that it is readily achievable to do so. Removal of a structural barrier is readily achievable if it is easily accomplishable and able to be carried out without much difficulty or expense. The Department's regulation implementing title III provides examples of, and priorities for, readily achievable barrier removal, as well as alternatives for those situations where barrier removal is not readily achievable.

Surveys such as the one attached to XX letter may be useful in identifying barriers to access in existing buildings. However, the ADA does not necessarily require that every barrier identified on such a survey be immediately corrected. Rather, the ADA's three-level system seeks to balance the needs of people with disabilities against the real constraints faced by businesses.

I am enclosing a copy of the Department's regulation

implementing title III for your further information. I hope this information is helpful to you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

Honorable Kay Bailey Hutchinson
Honorable Phil Gramm
Honorable Jack Fields

I lease commercial office space in Houston, Texas & am a constituent of yours.

I have attached for your review a section of a request for proposal by a tenant looking at one of my buildings. This section deals w/ADA compliance.

Does anyone in Washington have any idea how obtrusive ADA regulation is? Property owners are spending billions of dollars to comply w/ADA to satisfy completely the needs of a miniscule portion of the population. Buildings should provide barrier free access however ADA is so absurdly eggregious that only a bureaucratic, detached government could pass it & not understand the potential ramifications.

Something must be done to mitigate the ongoing damage

01-03610

being suffered by business
people to comply w/ADA.
What do you suggest?

Thanks

XX

ADA AUDIT REPORTS
AND INSPECTION FIRMS

Aetna Corporate Leasing Services requires an ADA survey prepared by a qualified firm for all facilities being considered for occupancy by Aetna. This memorandum outlines what constitutes a qualified firm and what is required in a survey.

To be qualified, inspection firms will at a minimum meet the following criteria:

a) Firm should have either a licensed Registered Architect or Professional Engineer managing the inspection program.
b) Firm should be able to demonstrate an expertise and experience in ADA/Code Compliance work.
c) Firm should have had recent training in ADA Compliance by a reputable organization such as the AIA or BOMA.
d) Firm should be able to provide references from other clients for similar types of inspection work.

The survey will include at a minimum the following items:

a) A brief description of the property.
b) A copy of the full survey that demonstrates that all ADA-related

requirements have been reviewed.

c) A list of all non-compliant items relating to the technical elements noted in the BOMA "ADA Compliance Guidebook".

d) Pictures of non-compliant items.

e) Recommendations for corrective action.

f) Cost estimates for corrective actions.

g) Timeline for corrective actions

01-03612

ADA CHECKLIST

Building:
Address:

Parking and Access to Building YES NO

1) Is there designated compliant parking for individuals with disabilities (width: 96", aisle width: 60", clearance: 80", maximum slope: 1:50)?
   Number of compliant disabled parking spots:
   Number of disabled parking spots:
   Total number of parking spots:
2) Are accessible parking spaces located on the shortest accessible route to an accessible entrance?
3) Is there at least one accessible route (width: 36", running slope: 1:20, slip-resistant surface) to an accessible building entrance from public transportation stops?
   from accessible parking spaces?
   from sidewalks?
4) Is a curb ramp (maximum slope: 1:12, clear width: 36", slip-resistant surface, not obstructed by parked vehicles)

provided whenever an accessible route crosses a curb?

Entrances/Interior Route

5) Are at least 50% of all entrances accessible? If all entrances are not accessible, are there appropriate signs indicating the location of the nearest accessible entrance?
6) Is there at least one accessible door (clear opening: 32" with door open 90 degrees, maximum threshold height: 1/2", hardware which can be grasped by one hand) at each accessible entrance?
7) Is there at least one accessible route (width: 36", headroom: 80", running slope: 1:20, slip-resistant, clear floor space: 30" x 48" interior doors with pull pressure less than 5 lbs.) connecting accessible entrances with all accessible spaces?

Ramps

8) Are there ramps (maximum slope: 1:12, clear width: 36", level landing, cross slope: 1:50) wherever an accessible route exceeds 1:20?

Elevators

10) If the building is 2 levels high or greater, is there an elevator?

11) Are all elevators accessible (automatic operation, notification time: 5 sec, audio and visual position indicators, clear minimum: 36", depth: 51, width: 68" side opening door/80" center opening door)?

Bathrooms

12) Are there accessible bathrooms (unobstructed turning space of 60" diameter circle or T-shaped space of 60" square with 36" legs) which are located on an accessible route?

13) Within an accessible bathroom, is there at least one toilet stall which is accessible (width: 60", minimum depth: 56" to 59", outward swinging door)?

If desired, attach a sheet with explanatory comments.

FEB 13 1995

DJ 202-PL-865

Mr. Wilfredo Davila
Director & Chief ADA Compliance Officer
Bergen County Office on the Disabled
Administration Building
Court Plaza South
21 Main Street, West Wing, Room 113-W
Hackensack, New Jersey 07601-7000

Dear Mr. Davila:

This is in response to your letter about a public accommodation's responsibility to provide accessible parking under the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that have rights and responsibilities under the ADA. This letter provides informal guidance to assist you in understanding the ADA. This technical assistance, however, does not constitute a determination by the Department of Justice of any entity's rights or responsibilities under the ADA and is not binding on the Department of Justice.

In your letter you correctly noted that the Department of Justice regulation implementing title III provides that a public accommodation must remove architectural barriers in existing facilities when such removal is readily achievable, i.e., easily accomplishable and able to be carried out without much difficulty or expense. Providing accessible parking spaces is one type of architectural barrier removal. To the extent it is readily achievable, barrier removal measures must comply with the ADA's requirements for alterations, including the ADA Standards for Accessible Design.

Determining the application of these general rules to a specific place of public accommodation requires a case-by-case assessment of whether the required barrier removal is readily achievable that takes into account the following factors:

cc: FOIA

01-03614

1) The nature and cost of the action;

2) The overall financial resources of the site or sites involved; the number of persons employed at the site; the effect on expenses and resources; legitimate safety requirements necessary for safe operation, including crime prevention

measures; or any other impact of the action on the operation of the site;

3) The geographic separateness, and the administrative or fiscal relationship of the site or sites in question to any parent corporation or entity;

4) If applicable, the overall financial resources of any parent corporation or entity; the overall size of the parent corporation or entity with respect to the number of its employees; the number, type, and location of its facilities; and

5) If applicable, the type of operation or operations of any parent corporation or entity, including the composition, structure, and functions of the workforce of the parent corporation or entity.

If the public accommodation is a facility that is owned or operated by a parent entity that conducts operations at many different sites, the public accommodation must consider the resources of both the local facility and the parent entity to determine if removal of a particular barrier is "readily achievable." The administrative and fiscal relationship between the local facility and the parent entity must also be considered in evaluating what resources are available for any particular act of barrier removal.

I hope that this information is helpful to you.

Sincerely,

Janet L. Blizard
Supervisory Attorney

DJ 202-PL-802

FEB 16 1995

Kenneth M. Hrechka, D.D.S.
6130 Oxon Hill Road
Oxon Hill, Maryland 20745

Dear Dr. Hrechka:

This letter is in response to your inquiry concerning your obligations to provide interpreter services for deaf patients.

The Americans with Disabilities Act (ADA) authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the ADA. This letter provides informal guidance to assist you in understanding the ADA's requirements. It does not, however, constitute a legal interpretation, and it is not binding on the Department.

The issues and concerns raised in your letter relate most directly to the auxiliary aids and services provisions of title III. Such aids and services are measures that are undertaken to ensure "effective communication" for individuals with impaired speech, hearing and/or vision, as well as those who are profoundly deaf. The auxiliary aids requirement is intended to be flexible, reflecting the variable nature of what constitutes "effectiveness" in any particular situation.

In addition to the specific nature of the disability involved, factors used to determine communication effectiveness in any given circumstance include the length, complexity and importance of the information being exchanged. In your practice, for example, printed information and the exchange of handwritten notes might provide effective communication during routine appointments to adjust wires or check treatment progress. However, during appointments scheduled to discuss treatment options, or unexpected alterations necessary to the treatment plan, the use of printed information and handwritten notes may

cc: FOIA

01-03616

not prove effective and the use of an interpreter may be necessary. Further discussion of this point is found on page 35567 of the enclosed title III regulation.

Ideally, the determination of which particular auxiliary aid or service will ensure effective communication in a given situation is reached through a process of consultation between patient and practitioner. Not only will consultation ensure that equal services are provided to individuals with disabilities, it may also significantly reduce the costs of providing such auxiliary aids or services. The enclosed Department of Justice ADA Title III Technical Assistance Manual provides additional guidance on page 26.

Under section 36.301 (c) of the ADA title III regulation, when an interpreter or other auxiliary aid or service is necessary to ensure effective communication, the medical or dental practitioner must absorb the cost of this aid or service, unless this would result in an undue burden. As provided in section 36.303(f), the term "undue burden" means "significant difficulty or expense". In determining whether providing a sign language interpreter or other auxiliary aid or service, would result in an undue burden, the practitioner should consider the overall financial resources of the practice, not just the fees paid for a particular procedure or treatment session.

Consideration should be given to other factors that would minimize the degree of burden on the practice, such as the ability to spread costs throughout the general patient population and the provision of tax credits for small businesses for costs incurred to provide auxiliary aids. Eligibility criteria for this credit are found in publication 907, available from the IRS.

Your letter also raises the question of how to obtain interpreter services. Most states have a Deaf Services Center, or similar office, which can provide referral services for you. In those circumstances where interpreter services are required to ensure effective communication, the interpreter must be "qualified".

As defined in the enclosed regulation, a "qualified interpreter" has the ability to interpret "effectively, accurately, and impartially, both receptively and expressively, using any necessary specialized vocabulary." Further discussion of this issue may be found in the ADA Title III Technical Assistance Manual at III-4.3200.

01-03617

I trust that this information, along with the enclosures, will be helpful to you and your patients with disabilities.

Sincerely,

John L. Wodatch
Chief

Association of Disabilities Act
Department of Justice
Civil Rights Division
P. O. Box 65310
Washington, DC 20025-1530

Dear Association of Disabilities Act,

I am an orthodontist, treating a woman, who is deaf. My office receptionist and I have tried to reach you by phone for over three weeks, calling every hour of the day. Apparently, your employees are overworked as your lines are always busy.

I need important information answered by you, which I can not obtain from the legal office of the American Dental Association re: disabled Americans. I operate a small professional business. I have treated deaf patients before without any difficulty. (They could read lips or we would exchange written notes). Currently, I am told I may be required to supply an interpretor for a deaf patient. Is this true? Are they available as a service through local government, social work-like organizations? Does the small business or deaf individual pay for the interpretor? Orthodontic treatment usually requires 24-36 appointment visits. The cost of a sign interpretor for this number of visits would greatly exceed all total costs I would charge, prior to considering expenses, for the orthodontic service I am providing.

I have never been asked to provide this service before. If rules and regulations exist, could I be given the existing laws along with the status number and a copy of the same.

Please, I wish to be informed of individual's, patient's, doctor's and small businessman's rights. I have been referred to you for assistance.

Thank you in advance for your time and consideration.

Sincerely,

Kenneth M. Hrechka, DDS
KMH/ms
DIPLOMATE, AMERICAN BOARD OF ORTHODONTICS
01-03619

FEB 16 1995

XX
West Des Moines, Iowa XX

Dear XX

This is in response to your letter regarding the requirements of title II of the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that have rights or responsibilities under the Act. Pursuant to that authority, this letter provides informal guidance to assist you in understanding the ADA. However, this technical assistance does not constitute a legal interpretation of the statute, and it is not binding on the Department.

Your letter asks, first, whether title II of the ADA permits a public school district to relocate a special education class containing a number of students with physical disabilities from an inaccessible building to a newer accessible building. Title II of the ADA prohibits public entities, including public schools, from discriminating on the basis of disability. A public school district may not afford students with disabilities opportunities that are not equal to the opportunities afforded to other students. In addition, a public school district must operate each of its programs so that, when viewed in its entirety, the program is accessible to individuals with disabilities.

Title II's program access requirement does not require a public entity to make each of its facilities physically accessible, as long as the program is accessible when viewed in its entirety. However, in determining which structures must be altered to provide physical accessibility, the equal opportunity

requirement also applies. Therefore, title II may permit relocation of a special education class to an accessible facility if the accessible facility provides opportunities and benefits that are equal to the inaccessible facility to which the students were originally assigned. In assessing the equality of the two facilities, the school district must consider such aspects as the

cc: Records, Chrono, Wodatch, Hill, FOIA, MAF
n:\udd\hille\policylt\XX

01-03620

types of programs and facilities offered and the distance from the student's homes.

Your letter next asks whether title II permits a school district to relocate an individual student from an inaccessible school to an accessible school within the district. Again, the program access and equal opportunity requirements of title II apply. Program access will permit such relocation in lieu of alterations to the inaccessible school if the accessible school provides opportunities and benefits that are equal to those of the inaccessible school.

In both situations described in your letter, if the school district is required to undertake structural alterations or other measures to provide program access, it is only required to do so to the extent such measures do not constitute a fundamental alteration of its program or an undue financial or administrative burden.

Public education of individuals with disabilities is also regulated under Section 504 of the Rehabilitation Act of 1973 and the Individuals with Disabilities Education Act (IDEA). Therefore, those statutes may also affect your school district's obligations toward students with disabilities.

I hope that this information is helpful to you.

Sincerely,

John L. Wodatch
Chief
Public Access Section

01-03621

FEB 16 1995

XX
San Antonio, TX XX

Dear XX

This letter is in response to your recent letter concerning the "Meals-on-Wheels" program. You expressed concern that the program is limited to elderly people and is not available to individuals with disabilities who are not elderly.

The Americans with Disabilities Act (ADA) authorizes the Department of Justice to provide technical assistance to individuals and entities that have rights or responsibilities under the Act. Pursuant to that authority, this letter provides informal guidance to assist you in understanding the ADA. However, this technical assistance does not constitute a legal interpretation of the statute and it is not binding on the Department.

The ADA is a civil rights statute that prohibits discrimination on the basis of disability. Title III of the ADA requires public accommodations to ensure that no individual with a disability is denied an equal opportunity to participate in its activities or to benefit from the goods, services, or advantages

that it offers because of that individual's disability. Nothing in the ADA precludes providing special benefits, similar to a "Meals-on-Wheels" program, for individuals with disabilities or groups of individuals with disabilities. However, the ADA also does not prohibit the operation of a program designed to serve only elderly people, as long as the program benefits are offered equally to senior citizens who have disabilities and those who do not.

XX

XX
XX
Cincinnati, Ohio XX

Dear XX

This is in response to your letter regarding the Americans with Disabilities Act (ADA). You have asked whether the ADA would require medical care providers to require their employees to refrain from wearing fragrances when they are providing services to a person who has multiple chemical sensitivities.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that have rights or responsibilities under the Act. Pursuant to that authority,

this letter provides informal guidance to assist you in understanding the ADA. However, this technical assistance does not constitute a legal interpretation of the statute, and it is not binding on the Department.

A medical care facility, such as the University of Cincinnati Medical Center, may be covered under either title II or title III of the ADA. Title II prohibits discrimination on the basis of disability by State and local government entities. Title III prohibits such discrimination by places of public accommodation and commercial facilities.

Both title II and title III require covered entities to make reasonable modifications to policies, practices, and procedures when such modifications are necessary to avoid discrimination against persons with disabilities. Use of fragrances is usually a matter of personal choice by individual employees, rather than a business or employment policy. In most circumstances, it would not be "reasonable" to require an employer to regulate such personal choices by its employees.

cc: FOIA

01-03624

I hope this information is helpful to you and fully responds to your inquiry.

Sincerely,

John L. Wodatch
Chief
Public Access Section

XX

November 28, 1994

United States Department of Justice
Title III, ADA
P.O. Box 66738
Washington, D.C. 20035-6738

Dear Sir or Madam:

Enclosed is a letter which I recently sent to the University of Cincinnati Medical Center due to a lack of any effort on their part to accommodate my special needs.

I am disabled due to Multiple Chemical Sensitivity which I developed after years of exposure to solvents while in the printing business. Due to this condition, I become very ill when exposed to fragrances, tobacco odors, chlorine, Phenol, petroleum products and many other Volatile Organic Compounds.

I am a very reasonable person and realize that VOC's are necessary for many businesses to provide the products and services that keep our economy going. However, to request personnel of a specific department to refrain from wearing fragrances on one a specific day so that a person with MCS can have access to medical care, and to be mocked is reprehensible.

Please advise if access to medical care is covered under the Americans with Disabilities Act, and if asking medical providers to have their personnel to refrain from using fragrances on a specific day that services would be provided
to a MCS sufferer is an unreasonable request.

Sincerely,
XX

XX
XX
Cincinnati OH XX
XX

November 16, 1994
University of Cincinnati Medical Center
Mr. Jack Cook, CEO

234 Goodman Street, ML 0700
Cincinnati, Ohio 45267

Dear Mr. Cook:
I write today out of concern for all patients with disabilities having a need for access to medical services at your facilities. The perception of those being disabled and needing some special accommodations often seems to be limited to those restricted to wheel chairs or without sight; disabilities that one can be aware of quickly and visually. There are many other cases when individuals are in need of special services or accommodations that may not be so apparent. These disabilities include, but are not limited to, persons with speech problems, heart and breathing problems, which may be accommodated in most instances with a minimum of courtesy and inconvenience.

In addition to normal inhalant allergies and asthma that are suffered by many, I am disabled due to a condition most frequently called Multiple Chemical Sensitivity Syndrome, (MCS). Individuals with this condition have strong reactions to chemical exposures, usually Volatile Organic Compounds, (VOC's), which may cause a variety of symptoms including respiratory difficulties, raising of blood pressure, coughing, choking, gagging, vomiting, numbness & pains in extremities or torso, dizziness, and mental confusion along with more typical allergic symptoms. Common irritants which effect me are; perfumes and other fragrances; exhaust and petroleum products; smoke odors, active or residual, from cigars, cigarettes and fireplaces; aerosol cleaners and propellants; cleaning products including phenol and pine tar products; chlorine; alcohol; new carpeting and composite wood products. Some of these I will agree are very hard to avoid and eliminate from all environments, however irritants such as fragrances can and should be easy to avoid for allergic and irritated patients in a medical setting.

Although I have had a multitude of milder problems while attempting to receive medical care which I will lightly elaborate on a little later, the main incident which has caused me to write concerns the Oral Surgery Department and a total disregard for my needs as a disabled patient.
On the afternoon of September 27, 1994, after being advised by my dentist that I should have a tooth removed by an oral surgeon, I called the Oral Surgery Department in the Medical Subspecialties Building and explained my situation and need to have the area fragrance free for the day I would have Oral Surgery.
I truly felt that since you were a hospital setting where I had received most of my medical attention over the past few years, and all departments would have access to my medical records, that some attempt to accommodate me would be routine.
01-03627
I was promptly told in a very nasty, huffy tone, that not being able to wear perfume would be a violation of the employees personal rights. I responded to her attitude with a statement that; "I believed the Americans with Disabilities Act would consider not being able to wear perfume on one day

after being requested for a specific patient a reasonable accommodation. I felt this was especially so since this was a medical necessity, not just an inconvenience." I was quickly promised that the department head would call me back later that afternoon.

On Thursday, September 29, 1994, after my appointment at the allergy/asthma clinic on the third floor, I went down to the Oral Surgery Department to attempt to explain further what the problem was, and try to get an appointment to have my tooth removed. Upon my entry and initial start of explanation to the two receptionists, one being a black woman and one being a white woman, the black woman immediately left stating; "I'm going to get out of here!" I proceeded to try to talk to the white woman in an atmosphere of overpowering fragrance that was not relieved by the handkerchief I was trying to use to filter the air as I would inhale. Her attitude continued to prevail, as I was choking and gagging in an effort to talk to her. She finally said she would have her chief call me the following day, stating a note was still attached to her computer. Her "chief" was said to have been out for meetings the past few days which was why I had not been called back as previously promised. As I left the reception area and started to try to breathe non-contaminated air, I continued to choke and had to run to the restroom to vomit & catch my breath. Once I regained most of my composure, I went back upstairs to have a nurse in the allergy clinic check my BP and Peak Flow for comparison to before the exposure and then I left.

As of this date, I have still not received any type of contact, appointment or explanation, from anyone in the UCMC Oral Surgery Department.
In my frustration, I started calling other area Oral Surgeons the next week with an explanation of my problem and found one where a nurse was also fragrance sensitive. I had my tooth removed at his office without any additional problems.

What makes this experience even more frustrating is the fact that I have been told by other hospital employees on numerous occasions that hospital policy states perfumes are not to be worn, especially where anesthesia is in use because so many people have problems when under the effect of an anesthetic. A previous situation that was frustrating occurred on July 19, 1994, and involved the Hand Surgery Department and the Same Day Surgery Department at Holmes.

I had been scheduled for Carpal Tunnel surgery on my left wrist and had taken great pains to explain to the nurse the problems I have when exposed to perfume
and alcohol when interviewed on the phone prior to the scheduled surgery date. I also requested if at all possible to use zephryne or iodine if a topical cleaning agent was needed and to have everyone refrain from wearing perfume the morning of the surgery. After assuring me that perfume was already a no-no in a surgical area anyway, she said she would make extra notes to be sure no-one wore anything the day of my surgery. She also had me call the surgeon's

office to go over my problems and medications with his office. I spoke directly with the surgeon's nurse, after which she spoke to the doctor and called me back stating everything would be OK.

On the morning of the surgery, my first exposure that caused problems was when the assisting surgeon entered with a strong residual odor of tobacco smoke on him. He assured me that after he scrubbed and wore a mask, I wouldn't have a problem. Shortly after this, the scrub nurse came

in to take me into the OR with a very strong odor of perfume that caused immediate breathing problems. I had to ask her three times to leave because I couldn't breathe with the irritation of her perfume. Notations had been made on my chart, however this nurse had apparently been off for a few days and had not been advised. The lead surgeon then came in and canceled my surgery due to his fear of my going into respiratory distress, and the fact that I still had feeling in my fingertips most of the time.

I had actually been a little relieved for the cancellation of the surgery since I didn't feel all of my pains & cramps in my arms and hands are related to carpal tunnel. Many of them involve my forearms and upper arms and seem to frequently occur after an exposure. Although frustrated that a seemingly simple request for accommodation had not been considered important enough to see that it was carried out. The most frustrating part of this incident was the fact that billings were still sent out to Medicare and Medicaid for services that were aborted due to hospital errors.

I am also frustrated that some personnel in the Allergy/asthma Department are allowed to wear perfumes and use scented lotions. There are many others in the waiting room each Thursday with allergies that have reactions to fragrances. Their reactions may not be as severe as mine, but it's enough that they remark about it in the waiting area.

On one hand I would like to commend you on making the entire facility smoke free, however on the other hand to allow smoking just outside the doors of the buildings also presents a problem for those irritated. This is especially so for the walkway between the Main Clinic building and the Medical Subspecialties Building. Additionally, allowing vehicles to idle just outside the sliding doorways near the Outpatient Pharmacy is a problem on a regular basis when it's cool outside.

Please realize, I have to take great steps in my routine daily activities to avoid exposures that cause problems, and I always have to be aware of how I can escape to clean air should a person with cologne or perfume enter an area. I also realize that I cannot force the entire world to adapt just for me, so that I may function and travel about without risk of exposure. However, there are many individuals that have similar reactions or allergies to fragrances, and medical care is one area that should make that extra little effort to accommodate all disabilities.

I still can't believe the attitude that was displayed by the woman in the Oral Surgery Department, or that the some individuals in the Allergy Department are permitted to wear fragrances regularly when they are very aware of the problems it may cause.

Sincerely,
XX

United States Department of Justice, re: ADA Title III

01-03629

FEB 17 1995

xx

XX
Tampa, Florida

Dear XX

This letter is in response to your inquiry about application of the Americans with Disabilities Act (ADA) to U.S. possessions. I apologize for the delay in our response.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation or legal advice, and it is not binding on the Department of Justice.

Your letter inquires about whether title III of the ADA extends to the Commonwealth of Puerto Rico and the Virgin Islands. Title III, which prohibits discrimination on the basis of disability by private entities that own, operate or lease places of public accommodation, does apply to entities located in the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, the Trust Territory of the Pacific Islands, and the Commonwealth of the Northern Mariana Islands. A copy of the regulation implementing title III of the ADA is enclosed for your information.

I hope this information is useful to you in understanding the requirements of the ADA.

Sincerely,

Janet L. Blizard
Supervisory Attorney

Enclosure

June 21, 1994

U.S. Department of Justice
Civil Rights Division
Washington, D.C.

To Whom it may Concern:

I have a question concerning the Public Accomodations Section of the Americans with Disabilities Act (ADA).

Do the provisions of this law apply to the various U.S. possessions, i.e., Puerto Rico, The Virgin Islands, etc.? If so, there are a few places in these Islands that are not in compliance with this law.

I thank you for any assistance and clarification that you can offer.

Sincerely,

xx

General Counsel
Office of the Vermont Secretary of State
109 State Street
Montpelier, VT 05609-1101

Re: Inquiries on Vermont Professional Licensing Applications

Dear Mr. Chase:

This letter responds to your inquiry regarding the content of professional licensing applications in your State. Specifically, you have requested guidance regarding whether questions included on the Vermont Board of Nursing's licensure application form are consistent with the Americans with Disabilities Act, 42 U.S.C. SS 12101-12213 ("ADA"). According to your letter, the Office of the Vermont Secretary of State supports 33 other licensing boards which utilize similar inquiries.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation or legal advice and it is not binding on the Department of Justice.

Two forms were appended to your letter. The first, labelled "State of Vermont Renewal Application," contains five questions. The first three questions pose no issue under the ADA. We recommend, however, that Questions 4 and 5 be revised or eliminated.

Question 4 and 5 now read:
[During the previous 2 years, have you]
4. Had a problem with substance abuse?
5. Received care for a physical or mental health problem that may cause a threat to public safety during nursing practice?

cc: Records, Chrono, Wodatch, Foran, FOIA, MAF
Udd:Foran:Vermont.ltr

To be completely consistent with the ADA, we would recommend that Question 5 be revised to read as follows:

[During the previous 2 years, have you]

5. Had, or do you now have, a physical or mental health problem that may cause a threat to public safety during nursing practice?

We recommend that Question 4 be eliminated. In its place, you may wish to substitute one or more inquiries from the attached list of questions drafted by various licensing boards and revised by the Department to comply with the ADA.1

The second form appended to your letter is untitled, but bears a caption at the top that states, "THIS PAGE IS NOT SUBJECT TO PUBLIC DISCLOSURE." There are six questions on this form, the first four of which pose no issue under the ADA. Question 5 should be revised, however, and Question 6 eliminated. Presently, Question 5 reads:

Have you had a mental, emotional or physical disability the nature of which would interfere with your ability to practice nursing competently?

The question should be revised to ask:
Do you have or have you had a mental, emotional or physical

disability the nature of which would interfere with your current ability to practice nursing competently?

Question 6 is similar to Question 5 on the first form, and like that inquiry, should be eliminated.

1 We hope that the list of questions provides you with useful examples (this list constitutes the significant portion of the conference handout referred to in your letter). Various licensing boards approached the Department for assistance in revising their professional licensure applications consistent with the ADA. Most of the questions focus on applicants' behavior and conduct, while others ask whether applicants have any condition that would currently impair their ability to practice the profession in question. You will note that some of the questions deal specifically with the practice of law. While we do not endorse these as "model questions," we have concluded that the questions do not on their face violate the ADA.
01-03633

I hope that this is helpful to you in your efforts to promulgate professional application forms consistent with the ADA. Please feel free to forward any additional materials on which you wish the Department to provide technical assistance, and to call me at (202) 616-2314 with any questions you may have.

Sincerely,

Sheila M. Foran
Attorney
Public Access Section

01-03634

SAMPLE QUESTIONS

Q. Do you have any condition or impairment that currently impairs your ability to practice law? If the answer to the above is yes, please set forth the specifics, including dates, the name and the address of any treating physician or mental health counselor.

"Medical condition or impairment" means any physiological, mental or psychological condition, impairment or disorder, including drug addiction and alcoholism.

"Ability to Practice Law" is to be construed to include the following:

a) The cognitive capacity to undertake fundamental lawyering skills such as problem solving, legal analysis and reasoning, legal research, factual investigation, organization and management of legal

work, making appropriate reasoned legal judgments, and recognizing and resolving ethical dilemmas, for example.

b) The ability to communicate legal judgments and legal information to clients, other attorneys, judicial and regulatory authorities, with or without the use of aids or devices; and

c) The capability to perform legal tasks in a timely manner.2

Q. Have you ever been involved in, reprimanded for or disciplined by an employer or education institution for misconduct including:

a. acts of dishonesty, fraud, or deceit;
b. lying on a resume, or misrepresentation;

2 The Board understands that mental health counseling or treatment is a normal part of many persons' lives and such counseling or treatment does not of itself disqualify an applicant from the practice of law. Furthermore, the Board does not wish to pry into the private affairs of applicants. However, the Board is obligated to determine whether an applicant is physically and mentally fit to practice law and therefore, must inquire into such matters to the extent necessary to make such determination. The Board is not seeking disclosure of counseling or treatment for a dramatic or upsetting event such as death, break-up of a relationship or a personal assault, even if such event does affect the applicant's ability to practice law for a limited time.

c. academic misconduct, including such acts as cheating;
d. misconduct involving student activities;
e. theft;
f. excessive absences;
g. failure to complete assignments in a timely manner;
h. actions in disregard of the health, safety and welfare of others;
i. sexual harassment;
j. neglect of financial responsibilities.

If the answer to any of the above is yes, please set forth the specifics, including date of the action; by whom taken; the name and address of the employment supervisor or academic advisor involved, if applicable and any person involved in the

investigation of your conduct.

Q. Have you ever been terminated or granted a leave of absence by an employer or withdrawn from an education institution?

If the answer to the above is yes, please set forth the specifics, including date of the action; by whom taken; the name and address of the employee's supervisor or academic advisor involved.

Q. Are you currently engaged in the illegal use of drugs?
"Illegal Use of Drugs" means the use of controlled substances obtained illegally as well as the use of controlled substances which are not obtained pursuant to a valid prescription or taken in the accordance with the directions of a license health care practitioner.

"Currently" does not mean on the day of, or even the weeks or months preceding the completion of this application. Rather, it means recently enough so that the condition or impairment may have an ongoing impact.3

3 You have a right to elect not to answer those portions of the above questions which inquire as to the illegal use of controlled substances or activity you have reasonable cause to believe that answering may expose you to the possibility of criminal prosecution. In that event, you may assert the Fifth Amendment privilege against self-incrimination. Any claim of Fifth Amendment privilege must be made in good faith. If you choose to assert the Fifth Amendment privilege, you must do so in writing. You must fully respond to all other questions on the application. Your application for licensure will be processed if you claim the Fifth Amendment privilege against self-incrimination.

Q. In the past year, have you illegally used drugs? If yes, provide details. (Illegal use of drugs means the unlawful use of one or more drugs and/or the unlawful possession or distribution of drugs. It does not include the use of drugs taken under supervision of a licensed health care professional, or other uses authorized by federal law provisions.)

Q. In the past year, have you ever been reprimanded, demoted, disciplined, terminated or cautioned by an employer? If so, please state the circumstances under which such action was taken, the date(s) such action was taken, the name(s) of persons

who took such action and the background and resolution of such action.

Q. Since the age of 18, or within the last five years (whichever period is shorter), have you ever been reprimanded, demoted, disciplined, cautioned or terminated by an employer for alleged tardiness, absenteeism or unsatisfactory job performance in your employment? If so, please state the circumstances under which such action was taken, the date(s) such action was taken, the name(s) of persons who took such action and the background and resolution of such action.

Q. Have you ever been accused of mishandling, mismanaging, or misappropriating the money or property of others? If so, please state the date of such accusations, the person(s) making such accusations, the specific accusations made, and the background and resolution of such accusations.

Q. In the past year, have you suffered memory loss or impaired judgment for any reason? If so, please explain in full.

Q. In the past year, have you failed to meet any personal or business related deadlines for any reason? If so, explain in full.

Post Office Box 66738
Washington, DC 20035-6738

Dear Ms. Foran:

I heard you speak at this year's CLEAR Conference in Boston, on the topic of ADA compliance. At one point you remarked that your office was able to provide technical assistance on the phrasing and subject of the questions licensing boards ask on application and renewal forms.

I've enclosed copies of the questions used by the Board of Nursing in the past. Perhaps you could identify the ones most likely to be objectionable, and suggest alternatives. At the conference, you referred to a handout which unfortunately was not available. I'd appreciate a copy of that handout, assuming it would provide guidance to the Board of Nursing.

In addition to the Board of Nursing, this office supports 33 other professional licensing boards. Nearly every one uses the kind of questions found on the Nursing Board forms. I'm eager to revise as many of those questions as need revision, and I look forward to your response.

Sincerely,

John H. Chase
General Counsel

STATE OF VERMONT
RENEWAL APPLICATION

I hereby apply for the renewal of my:

Current Expiration Renewal Period Covering Renewal Fee License #

Renewals postmarked after the expiration date must include a late fee of $25.00

* The fee of $40.00 represents the renewal fee of $35.00 and a $5.00 assessment
in accordance with 3 V.S.A. S 124 (b)

** Make any changes to your address in the blank space above.

Please check (X) if you wish inactive status (no fee required):

INFORMATION NEEDED

Circle yes or no, a yes requires an explanation * during the previous 2 years, have you:

1. Applied for and been denied a nursing license in another state, or had a nursing license suspended? Yes or No
2. Been subject to a disciplinary proceedings before a state board of nursing? Yes or No
3. Been convicted of a criminal offense, other than minor traffic violations? Yes or No
4. Had a problem with substance abuse? Yes or No
5. Received care for a physical or mental health problem that may cause a threat to public safety during nursing practice? Yes or No

* If necessary, additional pages may be attached.

ADDITIONAL QUALIFICATIONS FOR RENEWAL

Respond to part A or part B

A. I have practiced nursing as defined in Chapter 4, Rule II, Administrative Rules, for at least: **
120 days (960 hrs) in the last 5 years, or 50 days (400 hrs) in the last 2 years
at
(Name of specific Agency/Institution) (City/State) (Position)

OR

B. I have completed a Board approved program for re-entry into nursing within the past five years
at
(Program Sponsor (School, Institution, or Person) (City/State) (Date)

** If private duty position - please note name, address of each patient(s), number of days and hours for each; diagnosis; nursing care provided; physician's
name and address. Attach additional papers if needed.

YOU MUST COMPLETE AND SIGN THE REVERSE SIDE OR YOUR LICENSE WILL NOT BE RENEWED

THIS PAGE NOT SUBJECT TO PUBLIC DISCLOSURE

Section III

APPLICANT'S NAME: Last First MI

Social Security # / / The disclosure of your social security number is mandatory, pursuant to 42 U.S.C. Section 405 (c)(2)(c), and will be used by the Vermont Department of Taxes in the administration of tax laws to identify persons affected by such law.

1) Have you previously applied for a license in Vermont? Yes No
If yes: under what name?

2) Have you ever applied for and been denied a nursing license in another state? Yes No

3) Do you now hold or have you ever held a Nursing License that has been subject to disciplinary proceedings before any state licensing authority or had a license revoked or limited in any way? Yes No

4) Have you ever been convicted of a criminal offense, other than a minor traffic violation? Yes No

5) Have you had a mental, emotional or physical disability the nature of which would interfere with your ability to practice nursing competently? Yes No

6) Have you ever had a problem with substance abuse? Yes No

IF THE ANSWER TO QUESTIONS (#2 thru 6) IS YES, PLEASE IDENTIFY BY NUMBER AND EXPLAIN FULLY USING SEPARATE SHEETS OF PAPER, AS NEEDED.

Section IV
STATEMENT OF APPLICANT

I hereby certify that everything in this application is true and accurate to the best of my knowledge.

FEB 22 1995

The Honorable Roscoe G. Bartlett
Member, U.S. House of Representatives
15 East Main Street, Suite 110
Westminster, Maryland 21157

Dear Congressman Bartlett:

This letter is in response to your inquiry on behalf of XX inquired whether rental car companies must provide vehicles equipped with steering knobs upon request under the Americans with Disabilities Act ("ADA").

Title III of the ADA requires rental car companies to remove transportation barriers that prevent persons with disabilities from being able to use rental cars, when doing so is readily achievable. An act of barrier removal is readily achievable when it is easily accomplishable and able to be carried out without much difficulty or expense. This analysis depends on several factors, including the nature and cost of the action, the overall financial resources available, and legitimate safety requirements needed for safe operation of the vehicle.

Rental car agencies have argued that some types of mounting hardware used to attach spinner knobs to steering wheels damage the steering wheels, rendering the cars less valuable upon resale. Others have argued that some mounting devices interfere with the proper deployment of drivers side air bags which are installed inside the steering column. Please refer to the enclosed Consumer Advisory, released on September 15, 1994, by the National Highway Traffic Safety Administration. In either case, it would not be readily achievable to equip a rental vehicle with a spinner knob.

To the extent that mounting devices are available that do not damage the steering wheel or interfere with air bag deployment, however, rental car agencies are generally required to provide spinner knobs for persons with disabilities, when

cc: Records; Chrono; Wodatch; Breen; Mobley; McDowney; MAF; FOIA
udd\mobley\congress\bartlett

01-03641

provided with sufficient notice. Spinner knobs are relatively inexpensive, easily installed, and transportable. Where spinner knobs are required by title III, companies cannot impose a surcharge for their use. Instead, the cost should be treated as an overhead expense.

I hope this information is useful to you in responding to your constituent.

Sincerely,

Deval L. Patrick

Dear Public Access Department:

Please find enclosed a copy of a letter from XX regarding steering knob access from rental car agencies. As you can see from the enclosures, XX was involved in an accident, and needed to rent a car. According to XX , he was denied access because the rental agencies did not have a vehicle with steering knobs. He has asked that I bring this matter to your attention.

Any assistance you may provide XX would be greatly appreciated. Please reply to 15 E. Main Street, Suite 110, Westminster, MD 21157, Attention: Deborah Hamrick.

Sincerely,

Roscoe G. Bartlett
Member of Congress

RGB:dlh
Enclosure

12-7-94

Dear Mr. Bartlett

On Saturday, November 26
I was coming down 140 from Westminster. I turned left onto Gorsuch Rd. at McDonald's. It was about eight o'clock and pitch black. After going 200-300 yds, a large doe decided to cross the road and hit my car.

My insurance paid for the damage but trying to get a rental car with a steering knob was a real predicament. Rental car agencies have cars for the disabled but they only deal with the ignition and brakes.

Medically I'm classified as a walking quadraplegic. I walk with 2 canes. Both legs were broke (left leg shattered from knee down.)

I took Driver's Education at Easy Method and the instructor recommended the steering knob. This feature allows me to make all my turns with the right arm. I really appreciate your consideration and help.

Thanks
XX

FEB 28 1995

The Honorable Bob Graham
United States Senator
Post Office Box 3050
Tallahassee, Florida 32315

Dear Senator Graham:

This letter is in response to your inquiry on behalf of your constituent, XX , regarding an alleged lack of wheelchair accessibility in the attractions at Walt Disney World (Disney) in Orlando, Florida. Specifically, XX complains that his wife, who uses a wheelchair, was prevented from enjoying several attractions at Disney because the attractions were not accessible to individuals who use wheelchairs. XX alleges that several of these attractions had been renovated after the effective date of the Americans with Disabilities Act (ADA), and that some attractions that were not renovated could easily be made accessible to individuals who use wheelchairs. Finally, XX was concerned about Disney's imposition of certain policies that limited use of some rides to individuals who can walk.

The ADA requires public accommodations like Disney to provide "full and equal enjoyment" of their goods and services to individuals with disabilities. 42 U.S.C. S 12182 (a). Among the law's many provisions is a carefully crafted process for the development of physical access to places of public accommodation. The ADA places a relatively modest burden on existing facilities, requiring that they remove barriers to access where it is readily achievable, or "easily accomplishable and able to be carried out without much difficulty or expense." 42 U.S.C. S 12182(2) (A) (iv); 28 C.F.R. S 36.304(a). When a place of public accommodation performs alterations or when it undertakes new construction, however, the law requires strict adherence to specific standards that are intended to provide maximum physical access for persons with disabilities. 42 U.S.C. S 12183(a) (2); 28 C.F.R. S 36.401 (new construction), 28 C.F.R. S 36.402 (alterations), 28 C.F.R. S 36.406, pt. 36, App. A (Standards for Accessible Design). Entities performing alterations that are more than mere cosmetic changes must ensure that any altered areas are readily accessible to and usable by persons with

disabilities. 42 U.S.C. S 12183 (a) (2); 28 C.F.R. S 36.402. In addition, if the alterations involve areas of primary function, entities must spend up to 20% of the costs of the alterations making the path of travel to the altered areas accessible. 42 U.S.C. S 12183 (a)(2); 28 C.F.R. S 36.403. A "primary function" is a major activity for which the facility is intended and includes areas such as the lobby of a bank, the dining area of a cafeteria, and meeting rooms. 28 C.F.R S 36.403(b). The "path of travel" to an altered area is defined as an unobstructed passageway from the entrance to the facility to the altered areas, and includes areas such as restrooms, telephones, and drinking fountains. 28 C.F.R. S 36.403(e).

While the Standards do not specifically address some elements of amusement park rides, other provision of the title III regulation may require purchase or modification of equipment in order to ensure full and equal employment of the facilities and to provide an opportunity to participate in the services and facilities. 28 C.F.R. SS 36.201 and 36.202. The barrier removal requirements would also apply.

Several of the attractions identified by XX are existing, and others, allegedly, have been altered. Without a thorough investigation into the nature of the changes that need to be made in order to provide access to the existing rides, it is impossible to determine whether Disney has violated the section of the law mandating "readily achievable" barrier removal. Similarly, the United States cannot determine whether Disney has violated the alterations provisions, short of an investigation of the date on which alterations were undertaken, the nature of the alterations, and a determination of whether the alterations, if more than cosmetic, involved areas of primary function.

Finally, XX complains that his wife was not permitted onto a ride because of Disney's conclusion that she would be unable to evacuate the ride in the event of its breakdown. Public accommodations are required by the law to make all reasonable modifications in their policies, practices and

procedures that are necessary to ensure that individuals with disabilities enjoy their goods and services. 42 U.S.C. S 12182 (b)(2)(A)(ii); 28 C.F.R. S 36.302. Entities are, however, permitted to establish neutral "eligibility criteria" that are necessary for the safe operation of the place of public accommodation. 28 C.F.R. S 36.301(b). Safety requirements must be based on actual risks, and not on stereotypes or generalizations about individuals with disabilities. 28 C.F.R. pt. 36, App. B at 605. A determination of whether the alleged criteria for the rides are discriminatory would require investigation into the particular circumstances involved.

At this time, the Department has decided not to open an investigation of XX complaint. I am enclosing a copy of this Department's regulation implementing title III of the ADA and the Technical Assistance Manual that was developed to assist individuals and entities subject to the ADA to understand the requirements of title III. I hope that these materials and the discussion herein provide guidance to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

December 24, 1994

Architectural & Transportation Barriers
Compliance Board
1331 F Street NW
Suite 1000
Washington, DC 20004-1111

Good Day:

This is to issue a complaint about Walt Disney World, in Orlando, reticence to make their facilities wheelchair accessible.

My wife, XX , is a paraplegic and, of course, unable to stand or walk, and must use a wheelchair for mobility. Other than being paraplegic, she is in excellent health. In February of 1993, we purchased an Annual Pass for Walt Disney World in Orlando. At that time we realized that the Magic Kingdom, the oldest theme park, would be least accessible for someone in a wheelchair. Disney-MGM Studios, the newest park, would be most accessible, and Epcot would fall somewhere in between. Our subsequent visits to the park confirmed the aforementioned.

Although we visited the park many times, we decided to return to the Magic Kingdom in early December to see the new attractions at Tomorrowland. Several of the rides in this section had been closed for upgrading, plus a new ride, the Extra "Terrorestrial" Alien Encounter were all due to open in December, 1994. Once we were in

the park we learned their newest Terrorestrial ride would be delayed in opening until February, 1995.

Since we were in the Tomorrowland area we decided to try some of the rides which had been renovated and were now opened. We tried to go onto the Tomorrowland Transit Authority but we were told that unless my wife can walk up an ascending ramp, to a moving turntable, she would not be allowed to go on this ride. Moreover, unless she could walk 2 1/2 or 3 1/2 miles in the event the ride stops functioning she is prohibited from participating on this ride. We have gone on many slow moving rides, at Disney, whereby the ride was stopped to enable her to transfer. I wonder what would have happened on Spaceship Earth if the ride stopped at the top of the Sphere, or if any of the other rides we were on were forced to a standstill. There is no way she could have walk away from any of these rides. Therefore, it follows using this logical approach that she should not be allowed on most of the rides in the park, or maybe just don't allow her in the park. When I tried to explain this to the attendants, at the Tomorrowland Transit Authority, I was told they were sorry but she cannot get on the ride.

We then went over to the Astro-Orbiter and the attendant told us unless she can move the bottom portion of her body, it would not be feasible for her to wiggle into a rather tight opening to enter

01-03648

DISNEY-MGM STUDIOS
Great Movie Ride
Backstage Studio Tour
Plus all other shows in a theatrical format

The reason Disney-MGM Studios is most accessible is simply because the preponderant number of attractions are presented in a theatrical format.

I do not understand why the new rides, or the renovated rides have not been made wheelchair accessible. I thought the American Disability Act required new construction to accommodate wheelchairs. Furthermore, if the Act does not require new or renovated attractions to accommodate wheelchairs, don't you think the premier attraction in our country should extend themselves to help those less fortunate. The following attractions have been renovated or built since the ADA act and are not wheelchair accessible:

Tomorrowland Transit Authority
Astro-Orbitor
Skyway
Splash Mountain
Spaceship Earth
The Twilight Zone Tower of Terror

We have learned to live and travel within the confines of my wife's disability. Many attractions discount their fees because we are limited to what we can see and do. When an attraction charges top dollars for entry, pays their CEO an annual salary of two hundred million dollars don't you think they should extend themselves to those who must endure life from a restrictive prospective. Maybe Disney is so big and important that they can flaunt the law of the land, and relegate the disabled to second class citizens.

It has reached the time that renting a wheelchair at a nominal cost to the handicapped, or making some rides accessible to the handicapped is just not enough. We are tired of hand-outs. We want, when it is possible, to have the same rights and pleasures as able body people. Disney's denouement to those in a wheelchair must end, and they should voluntarily or forceable make their attr actions accomodate those restricted to a wheelchair.

Cordially,

XX
cc: Walt Disney World
Tampa Tribune
WFLA-TV
National Spinal Cord Injury Association
Senator Bob Graham
Congressman Michael Bilirakis
Abilities Inc. of Florida
State Attorney General
The Honorable Eleanor Holmes Norton
Member, U.S. House of Representatives
815 15th Street, N.W., Suite 100
Washington, D.C. 20005-2201

Dear Congresswoman Norton:

This letter is in response to your inquiry on behalf of your constituent, XX , concerning her rights under the Americans with Disabilities Act of 1990 ("ADA"). XX , who states that she is "extremely overweight" states that Darrell's Barber Shop refused to provide service to her recently, telling her that she might break the barber chair.

Barber shops are subject to the nondiscrimination requirements of title III of the ADA. The ADA defines "disability" to include any physical or mental impairment that substantially limits one or more of an individual's major life activities, such as walking, seeing, hearing, speaking, breathing, learning, working, or caring for oneself. The

definition is a broad one, however, being overweight is generally not considered to be a disability that entitles an individual to protection under the ADA. Some courts have determined that an individual who is morbidly obese -- weighs either more that twice one's optimal weight or more than one hundred pounds over one's optimal weight -- may be entitled to the protections of the ADA, if an individual is substantially limited in a major life activity.

A review of the matter raised by XX indicates that there is insufficient information to determine whether she would be considered a person with a disability within the meaning of the ADA. In any event, while we would have authority under title III to investigate this matter, we could take enforcement action only where there is a pattern or practice of discrimination or discrimination involving an issue of general public importance. We have determined that action by the Department is not warranted in this matter.

01-03650

XX has other options, however, including contacting local authorities, disability rights groups, organizations that provide alternative dispute resolution services (such as arbitration or mediation), or contacting a private attorney. For your constituent's convenience, we have enclosed a list of organizations serving your area. These listings come from various sources, and our office cannot guarantee that they are current and accurate. These groups may, however, be able to refer XX to regional or national groups with a focus on the particular matter at issue here. Other contact options include the District of Columbia Bar Association and the Better Business Bureau.

You may also wish to inform XX that further

information is available through our Americans with Disabilities Act Information Line at (800) 514-0301.

I hope this information is useful to you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

Enclosure

01-03651

Honorable Eleanor Holmes-Norton
Washington, D.C. Representative
815 15th St., N.W.
Washington, D.C. 20007

Dear Hon. Holmes-Norton:

On January 14, 1995 I placed a call to Darrell's Barber Shop to get an appointment for a haircut and eye brow arch. I spoke to the barber who cut my hair on December 10, 1994 XX and he told me to come in at 1:30 p.m. I arrived approx. 1:45 p.m. and sat while he was cutting a customer's hair. He finished with him approx. 2:05 p.m. at which time

a lady who came in after I did sat in XX chair. I was concern due to the fact I was next in line. XX came over to me and informed me that the owner requested that I not get my hair cut in his place because I might break his barber chair. I was not only shocked but hurt and humiliated. I ask XX why was he just telling me now and not on the phone when I called him, he replied by saying he didn't know at that time. He later informed that it was not of his doing it was at the owners request. XX then said he would come to my home after he get off around 5:30 p.m. and cut my hair and I gave him my address and phone number because my whole schedule was mess up so I asked that he would call me first but I never heard from him.

I am wondering why and how did the owner know I was coming if XX didn't inform him plus I believe the owner was in the shop cutting a little boy's hair at the time and did not approach me or XX and why did XX wait until he cut the customer's hair to tell me this?????

I am a African-American woman who is extremely overweight but I am still proud of who I am and at this time I am suffering a set back in emotion where I need my hair cut but I am experiencing a phobia of going into a barber shop or any hair establishment to receive services for fear of being humiliated. The most hurting factor of all, this is a BLACK Establishment.

I feel I was clearly discriminated, please can you help me???? Your immediate attention is needed in this matter.

I can be reached on XX all day every day.

Sincerely,
XX

JUN 15 1995

The Honorable Dianne Feinstein
United States Senator
1700 Montgomery Street, Suite 305

San Francisco, California 94111

Dear Senator Feinstein:

I am responding to your letter on behalf of your constituent, XX , who is inquiring about the application of the Americans with Disabilities Act (ADA) to the provision of accessible parking spaces at an existing place of public accommodation, and to local enforcement of laws pertaining to the provision of accessible parking spaces. Please excuse the delay in responding.

Title III of the ADA, which prohibits discrimination against persons with disabilities by public accommodations, requires the owners or operators of a place of public accommodation, such as a race track, to remove architectural barriers to access. If a public accommodation provides parking, the absence of accessible parking spaces is considered to be an architectural barrier that precludes independent use of the place of public accommodation by people with disabilities.

In removing architectural barriers, a public accommodation is required to comply with the ADA Standards for Accessible Design to the extent that it is readily achievable, that is, easily accomplishable and able to be carried out without much difficulty or expense. The requirements for accessible parking are contained in section 4.1.2(5) of the ADA Standards for Accessible Design, a copy of which is enclosed. If self-parking is provided for employees or guests of a facility, accessible parking spaces should be provided in compliance with the requirements of 4.1.2(5).

The ADA authorizes the Department of Justice to investigate alleged violations of title III. However, the ADA does not authorize the Department to pursue every complaint. The Department may seek judicial relief only in instances where there appears to be a pattern or practice of discrimination or where an issue of general public importance is involved. For cases that do not fall within those categories, the ADA relies on private

individuals to enforce their rights through litigation in Federal court. This prioritization of cases allows the Department to

focus its resources on cases that will have far-reaching effects, for example, by educating individuals and entities about their rights and responsibilities under the Act and by setting legal precedents that can make later cases simpler or even unnecessary.

Enforcement of local parking regulations is a matter governed by State or local law. The ADA does not contain provisions specifically requiring law enforcement officials to ensure that accessible parking spaces are occupied only by persons with disabilities. Decisions made by local law enforcement officials as to how to allocate scarce enforcement resources are a matter of local prosecutorial discretion that typically would not raise ADA concerns.

I hope that this information is helpful to you in responding to your constituent. As you requested, we are returning XX correspondence.

Sincerely,

Deval L. Patrick

XX
SAN MATEO, CA 94402

April 6, 1995

The Honorable Dianne Feinstein,
U.S. Senator
1700 Montgomery Street, Suite 305
San Francisco, CA 94111

Dear Senator Feinstein,

I took my disabled brother, XX , to Bay Meadows Horse Racing Track in San Mateo last Friday night and we discovered that the handicapped spaces were filled with cars without DP plates or handicapped plaques. We called the San Mateo Police and Officer Michael Schlegel arrived promptly.

He stated that the parking spaces were not properly marked for handicapped parking because the law reads that there must either be a sign posted or the space must be outlined in blue markings, therefore he was unable to issue a citation.

We discovered that with the exception of a few spaces along the fence of the fairgrounds (which are some of the farthest spaces from the race track), there are no handicapped parking spaces at Bay Meadows. The spaces with the handicapped logo are apparently marked as such to allow the management to use those spaces for valet parking. This deception should be an illegal practice and it is without a doubt unethical.

It seems that Bay Meadows may be in violation of the Americans with Disabilities Act of 1990 but I have no idea of how such a law is enforced or interpreted. Any assistance that you could provide would be greatly appreciated.

Sincerely yours,

XX

JUN 15 1995

The Honorable Nancy L. Johnson
U.S. House of Representatives
343 Cannon House Office Building
Washington, D.C. 20515

Dear Congresswoman Johnson:

Your letter to the Equal Employment Opportunity Commission on behalf of your constituent, XX , has been referred to me for response. We apologize for the delay in responding.

XX letter questions a Connecticut State Department of Transportation decision to install wheelchair ramps at rural intersections as part of a project to replace old traffic lights. According to the article attached to XX letter, the Connecticut Department of Transportation believes such wheelchair ramps are required by the Americans with Disabilities Act (ADA).

Title II of the ADA prohibits discrimination on the basis of disability by State and local government entities. The ADA directed the Department of Justice to issue a regulation implementing title II. I am enclosing a copy of the Department's regulation and the Title II Technical Assistance Manual for your information.

When public entities build new facilities or alter existing facilities, the title II regulation requires that such new construction or alterations be made accessible to individuals with disabilities. The regulation allows covered entities to apply either the Uniform Federal Accessibility Standards (UFAS) or the ADA Standards for Accessible Design (Standards) as the standards for accessibility of new construction and alterations.

The Connecticut project referred to in XX letter appears to be an alteration to existing traffic signals. Merely replacing traffic signals or installing crossing buttons would not trigger an obligation to install curb ramps.

cc: Records, Chrono, Wodatch, McDowney, Blizard, Hill, FOIA
Udd:Hille:Policylt:Johnson.ltr

The title II regulation specifically addresses curb ramps at altered streets, roads, and highways. When streets are altered, ramps are required at altered intersections if they have curbs that prevent entry to or from pedestrian walkways. 28 C.F.R. S 35.151(e)(1). In addition, ramps are required when pedestrian walkways are altered. 28 C.F.R. S 35.151(e)(2). Curb ramps are not required to be installed in the absence of a pedestrian walkway. Nor are they required in the absence of a curb or other barrier between the street and the pedestrian walkway.

I hope this information is helpful to you in responding to your constituent.

Sincerely,

Deval L. Patrick

14 March, 1995

The Hon. Nancy Johnson
United States House of Representatives
Washington, D.C.

Dear Representative Johnson;

Undoubtedly your staff has brought the subject of the enclosed Hartford Courant editorial to your attention.
This editorial which was published on March 14, 1995 is the second time the Courant has published an article on the subject of installing crosswalks where they will only be used by wildlife.

I guess it would be easy to simply glance at the enclosed, throw it aside and worry about more important things ..... well, an awful lot of people think this is important! I don't think it is the incident itself as much as the mindset of those who make such decisions and those who let them stand!

Don't you thing you really should do something about this sort of thing? There were an awful lot of frustrations in the past where you and your colleagues simply had to bow to the majority; but now we have a new majority, and you're it!

Now, a half million here and a half million there can begin to add up to a lot of money! You want to cut expense without reducing services, right? Well, a half million here and a half million there can really help!

You are in a position to do something about this stupid interpretation of regulations . . . or should we say "this stupid regulation"? I hope you will use your good office to get this project killed; you aught to, you know!

Very truly yours,
XX

GOP legal reforms go too far

Although changes in this nation's overburdened system of civil justice are needed, the three legal reform bills approved by the House last week would severely limit the ability of people to sue for damages.

The measures sent to the Senate would:

* Set federal standards in product-liability cases, and require states to abide by them.

* Impose strict limits on punitive damages in all civil cases.

* Require the loser to pay the court costs and legal fees of the winner in many cases.

Last year, Connecticut Democratic Sens. Joseph I. Lieberman and Christopher J. Dodd, among others, proposed substantive but more careful changes in product-liability law.

In the GOP version, stockholders, for example, would have to prove a company or broker lied in order to prove fraud. If a stockholer failed to

win a lawsuit, he or she could be forced to pay court costs and legal fees of the defendants.

Granted, far too many frivolous lawsuits are filed by lawyers who try to force companies to settle rather than face a long and costly trial. Some lawyers maintain a stable of "professional plaintiffs" and use them to file lawsuits as soon as the stock price or dividend falls. But truly aggrieved stockholders should be able to sue for winner. And lawyers who filed what the judge ruled were frivolous lawsuits would face fines.

The bill is aimed at forcing pretrial mediated settlements, an excellent idea. It would also do away with the abused contingency-fee system, which generates about $15 billion a year for lawyers in personal-injury and product-liability lawsuits. But this reform does not provide for a fee system based on work done. It should.

The reform aimed at replacing state product-liability laws with a single federal standard and capping damage awards should be reconsidered. Limiting awards is fine, but such a law should be written carefully. In its present version, the bill could protect firms and professionals from being sued over clearly reckless or incompetent behavior.

The House Republicans, who champion empowering local governments, want to nationalize liability laws. States would be unable to enact versions tougher than the federal liability laws.

By contrast, the Lieberman-Dodd measure would protect most state liability laws and promote pretrial mediated settlements.

Reform of liability laws has been overdue. but what was tilted one way has now been tilted the other way by the House. The Senate should bring a balance to the scale of justice for plaintiffs

JUL 7 1995

Mr. David B. Casas
Assistant City Attorney
City of San Antonio
San Antonio, Texas 78283-3966

Re: Complaint Number 204-76-35
Dear Mr. Casas:

This letter is in reference to the complaints filed against the San Antonio Riverwalk alleging that it is inaccessible to individuals with disabilities in violation of Title II of the Americans with Disabilities Act of 1990 (ADA).

Based on information received over the course of the past year, I understand that the City of San Antonio has taken the following steps to increase accessibility on the Riverwalk:

1. The narrow sidewalk around the tree on the north side of the 1968 Riverwalk extension has been widened to forty inches.

2. An elevator is planned to replace a ramp that is being removed as part of the Crockett Street Project. The elevator

will be fully accessible and will be in operation on a twenty-four hour basis.

3. A project to provide comprehensive signage along the Riverwalk has been undertaken and will be completed shortly.

4. Plans are in the works to remove steps at several junctures along the Riverwalk.

5. Criteria have been developed to assure accessible riverboats along the Riverwalk.

6. The City has abandoned plans to construct an inaccessible bridge along the Riverwalk.

Based on the foregoing information, and in anticipation of the completion of work mentioned above, we have concluded that the allegations that the San Antonio Riverwalk is inaccessible have been resolved, and we are closing our files on the case as of the date of this letter.

cc: Records, Chrono, Wodatch, Milton, FOIA
n:\udd\milton\complnts\76_35.res\sc. young-parran

01-03660

This letter does not address other potential claims of discrimination on the basis of disability that may arise from the activities of the City of San Antonio. Rather, this letter is limited to the allegations presented in the complaints made to us.

You should be aware that no one may intimidate, threaten, coerce, or engage in other discriminatory conduct against anyone because he or she has either taken action or participated in an action to secure rights protected by the ADA. Any individual alleging such harassment or intimidation may file a complaint with the Department of Justice. We would investigate such a complaint if the situation warrants.

Under the Freedom of Information Act, 5 U.S.C. S 522, we may be required to release this letter and other correspondence and records related to your complaint in response to a request from a third party. Should we receive such a request, we will safe-guard, to the extent permitted by the Freedom of Information Act and the Privacy Act, the release of information that could constitute an unwarranted invasion of other's privacy.

Sincerely,

Naomi Milton
Attorney
Disability Rights Section

01-03661

JUL 14 1995

Mr. Raymond C. Speciale
Yodice Associates
500 E Street, S.W.
Suite 930
Washington, D.C. 20024

Dear Mr. Speciale:

This is in response to your letter to Ed Miller regarding the obligation of the AOPA Air Safety Foundation (ASF) to provide sign language interpreters at aviation safety seminars. You wish to know whether ASF is required under the Americans with Disabilities Act of 1990 (ADA) to provide sign language interpreters for deaf pilots who wish to attend a free aviation safety seminar that is jointly sponsored by ASF and the Federal Aviation Administration.

Title III of the ADA prohibits discrimination on the basis of disability in all places of public accommodation and commercial facilities. Congress defined place of public accommodation as a facility that is operated by a private entity, whose operations affect commerce, and that falls within one of twelve listed categories. One of those categories covers "places of education". 42 U.S.C. 12181, 28 CFR 36.104. Thus, your analysis of section 36.309 is not determinative. As a place of public accommodation, ASF is required to comply with section 36.303 of the ADA, which requires that:

> A public accommodation shall take those steps that may be necessary to ensure that no individual with a disability is excluded, denied services, segregated or otherwise treated differently than other individuals because of the absence of auxiliary aids and services, unless the public accommodation can demonstrate that taking those steps would fundamentally alter the nature of the goods, services, facilities, privileges, advantages, or accommodations being offered or would result in an undue burden . . . . A public accommodation shall furnish appropriate auxiliary aids and services where necessary to ensure effective communication with individuals with disabilities.

cc: Records; Chrono; Wodatch; Milton; FOIA
n:\udd\milton\letters\interp.spe\sc. young-parran

The term auxiliary aids and services includes qualified interpreters, notetakers, computer-aided transcription services, written materials, etc.

A fundamental alteration is a modification that is so significant that it alters the essential nature of the goods, services, facilities, privileges, advantages, or accommodations offered. An undue burden is defined as "significant difficulty or expense." Among the factors to be considered in determining whether an action would result in an undue burden are the nature and cost of the action; the overall financial resources of the site or sites involved; the number of persons employed at the site; the effect on expenses and resources; and the administrative or fiscal relationship of the site or sites in question to any parent corporation or entity.

You assert that ASF is a non-profit entity with limited resources and that the cost of providing interpreters would hamper ASF's ability to provide the same number of free seminars it provides today. While it may be that the provision of interpreters at all seminars would be an undue burden to ASF, you should bear in mind that if a public accommodation determines that providing a particular auxiliary aid or service would result in a fundamental alteration or undue burden, it is not necessarily relieved from its obligations under the ADA. The public accommodation must still provide an alternative auxiliary aid or service that would not result in an undue burden or fundamental alteration but that would ensure effective communication to the maximum extent possible, if such alternatives are available.

I hope this information has been helpful to you.

Sincerely,

John L. Wodatch
Chief
Disability Rights Section

01-03663

JUL 21 1995

Technical assistance review of
proposed amendments to the
Maine Human Rights Act

John L. Wodatch
Chief
Disability Rights Section

Eve L. Hill
Attorney
Disability Rights Section

I. Background and Recommendation

By letter dated January 11, 1995, the Maine Human Rights Commission (Commission) requested the Department's comments on proposed amendments to the Maine Human Rights Act(law). The proposed amendments are intended to incorporate requirements of title III of the Americans with Disabilities Act (ADA) into the Maine law.

Since the letter was sent, the amendments have been submitted to the State legislature and hearings have been completed. The amendments are currently being addressed by the legislature's Judiciary Committee. Staff of the Commission are anxious to receive our comments in order to address them in working sessions with the Judiciary Committee.

Todd Andersen and I have reviewed the Maine law and the proposed amendments. This review indicates that a number of potential problems exist in the proposed amendments as they are currently drafted. I recommend that we point out the major issues and encourage the Commission to address them in its work with the Judiciary Committee and then to submit the final code for certification. A proposed draft response to the Commission is attached. It is important that we move quickly in order to respond before the proposed amendments are finalized. If we wait until they are finalized it will be much more difficult to make the needed changes.

II. Analysis

Maine's approach is significantly different from the approaches taken by the other jurisdictions whose codes we have reviewed. Rather than create its own accessibility code, Maine has chosen to incorporate the ADA construction standards into its human rights code and involve the Fire Marshall in the enforcement of that code. This is more similar to the ADA's

approach than to a building code approach. This approach was most likely chosen because Maine has no pre-existing statewide building code. Instead, the cities that have adopted building

cc: Records, Chrono, Wodatch, Hill, FOIA
n:\udd\hille\maine\tal.mem\sc. young-parran
01-03664

codes use the Building Officials and Code Administrators International (BOCA) code. The State Fire Marshall apparently applies the National Fire Protection Association (NFPA) code.

A. Current Law

The Maine Human Rights Act prohibits discrimination on the basis of race, color, sex, disability, religion, ancestry, national origin, or familial status. It covers employment, housing, public accommodations, credit extension, and education. A person who feels he or she has been discriminated against may file a complaint with the Commission within six months after the discrimination occurs. The Commission will investigate and, if it finds discrimination, it may file suit seeking injunctive relief, reinstatement, back pay, damages, civil penalties, and attorneys' fees. The individual may also sue on his or her own behalf, without seeking relief through the Commission.

The law currently includes accessibility requirements for new construction and alterations of places of public accommodation (defined as places open to the general public) and places of employment (undefined) when the construction or alteration costs exceed $100,000. It currently uses American National Standards Institute (ANSI) standard A117.1-1986 as its construction standard. It requires covered construction or alterations to comply with the ANSI accessibility requirements for accessible routes, doors, detectable warnings at doors to hazardous areas, parking spaces, and toilet stalls.

The only review mechanism currently in place is a requirement that the builder obtain a certificate from a design professional stating that the plans comply. The builder must submit the certification and the plans to the Fire Marshall and to the municipality where the building is located. The Fire Marshall can provide technical assistance, but it is unclear whether he or she has any authority to actually require compliance. This authority may be addressed in the fire code, which has not been submitted.

B. Proposed Amendments

The proposed amendments are intended to make the Maine law more consistent with the ADA, while retaining the current State law remedies. While the proposed amendments do improve the Maine law as it applies to new construction and alterations, several significant issues remain.

1. Inspection

There is no statewide across-the-board system of building inspection in Maine and the proposed amendments do not attempt to create one. The proposed amendments require a covered builder to

obtain a design professional's certification of compliance if the construction or alteration cost is $50,000 or more. The builder must provide the building plans and the certification to the Fire Marshall and the municipality where the building is located. It is not clear whether the Fire Marshall has any ability to prevent construction if the plans do not comply.

In addition, all newly constructed restaurants, hotels, government buildings, and schools must submit plans to the Fire Marshall, who must certify compliance before a municipality may issue a building permit. If the municipality in which such a building is located conducts inspections, the proposed amendments require it to include accessibility as part of its inspection.

Builders of buildings that do not fall within the two categories described above may seek voluntary review by the Fire Marshall.

Approval by the Fire Marshall will constitute rebuttable evidence of compliance with the Maine law. This provision refers only to mandatory review by the Fire Marshall, not to voluntary submissions. We need to consider whether a situation in which Fire Marshall approval constitutes rebuttable evidence with State law and compliance with State law, in turn, constitutes rebuttable evidence of ADA compliance gives too much authority to the Fire Marshall. Because the evidence is rebuttable, and because areas of real discretion (e.g., waivers) are not certified, I recommend that we accept this. I believe it is essentially just an explicit statement of actual practice under most building inspection and permitting systems.

We must also consider whether certification should be available for codes under which not all buildings are subject to mandatory plan review/inspection and under which the Fire Marshall may not have authority to prevent construction of non-complying buildings that he or she does review. Although the limitations on Fire Marshall review will limit the effectiveness of certification somewhat, the unreviewed buildings will still be legally required to comply and noncompliance will give rise to an additional State law cause of action. Furthermore, notice by the Fire Marshall that a plan does not comply may persuade builders to comply, even if the Fire Marshall cannot prevent construction.

We have several options in this regard. We could:

a) limit the effect of any future certification determination to construction costing over $50,000 and, therefore, reviewed by the Fire Marshall;

b) limit the effect of any future certification determination to construction that is both reviewed and approved

by the Fire Marshall (i.e., restaurants, hotels, public buildings, and schools);

c) provide technical assistance indicating that the code is equivalent while refusing certification because of the lack of enforcement; or

d) apply any future certification determination to the entire code.

Although any of these options may be justified, I recommend that we not limit any certification determination based on the limits of Fire Marshall review. Although one of the purposes of certification is to increase pre-construction review of buildings, other purposes include increasing ease of compliance for builders and increasing the level of enforcement and the number of available remedies. By incorporating the ADA requirements into the State law and by providing a State law cause of action with appropriate enforcement mechanisms and remedies, the State of Maine has accomplished most of the purposes of certification. In addition, by providing for some review, the State has also addressed the remaining purpose of certification to a large extent.

2. Alterations

The proposed amendments require altered areas in existing buildings to comply with ADAAG to the maximum extent feasible. The proposed amendments also require alterations costing over $100,000 that affect areas normally open to the public to meet the requirements of ADAAG § 4.3 (accessible routes), § 4.13 (doors), § 4.29.3 (detectable warnings at hazardous areas), § 4.1.2 (parking), and § 4.17 (toilet stalls). These requirements must be met "regardless of cost." This requirement appears to be in addition to the general requirement that altered areas and paths of travel must be made accessible. This understanding needs to be confirmed. It is also unclear whether the builder must meet the five requirements for every area in the building or just those serving the altered area or only one of

each.

Some of the five requirements referenced for large alterations are only technical provisions of ADAAG, without scoping. This is true of § 4.13 (doors). Because the ADAAG scoping provision is not referenced, the Maine requirement would appear to require all doors to comply. This exceeds the ADA. In addition, the Maine reference to § 4.17 provides its own scoping, requiring one standard stall and requiring that all additional stalls in the same toilet room be accessible as well. This also exceeds the ADA. It is unclear whether the proposed amendments actually intend to exceed the ADA in these ways. The requirement

for parking, on the other hand, refers only to the ADA scoping provision without technical specifications.

The proposed amendments also provide a path of travel requirement for alterations to primary function areas. The path of travel requirement is split into two provisions; one for alterations over $100,000 and one for smaller alterations. In the provision for large alterations, the 20% cost limit is correctly addressed, as are priorities for providing access. The provision for smaller alterations simply requires an accessible path of travel when it is "not disproportionate to the overall alterations in terms of cost and scope." It needs to be made clear that the same standards of disproportionality apply to small alterations as apply to large ones.

The proposed path of travel requirement for large alterations includes a prohibition against evasion of the obligations "by performing a series of small alterations...." The evasion provision does not specify the three-year time period used by the ADA. The path of travel provision for small alterations does not address evasion at all.

The proposed amendments exceed the requirements of the ADA by requiring any reconstruction affecting 80% or more of the internal structure to be treated as new construction.

3. Waivers

The proposed amendments provide a waiver procedure for builders of facilities subject to mandatory plan review (restaurants, hotels, etc.). The Fire Marshall may grant a waiver if compliance would be structurally impracticable. Certification will not apply to such a waiver. The waiver is confusing, however, when applied with the referenced ADAAG standard of construction. ADAAG already includes a structural

impracticability exception that applies without the need to formally seek a waiver.

For two-story buildings not to be used by a public entity, the Fire Marshall may waive accessibility requirements if installation of an elevator would be technically infeasible or would result in excessive and unreasonable costs without any substantial benefit to individuals with disabilities. Shopping centers, shopping malls, offices of health care providers, and transportation stations are ineligible for the elevator waiver. If this waiver is limited to the elevator requirement and does not waive any other requirements, it is more stringent than the ADA elevator exception, which generally does not require elevators in two-story buildings. However, it is not clear that the waiver is limited to the elevator requirement only.

In addition, this waiver provision does not make sense as it is used. Because the proposed amendments incorporate ADAAG, including the elevator exemption for two-story buildings, there is no need for a waiver for two-story buildings. If the proposed amendments are not intended to adopt the ADAAG elevator exception, they must be more explicit.

4. Conflicts

One significant problem may be conflicts between the ADA building standards incorporated in the Maine law and the standards in municipalities' local building codes. In addition, the NFPA code may conflict. It is unclear how such conflicts have been addressed in the past.

5. Covered facilities

The proposed amendments add a definition of "commercial facilities" as "facilities that are intended for nonresidential use." The definition, itself, is equivalent. However, the term is only used in the context of alterations (public accommodations and commercial facilities must comply). In the context of new construction, public accommodations and "places of employment" are covered. The term "places of employment" is not defined.

Although the term "places of employment" may provide sufficient coverage, it should be defined. More importantly, it is problematic to use two different terms to define coverage of alterations and new construction. The scope of coverage for both requirements should be the same.

6. Defenses

The proposed amendments define "readily achievable" and "undue hardship." However, the proposed amendments do not use these terms. Including these unused definitions in the law will cause confusion and may lead builders to believe they have defenses that do not, in fact, exist.

7. "Disability"

The proposed amendments extend protection to people with disabilities, people with records of disabilities, and people who are regarded as having disabilities. However, the amendments retain the current definition of "disability," which is limited to disabilities "caused by bodily injury, accident, disease, birth defect, environmental conditions or illness." The ADA does not limit the definition based on causation, but, instead, looks to the effect of the impairment. In addition, the current Maine definition provides that it includes conditions diagnosed as "substantial" by a health care provider. The ADA does not require medical assessment of substantiality.

8. "Place of public accommodation"

The proposed amendments alter the definition of "place of public accommodation" to more closely resemble the ADA definition. The new definition significantly exceeds the twelve ADA categories by covering elevators in small residential facilities, State and local government buildings, and "any establishment which in fact caters to, or offers its goods, facilities or services to, or solicits or accepts patronage from, the general public."

9. Existing buildings

The Maine law includes requirements for accessibility of public accommodations and places of employment that were constructed between 1974 and 1982. For existing public accommodations, it requires:

a) at least one public walk at least 48 in. wide with no greater than 1:12 slope;

b) a 32 in. wide doorway at the primary entrance that is "operable by a single effort;"

c) at least one stall in rest room facilities that is at least 4 ft. wide and 5 ft. deep, with an out-swinging or sliding 32 in. door, with 33 in. high handrails on each side, and with a 20 in. high toilet;

d) knurled door handles on doors to dangerous areas that are not intended for normal use;

e) one reserved parking space for every 25 provided

(no technical specification provided).

For existing places of employment, it requires compliance with the above requirements for walks, entries, restrooms, and doors (but not parking).

Although certification does not address barrier removal, it needs to be made clear that these requirements will exceed the ADA's barrier removal requirement for some facilities, but will not meet the requirement for other facilities. Further, buildings built before 1974 must comply with the ADA's barrier removal requirements as well.

In addition, because the basic accessibility standard for barrier removal is the new construction/alteration standard, the technical specifications provided are not sufficient. For example, they do not address maneuvering clearance at doors or design of parking spaces. In addition, by requiring the 48 in. alternate stall, the Maine law limits design choices more than the ADA does.

These provisions are unclear and the intended application is uncertain. This intent must be clarified.

01-03670

10. Effective date

The Maine law contains construction requirements for buildings begun before the enactment of the amendments. The amendments create a separate section (4594-F) applicable to construction and alterations after January 1, 1995. Any certification determination must make clear that only the amended section is subject to certification.

11. Incorporation of ADAAG

The proposed amendments adopt ADAAG as the construction standard. They need to refer to the ADA Standards instead. In addition, they need to consider whether they will automatically incorporate any future amendments that the Department of Justice makes to the ADA Standards or whether, instead, they will individually consider each such amendment.

01-03671

JUL 21 1995

Ms. Alberta C. Frost
Director
Child Nutrition Division
Food and Nutrition Service
United States Department of Agriculture
3101 Park Center Drive
Alexandria, Virginia 22302

Dear Ms. Frost:

This letter is in response to your letter to the Coordination and Review Section of the Civil Rights Division requesting comments on the Department of Agriculture's guide to feeding children with special health care needs in schools. We apologize for the delay in responding. We understand that you have proceeded with an initial mailing of the guide and submit these views for your use for future mailings of the guide.

On March 1, 1995, the Civil Rights Division reassigned the

responsibility for interagency policy coordination with respect to issues arising under the Americans with Disabilities Act of 1990 (ADA), and section 504 of the Rehabilitation Act of 1973, as amended (section 504), to the Disability Rights Section. The Disability Rights Section has reviewed the draft that you provided to the Coordination and Review Section. Our comments and recommendations are as follows:

1. Under paragraph II. A. Physician's Statement for Child with Disabilities, the guide includes in the list of things that the physician's statement must identify "the major life activity affected by the disability." In this context, this is a legal, rather than a medical determination, because it is a statement that the child is eligible to claim the protection of the ADA and section 504. We do not think that it is appropriate to require a physician to make this determination.

Furthermore, the Department of Agriculture reimburses schools for food substitutions made for children who do not have a disability on the basis of a certification of special dietary needs by health care professionals other than physicians. Therefore, we question whether it is necessary to require a physician's certification of any child's dietary need.

cc: Records, Chrono, Wodatch, Milton, FOIA
n:\udd\milton\letters\doaguide.fro\sc. young-parran
01-03672

The process for making determinations of special dietary needs are no different because the special need is the result of an impairment that is legally regarded as a disability. Thus, the determination should be able to be made by a licensed medical authority (physician, physician's assistant, nurse practitioner, registered nurse, etc.) of the family's choosing, whether or not the special need is the result of a condition that qualifies as a disability under the ADA or section 504. Alternatively, you could elect to require determinations of special dietary needs for all children to be made by a physician.

2. Under paragraph III. A. School Responsibilities, the guide requires that substitutions for students with disabilities be based on a prescription written by a licensed physician. In medical terminology, a prescription is a physician's written instruction for preparation and administration of a medication. If you retain a requirement for a physician's certification of a child's dietary needs, we would suggest that you substitute the word "order" or "instructions" for "prescription."

3. In the subsection of paragraph III. A. headed Individualized Education Program (IEP), the guide states that "a child with diabetes may be certified by a physician as needing special dietary accommodations, but probably would not be in special education nor have an IEP." Because a child with diabetes is just as likely to be in special education as any other child, we would alter that sentence to say that a child with diabetes would not necessarily be in special education.

4. The first paragraph under III. B. Funding Issues states that schools may not charge children with disabilities who require food modifications "more than they charge other children for Program meals or snacks." It should be noted that schools may not charge children with disabilities more than they charge other children for any meals or snacks that are part of the meal program provided to all students.

5. Section 504 of the Rehabilitation Act has been amended to read "disability" rather than "handicap" and "individual with a disability" rather than "handicapped individual." These changes should be incorporated in the first paragraph of IV. A. School's responsibility for accommodating children with disabilities.

6. The third paragraph of IV. A. states that title II of the ADA "requires equal availability and accessibility in State and local government programs and services." More accurately, title II prohibits discrimination on the basis of disability in

the services, programs, and activities of State and local government entities.

01-03673

7. Also in the third paragraph of IV. A., the guide states that title II "reiterates the statutory prohibition of the Rehabilitation Act of 1973 against discrimination on the basis of disability by programs receiving Federal funding." This might incorrectly be read to mean that title II is also limited to federally assisted programs.

8. The fourth paragraph of IV. A. states that title III of the ADA "extends public accommodations requirements to privately owned facilities. . ." More accurately, title III extends accessibility requirements to privately owned places of public accommodation.

9. In the response to the first situation posed under paragraph V. Situations and Responses, you may want to point out that the school must allow the child to bring his or her own juice and drink it whenever necessary to meet the prescribed schedule.

10. In the response to situation 9 under paragraph V., you may wish to make clear that the school can provide separate facilities for disabled children as long as the children have a choice between using those facilities and the facilities provided for all of the children.

11. In the glossary section, paragraph VII, you may wish to amend the entry on the Americans with Disabilities Act as noted in paragraph 6, above.

I hope this information has been helpful to you. If you have any questions, please feel free to call Naomi Milton at (202) 514-9807.

Sincerely,

John L. Wodatch
Chief
Disability Rights Section

JUL 21 1995

Ms. Patricia E. Ryan
Executive Director
Maine Human Rights Commission
State House Station 51
Augusta, Maine 04333-0051

Dear Ms. Ryan:

This letter is in response to your letter requesting that the Department of Justice preliminarily review the proposed amendments to the Maine Human Rights Act (law) and provide technical assistance regarding their equivalency to the new construction and alterations requirements of title III of the Americans with Disabilities Act (ADA).

Our preliminary review of the Maine law indicates that you have made significant progress toward an ADA-equivalent law. We appreciate your efforts, as well as your patience in awaiting our response. Our review has also raised several potential problems and ambiguities, described in detail below.

In order to provide a timely response, we have limited our review to major issues that might arise if the Maine law were submitted for a certification determination pursuant to the regulation implementing title III. 28 C.F.R. § 36.601 et seq. Our analysis is not intended to address comprehensively all potential ways in which the Maine law compares with the ADA's construction requirements.

We have reviewed only the new construction and alterations provisions of the Maine law. Certification does not apply to other aspects of human rights laws. In addition, we have evaluated the Maine law's consistency with title III of the ADA only. Certification does not apply to facilities subject to title II of the ADA or to purely residential facilities.

cc: Records, Chrono, Wodatch, Hill, FOIA
n:\udd\hille\maine\tal.ltr\sc. young-parran

01-03675

1. General Concerns

The limited availability of plan review and pre-construction enforcement does not prevent certification but it does significantly limit builders' ability to take advantage of the full benefits of certification. For example, without any mechanism for official approval by the Fire Marshall, builders of facilities other than restaurants, hotels, government buildings, and schools will have to specifically prove compliance with the State law before they can gain the benefit of certification's rebuttable evidence of ADA compliance. In addition, lack of mandatory plan review will increase the burdens on individuals and on the Commission to enforce the law through litigation. Increased mandatory plan review could avoid such litigation as well the increased costs of providing accessible features after construction is completed.

2. Ambiguous Provisions

A number of the provisions of the Maine law are unclear. While these issues will not necessarily prevent certification, clarification would facilitate our review.

a. Enforcement

The Fire Marshall's authority regarding voluntary submissions (costing less then $50,000) and submissions of plans for buildings other than restaurants, hotels, government buildings, and schools, is unclear. The Maine law does not specify whether the Fire Marshall has a duty to identify violations or what the Fire Marshall's responsibility is when a violation is found.

b. Alterations

The requirements for alterations impose five specific requirements for alterations costing over $100,000 that affect areas open to the public. It is unclear whether these requirements must be met in addition to the general requirement that the altered area and the path of travel be accessible. In addition, it is unclear whether the builder must satisfy the five requirements for every area of the building, for only the altered area, or for some other number of areas.

Because the requirement for accessible doors refers only to technical specifications without scoping, it is unclear how many doors are required to be accessible. Because the requirement for toilet stalls requires all the stalls in a toilet room to be

accessible, it substantially exceeds the ADA's general requirement that one stall be accessible. Finally, because the requirement for parking refers only to the ADA scoping provision
01-03676

without technical specifications, it does not require the reserved space to be usable by individuals with disabilities.

The Maine law's path of travel requirement is split into two provisions; one for alterations over $100,000 and one for smaller alterations. In the provision for large alterations, the 20% cost limit is correctly addressed, as are priorities for providing access. The provision for smaller alterations simply requires an accessible path of travel when it is "not disproportionate to the overall alterations in terms of cost and scope." It needs to be made clear that the same standard of disproportionality (20%) applies to small alterations as applies to large ones.

c. Waivers

Certification will not apply to waivers of ADA requirements that may be granted by reviewing officials. Therefore, if a builder applies for a waiver of an ADA accessibility requirement for an element of a building, he or she will not be entitled to certification's rebuttable evidence of compliance for that element.

The Maine law's waiver provision for structural impracticability is an example of an uncertified waiver provision. This waiver provision does, however, create an ambiguity that needs to be addressed. The ADA Standards, which are incorporated into the Maine law as the required construction standard, already include an exception for structural impracticability (S 4.1.1(5)). Therefore, the need for the additional waiver in the Maine law is unclear.

The Maine law also provides a waiver for two-story buildings if installation of an elevator would be technologically infeasible or would result in undue costs. It is not clear whether this waiver would eliminate all accessibility requirements for eligible buildings, or whether it will only lift the elevator requirement. If it lifts requirements other than the elevator requirement, this waiver is less stringent than the ADA, which requires upper floors to be accessible in non-elevator buildings. If it lifts only the elevator requirement, this waiver exceeds the ADA, which generally does not require an elevator in two-story buildings. Because waivers are uncertified, these differences between the Maine law and the ADA will not prevent certification.

More significantly, it is not clear how Maine's elevator waiver provision is to be reconciled with the incorporated ADA

Standards. Because the ADA Standards include an elevator exception for two-story buildings, the Maine elevator waiver seems unnecessary. If the intent of the Maine law is not to

01-03677

incorporate the ADA elevator exception, that intent needs to be clarified.

d. Effective date

Any future certification determination would be limited to the amended law's requirements in effect as of the date of the determination (i.e., the provisions applicable to construction after January 1, 1995). Certification would not apply to the law's provisions applicable before the 1995 amendments. Because those provisions are still included in the Maine law and have not been repealed, there may be some confusion on this point. It would be more clear if the Maine law explicitly stated that those earlier provisions were no longer in effect.

e. Incorporation of "ADAAG"

The proposed amendments incorporate the ADA Accessibility Guidelines (ADAAG) as the applicable construction standard. It would be more correct to refer to the "ADA Standards for Accessible Design," which are codified at 28 C.F.R. Part 36, Appendix A. This reference more accurately describes the standards adopted and enforced under the ADA, as distinct from the unenforceable guidelines on which the standards are based.

It is unclear how the Maine law will address future amendments to the ADA Standards for Accessible Design, i.e., whether such amendments will automatically be incorporated into the Maine law.

3. Specific Problems

a. Conflicts

There may be conflicts between the requirements of the Maine law and the requirements of other building-related codes (e.g., municipal building codes, fire protection codes). It is unclear how such conflicts will be resolved.

b. Covered facilities

The Maine law requires places of public accommodation and "places of employment" to comply with the new construction requirements. Although "places of employment" may provide equivalent coverage, the term needs to be defined (i.e., whether it will include volunteer organizations).

In addition, the Maine law's alterations requirements apply

to places of public accommodation and "commercial facilities." The scope of coverage for new construction and alterations is the same under the ADA. The use of two different terms in the Maine

law indicates that the scope of coverage differs for new construction and alterations.

c. Defenses

The proposed amendments add definitions of "readily achievable" and "undue hardship." However, those terms do not appear to be used in the Maine law. Inclusion of those definitions may lead builders to believe they have defenses that are not really available.

d. "Disability"

The Maine law limits the definition of covered disabilities to those caused by certain listed events. The ADA determines coverage based on the extent of a disability's effect on an individual's major life activities, not on its cause. In addition, the Maine law appears to rely on diagnosis by a health care provider in order to determine whether a person's disability is covered. The ADA does not restrict coverage to only those disabilities that are medically diagnosed.

I hope these comments are helpful to you in preparing the final Maine law and that you will soon be in a position to submit a request for certification of the Maine law. We would be happy to discuss our comments with you at your convenience. Feel free to call Eve Hill at (202) 307-0663 to arrange such a discussion.

Sincerely,

John L. Wodatch

JUL 26 1995

Mr. Robert L. Kuiken
Administrative Assistant
Summit County's Disabled Citizens Program
47 North Main Street, 2-148
Akron, Ohio 44308-1991

Dear Mr. Kuiken:

Thank you for your kind words about my presentation at the Cleveland City Club. It was a beneficial trip for me. Your letter asks the Department of Justice to take action to compel companies that operate gas stations to provide a "full service" option for their customers.

The Department is responsible for enforcing title III of the Americans with Disabilities Act (ADA), which prohibits discrimination on the basis of disability by places of public accommodation, including gas stations. Title III requires places of public accommodation to ensure that the services that are provided to clients or customers are accessible to people with disabilities. However, title III does not require any place of public accommodation to fundamentally alter the nature of its business to provide different services, even if those services might better meet the needs of people with disabilities. Therefore, the ADA does not require gas stations to provide full service to any customer.

The ADA does require existing gas stations that are not otherwise being altered to remove architectural barriers to the extent that it is readily achievable to remove them. The Department of Justice regulation implementing title III requires such barrier removal to comply with the ADA Standards for Accessible Design (Standards) for each altered element if it is readily achievable.
01-03680

If a self-service gas station determines that it is not readily achievable to redesign gas pumps to enable people with disabilities to use them, the gas station is not required to make physical modifications to the gas pumps. However, the gas station is required to provide its services to individuals with disabilities through any readily achievable method, such as providing refueling service upon request to an individual with a disability at self-service prices. A service station is not required to provide refueling service to individuals with disabilities at any time when it is operating exclusively on a remote control basis with a single cashier.

In our view, the ADA does not prohibit the operation of gas stations on a self-service basis. Therefore, the Department is unable to take further action in response to your request.

I have included the Division's most recent status reports on ADA enforcement for your information.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

Enclosures

01-03681

Tim Davis, County Executive Patrick A. McGrath, Director
County of Summit
Department of Human Services
Disabled Citizens Program
"Making A Difference"

Deval Patrick, 3/31/95
Assistant Attorney General
Civil Rights Division
Department of Justice
P.O. Box 66738
Washington, D.C. 20035-6738

Dear Mr. Patrick,

First I want to congratulate you on the fine job you did speaking at the Cleveland City Club Form. I was fortunate to be able to sit in on that meeting. I have also read an article in the Disability Rights Education & Defense Fund News (DREDF) where you were the keynote speaker on Nov. 10, 1994 at their fifteenth year celebration. With your background in civil rights for all people I feel confident that we have the right person as Assistant Attorney General for Civil Rights.

There is also another reason for me contacting you and requesting your guidance and help in resolving an issue that is of major concern to me and many of other people with limited mobility in keeping their independence.

The ability to drive yourself to work, to go shopping, travel, and/or other activities that we do everyday, is a necessity that people have long depended on. Just look at the number of cars & trucks on the highways. However this activity is slowly being taken away from many of us who can no longer buy gas without having someone with us that is able bodied.

More and more gas stations around the country are becoming "Self-Service" only gas stations. Just ask your friends that have disabilities how difficult it is to get gas today. This means that if we do need to get gas, we have to find a gas station with at least one full service pump. The trend by the oil companies is to eliminate "Full-Service" altogether, in order to save money. This is taking the opportunity of living independently and keeping a job next to impossible.

I have been working on this problem for over a year now, asking and getting support from other disability groups but we need to do more. I wrote a letter to Janet Reno, who is suppose to be in charge of the DOJ, pointing out the problem we are having. I received a response that is like receiving no answer at all (enclosed). I have also written to many of our Congressmen and Senators, as well as President Clinton, and have received letters that amount to a pat on the head

and nothing else in the way of what actions could be taken to overcome this discriminatory policy that the oil companies have in place towards people with limited mobility.
01-03682

Many of our senior citizens have also told me they too are having a hard time pumping gas because of limited strength and problems with mobility and/or dexterity that they have because of their age and changes in their bodies.

I am hoping that with your help and guidance, and that of the members of other disability organizations, we might find a solution to this problem. Perhaps we need to file a class action suite against a major oil company to have them change their policies so people have a choice between Self-Service or Full-Service at their stations. At one time this was available, but few stations, as I pointed out before, still offer this option.

I know that the oil industries have a number of lobbyist on Capitol Hill, which will make this a difficult task, to say the least. I feel that they believe they are above the law and that the principals and policies of the Americans With Disabilities Act does not include them or their gas stations.

Enclosed is a copy one of the articles that I had in our "Newsletter" that went out to over 3,000 people and organizations that work for the benefit of people with disabilities. Also a copy of a letter I sent to the local Newspapers, from which I got a number of phone calls thanking me for putting into words what they were also facing with this discriminatory policy.

I am also writing a letter to Marilyn Golden at DREDF and ask for her opinions and ideas concerning this matter. I hope I get more of a response from you than what I got from Merrily A. Friedlander, Acting Chief Coordinator and Review Section, Civil Rights Division. Someone at DOJ has to step up and take charge of situations that threaten the very intent of the Disability Rights Laws that have been passed to help protect people with disabilities and afford them equal opportunities in this Country.

Thank you for taking time to read this and also for any help and guidance you might be able to give me as I continue to fight for the rights of people with disabilities. I'm looking forward to hearing from you in regards to this matter.

Respectfully Submitted,

Robert L. Kuiken, Administrative Assistant

Summit County's Disabled Citizens Program
47 North Main Street, 2-148
Akron, Ohio 44308-1991
(216) 643-7364 / Fax (216) 643-7742

01-03683

Att'n General Janet Reno
U.S. Department of Justice
Main Justice Building
10th Street & Constitution Ave. N.W.
Washington, DC 20530

Ms. Reno,

I have enclosed a letter which I have recently sent to the Department of Justice in Washington D.C. which I hope, with their help, will cause the owners of the self-service gas stations to make some policy changes so people with disabilities that drive and have mobility problems will not be stranded along the highway because of not having access to a gas station that will pump their gas for them.

This has happen to me recently as I was returning to Akron from Columbus, Ohio. Fortunately I was able to get a truck driver to pump my gas for me at a self-service station. Even if I was able to exit my car, I would not have been able to reach the pumps from my wheelchair or the controls to turn the pumps on. I also noticed that there were no ramps or curb cuts leading into the building where I would have had to pay for my gas.

People with disabilities that do try to lead an independent life style should not be discriminated against because of the designs of the gas stations or the policies that do not permit the workers to assist you in buying gas.

I have brought this issue up at different meetings that I have attended and I have the support of "The National Association of the Physically Handicapped", The Disability Network of Ohio-Solidarity", "The Summit County Committee on Employment of the Handicapped" as well as several other disabled drivers that I have spoken to.

My hopes is that you will support my efforts in trying to stop the discrimination of people with disabilities that drive by trying to change some of the policies that the oil companies have concerning self-service gas stations. If you could discuss this matter with other legislative advisors and those you work with in the U.S. Department of Justice and ask for their support, perhaps we can correct this act of discrimination.

Thank you for your support and for the great job you and your colleagues are doing by working with and supporting is-

sues of interest to people with disabilities. Keep up the good work.

Respectfully,
Robert L. Kuiken
Summit County's
Disabled Citizens Program

Dear Editor,

I am writing this letter to alert you to a major economic disaster that is being brought on by the major oil companies in our Nation and in your area.

This is being brought about by having more and more of their gas stations become "Self-Service" only. By doing this they have singled out people with disabilities that drive and eliminated their ability to get gas at their stations. This action will eventually lead to them not being able to go to work, or shopping, or many other activities that would require them to drive. This not only affects the person with a disability but also their families, their employers, the store where they do their shopping, etc.

This policy also will have an effect on several "million dollar" corporations that manufacture driving aides and lifts for vans, not to mention the companies that install this equipment. The elimination of access to gasoline would eventually put these companies out of business. This would affect all the people that they employ plus all their families. This domino effect hurts us all.

In Ohio there is a law that states "if a gas station offers full-service and self-service, people with disabilities that drive can get served at the self-service price. The oil companies policies have eliminated the full-service pumps which bypasses this law.

They have also eliminated any extra help, which leaves only one person to handle the money. This policy puts that one person in a dangerous position should something go wrong or a robbery takes place. This policy puts the employee's life in danger. Police departments have realized this problem but seem powerless over the oil companies clout. The Oil companies greed which drives them to eliminating extra employees while charging high prices for their products.

The Americans With Disabilities Act of 1990 provides equal access to products being offered to the general public by businesses. The oil companies choose to ignore this federal law.

It also upsets me when I see our senior citizens that drive, standing our in the rain & snow trying to pump their own gas, without having the option to get full-service if they choose to. Also men & women with their good cloths on taking the chance of spilling gas on themselves, just so the oil companies can make more money.

I think it is past time for people to take a stand and demand

the option to get full-service at gas stations again, if they choose to. When is the last time anyone at a gas station has offered to wash your car's windshields, check your oil, water and other fluids under your car hood?

It is time to contact the oil companies, your local legislators, federal legislators, congressman, senators, the attorney general's office, the Department of Justice, and the Department of Commerce and let them know how you feel about having the choice of Full-Service at gas stations in your areas.

Thank You for your time and your support on this important issue of concern to people with disabilities that drive.

Robert L Kuiken

Your
TICKET
to Independence

by Margaret A. Johnson, O.T.R./L.

Regaining the ability to drive is a basic part of independent living.

When you were 16 years old, you excitedly and nervously prepared for the behind-the-wheel portion of your driver's test. Passing the exam was your ticket to independence. No more riding shotgun with the folks or listening to backseat drivers giving orders. You were on your own-and what a good feeling this was!

Injuries or disease can affect you mentally, physically, and emotionally-to the point of temporarily or permanently impairing driving. But, because your physical capabilities have changed, does this mean you must ride shuttles and carpool? Certainly not!

How do you go about learning what you may need if you are unable to drive a conventional vehicle? The first step is to acquire a doctor's referral for evaluation by an occupational therapist (OT) or driver rehabilitation specialist knowledgeable in the medical field.

I am an OT who was a driving evaluator for several years. When I worked with clients, I first assessed their mental, physical, and emotional status.

Adequate vision is crucial for drivers, and we provided a thorough screening. Inone case, the result of a man's testing was far below the state's minimum standard for visual acuity. The client was asked to return for completion of the evaluation after he had visited his eye doctor. The physician found a hemorrhage in the man's eye: early discovery and laser treatment saved his vision. The client went on to successfully drive again.

Following an eye test, you are screened in the areas of cognition and perception. Are you able to think quickly? Do you have good judgment and decision-making skills? One young woman drove without mishap for 20 minutes, but as we neared completion of the in-vehicle assessment, something told me to extend the length of the route. In the next block, she failed to brake when two pedestrians crossed her path. I stopped the vehicle and questioned her about this serious mistake. She said she saw the women, but "it just didn't register."

Evaluators also test your muscles and movement for stregnth, coordination, range of motion, and endurance. Strong muscle-spasms can interfere with safe driving; many times a change in medications may be a solution. Independent car-transfer was a grueling process for one man, whose legs had severe spasms; he was breathless and exhausted before he even turned on the ignition.

Balance is an important consideration for driving. Can you maintain an upright sitting posture while making a sharp evasive right or left turn? It certainly defeats the confidence of

PN Paraplegia News April 1995
01-03686

drivers who, on sharp curves suddenly find themselves staring at the kneecaps of those in the passenger seat. OTs can evaluate your hand function and recommend a chest restraint adapted so you can apply the strap, even if you can't use your fingers.

The final test is the actual in-vehicle assessment. The car is equipped with a reversible set of hand controls, various steering devices, a right and left-sided turn signal, and a left foot accelerator. Following demonstration and instruction, you begin to drive in a safe empty parking

PHOTO with the help of "driver" Laura Schleiger. Occupational Therapist Margaret Johnson demonstrates an in-vehicle assessment.

PHOTO In the Adapted Driving Program at Good Samaritan Regional Medical Center in Phoenix, Nick Mereles learns to transfer to the driver's seat of the facility's adapted van.

PHOTO An adapted Driving Program van acquaints Mereles with equipment and vehicle modifications.

PHOTO FROM TOP: As part of Good Samaritan's program, Charles Mascari's training includes stowing his chair behind the driver's seat.

01-03687

lot. After an increase in confidence and ability, you drive in residential areas and finally go into more complex traffic--but only if you feel comfortable.

Your evaluation is then typed up and, with the required state forms, sent to your physician for review. You visit one of a list of recommended reputable vendors, where the prescribed adapted automobile equipment is installed. You may need further training at a local licensed driving school that has personnel skilled in instruction with adapted controls. At some facilities, OTs conduct this training.

Once your controls are installed and you are proficient in their use, the therapist gives you final approval. You must have a state test for effectiveness in using the special equipment. Your driver's license receives a code that denotes an adaptive-equipment-use restriction similar

to the one for people who wear glasses.

OTs and your vendor can help suggest appropriate vans or automobiles. Installation of hand controls is difficult in extremely small vehicles; some compact vans may not have room for you and your particular form of mobility. Many car manufacturers offer rebates for purchasing hand controls or other adaptive equipment.

If your needs cannot be met in an adapted automobile, you will be referred to a facility that has specialized adapted vans. Vehicles of this type allow you to experiment with using a lift for access and with various interchangeable steering devices. A raised roof or dropped floor accommodates drivers in wheelchairs. These vans even have interchangeable steering wheels and lever-operated accelerators and brakes.

The Association of Driver Educators for the Disabled (ADED), an international organization, is devoted to the support of professionals working in the field of driver education and transportation-equipment modification. ADED's goal is to maximize transportation options for people with disabilities because driving is an earned privilege--for all of us.

Margaret A. Johnson, formerly an occupational therapist in the Driver Evaluation Program at Vanderbilt University Medical Center, Nashville, is now coordinator of Occupational Therapy at Nashville Rehabilitation Hospital. For assistance in locating an evaluation center in your area, contact ADED at (608) 884-8833/ 884-4851 (fax).

for Evaluation--Then for Independence

Driver-evaluation is performed at many sites around the country. Examples are the programs at Vanderbilt University Medical Center, Nashville, and at Samaritan Rehabilitation Institute. Good Samaritan Regional Medical Center, in Phoenix.

Margaret A. Johnson (author of "Your Ticket to Independence") worked for eight years in the Driver Evaluation Program at Vanderbilt University Medical Center. "Clients were always surprised at how thorough the evaluations were," she recalls. "Many of them remembered their original driver's exams, in which

they answered some questions, took a 20-minute ride, and received their licenses. They had no idea our assessment was two or three hours long."

Driver-evaluation programs emphasize safety as well as defensive driving. "I told clients to always use restraints (seat belts, etc.) and to raise their headrests to provide more protection." Johnson says. "Many of them received spinal-cord and head injuries because their headrests weren't properly adjusted."

According to Johnson, some clients are afraid evaluators will take away their driver's licenses. "I'm not employed by the state, and I don't have the authority to do something like that," she would tell them. After putting this fear to rest, she'd get on with the business at hand: putting qualified drivers with disabilities back on the road again.

According to Carol Blanc, O.T.R., a driver-rehabilitation specialist, the Adapted Driving Program at the Arizona facility annually processes 100-130 people whose disabilities range from head and spinal-cord injury to amputation, stroke, arthritis, and neurological diseases and problems. Clients must be of legal driving age and have a physician's referral and a valid Arizona driver's license or permit.

The length of the course depends on client disability and previous driving experience. Fees are charged by the hour; some insurance companies assist with these costs. Participants also receive help with obtaining their driver's licenses.

"Making A Difference"

Deval Patrick, 3/31/95
Assistant Attorney General
Civil Rights Division
Department of Justice
P.O. Box 66738
Washington, D.C. 20035-6738

Dear Mr. Patrick,

First I want to congratulate you on the fine job you did speaking at the Cleveland City Club Form. I was fortunate to be able to sit in on that meeting. I have also read an article in the Disability Rights Education & Defense Fund News (DREDF) where you were the keynote speaker on Nov. 10, 1994 at their fifteenth year celebration. With your background in civil rights for all people I feel confident that we have the right person as Assistant Attorney General for Civil Rights.

There is also another reason for me contacting you and requesting your guidance and help in resolving an issue that is of major concern to me and many of other people with limited mobility in keeping their independence.

The ability to drive yourself to work, to go shopping, travel, and/or other activities that we do everyday, is a ne--cessity that people have long depended on. Just look at the number of cars & trucks on the highways. However this activity is slowly being taken away from many of us who can no longer buy gas without having someone with us that is able bodied.

More and more gas stations around the country are becoming "Self-Service" only gas stations. Just ask your friends

that have disabilities how difficult it is to get gas today. This means that if we do need to get gas, we have to find a gas station with at least one full service pump. The trend by the oil companies is to eliminate "Full-Service" altogether, in order to save money. This is taking the opportunity of living independently and keeping a job next to impossible.

I have been working on this problem for over a year now, asking and getting support from other disability groups but we need to do more. I wrote a letter to Janet Reno, who is suppose to be in charge of the DOJ, pointing out the problem we are having. I received a response that is like receiving no answer at all (enclosed). I have also written to many of our Congressmen and Senators, as well as President Clinton, and have received letters that amount to a pat on the head and nothing else in the way of what actions could be taken to overcome this discriminatory policy that the oil companies have in place towards people with limited mobility.

47 N. Main Street. 2-148 Akron Ohio 44308 phone: (216) 643-7257

Many of our senior citizens have also told me they too are having a hard time pumping gas because of limited strength and problems with mobility and/or dexterity that they have because of their age and changes in their bodies.

I am hoping that with your help and guidance, and that of the members of other disability organizations, we might find a solution to this problem. Perhaps we need to file a class action suite against a major oil company to have them change their policies so people have a choice between Self-Service or Full-Service at their stations. At one time this was available, but few stations, as I pointed out before, still offer this option.

I know that the oil industries have a number of lobbyist on Capitol Hill, which will make this a difficult task, to say the least. I feel that they believe they are above the law and that the principals and policies of the Americans With Disabilities Act does not include them or their gas stations.

Enclosed is a copy one of the articles that I had in our "Newsletter" that went out to over 3,000 people and organizations that work for the benefit of people with disabilities. Also a copy of a letter I sent to the local Newspapers, from which I got a number of phone calls thanking me for putting into words what they were also facing with this discriminatory policy.

I am also writing a letter to Marilyn Golden at DREDF and ask for her opinions and ideas concerning this matter. I hope I get more of a response from you than what I got from Merrily A. Friedlander, Acting Chief Coordinator and Review

Section, Civil Rights Division. Someone at DOJ has to step up and take charge of situations that threaten the very intent of the Disability Rights Laws that have been passed to help protect people with disabilities and afford them equal opportunities in this Country.

Thank you for taking time to read this and also for any help and guidance you might be able to give me as I continue to fight for the rights of people with disabilities. I'm looking forward to hearing from you in regards to this matter.

Respectfully Submitted,

Robert L. Kuiken, Administrative Assistant
Summit County's Disabled Citizens Program

Att'n General Janet Reno
U.S. Department of Justice
Main Justice Building
10th Street & Constitution Ave. N.W.
Washington, DC 20530

Ms. Reno,

I have enclosed a letter which I have recently sent to the Department of Justice in Washington D.C. which I hope, with their help, will cause the owners of the self-service gas stations to make some policy changes so people with disabilities that drive and have mobility problems will not be stranded along the highway because of not having access to a gas station that will pump their gas for them.

This has happen to me recently as I was returning to Akron from Columbus, Ohio. Fortunately I was able to get a truck driver to pump my gas for me at a self service station. Even if I was able to exit my car, I would not have been able to reach the pumps from my wheelchair or the controls to turn the pumps on. I also noticed that there were no ramps or curb cuts leading into the building where I would have had to pay for my gas.

People with disabilities that do try to lead an independent life style should not be discriminated against because of the design of the gas stations or the policies that do not permit the workers to assist you in buying gas

I have brought this issue up at different meetings that I have attended and I have the support of "The National As-

sociation of the Physically Handicapped", The Disability Network of Ohio-Solidarity", "The Summit County Committee on Employment of the Handicapped" as well as several other disabled drivers that I have spoken to.

My hopes is that you will support my efforts in trying to stop the discrimination of people with disabilities that drive by trying to change some of the policies that the oil companies have concerning self-service gas stations. If you could discuss this matter with other legislative advisors and those you work with in the U.S. Department of Justice and ask for their support, perhaps we can correct this act of discrimination.

Thank you for your support and for the great job you and your colleagues are doing by working with and supporting issues of interest to people with disabilities. Keep up the good work.

Respectfully,
Robert L. Kuiken

Dear Editor,

I am writing this letter to alert you to a major economic disaster that is being brought on by the major oil companies in our Nation and in your area.

This is being brought about by having more and more of their gas stations become "Self-Service" only. By doing this they have singled out people with disabilities that drive and eliminated their ability to get gas at their stations. This action will eventually lead to them not being able to go to work, or shopping, or many other activities that would require them to drive. This not only affects the person with a disability but also their families, their employers, the store where they do their shopping, etc.

This policy also will have an effect on several "million dollar" corporations that manufacture driving aides and lifts for vans, not to mention the companies that install this equipment. The elimination of access to gasoline would eventually put these companies out of business. This would affect all the people that they employe plus all their families. This domino effect hurts us all.

In Ohio there is a law that states "if a gas station offers

full-service and self-service, people with disabilities that drive can get served at the self-service price. The oil companies policies have eliminated the full-service pumps which bypasses this law.

They have also eliminated any extra help, which leaves only one person to handle the money. This policy puts that one person In a dangerous position should something go wrong or a robbery takes place. This policy puts the employee's life in danger. Police departments have realized this problem but seem powerless over the oil companies clout. The Oil companies greed which drives them to eliminating extra employees while charging high prices for their products.

The Americans With Disabilities Act of 1990 provides equal access to products being offered to the general public by businesses. The oil companies choose to ignore this federal law.

It also upsets me when I see our senior citizens that drive, standing our in the rain & snow trying to pump their own gas, without having the option to get full-service if they choose to. Also men & women with their good cloths on taking the chance of spilling gas on themselves, just so the oil companies can make more money.

I think it is past time for people to take a stand and demand the option to get full-service at gas stations again, if they choose to. When is the last time anyone at a gas station has offered to wash your car's windshields, check your oil, water and other fluids under your car hood?

It is time to contact the oil companies, your local legislators, federal legislators, congressman, senators, the attorney general's office, the Department of Justice, and the Department of Commerce and let them know how you feel about having the choice of Full-Service at gas stations in your areas.

Thank You for your time and your support on this important issue of concern to people with disabilities that drive.

Robert L Kuiken

Your
TICKET
to Independence

by Margaret A. Johnson, O.T.R./L.

Regaining the ability to drive is a
basic part of independent living.

When you were 16 years old, you excitedly and nervously prepared for the behind-the-wheel portion of your driver's test Passing the exam was your ticket to independence. No more riding shotgun with the folks or listening to backseat drivers giving orders. You were on your own-and what a good feeling this was!

Injuries or disease can affect you mentally, physically, and

emotionally-to the point of temporarily or permanently impairing driving. But, because your physical capabilities have changed,does this mean you must ride shuttles and carpool? Certainly not!

How do you go about learning what you may need if you are unable to drive a conventional vehicle? The first step is to acquire a doctor's referral for evaluation by an occupational therapist (OT) or driver rehabilitation specialist knowledgeable in the medical field.

I am an OT who was a driving evaluator for several years. When I worked with clients, I first assessed their mental, physical, and emotional status.

Adequate vision is crucial for drivers, and we provided a thorough screening. In one case, the result of a man's testing was far below the state's minimum standard for visual acuity. The client was asked to return for completion of the evaluation after he had visited his eye doctor. The physician found a hemorrhage in the man's eye: early discovery and laser treatment saved his vision. The client went on to successfully drive again.

Following an eye test you are screened in the areas of cognition and perception. Are you able to think quickly? Do you have good judgment and decision-making skills? One young woman drove without mishap for 20 minutes, but as we neared completion of the in-vehicle assessment, something told me to extend the length of the route. In the next block, she failed to brake when two pedestrians crossed her path. I stopped the vehicle and questioned her about this serious mistake. She said she saw the women, but "it just didn't register."

Evaluators also test your muscles and movement for strength, coordination, range of motion, and endurance. Strong muscle-spasms can interfere with safe driving; many times a change in medications may be a solution. Independent car-transfer was a grueling process for one man, whose legs had severe spasms; he was breathless and exhausted before he even turned on the ignition. Balance is an important consideration for driving. Can you maintain an upright sitting posture while making a sharp evasive right or left turn? It certainly defeats the confidence of

(PHOTO CAPTION)
With the help of "driver" Laura Schleiger, Occupational
Therapist Margaret Johnson demonstrates in-vehicle assessment.

(PHOTO CAPTION)
In the Adapted Driving Program at Good Samaritan Regional

Medical Center in Phoenix, Nick Mereles learns to transfer to the driver's seat of the facility's adapted van.

(PHOTO CAPTION)
An Adapted Driving Program van acquaints Mereles with equipment and vehicle modifications.

drivers who are on sharp curves suddenly find themselves staring at the kneecaps of those in the passenger seat. OTs can evaluate your hand function and recom-mend a chest restraint adapter so you can apply the strap, even if you can't use your fingers.

The final test is the actual in-vehicle assessment. The car is equipped with a reversible set of hand controls, various steering devices, a right- and left-sided turn signal, and a left-foot accelerator. Following demonstration and instruction, you begin to drive in a safe, empty park-

(PHOTO CAPTION)
FROM TOP: As part of Good Samaritan's Program, Charles Mascari's training includes stowing his chair behind the driver's seat.

01-03875

ing lot. After an increase in confidence and ability, you drive in residential areas and finally go into more complex traffic-but only if you feel comfortable.

Your evaluation is then typed up and, with the required

state forms, sent to your physician for review. You visit one of a list of recommended reputable vendors, where the prescribed adapted automobile equipment is installed. You may need further training at a local licensed driving school that has personnel skilled in instruction with adapted controls. At some facilities, OTs conduct this training. Once your controls are installed and you are proficient in their use, the therapist gives you final approval. You must have a state test for effectiveness in using special equipment. Your driver's license receives a code that denotes adaptive-equipment-use restriction similar to the one for people who wear glasses.

OTs and your vendor can help suggest appropriate vans or automobiles. Installation of hand controls is difficult in extremely small vehicles; some compact vans may not have room for you and your particular form of mobility. Many car manufacturers offer rebates for purchasing hand controls or other adaptive equipment..

If your needs cannot be met in an adapted automobile, you will be referred to a facility that has specialized adapted vans. Vehicles of this type allow you to experiment with using a lift for access and with various interchangeable steering devices. A raised roof or dropped in floor accommodates drivers in wheelchairs. These vans even have interchangeable steering wheels and lever-operated accelerators and brakes.

The Association of Driver Educators for the Disabled(ADED), an intenational organization, is devoted to the supportof professionals working in the field of driver education and transportation-equipment modification. ADED's goal to maximize transportation options for people with disabilities because driving is an earned privilege-for all of us.

Margaret A. Johnson, formerly an occupational therapist in the Driver Evaluation Program at Vanderbilt University Medical Center, Nashville, is now coordinator of Occupational Therapy at Nashville Rehabilitation Hospital. For assistance locating an evaluation center in your area, contact ADED at (608) 884-8833 / 884-4851 (fax).

for Evaluation-Then
for Independence

Driver-evaluation is performed at many sites around the country. Examples are the programs at Vanderbilt University Medical Center., Nashville, and at Samaritan Rehabilitation Institute. Good Samaritan Regional Medical Center, in Phoenix. Margaret A. Johnson (author of "Your Ticket to Independence") worked for eight years in the Driver Evaluation Program at Vanderbilt University Medical Center. "Clients were always surprised at how thorough the evaluations were," she recalls. "Many of them remembered their original driver's exams, in which they answered some questions, took a 20-minute ride,

and received their licenses. They had no idea our assessment was two or three hours long."

Drivers-evaluation programs emphasize safety as well as defensive driving. "I told clients to always use restraints (seat belts, etc.) and to raise their headrests to provide more protection," Johnson says. "Many of them received spinal-cord and head injuries because their headrests weren't properly adjusted."

According to Johnson, some clients are afraid evaluators will take away their driver's licenses. "I'm not employed by the state, and I don't have the authority to do something like that," she would tell them. After putting this fear to rest, she'd get on with the business at hand: putting qualified drivers with disabilities back on the road again.

According to Carol Blanc, 0.T.R., a driver-rehabilitation specialist, the Adapted Driving Program at the Arizona facility annually processes 100- 130 people whose disabilities range from head and spinal-cord injury to amputation, stroke, arthritis, and neurological diseases and problems. Clients must be of legal age and have a physician's referral and a valid Arizona driver's license or permit.

The length of the course depends on client disability and previous driving experience. Fees are charged by the hour; some insurance assist with these costs. Participants also receive help with obtaining their driver's licenses.

XX
XX
Tucson, Arizona XX

Dear XX

I am responding to your letter regarding the accessibility of gas stations to people with disabilities. Your letter asks the Department of Justice to take action to compel companies that operate gas stations to provide a "full service" option for their customers. Please excuse our delay in responding.

The Department of Justice is responsible for enforcing title III of the Americans with Disabilities Act (ADA), which prohibits discrimination on the basis of disability by places of public accommodation, including gas stations. The ADA requires existing gas stations that are not otherwise being altered to remove architectural barriers to the extent that it is readily achievable to remove them. The Department of Justice regulation implementing title III requires such barrier removal to comply with the ADA Standards for Accessible Design (Standards) for each altered element if it is readily achievable.

If a self-service gas station determines that it is not readily achievable to redesign gas pumps to enable people with disabilities to use them, the gas station is not required to make physical modifications to the gas pumps. However, the gas station is required to provide its services to individuals with disabilities through any readily achievable method, such as providing refueling service upon request to an individual with a disability at self-service prices. A service station is not required to provide refueling service to individuals with disabilities at any time when it is operating exclusively on a remote control basis with a single cashier and, under no circumstances, does the ADA require a self-service gas station to initiate a full-service operation.

cc: Records, Chrono, Wodatch, Blizard, FOIA
n:\udd\blizard\drsltrs\
01-03689

Because no Federal civil rights law enforced by this Division prohibits the operation of gas stations on a self-service basis, we can take no further action in response to your request.

Sincerely,

John L. Wodatch
Disability Rights Section
Civil Rights Division

Enclosures

01-03690

AUG 18 1995

The Honorable John D. Leshy
Solicitor
Office of the Solicitor
U.S. Department of the Interior
1849 C Street, N.W.
Washington, D.C. 20240

Dear Mr. Leshy:

Since my last letter to you on the subject of leaf-burning, your staff has asked a number of questions about our approach. Your inquiries have caused us to review our position. This letter, then, is in further response to the draft letter of findings that was submitted to us for review. I apologize for the delay and hope it has not inconvenienced your enforcement efforts under the Americans with Disabilities Act ("ADA"). This letter will clarify the Department's position on this issue.

The draft letter of findings addresses whether the City of Moline, Illinois1 has violated title II of the ADA by allowing leaf-burning by its citizens. The Department of the Interior has determined that the practice of leaf-burning may adversely affect people with asthma and other respiratory disabilities. Although the City has voluntarily enacted a total ban on leaf-burning effective May 1, 1995, the draft letter of findings finds a violation of title II in the City's failure to modify the practice of leaf-burning during the interim period before the effective date of the ban. The letter makes three arguments in support of its conclusion: (1) that leaf-burning is a program of the City under 28 C.F.R. § 35.130(a); (2) that leaf-burning is part of an "arrangement" between the City and its citizens under 28 C.F.R. § 35.130(b)(3)(i); and (3) that leaf-burning is a barrier to access by people with disabilities to other programs of the City in violation of 28 C.F.R. § 35.149.

Upon further review, we have refined our view of the issue. However, we still do not concur with the positions taken in the Department of the Interior's letter. We believe that argument

cc: Records, Chrono, Wodatch, Hill, McDowney, FOIA
n:\udd\hille\leafburn\leafdoi.ltr\sc. young-parran

1 The letter of findings also mentions East Moline and Rock Island, Illinois, and Davenport, Iowa, but does not provide a factual assessment of the complaints against those cities.
01-03691

two, above, does not apply to the current situation. The letter does not indicate any formal or informal agreement or arrangement between the City and its citizens under which the citizens have agreed to provide a leaf-burning service for the City. While an arrangement need not necessarily be evidenced by a formal agreement or similar documentation in order to be governed by 28 C.F.R. § 35.130(b) (3) (i), a mere incidental benefit to a public entity is not sufficient to indicate such an arrangement.

Similarly, argument three is too broad. Such an argument would potentially extend the City's program access obligations to any barriers found along the path from a City resident's home to a municipal program, regardless of whether those barriers were created by the City or were within its control. Section 35.149 of the title II regulation, which is limited to the "public entity's facilities," was not intended to go that far.

Finally, the first argument, that leaf-burning is a program of the City under 28 C.F.R. § 35.130(a), while possibly appropriate in some circumstances, does not appear applicable here. The ADA was intended to eliminate discrimination by public entities in their programs, services, and activities. The leaf-burning activities described in the draft letter of findings, however, are not conducted by or on behalf of a public entity, but rather constitute purely private activity on the part of City residents. As such, those activities are not subject to title II of the ADA.

If, on the other hand, a public entity requires leaf-burning by its citizens or contracts with its citizens to provide leaf-burning services for the public entity, then leaf-burning may constitute a program of the public entity under title II. Merely allowing leaf-burning, though, generally would not transform leaf-burning into a public program.

Therefore, in reviewing pending and future complaints regarding leaf-burning, we would recommend that the Department of the Interior assess whether the leaf-burning is done by or on behalf of the public entity or is required by the public entity. If it is, the public entity would be required to make reasonable modifications to the leaf-burning program, such as providing advance notice of dates and locations of leaf-burning. If it is not, the leaf-burning activity, itself, will most likely not be covered by title II.

01-03692

I hope this is helpful to you in resolving complaints based on leaf-burning. If you have further questions, please feel free to call Eve Hill at (202) 307-0663.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

01-03693

SEP 26 1995

The Honorable Frank D. Lucas
Member, U.S. House of Representatives
P.O. Box 3612
Enid, Oklahoma 73702

Dear Congressman Lucas:

This letter is in response to your inquiry on behalf of your constituent, XX regarding the inaccessibility of the streets, sidewalks, and Post Office in Garber, Oklahoma. XX complains that the curbs are too high and the sidewalks too uneven for the use of persons with disabilities and that the door into the Post Office is not accessible to persons with disabilities.

Several Federal laws prohibit discrimination on the basis of disability. Title II of the ADA prohibits discrimination on the basis of disability in any of the services, programs, or activities of State and local governments. A public entity's services, programs, or activities, when viewed in their entirety, must be readily accessible to and usable by individuals with disabilities. This standard, known as "program accessibility," applies to all existing facilities of a public entity. Public entities, however, are not necessarily required to make each of their existing facilities accessible. In addition, a public entity does not have to take any action that it can demonstrate would result in a fundamental alteration in the nature of its program or activity or in undue financial and administrative burdens.

Installation of curb ramps to provide access to existing pedestrian walkways on existing streets that are not otherwise being altered may be necessary in order to provide access to the "program" of using public streets and walkways.

Title II of the ADA further requires that public entities maintain in operable working condition those features, including sidewalks and streets, that are required to be readily accessible

cc: Records; Chrono; Wodatch; Milton; McDowney; FOIA
udd\milton\congress\curbs&po.luc
01-03694

to and usable by persons with disabilities. A complaint that a State or local government has violated title II may be filed by writing a detailed letter to the Department of Justice, Civil Rights Division, Disability Rights Section, P.O. Box 66738, Washington, D.C. 20035-6738.

The Architectural Barriers Act requires accessibility in all Federal buildings, including U.S. postal facilities, that are designed, constructed, or altered after 1968. Complaints alleging violations of the Architectural Barriers Act may be sent to: Judith A. Haslam, Director, Office of Compliance and Enforcement, Architectural and Transportation Barriers Compliance Board, 1331 F Street, N.W., Washington, D.C. 20004-1111 ((202) 272-5435).

In addition, all Federal government entities (including the United States Postal Service) must comply with section 504 of the Rehabilitation Act of 1973. Section 504 regulations require that newly constructed or altered facilities be constructed to be readily accessible to and usable by individuals with disabilities. For existing facilities, the regulations require that all programs and services provided by the government entity be accessible. A section 504 complaint may be filed by writing a detailed letter to: Ursula D. Hennessy, Acting Manager, Architectural Barriers Compliance Program, United States Postal Service, 475 L'Enfant Plaza, S.W., Room 4130, Washington, D.C. 20260-6422 ((202) 268-3139).

I hope this information is helpful to you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

XX
Garber, Okla
XX

The Honorable Frank Lucas

Dear Mr Lucas

I am writting because of a problem that has existed in this town for as long as I have lived here. I wrote the D.O.J. and D.O.T. several years ago, only to have my letters sent back and forth between the two departments for about 3 years. The last time they sent me a letter saying they were sending it back to which ever I wrote them and told them I would be dead before they got off their you know whats and did anything.

One of my stepsons suggested I contact Brad Edwards from tv 4 in OkC which I did and they suggested I contact you since the city of Garber is in violation of several Federal Laws. Mr Edwards is going to also follow up on my progress and help if I have any problems.

The probleme which I am writting about have to do with the sidewalks in downtown Garber. The curbs in some places are about 12 to 18 inches high making it difficult for the elderly and handicapped to get one a sidewalk, and then the sidewalks are dangerous even for someone who isn't handicapped. Anyone in a wheelchair or other means of handicapped transportation can't get down a sidewalk in this town. I even have difficulty with my grandson stroller. This makes it difficult for anyone to even get into a business in town. During the winter the elderly have a very hard time getting into the stores, because of the curbs being so high and the streets being slick.

The other problem is the post office which at last check was a Federal agent, is impossible for the handicapped to get into. Oh they just build a realy nice ramp but anyone in a wheelchair or other divice can't get in to the post office. We have one man who has to sit and wait for someone to open the door for him so he can get in and out.

Mr. Edwards office informed me that both of these violate the handicapped regulations. But everyone figures if they just ignore it that no one will have to do anything at all about it.

Our city council sure isn't going to do anything about it because they don't want to they don't have to worry about it. I heard for I know the last 10 yrs that they are going to do something about it and as long as no one makes a big deal out of it they arn't going to do anything.

I'm tired of people putting me off about this. My husband will be 80 yrs old in Nov. he can't even walk down the sidewalks in town nor the streets around our house because they keep filling holes up with large large gravel. I have even twisted my ankle on this stuff and on the sidewalks in town. Why should we be forced to drive 20 miles to Enid to walk in the mall when we are paying taxes in this town to keep our streets and sidewalks useable.

I could have written my state rep. but I know they would have only sent us to you so I just bypassed him and came straight to you I hope you will be able to get this problem taken care of. Our state senator MR Long is from Garber and a lot of good it does to have him around. This problem has been here since he was living here and he did nothing about it

Thank you for your time

Sincerely

XX

The last time they sent me a letter saying they were sending it back to which ever I wrote them and told them I would be dead before they got off their you know whats and did anything.

One of my stepsons suggested I contact Brad Edwards from tv 4 in OkC which I did and they suggested I contact you since the city of Garber is in violation of several Federal Laws. Mr. Edwards is going to also follow up on my progress and help if I have any problems.

The problem which I am writing about have to do with the sidewalks in downtown Garber. The curbs in some places are about 12 to 18 inches high making it difficult for the elderly and handicapped to get one a sidewalk, and then the sidewalks are dangerous even for someone who isn't handicapped. Anyone in a wheelchair or other means of handicapped transportation can't get down a sidewalk in this town. I even have difficulty with my grandson stroller. This makes it difficult for anyone to even get into a business in town. During the winter the elderly have a very hard time getting into the stores, because of the curbs being so high and the streets being slick.

The other problem is the post office which at last check was a Federal agent, is impossible for the handicapped to get into. Oh they just build a really nice ramp but anyone in a wheelchair or other divice can't get in to the post office. We have one man who has to sit and wait for someone to open the door for him so he can get in and out.

Mr. Edwards office informed me that both of these violate the handicapped regulations. But everyone figures if they just ignore it that no one will have to do anything at all about it.

Our city council sure isn't going to do anything about it because they don't want to they don't have to worry about it. I heard

for I know the last 10 yrs that they are going to do something about it and as long as no one makes a big deal out of it they aren't going to do anything.

I'm tired of people putting me off about this. My husband will be 80 yrs old in Nov. he can't even walk down the sidewalks in town nor the streets around our house because they keep filling holes up with large large gravel. I have even twisted my ankle on this stuff and on the sidewalks in town. Why should we be forced to drive 20 miles to Enid to walk in the mall when we paying taxes in this town to keep our streets and sidewalks useable.

I could have written my state rep. But I know they would have only sent us to you so I just bypassed him and came straight to you I hope you will be able to get this problem taken care of. Our state senator MR Long is from Garber and a lot of good it does have him around. This problem has been here since he was living here and he did nothing about it

Thank you for your time

Sincerely,

XX

01-03891

OCT 5 1995

The Honorable Norma Cantu
Assistant Secretary for Civil Rights
U.S. Department of Education
330 C Street, S.W.
Suite 5000
Washington, D.C. 20202-1100

Dear Ms. Cantu:

This letter addresses your inquiry regarding the provision of sign language interpreters to college students. You asked if the Americans with Disabilities Act (ADA) would permit a college to require students who are not clients of State vocational rehabilitation agencies to apply to such agencies in order to reimburse the college for the costs of needed sign language interpreters or other auxiliary aids.

Title III of the ADA requires private institutions of higher education to provide auxiliary aids and services, including qualified interpreters, to students where necessary to ensure that no individual with a disability is excluded, denied services, segregated or otherwise treated differently than other individuals because of the absence of auxiliary aids and services. 28 CFR S 36.303. Title II of the ADA requires public institutions of higher education to furnish appropriate auxiliary aids and services, including qualified interpreters, where necessary to afford an individual with a disability an equal opportunity to participate in, and enjoy the benefits of, a service, program, or activity conducted by the institution. 28 CFR S 35.160. Section 504 of the Rehabilitation Act also requires postsecondary schools that receive federal financial

assistance to provide appropriate auxiliary aids. 34 CFR S 104.44(d). None of these regulations require an entity to take any action that it can demonstrate would result in a fundamental alteration in the nature of a service, program, or activity or in undue financial or administrative burdens. A college's obligation to provide auxiliary aids, however, is not dependent on the availability of vocational rehabilitation or other funding.

cc: Records; Chrono; Wodatch; Blizard; Milton; FOIA
n:\udd\milton\rsa.3\sc. young-parran
01-03697

The Federal regulations implementing titles II and III expressly prohibit the imposition of a surcharge on a particular individual with a disability or any group of individuals with disabilities to cover the costs of measures, such as the provision of interpreters or other auxiliary aids or services, that are required to provide an individual or group with the nondiscriminatory treatment required by the ADA. 28 CFR SS 35.130(f), 36.301(c). Requiring a student with a hearing impairment or other disability to apply for participation in the vocational rehabilitation program could impose a direct financial obligation on the student if a State vocational rehabilitation agency has established, as permitted by program regulations in 34 CFR 361.47(a), a financial need test on the provision of certain auxiliary aids, such as interpreter services or reader services, whereby the student is required to pay part of the cost of the needed services.

Even if a State vocational rehabilitation agency has not established such a financial need test, the student may expend considerable time and effort in meeting the procedural requirements for receiving services. Before any services can be initiated, the Rehabilitation Act requires a formal application for services, an eligibility determination, which may involve a comprehensive assessment of the individual's vocational aptitudes and interests, functional capacities, personality and interpersonal skills, and medical condition if existing data is determined to be insufficient. Then the applicant and the vocational rehabilitation counselor jointly must develop an individualized written rehabilitation program identifying all services needed to achieve a particular outcome. Requiring a student with a disability to complete this process as a prerequisite to obtaining auxiliary aids that Federal law requires the postsecondary institution to provide, imposes a burden on students with disabilities that is not imposed on other students. In our view, this expenditure of time and effort may be quantified as a cost imposed on the student as a precondition to the provision of a required auxiliary aid; therefore, it is prohibited by the ADA.

No different result should be reached under section 504 because the Department of Education regulation implementing section 504 expressly requires covered postsecondary institutions to provide auxiliary aids for students with disabilities. 34 CFR S 104.44(d). This clearly requires covered entities to ensure that auxiliary aids are provided to qualified students with disabilities regardless of their financial need or the availability of outside funding. U.S. v. Bd. of Trustees for the

Neither the ADA nor section 504 prohibits a postsecondary institution from encouraging eligible students to take advantage of any benefits available to them, including participation in a vocational rehabilitation program. However, the decision to participate must be made voluntarily by the student. A postsecondary institution may not require a student to apply for benefits, it may not withhold payment for required auxiliary aids while the student's vocational rehabilitation eligibility is being determined, and it may not refuse to fund any portion of the cost of required auxiliary aids that is not covered by the vocational rehabilitation program in States where a financial need test is applied to vocational rehabilitation clients.

I hope this information is helpful to you in resolving this issue.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

OCT 11 1995

The Honorable Strom Thurmond
United States Senate
217 Russell Office Building
Washington, D.C. 20510-4001

Dear Senator Thurmond:

Your letter to the Department of Labor on behalf of your constituent, Edwin Poulnot, III (your case number 5206230003), was referred to the Department of Justice for reply. Mr. Poulnot has questions about existing retail space that he is trying to sublease to another tenant. Mr. Poulnot wished to know his obligations under the Americans with Disabilities Act of 1990 (ADA). Please excuse our delay in responding.

The ADA does not establish specific requirements regarding alterations that must be made to existing facilities for the purpose of accessibility, if alterations are not otherwise planned. Title III of the ADA, which applies to places of public accommodation and commercial facilities, simply requires that places of public accommodation, including sales and rental establishments, remove architectural and communication barriers to the extent that it is readily achievable to do so. Such barriers must be removed from all public areas of the place of public accommodation, including restrooms. Congress defined the term "readily achievable" to mean "easily accomplishable and able to be carried out without much difficulty or expense."

In determining whether an action is readily achievable, the factors to be considered include: 1) the nature and cost of the action needed; 2) the overall financial resources of the entity; 3) the number of persons employed by the entity; 4) the effect which complying will have on the entity's expenses and resources; 5) legitimate safety requirements necessary for safe operation; 6) the impact otherwise of the action upon operation of the site; 7) the relationship of the entity to any parent corporation or entity; and 8) the overall financial resources, size, and types of operations of any parent corporation or entity.

cc: Records; Chrono; Wodatch; McDowney; Milton; FOIA
n:\udd\congress\achvable.thu\sc. young-parran
01-03700

The Department of Justice regulation implementing title III of the ADA requires that measures taken to remove barriers must comply with the ADA Standards for Accessible Design unless such compliance is not readily achievable. If it is not readily achievable to remove barriers in an existing facility that is not otherwise being altered, then barrier removal is not required. However, where barrier removal is not readily achievable, the public accommodation must nonetheless make its goods, services, or facilities available through alternative methods, such as curbside service, home delivery, or relocation of activities, where those methods are readily achievable.

Thus, businesses such as retail stores may need to adjust their layout of racks and shelves in order to permit wheelchair access, but they are not required to do so if it would result in a significant loss of selling space. However, the store is still required to make the goods and services that are located along inaccessible aisles available to individuals with disabilities through alternative methods. For example, the store could instruct a clerk to retrieve inaccessible merchandise, if it is readily achievable to do so.

Finally, please note that both the landlord and the tenant of a retail establishment are public accommodations and have full responsibility for complying with all ADA title III requirements applicable to that place of public accommodation. The title III regulation permits the landlord and the tenant to allocate responsibility, in the lease, for complying with particular provisions of the regulation. However, any allocation made in a lease or other contract is only effective as between the parties, and both landlord and tenant remain fully liable for compliance with all provisions of the ADA relating to that place of public accommodation.

I hope this information will be helpful to you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

*ST. ANDREWS CENTER
*NORTHWOODS MALL FOUNDED IN

Mr. John Payne
Office Sen. J. Strom Thurmond
Washington, D.C.

FAX 202-224-1300

Dear Mr. Payne I am writing you to ask your help in clarifying the implications of the Disability Act on a property that I am trying to sublease to another tenant.

This building is 26,500 square feet and is located in the City of Charleston. It was constructed in 1966, and is free standing within a strip center. It has wheel chair ramps at the front and rear doors. We are presently offering public rest rooms for male and female. These restrooms are small and do not have access for wheel chairs. The rooms are quite small and have two stalls in the mens room and four stalls in the womens area. Store aisles in the main aisles are about five feet, but in the interior aisles the width varies according to the department.

My question is, what do we have to do (if anything) to conform to the Disabilities Act.

Any information which you can obtain for us would be sincerely appreciated.

July 25, 1995 Sincerely,

Edwin Poulnot, III
President

OCT 12 1995

XX
XX
West Bowdoin, Maine 04287

Dear XX

I have been asked to respond to your letter to President Clinton regarding the case of Abbott v. Bragdon.

As you know, the case involves a dentist, Dr. Bragdon, who has refused to provide in-office dental treatment to patients (and in particular, Ms. Sidney Abbott) who are HIV-positive. Ms. Abbott alleges that Dr. Bragdon has violated the Americans with Disabilities Act (ADA). The United States became involved in the case after Dr. Bragdon alleged that the ADA is unconstitutional.

The ADA is a civil rights statute enacted to protect the civil rights of individuals with disabilities. Under the law, health care providers, including dentists, are required to treat patients without discriminating on the basis of an individual's disability. Persons who are HIV-positive are individuals with disabilities, and so they are protected from discrimination on that basis. However, the ADA would not require a health care provider to treat an individual with a disability if doing so would create a direct threat to health or safety.

In this case, Dr. Abbott's argument that it is not safe to treat patients who are HIV-positive in his dental office is not based on scientific fact. The Centers for Disease Control, the American Dental Association and other authorities as well as every court to address this issue have uniformly concluded that providing routine in-office dental care to individuals who are HIV positive does not require any special procedures or expertise and does not endanger the health or safety of the treating dentist.

XX

7/23/95

Dear President Clinton:

It has come to my attention that there is a lawsuit pending against a dentist in Bangor, M Dr. Randon Brandon, by an HIV + woman because Dr. Brandon (in the intrests of her health as well as the health of the rest of her patients) wants to treat her in the hospital. I have also learned that six lawyers from Att. General Janet Reno's office have been assigned to her case.

As a citizen and taxpayer I am appalled that with all the crime and drugs in this nation the Dept. of Justice has nothing better to do than to harass a law abiding citizen like Dr. Brandon and I would hope that you would put an end to this foolishness.

Very truly yours,

XX

01-03705

OCT 9 1995

The Honorable Bob Filner
Member, U.S. House of Representatives
333 F Street, Suite A
Chula Vista, California 91910

Dear Congressman Filner:

This is in response to your inquiry on behalf of your constituents, XX .
We apologize for our delay in responding.

XX are complaining about their treatment at the Hometown Buffet Restaurant in Chula Vista and they inquire whether their rights have been violated. XX uses a wheelchair and requires assistance for toileting. At the Hometown Buffet, a problem arose when XX attempted to use the ladies' room with his wife's assistance. It appears that a female customer objected to XX presence in the ladies' room and the assistant manager subsequently advised the XX to wait outside the restroom until it was unoccupied before entering to use the toilet. The XX note, however, that a woman with a child, an "older boy," were apparently allowed to use the ladies' room without incident. The XX further allege that they were told to sit at a table in the restaurant nearest the door, and were advised that this policy was in effect "in case a wheelchair person became ill."

Title III of the Americans with Disabilities Act prohibits discrimination against individuals with disabilities by places of public accommodation, including restaurants such as the Hometown Buffet. Among other things, the ADA requires public accommodations to make "reasonable modifications" in its policies, practices, and procedures where necessary to afford an individual with a disability an equal opportunity to enjoy the goods and services offered by the public accommodation. Designating restrooms for separate use by men and women is a policy or practice subject to the reasonable modification requirement. It appears from the XX account that the restaurant was willing to modify its general rules and allow

cc: Records; Chrono; Wodatch; Magagna; McDowney; FOIA
udd\magagna\congress\filner
01-03706

XX to use the ladies' room with his wife's assistance so long as the privacy of other patrons was respected. Without knowing more, the restaurant's position appears to be reasonable.

More problematic is the restaurant's rule that patrons using wheelchairs sit only near exit doorways. While a public accommodation may impose legitimate safety rules, it cannot make assumptions about the capabilities of individuals with disabilities or provide services in a segregated manner.

Under title III, individuals have a private right of action to enforce their rights in federal court. The ADA also authorizes the Department of Justice to investigate complaints against places of public accommodation and to take enforcement action where there is a pattern or practice of discrimination or discrimination involving an issue of general public importance. The Department has undertaken a vigorous enforcement program under the ADA which is described in the attached report. Unfortunately, however, we are not able to investigate every meritorious complaint we receive. We have reviewed the information provided by the XX and determined not to investigate this incident. The XX may wish to pursue their rights in federal court. We have also enclosed a list of agencies in California that may be able to provide some assistance in this manner.

I hope this information will be helpful to you in responding to your constituents.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

Enclosures

01-03707

August 3, 1995

Rep. Bob Filner
333 F Street
Chula Vista CA 91910

Dear Bob:

RE: Violation of ADA

My husband, XX , is disabled by a stroke, uses a wheelchair, and can barely stand by himself. He must be pulled up from the chair and steadied when we are in a public bathroom. He cannot go alone. This had never been a problem for us these last 12 years wherever we went in the U.S; that is, until ----

On July 24, 1995 at between 4:30 and 5:00 p.m., we were in the womens' room at the Hometown Buffet, 651 Palomar St., Chula Vista, CA 91911. We are regular customers, going to the Hometown Buffets 2 or 3 times a week for at least two years. We are known, and greet the manager, XX , when we see her.

The Palomar St. store is heavily patronized by Mexican shoppers, being near the border; almost all the employees are bilingual, Spanish being the first language spoken there.

While we were waiting for the wide stall to become vacant, I observed a woman looking angrily at us. She left, and then in came a bus-girl to say "You don't belong in here". I told her to go away. Shortly in came the Asst. Manager, another Mexican, and told us that we could use the room, but that we had to leave and wait outside with an escort from the restaurant until the room was emptied. Then we would be permitted in and all others would be barred from entering until we had left.

We had already been waiting for over 10 minutes. There is no blue symbol on the door to designate wheelchair use, and while the customers can use the other three stalls, we cannot. Another woman slipped in before I could maneuver the chair to the opening, the area where we had to wait being at hinges to the door. I noticed one woman had an older boy with her, whom we Americans would send to the mens' room.

01-03708

I called the company's main office the next morning (address below) and related my account to XX . The day after that, Mgr. Diane Stoops called me and apologized for the scene and humiliation to my husband. But she did mention she knew of this new restriction. I asked her to let me know what her company was going to do, but she has not yet called me with that information.

Another point: One of the hostesses, Erika, told me we had to sit near the exit doorway in case a wheelchair person became ill, and that we should wait at the side of the line of people until a table came empty near the door. But there are 3 exits, not just one. The second and third time she seated, I refused to wait for a table in the one area she said we had to sit. She was angry, said these were her orders.

What are our rights? Americans have not been offended by our use of either mens' or womens' rooms. This appears to be a case of cultural clash - they are imposing their standards from across the border. If my disabled husband cannot come into the bathroom without elaborate procedure, why should their older boys come in and out at will? And it is clear the customers do not connect the wide stall for use by a person in a wheelchair.

Sincerely,
XX

01-03709

Mr. Richard Kuchnicki
President
Council of American Building Officials
5203 Leesburg Pike
Falls Church, Virginia 22041

Dear Mr. Kuchnicki:

This letter is in response to your request that the Department of Justice review the American National Standards Institute's (ANSI) standard A117.1 (1992 ed.) and the Board for the Coordination of the Model Codes' (BCMC) recommended accessibility provisions and evaluate their consistency with the new construction and alterations requirements of the Americans with Disabilities Act (ADA). The efforts of ANSI, BCMC, and the other model code groups involved in drafting the BCMC/ANSI standards are highly commendable.

I apologize for the delay in responding to your request and I thank you for your patience during the review process. We have attempted to conduct a comprehensive and detailed evaluation of the BCMC/ANSI standards that we hope will assist you in the ongoing development of the 1997 edition of ANSI A117.1. The Architectural and Transportation Barriers Compliance Board has also reviewed the submitted standards and their comments are addressed in our evaluation.

Our analysis of the submitted BCMC/ANSI standards is discussed in detail in the enclosed side-by-side comparison. That comparison contains the ADA new construction and alterations requirements in the left column, the comparable ANSI A117.1 provisions in the second column, the comparable BCMC provisions in the third column, and the Department's comments in the right column. Although the ANSI and BCMC provisions occupy separate columns, the Department's comments generally treat both codes as a single combined code, rather than analyzing each individually. This is based on our understanding that BCMC section 1.3 adopts the ANSI standard to provide its technical specifications. In some instances, however, the ANSI and BCMC codes contain differing requirements for a single element. In these instances, the intent of the drafters is unclear and, therefore, the provisions have been addressed separately.

cc: Records, Chrono, Wodatch, Blizard, Hill

We have identified several areas where the requirements of the BCMC/ANSI standards are not equivalent to the ADA requirements. These areas are identified in the side-by-side comparison by the characters "N.E." Other sections are designated as "P.N.E.," meaning "possibly not equivalent." Further clarification regarding the intent and meaning of such sections may resolve the potential problems identified in the comparison.

Most of the substantial areas of nonequivalency appear to involve scoping issues, rather than technical specifications. While the side-by-side comparison should give you a comprehensive picture of the areas of concern, I would like to highlight some of the major differences between the BCMC/ANSI standards and the ADA requirements. These differences are as follows:

A. Global Issues

1. "Non-code" Issues

The BCMC/ANSI standards provide that a number of elements covered by the ADA Standards are "inappropriate for incorporation into a building code." Therefore, the BCMC/ANSI standards do not impose any accessibility requirements on those elements. The "non-code" items include:

automatic teller machines
express check-out aisles
library magazine displays
permanent signage
public telephones
temporary raised platforms
self-service shelves and display units
smoking/non-smoking dining areas
telecommunication devices for the deaf
transient lodging notification devices

Many of these items can be regulated by building code officials and, therefore, must be included in any building code in order for the code to be considered equivalent to the ADA.

Furthermore, those few items that may be beyond the scope of building officials' inspections must nevertheless meet the ADA requirements. Therefore, scoping and technical requirements should, at least, be provided as advisory Appendix material in building codes so builders have notice of the requirements.

2. Historic Preservation

The ANSI and BCMC standards each address historic preservation. It is unclear how the drafters intended to mesh the two.

The ANSI standard addresses historic preservation only in the Appendix. In addition, the ANSI process is significantly different from the process mandated by the ADA. Congress specifically required the ADA Standards to include historic preservation provisions equivalent to those in the Uniform Federal Accessibility Standards, which require consultation with the appropriate historic preservation official whenever a building is covered by the National Historic Preservation Act. The ANSI process permits the building official to act without consultation with the appropriate preservation official. In addition, the ADA specifically provides modified standards to be applied when full accessibility would threaten historic preservation. The ANSI standard does not specify such modified standards and, thus, leaves it to the discretion of the building official to balance accessibility and historic preservation.

The BCMC standard does not refer to the ANSI standard

regarding historic preservation. The BCMC standard will allow application of "alternate provisions" whenever the historic character of a building would be "adversely affected" by accessibility. This standard is not equivalent to the ADA Standards, which apply modified accessibility requirements only when full accessibility would "threaten or destroy" the historic character of a building. In addition, the BCMC standard fails to specify what "alternate provisions" are to be applied and, thus, leaves it to the discretion of the building official.

2. Building Classification

The BCMC/ANSI standards rely on traditional building code classifications of buildings. Such classification systems may not completely overlap with ADA coverage. Therefore, in some cases, the BCMC/ANSI standards may not meet the ADA requirements for some types of buildings. The statutory language of the ADA requires coverage of all public accommodations and commercial

facilities. The equivalency of the scope of application of the BCMC/ANSI standards cannot be assessed without the applicable building code. The BCMC/ANSI standards also rely on building codes to define alterations, entrances, and stories. The equivalency of these definitions, therefore, cannot be assessed at this time.

3. Mainstreaming

The BCMC/ANSI standards take the position that the accessibility of some elements of buildings is a matter of concern for all occupants, not just for occupants with disabilities. Therefore, the BCMC/ANSI standards do not provide scoping for these elements, and leave it to the general building code to require all such elements to be accessible. Such "mainstreamed" elements include ramps, stairs, and doors.

While mainstreaming of such elements is a laudable goal, the lack of scoping in the submitted BCMC/ANSI standards prevents the Department from finding equivalency. In order to assess the equivalency of mainstreamed elements, the applicable building code must be reviewed.

B. Major Scoping and Technical Issues

1. Alterations and Additions (4.1.5; 4.1.6)

The BCMC/ANSI standards' requirement for provision of an accessible path of travel to alterations is unclear. The BCMC/ANSI standards do not define "path of travel" and, therefore, the more common meaning may be applied, rather than the meaning established by the statutory language of the ADA. In addition, the BCMC/ANSI standards do not address the potential problem of a series of small alterations to which the path of travel requirement may not apply individually. The ADA addresses this problem by requiring consideration of the cost of all alterations made during the prior three years for which no path of travel was provided. The BCMC/ANSI standards also fail to require that, if full accessibility of the path of travel would exceed 20% of the cost of the alteration, the builder must spend 20% toward partial accessibility. Problems with the BCMC/ANSI standards' technical provisions for alterations are addressed in the side-by-side comparison.

The BCMC/ANSI standards do not specifically address additions. Therefore, it is unclear whether additions will be treated as alterations or as new construction.

2. Special Application Sections (5-10)

The BCMC/ANSI standards do not address unique accessibility requirements in medical facilities, business and mercantile facilities, libraries, transient lodging, and transportation facilities. Some of the ADA's requirements for such facilities are adequately addressed by the general provisions of the BCMC/ANSI standards, but many are not. Specific problems with the BCMC/ANSI standards' general technical specifications as applied to the ADA's special occupancies are addressed in the side-by-side comparison.

3. Transient Lodging (9)

The BCMC/ANSI standards' scoping for hotels is seriously inadequate. The BCMC/ANSI standards exempt all hotels with less than 6 rooms. The ADA exempts such hotels only if the owner is in residence. In addition, the BCMC/ANSI standards require 1 accessible room for the first 30 rooms and then 1 more accessible room for each additional 100 rooms. This is not equivalent to

the ADA requirements for accessible rooms. Also, the BCMC/ANSI standards do not require dispersion of accessible rooms.

The disparity between the BCMC/ANSI standards and the ADA requirements is increased by the fact that the BCMC/ANSI standards only require that roll-in showers be provided in half of the accessible rooms, instead of requiring additional accessible rooms with roll-in showers.

The following chart illustrates the disparity between the ADA scoping requirements and the BCMC/ANSI requirements. (Chart has been formatted to accomodate ASCII text)

No. of rooms	ADA Accessible Rms	ADA Accessible Rms + Roll-in Shower Rms	BCMC Accessible Rms (1/2 of these are Roll-in Shower Rms)
1 to 25	1	1	1
26 to 50	2	2	(26-30: 1) (30-50: 2)
51 to 75	3	4	2
76 to 100	4	5	2
101 to 150	5	7	(101-130: 2) (131-150: 3)
151 to 200	6	8	3
201 to 300	7	10	(201-230: 3) (231-300: 4)
301 to 400	8	12	(301-330: 4) (331-400: 5)

401 to 500	9	14	(401-430: 5) (431-500: 6)
501 to 1000	2% of total (=10-20)	15-19	6-9
1001 and over	20 plus 1 for each 100 over 1000	24 + 1 for each 100	(1001-1030: 9) (>1030: 10 + 1 for each 100)

Although the scoping for rooms accessible to people with hearing impairments is equivalent, the BCMC/ANSI standards only require visual alarms in those rooms. The ADA requires both visual alarms and visual notification devices.

01-03714

The BCMC/ANSI standards do not specifically address homeless shelters and other social service establishments. It is unclear whether these facilities would be subject to the general requirements for transient lodging, for residences, or would not be covered at all.

4. Work Areas (4.1.1(3))

The BCMC/ANSI standards exempt "areas where work cannot reasonably be performed by persons having a severe impairment" from accessibility requirements. This is not equivalent to the ADA Standards, which require limited accessibility to all work areas. The BCMC/ANSI provision requires building code officials to determine what the requirements of the job are and whether individuals with disabilities could perform them. Building officials are not in a position to make such employment decisions. The BCMC/ANSI restriction is contrary to one of the major purposes of the ADA, which is to increase employment opportunities for people with disabilities.

5. Parking and passenger Loading Zones (4.1.2(5))

The BCMC/ANSI standards' scoping for lots with 5 or fewer

parking spaces requires 1 accessible space, but does not require the space to be designated as reserved for individuals with disabilities. The BCMC/ANSI standards do not provide scoping for accessible passenger loading zones.

6. Portable Toilets (4.1.2(6))

The BCMC/ANSI standards do not provide specific scoping for portable toilets. It is unclear whether they are covered as temporary structures.

7. Elevators (4.1.3(5); 4.10)

The BCMC/ANSI standards do not provide that required elevators must serve all levels. In addition, the BCMC/ANSI standards appear to require only elevators on accessible routes to be accessible. The ADA requires all passenger elevators to be accessible.

The BCMC/ANSI standards permit recessed buttons on control panels. Such buttons make activation more difficult for individuals with limited manual dexterity, who must use an open hand or closed fist. The BCMC/ANSI standards also permit a 54 inch reach range for emergency communication. Although a 54 inch side reach range is generally acceptable, some people cannot reach that high. The ADA provides a 48 inch maximum height because emergency communication may be a life-or-death issue. The BCMC/ANSI standards also relax requirements for alterations to elevators.

8. Entrances (4.1.3(8); 4.14)

The BCMC/ANSI standards do not require at least one accessible ground floor entrance and do not require accessible entrances in the same number as required exits. The BCMC/ANSI standards provide a blanket exemption for service entrances, even if a service entrance is the only entrance.

9. Areas of Refuge (4.1.3(9); 4.3.11)

The BCMC/ANSI standards appear never to require more than two areas of rescue assistance. The ADA requires areas of rescue assistance in a number equal to the number of inaccessible required exits. In addition, the BCMC/ANSI standards fail to require two-way communication in buildings with less than five stories and permit two-way communication to rely exclusively on voice communication.

10. Drinking Fountains (4.1.3(10; 4.15)

The BCMC/ANSI standards fail to address fountains that are accessible to people who have difficulty bending. The BCMC/ANSI standards also allow a lower clear knee space for fountains on cantilevered arms. This lower space may make it more difficult for people to use the fountains.

11. Signage (4.1.3(16); 4.30)

The BCMC/ANSI standards' scoping for signage is not equivalent for parking spaces, accessible entrances, and accessible toilet and bathing facilities. The BCMC/ANSI standards also fail to provide scoping for room signage and to require directional signage for TDDs. The BCMC/ANSI standards fail to require sans serif or simple serif typeface and to require clear approach to within three inches of room signs.

12. Accessible Seating (4.1.3(10); 4.33)

The BCMC/ANSI standards require dispersion of accessible seating only "where necessary for line of sight" and permit dispersion to be based on availability of an accessible route. This would appear to allow a builder to avoid dispersion by providing only a few accessible routes.

The BCMC/ANSI standards' scoping of accessible seats is deficient for spaces with more than 500 seats. The ADA requires 6 accessible seats plus 1 for each increase of 100. The BCMC/ANSI standards require 6 accessible seats plus only 1 for each increase of 200.

13. Ramps (4.8)

The BCMC/ANSI standards allow slopes steeper than 1:12 in new construction, while the ADA allows them only in alterations. The BCMC/ANSI standards' requirements would not require handrails on long shallow ramps, where the ADA would require rails.

14. Stairs (4.9)

The BCMC/ANSI standards permit winders, circular stairs, and open risers on "accessible" stairs. The ADA does not. The BCMC/ANSI handrail requirements fail to address recessed rails and structure strength and may not require handrail extension at the bottom of stairs.

15. Doors (4.13)

The BCMC/ANSI standards permit revolving doors to be part of an accessible route if they comply with S 4.13. Merely complying with S 4.13 is insufficient to make a revolving door accessible. Rather, the dimensions and movement of the door, itself, must also be addressed. In addition, the BCMC/ANSI standards generally fail to require sufficient maneuvering clearances at doors.

16. Water Closets (4.16)

The BCMC/ANSI standards permit a 24 inch, rather than a 36 inch, grab bar behind the toilet in some circumstances in new construction. The ADA does not.

17. Showers (4.21)

The BCMC/ANSI standards do not require a folding seat in roll-in showers. In addition, they allow a 2 1/2 inch gap between the back of the seat and the wall. The ADA only allows 1 1/2 inches in order to limit the risk of arms slipping through the gap during transfers.

18. Toilet Rooms (4.22)

The BCMC/ANSI standards allow doors to swing into clear space. This problem may be offset by the BCMC/ANSI standards' greater clear space requirements. However, in individual toilet rooms, where the extra clear space is not required, the in-swinging door is clearly not equivalent.

19. Sinks (4.24)

The BCMC/ANSI standards allow knee clearance under accessible sinks to be a little as 17 inches deep. The ADA requires a 19 inch minimum clearance depth.

20. Storage (4.25)

The BCMC/ANSI standards address distance from wheelchairs to clothes rods and shelves. The permissible reach heights must be reduced as the distance from the rod or shelf increases.

21. Alarms (4.28)

The BCMC/ANSI standards address accessibility only of required alarms. The ADA requires accessibility whenever alarms are provided, not just when they are required. In addition, the

BCMC/ANSI standards' requirements regarding placement of signals and flash rate are problematic. The standards allow visible signals to be higher and, thus, more easily obscured by smoke and the standards' lower flash intensity and higher number of appliances may increase the risk of triggering seizures.

Additional technical and scoping problems are addressed in the side-by-side comparison.

I hope this evaluation is helpful to you in your efforts to create a model accessibility standard that is equivalent to the ADA requirements. My staff would be happy to meet with you to discuss the evaluation. If you would like to arrange such a meeting, or if you have any questions, please call Eve Hill at (202) 307-0663.

I hope that you will continue to work with the Department to achieve an ADA-equivalent accessibility model. To that end, we will be happy to review any proposed changes to the BCMC/ANSI standards and assess their equivalency to the ADA requirements. Such review may help adopting jurisdictions to evaluate the standards' equivalency to the ADA and to make any changes needed to ensure complete equivalency. In addition, once an equivalent model is completed, the Department's review will provide assurance of equivalency for jurisdictions adopting the code and will allow the Department to review certification submissions by such jurisdictions more quickly.

Sincerely,
John L. Wodatch
Chief
Disability Rights Section

ADA Title III Requirements

1 PURPOSE

This document sets guidelines for accessibility to places of public accommodation and commercial facilities by individuals with disabilities. These guidelines are to be applied during the design, construction, and alteration of such buildings and facilities to the extent required by

regulations issued by Federal agencies, including the Department of Justice, under the Americans with Disabilities Act of 1990.

CABO/ANSI A117.1-1992

1 Purpose and Application

1.1* Purpose
The specifications in this standard make buildings and facilities accessible to and usable by people with such physical disabilities as the inability to walk, difficulty walking, reliance on walking aids, blindness and visual impairment, deafness and hearing impairment, in coordination, reaching and manipulation disabilities, lack of stamina, difficulty interpreting and reacting to sensory information, and extremes of physical size based generally upon adult dimensions. Accessibility and usability allow a person with a physical disability to independently get to, enter and use a building or facility.

This standard provides specifications for elements that are used in making functional spaces accessible. For example, it specifies technical requirements for making doors, routes, seating, and other elements accessible. These accessible elements are used to design accessible functional spaces such as classrooms, hotel rooms, lobbies, or offices.

This standard is for adoption by government agencies and by organizations setting model codes to achieve uniformity in the technical design criteria in building codes and other regulations. This standard is also used by non-governmental parties as technical design guidelines or requirements to make buildings and facilities accessible to and usable by persons with physical disabilities.

BCMC

1.2 This document sets minimum requirements for the application of standards for facility accessibility by people with physical disabilities, which includes those with sight impairment, hearing impairment and mobility impairment. It shall be interpreted to mandate access for all persons, including but not limited to occupants, employees, consumers, students, spectators, participants and visitors.

1.3 Details, dimensions and construction specifications for

items herein shall comply with the requirements set forth in the American National Standards Institute standard CABO/ANSI A117.1-1992, "Accessible and Usable Buildings and Facilities."

1.4 Maintenance of Facilities. Any building, facility, dwelling unit, or site which is constructed or altered to be accessible or adaptable under this document shall be maintained accessible and/or adaptable during its occupancy.

Comments*

E.

E.

Exceeds - Exceeds ADA Standards
E - Equivalent to ADA Standards
N.E. - Not equivalent to ADA Standards
P.N.E. - Potentially not equivalent to ADA Standards

ADA/ANSI/BCMC Requirements - October 13, 1995

01-03719

ADA Title III Requirements

2 GENERAL

2.1 Provisions for Adults. The specifications in these guidelines are based upon adult dimensions and anthropometrics.

2.2 Equivalent Facilitation. Departures from particular technical and scoping requirements of this guideline by the use of other designs and technologies are permitted where the alternative designs and technologies used will provide substantially equivalent or greater access to and usability of the facility.

CABO/ANSI A117.1-1992

2 Recommendations to Adopting Authorities

2.1 Administration
This standard does not establish which occupancy or building types are covered and the extent to which each type is covered. Such requirements for application of this standard shall be specified by the adopting authority, including which and how many functional spaces and elements are to be made accessible within each building type, as described in 2.2 through 2.4.

2.2 Number of Spaces and Elements
The administrative authority adopting this standard shall specify the actual number of spaces and elements or establish procedures for determining them based on, but not limited to:
- population to be served
- availability to occupants, employees, customers, and visitors
- distances and time required to use the accessible elements
- provision of equal opportunity and treatment under law

2.3* Remodeling
The specifications in this standard are based upon the functional requirements of persons with physical disabilities. The administrative authority adopting this standard shall specify the extent to which it is to cover remodeling, alteration, or rehabilitation within its jurisdiction.

2.4 Review Procedures
To promote effective compliance with the requirements of this standard, the administrative authority adopting it should establish a review and approval procedure for construction projects that come under its jurisdiction.

See 1.1 Purpose
BCMC

Comments*
N.C. Note: Scoping issue.
E.
No equivalent provision. However, if used with a building code, the building code's waiver provisions will be uncertifiable.

3 MISCELLANEOUS INSTRUCTIONS AND DEFINITIONS

3.1 Graphic Conventions. Graphic conventions are shown in Table 1. Dimensions that are not marked minimum or maximum are absolute, unless otherwise indicated in the text or captions.

Table 1
Graphic Conventions

Convention	Description
36/915	Typical dimension line showing U.S. customary units (in inches) above the line and SI units (in millimeters) below
9/230	Dimensions for short distances indicated on extended line
9/230	Dimension line showing alternate dimensions required
36/916	Direction of approach
max	Maximum
min	Minimum
	Boundary of clear floor area
	Centerline

3.2 Dimensional Tolerances. All dimensions are subject to conventional building industry tolerances for field

conditions.

3.3 Notes. The text of these guidelines does not contain

notes or footnotes. Additional information, explanations, and advisory materials are located in the Appendix. Paragraphs marked with an asterisk have related non-mandatory material in the Appendix. In the Appendix, the corresponding paragraph numbers are preceded by an A.

CABO/ANSI A117.1-1992

3 Graphics, Dimensions, Referenced Standards, and Definitions

3.1 Graphic Conventions
Graphic conventions used in the illustrations are shown in Table 3.1. Dimensions that are not marked "minimum," "maximum," or "nominal" are absolute, unless otherwise indicated in the text or captions.

Table 3.1 - Graphic conventions

3.2 Dimensions

All dimensions are subject to conventional industry tolerances. Millimeter equivalents for dimensions 3 in and larger have been rounded off to the nearest multiple of 5.

ANSI Appendix A - Additional Information

This appendix contains additional information that is intended to help the user understand the minimum requirements of the standard or to design or regulate the construction of buildings or facilities for greater accessibility and usability. The subsection numbers correspond to the sections or subsections of the standard to which the material relates and are, therefore, not consecutive (for example, A4.2.1 contains additional information relevant to 4.2.1). Sections in the standard for which additional material appears in this Appendix have been indicated by an asterisk. All figures referenced in this appendix are contained in Appendix B and are designated Fig. BAxxx.

ADA/ANSI/BCMC Requirements - October 13, 1995
01-03721
ADA Title III Requirements
3.4 General Terminology.
comply with. Meet one or more specifications of these guidelines.
if, if... then. Denotes a specification that applies only when the conditions described are present.
may. Denotes an option or alternative.
shall. Denotes a mandatory specification or requirement.
should. Denotes an advisory specification or recommendation.

3.5 Definitions.

Access Aisle. An accessible pedestrian space between elements, such as parking spaces, seating, and desks, that provides clearances appropriate for use of the elements.

Accessible. Describes a site, building, facility, or portion thereof that complies with these guidelines.

Accessible Element. An element specified by these guidelines (for example, telephone, controls, and the like).

Accessible Route. A continuous unobstructed path connecting all accessible elements and spaces of a building or facility. Interior accessible routes may include corridors, floors, ramps, elevators, lifts, and clear floor space at fixtures. Exterior accessible routes may include parking access aisles, curb ramps, crosswalks at vehicular ways, walks, ramps, and lifts.

Accessible Space. Space that complies with these guidelines.

CABO/ANSI A117.1-1992

3.3 Referenced American National Standards

The following American National Standards are referenced in this document.

ANSI/BHMA A156.10-1991, Power Operated Pedestrian Doors

ANSI/BHMA A156.19-1990, Power Assist and Low Energy Power Operated Doors

ASME/ANSI A17.1-1990, Safety Code for Elevators and Escalators (including Addenda ASME/ANSI A17.1a-1991)

3.4 Definitions
For the purpose of this standard, the terms listed in 3.4 have the indicated meaning.

access aisle: An accessible pedestrian space between elements, such as parking spaces, seating, and desks, that provides clearances appropriate for use of the elements.

accessible: Describes a site, building, facility, or portion thereof that complies with this standard and that can be approached, entered, and used by persons with physical disabilities.

accessible route: A path connecting all accessible elements and spaces in a building or facility that is usable by persons with physical disabilities.

Comments*

Not comparable. ADA Standards reference the same or previous versions of these ANSI Standards.

ADA Title III Requirements

Adaptability. The ability of certain building spaces and elements, such as kitchen counters, sinks, and grab bars, to be added or altered so as to accommodate the needs of individuals with or without disabilities or to accommodate the needs of persons with different types or degrees of disability.

Addition. An expansion, extension, or increase in the gross floor area of a building or facility.

Administrative Authority. A governmental agency that adopts or enforces regulations and guidelines for the design, construction, or alteration of buildings and facilities.

Alteration. An alteration is a change to a building or facility made by, on behalf of, or for the use of a public accommodation or commercial facility, that affects or could affect the usability of the building or facility or part thereof. Alterations include, but are not limited to, remodeling, renovation, rehabilitation, reconstruction, historic restoration, changes or rearrangement of the

structural parts or elements, and changes or rearrangement in the plan configuration of walls and full-height partitions. Normal maintenance, reroofing, painting or wallpapering, or changes to mechanical and electrical systems are not alterations unless they affect the usability of the building or facility.

Area of Rescue Assistance. An area, which has direct access to an exit, where people who are unable to use stairs may remain temporarily in safety to await further instructions or assistance during emergency evacuation.

Assembly Area. A room or space accommodating a group of individuals for recreational, educational, political, social, or amusement purposes, or for the consumption of food and drink.

Automatic Door. A door equipped with a power-operated mechanism and controls that open and close the door automatically upon receipt of a momentary actuating signal. The switch that begins the automatic cycle may be a photoelectric device, floor mat, or manual switch (see power-assisted door).

Building. Any structure used and intended for supporting or sheltering any use or occupancy.

CABO/ANSI A117.1-1992

adaptability: The capability of certain building spaces and elements, such as kitchen counters, sinks, and grab bars, to be altered or added so as to accommodate the needs of persons with and without disabilities, or to accommodate the needs of persons with different types or degrees of disability.
adaptable dwelling unit: An accessible dwelling unit which has been designed for adaptability.
administrative authority: A jurisdictional body that adopts or enforces regulations and standards for the design, construction, or operation of buildings and facilities.
authority having jurisdiction: See administrative authority.
automatic door:* A door operated with power mechanisms and controls.

A3.4 automatic door: The switch that begins the cycle for an automatic door is a photo electric device, floor mat, sensing device, or manual switch mounted on an area near

the door itself (see power assisted door).

BCMC

Area of Refuge - an area with direct access to an exit or an elevator where persons unable to use stairs can remain temporarily in safety to await instructions or assistance during emergency evacuation.

ADA/ANSI/BCMC Requirements - October 13, 1995

01-03723

ADA Title III Requirements

Circulation Path. An exterior or interior way of passage from one place to another for pedestrians, including, but not limited to, walks, hallways, courtyards, stairways, and stair landings.

Clear. Unobstructed.

Clear Floor Space. The minimum unobstructed floor or ground space required to accommodate a single, stationary wheelchair and occupant.

Closed Circuit Telephone. A telephone with dedicated line(s) such as a house phone, courtesy phone or phone that must be used to gain entrance to a facility.

Commercial Facilities. (28 C.F.R. § 36.104). Commercial

facilities means facilities --
(1) Whose operations will affect commerce;
(2) That are intended for nonresidential use by a private entity; and
(3) That are not -

(i) Facilities that are not covered or expressly exempted from coverage under the Fair Housing Act of 1968, as amended (42 U.S.C. 3601-3631);
(ii) Aircraft; or
(iii) Railroad locomotives, railroad freight cars, railroad cabooses, commuter or intercity passenger rail cars (including coaches, dining cars, sleeping cars, lounge cars, and food service cars), and any other railroad cars described in section 242 of the Act or covered under title II of the Act, or railroad rights-of-way. For purposes of this definition, "rail" and "railroad" have the meaning given the term "railroad" in section 202(e) of the Federal Railroad Safety Act of 1970 (45 U.S.C. 431(e)).

Commercial facilities located in private residences. (28 C.F.R.
§ 36.401(b)).
(1) When a commercial facility is located in a private residence, the portion of the residence used exclusively as a residence is not covered by this subpart, but that portion used both for the commercial facility and for residential purposes is covered by the new construction and alterations requirements of this subpart.
(2) The portion of the residence covered under paragraph (b)(1) of this section extends to those elements used to enter the commercial facility, including the homeowner's front sidewalk, if any, the door or entryway, and hallways; and those portions of the residence, interior or exterior, available to or used by employees or visitors of the commercial facility, including restrooms.

CABO/ANSI A117.1-1992
circulation path:* An exterior or interior way of passage from one place to another for pedestrians.
A3.4 circulation path: Examples include walks, hallways, courtyards, stairways, and stair landings.
clear: Unobstructed.
See ANSI 4.2.4.

ADA/ANSI/BCMC Requirements - October 13, 1995

01-03724

ADA Title III Requirements

Common Use. Refers to those interior and exterior rooms, spaces, or elements that are made available for the use of a restricted group of people (for example, occupants of a homeless shelter, the occupants of an office building, or the guests of such occupants).

Cross Slope. The slope that is perpendicular to the

direction of travel (see running slope).

Curb Ramp. A short ramp cutting through a curb or built up to it.

Detectable Warning. A standardized surface feature built in or applied to walking surfaces or other elements to warn visually impaired people of hazards on a circulation path.

Disability. (28 C.F.R. § 36.104). Disability means, with respect to an individual, a physical or mental impairment that substantially limits one or more of the major life activities of such individual; a record of such an impairment; or being regarded as having such an impairment.

Dwelling Unit. A single unit which provides a kitchen or food preparation area, in addition to rooms and spaces for living, bathing, sleeping, and the like. Dwelling units include a single family home or a townhouse used as a transient group home; an apartment building used as a shelter; guestrooms in a hotel that provide sleeping accommodations and food preparation areas; and other similar facilities used on a transient basis. For purposes of these guidelines, use of the term "Dwelling Unit" does not imply the unit is used as a residence.

CABO/ANSI A117.1-1992

common use:* Those rooms, spaces, or elements that are made available for use of a specific group of people.

A3.4 common use: These are the spaces and elements that are made available for the use of residents of an apartment building, the occupants of an office building, or the guests of such residents or occupants.

counter slope: Any slope opposing the running slope of a curb ramp or ramp.

cross slope: The slope of a pedestrian way that is perpendicular to the direction of travel (see running slope).

curb ramp: A short ramp cutting through a curb or built up to it.
detectable: Perceptible by one or more of the senses.

See 1.1 Purpose.

dwelling unit:* A single unit of residence that provides a kitchen or food preparation area, in addition to rooms and spaces for living, bathing, sleeping, and the like.

A3.4 dwelling unit: A single-family home is a dwelling unit, and dwelling units are to be found in such housing types as townhouses and apartment buildings.

BCMC

See 1.2.

Comments*

E.

N.C.

E.

E.

P.N.E. ADA's only use of this word is in the phrase "detectable warning" where it is addressing the needs of only visually impaired persons. Therefore, this definition should include only senses other than sight.

N.E.

ANSI E. Although different, for purposes of building design the definition does not reduce access (see also "Person with a Disability").

BCMC N.E. BCMC is too narrow.

P.N.E. The difference in these definitions relates to the lack of special technical provisions for transient lodging. See ADA Standards 9.0.

01-03725

Egress, Means of. A continuous and unobstructed way of exit travel from any point in a building or facility to a public way. A means of egress comprises vertical and horizontal travel and may include intervening room spaces, doorways, hallways, corridors, passageways, balconies, ramps, stairs, enclosures, lobbies, horizontal exits, courts and yards. An accessible means of egress is one that complies with these guidelines and does not include stairs, steps, or escalators. Areas of rescue assistance or evacuation elevators may be included as part of accessible means of egress.

Element. An architectural or mechanical component of a building, facility, space, or site, e.g., telephone, curb ramp, door, drinking fountain, seating, or water closet.

Entrance. Any access point to a building or portion of a building or facility used for the purpose of entering. An entrance includes the approach walk, the vertical access leading to the entrance platform, the entrance platform itself, vestibules if provided, the entry door(s) or gate(s), and the hardware of the entry door(s) or gate(s).

Facility. All or any portion of buildings, structures, site improvements, complexes, equipment, roads, walks, passageways, parking lots, or other real or personal property located on a site.

Ground Floor. Any occupiable floor less than one story above or below grade with direct access to grade. A building or facility always has at least one ground floor and may have more than one ground floor as where a split level entrance has been provided or where a building is built into a hillside.

Marked Crossing. A crosswalk or other identified path intended for pedestrian use in crossing a vehicular way.

CABO/ANSI A117.1-1992

egress, means of: A continuous and unobstructed way of travel from any point in a building or facility to a public way.

element:* An architectural or mechanical component of a building, facility, space or site that is used in making spaces accessible.

A3.4 element: Examples of elements are telephones, curb ramps, doors, drinking fountains, seating, and water closets.

facility: All or any portion of a building, structure, or area, including the site on which such building, structure, or area is located, wherein specific services are provided or activities are performed.

housing:* A building, facility, or portion thereof, that contains one or more dwelling units or sleeping accommodations, excluding inpatient health care facilities and detention/correctional facilities.

A3.4 housing: Examples are one- and two-family dwellings, multifamily dwellings, group homes, hotels, motels, dormitories, and mobile homes.

marked crossing: A crosswalk or other identified path intended for pedestrian use in crossing a vehicular way.

BCMC

2.1 Accessible Means of Egress - a path of travel, usable by a mobility impaired person, that leads to a public way.

Comments*

ANSI E. Note: Although the definition in ANSI does not address accessible means of egress, the standard, in general, does.

BCMC N.E. Access is limited to "mobility impaired persons."

E. Assuming "used in making spaces accessible" means "affecting accessibility."

P.N.E. Without a definition, "entrance" may be interpreted narrowly to not require accessibility of all elements covered by the ADA.

P.N.E. It is unclear how limiting "wherein specific services..." is intended to be.

Maximum Extent Feasible. (28 C.F.R. § 36.402(c)). The phrase, "to the maximum extent feasible," as used in this section, applies to the occasional case where the nature of an existing facility makes it virtually impossible to comply fully with applicable accessibility standards through a planned alteration. In these circumstances, the alteration shall provide the maximum physical accessibility feasible. Any altered features of the facility that can be made accessible shall be made accessible. If providing accessibility in conformance with this section to individuals with certain disabilities (e.g., those who use wheelchairs) would not be feasible, the facility shall be made accessible to persons with other types of disabilities (e.g., those who use crutches, those who have impaired vision or hearing, or those who have other impairments).

Mezzanine or Mezzanine Floor. That portion of a story which is an intermediate floor level placed within the story and having occupiable space above and below its floor.

Multifamily Dwelling. Any building containing more than two dwelling units.

Occupiable. A room or enclosed space designed for human occupancy in which individuals congregate for amusement, educational or similar purposes, or in which occupants are engaged at labor, and which is equipped with means of egress, light, and ventilation.

Operable Part. A part of a piece of equipment or appliance used to insert or withdraw objects, or to activate, deactivate, or adjust the equipment or appliance (for example, coin slot, pushbutton, handle).

Path of Travel. (28 C.F.R. S 36.403(e)).

(1) A "path of travel" includes a continuous, unobstructed way of pedestrian passage by means of

which the altered area may be approached, entered, and exited, and which connects the altered area with an exterior approach (including sidewalks, streets, and parking areas or an entrance to the facility, and other parts of the facility

(2) An accessible path of travel may consist of walks and sidewalks, curb ramps and other interior or exterior pedestrian ramps; clear floor paths through lobbies, corridors, rooms, and other improved areas; parking access aisles; elevators and lifts; or a combination of these elements.

(3) For the purposes of this part, the term "path of travel" also includes the restrooms, telephones, and drinking fountains serving the altered area.

CABO/ANSI A117.1-1992

multifamily dwelling: Any building containing more than two dwelling units.
operable part:* A part of a piece of equipment or appliance used to insert or withdraw objects, or to activate, deactivate, or adjust the equipment or appliance.

A3.4 operable part: Examples of operable parts are telephone coin slots, push buttons, and handles.

ADA Title III Requirements
Person with a Disability. (28 C.F.R. S 36.104). Disability means, with respect to an individual, a physical or mental impairment that substantially limits one or more of the major life activities of such individual; a record of such an impairment; or being regarded as having such an impairment.

Place of Public Accommodation. (28 C.F.R. § 36.104). Place of public accommodation means a facility, operated by a private entity, whose operations affect commerce and fall within at least one of the following categories -

(1) An inn, hotel, motel, or other place of lodging, except for an establishment located within a building that contains not more than five rooms for rent or hire and that is actually occupied by the proprietor of the establishment as the residence of the proprietor;
(2) A restaurant, bar, or other establishment serving food or drink;
(3) A motion picture house, theater, concert hall, stadium, or other place of exhibition or entertainment;
(4) An auditorium, convention center, lecture hall, or other place of public gathering;
(5) A bakery, grocery store, clothing store, hardware store, shopping center, or other sales or rental establishment;
(6) A laundromat, dry-cleaner, bank, barber shop, beauty shop, travel service, shoe repair service, funeral parlor, gas station, office of an accountant or lawyer, pharmacy, insurance office, professional office of a health care provider, hospital, or other service establishment;

(7) A terminal, depot, or other station used for specified public transportation;

(8) A museum, library, gallery, or other place of public display or collection;

(9) A park, zoo, amusement park, or other place of recreation;

(10) A nursery, elementary, secondary, undergraduate, or postgraduate private school, or other place of education;

(11) A day care center, senior citizen center, homeless shelter, food bank, adoption agency, or other social service center establishment; and

(12) A gymnasium, health spa, bowling alley, golf course, or other place of exercise or recreation.

CABO/ANSI A117.1-1992

parking space:* Any space for parking vehicles.
A3.4 parking space: This includes parking spaces that are located in parking garages, on streets and in lots.
See 1.1 Purpose.

BCMC
See 1.2.

Comments*
N.C.
ANSI E. ANSI's coverage is limited to "physical disabilities." However, the list of examples is sufficiently broad to cover those disabilities significantly affected by building design.
BCMC N.E. BCMC's coverage is limited to "physical disabilities" and its list of examples does not provide sufficient coverage.
Not addressed. BCMC coverage does not depend on public accommodation.

Power-assisted Door. A door used for human passage with a mechanism that helps to open the door, or relieves the opening resistance of a door, upon the activation of a switch or a continued force applied to the door itself.

Primary Function. (28 C.F.R. S 36.403(b)). A "primary function" is a major activity for which the facility is intended. Areas that contain a primary function include, but are not limited to, offices and other work areas in which the activities of the public accommodation or other private entity using the facility are carried out. Mechanical rooms, boiler rooms, supply storage rooms, employee lounges or locker rooms, janitorial closets, entrances, corridors, and restrooms are not areas containing a primary function.

Professional Office of a Health Care Provider. (28 C.F.R. S 36.401(d)(i)). A location where a person or entity, regulated by a State to provide professional services related to the physical or mental health of an individual, makes such services available to the public. The facility housing the "professional office of a health care provider"

only includes floor levels housing at least one health care provider, or any floor level designed or intended for use by at least one health care provider.

Public Use. Describes interior or exterior rooms or spaces that are made available to the general public. Public use may be provided at a building or facility that is privately or publicly owned.

Ramp. A walking surface which has a running slope greater than 1:20.

Running Slope. The slope that is parallel to the direction of travel (see cross slope).
Service Entrance. An entrance intended primarily for delivery of goods or services.

Signage. Displayed verbal, symbolic, tactile, and pictorial information.

Site. A parcel of land bounded by a property line or a designated portion of a public right-of-way.

Site Improvement. Landscaping, paving for pedestrian and vehicular ways, outdoor lighting, recreational facilities, and the like, added to a site.

CABO/ANSI A117.1-1992

power-assisted door:* A door used for human passage, with a mechanism that helps to open the door, or to relieve the opening resistance of the door.
A3.4 power-assisted door: The power assist is provided upon the activation of a switch or the use of continued force applied to the door itself. If the switch or door is released, such doors immediately begin to close or close completely within 3 to 30 seconds (see automatic door).
Primary Function is a major function for which the facility is intended.
public use:* Describes rooms or spaces that are made available to the general public.
A3.4 public use: Public use is often provided at a building or facility that is privately or publicly owned.
ramp: A walking surface that has a running slope steeper than 1:20.
running slope: The slope of a pedestrian way that is parallel to the direction of travel (see cross slope).

signage: Displayed textual, symbolic, tactile and pictorial information.
site: A parcel of land bounded by a property line or a designated portion of a public right-of-way.
site improvements:* Features added to a site.
A3.4 site improvements: This includes features such as landscaping, pedestrian and vehicular pathways, outdoor lighting, and recreational facilities.

ADA Title III Requirements
Sleeping Accommodations. Rooms in which people sleep; for example, dormitory and hotel or motel guest rooms or suites.
Space. A definable area, e.g., room, toilet room, hall, assembly area, entrance, storage room, alcove, courtyard, or lobby.
Specified Public Transportation. (28 C.F.R. S 36.104). Transportation by bus, rail, or any other conveyance (other than by aircraft) that provides the general public with general or special service (including charter service) on a regular and continuing basis.
Story. That portion of a building included between the upper surface of a floor and upper surface of the floor or roof next above. If such portion of a building does not include occupiable space, it is not considered a story for

purposes of these guidelines. There may be more than one floor level within a story as in the case of a mezzanine or mezzanines.
Structural Frame. The structural frame shall be considered to be the columns and the girders, beams, trusses and spandrels having direct connections to the columns and all other members which are essential to the stability of the building as a whole.
Tactile. Describes an object that can be perceived using the sense of touch.
ILLEGIBLE Telephone. Machinery or equipment that employs interactive graphic (i.e., typed) communications through the transmission of coded signals across the standard telephone network. Text telephones can include, for example, devices known as TDDs (telecommunication display devices or telecommunication devices for deaf persons) or computers.

CABO/ANSI A117.1-1992

sleeping accommodations:* Rooms intended for sleeping purposes.
A3.4 sleeping accommodations: Dormitories and hotel or motel guest rooms are examples.
tactile: Describes an object that can be perceived using the sense of touch.
temporary:* Applies to facilities that are not of permanent construction but are extensively used or essential for public use for a given (short) period of time.
A 3.4 temporary: Examples are temporary classrooms or classroom buildings at schools and colleges. Other examples are movable facilities at the perimeter of a major construction site to permit accessible and safe passage past the site. Structures directly associated with the actual processes of major construction, such as portable toilets, scaffolding, rigging, and trailers are not included.
telecommunications device for the deaf (TDD):* Machinery or equipment that employs interactive graphic communications through the transmission of coded signals across the standard telephone network.
A3.4 telecommunications device for the deaf (TDD): TDD's include telecommunications display devices, telecommunication devices for deaf persons, text telephones or computers.

ADA Title III Requirements

Transient Lodging. A building, facility, or portion thereof, excluding inpatient medical care facilities, that contains one or more dwelling units or sleeping accommodations. Transient lodging may include, but is not limited to, resorts, group homes, hotels, motels, and dormitories (see Place of Public Accommodation).

Vehicular Way. A route intended for vehicular traffic, such

as a street, driveway, or parking lot.
Walk. An exterior pathway with a prepared surface intended for pedestrian use, including general pedestrian areas such as plazas and courts.
4 ACCESSIBLE ELEMENTS AND SPACES: SCOPE AND TECHNICAL REQUIREMENTS
4.1 Minimum Requirements
4.1.1* Application.
(1) General. All areas of newly designed or newly constructed buildings and facilities required to be accessible by 4.1.2 and 4.1.3 and altered portions of existing buildings and facilities required to be accessible by 4.1.6 shall comply with these guidelines, 4.1 through 4.35, unless otherwise provided in this section or as modified in a special application section.

CABO/ANSI A117.1-1992

vehicular way:* A route provided for vehicular traffic.
A3.4 vehicular way: Examples are streets, driveways, and parking lots.
walk:* An exterior pathway with a prepared surface for pedestrian use.
A3.4 walk: This includes general pedestrian areas such as plazas and courts.
4 Accessible Elements and Spaces
4.1 Basic Components
Accessible sites, facilities, and buildings, including public-use, employee-use, and common-use spaces in housing facilities, shall, where required, provide accessible elements and spaces conforming with Section 4.
1.2 Application
Provisions of this standard are suitable for:
- the design and construction of new buildings and facilities, including both spaces and elements, site improvements, and public walks
- remodeling, alteration, and rehabilitation of existing construction
- permanent, temporary, and emergency conditions

BCMC

2.2 The following additional terms are defined in CABO/ANSI A117.1. Where these terms are used in this report, such terms shall have the meaning ascribed to them in CABO/ANSI A117.1.
accessible accessible route adaptability
detectable detectable warning dwelling unit
element facility site
1.0 SCOPE
1.1 All buildings and structures, including their associated sites and facilities, shall be accessible with accessible

means of egress for people with physical disabilities as required in these provisions.

EXCEPTIONS:

1. Areas where work cannot reasonably be performed by persons having a severe impairment (mobility, sight or hearing) are not required to have the specific features providing accessibility to such persons.

2. Group R3 buildings and accessory structures and their associated site facilities.

3. Group U structures.

EXCEPTIONS:

1. In Group U agricultural buildings, access is required to paved work areas and areas open to the general public.

2. Access is required to private garages or carports which contain accessible parking.

4. Temporary structures, sites, and equipment directly associated with the construction process such as construction site trailers, scaffolding, bridging or material hoists.

5. Buildings and facilities or portions thereof not required to be accessible in 3.0, 4.0, 5.0 and 6.0.

Comments*

N.E. Needs to be addressed. Also, needs to be distinguished from traditional code categories.

E.

E.

See above.

General provision - E.

Exception 1 - N.E. See ADA Standards 4.1.1(3) for analogous provision.

Exception 2 - N.E. to the extent R3 includes transient lodging.

Exception 3 - E.

Exception 4 - E.

Exception 5 - P.N.E.

ADA Title III Requirements

4.1.1 (2) Application Based on Building Use. Special application sections 5 through 10 provide additional requirements for restaurants and cafeterias, medical care facilities, business and mercantile, libraries, accessible transient lodging, and transportation facilities. When a building or facility contains more than one use covered by a special application section, each portion shall comply with the requirements for that use.

4.1.1 (3)* Areas Used Only by Employees as Work Areas. Areas that are used only as work areas shall be designed and constructed so that individuals with disabilities can approach, enter, and exit the areas. These guidelines do not require that any areas used only as work areas be constructed to permit maneuvering within the work area or be constructed or equipped (i.e., with racks or shelves) to be accessible.

4.1.1 (4) Temporary Structures. These guidelines cover temporary buildings or facilities as well as permanent facilities. Temporary buildings and facilities are not of permanent construction but are extensively used or are essential for public use for a period of time. Examples of temporary buildings or facilities covered by these guidelines include, but are not limited to: reviewing stands, temporary classrooms, bleacher areas, exhibit areas, temporary banking facilities, temporary health screening services, or temporary safe pedestrian passageways around a construction site. Structures, sites and equipment directly associated with the actual processes of construction, such as scaffolding, bridging, materials hoists, or construction trailers are not included.

4.1.1 (5) General Exceptions.

(a) In new construction, a person or entity is not required to meet fully the requirements of these guidelines where that person or entity can demonstrate that it is structurally impracticable to do so. Full compliance will be considered structurally impracticable only in those rare circumstances when the unique characteristics of terrain prevent the incorporation of accessibility features. If full compliance with the requirements of these guidelines is structurally impracticable, a person or entity shall comply with the requirements to the extent it is not structurally impracticable. Any portion of the building or facility which can be made accessible shall comply to the extent that it is not structurally impracticable.

CABO/ANSI A117.1-1992

1.2 Application

Provisions of this standard are suitable for: ...

- permanent, temporary, and emergency conditions
A3.4 temporary: Examples are temporary classrooms or classroom buildings at schools and colleges. Other examples are movable facilities at the perimeter of a major construction site to permit accessible and safe passage past the site. Structures directly associated with the actual processes of major construction, such as portable toilets, scaffolding, rigging, and trailers are not included.
temporary:* Applies to facilities that are not of permanent construction but are extensively used or essential for public use for a given (short) period of time.

BCMC

5.0 SPECIAL OCCUPANCY REQUIREMENTS
5.1 General
In addition to the general provisions herein, the following requirements for specific occupancies shall apply.
1.1 EXCEPTIONS:
1. Areas where work cannot reasonably be performed by persons having a severe impairment (mobility, sight or hearing) are not required to have the specific features providing accessibility to such persons.
3. Group U structures.
EXCEPTIONS:
1. In group U agricultural buildings, access is required to paved work areas and areas open to the general public.
2. Access is required to private garages or carports which contain accessible parking.
1.1 EXCEPTIONS:
4. Temporary structures, sites, and equipment directly associated with the construction process such as construction site trailers, scaffolding, bridging or material hoists.

Comments*

See discussion at special application sections. See also BCMC 1.1, Exception 2 (N.E. - exempts Group R3 buildings from accessibility requirements).
Exception 1 - N.E. Building official is not qualified to make employment decision. ADA does not permit such an exception.
E.
Exceeds in that BCMC does not provide such a general exception. BCMC's specific exceptions are N.E. (see above).

ADA Title III Requirements

28 C.F.R. S 36.401(c)(3). If providing accessibility in conformance with this section to individuals with certain disabilities (e.g., those who use wheelchairs) would be structurally impracticable, accessibility shall nonetheless be ensured to persons with other types of disabilities (e.g., those who use crutches or who have sight, hearing, or mental impairments) in accordance with this section.

4.1.1 (5) (b) Accessibility is not required to (i) observation galleries used primarily for security purposes; or (ii) in non-occupiable spaces accessed only by ladders, catwalks, crawl spaces, very narrow passageways, or freight (non-passenger) elevators, and frequented only by service personnel for repair purposes; such spaces include, but are not limited to, elevator pits, elevator penthouses, piping or equipment catwalks.

4.1.2 Accessible Sites and Exterior Facilities: New Construction. An accessible site shall meet the following minimum requirements:

(1) At least one accessible route complying with 4.3 shall be provided within the boundary of the site from public transportation stops, accessible parking spaces, passenger loading zones if provided, and public streets or sidewalks, to an accessible building entrance.

(2) At least one accessible route complying with 4.3 shall connect accessible buildings, accessible facilities, accessible elements, and accessible spaces that are on the same site.

4.1.2 (3) All objects that protrude from surfaces or posts into circulation paths shall comply with 4.4.

4.1.2 (4) Ground surfaces along accessible routes and in accessible spaces shall comply with 4.5.

CABO/ANSI A117.1-1992

4. Accessible Elements and Spaces

4.1 Basic Components

Accessible sites, facilities, and buildings, including public-use, employee-use, and common-use spaces in housing facilities, shall, where required, provide accessible elements and spaces conforming with Section 4.

BCMC

3.1 Accessible Route
3.1.1 Accessible routes within the site shall be provided from public transportation stops, accessible parking and accessible passenger loading zones, and public streets or sidewalks to the accessible building entrance they serve.
3.1.2 At least one accessible route shall connect accessible spaces, elements, facilities and buildings that are on the same site. Where only one accessible route is provided, it shall not pass through kitchens, storage rooms, restrooms, closets or similar spaces.
3.1.3 Where floor levels are required to be connected by an accessible route, and an interior path of travel is provided between the levels, the accessible route between the levels shall also be interior.
14.0 PROTRUDING OBJECTS
14.1 Horizontal Projections. Objects projecting from walls with their leading edges located more than 27 and not more than 80 inches above the finished floor shall protrude no more than 4 inches into walks, corridors, passageways, or aisles. Free-standing objects mounted on posts or pylons may overhang 12 inches maximum where located more than 27 and not more than 80 inches above the ground or finished floor.
14.2 Headroom. There shall be a minimum headroom of 6 ft 8 inches from the walking surface to the lowest part of any structural member, fixture or furnishing.

Comments*

Not addressed.

Exceeds if lack of an exception means usual accessibility standards apply to non-occupiable space.

3.1.1 & 3.1.2 - E.

3.1.3 - Exceeds.

E.

P.N.E. Neither ANSI nor BCMC scopes this requirement. However, ANSI 4.5.1 reaches the same result.

ADA Title III Requirements

4.1.2 (5) (a) If parking spaces are provided for self-parking by employees or visitors, or both, then accessible spaces complying with 4.6 shall be provided in each such parking area in conformance with the table below. Spaces required by the table need not be provided in the particular lot. They may be provided in a different location if equivalent or greater accessibility in terms of distance from an accessible entrance, cost and convenience is ensured.

Total Parking in Lot	Required Minimum Number of Accessible Spaces
1 to 25	1
26 to 50	2
51 to 75	3
76 to 100	4
101 to 150	5
151 to 200	6
201 to 300	7
301 to 400	8
401 to 500	9
501 to 1000	2 percent of total
1001 and over	20, plus 1 for each 100 over 1000

Except as provided in (b), access aisles adjacent to accessible spaces shall be 60 in (1525 mm) wide minimum.

4.1.2 (5) (b) One in every eight accessible spaces, but not less than one, shall be served by an access aisle 96 in (2440 mm) wide minimum and shall be designated "van accessible" as required by 4.6.4. The vertical clearance at such spaces shall comply with 4.6.5. All such spaces may be grouped on one level of a parking structure.

EXCEPTION: Provision of all required parking spaces in conformance with "Universal Parking Design" (see appendix A4.6.3) is permitted.

4.1.2 (5) (c) If passenger loading zones are provided, then at least one passenger loading zone shall comply with 4.6.6.

CABO/ANSI A117.1-1992

BCMC

3.2 Parking Facilities

3.2.1 Number of Accessible Parking Spaces

3.2.1.1 Two percent of parking spaces provided for R2 apartments occupancies required to have accessible/adaptable dwelling units shall be accessible. Where parking is provided within or beneath a building, accessible parking spaces shall also be provided within or beneath the building.

3.2.1.3 In occupancies not included in 3.2.1.1 and 3.2.1.2, accessible spaces shall be provided in conformance with Table 3.2.

TABLE 3.2

Total Parking Spaces Provided	Required Minimum Number of Accessible Spaces
1 to 5	1*
6 to 25	1
26 to 50	2
51 to 75	3
76 to 100	4
101 to 150	5
151 to 200	6
201 to 300	7
301 to 400	8
401 to 500	9
501 to 1000	2% of total
more than 1000	20, plus 1 for each 100 over 1000

* The accessible space shall be provided but need not be designated as reserved for physically disabled. See 7.0.

3.2.1.4 For every eight or fraction of eight accessible parking spaces, at least one shall be a van accessible parking space.

Comments*

N.E. regarding designation and reservation of accessible space in lots with 5 or fewer spaces.

E. Lack of exception does not affect accessibility adversely.

N.E. No scoping provided by ANSI or BCMC.

01-03734

ADA Title III Requirements

4.1.2 (5) (d) At facilities providing medical care and other services for persons with mobility impairments, parking spaces complying with 4.6 shall be provided in accordance with 4.1.2(5)(a) except as follows:

(i) Outpatient units and facilities: 10 percent of the total number of parking spaces provided serving each such outpatient unit or facility;

(ii) Units and facilities that specialize in treatment or services for persons with mobility impairments: 20 percent of the total number of parking spaces provided serving each such unit or facility.

4.1.2 (5) (e)* Valet parking: Valet parking facilities shall provide a passenger loading zone complying with 4.6.6 located on an accessible route to the entrance of the facility. Paragraphs 5(a), 5(b), and 5(d) of this section do not apply to valet parking facilities.

4.1.2 (6) If toilet facilities are provided on a site, then each such public or common use toilet facility shall comply with 4.22. If bathing facilities are provided on a site, then each such public or common use bathing facility shall comply with 4.23.

For single user portable toilet or bathing units clustered at a single location, at least 5% but no less than one toilet

unit or bathing unit complying with 4.22 or 4.23 shall be installed at each cluster whenever typical inaccessible units are provided. Accessible units shall be identified by the International Symbol of Accessibility.
EXCEPTION: Portable toilet units at construction sites used exclusively by construction personnel are not required to comply with 4.1.2(6).

CABO/ANSI A117.1-1992

BCMC

3.2.1.2 Ten percent of parking spaces provided for medical outpatient facilities shall be accessible. Twenty percent of parking spaces provided for medical facilities that specialize in treatment or services for persons with mobility impairments shall be accessible.
6.1 Toilet and Bathing Facilities
6.1.1 Toilet rooms and bathing facilities shall be accessible. At least one of each type fixture or element in each accessible toilet room and bathing facility shall be accessible.
EXCEPTIONS:
1. A toilet room or bathing facility for a single occupant and not for common or public use shall be permitted to be adaptable.
2. Dwelling units, guest rooms and patient toilet rooms, unless required by 5.0 to be accessible or adaptable.

Comments*

E.

E. No exemption - accessible spaces required at valet parking. But no requirement for passenger loading zone. Still considered equivalent because self-parking standards would be applicable in all new construction, even if building owner later decided to do valet parking.

P.N.E. Portable toilets not addressed (because not "code" issue) per se. Since temporary structures, other than those associated with construction, are covered, perhaps all portable toilets at a site would have to be accessible. (Section 7.1 seems to assume they are required to be accessible).

ADA Title III Requirements

4.1.2 (7) Building Signage. Signs which designate permanent rooms and spaces shall comply with 4.30.1, 4.30.4, 4.30.5 and 4.30.6. Other signs which provide direction to, or information about, functional spaces of the building shall comply with 4.30.1, 4.30.2, 4.30.3, and 4.30.5. Elements and spaces of accessible facilities which shall be identified by the International Symbol of Accessibility and which shall comply with 4.30.7 are:

(a) Parking spaces designated as reserved for individuals with disabilities;

(b) Accessible passenger loading zones;

(c) Accessible entrances when not all are accessible (inaccessible entrances shall have directional signage to indicate the route to the nearest accessible entrance);

(d) Accessible toilet and bathing facilities when not all are

accessible.
4.1.3 Accessible Buildings: New Construction. Accessible buildings and facilities shall meet the following minimum requirements:
(1) At least one accessible route complying with 4.3 shall connect accessible building or facility entrances with all accessible spaces and elements within the building or facility.
4.1.3 (2) All objects that overhang or protrude into circulation paths shall comply with 4.4.
4.1.3 (3) Ground and floor surfaces along accessible routes and in accessible rooms and spaces shall comply with 4.5.
4.1.3 (4) Interior and exterior stairs connecting levels that are not connected by an elevator, ramp, or other accessible means of vertical access shall comply with 4.9.

CABO/ANSI A117.1-1992

4. Accessible Elements and Spaces
4.1 Basic Components
Accessible sites, facilities, and buildings, including public-use, employee-use, and common-use spaces in housing facilities, shall, where required, provide accessible elements and spaces conforming with Section 4.

BCMC

7.0 SIGNS
7.1 Required accessible elements shall be identified by the International Symbol of Accessibility at the following locations:
1. Accessible parking spaces required by 3.2.1, except where the total parking spaces provided are five or less.
2. Accessible passenger loading zones.
3. Accessible areas of refuge. See 9.6.
4. Accessible portable toilet and bathing units.
7.2 Inaccessible building entrances, inaccessible public toilets and bathing facilities and elevators not serving an accessible route shall be provided with directional signage indicating the route to the nearest like accessible element.
3.1.2 At least one accessible route shall connect accessible spaces, elements, facilities and buildings that are on the same site. Where only one accessible route is provided, it shall not pass through kitchens, storage rooms, restrooms, closets or similar spaces.
EXCEPTIONS:
1. A single accessible route shall be permitted to pass through a kitchen or storage room in an accessible or adaptable dwelling unit.
2. In other than the offices of health care providers, transportation facilities and airports, and multitenant Group

M occupancies, floors that are above and below accessible levels, and that have an aggregate area of not more than 3000 square feet, and an aggregate occupant load of not more than 50, need not be served by an accessible route from an accessible level.
14.1 Horizontal Projections. Objects projecting from walls with their leading edges located more than 27 and not more than 80 inches above the finished floor shall protrude no more than 4 inches into walks, corridors, passageways, or aisles. Free-standing objects mounted on posts or pylons may overhang 12 inches maximum where located more than 27 and not more than 80 inches above the ground or finished floor.
14.2 Headroom. There shall be a minimum headroom of 6 ft 8 inches from the walking surface to the lowest part of any structural member, fixture or furnishing.

Comments*

7.1 - 1. N.E. because of lack of parking designation where total number is less than 5.
3. N.E. Leaves out accessible entrances.
4. N.E. Only addresses portable toilets.
7.2 - N.E. No scoping provided for room signage. Requirement for directional signage is unclear regarding what the technical standard is (ANSI 4.28).
E. (elevator exception addressed separately below).
E. for scoping (see technical discussion at S 4.4).
N.E. Not addressed.
N.E. BCMC does not address because "mainstreamed" into building codes.

ADA Title III Requirements

4.1.3 (5)* One passenger elevator complying with 4.10 shall serve each level, including mezzanines, in all multi-story buildings and facilities unless exempted below. If more than one elevator is provided, each full passenger elevator shall comply with 4.10.
4.1.3 (5) EXCEPTION 1: Elevators are not required in facilities that are less than three stories or that have less

than 3000 square feet per story unless the building is a shopping center, a shopping mall, or the professional office of a health care provider, or [a terminal, depot, or other station used for specified public transportation, or an airport passenger terminal. In such a facility, any area housing passenger services, including boarding and debarking loading and unloading baggage claim, dining facilities, and other common areas open to the public, must be on an accessible route from an accessible entrance (28 C.F.R. S 36.401(d)(2)(ii))].

The elevator exemption set forth in this paragraph does not obviate or limit in any way the obligation to comply with the other accessibility requirements established in section 4.1.3. For example, floors above or below the accessible ground floor must meet the requirements of this section except for elevator service. If toilet or bathing facilities are provided on a level not served by an elevator, then toilet or bathing facilities must be provided on the accessible ground floor. In new construction if a building or facility is eligible for this exemption but a full passenger elevator is nonetheless planned, that elevator shall meet the requirements of 4.10 and shall serve each level in the building. A full passenger elevator that provides service from a garage to only one level of a building or facility is not required to serve other levels.

CABO/ANSI A117.1-1992

BCMC

3.1.2 At least one accessible route shall connect accessible spaces, elements, facilities and buildings that are on the same site.

6.2.1 All passenger elevators on an accessible route shall be accessible.

EXCEPTION: Elevators within a dwelling unit.

18.0 Elevators

Passenger elevators shall comply with ASME/ANSI A17.1 and CABO/ANSI A117.1 (4.10).

3.1.2 EXCEPTION:

2. In other than the offices of health care providers, transportation facilities and airports, and multitenant Group M occupancies, floors that are above and below accessible levels, and that have an aggregate area of not more than 3000 square feet, and an aggregate occupant load of not more than 50, need not be served by an accessible route from an accessible level.

Comments*

3.1.2 - P.N.E. This may be acceptable if all levels and mezzanines in a building are

required to be accessible. If they are not, then BCMC would not require elevator service.
6.2.1 - P.N.E. Does not require elevator service to each level. May be misconstrued to suggest that elevators in a separate bank that is not accessible may be newly constructed as inaccessible. ADA requires all new elevators to be accessible, regardless of whether they are on an accessible route.
P.N.E. BCMC elevator exemption more stringent in the respect that floor area limit applies to all buildings, even those with fewer than 3 floors, and even floors that meet the floor size limit are only exempt if they have aggregate occupant load of 50 or less. However, it needs to be made clear that all floors must be less than 3000 square feet, not just the inaccessible floors.

ADA Title III Requirements

28 C.F.R. S 36.401(d)(ii). Shopping center or shopping mall means --

(A) A building housing five or more sales or rental establishments; or

(B) A series of buildings on a common site, either under common ownership or common control or developed either as one project or as a series of related projects, housing five or more sales or rental establishments. For purposes of this section, places of public accommodation of the types listed in paragraph (5) of the definition of "place of public accommodation" in section 36.104 are considered sales or rental establishments. The facility housing a "shopping center or shopping mall" only includes floor levels housing at least one sales or rental establishment, or any floor level designed or intended for use by at least one sales or rental establishment.

4.1.3 (5) EXCEPTION 2: Elevator pits, elevator penthouses, mechanical rooms, piping or equipment catwalks are exempted from this requirement.

4.1.3 (5) EXCEPTION 3: Accessible ramps complying with 4.8 may be used in lieu of an elevator.

4.1.3 (5) EXCEPTION 4: Platform lifts (wheelchair lifts) complying with 4.11 of this guideline and applicable state or local codes may be used in lieu of an elevator only under the following conditions:

(a) To provide an accessible route to a performing area in an assembly occupancy.

(b) To comply with the wheelchair viewing position line-of-sight and dispersion requirements of 4.33.3.

(c) To provide access to incidental occupiable spaces and rooms which are not open to the general public and which house no more than five persons, including but not limited to equipment control rooms and projection booths.

(d) To provide access where existing site constraints or other constraints make use of a ramp or an elevator infeasible.

4.1.3 (6) Windows: (Reserved).

CABO/ANSI A117.1-1992

BCMC

6.2.2 Platform (wheelchair) lifts shall not be part of a required accessible route in new construction.

Comments*

Not addressed. Equivalence of BCMC's "multitenant Group M occupancies" provision will depend on building code.

P.N.E. Not addressed as elevator

exemptions.
Exceeds.
20 ADA/ANSI/BCMC Requirements - October 13, 1995
01-03738
ADA Title III Requirements
4.1.3 (7) Doors:
(a) At each accessible entrance to a building or facility, at least one door shall comply with 4.13.
(b) Within a building or facility, at least one door at each accessible space shall comply with 4.13.
(c) Each door that is an element of an accessible route shall comply with 4.13.
(d) Each door required by 4.3.10, Egress, shall comply with 4.13.
4.1.3 (8) In new construction, at a minimum, the requirements in (a) and (b) below shall be satisfied independently:
(a) (i) At least 50% of all public entrances (excluding those in (b) below) must be accessible. At least one must be a ground floor entrance. Public entrances are any entrances that are not loading or service entrances.
4.1.3 (8) (a) (ii) Accessible entrances must be provided in a number at least equivalent to the number of exits required by the applicable building/fire codes. (This paragraph does not require an increase in the total number of entrances planned for a facility.)
4.1.3 (8) (a) (iii) An accessible entrance must be provided to each tenancy in a facility (for example, individual stores in a strip shopping center).
One entrance may be considered as meeting more than one of the requirements in (a). Where feasible, accessible entrances shall be the entrances used by the majority of people visiting or working in the building.
4.1.3 (8) (b) (i) In addition, if direct access is provided for pedestrians from an enclosed parking garage to the building, at least one direct entrance from the garage to the building must be accessible.
(ii) If access is provided for pedestrians from a pedestrian tunnel or elevated walkway, one entrance to the building from each tunnel or walkway must be accessible.
One entrance may be considered as meeting more than one of the requirements in (b).
Because entrances also serve as emergency exits whose proximity to all parts of buildings and facilities is essential, it is preferable that all entrances be accessible.
CABO/ANSI A117.1-1992
BCMC
15.0 DOORS

15.1 Doorway Width. Doorways shall have a minimum clear width of 32 inches.
EXCEPTIONS:
1. Doorways not required for means of egress in Group R2 and R3 occupancies.
2. Group I3 occupancies.
3. Storage closets less than 10 sq ft in area.
4. Revolving doors.
5. Interior egress doorways within a dwelling unit not required to be adaptable or accessible shall have a minimum clear width of 29 3/4 inches.
4.0 ACCESSIBLE ENTRANCES
4.1 Each building and structure, and each separate tenancy within a building or structure, shall be provided with at least one entrance which complies with the accessible route provisions of CABO/ANSI A117.1. Not less than 50% of the entrances shall be accessible.
EXCEPTION: Loading and service entrances.
4.1 ... and each separate tenancy ...
4.2 When a building or facility has entrances which normally serve accessible parking facilities, transportation facilities, passenger loading zones, taxi stands, public streets and sidewalks, or accessible interior vertical access, then at least one of the entrances serving each such function shall comply with the accessible route provisions of CABO/ANSI A117.1.

Comments*

E. All doors (without limitations) are required to be accessible under BCMC.
EXCEPTIONS:
2. P.N.E. institutional occupancy - access required.
3. P.N.E. when door meant for passage.
4. E.
5. N.E. to the extent this exempts dwelling units in transient lodging.
N.E. BCMC does not require a ground floor entrance.
N.E. Not addressed.
P.E.
N.E. because not fully addressed with regard to tunnels, walkways.

4.1.3 (8) (c) If the only entrance to a building, or tenancy

in a facility, is a service entrance, that entrance shall be accessible.
4.1.3 (8) (d) Entrances which are not accessible shall have directional signage complying with 4.30.1, 4.30.2, 4.30.3 and 4.30.5, which indicates the location of the nearest accessible entrance.
4.1.3 (9)* In buildings or facilities, or portions of buildings or facilities, required to be accessible, accessible means of egress shall be provided in the same number as required for exits by local building/life safety regulations. Where a required exit from an occupiable level above or below a level of accessible exit discharge is not accessible, an area of rescue assistance shall be provided on each such level (in a number equal to that of inaccessible required exits). Areas of rescue assistance shall comply with 4.3.11. A horizontal exit, meeting the requirements of local building/life safety regulations, shall satisfy the requirement for an area of rescue assistance.
EXCEPTION: Areas of rescue assistance are not required in buildings or facilities having a supervised automatic sprinkler system.

CABO/ANSI A117.1-1992
BCMC

7.2 In accessible building entrances, inaccessible public toilets and bathing facilities and elevators not serving an accessible route shall be provided with directional signage indicating the route to the nearest like accessible element.
8.0 ACCESSIBLE MEANS OF EGRESS
8.1 All required accessible spaces shall be provided with not less than one accessible means of egress. Where more than one means of egress is required from any required accessible space, each accessible portion of the space shall be served by not less than two accessible means of egress.
8.2 Each accessible means of egress shall be continuous from each required accessible occupied area to a public way and shall include accessible routes, ramps, exit stairs, elevators, horizontal exits or smoke barriers.
8.2.1 An exit stair to be considered part of an accessible means of egress shall have a clear width of at least 48 inches between handrails and shall either incorporate an area of refuge within an enlarged story-level landing or shall be accessed from either an area of refuge complying with 9.0 or a horizontal exit.
EXCEPTIONS:
1. Exit stairs serving a single dwelling unit or guest room.
2. Exit stairs serving occupancies protected throughout by an approved automatic sprinkler system.

3. The clear width of 48 inches between handrails is not required for exit stairs accessed from a horizontal exit.

Comments*

P.N.E. Not addressed (blanket exemption for service entrances.)

Is a service entrance treated as a public entrance when it is the only entrance provided?

E. for entrances.

8.1 - N.E. "Limit" of two not equivalent, especially in very large facilities where four exits may be required by building/life safety regulations.

8.2 - Allowing exit stairs is problem. "Exit stairs that are part of an area of refuge" or "exit stair complying with 8.2.1" would be better.

8.2.1 - E. Generally. Slightly different in that 48" wide stairs may be part of an accessible means of egress.

01-03740

ADA Title III Requirements
CABO/ANSI A117.1-1992
BCMC

8.2.2 An elevator to be considered part of an accessible means of egress shall comply with the requirements of Section 211 of ASME/ANSI A17.1 and standby power shall be provided. The elevator shall be accessed from either an area of refuge complying with 9.0 or a horizontal exit.

EXCEPTION: Elevators are not required to be accessed by an area of refuge or a horizontal exit in occupancies equipped throughout with an automatic sprinkler system.

8.3 In buildings where a required accessible floor is four or more stories above or below a level of exit discharge serving that floor, at least one elevator shall be provided to comply with 8.2.2 and shall serve as one required accessible means of egress.

EXCEPTION: In fully sprinklered buildings, the elevator shall not be required on floors provided with a horizontal exit and located at or above the level of exit discharge.

8.4 Platform (wheelchair) lifts shall not serve as part of an accessible means of egress.

EXCEPTION: Within a dwelling unit.

9.0 AREAS OF REFUGE

9.1 Every required area of refuge shall be accessible from the space it serves by an accessible means of egress. The maximum travel distance from any accessible space to an area of refuge shall not exceed the travel distance

permitted for the occupancy. Every required area of refuge shall have direct access to an exit complying with 8.2.1 or an elevator complying with 8.2.2. Where an elevator lobby is used as an area of refuge, the elevator shaft and lobby provided to comply with 8.2.2 shall be pressurized to comply with the requirements for smokeproof enclosures, except where elevators are in an area of refuge formed by a horizontal exit or smoke barrier.
EXCEPTION: Areas of refuge are not required in open parking garages.
(9.2 through 9.9 are technical provisions. See ADA Standards/ANSI.)
4.3.9* Egress. Accessible routes serving any accessible space or element shall also serve as a means of egress for emergencies or connect to an accessible area of refuge.

Comments*

E.
E.
E.

23 ADA/ANSI/BCMC Requirements - October 13, 1995
01-03741

ADA Title III Requirements
4.1.3 (10)* Drinking Fountains:
(a) Where only one drinking fountain is provided on a floor there shall be a drinking fountain which is accessible to individuals who use wheelchairs in accordance with 4.15 and one accessible to those who have difficulty bending or stooping. (This can be accommodated by the use of a "hi-lo" fountain; by providing one fountain accessible to those who use wheelchairs and one fountain at a standard height convenient for those who have difficulty bending; by providing a fountain accessible under 4.15 and a water cooler; or by such other means as would achieve the required accessibility for each group on each floor.)
(b) Where more than one drinking fountain or water cooler is provided on a floor, 50% of those provided shall comply with 4.15 and shall be on an accessible route.
4.1.3 (11) Toilet Facilities: If toilet rooms are provided, then each public and common use toilet room shall comply with 4.22. Other toilet rooms provided for the use of occupants of specific spaces (i.e., a private toilet room for the occupant of a private office) shall be adaptable. If bathing rooms are provided, then each public and common use bathroom shall comply with 4.23. Accessible toilet

rooms and bathing facilities shall be on an accessible route.

4.1.3 (12) Storage, Shelving and Display Units:

(a) If fixed or built-in storage facilities such as cabinets, shelves, closets, and drawers are provided in accessible spaces, at least one of each type provided shall contain storage space complying with 4.25. Additional storage may be provided outside of the dimensions required by 4.25.

4.1.3 (12) (b) Shelves or display units allowing self-service by customers in mercantile occupancies shall be located on an accessible route complying with 4.3. Requirements for accessible reach range do not apply.

4.1.3 (13) Controls and operating mechanisms in accessible spaces, along accessible routes, or as parts of accessible elements (for example, light switches and dispenser controls) shall comply with 4.27.

CABO/ANSI A117.1-1992

4.25 Operable Parts of Equipment and Appliances.

*General. Operable parts of equipment and appliances in accessible spaces, along accessible routes, or as part of accessible elements shall comply with 4.25.

BCMC

6.3 Drinking Fountains

At least 50% of drinking fountains, but not less than one, provided on every floor shall be accessible.

6.1.1 Toilet rooms and bathing facilities shall be accessible. At least one of each type fixture or element in each accessible toilet room and bathing facility shall be accessible.

EXCEPTIONS:

1. A toilet room or bathing facility for a single occupant and not for common or public use shall be permitted to be adaptable.

2. Dwelling units, guest rooms and patient toilet rooms, unless required by 5.0 to be accessible or adaptable.

6.4 Storage and Locker Facilities

Where storage facilities such as cabinets, shelves, closets, lockers and drawers are provided in required accessible or adaptable spaces, at least one of each type shall contain storage space complying with A117.1 (4.23).

6.8 Controls, Operating Mechanisms and Hardware

Controls, operating mechanisms and hardware, including switches that control lighting, ventilation or electrical outlets, in accessible spaces, along accessible routes or as parts of accessible elements, shall be accessible.

Comments*

N.E. Need to address fountains for

people who have difficulty bending or stooping.
E.
E.
P.N.E. Lack of requirement may be construed as permitting inaccessible floor levels (i.e. platforms) in mercantile occupancies. BCMC states that self-service shelves and display units are "inappropriate for incorporation into a building code." Spaces for these shelves must be required to be on an accessible route.
E.

01-03742

ADA Title III Requirements

4.1.3 (14) If emergency warning systems are provided, then they shall include both audible alarms and visual alarms complying with 4.28. Sleeping accommodations required to comply with 9.3 shall have an alarm system complying with 4.28. Emergency warning systems in medical care facilities may be modified to suit standard health care alarm design practice.
4.1.3 (15) Detectable warnings shall be provided at locations as specified in 4.29.
4.1.3 (16) Building Signage:
(a) Signs which designate permanent rooms and spaces shall comply with 4.30.1, 4.30.4, 4.30.5 and 4.30.6.
(b) Other signs which provide direction to or information about functional spaces of the building shall comply with 4.30.1, 4.30.2, 4.30.3, and 4.30.5.

EXCEPTION: Building directories, menus, and all other signs which are temporary are not required to comply.

CABO/ANSI A117.1-1992

BCMC

19.0 ALARM SYSTEMS

Required fire protective signalling systems shall include visible alarm-indicating appliances in public and common areas.

6.5 Detectable Warnings

Transit platform edges bordering a drop-off and not protected by platform screens or guardrails shall have a detectable warning.

EXCEPTION: Bus stops.

7.0 SIGNS

7.1 Required accessible elements shall be identified by the International Symbol of Accessibility at the following locations:

1. Accessible parking spaces required by 3.2.1, except where the total parking spaces provided are five or less.
2. Accessible passenger loading zones.
3. Accessible areas of refuge. See 9.6.
4. Accessible portable toilet and bathing units.

7.2 Inaccessible building entrances, inaccessible public toilets and bathing facilities and elevators not serving an accessible route shall be provided with directional signage indicating the route to the nearest like accessible element.

16.5 Stair Sign

Each door to an exit stairway shall have tactile signage stating EXIT and complying with CABO/ANSI A117.1 (4.28).

Comments*

P.N.E. Addresses only required fire protection signals. If extra (non-required) signals are provided, they must also include strobes.

N.E. No scoping for tactile signage other than "exit." This only addresses signs on required accessible elements. Does not require signs on all permanent rooms and spaces to be accessible and, in fact, BCMC says such permanent signage is "inappropriate for incorporation into a building code."

4.1.3 (17) Public Telephones:
(a) If public pay telephones, public closed circuit telephones, or other public telephones are provided, then they shall comply with 4.31.2 through 4.31.8 to the extent required by the following table:

Number of each type of telephone provided on each floor	Number of telephones required to comply with 4.31.2 through 4.31.81
1 or more single unit	1 per floor
1 bank 2	1 per floor
2 or more banks 2	1 per bank. Accessible unit may be installed as a single unit in proximity (either visible or with signage) to the bank. At least one public telephone per floor shall meet the requirements for a forward reach telephone 3.

1 Additional public telephones may be installed at any height. Unless otherwise specified, accessible telephones may be either forward or side reach telephones.
2 A bank consists of two or more adjacent public telephones, often installed as a unit.
3 EXCEPTION: For exterior installations only, if dial tone first service is available, then a side reach telephone may be installed instead of the required forward reach telephone (i.e., one telephone in proximity to each bank shall comply with 4.31).
4.1.3 (17) (b)* All telephones required to be accessible and complying with 4.31.2 through 4.31.8 shall be equipped with a volume control. In addition, 25 percent, but never less than one, of all other public telephones provided shall be equipped with a volume control and shall be dispersed among all types of public telephones, including closed circuit telephones, throughout the building or facility. Signage complying with applicable provisions of 4.30.7 shall be provided.

CABO/ANSI A117.1-1992 BCMC Comments*
N.E. Not addressed. BCMC considers telephones "not appropriate for incorporation into a building code."
N.E.

4.1.3 (17) (c) The following shall be provided in accordance with 4.31.9:

(i) if a total number of four or more public pay telephones (including both interior and exterior phones) is provided at a site, and at least one is in an interior location, then at least one interior public text telephone shall be provided.
(ii) if an interior public pay telephone is provided in a stadium or arena, in a convention center, in a hotel with a convention center, or in a covered mall, at least one interior public text telephone shall be provided in the facility.
(iii) if a public pay telephone is located in or adjacent to a hospital emergency room, hospital recovery room, or hospital waiting room, one public text telephone shall be provided at each such location.
4.1.3 (17) (d) Where a bank of telephones in the interior of a building consists of three or more public pay telephones, at least one public pay telephone in each such bank shall be equipped with a shelf and outlet in compliance with 4.31.9(2).
4.1.3 (18) If fixed or built-in seating or tables (including, but not limited to, study carrels and student laboratory stations), are provided in accessible public or common use areas, at least five percent (5%), but not less than one, of the fixed or built-in seating areas or tables shall comply with 4.32. An accessible route shall lead to and through such fixed or built-in seating areas, or tables.

CABO/ANSI A117.1-1992

BCMC

6.6 Fixed or Built-in Seating or Tables
Where fixed or built-in seating or tables are provided, at least 5%, but no fewer than one, shall be accessible. In eating and drinking facilities, such seating or tables shall be distributed throughout the facility.
3.1.2 At least one accessible route shall connect accessible spaces, elements, facilities and buildings that are on the same site.

Comments*

N.E.
N.E.
E.
27 ADA/ANSI/BCMC Requirements - October 13, 1995
01-03745

ADA Title III Requirements

4.1.3 (19)* Assembly areas:
(a) In places of assembly with fixed seating accessible wheelchair locations shall comply with 4.33.2, 4.33.3, and

4.33.4 and shall be provided consistent with the following table:

Capacity of Seating in Assembly Areas	Number of Required Wheelchair Locations
4 to 25	1
26 to 50	2
51 to 300	4
301 to 500	6
over 500	6, plus 1 additional space for each total seating capacity increase of 100

In addition, one percent, but not less than one, of all fixed seats shall be aisle seats with no armrests on the aisle side, or removable or folding armrests on the aisle side. Each such seat shall be identified by a sign or marker. Signage notifying patrons of the availability of such seats shall be posted at the ticket office. Aisle seats are not required to comply with 4.33.4.

4.1.3 (19) (b) This paragraph applies to assembly areas where audible communications are integral to the use of the space (e.g., concert and lecture halls, playhouses and movie theaters, meeting rooms, etc.). Such assembly areas, if (1) they accommodate at least 50 persons, or if they have audio-amplification systems, and (2) they have fixed seating, shall have a permanently installed assistive listening system complying with 4.33. For other assembly areas, a permanently installed assistive listening system, or an adequate number of electrical outlets or other supplementary wiring necessary to support a portable assistive listening system shall be provided. The minimum number of receivers to be provided shall be equal to 4 percent of the total number of seats, but in no case less than two. Signage complying with applicable provisions of 4.30 shall be installed to notify patrons of the availability of a listening system.

CABO/ANSI A117.1-1992

BCMC

5.0 SPECIAL OCCUPANCY REQUIREMENTS

5.1 General

In addition to the general provisions herein, the following requirements for specific occupancies shall apply.

5.2 Group A Assembly

5.2.1 In Group A1, A2, and A5 occupancies wheelchair spaces for each assembly area shall be provided in accordance with Table 5.2. Removable seats shall be permitted in the wheelchair spaces. When the number of seats exceeds 300, wheelchair spaces shall be provided in more than one location. Dispersion of wheelchair locations

shall be based on the availability of accessible routes to various seating areas, including seating at various levels in multilevel facilities.

5.2.3 In Group A3 occupancies the total floor area allotted for seating and tables shall be accessible.

EXCEPTIONS:

1. Where necessary for line of sight, requirements of 5.2.1 for number and dispersion of wheelchair spaces shall be applied.

TABLE NO. 5.2

WHEELCHAIR SPACES REQUIRED IN ASSEMBLY AREAS

Capacity of Seating in Assembly Area	Number of Required Wheelchair Spaces
4 to 25	1
26 to 50	2
51 to 300	4
301 to 500	6
over 500	6 plus 1 for each 200 over 500

5.2.2 Stadiums, theaters, auditoriums, lecture halls and similar areas having fixed seating and which are equipped with audio amplification systems or have an occupant load of 50 or more persons shall have a listening system complying with CABO/ANSI A117.1 (4.32) for at least 4% of the seats, but not less than two receivers. Such assembly areas not equipped with audio amplification systems or with an occupant load less than 50 shall have a permanently installed assistive listening system, or an adequate number of electrical outlets or other supplementary wiring necessary to support a portable assistive listening system. Signage shall be provided to notify patrons of the availability of a listening system.

Comments*

5.1 - N.E. Accessible route is required by ADA Standards - dispersion requirement not dependent on "availability" of accessible route. This "availability" language makes it sound like builders can escape the dispersion requirement simply by choosing to make only a few accessible routes available.

5.2.1 - N.E. No requirement for aisle seats.

5.2.3 - P.N.E. Group A3 occupancies with fixed seats must provide wheelchair spaces in the same proportion as other assembly

occupancies.
N.E. ADA (for over 500) requires 6
plus 1 additional space for each
total seating capacity increase of
100.
E.

28 ADA/ANSI/BCMC Requirements - October 13, 1995

01-03746

ADA Title III Requirements

4.1.3 (20) Where automated teller machines are provided, each machine shall comply with the requirements of 4.34 except where two or more are provided at a location, then only one must comply.
EXCEPTION: Drive-up-only automated teller machines are not required to comply with 4.34.2 and 4.34.3.
4.1.3 (21) Where dressing and fitting rooms are provided for use by the general public, patients, customers or employees, 5 percent, but never less than one, of dressing rooms for each type of use in each cluster of dressing rooms shall be accessible and shall comply with 4.35. Examples of types of dressing rooms are those serving different genders or distinct and different functions as in different treatment or examination facilities.
4.1.4 (Reserved).
4.1.5 Accessible Buildings: Additions. Each addition to an existing building or facility shall be regarded as an alteration. Each space or element added to the existing building or facility shall comply with the applicable provisions of 4.1.1 to 4.1.3, Minimum Requirements (for New Construction) and the applicable technical specifications of 4.2 through 4.35 and sections 5 through 10. Each addition that affects or could affect the usability of an area containing a primary function shall comply with 4.1.6(2).
28 C.F.R. S 36.402(a)(1). Alterations. Any alteration to a place of public accommodation or a commercial facility shall be made so as to ensure that, to the maximum extent feasible, the altered portions of the facility are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

CABO/ANSI A117.1-1992

1.2 Application
Provisions of this standard are suitable for:
- the design and construction of new buildings and facilities, including both spaces and elements, site improvements, and public walks
- remodeling, alteration, and rehabilitation of existing construction

- permanent, temporary, and emergency conditions
2.3* Remodeling
The specifications in this standard are based upon the functional requirements of persons with physical disabilities. The administrative authority adopting this standard shall specify the extent to which it is to cover remodeling, alteration, or rehabilitation within its jurisdiction.

BCMC

6.7.1 Dressing and Fitting Rooms
Where dressing or fitting rooms are provided, at least 5%, but not less than one, in each group of rooms serving distinct and different functions shall be accessible.
11.1.1 Each element or space of a building or facility that is altered shall comply with these provisions, unless technically infeasible. Where full compliance is technically infeasible, the element or space shall be made accessible to the extent to which it is not technically infeasible.
EXCEPTION: Where these provisions require that an element or space be on an accessible route, the altered element or space is not required to be on an accessible route, unless required by 11.1.2.
11.0 EXISTING BUILDINGS
11.1 Alterations
11.1.1 Each element or space of a building or facility that is altered shall comply with these provisions, unless technically infeasible. Where full compliance is technically infeasible, the element or space shall be made accessible to the extent to which it is not technically infeasible.
EXCEPTION: Where these provisions require that an element or space be on an accessible route, the altered element or space is not required to be on an accessible route, unless required by 11.1.2. (Alteration to area of primary function.)
11.2 Change of Occupancy
Provisions for new construction shall apply to existing buildings that undergo a change of use group, unless technically infeasible.

Comments*

N.E. Not addressed. BCMC considers these "not appropriate for incorporation into a building code."

E. Not specifically addressed. Unclear whether an addition constitutes an alteration.

ANSI P.N.E. Although ANSI states that it is applicable/suitable for

alterations, specific scoping
provisions are not addressed.
However, specific technical
exceptions or variations are
included in some technical sections.
An entire section, ANSI 4.10.2,
was created for existing elevators.
BCMC 11.1 - E.
11.2 - Exceeds. ADA does not
address change of use group.

01-03747

ADA Title III Requirements

4.1.6 (1) (g) In alterations, the requirements of 4.1.3(9), 4.3.10 and 4.3.11 do not apply.

4.1.6 (1) (h)* Entrances: If a planned alteration entails alterations to an entrance, and the building has an accessible entrance, the entrance being altered is not required to comply with 4.1.3(8), except to the extent required by 4.1.6(2). If a particular entrance is not made accessible, appropriate accessible signage indicating the location of the nearest accessible entrance(s) shall be installed at or near the inaccessible entrance, such that a person with disabilities will not be required to retrace the approach route from the inaccessible entrance.

4.1.6 (1) (i) If the alteration work is limited solely to the electrical, mechanical, or plumbing system, or to hazardous material abatement, or automatic sprinkler retrofitting, and does not involve the alteration of any elements or spaces required to be accessible under these guidelines, then 4.1.6 (2) does not apply.

4.1.6 (1) (j) EXCEPTION: In alteration work, if compliance with 4.1.6 is technically infeasible, the alteration shall provide accessibility to the maximum extent feasible. Any elements or features of the building or facility that are being altered and can be made accessible shall be made accessible within the scope of the alteration.

Technically Infeasible. Means, with respect to an alteration of a building or a facility, that it has little likelihood of being accomplished because existing structural conditions would require removing or altering a load-bearing member which is an essential part of the structural frame; or because other existing physical or site constraints prohibit modification or addition of elements, spaces, or features which are in full and strict compliance with the minimum requirements for new construction and which are necessary to provide accessibility.

CABO/ANSI A117.1-1992

BCMC
11.1.3 The following scoping provisions shall apply for alterations to existing buildings and facilities:
8. Accessible means of egress are not required in alterations to existing buildings and facilities.
11.1.2 Exception 3. Alterations to mechanical systems, electrical systems, installations or alteration of fire protection systems, and abatements of hazardous materials.
11.1.1 Each element or space of a building or facility that is altered shall comply with these provisions, unless technically infeasible. Where full compliance is technically infeasible, the element or space shall be made accessible to the extent to which it is not technically infeasible.
EXCEPTION: Where these provisions require that an element or space be on an accessible route, the altered element or space is not required to be on an accessible route, unless required by 11.1.2.
TECHNICALLY INFEASIBLE - an alteration of a building or a facility that has little likelihood of being accomplished because existing structural conditions would require removing or altering a load-bearing member which is an essential part of the structural frame, or because other existing physical or site constraints prohibit modification or addition of elements, spaces, or features which are in full and strict compliance with the minimum requirements for new construction and which are necessary to provide accessibility.
Comments*
E.
Not addressed. Lack of this exception possibly exceeds the ADA.
E.
E.
E.
31 ADA/ANSI/BCMC Requirements - October 13, 1995
01-03748
ADA Title III Requirements
4.1.6 (1) (k) EXCEPTION:
(i) These guidelines do not require the installation of an elevator in an altered facility that is less than three stories or has less than 3,000 square feet per story unless the building is a shopping center, a shopping mall, the professional office of a health care provider, or [a terminal, depot, or other station used for specified public transportation, or an airport passenger terminal (28 C.F.R S 36.404(a))].

(ii) The exemption provided in paragraph (i) does not obviate or limit in any way the obligation to comply with the other accessibility requirements established in these guidelines. For example, alterations to floors above or below the ground floor must be accessible regardless of whether the altered facility has an elevator. If a facility subject to the elevator exemption set forth in paragraph (i) nonetheless has a full passenger elevator, that elevator shall meet, to the maximum extent feasible, the accessibility requirements of these guidelines.
28 C.F.R. S 36.404 (a) (2). For purposes of this section, shopping center or shopping mall means --

(A) A building housing five or more sales or rental establishments; or

(B) A series of buildings on a common site, connected by a common pedestrian access route above or below the ground floor, that is either under common ownership or common control or developed either as one project or as a series of related projects, housing five or more sales or rental establishments. For purposes of this section, places of public accommodation of the types listed in paragraph (5) of the definition of "place of public accommodation" in section 36.104 are considered sales or rental establishments. The facility housing a "shopping center or shopping mall" only includes floor levels housing at least one sales or rental establishment, or any floor level designed or intended for use by at least one sales or rental establishment.

CABO/ANSI A117.1-1992

BCMC

3.1.2 EXCEPTION: 2. In other than the offices of health care providers, transportation facilities and airports, and multitenant Group M occupancies, floors that are above and below accessible levels, and that have an aggregate area of not more than 3000 square feet, and an aggregate occupant load of not more than 50, need not be served by an accessible route from an accessible level.

Comments*

P.N.E. BCMC elevator exception is more stringent in that it does not exempt buildings with less than 3 floors and it imposes an additional occupant load limit on small buildings. However, it needs to be made clear that all floors must be less than 3000 square feet, not just the inaccessible floors.
Other accessibility requirements not

addressed specifically; however, the exception applies only to a connecting accessible route (i.e., elevator, lift, ramp).
Not addressed. Whether the BCMC provision for "multitenant Group M occupancies" is equivalent depends on building codes.

01-03749

ADA Title III Requirements

4.1.6 (2) Alterations to an Area Containing a Primary Function: In addition to the requirements of 4.1.6(1), an alteration that affects or could affect the usability of or access to an area containing a primary function shall be made so as to ensure that, to the maximum extent feasible, the path of travel to the altered area and the restrooms, telephones, and drinking fountains serving the altered area, are readily accessible to and usable by individuals with disabilities, unless such alterations are disproportionate to the overall alterations in terms of cost and scope (as determined under criteria established by the Attorney General). (See 28 C.F.R S 36.403).
28 C.F.R. S 36.403(c)(2). For the purposes of this section, alterations to windows, hardware, controls, electrical outlets, and signage shall not be deemed to be alterations that affect the usability of or access to an area containing a primary function.
28 C.F.R. S 36.403(d). Landlord/tenant: If a tenant is making alterations as defined in Section 36.402 that would trigger the requirements of this section, those alterations by the tenant in areas that only the tenant occupies do not trigger a path of travel obligation upon the landlord with respect to areas of the facility under the landlord's authority, if those areas are not otherwise being altered.
28 C.F.R. S 36.403(f). Disproportionality.
(1) Alterations made to provide an accessible path of travel to the altered area will be deemed disproportionate to the overall alteration when the cost exceeds 20% of the cost of the alteration to the primary function area.
28 C.F.R. S 36.403(g). Duty to provide accessible features in the event of disproportionality.
(1) When the cost of alterations necessary to make the path of travel to the altered area fully accessible is disproportionate to the cost of the overall alteration, the path of travel shall be made accessible to the extent that it can be made accessible without incurring disproportionate

costs.

CABO/ANSI A117.1-1992

BCMC

11.1.2 Where an alteration affects the usability of, or access to, an area containing a primary function, an accessible route to the primary function area shall be provided. The accessible route to the primary function area shall include any restrooms or drinking fountains serving the primary function area.

EXCEPTIONS:

1. The costs of providing the accessible route need not exceed 20% of the costs of the alterations affecting the primary function area.

2. Alterations to windows, hardware, operating controls, electrical outlets and signage.

3. Alterations to mechanical systems, electrical systems, installations or alteration of fire protection systems, and abatement of hazardous materials.

4. Alterations undertaken for the primary purpose of increasing the accessibility of an existing building, facility or element.

11.1.2 Exception 2. Alterations to windows, hardware, operating controls, electrical outlets and signage.

11.1.2 Exception 1. The cost of providing the accessible route need not exceed 20% of the costs of the alterations affecting the primary function area.

Comments*

P.N.E. Need more detail regarding what is required to be included in path of travel.

Exception 1 - P.N.E. No mention of making the path of travel accessible to extent that costs are not greater than 20%, or series of smaller alterations. Need clarification.

Exception 2 - E.

Exception 3 - E.

Exception 4 - E. to 36.304 (d)(i) Barrier Removal.

Not addressed.

E.

N.E. - Not addressed.

33 ADA/ANSI/BCMC Requirements - October 13, 1995

01-03750

ADA Title III Requirements

28 C.F.R. S 36.403(h). Series of smaller alterations.

(1) The obligation to provide an accessible path of travel

may not be evaded by performing a series of small alterations to the area served by a single path of travel if those alterations could have been performed as a single undertaking.

(2) (i) If an area containing a primary function has been altered without providing an accessible path of travel to that area, and subsequent alterations of that area, or a different area on the same path of travel, are undertaken within three years of the original alteration, the total cost of alterations to the primary function areas on that path of travel during the preceding three year period shall be considered in determining whether the cost of making that path of travel accessible is disproportionate.

4.1.6 (3) Special Technical Provisions for Alterations to Existing Buildings and Facilities:

(a) Ramps: Curb ramps and interior or exterior ramps to be constructed on sites or in existing buildings or facilities where space limitations prohibit the use of a 1:12 slope or less may have slopes and rises as follows:

(i) A slope between 1:10 and 1:12 is allowed for a maximum rise of 6 inches.

(ii) A slope between 1:8 and 1:10 is allowed for a maximum rise of 3 inches. A slope steeper than 1:8 is not allowed.

4.1.6 (3) (b) Stairs: Full extension of handrails at stairs shall not be required in alterations where such extensions would be hazardous or impossible due to plan configuration.

4.1.6 (3) (c) Elevators:

(i) If safety door edges are provided in existing automatic elevators, automatic door reopening devices may be omitted (see 4.10.6).

CABO/ANSI A117.1-1992

4.8.2* Slope and Rise. ...Curb ramps and ramps constructed on existing sites or existing buildings or facilities shall be permitted to have slopes and rises as shown in Table 4.8.2 provided space limitations prohibit use of a 1:12 slope or less.

Table 4.8.2

Allowable Ramp Dimensions for Construction in Existing Sites, Buildings and Facilities

Slope"	Maximum Rise
Steeper than 1:10 but not steeper than 1:8	3 in 75 mm
Steeper than 1:12 but not steeper than 1:10	6 in 150 mm

"A slope steeper than 1:8 shall not be permitted.

4.10.2 Elevators - Existing

4.10.2.1 General. Existing passenger elevators that are required to be accessible shall comply with 4.10.2 and with 4.10.1.2, 4.10.1.5, 4.10.1.7 through 4.10.1.11, and 4.10.1.14. All elevators that are programmed to respond to the same hall call control as the required accessible elevator shall comply with the requirements of 4.10.2.

BCMC

17.1 Slope

Maximum slope in the direction of travel shall be 1:12. Maximum cross slope shall be 1:48.

EXCEPTIONS:

1. Maximum slope in direction of travel shall be 1:8 for a 3-inch rise maximum and 1:10 for a 6-inch rise maximum.

Comments*

N.E.- Not addressed.

ANSI E.

BCMC Exception 1 - N.E. "Where space limitations prohibit the use of a 1:12 slope..." is critical phrase. Not addressed. Mainstreamed requirements for new construction require extensions on only one side.

N.E. ANSI does not require altered elevators to comply with 4.10.1.6 (reopening devices), regardless of whether safety door edges are provided.

01-03751

ADA Title III Requirements

4.1.6 (3) (c) (ii) Where existing shaft configuration or technical infeasibility prohibits strict compliance with 4.10.9, the minimum car plan dimensions may be reduced by the minimum amount necessary, but in no case shall the inside car area be smaller than 48 in by 48 in.

(iii) Equivalent facilitation may be provided with an elevator car of different dimensions when usability can be demonstrated and when all other elements required to be accessible comply with the applicable provisions of 4.10. For example, an elevator of 47 in by 69 in (1195 mm by 1755 mm) with a door opening on the narrow dimension, could accommodate the standard wheelchair clearances shown in Figure 4.

CABO/ANSI A117.1-1992

4.10.2 Elevators-Existing

4.10.2.1 General. Existing passenger elevators that are required to be accessible shall comply with 4.10.2 and with 4.10.1.2, 4.10.1.5, 4.10.1.7 through 4.10.1.11, and

4.10.1.14. All elevators that are programmed to respond to the same hall call control as the required accessible elevator shall comply with the requirements of 4.10.2.
4.10.1.9* Inside Dimensions of Elevator Cars. The inside dimensions of elevator cars shall provide space for wheelchair users to enter the car, maneuver within reach of controls, and exit from the car. The clearance between the car platform sill and the edge of any hoistway landing shall be 1 1/4 in (32 mm) maximum.
4.10.2 Existing Elevators
4.10.2.1 General. Existing passenger elevators that are required to be accessible shall comply with 4.10.2 and with 4.10.1.2, 4.10.1.5, 4.10.1.7 through 4.10.1.11, and 4.10.1.14. All elevators that are programmed to respond to the same hall call control as the required accessible elevator shall comply with the requirements of 4.10.2.
4.10.2.2 Call Buttons. The top of the hall call buttons shall be located vertically between 35 in (890 mm) and 54 in (1370 mm) above the floor when the appropriate floor area specified in 4.2.5 or 4.2.6 is provided. The button that designates the up direction shall be located above the button that designates the down direction.
4.10.2.3 Hall Signals. A visible and audible signal shall be provided at each hoistway entrance to indicate which car is answering a call, except that in-car signals complying with 4.10.1.4 shall be acceptable. Audible signals shall sound once for the up direction and twice for the down direction, or shall have verbal annunciators that state the word "up" or "down." If hall signals are added, they shall comply with 4.10.1.4.
4.10.2.4 Door Operation. Power operated horizontally sliding car and hoistway doors opened and closed by automatic means shall comply with 4.10.1.6. Existing manually operated hoistway swing doors shall comply with 4.13.5 and 4.13.11. A power operated car door that opens and maintains a 32 in (815 mm) minimum clear width shall be provided. Closing of the car door shall not be initiated until the hoistway door is closed. Car gates are prohibited.

BCMC
Comments*

N.E. Not limited to technical infeasibility. Also, no minimum of 48 by 48.

N.E. If applied to alterations, this allows greater variation from accessibility requirements than ADA permits.

4.10.2.2 - N.E. Visual signal not required. No restriction for protruding objects below buttons. ADA Standards do not specifically relax these requirements. Reach ranges okay as substitute for 42 inch centerline.
4.10.2.3 - N.E. because no height requirements and no element size requirements.
4.10.2.4 - Generally equivalent to 4.1.6 (3) (c). But, if swinging hoistway doors are allowed, the hardware also should comply and there should be maneuvering space complying with 4.13.6.
4.10.2.5 - N.E. Allows recessed buttons.

ADA Title III Requirements
4.1.6 (3) (d) Doors:
(i) Where it is technically infeasible to comply with clear opening width requirements of 4.13.5, a projection of 5/8

in maximum will be permitted for the latch side stop.
4.1.6 (3) (d) (ii) If existing thresholds are 3/4 in high or less, and have (or are modified to have) a beveled edge on each side, they may remain.
4.1.6 (3) (e) Toilet Rooms:
(i) Where it is technically infeasible to comply with 4.22 or 4.23, the installation of at least one unisex toilet/bathroom per floor, located in the same area as existing toilet facilities, will be permitted in lieu of modifying existing toilet facilities to be accessible. Each unisex toilet room shall contain one water closet complying with 4.16 and one lavatory complying with 4.19, and the door shall have a privacy latch.

CABO/ANSI A117.1-1992

4.10.2.5 Car Controls. Elevator control panels shall have the following features:
4.10.2.5.1 Car control buttons shall be 3/4 in (19 mm) minimum in their smallest dimension. Control buttons shall be raised, flush or recessed.
4.10.2.5.2 When the car operating panel is changed, control buttons shall comply with 4.10.1.12.1.
4.10.2.5.3 All control buttons shall comply with 4.10.1.12.2.
Exception: When existing car operating panel construction precludes locating tactile markings to the left of the controls, markings shall be placed as near to the control panel as possible.
4.10.2.5.4 All floor buttons shall be located 54 in (1370 mm) maximum above the floor for parallel approach and 48 in (1220) maximum above the floor for front approach. When the panel is changed, emergency controls, including the emergency alarm, shall comply with 4.10.1.12.3.
4.10.2.5.5 Location of controls shall comply with 4.10.1.12.4.
4.10.2.5.6 When a new car operating panel conforming to the requirements of 4.10.1.12 is provided, existing car operating panel(s) not conforming to 4.10.1.12 are not required to be removed.
4.10.2.6 Car Position Indicators. When a new car position indicator is installed, the indicator shall comply with 4.10.1.13.
4.10.2.7 Identification. Elevators that comply with this standard shall be clearly identified with the international symbol of accessibility, unless all elevators in the building are accessible. See Fig. 4.28.8.1.

BCMC

11.1.3 The following scoping provisions shall apply for alterations to existing buildings and facilities:

1. Where it is technically infeasible to alter existing toilet rooms or bathing facilities to be accessible, at least one accessible unisex toilet/bathroom shall be provided and shall be located on the same floor and in the same area as the existing toilet/bathrooms. Each unisex toilet/bath room shall contain one accessible water closet and lavatory, and the door shall be lockable from within the room.

Comments*

P.N.E. BCMC gives builder discretion to decide what to do when full compliance is infeasible.

P. Exceeds BCMC does not provide such an exception to accessibility.

E.

01-03753

ADA Title III Requirements

4.1.6 (3) (e) (ii) Where it is technically infeasible to install a required standard stall (Fig. 30(a)), or where other codes prohibit reduction of the fixture count (i.e., removal of a water closet in order to create a double-wide stall), either alternate stall (Fig. 30 (b)) may be provided in lieu of the standard stall.

4.1.6 (3) (e) (iii) When existing toilet or bathing facilities are being altered and are not made accessible, signage complying with 4.30.1, 4.30.2, 4.30.3, 4.30.5, and 4.30.7 shall be provided indicating the location of the nearest accessible toilet or bathing facility within the facility.

4.1.6 (3) (f) Assembly Areas:

(i) Where it is technically infeasible to disperse accessible seating throughout an altered assembly area, accessible seating areas may be clustered. Each accessible seating area shall have provisions for companion seating and shall be located on an accessible route that also serves as a means of emergency egress.

(ii) Where it is technically infeasible to alter all performing areas to be on an accessible route, at least one of each type of performing area shall be made accessible.

4.1.6 (3) (g) Platform Lifts (Wheelchair Lifts): In alterations, platform lifts (wheelchair lifts) complying with 4.11 and applicable state or local codes may be used as part of an accessible route. The use of lifts is not limited to the four conditions in Exception 4 of 4.1.3(5).

4.1.6 (3) (h) Dressing Rooms: In alterations where technical infeasibility can be demonstrated, one dressing room for each sex on each level shall be made accessible. Where only unisex dressing rooms are provided, accessible

unisex dressing rooms may be used to fulfill this requirement.

CABO/ANSI A117.1-1992

BCMC

11.1.3 2. Where existing toilet or bathing facilities are being altered and are not made accessible, directional signage shall be provided indicating the location of the nearest accessible toilet or bathing facility within the facility.

11.1.3 3. Where it is technically infeasible to disperse accessible seating throughout an altered assembly area, accessible seating areas may be clustered. Each accessible seating area shall have provisions for companion seating and shall be located on an accessible route that also serves as an accessible means of egress.

4. Where it is technically infeasible to alter all performing areas to be on an accessible route, at least one of each type of performing area shall be made accessible.

11.1.3 5. Platform (wheelchair) lifts, installed in accordance with ASME/ANSI A17.1, Part 20, may be used as part of an accessible route.

11.1.3 6. Where it is technically infeasible to alter existing dressing rooms to be accessible in accordance with 6.7.1, not less than one accessible dressing room shall be provided on the same level as the inaccessible dressing rooms. Where separate dressing rooms are provided for each sex, not less than one accessible dressing room for each sex shall be provided.

11.2 Change of Occupancy

Provisions for new construction shall apply to existing buildings that undergo a change of use group, unless technically infeasible.

Comments*

Not addressed. This needs to be made clear.

P.N.E. Need to specify that signage must be accessible.

E.

E.

E.

Exceeds. Change of occupancy is not mentioned specifically in ADA. But, if alterations occur as a result of change of occupancy, 4.1.6 governs.

01-03754

ADA Title III Requirements

4.1.7 Accessible Buildings: Historic Preservation.

(1) Applicability:

(a) General Rule. Alterations to a qualified historic building or facility shall comply with 4.1.6 Accessible Buildings: Alterations, the applicable technical specifications of 4.2 through 4.35 and the applicable special application sections 5 through 10 unless it is determined in accordance with the procedures in 4.1.7(2) that compliance with the requirements for accessible routes (exterior and interior), ramps, entrances, or toilets would threaten or destroy the historic significance of the building or facility in which case the alternative requirements in 4.1.7(3) may be used for the feature.

CABO/ANSI A117.1-1992

1.2 Application

Provisions of this standard are suitable for:

- the design and construction of new buildings and facilities, including both spaces and elements, site improvements, and public walks
- remodeling, alteration, and rehabilitation of existing construction
- permanent, temporary, and emergency conditions

A2.3 Historic Buildings and Facilities 1)2)3)

Accessibility in historic buildings and facilities, that are required to be made accessible and usable by persons with disabilities, should be accomplished in a manner that maintains the significant historic fabric and historic aspects of such buildings and facilities.

If the historic fabric or historic aspects are threatened or destroyed by strict compliance with the provisions of this standard, reasonably equivalent access and use may be accomplished by using the concepts in A2.3. Reasonably equivalent access and use means that the entry to, and use of, a building or facility by persons with disabilities is achieved with standards or measurements which are individually tailored to the historic building or facility.

1) Historic aspects are the particular features of the historic site, building or facility that gives it its historic significance, such as historic background, noteworthy architecture, unique design, works of art, memorabilia, and artifacts.

2) Historic fabric consists of the original materials and portions of the building intact when exposed or as they appeared and were used in the past.

3) Historic buildings are buildings and facilities that are eligible for listing or are listed in the National Register of Historic Places, or such properties designated as historic under a statute of the appropriate state or local government body.

BCMC

11.3 Historic Buildings

These provisions shall apply to buildings and facilities designated as historic structures that undergo alterations or a change in use group, unless technically infeasible. If the historic character of the building is adversely affected, alternate provisions may be accepted.

Comments*

ANSI N.E. ANSI sets out a process in the appendix that is quite different from ADA Standards. (See 4.1.7 (2)). Further, all technical provisions are in the appendix and are, therefore, advisory only. Further, ANSI leaves it up to adopting authority to decide whether provisions apply. Adopting authority could be a model code or local/state code. Following comments address the ANSI provisions as if they were mandatory.

BCMC N.E. Alternate provisions not specified. Also, "adversely affected" is not as stringent as ADA's "threaten or destroy" standard for when alternate provisions may be used.

01-03755

ADA Title III Requirements

4.1.7 (1) (b) Definition. A qualified historic building or facility is a building or facility that is:

(i) Listed in or eligible for listing in the National Register of Historic Places; or

(ii) Designated as historic under an appropriate State or local law.

CABO/ANSI A117.1-1992

A2.3 Historic Buildings and Facilities. ...Should the above still be deemed to destroy the historic fabric or historic aspect, additional consideration may be given to the following:

1. Deviations should be on an item-by-item or case-by-case basis.

2. Interpretive exhibits and/or equal services of significant historic aspects which do not comply with this standard are provided for the public in a location fully accessible to and usable by persons with disabilities,

including people with hearing and sight impairment.

3. Services are provided in an accessible location equal to those provided in the locations which do not comply with this standard.

4. The owner/designer has provided written documentation stating the reasons for the consequent exemption. Such statement shall include the opinions and/or comments of a representative local group of persons with disabilities and be submitted to the administrative authority for approval.

A2.3 fn. 3 Historic buildings are buildings and facilities that are eligible for listing or are listed in the National Register of Historic Places, or such properties designated as historic under a statute of the appropriate state or local government body.

39 ADA/ANSI/BCMC Requirements - October 13, 1995

01-03756

ADA Title III Requirements

4.1.7 (2) Procedures.

(a) Alterations to Qualified Historic buildings and Facilities Subject to Section 106 of the National Historic Preservation Act:

(i) Section 106 Process. Section 106 of the National Historic Preservation Act (16 U.S.C. 470 f) requires that a Federal agency with jurisdiction over a Federal, federally assisted, or federally licensed undertaking consider the effects of the agency's undertaking on buildings and facilities listed in or eligible for listing in the National Register of Historic Places and give the Advisory Council on Historic Preservation a reasonable opportunity to comment on the undertaking prior to approval of the undertaking.

(ii) ADA Application. Where alterations are undertaken to a qualified historic building or facility that is subject to section 106 of the National Historic Preservation Act, the Federal agency with jurisdiction over the undertaking shall follow the section 106 process. If the State Historic Preservation Officer or Advisory Council on Historic Preservation agrees that compliance with the requirements for accessible routes (exterior and interior), ramps, entrances, or toilets would threaten or destroy the historic significance of the building or facility, the alternative requirements in 4.1.7(3) may be used for the feature.

4.1.7 (2) (b) Alterations to Qualified Historic Buildings and

Facilities Not Subject to Section 106 of the National Historic Preservation Act. Where alterations are undertaken to a qualified historic building or facility that is not subject to section 106 of the National Historic Preservation Act, if the entity undertaking the alterations believes that compliance with the requirements for accessible routes (exterior and interior), ramps, entrances, or toilets would threaten or destroy the historic significance of the building or facility and that the alternative requirements in 4.1.7(3) should be used for the feature, the entity should consult with the State Historic Preservation Officer. If the State Historic Preservation Officer agrees that compliance with the accessibility requirements for accessible routes (exterior and interior), ramps, entrances or toilets would threaten or destroy the historical significance of the building or facility, the alternative requirements in 4.1.7(3) may be used.
4.1.7 (2) (c) Consultation With Interested Persons. Interested persons should be invited to participate in the consultation process, including State or local accessibility officials, individuals with disabilities, and organizations representing individuals with disabilities.

CABO/ANSI A117.1-1992

A2.3 Historic Buildings and Facilities. ...Should the above still be deemed to destroy the historic fabric or historic aspect, additional consideration may be given to the following:

1. Deviations should be on an item-by-item or case-by-case basis.

2. Interpretive exhibits and/or equal services of significant historic aspects which do not comply with this standard are provided for the public in a location fully accessible to and usable by persons with disabilities, including people with hearing and sight impairment.

3. Services are provided in an accessible location equal to those provided in the locations which do not comply with this standard.

4. The owner/designer has provided written documentation stating the reasons for the consequent exemption. Such statement shall include the opinions and/or comments of a representative local group of persons with disabilities and be submitted to the administrative authority for approval.

See above.

Appendix A2.3. ...Such statement shall include the opinions and/or comments of a representative local group of persons with disabilities and be submitted to the administrative authority for approval.

01-03757

ADA Title III Requirements
4.1.7 (2) (d) Certified Local Government Historic Preservation Programs. Where the State Historic Preservation Officer has delegated the consultation responsibility for purposes of this section to a local government historic preservation program that has been certified in accordance with section 101(c) of the National Historic Preservation Act of 1966 (16 U.S.C. 470a (c)) and implementing regulations (36 CFR 61.5), the responsibility may be carried out by the appropriate local government body or official.
4.1.7 (3) Historic Preservation: Minimum Requirements:
(a) At least one accessible route complying with 4.3 from a site access point to an accessible entrance shall be provided.
EXCEPTION: A ramp with a slope no greater than 1:6 for a run not to exceed 2 ft (610 mm) may be used as part of an accessible route to an entrance.
4.1.7 (3) (b) At least one accessible entrance complying with 4.14 which is used by the public shall be provided.
EXCEPTION: If it is determined that no entrance used by the public can comply with 4.14, then access at any entrance not used by the general public but open (unlocked) with directional signage at the primary entrance

may be used. The accessible entrance shall also have a notification system. Where security is a problem, remote monitoring may be used.
4.1.7 (3) (c) If toilets are provided, then at least one toilet facility complying with 4.22 and 4.1.6 shall be provided along an accessible route that complies with 4.3. Such toilet facility may be unisex in design.
4.1.7 (3) (d) Accessible routes from an accessible entrance to all publicly used spaces on at least the level of the accessible entrance shall be provided. Access shall be provided to all levels of a building or facility in compliance with 4.1 whenever practical.
4.1.7 (3) (e) Displays and written information, documents, etc., should be located where they can be seen by a seated person. Exhibits and signage displayed horizontally (e.g., open books), should be no higher than 44 in (1120 mm) above the floor surface.

CABO/ANSI A117.1-1992

See above.
Appendix A2.3. ...If compliance with 4.8 cannot be achieved, a ramp meeting the criteria in Table A2.3(a) may be used as part of an accessible route at an entrance.

Table A2.3(a)
Maximum Slopes

Max. Slope	Maximum Rise	Maximum Run
1:9	16 in (405 mm)	12 ft (4 m)
1:6	4 in (100 mm)	2 ft (2 m)

Appendix A2.3. ...In the absence of an entrance used by the public complying with 4.14, then access at any entrance not used by the public but open (unlocked) with directional signs at the principal entrance may be used.

4.2 Space Allowance and Reach Ranges.
4.2.1* Wheelchair Passage Width. The minimum clear width for single wheelchair passage shall be 32 in (815 mm) at a point and 36 in (915 mm) continuously (see Fig. 1 and 24(e)).
Figure 1 of the ADA Standards. Minimum Clear Width for Single Wheelchair.
The minimum clear passage width for a single wheelchair passage shall be 32 in (815 mm) at a point for a maximum depth of 24 in (610 mm).
4.2.2 Width for Wheelchair Passing. The minimum width for two wheelchairs to pass is 60 in (1525 mm) (see Fig. 2).
4.2.3* Wheelchair Turning Space. The space required for a wheelchair to make a 180-degree turn is a clear space of 60 in (1525 mm) diameter (see Fig. 3(a)) or a T-shaped space (see Fig. 3(b)).
Figure 3 of the ADA Standards. Wheelchair Turning Space.
3(b) T-Shaped Space for 180 degree Turns. The T-shaped space is created by the perpendicular intersection of two routes. Each route must be a minimum of 36 in (915 mm) in width. The route forming the top of the "T" must extend at least 12 in (305 mm) beyond the intersection in each direction and the route forming the base of the "T" must extend at least 24 in (610 mm) beyond the intersection. The "T" fits within a 60 in (1525 mm) square.

CABO/ANSI A117.1-1992

Appendix A2.3. ...Nominal minimum door leaf widths are shown in Table A2.3(b).

Table A2.3(b)
Nominal Minimum Door Leaf Widths

Min Corridor/Room	Min Door Leaf Width
36 in (915 mm)	34 in (865 mm)
40 in (1015 mm)	32 in1" (815 m)

1) When the door provides 31 in (785 mm) clear opening in its full open position.

4.2.1* Wheelchair Passage Width. The clear width of a passageway for a single wheelchair shall be 32 in (815 mm) minimum for a passageway length of 24 in (610 mm) maximum and 36 in (915 mm) minimum for a passageway longer than 24 in (610 mm). See Fig. B4.2.1.
4.2.2 Width for Wheelchair Passing. The width for two wheelchairs to pass shall be 60 in (1525 mm) minimum. See Fig. B4.2.2.
4.2.3* Wheelchair Turning Space. The space required for a wheelchair to make a 180-degree turn shall be a clear

space of 60 in (1525 mm) diameter minimum or a T-shaped space within a 60 in (1525 mm) minimum square with arms 36 in (915 mm) wide minimum and 60 in (1525 mm) long minimum. See Fig. B4.2.3. Wheelchair turning space shall be permitted to include knee and toe clearance in accordance with 4.2.4.3.

4.2.4.3 Knee and Toe Clearances. Knee clearance shall be 25 in (635 mm) in depth maximum, 30 in (760 mm) wide minimum, and 27 in (685 mm) high minimum. Toe clearance shall be 6 in (150 mm) deep maximum and 9 in (230 mm) high minimum.

BCMC
Comments*

E.
E.
P.N.E. because no dimension is established for the base of the T. The reference to 4.2.4.3 could allow the base of the T to be 30 inches when the ADA requires it to be 36 inches.

01-03759

ADA Title III Requirements

4.2.5* Forward Reach. If the clear floor space only allows forward approach to an object, the maximum high forward reach allowed shall be 48 in (1220 mm). The minimum low forward reach is 15 in (380 mm). If the high forward reach is over an obstruction, reach and clearances shall be as shown in Fig. 5(b).

Figure 5 of the ADA Standards. Forward Reach.

5(b) Maximum Forward Reach over an Obstruction. The maximum depth of an obstruction with knee space below is 25 in (635 mm). When the obstruction is less than 20 in (510 mm) deep, the

maximum high forward reach is 48 in (1220 mm). When the depth of the obstruction is greater than 20 in (510 mm), the maximum high forward reach is 44 in (1120 mm).

4.2.6* Side Reach. If the clear floor space allows parallel approach by a person in a wheelchair, the maximum high side reach allowed shall be 54 in (1370 mm) and the low side reach shall be no less than 9 in (230 mm) above the floor (Fig. 6(a) and (b)). If the side reach is over an obstruction, the reach and clearances shall be as shown in Fig. 6(c).

Figure 6 of the ADA Standards. Side Reach.

6(a) Clear Floor Space - Parallel Approach, and 6(b) High and Low Side Reach Limits. The clear floor space is located a maximum of 10 in (255 mm) from the wall.

6(c) Maximum Side Reach over Obstruction. If the depth of the obstruction is 24 in (610 mm) and the maximum height of the obstruction is 34 in (865 mm), the maximum high side reach over the obstruction is 46 in (1170 mm).

CABO/ANSI A117.1-1992

4.2.5 Forward Reach

4.2.5.1 Unobstructed. If the clear floor space allows only forward approach to an object and is unobstructed, the high forward reach permitted shall be 48 in (1220 mm) maximum and the low forward reach shall be 15 in (380 mm) minimum above the floor. See Fig. B4.2.5.1.

4.2.5.2 Obstructed. If the high forward reach is over an obstruction, reach depth and heights shall comply with Table 4.2.5.2. See Fig. B4.2.5.2.

Table 4.2.5.2

Reach Limits for Obstructed Forward Reach1)

	in	mm	in	mm
Reach Depth	0 20	0-510	20-25	510-635
Reach Height	48	1220	44	1120

1) The clear floor space extending under an obstruction shall be equal to or greater than the reach depth for a maximum of 25 in (635 mm).

4.2.6 Side Reach*

4.2.6.1 Unobstructed. If the clear floor space allows a parallel approach by a person in a wheelchair, the high side reach permitted shall be 54 in (1370 mm) maximum and the low side reach shall be 15 in (380 mm) minimum above the floor. See Fig. B4.2.6.1

4.2.6.2 Obstructed. If the side reach is over an obstruction, the high reach shall be 46 in (1170 mm) maximum providing the:

- the height of the obstruction from the floor or ground is

34 in (865 mm) maximum, and
- the depth of the obstruction is 24 in (610 mm) maximum. See Fig. B4.2.6.2.

BCMC
Comments*

E.
Exceeds ADA standards (15 inch low side reach).

01-03760

ADA Title III Requirements

4.3 Accessible Route.

4.3.1* General. All walks, halls, corridors, aisles, skywalks, tunnels, and other spaces that are part of an accessible route shall comply with 4.3.

4.3.2 Location.

(1) At least one accessible route within the boundary of the site shall be provided from public transportation stops, accessible parking, and accessible passenger loading zones, and public streets or sidewalks to the accessible building entrance they serve. The accessible route shall, to the maximum extent feasible, coincide with the route for the general public.

(2) At least one accessible route shall connect accessible buildings, facilities, elements, and spaces that are on the same site.

(3) At least one accessible route shall connect accessible building or facility entrances with all accessible spaces and elements and with all accessible dwelling units within the building or facility.

(4) An accessible route shall connect at least one accessible entrance of each accessible dwelling unit with those exterior and interior spaces and facilities that serve the accessible dwelling unit.

CABO/ANSI A117.1-1992

4.3 Accessible Route

4.3.1* General. Accessible routes shall comply with 4.3.

A4.3 Accessible Route

A4.3.1 General. Walks, paths, halls, corridors, aisles and other elements and spaces are part of an accessible route.

4.3.2 Components

4.3.2.1 Accessible routes shall consist of one or more of the following components: Walking surfaces with a slope not steeper than 1:20, marked crossings at vehicular ways, clear floor space at accessible elements, access aisles, ramps, curb ramps and elevators.

4.3.2.2 All components of an accessible route shall comply with the applicable portions of this standard.

BCMC

3.1.1 Accessible routes within the site shall be provided from public transportation stops, accessible parking and accessible passenger loading zones, and public streets or sidewalks to the accessible building entrance they serve.

3.1.2 At least one accessible route shall connect accessible spaces, elements, facilities and buildings that are on the same site. Where only one accessible route is provided, it shall not pass through kitchens, storage rooms, restrooms, closets or similar spaces.

EXCEPTIONS:

1. A single accessible route shall be permitted to pass through a kitchen or storage room in an accessible or adaptable dwelling unit.

3.1.3 Where floor levels are required to be connected by an accessible route, and an interior path of travel is provided between the levels, the accessible route between the levels shall also be interior.

Comments*

E. (possibly even exceeds because BCMC does not allow lifts as a component of an accessible route).

3.1.1 - P.N.E. "... coincide with the route for the general public" missing.

3.1.2 - E.

3.1.3 - E.

01-03761

ADA Title III Requirements

4.3.3 Width. The minimum clear width of an accessible route shall be 36 in (915 mm) except at doors (see 4.13.5 and 4.13.6). If a person in a wheelchair must make a turn around an obstruction, the minimum clear width of the accessible route shall be as shown in Fig. 7(a) and (b).

Figure 7 of the ADA Standards. Accessible Route.

7(a) 90 degree turn. A 90 degree turn can be made from a 36 in (915 mm) wide passage into another 36 in (915 mm) passage if the depth of each leg is a minimum of 48 in (1220 mm) on the inside dimensions of the turn.

7(b) Turns around an Obstruction. A U-turn around an obstruction less than 48 in (1220 mm) wide may be made if the width of the passages approaching and exiting the turn is a minimum of 42 in (1065 mm) and the base of the U-turn space is a minimum of 48 in (1220 mm) wide.

4.3.4 Passing Space. If an accessible route has less than

60 in (1525 mm) clear width, then passing spaces at least 60 in by 60 in (1525 mm by 1525 mm) shall be located at reasonable intervals not to exceed 200 ft (61 m). A T-intersection of two corridors or walks is an acceptable passing place.

4.3.5 Head Room. Accessible routes shall comply with 4.4.2.

4.3.6 Surface Textures. The surface of an accessible route shall comply with 4.5.

4.3.7 Slope. An accessible route with a running slope greater than 1:20 is a ramp and shall comply with 4.8. Nowhere shall the cross slope of an accessible route exceed 1:50.

4.3.8 Changes in Levels. Changes in levels along an accessible route shall comply with 4.5.2. If an accessible route has changes in level greater than 1/2 in (13 mm), then a curb ramp, ramp, elevator, or platform lift (as permitted in 4.1.3 and 4.1.6) shall be provided that complies with 4.7, 4.8, 4.10, or 4.11, respectively. An accessible route does not include stairs, steps, or escalators. See definition of "egress, means of" in 3.5.

4.3.9 Doors. Doors along an accessible route shall comply with 4.13.

CABO/ANSI A117.1-1992

4.3.3* Width. Clear width of an accessible route shall be 36 in (915 mm) minimum, except at doors (see 4.13.5). See Fig. B4.3.3(a). Clear width of the accessible route with turns around an obstruction less than 48 in (1220 mm) wide shall have a clear space of 42 in by 48 in (1065 mm by 1220 mm) minimum. See Fig 4.3.3(b).

4.3.4* Passing Space. An accessible route with a clear width less than 60 in (1525 mm) shall provide passing spaces at intervals of 200 ft (61 m) maximum. These passing spaces shall be either a 60 in by 60 in (1525 mm by 1525 mm) minimum space, or an intersection of two corridors or walks which provide a T-shaped turning space complying with 4.2.3.

4.3.5 Surface Texture. Surface textures of an accessible route shall comply with 4.5.

4.3.6 Slope. Portions of an accessible route with running slopes steeper than 1:20 are ramps and shall comply with 4.8. The cross slope of an accessible route shall not be steeper than 1:48.

4.3.7 Changes in Level. Changes in level along an accessible route shall comply with 4.5.2.

4.3.8 Doors. Doors that are part of an accessible route shall comply with 4.13.

BCMC

15.3.1 The floor surface on both sides of a door shall be at the same elevation. The floor surface over which the door swings shall extend from the door in the closed position a distance equal to the door width.
EXCEPTIONS:
1. Exterior doors not on an accessible route.
2. Variations in elevation due to differences in finish materials, but not more than 1/2 inch.

Comments*

P.E. The text does not match figure.
E.
Note: Addressed in 4.4.
E.
E. 1:48 is equivalent to 1:50.
2.08% vs. 2.0% is not a significant difference.
ANSI E.
BCMC P.N.E. Fig. 25 requires maneuvering clearance (with flat surface) to be wider than the door width because people need to be able to get out of the way of the door swing.
Exception 2 - N.E. Unless reference to slope of bevel is mentioned.
E.

01-03762

ADA Title III Requirements

4.3.11.1 (6) When approved by the appropriate local authority, an area or a room which is separated from other portions of the building by a smoke barrier. Smoke barriers shall have a fire-resistive rating of not less than one hour and shall completely enclose the area or room. Doors in the smoke barrier shall be tight-fitting smoke- and draft-control assemblies having a fire-protection rating of not less than 20 minutes and shall be self-closing or automatic closing. The area or room shall be provided with an exit directly to an exit enclosure. Where the room or area exits into an exit enclosure which is required to be of more than one-hour fire-resistive construction, the room or area shall have the same fire-resistive construction, including the same opening protection, as required for the adjacent exit enclosure.
(7) An elevator lobby when elevator shafts and adjacent lobbies are pressurized as required for smokeproof enclosures by local regulations and when complying with

requirements herein for size, communication, and signage. Such pressurization system shall be activated by smoke detectors on each floor located in a manner approved by the appropriate local authority. Pressurization equipment and its duct work within the building shall be separated from other portions of the building by a minimum two-hour fire-resistive construction.

4.3.11.2 Size. Each area of rescue assistance shall provide at least two accessible areas each being not less than 30 inches by 48 inches (760 mm by 1220 mm). The area of rescue assistance shall not encroach on any required exit width. The total number of such 30-inch by 48-inch (760 mm by 1220 mm) areas per story shall be not less than one for every 200 persons of calculated occupant load served by the area of rescue assistance.

EXCEPTION: The appropriate local authority may reduce the minimum number of 30-inch by 48-inch (760 mm by 1220 mm) areas to one for each area of rescue assistance on floors where the occupant load is less than 200.

4.3.11.3* Stairway Width. Each stairway adjacent to an area of rescue assistance shall have a minimum clear width of 48 inches between handrails.

CABO/ANSI A117.1-1992

To facilitate an adequate degree of understanding about the use of areas of refuge and about the associated assisted egress procedures, information should be provided to those using the facilities. The exact content of the information, its format (e.g., as a set of instructions), its distribution (e.g., either posted in the area of refuge or otherwise transmitted to users) must be determined on a case-by-case basis. The information must be tailored to the specific facility, its emergency plan, and the intended audience.

BCMC

8.2.2 An elevator to be considered part of an accessible means of egress shall comply with the requirements of Section 211 of ASME/ANSI A17.1 and standby power shall be provided. The elevator shall be accessed from either an area of refuge complying with 9.0 or a horizontal exit.

EXCEPTION: Elevators are not required to be accessed by an area of refuge or a horizontal exit in occupancies equipped throughout with an automatic sprinkler system.

9.2 Each area of refuge shall be sized to accommodate one wheelchair space of 30 by 48 inches for each 200 occupants or portion thereof, based on the occupant load of the area of refuge and all areas served by the area of refuge. Such wheelchair spaces shall not reduce the

required means of egress width.
9.3 Access to any of the required wheelchair spaces in an area of refuge shall not be obstructed by more than one adjoining wheelchair space.
8.2.1 An exit stair to be considered part of an accessible means of egress shall have a clear width of at least 48 inches between handrails and shall either incorporate an area of refuge within an enlarged story-level landing or shall be accessed from either an area of refuge complying with 9.0 or a horizontal exit.
EXCEPTIONS:
1. Exit stairs serving a single dwelling unit or guest room.
2. Exit stairs serving occupancies protected throughout by an approved automatic sprinkler system.
3. The clear width of 48 inches between handrails is not required for exit stairs accessed from a horizontal exit.

Comments*

See above.

E. for total wheelchair spaces required. N.E. because BCMC fails to require 2 wheelchair spaces per area of refuge.

E.

01-03763

ADA Title III Requirements

4.3.11.4* Two-way Communication. A method of two-way communication, with both visible and audible signals, shall be provided between each area of rescue assistance and the primary entry. The fire department or appropriate local authority may approve a location other than the primary entry.
4.3.11.5 Identification. Each area of rescue assistance shall be identified by a sign which states "AREA OF RESCUE ASSISTANCE" and displays the international symbol of accessibility. The sign shall be illuminated when exit sign illumination is required. Signage shall also be installed at all inaccessible exits and where otherwise necessary to clearly indicate the direction to areas of rescue assistance. In each area of rescue assistance, instructions on the use of the area under emergency conditions shall be posted adjoining the two-way communication system.

CABO/ANSI A117.1-1992
BCMC

9.5 Every area of refuge shall be provided with a two-way communication system between the area of refuge and a central control point.
EXCEPTION: Buildings four stories or less in height.
9.6 In each area of refuge provided with a two-way emergency communication system, instructions on the use of the area under emergency conditions shall be posted adjoining the communication system. The instructions shall include:

1. Directions to other means of egress,

2. Advice that persons able to use the exit stairs do so as soon as possible unless they are assisting others,

3. Information on planned availability of assistance in the use of stairs or supervised operation of elevators and how to summon such assistance, and

4. Directions for use of the emergency communication system.

9.7 Each area of refuge shall be identified by a sign stating AREA OF REFUGE and the International Symbol of Accessibility. The sign shall be located at each door providing access to the area of refuge. The sign shall be illuminated as required for exit signs where exit sign illumination is required. Tactile signage complying with CABO/ANSI A117.1 (4.28) shall be located at each door to an area of refuge.

9.8 At all exits and elevators serving a required accessible space, but not providing an approved accessible means of egress, signage shall be installed indicating the location of accessible means of egress.

Comments*

9.5 - N.E. Needs visual and audible signals.

9.5 Exception - N.E. (No exemption regarding number of stories in ADA).

9.6 - Not comparable.

E.

01-03764

ADA Title III Requirements

4.4 Protruding Objects.

4.4.1* General. Objects projecting from walls (for example, telephones) with their leading edges between 27 in and 80 in (685 mm and 2030 mm) above the finished floor shall protrude no more than 4 in (100 mm) into walks, halls, corridors, passageways, or aisles (see Fig. 8(a)). Objects mounted with their leading edges at or below 27 in (685 mm) above the finished floor may protrude any amount (see Fig. 8(a) and (b)). Free-standing objects mounted on posts or pylons may overhang 12 in (305 mm) maximum from 27 in to 80 in (685 mm to 2030 mm) above the ground or finished floor (see Fig. 8(c) and (d)). Protruding objects shall not reduce the clear width of an accessible route or maneuvering space (see Fig. 8(e)).

4.4.2 Head Room. Walks, halls, corridors, passageways, aisles, or other circulation spaces shall have 80 in (2030 mm) minimum clear head room (see Fig. 8(a)). If vertical clearance of an area adjoining an accessible route is reduced to less than 80 in (nominal dimension), a barrier to warn blind or visually-impaired persons shall be provided (see Fig. 8(c-1)).

Figure 8 of the ADA Standards. Protruding Objects.

8(c-1) Overhead Hazards. As an example, the

diagram illustrates a stair whose underside descends across a pathway. Where the headroom is less than 80 in (2030 mm), protection is offered by a railing which can be no higher than 27 in (685 mm) to ensure detectability.

4.5 Ground and Floor Surfaces.

4.5.1* General. Ground and floor surfaces along accessible routes and in accessible rooms and spaces including floors, walks, ramps, stairs, and curb ramps, shall be stable, firm, slip-resistant, and shall comply with 4.5.

CABO/ANSI A117.1-1992

4.4 Protruding Objects*

Protruding objects shall comply with 4.4.

4.4.1 Objects with leading edges located more than 27 in and not more than 80 in (685 mm and 2030 mm) above the floor shall protrude from the wall 4 in (100 mm) maximum. See Fig. B4.4(a).

4.4.2 The protrusion of objects with leading edges located 27 in (685 mm) or less above the floor shall not be limited. See Fig. B4.4(a).

4.4.3 Free-standing objects mounted on posts or pylons shall be permitted to overhang 12 in (305 mm) maximum when located more than 27 in (685 mm) and not more than 80 in (2030 mm) above the ground or floor. See Fig. B4.4(b). Where a sign or other obstruction is mounted between posts or pylons and the clear distance between the posts or pylons is greater than 12 in (305 mm), the lowest edge of such sign or obstruction shall be either 27 in (685 mm) maximum or 80 in (2030 mm) minimum above the adjacent ground or floor surface. See Fig. B4.4(c).

4.4.5 Protruding objects shall not reduce the clear width required for accessible routes. See Fig. B4.4(e).

4.4.4 Guardrails or other barriers shall be provided when vertical clearance of an area adjoining an accessible route is less than 80 in (2030 mm) high. Leading edge of such guardrail or barrier shall be located 27 in (685 mm) maximum above the floor. See Fig. B4.4(c) and (d).

4.5 Ground and Floor Surfaces

4.5.1* General. Ground and floor surfaces of accessible routes and in accessible rooms and spaces, shall be stable, firm, and slip resistant, and shall comply with 4.5.

BCMC

14.1 Horizontal Projections. Objects projecting from walls with their leading edges located more than 27 and not more than 80 inches above the finished floor shall protrude no more than 4 inches into walks, corridors, passageways, or aisles. Free-standing objects mounted on

posts or pylons may overhang 12 inches maximum where located more than 27 and not more than 80 inches above the ground or finished floor.

14.2 Headroom. There shall be a minimum headroom of 6 ft 8 inches from the walking surface to the lowest part of any structural member, fixture or furnishing.

50 ADA/ANSI/BCMC Requirements - October 13, 1995

01-03765

ADA Title III Requirements

4.5.2 Changes in Level. Changes in level up to 1/4 in (6 mm) may be vertical and without edge treatment (see Fig. 7(c)). Changes in level between 1/4 in and 1/2 in (6 mm and 13 mm) shall be beveled with a slope no greater than 1:2 (see Fig. 7 (d)). Changes in level greater than 1/2 in (13 mm) shall be accomplished by means of a ramp that complies with 4.7 or 4.8.

4.5.3* Carpet. If carpet or carpet tile is used on a ground or floor surface, then it shall be securely attached; have a firm cushion, pad, or backing, or no cushion or pad; and have a level loop, textured loop, level cut pile, or level cut/uncut pile texture. The maximum pile thickness shall be 1/2 in (13 mm) (see Fig. 8(f)). Exposed edges of carpet shall be fastened to floor surfaces and have trim along the entire length of the exposed edge. Carpet edge trim shall

comply with 4.5.2.
4.5.4 Gratings. If gratings are located in walking surfaces, then they shall have spaces no greater than 1/2 in (13 mm) wide in one direction (see Fig. 8 (g)). If gratings have elongated openings, then they shall be placed so that the long dimension is perpendicular to the dominant direction of travel (see Fig. 8 (h)).
4.6 Parking and Passenger Loading Zones.
4.6.1 Minimum Number. Parking spaces required to be accessible by 4.1 shall comply with 4.6.2 through 4.6.5. Passenger loading zones required to be accessible by 4.1 shall comply with 4.6.5 and 4.6.6.
4.6.2 Location. Accessible parking spaces serving a particular building shall be located on the shortest accessible route of travel from adjacent parking to an accessible entrance. In parking facilities that do not serve a particular building, accessible parking shall be located on the shortest accessible route of travel to an accessible pedestrian entrance of the parking facility. In buildings with multiple accessible entrances with adjacent parking, accessible parking spaces shall be dispersed and located closest to the accessible entrances.

CABO/ANSI A117.1-1992

4.5.2* Changes in Level.
4.5.2.1 Changes in level of 1/4 in (6 mm) high maximum shall be permitted to be vertical and without edge treatment. See Fig. B4.5(a).
4.5.2.2 Changes in level between 1/4 in (6 mm) high minimum and 1/2 in (13 mm) high maximum shall be beveled with a slope not steeper than 1:2 maximum, as shown in Fig. B4.5(b).
4.5.2.3 Changes in level greater than 1/2 in (13 mm) shall be accomplished by a curb ramp, ramp or elevator that complies with 4.7, 4.8 or 4.10, respectively.
4.5.3* Carpet. Carpet or carpet tile used on a ground or floor surface shall be securely attached and shall have a firm cushion, pad, or backing or no cushion or pad. Carpet or carpet tile shall have a level loop, textured loop, level cut pile, or level cut/uncut pile texture. Pile height shall be 1/2 in (13 mm) maximum. Exposed edges of carpet shall be fastened to floor surfaces and shall have trim along the entire length of the exposed edge. Carpet edge trim shall comply with 4.5.2.
4.5.4. Gratings. Gratings located in accessible routes and spaces shall have openings no greater than 1/2 in (13 mm) wide in one direction. Gratings with elongated openings shall be placed so that the long dimension is perpendicular to the dominant direction of travel.

4.6 Parking Spaces and Passenger Loading Zones
4.6.1* General. Accessible parking spaces shall comply with 4.6.2. Accessible passenger loading zones shall comply with 4.6.3. Accessible parking spaces, access aisles and passenger loading zones shall have surface slopes not steeper than 1:48 in all directions. Access aisles serving accessible parking spaces or passenger loading zones shall be at the same level as the spaces or loading zones they serve.

BCMC

3.2.2 Accessible parking spaces shall be located on the shortest accessible route of travel from adjacent parking to an accessible building entrance. In parking facilities that do not serve a particular building, accessible parking spaces shall be located on the shortest route to an accessible pedestrian entrance of the parking facility.
3.2.3 In buildings with multiple accessible entrances with adjacent parking, accessible parking spaces shall be dispersed and located near the accessible entrances.
EXCEPTION: In multilevel parking structures, accessible van parking spaces shall not be required to be located on more than one level.

Comments*

E.
E.
E.
Exceeds. 1:48 is equivalent to 1:50. 2.08% vs. 2.0% is not a significant difference.
3.2.2. E.
3.2.3. P.N.E. Requires spaces to be "near" accessible entrance. ADA requires that they be "closest" to the entrances.
Exception - E. (see ADA Standard 4.1.2(5)(b)).

51 ADA/ANSI/BCMC Requirements - October 13, 1995
01-03766

ADA Title III Requirements

4.6.3* Parking Spaces. Accessible parking spaces shall be at least 96 in (2440 mm) wide. Parking access aisles shall be part of an accessible route to the building or facility entrance and shall comply with 4.3. Two accessible parking spaces may share a common access aisle (see Fig. 9). Parked vehicle overhangs shall not reduce the clear width of an accessible route. Parking spaces and access aisles shall be level with surface slopes not exceeding 1:50 (2%) in all directions.

Figure 9 of the ADA Standards. Dimensions of Parking Spaces.

The access aisle shall be a minimum of 60 in (1525 mm) wide for cars or a minimum of 96 in (2440 mm) wide for vans. The accessible route connected to the access aisle shall be a minimum of 36 in (915 mm) wide.

4.6.4* Signage. Accessible parking spaces shall be designated as reserved by a sign showing the symbol of accessibility (see 4.30.7). Spaces complying with 4.1.2(5)(b) shall have an additional sign "Van-Accessible" mounted below the symbol of accessibility. Such signs shall be located so they cannot be obscured by a vehicle parked in the space.

4.6.5* Vertical Clearance. Provide minimum vertical clearance of 114 in (2895 mm) at accessible passenger loading zones and along at least one vehicle access route to such areas from site entrance(s) and exit(s). At parking spaces complying with 4.1.2(5)(b), provide minimum vertical clearance of 98 in (2490 mm) at the parking space and along at least one vehicle access route to such spaces from site entrance(s) and exit(s).

4.6.6 Passenger Loading Zones. Passenger loading zones shall provide an access aisle at least 60 in (1525 mm) wide and 20 ft (240 in)(6100 mm) long adjacent and parallel to the vehicle pull-up space (see Fig. 10). If there are curbs between the access aisle and the vehicle pull-up space, then a curb ramp complying with 4.7 shall be provided. Vehicle standing spaces and access aisles shall be level with surface slopes not exceeding 1:50 (2%) in all directions.

4.7 Curb Ramps.

4.7.1 Location. Curb ramps complying with 4.7 shall be provided wherever an accessible route crosses a curb.

CABO/ANSI A117.1-1992

4.6.2* Parking Spaces. Parking spaces for persons with disabilities shall be 96 in (2440 mm) wide minimum and shall have an adjacent access aisle 60 in (1525 mm) wide minimum. See Fig. B4.6.2. Parking access aisles shall be part of the accessible route to the building or facility entrance and shall comply with 4.3. Two accessible parking spaces shall be permitted to share a common access aisle. Parked vehicle overhangs shall not reduce the clear width of an accessible circulation route.

4.6.2* . . . Accessible parking spaces shall be identified by a sign showing the international symbol of accessibility complying with 4.28.8. Signs shall not be obscured by a vehicle parked in the space.

4.6.3 Passenger Loading Zones. ...Vertical clearance of

114 in (2895 mm) minimum shall be provided at accessible passenger loading zones and along vehicle access routes to such areas from site entrances.

4.6.4* Van Parking Space. Accessible parking spaces for vans used by persons with disabilities shall have a height of 98 in (2490 mm) minimum at the space and along the vehicular route thereto and shall have an access aisle 96 in (2440 mm) wide minimum.

4.6.3 Passenger Loading Zones. Passenger loading zones shall provide an access aisle 60 in (1525 mm) wide minimum and 20 ft (6 m) long minimum adjacent and parallel to the vehicle pull-up space and at the same level as the roadway. See Fig. B4.6.3. Access aisle and vehicle pull-up space shall be at the same level with a slope not steeper than 1:48. Passenger loading zone access aisles shall be part of the accessible route of travel to the building or facility entrance and shall comply with 4.3.

4.7 Curb Ramps

4.7.1 Location. Curb ramps complying with 4.7 shall be provided wherever an accessible route crosses a curb.

BCMC
Comments*

E. (Slope limit of 1:48 in ANSI 4.6.1 above). 1:48 is equivalent to 1:50. 2.08% vs. 2.0% is not a significant difference.

N.E. No equivalent provision for "van-accessible" sign.

Exceeds. ANSI requires 114 in. height along all vehicle access routes to the loading zones, whereas ADA only requires one.

E.

E.

ADA Title III Requirements

4.7.2 Slope. Slopes of curb ramps shall comply with 4.8.2. The slope shall be measured as shown in Fig. 11. Transitions from ramps to walks, gutters, or streets shall be flush and free of abrupt changes. Maximum slopes of adjoining gutters, road surface immediately adjacent to the curb ramp, or accessible route shall not exceed 1:20.

Figure 11 of the ADA Standards. Measurement of Curb Ramp Slopes.

The ramp slope is a ratio expressed as the vertical rise divided by the horizontal run. The adjoining slope at walk or street shall not exceed 1:20.

4.7.3 Width. The minimum width of a curb ramp shall be 36 in (915 mm), exclusive of flared sides.

4.7.4 Surface. Surfaces of curb ramps shall comply with 4.5.

4.7.5 Sides of Curb Ramps. If a curb ramp is located where pedestrians must walk across the ramp, or where it is not protected by handrails or guardrail, it shall have flared sides; the maximum slope of the flare shall be 1:10 (see Fig. 12(a)). Curb ramps with returned curbs may be used where pedestrians would not normally walk across the ramp (see Fig. 12 (b)).

Figure 12 of the ADA Standards. Sides of Curb Ramps.

12(a) Flared Sides. If the landing depth at the top of a curb ramp is less than 48 in (1220 mm), then the slope of the flared side shall not be steeper than 1:12.

4.7.6 Built-up Curb Ramps. Built-up curb ramps shall be located so that they do not project into vehicular traffic lanes (see Fig. 13.

4.7.7 Detectable Warnings. A curb ramp shall have a detectable warning complying with 4.29.2. The detectable warning shall extend the full width and depth of the curb ramp. [Suspended until July 26, 1996. 28 C.F.R. S 36.407.]

4.7.8 Obstructions. Curb ramps shall be located or protected to prevent their obstruction by parked vehicles.

4.7.9 Location at Marked Crossings. Curb ramps at marked crossings shall be wholly contained within the markings, excluding any flared sides (see Fig. 15).

CABO/ANSI A117.1-1992

4.7.2 Slope. Slopes of curb ramps shall comply with 4.8.2. The slope shall be measured as the vertical rise relative to the horizontal run. See Fig. B4.7.2. Counter slopes of adjoining gutters and road surfaces immediately adjacent to the curb ramp or accessible route shall not be steeper than 1:20. Transitions from ramps to walks, gutters or streets shall be flush.

4.7.3 Width. Curb ramps shall be 36 in (915 mm) wide minimum, exclusive of flared sides.
4.7.4 Surface. Surfaces of curb ramps shall comply with 4.5.
4.7.5 Sides of Curb Ramps. Curb ramps located where pedestrians must walk across the ramp shall have flared sides. Slope of flares shall not be steeper than 1:10. See Fig. B4.7.5(a). Where the width of the walking surface at the top of the ramp and parallel to the run of the ramp is less than 48 in (1220 mm) wide, the flared sides shall have a slope not steeper than 1:12. Curb ramps with returned curbs shall be permitted where pedestrians would not normally walk across the ramp. See Fig. B4.7.5(b).
4.7.6 Built-Up Curb Ramps. Built-up curb ramps shall be located so that they do not protrude into vehicular traffic lanes or into parking space access aisles. Flare shall not be steeper than 1:10. See Fig. B4.7.6.
4.7.7 Obstructions. Curb ramps shall be located or protected to prevent their obstruction by parked vehicles.
4.7.9 Location at Marked Crossings. Curb ramps at marked crossing shall be wholly contained within the markings, excluding any flared sides. See Fig. B4.7.9.

E.
E.
E.
E.
E.
E.

4.7.10 Diagonal Curb Ramps. If diagonal (or corner type) curb ramps have returned curbs or other well-defined edges, such edges shall be parallel to the direction of pedestrian flow. The bottom of diagonal curb ramps shall have 48 in (1220 mm) minimum clear space as shown in Fig. 15 (c) and (d). If diagonal curb ramps are provided at marked crossings, the 48 in (1220 mm) clear space shall be within the markings (see Fig. 15(c) and (d)). If diagonal curb ramps have flared sides, they shall also have at least a 24 in (610 mm) long segment of straight curb located on each side of the curb ramp and within the marked crossing (see Fig. 15(c)).

4.7.11 Islands. Any raised islands in crossings shall be cut through level with the street or have curb ramps at both sides and a level area at least 48 in (1220 mm) long between the curb ramps in the part of the island intersected by the crossings (see Fig. 15(a) and (b)).

4.8 Ramps.

4.8.1* General. Any part of an accessible route with a slope greater than 1:20 shall be considered a ramp and shall comply with 4.8.

4.8.2* Slope and Rise. The least possible slope shall be used for any ramp. The maximum slope of a ramp in new construction shall be 1:12. The maximum rise for any run shall be 30 in (760 mm) (see Fig. 16). Curb ramps and ramps to be constructed on existing sites or in existing buildings or facilities may have slopes and rises as shown as allowed in 4.1.6(3)(a) if space limitations prohibit the use of a 1:12 slope or less (see 4.1.6).

Figure 16 of the ADA Standards. Components of a Single Ramp Run and Sample Ramp Dimensions.

If the slope of a ramp is between 1:12 and 1:16, the maximum rise shall be 30 in (760 mm) and the maximum horizontal run shall be 30 ft (9 m). If the slope of the ramp is between 1:16 and 1:20, the maximum rise shall be 30 in (760 mm) and the maximum horizontal run shall be 40 ft (12 m).

4.8.3 Clear Width. The minimum clear width of a ramp shall be 36 in (915 mm).

CABO/ANSI A117.1-1992

4.7.10 Diagonal Curb Ramps. Diagonal (or corner-type) curb ramps with returned curbs or other well-defined edges shall have the edges parallel to the direction of pedestrian flow. Bottoms of diagonal curb ramps shall have 48 in (1220 mm) minimum clear space. See Fig. B4.7.9(c) and (d). Diagonal curb ramps provided at marked crossings shall provide the 48 in (1220 mm) minimum clear space within the markings. See Fig. B4.7.9(c) and (d). Diagonal curb ramps with flared sides shall have a segment of straight curb 24 in (610 mm) long minimum located on each side of the curb ramp and within the marked crossing. See Fig. B4.7.9(c).

4.7.11 Islands. Raised islands in crossings shall be cut through level with the street or have curb ramps at both sides, and a level area 48 in (1220 mm) minimum by 36 in (915 mm) wide minimum, in the part of the island intersected by the crossing. See Fig. 4.7.9(a) and (b).

4.8 Ramps

4.8.1* General. A slope steeper than 1:20 shall be considered a ramp and shall comply with 4.8.

4.8.2* Slope and Rise. Ramps in new construction shall have a slope not steeper than 1:12. The rise for any ramp run shall be 30 in (760 mm) maximum. See Fig. B4.8.2. Curb ramps and ramps constructed on existing sites or existing buildings or facilities shall be permitted to have slopes and rises as shown in Table 4.8.2 provided space limitations prohibit use of a 1:12 slope or less.

4.8.3 Clear Width. The clear width of a ramp shall be 36 in (915 mm) minimum. See Fig. B4.8.3.

BCMC

17.1 Slope. Maximum slope in the direction of travel shall be 1:12. Maximum cross slope shall be 1:48.

EXCEPTIONS:

1. Maximum slope in direction of travel shall be 1:8 for a 3-inch rise maximum and 1:10 for a 6-inch rise maximum.
2. Aisles in Group A occupancies in accordance with Item 95 of the BCMC Means of Egress Report.

17.2 Rise. Maximum rise for a single ramp run shall be 30 inches.

EXCEPTION: Aisles in Group A occupancies in accordance with Item 95 of the BCMC Means of Egress Report.

Comments*

E.

E.

ANSI E. for technical requirement.

BCMC P.N.E. BCMC does not specifically scope ramps. However,

ANSI appears to require all ramps,
or at least all ramps in accessible
routes, to comply.

BCMC 17.1 - 1. N.E. for new
construction. E. for alterations.
2. N.E. if aisle is part of accessible
route.
17.2 - P.N.E. The ADA Standards
limit both the rise and the length of
ramps. BCMC limits only the rise.
E.

ADA Title III Requirements

4.8.4* Landings. Ramps shall have level landings at bottom and top of each ramp and each ramp run. Landings shall have the following features:

(1) The landing shall be at least as wide as the ramp run leading to it.

(2) The landing length shall be a minimum of 60 in (1525 mm) clear.

(3) If ramps change direction at landings, the minimum landing size shall be 60 in by 60 in (1525 mm by 1525 mm).

(4) If a doorway is located at a landing, then the area in front of the doorway shall comply with 4.13.6.

4.8.5* Handrails. If a ramp run has a rise greater than 6 in (150 mm) or a horizontal projection greater than 72 in (1830 mm), then it shall have handrails on both sides. Handrails are not required on curb ramps or adjacent to seating in assembly areas. Handrails shall comply with 4.26 and shall have the following features:

4.8.5 (1) Handrails shall be provided along both sides of ramp segments. The inside handrail on switchback or dogleg ramps shall always be continuous.

4.8.5 (2) If handrails are not continuous, they shall extend at least 12 in (305 mm) beyond the top and bottom of the ramp segment and shall be parallel with the floor or ground surface (see Fig. 17).

4.8.5 (3) The clear space between the handrail and the wall shall be 1-1/2 in (38 mm).

4.8.5 (4) Gripping surfaces shall be continuous.

4.8.5 (5) Top of handrail gripping surfaces shall be mounted between 34 in and 38 in (865 mm and 965 mm) above ramp surfaces.

4.8.5 (6) Ends of handrails shall be either rounded or returned smoothly to floor, wall, or post.

4.8.5 (7) Handrails shall not rotate within their fittings.

CABO/ANSI A117.1-1992

4.8.4 Landings. Ramps shall have level landings at bottom and top of each run. Landings shall have the following features:

-landing width shall be at least as wide as the widest ramp run leading to it.

-landing length shall be 60 in (1525 mm) minimum clear.

-ramps that change direction at landings shall have a 60 in by 60 in (1525 mm by 1525 mm) minimum landing.

-doorways located at a landing shall have an area in front of the doorway which shall comply with 4.13.6.

4.8.5 Handrails. Ramps with a rise greater than 6 in (150 mm) or a run greater than 72 in (1830 mm) shall have handrails complying with 4.3.10 and 4.3.11.

4.3.10* Handrails. Handrails for stairs and ramps shall comply with 4.3.10.

4.3.10.1 Handrails shall be provided on both sides of stairs and ramps.

Exception: Aisle stairs and aisle ramps provided with a handrail either at the side or within the aisle width.

4.3.10.2 Handrails shall be continuous within the full length of each stair flight or ramp run.

Exception: Handrails in aisles serving seating.

4.3.10.3 Inside handrails on switchback or dogleg stairs or ramps shall be continuous between flights or runs. See Fig. B4.3.10.3. Other handrails shall comply with 4.3.11 and 4.4.

Exception: Handrails in aisles serving seating.

4.3.11* Handrail Extensions. Handrails for stairs and ramps shall have extensions complying with 4.3.11.

Exception: Continuous handrails at the inside turn of stairs and ramps.

4.3.11.1 Ramp handrails shall extend horizontally 12 in (305 mm) minimum beyond the top and bottom of ramp runs. Such extension shall return to a wall, guard or the walking surface, or shall be continuous to the handrail of an adjacent ramp run. See Fig. B4.3.11.1.

4.3.10.5 Clear space between handrail and wall shall be 1 1/2 in (38 mm) minimum.

4.3.10.6 Gripping surfaces shall be continuous, without interruption by newel posts, other construction elements, or obstructions.

4.3.10.4 Top of gripping surfaces of handrails shall be 34 in (865 mm) minimum and 38 in (965 mm) maximum vertically above stair nosings and ramp surfaces. Handrails shall be at a consistent height above stair nosings and ramp surfaces.

BCMC

17.3 Landings. Ramps shall have landings at the top, bottom and at doors opening onto the ramp. Slope of landings shall not be steeper than 1:48.

17.4 Handrails. Ramps steeper than 1:20 shall be provided with handrails along both sides of a ramp segment and shall conform with the requirements in 16.4.1, 16.4.2 and 16.4.3. If handrails are not continuous, they shall extend at least 12 inches beyond the top and bottom of the ramp segment and shall be parallel with the floor or ground surface.

EXCEPTIONS:

1. Handrails are not required when the total rise is 6 inches or less.
2. Aisles in Group A occupancies in accordance with Item 96 of the BCMC Means of Egress Report.

4.7.8 Handrails. Handrails are not required on curb ramps.

17.5 Handrails. . . .If handrails are not continuous, they shall extend at least 12 inches beyond the top and bottom of the ramp segment and shall be parallel with the floor or ground surface.

Comments*

ANSI E.

BCMC (Mainstream) N.E. to ADA Standards 4.8.4(3) (change of direction).

ANSI E.

BCMC 17.4 - N.E. BCMC allows no rails on > 72 inch ramp as long as rise is < 6 inches - e.g. a 1:15 ramp that is 85 inches long has < 6 inch rise but is longer than 72 inches - ADA would require rails and BCMC would not.

Exception 2

P.E. if only "adjacent to seating."

4.7.8 - E.

17.5 - E.

01-03770

4.8.6 Cross Slope and Surfaces. The cross slope of ramp surfaces shall be no greater than 1:50. Ramp surfaces shall comply with 4.5.

4.8.7 Edge Protection. Ramps and landings with drop-offs shall have curbs, walls, railings, or projecting surfaces that prevent people from slipping off the ramp. Curbs shall be a minimum of 2 in (50 mm) high (see Fig. 17).

4.8.8 Outdoor Conditions. Outdoor ramps and their approaches shall be designed so that water will not accumulate on walking surfaces.

4.9 Stairs.

4.9.1* Minimum Number. Stairs required to be accessible by 4.1 shall comply with 4.9.

4.9.2 Treads and Risers. On any given flight of stairs, all steps shall have uniform riser heights and uniform tread widths. Stair treads shall be no less than 11 in (280 mm) wide, measured from riser to riser (see Fig. 18(a)). Open risers are not permitted.

4.9.3 Nosing. The undersides of nosing shall not be

abrupt. The radius of curvature at the leading edge of the tread shall be no greater than 1/2 in (13 mm). Risers shall be sloped or the underside of the nosing shall have an angle not less than 60 degrees from the horizontal. Nosing shall project no more than 1-1/2 in (38 mm) (see Fig. 18).

CABO/ANSI A117.1-1992

4.3.10.8 Handrails, and any wall or other surfaces adjacent to them, shall be free of any sharp or abrasive elements. Edges shall have 1/8 in (3.2 mm) minimum radius.

4.3.10.9 Handrails shall not rotate within their fittings.

4.8.6* Cross Slope and Surfaces. Cross slope of ramp surfaces shall not be steeper than 1:48. Ramp surfaces shall comply with 4.5.

4.8.7 Edge Protection. Ramps and landings shall have curbs, walls, or railings that prevent people from traveling off the ramp or landing or shall protrude 12 in (305 mm) minimum beyond the inside face of the railing. Curbs or barriers shall be 4 in (100 mm) high minimum. See Fig. B4.8.3.

4.8.8 Outdoor Conditions. Outdoor ramps and approaches to them shall be designed so that water will not accumulate on walking surfaces.

4.9 Stairs

4.9.1 General. Accessible stairs shall comply with 4.9.

4.9.2 Treads and Risers

4.9.2.1 Dimensions. All steps on a flight of stairs shall have uniform riser heights and uniform tread depth. Risers shall be 7 in (180 mm) maximum and 4 in (100 mm) high minimum. Treads shall be 11 in (280 mm) deep minimum, measured from riser to riser. See Fig. B4.9.2.1.

4.9.2.2 Open Risers. Open risers are not permitted.

4.9.3 Nosings. Undersides of nosings shall not be abrupt. The radius of curvature at the leading edge of tread shall be 1/2 in (13 mm) maximum. Risers shall be sloped or the underside of the nosing shall have an angle 60 degrees minimum from the horizontal. Nosings shall protrude 1 1/2 in (38 mm) maximum. See Fig. B4.9.2.1.

BCMC

17.1 Slope. Maximum slope in the direction of travel shall be 1:12. Maximum cross slope shall be 1:48.

17.6 Slip Resistance. Ramps shall have a slip resistant surface.

17.5 Drop-Offs. Ramps and landings with drop-offs shall have a curb with a minimum 4-inch height, wall, railing or a guardrail.

17.7 Water Accumulation. Exterior ramps and landings shall be designed so water will not accumulate on their

surfaces.
16.0 STAIRS
16.1 Treads and Risers. In Group R3 occupancies, riser heights shall be 7 inches maximum and 4 inches minimum. Tread depths shall be 11 inches minimum. The minimum depth of a winder is limited to 6 inches and the tread shall have a minimum depth of 11 inches at 12 inches from the narrower end.
Circular stairways shall be permitted as an egress element providing the minimum tread depth measured 12 inches from the narrower end of the tread is not less than 11 inches and the smaller radius is not less than twice the width of the stairway.
[Other tread/riser provisions in the BCMC Means of Egress Report remain unchanged.]
16.3 Leading Edge of Tread. The radius of curvature at the leading edge of the tread shall be no greater than 1/2 inch. Bevelling of nosings shall not exceed 1/2 inch. Risers shall be vertical or sloped from the underside of the leading edge of the tread above at an angle not more than 30 degrees from the vertical. The leading edge of tread shall project not more than 1 1/2 inches beyond the tread below.

ADA Title III Requirements

4.9.4 Handrails. Stairways shall have handrails at both sides of all stairs. Handrails shall comply with 4.26 and shall have the following features:

4.9.4 (1) Handrails shall be continuous along both sides of stairs. The inside handrail on switchback or dogleg stairs shall always be continuous (see Fig. 19(a) and (b)).

4.9.4 (2) If handrails are not continuous, they shall extend

at least 12 in (305 mm) beyond the top riser and at least 12 in (305 mm) plus the width of one tread beyond the bottom riser. At the top, the extension shall be parallel with the floor or ground surface. At the bottom, the handrail shall continue to slope for a distance of the width of one tread from the bottom riser; the remainder of the extension shall be horizontal (see Fig. 19(c) and (d)). Handrail extensions shall comply with 4.4.
4.9.4 (3) The clear space between handrails and wall shall be 1-1/2 in (38 mm).
4.9.4 (4) Gripping surfaces shall be uninterrupted by newel posts, other construction elements, or obstructions.
4.9.4 (5) Top of handrail gripping surface shall be mounted between 34 in and 38 in (865 mm and 965 mm) above stair nosing.
4.9.4 (6) Ends of handrails shall be either rounded or returned smoothly to floor, wall or post.
4.9.4 (7) Handrails shall not rotate within their fittings.

CABO/ANSI A117.1-1992

4.9.4 Handrails. Handrails shall comply with 4.3.10 and 4.3.11.
4.3.10* Handrails. Handrails for stairs and ramps shall comply with 4.3.10.
4.3.10.1 Handrails shall be provided on both sides of stairs and ramps.
Exception: Aisle stairs and aisle ramps provided with a handrail either at the side or within the aisle width.
4.3.10.2 Handrails shall be continuous within the full length of each stair flight or ramp run.
Exception: Handrails in aisles serving seating.
4.3.10.3 Inside handrails on switchback or dogleg stairs or ramps shall be continuous between flights or runs. See Fig. B4.3.10.3. Other handrails shall comply with 4.3.11 and 4.4.
Exception: Handrails in aisles serving seating.
4.3.10.5 Clear space between handrail and wall shall be 1 1/2 in (38 mm) minimum.
4.3.10.6 Gripping surfaces shall be continuous, without interruption by newel posts, other construction elements, or obstructions.
4.3.10.4 Top of gripping surfaces of handrails shall be 34 in (865 mm) minimum and 38 in (965 mm) maximum vertically above stair nosings and ramp surfaces. Handrails shall be at a consistent height above stair nosings and ramp surfaces.
4.3.10.8 Handrails, and any wall or other surfaces adjacent to them, shall be free of any sharp or abrasive elements. Edges shall have 1/8 in (3.2 mm) minimum

radius.
4.3.10.9 Handrails shall not rotate within their fittings.

BCMC

16.4 Handrails.
16.4.1 Stairways shall have handrails on each side.
EXCEPTIONS:
1. Aisle stairs in accordance with Item 96 of the BCMC Means of Egress Report provided with a handrail either at the side or within the aisle width.
2. Stairs within dwelling units, spiral stairs and aisle stairs serving seating only on one side may have a handrail on one side only.
16.4.4 At locations where handrails are not continuous between flights, the handrails shall extend horizontally at least 12 inches beyond the top riser and continue to slope for the depth of one tread beyond the bottom riser.
EXCEPTIONS:
1. Handrails within a dwelling unit shall extend from the top riser to the bottom riser.
2. Aisle handrails in Group A occupancies in accordance with Item 96 of the BCMC Means of Egress Report.
16.4.5 Clear space between handrail and wall shall be a minimum of 1 1/2 inches.
16.4.3 Gripping surfaces shall be continuous, without interruption by newel posts or other obstructions.

ADA Title III Requirements

4.9.5 Detectable Warnings at Stairs. (Reserved).

4.9.6 Outdoor Conditions. Outdoor stairs and their approaches shall be designed so that water will not accumulate on walking surfaces.

4.10 Elevators.

4.10.1 General. Accessible elevators shall be on an accessible route and shall comply with 4.10 and with the ASME A17.1-1990, Safety Code for Elevators and Escalators. Freight elevators shall not be considered as meeting the requirements of this section unless the only elevators provided are used as combination passenger and freight elevators for the public and employees.

CABO/ANSI A117.1-1992

4.3.11* Handrail Extensions. Handrails for stairs and ramps shall have extensions complying with 4.3.11. Exception: Continuous handrails at the inside turn of stairs and ramps.

4.3.11.1 Ramp handrails shall extend horizontally 12 in (305 mm) minimum beyond the top and bottom of ramp runs. Such extension shall return to a wall, guard or the walking surface, or shall be continuous to the handrail of an adjacent ramp run. See Fig. B4.3.11.1.

4.3.11.2 At the top of a stair flight, handrails shall extend horizontally above the landing for 12 in (305 mm) minimum beginning directly above the first riser nosing. Such extension shall return to a wall, guard or the walking surface, or shall be continuous to the handrail of an adjacent stair flight. See Fig. B4.3.11.2.

4.3.11.3 At the bottom of a stair flight, handrails shall extend at the slope of the stair flight for a horizontal distance equal to one tread depth beyond the last riser nosing. Such extension shall continue with a horizontal extension complying with 4.3.11(4) or shall return to a wall, guard or the walking surface. See Fig. B4.3.11.3.

4.3.11.4 At the bottom of a stair flight, where a guard or wall is located so as to permit a 12 in (305 mm) minimum horizontal extension of the handrail, in addition to the extension required by 4.3.11(3), such a 12 in (305 mm) minimum extension shall be provided. The height of this extension shall equal the height of the handrail above the stair nosing. Such extension shall return to a wall, guard or the walking surface, or shall be continuous to the handrail of an adjacent stair flight. See Fig. B4.3.11.4.

4.9.5 Outdoor Conditions. Outdoor stairs and approaches to them shall be designed so that water will not accumulate on walking surfaces.

4.10 Elevators

4.10.1 New Elevators

4.10.1.1* General. Accessible passenger elevators shall comply with 4.10 and ASME/ANSI A17.1. Freight elevators shall not be considered as meeting the requirements of this section unless the only elevators provided are used as combination passenger and freight elevators.

BCMC

18.0 ELEVATORS

Passenger elevators shall comply with ASME/ANSI A17.1 and CABO/ANSI A117.1 (4.10).

Comments*

E. Generally equivalent.

EXCEPT

4.3.11.4 - N.E. Although this exception avoids protrusions into circulation space, at least a 4 in. extension or extension around a corner should be required.

E.

E.

01-03773

4.10.2 Automatic Operation. Elevator operation shall be automatic.

Each car shall be equipped with a self-leveling feature that will automatically bring the car to floor landings within a tolerance of 1/2 in (13 mm) under rated loading to zero loading conditions. This self-leveling feature shall be automatic and independent of the operating device and shall correct the overtravel or undertravel.

4.10.3 Hall Call Buttons. Call buttons in elevator lobbies and halls shall be centered at 42 in (1065 mm) above the floor. Such call buttons shall have visual signals to indicate when each call is registered and when each call is answered. Call buttons shall be a minimum of 3/4 in (19 mm) in the smallest dimension. The button designating the up direction shall be on top (see Fig. 20)). Buttons shall be raised or flush. Objects mounted beneath hall call buttons shall not project into the elevator lobby more than 4 in (100 mm).

4.10.4 Hall Lanterns. A visible and audible signal shall be provided at each hoistway entrance to indicate which car is answering a call. Audible signals shall sound once for the up direction and twice for the down direction or shall have verbal annunciators that say "up" or "down." Visible signals shall have the following features:

(1) Hall lantern fixtures shall be mounted so that their centerline is at least 72 in (1830 mm) above the lobby floor (see Fig. 20).

(2) Visual elements shall be at least 2-1/2 in (64 mm) in the smallest dimension.

(3) Signals shall be visible from the vicinity of the hall call button (see Fig. 20). In-car lanterns located in cars, visible from the vicinity of hall call buttons, and conforming to the above requirements, shall be acceptable.

4.10.5 Raised and Braille Characters on Hoistway Entrances. All elevator hoistway entrances shall have raised and Braille floor designations provided on both jambs. The centerline of the characters shall be 60 in (1525 mm) above finish floor. Such characters shall be 2 in (50 mm) high and shall comply with 4.30.4.

Permanently applied plates are acceptable if they are permanently fixed to the jambs (see Fig. 20).

CABO/ANSI A117.1-1992

4.10.1.2 Automatic Operations. Elevator operation shall be automatic. Each car shall be equipped with a self-leveling feature that will automatically bring the car to floor landings within a tolerance of 1/2 in (13 mm) under rated loading to zero loading conditions. This self-leveling feature shall be automatic and independent of the operable part and shall correct for overtravel or undertravel.

4.10.1.3 Call Buttons. Call buttons in elevator lobbies and halls shall be centered at 42 in (1065 mm) above the floor, as shown in Fig. B4.10.1. Such call buttons shall have visual signals to indicate when each call is registered and when each call is answered. Call buttons shall be 3/4 in (19 mm) minimum in the smallest dimension. The button that designates the up direction shall be located above the button that designates the down direction. Objects located beneath hall call buttons shall protrude into the elevator lobby 4 in (100 mm) maximum.

4.10.1.4 Hall Signals. A visible and audible signal shall be provided at each hoistway entrance to indicate which car is answering a call and the direction of travel, except that in-car signals located in cars, visible from the floor area adjacent to the hall call buttons, and conforming to the requirements of this subsection, shall be acceptable. Audible signals shall sound once for the up direction and twice for the down direction, or shall have verbal annunciators that state the word "up" or "down." Visible signals shall have the following features:

- Hall signal fixtures shall be centered at 72 in (1830 mm) minimum above the lobby floor. See Fig. B4.10.1.
- The visible signal elements shall be 2 1/2 in (63 mm) minimum in the smallest dimension.
- Signals shall be visible from the floor area adjacent to the hall call button.

4.10.1.5* Tactile Signage on Hoistway Entrances. Raised character and Braille floor designations shall be provided on both jambs of elevator hoistway entrances and shall be centered at 60 in (1525 mm) above the floor. See Fig. B4.10.1. Such characters shall be 2 in (51 mm) high nominal and shall comply with 4.28.6.

BCMC

Comments*

E.

N.E. ANSI allows recessed buttons which are not allowed in ADA Standards. Raised or flush buttons

allow people with limited manual dexterity to activate them with an open hand or closed fist.
E.
E.
59 ADA/ANSI/BCMC Requirements - October 13, 1995
01-03774

ADA Title III Requirements

4.10.6* Door Protective and Reopening Device. Elevator doors shall open and close automatically. They shall be provided with a reopening device that will stop and reopen a car door and hoistway door automatically if the door becomes obstructed by an object or person. The device shall be capable of completing these operations without requiring contact for an obstruction passing through the opening at heights of 5 in and 29 in (125 mm and 735 mm) above finish floor (see Fig. 20). Door reopening devices shall remain effective for at least 20 seconds. After such an interval, doors may close in accordance with the requirements of ASME A17.1-1990.

4.10.7* Door and Signal Timing for Hall Calls. The minimum acceptable time from notification that a car is answering a call until the doors of that car start to close shall be calculated from the following equation:

T = D/(1.5 ft/s) or T = D/(445 mm/s)

where T total time (in seconds) and D distance (in feet or millimeters) from a point in the lobby or corridor 60 in (1525 mm) directly in front of the farthest call button controlling that car to the centerline of its hoistway door (see Fig. 21). For cars with in-car lanterns, T begins when the lantern is visible from the vicinity of hall call buttons and an audible signal is sounded. The minimum acceptable notification time shall be 5 seconds.

4.10.8 Door Delay for Car Calls. The minimum time for elevator doors to remain fully open in response to a car call shall be 3 seconds.

CABO/ANSI A117.1-1992

4.10.1.6* Door Protective and Reopening Device. Elevator doors shall open and close automatically. Elevator

doors shall be provided with a reopening device that shall stop and reopen a car door and hoistway door automatically if the door becomes obstructed by an object or person. The device shall be activated by sensing an obstruction passing through the door opening at 5 in and at 29 in (125 mm and 735 mm) above the floor. The device shall not require physical contact to be activated, although contact may occur before the door reverses. Door reopening devices shall remain effective for 20 seconds minimum.

4.10.1.7* Door and Signal Timing for Hall Calls. The minimum acceptable time from notification that a car is answering a call until the doors of that car start to close shall be calculated from one of the following equations:

T =

OR

T = = 5 seconds minimum

where T = total time in seconds and D = distance (in feet or millimeters) from the point in the lobby or corridor 60 in (1525 mm) directly in front of the farthest call button controlling that car to the centerline of its hoistway door. For cars with in-car signals, T begins when the signal is visible from the point 60 in (1525 mm) directly in front of the farthest hall call button and the audible signal is sounded.

4.10.1.8 Door Delay for Car Calls. Elevator doors shall remain fully open in response to a car call for 3 seconds minimum.

ADA Title III Requirements

4.10.9 Floor Plan of Elevator Cars. The floor area of elevator cars shall provide space for wheelchair users to enter the car, maneuver within reach of controls, and exit from the car. Acceptable door opening and inside dimensions shall be as shown in Fig. 22. The clearance between the car platform sill and the edge of any hoistway landing shall be no greater than 1-1/4 in (32 mm).

Figure 22 of the ADA Standards. Minimum Dimensions of Elevator Cars.

22(a) Illustrates an elevator with a door providing a 36 in (915 mm) minimum clear width, in the middle of the elevator. The width of the elevator car is a minimum of 80 in (2030 mm). The depth of the elevator car measured from the back wall to the elevator door is a minimum of 54 in (1370 mm). The depth of the elevator car measured from the back wall to the control panel is a minimum of 51 in (1291 mm).

22(b) Illustrates an elevator with door providing a minimum 36 in (915 mm) clear width, located to one side of the elevator. The width of the elevator car is a minimum of 68 in (1730 mm). The depth of the elevator car measured from the back wall to the elevator door is a minimum of 54 in (1370 mm). The depth of the elevator

car measured from the back wall to the control panel is a minimum of 51 in (1291 mm).
4.10.10 Floor Surfaces. Floor surfaces shall comply with 4.5.
4.10.11 Illumination Levels. The level of illumination at the car controls, platform, and car threshold and landing sill shall be at least 5 footcandles (53.8 lux).

CABO/ANSI A117.1-1992

4.10.1.9* Inside Dimensions of Elevator Cars. The inside dimensions of elevator cars shall provide space for wheelchair users to enter the car, maneuver within reach of controls, and exit from the car. The clearance between the car platform sill and the edge of any hoistway landing shall be
1 1/4 in (32 mm) maximum.
4.10.1.10 Floor Surfaces. Floor surfaces in elevator cars shall comply with 4.5.
4.10.1.11 Illumination Levels. The level of illumination at the car controls, platform, and car threshold and landing sill shall be 5 footcandles (53.8 lux) minimum.

BCMC

01-03776

ADA Title III Requirements

4.10.12* Car Controls. Elevator control panels shall have the following features:
(1) Buttons. All control buttons shall be at least 3/4 in (19 mm) in their smallest dimension. They shall be raised or flush.
(2) Tactile, Braille, and Visual Control Indicators. All control buttons shall be designated by Braille and by raised standard alphabet characters for letters, Arabic characters for numerals, or standard symbols as shown in Fig. 23(a), and as required in ASME A17.1-1990. Raised and Braille characters and symbols shall comply with 4.30. The call button for the main entry floor shall be designated by a raised star at the left of the floor designation (see Fig. 23(a)). All raised designations for control buttons shall be placed immediately to the left of the button to which they apply. Applied plates, permanently attached, are an acceptable means to provide raised control designations. Floor buttons shall be provided with visual indicators to show when each call is registered. The visual indicators

shall be extinguished when each call is answered.
(3) Height. All floor buttons shall be no higher than 54 in (1370 mm) above the finish floor for side approach and 48 in (1220 mm) for front approach. Emergency controls, including the emergency alarm and emergency stop, shall be grouped at the bottom of the panel and shall have their centerlines no less than 35 in (890 mm) above the finish floor (see Fig. 23(a) and (b)).
Figure 23 of the ADA Standards. Car Controls.
23(a) Panel Detail. The diagram illustrates the symbols used for the following control buttons: main entry floor, door closed, door open, emergency alarm, and emergency stop. The diagram further states that the octagon symbol for the emergency stop shall be raised but the X (inside the octagon) is not.
(4) Location. Controls shall be located on a front wall if cars have center opening doors, and at the side wall or at the front wall next to the door if cars have side opening doors (see Fig. 23(c) and (d)).
CABO/ANSI A117.1-1992
4.10.1.12* Car Controls. Elevator control panels shall have the following features:
4.10.1.12.1 Control buttons shall be 3/4 in (19 mm) minimum in their smallest dimension. Control buttons shall be raised, flush, or recessed.
Control buttons shall be arranged with numbers in ascending order. When two or more columns of buttons are provided they shall read from left to right. See Fig. B4.10.1.12(a).
4.10.1.12.3 Floor buttons shall be located 54 in (1370 mm) maximum above the floor for parallel approach and 48 in (1220 mm) maximum for front approach. Emergency controls, including the emergency alarm, shall be grouped at the bottom of the panel. Emergency control buttons shall have their centerlines 35 in (890 mm) minimum above the floor. See Fig. B4.10.1.12(c).
4.10.1.12.4 Controls shall be located on a front wall if cars have center opening doors, and at the side wall or at the front wall next to the door if cars have side opening doors.
BCMC
Comments*
N.E. ADA requires raised or flush buttons so they can be activated by an open hand or closed fist. ANSI fails to require Braille designation.
Paragraph about arrangement of control buttons exceeds ADA.

ADA Title III Requirements
4.10.13* Car Position Indicators. In elevator cars, a visual car position indicator shall be provided above the car control panel or over the door to show the position of the elevator in the hoistway. As the car passes or stops at a floor served by the elevators, the corresponding numerals shall illuminate, and an audible signal shall sound. Numerals shall be a minimum of 1/2 in (13 mm) high. The audible signal shall be no less than 20 decibels with a frequency no higher than 1500 Hz. An automatic verbal announcement of the floor number at which a car stops or which a car passes may be substituted for the audible

signal.
4.10.14* Emergency Communications. If provided, emergency two-way communication systems between the elevator and a point outside the hoistway shall comply with ASME A17.1-1990. The highest operable part of a two-way communication system shall be a maximum of 48 in (1220 mm) from the floor of the car. It shall be identified by a raised symbol and lettering complying with 4.30 and located adjacent to the device. If the system uses a handset then the length of the cord from the panel to the handset shall be at least 29 in (735 mm). If the system is located in a closed compartment the compartment door hardware shall conform to 4.27, Controls and Operating Mechanisms. The emergency intercommunication system shall not require voice communication.
4.11 Platform Lifts (Wheelchair Lifts).
4.11.1 Location. Platform lifts (wheelchair lifts) permitted by 4.1 shall comply with the requirements of 4.11.
4.11.2* Other Requirements. If platform lifts (wheelchair lifts) are used, they shall comply with 4.2.4, 4.5, 4.27, and ASME A17.1 Safety Code for Elevators and Escalators, Section XX, 1990.
4.11.3 Entrance. If platform lifts are used then they shall facilitate unassisted entry, operation, and exit from the lift in compliance with 4.11.2.
4.12 Windows.
4.12.1* General. (Reserved).
4.12.2* Window Hardware. (Reserved).
CABO/ANSI A117.1-1992
4.10.1.13* Car Position Indicators. In elevator cars, both audible and visible car floor location indicators shall be provided.
4.10.1.13.1 Visible. Indicator shall be located above the car control panel or above the door. Numerals shall be 1/2 in (13 mm) minimum. As the car passes or stops at a floor served by the elevator, the corresponding character shall illuminate.
4.10.1.13.2 Audible. Indicator shall be 20 decibels minimum with a frequency of 1500 Hz maximum above ambient. Indicator shall be either an audible signal which sounds when the car passes a floor and when a car stops at a floor served by the elevator, or an automatic verbal announcement which announces the floor at which the car has stopped.
4.10.1.14* Emergency Communications. If provided, car emergency signaling devices between the elevator and a point outside the hoistway shall comply with ASME/ANSI

A17.1. The highest operable part of a two-way communication system shall be 54 in (1370 mm) maximum above the floor for parallel approach and 48 in (1220 mm) maximum above the floor for front approach. If the device is located in a closed compartment, the compartment door hardware shall comply with 4.25. The device shall be identified by raised symbols and lettering complying with 4.28 and located adjacent to the device. If the system uses a handset, the cord from the panel to the handset shall be 29 in (735 mm) long minimum. The car emergency signaling device shall not be limited to voice communication. If instructions for use are provided, essential information shall be presented in both tactile and visual form.

4.11 Wheelchair Lifts

Wheelchair lifts, if provided, shall comply with ASME/ANSI A17.1 and with 4.2.4, 4.5 and 4.25. Wheelchair lifts shall not require an attendant for operation.

4.12 Windows*

Windows that are required to be operable by occupants in accessible spaces shall have locks, cranks and other window hardware that comply with 4.25.

BCMC

Comments*

E.

N.E. ANSI allows a 54 inch side reach to highest operable part.

P.N.E. ADA Standards require unassisted entry, operation and exit. This is not the same as "shall not require an attendant for operation." One might still have to go into building to hunt for a key.

Exceeds.

01-03778

ADA Title III Requirements

4.13 Doors.

4.13.1 General. Doors required to be accessible by 4.1 shall comply with the requirements of 4.13.

4.13.2 Revolving Doors and Turnstiles. Revolving doors or turnstiles shall not be the only means of passage at an accessible entrance or along an accessible route. An accessible gate or door shall be provided adjacent to the turnstile or revolving door and shall be so designed as to facilitate the same use pattern.
4.13.3 Gates. Gates, including ticket gates, shall meet all applicable specifications of 4.13.
4.13.4 Double-Leaf Doorways. If doorways have two independently operated door leaves, then at least one leaf shall meet the specifications in 4.13.5 and 4.13.6. That leaf shall be an active leaf.
4.13.5 Clear Width. Doorways shall have a minimum clear opening of 32 in (815 mm) with the door open 90 degrees, measured between the face of the door and the opposite stop (see Fig. 24(a), (b), (c), and (d)). Openings more than 24 in (610 mm) in depth shall comply with 4.2.1 and 4.3.3 (see Fig. 24 (e)).
EXCEPTION: Doors not requiring full user passage, such as shallow closets, may have the clear opening reduced to 20 in (510 mm) minimum.
CABO/ANSI A117.1-1992
4.13 Doors
4.13.1 General. Accessible doors shall comply with the requirements of 4.13.
4.13.2 Revolving Doors and Turnstiles. Accessible revolving doors or turnstiles shall comply with 4.13.
4.13.3 Gates. Gates, including ticket gates, shall comply with 4.13.
4.13.4. Double-Leaf Doorways. At least one of the active leaves of doorways with two independently operated leaves serving non-storage areas shall comply with 4.13.5 and 4.13.6.
4.13.5 Clear Width. Doorways shall have a clear opening of 32 in (815 mm) minimum with door open 90 degrees. Clear opening shall be measured between the face of door and stop. See Fig. B4.13.5. Openings more than 24 in (610 mm) deep shall comply with 4.2.1 and 4.3.3.
BCMC
15.1 Doorway Width. Doorways shall have a minimum clear width of 32 inches.
EXCEPTIONS:
1. Doorways not required for means of egress in Group R2 and R3 occupancies.
2. Group I3 occupancies.
3. Storage closets less than 10 sq ft in area and less than or equal to 24 inches in depth.
4. Revolving doors.

5. Interior egress doorways within a dwelling unit not required to be adaptable or accessible shall have a minimum clear width of 29 3/4 inches.

Comments*

E.

N.E. The ADA prohibits revolving doors as accessible entrances or as part of the only means of passage at accessible routes. Although an accessible revolving door might constitute equivalent facilitation, merely complying with 4.13 will not make a revolving door accessible. The dimensions, speed, and weight of the door itself must also be addressed.

E.

P.N.E. Allows storage areas to have double-leaf doors that are not accessible. This is alright if limited to small closets.

ANSI E.

BCMC 15.1 E. except exceptions:

2. P.N.E.

3. E.

4. E.

5. N.E. to the extent this exempts dwelling units in transient lodging.

ADA Title III Requirements
4.13.6 Maneuvering Clearances at Doors. Minimum maneuvering clearances at doors that are not automatic or power-assisted shall be as shown in Fig. 25. The floor or ground area within the required clearances shall be level and clear.
EXCEPTION: Entry doors to acute care hospital bedrooms for in-patients shall be exempted from the requirement for space at the latch side of the door (see dimension "x" in Fig. 25) if the door is at least 44 in (1120 mm) wide.
Figure 25 of the ADA Standards. Maneuvering Clearances at Doors. NOTE: All doors in alcoves shall comply with the clearances for front approaches.
25(a) Front Approaches - Swinging Doors. Front approaches to pull side of swinging doors shall have maneuvering space that extends 18 in (455 mm) minimum beyond the latch side of the door and 60 in (1525 mm) minimum perpendicular to the doorway.
Front approaches to push side of swinging doors, if equipped with both closer and latch, shall have maneuvering space that extends 12 in (305 mm) minimum beyond the latch side of the door and 48 in (1220 mm) minimum perpendicular to the doorway.
Front approaches to push side of swinging doors, if not equipped with latch and closer, shall have maneuvering space that is the same width as door opening and extends 48 in (1220 mm) minimum perpendicular to the doorway.
CABO/ANSI A117.1-1992
4.13.6 Maneuvering Clearances at Doors. Minimum maneuvering clearances shall comply with 4.13.6.
4.13.6.15 Floor or ground surfaces within the required maneuvering spaces shall have a slope not steeper than 1:48 and shall be clear.
4.13.6.14 Doors in alcoves shall comply with 4.13.6.1, 4.13.6.2 and 4.13.6.7, clearances for front approach.
4.13.6.16 Doors to hospital bedrooms shall be exempt from the requirement for space at the latch side of door provided the door is 44 in (1120 mm) wide minimum.
4.13.6.1 Front approaches to pull side of swinging doors shall have maneuvering space that extends 18 in (455 mm) minimum beyond the latch side of the door and 60 in (1525 mm) minimum perpendicular to the doorway. See Fig. B4.13.6(a).
4.13.6.2 Front approaches to push side of swinging doors,

equipped with both closer and latch, shall have maneuvering space that extends 12 in (305 mm) minimum beyond the latch side of the door and 48 in (1220 mm) minimum perpendicular to the doorway. See Fig. B4.13.6(a).

4.13.6.3 Front approaches to push side of swinging doors, not equipped with latch and closer, shall have maneuvering space that is the same width as door opening and extends 48 in (1220 mm) minimum perpendicular to the doorway. See Fig. B4.13.6(a).

BCMC

15.3.1 The floor surface on both sides of a door shall be at the same elevation. The floor surface over which the door swings shall extend from the door in the closed position a distance equal to the door width.

EXCEPTIONS:

1. Exterior doors not on an accessible route.
2. Variations in elevation due to differences in finish materials, but not more than 1/2 inch.

Comments*

ANSI 4.13.6 - E. (exceeds because no exemption given for automatic doors.)

4.13.6.14 - P.N.E. More specific than ADA Standards but not sure language is correct. 4.13.6.7 is not a front approach and this requirement conflicts with perpendicular dimension of 4.13.6.1. Need to drop the reference to 4.13.6.7.

4.13.6.15 - E.

4.13.6.16 - N.E. Exemption is given to all hospital bedrooms not just acute care bedrooms.

BCMC N.E. Does not provide sufficient maneuvering space.

E.

ADA Title III Requirements

25(b) Hinge Side Approaches. Hinge-side approaches to pull side of swinging doors shall have maneuvering space that extends 36 in (915 mm) minimum beyond the latch side of the door if 60 in (1525 mm) minimum is provided perpendicular to the doorway or maneuvering space that extends 42 in (1065 mm) minimum beyond the latch side of the door if 54 in (1370 mm) minimum is provided perpendicular to the doorway.

Hinge-side approaches to push side of swinging doors, if not equipped with both latch and closer, shall have a maneuvering space of 54 in (1370 mm) minimum parallel to the doorway, extending from the latch side to beyond the hinge side, and 42 in (1065 mm) minimum perpendicular to the doorway. (1220 mm) minimum perpendicular to the doorway.

Hinge side approaches to push side of swinging doors, if equipped with both latch and closer, shall have maneuvering space of 54 in (1370 mm) minimum parallel to the doorway, extending from the latch side to beyond the hinge side, and 48 in (1220 mm) minimum perpendicular to the doorway.

25(c) Latch Side Approaches -- Swinging Doors.

Latch-side approaches to pull side of swinging doors that have closers shall have maneuvering space that extends 24 in (610 mm) minimum beyond the latch side of the door and 54 in (1370 mm) minimum perpendicular to the doorway.

Latch-side approaches to pull side of swinging doors, if not equipped with closers, shall have maneuvering space that extends 24 in (610 mm) minimum beyond the latch side of the door and 48 in (1220 mm) minimum perpendicular to the doorway.

Latch-side approaches to push side of swinging doors that have closers shall have maneuvering space that extends 24 in (610 mm) minimum parallel to the doorway

beyond the latch side of the door and 48 in (1220 mm) minimum perpendicular to the doorway.
Latch-side approaches to push side of swinging doors, if not equipped with closers, shall have maneuvering space that extends 24 in (610 mm) minimum parallel to the doorway beyond the latch side of the door and 42 in (1065 mm) minimum perpendicular to the doorway.
CABO/ANSI A117.1-1992
4.13.6.4 Hinge-side approaches to pull side of swinging doors shall have maneuvering space that extends 36 in (915 mm) minimum beyond the latch side of the door if 60 in (1525 mm) minimum is provided perpendicular to the doorway, or shall have maneuvering space that extends 42 in (1065 mm) minimum beyond the latch side of the door if 54 in (1370 mm) minimum is provided perpendicular to the doorway. See Fig. B4.13.6(b).
4.13.6.5 Hinge-side approaches to push side of swinging doors, not equipped with both latch and closer, shall have a maneuvering space of 54 in (1370 mm) minimum, parallel to the doorway and 42 in (1065 mm) minimum, perpendicular to the doorway. See Fig. B4.13.6(b).
4.13.6.6 Hinge-side approaches to push side of swinging doors, equipped with both latch and closer, shall have maneuvering space of 54 in (1370 mm) minimum, parallel to the doorway, 48 in (1220 mm) minimum perpendicular to the doorway. See Fig. B4.13.6(b).
4.13.6.7 Latch-side approaches to pull side of swinging doors, with closers, shall have maneuvering space that extends 24 in (610 mm) minimum beyond the latch side of the door and 54 in (1370 mm) minimum perpendicular to the doorway. See Fig. B4.13.6(c).
4.13.6.8 Latch-side approaches to pull side of swinging doors, not equipped with closers, shall have maneuvering space that extends 24 in (610 mm) minimum beyond the latch side of the door and 48 in (1220 mm) minimum perpendicular to the doorway. See Fig. B4.13.6(c).
4.13.6.9 Latch-side approaches to push side of swinging doors, with closers, shall have maneuvering space that extends 24 in (610 mm) minimum parallel to the doorway beyond the latch side of the door and 48 in (1220 mm) minimum perpendicular to the doorway. See Fig. B4.13.6(c).
4.13.6.10 Latch-side approaches to push side of swinging doors, not equipped with closers, shall have maneuvering space that extends 24 in (610 mm) minimum parallel to the doorway beyond the latch side of the door and 42 in (1065 mm) minimum perpendicular to the doorway. See

Fig. B4.13.6(c).
BCMC
Comments*
N.E. In #5 and #6, ANSI fails to specify that the 54 in. must be measured from the latch side.
E.
66 ADA/ANSI/BCMC Requirements - October 13, 1995
01-03781

ADA Title III Requirements
25(d) Front Approach - Sliding Doors and Folding Doors. Front approaches to sliding doors and folding doors shall have maneuvering space that is the same width as the door opening extending 48 in (1220 mm) minimum perpendicular to the doorway.
25(e) Slide-side approaches to sliding doors and folding doors shall have a maneuvering space of 54 in (1370 mm) minimum parallel to the doorway, extending from the latch side to beyond the hinge side, and 42 in (1065 mm) minimum perpendicular to the doorway.
25(f) Latch Side Approach - Sliding Doors and Folding Doors. Latch-side approaches to sliding doors and folding doors shall have a maneuvering space that extends 24 in (610 mm) minimum beyond the latch side of the door and extends 42 in (1065 mm) minimum perpendicular to the doorway.
4.13.7 Two Doors in Series. The minimum space between two hinged or pivoted doors in series shall be 48 in (1220 mm) plus the width of any door swinging into the space. Doors in series shall swing either in the same direction or away from the space between the doors (see Fig. 26).
4.13.8* Thresholds at Doorways. Thresholds at doorways shall not exceed 3/4 in (19 mm) in height for exterior sliding doors or 1/2 in (13 mm) for other types of doors. Raised thresholds and floor level changes at accessible doorways shall be beveled with a slope no greater than 1:2 (see 4.5.2).

4.13.9* Door Hardware. Handles, pulls, latches, locks, and other operating devices on accessible doors shall have a shape that is easy to grasp with one hand and does not require tight grasping, tight pinching, or twisting of the wrist to operate. Lever-operated mechanisms, push-type mechanisms, and U-shaped handles are acceptable designs. When sliding doors are fully open, operating hardware shall be exposed and usable from both sides. Hardware required for accessible door passage shall be mounted no higher than 48 in (1220 mm) above finished floor.

4.13.10* Door Closers. If a door has a closer, then the sweep period of the closer shall be adjusted so that from an open position of 70 degrees, the door will take at least 3 seconds to move to a point 3 in (75 mm) from the latch, measured to the leading edge of the door.

CABO/ANSI A117.1-1992

4.13.6.11 Front approaches to sliding doors and folding doors shall have maneuvering space that is the same width as the door opening and shall extend 48 in (1220 mm) minimum perpendicular to the doorway. See Fig. B4.13.6(d).

4.13.6.12 Slide-side approaches to sliding doors and folding doors shall have a maneuvering space of 54 in (1370 mm) minimum, parallel to the doorway, and 42 in (1065 mm) minimum, perpendicular to the doorway. See Fig. B4.13.6(e).

4.13.6.13 Latch-side approaches to sliding doors and folding doors shall have a maneuvering space that extends 24 in (610 mm) minimum beyond the latch side of the door and extends 42 in (1065 mm) minimum perpendicular to the doorway. See Fig. B4.13.6(f).

4.13.7 Two Doors in Series. Space between two hinged or pivoted doors in series shall be 48 in (1220 mm) minimum plus the width of any door swinging into the space. Doors in series shall swing either in same direction or away from space between doors. See Fig. B4.13.7.

4.13.8* Thresholds at Doorways. Thresholds, if provided, at doorways shall be 1/2 in (13 mm) high maximum except that thresholds for exterior residential sliding doors shall be 3/4 in (19 mm) high maximum. Raised thresholds and floor level changes shall comply with 4.5.2.

4.13.9* Door Hardware. Handles, pulls, latches, locks, and other operable parts on accessible doors shall have a shape that is easy to grasp with one hand and does not require tight grasping, tight pinching, or twisting of the wrist to operate. Such hardware shall be mounted within reach ranges specified in 4.2. When sliding doors are in

the fully open position, operating hardware shall be exposed and usable from both sides.
4.13.10* Door Closers. Door closers shall be adjusted so that from an open position of 90 degrees, the time required to move the door to an open position of 12 degrees will be 5 seconds minimum.
BCMC
15.3.2 Thresholds at doorways shall not exceed 3/4 inch in height for exterior residential sliding doors or 1/2 inch for other doors. Raised thresholds and floor level changes greater than 1/4 inch at doorways shall be beveled with a slope no greater than 1:2.
15.2 Hardware.
15.2.1 Door handles, pulls, latches, locks and other operating devices shall be at a maximum height of 48 inches.
15.2.2 The operating devices shall be capable of operating with one hand and shall not require tight grasping, tight pinching, or twisting of the wrist to operate.
EXCEPTION: Hardware for doors within or serving a single dwelling unit that is not required to be accessible or adaptable by 5.0.
Comments*
N.E. In #12, ANSI fails to specify
that the 54 in. is measured from
the latch side.
E.
ANSI E.
BCMC E.
ANSI E.
BCMC Exception - P.N.E. for
dwelling units in transient lodging.
Exceeds.
ADA Requires +/- 13.6 in/sec
ANSI = +/- 9.8 in/sec --
(considerably slower)

ADA Title III Requirements
4.13.11* Door Opening Force. The maximum force for pushing or pulling open a door shall be as follows:
(1) Fire doors shall have the minimum opening force allowable by the appropriate administrative authority.
(2) Other doors.
(a) exterior hinged doors: (Reserved)
(b) interior hinged doors: 5 lbf (22.2N)
(c) sliding or folding doors: 5 lbf (22.2N)
These forces do not apply to the force required to retract latch bolts or disengage other devices that may hold the door in a closed position.
4.13.12* Automatic Doors and Power-Assisted Doors. If an automatic door is used, then it shall comply with ANSI/BHMA A156.10-1985. Slowly opening, low-powered, automatic doors shall comply with ANSI

A156.19-1984. Such doors shall not open to back check faster than 3 seconds and shall require no more than 15 lbf (66.6N) to stop door movement. If a power-assisted door is used, its door-opening force shall comply with 4.13.11 and its closing shall conform to the requirements in ANSI A156.19-1984.

4.14 Entrances.

4.14.1 Minimum Number. Entrances required to be accessible by 4.1 shall be part of an accessible route complying with 4.3. Such entrances shall be connected by an accessible route to public transportation stops, to accessible parking and passenger loading zones, and to public streets or sidewalks if available (see 4.3.2(1)). They shall also be connected by an accessible route to all accessible spaces or elements within the building or facility.

CABO/ANSI A117.1-1992

4.13.11* Door-Opening Force. Fire doors shall have the minimum opening force allowable by the appropriate administrative authority. The required force for pushing open or pulling open doors other than fire doors shall be as follows:

- interior hinged door: 5.0 lb (22.2 N) maximum
- sliding/folding door: 5.0 lb (22.2 N) maximum

These forces do not apply to the force required to retract latch bolts or disengage other devices that hold the door in a closed position.

4.13.12 Automatic Doors. Automatic doors shall comply with ANSI/BHMA A156.10.

4.13.13 Power-Assisted Doors and Low-Energy Power-Operated Doors. Power-assisted doors shall comply with ANSI/BHMA A156.19. The time required for such doors to open to the back check position shall be 3 seconds minimum. The force required to stop door movement shall be 15 lb (66.6 N) maximum.

4.13.14* Door Surface. The bottom 12 in (305 mm) of all doors except automatic doors, power assisted doors, and sliding doors shall have a smooth uninterrupted surface to allow the door to be opened by a wheelchair footrest without creating a trap or hazardous condition. When narrow stile and rail doors are used, a 12 in (305 mm) high minimum, smooth panel, extending the full width of the door, shall be installed on the push side(s) of the door which will allow the door to be opened by a wheelchair footrest without creating a trap or hazardous condition. Cavities created by kick plates shall be capped.

4.14 Entrances

Accessible entrances to a building or facility shall comply

with 4.3. They shall be connected by an accessible route to all accessible spaces or elements within the building or facility.
BCMC
15.2.3 Opening forces shall not exceed the following:
1. Interior side-swinging doors without closers - 5 lb.
2. Sliding or folding doors - 5 lb.
3. Other side-swinging doors:
Latch release - 15 lb.
Static opening - 30 lb.
Swing opening - 15 lb.
4. Special locking - 15 lb.
3.1.1 Accessible routes within the site shall be provided from public transportation stops, accessible parking and accessible passenger loading zones, and public streets or sidewalks to the accessible building entrance they serve.
Comments*
ANSI E.
BCMC E.
E.
Exceeds.
ANSI N.E. ANSI does not specifically address exterior elements, public streets, parking and passenger loading zones. See also 4.3.2 (1) where these are also deleted. Route to accessible parking is addressed in ANSI 4.6.2., but route is not addressed in passenger loading zone.
BCMC N.E. BCMC does not specifically require all accessible entrances to be part of accessible routes.
Together, ANSI and BCMC are E.

ADA Title III Requirements
4.14.2 Service Entrances. A service entrance shall not be the sole accessible entrance unless it is the only entrance to a building or facility (for example, in a factory or garage).
4.15 Drinking Fountains and Water Coolers.
4.15.1 Minimum Number. Drinking fountains or water coolers required to be accessible by 4.1 shall comply with

4.15.
4.15.2* Spout Height. Spouts shall be no higher than 36 in (915 mm), measured from the floor or ground surfaces to the spout outlet (see Fig. 27(a)).
4.15.3 Spout Location. The spouts of drinking fountains and water coolers shall be at the front of the unit and shall direct the water flow in a trajectory that is parallel or nearly parallel to the front of the unit. The spout shall provide a flow of water at least 4 in (100 mm) high so as to allow the insertion of a cup or glass under the flow of water. On an accessible drinking fountain with a round or oval bowl, the spout must be positioned so the flow of water is within 3 in (75 mm) of the front edge of the fountain.
4.15.4 Controls. Controls shall comply with 4.27.4. Unit controls shall be front mounted or side mounted near the front edge.
CABO/ANSI A117.1-1992
4.15 Drinking Fountains and Water Coolers
4.15.1* General. When fixed, accessible drinking fountains and water coolers shall comply with 4.4 and 4.15.
4.15.2 Spouts.
4.15.2.1* Height. Spout outlets shall be 36 in (915 mm) maximum above the floor. See Fig. B4.15.2.1.
4.15.2.2* Location. Spouts of drinking fountains and water coolers arranged for parallel approach shall be located 3 in (75 mm) maximum from the front edge. Spouts of cantilevered drinking fountains and water coolers with knee and toe clearances, shall be located 15 in (380 mm) minimum from the vertical support and 5 in (125 mm) maximum from the front edge.
4.15.2.3 Flow. Spouts shall provide a flow of water 4 in (100 mm) high minimum so as to allow the insertion of a cup or glass under the flow of water. Measured horizontally, relative to the front face of the unit, the angle of the water stream from spouts located within 3 in (75 mm) of the front of the unit shall be 30 degrees maximum and spouts located between 3 in and 5 in (75 mm and 125 mm) from the front shall be 15 degrees maximum. See Fig. B4.15.2.3.
4.15.3 Operable Parts. Operable parts shall be located at or near the front edge of the fountain or water cooler and shall comply with 4.25.4.
BCMC
4.1 Each building and structure, and each separate tenancy within a building or structure, shall be provided with at least one entrance which complies with the

accessible route provisions of CABO/ANSI A117.1. Not less than 50% of the entrances shall be accessible.
EXCEPTION: Loading and service entrances.
Comments*
N.E. Exempts all loading and service entrances.
E.
E.
N.E. This requires the spout to be within 3". ADA requires the flow to be within 3" for oval or round bowls. Figure B4.15.2.3 shows 45 degrees, not 30 degrees maximum of text.
E.

ADA Title III Requirements
4.15.5 Clearances.
(1) Wall- and post-mounted cantilevered units shall have a clear knee space between the bottom of the apron and the floor or ground at least 27 in (685 mm) high, 30 in (760 mm) wide, and 17 in to 19 in (430 mm to 485 mm) deep (see Fig. 27(a) and (b)). Such units shall also have a minimum clear floor space 30 in by 48 in (760 mm by 1220 mm) to allow a person in a wheelchair to approach the unit facing forward.
Figure 27 of the ADA Standards. Drinking Fountains and Water Coolers.
27(a) Spout Height and Knee Clearance. The 27 in (685 mm) high minimum clear knee space must be free of equipment or obstructions for a minimum of 8 in (205 mm) extending from the front edge of the fountain back toward the wall. In addition, a minimum 9 in (230 mm) high toe clearance space must be provided extending back toward the wall to a distance no more than 6 in (150 mm) from the back wall. The toe clearance space must be free of equipment or obstructions.
4.15.5 (2) Free-standing or built-in units not having a clear space under them shall have a clear floor space at least 30 in by 48 in (760 mm by 1220 mm) that allows a person in a wheelchair to make a parallel approach to the unit (see Fig. 27(c) and (d)). This clear floor space shall comply with 4.2.4.
4.16 Water Closets.
4.16.1 General. Accessible water closets shall comply with 4.16.
CABO/ANSI A117.1-1992
4.15.4 Clearances
4.15.4.1 Knee and Toe Clearances. Wall-mounted or post-mounted cantilevered units shall extend 17 in (430 mm) minimum from the vertical support. Clear knee space shall be provided in accordance with 4.2.4.3. The clear knee space shall be 8 in (205 mm) in depth minimum at 27 in (685 mm) minimum above the floor or ground, and 11 in (280 mm) in depth minimum at 9 in (230 mm) minimum above the floor or ground. Clear toe space shall be provided in accordance with 4.2.4.3. See Fig. B4.15.2.1. Where the basin and spout assembly is supported on a cantilevered arm 8 in (205 mm) wide maximum, the clear space between the bottom of the arm and floor shall be 25 in (635 mm) minimum.
4.15.4.2 Floor Space. Forward approach units shall comply with 4.2. Units in alcoves shall comply with 4.2.4.4. See Fig. B4.15.2.1(b). Units not having the

necessary knee and toe clearance or clear space under them shall comply with 4.2.4 and have a clear floor space that allows a person in a wheelchair to make a parallel approach to the unit.

4.17 Water Closets

4.17.1 General. Accessible water closets shall comply with 4.17. Water closets shall be mounted adjacent to a side wall or partition. The distance from the side wall or partition to the centerline of the water closet shall be 18 in (455 mm). Water closets in dwelling units shall comply with 4.33.3.2.

BCMC
Comments*

N.E. regarding 2 in. lower knee clearance for basins on cantilevered arms.

E. Except that dwelling units in transient lodging would not be in compliance using 4.33.3.2.

ADA Title III Requirements

4.16.2 Clear Floor Space. Clear floor space for water closets not in stalls shall comply with Fig. 28. Clear floor space may be arranged to allow either a left-handed or right-handed approach.

Figure 28 of the ADA Standards. Clear Floor Space at Water Closets.

For a side or front approach, the water closet must be located along the back wall and the centerline of the water closet must be 18 in (455 mm) from the side wall with the side grab bar.

For a front approach/transfer, there must be a clear floor space at the water closet that is a minimum 48 in (1220 mm) in width (parallel to the back wall) and a minimum of 66 in (1675 mm) in length. If there is no stall, an accessible lavatory may overlap the clear floor space at the back wall as long as a minimum 18 in (455 mm) clearance is maintained between the centerline of the water closet and the nearest edge of the lavatory.

For a side approach/transfer, there must be a clear floor space at the water closet that is a minimum of 48 in (1220 mm) in width (parallel to the back wall) and a minimum of 56 in (1420 mm) in length. If there is no stall, an accessible lavatory may overlap the clear floor space at the back wall as along as a minimum 18 in (455 mm) clearance is maintained between the centerline of the water closet and the nearest edge of the lavatory.

For a forward and side approach or for a lateral transfer, there must be a clear floor space at the water closet that is a minimum of 60 in (1525 mm) in width (parallel to the back wall) and a minimum of 56 in (1420 mm) in length. There must be a clear floor space of 42 in (1066 mm) minimum from the centerline of the water closet to the nearest obstruction/wall. A lavatory may not overlap this clear space.

4.16.3* Height. The height of water closets shall be 17 in to 19 in (430 mm to 485 mm), measured to the top of the toilet seat. Seats shall not be sprung to return to a lifted position.

CABO/ANSI A117.1-1992

4.17.2* Clear Floor Space. Clear floor space for water closets not in stalls shall be 48 in (1220 mm) minimum in front of the water closet and 42 in (1065 mm) from the center line of the water closet on the side not adjacent to the wall. See Fig. B4.17.2.

4.17.3* Height. The top of water closet seats shall be 17 in to 19 in (430 mm to 485 mm) above the floor. Seats shall not be sprung to return to a lifted position. See Fig. B4.17.3.

BCMC
Comments*

Exceeds. ADA Standards do not require 48 inch minimum in front of water closet. ADA Standards allow the lavatory to be in clear floor space. It appears ANSI does not.

E.

ADA Title III Requirements

4.16.4* Grab Bars. Grab bars for water closets not located in stalls shall comply with 4.26 and Fig. 29. The grab bar behind the water closet shall be 36 in (915 mm) minimum.

Figure 29 of the ADA Standards. Grab Bars at Water Closets.

29(a) Back Wall. A 36 in (915 mm) minimum length grab bar, mounted 33-36 in (840-915 mm) above the finish floor, is required behind the water closet. The grab bar must extend at least 12 in (305) from the centerline of the water closet toward the side wall and at least 24 in (610 mm) from the centerline of the water closet toward the open side.

29(b) Side Wall. A 42 in (1065 mm) minimum length grab bar is required on the side wall, spaced a maximum of 12 in (305 mm) from the back wall and extending a minimum of 54 in (1370 mm) from the back wall at a height of 33-36 in (840-915 mm).

4.16.5* Flush Controls. Flush controls shall be hand operated or automatic and shall comply with 4.27.4. Controls for flush valves shall be mounted on the wide side of toilet areas no more than 44 in (1120 mm) above the floor.

4.16.6 Dispensers. Toilet paper dispensers shall be installed within reach, as shown in Fig. 29(b). Dispensers that control delivery, or that do not permit continuous paper flow, shall not be used.

Fig. 29(b) ...The toilet paper dispenser shall be mounted below the grab bar, at a minimum height of 19 in (485 mm).

4.17 Toilet Stalls.

4.17.1 Location. Accessible toilet stalls shall be on an accessible route and shall meet the requirements of 4.17.
4.17.2 Water Closets. Water closets in accessible stalls shall comply with 4.16.

CABO/ANSI A117.1-1992

4.17.4* Grab Bars. Grab bars for water closets shall comply with 4.24. Grab bars shall be provided on the rear and side walls adjacent to the water closet.
4.17.4.1 Side wall grab bar shall be 42 in (1065 mm) long minimum, located 12 in (305 mm) maximum from the rear wall and extending 54 in (1370 mm) minimum from the rear wall. See Fig. B4.17.3.
4.17.4.2 The rear wall grab bar shall be 24 in (610 mm) long minimum, centered on the water closet. Where space permits, the bar shall be 36 in (915 mm) long minimum, with the additional length provided on the transfer side of the water closet. See Fig. B4.17.4.
4.17.5* Flush Controls. Flush controls shall be hand operated or automatic and shall comply with 4.25.4. Hand operated controls for flushometers shall be mounted 44 in (1120 mm) maximum above the floor on the wide side of the toilet stall.
4.17.6 Dispensers. Toilet paper dispensers shall comply with 4.25.4 and shall be installed between 7 in and 9 in (180 mm and 230 mm) in front of the water closet. The outlet of the dispenser shall be located between 15 in and 48 in (380 mm and 1220 mm) above the floor. There shall be a clearance of 1 1/2 in (38 mm) minimum below and 12 in (305 mm) minimum above the grab bar. Dispensers shall not be of a type that control delivery, or that do not allow continuous paper flow.
4.18 Toilet Stalls
4.18.1 General. Accessible toilet stalls shall comply with 4.18.
4.18.2 Water Closets. Water closets in accessible toilet stalls shall comply with 4.17.

BCMC

Comments*

4.17.4 - E.

4.17.4.1 - E.

4.17.4.2 - N.E. ANSI permits a 24 inch grab bar behind the water closet where space does not allow a 36 inch grab bar. However, there will be no space limitations in new construction.

E.

E.

ADA Title III Requirements

4.17.3* Size and Arrangement. The size and arrangement of the standard toilet stall shall comply with Fig. 30(a), Standard Stall. Standard toilet stalls with a minimum depth of 56 in (1420 mm) (see Fig. 30(a)) shall have wall-mounted water closets. If the depth of a standard toilet stall is increased at least 3 in (75 mm), then a floor-mounted water closet may be used. Arrangements shown for standard toilet stalls may be reversed to allow either a left- or right-hand approach. Additional stalls shall be provided in conformance with 4.22.4.

EXCEPTION: In instances of alteration work where provision of a standard stall (Fig. 30(a)) is technically infeasible or where plumbing code requirements prevent combining existing stalls to provide space, either alternate stall (Fig. 30(b)) may be provided in lieu of the standard stall.

Figure 30 of the ADA Standards. Toilet Stalls.

30(a) Standard Stall. The minimum width of the stall is 60 in (1525 mm). The centerline of the water closet is 18 in (455 mm) from the side wall. The location of the door is in front of the clear space and diagonal to the water closet, with a maximum stile width of 4 in (100 mm). An alternate door location is permitted to be on the

adjacent side of the stall also diagonal to the water closet with a maximum stile width of 4 in (100 mm). The minimum width of the standard stall shall be 60 in (1525 mm). If a wall mounted water closet is used, the depth of the stall is required to be a minimum of 56 in (1420 mm). If a floor mounted water closet is used, the depth of the stall is required to be a minimum of 59 in (1500 mm). A grab bar at least 36 in (965 mm) long shall be located behind the water closet, with one end no further than 6 in (150 mm) from the inside corner of the stall. Another grab bar shall extend at least 52 in (1320 mm) along the side wall, with one end no more than 12 in (305 mm) from the back wall.

CABO/ANSI A117.1-1992

4.18.3* Wheelchair Accessible Stalls.

4.18.3.1 Wheelchair accessible stalls shall be 60 in (1525 mm) wide minimum and 56 in (1420 mm) deep minimum for wall hung water closets and 59 in (1500 mm) deep minimum for floor mounted water closets. See Fig. B4.18.3.1.

4.18.3.2 If the door swings into the stall, the required depth shall be increased by 36 in (915 mm) minimum. See Fig. B4.18.3.2.

4.18.3.3 Arrangements shown for stalls shall be permitted for left-hand or right-hand approach.

4.18.3.4 In wheelchair accessible stalls, the front partition and at least one side partition shall provide a toe clearance of 9 in (230 mm) minimum above the floor. Toe clearance is not required in stalls greater than 60 in (1525 mm) deep.

BCMC

Comments*

E.

73 ADA/ANSI/BCMC Requirements - October 13, 1995

01-03788

ADA Title III Requirements

30(a-1) Standard Stall (end of row). If a standard stall is provided at the end of a row of stalls, and if the length of the stall is extended at least a minimum of 36 in (915 mm) beyond the required minimum length, the door (if located on the side of the stall) may swing into the stall. Two grab bars are located in the rear and the side of the water closet.

30(b) Alternate Stalls. Two alternate stalls are permitted; one alternate stall is required to be 36 in (915 mm) wide. The other alternate stall is required to be a minimum of 48 in (1220 mm) wide. In either alternate stall, if a wall mounted water closet is used, the depth of the stall is required to be a minimum of 66 in (1675 mm). If a floor mounted water closet is used, the depth of the stall is required to be a minimum of 69 in (1745 mm). The

36 in (915 mm) wide stall shall have parallel grab bars on the side walls. The 48 in (1220 mm) minimum stall shall have a grab bar behind the water closet and one on the side wall next to the water closet. Grab bars are mounted 33-36 in (840-915 mm) above the finish floor. In both alternate stalls, the centerline of the water closet is 18 in (455 mm) from a side wall. In both alternate stalls, the grab bars along the sides of the water closets shall extend at least 54 in (1370 mm) from the back wall and shall have one end no further than 12 in (305 mm) from the back wall.

30(c) Rear Wall of Standard Stall. Grab bars located behind the water closet shall be at least 36 in (915 mm) in length. All grab bars shall be located 33-36 in (840-915 mm) above the finish floor.

30(d) Side Walls. Side grab bars shall be located 33-36 in (840-915 mm) above the finish floor and shall be no more than 12 in (305 mm) from the rear wall. Grab bars shall be at least 40 in (1015 mm) long or at least 42 in (1065 mm) long for alternate stalls. Water closet seat heights shall be between 17 in (430 mm) and 19 in (485 mm). Toilet paper dispensers shall be below the grab bar and at least 19 in (485 mm) above the floor and no further than 36 in (915 mm) from the rear wall.

4.17.4 Toe Clearances. In standard stalls, the front partition and at least one side partition shall provide a toe clearance of at least 9 in (230 mm) above the floor. If the depth of the stall is greater than 60 in (1525 mm), then the toe clearance is not required.

CABO/ANSI A117.1-1992

4.18.3.4 In wheelchair accessible stalls, the front partition and at least one side partition shall provide a toe clearance of 9 in (230 mm) minimum above the floor. Toe clearance is not required in stalls greater than 60 in (1525 mm) deep.

BCMC

Comments*

See comments above.

E.

01-03789

ADA Title III Requirements

4.17.5* Doors. Toilet stall doors, including door hardware, shall comply with 4.13. If toilet stall approach is from the latch side of the stall door, clearance between the door side of the stall and any obstruction may be reduced to a minimum of 42 in (1065 mm) (Fig. 30).

4.17.6 Grab Bars. Grab bars complying with the length and positioning shown in Fig. 30(a), (b), (c), and (d) shall

be provided. Grab bars may be mounted with any desired method as long as they have a gripping surface at the locations shown and do not obstruct the required clear floor area. Grab bars shall comply with 4.26.

4.18 Urinals.

4.18.1 General. Accessible urinals shall comply with 4.18.

4.18.2 Height. Urinals shall be stall-type or wall-hung with an elongated rim at a maximum of 17 in (430 mm) above the finish floor.

4.18.3 Clear Floor Space. A clear floor space 30 in by 48 in (760 mm by 1220 mm) shall be provided in front of urinals to allow forward approach. This clear space shall adjoin or overlap an accessible route and shall comply with 4.2.4. Urinal shields that do not extend beyond the front edge of the urinal rim may be provided with 29 in (735 mm) clearance between them.

4.18.4 Flush Controls. Flush controls shall be hand operated or automatic, and shall comply with 4.27.4, and shall be mounted no more than 44 in (1120 mm) above the finish floor.

4.19 Lavatories and Mirrors.

4.19.1 General. The requirements of 4.19 shall apply to lavatory fixtures, vanities, and built-in lavatories.

4.18.5 Doors. Toilet stall doors shall comply with 4.13, except that if the approach is to the latch side of the stall door, the clearance between the door side of the stall and any obstruction shall be 42 in (1065 mm) minimum. The door shall be hinged 4 in (100 mm) maximum from the partition farthest from the water closet. A handle complying with 4.13.9 shall be placed on the inner side of the door near the pivot point or self-closing hinges shall be provided.

4.18.6 Grab Bars.

4.18.6.1 General. Grab bars shall comply with 4.24.

4.18.6.2 Wheelchair Accessible Stalls. A side-wall grab bar complying with 4.17.4.1, located on the wall closest to the water closet, and a rear-wall grab bar complying with 4.17.4.2 shall be provided. See Fig. B4.18.3.1.

4.18.7* Coat Hooks and Shelves. Coat hooks provided within toilet stalls shall be 54 in (1370 mm) maximum above the floor. When provided, a fold down shelf shall be located between 40 in (1015 mm) minimum and 48 in (1220 mm) maximum above the floor.

4.19 Urinals*

4.19.1 General. Accessible urinals shall comply with 4.19.

4.19.2 Height. Urinals shall be of the stall type or wall hung with the rim at 17 in (430 mm) maximum above the

floor.
4.19.3 Clear Floor Space. Clear floor space 30 in by 48 in (760 mm by 1220 mm) minimum shall be provided in front of urinals to allow forward approach. This clear space shall comply with 4.2.4. Privacy shields shall not extend beyond the front edge of the urinal rim, unless they are 30 in (760 mm) minimum apart.
4.19.4 Flush Controls. Flush controls shall be hand operated or automatic. Hand operated flush controls, shall be mounted between 15 in (380 mm) minimum and 44 in (1120 mm) maximum above the floor and shall comply with 4.25.4.
4.20 Lavatories and Sinks
4.20.1 General. Accessible lavatory fixtures, sinks, vanities, and built-in lavatories shall comply with 4.20.

BCMC
Comments*

E.
N.E. Note: 4.17.4.2 allows 24 inch grab bar on rear wall, see above. ADA Standards 4.16.4
N.E. 54 in. will be too high when only a forward approach is possible.
E.
P.N.E. ADA prohibits shields beyond rim no matter how far apart. Plus ANSI puts no limits on shields that DO NOT project beyond the rim.
Exceeds. ANSI establishes a minimum height for flush controls.
E.

ADA Title III Requirements

4.19.2 Height and Clearances. Lavatories shall be mounted with the rim or counter surface no higher than 34 in (865 mm) above the finish floor. Provide a clearance of at least 29 in (735 mm) above the finish floor to the bottom of the apron. Knee and toe clearance shall comply with Fig. 31.

Figure 31 of the ADA Standards. Lavatory Clearances.

The minimum knee clearance must be free of equipment or obstructions for a minimum of 8 in (205 mm) extending from the front edge of the lavatory back toward the wall. This knee clearance must be 29 in (735 mm) high at the front of the lavatory and no less than 27 in (685 mm) high at a point 8 in (205 mm) back. In addition, a minimum 9 in (230 mm) high toe clearance must be provided extending back toward the wall to a distance no more than 6 in (150 mm) from the back wall. The toe clearance space must be free of equipment or obstructions.

4.19.3 Clear Floor Space. A clear floor space 30 in by 48 in (760 mm by 1220 mm) complying with 4.2.4 shall be provided in front of a lavatory to allow forward approach. Such clear floor space shall adjoin or overlap an accessible route and shall extend a maximum of 19 in (485 mm) underneath the lavatory (see Fig. 32).

Figure 32 of the ADA Standards. Clear Floor Space at Lavatories.

The minimum depth of the lavatory is 17 in (430 mm).

4.19.4 Exposed Pipes and Surfaces. Hot water and drain pipes under lavatories shall be insulated or otherwise configured to protect against contact. There shall be no sharp or abrasive surfaces under lavatories.

4.19.5 Faucets. Faucets shall comply with 4.27.4. Lever-operated, push-type, and electronically controlled mechanisms are examples of acceptable designs. If self-closing valves are used the faucet shall remain open for at least 10 seconds.

CABO/ANSI A117.1-1992

4.20.2 Height

4.20.2.1* Lavatories. Lavatories shall be mounted with the rim 34 in (865 mm) maximum above the floor and with a clearance of 29 in (735 mm) minimum from the floor to the bottom of the apron.

4.20.3 Clearances.

4.20.3.1 Knee and Toe Clearances. Fixtures shall extend 17 in (430 mm) minimum from the wall. Clear knee space shall be provided in accordance with 4.2.4.3. Clearance

between the bottom of the front edge of the apron and the floor shall be 29 in (735 mm) minimum. The clear knee space shall be 8 in (205 mm) in depth minimum at 27 in (685 mm) minimum above the floor or ground and 11 in (280 mm) in depth minimum at 9 in (230 mm) minimum above the floor or ground. Clear toe space shall be provided in accordance with 4.2.4.3. The dip of the overflow shall be ignored when checking the clearances. See Fig. B4.20.3.1.

4.20.3.2 Clear Floor Space. Clear floor space shall comply with 4.2.4. Clear floor space, 30 in by 48 in (760 mm by 1220 mm) minimum, shall be provided in front of a lavatory or sink to allow a forward approach and shall extend 19 in (485 mm) maximum under the lavatory or sink. See Fig. B4.20.3.2.

4.20.4* Exposed Pipes and Surfaces. Water supply and drain pipes under lavatories or sinks shall be insulated or otherwise configured to protect against contact. See Fig. B4.20.3.1. There shall be no sharp or abrasive surfaces under lavatories and sinks.

4.20.5* Faucets. Faucets shall comply with 4.25.4. Self-closing faucets, when used, shall remain open for 10 seconds minimum.

BCMC
Comments*

4.20.2 - E. for lavatories (sinks addressed below at ADA 4.24).

E.

E.

E.

ADA Title III Requirements

4.19.6* Mirrors. Mirrors shall be mounted with the bottom edge of the reflecting surface no higher than 40 in (1015 mm) above the finish floor (see Fig. 31).

4.20 Bathtubs.

4.20.1 General. Accessible bathtubs shall comply with 4.20.

4.20.2 Floor Space. Clear floor space in front of bathtubs shall be as shown in Fig. 33.

Figure 33 of the ADA Standards. Clear Floor Space at Bathtubs.

33(a) With Seat in Tub. If the approach is parallel to the bathtub, a 30 in (760 mm) minimum width by 60 in (1525 mm) minimum length clear space is required alongside the bathtub. If the approach is perpendicular to the bathtub, a 48 in (1220 mm) minimum width by 60 in (1525 mm) minimum length clear space is required. An accessible lavatory is permitted within the clear space at the foot end of the tub.

33(b) With Seat at Head of Tub. If the approach is parallel to the bathtub, a 30 in (760 mm) minimum width by 75 in (1905 mm) minimum length clear space is required alongside the bathtub. The seat width shall be 15 in (380 mm), measured from the back wall to the front of the seat, and shall extend the full width of the tub. An accessible lavatory is permitted within the clear space at the foot end of the tub.

4.20.3 Seat. An in-tub seat or a seat at the head end of the tub shall be provided as shown in Fig. 33 and 34. The structural strength of seats and their attachments shall comply with 4.26.3. Seats shall be mounted securely and shall not slip during use.

CABO/ANSI A117.1-1992

4.16.6* Mirrors. Mirrors, mounted above lavatories or sinks, shall have the bottom edge of the reflecting surface 38 in (965 mm) maximum above the floor. See Fig. B4.20.3.1.

Full length mirrors used in conjunction with wheelchair accessible dressing rooms shall be 18 in (455 mm) wide minimum and shall be mounted with the bottom edge 18 in

(455 mm) high maximum above the floor and the top edge 72 in (1830 mm) high minimum. Mirrors shall be located in a position affording a view to a person seated on a bench or a wheelchair, as well as to a person in a standing position.

4.21 Bathtubs

4.21.1 General. Accessible bathtubs shall comply with 4.21. Bathtubs in dwelling units shall comply with 4.33.3.4.

4.21.2 Floor Space. Clear floor space in front of bathtubs shall be 30 in by 60 in (760 mm by 1525 mm) minimum for a parallel approach and 48 in by 60 in (1220 mm by 1525 mm) minimum for a forward approach to a tub without a seat at the head of the tub. When a seat is provided at the head of the tub, the clear space shall be 30 in by 93 in (760 mm by 2360 mm) minimum. Lavatories complying with 4.10.2.1** shall be permitted at the foot end of the clear space. See Fig. B4.21.2.

[** Existing Elevators -- General]

4.21.3* Seat. A removable in-tub seat or a permanent seat at the head end of the tub shall be provided. See Fig. B4.21.2 and B4.21.4. Permanent seats located at the head of the tub shall be 15 in (380 mm) wide minimum. Seats shall be built-in or mounted securely and shall not slip during use. The structural strength of seats and their attachments shall comply with 4.24.3.

ADA Title III Requirements

4.20.4 Grab Bars. Grab bars complying with 4.26 shall be provided as shown in Fig. 33 and 34.

Figure 34 of the ADA Standards. Grab Bars at Bathtubs.

34(a) With Seat in Tub. At the foot of the tub, the grab bar shall be 24 in (610 mm) minimum in length measured from the outer edge of the tub. On the back wall, two grab bars are required. The grab bars mounted on the back (long) wall shall be a minimum 24 in (610 mm) in length located 12 in (305 mm) maximum from the foot of the tub and 24 in (610 mm) maximum from the head of the tub. One grab bar on the back wall shall be located 9 in (230 mm) above the rim of the tub. The other shall be 33 to 36 in (840 mm to 915 mm) above the bathroom floor. At the head of the tub, the grab bar shall be a minimum of 12 in (305 mm) in length measured from the outer edge of the tub.

34(b) With Seat at Head of Tub. At the foot of the tub, the grab bar shall be a minimum of 24 in (610 mm) in length measured from the outer edge of the tub. On the back wall, two grab bars are required. The grab bars mounted on the back wall shall be a minimum of 48 in (1220 mm) in length located a maximum of 12 in (305 mm) from the foot of the tub and a maximum of 15 in (380 mm) from the head of the tub. Heights of grab bars are as described above. No horizontal grab bar should be placed at the head of the tub.

4.20.5 Controls. Faucets and other controls complying with 4.27.4 shall be located as shown in Fig. 34.

Figure 34 of the ADA Standards. Grab Bars at Bathtubs.

Controls are required to be located in an area between the open edge and the midpoint of the tub

("offset") and to be located at the foot of the tub.
4.20.6 Shower Unit. A shower spray unit with a hose at least 60 in (1525 mm) long that can be used both as a fixed shower head and as a hand-held shower shall be provided.
4.20.7 Bathtub Enclosures. If provided, enclosures for bathtubs shall not obstruct controls or transfer from wheelchairs onto bathtub seats or into tubs. Enclosures on bathtubs shall not have tracks mounted on their rims.

CABO/ANSI A117.1-1992

4.21.4 Grab Bars. Grab bars shall comply with 4.24 and unless otherwise required shall be 33-36 in (840-915 mm) above the floor.
4.21.4.1 For bathtubs with permanent seats, a grab bar 48 in (1220 mm) long minimum shall be installed on the back wall 15 in (380 mm) maximum from the head end wall and 12 in (305 mm) maximum from the foot end wall.
4.21.4.2 For bathtubs without permanent seats, a grab bar 24 in (610 mm) long minimum shall be installed on the back wall 24 in (610 mm) maximum from the head end wall and 12 in (305 mm) maximum from the foot end wall. A grab bar 12 in (305 mm) long minimum shall be installed on the head end wall at the front edge of the tub.
4.21.4.3 For bathtubs with or without permanent seats, a grab bar 24 in (610 mm) long minimum shall be installed on the foot end wall at the front edge of the tub. On the back wall a bar of the same length as the higher bar shall be provided 9 in (230 mm) above the rim of the tub. See Fig. B4.21.4.
4.21.5 Controls. Faucets and other controls shall comply with 4.25.4. Controls shall be located between the rim of the tub and the grab bar at the foot of the tub. See Fig. B4.21.4.
4.21.6 Shower Unit. A shower spray unit shall be provided with a hose, 60 in (1525 mm) long minimum, that can be used as a fixed shower head or as a hand-held shower. If an adjustable-height shower head mounted on a vertical bar is used, the bar shall be installed so as not to obstruct the use of grab bars.
4.21.7 Bathtub Enclosures. Enclosures for bathtubs shall not obstruct controls or transfer from wheelchairs onto bathtub seats or into tubs. Enclosures shall not have tracks mounted on the bathtub rim.

BCMC
Comments*

E.
N.E. ADA Standards require the controls to be offset toward the

outside of the tub to facilitate
operation. (Shown correctly in Fig.
B4.21.4.)
E.
E.

ADA Title III Requirements

4.21 Shower Stalls.

4.21.1* General. Accessible shower stalls shall comply with 4.21.

4.21.2 Size and Clearances. Except as specified in 9.1.2, shower stall size and clear floor space shall comply with Fig. 35(a) or (b). The shower stall in Fig. 35(a) shall be 36 in by 36 in (915 mm by 915 mm). Shower stalls required by 9.1.2 shall comply with Fig. 57(a) or (b). The shower stall in Fig. 35(b) will fit into the space required for a bathtub.

Figure 35 of the ADA Standards. Shower Size and Clearances.

35(a) 36 in by 36 in (915 mm by 915 mm) Stall (Transfer Shower). The clear floor space shall be a minimum of 48 in (1220 mm) in length by a minimum of 36 in (915 mm) in width and allow for a parallel approach. The clear floor space shall extend 12 in (305 mm) beyond the shower wall on which the seat is mounted.

35(b) 30 in by 60 in (760 mm by 1525 mm) Stall (Roll-in Shower). The clear floor space alongside the shower shall be a minimum of 60 in (1220 mm) in length by a minimum of 36 in (915 mm) in width. If the controls are located on the back (long) wall, they must be a

maximum of 27 in (685 mm) from a side wall. An accessible lavatory may be located in the clear floor space at the end of the shower.

CABO/ANSI A117.1-1992

4.21.8 Rim Height. Bathtub rims shall be 17 in to 19 in (430-480 mm) measured from floor to top of rim.

4.22 Shower Stalls

4.22.1* General. Accessible shower stalls shall comply with 4.22.

4.22.2 Size and Clearances.

4.22.2.1* Transfer-Type Showers. Transfer-type shower stalls shall be 36 in by 36 in (915 mm by 915 mm) inside finished dimension with clear floor space of 36 in (915 mm) wide minimum by 48 in (1220 mm) long minimum measured from the control wall. See Fig. B4.22.2.1.

4.22.2.2* Roll-in Type Showers. Roll-in type shower stalls shall be 30 in by 60 in (760 mm by 1525 mm) inside finished dimension minimum with clear floor space of 36 in wide by 60 in long (915 mm by 1525 mm) minimum. Lavatories complying with 4.20.2.1 shall be permitted at either end of the clear space. See Fig. B4.22.2.2.

BCMC

Comments*

P.N.E. Specifying this height can make the tub difficult for some people to use. Many people cannot step over such a high tub rim and can be "trapped" in tubs. This 17-19 inch is significantly higher than the typical 14 - 16 inch tub.

E.

E. for transfer showers. However, the drawings fail to reflect that the 48 inch and 60 inch dimensions are minimums.

P.N.E. for roll-in showers. ANSI would appear to allow more than one lavatory in the clear space.

01-03794

ADA Title III Requirements

4.21.3 Seat. A seat shall be provided in shower stalls 36 in by 36 in (915 mm by 915 mm) and shall be as shown in Fig. 36. The seat shall be mounted 17 in to 19 in (430 mm to 485 mm) from the bathroom floor and shall extend the full depth of the stall. In a 36 in by 36 in (915 mm by 915 mm) shower stall, the seat shall be on the wall opposite the controls. Where a fixed seat is provided in a 30 in by 60 in minimum (760 mm by 1525 mm) shower stall, it shall be a folding type and shall be mounted on the wall adjacent to the controls as shown in Fig. 57. The structural strength of seats and their attachments shall comply with 4.26.3.

Figure 36 of the ADA Standards. Shower Seat Design.

An L-shaped shower seat shall be provided, extending the full depth of the stall. The seat shall be

located 1-1/2 in (38 mm) maximum from the wall. The front of the seat (nearest to the opening) shall extend a maximum 16 in (330 mm) from the wall. The back of the seat (against the back wall) shall extend a maximum of 23 in (582 mm) from the side wall and shall be a maximum of 15 in (305 mm) deep.

4.21.4 Grab Bars. Grab bars complying with 4.26 shall be provided as shown in Fig. 37.

Figure 37 of the ADA Standards. Grab Bars at Shower Stalls.

37(a) 36 in by 36 in (915 mm by 915 mm) Transfer Stall. An L-shaped grab bar shall be provided, located along the full depth of the control wall (opposite the seat) and halfway (18 in (455 mm)) along the back wall. The grab bar shall be mounted 33-36 in (840-915 mm) above the shower floor.

37(b) 30 in by 60 in (760 mm by 1525 mm) Roll-in Stall. A U-shaped grab bar that wraps around the stall shall be provided. The grab bar shall be 33-36 in (840-915 mm) high.

CABO/ANSI A117.1-1992

4.22.3* Seat. A folding or non-folding seat shall be provided in transfer-type shower stalls and shall be L-shaped as shown in Fig. B4.22.3. The seat shall be mounted 17 in to 19 in (430 mm to 485 mm) above the bathroom floor and shall extend the full depth of the stall. The rear edge of the seat shall be 2 1/2 in (64 mm) maximum and the front edge 15 to 16 in (380 to 405 mm) from the seat wall. The "L" portion of the seat shall be 1 1/2 in (38 mm) maximum from the back wall and be 14 to 15 in (355 to 380 mm) from the back wall to the inner edge of the seat. The front edge of the "L" shall be 22 to 23 in (560 to 585 mm) from the seat wall. The seat shall be on the wall opposite the controls. The structural strength of seats and their attachments shall comply with 4.24.3.

4.22.4 Grab Bars. Grab bars shall comply with 4.24.

4.22.4.1 Transfer Type Showers. Grab bar shall be extended across the control wall and back wall to a point 18 in (455 mm) from the control wall. See Fig. B4.22.4(a).

4.22.4.2 Roll-in Type Showers. Grab bars shall be provided on the three walls of the shower. See Fig. B4.22.4(b).

BCMC

Comments*

N.E. This section should address folding seats in roll-in showers or it

can't be scoped. Also, a 2 1/2 inch gap along the back edge of the seat is far in excess of the 1 1/2 inches allowed in ADA Standards. It is easier for a hand to fall through a 2 1/2 inch space, which is a problem if you are leaning on that hand to transfer. Also, once having fallen through, an arm may get stuck between the seat and the wall.
E. But see discussion at ADA 9.1.2.

ADA Title III Requirements
4.21.5 Controls. Faucets and other controls complying with 4.27.4 shall be located as shown in Fig. 37. In shower stalls 36 in by 36 in (915 mm by 915 mm), all controls, faucets, and the shower unit shall be mounted on the side wall opposite the seat.
Figure 37 of the ADA Standards. Grab Bars at Shower Stalls.

37(a) 36 in by 36 in (915 mm by 915 mm) Transfer Stall. The controls shall be placed in an area between 38-48 in (965-1220 mm) above the floor. The controls and spray unit shall be within 18 in (455 mm) of the front of the shower.

37(b) 30 in by 60 in (760 mm by 1525 mm) Roll-in Stall. The controls shall be placed in an area between 38-48 in (965-1220 mm) above the floor. Controls shall be located on the back (long) wall 27 in (685 mm) from the side wall. The shower head and control area may be located on the back wall or on either side wall.

4.21.6 Shower Unit. A shower spray unit with a hose at least 60 in (1525 mm) long that can be used both as a fixed shower head and as a hand-held shower shall be provided.

EXCEPTION: In unmonitored facilities where vandalism is a consideration, a fixed shower head mounted at 48 in (1220 mm) above the shower floor may be used in lieu of a hand-held shower head.

4.21.7 Curbs. If provided, curbs in shower stalls 36 in by 36 in (915 mm by 915 mm) shall be no higher than 1/2 in (13 mm). Shower stalls that are 30 in by 60 in (760 mm by 1525 mm) minimum shall not have curbs.

4.21.8 Shower Enclosures. If provided, enclosures for shower stalls shall not obstruct controls or obstruct transfer from wheelchairs onto shower seats.

CABO/ANSI A117.1-1992

4.22.5 Controls. Faucets and other controls shall comply with 4.25.4. Controls in roll-in showers shall be located on the back wall 38-48 in (965-1220 mm) above the shower floor, as shown in Fig. B4.22.4(b). In transfer-type shower stalls, all controls, faucets, and the shower unit shall be mounted on the side wall opposite the seat 38 in to 48 in (965-1220 mm) above the shower floor. See Fig. B4.22.4(a).

4.22.6* Shower Unit. A shower spray unit shall be provided with a hose 60 in (1525 mm) long minimum that can be used as a fixed shower head or as a hand-held shower. In transfer type showers, the controls and shower unit shall be located on the control wall within 15 in (380 mm), left or right, of the centerline of the seat. In roll-in type showers, shower spray units mounted on the back wall shall be mounted 27 in (685 mm) maximum from the side wall. If an adjustable-height shower head mounted on a vertical bar is used, the bar shall be installed so as not to obstruct the use of grab bars.

4.22.7 Thresholds. Thresholds in shower stalls shall be 1/2 in (13 mm) high maximum in accordance with 4.5.

4.22.8 Shower Enclosures. Enclosures for shower stalls shall not obstruct controls or obstruct transfer from wheelchairs onto shower seats.

BCMC Comments*

E.

N.E. Allowing controls to be either left or right of centerline makes it very difficult to turn on water and adjust temperature BEFORE making transfer.

E.

E.

ADA Title III Requirements

4.22 Toilet Rooms.

4.22.1 Minimum Number. Toilet facilities required to be accessible by 4.1 shall comply with 4.22. Accessible toilet rooms shall be on an accessible route.

4.22.2 Doors. All doors to accessible toilet rooms shall comply with 4.13. Doors shall not swing into the clear floor space required for any fixture.

4.22.3* Clear Floor Space. The accessible fixtures and controls required in 4.22.4, 4.22.5, 4.22.6, and 4.22.7 shall be on an accessible route. An unobstructed turning space complying with 4.2.3 shall be provided within an accessible toilet room. The clear floor space at fixtures and controls, the accessible route, and the turning space may overlap.

CABO/ANSI A117.1-1992

4.16 Toilet, Bath, Dressing and Shower Rooms and Bathing Facilities.

4.16.1 General. Accessible toilet rooms, bathrooms, bathing facilities, dressing rooms and shower rooms shall comply with 4.16.

4.16.2* Doors. All doors to accessible toilet rooms, bathrooms, bathing facilities, and shower rooms shall comply with 4.13. Doors shall not swing into the clear floor space required for any fixture unless the toilet or bathroom is for individual use only, or a clear floor space complying with 4.2.4.1 is provided beyond the arc of the door swing within the room.

4.16.3* Clear Floor Space. Accessible fixtures and controls shall comply with 4.17 through 4.22. An unobstructed turning space complying with 4.2.3 and 4.2.4.1 shall be provided within an accessible room. The clear floor spaces at fixtures and operable parts, the accessible route, and the turning space shall be permitted to overlap.

BCMC

3.1.2 At least one accessible route shall connect accessible spaces, elements, facilities and buildings that are on the same site. Where only one accessible route is provided, it shall not pass through kitchens, storage rooms, restrooms, closets or similar spaces.

6.1.1 Toilet rooms and bathing facilities shall be accessible. At least one of each type fixture or element in each accessible toilet room and bathing facility shall be accessible.

EXCEPTIONS:

1. A toilet room or bathing facility for a single occupant and not for common or public use shall be permitted to be

adaptable.
2. Dwelling units, guest rooms and patient toilet rooms, unless required by 5.0 to be accessible or adaptable.

Comments*

E.
P.N.E. This appears to raise the risk that people could be injured by the door swing and a dead power chair could block the door. Even if the toilet room is used by only one person at a time, he/she may not be able to close the door behind him/her after entering.
However, when considered with all the clear space and maneuvering space and turning space requirements that exceed the ADA, it may be acceptable, as long as there is no relaxation of requirements for maneuvering space at door or of extra large clear floor space at toilet. Need to confirm our understanding of the other requirements.
This is still N.E. for individual use bath and toilet rooms because they are exempt from additional space requirements.
E.

ADA Title III Requirements

4.22.4 Water Closets. If toilet stalls are provided, then at least one shall be a standard toilet stall complying with 4.17; where 6 or more stalls are provided, in addition to the stall complying with 4.17.3, at least one stall 36 in (915 mm) wide with an outward swinging, self-closing door and parallel grab bars complying with Fig. 30(d) and 4.26 shall be provided. Water closets in such stalls shall comply with 4.16. If water closets are not in stalls, then at least one shall comply with 4.16.

4.22.5 Urinals. If urinals are provided, then at least one shall comply with 4.18.

4.22.6 Lavatories and Mirrors. If lavatories and mirrors are provided, then at least one of each shall comply with 4.19.

4.22.7 Controls and Dispensers. If controls, dispensers, receptacles, or other equipment are provided, then at least one of each shall be on an accessible route and shall comply with 4.27.

4.23 Bathrooms, Bathing Facilities, and Shower Rooms.

4.23.1 Minimum Number. Bathrooms, bathing facilities, or shower rooms required to be accessible by 4.1 shall comply with 4.23 and shall be on an accessible route.

CABO/ANSI A117.1-1992

4.18.4* Ambulatory Accessible Stalls. Ambulatory accessible stalls shall be 36 in (915 mm) wide maximum and 60 in (1525 mm) deep minimum. See Fig. B4.18.3.2.

4.16.6* Mirrors. Mirrors, mounted above lavatories or sinks, shall have the bottom edge of the reflecting surface 38 in (965 mm) maximum above the floor. See Fig. B4.20.3.1. Full length mirrors used in conjunction with wheelchair accessible dressing rooms shall be 18 in (455 mm) wide minimum and shall be mounted with the bottom edge 18 in (455 mm) high maximum above the floor and the top edge 72 in (1830 mm) high minimum. Mirrors shall be located in a position affording a view to a person seated on a bench or a wheelchair, as well as to a person in a standing position.

4.16.4 Controls and Dispensers. Accessible operable parts, dispensers, receptacles, or other equipment shall comply with 4.25.

4.16 Toilet Rooms, Bathrooms, Bathing Facilities, and Shower Rooms

4.16.1 General. Accessible toilet rooms, bathrooms, bathing facilities, and shower rooms shall comply with 4.16.

BCMC

6.1.2 Where toilet stalls are provided in a toilet room or bathing facility, a wheelchair accessible toilet stall shall be provided. Where six or more toilet stalls are provided in a toilet room or bathing facility, at least one ambulatory accessible stall shall be provided in addition to the wheelchair accessible stall.

6.1.1 Toilet rooms and bathing facilities shall be accessible. At least one of each type fixture or element in each accessible toilet room and bathing facility shall be accessible.

EXCEPTIONS:

1. A toilet room or bathing facility for a single occupant and not for common or public use shall be permitted to be adaptable.

2. Dwelling units, guest rooms and patient toilet rooms, unless required by 5.0 to be accessible or adaptable.

6.1.1 Toilet rooms and bathing facilities shall be accessible. At least one of each type fixture or element in each accessible toilet room and bathing facility shall be accessible.

EXCEPTIONS:

1. A toilet room or bathing facility for a single occupant and not for common or public use shall be permitted to be adaptable.

2. Dwelling units, guest rooms and patient toilet rooms, unless required by 5.0 to be accessible or adaptable.

6.1.1 Toilet rooms and bathing facilities shall be accessible. At least one of each type fixture or element in each accessible toilet room and bathing facility shall be accessible.

EXCEPTIONS:

1. A toilet room or bathing facility for a single occupant and not for common or public use shall be permitted to be adaptable.

2. Dwelling units, guest rooms and patient toilet rooms, unless required by 5.0 to be accessible or adaptable.

3.1.2 At least one accessible route shall connect accessible spaces, elements, facilities and buildings that are on the same site. Where only one accessible route is provided, it shall not pass through kitchens, storage rooms, restrooms, closets or similar spaces.

Comments*

N.E. 4.18.4 does not require an outward swinging, self-closing door or establish a toilet seat height requirement as required by ADA Standards. 4.18.4 requires 36" maximum stall width where ADA requires 36" absolute width.

ADA/ANSI/BCMC Requirements - October 13, 1995

01-03798

ADA Title III Requirements

4.23.2 Doors. Doors to accessible bathrooms shall comply with 4.13. Doors shall not swing into the floor space required for any fixture.

4.23.3* Clear Floor Space. The accessible fixtures and controls required in 4.23.4, 4.23.5, 4.23.6, 4.23.7, 4.23.8, and 4.23.9 shall be on an accessible route. An unobstructed turning space complying with 4.2.3 shall be provided within an accessible bathroom. The clear floor spaces at fixtures and controls, the accessible route, and the turning space may overlap.

4.23.4 Water Closets. If toilet stalls are provided, then at least one shall be a standard toilet stall complying with 4.17; where 6 or more stalls are provided, in addition to the stall complying with 4.17.3, at least one stall 36 in (915 mm) wide with an outward swinging, self-closing door and parallel grab bars complying with Fig. 30(d) and 4.26 shall be provided. Water closets in such stalls shall comply with 4.16. If water closets are not in stalls, then at least one shall comply with 4.16.

4.23.5 Urinals. If urinals are provided, then at least one shall comply with 4.18.

4.23.6 Lavatories and Mirrors. If lavatories and mirrors are provided, then at least one of each shall comply with 4.19.

CABO/ANSI A117.1-1992

4.16.2* Doors. All doors to accessible toilet rooms, bathrooms, bathing facilities, and shower rooms shall comply with 4.13. Doors shall not swing into the clear floor space required for any fixture unless the toilet or bathroom is for individual use only, or a clear floor space complying with 4.2.4.1 is provided beyond the arc of the door swing within the room.

4.16.3* Clear Floor Space. Accessible fixtures and controls shall comply with 4.17 through 4.22. An unobstructed turning space complying with 4.2.3 and 4.2.4.1 shall be provided within an accessible room. The clear floor spaces at fixtures and controls, the accessible route, and the turning space shall be permitted to overlap.
4.18.4* Ambulatory Accessible Stalls. Ambulatory accessible stalls shall be 36 in (915 mm) wide maximum and 60 in (1525 mm) deep minimum. See Fig. B4.18.4.
4.16.6* Mirrors. Mirrors, mounted above lavatories or sinks, shall have the bottom edge of the reflecting surface 38 in (965 mm) maximum above the floor. See Fig. B4.20.3.1. Full length mirrors used in conjunction with wheelchair accessible dressing rooms shall be 18 in (455 mm) wide minimum and shall be mounted with the bottom edge 18 in (455 mm) high maximum above the floor and the top edge 72 in (1830 mm) high minimum. Mirrors shall be located in a position affording a view to a person seated on a bench or a wheelchair, as well as to a person in a standing position.

BCMC

3.1.2 At least one accessible route shall connect accessible spaces, elements, facilities and buildings that are on the same site. Where only one accessible route is provided, it shall not pass through kitchens, storage rooms, restrooms, closets or similar spaces.
6.1.2 Where toilet stalls are provided in a toilet room or bathing facility, a wheelchair accessible toilet stall shall be provided. Where six or more toilet stalls are provided in a toilet room or bathing facility, at least one ambulatory accessible stall shall be provided in addition to the wheelchair accessible stall.
6.1.1 Toilet rooms and bathing facilities shall be accessible. At least one of each type fixture or element in each accessible toilet room and bathing facility shall be accessible.
EXCEPTIONS:
1. A toilet room or bathing facility for a single occupant and not for common or public use shall be permitted to be adaptable.
2. Dwelling units, guest rooms and patient toilet rooms, unless required by 5.0 to be accessible or adaptable.
6.1.1 Toilet rooms and bathing facilities shall be accessible. At least one of each type fixture or element in each accessible toilet room and bathing facility shall be accessible.
EXCEPTIONS:
1. A toilet room or bathing facility for a single occupant

and not for common or public use shall be permitted to be adaptable.
2. Dwelling units, guest rooms and patient toilet rooms, unless required by 5.0 to be accessible or adaptable.

Comments*

E. (But see above at ADA 4.22.2)
E.
ANSI N.E. 4.18.4 does not require self-closing door or establish toilet seat height as required in the ADA Standards. ANSI requires 36 inch maximum width, while ADA requires 36 inches absolute.
BCMC N.E. - Need reference to accessible water closet.
E.
E.

ADA Title III Requirements

4.23.7 Controls and Dispensers. If controls, dispensers, receptacles, or other equipment are provided, then at least one of each shall be on an accessible route and shall comply with 4.27.
4.23.8 Bathing and Shower Facilities. If tubs or showers are provided, then at least one accessible tub that complies with 4.20 or at least one accessible shower that complies with 4.21 shall be provided.
4.23.9* Medicine Cabinets. If medicine cabinets are provided, at least one shall be located with a usable shelf no higher than 44 in (1120 mm) above the floor space. The floor space shall comply with 4.2.4.
4.24 Sinks.
4.24.1 General. Sinks required to be accessible by 4.1 shall comply with 4.24.
4.24.2 Height. Sinks shall be mounted with the counter or rim no higher than 34 in (865 mm) above the finish floor.

CABO/ANSI A117.1-1992

4.16.4 Controls and Dispensers. Accessible controls, dispensers, receptacles, or other equipment shall comply with 4.25.
4.16.5* Medicine Cabinets. Accessible medicine cabinets shall be located with a usable shelf 44 in (1120 mm)

maximum above the floor. The floor space shall comply with 4.2.4.

4.20 Lavatories and Sinks

4.20.1 General. Accessible lavatory fixtures, sinks, vanities, and built-in lavatories shall comply with 4.20.

4.20.2 Height

4.20.2.2 Sinks. Sinks shall be mounted with the counter or rim 34 in (865 mm) maximum above the floor. Sinks shall be 6 1/2 in (165 mm) deep maximum. Sinks in kitchens of accessible dwelling units shall comply with 4.33.4.5.

BCMC

6.1.1 Toilet rooms and bathing facilities shall be accessible. At least one of each type fixture or element in each accessible toilet room and bathing facility shall be accessible.

EXCEPTIONS:

1. A toilet room or bathing facility for a single occupant and not for common or public use shall be permitted to be adaptable.

2. Dwelling units, guest rooms and patient toilet rooms, unless required by 5.0 to be accessible or adaptable.

6.1.1 Toilet rooms and bathing facilities shall be accessible. At least one of each type fixture or element in each accessible toilet room and bathing facility shall be accessible.

EXCEPTIONS:

1. A toilet room or bathing facility for a single occupant and not for common or public use shall be permitted to be adaptable.

2. Dwelling units, guest rooms and patient toilet rooms, unless required by 5.0 to be accessible or adaptable.

6.1.1 Toilet rooms and bathing facilities shall be accessible. At least one of each type fixture or element in each accessible toilet room and bathing facility shall be accessible.

EXCEPTIONS:

1. A toilet room or bathing facility for a single occupant and not for common or public use shall be permitted to be adaptable.

2. Dwelling units, guest rooms and patient toilet rooms, unless required by 5.0 to be accessible or adaptable.

6.1.1 Toilet rooms and bathing facilities shall be accessible. At least one of each type fixture or element in each accessible toilet room and bathing facility shall be accessible.

EXCEPTIONS:

1. A toilet room or bathing facility for a single occupant

and not for common or public use shall be permitted to be adaptable.
2. Dwelling units, guest rooms and patient toilet rooms, unless required by 5.0 to be accessible or adaptable.

Comments*

E.
E.
E.
E.
E. Except for error in 4.33.4.5 that calls for fixed counter height at 34 inches MINIMUM.

ADA Title III Requirements

4.24.3 Knee Clearance. Knee clearance that is at least 27 in (685 mm) high, 30 in (760 mm) wide, and 19 in (485 mm) deep shall be provided underneath sinks.
4.24.4 Depth. Each sink shall be a maximum of 6-1/2 in (165 mm) deep.
4.24.5 Clear Floor Space. A clear floor space at least 30 in by 48 in (760 mm by 1220 mm) complying with 4.2.4 shall be provided in front of a sink to allow forward approach. The clear floor space shall be on an accessible route and shall extend a maximum of 19 in (485 mm) underneath the sink (see Fig. 32).
4.24.6 Exposed Pipes and Surfaces. Hot water and drain pipes exposed under sinks shall be insulated or otherwise configured so as to protect against contact. There shall be no sharp or abrasive surfaces under sinks.

4.24.7 Faucets. Faucets shall comply with 4.27.4. Lever-operated, push-type, touch-type, or electronically controlled mechanisms are acceptable designs.
4.25 Storage.
4.25.1 General. Fixed storage facilities such as cabinets, shelves, closets, and drawers required to be accessible by 4.1 shall comply with 4.25.
4.25.2 Clear Floor Space. A clear floor space at least 30 in by 48 in (760 mm by 1220 mm) complying with 4.2.4 that allows either a forward or parallel approach by a person using a wheelchair shall be provided at accessible storage facilities.

CABO/ANSI A117.1-1992

4.20.3 Clearances.
4.20.3.1 Knee and Toe Clearances. Fixtures shall extend 17 in (430 mm) minimum from the wall. Clear knee space shall be provided in accordance with 4.2.4.3. Clearance between the bottom of the front edge of the apron and the floor shall be 29 in (735 mm) minimum. The clear knee space shall be 8 in (205 mm) in depth minimum at 27 in (685 mm) minimum above the floor or ground and 11 in (280 mm) in depth minimum at 9 in (230 mm) minimum above the floor or ground. Clear toe space shall be provided in accordance with 4.2.4.3. The dip of the overflow shall be ignored when checking the clearances. See Fig. B4.20.3.1.
4.20.2.2 Sinks. Sinks shall be mounted with the counter or rim 34 in (865 mm) maximum above the floor. Sinks shall be 6 1/2 in (165 mm) deep maximum. Sinks in kitchens of accessible dwelling units shall comply with 4.33.4.5.
4.20.3.2 Clear Floor Space. Clear floor space shall comply with 4.2.4. Clear floor space, 30 in by 48 in (760 mm by 1220 mm) minimum, shall be provided in front of a lavatory or sink to allow a forward approach and shall extend 19 in (485 mm) maximum under the lavatory or sink. See Fig. B4.20.3.2.
4.20.4* Exposed Pipes and Surfaces. Water supply and drain pipes under lavatories or sinks shall be insulated or otherwise configured to protect against contact, as shown in Fig. B4.20.3.1. There shall be no sharp or abrasive surfaces under lavatories and sinks.
4.20.5* Faucets. Faucets shall comply with 4.25.4. Self-closing faucets, when used, shall remain open for 10 seconds minimum.
4.23 Storage
4.23.1 General. Accessible storage facilities including cabinets, shelves, closets, lockers and drawers shall

comply with 4.23.
4.23.2 Clear Floor Space. A clear floor space complying with 4.2.4 that allows either a forward or parallel approach by a person using a wheelchair shall be provided at accessible storage facilities.

BCMC Comments*

N.E. ADA requires 19 inch depth of clear floor space at sink, not 17-19 inches.

E.
E.
E.
E.
E.
E.

ADA Title III Requirements

4.25.3 Height. Accessible storage spaces shall be within at least one of the reach ranges specified in 4.2.5 and 4.2.6 (see Fig. 5 and Fig. 6). Clothes rods or shelves shall be a maximum of 54 in (1370 mm) above the finish floor for a side approach. Where the distance from the wheelchair to the clothes rod or shelf exceeds 10 in (255 mm) (as in closets without accessible doors) the height

and depth to the rod or shelf shall comply with Fig. 38(a) and Fig. 38(b).

Figure 38 of the ADA Standards. Storage Shelves and Closets.

38(a) Shelves. If the clear floor space allows a parallel approach by a person in a wheelchair and the distance between the wheelchair and the shelf exceeds 10 in (255 mm), the maximum high side reach shall be 48 in (1220 mm) above the floor and the low side reach shall be a minimum of 9 in (230 mm) above the floor. The shelves can be adjustable. The maximum distance from the user to the middle shelf shall be 21 in (535 mm).

38(b) Closets. If the clear floor space allows a parallel approach by a person in a wheelchair and the distance between the wheelchair and the clothes rod exceeds 10 in (255 mm), the maximum high side reach shall be 48 in (1220 mm). The maximum distance from the user to the clothes rod shall be 21 in (535 mm).

4.25.4 Hardware. Hardware for accessible storage facilities shall comply with 4.27.4. Touch latches and U-shaped pulls are acceptable.

4.26 Handrails, Grab Bars, and Tub and Shower Seats.

4.26.1* General. All handrails, grab bars, and tub and shower seats required to be accessible by 4.1, 4.8, 4.9, 4.16, 4.17, 4.20 or 4.21 shall comply with 4.26.

CABO/ANSI A117.1-1992

4.23.3 Height. Accessible storage spaces shall be within at least one of the reach ranges specified in 4.2.5 and 4.2.6. Clothes rods shall be 54 in (1370 mm) maximum above the floor. See Fig. B4.23.

4.23.4 Hardware. Hardware for accessible storage facilities shall comply with 4.25.4.

4.24 Grab Bars, and Tub and Shower Seats

4.24.1* General. Grab bars and tub and shower seats in accessible toilet or bathing facilities shall comply with 4.24.

BCMC

Comments*

N.E. ANSI text does not include the 10" limitation on side reach height for clothes rods. ANSI also removes the 21" max reach limitation in ADA Standards Fig. 38.

E.

E.

ADA Title III Requirements

4.26.2* Size and Spacing of Grab Bars and Handrails. The diameter or width of the gripping surfaces of a handrail or grab bar shall be 1-1/4 in to 1-1/2 in (32 mm to 38 mm), or the shape shall provide an equivalent gripping surface. If handrails or grab bars are mounted adjacent to a wall, the space between the wall and the grab bar shall be 1-1/2 in (38 mm) (see Fig. 39(a), (b), (c), and (e)). Handrails may be located in a recess if the recess is a maximum of 3 in (75 mm) deep and extends at least 18 in (455 mm) above the top of the rail (see Fig. 39(d)).

CABO/ANSI A117.1-1992

4.24.2 Grab Bars.

4.24.2.1 Size and Spacing of Grab Bars. The diameter or width of the gripping surfaces of a grab bar shall be 1 1/4 - 1 1/2 in (32-38 mm), or the shape shall provide an equivalent gripping surface. If grab bars are mounted adjacent to a wall, the space between the wall and the grab bar shall be
1 1/2 in (38 mm). See Fig. B4.24.2.1.

4.24.2.2 Position of Grab Bars. Grab bars shall be mounted in a horizontal position, 33-36 in (840-915 mm) above the floor, except where a supplemental grab bar is installed in relation to a fixture rim or surface.

4.24.2.3 Surface Hazards. Grab bars and any wall or other surfaces adjacent to grab bars shall be free of sharp or abrasive elements. Edges shall have a radius of 1/8 in (3 mm) minimum.

4.24.2.4 Fittings. Grab bars shall not rotate within their fittings.

4.24.2.5* Method of Mounting. Grab bars shall be mounted in any manner that provides a gripping surface at the locations specified in this standard and that does not obstruct the required clear floor space.

4.3.10.7 Handrails shall have a circular cross section with an outside diameter of 1 1/4 in (32 mm) minimum and 2 in (51 mm) maximum, or shall provide equivalent graspability in accordance with the following requirement. Handrails with other shapes shall be permitted provided they have a perimeter dimension of 4 in (100 mm) minimum and 6 1/4 in (160 mm) maximum, and provided their largest cross-section dimension is 2 1/4 in (57 mm) maximum.

BCMC

16.4.2 Handrails shall have either a circular cross section with a diameter of 1 1/4 inches to 2 inches, or shall provide equivalent graspability. Handrails with other shapes shall be permitted if they have a perimeter dimension of at least 4 inches but not greater than 6 1/4

inches and if their largest cross section dimension does not exceed 2 1/4 inches. Edges shall have a minimum radius of 1/8 inch.

Comments*

N.E. ANSI does not address grab bars in a recess. They are, therefore, allowed with no special constraints or design requirements. Grab bars in a recess may be unusable.

E.

ADA Title III Requirements

4.26.3 Structural Strength. The structural strength of grab bars, tub and shower seats, fasteners, and mounting devices shall meet the following specification:

(1) Bending stress in a grab bar or seat induced by the maximum bending moment from the application of 250 lbf (1112N) shall be less than the allowable stress for the material of the grab bar or seat.

(2) Shear stress induced in a grab bar or seat by the application of 250 lbf (1112N) shall be less than the allowable shear stress for the material of the grab bar or seat. If the connection between the grab bar or seat and its mounting bracket or other support is considered to be fully restrained, then direct and torsional shear stresses shall be totaled for the combined shear stress, which shall not exceed the allowable shear stress.

(3) Shear force induced in a fastener or mounting device from the application of 250 lbf (1112N) shall be less than the allowable lateral load of either the fastener or mounting device or the supporting structure, whichever is the smaller allowable load.

(4) Tensile force induced in a fastener by a direct tension force of 250 lbf (1112N) plus the maximum moment from the application of 250 lbf (1112N) shall be less than the allowable withdrawal load between the fastener and the supporting structure.

(5) Grab bars shall not rotate within their fittings.

4.26.4 Eliminating Hazards. A handrail or grab bar and any wall or other surface adjacent to it shall be free of any sharp or abrasive elements. Edges shall have a minimum radius of 1/8 in (3.2 mm).

4.27 Controls and Operating Mechanisms.

4.27.1 General. Controls and operating mechanisms required to be accessible by 4.1 shall comply with 4.27.

4.27.2 Clear Floor Space. Clear floor space complying with 4.2.4 that allows a forward or a parallel approach by a person using a wheelchair shall be provided at controls, dispensers, receptacles, and other operable equipment.

CABO/ANSI A117.1-1992

4.24.3 Structural Strength. Allowable stresses in bending,

shear and tension shall not be exceeded for materials used when a vertical or horizontal force of 250 lb (1112N) is applied at any point on the grab bar, seat, fastener, mounting device or supporting structure.

4.24.2.4 Fittings. Grab bars shall not rotate within their fittings.

4.24.2.3 Surface Hazards. Grab bars and any wall or other surfaces adjacent to grab bars shall be free of sharp or abrasive elements. Edges shall have a radius of 1/8 in (3 mm) minimum.

4.25 Operable Parts of Equipment and Appliances

4.25.1* General. Operable parts of equipment and appliances in accessible spaces, along accessible routes, or as part of accessible elements shall comply with 4.25.

4.25.2 Clear Floor Space. Clear floor space complying with 4.2.4 that allows a forward or a parallel approach by a person using a wheelchair shall be provided at operable parts of equipment and appliances.

BCMC

6.8 Controls, Operating Mechanisms and Hardware

Controls, operating mechanisms and hardware, including switches that control lighting, ventilation or electrical outlets, in accessible spaces, along accessible routes or as parts of accessible elements, shall be accessible.

Comments*

E.

E.

E.

E.

ADA Title III Requirements

4.27.3* Height. The highest operable part of controls, dispensers, receptacles, and other operable equipment shall be placed within at least one of the reach ranges specified in 4.2.5 and 4.2.6. Electrical and communications system receptacles on walls shall be mounted no less than 15 in (380 mm) above the floor.

EXCEPTION: These requirements do not apply where the use of special equipment dictates otherwise or where electrical and communications systems receptacles are not normally intended for use by building occupants.

4.27.4 Operation. Controls and operating mechanisms shall be operable with one hand and shall not require tight grasping, pinching, or twisting of the wrist. The force required to activate controls shall be no greater than 5 lbf (22.2 N).

4.28 Alarms.

4.28.1 General. Alarm systems required to be accessible by 4.1 shall comply with 4.28. At a minimum, visual signal appliances shall be provided in buildings and facilities in each of the following areas: restrooms and any other general usage areas (e.g., meeting rooms), hallways, lobbies, and any other area for common use.

4.28.2* Audible Alarms. If provided, audible emergency alarms shall produce a sound that exceeds the prevailing equivalent sound level in the room or space by at least 15 dbA or exceeds any maximum sound level with a duration of 60 seconds by 5 dbA, whichever is louder. Sound levels for alarm signals shall not exceed 120 dbA.

CABO/ANSI A117.1-1992

4.25.3* Height. Operable parts of equipment and appliances shall be placed within one or more of the reach

ranges specified in 4.2.5 and 4.2.6.
Exception: Electrical and communications-system receptacles on walls shall be mounted 15 in (380 mm) minimum above the floor unless the use of special equipment requires location at a different position.
4.25.4 Operation. Operable parts of equipment and appliances shall be operable with one hand and shall not require tight grasping, pinching, or twisting of the wrist. The force required to activate controls shall be 5 lb (22.2 N) maximum.
4.26 Alarms
4.26.1* General. Accessible emergency warning systems shall include both audible alarm signals complying with 4.26.2 and visible signaling appliance complying with 4.26.3.
4.26.2* Audible Alarm Signals. Audible emergency alarms shall produce a sound that exceeds the prevailing equivalent sound level in the room or space by 15 decibels minimum, or exceeds any maximum sound level with a duration of 30 seconds minimum by 5 decibels minimum, whichever is louder. Sound levels for alarm signals shall be 120 decibels maximum.

BCMC

19.0 ALARM SYSTEMS
Required fire protective signaling systems shall include visible alarm-indicating appliances in public and common areas.

Comments*

E.
E.
N.E. Addresses only "required" systems. ADA says, "if provided. . ." Also, no minimum requirement for locations of visual alarms except "public and common areas."
E.

ADA Title III Requirements

4.28.3* Visual Alarms. Visual alarm signal appliances shall be integrated into the building or facility alarm system. If single station audible alarms are provided then single station visual alarm signals shall be provided. Visual alarm signals shall have the following minimum photometric and location features:

(1) The lamp shall be a xenon strobe type or equivalent.

(2) The color shall be clear or nominal white (i.e., unfiltered or clear filtered white light).

(3) The maximum pulse duration shall be two-tenths of one second (0.2 sec) with a maximum duty cycle of 40 percent. The pulse duration is defined as the time interval between initial and final points of 10 percent of maximum signal.

(4) The intensity shall be a minimum of 75 candela.

(5) The flash rate shall be a minimum of 1 Hz and a maximum of 3 Hz.

(6) The appliance shall be placed 80 in (2030 mm) above the highest floor level within the space or 6 in (152 mm) below the ceiling, whichever is lower.

(7) In general, no place in any room or space required to have a visual signal appliance shall be more than 50 ft (15 m) from the signal (in the horizontal plane). In large rooms

and spaces exceeding 100 ft (30 m) across, without obstructions 6 ft (2 m) above the finish floor, such as auditoriums, devices may be placed around the perimeter, spaced a maximum 100 ft (30 m) apart, in lieu of suspending appliances from the ceiling.

(8) No place in common corridors or hallways in which visual alarm signaling appliances are required shall be more than 50 ft (15 m) from the signal.

CABO/ANSI A117.1-1992

4.26.3* Visible Signaling Appliances. Visible signaling appliances shall have the following photometric and location features.

4.26.3.1 General Features

4.26.3.1.1 Lamp shall be xenon strobe type producing a clear or nominal white light.

4.26.3.1.2 Flash rate shall be 0.33 Hz minimum and 3 Hz maximum.

4.26.3.1.3 Wall mounted visible signaling appliances shall be 80 in (2030 mm) minimum and 96 in (2440 mm) maximum above the floor.

Exception: Portable visible signaling appliances which incorporate smoke detectors shall be wall mounted 4 in (100 mm) minimum and 12 in (305 mm) maximum from the ceiling.

4.26.3.2 Awake Mode

4.26.3.2.1 For rooms and similar spaces that are not intended for sleeping, visible signaling appliances shall be located in accordance with Table 4.26.3.2.1. The separation between adjacent appliances shall not exceed 100 ft (30 m). The minimum square room size contained in Table 4.26.3.2.1 that entirely encompasses the area of the room, or subdivision of the room into multiple square areas, shall be used to determine the required number and intensity of appliances in accordance with Table 4.26.3.2.1.

4.26.3.2.2 For corridors 20 ft (6 m) wide maximum, visible signaling appliances shall be located in accordance with Table 4.26.3.2.2. In these corridors, visible signaling appliances shall be located 15 ft (5 m) maximum from the end of the corridor, with a separation of 100 ft (30 m) maximum between appliances. For corridors more than 20 ft (6 m) wide, visible signaling appliances shall be located in accordance with Table 4.26.3.2.1.

BCMC

Comments*

N.E. No pulse duration maximum.

1/3 Hz is lower than permitted by ADA.

ADA requires 6" minimum from the ceiling. ANSI's 4 inch minimum from ceiling allowed in exception will allow fixture to be more easily obscured by smoke.
N.E. The lower intensity (.33 Hz rather than 1 hz in ADA) allowed by ANSI plus the placement requirements could easily result in too many appliances too close together. These overlapping flashes would increase the flash rate, which could potentially trigger seizures.

ADA Title III Requirements
CABO/ANSI A117.1-1992

4.26.3.2.3 The light output for visible signaling appliances shall conform to Table 4.26.3.2.1 or 4.26.3.2.2, depending on room size or corridor length. For corridors, visible signaling appliances shall be rated 15 candela (cd) minimum.
4.26.3.2.4 The signal shall be visible, directly or by reflection, from any point in the room or space.

Table 4.26.3.2.1
Room spacing allocation

Max room size ft	One light cd	Two lights opposite walls cd	One light per wall cd
20 x 20	15	-	-
30 x 30	30	15	-

40 x 40	60	30	15
50 x 50	95	60	30
60 x 60	135	95	30
70 x 70	185	110	60
80 x 80	-	140	95
90 x 90	-	180	95
100 x 100	-	-	95
110 x 110	-	-	135
120 x 120	-	-	160
130 x 130	-	-	185

Note: The values in column two for "One light" are based on locating the visible signaling appliance at the half-way distance of the longest wall. In square rooms, the "Maximum Room Size" shall be determined by: (a) The distance from the appliance to the farthest opposite wall; or (b) Twice the distance from the appliance to the farthest adjacent wall, whichever is greater.

Table 4.26.3.2.2

Corridor spacing allocation

Corridor length (20 foot Maximum Width) ft	Minimum number of 15 cd visible appliances required
less equal to 30	1
>30 - 130	2
>130 - 230	3
>230 - 330	4
>330 - 430	5
>430 - 530	6

BCMC Comments*
N.E. See above and below. Note: Too many devices in rooms increase flash rates and risk of seizures.
N.E. See above.

ADA Title III Requirements

4.28.4* Auxiliary Alarms. Units and sleeping accommodations shall have a visual alarm connected to the building emergency alarm system or shall have a standard 110-volt electrical receptacle into which such an alarm can be connected and a means by which a signal from the building emergency alarm system can trigger such an auxiliary alarm. When visual alarms are in place the

signal shall be visible in all areas of the unit or room. Instructions for use of the auxiliary alarm or receptacle shall be provided.

4.29 Detectable Warnings.

4.29.1 General. Detectable warnings required by 4.1 and 4.7 shall comply with 4.29.

4.29.2* Detectable Warnings on Walking Surfaces. Detectable warnings shall consist of raised truncated domes with a diameter of nominal 0.9 in (23 mm), a height of nominal 0.2 in (5 mm) and a center-to-center spacing of nominal 2.35 in (60 mm) and shall contrast visually with adjoining surfaces, either light-on-dark, or dark-on-light. The material used to provide contrast shall be an integral part of the walking surface. Detectable warnings used on interior surfaces shall differ from adjoining walking surfaces in resiliency or sound-on-cane contact.

4.29.3 Detectable Warnings on Doors To Hazardous Areas. (Reserved).

4.29.4 Detectable Warnings at Stairs. (Reserved).

4.29.5 Detectable Warnings at Hazardous Vehicular Areas. If a walk crosses or adjoins a vehicular way, and the walking surfaces are not separated by curbs, railings, or other elements between the pedestrian areas and vehicular areas, the boundary between the areas shall be defined by a continuous detectable warning which is 36 in (915 mm) wide, complying with 4.29.2. [Suspended until July 26, 1996. 28 C.F.R. S 36.407.]

4.29.6 Detectable Warnings at Reflecting Pools. The edges of reflecting pools shall be protected by railings, walls, curbs, or detectable warnings complying with 4.29.2. [Suspended until July 26, 1996. 28 C.F.R. S 36.407.]

CABO/ANSI A117.1-1992

4.26.3.3 Asleep Mode

4.26.3.3.1 In rooms intended for sleeping where visible signal appliances are provided, they shall be actuated by the building alarm system and by the room smoke detector. The visible signaling appliance shall provide a light output of 110 candela minimum.

4.26.3.3.2 Where used in a single station portable or hardwired system, the alarm shall be a combination single station smoke detector and visible signaling appliance. The visible signaling appliance shall provide a light output of 177 candela minimum. The visible signaling appliance shall be powered by the building electrical system or by a standard 110-120 volt receptacle that is not subject to loss of power by a wall switch.

4.26.3.3.3 All portable alarm appliances shall have an

individual printed instruction card, either available with the alarm appliance or posted on the room door of each sleeping room or space where the portable alarm plug receptacles are located.

BCMC Comments*

P.N.E. No scoping of when visible alarms are required.

Technical provisions exceed ADA Standards.

N.E.

N.E.

N.E.

N.E.

N.E.

N.E.

ADA Title III Requirements

4.29.7 Standardization. (Reserved).

4.30 Signage.

4.30.1* General. Signage required to be accessible by 4.1 shall comply with the applicable provisions of 4.30.

CABO/ANSI A117.1-1992

4.27 Detectable Warnings - Standardization*

Where required, detectable warnings shall be standard within a building, facility, site or complex of buildings.

A4.27 Detectable Warnings - Standardization

Recognition of, and quick response to, detectable warnings is maximized by standardization of material as well as surface texture and color. Provision of too many detectable and tactile warnings or failure to standardize such warnings weakens their usefulness. Detectable and tactile warnings are also visual signals to guide dogs, since dogs are trained to respond to a large variety of visual cues.

4.28 Signage

4.28.1* General. Accessible signage shall comply with 4.28.2, 4.28.3, and 4.28.5. Tactile signage shall comply with 4.28.2, 4.28.5, 4.28.6 and 4.28.7.

A4.28.1 General. Much of the information in 4.28 was developed to assist the large number of people who are visually impaired but have some residual sight. In building complexes where finding locations independently on a routine basis is a necessity (for example, college campuses), tactile maps or prerecorded instructions are very helpful to visually impaired people. Several maps and auditory instruction have been developed and tested for specific applications. The type of map or instructions used are based on the information to be communicated, which depends highly on the type of buildings or users. Tactile signage is used where permanent signs identify the following rooms and spaces.

-Hotel guest rooms
-Tenant space entrances
-Entrances to apartment units
-Patient rooms in medical facilities
-Classrooms and offices in schools and colleges
-Common use areas
-Rest rooms
-Areas of refuge

Landmarks easily distinguished by visually impaired individuals are useful as orientation cues. Such cues include changes in illumination level, bright colors, unique patterns, wall murals, location of special equipment, or other architectural features (for example, an exterior view).

Many people with disabilities have limitations in movement of their head and reduced peripheral vision. Thus, signage position perpendicular to the path of travel is easiest for them to notice. People generally distinguish signage within an angle of 30 degrees to either side of the centerline of their face without moving their head.

ADA/ANSI/BCMC Requirements - October 13, 1995

01-03809

ADA Title III Requirements

4.30.2* Character Proportion. Letters and numbers on signs shall have a width-to-height ratio between 3:5 and 1:1 and a stroke-width-to-height ratio between 1:5 and 1:10.

4.30.3 Character Height. Characters and numbers on signs shall be sized according to the viewing distance from which they are to be read. The minimum height is measured using an upper case X. Lower case characters are permitted.

Height Above Finished Floor	Minimum Character Height
Suspended or Projected Overhead in compliance with 4.4.2	3 in (75 mm) minimum

4.30.4* Raised and Brailled Characters and Pictorial Symbol Signs (Pictograms). Letters and numerals shall be raised 1/32 in, upper case, sans serif or simple serif type and shall be accompanied with Grade 2 Braille. Raised characters shall be at least 5/8 in (16 mm) high, but no higher than 2 in (50 mm). Pictograms shall be accompanied by the equivalent verbal description placed directly below the pictogram. The border dimension of the pictogram shall be 6 in (152 mm) minimum in height.

4.30.5* Finish and Contrast. The characters and background of signs shall be eggshell, matte, or other non-glare finish. Characters and symbols shall contrast with their background -- either light characters on a dark background or dark characters on a light background.

CABO/ANSI A117.1-1992

4.28.2* Character Proportion. Letters and numbers on signs shall have a width-to-height ratio between 3:5 and 1:1 and a stroke-width-to-height ratio between 1:5 and 1:10, utilizing an upper-case "X" for measurement.

4.28.3* Character Height. Letter and number heights for signs of various sizes shall conform to Table 4.28.3. Exception: Character heights shall be 5/8 in (16 mm) high minimum for building directories.

Table 4.28.3

Letter and Number Heights

Height above floor/ground	Minimum character height

More than 80 in (2030 mm) 3 in (75 mm)
More than 60 in (1525 mm) but not more than 80 in (2030 mm) 2 in (51 mm)
More than 48 in (1220 mm) but not more than 60 in (1525 mm) 1 in (25 mm)

4.28.4* Pictograms. Where pictograms are required, they shall have a 6 in (150 mm) minimum size measured at the border. Where text descriptors for pictograms are required, they shall comply with the tactile character provisions of 4.28.6 and 4.28.7.

4.28.6* Tactile Characters or Symbols. Raised characters, symbols and Braille shall comply with 4.28.6.1 and 4.28.6.2.

4.28.6.1 Raised Characters and Symbols. Characters and symbols on tactile signs shall be raised 1/32 in (0.8 mm) minimum. Raised characters and symbols shall be in uppercase characters. Raised characters and symbols shall be 5/8 in (16 mm) high minimum, and 2 in (51 mm) maximum. Raised characters and symbols shall be accompanied by Braille in accordance with 4.28.6.2.

4.28.6.2 Braille. Braille shall be separated 1/2 in (13 mm) minimum from the corresponding raised characters or symbols. Braille provided in accordance with 4.10.1.12 shall be placed 3/16 in (5 mm) minimum below the corresponding raised characters or symbols. Braille shall be Grade II and shall conform to Specification #800, National Library Service, Library of Congress.

4.28.5* Finish and Contrast. The characters and background of signs shall be eggshell, matte, or other non-glare finish. Characters and symbols shall contrast with their background, with either light characters on a dark background or dark characters on a light background.

BCMC Comments*

E. Exceeds.

ANSI N.E. ANSI fails to require sans serif or simple serif typeface.

BCMC P.N.E. ANSI gives technical provision for required pictograms only and does not require text descriptions to accompany pictograms. Therefore, BCMC needs to provide scoping for pictograms and accompanying text.

E.

ADA Title III Requirements

4.30.6 Mounting Location and Height. Where permanent identification is provided for rooms and spaces, signs shall be installed on the wall adjacent to the latch side of the door. Where there is no wall space to the latch side of the door, including at double leaf doors, signs shall be placed on the nearest adjacent wall. Mounting height shall be 60 in (1525 mm) above the finish floor to the centerline of the sign. Mounting location for such signage shall be so that a person may approach within 3 in (76 mm) of signage without encountering protruding objects or standing within the swing of a door.

4.30.7* Symbols of Accessibility

(1) Facilities and elements required to be identified as accessible by 4.1 shall use the international symbol of accessibility. The symbol shall be displayed as shown in Fig. 43(a) and (b).

Figure 43 of the ADA Standards. International Symbols.

43(a) Proportions, International Symbol of Accessibility. The diagram illustrates the International Symbol of Accessibility on a grid background.

43(b) Display Conditions, International Symbol of Accessibility. The symbol contrast shall be light on dark or dark on light.

(2) Volume Control Telephones. Telephones required to have a volume control by 4.1.3(17)(b) shall be identified by a sign containing a depiction of a telephone handset with radiating sound waves.

(3) Text Telephones. Text telephones required by 4.1.3(17)(c) shall be identified by the international TDD symbol (Fig. 43(c)). In addition, if a facility has a public text telephone, directional signage indicating the location

of the nearest text telephone shall be placed adjacent to all banks of telephones which do not contain a text telephone. Such directional signage shall include the international TDD symbol. If a facility has no banks of telephones, the directional signage shall be provided at the entrance (e.g., in a building directory).

(4) Assistive Listening Systems. In assembly areas where permanently installed assistive listening systems are required by 4.1.3(19)(b) the availability of such systems shall be identified with signage that includes the international symbol of access for hearing loss (Fig. 43(d)).

4.30.8* Illumination Levels. (Reserved).

4.31 Telephones.

4.31.1 General. Public telephones required to be accessible by 4.1 shall comply with 4.31.

CABO/ANSI A117.1-1992

4.28.7* Location of Tactile Signage. Tactile signage shall be located alongside the door on the latch side and shall be mounted at 60 in (1525 mm) above the adjacent finished floor to the centerline of the sign. In locations having double doors, tactile signs shall be mounted to the right of the right hand door. Where there is no wall space on the latch side of the door, including double leaf doors, signs shall be placed on the nearest adjacent wall.

4.28.8* Symbols of Accessibility.

4.28.1 International Symbol of Accessibility. Where the international symbol of accessibility is required, it shall be proportioned and displayed as shown in Fig. 4.28.8.1.

4.28.8.4 Volume Controlled Telephones. Where telephones are required to have volume controls, they shall be identified by a sign containing a depiction of a telephone handset with radiating sound waves, such as is shown in Fig. 4.28.8.4.

4.28.8.2 International Symbol of Telecommunication Devices for the Deaf (TDD). Where telecommunication devices for the deaf are required, they shall be identified by the international telecommunications device for the deaf symbol and proportioned as shown in Fig. 4.28.8.2.

4.28.8.3 Assistive Listening Systems. Where permanently installed assistive listening systems are required, they shall be identified by the international symbol of access for hearing loss proportioned and displayed as shown in Fig. 4.28.8.3.

4.29 Telephones

4.29.1 General. Accessible public telephones and related equipment shall comply with 4.29.

BCMC

Comments*

N.E. ANSI deleted the provision requiring placement of room signage to allow a person to approach within 3 inches of the sign.
N.E. Directional signage for TDDs/TTs is not required by ANSI.
E.

ADA Title III Requirements

4.31.2 Clear Floor or Ground Space. A clear floor or ground space at least 30 in by 48 in (760 mm by 1220 mm) that allows either a forward or parallel approach by a person using a wheelchair shall be provided at telephones (see Fig. 44). The clear floor or ground space shall comply with 4.2.4. Bases, enclosures, and fixed seats shall not impede approaches to telephones by people who use wheelchairs.
Figure 44 of the ADA Standards. Mounting Heights and Clearances for Telephones.

44(a) Side Reach Possible. If a parallel approach is provided at a telephone in an enclosure, the wing walls and shelf may extend beyond the face of the telephone a maximum of 10 in (255 mm). The wing walls and shelf may not overlap the required clear space. The controls shall be located no higher than 54 in (1370 mm) above the floor and the wing walls shall extend downward to 27 in (685 mm) or less above the floor.

44(b) Forward Reach Required. If a front approach is provided at a telephone with an enclosure, the shelf may extend beyond the face of the telephone a maximum of 20 in (510 mm) into the required clear floor space. Wing walls may extend beyond the face of the

telephone a maximum of 24 in (610 mm). If wing walls extend more than 24 in (610 mm) beyond the face of the telephone, an additional 6 in (150 mm) in width of clear floor space shall be provided, creating a clear floor space of 36 in by 48 in (910 mm by 1220 mm). Wing walls shall extend downward to 27 in (685 mm) or less above the floor. The highest operable part shall be located no higher than 48 in (1220 mm) above the floor.

4.31.3* Mounting Height. The highest operable part of the telephone shall be within the reach ranges specified in 4.2.5 or 4.2.6.

4.31.4 Protruding Objects. Telephones shall comply with 4.4.

4.31.5 Hearing Aid Compatible and Volume Control Telephones Required by 4.1.

(1) Telephones shall be hearing aid compatible.

(2) Volume controls, capable of a minimum of 12 dbA and a maximum of 18 dbA above normal, shall be provided in accordance with 4.1.3. If an automatic reset is provided then 18 dbA may be exceeded.

4.31.6 Controls. Telephones shall have pushbutton controls where service for such equipment is available.

CABO/ANSI A117.1-1992

4.29.2 Clear Floor Space or Ground Space. Clear floor or ground space shall be provided at each accessible public telephone in accordance with 4.29.2.1 or 4.29.2.2. The required clear space shall comply with 4.2.4 and shall not be restricted by bases, enclosures, and fixed seats.

4.29.2.1 Parallel Approach. Where a parallel approach by a person in a wheelchair is provided, the clear floor space or ground space shall be 30 in deep by 48 in wide (760 mm by 1220 mm) minimum. The distance from the edge of the telephone enclosure to the face of the telephone unit shall be 10 in (255 mm) maximum. See Fig. B4.29.2.1.

4.29.2.2 Forward Approach. Where a forward approach by a person in a wheelchair is provided, the clear floor space or ground space shall be 48 in (1220 mm) deep minimum. Where the distance from the edge of the telephone enclosure to the face of the telephone unit is 24 in (610 mm) maximum, the clear space shall be 30 in (760 mm) wide minimum. Where the distance from the edge of the telephone enclosure to the face of the telephone unit is 24 in (610 mm) minimum, the clear space shall be 36 in (915 mm) wide minimum. The distance from the front edge of a counter within the enclosure to the face of the telephone unit shall be 20 in (510 mm) maximum. See Fig. B4.29.2.2.

4.29.3* Mounting Height. The highest operable parts that are essential to the use of the telephone shall be located within the reach ranges specified in 4.2.5 or 4.2.6.
4.29.4 Protruding Objects. Telephones, enclosures, and related equipment shall comply with 4.4.
4.29.5 Hearing-aid Compatible and Volume Controlled Telephones. Telephones shall be hearing-aid compatible. Volume control shall be capable of increasing the volume within the range of 12 db minimum and 18 db maximum above the nonamplified mode, except that the 18 db maximum shall not apply where an automatic reset is provided.
4.29.6 Controls. Accessible telephones shall have push button controls where service for such equipment is available.

BCMC
Comments*

E.
P.N.E. ANSI needs to address that the clear space must extend under the counter at least to the depth of the face of the phone. This is shown on the illustration but not in text.

ADA/ANSI/BCMC Requirements - October 13, 1995
01-03812

ADA Title III Requirements

4.31.7 Telephone Books. Telephone books, if provided, shall be located in a position that complies with the reach ranges specified in 4.2.5 and 4.2.6.
4.31.8 Cord Length. The cord from the telephone to the handset shall be at least 29 in (735 mm) long.
4.31.9* Text Telephones Required by 4.1.
(1) Text telephones used with a pay telephone shall be permanently affixed within, or adjacent to, the telephone enclosure. If an acoustic coupler is used, the telephone cord shall be sufficiently long to allow connection of the text telephone and the telephone receiver.
(2) Pay telephones designed to accommodate a portable text telephone shall be equipped with a shelf and an electrical outlet within or adjacent to the telephone enclosure. The telephone handset shall be capable of

being placed flush on the surface of the shelf. The shelf shall be capable of accommodating a text telephone and shall have 6 in (152 mm) minimum vertical clearance in the area where the text telephone is to be placed.

(3) Equivalent facilitation may be provided. For example, a portable text telephone may be made available in a hotel at the registration desk if it is available on a 24-hour basis for use with nearby public pay telephones. In this instance, at least one pay telephone shall comply with paragraph 2 of this section. In addition, if an acoustic coupler is used, the telephone handset cord shall be sufficiently long so as to allow connection of the text telephone and the telephone receiver. Directional signage shall be provided and shall comply with 4.30.7.

4.32 Fixed or Built-in Seating and Tables.

4.32.1 Minimum Number. Fixed or built-in seating or tables required to be accessible by 4.1 shall comply with 4.32.

4.32.2 Seating. If seating spaces for people in wheelchairs are provided at fixed tables or counters, clear floor space complying with 4.2.4 shall be provided. Such clear floor space shall not overlap knee space by more than 19 in (485 mm) (see Fig. 45).

Figure 45 of the ADA Standards. Minimum Clearances for Seating and Tables.

If wheelchair seating is beside fixed seats, clear floor space 30 in by 48 in (760 mm by 1220 mm) minimum must be provided. If wheelchair seating is across the front of fixed seating, the minimum required clear floor space is 42 in by 48 in (1065 mm by 1220 mm). An accessible route to wheelchair seating must be provided.

CABO/ANSI A117.1-1992

4.29.7 Telephone Directories. Telephone directories, if provided, shall be located in accordance with 4.2.

4.29.8 Cord Length. Accessible telephones shall be equipped with a handset cord length of 29 in (735 mm) minimum.

4.29.9 Telecommunications Device for the Deaf (TDD).

4.29.9.1 Where used with a pay telephone, telecommunications devices for the deaf shall be permanently affixed within, or adjacent to, the telephone enclosure. If an acoustic coupler is used, the telephone cord shall be sufficiently long to allow connection of the TDD and the telephone receiver.

4.29.9.2 Where pay telephones designed to accommodate a portable TDD are provided, they shall be equipped with a shelf and an electrical outlet within or adjacent to the telephone enclosure. The telephone handset shall be

capable of being placed flush on the surface of the shelf. The shelf shall be capable of accommodating a TDD and shall have a 6 in (150 mm) high minimum vertical clearance above the area where the TDD is to be located.

4.31 Seating, Tables, Work Surfaces, and Service Counters

4.31.1 General. Accessible fixed or built-in seating, benches, tables, service counters or work surfaces shall comply with 4.16.6 and 4.31.

4.31.2.1 Seating. Accessible seating spaces provided at tables, service counters, or work surfaces for people in wheelchairs shall have a clear floor space complying with 4.2.4. Such clear floor space shall overlap knee space by not more than 19 in (485 mm). See Fig. B4.31.2.

4.31.2.2 Benches. Accessible benches shall be 20 in to 24 in (510 mm to 610 mm) wide by 42 in to 48 in (1065 mm to 1220 mm) long fixed to a wall along the longer dimension. The bench shall be mounted 17 in to 19 in (430 mm to 480 mm) above the floor. Clear floor space shall be provided in accordance with 4.2.4. The structural strength of the benches shall conform to 4.24. Where installed in wet locations the surface of the bench shall be slip resistant and water shall not accumulate upon the surface.

BCMC Comments*

E.

E.

E.

E.

ANSI E. for technical specification.

BCMC N.E. There is no requirement to provide accessible seating at counters, as there is in the ADA.

ADA Title III Requirements

4.32.3 Knee Clearances. If seating for people in wheelchairs is provided at tables or counters, knee spaces at least 27 in (685 mm) high, 30 in (760 mm) wide, and 19 in (485 mm) deep shall be provided (see Fig. 45).

4.32.4* Height of Tables or Counters. The tops of accessible tables and counters shall be from 28 in to 34 in (710 mm to 865 mm) above the finish floor or ground.

4.33 Assembly Areas.
4.33.1 Minimum Number. Assembly and associated areas required to be accessible by 4.1 shall comply with 4.33.
4.33.2* Size of Wheelchair Locations. Each wheelchair location shall provide minimum clear ground or floor spaces as shown in Fig. 46.
Figure 46 of the ADA Standards. Space Requirements for Wheelchair Seating Spaces in Series.

46(a) Forward or Rear Access. If seating space for two wheelchair users is accessed from the front or rear, the minimum space required is 48 in (1220 mm) deep by 66 in (1675 mm) wide.

46(b) Side Access. If seating space for two wheelchair users is accessed from the side, the minimum space required is 60 in (1525 mm) deep by 66 in (1675 mm) wide.

4.33.3* Placement of Wheelchair Locations. Wheelchair areas shall be an integral part of any fixed seating plan and shall be provided so as to provide people with physical disabilities a choice of admission prices and lines of sight comparable to those for members of the general public. They shall adjoin an accessible route that also serves as a means of egress in case of emergency. At least one companion fixed seat shall be provided next to each wheelchair seating area. When the seating capacity exceeds 300, wheelchair spaces shall be provided in more than one location. Readily removable seats may be installed in wheelchair spaces when the spaces are not required to accommodate wheelchair users.
EXCEPTION: Accessible viewing positions may be clustered for bleachers, balconies, and other areas having sight lines that require slopes of greater than 5 percent. Equivalent accessible viewing positions may be located on levels having accessible egress.
4.33.4 Surfaces. The ground or floor at wheelchair locations shall be level and shall comply with 4.5.

CABO/ANSI A117.1-1992

4.31.3 Knee Clearances. Accessible seating for people in wheelchairs at tables, service counters, and work surfaces shall have knee spaces 27 in (685 mm) high minimum, 30 in (760 mm) wide minimum, and 19 in (485 mm) deep minimum. See Fig. B4.31.2.
4.31.4* Height of Work Surfaces and Service Counters. The tops of accessible portions of tables, service counters, tray slides and work surfaces shall be from 28-34 in (710 mm to 865 mm) from the floor or ground.
4.32 Auditorium and Assembly Areas
4.32.1 General. Accessible viewing positions in

auditorium and assembly areas with fixed seating shall comply with 4.32.
4.32.2* Size of Wheelchair Locations.
4.32.2.1 Wheelchair locations with forward or rear access shall provide clear ground or floor spaces of 33 in (840 mm) wide by 48 in (1220 mm) deep minimum. See Fig. B4.32.2(a).
4.32.2.2 Wheelchair locations with side access shall provide minimum clear ground or floor spaces of 33 in (840 mm) wide and 60 in (1525 mm) deep. See Fig. B4.32.2(b).
4.32.3* Placement of Wheelchair Locations.
4.32.3.1 At least one wheelchair location shall accommodate two wheelchairs minimum.
4.32.3.2 Wheelchair locations shall be adjacent to an aisle. They shall also be adjacent to a fixed or removable seat located such that each wheelchair location has, immediately to one side, a fixed or removable seat.
4.32.3.3 Wheelchair locations shall provide lines of sight comparable to those of all viewing areas.
4.32.4 Aisles. Ramps serving as aisles adjacent to seating areas shall be permitted to have a running slope not steeper than 1:8 where such slope is required to maintain adequate sightlines. Such ramped aisles shall be permitted as an accessible route to seating areas, to performing areas adjacent to seating, and as means of egress from such areas.
4.32.5 Surfaces. Ground or floor surfaces at wheelchair locations shall have a slope not steeper than 1:48 and shall comply with 4.5.

BCMC

5.2.1 In Group A1, A2, and A5 occupancies wheelchair spaces for each assembly area shall be provided in accordance with Table 5.2. Removable seats shall be permitted in the wheelchair spaces. When the number of seats exceeds 300, wheelchair spaces shall be provided in more than one location. Dispersion of wheelchair locations shall be based on the availability of accessible routes to various seating areas, including seating at various levels in multilevel facilities.

Comments*

E.
E.
E.
E.
N.E. ANSI uses the term "aisle" in 4.32.3.2 instead of "accessible route that also serves as a means

of egress" in the ADA Standards.
See 4.32.4 below. ANSI allows
aisles 1:8 to serve as accessible
routes, etc. See comments at ADA
Standards 4.1.3(19).
E.

ADA Title III Requirements

4.33.5 Access to Performing Areas. An accessible route shall connect wheelchair seating locations with performing areas, including stages, arena floors, dressing rooms, locker rooms, and other spaces used by performers.

4.33.6* Placement of Listening Systems. If the listening system provided serves individual fixed seats, then such seats shall be located within a 50 ft (15 m) viewing distance of the stage or playing area and shall have a complete view of the stage or playing area.

4.33.7* Types of Listening Systems. Assistive listening systems (ALS) are intended to augment standard public address and audio systems by providing signals which can be received directly by persons with special receivers or their own hearing aids and which eliminate or filter background noise. The type of assistive listening system appropriate for a particular application depends on the characteristics of the setting, the nature of the program, and the intended audience. Magnetic induction loops, infra-red and radio frequency systems are types of listening systems which are appropriate for various applications.

4.34 Automated Teller Machines.

4.34.1 General. Each automated teller machine required to be accessible by 4.1.3 shall be on an accessible route and shall comply with 4.34.

4.34.2 Clear Floor Space. The automated teller machine shall be located so that clear floor space complying with 4.2.4 is provided to allow a person using a wheelchair to make a forward approach, a parallel approach, or both, to the machine.

4.34.3 Reach Ranges.

(1) Forward Approach Only. If only a forward approach is possible, operable parts of all controls shall be placed within the forward reach range specified in 4.2.5.

CABO/ANSI A117.1-1992

4.32.6* Placement of Listening Systems. Individual fixed seats, served by a listening system, shall be located within a 50 ft (15 m) distance of the stage or playing area and shall have a complete view of the stage or playing area. In a motion picture theater, individual fixed seats, served by a listening system, shall be located any place within the auditorium that has a complete view of the screen.

4.32.7 Types of Listening Systems. Induction loops, infrared systems, FM and AM radio frequency systems,

hard-wired earphones, and other equivalent devices shall be permitted as acceptable listening systems.
4.30 Automatic Teller Machines
4.30.1 Mounting. Accessible automatic teller machines shall be mounted so that all features requiring user activation comply with 4.2.5 or 4.2.6. Clear floor space shall comply with 4.2.4. Input into machines shall be made possible by tactile markings, and private audible output shall be made available so that the machine can be used entirely without vision.
4.30.2 Display Screen. Where print appears on the display screen, the automatic teller machine video display screen shall use san serif print that is a minimum of 18 point size, and shall contrast with the background by a minimum of 70 percent. Where the automatic teller machine is designed to be used by pedestrians, the video display screen shall be placed so that the lower edge shall be at a height of 38 in (965 mm) maximum off the ground or be adjustable.
4.24.1* General. Operable parts of equipment and appliances in accessible spaces, along accessible routes, or as part of accessible elements shall comply with 4.25.
See 4.30 above.
BCMC
3.1.2 At least one accessible route shall connect accessible spaces, elements, facilities and buildings that are on the same site. Where only one accessible route is provided, it shall not pass through kitchens, storage rooms, restrooms, closets or similar spaces.
Comments*
Note: No specific provision but general language should cover this.
There is no exception.
E.
E.
E. See separate sections below.
E.
E. Although less detailed, the ANSI standard is within the general reach ranges.
100
ADA/ANSI/BCMC Requirements - October 13, 1995
01-03815

4.34.3(2) Parallel Approach Only. If only a parallel approach is possible, operable parts of controls shall be placed as follows:

(a) Reach Depth Not More Than 10 in (255 mm). Where the reach depth to the operable parts of all controls as measured from the vertical plane perpendicular to the edge of the unobstructed clear floor space at the farthest protrusion of the automated teller machine or surround is not more than 10 in (255 mm), the maximum height above the finished floor or grade shall be 54 in (1370 mm).

(b) Reach Depth More Than 10 in (255 mm). Where the reach depth to the operable parts of any control as measured from the vertical plane perpendicular to the edge of the unobstructed clear floor space at the farthest protrusion of the automated teller machine or surround is more than 10 in (255 mm), the maximum height above the finished floor or grade shall be as follows:

Reach Depth		Maximum Height	
In	Mm	In	Mm
10	255	54	1370
11	280	53 1/2	1360
12	305	53	1345
13	330	52 1/2	1335
14	355	51 1/2	1310
15	380	51	1295
16	405	50 1/2	1285
17	430	50	1270
18	455	49 1/2	1255
19	485	49	1245
20	510	48 1/2	1230
21	535	47 1/2	1205
22	560	47	1195
23	585	46 1/2	1180
24	610	46	1170

4.34.3(3) Forward and Parallel Approach. If both a

forward and parallel approach are possible, operable parts of controls shall be placed within at least one of the reach ranges in paragraphs (1) or (2) of this section.

(4) Bins. Where bins are provided, for envelopes, waste paper, or other purposes, at least one of each type provided shall comply with the applicable reach ranges in paragraph (1), (2), or (3) of this section.

EXCEPTION: Where a function can be performed in a substantially equivalent manner by using an alternate control, only one of the controls needed to perform that function is required to comply with this section. If the controls are identified by tactile markings, such markings shall be provided on both controls.

4.34.4 Controls. Controls for user activation shall comply with 4.27.4.

CABO/ANSI A117.1-1992

ADA/ANSI/BCMC Requirements - October 13, 1995

01-03816

ADA Title III Requirements

4.34.5 Equipment for Persons with Vision Impairments. Instructions and all information for use shall be made accessible to and independently usable by persons with vision impairments.

4.35 Dressing and Fitting Rooms.

4.35.1 General. Dressing and fitting rooms required to be accessible by 4.1 shall comply with 4.35 and shall be on an accessible route.

4.35.2 Clear Floor Space. A clear floor space allowing a person using a wheelchair to make a 180-degree turn shall be provided in every accessible dressing room entered through a swinging or sliding door. No door shall swing into any part of the turning space. Turning space shall not be required in a private dressing room entered through a curtained opening at least 32 in (815 mm) wide if clear floor space complying with section 4.2 renders the dressing room usable by a person using a wheelchair.

4.35.3 Doors. All doors to accessible dressing rooms shall be in compliance with section 4.13.

4.35.4 Bench. Every accessible dressing room shall have a 24 in by 48 in (610 mm by 1220 mm) bench fixed to the wall along the longer dimension. The bench shall be mounted 17 in to 19 in (430 mm to 485 mm) above the finish floor. Clear floor space shall be provided alongside the bench to allow a person using a wheelchair to make a parallel transfer onto the bench. The structural strength of the bench and attachments shall comply with 4.26.3.

Where installed in conjunction with showers, swimming pools, or other wet locations, water shall not accumulate upon the surface of the bench and the bench shall have a slip-resistant surface.

4.35.5 Mirror. Where mirrors are provided in dressing rooms of the same use, then in an accessible dressing room, a full-length mirror, measuring at least 18 in wide by 54 in high (460 mm by 1370 mm), shall be mounted in a position affording a view to a person on the bench as well as to a person in a standing position.

CABO/ANSI A117.1-1992

See 4.30 above.

4.16 Toilet, Bath, Dressing and Shower Rooms and Bathing Facilities.

4.16.1 General. Accessible toilet rooms, bathrooms, bathing facilities, dressing rooms and shower rooms shall comply with 4.16.

4.16.3* Clear Floor Space. Accessible fixtures and controls shall comply with 4.17 through 4.22. An unobstructed turning space complying with 4.2.3 and 4.2.4.1 shall be provided within an accessible room. The clear floor spaces at fixtures and operable parts, the accessible route, and the turning space shall be permitted to overlap.

4.16.2* Doors. All doors to accessible toilet rooms, bathrooms, bathing facilities, and shower rooms shall comply with 4.13. Doors shall not swing into the clear floor space required for any fixture unless the toilet or bathroom is for individual use only, or a clear floor space complying with 4.2.4.1 is provided beyond the arc of the door swing within the room.

4.31.2.2 Benches. Accessible benches shall be 20 in to 24 in (510 mm to 610 mm) wide by 42 in to 48 in (1065 mm to 1220 mm) long fixed to a wall along the longer dimension. The bench shall be mounted 17 in to 19 in (430 mm to 480 mm) above the floor. Clear floor space shall be provided in accordance with 4.2.4. The structural strength of the benches shall conform to 4.24. Where installed in wet locations the surface of the bench shall be slip resistant and water shall not accumulate upon the surface.

4.16.6* Mirrors. Mirrors, mounted above lavatories or sinks, shall have the bottom edge of the reflecting surface 38 in (965 mm) maximum above the floor. See Fig. B4.20.3.1. Full length mirrors used in conjunction with wheelchair accessible dressing rooms shall be 18 in (455 mm) wide minimum and shall be mounted with the bottom edge 18 in (455 mm) high maximum above the floor and

the top edge 72 in (1830 mm) high minimum. Mirrors shall be located in a position affording a view to a person seated on a bench or a wheelchair, as well as to a person in a standing position.

BCMC Comments*

E.

E.

N.E. ANSI should address encroachment of door swing on turning space.

P.N.E. 4.16.2 does not mention dressing rooms.

ANSI N.E. Dimensions of the bench vary from ADA Standards.

BCMC N.E. BCMC/ANSI requires dressing rooms to be accessible, but does not require accessible dressing rooms to have benches.

E.

ADA Title III Requirements

5 RESTAURANTS AND CAFETERIAS

5.1* General. Except as specified or modified in this section, restaurants and cafeterias shall comply with the requirements of 4.1 to 4.35. Where fixed tables (or dining counters where food is consumed but there is no service) are provided, at least 5 percent, but not less than one, of the fixed tables (or a portion of the dining counter) shall be accessible and shall comply with 4.32 as required in 4.1.3(18). In establishments where separate areas are designated for smoking and non-smoking patrons, the required number of accessible fixed tables (or counters) shall be proportionally distributed between the smoking and non-smoking areas. In new construction, and where practicable in alterations, accessible fixed tables (or counters) shall be distributed throughout the space or facility.

5.2 Counters and Bars. Where food or drink is served at counters exceeding 34 in (865 mm) in height for consumption by customers seated on stools or standing at

the counter, a portion of the main counter which is 60 in (1525 mm) in length minimum shall be provided in compliance with 4.32 or service shall be available at accessible tables within the same area.

5.3 Access Aisles. All accessible fixed tables shall be accessible by means of an access aisle at least 36 in (915 mm) clear between parallel edges of tables or between a wall and the table edges.

5.4 Dining Areas. In new construction, all dining areas, including raised or sunken dining areas, loggias, and outdoor seating areas, shall be accessible. In non-elevator buildings, an accessible means of vertical access to the mezzanine is not required under the following conditions: 1) the area of mezzanine seating measures no more than 33 percent of the area of the total accessible seating area; 2) the same services and decor are provided in an accessible space usable by the general public; and, 3) the accessible areas are not restricted to use by people with disabilities. In alterations, accessibility to raised or sunken dining areas, or to all parts of outdoor seating areas is not required provided that the same services and decor are provided in an accessible space usable by the general public and are not restricted to use by people with disabilities.

Figure 53 of the ADA Standards. Food Service Lines.

The clear width of the food service line shall be measured from the leading edge of the tray slide.

CABO/ANSI A117.1-1992

4.31.4* Height of Work Surfaces and Service Counters. The tops of accessible portions of tables, service counters, tray slides and work surfaces shall be from 28-34 in (710-865 mm) from the floor or ground.

4.3.3* Width. Clear width of an accessible route shall be 36 in (915 mm) minimum, except at doors (see 4.13.5). See Fig. B4.3.3(a). Clear width of the accessible route with turns around an obstruction less than 48 in (1220 mm) wide shall have a clear space of 42 in by 48 in (1065 mm by 1220 mm) minimum. See Fig 4.3.3(b).

BCMC

5.2.3 In Group A3 occupancies the total floor area allotted for seating and tables shall be accessible.

EXCEPTIONS:

1. Where necessary for line of sight, requirements of 5.2.1 for number and dispersion of wheelchair spaces shall be applied.

2. In buildings without elevators, an accessible route to a mezzanine dining area is not required, provided that the mezzanine contains less than 25% of the total area and

the same services are provided in the accessible area.
5.2.3 In Group A3 occupancies the total floor area allotted for seating and tables shall be accessible.
5.2.3 In Group A3 occupancies the total floor area allotted for seating and tables shall be accessible.
EXCEPTIONS:
1. Where necessary for line of sight, requirements of 5.2.1 for number and dispersion of wheelchair spaces shall be applied.
2. In buildings without elevators, an accessible route to a mezzanine dining area is not required, provided that the mezzanine contains less than 25% of the total area and the same services are provided in the accessible area.

Comments*

Exception 1 - N.E. Does not mention outdoor seating or fixed tables. Requires dispersion only "where necessary".
N.E. Does not require 60" length.
E. Although not specific, the general provision of 4.3.3 would appear to apply here.
Exception 1 - N.E. Does not mention outdoor seating or fixed tables. Also, it appears to require dispersion only "where necessary."

ADA Title III Requirements

5.5 Food Service Lines. Food service lines shall have a minimum clear width of 36 in (915 mm), with a preferred clear width of 42 in (1065 mm) to allow passage around a person using a wheelchair. Tray slides shall be mounted no higher than 34 in (865 mm) above the floor (see Fig. 53). If self-service shelves are provided, at least 50 percent of each type must be within reach ranges specified in 4.2.5 and 4.2.6.
5.6 Tableware and Condiment Areas. Self-service shelves and dispensing devices for tableware, dishware, condiments, food and beverages shall be installed to

comply with 4.2 (see Fig. 54).
Figure 54 of the ADA Standards. Tableware Areas.
The maximum height is 54 in (1370 mm).
5.7 Raised Platforms. In banquet rooms or spaces where a head table or speaker's lectern is located on a raised platform, the platform shall be accessible in compliance with 4.8 or 4.11. Open edges of a raised platform shall be protected by placement of tables or by a curb.
5.8 Vending Machines and Other Equipment. Spaces for vending machines and other equipment shall comply with 4.2 and shall be located on an accessible route.
5.9 Quiet Areas. (Reserved).
CABO/ANSI A117.1-1992
4.31.4* Height of Work Surfaces and Service Counters. The tops of accessible portions of tables, service counters, tray slides and work surfaces shall be from 28-34 in (710-865 mm) from the floor or ground.
4.23.1 General. Accessible storage facilities including cabinets, shelves, closets, lockers and drawers shall comply with 4.23.
4.23.2 Clear Floor Space. A clear floor space complying with 4.2.4 that allows either a forward or parallel approach by a person using a wheelchair shall be provided at accessible storage facilities.
4.23.3 Height. Accessible storage spaces shall be within at least one of the reach ranges specified in 4.2.5 and 4.2.6. Clothes rods shall be 54 in (1370 mm) maximum above the floor. See Fig. B4.23.
BCMC
Comments*
P.N.E. No scoping provided.
N.E. regarding width of food service lines and self-service shelves.
P.N.E. No scoping provided.
P.N.E. Scoping issue. Further, edge protection is not addressed.
N.E.

ADA Title III Requirements
6 MEDICAL CARE FACILITIES
6.1 General. Medical care facilities included in this section are those in which people receive physical or medical treatment or care and where persons may need assistance in responding to an emergency and where the period of stay may exceed twenty-four hours. In addition to the requirements of 4.1 through 4.35, medical care facilities

and buildings shall comply with 6.
6.1 (1) Hospitals - general purpose hospitals, psychiatric facilities, detoxification facilities -- At least 10 percent of patient bedrooms and toilets, and all public use and common use areas are required to be designed and constructed to be accessible.
6.1 (2) Hospitals and rehabilitation facilities that specialize in treating conditions that affect mobility, or units within either that specialize in treating conditions that affect mobility -- All patient bedrooms and toilets, and all public use and common use areas are required to be designed and constructed to be accessible.
6.1 (3) Long term care facilities, nursing homes -- At least 50 percent of patient bedrooms and toilets, and all public use and common use areas are required to be designed and constructed to be accessible.
6.1 (4) Alterations to patient bedrooms.
(a) When patient bedrooms are being added or altered as part of a planned renovation of an entire wing, a department, or other discrete area of an existing medical facility, a percentage of the patient bedrooms that are being added or altered shall comply with 6.3. The percentage of accessible rooms provided shall be consistent with the percentage of rooms required to be accessible by the applicable requirements of 6.1(1), 6.1(2), or 6.1(3), until the number of accessible patient bedrooms in the facility equals the overall number that would be required if the facility were newly constructed. (For example, if 20 patient bedrooms are being altered in the obstetrics department of a hospital, 2 of the altered rooms must be made accessible. If, within the same hospital, 20 patient bedrooms are being altered in a unit that specializes in treating mobility impairments, all of the altered rooms must be made accessible.) Where toilet/bathrooms are part of patient bedrooms which are added or altered and required to be accessible, each such patient toilet/bathroom shall comply with 6.4.

CABO/ANSI A117.1-1992

BCMC

5.3.1 In Group 12 general purpose hospitals, psychiatric facilities and detoxification facilities, at least 10%, but not less than one, of the patient sleeping rooms and their bathing and toilet facilities shall be accessible.
5.3.2 In Group 12 hospitals and rehabilitation facilities that specialize in treating conditions that affect mobility, or units within either that specialize in treating conditions that affect mobility, 100% of the patient rooms and their bathing and toilet facilities shall be accessible.

5.3.3 In Group 11 occupancies and 12 nursing homes, at least 50%, but not less than one, of the patient sleeping rooms and their bathing and toilet facilities shall be accessible.

5.3.4 In Group 13 occupancies, at least 5%, but not less than one, of the resident units and their bathing and toilet facilities shall be accessible for each 100 resident units or fraction thereof.

Comments*

E.

N.E. No specific provisions.

ADA Title III Requirements

6.1 (4) (b) When patient bedrooms are being added or altered individually, and not as part of an alteration of the entire area, the altered patient bedrooms shall comply with 6.3, unless either: a) the number of accessible rooms provided in the department or area containing the altered patient bedroom equals the number of accessible patient bedrooms that would be required if the percentage requirements of 6.1(1), 6.1(2), or 6.1(3) were applied to that department or area; or b) the number of accessible patient bedrooms in the facility equals the overall number that would be required if the facility were newly constructed. Where toilet/bathrooms are part of patient bedrooms which are added or altered and required to be accessible, each such toilet/bathroom shall comply with 6.4.

6.2 Entrances. At least one accessible entrance that complies with 4.14 shall be protected from the weather by canopy or roof overhang. Such entrances shall incorporate a passenger loading zone that complies with 4.6.6.

6.3 Patient Bedrooms. Provide accessible patient bedrooms in compliance with 4.1 through 4.35. Accessible patient bedrooms shall comply with the following:

(1) Each bedroom shall have a door that complies with 4.13.

EXCEPTION: Entry doors to acute care hospital bedrooms for in-patients shall be exempted from the requirement in 4.13.6 for maneuvering space at the latch side of the door if the door is at least 44 in (1120 mm) wide.

(2) Each bedroom shall have adequate space to provide a maneuvering space that complies with 4.2.3. In rooms with 2 beds, it is preferable that this space be located between beds.

(3) Each bedroom shall have adequate space to provide a minimum clear floor space of 36 in (915 mm) along each side of the bed and to provide an accessible route complying with 4.3.3 to each side of each bed.

CABO/ANSI A117.1-1992

4.13.6.16 Doors to hospital bedrooms shall be exempt from the requirement for space at the latch side of door provided the door is 44 in (1120 mm) wide minimum.

BCMC

5.3.5 In Group 12 occupancies, at least one accessible entrance shall include a passenger loading zone complying with CABO/ANSI A117.1.

Comments*

N.E. BCMC does not address

weather protection.
N.E. The ADA Standards 6.3(1) exception applies only to "acute care" hospital bedrooms. ANSI 4.13.6.16 gives exemption to all hospital bedrooms.

ADA Title III Requirements

6.4 Patient Toilet Rooms. Where toilet/bath rooms are provided as a part of a patient bedroom, each patient bedroom that is required to be accessible shall have an accessible toilet/bath room that complies with 4.22 or 4.23 and shall be on an accessible route.

7 BUSINESS AND MERCANTILE

7.1 General. In addition to the requirements of 4.1 to 4.35, the design of all areas used for business transactions with the public shall comply with 7.

CABO/ANSI A117.1-1992

BCMC

5.3.1 In Group 12 general purpose hospitals, psychiatric facilities and detoxification facilities, at least 10%, but not less than one, of the patient sleeping rooms and their bathing and toilet facilities shall be accessible.

5.3.2 In Group 12 hospitals and rehabilitation facilities that specialize in treating conditions that affect mobility, or units within either that specialize in treating conditions that affect mobility, 100% of the patient rooms and their bathing and toilet facilities shall be accessible.

5.3.3 In Group 11 occupancies and 12 nursing homes, at least 50%, but not less than one, of the patient sleeping rooms and their bathing and toilet facilities shall be accessible.

Comments*

E.

P.N.E. No specific scoping.

ADA Title III Requirements

7.2 Sales and Service Counters, Teller Windows, Information Counters.

(1) In department stores and miscellaneous retail stores where counters have cash registers and are provided for sales or distribution of goods or services to the public, at least one of each type shall have a portion of the counter which is at least 36 in (915 mm) in length with a maximum height of 36 in (915 mm) above the finish floor. It shall be on an accessible route complying with 4.3. The accessible counters must be dispersed throughout the building or facility. In alterations where it is technically infeasible to provide an accessible counter, an auxiliary counter meeting these requirements may be provided.

(2) At ticketing counters, teller stations in a bank, registration counters in hotels and motels, box office ticket counters, and other counters that may not have a cash register but at which goods or services are sold or distributed, either:

(i) a portion of the main counter which is a minimum of 36 in (915 mm) in length shall be provided with a maximum height of 36 in (915 mm); or

(ii) an auxiliary counter with a maximum height of 36 in (915 mm) in close proximity to the main counter shall be provided; or

(iii) equivalent facilitation shall be provided (e.g., at a hotel registration counter, equivalent facilitation might consist of: (1) provision of a folding shelf attached to the main counter on which an individual with disabilities can write, and (2) use of the space on the side of the counter or at the concierge desk, for handing materials back and forth).

All accessible sales and service counters shall be on an accessible route complying with 4.3.

(3)* Assistive Listening Devices. (Reserved).

CABO/ANSI A117.1-1992

4.31.4* Height of Work Surfaces and Service Counters. The tops of accessible portions of tables, service counters, tray slides and work surfaces shall be from 28 in to 34 in (710 mm to 865 mm) from the floor or ground.

BCMC

6.7.2 Counters and Windows. Where customer sales and service counters or windows are provided, a portion of the counter, or at least one window, shall be accessible.

Comments*

P.N.E. BCMC does not require 36" length.

ADA Title III Requirements

7.3* Check-out Aisles.

(1) In new construction, accessible check-out aisles shall be provided in conformance with the table below:

Total Check-out Aisles of Each Design	Minimum Number of Accessible Check-out Aisles Of Each Design
1 - 4	1
5 - 8	2
8 - 15	3
over 15	3, plus 20% of additional aisles

EXCEPTION: In new construction, where the selling space is under 5000 square feet, only one check-out aisle is required to be accessible.

EXCEPTION: In alterations, at least one check-out aisle shall be accessible in facilities under 5000 square feet of selling space. In facilities of 5000 or more square feet of selling space, at least one of each design of check-out aisle shall be made accessible when altered until the number of accessible check-out aisles of each design equals the number required in new construction. Examples of check-out aisles of different "design" include those which are specifically designed to serve different functions. Different "design" includes but is not limited to the following features - length of belt or no belt; or permanent signage designating the aisle as an express lane.

(2) Clear aisle width for accessible check-out aisles shall comply with 4.2.1 and maximum adjoining counter height shall not exceed 38 in (965 mm) above the finish floor. The top of the lip shall not exceed 40 in (1015 mm) above the finish floor.

7.3 (3) Signage identifying accessible check-out aisles shall

comply with 4.30.7 and shall be mounted above the check-out aisle in the same location where the check-out number or type of check-out is displayed.

7.4 Security Bollards. Any device used to prevent the removal of shopping carts from store premises shall not prevent access or egress to people in wheelchairs. An alternate entry that is equally convenient to that provided for the ambulatory population is acceptable.

CABO/ANSI A117.1-1992

4.31.5 Checkout Counters. Checkout counter surfaces shall be 38 in (965 mm) maximum above the finished floor. The top of the counter edge protection shall be 40 in (1015 mm) maximum above the finished floor.

BCMC

6.7.3 Check-out Aisles. Accessible check-out aisles shall be installed in accordance with Table 6.7. Traffic control devices, security devices and turnstiles located in accessible check-out aisles or lanes shall be accessible.

TABLE NO. 6.7

REQUIRED CHECK-OUT AISLES

Minimum Number of Total Check-out Aisles	Accessible Check-Out Aisles
1-4	1
5-8	2
9-15	3
Over 15	3, plus 1 for each additional 5 over 15

6.7.3 Check-out Aisles. Accessible check-out aisles shall be installed in accordance with Table 6.7. Traffic control devices, security devices and turnstiles located in accessible check-out aisles or lanes shall be accessible.

TABLE NO. 6.7

REQUIRED CHECK-OUT AISLES

Minimum Number of Total Check-out Aisles	Accessible Check-Out Aisles
1-4	1
5-8	2
9-15	3
Over 15	3, plus 1 for each additional 5 over 15

Comments*

P.N.E. No requirement for accessible route.

No signage requirements.

P.N.E. Need to ensure that bollards are considered "security devices." Also, need to address security devices in accessible routes other

ADA Title III Requirements

8. LIBRARIES.

8.1 General. In addition to the requirements of 4.1 to 4.35, the design of all public areas of a library shall comply with 8, including reading and study areas, stacks, reference rooms, reserve areas, and special facilities or collections.

8.2 Reading and Study Areas. At least 5 percent or a minimum of one of each element of fixed seating, tables, or study carrels shall comply with 4.2 and 4.32. Clearances between fixed accessible tables and between study carrels shall comply with 4.3.

8.3 Check-Out Areas. At least one lane at each check-out area shall comply with 7.2(1). Any traffic control or book security gates or turnstiles shall comply with 4.13.

8.4 Card Catalogs and Magazine Displays. Minimum clear aisle space at card catalogs and magazine displays shall comply with Fig. 55. Maximum reach height shall comply with 4.2, with a height of 48 in (1220 mm) preferred irrespective of approach allowed.

8.5 Stacks. Minimum clear aisle width between stacks shall comply with 4.3, with a minimum clear aisle width of 42 in (1065 mm) preferred where possible. Shelf height in stack areas is unrestricted (see Fig. 56).

CABO/ANSI A117.1-1992

4.31.5 Checkout Counters. Checkout counter surfaces shall be 38 in (965 mm) maximum above the finished floor. The top of the counter edge protection shall be 40 in (1015 mm) maximum above the finished floor.

BCMC

Comments*

P.N.E. No specific scoping.

P.N.E. No specific scoping.

N.E. No specific scoping provisions. Technical provision is not equivalent with surface at 38 inches rather than 36 inches as in 7.2.(1).

N.E. No specific scoping. Technical provisions are not equivalent because ANSI reach requirements would apply and ADA is more restrictive here.

P.N.E. No specific scoping.

01-03825

ADA Title III Requirements

9. ACCESSIBLE TRANSIENT LODGING.

(1) Except as specified in the special technical provisions of this section, accessible transient lodging shall comply with the applicable requirements of 4.1 through 4.35. Transient lodging includes facilities or portions thereof used for sleeping accommodations, when not classed as a medical care facility.

9.1 Hotels, Motels, Inns, Boarding Houses, Dormitories, Resorts and Other Similar Places of Transient Lodging.

9.1.1 General. All public use and common use areas are required to be designed and constructed to comply with section 4 (Accessible Elements and Spaces: Scope and Technical Requirements).

EXCEPTION: Sections 9.1 through 9.4 do not apply to an establishment located within a building that contains not more than five rooms for rent or hire and that is actually occupied by the proprietor of such establishment as the residence of such proprietor.

CABO/ANSI A117.1-1992

BCMC

1.1 All buildings and structures, including their associated sites and facilities, shall be accessible with accessible means of egress for people with physical disabilities as required in these provisions.

EXCEPTIONS:

1. Areas where work cannot reasonably be performed by persons having a severe impairment (mobility, sight or hearing) are not required to have the specific features providing accessibility to such persons.

2. Group R3 buildings and accessory structures and their associated site facilities.

3. Group U structures.

EXCEPTIONS:

1. In Group U agricultural buildings, access is required to paved work areas and areas open to the general public.

2. Access is required to private garages or carports which contain accessible parking.

4. Temporary structures, sites, and equipment directly associated with the construction process such as construction site trailers, scaffolding, bridging or material hoists.

5. Buildings and facilities or portions thereof not required to be accessible in 3.0, 4.0, 5.0 and 6.0.

5.4.2 In Group R2 occupancies containing more than 20 dwelling units, at least 2%, but not less than one, of the dwelling units shall be adaptable. All dwelling units on a site shall be considered to determine the total number of adaptable units.

Comments*

P.N.E. No specific scoping.

N.E. Not specifically addressed.

ADA Title III Requirements

9.1.2 Accessible Units, Sleeping Rooms, and Suites. Accessible sleeping rooms or suites that comply with the requirements of 9.2 (Requirements for Accessible Units, Sleeping Rooms, and Suites) shall be provided in conformance with the table below. In addition, in hotels, of 50 or more sleeping rooms or suites, additional accessible sleeping rooms or suites that include a roll-in shower shall also be provided in conformance with the table below. Such accommodations shall comply with the requirements of 9.2, 4.21, and Figure 57(a) or (b).

Number of Rooms	Accessible	Rooms with

	Rooms	Roll-in Showers
1 to 25	1	
26 to 50	2	
51 to 75	3	1
76 to 100	4	1
101 to 150	5	2
151 to 200	6	2
201 to 300	7	3
301 to 400	8	4
401 to 500	9	4, plus one for
501 to 1000	2% of total	each additional
1001 and over	20 plus 1 for each	100 over 400
	100 over 1000	

Figure 57 of the ADA Standards. Roll-in Shower with Folding Seat.

57(a) Where a fixed seat is provided in a 30 in minimum by 60 in (716 mm by 1220 mm) minimum shower stall, the controls and spray unit on the back (long) wall shall be located a maximum of 27 in (685 mm) from the side wall where the seat is attached.

57(b) An alternate 36 in by 60 in (915 mm by 1220 mm) minimum shower stall is permitted. The width of the stall opening shall be a minimum of 36 in (915 mm) clear located on a long wall at the opposite end of the shower from the controls. The shower seat shall be 24 in (610 mm) minimum in length by 16 in (330 mm) minimum in width and may be rectangular in shape. The seat shall be located next to the opening to the shower and adjacent to the end wall containing the shower head and controls.

CABO/ANSI A117.1-1992

4.22.2.2 Roll-in Type Showers. Roll-in type shower stalls shall be 30 in by 60 in (760 mm by 1525 mm) inside finished dimension minimum with clear floor space of 36 in wide by 60 in long (915 mm by 1525 mm) minimum....

4.22.3 Seat. A folding or non-folding seat shall be provided in transfer-type shower stalls....

BCMC

5.4.1 In Group R1 occupancies containing 6 or more guest rooms, one for the first 30 guest rooms and one additional for each additional 100 guest rooms or fraction thereof shall be accessible. In hotels with more than 50 sleeping rooms or suites, roll-in type showers shall be provided in one-half, but not less than one, of the required accessible sleeping rooms or suites.

Comments*

N.E.

1) No requirement for owner on premises for bed & breakfast with

five or fewer rooms. BCMC exempts 6-room facilities. ADA does not.
2) Scoping requirements for accessible guest rooms far below ADA.
3) Roll-in showers included, not additional: e.g. under ADAAG, hotel with 310 rooms has 8 accessible rooms with tub or shower, plus 4 rooms with roll-in showers for a total of 12.
Under BCMC hotel with 310 rooms has 2 accessible rooms with tub or shower, 2 rooms with roll-in showers for a total of 4 (1/30 + 3/280).
BCMC does not require combination roll-in/ transfer shower. Regular roll-in shower will not necessarily satisfy ADA requirements for hotels (see below).
N.E. for transient lodging combination showers. A folding seat must be provided in such showers.

ADA Title III Requirements
9.1.3 Sleeping Accommodations for Persons with Hearing Impairments. In addition to those accessible sleeping rooms and suites required by 9.1.2, sleeping rooms and

suites that comply with 9.3 (Visual Alarms, Notification Devices, and Telephones) shall be provided in conformance with the following table:

Number of Elements	Accessible Elements
1 to 25	1
26 to 50	2
51 to 75	3
76 to 100	4
101 to 150	5
151 to 200	6
201 to 300	7
301 to 400	8
401 to 500	9
501 to 1000	2% of total
1001 and over	20 plus 1 for each 100 over 1000

9.1.4 Classes of Sleeping Accommodations.

(1) In order to provide persons with disabilities a range of options equivalent to those available to other persons served by the facility, sleeping rooms and suites required to be accessible by 9.1.2 shall be dispersed among the various classes of sleeping accommodations available to patrons of the place of transient lodging. Factors to be considered include room size, cost, amenities provided, and the number of beds provided.

(2) Equivalent Facilitation. For purposes of this section, it shall be deemed equivalent facilitation if the operator of a facility elects to limit construction of accessible rooms to those intended for multiple occupancy, provided that such rooms are made available at the cost of a single occupancy room to an individual with disabilities who requests a single-occupancy room.

CABO/ANSI A117.1-1992

BCMC

10.0 ALARM SYSTEMS

In Group R1 occupancies, all required accessible guest rooms plus an additional number of guest rooms in accordance with the table below shall be provided with a visible and audible alarm-indicating appliance, activated by both the in-room smoke detector and the building fire protective signaling system.

Number of Rooms	Rooms with Visual and Audible Alarms
6 to 25	1
26 to 50	2
51 to 75	3
76 to 100	4
101 to 150	5

151 to 200	6
201 to 300	7
301 to 400	8
401 to 500	9
501 to 1000	2% of total
1001 & over	20, plus 1 for each 100 over 1000

Comments*

N.E. None required if less than or equal to 6 rooms, even if not owner-occupied. BCMC exempts 6-room facilities. Also, no requirement for notification or telephone devices.

N.E. Does not require dispersion.

ADA Title III Requirements

9.1.5 Alterations to Accessible Units, Sleeping Rooms, and Suites. When sleeping rooms are being altered in an existing facility, or portion thereof, subject to the requirements of this section, at least one sleeping room or suite that complies with the requirements of 9.2 (Requirements for Accessible Units, Sleeping Rooms, and Suites) shall be provided for each 25 sleeping rooms, or fraction thereof, of rooms being altered until the number of such rooms provided equals the number required to be accessible with 9.1.2. In addition, at least one sleeping room or suite that complies with the requirements of 9.3 (Visual Alarms, Notification Devices, and Telephones) shall be provided for each 25 sleeping rooms, or fraction thereof, of rooms being altered until the number of such rooms equals the number required to be accessible by 9.1.3.

9.2 Requirements for Accessible Units, Sleeping Rooms and Suites.

9.2.1 General. Units, sleeping rooms, and suites required to be accessible by 9.1 shall comply with 9.2.

9.2.2 Minimum Requirements. An accessible unit, sleeping room or suite shall be on an accessible route complying with 4.3 and have the following accessible elements and spaces.

(1) Accessible sleeping rooms shall have a 36 in (915 mm) clear width maneuvering space located along both sides of a bed, except that where two beds are provided, this requirement can be met by providing a 36 in (915 mm) wide maneuvering space located between the two beds.

(2) An accessible route complying with 4.3 shall connect all accessible spaces and elements, including telephones, within the unit, sleeping room, or suite. This is not intended to require an elevator in multi-story units as long as the spaces identified in 9.2.2(6) and (7) are on accessible levels and the accessible sleeping area is suitable for dual occupancy.

(3) Doors and doorways designed to allow passage into and within all sleeping rooms, suites or other covered units shall comply with 4.13.

CABO/ANSI A117.1-1992

4.33 Dwelling Units

4.33.1* General. Accessible dwelling units shall comply with 4.33.

4.33.2* Adaptability. Both adaptable dwelling units and units in which fixtures are permanently installed within the heights specified in 4.33.3 and 4.33.4 shall be considered accessible dwelling units.

BCMC

3.1.2 At least one accessible route shall connect accessible spaces, elements, facilities and buildings that are on the same site. Where only one accessible route is provided, it shall not pass through kitchens, storage rooms, restrooms, closets or similar spaces.
EXCEPTIONS:
1. A single accessible route shall be permitted to pass through a kitchen or storage room in an accessible or adaptable dwelling unit.
15.1 Doorway Width. Doorways shall have a minimum clear width of 32 inches.
EXCEPTIONS:
1. Doorways not required for means of egress in Group R2 and R3 occupancies.
2. Group I3 occupancies.
3. Storage closets less than 10 sq ft in area.
4. Revolving doors.
5. Interior egress doorways within a dwelling unit not required to be adaptable or accessible shall have a minimum clear width of 29 3/4 inches.

Comments*

Exceeds by not providing this exception to the general requirements for alterations.
N.E. ANSI has no specific technical requirements for transient housing. However, the provisions for dwelling units could be applied to some facility types, i.e., "time share" apartments and family shelters. BCMC is N.E. because it has not scoped these requirements.
N.E. Specific provisions for accessible units not addressed.

ADA Title III Requirements

9.2.2 (4) If fixed or built-in storage facilities such as cabinets, shelves, closets, and drawers are provided in accessible spaces, at least one of each type provided shall contain storage space complying with 4.25. Additional storage may be provided outside of the dimensions required by 4.25.

(5) All controls in accessible units, sleeping rooms, and suites shall comply with 4.27.

9.2.2 (6) Where provided as part of an accessible unit, sleeping room, or suite, the following spaces shall be accessible and shall be on an accessible route:

(a) the living area.

(b) the dining area.

(c) at least one sleeping area.

(d) patios, terraces, or balconies.

EXCEPTION: The requirements of 4.13.8 and 4.3.8 do not apply where it is necessary to utilize a higher door threshold or a change in level to protect the integrity of the unit from wind/water damage. Where this exception results in patios, terraces or balconies that are not at an accessible level, equivalent facilitation shall be provided. (E.g., Equivalent facilitation at a hotel patio or balcony might consist of providing raised decking or a ramp to provide accessibility).

CABO/ANSI A117.1-1992

BCMC

6.4 Storage and Locker Facilities

Where storage facilities such as cabinets, shelves, closets, lockers and drawers are provided in required accessible or adaptable spaces, at least one of each type shall contain storage space complying with A117.1 (4.23).

6.8 Controls, Operating Mechanisms and Hardware

Controls, operating mechanisms and hardware, including switches that control lighting, ventilation or electrical outlets, in accessible spaces, along accessible routes or as

parts of accessible elements, shall be accessible.

Comments*

ADA/ANSI/BCMC Requirements - October 13, 1995

01-03830

ADA Title III Requirements

9.2.2 (6)(e) at least one full bathroom (i.e., one with a water closet, a lavatory, and a bathtub or shower).

CABO/ANSI A117.1-1992

4.33.3* Bathrooms. Accessible bathrooms shall comply with 4.33.3.

4.33.3.1 Doors. Doors shall not swing into the clear floor space required for any fixture unless the toilet or bathroom is for individual use only, or a clear floor space complying with 4.2.4.1 is provided beyond the arc of the door swing within the room.

4.33.3.2 Water Closets

4.33.3.2.1 Water closets shall be located in the corner of the adaptable bathroom. See Fig. B4.33.3.2. A 48 in (1220 mm) minimum clear space shall be provided in front of the bowl and from the side wall. The distance from the centerline of water closet to accessible lavatory shall be 18 in (455 mm) minimum and from the centerline of the water closet to the wall shall be 18 in (455 mm). The clear space shall be permitted at either side of the water closet.

4.33.3.2.2 Water closet height shall be from 15 in (380 mm) minimum to 19 in (485 mm) maximum, measured from the floor to the top of the toilet seat.

4.33.3.2.3 Grab bars complying with 4.24 shall be installed, or structural reinforcement or other provisions shall be made that will allow installation of grab bars meeting these requirements.

4.33.3.2.4 The toilet paper dispenser shall comply with 4.16.4.

4.33.3.3 Lavatory, Mirrors, and Medicine Cabinets

4.33.3.3.1 The lavatory shall comply with 4.20.

4.33.3.3.2 Medicine cabinets provided under the lavatory shall provide, or shall be removable to provide, the clearances specified in 4.20.2.
4.33.3.3.3 Medicine cabinets provided above the lavatory shall comply with 4.16.5.
4.33.3.3.4 Mirrors shall comply with 4.16.6.
4.33.3.4 Bathtubs. Where a bathtub is provided, it shall have the following features:
4.33.3.4.1 Clear floor space at bathtubs shall comply with 4.21.2.

BCMC

6.1.1 Toilet rooms and bathing facilities shall be accessible. At least one of each type fixture or element in each accessible toilet room and bathing facility shall be accessible.
EXCEPTIONS:
1. A toilet room or bathing facility for a single occupant and not for common or public use shall be permitted to be adaptable.
adaptable.
2. Dwelling units, guest rooms and patient toilet rooms, unless required by 5.0 to be accessible or adaptable.

Comments*

ANSI N.E. ANSI allows adaptability and does not require a turning space in residential bathrooms.
BCMC E.

ADA Title III Requirements

9.2.2 (6) (f) if only half baths are provided, at least one half bath.

9.2.2 (6) (g) carports, garages or parking spaces.

CABO/ANSI A117.1-1992

4.33.3.4.2 A removable in-tub seat or permanent seat at the head end of the tub shall be provided in compliance with 4.21.3. The structural strength of seats and their attachments shall comply with 4.24.3. In-tub seats shall be capable of being mounted securely and shall not slip during use.

4.33.3.4.3 Grab bars shall be installed in compliance with 4.21.4, or structural reinforcement shall be made that will allow installation of grab bars meeting these requirements.

4.33.3.4.4 Faucets and other controls shall comply with 4.21.5.

4.33.3.4.5 A shower spray unit shall be provided in compliance with 4.21.6.

4.33.3.5 Showers. Where a shower is provided, it shall comply with 4.22.

Exception 1. In lieu of providing a seat, the wall opposite the controls in a shower stall shall be structurally reinforced the full depth of the stall at a height from 16 in to 20 in (405 mm to 510 mm) measured from the

bathroom floor, to allow for the installation of a shower seat.
Exception 2. Structural reinforcement shall be permitted that will allow installation of grab bars complying with 4.22.4.
4.33.3.6 Clear Floor Space. Clear floor space at fixtures shall be permitted to overlap.

BCMC
Comments*

See above.
N.E. Specific elements not required.

ADA Title III Requirements
9.2.2 (7) Kitchens, Kitchenettes, or Wet Bars. When provided as accessory to a sleeping room or suite, kitchens, kitchenettes, wet bars, or similar amenities shall be accessible. Clear floor space for a front or parallel approach to cabinets, counters, sinks, and appliances shall be provided to comply with 4.2.4. Countertops and sinks shall be mounted at a maximum height of 34 in (865 mm) above the floor. At least fifty percent of shelf space in cabinets or refrigerator/freezers shall be within the reach ranges of 4.2.5 or 4.2.6 and space shall be designed to allow for the operation of cabinet and/or appliance doors so that all cabinets and appliances are accessible and usable. Controls and operating mechanisms shall comply with 4.27.

CABO/ANSI A117.1-1992
4.33.4 Kitchens. Accessible kitchens and their components shall comply with the requirements of 4.33.4.
4.33.4.1 Clearance. Where counters provide the knee clearances specified in 4.20.2, clearances between those

counters and all opposing base cabinets, countertops, appliances, or walls in kitchens shall be 40 in (1015 mm) minimum, except in U-shaped kitchens, where such clearances shall be 60 in (1525 mm) minimum.

4.33.4.2 Clear Floor Space. A clear floor space 30 in by 48 in (760 mm by 1220 mm) minimum complying with 4.2.4 that allows either a forward or a parallel approach by a person in a wheelchair shall be provided at all appliances in the kitchen, including the range or cooktop, oven, refrigerator/freezer, dishwasher, and trash compactor. Laundry equipment located in the kitchen shall comply with 4.33.5.

4.33.4.3 Operable Parts. All operable parts in kitchens shall comply with 4.25.

4.33.4.4 Work Surfaces. At least one 30 in (760 mm) wide minimum section of counter shall provide a work surface that complies with the following requirements. See Fig. B4.33.4.4.

4.33.4.4.1 The counter shall be adjustable or replaceable as a unit at variable heights between 28 in and 36 in (710 mm and 915 mm), measured from the floor to the top of the counter surface, or shall be mounted at a fixed height of 34 in (865 mm) maximum, measured from the floor to the top of the counter surface.

4.33.4.4.2 Base cabinets, if provided, shall be removable under the full 30 in (760 mm) minimum frontage of the counter. The finished floor shall extend under the counter to the wall.

4.33.4.4.3 Counter thickness and supporting structure shall extend 2 in (51 mm) maximum over the required clear area.

BCMC
Comments*

P.N.E. No scoping of elements. However, technical detail exceeds the ADA Standards. If applied to transient housing these provisions would provide greater access in general than the ADA Standards.

ADA Title III Requirements
CABO/ANSI A117.1-1992

4.33.4.4.4 A clear floor space of 30 in by 48 in (760 mm by 1220 mm) minimum shall allow a forward approach to the counter. The clear floor space shall be permitted to extend 19 in (485 mm) maximum underneath the counter. The knee space shall have a clear width of 30 in (760 mm) minimum.

4.33.4.4.5 There shall be no sharp or abrasive surfaces under such counters.

4.33.4.5* Sink. The sink and surrounding counter shall comply with the following requirements. See Fig.

B4.33.4.5.
4.33.4.5.1 The sink and surrounding counter shall be adjustable or replaceable as a unit at variable heights between 28 in and 36 in (710 mm and 915 mm), measured from the finished floor to the top of the counter surface or sink rim, or shall be mounted at a fixed height of 34 in (865 mm) minimum, measured from the finished floor to the top of the counter surface or sink rim.
4.33.4.5.2 Where sinks are installed to be adjustable in height, rough-in plumbing shall be located to accept connections of supply and drain pipes for sinks mounted at the height of 28 in (710 mm).
4.33.4.5.3 The depth of a sink bowl shall be 6 1/2 in (165 mm) maximum. Only one bowl of double-bowl or triple-bowl sinks needs to meet this requirement.
4.33.4.5.4 Faucets shall comply with 4.25.4.
4.33.4.5.5 Base cabinets, if provided, shall be removable under the full 30 in (760 mm) minimum frontage of the sink and surrounding counter. The finished flooring shall extend under the counter to the wall.
4.33.4.5.6 Counter thickness and supporting structure shall extend 2 in (51 mm) maximum over the required clear space.
4.33.4.5.7 A clear floor space of 30 in by 48 in (760 mm by 1220 mm) minimum shall allow forward approach to the sink. The clear floor space shall be permitted to extend 19 in (485 mm) maximum underneath the sink. The knee space shall have a clear width of 30 in (760 mm) minimum.

BCMC
Comments*

See above.

ADA Title III Requirements
CABO/ANSI A117.1-1992

4.33.4.5.8 Water supply pipes and drain pipes under sinks shall be protected in accordance with 4.20.4
4.33.4.6* Ranges and Cooktops. Ranges and cooktops shall comply with 4.33.4.2 and 4.33.4.3. If ovens or cooktops have knee spaces underneath, they shall be insulated or otherwise protected on the exposed contact

surfaces for protection against burns, abrasions, or electrical shock. The clear floor space shall be permitted to overlap the knee space, if provided, by 19 in (485 mm) maximum. The location of controls for ranges and cooktops shall not require reaching across burners.
4.33.4.7* Ovens. Ovens shall comply with 4.33.4.2 and 4.33.4.3. Ovens shall be of the self-cleaning type or be located adjacent to an adjustable height counter with a 30 in (760 mm) wide minimum knee space below. See Fig. B4.33.4.7. For side-opening ovens, the door latch side shall be next to the open counter space, and there shall be a pull-out shelf under the oven extending the full width of the oven and pulling out 10 in (255 mm) minimum when fully extended. Ovens shall have controls on front panels. Controls shall be permitted to be located on either side of the door.
4.33.4.8* Refrigerator/Freezers. Refrigerators and freezers shall comply with 4.33.4.2 and 4.33.4.3. Side-by-side combination freezer and refrigerator appliances shall have at least 50 percent of the freezer space and at least 50 percent of the refrigerator space located 54 in (1370 mm) maximum above the floor. Other combination refrigerators and freezers shall have at least 50 percent of the freezer space and 100 percent of the refrigerator space and controls 54 in (1370 mm) maximum above the floor. Freezers with less than 100 percent of the storage volume within the limits specified in 4.2.5 or 4.2.6 shall be the self-defrosting type.
4.33.4.10* Kitchen Storage.
4.33.4.10.1 Cabinets, drawers, and shelf storage areas shall comply with 4.23.
4.33.4.10.2 At least one shelf of all cabinets and storage shelves mounted above work counters shall be 48 in (1220 mm) maximum above the floor. See Fig. B4.33.4.4.
4.33.4.10.3 Door pulls or handles for wall cabinets shall be mounted as close to the bottom of cabinet doors as possible. Door pulls or handles for base cabinets shall be mounted as close to the top of cabinet doors as possible.

ADA Title III Requirements

9.2.2(8) Sleeping room accommodations for persons with hearing impairments required by 9.1 and complying with 9.3 shall be provided in the accessible sleeping room or

suite.
9.3 Visual Alarms, Notification Devices and Telephones.
9.3.1 General. In sleeping rooms required to comply with this section, auxiliary visual alarms shall be provided and shall comply with 4.28.4. Visual notification devices shall also be provided in units, sleeping rooms and suites to alert room occupants of incoming telephone calls and a door knock or bell. Notification devices shall not be connected to auxiliary visual alarm signal appliances. Permanently installed telephones shall have volume controls complying with 4.31.5; an accessible electrical outlet within 4 ft (1220 mm) of a telephone connection shall be provided to facilitate the use of a text telephone.
9.3.2 Equivalent Facilitation. For purposes of this section, equivalent facilitation shall include the installation of electrical outlets (including outlets connected to a facility's central alarm system) and telephone wiring in sleeping rooms and suites to enable persons with hearing impairments to utilize portable visual alarms and communication devices provided by the operator of the facility.
9.4 Other Sleeping Rooms and Suites. Doors and doorways designed to allow passage into and within all sleeping units or other covered units shall comply with 4.13.5.

Exception 5 - N.E. for dwelling units in transient lodging.

ADA Title III Requirements

9.5 Transient Lodging in Homeless Shelters, Halfway Houses, Transient Group Homes, and Other Social Service Establishments.

9.5.1 New Construction. In new construction all public use and common use areas are required to be designed and constructed to comply with section 4. At least one of each type of amenity (such as washers, dryers and similar equipment installed for the use of occupants) in each common area shall be accessible and shall be located on an accessible route to any accessible unit or sleeping accommodation.

EXCEPTION: Where elevators are not provided as allowed in 4.1.3(5), accessible amenities are not required on inaccessible floors as long as one of each type is provided in common areas on accessible floors.

9.5.2 Alterations.

(1) Social service establishments which are not homeless shelters:

(a) The provisions of 9.5.3 and 9.1.5 shall apply to sleeping rooms and beds.

(b) Alteration of other areas shall be consistent with the new construction provisions of 9.5.1.

CABO/ANSI A117.1-1992

ADA Title III Requirements

9.5.2 (2) Homeless shelters. If the following elements are altered, the following requirements apply:

(a) at least one public entrance shall allow a person with mobility impairments to approach, enter and exit including a minimum clear door width of 32 in (815 mm).

(b) sleeping space for homeless persons as provided in the scoping provisions of 9.1.2 shall include doors to the sleeping area with a minimum clear width of 32 in (815 mm) and maneuvering space around the beds for persons with mobility impairments complying with 9.2.2(1).

(c) at least one toilet room for each gender or one unisex toilet room shall have a minimum clear door width of 32 in (815 mm), minimum turning space complying with 4.2.3, one water closet complying with 4.16, one lavatory complying with 4.19 and the door shall have a privacy latch; and if provided, at least one tub or shower shall comply with 4.20 or 4.21, respectively.

(d) at least one common area which a person with mobility impairments can approach, enter and exit including a minimum clear door width of 32 in (815 mm).

(e) at least one route connecting elements (a), (b), (c) and (d) which a person with mobility impairments can use including minimum clear width of 36 in (915 mm), passing space complying with 4.3.4, turning space complying with 4.2.3 and changes in levels complying with 4.3.8.

(f) homeless shelters can comply with the provisions of (a)-(e) by providing the above elements on one accessible floor.

9.5.3 Accessible Sleeping Accommodations in New Construction. Accessible sleeping rooms shall be provided in conformance with the table in 9.1.2 and shall comply with 9.2 Accessible Units, Sleeping Rooms and Suites (where the items are provided). Additional sleeping rooms that comply with 9.3 Sleeping Accommodations for Persons with Hearing Impairments shall be provided in conformance with the table provided in 9.1.3.

In facilities with multi-bed rooms or spaces, a percentage of the beds equal to the table provided in 9.1.2 shall comply with 9.2.2(1).

CABO/ANSI A117.1-1992

BCMC

5.4.1 In Group R1 occupancies containing 6 or more guest rooms, one for the first 30 guest rooms and one additional for each additional 100 guest rooms or fraction thereof shall be accessible. 10 TRANSPORTATION FACILITIES

10.1 General. Every station, bus stop, bus stop pad, terminal, building or other transportation facility, shall comply with the applicable provisions of 4.1 through 4.35, sections 5 through 9, and the applicable provisions of this section. The exceptions for elevators in 4.1.3(5) exception 1 and 4.1.6(l)(k) do not apply to a terminal, depot, or other station used for specified public transportation, or an airport passenger terminal, or facilities subject to Title II.

10.2 Bus Stops and Terminals.

10.2.1 New Construction.

(1) Where new bus stop pads are constructed at bus stops, bays or other areas where a lift or ramp is to be deployed, they shall have a firm, stable surface; a minimum clear length of 96 inches (measured from the curb or vehicle roadway edge) and a minimum clear width of 60 inches (measured parallel to the vehicle roadway) to the maximum extent allowed by legal or site constraints; and shall be connected to streets, sidewalks or pedestrian paths by an accessible route complying with 4.3 and 4.4. The slope of the pad parallel to the roadway shall, to the extent practicable, be the same as the roadway. For water drainage, a maximum slope of 1:50 (2%) perpendicular to the roadway is allowed.

(2) Where provided, new or replaced bus shelters shall be installed or positioned so as to permit a wheelchair or mobility aid user to enter from the public way and to reach a location, having a minimum clear floor area of 30 inches by 48 inches, entirely within the perimeter of the shelter. Such shelters shall be connected by an accessible route to

the boarding area provided under paragraph (1) of this section.

(3) Where provided, all new bus route identification signs shall comply with 4.30.5. In addition, to the maximum extent practicable, all new bus route identification signs shall comply with 4.30.2 and 4.30.3. Signs that are sized to the maximum dimensions permitted under legitimate local, state or federal regulations or ordinances shall be considered in compliance with 4.30.2 and 4.30.3 for purposes of this section.

EXCEPTION: Bus schedules, timetables, or maps that are posted at the bus stop or bus bay are not required to comply with this provision.

CABO/ANSI A117.1-1992

BCMC

1.1 All buildings and structures, including their associated sites and facilities, shall be accessible with accessible means of egress for people with disabilities as required in these provisions.

Comments*

N.E. Not addressed. Although transportation facilities will be covered by BCMC's general provisions, those provisions will not address the features and elements unique to such facilities.

N.E. Not addressed.

10.2.2 Bus Stop Siting and Alterations.

(1) Bus stop sites shall be chosen such that, to the maximum extent practicable, the areas where lifts or ramps are to be deployed comply with section 10.2.1(1) and (2).

(2) When new bus route identification signs are installed or old signs are replaced, they shall comply with the requirements of 10.2.1(3).

10.3 Fixed Facilities and Stations.

10.3.1 New Construction. New stations in rapid rail, light rail, commuter rail, intercity bus, intercity rail, high speed rail, and other fixed guideway systems (e.g., automated guideway transit, monorails, etc.) shall comply with the following provisions, as applicable.

10.3.1 (1) Elements such as ramps, elevators or other circulation devices, fare vending or other ticketing areas, and fare collection areas shall be placed to minimize the distance which wheelchair users and other persons who cannot negotiate steps may have to travel compared to the general public. The circulation path, including an accessible entrance and an accessible route, for persons with disabilities shall, to the maximum extent practicable, coincide with the circulation path for the general public.

Where the circulation path is different, signage complying with 4.30.1, 4.30.2, 4.30.3, 4.30.5, and 4.30.7(1) shall be provided to indicate direction to and identify the accessible entrance and accessible route.

10.3.1 (2) In lieu of compliance with 4.1.3(8), at least one entrance to each station shall comply with 4.14, Entrances. If different entrances to a station serve different transportation fixed routes or groups of fixed routes, at least one entrance serving each group or route shall comply with 4.14, Entrances. All accessible entrance shall, to the maximum extent practicable, coincide with those used by the majority of the general public.

10.3.1 (3) Direct connections to commercial, retail, or residential facilities shall have an accessible route complying with 4.3 from the point of connection to boarding platforms and all transportation system elements used by the public. Any elements provided to facilitate future direct connections shall be on an accessible route connecting boarding platforms and all transportation system elements used by the public.

CABO/ANSI A117.1-1992

BCMC

3.1.2 At least one accessible route shall connect accessible spaces, elements, facilities and buildings that are on the same site...

4.1 Each building and structure, and each separate tenancy within a building or structure, shall be provided with at least one entrance which complies with the accessible route provisions of CABO/ANSI A117.1. Not less than 50% of the entrances shall be accessible.

3.1.2 At least one accessible route shall connect accessible spaces, elements, facilities and buildings that are on the same site...

4.1 Each building and structure, and each separate tenancy within a building or structure, shall be provided with at least one entrance which complies with the accessible route provisions of CABO/ANSI A117.1. Not less than 50% of the entrances shall be accessible.

Comments*

N.E. Not addressed.

N.E. Not addressed.

P.N.E. BCMC needs to address "coincide with the circulation path for the general public."

Exceeds by requiring 50% rather than just one, to be accessible.

However, P.N.E. because BCMC fails to require one at each entrance

serving each group of routes.
E.

ADA Title III Requirements

10.3.1 (4) Where signs are provided at entrances to stations identifying the station or the entrance, or both, at least one sign at each entrance shall comply with 4.30.4 and 4.30.6. Such signs shall be placed in uniform locations at entrances within the transit system to the maximum extent practicable.

EXCEPTION: Where the station has no defined entrance, but signage is provided, then the accessible signage shall be placed in a central location.

10.3.1 (5) Stations covered by this section shall have identification signs complying with 4.30.1, 4.30.2, 4.30.3, and 4.30.5. Signs shall be placed at frequent intervals and shall be clearly visible from within the vehicle on both sides when not obstructed by another train. When station identification signs are placed close to vehicle

windows (i.e., on the side opposite from boarding) each shall have the top of the highest letter or symbol below the top of the vehicle window and the bottom of the lowest letter or symbol above the horizontal mid-line of the vehicle window.

10.3.1 (6) Lists of stations, routes, or destinations served by the station and located on boarding areas, platforms, or mezzanines shall comply with 4.30.1, 4.30.2, 4.30.3, and 4.30.5. A minimum of one sign identifying the specific station and complying with 4.30.4 and 4.30.6 shall be provided on each platform or boarding area. All signs referenced in this paragraph shall, to the maximum extent practicable, be placed in uniform locations within the transit system.

10.3.1 (7)* Automatic fare vending, collection and adjustment (e.g., add-fare) systems shall comply with 4.34.2, 4.34.3, 4.34.4, and 4.34.5. At each accessible entrance such devices shall be located on an accessible route. If self-service fare collection devices are provided for the use of the general public, at least one accessible device for entering, and at least one for exiting, unless one device serves both functions, shall be provided at each accessible point of entry or exit. Accessible fare collection devices shall have a minimum clear opening width of 32 in; shall permit passage of a wheelchair; and, where provided, coin or card slots and controls necessary for operation shall comply with 4.27. Gates which must be pushed open by wheelchair or mobility aid users shall have a smooth continuous surface extending from 2 inches above the floor to 27 inches above the floor and shall comply with 4.13. Where the circulation path does not coincide with that used by the general public, accessible fare collection systems shall be located at or adjacent to the accessible point of entry or exit.

ADA Title III Requirements

10.3.1 (8) Platform edges bordering a drop-off and not protected by platform screens or guard rails shall have a detectable warning. Such detectable warnings shall comply with 4.29.2 and shall be 24 inches wide running the full length of the platform drop-off.

10.3.1 (9) In stations covered by this section, rail-to-platform height in new stations shall be coordinated with

the floor height of new vehicles so that the vertical difference, measured when the vehicle is at rest, is within plus or minus 5/8 inch under normal passenger load conditions. For rapid rail, light rail, commuter rail, high speed rail, and intercity rail systems in new stations, the horizontal gap, measured when the new vehicle is at rest, shall be no greater than 3 in. For slow moving automated guideway "people mover" transit systems, the horizontal gap in new stations shall be no greater than 1 in.
EXCEPTION 1: Existing vehicles operating in new stations may have a vertical difference with respect to the new platform within plus or minus 1-1/2 in.
EXCEPTION 2: In light rail, commuter rail and intercity rail systems where it is not operationally or structurally feasible to meet the horizontal gap or vertical difference requirements, mini-high platforms, car-borne or platform-mounted lifts, ramps or bridge plates, or similar manually deployed devices, meeting the applicable requirements of 36 C.F.R. part 1192, or 49 C.F.R. part 38 shall suffice.
10.3.1 (10) Stations shall not be designed or constructed so as to require persons with disabilities to board or alight from a vehicle at a location other than one used by the general public.
10.3.1 (11) Illumination levels in the areas where signage is located shall be uniform and shall minimize glare on signs. Lighting along circulation routes shall be of a type and configuration to provide uniform illumination.
10.3.1 (12) Text Telephones: The following shall be provided in accordance with 4.31.9:
(a) If an interior public pay telephone is provided in a transit facility (as defined by the Department of Transportation) at least one interior public text telephone shall be provided in the station.
(b) Where four or more public pay telephones serve a particular entrance to a rail station and at least one is in an interior location, at least one interior public text telephone shall be provided to serve that entrance. Compliance with this section constitutes compliance with section 4.1.3(17)(c).

10.3.1 (13) Where it is necessary to cross tracks to reach boarding platforms, the route surface shall be level and flush with the rail top at the outer edge and between rails, except for a maximum 2-1/2 inch gap on the inner edge of each rail to permit passage of wheel flanges. Such crossings shall comply with 4.29.5. Where gap reduction is not practicable, an above-grade or below-grade accessible route shall be provided.

10.3.1 (14) Where public address systems are provided to convey information to the public in terminals, stations, or other fixed facilities, a means of conveying the same or equivalent information to persons with hearing loss or who are deaf shall be provided.

10.3.1 (15) Where clocks are provided for use by the general public, the clock face shall be uncluttered so that its elements are clearly visible. Hands, numerals, and/or digits shall contrast with the background either light-on-dark or dark-on-light. Where clocks are mounted overhead, numerals and/or digits shall comply with 4.30.3. Clocks shall be placed in uniform locations throughout the facility and system to the maximum extent practicable.

10.3.1 (16) Where provided in below grade stations, escalators shall have a minimum clear width of 32 inches. At the top and bottom of each escalator run, at least two contiguous treads shall be level beyond the comb plate before the risers begin to form. All escalator treads shall be marked by a strip of clearly contrasting color, 2 inches in width, placed parallel to and on the nose of each step. The strip shall be of a material that is at least as slip resistant as the remainder of the tread. The edge of the tread shall be apparent from both ascending and descending directions.

10.3.1 (17) Where provided, elevators shall be glazed or have transparent panels to allow an unobstructed view both in to and out of the car. Elevators shall comply with 4.10.

EXCEPTION: Elevator cars with a clear floor area in which a 60 inch diameter circle can be inscribed may be substituted for the minimum car dimensions of 4.10, Fig. 22.

10.3.1 (18) Where provided, ticketing areas shall permit persons with disabilities to obtain a ticket and check baggage and shall comply with 7.2.

ADA/ANSI/BCMC Requirements - October 13, 1995
01-03845

OCT 25 1995

The Honorable Richard J. Durbin
Member, U.S. House of Representatives
P.O. Box 790
Springfield, Illinois 62705

Dear Congressman Durbin:

I am responding to your inquiry on behalf of your constituents, Dr. Kermit W. Bell and Reverend Paul D. Frazier, regarding the elevator exemption in the Americans with Disabilities Act of 1990 (ADA). Dr. Bell and Reverend Frazier wish to know whether an elevator must be installed in the medical facility being constructed in Calhoun County, Illinois. We apologize for our delay in responding.

The Americans with Disabilities Act (ADA) authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's requirements. It does not, however, constitute a legal interpretation and it is not binding on the Department.

The ADA and the Department's ADA Standards for Accessible Design require an elevator to serve each level of newly constructed or altered buildings. An exception to that

requirement exempts privately owned and operated buildings that are less than three stories or that have less than 3000 square feet per story unless the building is a shopping center, a shopping mall, or the professional office of a health care provider. Congress, in enacting the ADA, specifically required that elevators be installed in the newly constructed offices of professional health care providers in recognition of the importance of providing access to health care for people with disabilities.

The Department has provided further interpretation of this provision in its Technical Assistance Manual for title III of the ADA. The manual explains that, where a physician has offices on an accessible floor of a two-story building and the other floor

Congress of the United States
House of Representatives
Washington, DC 20515-1520
September 18, 1995

Mr. Deval L. Patrick
Assistant Attorney General For the Civil Rights Division
U.S. Department of Justice
PO Box 65808
Washington, D.C. 20035-5808

Dear Mr. Patrick:

I am writing on behalf of my constituents Dr. Kermit W. Bell and Reverend Paul D. Frazier of the Calhoun Medical Center Board in Hardin, Illinois.

The only medical facility in Calhoun County was destroyed in the Flood of 1993. The community is now in the process of rebuilding. The community is planning to build a two story building to house its medical facilities -- the upper level to be used for the medical center and the lower level to be used for storage and public meetings. Both levels are accessible separately by entrances to outside parking lots.

The Medical Center Board has been advised that an elevator should be installed in the building to meet ADA requirements. They have contacted my office in an attempt to appeal this decision.

The Medical Center Board states that the added cost of this elevator has resulted in the downsizing of the medical center itself and the elimination of many needed medical features. The Board feels that a state-of-the-art medical facility is needed to guarantee quality medical service to its patients and to attract much needed physicians to this rural area.

The Medical Center Board contends that both levels of the building are accessible to the handicapped from the outside parking lots on each level. Therefore, the elevator is unnecessary.

I respectfully request that this matter be examined further and a decision be made regarding the necessity of this elevator in order to meet ADA requirements.

If you have any questions, please feel free to contact Wendy Feezel in my Springfield, Illinois office at P.O. Box 790, Springfield, Illinois 62705 or telephone #217/492-4062. I would also appreciate being kept apprised of the status of this inquiry.

Thank you for your attention to this matter, and I await your response.

Sincerely,
Richard J. Durbin
Member of Congress

OCT 25 1995

The Honorable Donald A. Manzullo
U.S. House of Representatives
426 Cannon House Office Building
Washington, D.C. 20515-1316

Dear Congressman Manzullo:

This letter responds to your inquiry seeking information about the liability of contractors and architects under title III of the Americans with Disabilities Act of 1990.

The Americans with Disabilities Act of 1990 ("ADA") authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's requirements. However, it does not constitute a legal interpretation, and it is not binding on the Department.

Title III of the ADA prohibits a variety of forms of discrimination against individuals with disabilities. One of its provisions -- section 302 of the Act, 42 U.S.C. 12182 -- applies to public accommodations and prohibits any party that owns, leases, leases to, or operates a public accommodation from engaging in several forms of discrimination on the basis of disability (including, for instance, maintaining discriminatory eligibility criteria, failing to provide auxiliary aids and services when necessary for the participation of an individual with a disability, and failing to remove architectural barriers to access where it is readily achievable to do so).

Another provision of title III -- section 303 of the Act, 42 U.S.C. 12183 -- applies to public accommodations and commercial facilities, and defines illegal discrimination to include failures to design and construct new public accommodations or new commercial facilities to be readily accessible to and usable by individuals with disabilities.

(Handwritten) FOIA
01-03849

Under this section, parties who participate in this type of unlawful discrimination, such as an architect or contractor, may be found jointly liable for violating the ADA. I have enclosed for your information a copy of the Department of Justice's Technical Assistance (TA) manual for title III. Section III-5.1000 of the TA manual discusses, on page 46, liability for violations of the ADA's architectural standards for new construction.

I hope this information will assist you in responding to your constituent.

Sincerely,
Deval L. Patrick
Assistant Attorney General
Civil Rights Division

The Honorable Janet Reno
Attorney General
Department of Justice
Tenth and Constitution Ave., N.W.
Washington, D.C. 20530

Dear Attorney General Reno:

I am writing to you on behalf of a consituent who has requested information regarding DOJ enforcement of the Americans With Disabilities Act.

Specifically, I am interested in obtaining information pertaining to liability of contractors and architects with regards to public accomodations found to be in violation of ADA requirements. While I was of the understanding that liability was limited to owners, operators, lessors and lessees of places of public accomodation, my constituent is concerned that contractors involved in the construction of public accomodations may be held jointly liable for non-compliance with ADA guidlines.
I would appreciate your assitance in clarifying this issue.

Sincerely,

Donald A. Manzullo
U.S. Congressman
16th District, Illinois

NOV 21 1995

The Honorable Cass Ballenger
Member, U.S. House of Representatives
P.O. Box 1830
Hickory, North Carolina 28603

Dear Congressman Ballenger:

I am responding to your letter on behalf of your constituent, XX who is concerned about provisions for students with disabilities in public schools. Specifically, XX would like to know whether the Americans with Disabilities Act (ADA) requires the provision of access to all public school activities and facilities, including the assembly area stage. Please excuse our delay in responding.

Title II of the ADA prohibits discrimination on the basis of disability in State and local government services. Sections 35.149 and 35.150 of the Department's title II regulation (enclosed) require accessibility to programs, services, and activities in facilities existing on the effective date of the statute, January 26, 1992. The principal focus of the program accessibility standard is access to programs, services, and activities, as opposed to access to physical structures. Therefore, not every area of an existing school facility would have to be made accessible, as long as there is access to a school's programs, services, or activities.

For existing facilities, every building does not necessarily have to be made accessible if all of the programs located inside that building can be made accessible by alternative means. Section 35.150 (b) (1) of the title II regulation does not require that a school district eliminate structural barriers if it provides access to its programs through alternative methods such as redesign of equipment, reassignment of services to accessible buildings, assignment of aides to beneficiaries, delivery of services at alternate accessible sites, alteration of existing facilities and construction of new facilities, or any other methods that result in making the services, programs, or activities readily accessible to and usable by individuals with disabilities.

cc: Records, Chrono, Wodatch, McDowney, Milton, FOIA
n:\udd\milton\congress\existfac.bal\sc. young-parran
01-03852

If structural alterations are necessary to provide program accessibility, such alterations must be undertaken unless the public entity can demonstrate that the alterations would cause a fundamental change to its program or that the cost of the alterations would result in undue financial and administrative burdens. 28 C.F.R. S 35.150(a) (3). Where an action would result in such a change or such burdens, the public entity must take any other action that would not result in such change or such burdens but would nevertheless ensure that individuals with disabilities receive the benefits or services provided by the entity.

Thus, in situations where a school has an inaccessible stage and students with mobility impairments must be on the stage, in order to meet its program accessibility obligations, the school district may choose to move the event from the inaccessible stage to an accessible location or make the stage accessible to persons with disabilities. If making the stage accessible would result in a fundamental change in the events or would constitute an undue financial or administrative burden, then the school district would be required to move all such events to an accessible location.

I hope this information assists you in responding to your constituent.

Sincerely,
Deval L. Patrick
Assistant Attorney General
Civil Rights Division

Mr. Deval L. Patrick
Asst. Attorney General
U.S. Department of Justice
PO Box 65808
Washington, DC 20035-5808
Dear Mr. Patrick:

My constituent, XX has
contacted my office about provisions for the handicapped in pubic schools as it relates to the Americans With Disabilities Act (ADA).

XX says that the schools in his district do have provisions for the handicapped to enter and exit the school building and classrooms, but that during assembly sessions the handicapped students cannot access the stage to receive diplomas or awards unless they are carried up by someone. He would like to know if the ADA regulations provides access to handicapped students to all school activities and facilities.

I would appreciate any information you may wish to offer that would assist me in responding tomy constituent. Please address your response to my Hickory District Office, P.O. Box 1830, Hickory, NC 28603.

Thank you for your time and attention to this matter.

Sincerely,
Cass Ballenger

NOV 21 1995

The Honorable Paul McHale
Member, U.S. House of Representatives
26 East Third Street
Bethlehem, Pennsylvania 18015-1392

Dear Congressman McHale:

This letter is in response to your inquiry on behalf of your constituent, XX , regarding the curb ramp that was recently installed in front of her house by the Borough of Slatington, Pennsylvania. XX complains that the curb ramp has decreased the value of her home, is a danger to pedestrians, and should not have been installed as it was. In addition, Ms. Parisi is concerned that the installation of the curb ramp does not comply with the Americans with Disabilities Act (ADA).

Title II of the ADA, which prohibits discrimination on the basis of disability by State and local government entities, requires the installation of curb ramps to provide access to pedestrian walkways on new or altered streets. In addition, title II may require the installation of curb ramps to provide access to existing pedestrian walkways on streets that are not otherwise being altered in order to provide access to the program of using public streets and walkways. The Federal regulation implementing title II requires public entities to conduct a "self-evaluation" to determine where it is necessary to install curb ramps to existing pedestrian walkways and to develop and implement a "transition plan" to establish a schedule for the installation of these curb ramps.

Under the ADA, local officials are required to comply with either section 4.7 of the ADA Standards for Accessible Design or section 4.7 of the Uniform Federal Accessibility Standards when they install curb ramps. These standards establish technical specifications for the construction of a curb ramp; they do not specify the location of a curb ramp. Therefore, nothing in the ADA regulation prohibits the installation of the curb ramp in the location selected by the Borough.

(HANDWRITTEN) FOIA

XX other concerns are not governed by the ADA. These issues are matters that are appropriately addressed under State law. Because there are no statutes which the Department of Justice, or any other federal agency, enforces that apply to XX complaint, this Department will take no action on this matter. We recommend that XX consult with private legal counsel to assist her in seeking to secure her rights.

I hope this information is helpful to you in responding to your constituent.

Sincerely,
Deval L. Patrick
Assistant Attorney General
Civil Rights Division

Sally Conway
Equal Opportunity Specialist
U.S. Department of Justice
P.O. Box 66738
Washington, DC 20035-6738

Dear Ms. Conway:

I am enclosing a letter from my constituent, XX regarding the installation of an accessibility ramp near her property in Slatington, PA. The Borough of Slatington has stated that the ramp was required under the Americans with Disabilities Act (ADA).

XX raises several questions in her letter. Her main concern is that she believes the placement of the ramp does not meet ADA guidelines. She claims the ramp is 26 feet from the corner of the crosswalk. Enclosed is a picture of the ramp for your review.

In accordance with all applicable law, regulation and/or agency policy, would you please investigate this matter on behalf of XX . Please respond to my Staff Assistant, Mr. Andrew Ferraro, at my Bethlehem office.

Thank you for your cooperation in this matter.

Sincerely,

Paul McHale

Congressman Paul McHale
c/o Mr. Andrew Ferraro
1603 Lehigh Street
Easton, PA 18042

Dear Congressman McHale,

Re: Questionable Handicap Ramp Installation

I have documented this issue in full for your review.

I had an unfortunate experience recently and I need your help in fixing the problem. On Monday, 8/21, I came home from work at 5:00 p.m. to find my front pavement removed. I immediately questioned my neighbor and was informed that she received a letter from the Borough of Slatington stating that they were putting in handicap ramps at the crosswalks. (Attachment A)

Since I do not live on a corner lot, I did not receive a copy of the letter. I immediately called the Borough of Slatington and left a message for Mr. Stephen Sechriest, Borough Manager, stating my concern.

After closer inspection of the remaining pavement, I found my home sustained additional damage from the heavy machinery they used to remove my pavement. The pavement that is directly in front of my home shifted away from the porch. Also, there was a drain pipe that ran under my sidewalk which was destroyed when they lifted the pavement. I called and left a message for someone to contact me immediately.

On Tuesday, 8/22 at 8:00 a.m., I met with XX at my home to discuss my concern. I told him that I never received a letter from the borough stating what they planned on doing and he said "sorry". I told him due to the location of the ramp if he continued to install it I would get water on my pavement. He said "no, I wouldn't". I informed him that this location (second house in from the corner) is not a crossing. He said "there was no other place to put the ramp". He stated that because of the drain basket at the corner and because of my neighbor's front steps, he would have to install the ramp in front of my home. I informed him that they broke the drain pipe that extended under the pavement and he replied that they (the contractor) would fix it.

On the same day, I went to work and contacted Attorney Robert Donatelli. He is representing me on this case. He instructed me to get a copy of my deed and to contact the Mayor of Slatington. I got in touch with Mayor R. Keegan and explained the situation. He said he would look into it and get back to me on 8/23.

When I got home that evening, I noticed that the borough inserted a plastic PVC pipe into the neck of the damaged drain pipe. (attachment B) I tested the drain pipe to see if it leaked by dropping a bucket of water from the second story of my home and found that it was not sealed properly and it leaked.

On Wednesday, 8/23, Mayor Keegan informed me that he and Mr. Sechriest and 2 Council members visited my home at 8:00 a.m. to discuss the issue. They said that due to the corner drain basket and the steps in front of my neighbors house, they had to put the handicap ramp in front of my house. Mayor Keegan agreed that it was wrong to install the ramp in front of my house, since my house is the second house from the corner. A person would have to go into the street and travel over 26 feet to get to the ramp that they were installing.
01-03858

Mayor Keegan agreed that I should seek Legal action.

Mayor Keegan said he would contact the Council members and call me that evening. He returned my call and informed me that he contacted Gary Phillips, Borough Councilman, and told him to halt the pouring and re-look the situation. The Mayor told Phillips that the repaired pipe leaked. That evening, I called Gary Phillips and he said that they will not pour per the Mayor. Gary Phillips told me to document my issues and send them to the Borough. (see Attachment B)

I received a call on Tuesday, 8/24 at 7:00 p.m. from XX stating that there would be a Council Meeting on 8/28 and that my issue would be reviewed.

On Monday, 8/28, I attended that meeting and the Council members voted 4 to 3 to continue to install the handicap ramp in front of my home. The Mayor could not vote, however, he agreed with me that it should not be placed in front of my home. At the meeting, I requested that a picture be taken of the pipe and asked how they planned to fix it.

They poured the cement on Monday, 8/30. It is an eye sore! I feel it has decreased the value of my home. It will be dangerous in the winter. It is dangerous now because of the steep slope.

On Friday, 9/1, I requested the meeting minutes from the 8/28/95 meeting from Mr. Sechriest he said that it would take up to two months to get them.

I contacted Mayor Keegan and told him that I would not receive the meeting minutes for two months.

He returned my call and stated that XX will work on providing them to me soon as soon as he can. He did not have a secretary and was backed up.

I need your help! Please review the pictures that I have attached and see for yourself. The handicap ramp is 26.3 feet from the corner. It extends 13' 10" over my property. I believe they could have investigated other alternatives. For instance, they could have increased the level of the blacktop or installed a new drain or re-worked the present drain area.

Mayor Keegan stated that he would support my issue in full and said he would contact Representative McHale if I needed assistance.

Please get in touch with me at your earliest convenience. I can be reached at work between the hours of 7:00 a.m. and 4:00 p.m. at phone number 610-712-6423 or during the evening hours at 767-9790.

Sincerely,

XX

SEP 6 1995

The Honorable Owen Pickett
Member, U.S. House of Representatives
2710 Virginia Beach Boulevard
Virginia Beach, Virginia 23452

Dear Congressman Pickett:

This is in response to your letter on behalf of your constituent, XX regarding the requirements of the Americans with Disabilities Act (ADA).

Specifically, XX inquires about ADA requirements for automatic door openers. The ADA Standards for Accessible Design set forth the ADA standards for new construction and alterations of places of public accommodations and commercial facilities. The Standards, located in Appendix A of the title III regulations, are enclosed with this letter. As you will note, the Standards do not require that newly constructed or altered buildings have automatic door openers. Rather, they require that if automatic doors are provided, they must comply with section 4.13.12. Additionally, other requirements for doors (section 4.13), such as maneuvering clearances, hardware, and pull force (on interior doors), must be followed.

Finally, because the title III rule does not require that existing places of public accommodation (such as the stores to which XX refers) exceed the new construction requirements, existing facilities would not be required to install an automatic door opener.

SEP 7 1995

XX
XX
Seattle, Washington XX

Dear XX

I am responding to your letter to President Clinton regarding the variance you requested to close off the open concrete staircase leading into your basement. You complain that the City of Seattle will not grant you a variance although you need to close off the staircase because of your disability.

Title II of the Americans with Disabilities Act of 1990 (ADA) prohibits discrimination against qualified individuals with disabilities on the basis of disability by State and local governments. Section 35.130(a) of the Department of Justice's Title II regulation (enclosed) provides that no qualified individual with a disability shall, on the basis of disability, be excluded from participation in or be denied the benefits of the services, programs, or activities of a public entity, or be subjected to discrimination by any public entity. Section 35.130(b)(7) of the Title II rule states that a public entity shall make reasonable modifications in policies, practices, or procedures when the modifications are necessary to avoid discrimination on the basis of disability, unless the public entity can demonstrate that making the modifications would fundamentally alter the nature of the service, program, or activity or result in undue financial or administrative burdens.

Thus, the city of Seattle may be required to grant a variance to you if a variance is necessary to avoid

discrimination on the basis of disability, unless Seattle can demonstrate that granting the variance would result in undue financial or administrative burdens.

(Handwritten)
ADDRESS: XX
XX
SEATTLE, WA. XX

April 23, 95

Dear President Clinton,

I am so sick of the city of Seattle, WA. My name is XX (b)(6). The right side of my body is paralyzed due to a head injury, documented by a 5 pg. Social Security Report.

My husband and I brought a 1916 house that sits right on the alley. It had open concrete stairs, existing, that sit 36" from

the alley. I was scared to death of them. They go down tot he ground to the basement. When we bought the house the stair well had no support.

Because of my stability, double vision, poor walking conditions due to my paralysis my husband put a wood door height entry way over the steps. He did this because the stairs were already there, they had absolutely no support, and because of my disability he covered them.

I am so tired of trying to explain this story, DCLU, Dept. of Construction and Land Use says "tear it down." My husband said, "it provides support for my wife's disability." The Dept. said, "OK, provide doctor's proof of her disability, and you can keep the entry way." We did.

The Dept. for 4 months has harassed us. Even if we pay their $1,430 variance fee,

01-03899

we are not sure we can keep it. I need the entry way for my disability. If there wasn't that reason behind the shelter WE WOULD NOT HAVE BUILT IT.

My constitutional rights are being broken. The mayor won't even see me about this issue. I've been to his office 4 times. His staff won't even make an appointment for me to see Norm Rice.

DCLU won't budge. They keep coming up with stupid reasons. This has gotten so dumb I can't even make sense out of it.

My husband and I have been both head injured. We are doing our best. We have explained and re explained the entry way. Again, our last letter, after 4, didn't get through to them. Now, they want us to get a lawyer. We can't afford a lawyer. Let alone anymore missed work trying to solve this or beating our heads against a brick wall.

We've written letters, had our entry way and my disability publicized in a name brand Seattle newspaper, the PI, other people have written letters in support of the entry way and me, phone calls in support. We've been to the complaint dept. at Norm Rice's office, we've been to city council, Senator Patty Murray's office, Governor Mike Lowery's Office, the Coalition of Citizen's with disabilities,

Neighborhood Council.

01-3900

I am really getting fed up, 4 months of this torment. Last week, I had to come home from work, April 18th, due to an excruciating head ache. I can not take the pressure DCLU is inflicting on me. My safety, peace of mind, every aspect of my total life is so very important for me to function in this world due to my disability. Every single part of my life has to be enhanced due to my disablement otherwise I fall apart.

I have a very supportive husband, I live 5 blocks from work, this house is 1 1/2 blocks from a bus stop, I work in a disabled job program which has been tailored for my conditions.

I usually can cope, but this problem we are having with DCLU is breaking me down. Seattle is disregarding my disability. I don't understand.

I could go on & on & on. It's pretty bad when I have to rely on the highest power in the country about this matter. The state of Wa., mostly the city of Seattle, "keeps" throwing their hands up

and saying "DCLU is the final authority," I don't know where to turn anymore.

This is getting ridiculous! I thought we lived in America, where when you had a problem like I am having "you could take it to the so called government, which is supposed

01-3901

to be BY THE PEOPLE AND FOR THE PEOPLE" and they would help you right the wrong being done.

The mayor, Norm Rice, won't even see me and the rest have said, "it's out of our jurisdiction." Will you, President Clinton, help me? My constitutional rights as a disabled person are being broken and I want to know why! I WANT TO LEGALLY KEEP OUR ENTRY WAY BECAUSE WE PUT IT UP FOR MY DISABILITY.

The house is illegal, the stairs are illegal, but that's how it has been since 1916. I am sending a packet along about our case. Please help me! I need to live in that house without pressure.

Thank you,

XX

01-3902

SEP 14 1995

The Honorable Michael Bilirakis
Member, U.S. House of Representatives
4111 Land O' Lakes Boulevard, Suite 306
Land O' Lakes, Florida 34639

3802

Dear Representative Bilirakis:

This responds to your letter on behalf of your constituent, XX who inquired about requirements for accessible medical exam tables under the Americans with Disabilities Act (ADA). Although it is not explicitly stated, we infer that XX is asking about the ADA requirements that apply to private physicians. We apologize for our delay in responding.

Title III of the ADA prohibits discrimination on the basis of disability by places of public accommodation, including the professional offices of health care providers. Physicians covered by title III are required to provide people with disabilities full and equal enjoyment of the services that they offer. To ensure that people with disabilities are not excluded from participation because a facility is inaccessible to them, title III requires places of public accommodation to remove barriers to the extent that it is readily achievable to do so. The statute defines "readily achievable" as "easily accomplishable and able to be carried out without much difficulty or expense." If barrier removal is not readily achievable, then places of public accommodation must use any readily achievable alternative methods of providing services to people with disabilities.

To assist members of the public to understand their rights and responsibilities under the ADA, the Department of Justice has published technical assistance manuals that explain the ADA regulations. We have enclosed a copy of the Division's title III Technical Assistance Manual that you may wish to provide to XX. In addition, XX may wish to contact the Department's toll-free ADA information line (800-514-0301 (voice)

cc: Records; Chrono; Wodatch; Gracer; McDowney; FOIA
udd\gracer\tabilira.2

01-03903

or 800-514-0383 (TDD)) for assistance. Members of the Disability

Rights Section staff are available to answer questions on the information line on Monday, Tuesday, Wednesday, and Friday from 10:00 a.m. to 6:00 p.m., Eastern time. On Thursday, the information line is staffed from 1:00 p.m. to 6:00 p.m.

I hope this is helpful in responding to XX.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

Enclosure

01-03904

SEP 14 1995

The Honorable Bill Paxon
Member, U.S. House of Representatives
5500 Main Street
Williamsville, New York 14221

Dear Congressman Paxon:

I am responding to your inquiry on behalf of your constituent, William Reemtsen, City Manager of the City of Batavia, New York. Mr. Reemtsen asked whether the Americans with Disabilities Act (ADA) requires a municipal government to ensure that accessible seating locations in newly constructed stadiums provide sightlines over standing spectators for people who use wheelchairs. Mr. Reemtsent's letter also asked you to determine the source of a single-page document containing this requirement that was provided to Mr. Reemtsen by the Eastern Paralyzed Veterans of America (EPVA) to enable him to determine if this is a "new" ADA requirement, or merely a preference of the EPVA.

The document enclosed with Mr. Reemtsen's letter was copied from the 1994 supplement to the Department of Justice Title III Technical Assistance Manual. The Department initially published this manual in 1992 to assist people to understand their rights and responsibilities under the ADA. A copy of the Technical Assistance Manual is enclosed for your reference. The manual does not establish "new" requirements; it explains the requirements that are now published.

In this specific instance, the Technical Assistance Manual is addressing the requirement found in section 4.33.3 of the ADA Standards for Accessible Design, which provides that --

> wheelchair areas shall be an integral part of any fixed seating plan and shall be provided so as to provide people with physical disabilities a choice of admission prices and lines of sight comparable to those for members of the general public.

28 C.F.R. pt. 36, App. A, 4.33.3. The Technical Assistance Manual explains that in order to provide a "comparable" line of sight for a person using a wheelchair in an assembly area, such as a sports stadium, where it can be reasonably predicted that spectators will stand to observe the events that are occurring, it is necessary to ensure a line of sight over standing spectators from wheelchair locations.

For your information, I am enclosing copies of the Department's regulations implementing titles II and III of the ADA and the Department's Technical Assistance Manuals. If Mr. Reemtsen has additional questions, he may contact the Department's ADA information line (800-514-0301 (voice) or 800-514-0383 (TDD)). Members of the Disability Rights Section staff are available to answer questions on the information line from 10:00 a.m. to 6:00 p.m., Eastern time, on Monday, Tuesday, Wednesday, and Friday. On Thursday, the information line is staffed from 1:00 p.m. to 6:00 p.m.

I hope that this information will assist you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

RE: American's for Disabilities Act Requirements as they Apply to the Dwyer Stadium Grandstand Construction Project in the City of Batavia

Dear Congressman Paxon:

The purpose of this letter is to request your assistance in clarifying certain ADA requirements as they apply to the City of Batavia's Dwyer Stadium grandstand project. Recently, Highland Associates, the City's design architect, told us that the Eastern Paralyzed Veteran's Association (EPVA, had informed the (Highland Associates) that there were new American's with Disabilities Act requirements with which Dwyer Stadium would have to comply.

Specifically, the new requirement according to EPVA applies to elevation for persons who are wheelchair bound.

Highland Associates has been attempting to determine if what EPVA has been telling them is in fact a new ADA requirement or if it is simply a non-mandatory standard that EPVA is advancing. The City's architect has provided us with some documentation describing the wheelchair seating elevation specifications, which I have enclosed with this letter.

Can you please tell us if this is in fact an ADA specification with which the City must comply or is this simply a non-mandatory standard which the Eastern Paralyzed Veteran's Association is attempting to have incorporated in the stadium?

We would appreciate your response at your earliest possible convenience, in as much as this is one of last issues that has to be resolved so that the City can go to bid in a timely manner and be able to meet the construction deadline. If you need any clarification on this request, please telephone me at (716) 343-8180. Thank you for your assistance.

Very truly yours,

William Reemtsen
City Manager

III-7.4300 Parking.

A.[Insert the following before the first sentence of this section, p. 60.]

If self-parking is provided for employees or guests of a public accommodation accessible parking spaces must be provided in compliance with ADA

B. [Insert the following text before the paragraph beginning "If valet parking...?" P.61]

Accessible parking spaces must be located on the shortest accessible route of travel to the facility's entrance. Accessible parking spaces and the required accessible route should be located where individuals with disabilities do not have to cross vehicular lanes or pass behind vehicles to have access to the entrance. If it is necessary to cross vehicle lane because for example, local fire engine access requirements prohibit parking immediately adjacent to a building, then a marked crossing should be used as part of the accessible route to the entrance.

III-7.5000 Building New construction.

III-7.5170 Telephones.

[Insert the following text to the paragraph 6 of this section, p. 63.]

Moreover, if any of the public pay telephones provided in these locations are coin-operated, then a TDD or text telephone that can be used with a coin-operated telephone must be provided. If all of the public pay telephones provided in these locations are card-operated only, then it is permissible to provide a TDD or text telephone that can be used only with card operated telephones.

III-7.5180 Assembly areas.

[Insert the following text before the sentence beginning "Finally, wheelchair seating..." p.64]

In addition to requiring companion seating and dispersion of wheelchair locations ADAAG requires that wheelchair locations provide people with disabilities lines of sight comparable to those for members of the general public. Thus in assembly areas where spectators can be expected to stand during the event or show being viewed, the wheelchair locations must provide lines of sight over spectators who stand. This can accomplished in many ways including placing wheelchair locations at the front of the seating sections, or by providing sufficient additional elevation for wheelchair locations placed at the rear of seating sections to allow those spectators to see over the spectators who stand in front of them.

The Honorable Rick Santorum
United States Senator
Suite 250 Landmarks Building
One Station Square
Pittsburgh, Pennsylvania 15219

Dear Senator Santorum:

This is in response to your inquiry on behalf of your constituent, Mr. William J. Spagnol, regarding closed captioning of local government meetings. Mr. Spagnol wishes to know the obligations of municipalities to provide closed captioning for the broadcast of local government meetings on public access television channels.

Section 35.160(a) of the Department of Justice's regulation implementing title II of the Americans with Disabilities Act of 1990 (ADA) requires that a public entity take appropriate steps to ensure that communications with members of the public with disabilities are as effective as communications with others. Section 35.160(b) requires the furnishing of appropriate auxiliary aids and services in order to afford individuals with

disabilities equal access to communications and requires that primary consideration shall be given to the requests of individuals with disabilities in determining what type of auxiliary aid or service is necessary. Auxiliary aids and services, as defined in section 35.104, may include open or closed captioning of video presentation.

Audio portions of television and videotape programming produced by public entities are subject to the requirement to provide effective communication for individuals with hearing impairments. Closed captioning of such programs is sufficient to meet this requirement. Please note, however, that the obligation to provide effective communication does not require a public entity to take any action that it can demonstrate would result in a fundamental alteration in the nature of its services, programs, or activities, or in undue financial and administrative burdens.

01-03909

I hope this information is helpful to you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

RE: Bethel Park - Closed Captioned Television

Dear Senator Santorum:

It is my understanding that inquiries have been made to the United States Department of Justice concerning the obligations of municipalities to provide closed-captioning for the broadcast of local government meetings on public access television channels. Any information that you could provide concerning this matter would greatly be appreciated.

On behalf of Bethel Park Municipal Council and Mayor Hoffman, thank you very much for your assistance.

Sincerely,

William Spagnol
Manager

SEP 14 1995

The Honorable Bob Wise
Member, U.S. House of Representatives
Elk Office Center
4710 Chimney Drive
Charleston, West Virginia 25302-4804

Dear congressman Wise:

This is in response to your inquiry on behalf of your constituent, XX ,concerning the accessibility

of polling places. XX complains that XX polling place, in the Cedar Grove School Building, is not accessible to persons using wheelchairs. We apologize for our delay in responding.

Title II of the Americans with Disabilities Act requires "program accessibility," rather than facility access, for existing buildings and facilities. A public entity must operate each program, service, or activity so that the service, program, or activity, when viewed in its entirety, is readily accessible to and usable by individuals with disabilities, but a public entity is not necessarily required to make each of its existing facilities accessible. 28 C.F.R. 35.150 (the Department of Justice's regulation implementing Title II, 28 C.F.R. pt. 35). Removal of architectural barriers is one method of providing access to programs and activities in existing facilities, but other methods are also permitted if they provide program access. West Virginia is required to make its voting activities accessible through whatever effective means it deems appropriate. Thus, XX polling place need not necessarily be accessible if other means are provided for voters with disabilities to cast their ballots on the day of the election (curbside voting procedures, for example).

The Voting Accessibility for the Elderly and Handicapped Act (Voting Access Act) requires that all polling places for Federal elections be accessible. The Voting Access Act does not apply, however, to a polling place if the chief election officer of the State determines that no accessible place is available and it is

cc: Records; Chrono; Wodatch; Milton; McDowney; FOIA
udd\milton\congress\voting.wis

01-03912

not possible to make one temporarily accessible and that any voter in need of an accessible polling place, upon advance request, will be assigned to an accessible polling place or will be provided with an alternative means for casting a ballot on the day of the election.

Curbside or other alternative voting procedures are a permissible alternative to accessible voting places, however, only if they are an effective method of providing access to the program or activity. Thus, if the Commission failed to follow its procedures for curbside voting, or otherwise denied an individual with a disability the opportunity to vote, it would be in violation of title II and the Voting Access Act.

I hope this information is helpful to you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

01-03913

Nov 29, 1995

The Honorable Barbara Cubin

U.S. House of Representatives
Washington, D.C. 20515-5001

Dear Congresswoman Cubin:

This is in response to your letter on behalf of your constituent, Ms. Ann Snow, regarding the application of the Americans with Disabilities Act (ADA) to an alteration of the Weston County Memorial nursing home. Please excuse our delay in responding.

We assume that the Weston County Memorial nursing home is a State or local government entity. Title II of the ADA prohibits discrimination on the basis of disability by such entities. The Department of Justice's regulation implementing title II requires that when a covered entity alters a facility, the altered area must, to the maximum extent feasible, be made accessible to individuals with disabilities. 28 C.F.R. S 35.151(b). The regulation allows covered entities to apply either the ADA Standards for Accessible Design (Standards), 28 C.F.R. pt. 36, Appendix A, or the Uniform Federal Accessibility Standards (UFAS), 41 C.F.R. pt. 101-19.6, Appendix A, as the accessibility standard for the altered area. 28 C.F.R. S 35.151(c).

Title II does not require that the altered facility be completely retrofitted to satisfy the applicable accessibility standard. Instead, only the altered area generally needs to be made accessible. ADA Standards S 4.1.6; UFAS S 4.1.6. The addition of eight bedrooms to the nursing home described by Ms. Snow would, therefore, require only those added bedrooms, with their associated toilet and bathing facilities, to be fully accessible. It would not require unaltered portions of the building to be made accessible.

The ADA Standards differ somewhat from the UFAS regarding what portion of the altered rooms must be made accessible. Under the ADA Standards, if the altered rooms constitute an entire

wing, department, or unit, only a percentage of the altered rooms must be accessible. ADA Standards S 6.1(4)(a). The percentage to be applied is the same percentage applicable to newly constructed facilities; in this case 50%. ADA Standards S 6.1(3). If the rooms are being altered individually, the ADA Standards require them all to be made accessible. ADA Standards S 6.1(4)(b). In both cases the ADA Standards would require an accessible path of travel from the entrance to the altered rooms. ADA Standards S 4.1.6(2).

The UFAS requires all the altered rooms to be made accessible. UFAS S 4.1.6(1)(a). The UFAS would only require an accessible entrance and accessible route to the altered area if the alteration were "substantial" (costing over 50% of the value of the building). UFAS S 4.1.6(3).

I hope this information is helpful to you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

Elaine McCauley
District Representative to
Congresswoman Barbara Cubin
2015 federal Building
Cheyenne, WY 82001

Dear Ms. McCauley:

It was a pleasure to meet you following the Medicare meeting in Newcastle last week. At that time I briefly mentioned our concerns over compliance with the ADA and with meeting state regulations at the nursing home. I would like to provide you with more detailed information and request Mrs. Cubin's assistance in containing costs for this project.

State regulations require an upgrade to the ventilation system at the nursing home. A needs assessment survey resulted in the decision to add another eight beds to the nursing home while remodeling for the ventilation upgrade. The total project cost including interest was estimated to be just under $3,000,000. In March, an election was held for a 1% capital facilities sales tax (that included several other community projects) that, with a 60% voter turnout, was defeated by 90 votes. We are working with the Wyoming Office of Health Quality on the state regulations in an effort to reduce costs where possible before bringing it before the voters again.

One concern I have over the cost of this project is the ADA space requirements Which necessitate the demolition of a portion of the nursing home (22 beds) in order to achieve a net gain of eight beds. The Uniform Federal Accessibility Standards in Appendix IV, section 4.1.4 (b) state that ADA space requirements for Long Term Care Facilities apply to "At least 50% of patient toilets and bedrooms; all public use, common use of areas which may result in employment of physically handicapped persons". The costs of demolition and reconstruction of existing rooms adds greatly to the total project cost.

Weston Manor has been owned and operated by the county since 1975. For twenty years we have provided quality care for the residents. We could continue to provide the same quality care in this section of the nursing home without the expense of extensive ADA remodeling. Ten beds were added in a 1990 project and this addition met ADA requirements. If the ADA space requirements were applied only to new construction and not 50% of the entire facility, we could meet the state ventilation requirements and add eight beds at a much more reasonable cost.

We currently have 51 beds with an average occupancy rate of 95-98%. The demolition and reconstruction would result in the need to relocate the twenty two residents. Since we could not
accommodate the total number (in hospital swing beds) at one time, the project would need to be completed in phases which would also add to additional construction costs.

Any assistance or advice you can give us in reducing construction costs in relation to ADA compliance would be appreciated. If you need additional information, please contact me.

Sincerely,

Ann Snow
Administrator

Nov 29, 1995

The Honorable Frank S. Turner
Maryland House of Delegates
6284 Light Point Place
Columbia, Maryland 21045

Dear Mr. Turner:

This letter is in response to your inquiry to Robert Silverstein, Minority Staff Director for the United States Senate, Committee on Labor and Human Resources, Subcommittee of Disability Policy. Mr. Silverstein forwarded to this office your letter regarding questions raised by the Howard County Family Care Association concerning the Federal and State role in protecting children living with AIDS or HIV and also protecting non-disabled children. Please excuse our delay in responding.

As you note, many child care and early education providers are concerned about the possible risk of HIV transmission in child care settings, such as when children collide while playing. Specifically, you first ask whether the ADA provides legal protection to caretakers who enroll children living with AIDS or HIV in their programs, if another child becomes infected due to routine contact with a child with AIDS or HIV. Secondly, you ask what States can do to protect children from obtaining HIV while in school.

The Centers for Disease Control and Prevention (CDC) reports that while some people fear that HIV might be transmitted through casual contact, scientific evidence proves otherwise. For your reference, we have enclosed a copy of the CDC's "Facts About The Human Immunodeficiency Virus and Its Transmission," published in May 1994. As reported in this article, HIV can be spread through

sexual contact with an infected person, by sharing needles and/or syringes with someone who is infected, or, less commonly, through transfusions of infected blood or blood clotting factors. Babies born to HIV-infected women may become infected before of during

cc: Records; Chrono; Wodatch; McDowney; Mobley; FOIA.
\udd\mobley\congress\turner

01-04085

birth, or through breast-feeding after birth. There is a single incidence in which HIV was transmitted from a dentist infected by HIV to his patients. There are no other reported instances in which HIV has been spread in commercial settings. In fact, only in very rare instances has HIV been transmitted between family members in a household setting. These transmissions are believed to have resulted from contact between skin or mucous membranes and infected blood. There are no reported cases in which a child has acquired HIV or AIDS through exposure to the disease at a child care facility or school.

In all settings, including child care facilities and educational institutions, the CDC recommends that certain universal precautions should be taken to prevent exposure to the blood of persons who are living with HIV or whose infection and risk status are unknown. These precautions may also be effective in preventing transmission of other diseases, such as hepatitis. For example, gloves should be worn during contact with blood or other bodily fluids that could possibly contain blood, such as urine, feces, or vomit. Cuts, sores, or breaks on both the caregiver's and children's exposed skin should be covered with bandages. Hands and other parts of the body should be washed immediately after contact with blood or other body fluids, and surfaces soiled with blood should be disinfected appropriately. Practices that increase the likelihood of blood contact, such as sharing toothbrushes, should be avoided. To the extent that needles and other sharp instruments are used for medical procedures, they should be used according to the manufacturer's instructions and disposed of in puncture-proof containers that are kept out of the reach of children and visitors.

The Americans with Disabilities Act of 1990 (ADA) prohibits State and local governments, as well as the owners and operators of child care facilities and other places of public accommodation, from imposing eligibility criteria that screen out or tend to screen out persons with disabilities, unless necessary to prevent a direct threat to the health or safety of others. A direct threat is a significant risk to others that cannot be eliminated or reduced to an acceptable level by reasonable modifications to the public accommodation's policies, practices, or procedures or by the provision of appropriate auxiliary aids or services. The determination that someone poses a direct threat should be based on the best available objective evidence rather than generalizations or stereotypes. Based on the CDC's findings as articulated above, private and public child care and educational institutions cannot exclude from their programs children who are living with HIV or AIDS, because abundant scientific evidence suggests that there is almost no risk that the disease will be transmitted through the types of contact that occur in these settings.
01-04086

For more information regarding AIDS or HIV, you may call the CDC National AIDS Hotline, 1-800-342-2437, 1-800-344-7432 (Spanish), or 1-800-243-7889 (TDD). You may also wish to contact the CDC National AIDS Clearinghouse, P.O. Box 6003, Rockville, Maryland 20849-6003. The Clearinghouse can provide you with technical assistance materials such as "The AIDS Prevention Guide: The Facts About HIV Infection and AIDS," or "Facts About Adolescents and HIV/AIDS," or posters such as "You Won't Get AIDS from Hide 'N Seek," or "You Won't Get AIDS From A Public Pool." Each of these costs 10 cents per copy or is free.

I hope this information will be helpful to you in responding to the Howard County Family Child Care Association and other constituents.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

113 Hart Senate Office Building
Washington, D.C. 20510

Dear Mr. Silverstein:

The Howard County Family Child Care Association requested that I contact you concerning the Federal and State role in protecting children with aids or who have tested HIV positive. In addition, these providers are also concerned with protecting children who do not have aids related

Since aids is protected by the Disabilities Act, many providers are concerned about the possible risk of blood exchange if two children collide while playing. What legal protection would a provider and the children have under the Disabilities Act and second, what can a state like Maryland do to protect its children from a related incident in school?

Thank you very much for your help in addressing these concerns. I look forward to your reply.

Very truly yours,

Frank S. Turner

DEC 4, 1995

XX

Dear XX :

I am responding to your letter to President Clinton regarding section 35 of the general business law of the State of New York, as amended in 1991. Please excuse the delay in responding.

As we understand it, section 35 permits cities with a population in excess of one million people to apply laws governing street vendors to disabled veterans on the same basis as those laws apply to others. You complain that section 35 has taken away the jobs of disabled veterans in New York City.

The Disability Rights Section of the Civil Rights Division is responsible, among other things, for the implementation of

title II of the Americans with Disabilities Act (ADA), which prohibits discrimination on the basis of disability by public entities, including State and local governments. Under title II, public entities are required to ensure that people with disabilities have the opportunity to participate in, or benefit from, the programs, services, and activities that the public entity provides. Title II does not require a public entity to establish programs that provide benefits for people with disabilities that are not available to others. Because section 35 of the general business law of the State of New York subjects persons with disabilities to the same requirements applied to others, it does not appear to violate the ADA. Therefore, the Department of Justice is unable to assist you in this matter.

Sincerely,

John L. Wodatch
Chief
Disability Rights Section

01-04089
August 26, 1995
The Honorable William Clinton
President of the United States
1600 Pennsylvania Avenue
Washington, DC 20500

Dear President Clinton:
The disabled veterans of New York City have been betrayed! We have been betrayed by the Legislature of New York State, the governor, the City of New York and it's mayor for the recent passage of a permanent law that allows and encourages the discrimination of the state's disabled veterans who had chosen to earn their livelihoods as vendors. Please note that it was the effort of street vendors in the 19th and early 20th centuries who founded such retail giants as Macy's. Gimbels and Fortunoff among others. Of course, these were American white and European

immigrants who had the opportunity to succeed as street vendors.

Back in 1894 the New York State Legislature passed a law allowing disabled veterans to peddle their merchandise throughout the state without restriction. In 1991, the rich and powerful Fifth Avenue Association led by it's President, Tom Cusick, bought the support of the legislature through the deep pockets of the organization and via many lies, distortions and half-truths (concerning we disabled veteran vendors) and had a law passed which severely restricted the opportunity to make a living of the disabled veterans of New York City. This bill had a four year sunset provision. On July 1, the bill was made permanent.

Prior to the passage of the law in 1991, more than forty disabled veterans had been able to work themselves from a state of homelessness thanks to the opportunity provided by that law. With the passage they were suddenly thrust back into that tragic state of homelessness. Still others were forced onto the welfare roles because they were no longer able to earn enough in the streets to provide for themselves and their families. At least five others are now dead as a result of the legislation. One committed suicide because he was no longer able to provide for his family.

The jobs promised by the Fifth Avenue Association of Doormen, Stock Clerks and Security Guards paid no more than poverty-level wages of twice minimum wage. After taxes, these men could not afford to care for their families or offer their children any hope for the future. As a result of this legislation, many families were torn apart! Further, those few vets who chose to accept the positions offered by the Fifth Avenue Association members were dismissed from those jobs within a few weeks of their hiring. It is an acknowledged fact that many Vietnam vets were so emotionally scarred from the war in Vietnam that they are very limited in their ability to do much more than survive. So, peddling was just about all many of them could do and do well.
01-04090
Thus, several of the few who took the jobs with Fifth Avenue Association members, were just incapable of handling the traditional job. For others, there are indications that the working conditions were so poor that they were literally driven from the job. I suspect that Fifth Avenue Association members were told to hire these vets for a few weeks, then terminate them.
In my case, I was promised a Manager In Training position with XX in September 1992. That 12 week training was to lead to either a Manager position in a small XX or an Assistant Manager position in a XX . In nearly three years, I have yet to receive that training. In spite of the

years of managerial experience I have as an Officer in the Air Force, a MBA degree and years of experience as a manager following my graduate study, XX has failed to make good on its agreement with me. I, on the other hand have gone above and beyond the agreement for XX . I have developed and created several programs including two successful seminar series for my store which have significantly increased sales, store traffic and the store's stature in the community. Yet, over the past year and a half, numerous persons have been accepted into the Manager In Training program and have received a portion of their training in our store. Further, several members of the staff from my store have been selected to receive the management training. I continue to be passed over. I think there is a blatant breach of contract in this case. From the very beginning, it was clear that there was no intent to fulfill the agreement. In fact, the intent seemed to be to get rid of me as quickly as possible. It didn't happen (for I needed the job so badly) and I have contributed more to that store than anyone including the manager.

The legislation that has wreaked such havoc and damage on our lives is extremely discriminatory. It discriminates against the disabled veterans in New York City (the law applies only to those cities with populations with one million or more); it discriminates against those who were disabled in service to this nation. It is also racially discriminatory in that 50% of the veterans affected are Black and another 25% are Latino. Of course, most of the minority veterans in New York State live in New York City. So, it seems that we were singled out! The Fifth Avenue Association wanted to get us off as many New York City streets as possible. With its money, power and political influence, it was successful.

In the four years prior to permanent passage of the bill, neither New York State nor New York City has done anything to ease the transition from street vendor to other occupations for us. In fact, I have sought employment at both levels of government and the private sector with no success. In the four year period, I have applied for well over three hundred jobs, with no success. At this point, I am sure that age has been a major factor and for me now, health is an issue.

01-04091

The effects of the legislation and XX failure to live up to it's agreement with me have been devastating. Not only have I struggled to survive financially - after having earned a very decent living as a vendor - but it has adversely affected my health. XX

XX . It was all a result of the stress, tension and emotional anger caused by the mean-spirited, callous and bigoted actions of the Fifth Avenue Association, New York State and New York City.

It has been extremely painful as well as angering, devastating and disappointing that I served my nation in time of war, was injured and I am now deprived me of the opportunity to live my dreams.

As I look back on my life as an American in this nation, I regret my having served in this nation's military. When I was twenty-two, I was accepted to study French at the University of Caen, in Caen, France. I had saved my money for tuition and expenses for a year there and had purchased my travel ticket on the Sitmar Lines. Three weeks prior to my departure date, my draft board denied me permission to leave the country. Had I known then or had a premonition that this nation would treat me (and other disabled veterans) with such disdain and disregard and thus deprive us of opportunities that it affords people from throughout the world, I would have defied the draft board and proceeded to France or gone to Canada or Sweden or some other country. Mr. President, I am ashamed of having served this nation. I recall very vividly my strong opposition to the Vietnam War and my many letters expressing that opposition to my Congressman, William Clay while I was in combat training and in Vietnam.

In our desperate attempts to fight our unbeatable foe, the Fifth Avenue Association, we have sent letters to several members of your cabinet hoping to find some guidance, some compassion, some concern and assistance. Unfortunately, we have found none. Several of us wrote letters to Mr. Jessie Brown seeking his assistance and guidance. There was never a response. We wrote to Attorney General Reno because of possible legal violations in this legislation. Again, nothing. With the lack of response and apparent lack of concern about our plight, we realize that it doesn't pay to be poor and a minority in this nation and that there is no dignity in being a veteran and having fought for this nation. Especially, when we come up against the desires of the wealthy and powerful such as the members of the Fifth Avenue Association.

With the recent passage of Congressional legislation and Supreme Court decisions which have set civil rights efforts back by at least thirty years, we minority members of the nation who served in Vietnam are now at an age in our lives where there is little hope for the future. We have not asked for governmental handouts nor do we want them. All we want is the opportunity/right restored to earn a decent living, to lead respectable lives and

to have reasonably secure and comfortable retirements.

Mr. Clinton, I hope this letter doesn't fall on deaf ears. I only

have a few years left in this world and I would like to be in a position to enjoy what remains of them. That of course includes having an opportunity to retire with security. I certainly do not wish to have to work for the remainder of my life, but to close it out peacefully, quietly and without the anxiety of struggling to work in order to survive. Thus, I appeal to you for your help in getting the Justice Department involved in the investigation of the discriminatory law in New York State. I also encourage you to have the Department of Veterans Affairs do what is necessary to protect this nation's veterans from the predatory efforts of the rich and powerful business organizations that would drive out small businesses (as we were as street vendors) in what may very well be monopolistic efforts.

One final note Mr. President: I have been concerned about the sorry state of parenting in this nation. As a result of this concern, I have developed a business plan (I do want my own business) for the development of a business which specializes in taking parenting seminars to the business place. In addition, I have written the script for a parenting video designed primarily for Black parents with a more all-inclusive one to follow. While the project has been acclaimed for its potential value to helping teach good parenting techniques, through the use of real life scenes, I lack the capital to get the project off the ground. In fact, one of the effects of the legislation was to cost me all of my savings (part of which was to use to help capitalize my business idea) including my retirement. So, I am frantically trying to raise money for this project. Because I have no money, I am having great difficulty raising the necessary capital. I so believe in the value of this idea that I am compelled to continue my efforts to bring the idea to fruition.

I am accompanying several documents with this letter including a copy of my resume and the contract with XX . I do hope you will be able to give my requests some consideration and assist me in gaining justice in a very unjust situation.

I wish you the very best for the remainder of this term in office and also in your campaign for a second term. I have always been impressed with your compassion for all people and your commitment to doing what is just and right.

Sincerely,

XX

DEC 18, 1995

XX
North Royalton, Ohio 44133

Dear XX

On April 20, 1995, we received your complaint of discrimination against the City of North Royalton, Ohio. In your complaint, you alleged that various North Royalton city officials have discriminated against you on the basis of disability by failing to expedite or otherwise establish or amend policies and procedures that would result in the installation of a city (Cleveland) water main along Cady Road.

Under the Americans with Disabilities Act (ADA), this Department is authorized to investigate alleged violations of title II, which prohibits discrimination on the basis of disability by public entities. Pursuant to our title II authority, we opened your complaint (DOJ XX) after determining it was complete and timely filed.

Staff from the Disability Rights Section, Civil Rights Division, has now thoroughly reviewed your allegations. Based on that review, we are administratively closing your complaint with this office because your allegations are not sufficient to state a claim that the ADA has been violated. Under title II, a public entity may not deny services to individuals on the basis of disability, if it makes those services available to other citizens. Generally, however, it is not required to provide special programs, services, or privileges for individuals with disabilities if it does not provide them for individuals without disabilities. With respect to your allegations, the response by North Royalton officials to your requests to expedite the installation of city water along Cady Road does not violate the ADA because both persons with disabilities and persons without disabilities are subjected to the same requirements. While we understand your concerns about water quality and the benefits of obtaining city water in your residential area, the nature of North Royalton's response to your initiatives is insufficient to constitute discrimination under the law.

The Department of Justice will take no further action in this matter and has administratively closed your complaint as of the date of this letter. You have the right to file a private lawsuit in the appropriate United States District Court under title II, and do not need any approval letter from the Department of Justice before proceeding. Generally, title II has provisions for the prevailing party to recover attorney fees and court costs.

You also may seek to resolve your complaint by continuing to consult with the State or local authorities involved, disability rights organizations, or organizations that provide alternative dispute resolution services (such as mediation or negotiation). We have enclosed a list of organizations serving your area. These groups may be able to identify resources available to provide you with assistance. The local or State bar association also may be able to give the names of private attorneys or mediation services. The mediation process and information on securing a local mediator are summarized in the enclosed brochure "Want to Resolve Your ADA Complaint? Consider Mediation."

To assist members of the public to understand their rights and responsibilities under the ADA, the Department of Justice operates an ADA information line (800-514-0301 (voice) or 800-514-0383 (TDD)). Members of the Disability Rights Section staff are available to answer questions on the information line on Monday, Tuesday, Wednesday, and Friday from 10:00 a.m. to 6:00 p.m., Eastern time. On Thursday, the information line is staffed from 1:00 p.m. to 6:00 p.m.

I hope this information is helpful to you.

Sincerely,

John L. Wodatch
Chief
Disability Rights Section

The Honorable Mike DeWine
United States Senator
200 North High Street, Room 405
Columbus, Ohio 43215

Dear Senator DeWine:

I am responding to your request concerning the complaint filed with the Department of Justice by your constituent, XX . She alleged that North Royalton city officials discriminated against her on the basis of disability in their responses to her requests for installation of a city water main in her residential area. Please excuse the delay in responding.

Enclosed is a copy of our recent letter to XX following review of her complaint pursuant to our authority under title II of the Americans with Disabilities Act. It explains our determinations regarding this matter.

We hope this information will assist you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

Senator Mike DeWine
200 N. High Street, Room 405
Columbus, Ohio 43215

Dear Senator DeWine:

I am writing to request that you make an urgent inquiry to the Department of Justice in Washington concerning a complaint I filed against the city of N. Royalton for discrimination and failure to modify policy and procedure under Title II A.D.A. Law. I have had to live without water in my home for almost a year because of methane gas in the well water which causes life threatening problems because of my disability.

I will be pleased to furnish your staff with any additional information and I am sure my physician would be willing to do the same.

Thank you for your kind assistance.

Sincerely,

XX

October 13, 1995

To:

George V. Voinovich, Governor, State of Ohio
Peter Somani, M.D., Director Ohio Department of Health
Donald R. Schregardus, Director, Ohio EPA
Timothy Horrigan, Health Commissioner, Cuyahoga County Board of Health

From: XX

Citizen, State of Ohio, City of N. Royalton in Cuyahoga County

As you all know, I have been involved in a very difficult situation because there are explosive levels of methane gas in my well water (it ignites with a match and causes me to black out). I received absolutely no help from any of the above agencies toward the resolution of this problem (regardless of what you may hear or what has been put in the paperwork). The only resolution to this problem is to replace my well water with a city water line (which is four or five houses away from me and within 1200 ft.) and all of the above agencies deny any responsibility and fail to cite the city of N. Royalton for health and safety hazards.

I filed with the Environmental Board of Review who is now investigating and hopefully they can let me know who is in charge and who does have the authority.
In the meantime, I can only say that I am shocked by the amount of time and money being spent by all of the above agencies to fight me in their attempts to dismiss my "case" with the EBR. IF JUST A FRACTION OF THE TIME AND TAXPAYER MONEY (for attorneys, briefs, pleadings, hearings, etc.) BEING SPENT TO FIGHT ME WAS USED INSTEAD TO ASSIST ME, THE PROBLEM OF NOT HAVING A WATER LINE IN FRONT OF MY HOME WOULD BE RESOLVED BY NOW.

I would like to ask all of you what you would like to have done if you were to find yourself in this appalling situation? And then I would like to ask you - will you do just that for me? In addition, I am legally disabled with MCS - Multiple Chemical Sensitivity) and exposures to methane gas place me in a life threating position.

There is no sense in spending any more tax dollars and ignoring the fact that all Ohio citizens should be covered under the Safe Drinking Water Act and that disabled persons have special needs. Will you all please give me your help and support? The City of N. Royalton will not provide its citizens with water lines (even though we are willing to be assessed for it). Someone must mandate the city of N. Royalton to furnish us the water lines. The city's own rules say they will accept a mandate from the EPA or the Board of Health to furnish us with one and I am at a loss as to understand why they are not being mandated to do so? Anyone can call the local poison control center and learn of the many health effects caused by exposure to methane gas, including

cyanosis!

DEC 11 1995

The Honorable Bill Emerson
Member, U.S. House of Representatives
The Federal Building
339 Broadway
Cape Girardeau, Missouri 63701

Dear Congressman Emerson:

I am responding to your letter on behalf of your constituent, Sheriff Bill Ferrell, who is concerned about accessibility requirements for persons with disabilities. Please excuse our delay in responding.

Sheriff Ferrell is concerned that retrofitting the Scott County administrative offices and jail in order to make them accessible would constitute an undue financial burden on the County. Title II of the Americans with Disabilities Act (ADA) prohibits discrimination on the basis of disability in State and local government services. Sections 35.149 and 35.150 of the Department's title II regulation (enclosed) require accessibility to programs, services, and activities in facilities existing on the effective date of the statute, January 26, 1992. The principal focus of the program accessibility standard is access to programs, services, and activities, as opposed to access to physical structures. Therefore, not every area of an existing county jail or administrative office building would have to be made accessible, as long as there is access to the buildings' programs, services, and activities.

For existing facilities, every building does not necessarily have to be made accessible if all of the programs located inside that building can be made accessible by alternative means. Section 35.150(b)(1) of the title II regulation does not require that a local government eliminate structural barriers to all its facilities if it provides access to its programs through alternative methods such as redesign of equipment, reassignment of services to accessible buildings, assignment of aides to beneficiaries, delivery of services at alternate accessible sites, alteration of existing facilities and construction of new facilities, or any other methods that result in making the services, programs, or activities readily accessible to and usable by individuals with disabilities.

cc: Records, Chrono, Wodatch, McDowney, Milton, FOIA
n:\udd\milton\congress\existfac.eme\sc. young-parran

01-04099

If structural alterations are necessary to provide program accessibility, such alterations must be undertaken unless the public entity can demonstrate that the alterations would cause a fundamental change to its program or that the cost of the alterations would result in undue financial and administrative burdens. 28 C.F.R. S 35.150(a)(3). The decision that any proposed alterations would result in a fundamental change or in undue financial and administrative burdens must be made by the head of the public entity or his or her designee after considering all the resources available for use in the funding and operation of the service, program, or activity. Where an action would result in such a fundamental change or undue burdens, the public entity must take any other action that would not result in such change or such burdens but would nevertheless ensure that individuals with disabilities receive the benefits or services provided by the entity.

I hope this information assists you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

DEC 11 1995

XX
Apopka, Florida XX

Dear XX

I have been asked to respond to your recent letter to Attorney General Janet Reno with respect to the current practice of CD-ROM manufacturers to produce programs that provide information to the user through speech and sound rather than text. You have asked the Attorney General to intercede with the manufacturers of these products to ensure that these products are made accessible to people with hearing impairments.

Your letter was referred to me because the Disability Rights Section of the Civil Rights Division is responsible for implementing the Attorney General's authority to enforce titles II and III of the Americans with Disabilities Act (ADA), which prohibit discrimination on the basis of disability by State and local governments and public accommodations and commercial facilities. We also enforce title I of the ADA in cases that allege disability-based employment discrimination by public entities. These ADA enforcement responsibilities are assigned to the Attorney General as the nation's chief law enforcement officer and head of the Department of Justice.

In enforcing the ADA, this Department represents the law enforcement interest of the United States. The Department is not authorized to act as an attorney for, or representative of, any individual. After carefully reviewing your letter, we have determined that no action by the Department is appropriate because you have not alleged a violation of the ADA or any other Federal statute that is enforced by this Department.

However, the World Institute on Disability is working on a project regarding accessibilty of multimedia technology. For more information on their efforts, you may contact Betsy Baya at (510) 01-04101

251-4355. Additional resouces on this subject are also available from the National Center for Accessible Media at 125 Western Avenue, Boston, Massachusetts 02134, (617) 492-9258 (Voice or TDD).

I regret that we cannot assist you in this matter.

Sincerely,

John L. Wodatch

Tuesday, September 26, 1995

Ms. Janet Reno
Attorney General
The United States of America
The US Justice Department
1600 Pennsylvania Ave.
Washington, DC

To: Ms. Reno Attorney General

I would like to tell you about something which is sweeping across this nation at alarming rate: the hearing impaired do not seem to qualify for rights nor even simple courtesy. Do not get me wrong, I'm no longer claiming prejudice, because "prejudice implies a deliberate bias" as CD-ROM Today editor, Chris Lombardi pointed out to me. It's people not thinking before they act that cuts out millions of Americans each year. People do not think, and this is poor marketing on their part.

My complaint is with manufactures of CD-ROMs (Compact Disk - Read Only Memory). CDs make loading and playing of large programs much easier. But the trend is to have speech and/or sound required and ignore displaying text to explain the sound so that the hearing impaired may use the CD.

Programs like Sierra On-line's King's Quest VII: The Princess Bride or the company's upcoming Phantasmagoria and Virgin Electronics' The 7th Guest, 11th Hour, and Kyrondia, are all found on CD-ROMs but they have no text for the hearing impaired to play. I find it particularly unfortunate that Sierra On-Line dropped the text options from their games - (an explanation of the option follows later on in my letter). Virgin never had the option.

The Americans with Disabilities Act (ADA) changed much of what is perceived today as being "politically correct" but people such as myself are still working on improving what people perceive. I feel comfortable speaking from a deaf man's prospective. My hearing loss is profound; 100%.

I've had some amusing experiences where in my hearing-ear dog has been presumed to be a seeing-eye dog, but the problem I wish to address in this letter is that makers of CD-ROMs don't seem to understand there's more to the enjoyment of their product than seeing pretty pictures and hearing music and talk. In my case and that of many potential users, we also need to read what's going on.

01-04106

On the verge of the 21st Century I notice something which, if not addressed soon, will leave millions of hearing impaired children behind their peers because they don't have equal access to a new form of informational media.

Allow me to explain my reasoning. It is a fact that trends begin in the computer gaming industry. Sound cards were originally meant to enhance the enjoyment of games. Today it is difficult to buy a computer without a sound card, or find a commercial program that doesn't use one. Today, Microsoft Office and 20th Century Video Almanac not to mention numerous encyclopedias, (Compton's New World, Microsoft Encarta, Groiler's etc.) and "edutainment" programs (Mathblaster, Reading Rabbit, etc.) use sound extensively. Extensive use of sound is now linked with the enhanced graphics found in more and more software.

And what about text on CD-ROM's? Most people have seen it. In the infancy of CD- ROM programs, companies used "balloons" to show what was being said, like what we see in the comics. Later Sierra On-Line developed this as an option: that text may be turned on or, if preferred, off and sound only may be enjoyed by the user. Naturally, though the hearing impaired user will keep the text on for full enjoyment. So, when you think about it, text begins to "sound" more important than previously thought.

There are rumors circulating that Microsoft Word will include, in its next version for CD-ROM users, the capability to have "help" speak out loud. Will this program retain the option of Cue Cards popping up to provide the text of the advice for the hearing impaired? How about future editions of encyclopedias?

Will Dr. Martin Luther King, Jr.'s "I Have a Dream" speech only be read to them and not written out? If so, a significant number of hearing impaired children will have to go to an antiquated paper book for information. There are children today who use CD-ROM-based products to practice their spelling, language- learning skills, math and other subjects. But deaf children cannot participate due to the lack of text. In the future, will text be added?

Perhaps the manufacturers of educational and entertainment oriented CD-ROMs don't realize that text for an entire program will take up less space than the music in the closing credits. The scripts for these programs were written down at one point. It would be a simple matter to merge the two programs.

I've discovered through personal experience that many CD-ROM programs are useless to the hearing impaired because important audible parts of them are not also available in text. I've spent over $600 and have had trouble returning the programs when I realized that they lacked text. I've had to stop buying such programs unless I am 100% certain that text is available on them, and unfortunately this is something that usually isn't clearly indicated.

Computers are priceless to anyone who wishes to enter the society of the future. Our schools, hospitals, banks, industry and others are using them to increase productivity and encourage creativity. The hearing impaired want to be part of that revolution.

The ADA mandates that the concerns of the hearing impaired be taken into

account in every-day services. It seems to me that manufacturers of CD-ROMs don't realize how

01-04107

important their products are becoming. I would like to help them understand this, but I'm not sure how to go about this. All I ask is that your organization talk to these companies.

I would like to resolve this as quickly as possible and avoid bad publicity for these companies. Unfortunately, they have not replied to my comments and I suspect though that if they "hear" from you, they will be inclined to take the concerns of the hearing impaired more seriously. After all, it's a matter of dollars and good sense.

Sincerely,
XX

01-04108

DEC 11 1995

The Honorable Olympia J. Snowe
United States Senator
3 Canal Plaza, Suite 601
P.O. Box 188
Portland, Maine 04112

Dear Senator Snowe:

This is in response to your inquiry on behalf of your constituent, XX , concerning the enforcement of Federal disability rights laws in her area. XX is concerned that Federal laws are being ignored and that some businesses are choosing to comply with State laws instead.

Please note, initially, that local law enforcement and building code officials do not have authority to enforce Federal disability rights laws such as the Americans with Disabilities Act (ADA) or the Rehabilitation Act of 1973. When both a State law and a Federal disability rights law apply to a certain facility, both laws must be followed, and thus the more stringent provisions of the two laws must be met. If State law provisions differ from the ADA requirements in a way that results in less accessibility, then an entity subject to the construction requirements of the ADA is required to comply with the Federal standard. To the extent that the Federal standard is irreconcilable with the State standard, a covered entity must comply with the Federal standard.

As the article enclosed with XX letter notes, the Department of Justice is attempting to address the potential problem of overlapping State and Federal law through the ADA certification process. Under this program, State and local governments may submit their building codes to the Department for certification that the codes' requirements meet or exceed the requirements of the ADA. If such certification is granted for a State or local code, an entity whose building is built in compliance with the certified code will be able to rely on the certified code as "rebuttable evidence" of compliance with the ADA. Thus, such certification, although not a guarantee against findings of noncompliance, would allow builders to rely on their State or local codes and on the local systems of preliminary

investigation, approval, and enforcement, rather than having to

cc: Records, Chrono, Wodatch, McDowney, Milton, FOIA
n:\udd\milton\congress\tosue.sno\sc. young-parran
01-04109

do independent reviews of both the local and Federal laws. The State of Maine has applied for such certification and its submission is under review by the Department.

In the event that a covered entity undertakes construction that violates the Federal disability rights laws, XX has several enforcement options. First, she may file a complaint with this office by sending her allegations in writing to the Disability Rights Section, Civil Rights Division, U.S. Department of Justice, P.O. Box 66738, Washington, D.C. 20035-6738. As an alternative to investigation by a Federal agency, XX may file a lawsuit in the appropriate Federal district court. She would not need any approval letter from the Department of Justice before proceeding. XX also may seek to resolve her complaints through alternative dispute resolution. The enclosed brochure describes such processes.

I hope this information is helpful to you in responding to your constituent.

Sincerely,
Deval L. Patrick
Assistant Attorney General
Civil Rights Division

Enclosure
01-04110

To: Honorable Senate Snowe
From: XX
Re:Handicap Accessability
Dear Senator Snowe,

I live in XX
accident that left me a Quadriplegic. I am having problems with towns and businesses making sidewalks and ramps accessible so people with disabilities can get around better. The laws are there but there is no one to enforce them. State laws and the federal laws are so different that some businesses are going by state laws and are not following federal laws.

There is a Restaurant in XX that did a lot of remodeling and was told by the code enforcement office and the Fire Marshall's office that she didn't meet Federal Laws. She told them she chose to go by the State Laws only. I contacted an Attorney and he has been talking with her and she still say she didn't break any Federal Laws. She put in a new door and steps but no ramp.

The town of XX wouldn't make their town accessible until I called the Maine Civil Liberties Union. They said I had a case against XX . They got an Attorney for me and XX decided to do the work instead of going to court. I have been working with the City of XX and they are trying to get all their sidewalk done. Some people with disables give up and won't fight for their rights. The laws are there and we shouldn't have to fight to get something done. There needs to be someone to enforce the laws. There is a Fire Inspector and Plumming Inspector but no one to force the handicapped laws. I talked to Brian Trask about it and he agrees with me. He said he can tell people what has to be done but he can't go and make them do it. I don't know if you can help but maybe you know someone who can. I'm sending you a copy of Opening More Doors. I circled enforcement changes so you can check into it.

Thank You,
XX

01-04111

DEC 13 1995

The Honorable Trent Lott
United States Senate
487 Russell Senate Office Building
Washington, D.C. 20510-2403

Dear Senator Lott:

I am responding to your letter on behalf of your constituent, Mr. Thomas Matthews, regarding requirements under the Americans with Disabilities Act (ADA).

According to Mr. Matthews' letter, he is an attorney representing an individual who is deaf in a trial about a speeding ticket. The court has informed him that he must provide an interpreter for his client during the trial. Mr. Matthews proposes to use a 15-year-old who has a deaf parent as the interpreter.

Title III of the ADA prohibits people who own or operate places of public accommodation, such as attorneys, from discriminating on the basis of disability in the provision of their services. In addition, title II of the ADA prohibits State and local government entities, such as courts, from discriminating on the basis of disability in their programs, services, and activities.

Both title II and title III require covered entities to ensure effective communication with the participants in their programs or services, including participants with hearing impairments, unless doing so would cause a fundamental alteration of the program or service or would result in an undue burden. 28 C.F.R. SS 35.160-164; 28 C.F.R. S 36.303. Therefore, unless it would cause a fundamental alteration or undue burden, Mr. Matthews must provide necessary auxiliary aids, including, if necessary, qualified sign language interpreters to ensure effective communication in his out-of-court communications with his client. In-court communications, however, fall within the

jurisdiction of the court and, therefore, are covered by title II. The court must ensure effective communication through appropriate auxiliary aids, including, if necessary, qualified sign language interpreters, for such in-court proceedings, unless to do so would cause a fundamental alteration or undue burden.

A sign language interpreter is not a necessary auxiliary aid in all situations. In some contexts, other auxiliary aids may be adequate. In determining what constitutes an effective auxiliary aid or service, covered entities must consider, among other things, the length and complexity of the communication involved. A note pad and written materials may be sufficient means for short, uncomplicated communications. Where, however, the information to be conveyed is lengthy or complex, the use of handwritten notes may be inadequate and the use of an interpreter may be the only effective form of communication. Use of interpreter services is not necessarily limited to the most extreme situations. The enclosed Technical Assistance Manuals address this issue at II-7.1000 and III-4.3200.

In order to satisfy the effective communication requirement of the ADA, any sign language interpreter that is provided must be qualified. Although an interpreter need not be certified, he or she must be able to effectively sign to the individual who is deaf what is being said by the hearing person and to effectively voice to the hearing person what is being signed by the individual who is deaf. The interpreter must be able to accomplish these communications effectively, accurately, and impartially. In some contexts, such as some legal proceedings, this may require knowledge of the applicable specialized vocabulary.

I hope this information is helpful to you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

Dear Sirs:

I was just called by the Justice Court Clerk and advised that through the Mississippi Attorney General's Office she was told that because of the Americans With Disabilities Act we must provide an interpreter for a deaf individual who wants a trial on his speeding ticket. Our search of Stone County has revealed that we may be able to use a 15 year old who has a deaf parent; otherwise, we will have to hire someone from outside the county.

I just wanted you to know that we are all well in South Mississippi and are trying to live up to our obligations under that great shielf provided by Washington that protects us all.

I am,

Sincerely yours,

THOMAS M. MATTHEWS, JR.

TMM:sbp
01-04114

DEC 13 1995

Mr. David F. Tufaro
Executive Vice President
Summit Properties
1629 Thames Street
Suite 200
Baltimore, Maryland 21231

Dear Mr. Tufaro:

I am responding to your letter to Attorney General Reno commenting on the Americans with Disabilities Act (ADA) as applied to public libraries. You state that improvements cannot be made to the Roland Park Public Library in Baltimore City because any alterations would have to be in compliance with the ADA, which would be prohibitively expensive. Please excuse the delay in responding.

Title II of the ADA prohibits discrimination on the basis of disability in State and local government services. The Department of Justice's regulation implementing title II (enclosed) attempts to balance the rights of individuals with disabilities to participate in government programs, services, and activities, with government entities' legitimate concerns about cost and administrative difficulty. To achieve this balance, the title II regulation provides flexible, performance-based standards of accessibility for programs occurring in existing facilities, where the cost of physical accessibility may be high. For new or altered facilities, on the other hand, where access can often be provided without significantly increased cost, the title II regulation requires newly constructed or altered areas to meet specific standards of accessible construction set out in the ADA Standards for Accessible Design (Standards) or the Uniform Federal Accessibility Standards (UFAS).

Sections 35.149 and 35.150 of the title II regulation require accessibility to State and local government programs,

services, and activities in facilities existing on the effective date of the statute, January 26, 1992. The principal focus of the program accessibility standard is access to programs, services, and activities, as opposed to access to physical structures. Therefore, not every area of an existing public library would have to be made accessible, as long as there is access to the library's programs, services, and activities.

For existing facilities, every building does not necessarily have to be made accessible if all of the programs located inside that building can be made accessible by alternative means. Section 35.150(b)(1) of the title II regulation does not require that a public library eliminate structural barriers if it provides access to its programs through alternative methods such as redesign of equipment, reassignment of services to accessible buildings, assignment of aides to beneficiaries, delivery of services at alternate accessible sites, alteration of existing facilities and construction of new facilities, or any other methods that result in making the services, programs, or activities readily accessible to and usable by individuals with disabilities.

Thus, for instance, if a public library's open stacks are located on upper floors having no elevator, as an alternative to making the upper floors accessible, library staff may retrieve books for patrons who use wheelchairs as long as the aides are available during the operating hours of the library. Or, if a public library has an entrance with several steps, the library can make its services accessible in several ways. It may construct a simple wooden ramp quickly and at relatively low cost. Alternatively, individuals with mobility impairments may be provided access to the library's services through a bookmobile, by special messenger service, through use of clerical aides, or by any other method that makes the resources of the library "readily accessible." Priority should be given, however, to methods that offer library services to individuals with and without disabilities in the same setting.

If structural alterations are necessary to provide program accessibility, such alterations must be undertaken. However, a public entity does not have to take any action that it can demonstrate would result in a fundamental alteration in the nature of its program or activity or in undue financial and administrative burdens. This determination can only be made by the head of the public entity or his or her designee and must be accompanied by a written statement of the reasons for reaching that conclusion. The determination that undue burdens would result must be based on all resources available for use in the

program. If an action would result in such an alteration or such burdens, the public entity must take any other action that would not result in such an alteration or such burdens but would
01-04116

nevertheless ensure that individuals with disabilities receive the benefits and services of the program or activity.

You have correctly noted that if Baltimore City undertakes structural alterations in order to provide program accessibility or for any other reason, the title II regulation requires that the altered areas comply with either the ADA Standards or the UFAS. The Department of Justice believes this approach will ensure full accessibility to people with disabilities in the long term while allowing State and local governments to control and minimize short-term costs.

Your letter also raises issues pertaining to the implementation of the Fair Housing Act. Please note that the Fair Housing Act is enforced by the Department of Housing and Urban Development. If you wish to contact that agency regarding the law, you may write to: Ms. Bonnie Milstein, Director, Office of Program Compliance and Disability Rights, Department of Housing and Urban Development, 451 7th Street, S.W., Room 5112, Washington, D.C 20410.

I hope this information is helpful.

Sincerely,

John L. Wodatch
Chief
Disability Rights Section
Civil Rights Division

PROPERTIES November 10, 1995

The Honorable Janet Reno
Attorney General of the United States
U.S. Department of Justice
Constitution Avenue & 10th Street, N.W.
Washington, D.C. 20530

Re: American Disabilities Act

Dear Attorney General Reno:

I read the article that you and former Attorney General Dick Thornburgh wrote, celebrating the fifth anniversary of the American Disabilities Act. While the intent of ADA is clearly positive, your general statement does not square with the facts. I am going to cite some specific examples.

I live in Baltimore City. I have served on the Board of the Friends of the Roland Park Public Library in Baltimore City. This is a two story library sitting in the midst of our community. Although it is a small branch of the Enoch Pratt Public Library System, it is one of the most heavily utilized libraries in the City's system. We have many older citizens of the community who use the library on a regular basis, and many students come here after school gets out in the afternoon. The Friends of the Library was formed several years ago to help address some physical deterioration of the building because of the City's shortage of money, and also to enhance certain resources of the library, i.e. magazine subscriptions and book collections. The library is in need of both renovation and expansion. The building consists of a basement, a ground floor which you have to access by steps, and a second floor. The building is part of a one hundred year old residential community which has been designated a historic district. The library staff and the City are of the view based on ADA that improvements to the building cannot be made without complying with ADA, which would be prohibitively expensive.

Your statement in the article that you wrote suggests that if there were librarians available to assist handicapped persons that making the building handicap accessible would not be required. As you well know, Baltimore, like many other communities, does not have adequate funds to service current needs. It is doubtful that one would believe that there are adequate librarians available to provide handicap needs. In any event, who is going to make that determinaton? Can the City make that judgment by itself. or is that

01-04118

going to be determined in Court when somebody files a lawsuit on behalf of a handicap person? Baltimore can ill afford to have to spend additional money on making a building like this accessible to the physically handicapped. I should add that the library system has recently built a library specifically for handicapped persons adjacent to the main library.

Your examples of how matters are being interpreted reasonably are all well and good. However, that in fact is not the way that decisions are made. There is unlimited opportunity for second guessing. A private owner might determine that a building cannot be made handicap accessible without an inordinate amount of expense. The local jurisdiction, state or federal government may make the determination that judgment is incorrect. A handicapped person or group representing handicapped persons might bring a lawsuit, which could result in substantial amounts of liability and punitive damages. The law and regulations leave it very uncertain as to who is handicapped and what is a reasonable effort made to accommodate handicapped persons. It is left wide open and subject to litigation. This is not in the best interest of society.

I am going to turn to another area with similar requirements to the ADA that applies to multifamily housing. That is the Fair Housing Act of 1988. This statute, which preceded ADA, imposed stringent requirements on multifamily housing to make new properties handicap accessible. At least the good thing about this law is that it was not applied retroactively. It applied to building permits being issued after a certain date. The law requires that all elevator apartment buildings allow wheelchair handicap accessibility to 100 percent of the apartments and through 100 percent of the apartments. This includes kitchens, bathrooms, and balconies, as well as all doorways. For non-elevator multifamily buildings, all ground floor units have to be accessible to the wheelchair handicapped. The problem arises with sites with a lot of steepness, and there is a whole set of regulations determing the percentage of accessibility required based on the natural steepness of the site. The law has added considerable cost to new apartments, which is the sector of housing serving the lower echelon of income groups in this country, by requiring wider doorways and doors, larger kitchens, larger bathrooms, and much more grading of sites to accommodate the requirements. Moreover, it has been an anti- environmental piece of legislation in that it has required a lot more removal of trees than we would otherwise have done under normal circumstances.

Prior to the federal law being passed, most states had their own requirements for handicap accessible units which were on the order of 2 percent, 4 percent or 5 percent of all of the apartments in an apartment community. The multifamily industry never had sufficient demand to fill the handicap units before the federal law was passed. We tried to get this message across to Congress and ultimately to HUD charged with preparing the regulations implementing the new law, but nobody would listen. The argument was that wheelchair and handicap people should be able to go to the top of the

mountain. That may be a noble goal but is not a rationale for the kind of federal requirements that were imposed at any expense.
01-04119

Since the new federal law went into effect, the National Association of Home Builders has done a survey which has shown that the number of handicap persons occupying apartment units is not any higher than it was before. That is also something that we have been telling HUD and our elected members of Congress. The survey showed that out of 695,214 apartments less than 1% are occupied by disabled persons. A copy of the NAHB survey is attached.

The issue from the experience of people who are in the business of developing and managing apartments is one of affordability for handicap persons, not accessibility. So the solution imposed by Congress on behalf of certain elements of the handicap community was the wrong one, and it was a very expensive one. If Congress had been willing and open minded enough to listen to the people who manage apartments on a regular basis, they would have known the real statistics and the nature of the problem. I might add that only a portion of the handicap community pushed for the legislation.

The net result of the handicap legislation adopted under the fair housing law is just another reason in the litany of reasons the cost of housing have been increased for everybody, making it less affordable to all persons, both handicapped and non-handicapped alike, and we have not in fact, accommodated anymore handicapped persons. It is not an untypical case of federal legislation which, though well intentioned in the broad scheme of things, achieves nothing and in fact imposes greater costs on society (and I might add this does not show up in the federal budget). Further, it leaves the impression that people have been helped without in fact having helped them. To top it all off, when the facts are in, nobody in Congress or the Administration has the integrity or the strength to recommend changes in the legislation to correct the errors.

My hope, by writing this letter is that you will play the role of a leader and be an advocate for changes that improve the various forms of handicap legislation I have discussed here.

Sincerely yours,

David F. Tufaro
Executive Vice President

DEC 21 1995

The Honorable Charles H. Taylor
U.S. House of Representatives
231 Cannon Building
Washington, D.C. 20515-3311

Dear Congressman Taylor:

This letter is in response to your inquiry on behalf of your constituent, XX , regarding the broken sidewalk at Central Elementary School in Haywood County, North Carolina. XX wishes to know whether the school could be required to repair the sidewalk under the Americans with Disabilities Act of 1990 (ADA).

Title II of the ADA prohibits discrimination against qualified individuals with disabilities on the basis of disability in all programs, activities, and services provided by or on behalf of State and local governments. The Department of Justice's title II regulation prohibits a public entity from denying the benefits of such programs, activities, and services to qualified individuals with disabilities because the entity's facilities are inaccessible to or unusable by individuals with disabilities.

A public entity is required to provide "program access," i.e., the entity is required to operate each service, program, or activity it provides so that, when viewed in its entirety, the service, program, or activity is readily accessible to and usable by individuals with disabilities. Providing program access does not necessarily require a public entity to make each of its facilities fully accessible. For example, program access can be achieved by the relocation of services from inaccessible to accessible buildings or by the assignment of aides to program beneficiaries. In addition, a public entity is not required to take any action that it can demonstrate would result in a fundamental alteration in the nature of its services, programs, or activities or in undue financial and administrative burdens.

cc: Records, Chrono, Wodatch, McDowney, Milton, FOIA
n:\udd\milton\congress\sidewalk.tay\sc. young-parran
01-04121

With respect to the situation you describe, title II of the ADA requires public entities to maintain in operable working condition those features of facilities that are required for program access and over which the public entities have control. Therefore, if a public entity has responsibility for, or authority over, sidewalks or other public walkways, and if such sidewalks or walkways are necessary to ensure accessibility to the entity's programs, services, or activities, then the public entity has an obligation to maintain the sidewalks or walkways in usable working condition.

I hope this information is helpful to you in responding to your constituent.

XX
October 17, 1995

Congressman Charles H. Taylor
U.S. House of Representatives
516 Cannon Building
Washington, DC 20515

Dear Congressman Taylor:

On XX fell and broke XX arm at Central Elementary School in Haywood County. XX fell on a broken sidewalk that has been in need of repair for quite some time.

We attempted to recoup our medical expenses from the school's liability insurance carrier, North Carolina School Boards Insurance Trust, who denied our request under the laws of contributory negligence. We were told by Terrance Sullivan of the North Carolina General Assembly that even though the school was negligent, they were not obligated to pay medical expenses as they are protected by the laws of contributory negligence.

We are of the opinion that the school system uses contributory negligence to exempt themselves from the responsibility and expense of maintaining a safe school environment.

Even though contributory negligence has taken away the incentive for the schools to repair this sidewalk, can they be coerced to make the necessary repairs under the Americans with Disabilities Act on the grounds that they deny safe access for the blind and visually impaired?

Sincerely,
XX

DEC 28 1995

The Honorable Kay Bailey Hutchison
United States Senator
Suite 1160, LB 606
10440 N. Central Expressway
Dallas, Texas 75231-2223

Dear Senator Hutchison:

I am responding to your inquiry on behalf of the City of Richmond, Texas, with respect to the application of the Americans with Disabilities Act of 1990 (ADA) to the city's library. The library forwarded to you a letter to one of its patrons, XX XX in which it stated its position that it was not required to provide a TDD for patrons with hearing impairments at its public pay telephones because it only provided three such pay telephones.

Title II of the ADA prohibits discrimination on the basis of disability by public entities. The Department of Justice has published a regulation implementing title II that sets out the obligations of public entities under the ADA. In addition, the Department has published a Title II Technical Assistance Manual to further explain these requirements. Copies of these documents are enclosed for your reference.

Title II requires newly constructed or altered facilities to be constructed or altered in a manner that provides accessibility for individuals with disabilities in accordance with either the ADA Standards for Accessible Design (Standards) or the Uniform Federal Accessibility Standards (UFAS). As the library has correctly indicated to XX for most facilities, including libraries, the ADA Standards only require provision of a public TDD when the facility provides four or more public pay telephones.

FOIA
01-04127

If your consituents want further information about the ADA, they may contact the Department's ADA information line (800-514-0301 (voice) or 800-514-0383 (TDD)) Monday, Tuesday, Wednesday, and Friday from 10:00 a.m. to 6:00 p.m., Eastern time. On Thursday, the information line is staffed from 1:00 p.m. to 6:00 p.m.

I hope this information is useful to you in responding to your constituents. As requested, I am returning your constituents' correspondence.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

Garland, TX XX

Dear XX

This is in response to your letter of September 22, 1995 regarding the fact that our City Library's pay telephones are not equipped with Telecommunications Devices for the Deaf (TDDs). We regret that you were inconvenienced in this matter. However, our Library is not in violation of the Americans with Disabilities Act (ADA). We are properly guided by the Department of Justice's ADA Title II Technical Assistance Manual, which directs that a TDD would be required if the Library had a total of four or more pay telephones. The Richardson Public Library has a total of three pay telephones.

As required, we do have a TDD to enable hearing impaired patrons and citizens to call our Library for information. That TDD is for use by Library employees with the Library's business telephones, but would be made available to a patron for an emergency call, as Ms. Klobe stated. As a business line would be used, we are understandably reluctant to make it available as a public access service for business which is not Library related.

We are quite willing, however, to pursue possible placement of a permanently installed TDD with one of the pay telephones as a matter of convenience to patrons. We appreciate the information sheet you provided on one possible vendor. Our Purchasing Department will determine if there are alternative suppliers, to assure the most cost effective decision will be made.

P.O. Box 830309

XX
Garland, Texas XX
September 22, 1995

Mr. Bill Keffler, City Manager
City Hall of Richardson
411 W. Arapaho Street
Richardson, Texas 75080

Dear Mr. Keffler:
I am requesting a full investigation on the matter with the Richardson Public Library on 900 Civic Centre Drive why a pay telephone booth equipped with a Telecommunication Device for the Deaf (TDD) is not installed at this library and for the possible violations of Americans with Disabilities Act of 1990 (ADA) for denying the accessibility to the deaf and hard of hearing individuals.

On September 20, 1995 at 6:50 PM, I took my son to this library for his homework. When I needed to make a telephone call, I was looking for a pay telephone booth equipped with TDD in the lobby. Unfortunately, the TDD was not available. I asked a desk clerk if there was any TDD available in this library. She said we had one by the reference desk on the second floor. However, she asked Elaine Klobe, head librarian to see if I could use the TDD. She said that I would not be able to use this TDD, and she quoted "THE TDD IS NOT FOR PUBLIC USE, BUT IF IT IS AN EMERGENCY, I SHOULD LET YOU USE IT WITH MY PHONE". This remark really insulted and humiliated me. It was not very professional for Ms. Klobe to treat the library patrons with this kind of remark.

Also, I have noticed this library is being renovated. Apparently, the library has met all requirements of ADA EXCEPT it fails to meet the needs for the deaf/hard of hearing individuals. I am enclosing a copy of a motorized TDD for the pay telephone booth which I believe it will be more beneficial to all deaf/hard of hearing individuals. The name of company is ULTRATEC, and the address is 450 Science Drive, Madison, Wisconsin 53711. The telephone number is (608) 238-5400, or the fax number is (608) 238-3008.

Your immediate response on this matter will be greatly appreciated.

Sincerely yours,
XX

Pay Phone TTYTM Series

Vandal-resistant TTYs
designed for the public environment

Designed for public use, the Pay Phone TTY makes TTY calls from public facilities easy and reliable. There are several different models for both indoor and out-door use. Motorized models offer the maximum protection from vandalism. The stainless steel TTY keyboard remains protected in a metal drawer until a TTY call is placed. The drawer opens auto-matically when another TTY answers and closes again when the call is finished. For installations with less traffic, the durable shelf-top model is ideal. It's easy to install for either acoustic or direct-connect use, and has on-line help to assist users.

The Pay Phone TTY meets the require-ments for the Americans with Disabilities Act (ADA) as a public text telephone.

DEC 28 1995

The Honorable Richard Shelby
United States Senate
110 Hart Senate Office Building
Washington, D.C. 20510-0103

Dear Senator Shelby:

I am responding to your letter on behalf of your constituents, XX regarding a county government's decision to waive garbage collection fees for individuals who rely on Social Security as their sole source of income, while requiring payment by individuals relying on veterans' benefits, disability benefits, or other sources of income. XX argue that such distinctions are discriminatory against individuals with disabilities and other individuals.

Title II of the Americans with Disabilities Act (ADA) prohibits discrimination on the basis of disability by State and local government agencies. Nothing in the ADA prohibits governments from providing special benefits, discounts, or fee waivers to individuals with disabilities or groups of individuals with disabilities. However, the ADA also does not prohibit the provision of such benefits, discounts, or waivers only to senior citizens, as long as the benefits, discounts, or waivers are offered equally to senior citizens who have disabilities and those who do not.

I have enclosed a copy of the Department of Justice's regulation implementing title II of the ADA and a Title II Technical Assistance Manual. I hope this information is helpful to you in responding to your constituents.

Sincerely,

Deval L. Patrick
Assistant Attorney General

Enclosures
FOIA
01-04134

Sen. Richard Shelby Nov. 6, 1995
509 - Hart Senate Office Building
Washington, D.C. 20510

Dear Sir,

I would appreciate receiving some information regarding discrimination toward Senior Citizens, disabled, low income or no income citizens. Lawrence County has mandatory garbage pick up and many of its citizens cannot afford to pay the garbage fee. At a meeting, the question was asked whether Senior Citizens would be exempt from paying the garbage fee. We were told "No" They are prevented from singling out a specific class of people for special treatment in regard to the rates they pay. Then we learned that people who have only Social Security income could be exempt. But anyone drawing V.A. disability or any other small income would not be exempt. Also they only took applications for exemption a short period of time; about a month. They quit taking applications in May, 1995 and said they had all the applications they could process.

Now we have learned that the Health Department is still exempting some people and ignoring other people who are qualified for exemption. The Alabama State Health Department is partially funded by federal money. Lawrence County Health Department is using federal money to collect fees for Waste Contractors, a multi-million dollar company and if the citizens don't

the Health Department will have the people arrested, put in jail and will take those citizens to Court. The Health Department discriminates against Lawrence County citizens. They make some pay the garbage fees and others are exempt.

Joe Wheeler Corp. is a distributor of power for TVA and receives federal money from TVA. The money is used to put the garbage fee on electric bills. If the members don't say the garbage fee. Joe Wheeler turns them in to the Health Department so they can have the people arrested, put in jail and taken to court. Joe Wheeler discriminates against citizens by making some pay the garbage fee and others are exempt.

The Lawrence County Commission receives federal money. They made garbage pick-up mandatory. They allow some folks to be exempt and others have to pay. If the people do not pay the fee, they are arrested, put in jail and taken to court. This is discrimination! Joe Wheeler, Lawrence County Commission and the Health Department don't care what the citizens do with the garbage, as long as they pay the fee. The money is all they are interested in.

A person can draw the maximum Social Security, $1,300 or more, and still be exempt, but if a person draws VA, welfare or retirement, as little as $250.00, or unemployment and can't get a job, they are still billed for the garbage fee. If they can't pay, they will be arrested, put in jail and taken to Court.

Citizens are arrested and tried as criminals by the District Attorney for

a month they cannot afford to pay. It costs more to arrest and try the people then they would pay in 5 years- $7.64 x 12= $91.68 x 5= $458.40. Since jail time is involved the defendant would be eligible for a court appointed attorney in any criminal case.

The Health Department Lawrence County Commission and Joe Wheeler said the ones who do not pay will be made an example of by being arrested and prosecuted in Court. They will not give qualified citizens Exemption Applications and said it would be some time in 1996 before application would be accepted again.

We need the federal law that states "any agency that receives federal money cannot discriminate against different class of people regarding rates charged."

We would appreciate it if you would put a stop to this harassment, discrimination and punishment toward Senior Citizens disabled, low income or no income citizens. Now you have an opportunity to make an example of these agencies. You can cut off their federal money.

We, the Lawrence County citizens, need your help in this matter and would appreciate hearing from you as soon as possible.

Sincerely,
XX

01-04137

The Honorable Spencer Abraham
United States Senator
301 E. Genesee Street, #100
Saginaw, Michigan 48607

Dear Senator Abraham:

I am responding to your letter on behalf of your constituent, XX , regarding the application of the Americans with Disabilities Act (ADA) to zoning ordinances. The response to your letter was delayed because of the shutdown of the Federal government. I apologize for any inconvenience to your constituent.

According to the documents enclosed with your letter, the zoning administrator of Hawes Township, Michigan, has determined that XX wood processing business violates the agricultural zoning of his land. XX argues that, because he is an individual with a disability, the ADA exempts his business from local zoning ordinances.

Title II of the ADA prohibits discrimination on the basis of disability in the programs, services, and activities of State and local government entities. Title II requires public entities to make reasonable modifications to their policies, practices, and procedures, including their zoning policies, practices, and procedures, when such modifications are necessary to ensure that individuals with disabilities are not subjected to discrimination because of their disabilities.

While title II may require reasonable modification of discriminatory zoning ordinances and procedures, it does not provide a general exemption from zoning requirements for individuals with disabilities. Individuals with disabilities must generally comply with their local zoning requirements just as non-disabled individuals must comply.

Nov 6, 1995 XX

Senator Spence Abrham
301 E. Genesee
Suite 100
Saginaw, Mi. 48607
Att; Mr. John Potbury

Mr. John Potbury,
Enclosed you will find a copy of the letter I received from Mr. Lawrence A. Brown, Zoning administrator for Hawes township.

In late JUly when Mr. Brown was here he asked about the shop and I told him at that time I had always worked with wood. I was suprised to get this letter and really dont know what he is complaining about. In the spring of XX XX asked me to make him some 2X4 and 1X4 wood stakes which I did. This was my first customer, The second was XX XX which I also made stakes for. Which we have continued to this day.

XX I was in a accident and broke my back and as a result I am completely parolized from the chest down. So in the spring of XX and I started reparing and selling lawn & garden equip. Which XX continued until about XX at which time the stake business took off like crazy. XX went door to door talking to engineers and surveyors, Rd. commissions, anyone who might use wood stakes.

With the old customers and all the new ones picked up it was easy giving up the lawn & garden business. A couple years back the zoning administrator came to us and told us not to get to big. If a company has a good product you cant help but grow. We now have our logs brought here and have Can't Eardly lumber co. come in with his portable saw mill's and cut our lumber. Through the growth of the business we have helped to take 5 families off the welfare roll. These families do not directly work for us, they work on the saw mill's, for trucking and in the woods. We now serve 41 customers from engineers, Const. companies, surveyors, road comm. & etc.

I dont know if there was a misunderstanding between Mr. Brown and myself or what. I also was under the impression I came under the A.D.A. (American Disability Act). Perhaps you could inform me of this. I would be more then happy to work with Mr. Brown, If he would like some measurements, Id be more then happy to get them for him. I do not feel I should pay the $150.00 he is requesting as I feel the zoning board has made the mistake not me.

Thank you,

XX
XX
October 24, 1995

XX
XX
XX

Mr. & Mrs. XX

1. This letter is to advise you that the present use of your land for commercial wood processing purposes is in violation of the agricultural zoning for your property.
2. During my recent inspection of your property in late July 1995, I discussed this matter with you and asked how you made the transition from a small-motor repair service, which was grandfathered, to your present operation and you stated it was without the approval of the Hawes Township Planning/Zoning Committee, Your reasoning was that because of your handicap situation, approval to start up a new business or change types of operation was not required based on a Michigan Handicap law. I advised you that I was not aware of any such law but I would investigate the matter and get back with you.
3. It was the advice of legal counsel that there is no such law on Michigan records and that your operation without having prior approval of the township is in violation of the township ordinance.

4. You are hereby notified that all on-site wood processing operations should cease until you have received written approval for such land use from the Planning/Zoning Committee.

5. Application for such approval can be made through the undersigned by submittal of written request showing property lines, setbacks, building dimensions, storage areas, and operational procedures, together with a check for $50.00 to serve as deposit to activate the review and approval process. You will then be notified of the date and location of the public hearing at which time you will be expected to pay the balance of the special hearing cost which is a total of $150.00.

6. You may also submit your application to the secretary of the P/Z Committee:
   Marian Wilburn
   1934 Quick Rd.
   Lincoln, MI. 48742
   Tel. 736-6178

7. For additional information regarding this letter or submittal procedures, you may contact either Mrs. Wilburn or myself.

8. Strict compliance is expected on receipt of this letter.

Lawrence A. Brown XX
Zoning Administrator XX
Hawes Township XX
FEB 15 1996

The Honorable Trent Lott
United States Senate
Suite 487
Russell Senate Office Building
Washington, DC 20510-2403

Dear Senator Lott:

This letter is in response to your inquiry on behalf of your constituent, Mrs. Skeeter Maxey. The delay in responding was caused by the partial government shutdown. We apologize for any inconvenience this may have caused your constituent.

The correspondence from Mrs. Maxey enclosed with your letter to Attorney General Reno says that Mrs. Maxey is interested in opening a four-screen motion picture theater, but is concerned about what she believes are unnecessary costs associated with complying with the Americans with Disabilities Act ("ADA"). Mrs. Maxey's letter does not, however, indicate any specific provision of the ADA or of the Department of Justice's title III regulation about which she is concerned.

The ADA is a carefully balanced law providing equal opportunity for persons with disabilities while taking into consideration the legitimate cost concerns of the business sector. The costs of complying with the ADA are especially minimal in the area of new construction, where less than 1% of the costs of construction are attributable to accessibility.

Please be assured that the title III regulation was promulgated pursuant to Congress's directive and contains standards for the design and construction of facilities required to be accessible by the ADA. See 42 U.S.C. S 12186(b) and (c). These accessibility standards are consistent with the Americans with Disabilities Act Accessibility Guidelines ("ADAAG") issued by the Architectural and Transportation Barriers Compliance Board ("Access Board"). See 42 U.S.C. SS 12186(c); 12204(a) and (b).

cc: Records, Chrono, Wodatch, Bowen, McDowney, Kuczynski, FOIA
Udd:Kuccynsk:Bowen:Congress:Lott
01-04142

Members of the public were given an opportunity to comment upon both the regulation and the ADAAG before they were finally issued. In fact, representatives of the National Association of Theatre Owners commented extensively on the impact of the regulation and the ADAAG upon the motion picture theater industry.

I hope this information is helpful in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

01-04143

The Honarable Trent Lott
U.S. Congressman
Senate Majority Whip
Washington, D.C. 20510

Dear Senator Lott:

On behalf of myself as a theatre owner and as a consultant presently working with a man and his wife in the process of building a theatre in Holly Springs and also another prospect of a Clinton, Miss. location, I want to ask you to please consider taking a second look at the actions of the Department of Justice and their interpretation of the ADA.

At the present time Bill Nelms and I are working toward a plan to build a new four-screen theatre here in Senatobia. As you know, Mississippi Bank is building a new bank in the old Sandman Motel location. Bill told me this week that we are almost on ready to proceed. There is enough space next to the bank to build a four-plex theatre and they (President of the bank, Bill Nelms) an option to put in a new theatre complex. We feel Senatobia is ready to expand with the surge of growth the past few years.

You can see why I am so concerned about the ADA and the pressures from the Department of Justice. Business owners oppose the excessive demands, not to mention the litigation. We spend more time on the hassle than any other phase of getting our business 'house in order'.

Our industry has supported the legislation, and we have all provided accommodations that we are proud to serve our handi-capped.

I do wish some of us could come before your panel and discuss some of the changes or modifications that we need concerning ADA.
01-04144

We do not have any representatives that I know of on the Public Advisory Committee, and I do know it would be quite helpful to both parties to discuss the ADA requirement implementations that are at present ignored. There are overly costly changes that we really don't need. I could save enough to equip another projection room or more. The re-designing is costly, and really not needed. No one knows better than I since my husband is handicapped, that the handicapped deserve accomodations and a theatre provides this. I know first hand from being in this business so many years, that we go the extra mile to serve our handicapped.

I do so want to proceed with the four screen theatre and you know how vital a theatre is to our Northwest Community College students as well as the citizens, young and old in our community.

I employ mostly young high school and college students. They have gone on to professions in education, accounting, law, health fields, and one in particular a director of Miss Texas pageant. And you knwo Norval Sykes quite well; now executive producer of Miss Texas. Our industry does contribute to beyond entertainment.

Trent, so much is being ignored by the Department of Justice in our best interest. So much time and money is being wasted that could better serve more elsewhere.

I do hope you will look into this matter, and please let me hear from you and your thoughts. Anything you can do to help us, I will appreciate so much. It seems everytime I have a problem, I always call on you. But, I must add, you have always come through for me. And I do thank you so very much.

Kindest personal regards,

SKEETER
01-04145

FEB 15 1996

The Honorable Frank Pallone, Jr.
Member, U.S. House of Representatives
540 Broadway, Suite 118
Long Branch, New Jersey 07740

Dear Congressman Pallone:

I am responding to your recent letter on behalf of your constituent, XX , who asked for your assistance in resolving her allegation that certain entities have discriminated against her on the basis of disability. XX correspondence indicates that she is being discriminated against on the basis of her use of a hearing and guide dog that has not been certified as a service animal by the State of New Jersey. The response to your letter was delayed because of the Federal shutdown. I apologize for any inconvenience to your constituent.

As the enclosed Title III Technical Assistance Manual explains at S III-4.2300, title III of the Americans with Disabilities Act (ADA) requires places of public accommodation to make reasonable modifications in their policies to permit use of a service animal by an individual with a disability, unless doing so would result in a fundamental alteration or jeopardize the safe operation of the public accommodation. In addition, title II of the ADA requires State and local government entities to make reasonable modifications in their policies, including those governing service animals, to the extent such modification is necessary to avoid discrimination, unless the entity can demonstrate that the modification would fundamentally alter the nature of its service, program, or activity.

Some States and localities provide programs or requirements for certification or licensing of service animals. A place of public accommodation may not insist on proof of State or local certification before permitting the entry of a service animal onto its premises. Similarly, a State or local government agency may not require proof of certification before permitting an individual with a disability to participate in its programs, services, or activities.

FEB 15 1996

The Honorable Deborah Pryce
U.S. House of Representatives
128 Cannon House Office Building
Washington, D.C. 20515

Dear Congresswoman Pryce:

I am responding to your letter on behalf of your constituent, XX , regardig the rights of XX XX under the Americans with Disabilities Act of 1990 (ADA). The response to your letter was delayed because of the shutdown of the Federal government. I apologize for any inconvenience to your constituent.

According to XX letter, XX is an individual with a disability who is considered to be incompetent under the law of the State of Maryland. XX apparently disagrees with the State's competency decision. Title II of the ADA prohibits discrimination by State and local government entities on the basis of disability. The ADA does not, however, generally provide a basis for overturning the disability-neutral decisions of State courts regarding the competency of particular individuals. The proper course for challenging such a determination is by appealing the competency decision through the State's judicial or administrative process.

If XX was discriminated against in some particular manner during the proceedings to determine his competency, he, or his representative, may file a complaint under title II of the ADA. Such a complaint must be in writing and must include the name and address of the complaining individual with a disability. Such a complaint must identify the entity alleged to have discriminated on the basis of disability and must describe the particular instance of discrimination. To assist XX , I have enclosed the Department's regulation implementing title II of the ADA and a title II complaint form.

cc: Records, Chrono, Wodatch, McDowney, Blizard, Hill, FOIA
Udd:Hille:PolicyIt:Pryce.ltr
01-04148

XX also disagrees with the State of Maryland's determination that XX father must continue to support his son financially. Again, title II of the ADA does not provide a general means to challenge State child support rulings. The proper course is to file an appeal through the State's judicial or administrative process.

I hope this information is helpful to you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

Att: Robert Nichols
Deborah Pryce
United States Represenative
200 North High STreet
Suite 400
Columbus, OH 43215

Dear Mr. Nichols:
Thank you for returning my phone call today. I am going to greatfully accept your offer of help in regards to getting needed information to and from the following Federal Government agency.

1. The inspector General of the Dept. of Health and Human Services

2. The Federal Division of the criminal Division of the Civil rights, U.S. Justice.

3. The Federal Division of the Disability rights Section of the United States Justice.

THIS LETTER WILL AUTHORIZE YOU TO INQUIRE ON MY AND MY BROTHERS BEHALF INTO ALL MATTERS RELATING TO HIS ADULT SONS DISABILITY IN REGARDS TO HIS DISABILITY RIGHTS, EMANCIPATION, AND WHO HAS THE DUTY TO SUPPORT AN ADULT DISABLED PERSON.

The greatest concern we haVE IS THE FACT THE STATE OF MARYLAND WILL NOT TELL US THE LOCATION OR THE WELFARE OF XX . They state of maryland also claims he is unemancipated due to his disability, XX . This means all his rights are taken away and the state of maryland can treat him as an infant. He has no right to chose where he wants to live ordoes not have control of his money or his life.

My brother raised his son until the age of XX
XX to maryland XX . this was a sad day for us.

XX is a high school grad. and should be emancipated so he can contact his father and not be held prisoner of the State of Maryland.

I am power of attorney for my brother XX and I will send you a copy of the power of attorney for your files.

God Bless you for helping us, and God bless America, maybe you can help to old veterans of the Air Force and the U.S. Coast Guard.

Sincerely,

XX

01-04150

FEB 28 1996

The Honorable David L. Hobson
U.S. House of Representatives
1514 Longworth HOB
Washington, D.C. 20515

Dear Congressman Hobson:

I am responding to your letter on behalf of your constituent, Mr. Roger Bloomfield, regarding the application of the Americans with Disabilities Act (ADA) to the use of alcohol and drugs by college students. The response to your letter was delayed because of the Federal shutdown. I apologize for any inconvenience to your constituent.

Mr. Bloomfield's letter asks about the protections afforded to students using alcohol or illegal drugs in the context of the college admissions process. Mr. Bloomfield's question arises from the suggestion that users of alcohol or illegal drugs be excluded from admission to colleges or universities.

Colleges and universities may be covered by either title II or title III of the ADA. Title II covers publicly owned or operated schools, while title III covers private schools. Both title II and title III prohibit discrimination on the basis of disability by covered entities. Therefore, a covered entity generally may not rely upon an individual's disability as a basis for excluding that individual from participating in the entity's programs or services.

Mere casual use of alcohol or illegal drugs does not constitute a disability within the protection of the ADA. Therefore, a college or university may refuse admission to casual users of drugs or alcohol without violating the ADA. In addition, in enacting the ADA, Congress chose specifically to exempt from civil rights protection drug addicts who are currently engaged in the illegal use of drugs. Therefore, a college or university may exclude such current illegal drug users from its programs.

cc: Records, Chrono, Wodatch, McDowney, Hill, FOIA
n:\udd\hille\policylt\hobson.ltr\sc. young-parran

However, in order to encourage individuals with chemical dependencies to pursue rehabilitation and recovery, Congress chose to provide ADA protection to individuals with a history of drug dependency who have successfully completed a drug rehabilitation program, who are currently participating in such a program, or who, through their own efforts, are no longer engaging in the illegal use of drugs. Therefore, a college or university may not categorically exclude applicants on the basis of their former drug dependency.

Congress did not exclude alcohol dependency from coverage under the ADA. Therefore, individuals who are dependent on alcohol may not be excluded simply on the basis of their status as alcoholics. They may, however, be held to the same standards of conduct that other participants must meet, e.g., behavior standards, academic standards. Therefore, a college or university may prohibit drinking or drunkenness, as long as the prohibition applies to all students, not just those who are or were dependent on alcohol.

I have enclosed, for your information, two copies of the Department's regulations implementing titles II and III of the ADA, as well as one copy of each of the Technical Assistance Manuals for titles II and III. Additional information regarding the application of title II of the ADA to educational institutions may be obtained by contacting the Department of Education at (202) 205-5413 (Voice), (800) 358-8247 (TDD). I hope this information is helpful to you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

Enclosures
01-04152

October 14, 1995

The Honorable David L. Hobson
1514 Longworth HOB
Washington, D.C. 20515

Dear David:

At a recent conference, Legal Issues in Higher Education, sponsored by the University of Vermont, I participated in a discussion concerning how an institution might screen alcohol abusers during the admissions process in an attempt to reduce the growing number of sexual assault and other incidents on campus that seem to coexist with alcohol abuse. One of my colleagues contended that one needed to be cautious about such screening since a student impaired by alcohol could claim protection under the Americans with Diabilities Act. It struck me as inappropriate, and almost ridiculous, that anyone under age 21 could claim alcohol as a disability since it is unlawful for those under age 21 to consume alcohol. The same could be said of other controlled and drug substances that are abused.

Consequently, I am prompted to write to you to ask you to consider whether federal legislation amending the ADA would be in order to make it clear that one cannot claim the Act's protection for any disability that is caused by the person's having engaged in an illegal activity.

Because this matter is related to the illegal use of alcohol, perhaps Mike DeWine would be interested in considering this point. There is no particular urgency to this matter, and in view of the other items on your current agenda, I would not expect any response until it is convenient for you.

Susan and I send our best to you and Carolyn.

Cordially,

01-04153

MAR 14 1996

The Honorable Mark E. Souder
Member, U.S. House of Representatives
3105 Federal Building
1300 S. Harrison Street
Fort Wayne, Indiana 46802

Dear Congressman Souder:

This letter is in response to your inquiry on behalf of your constituent, XX , regarding obesity. XX feels that seating should be made available at such places as restaurants and doctors' offices for persons who are severely overweight. The response to your letter was delayed because of the shutdown of the Federal government. I apologize for any inconvenience to your constituent.

The Americans with Disabilities Act of 1990 (ADA) prohibits discrimination on the basis of disability. However, in order to be viewed as a disability under the ADA, an impairment must substantially limit one or more major life activities.

Being overweight is generally not, by itself, an impairment. On the other hand, severe obesity, which has been defined as body weight more than 100% over the norm, is an impairment. Whether the impairment of severe obesity rises to the level of a disability depends on whether the obesity substantially limits a major life activity, such as walking. Therefore, except in rare circumstances, obesity would not be considered a disabling impairment.

I hope this information is useful to you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

cc: Records, Chrono, Wodatch, McDowney, Milton, FOIA
n:\udd\milton\congress\obesity.sou\sc. young-parran

Dear Congressman Souder

I am writting to address to you a problem I've come across and it needs your attention. Please take this befor congress as a law.

Now, here is the problem that my Wife and millions of others face.

You see, my Wife and 4 other people I know are heavy set. As you may know being heavy set is also a disability just like or about like being crippled. My Wife and these other people go into Law Offices, Doctors Offices, Dentists, some Resturants and even Court Rooms. Most of thease places have seating for people who are small built by having chairs with arms on them. Well, a heavy set person is unable to set in thease chairs because the arms are too close together. They can't set in Booths at Resturants because the seats are too close to the table.

So when my wife and I go to a Doctors office she may have to stand for as much as an hour to an hour and a half waiting to be seen. How would you feel if you had to stand for an hour waiting to get into seeing a doctor and you have trouble with your legs and feet hurting because of the weight?

Thease places should be made to have seating for thease people. I've brought it to the attention of Doctors and Dentists and they said they

will not change there seating for anyone. Its just unfair to thease people. They should have the right to set comfertable just as much as a skinny or thin person. Don't you think so? Pleas write back and give me your insight on this problem. Can you do anything with this?

Sincerely,

XX

P.S.

The Huntington Co. Hospital is an example of such places without proper seating arrangements. You can also check Dr. Boyed's. office down by I69 behind the car wash and McDonalds, and almost any other doctors office in Ft. Wayne and Huntington. You can also check Dr. Cox ILLEGIBLE office in ILLEGIBLE accross from the Hospital. If you need addresses of thease people I can get them for you. All McDonalds, Bugar King, Harrdies and most Fast food places have Booths with attached chairs you can't move. Take a heavy set person to one of thease places to see how much trouble they have setting.

DISABILITIES: SUPREME COURT TURNS DOWN APPEAL OF BUS DRIVER DIAGNOSED WITH DIABETES

The U.S. Supreme Court has refused to hear an appeal by a bus driver in El Paso, Texas, who was removed from his job in 1992 following a diagnosis of diabetes. In failing to grant review, the justices left intact a July 1995 holding of the U.S. Court of Appeals for the Fifth Circuit (Daugherty v. El Paso, US SupCt, No. 95-1083, 3/18/96).

The Fifth Circuit held that the city government was not required to petitio the Department of Transportation for a waiver of rules specifically prohibiting insulin-dependent diabetics from driving buses. The court also found that the city was under no obligation to reassign the driver to another job.

According to the appeals court, the Americans with Disabilities Act does no require affirmative action in favor of individuals with disabilities such as priority in hiring or reassignment over those who are not disabled.

A jury had awarded Carl Daugherty $5,000 in compensatory damages when the city placed him on leave without pay following the diagnosis of his condition. The U.S. District Court for the Western District of Texas added nearly $22,000 in back pay, and $12,000 in attorneys' fees. Daugherty had worked for the cit as a part-time bus driver for some nine months prior to his diagnosis.
The Fifth Circuit held that insulin-dependent diabetics are by law not "otherwise qualified" to drive public buses because they pose a direct threat to the health and safety of others.

In his petition for review, Daugherty said that the act requires a case-by-case consideration whether an insulin-dependent diabetic should be allowed to operate a bus. He cautioned that the legislation was enacted precisely to combat the sort of unfounded prejudice exhibited by the federal appeals court. The petition said that he has been treated as a leper, even though he has not been shown to be a direct threat to the health and safety of anyone. It submitted that he has been treated on the basis of a stereotype, with no consideration of medical evidence.

The City of El Paso filed a six-page statement with the court asserting tha ADA does not require or condone affirmative action on behalf of the disabled: "[T]here is nothing in the ADA that even suggests that a disabled person shoul be given preference or priority over his nondisabled fellow workers. This notion is unthinkable, especially, one would imagine, to the disabled."

The American Diabetes Foundation submitted a friend-of-the-court brief denouncing the appeals court's reasoning as myopic. It warned that the holding reflects stereotypes and unfounded fear, rather than an individualized

assessment whether Daugherty could adequately and safely perform the job. The brief described the appeal as a matter of exceptional national importance that directly affects the interests of 3.8 million Americans who take insulin to treat their diabetes. With rapid and accurate self-monitoring of glucose levels, the risk of incapacitation from hypoglycemia is negligible, according to the brief.

01-04157

After-Acquired Evidence Claim Denied Review

In other action, the Supreme Court refused to examine the admissibility of after-acquired evidence to determine whether an employee with a disability is "otherwise qualified" under the Rehabilitation Act of 1973 (Maricopa County v Junot, US SupCt, No. 95-1178).

In October 1995, the U.S. Court of Appeals for the Ninth Circuit held that Maricopa County, Ariz., could not rely on evidence it obtained after it rejected a job applicant to support its view that she was not "otherwise qualified" for the job. The county rejected Patricia Junot when she applied in 1985 for a job as a detention officer, a position requiring the supervision and control of inmates housed in the local county jail. Junot had recently had a radical mastectomy.

According to the county, Junot supplied false information about her medical condition, and prevented the county from reviewing pertinent medical and psychiatric records. Ultimately, the county obtained information on her medical condition as part of public records relating to her divorce in 1984. Following the denial of her job application, she sought spousal maintenance based on a claim that her cancer surgery prevented full use of her right arm.

The county claimed that she concealed this information during a pre-employment physical, and that had she disclosed this information, she would have been given a stress test to reveal the extent of the weakness in her arm. The county also argued that Junot concealed information that she had been admitted to a mental hospital for an attempted suicide some five months prior to her filing a job application. It also submitted that Junot kept secret a long history of debilitating migraine headaches, and that she misrepresented the length and type of work history on her application.

The Ninth Circuit granted Junot a new trial in light of the Supreme Court's 1995 holding of McKennon v. Nashville Banner Publishing Co., dealing with after-acquired evidence. The appeals court reasoned that after-acquired evidence is barred until after the jury has determined, in a bifurcated proceeding, that the county was in fact liable for failing to hire Junot due to her disability.

In its petition for review, the county argued that the decision bars the use of after-acquired evidence to rebut Junot's claim that she was "otherwise qualified" for the job, or to rebut her credibility. The county warned that

the appeals court holding grants the disabled and unqualified applicant an advantage over non-disabled unqualified applicants. It concluded that the practical impact of the holding is to discourage employers from hiring the disabled. The use of a bifurcated trial procedure defies both precedent and common sense, according to the petition.

DISABILITIES: PRISON GUARD WITH SEVERE VISION LOSS HELD NOT ENTITLED TO RELIEF UNDER ADA

A prison guard who lost substantial vision is not entitled to relief under the Americans with Disabilities Act because she can no longer perform the guard's position even with reasonable accommodation and no other job she could perform was available, a federal court ruled (Miller v. Illinois Department of Corrections, DC CI11, No. 95-3234, 3/1/96).

Despite her sightlessness, the guard, Bobbi Miller, maintained that she could be a telephone switchboard operator at the prison or could manage the guards' armory. The U.S. District Court for the Central District of Illinois said that even though Miller might be able to perform switchboard or armory supervisor duties, in a prison environment an employee must be able to perform other guard functions as well. Because Miller concededly is unable to perform the other duties, she is not entitled to permanent assignment to switchboard or armory work, the court said.

What Miller sought was not a guard's job with reasonable accommodation, but a new position as switchboard operator or armory attendant at the prison, Judge Richard Mills said. The ADA does not require the creation of permanent light-duty positions, he held, citing Rucker v. Philadelphia, DC EPa, No. 94-0364
(7/31/95).

Delayed Result of Crash

Miller began work at the Lincoln, Ill., correctional center in 1988. Two years earlier she had suffered severe head injuries in an automobile accident. In 1993, she experienced a substantial loss of vision and was placed on indefinite medical leave. Her treating physician, a neurologist, traced the condition to the head trauma in the accident. Her vision was measured as 20/800 in both eyes, leaving her effectively blind. The neurologist also said the condition was likely to be permanent.

Miller sought to return to Lincoln in some capacity. Management determined that there was no job for a severely visually handicapped person to do at the facility and removed her.

She filed suit under ADA, but Mills granted summary judgment to the state after finding that Miller was no longer qualified for work at Lincoln with or without reasonable accommodation for her disabling condition.

According to Mills, the job description for the correctional officer position makes clear that the ability to supervise and conduct surveillance of inmates--duties requiring good vision--is an essential function of the job.

Another's Case Unhelpful

Miller pointed to the case of another guard who was allowed to perform

restricted duties though disabled. The judge said the example provided little

support for Miller's position because the critical difference in the other guard's situation was that he was only temporarily disabled by injuries. Following his recovery, that employee resumed the full range of the duties of a guard.

Responding to Miller's arguments that still other employees classified as guards had been assigned specific duties for long periods, Mills replied that the other employees could, if necessary, perform all the duties of the guard position. In an emergency, for example, these guards could drop their office duties and assist the rest of the force. Miller is no longer able to do that, Mills said.

No Duty Of Job Creation

If Miller had pointed to an already existing switchboard or armory position that was vacant, she might have been able to make a case for her transfer, the court said. But no such showing was made, it said.

Although, as Miller pointed out, the prison employs other handicapped employees, some severely affected, their examples are irrelevant because they are not guards, Mills said.

Finally, Miller said the guards' union at Lincoln was willing to waive collective bargaining agreement requirements so that she could work full-time at switchboard or armory duties. The union's willingness is of no moment, the court replied, because ADA does not compel employers to create new jobs or to restructure existing ones so that their essential duties are eliminated.

Mills said that while he is certainly sympathetic to Miller's plight," he had to rule against her because she was not qualified, even with reasonable accommodation, to retain her job as prison guard.

DISABILITIES: DOCTOR'S CLAIM OF JOB REJECTION LINKED TO AGE, HEART CONDITION ALLOWED

A federal magistrate in Boston has refused to dismiss disability and age bias claims filed by a cardiologist who had been deemed totally disabled under the terms of an insurance policy. Brigham & Women's Hospital argued that the doctor's receipt of benefits meant that he is totally disqualified from the practice of medicine, and therefore cannot be otherwise qualified" within the meaning of the Americans with Disabilities Act (Pressman v. Brigham Medical Group, DC Mass, No. 92-10463, 3/12/96).

The court also allowed Dr. David L. Pressman to proceed with a claim for invasion of privacy relating to allegations that a treating physician at the hospital gained access through a hospital computer to medical records showing that he had been admitted to the hospital in 1991 for angina and underwent a cardiac catheterization and angioplasty.

The evidence would permit an inference that the hospital reviewed the plaintiff's private medical records, said Magistrate Judge Robert B. Collings. He found that the case must go to the jury:

[W]hether the [hospital] failed to hire [Pressman] for unlawful discriminatory reasons or for legitimate, non-discriminatory reasons is a subject of dispute. At a minimum, Dr. Pressman has averred that he was told by Dr. [Harold] Solomon that his job offer was jeopardized by his medical history, and his age in light of his medical history. The defendants contend it was because Dr. Pressman exhibited poor judgment, was out of practice too long, behaved inappropriately and received lukewarm recommendations. The evidence raises questions of fact for a jury to decide."

The hospital argued that when Pressman applied for employment, he consented to an investigation of his professional competence and signed an authorization form. Collings found that the form cannot reasonably be read as a consent for the hospital to search or review his medical records.

Pressman is a graduate of Harvard University and Columbia University School of Medicine. He engaged in a solo practice of internal medicine and cardiology in Arlington, Mass., for some 22 years.

After an unsuccessful effort in 1987 to relocate his practice to Cape Cod, he suffered a myocardial infarction. He was transferred to Brigham and Women's Hospital and underwent surgery.

Received Disability Payments

Pressman applied for, and received, disability payments under his private disability policy with Provident Life and Accident Insurance Co. He continued to receive the payments through January 1993.

In November 1990, Pressman replied to an advertisement in the New England Journal of Medicine announcing the opening of a new practice that would be set

interview by Dr. Solomon. The opening included a faculty appointment as a clinical instructor with Harvard Medical School.

In February 1991, Dr. Solomon sent written confirmation of the job offer, and Pressman and his wife began a search for housing in the Boston area. But in June 1991, Solomon questioned Pressman about the 1987 events in Cape Cod, and the angioplasty procedure.

According to Pressman, Solomon said it was poor judgment not to have disclosed his cardiac medical history, and expressed concern about his age and the three and one-half years break in medical practice. Solomon allegedly questioned whether Pressman would tire at mid-day and want to leave work early.

Collings concluded that a jury could return a verdict that the rejection was tainted by considerations of age and disability. Pressman argued that under the terms of his private disability plan, he could continue to receive benefits so long as there was some medical restriction on his ability to practice his sub-speciality of cardiology. He also submitted insurance company correspondence that he is unable to perform the duties of a practicing cardiologist in solo private practice with emergency room duties, but can perform in a group clinical practice.

Hospital Had Access To Medical Records

As for the invasion of privacy claim relating to Dr. Solomon's alleged review of medical records regarding his surgery, the court found that Solomon had access to the records by computer, and whether or not he reviewed the files is a question of fact, awaiting resolution at trial.

The court also discounted the significance of a consent form signed by Pressman to permit an investigation of his professional competence. The form obliged the applicant to submit to a mental or physical examination or to provide evidence that any impairment does not interfere with his competence to practice medicine. It also authorizes any former employer, medical practice or association in the past 10 years to give an assessment of his professional skills, to release information concerning any disciplinary or malpractice proceedings, and any other information relevant to character and professional competence.

Collings concluded that the release cannot reasonably be read as a consent to a review of medical records or as notice that a review of his records was within the scope of an investigation of his professional competence.

SUPREME COURT: JUSTICES WILL RULE ON METHOD OF COUNTING EMPLOYEES UNDER TITLE VII

Granting separate requests by the federal government and an Illinois woman, the Supreme Court March 18 agreed to clarify the method of counting employees for the purpose of determining coverage of small employers under Title VII of the 1964 Civil Rights Act (Walters v. Metropolitan-Educational Enterprises Inc., No. 95-259, and EEOC v. Metropolitan-Educational Enterprises Inc., No. 95-779, US SupCt, 3/18/96).

Without comment, the justices agreed to review a July 1995 decision by the U.S. Court of Appeals for the Seventh Circuit, which took a narrower approach toward counting salaried employees than the one endorsed by the Equal Employment Opportunity Commission and adopted by the First and Fifth Circuits.

"The method to be used to count employees affects the coverage determination for a very large number of small employers with part-time or nonsalaried employees on flexible work schedules," Solicitor General Drew Days argued on behalf of EEOC for the more expansive approach.

Title VII Is Not Explicit

Title VII defines a covered employer as "a person engaged in an industry affecting commerce who has 15 or more employees for each working day in each of 20 or more calendar weeks in the current or preceding calendar year. " But the statute does not explicitly prescribe a method of counting employees.

Last July, in a case involving a sex discrimination suit brought by Darlene Walters against Metropolitan Educational Enterprises, the Seventh Circuit, relying on an earlier decision involving the Age Discrimination in Employment Act, held that the company was not large enough to be considered a covered employer under Title VII (142 DLR A-7, 7/25/95, 68 FEP Cases 499).

The appeals court relied on a more restrictive method of counting employees salaried employees were to be counted toward the minimum number of employees, while hourly or part-time workers were counted only on the days when they were physically present at work or were on paid leave. That approach has been adopted by the Eighth Circuit and several district courts.

EEOC, on the other hand, has endorsed a more expansive, "payroll" method, which says that those hourly or part-time workers should be counted if they are on the employer's payroll. The EEOC-favored method, which the commission sets out in its compliance manual, has been adopted by the First and Fifth Circuit and a number of district courts.

'Tens of Thousands' May Be Covered

In arguing for review, the government said its more expansive interpretatio is "supported by the text, structure, and history of Title VII," is more

consistent with "the broad remedial purposes" of the statute, and also "create

01-04163

a more workable method" for determining whether a small employer is covered by the law.

The government cited Census Bureau statistics reporting that there are some 555,000 employers with 10 to 19 employees, who employed a total of 7.4 million employees in 1991.

"The data suggest that there are tens of thousands of employers who are within the range of the jurisdictional minimum," the government said, "and tha a significant number of employees of such employers are likely to work part-time or flexible work schedules. The court of appeals' approach to the coverag issue would require a cumbersome and time consuming examination of attendance and leave schedules for each working day at each employer whose coverage is uncertain. That approach unnecessarily complicates the coverage determination. . . In contrast, the relative simplicity of the EEOC's payroll method conserves administrative resources and clarifies for the EEOC and a significant number of small employers, employees, and employment applicants whether the federal nondiscrimination laws extend to them."

In opposing review, the company, which sells and finances encyclopedias and other educational materials, characterized the case as an anomaly, presenting an issue which has rarely been litigated by EEOC. "The Seventh Circuit's interpretation is consistent with the plain language of the statute and accord meaning to the phrase 'for each working day'," the employer said.

"History belies the dire forecast of an EEOC and district courts whose time will be consumed by counting employees. To the contrary, this case, and those like it are anomalies," the company said.

Disability Rights Section
P.O. Box 66738
Washington, DC 20035-6738

MAR 19 1996

XX
XX
Dear XX

I have been asked to respond to your letter to Attorney General Janet Reno, concerning the government's participation in lawsuits against dentists who refused to treat persons with HIV/AIDS.

The Americans with Disabilities Act ("ADA") is a civil rights statute enacted to protect the civil rights of individuals with disabilities. Title III of the ADA prohibits discrimination by "public accommodations" on the basis of disability. 28 C.F.R. S 36.201(a). HIV infection meets the definition of a "disability" under title III and its implementing regulation because it is a physical impairment that substantially limits one or more major life activities, e.g. reproduction. 42 U.S.C. S 12102(2) (definition of disability); 28 C.F.R. S 36.104. In fact, HIV disease, both symptomatic and asymptomatic, is listed as one of the covered disabilities in the regulation. See 28 C.F.R. S 36.104.

According to the ADA, public accommodations are defined as any private entity "that owns, operates, leases or leases to a place of public accommodation. 28 C.F.R. S 36.104. Covered entities include, specifically, the "professional office of a health care provider." Id. Therefore, dental offices are public accommodations within the meaning of title III and the title III regulation.

As such, dentists are required to treat all persons including those persons who are HIV positive, provided that the individual does not pose a direct threat to the health or safety

of others, or require or request treatment that is outside of the dentist's expertise. The term "direct threat" means a

cc: Records; Chrono; Wodatch; Perley; McDowney; FOIA
udd\perley\policy\XX
01-04165

significant risk to the health or safety of others that cannot be eliminated by a modification of policies, practices, or procedures or by the provision of auxiliary aids or services. 42 U.S.C. S 12182(b)(3); See also 28 C.F.R. S 36.208. The title III regulation clarifies the direct threat exception:

> In determining whether an individual poses a direct threat to the health or safety of others, a public accommodation must make an individualized assessment, based on reasonable judgment that relies on current medical knowledge or on the best available objective evidence, to ascertain: the nature, duration, and severity of the risk; the probability that the potential injury will actually occur; and whether reasonable modifications of policies, practices, and procedures will mitigate the risk.

28 C.F.R. S 36.208(c). Thus, a dentist would have to demonstrate that persons with HIV pose a significant risk of transmitting the virus to the dentist, his employees, or his other patients, and that this risk cannot be mitigated through reasonable methods of infection control.

According to the Centers for Disease Control and Prevention, however, the risk of transmitting viruses like HIV in the health-care setting is minimal, and can be severely lessened by the use of infection control procedures, often described as "Universal Precautions." These protective measures -- which include the use of gloves, surgical masks, and protective eyewear, the sterilization of medical instruments, the disinfection of exposed environmental surfaces, and proper waste disposal methods -- prevent the spread of almost all bloodborne diseases, including HIV. Indeed, Congress has required each state to adopt CDC's guidelines regarding Universal Precautions, and OSHA has adopted most of the protective measures outlined by the CDC in its Bloodborne Pathogen Rule. See 29 C.F.R. Ch. XVIII S 1910.1030. Moreover, the American Dental Association strongly avers that Universal Precautions are an effective and adequate means of preventing the transmission of HIV from dental health care worker to patient and patient to dental health care worker. Thus, the risk of transmission is not significant, and the direct threat defense is considered to be invalid for these cases.

I hope that this responds to your concerns.

Sincerely,

John L. Wodatch
Section Chief
Disability Rights Section

December 18, 1995

U.S. Attorney Janet Reno
Room 5111, 10th and Pennsylvania Ave. N.W.
Washington, D.C. 20530

Dear Ms. Reno

Every so often I read in some dental journal about a dentist being prosecuted and fined by the federal courts because of his or her refusal to treat an AIDS infected patient. Prosecution is based on the dentist's lack of compliance with the Americans with Disabilities Act, which, for some dubious reason, has categorized AIDS as a disability/handicap and not a disease.

In my office if a child comes in for dental treatment and I find out that they have pink eye, ring worm, impetigo, etc., I will often refuse to treat them. No one objects to this. I am not reported to the "proper authorities," or the ACLU. I am not prosecuted or sued. Yet if I refuse to treat or referred out an AIDS infected child, all hell would break loose. It could even cost me my livelihood and destroy my pediatric practice.

The overriding question in this whole scenario is "Why is AIDS classified as a handicap and not a disease?" Other sexually transmitted diseases are not so classified. As you can see from the enclosed articles this ADA classification is wreaking havoc with many innocent and unsuspecting people, especially women and children. Many young newborns could be successfully treated but the "privacy" laws prevent patient notification and greatly frustrate the physicians who have to stand by and watch these tragedies unfold.

The chance of a "magic bullet" being developed to suddenly wipe out and prevent future AIDS infections is probably very remote. Consequently AIDS will be around a long time and will continue to spread unless we treat is as a disease and not a 0 "handicap." What is the rationalization behind its "handicap"

01-04167

status where the rights to privacy of an individual are more important that the rights of the rest of us who do not have and do not want to contract the disease? Why is our rights secondary to the individuals? Tuberculosis is an example of a contagious disease that is being fought as it should be. Contacts are notified and every effort is being made to restrict and control its spread. Syphilis and gonorrhea are other examples of sexually transmitted diseases where contacts are notified, searched out, etc., in an effort to limit and eradicate the disease.

What is the great fear in the circle of our elected leaders that allows this "individual privacy rights" charade to persist? Are too many of them afraid that their names will end up on some contact list? Why are they allowing a small group of well funded, vociferous individuals dictate the government's policy on AIDS?

How can you ethically and morally justify your department's involvement in this prosecutorial approach to perpetuate the governments position on AIDS? Lawyers can pick and choose their clients. I can refuse to treat patients at my discretion except in the case of those infected with AIDS.

It's about time that the ACLU and other groups start accepting their responsibility in this matter and stop interfering in the eradication and control of AIDS. A prime example of the lack of responsibility of some AIDS infected individuals is exemplified in the enclosed copy of a St. Petersburg Times article. The young man quoted in the article spoke to an AIDS awareness class at the University of South Florida. For six years after he learned that he had the AIDS virus he continued to indiscriminately make his sexual contacts and probably infected many of them with the AIDS virus. He should be prosecuted, not someone who doesn't want to take the risk of contracting AIDS.

I wrote to President Clinton about this problem and as you can see from his response, I received a typical government non-answer. He completely ignored the question about attacking AIDS as a disease and not as a handicap.

I've had similar responses from other representatives. No one wants to touch the issue. Their careers are more important that the lives, heartaches, and misery that AIDS will wreak on the citizens of America let alone billions of dollars in cost. We are all affected, either directly or indirectly, by this plague.
01-04168

Our only real chance to defeat it is to treat it as a disease and fight it as such.

I would like you to use your position and influence to turn this thing around to a logical, scientific attack on AIDS as a disease. Now that you realize your own vulnerability to disease, I hope you can find it in your heart to do what you can to help in the restriction and eradication of this disease. I can only imagine the frustration of the physicians and staff at the Centers for Disease Control in Atlanta in regards to their hands being tied in dealing with AIDS.

I do not particularly relish the thought of my children and grandchildren having to face a life in constant fear of contracting such a disease. Is your position, status and power, as well as our other elected officials more important than the lives of hundreds of thousands and even millions of the rest of us in the United States? "I'm just obeying orders and doing my job," is not a rationalization for the prosecution of health care providers referring out or refusing to treat AIDS patients. That defense was tried and rejected in postwar Germany.

Sincerely,
XX
XX
XX
01-04169

MAR 19 1996

XX
XX
XX
Dear XX

I am writing in response to your letter to President Clinton, dated December 7, 1995. Several of the concerns that you raised are related to specific provisions of the Americans with Disabilities Act (ADA). The Disability Rights Section of the Civil Rights Division of the Department of Justice implements titles II and III of the ADA. Please excuse our delay in responding.

You asked about accessibility in public schools and school administration buildings. All public schools and state and local government entities are covered under title II of the ADA. Title II of the ADA is similar to Section 504 of an older law, the Rehabilitation Act of 1973, which applies to programs receiving Federal financial assistance and the operations of the Federal government. Most school districts are covered by both title II and Section 504.

Title II of the ADA requires that programs, activities, and services be accessible to, and usable by, people with disabilities. This does not necessarily mean that each facility or part of a facility must undergo extensive structural changes. School districts may pursue other options to achieve program access. However, the method that is selected must be effective. One of the acceptable options is to relocate meetings or services to another facility. However, the new location must be readily accessible to and usable by individuals with disabilities. Sections 35.149 and 35.150 of the enclosed regulation and the enclosed Title II Technical Assistance Manual will give you additional information about program access. If school districts and other covered entities are not able to provide effective program access using alternative methods, then structural changes must be made to remove barriers.

You also expressed concerns about the lack of privacy available to you while voting during the last election. Like

cc: Records Chrono Wodatch Hill Bouvier McDowney FOIA
N:\UDD\BOUVIER\XX .CON\secy.johnson
01-04170

other existing facilities covered under title II, polling places are required to be accessible, unless alternative methods are provided that are effective in enabling individuals with disabilities to cast a ballot on the day of the election. A ballot may be taken outside to the car, or an alternate method ensuring privacy might be acceptable. Again, the method chosen must be effective.

Your letter also describes the general lack of accessibility that you have encountered in the past months, with particular reference to a motel. Title III of the ADA covers places of public accommodation such as hotels, motels, restaurants, and service establishments. Under title III, private businesses in existing buildings are required to remove barriers when it is readily achievable to do so. "Readily achievable" means easy to accomplish without much difficulty or expense. The enclosed title III regulation and Technical Assistance Manual will give you additional information about the provisions of title III, including the Standards for Accessible Design, which must be followed for new construction and alterations.

Although I understand that telephone communication is difficult for you at present, you may call our ADA Information Line using a text telephone at 800/514-0383. The voice number is 800/514-0301. You may also write to us at P.O. Box 66738, Washington, DC 20035-6738. Please do not hesitate to contact us if you have additional questions or concerns.

Sincerely,

John L. Wodatch
Chief
Disability Rights Section

XX

NOVEMBER 7, 1995

PRESIDENT WILLIAM CLINTON
1600 PENNSYLVANIA AVENUE NORTH WEST
WASHINGTON, DC 20500

DEAR PRESIDENT CLINTON:

I AM NOT SURE WHERE TO START, I HAVE MANY ISSUES I WOULD LIKE TO COVER. I GUESS I WILL TELL YOU A BIT ABOUT MYSELF FIRST.

IN XX , I WAS IN A AUTOMOBILE ACCIDENT, AND THROUGH A MRI TEST, WE FOUND A CERABELLUM EPIDERMOID TUMOR WHICH WAS LOCATED ON MY BRAINSTEM. BEING THAT IT WAS LOCATED IN SUCH A SENSITIVE AREA, WHICH WAS THE NERVOUS SYSTEM, IT WAS SAID THAT IT NEEDED TO BE REMOVED. THEY TOLD ME THAT IT HAD BEEN SLOWLY GROWING SINCE BIRTH, IF IT HAD NOT BEEN DETECTED, THAT ONE DAY I MAY NOT HAVE WOKE UP. I AM A HOUSEWIFE AND YOUNG MOTHER OF XX SCHOOL AGE CHILDREN, SO YOU CAN BET I CHOSE THE SURGERY. THE SURGERY LEFT ME TOTALLY PARALYZED, RESPITORY PROBLEMS, AND A PARALYZES VOCAL CORD. I SPENT TWO MONTHS IN ICU, AND TEN MONTHS AWAY FROM MY HUSBAND AND CHILDREN IN A REHABILITATION CENTER. I FINALLY RETURNED BACK HOME WITH MY FAMILY IN XX , WITH THE ABILITY TO MOVE A GOOD PART OF MY RIGHT SIDE, BUT MY VOCAL CORD IS STILL PARALYZED, SO MY COORESPODANCE IS BASICALLY LIMITED TO LETTERS. WE ARE STILL KEEPING THE FAITH THAT I MAY REGAIN MOVEMENT OF MY LEFT SIDE. SINCE I HAVE RETURNED HOME I WANT NOTHING MORE THAN TO BE ABLE TO GET BACK TO MY HOMAKING DUTIES, AND WITH A LITTLE LUCK AND ALOT OF PRAYER, BACK TO PART-TIME EMPLOYMENT. I HAVE ENCOUNTERED NOTHING BUT ROAD BLOCKS ON A WEEKLY BASS.

MY FIRST ISSUE IS MEDICAID, THE WAY THE GUIDE LINES ARE SET UP THEY DO NOT REALLY PERTAIN TO SOMEONE IN MY POSITION. THE WAY IT IS SET UP IT GEARS MORE TOWARD THE ELDERLY POPULATION. WE ARE A YOUNG FAMILY OF XX , MY HUSBAND WORKS 40 HOURS A WEEK AND THEN COMES HOME TO TAKE CARE OF ME AND OUR CHILDREN, IT MAKES FOR A VERY LONG DAY. WITH HIS INCOME AND MY SSD, WE GET ABOUT 31,000.00 A YEAR, WHICH IS ALL FINE AND WELL, BUT MEDICAID DOES NOT TAKE INTO CONSIDERATION BILLS THAT WERE INCURRED BEFORE ALL OF THIS, AND THE EXPENSE OF CLOTHING, FOOD, OR CHILD CARE FOR MY CHILDREN. MEDICAID IS TRYING TO TELL US THAT WE CAN AFFORD TO PAY THEM $572.00 A MONTH ABOVE AND BEYOND WHAT HE IS ALREADY PAYING FOR. WE TRIED TO TELL THEM, THAT WITH THE GUIDELINES THAT THEY GO BY, THE ONLY WAY HE COULD DO THAT IS TO GO BANKRUPT JUST TO PAY ANOTHER BILL, NOT EVEN TO GET AHEAD. IF WE ARE FORCED TO DO THAT, WE WILL BE NO FURTHER THAN WE ARE NOW, AND END UP WITH BAD CREDIT. I MYSELF HAD WORKED FOR FIFTEEN YEARS TO GET WHERE I AM TODAY, ONLY TO HAVE SOMEONE TELL ME

THAT BECAUSE I NEED A HOME HEALTH AID 8 HOURS A DAY 5 DAYS A WEEK, AND PHYSICAL THERAPY AND OCCUPATIONAL THERAPY 2 HOURS A DAY 5 DAYS A WEEK THAT IT IS COSTING TOO MUCH THEREFORE THEY 01-04172

WANT ME TO PAY. I COULD SEE IF I WAS MAKING NO PROGRESS, BUT THAT IS NOT THE CASE. EVERYDAY IS A STEP CLOSER TO INDEPENDENCE TO ME. THE PROBLEM WITH SOCIETY TODAY IS THAT QUALITY OF LIFE IS NOT A BIG ENOUGH ISSUE, SO PEOPLE JUST DO NOT CARE. BEING A YOUNG HOUSEWIFE AND MOTHER OF XX SCHOOL AGE CHILDREN, QUALITY OF LIFE IS A BIG ISSUE FOR US. I AM WORKING VERY HARD TO GET THINGS AS BACK TO NORMAL AS POSSIBLE, YES IT IS GOING TO TAKE SOME TIME, BUT IF I HAVE THE MEANS TO WANT TO GET BETTER AND IT TAKES A COUPLE OF YEARS, IT WILL CERTAINLY COST LESS FOR A COUPLE YEARS OF SERVICE THAN BEING ON MEDICAID FOR THE REST OF MY LIFE. THE WAY I SEE IT I HAVE ALREADY LOST XX WITH MY FAMILY, TIME IS TOO PRECIOUS TO LOSE ANYMORE. IF YOU HAVE ANY INPUT ON THIS, PLEASE SHARE IT.

MY NEXT ISSUE IS A STATE AGENCY CALLED VESID. I HAVE BEEN HOME SINCE XX , AND VESID CAME TO MY HOME TO EVALUATE FOR MODIFICATIONS THAT NEED TO BE DONE SO THAT I CAN BE ABLE TO GET BACK TO MY HOUSEMAKING SKILLS, AND REGAIN BACK SOME OF MY INDEPENDENCE, AND ALSO RELIEVE MY XX OLD OF THINGS THEY SHOULD NOT BE STUCK DOING. I HAVE SPOKE WITH VESID, AND THEY TELL ME THAT IT COULD BE UP TO ANOTHER 5 MONTHS BEFORE THEY EVEN GET STARTED. MEANWHILE, I AM UNABLE TO GET INTO MY BATHROOM TO GET INTO THE SHOWER, I HAVE NO CHOICE BUT TO GET A BED BATH AND SHAMPOO MY HAIR IN THE SINK. I AM UNABLE TO UTILIZE MY KITCHEN, UNABLE TO DO THE LAUNDRY, AND THEY WERE SUPPOSED TO SET UP A COMPUTER SO THAT I COULD CORRESPOND TO WHOM I NEEDED TO. MY HUSBAND HAS BEEN SO DISGUSTED WITH VESID THAT HE WENT OUT AND PURCHASED A DESK AND WORD-PROCESSOR SO I CAN WRITE WHO I NEED TO. I CANNOT CORRESPOND ON THE PHONE I DO NOT HAVE ENOUGH VOICE FOR THAT. I HAVE BEEN HOME ALMOST XX AND IT REALLY SEEMS TO ME THAT THEY EXPECT ME TO JUST STAY IN THIS WHEELCHAIR AND BE HAPPY WITH THAT. I AM TOO STRONG A PERSON TO GIVE UP NOW.

I AM VERY CONFUSED ON THE ISSUES THAT PERTAIN TO HANDICAPPED ACCESSIBILITY. WHERE MY CHILDREN GO TO SCHOOL IN THE XX CITY SCHOOL DISTRICT, CLAIMS THAT THE SCHOOL BOARD ADMINISTRATIVE BUILDING IS NOT HANDICAP ACCESSIBLE, BUT SOMEONE COULD MEET WITH ME AT ONE OF THEIR ACCESSIBLE SCHOOLS. WHEN I SAT BACK AND THOUGHT ABOUT THIS I DISCOVERED THAT THOSE SCHOOLS ARE NOT TOTALLY ACCESSIBLE. IF I WAS TO GET DROPPED OFF AT ONE OF THOSE SCHOOLS I WOULD NOT BE ABLE TO GET IN THE FRONT DOOR UNLESS SOMEONE HAD TO OPEN IT FOR ME. WHERE THEY HOLD THE SCHOOL BOARD

MEETINGS IT IS THE SAME WAY. I HAVE BEEN TRYING TO SET UP A MEETING WITH THE SCHOOL SUPERINTENDENT FOR OVER A MONTH, WITH NO SUCCESS. THERE ARE SO MANY PLACES THAT CLAIM THEY ARE ACCESSIBLE, BUT OVER THESE PAST 16 MONTHS I AM FINDING THAT THEY ARE NOT. XX
WE RESERVED A HANDICAPPED ACCESSIBLE ROOM, ONLY TO FIND OUT THAT THE ONLY THING ACCESSIBLE WAS THE FRONT DOOR.

I WAS JUST FACED WITH THIS ISSUE, I THOUGHT THAT THE CURTAINS AROUND A VOTING BOOTH WERE FOR PRIVACY. BEING THE SITUATION THAT I MYSELF AM IN, I HAD TO GO INTO THE BOOTH WITH

MY HUSBAND, BECAUSE THE VOTING BOOTHS ARE ALL TOO TALL FOR SOMEONE IN A WHEELCHAIR, BESIDES THE FACT THAT THEY ARE NOT DEEP ENOUGH FOR THE WHEELCHAIR TO FIT INTO. SO AS AN AMERICAN VOTING CITIZEN, THAT MY PRIVACY RIGHT IS BEING OVERLOOKED.

PRESIDENT WILLIAM CLINTON, ANY HELP YOU CAN GIVE ME WITH THESE MATTERS, WOULD BE GREATLY APPRECIATED. I HAVE ALREADY CONTACTED SENATOR SEARS AND CONGRESSMAN BOELHERT ON THESE MATTERS, AND THEY REALLY HAD NO ANSWERS, SO YOU ARE MY LAST HOPE. HOPE TO HEAR FROM YOU SOON.

SINCERELY,

01-04174

MAR 20 1996

The Honorable Sam Farr
Member, U.S. House of Representatives
701 Ocean Street
Santa Cruz, California 95060

Dear Congressman Farr:

I am responding to your letter on behalf of your constituent, XX , who is concerned about provisions for persons with disabilities in the San Benito Joint Union High School. Specifically, XX would like to know whether the High School is subject to the Americans with Disabilities Act (ADA) and whether the main auditorium, which hosts events open to the general pubic, is required to be accessible to persons using wheelchairs.

Title II of the ADA prohibits discrimination on the basis of disability in State and local government services, including public schools. Buildings constructed by or for State or local governments since the effective date of the ADA, January 26, 1992, are required to be fully accessible to and usable by individuals with disabilities, including individuals who use wheelchairs. In addition, sections 35.149 and 35.150 of the Department's title II regulation (enclosed) require accessibility to programs, services, and activities in facilities that were existing on the effective date of the statute. The principal focus of the program accessibility standard is access to programs, services, and activities, as opposed to access to physical structures. Therefore, not every area of an existing school facility would have to be made accessible, as long as there is access to a school's programs, services, or activities.

For existing facilities, every building does not necessarily

have to be made accessible if all of the programs located inside that building can be made accessible by alternative means. Section 35.150(b)(1) of the title II regulation does not require that a school district eliminate structural barriers if it provides access to its programs through alternative methods such as redesign of equipment, reassignment of services to accessible buildings, assignment of aides to beneficiaries, delivery of

cc: Records, Chrono, Wodatch, McDowney, Milton, FOIA
n:\udd\milton\congress\existfac.far\sc. young-parran
01-04175

services at alternate accessible sites, alteration of existing facilities and construction of new facilities, or any other methods that result in making the services, programs, or activities readily accessible to and usable by individuals with disabilities.

If structural alterations are necessary to provide program accessibility, such alterations must be undertaken unless the public entity can demonstrate that the alterations would cause a fundamental change to its program or that the cost of the alterations would result in undue financial and administrative burdens. 28 C.F.R. S 35.150(a)(3). Where an action would result in such a change or such burdens, the public entity must take any other action that would not result in such change or such burdens but would nevertheless ensure that individuals with disabilities receive the benefits or services provided by the entity.

Thus, in situations where a school has an existing inaccessible auditorium in which public events are held, in order to meet its program accessibility obligations, the school district may choose to move the event from the inaccessible auditorium to an accessible location or to make the auditorium accessible to persons with disabilities. If making the auditorium accessible would result in a fundamental change in the events or would constitute an undue financial or administrative burden, then the school district would be required to move the events to an accessible location.

In the event that the San Benito Joint Union High School is in violation of the ADA, XX has several enforcement options. First, he may file a complaint with the U.S. Department of Education, which is the agency most likely to have jurisdiction over his complaint by writing to: Office for Civil Rights, Department of Education, 330 C. Street, N.W., Suite 5000, Washington, D.C. 20202. The complaint must be in writing and must include the complainant's name, address, and signature, and a description of the public entity's alleged discriminatory action. As an alternative to investigation by a Federal agency, XX may file a lawsuit in the appropriate Federal district court. He would not need any approval letter from the Department of Justice before proceeding. Attorneys' fees are available under title II to a prevailing party in a private lawsuit. XX also may seek to resolve his complaint through alternative dispute resolution. The enclosed brochure describes such processes.
01-04176

I hope this information is helpful to you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General

XX

XX want to know whether San Benito Joint Union High School is subject to the Americans' With Disability Act (ADA). If so, then XX opines that the High School is violating the Act because the main auditorium, which hosts events open to the general public, is not wheel chair accessible.

Can Congressman Farr please find out whether or not the High School is subject to ADA? If so, can Congressman Farr describe the steps which XX should take to make a complaint with the appropriate authorities?

MAR 20 1996

The Honorable Carol Moseley-Braun
United States Senator
230 South Dearborn Street
Chicago, Illinois 60604

Dear Senator Moseley-Braun:

This letter is in response to your inquiry on behalf of your constituent, XX , and his concern about the Americans with Disabilities Act (ADA) and service animals in hospitals. Please excuse our delay in responding.

Unless it is a religious entity or under the control of a religious organization, a health care facility, such as a hospital, is covered by the provisions of title III of the ADA and the Department's title III regulation as a place of public accommodation (see section 36.104 of the enclosed regulation). According to section 36.302(c), a public accommodation is required to modify policies, practices, or procedures to permit the use of a service animal by an individual with a disability.

The regulation does acknowledge that in rare circumstances, if the nature of the goods and services provided or accommodations offered would be fundamentally altered, or if the safe operation of a public accommodation would be jeopardized, a service animal need not be allowed to enter. A showing by appropriate medical personnel that the presence or use of a service animal would pose a significant health risk in certain areas of a hospital may serve as a basis for excluding service animals in those areas.

The remaining issues raised by XX letter do not appear to fall within the jurisdiction of the Civil Rights Division.

Senator Carol Mosely-Braun
320 Hart Building
Washington, D.C. 20510

Dear Senator Mosely-Braun:

PLEASE, PLEASE HELP US! My wife and I XX because I went to XX Medical Center Emergency Department seeking treatment. My crime was that I took my guide dog with me. According to the ADA I have a legal right to do so. But the minority of visually impaired who use guide dogs are severely discriminated against here in the XX area. Since February everything has seemed like a nightmare. I am enclosing an extensive file documenting discrimination against my wife and me. As you can see from the newspaper articles, we are advocates for the disabled. Although there have been several articles about us, we do not seek publicity. I am visually and hearing impaired with additional disabilities due to a XX injury XX . My wife is an XX and has been disabled since a combination of accidents in XX . Sir, things like this are not supposed to happen in America! Innocent people do not go to jail. Exhibit #30 is further evidence of the intimidation and harassment by the legal system. A person cannot be in two places at the same time. The people who signed the papers saw us at XX.

We were always taught in school that the American way of justice gives everyone a fair trial regardless of their economic status. The sad reality is that IT IS A LIE! My wife and I are XX respectively, and have NEVER been in trouble. Our attorney represented us for free. Then he turned his back on us. He told us that he did what he was told to do! I have sought help in the past from State's Attorney Lyons' office regarding acts of physical abuse or discrimination. And his office has always refused. Also the powerful realtors do not like us because of the advocacy work we do. We have registered a formal complaint against Chase Ingersoll for ineffective counsel, discrimination and malfeasance. XX after the verdict. I have enclosed cassette tapes of legally recorded conversations between Mr. Ingersoll and me. Please listen to the tapes. The enclosed photos are also evidence of brutality by the police.

Is there any way you can help us? We have tried several agencies, to no avail. As past members of the XX Army National Guard, we were called upon to assist police agencies during times of trouble. If you need further information, please feel free to contact me at any time. My telephone/fax number is XX

Sincerely yours,

XX

MAR 20 1996

The Honorable Louise M. Slaughter
Member, U.S. House of Representatives
3120 Federal Building
100 State Street
Rochester, New York 14614

Dear Congresswoman Slaughter:

I am responding to your letter on behalf of your constituent, Mr. Bruce Gianniny, regarding the cost of compliance with the construction requirements of the Americans with Disabilities Act of 1990 (ADA). The response to your letter was delayed because of the shutdown of the Federal Government. I apologize for any inconvenience to your constituent.

Mr. Gianniny's letter objects to what he considers to be the "large costs" of complying with the ADA. His objection is apparently based on his belief that "[a]ny governmental agency or private agency that receives Federal funding cannot lease space in a non-ADA complying building." This belief is incorrect. Recipients of Federal funds are not required to lease only accessible buildings. However, under section 504 of the Rehabilitation Act of 1993 their programs must, when viewed in their entirety be accessible to people with disabilities. Recipients are permitted to provide access through nonstructural alternative measures such as relocating activities to an accessible part of a building or delivering services at an accessible site. Recipients are not required to take any steps that would result in undue financial or administrative burdens. This same program accessibility requirement applies to all state and local government agencies under title II of the ADA whether or not they receive Federal funds.

Private entities that own or operate places of public accommodation similarly are not required to lease only accessible space. They are, however, required by title III of the ADA to remove architectural barriers to access in rented space when it is readily achievable to do so. The ADA regulations define "readily achievable" as easily accomplishable and able to be carried out without much difficulty or expense.

FAX: (716) 385-6949

November 7, 1995

Congresswoman Louise M. Slaughter
3120 Federal Building
100 State Street
Rochester, NY 14614

Dear Congresswoman Slaughter:

I attended the Forum for Federal Regulatory Reform on Monday, November 6, and, not called upon to speak, I am writing to convey my thoughts on the Americans with Disabilities Act, and its impact on me as a real estate developer.

By designing and constructing office buildings I am aware of the large costs to comply to ADA regulations. Compliance with this code has increased the construction costs of new buildings substantially; costs that must be passed on to clients. To retrofit an existing building to ADA regulations, even when it is structurally feasible, is so extremely expensive the cost cannot be passed on. Any governmental agency or private agency that receives federal funding cannot lease space in a non-ADA complying building. So, as the owner of an older building, I have been excluded fiscally and legally from this market. At the same time I am forced to assume unwanted liability by this legislation. This will have grave implications for me as an owner and on any area with an infrastructure of older buildings such as a downtown.

I do not believe this to be a good or reasonable use of our resources.

As a member of a local school board, I am aware of the increased costs to comply with the Davis-Bacon Act. A recent construction job in the Brighton School District cost nearly one million dollars to comply with these regulations. This million dollars plus interest is paid primarily by the local property owner.

New York City school districts have been granted an exemption from the provisions of Davis-Bacon, I assume because of its inability to pay. I would submit that while the legislature searches for sources of funding for education, all districts should be granted this exemption.

I appreciate the opportunity to convey my thoughts and avail myself for discussion.

Very truly yours,

Bruce E. Gianniny

MAR 27 1996

VIA FACSIMILE AND
FIRST CLASS MAIL

The Honorable Tom Harkin
United States Senate
Washington, D.C. 20510-1502

Dear Senator Harkin:

I am responding to your letter on behalf of your constituent, W. Fletcher Reel, Mayor of Missouri Valley, Iowa, regarding the efforts of his municipality to comply with title II of the Americans with Disabilities Act or 1990 (ADA).

Title II of the ADA prohibits discrimination on the basis of disability in State and local government services. Sections 35.149 and 35.150 of the Department's title II regulation (enclosed) require accessibility to programs, services, and activities in facilities existing on the effective date of the statute, January 26, 1992. The principal focus of the program accessibility standard is access to programs, services, and activities, as opposed to access to physical structures. Therefore, not every facility nor every area of an existing facility would have to be made accessible, as long as there is access to the public entity's programs, services, or activities.

The title II regulation does not require that a government entity eliminate structural barriers, if it provides access to its programs through alternative methods such as redesign of equipment, reassignment of services to accessible buildings, assignment of aides to beneficiaries, delivery of services at alternate accessible sites, alteration of existing facilities and construction of new facilities, or any other methods that result in making the services, programs, or activities readily accessible to and usable by individuals with disabilities.

cc: Records, Chrono, Wodatch, McDowney, Blizard, Hill, FOIA.
n:\udd\hille\policylt\harkin.ltr
01-04185

If structural alterations are necessary to provide program accessibility, such alterations must be undertaken unless the public entity can demonstrate that the alterations would cause a fundamental change in its program or that the cost of the alterations would result in undue financial and administrative burdens. 28 C.F.R. S 35.150(a)(3). Where an action would result in such a change or such burdens, the public entity must take any other action that would not result in such change or burdens but would nevertheless ensure that individuals with disabilities receive the benefits or services provided by the entity. Public entities may not waive the requirements of the ADA, nor is any Federal agency or other entity authorized to grant such a waiver.

Because title II applies to over 80,000 units of State and local government, our limited resources do not permit us to review and approve self-evaluations and transition plans required by the title II regulation. We are unable, therefore, to issue a ruling that Missouri Valley's compliance plan complies with title II. In general, however, the types of measures listed in the compliance plan are appropriate ways of meeting the program accessibility requirement. Where structural changes would result in undue financial and administrative burdens, it is appropriate to provide government services and hold meetings at other already accessible sites or at the home of a person with a disability. The one-week prior notice requirement for moving a city council meeting to an accessible location would likely, however, restrict opportunities for residents with disabilities to attend council meetings. Access to local legislative bodies is a core principle of democratic societies and every effort should be made to keep restrictions to an absolute minimum. Other public entities have found far shorter time periods to be workable.

I hope this information is helpful to you in responding to your constituent.

Sincerely,

John L. Wodatch
Chief
Disability Rights Section

CITY OF MISSOURI VALLEY, IOWA
"Welcome Home to the Future"

March 15, 1996

Senator Tom Harkin
United States Senate
Washington, DC 20510-1502

Dear Senator Harkin:

The City of Missouri Valley has actively been attempting to bring all City services and facilities into compliance with the American Disabilities Act for some time. Though it is ultimately our own responsibility, we have on occasion been mislead. We have been left with some uncertainty, and hopefully now, a clear plan of action.

We believe our plan is compliant with both the letter and the spirit of the ADA, and essentially, we would like to verify its acceptability.

Any assistance you could provide would be greatly appreciated. If you have any questions or further requirements, please contact me at my 712/642-4077. Thank you for your assistance in this matter.

Sincerely,

W. Fletcher Reel
Mayor

01-04103

City of Missouri Valley, Iowa
American Disabilities Act Compliance Plan
March 1996

Objective:

To bring City buildings and services into compliance with both the letter and the spirit of the American Disabilities Act.

Background:

Missouri Valley is a small community with roughly 3,000 residents. We are a people who look-out for one another and have, with or without relating law, always considered it a civic duty to address the needs of those who are physically challenged. In essence, though our plans have not been formally adopted in the past, we have always made City services and facilities available to the disabled.

Our major challenges in bringing our facilities into ADA compliance are our City Hall, built in 1931, and our Public Library, built during the same era. As much of our community was built on a hillside with the downtown area bordering a flood plain, both City Hall and the Public Library used steps and multiple levels to protect the building from flooding. These architectural features, however, are a difficult challenge when attempting to make these facilities accessible to the handicapped. Essentially, we have found that making the most basic changes would cost the City more than the structures are worth.

When these buildings can no longer serve as useful facilities for the City, we will build new, fully ADA compliant buildings. However, building new structures now, before the old buildings' usefulness have ended, makes little economic sense, especially when one considers our limited funds and critical infrastructure priorities. Currently, all business district curbs are ADA compliant.

Strategy:

Our strategy in meeting immediate compliance with the ADA is essentially formalizing what we have always done. Our City Hall presently houses our City Clerk's office which handles a broad range of city services, the City Police, the Magistrates office, the Fire Department and the City Council Chambers.

According to 28 C.F.R. Sec. 35.150(a)(1); (b)(1) of Title II of the ADA, the City may reassign services to an accessible

01-04104

location if the facility is not accessible or a City worker may meet a disabled person at his or her home to provide whatever service is required or mail service may be permitted.

Plan:

* Any individual who meets the standard criteria to be classified as disabled may make a phone call to the Missouri Valley City Clerk's office and ask to be provided with home service. The City Clerk would then initiate whatever procedures are necessary to deliver that service. These could include but would not be limited to collecting payment of Water bills, making out police reports, filing complaints and the delivery of library books.

* The City Clerk's office could also coordinate special arrangements which may need to be made with the Magistrate's office.

* In order to make City Council meetings accessible, with one week's prior notification, we will move these meetings to an ADA compliant facility within the City Limits of Missouri Valley.

* The City will place signs in front of City Hall and the Library informing people where they may call for assistance.

* The City will publish the ADA compliant meeting locations in advance of the City Council meetings.

When rules overstep com

Missouri Valley, nestled comfortably in the low folds of the Loess Hills, is the sort of place you'd pick to show a visitor what small-town Iowa is all about - neat, homey, relaxed. It's home to businesses geared to the farming community, commuters, retired farmers, and small shops and services. Its mayor runs a child-care center.

But the town of 3,000 has a problem. It's out of compliance with the Americans with Disabilities Act. It needs more ramps and elevators - now. Congress left the town no alternatives.

Fletcher Reel, named mayor in a special election last June and re-elected in November, has no quarrel with the intent of the ADA. "I'm not saying ADA is unreasonable in looking out for the needs of the handicapped," he said. But it should cut the town some slack.

The main floor of the town's post office is about 12 feet above ground level. That meant a ramp was required. It cost about $100,000.

"It's a beautiful building," reflecting

the architectural nuances of the 1940s, Reel said, "and we absolutely trashed it with a ramp that winds back and forth."

Further, the mayor said, almost no one uses the ramp (although "the skateboarders kind of like it.") His 95-year-old grandmother prefers the steps; the long, winding ramp made her dizzy, Reel said.

The post office ramp was just for starters. City hall, the town library and the middle school are all out of compliance. Fixing them to satisfy the ADA would cost more than rebuilding. That means that some durable buildings with 20 or 30 or more years of useful life must be abandoned, and Missouri Valley abruptly faces some industrial-strength debt.

Again, Reel isn't critical of the intent of the law; his roommate, a lifelong friend, has been handicapped from birth ILLEGIBLE
other out," Reel said. But the ADA demands ramps and elevators, not helping hands or helpful neighbors.

A bond issue for a new middle school has been approved, and the city council has voted to rebuild city hall. The $6.6 million estimated as needed to satisfy ADA - more than $2,000 for each resident - would push the city and school district bonded indebtedness close to the limits. And then, what happens in an emergency? Reel asks.

Missouri Valley's sewer and water lines were buried before 1930; they could be getting weak. Woe be unto the little town if they collapse just a few years down the road, when the town is already up to here in debt.

*

Missouri Valley's mayor was one of a long parade of Iowans who testified in Des Moines last month before Iowa Congressman Greg Ganske and his

ILLEGIBLE
eral water-pollution and commercial driver's license laws. The hearing drew more than 100 Iowans with complaints dealing with federal regulations.

Targets varied. Favorites were farm, health care, environmental and transportation policies. The concept of metric conversion even took a hit.

It would be nonsense to suggest that all the gripes mean all the regulations represent unreasonable and unwarranted interference with free enterprise or local self-government. But it would be equal folly to deny that excesses exist. Some are simply built into the law by Congress.

L.D. McMullen, general manager of the Des Moines Water Works, was brief and to the point: Water-quality monitoring has become wasteful and burdensome. The Safe Drinking Water Act of 1974, as amended in 1986, required that the EPA set standards for 83 contaminants. It must add another 25 in a couple of years, and 25 more every three years thereafter.

As a result, Des Moines is forced to check for 83 chemicals although only
ILLEGIBLE
mon sense, it provides ammunition to those who profit by maligning all regulation. If they succeed in dismantling needed controls, the nation's forests, lakes and streams will soon be indistinguishable from the landfills. Russia and the former Soviet bloc in Eastern Europe offer examples. In a huge share of that forsaken territory, it's not even safe to breathe the air.

Avoiding a breakdown in orderly regulation here puts a special responsibility on the regulators. At all levels, controls must be applied in such a way that they retain the public's respect.

BILL LEONARD is a Register editorial

writer.

83 contaminants. It must add another 25 in ILLEGIBLE

APR 3 1996

The Honorable Dianne Feinstein
United States Senator
1700 Montgomery Street, Suite 305
San Francisco, California 94111

Dear Senator Feinstein:

Staff of the Disability Rights Section, Civil Rights Division, have reviewed your inquiry on behalf of your constituent, XX . XX seeks information about the requirements for access to Federal Bankruptcy Court. Please excuse our delay in responding.

Section 504 of the Rehabilitation Act of 1973 prohibits discrimination on the basis of disability. As originally enacted, Section 504 applies to programs and activities that receive Federal financial assistance. In 1978, Section 504 was amended to apply to the operations of the Federal government itself. However, coverage was limited to agencies within the Executive branch of government. The United States judiciary was not covered by Section 504.

The response that XX initially received about accessing her bankruptcy proceedings probably reflects the fact that the Federal judiciary is exempt from coverage under Section 504. Nonetheless, while Section 504 does not apply to the Federal judiciary, most Federal courts operate with policies to provide access for persons with disabilities. In this regard, XX should contact the Bankruptcy Court's chief judicial officer or the clerk's office and request accommodations to access its proceedings.

Coverage under Section 504 may exist if the bankruptcy proceeding that XX sought to attend was, in fact, a program or activity conducted by an Executive agency. The Office of the United States Trustees, a Department of Justice (DOJ) component agency, conducts some bankruptcy proceedings on behalf

of the Federal government. Such proceedings conducted by the Trustees are subject to Section 504's requirements for program access as outlined in DOJ's regulations implementing the 1978 amendments to Section 504. These are codified at 28 Code of Federal Regulations Part 39, and should be available at local libraries.

If XX bankruptcy proceedings are conducted by the United States Trustees, a determination about whether or not Section 504 applies to those proceedings is the responsibility of the Trustees. XX may seek additional information about access to her Federal bankruptcy proceedings by contacting: Mr. Joseph Patchan, Director, Executive Office of the United States Trustees, Room 700, 901 E Street, N.W., Washington, D.C. 20534, Attention: Ms. Martha L. Davis, Office of General Counsel, telephone (202) 307-1399.

I hope this information is useful in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

I am a constituent in your district, and am writing to you to inform you of a problem I am facing and to request your assistance.
I have filed bankruptcy papers and my court appearance is scheduled for XX . This will be held in the U.S. Post Office Building, 5th and H Streets, XX I am wheelchair bound and totally unable to stand or even transfer, and this building is not wheelchair accessible. I called the Bankruptcy Court Trustee to inform her of my dilemma, and she suggested that I get someone to carry me up the outside flight of stairs, as "this is what we've done in the past". She had no other suggestions. I was also informed that, as this is a federal, historic building, they are not required by law to be accessible. As my elected official, I am turning to you to resolve this problem. Would it be possible to move the Bankruptcy Court to another site that would accommodate those of us with disabilities?

Sincerely,
XX
01-04192

APR 3 1996

The Honorable Robert S. Walker
U.S. House of Representatives
2369 Rayburn Building
Washington, D.C. 20515-3816

Dear Congressman Walker:

Your letter to the U.S. Department of Transportation on behalf of your constituent, XX , regarding the requirements of the Americans with Disabilities Act (ADA) for curb ramps and sidewalks at public streets and intersections, was forwarded to me for comment.

XX has questioned decisions by North Coventry Township, Pennsylvania, to install curb ramps leading from public streets to impassable areas where there are no sidewalks. According to your letter, officials of North Coventry Township claim that these actions are mandated by title II of the ADA.

Title II of the ADA prohibits discrimination on the basis of disability by State and local government entities. When public entities build new facilities or alter existing facilities, the Department of Justice's regulation implementing title II (enclosed) requires that the newly constructed or altered areas be made accessible to individuals with disabilities. The regulation specifically provides that new construction of or alterations to streets give rise to accessibility obligations for curb ramps. 28 C.F.R. S 35.151(e). Therefore, if the North Coventry Township were constructing a new street or intersection or were altering an existing street or intersection, it may be required to provide accessible curb ramps or ramps where pedestrian walkways that are elevated or curbed intersect with the new or altered street or intersection. 28 C.F.R. S 35.151(e)(1). Notably, resurfacing of streets gives rise to these obligations, as resurfacing is considered to be an alteration within the meaning of the ADA. See Kinney v. Yerusalim, 9 F.3d 1067 (3d Cir. 1993). In addition, if North

Coventry Township were building or altering a pedestrian walkway, it may be required to provide curb ramps or ramps as needed where the walkway intersects streets or intersections. 28 C.F.R. S 35.151 (e) (2).

However, the new construction and alterations provisions of title II do not require installation of ramps or curb ramps in the absence of a pedestrian walkway. Nor are they required in the absence of a curb, elevation, or other barrier between the street and the walkway. Therefore, curb ramps or ramps leading to vacant grass lots are not required by the ADA.

Of course, the ADA does not prohibit North Coventry Township from exceeding the requirements of the ADA. Nor does it limit the State's discretion to provide new pedestrian walkways and ramps as it sees fit to serve interests in addition to accessibility.

I hope this information is helpful to you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

Enclosure

March 5, 1996

Kent Markus, Esquire
Acting Assistant Attorney General
U. S. Department of Justice
Main Justice Building, Room 1603
Pennsylvania and Constitution Avenues, N.W.
Washington, D.C. 20530

Dear Mr. Markus:

I am writing to you on behalf of my constituent, XX , who has enlisted my assistance.

It is my understanding that XX is concerned about the curb cuts which are being constructed in her neighborhood. She notes that there are no sidewalks, and at many intersections, the curb cuts lead to impassable areas. When she contacted North Coventry Township officials, she was told this action is being taken in compliance with the ADA. Since XX notes that should an individual in a wheelchair be able to negotiate the curb cut, there is no where else that person could go, due often to tree limbs and other brush. Therefore, she contends this expense is not practical and these curb cuts should not be mandated. Accordingly, I would like to take this opportunity to express my interest on behalf of my constituent and to request that this matter be reviewed
as expeditiously as possible.
Thank you for your cooperation in this regard. I will look forward to hearing from you at your earliest opportunity.

Cordially,

Robert S. Walker

Ms. Rhonda L. Daniels
Senior Counsel
National Association of Home Builders
1201 15th Street, N.W.
Washington, D.C. 20005-2800

Dear Ms. Daniels:

I am responding to your inquiry of January 19, 1995, on behalf of the National Association of Home Builders, regarding the application of the Americans with Disabilities Act of 1990 (ADA) to the home building industry. We apologize for the delay in responding to your letter.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that have rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. It does not, however, constitute a legal interpretation or advice, and it is not binding on the Department.

Your letter notes that questions have arisen about the application of the ADA to housing "as a result of the proposed accessibility guidelines published by the Architectural and Transportation Barriers Compliance Board . . . . " Therefore, you have requested clarification of the ADA's requirements as they apply to residential construction. Specifically, you have asked the Department to declare: 1) that privately owned residential housing is not subject to title II of the ADA; 2) that only buildings for which a State or local government holds the title are subject to title II; and, 3) that sidewalks in residential areas are not subject to the cross slope requirements

contained in the Interim Final ADA Accessibility Guidelines.

cc: Records; Chrono; Wodatch; Savage; Blizard; Pecht; FOIA
n:\udd\blizard\drsltrs\daniles\sc. young-parran
01-04196

Title II of the ADA, 42 U.S.C. S 12132, provides that

> [N]o qualified individual with a disability shall, by reason of such disability, be excluded from participation in or be denied the benefits of the services, programs, or activities of a public entity, or be subjected to discrimination by any such entity.

departments, agencies, or instrumentalities of State and local governments are public entities subject to title II. Under these definitions, it is clear that only public entities and individuals acting on behalf of public entities have an obligation to comply with title II. Residential properties that are owned and operated by private entities as purely private residential properties are not within the scope of title II.

However, when a State or local government establishes a program that involves providing housing to its residents, that public entity has the obligation to ensure that its program is operated in a non-discriminatory manner whether the program is provided directly by the public entity or through "contractual, licensing, or other arrangements." Because the ADA recognizes that public entities employ many different methods of operating their programs, the Department's regulations do not attempt to limit the types of arrangements that public entities may utilize to ensure effective delivery of programs or services. The regulation merely requires public entities to ensure that when public services or programs are provided through other entities those services or programs meet the same standard of accessibility that would be required if the public entity provided the service directly. 28 C.F.R. S 35.130. In cases where funding is provided to a private entity to facilitate the operation of a State or local program, such accessibility is required. In addition, it should be noted that even if title II would not require a specific facility to be made accessible, a public entity may have the authority under State or local law to require the facility to be accessible.

Your second assertion, that only buildings to which a public entity holds title should be subject to the ADA accessibility requirements is clearly inconsistent with title II and with the title II implementing regulation. Because title II prohibits discrimination in any program, service, or activity of a public entity, the title II regulation (28 CFR S 35.151(a)) requires

> [E]ach facility or part of a facility constructed by, on behalf of, or for the use of a public entity

. . . ." (emphasis added) to be designed and constructed so that it is ". . . readily accessible to and useable by individuals with disabilities.

A similar requirement applies to alterations to existing facilities that are commenced after January 26, 1992. 28 CFR S 35.151(b). Buildings and facilities covered by title II may be designed and constructed in accordance with either the Uniform Federal Accessibility Standards (UFAS) or the Americans with Disabilities Act Standards for Accessible Design (ADA Standards). 28 CFR S 35.151(c). These requirements will remain in effect until this Department publishes a final regulation adopting new accessibility standards for title II entities.

Finally, because sidewalks in residential areas are "facilities" within the meaning of the ADA, residential sidewalks that are constructed with the expectation that they will be turned over to the local government are required to be accessible to people with disabilities. As you know, the Access Board has published interim final guidelines that contain technical requirements applicable to public sidewalks. These requirements are the subject of a Notice of Proposed Rulemaking published by the Department, but they are not yet included in the Department's regulation. Therefore, compliance with the requirements of section 14 of the Access Board's Interim Final Rule is not required. Until this Department publishes a final regulation that establishes specific requirements for accessible public sidewalks, public entities may elect to meet their obligation to provide accessible sidewalks by using the technical provisions applicable to accessible exterior routes under the ADA Standards or UFAS, or they may follow any other accessibility standard in effect in their jurisdiction. In addition, public entities must provide curb ramps or other sloped areas at intersections between the pedestrian walkway and streets, roads, or highways. 28 CFR SS 35.151 (c) and (e).

I hope that this information assists you to understand the responsibility of public entities to apply title II in the operation of their programs. Please be advised that to the extent that your letter raises issues with respect to the technical and scoping requirements for residential properties or public rights of way contained in the notice of proposed rulemaking that was published by the Department in June 1994, we will consider your comments in our review of the responses to that notice. Both the Department and the Access Board are now completing the review of the proposed rule and making appropriate revisions. Your comments may be further addressed in the final

publication of the rule.

Sincerely,

John L. Wodatch

Ms. Merrily Friedlander
Acting Section Chief, Coordination and Review
Civil Rights Division
U.S. Department of Justice
Box 6618
Washington, D.C. 20035-6118

Dear Ms. Friedlander:

On behalf of the National Association of Home Builders, I am writing to request clarification about the applicability of Title II of the Americans with Disabilities Act (ADA) to residential housing. Some questions have arisen about the applicability of Title II to the residential home building industry as a result of the proposed accessibility guidelines published by the Architectural and Transportation Barriers Compliance Board (ATBCB) (57 Fed. Reg. 60612, December 21, 1992, and 59 Fed. Reg. 31676, June 20, 1994). We respectfully request your office to clarify that privately owned and operated residential housing is not subject to Title II. We are concerned that in the absence of such clarification, there will be continuing confusion among builders, state and local regulatory officials, building code officials, as well as the users of these facilities about the applicability of the Title II guidelines to a particular project. This letter sets forth two issues arising from the proposed guidelines which need to be addressed by the Department. Only Buildings Owned and Operated by State of Local Governments Should be
Subject to Title II

There appears to be widespread confusion regarding the applicablity of Title II to residential buildings which are privately owned and operated, but which receive some form of subsidy from a state or local government entity. The proposed accessibility guidelines issued by the ATBCB on December 21, 1992 stated that the guidelines applied to "...single family and multifamily dwelling unit facilities constructed or altered by, for, or on behalf of a State or local government entity." (57 Fed. Reg. 60660). We have been apprised

that certain state housing agencies have taken the position that all residential projects that receive a federal or state subsidy qualify as facilities constructed "on behalf of" a state or local government entity. Various local

01-04199

Ms. Merrily Friedlander January 19, 1995 Page 2 officials have been interpreting this provision to mean that any building that receives any type of government loan, guarantee, grant or any other financial assistance qualifiesas a "state or local government facility." We cannot support such a reading of ADA.

The legislative history of the ADA indicates that Congress was concerned that newly constructed public buildings, i.e, buildings owned by governmental entities, be accessible to the disabled. To suggest that the law extends to buildings owned by private concerns merely because the building may have received some type of financial assistance from a state or local government would expand coverage of the law to an extent not contemplated by Congress. For example, under this reasoning, housing built with funds made available under the HOME Investment Partnership Program would be subject to the ADA. Similarly, housing which receives funding from a community block grant program, or which is eligible for a low interest rate mortgage under a state government housing program would be subject to the ADA under this reasoning.

There is nothing in the legislative history of the ADA to suggest that Congress intended that the receipt of some form of governmental subsidy effectively changes a privately owned building into a public building. In fact, a letter from the Congressional Budget Office (CBO) to the Chairman of the House Committee on Education and Labor, supports the position that the only buildings that Congress intended to be covered by Title II are newly constructed state owned or local government-owned buildings. In estimating the costs of Title II, the CBO concluded that there would be little or no costs to state governments, since all states currently mandate accessibility in newly constructed state- owned public buildings. CBO recognized however, that because municipalities may not have such accessibility requirements, they would probably incur additional costs to make newly constructed, locally-owned public buildings accessible. (House Report, 101-485 p. 145). This analysis demonstrates that there was no intent to expand the reach of Title II to privately owned buildings which may receive some form of government subsidy.

We submit that rather than focusing on whether a building receives some form of government subsidy, the focus should be on whether the building is owned by a public or private entity. There is no question that buildings which are publicly owned are subject to Title II. However, if a building is owned by a private individual or entity, as evidenced by the name on the title to the property, then that building should not be subject to Title II. It is the ownership of the building, not whether the building receives some form of government subsidy, that should determine whether it is subject to Title II accessibility requirements. We urge the Department to clarify that if title to a building is held in the name of a private individual or entity, the building is not subject to Title II, regardless of whether the building receives any form of government subsidy. 01-04200 Ms. Merrily Friedlander January 19, 1995 Page 3 Residential Development Should Not Be Subject to the Sidewalk Cross Slope Requirement

A second issue has arisen under Title II concerning applicability of

the sidewalk cross slope requirement to residential development. ATBCB's proposed guidelines require that every private right-of-way dedicated to a public jurisdiction must meet a 1:50 cross slope requirement. Section 14.2.1 of the Guidelines, June 20, 1994). It is common practice for private residential developers to develop the entire right-of-way, including sidewalks, and dedicate them to the local jurisdiction. Thus, every residential subdivision could be subject to this requirement. Because of the adverse impact this requirement could have on residential development, we request the Justice Department reexamine this issue.

We have attached a letter to the ATBCB from the Southern Nevada Home Builders detailing the adverse impact to residential development that could result from the current proposal. As set forth in that letter, in order to comply with the 1:50 cross slope requirement, design remedies such as providing additional maneuvering space, will be necessary. There will be serious impacts to residential development if a sidewalk must be offset around a driveway apron to maintain an acceptable cross slope. In addition, offset sidewalks impact building setbacks. Local governments require a minimum setback from the back of the sidewalk. If the sidewalk encroaches on the building, the building must be moved further back from the street. The ultimate result of the cross slope requirement is more expensive housing, as density will be reduced as a result of increased setbacks.

We urge the Justice Department to clarify in the final rule implementing Title II that residential development is not subject to the cross slope requirement. We thank you for this opportunity to present our concerns.

Sincerely,

Rhonda L. Daniels

Ms. Elizabeth A. Stewart
Office of the General Counsel Architectural and Transportation Barriers
Compliance Board
1331 F Street NW., suite 1000
Washington, D.C. 2004-1111

Re: Americans with Disabilities Act (ADA) Accessibility Guidelines for Buildings and Facilities: State and Local Government Facilities (Fed. Regis. Vol.59 NO. 117)

Dear Ms. Stewart,

The Southern Nevada Home Builders Association represents over seven hundred developers, subcontractors, and suppliers throughout southern Nevada. In reviewing the Interim Final Rule, our Association is extremely concerned with the proposed requirement for a 1:50 cross slope where public sidewalks intersect driveways.

It was our original understanding that the Accessibility Guidelines for Buildings and Facilities: State and Local Government Facilities (Guidelines) would not apply to private residential development.

However, Section A14.1 (Public Rights-of-Way) states,

> Jurisdictions that may later accept pedestrian facilities constructed in rights-of-way developed by private entities should ensure through the permitting process that such elements will also meet the requirements of this section.

As such, is it the intent of the Guidelines that every private right-of-way development dedicated to a government jurisdiction must meet the 1:50 cross slope requirement, including the intersection of a sidewalk with the private driveway of a single-family home? It is common practice for residential development, including private subdivisions, to develop the entire right-of-way, including sidewalks, and dedicate them to local governments for maintenance. As a result, it would seem that the proposed Guidelines would impact nearly every residential development in the United States, including private subdivisions.

In order to comply with the 1:50 cross slope requirement, design remedies, such as providing additional maneuvering space, will be necessary. Forcing sidewalks to be offset around driveway aprons to maintain an acceptable cross slope will result in a host of impacts on residential development. Many of the future impacts cannot reasonably be anticipated at this time. One of the greatest factors influencing the impact of the proposed Guidelines will be existing regulations in local jurisdictions. Yet another critical issue will be the natural topography of the region to be developed. The immediate impact to southern Nevada will be increased building setbacks, loss of private property, and expensive engineering "solutions." The design and construction of right-of-way developments is dictated by a myriad of overlapping regulations. Building elevations may be dictated by regional flood control agencies, while building setbacks are determined by local planning boards, and sidewalks and street specifications are mandated by public works departments.

The proposed Guidelines will supersede some local requirements, but will have no effect on existing regulations that address building elevations, drainage, and other related issues. The Guidelines suggest offset sidewalks (Fig. A9(a), (b), page A26) as an acceptable design solution to the 1:50 cross slope requirement. Not only does this option result in the loss of private property for sidewalk offsets, but would impact building setbacks as well. Local governments require a minimum setback from the back of sidewalk. Whenever the sidewalk encroaches on the building, the building must be placed further from the street to satisfy setback requirements. We suggest that the scope of these guidelines with respect to the acceptable cross slope for driveways be re-examined. Since nearly all residential developers eventually dedicate right-of-way developments to local jurisdictions, the impact on residential housing, particularly the home buyer, must be taken into consideration. As these Guidelines stand, housing density will be reduced as a result of increased setbacks and a loss of private property for sidewalk offsets. In addition, the increased materials, design, and construction costs will also be passed on to the home buyers. The cumulative result of the 1:50 cross slope requirement will be to significantly reduce a developers ability to provide affordable housing to the general public. This increased expense will result in potential home buyers not being able to afford the increased housing cost.
01-04203

In conclusion, we recommend that the Guidelines be modified to allow for a limited exception to the 1:50 cross-slope requirement for public sidewalks, that being the apron intersecting a private single-family driveway, so long as each side of the apron is beveled where it contacts the sidewalk. If this is unacceptable, then we recommend that the implementation date of the Guidelines be postponed until the issues mentioned above can be addressed. We appreciate this opportunity to express our concerns. Our office would be more than happy to discuss this matter with you in greater detail.

Sincerely,
Jesse Wells
Government Affairs Specialist

APR 9 1996

The Honorable Gerald B. Solomon
U.S. House of Representatives
Washington, D.C. 20515-3222

Dear Congressman Solomon:

I am responding to your letter on behalf of your constituent, Mr. XX , who is concerned about provisions for students with disabilities in the Rhinebeck, New York, school district. Specifically, XX would like to know whether the school district is eligible for a waiver from the Americans with Disabilities Act (ADA) due to the expense that compliance with the ADA would entail. Please excuse our delay in responding.

Title II of the ADA prohibits discrimination on the basis of disability in State and local government services, including public schools. Sections 35.149 and 35.150 of the Department's title II regulation (enclosed) require accessibility to programs, services, and activities in facilities existing on the effective date of the statute, January 26, 1992. The principal focus of the program accessibility standard is access to programs, services, and activities, as opposed to access to physical structures. Therefore, not every area of an existing school facility would have to be made accessible, as long as there is access to a school's programs, services, or activities.

For existing facilities, every building does not necessarily have to be made accessible if all of the programs located inside that building can be made accessible by alternative means. Section 35.150(b)(1) of the title II regulation does not require that a school district eliminate structural barriers if it provides access to its programs through alternative methods such as redesign of equipment, reassignment of services to accessible buildings, assignment of aides to beneficiaries, delivery of services at alternate accessible sites, alteration of existing facilities, construction of new facilities, or any other methods that result in making the services, programs, or activities readily accessible to and usable by individuals with disabilities.

cc: Records, Chrono, Wodatch, McDowney, Milton, FOIA
n:\udd\milton\congress\progacc.sol\sc. young-parran
01-04205

If structural alterations are necessary to provide program accessibility, such alterations must be undertaken unless the public entity can demonstrate that the alterations would cause a fundamental change to its program or that the cost of the alterations would result in undue financial and administrative burdens. 28 C.F.R. S 35.150(a)(3). Where an action would result in such a change or such burdens, the public entity must take any other action that would not result in such change or such burdens but would nevertheless ensure that individuals with disabilities receive the benefits or services provided by the entity.

As you can see, the ADA is a reasonable and balanced law that takes the cost of compliance into consideration. Therefore, the law does not allow waivers. Thus, public entities may not waive the requirements of the ADA, nor is any Federal agency or other entity authorized to grant such a waiver.

I hope this information is helpful to you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

Enclosure

Handicapped Accessibility

Currently, no district building meets the Federal requirements contained in the Americans with Disabilities Act (ADA). This act, signed into law by President George Bush on July 26, 1990, essentially requires that all program areas of all public buildings must be made accessible to persons with disabilities.

At this time, the district has children with disabilities in the first, fourth and fifth grades, and they will not be able to access the Bulkeley building because of its limitations. This creates a possible legal liability for the District.

An architectural study, provided to the district earlier this year, estimated the cost of the renovations at Bulkeley to be as high as $750,000.00.
A recent estimate by the current architect, based on different plans, estimates renovations at $460,000. The building will need a three story elevator, exterior ramp work, new doors, and lavatory renovations. Yet the district would still face space problems at Bulkeley and an accessibility problem at the High School.

APR 12 1996

XX
Petaluma, California XX
Dear Mr. XX

Congresswoman Woolsey forwarded your correspondence regarding the Americans with Disabilities Act of 1990 (ADA) to this office for response. Your letter expressed concern that films shown in movie theaters are not accessible to people with hearing impairments. We apologize for our delay in responding.

The ADA prohibits discrimination on the basis of disability in employment, the provision of public services, places of public accommodation, and transportation. The ADA also requires all new construction and alterations in public buildings, places of public accommodation, and commercial facilities to be accessible, and it mandates the establishment of telephone relay services.

You are correct in your understanding that the ADA does not require movie theaters to show films with open captions. Under the Telecommunications Act of 1996, however, the Federal Communications Commission (FCC) will investigate the extent to which video programming is currently closed captioned and then promulgate regulations requiring video producers to incorporate captions into production. For more information regarding the Telecommunications Act of 1996, you may contact:

The Federal Communications Commission
1919 M Street, N.W.
Washington, D.C. 20554
Attention: Richard Engleman
(202) 653-6288 (Voice)
(The FCC requests that persons with speech or hearing impairments use the relay service to contact their offices).

I hope that this information proves useful to you.

Subject: I need your help

Dear Valerie,

There seems to be a minor loophole in the American Disabilities Act that prevents million of Americans from enjoying the fun and excitement that everyone else takes for granted. This would be going to the Movies. I need somebody that cares and is a public figure to help support a petition that I have started. In its rough draft form, I have included a copy of it here. Would you please review it and give me any suggestions, comments, ideas for improvement that you can think of. A word of endorsement with permission to quote you would also be of great help.

Thank you for your support and I look forward to hearing from you.

XX
XX
XX
XX

Intent of Petition:

To provide open captions at movie theaters on first run movies during special engagements.

Reasons:

The American Disabilities Act, ADA, does not provide for direct provisions for the hard of hearing and deaf as indicated in Senate Report 101-116, pg 64. The report does state that:

"Filmmakers are, however, 'encouraged' to produce and distribute open captioned versions of films and theaters are 'encouraged' to have at least some preannounced screenings of a captioned version of eature films."

Results:

When was the last time you went to a theater and saw an open captioned movie?

Reality:

The theaters show, on average, 0% open captioned screening of feature films. In the sense of the ADA, this meets the requirment for 'encouraged to produce' and 'encouraged to have some preannounced screenings'.

By signing this petition, you are agreeing that the ADA must amend the two words 'encouraged' and replace them with 'required' on Senate Report 101-116, page 64, as noted above.

SEP 7 1995

XX
XX
Seattle, Washington XX

Dear XX

I am responding to your letter to President Clinton regarding the variance you requested to close off the open concrete staircase leading into your basement. You complain that the City of Seattle will not grant you a variance although you need to close off the staircase because of your disability.

Title II of the Americans with Disabilities Act of 1990 (ADA) prohibits discrimination against qualified individuals with disabilities on the basis of disability by State and local governments. Section 35.130(a) of the Department of Justice's Title II regulation (enclosed) provides that no qualified individual with a disability shall, on the basis of disability, be excluded from participation in or be denied the benefits of the services, programs, or activities of a public entity, or be subjected to discrimination by any public entity. Section 35.130(b)(7) of the Title II rule states that a public entity shall make reasonable modifications in policies, practices, or procedures when the modifications are necessary to avoid discrimination on the basis of disability, unless the public entity can demonstrate that making the modifications would fundamentally alter the nature of the service, program, or activity or result in undue financial or administrative burdens.

Thus, the city of Seattle may be required to grant a variance to you if a variance is necessary to avoid discrimination on the basis of disability, unless Seattle can demonstrate that granting the variance would result in undue financial or administrative burdens.

APR 16 1996

The Honorable Mitch McConnell
United States Senator
601 West Broadway
Room 630
Louisville, Kentucky 40202

Dear Senator McConnell:

I am responding to your recent letter on behalf of your constituent, Mr. XX , Florence, Kentucky. Mr. XX filed a complaint with the Department of Justice alleging violation of the Americans with Disabilities Act (ADA) by the City of Florence for failure to pass an ordinance requiring the removal of snow from sidewalks by property owners. Please excuse our delay in responding.

Under title II of the ADA, State and local governments are required to ensure that their programs, services, and activities are accessible to individuals with disabilities. To the extent that accessible sidewalks are required to be provided in order to satisfy that obligation, those required sidewalks must be maintained in operable condition. Temporary interruptions in accessibility, such as those caused by snow, generally do not constitute violations of title II, however, unless they persist beyond a reasonable period of time. Notably, only those sidewalks that are required by the ADA to be accessible and that are within the control of the city will be required to be maintained by the city.

To the extent that a public entity provides snow removal services, title II requires those services to be provided in a non-discriminatory manner. However, sidewalk snow removal by private property owners is private action not covered by the title II absent some substantial involvement by the public entity. The ADA, therefore, does not generally require local governments to pass ordinances compelling property owners to remove snow from sidewalks.

cc: Records, Chrono, Wodatch, McDowney, Talian, FOIA
n:\udd\talian\congress\mcc XX \sc. young-parran
01-04217

To the extent that sidewalks lead to places of public accommodation covered by title III of the ADA, however, the private owners of such places of public accommodation may have obligations to maintain them under title III. If a sidewalk is required to be accessible under title III and if the abutting place of public accommodation exercises control over the sidewalk, the place of public accommodation may be required to maintain the sidewalk in operable condition. As under title II, temporary interruptions because of snow are permissible under title III unless they persist beyond a reasonable period of time.

Enclosed are copies of our Department's ADA Title II and Title III Technical Assistance Manuals, which may further assist Mr. XX in understanding the obligations of entities covered by the ADA. I hope this information is useful in responding to your constituent's inquiry.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

APR 23 1996

The Honorable Dianne Feinstein
United States Senate
487 Russell Senate Office Building
Washington, D.C. 20510-0504

Dear Senator Feinstein:

This is in response to your recent letter on behalf of your constituent, XX . Ms. XX inquired as to whether her service animal may be allowed into a pool area, under the Americans with Disabilities Act of 1990 (ADA).

If the Santa Rosa Junior College, in which the pool is located, is a privately owned and operated entity, it is covered by title III of the ADA. Section 36.302 (c) of the regulation issued by the Department of Justice under title III requires that places of public accommodation, such as restaurants, retail establishments, hotels, places of education and places of recreation modify their "policies, practices, or procedures to permit the use of a service animal by an individual with a disability." Section 36.104 defines a "service animal" as an animal that is "individually trained to do work or perform tasks for the benefit of an individual with a disability ..." A copy of the title III regulation is enclosed.

If the Santa Rosa Junior College is an instrumentality of a State or local government, it falls under title II of the ADA. Title II, like title III, requires that a public entity "make reasonable modifications in policies, practices, or procedures when the modifications are necessary to avoid discrimination on the basis of disability...." A copy of the title II regulation is enclosed.

According to Ms. XX letter, the Santa Rosa Junior College has taken legal action in State court to obtain a permanent restraining order prohibiting her service animal from

cc: Records Chrono Wodatch Hill Berger McDowney FOIA
N:\UDD\BERGER\CONGRESS\FEINSTEI\secy.johnson
01-04221

the pool area. The Department of Justice does not intervene in State court actions. The means for challenging such actions is through the State appellate process.

We hope this information will be of assistance to you in responding to your constituent.

Sincerely,

Deval L. Patrick

ILLEGIBLE

Help! The Santa Rosa Junior College, which advertises the huge Olympic-size heated indoor pool use to the disabled of our Community, is seeking to eradicate disabled person-dog teams from access to these wonderfully helpful classes. Ordinarily, I can go swim non-stop mile laps three times a week, when my body will co-operate. (I've just had a total hip replacement, so NOW is definitely NOT one of those blessed times - yet!) My surgeons & all doctors prescribe: "SWIM!"

For some of us disabled, this is a rare time for socialization and recreation and a little non-weight bearing exercise.

Over the recent two years, I have watched the Assistance Dog population go down to just my two-year old service dog, a Border Collie, named Velcro Max. Whereas the pool used to be a friendly & delightsome rendez-vous for these wonderful dogs and their owners; & where typically the dogs would be showered off while class mates helped, now, even after I refused to tie my dog outside "or, lock him in the car," (if I feared he'd be stolen"), & refused to leave, period, The SRJC attorneys HAVE gotten rid of my Max by securing false affidavits rife with hearsay (& FALACIOUS) comments quoted by a new - The new instructor at the pool, & others With this false evidence, they were able to push thru a temporary Restraining Order, which they hope to make permanent on 6 November 95 at 8:30 am. in The Superior Court Anne Dept 10, on Guerneville Road opposite ILLEGIBLE - D.

I live on an SSI income & cannot afford an attorney to fight these shameful proceedings against me & (worse!) against all assistance dogs.

As I understand the ADA, all accessible private & public entities MUST admit a qualified disabled person & that person's service dog, UNLESS they can prove that the dog would fundamentally alter the nature of the business. Speculation on possible ILLEGIBLE ILLEGIBLE individuals, & all old prejudices & retaliation for

ILLEGIBLE
ILLEGIBLE to ban us, if I read the ADA law a-right.

SRJC asserts that the law banning dogs from Calif. public pools controls, as does their hearsay evidence that Max is dangerous to others, potentially, as does also my refusal (per my legal rights) to accept a flimsy, non-effective endlessly droppable, pick-up device as "an adequate substitute for my service dog"! The ADA supercedes all these conditions, and the DOJ in Washington, D.C. assures me, via their ADA experts, that SRJC must conform. But they're using staff attornies to snake out of the law.

Judge Lloyd Van der Mehden apparently disagrees w/A He granted the TRO, & will judge the case for making that TRO permanent. Too bad I cannot have an attorney! I'd love to file a typewritten response to all of this. I DID hand-print two pages of comments to the Judge & would have blasted those untruths in the sheaf of affidavit handed me that day at Dept 10 by SRJC's attorney, but I "blew" my opportunity by saying I thought I'd provided sufficient date in my documents submitted; and yet - & wham! He interrupted & granted the TRO! He said I'd had my chance! He silenced my attempts to interject on objection & addition. I felt rude, having to try & insist. Of course, it did me no good. Done is DONE.

I offered to relent & agree to leashing & tying my utterly obedience-trained & reliable dog where he'd otherwise plant himself, anyway - at the foot of the lane where I do my endless nonstop laps. Max's eyes are on me the whole time, & should I get a cramp or heart problem, HE'D KNOW, & get help a-coming!

SRJC doesn't want possible dog hairs for students to walk upon. (My dog has zero fuzzy undercoat. His hairs are 2" to 2 1/2" long - far shorter than human styles today.

I ceased bathing Max at the SRJC pool in 1994 after being told by the multiply-degreed Director of Sonoma County Health Dept. that there is virtually NO danger to health in bathing the dog a

Because, in speaking again with ILLEGIBLE
Washington D.C., I learned that "no public or private entity
shall be required to provide supervision, goods or services
(I believe it says) to any service dog" - "goods" includes WATER,
from the showers, I believe. Right? So, there & then,
I decided I couldn't bathe Max in the absense of specific
permission, & never have, since - That's a loss of great
convenience to the disabled. So many people helped - It was
fun! & very useful, saving us not only another disrobing & re-robing
but also much difficulty in rinsing off all soap, as SRJC has flexible
long-hose shower heads in the 3/4 private handicapped shower booths.

Max is admitted to all hospitals with me. Mark Costielney,
the multiply-degreed Director of Public Health for Sonoma County SAYS the
dog represents no significant health hazzard, even if bathed at SRJC.
The DOJ in DC assures me that when local laws are more
stringent then Federal laws reaccess, the Government's law
has precedence. [28 CFR, Part 36 Section 36.103(a)].

As I cannot afford a real attorney to assist me in ILLEGIBLE
this matter, I am appealing to you to champion the cause
of dignity & freedom of access for disabled persons who rely
upon their 24-hour-a-day, life-sacrificing, canine assistants.
Are there any TEETH in Federal laws??? Do you care
that powerful people with prejudices can seize our
rights & manipulate the court system to serve their
own ends? I HOPE SO! I hope you will
help me gain legal access to the only place where I
can move freely on a more-or-less equal basis with
others in my community.

With 40 feet, to go around my down-stayed dog
(at the foot of "my" lane), on a little-used access route
for students - how dangerous can a curled up 50#
dog BE??? At poolside, how many will trip over him?
It is unrealistic to suppose ANYONE would walk that
close to the water! Help!

Thank you, sincerely, XX

The Honorable Jerry F. Costello
Member, U.S. House of Representatives
327 W Main Street
Belleville, Illinois 62220

Dear Congressman Costello:

This letter is in response to your inquiry on behalf of your constituent, Ron Boyer, concerning the requirements of the Americans with Disabilities Act (ADA). We apologize for the delay in our response.

The Department of Justice's regulation under title III of the ADA covers places of public accommodation, such as a place of public gathering. The ADA places a relatively modest burden on existing facilities, requiring that they remove barriers to access where it is readily achievable or "easily accomplishable and able to be carried out without much difficulty or expense." The regulation offers examples of barrier removal including installing ramps, making curb cuts in sidewalks, installing grab bars in toilet stalls, and making other modifications that increase the accessibility of a facility. For further information on the removal of barriers and the order of priorities, please see section S 36.304 of the enclosed title III regulation.

Only when a place of public accommodation or commercial facility performs alterations or undertakes new construction does the Federal law require strict adherence to specific standards that are intended to provide physical access for persons with disabilities. Please see sections S 36.401 and S 36.402 of the regulation.

There may be State or local laws that are also applicable to Mr. Boyer's situation. He should consult with local building code officials to determine what is required.

Mr. Boyer inquired into the availability of funds to make accessibility improvements. The Department of Justice does not provide financial assistance for compliance with the ADA.

cc: Records Chrono Wodatch Hill Berger McDowney FOIA
N:\UDD\BERGER\CONGRESS\CONGRESS.COS\secy.johnson
01-04227

Community Development Block Grant (CDBG) funds, awarded to individual communities by the Department of Housing and Urban Development, can be used for the removal of architectural barriers. Also, the Internal Revenue Service has established tax credits and deductions that may assist small businesses in complying with the ADA (see the enclosed information on tax credits and deductions). The Internal Revenue Service can be reached at 800-829-1040.

I hope this information is helpful to you in responding to your constituent.

Sincerely,

Deval L. Patrick

Dear Andrew:

I am writing to inquire about possible federal assistance for a local VFW in my Congressional district.

As you can note from the enclosed letter, Commander Boyer must comply with the American with Disabilities Act and has requested my help in locating financial assistance.

I would appreciate any information you could provide me in fulfilling Commander Boyer's request. Please direct your communication to my Belleville District Office to the attention of my district office manager Anne Risavy.

I appreciate you attention to this matter.

Sincerely,

VETERANS OF FOREIGN WARS OF THE U.S.
FAIRVIEW MEMORIAL POST NO. 8677
5325 North Illinois
Fairview Heights, Illinois 62208

February 3, 1996

Congressman Costello
327 West Main Street
Belleville, Illinois 62220

Dear Congressman Costello,

This letter is to request your assistance on behalf of Fairview Memorial Post 8677, Veterans of Foreign Wars of the United States located in Fairview Heights, Illinois.

As you may know, our Post Home located on North Illinois Street (Highway 159) is a very old structure dating back to the days when it was a cow barn used in the dairy industry. Over the years it has served the VFW Post and Ladies Auxiliary membership very well.

Our Post Home is open to the public for various functions, and it has now come the time that we must comply with the mandatory Handicap Accessibility Law by providing bathroom facilities for the handicapped men and women of our community. The cost of construction for the new facilities is approximately $93,000.00, which includes upgraded electrical power distribution required by the city of Fairview Heights, prior to issuing an occupancy permit after construction is completed.

Since compliance with the Handicap Accessibility Law is mandatory, and since we are a charitable and non-profit organization, we are asking your assistance in securing any financial help that may be available in the form of a grant or subsidy at the National, State or Local level of Government.

Over the years our membership has managed to allocate some funds to our 'building fund'; however, there is not nearly enough monies available to fund this project. We are forced to obtain a loan from a private banking institution, and will be required to surrender our Post Home and land as collateral for a loan. Our ability to make loan payments on a loan to finance this project is questionable.

Our Post Home has a long history of providing relief and assistance to members of our community.

We also allow our Post Home to be used free-of-charge by the following organizations:

* Red Cross blood drives
* Local, State and National election polling place for Township voters
* Mayor of Fairview Heights to hold Public meetings and 'rap' sessions
* Boy Scouts of America
* Various Community events and functions

We are very proud that we may have the opportunity to install handicap facilities for our handicapped citizenry, but as you can see we would welcome any much-needed assistance that may be provided to us.

We are thanking you in advance for any assistance you may provide us, and hope to hear from you at your earliest convenience.

Sincerely,

Ron Boyer
Commander

APR 29 1996

The Honorable Curt Weldon
Member, U.S. House of Representatives
1554 Garrett Road
Upper Darby, Pennsylvania 19082

Dear Congressman Weldon:

I am responding to your letter on behalf of your constituent, Judge James P. MacElree II of the Court of Common Pleas of Chester County, Pennsylvania, regarding the requirements of the Americans with Disabilities Act of 1990 (ADA). Please excuse our delay in responding.

Judge MacElree's letter expresses concern that the requirements of the ADA for alteration of courtrooms increase the costs of the planned alterations and limit the functionality of courtroom design. Specifically, Judge MacElree believes that the ADA requires a ramp or lift at any elevated judge's bench, witness stand, jury box, or clerk's stand and that any ramp must be 16 feet long for every 6 inches of height.

The ADA prohibits discrimination on the basis of disability by State and local government agencies, including courts. The Department of Justice's regulations implementing title II (enclosed) specify that whenever an entity covered by title II undertakes an alteration to a facility, the altered area must be made accessible to and usable by individuals with disabilities. The standard of accessibility to be applied may be either the Uniform Federal Accessibility Standards (UFAS), 41 C.F.R. pt. 101-19.6, Appendix A, or the ADA Standards for Accessible Design (Standards), 28 C.F.R. pt. 36, Appendix A (enclosed).

Both the ADA Standards and UFAS require all altered public and common use areas to be made accessible. Therefore, jury boxes and witness stands must be accessible to individuals with disabilities, including those who use wheelchairs. In order to be considered accessible, a jury box or witness stand must be reachable by an accessible route, must contain at least one accessible wheelchair space (a removable seat may be installed in

cc: Records; Chrono; Wodatch; McDowney; Hill; FOIA

the space when it is not needed to accommodate a wheelchair), and must be served by an unobstructed turning space. Any fixed counters or operating mechanisms in a jury box or witness stand must be accessible.

Judge MacElree seems most concerned about the requirement that an accessible route be provided to the accessible areas. The ADA does require such an accessible route. If the accessible juror or witness seating is not raised, such an accessible route consists simply of a level route with adequate width and head room. If the accessible seating is raised, a ramp that complies with ADA Standard 4.8 or UFAS 4.8 must generally be provided. Such a ramp need not be 16 feet long for each 6 inches of height, however, as Judge MacElree believes. Rather, it must generally have a 1:12 slope, i.e., 1 foot long for every 1 inch high (a 6-inch high ramp would, therefore, only have to be 6 feet long). In addition, in alterations, if space limitations prohibit use of a 1:12 ramp, a steeper slope may be used.

As Judge MacElree notes, the requirement that some juror and witness seats be level or ramped may alter traditional courtroom design. This alteration is necessary, however, to ensure that individuals with disabilities have the same opportunities to participate fully in their communities that non-disabled individuals have, including the opportunities for jury service and for participation as witnesses in legal proceedings.

Judge MacElree has also asked about accessibility of judges' benches and clerks' and reporters' stands. The UFAS and ADA Standards do not provide specific scoping requirements for such spaces. However, one of the purposes of the ADA is to increase employment opportunities for individuals with disabilities. Therefore, the ADA generally requires construction to be accomplished in such a way that it will not pose an obstacle to employment of individuals with disabilities. In order to balance traditional courtroom design with the need to avoid obstacles to employment, the Department of Justice has recently issued proposed design standards for courtrooms (enclosed). If adopted, such standards would require judges' benches and clerks' stations to be either fully accessible or adaptable, at the discretion of the builder. An adaptable bench or station would be designed to contain necessary maneuvering clearances and other spaces so full accessibility can easily be achieved when an employee requires it. For example, an adaptable judges' bench would not need a ramp if it were designed so that a ramp or lift can be easily installed at a later date.

Under the proposed rule, court reporters' stations, bailiffs' stations, and counsel and litigants' stations must be

fully accessible. The Department believes that requiring full accessibility of these areas will have minimal conflict with traditional courtroom design. In addition, full accessibility is
01-04242

justified by the more fungible nature of these positions, i.e., more than one person may use these stations, which increases the likelihood that an individual with a disability will need to use the stations.

I hope this information will assist you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

COURT OF COMMON PLEAS OF CHESTER COUNTY
15TH JUDICIAL DISTRICT OF PENNSYLVANIA
WEST CHESTER, PENNSYLVANIA 19380
(610) 344-6000

October 5, 1995

Senator Arlen Spector
530 Hart Senate Office Building
Washington, D.C. 20510

Senator Rick Santorium
B-40 Dirksen Senate Office Building
Washington, D.C. 20510

Congressman Curt Weldon
2452 Rayburn House Office Building
Washington, D.C. 20515

Dear Senators Spector, Santorium and Congressman Weldon:

I am a Common Pleas Judge in Chester County, Pennsylvania. Previously, I served as District Attorney having been elected three times.

Currently Chester County is in the process of refurbishing the 4th floor of our Courthouse, which housed the offices of probation and parole, and converting that space into three courtrooms. We have been advised by a federal official in the American Disabilities Act Division that our courtroom plans are not acceptable for the following reasons:

We cannot have an elevated judge's bench without a forty foot (40') ramp or elevated lift, even though none of our judges needs a lift or ramp.

We cannot have an elevated witness stand without a sixteen foot (16') ramp or lift, even if we provide a space in front of the witness stand large enough for a wheelchair so that a disabled person could testify from that location. In the past three years no person in a wheelchair had been presented as a witness in my courtroom.

We cannot have an elevated jury box without a sixteen foot

(16') ramp or lift, even if we provide a location in front of, or at the edge of, the jury box for a wheelchair.
01-04245

We cannot have an elevated area for the clerk and court reporter without a ramp or lift, even though we have no disabled clerks or reporters who would need to use a ramp or lift.

I am advised by our Engineering Department that the ramp being required by the federal official must be 16' long for each 6" of height. The result would be to destroy the functionality of the courtrooms.

This extreme application of the A.D.A. will have the effect of:

(1) Destroying the functional design of virtually every courtroom, county, state and federal, in the United States of America to which it is applied;

(2) Driving the cost of any new or refurbished courtrooms so high as to discourage any construction or refurbishment;

(3) Severely limiting the ability of county and state courts to supply an adequate number of courtrooms to be used by the citizens. (The federal system seems to exempt itself or, at least in the last 40 years, prints the extra money it needs.

I pose the following questions:

(1) Did Congress intend the A.D.A. to be applied as indicated above to effectively destroy the fundamental design of courtrooms?

(2) Can you assist us (the Judges and Commissioners in Chester County) in obtaining a sensible and speedy

federal review of our courtroom plans?

(3) If the answer to #1 is yes, will you move to amend or eliminate the A.D.A. as applied under these circumstances?

We need your assistance quickly as we have judges working in small "temporary" courtrooms which are grossly inadequate to serve the public. We also have the need to increase the number of judges handling the enormous flood of litigation. This may require the construction of even more courtrooms in the future.
01-04246

Senator Arlen Spector
Senator Rick Santorium
Congressman Curt Weldon
Page Three
October 5, 1995

During the past twenty (20) plus years that I have been trying cases I can't recall being in a courtroom (county, state or federal) where the judge's bench, the witness box and at least the back row of the jury box was not on a raised platform.

I wonder at what point do these "politically correct" statutes do more harm than good? Have we lost all common sense? Will our great country be dragged down and suffocated by its own regulations?

Sincerely,

James P. MacElree II

APR 29 1996

The Honorable Bill Young
U.S. House of Representatives
Washington, D.C. 20515-0910

Dear Congressman Young:

This is in response to your letter on behalf of your constituent, Mr. XX regarding the Americans with Disabilities Act of 1990 (ADA). Please excuse our delay in responding.

Mr. XX asks about the ADA's application to Florida's assessment of a fee for issuance of a permit to be displayed in a vehicle to indicate that its occupant has a disability and is entitled to use designated accessible parking spaces.

Title II of the ADA requires State and local government entities to make their programs, including their public parking programs, accessible to individuals with disabilities. Therefore, if a State or local government provides parking at a facility, it must provide an appropriate number of accessible parking spaces for individuals with disabilities. In order to ensure that the accessible spaces are available when needed by individuals with disabilities, the spaces must be reserved for the exclusive use of such individuals. According to Mr. XX letter, the State of Florida effects the reservation of accessible parking spaces by requiring users of such parking to display a particular permit.

Title II of the ADA prohibits a public entity from imposing a surcharge on an individual with a disability for any measure that is necessary in order to ensure nondiscriminatory treatment required by the ADA. 28 C.F.R. S 35.130(f) (enclosed). Because accessible parking is required by the ADA to be reserved for individuals with disabilities and because the issuance of permits is Florida's method of reserving the accessible spaces, Florida may be prohibited from charging a fee for such permits.

However, if Florida provides some alternate means, such as license plates with the international symbol of accessibility (ISA), to allow individuals with disabilities to use accessible spaces and if there is no surcharge for the alternate means, then Florida may charge for its special permits, as long as the

cc: Records, Chrono, Wodatch, McDowney, Hill, FOIA
n:\udd\hille\polcilt\young.ltr\sc. young-parran
01-04248

coverage of the two means is equivalent (i.e., every individual with a disability has the choice and no one is required to use just one of the options).

Florida law apparently authorizes issuance of ISA license plates to individuals who use wheelchairs. Consistent with the ADA, Florida apparently charges such individuals the same fee for such plates as it charges non-disabled individuals for ordinary plates. However, individuals with disabilities that limit their ability to walk significant distances, but who do not use wheelchairs, are apparently not given the option, under Florida law, of applying for ISA license plates. Instead, they are required to obtain a parking permit by paying a $15 fee. For these individuals, for whom there is no surcharge-free option for obtaining access to required accessible parking spaces, the assessment of the extra fee appears to violate title II of the ADA.

I hope this information is helpful to you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

RECYCLED PAPER
01-04250

320.0848 Disabled persons; issuance of exemption parking permits; temporary permits; permits for certain providers of transportation services to persons with disabilities.--

(1)(a) The Department of Highway Safety and Motor Vehicles or its authorized agents shall, upon application, issue an exemption parking permit for a period of 4 years to any person who has permanent mobility problems, or a temporary exemption parking permit not to exceed 90 days to any person with temporary mobility problems, together with an identification card. Such persons with disabilities shall be currently certified by a physician licensed under chapter 458, chapter 459, or chapter 460, or a podiatrist licensed under chapter 461, or comparable licensing in another state, by the Division of Blind Services of the Department of Education, or by the Adjudication Office of the United States Department of Veterans Affairs or its predecessor as having any of the following disabilities that limit or impair his ability to walk or who is certified as legally blind:

1. Inability to walk 200 feet without stopping to rest.

2. Inability to walk without the use of or assistance from a brace, cane, crutch, prosthetic device, or other assistive device, or without the assistance of another person. If the assistive device significantly restores the person's ability to walk to the extent that the person can walk without severe limitation, the person is not eligible for the exemption parking permit.

3. Permanently uses a wheelchair.

4. Restriction by lung disease to the extent that the person's forced (respiratory) expiratory volume for 1 second, when measured by spirometry, is less than 1 liter, or the person's arterial oxygen is less than 60 mm/hg on room air at rest.

5. Use of portable oxygen.

6. Restriction by cardiac condition to the extent that the person's functional limitations are classified in severity as Class III or Class IV according to standards set by the American Heart Association.

7. Severe limitation in the person's ability to walk due to an arthritic, neurological, or orthopedic condition.

(b) The certificate of disability shall include, but not be limited to:

1. The disability of the applicant; the certifying physician's name and address; the physician's certification number; the eligibility criteria for the permit; the penalty

for falsification by either the certifying physician or the applicant; and the duration of the condition that entitles the person to the permit.

2. The certificate of disability shall be signed by both the physician and the applicant or the applicant's parent or guardian.

(c) The Department of Highway Safety and Motor Vehicles shall renew, for a period of 4 years, the exemption parking permit of any person with disabilities upon presentation of the certification required by paragraph (b) or the identification card issued by the department with the previous permit together with proper identification and an affidavit of the department signed by the applicant which attests to the applicant's continued disability.

(d) The Department of Highway Safety and Motor Vehicles shall promulgate rules, in accordance with chapter 120, for the issuance of an exemption parking permit to any organization which can adequately demonstrate a bona fide need for such permit because the organization provides regular transportation services to persons with disabilities who are certified as provided in paragraph (a).

(2) EXEMPTION PARKING PERMIT; PERSONS WITH PERMANENT MOBILITY PROBLEMS.--

(a) The exemption parking permit shall be a placard and shall be renewed every 4 years in the birth month of the applicant. Each side of the placard shall have the international symbol of access in a contrasting color in the center so as to be visible, and the expiration date, and shall be suitable for display on a dashboard or from a rearview mirror.

(b) License plates issued pursuant to ss. 320.084, 320.0842, 320.0843, and 320.0845 shall be valid for the same parking privileges and other privileges provided for under ss. 316.1955, 316.1956, and 526.141(5)(a).

(c)1. Except as provided in subparagraph 2., the fees for the exemption parking permit and renewal are $15 for the initial parking permit, $1 for each additional parking permit, $15 for each renewal parking permit, and $1 for each additional renewal parking permit. The Department of Highway Safety and Motor Vehicles shall receive $13.50 from the moneys derived from the pro-

ceeds of the initial exemption parking permit fee and $13.50 from the moneys derived from the proceeds of the renewal fee therefor, and the tax collector of the county in which the fee was generated shall receive $1.50 from each such fee, to defray the expenses of administering this section.

2. If an applicant who is a disabled veteran, is a resident of this state, has been honorably discharged, and either has been determined by the 1Veterans Administration of the Federal Government to have a service-connected disability rating for compensation of 50 percent or greater or has been determined to have a service-connected disability rating of 50 percent or greater and is in receipt of both disability retirement pay from the 1Veterans Administration and has a signed physician's statement of qualification for the handicapped parking permits, the fees are $1.50 for the initial parking permit, $1 for each additional parking permit, $1.50 for each renewal parking permit, and $1 for each additional renewal parking permit. The fee must be paid to the tax collector of the county in which the fee was generated. The department shall not issue to any one eligible applicant more than two exemption parking permits upon request of the applicant. The provisions of subsections (1), (4), (5), and (6) shall apply to this subsection.

(3) EXEMPTION PARKING PERMIT: TEMPORARY.

(a) A person desiring a temporary exemption parking permit shall apply to the tax collector in his county of residence on a form furnished by the Department of Highway Safety and Motor Vehicles.

2(b) The application form shall be accompanied by a fee in the amount of $15. Such fee shall be distributed as follows:

1. To the tax collector for processing: $2.50.

2. To the Department of Highway Safety and Motor Vehicles: $3.50. Of such fee, $1 shall be deposited into the Motor Vehicle License Plate Replacement Trust Fund to be used for implementation of a real-time handicapped parking data base and replacement parking permit program.

3. To the Florida Governor's Alliance for the Employment of Disabled Citizens for the purpose of improving employment and training opportunities of persons with disabilities, with special emphasis on removing transportation barriers: $4. Such fees shall be deposited into the Transportation Disadvantaged Trust Fund

for transfer to the Florida Governor's Alliance for the Employment of Disabled Citizens.

4. To the Transportation Disadvantaged Trust Fund for the purpose of funding matching grants to counties for the purpose of improving transportation of persons with disabilities: $5.

(4) Any county or municipality may designate additional parking spaces for use for persons with disabilities, beyond the number required by s. 316.1955, to accommodate increased demand for such spaces.

(5) Any person who knowingly makes a false or misleading statement in an application or certification under this section commits a misdemeanor of the second degree, punishable as provided in s. 775.082 or s. 775.083.

(6) Any person who fraudulently obtains or unlawfully uses such an exemption parking permit or who uses an unauthorized replica of such exemption parking permit with the intent to deceive is guilty of a nonmoving traffic violation, punishable as provided in ss. 316.008(4) and 318.18(7).

(7) A violation of this section shall be grounds for disciplinary action pursuant to s. 458.331, s. 459.015, s. 460.413, or s. 461.013, as applicable.

(8) The Department of Highway Safety and Motor Vehicles shall adopt rules to implement this section.

ILLEGIBLE.--s. 7, ch. 79-82; s. 3, ch. 80-ILLEGIBLE; s. 32, ch. 83-318; s. 4, ch. 84-108, s.7, ch. 85-227; s. 1, ch. 86-237; s. 1, ch. 87-220; s. 1, ch. 90-28; s. 18, ch. 90-333; s. 06, ch. 93-120, s. 1, ch. 93-127; s. 12, ch. 93-208.

ILLEGIBLENote.--ILLEGIBLE as the United States Department of Veterans Affairs by s 2, Pub L. No 100-527.

ILLEGIBLENote.--Section ILLEGIBLE, ch. 93-120, amended paragraph (b) of subsection (3), effective July 1, 1994, to ILLEGIBLE.

(b) The application form shall be accompanied by a fee in the amount of $15. Such fee shall be distributed as follows:

1. To the tax collector for processing: $2.50.

2. To the Department of Highway Safety and Motor Vehicles. $3.50. Such fee shall be deposited into the Highway Safety Operating Trust Fund to be used for implementation of a real-time handicapped parking data base and replacement parking permit program and for operations of the department.

3. To the Florida Governor's Alliance for the Employment of Disabled Citizens for the purpose of improving employment and training opportunities of persons with disabilities, with special emphasis on removing transportation barriers: $4. Such fees shall be deposited into the Transportation Disadvantaged Trust Fund for transfer to the Florida Governor's Alliance for the Employment of Disabled Citizens.

4. To the Transportation Disadvantaged Trust Fund for the purpose of funding matching grants to counties for the purpose of improving transportation of persons with disabilities: $5.

The Honorable ILLEGIBLE Young 3 July, ILLEGIBLE
United State House of Representatives
Washington, DC ILLEGIBLE

Dear Congressman Young:

ILLEGIBLE of Florida has imposed an illegal and discriminatory $15.00 tax on a tag that ILLEGIBLE in the front window of the automobile for handicap parking. We, as tax paying citizens of Florida, pay the same tax that all other citizens pay, so this has to be a tax on the handicapped. This illegal and discriminatory tax is imposed upon a group of residents that can least afford this extra financial burden.
The Federal Register / Vol. 56, No. 144 / Friday, July 26, 1991 / Rules and Regulations / Nondiscrimination on the basis of Disability in State and Local Government Services; Final Rule. Subpart B Section ILLEGIBLE.130 Paragraph (F) provides that a public entity may not place a surcharge on a particular individual with a disability, or any group of individuals with disabilities to cover any cost of measures required to provide that individual or group with the nondiscriminatory treatment required by this act or this part. Such measures may include the provision of auxiliary aids of modifications to provide program accessibility.
Section 35.101 states the purpose of the rule, which is to effectuate subtitle A of title 11 of the Americans with Disabilities Act of 1990 ILLEGIBLE the Act) which ILLEGIBLE discrimination on the basis of disability by public entities.

Section 35.104 Definitions: Public entity means- (1) Any State or local government; (2) Any department, agency, special purpose ILLEGIBLE or other instrumentality of a State or States or local government.

Your help as an United State Congressman to rectify this illegal and discriminatory tax would be much appreciated. I request that the State of Florida cease collecting this tax and refund all money collected by this tax to the disabled person that paid this illegal and discriminatory tax.

Dear Mr. XX

Your letter to the Attorney General has been forwarded to this office for reply. Your letter asks whether Federal civil rights laws regarding education of students with disabilities cover private schools that do not receive Federal funding.

Section 504 of the Rehabilitation Act of 1973 and the Individuals with Disabilities Education Act, which impose requirements for appropriate individualized education of students with disabilities, apply only to schools that receive Federal funding. In addition, title II of the Americans with Disabilities Act (ADA), which imposes similar requirements on public schools, does not apply to private schools.

A private school that is not a religious entity or operated by a religious entity, however, will be covered as a place of public accommodation under title III of the ADA. Title III prohibits discrimination on the basis of disability by covered entities. However, unlike the laws discussed above, it does not impose requirements for appropriate individualized education for students with disabilities. Instead, it imposes more general requirements.

For example, a private school may not, on the basis of disability, refuse to allow a qualified individual with a disability to participate in its program. Such a school may not impose eligibility criteria that screen out individuals with disabilities from participation unless the criteria are necessary to the provision of the school's services. Such a school must make reasonable modifications to its policies, practices, and procedures where necessary to provide its services to individuals with disabilities, unless to do so would fundamentally alter the nature of the services. A covered private school must also ensure effective communication with students with disabilities by providing necessary auxiliary aids or services, unless doing so would fundamentally alter the nature of the services offered or would result in an undue burden.

cc: Records, Chrono, Wodatch, McDowney, Hill, FOIA

The requirements of title III are described in greater detail in the enclosed regulation implementing title III and in the enclosed Title III Technical Assistance Manual. If you have further questions, you may call the ADA information line at (800) 514-0301 (voice) or (800) 514-0383. Members of the Disability Rights Section staff are available to answer questions on the information line on Monday, Tuesday, Wednesday, and Friday from 10:00 a.m. to 6:00 p.m., Eastern time. On Thursday, the information line is staffed from 1:00 p.m. to 6:00 p.m.

I hope this information is helpful to you.

Sincerely,

John L. Wodatch

Re: Opinion on the Applicability of Federal Statutes to Tax Exempt Private Schools
-Section 504 of the Rehabilitation Act
-Individuals with Disabilities Education Act

Madame Attorney General,
One of my children suffers from Attention Deficit Disorder (ADD) and attends a private school. He thrived in the lower grades as a result of the small class sizes and very sensitive teachers. As he moved on to middle school recently, the attitude seems to ahve changed from one of nurturing to expectations of self reliance; a standard which he is incapable of meeting due to his condition. So, too, have the administration's policies with regard to assistance to ADD children. Where they had provided duplicate sets of texts for him in the past free of charge, they now are asking us to pay for the books. Where his teachers previously willingly provided advance curriculum schedules, the administration now will not allow it. No structured programs for educationally disabled children are offered. Their Legal Counsel has stated that the referenced Federal Statutes are not applicable because the school receives no Federal Funds.
It is my contention that as not-for-profit institutions, private schools receive funding from the United States Government in the form of exemptions from corporate income taxes and, therefore, the referenced Federal Statutes are applicable.

My ultimate goal is to work with the Board, Administration and Teachers to help them develop the appropriate support network and systems for children suffering from ADD and other learning disabilities. At this point in time, however, it appears that I need a '2"x4" to get their attention' as the old joke goes.

Assuming that my interpretation is correct, a letter from you stating your opinion in this matter would serve as a catalyst for positive action. If my assumptions are not right, your letter would help me formulate a new course of action. Thank you.

MAY 6 1996

The Honorable J. Bennett Johnston
United States Senator
1510 One American Place
Baton Rouge, Louisiana 70825

Dear Senator Johnston:

This letter responds to your inquiry on behalf of your constituent, Mr. XX , a restaurant owner, who expresses concern about what he regards as intrusions into private and commercial enterprises by the Americans with Disabilities Act of 1990 (ADA). In particular, Mr. XX appears to have concerns about questions that the ADA may not permit an employer to ask in pre-employment interviews. Please excuse our delay in responding.

Mr. XX requests the constitutional basis for the ADA. The stated purpose of the ADA is "to provide a clear and comprehensive national mandate for the elimination of discrimination against individuals with disabilities." 42 U.S.C. Section 12101(b)(1) (Supp. II 1990). Congress invoked the full sweep of its authority under the Commerce Clause and the Fourteenth Amendment to accomplish this mandate. For a thorough discussion of the constitutional authority underlying the ADA, we are enclosing two legal briefs pertinent to your constituent's question. Pinnock v. International House of Pancakes Franchisee, et al. 844 F.Supp. 574 (S.D. Cal. 1993), and Abbott v. Bragdon, Civil No. 94-0273-B, 1995 WL 775019 (D. Me. Dec. 22, 1995).

With respect to your constituent's question about pre-employment inquiries, the ADA prohibits discrimination in employment against a qualified individual with a disability. The Equal Employment Opportunity Commission (EEOC) has the authority to enforce the ADA's employment provisions, including setting employment policies. A copy of the EEOC's guidance regarding preemployment questions is enclosed.

cc: Records, Chrono, Wodatch, McDowney, O'Brien, FOIA

01-04259

For further information, you or your constituent may contact EEOC's Information Line at 1-800-669-4000. We also are enclosing copies of EEOC's brochure, The Americans with Disabilities Act, Your Responsibilities as an Employer, for information on employment requirements under the ADA, including those pertaining to pre-employment inquiries.

I hope this information will assist you in responding to your constituent. As you requested, we are returning your constituent's correspondence.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

Dear Sir,

As a restaurant owner, I have attached an article from the Restaurant Association monthly magazine. I was alarmed at the intrusions the national government has made with meddling into the business affairs of private enterprise and all commercial entities.

Please quote me the Constitutional article, section and clause of our beloved CONSTITUTION that grants federal jurisdiction for this local interference and domination.

What are your proposals to rectify this situation.

Looking forward to your reply.

Yours truly,
XX

DAMAGES ASSESSED AGAINST EMPLOYER WHO ASKED THE WRONG QUESTIONS DURING INTERVIEW

In a decision of first impression, a jury awarded a job applicant $45,000 this summer under the federal Americans with Disabilities Act (ADA) solely because the applicant was asked questions during a job interview that the ADA disallows. The case involved a company right here in Louisiana.

Prior to this decision, awards under discrimination laws for simply asking the wrong question were tied to other substantiated harm to the applicant, such as denial of the job. Here, however, the jury found there was no discrimination in refusing to hire the applicant, but awarded damages anyway simply because the interviewer committed "technical violations" by asking the applicant about his facial scars and how other persons reacted to his appearance.

This case emphasizes how important it is to carefully scrutinize the questions being asked during a job interview. The following outlines some questions that the ADA permits or does not permit.

Questions that may be asked include:

* An employer may ask whether an applicant can perform specific job functions. (question may be asked if it is not worded in terms of a disability, if it is asked of all applicants, and if a job description is provided.)

* If an applicant has a known disability that would appear to interfere with performance of a job function, the employer may ask

the applicant to describe or demonstrate how these functions will be performed, with or without an accommodation.

Questions that may not be asked

* Have you ever been hospitalized? If so, for what condition?

* Have you ever been treated for a mental condition?

* Have you ever had a major illness in the last few years?

* How many days were you absent from work because of illness last year?

* Do you have any physical defects that would preclude you from performing certain work for which you are applying?

* Are you taking any prescribed drugs?

* Have you ever been treated for drug addiction or alcoholism?

* Have you ever filed for workers' compensation insurance?

* Will you need time off for medical treatment?

Also, employers should keep in mind that other questions may create potential legal problems under other federal and/or state anti-discrimination laws, including questions about:

* marital status or number of children

* education requirements beyond what may be essential for the job

* arrest and/or conviction records

* citizenship

* birthdate.

MAY 7 1996

XX
San Marcos, California XX

Dear Ms. XX

This is in response to your letter to Mrs. Clinton, which was referred to this office for reply. You request help in obtaining large-print bills and bank statements.

The Americans with Disabilities Act (ADA) prohibits discrimination on the basis of disability by State and local government entities and places of public accommodation and commercial facilities. The services of public utilities, such as telephone companies, gas companies, electric companies, etc., generally are not covered by the ADA or any other Federal law that would require their providing large-print bills.

However, the ADA and the regulation issued by the Department under title III of the ADA (enclosed) require public accommodations, such as banks and retail stores, that are privately owned and operated, to provide auxiliary aids and services necessary to ensure effective communication with patrons with disabilities. Large print materials are one type auxiliary aid.

A public accommodation is not required, however, to provide any auxiliary aid or service that would fundamentally alter the nature of the services offered or that would result in an undue administrative or financial burden. Furthermore, while the title III regulation encourages public accommodations to consult with consumers about what they desire in the way of auxiliary aids, it does not require public accommodations to choose one aid over another only because the consumer chose it. Thus, a bank may make its statements accessible to persons with vision impairments by providing them in large print or on computer disk or tape or by any other effective method.

Dear Mrs Clinton,

I am legally blind and I have a problem!!
I am a long time member of a very good HMO.
I live alune and run my own home. I have attended seminars that have taught me to be mostly independent. I take care of myself and home.

My problem? I can not-even with my high powered magnifier- read the amounts due on my bills. or bank statements. I have made requests for large print bills and so far all replys have been negative.
I have offered proof of need from my dovtors. In the meantime I do consider it an invasion of my privacy to ask neighbors to read these amounts to me.
my debts are my own business!!

Many of these bills are printed in Spanish, Italian and many other langiages-but these companys do not care to help us who are attempting to stay off welfare. There are many of us and we are willing to present proof with our request.

Can you help me to find the proper people to make my appeals to? Your interest would be greatly apprciated.

GOD bless you and the President.

Sincerely,

XX

MAY 8 1996

XX
Jacksonville, Florida XX

Dear Mr. XX :

I am responding to your letter regarding assistive listening devices in movie theaters. Your letter was also forwarded by Congresswoman Fowler. Please excuse the delay in responding.

As you know, the Americans with Disabilities Act (ADA) requires places of public accommodation, such as movie theaters, to ensure effective communication with their customers who have hearing impairments by furnishing appropriate auxiliary aids and services. Assistive listening devices such as those described in your letter are one type of auxiliary aid.

In addition to the requirement to provide auxiliary aids, the ADA requires places of public accommodation to maintain required accessible features such as assistive listening devices, in operable working condition. This obligation is described in the enclosed regulation implementing title III of the ADA. 28 C.F.R. S 36.211.

Sincerely,

John L. Wodatch

Dear Sir:

I have been wearing two hearing aids since 1940. I also like very much to attend movies, particularly in those new theaters that come equipped with and supply their patrons with special hearing devices.

When these first came out I thought they were a godsend, but in the past year it has been so exasperating. The theaters do not maintain them. The batteries run down and the wires develop cracks.

I would be very grateful if you would write to the following theaters reminding them of their obligations under Title III of Public Law 333-106 (42 U.S.C.A. 12101 et seq):

MAY 13 1996

Alice D. Weingart, President
S.E. Florida Chapter, SHHH
4145 Cypress Reach Court, Apt. 301
Pompano Beach, Florida 33069

Dear Ms. Weingart:

Your letter to Attorney General Janet Reno was referred to this office for reply. You requested that the Department of Justice urge the National Safety Council to comply with the Americans with Disabilities Act (ADA) through the provision of auxiliary aids in their driver safety course.

Title III of the ADA requires that auxiliary aids and services be provided by public accommodations to ensure "effective communication" for individuals who are deaf or hard of hearing or who have impaired vision or speech. Under title III, "public accommodations" are private entities who own, operate, lease, or lease to, places of public accommodation, such as places of education. The National Safety Council's driver safety course may be a covered entity under title III if it is privately operated.

The ADA's auxiliary aids requirement is intended to be flexible, reflecting the variable nature of what constitutes effective communication. In addition to the specific nature of the disability involved, factors used to determine communication effectiveness in any given circumstance include the length, complexity, and significance of the information being exchanged. The auxiliary aids provisions of title III do not compel a covered entity to comply with a unilateral determination of an individual with a disability that a particular auxiliary aid is essential to effective communication. Ideally, the covered entity and the individual should arrive at a mutually acceptable choice through a process of consultation.

Under section 36.301(c) of the title III regulation, when an auxiliary aid or service is necessary to ensure effective communication, the covered entity must absorb the cost of this aid or service, unless it would result in an undue burden. The term "undue burden" means "significant difficulty or expense."

cc: Records, Chrono, Wodatch, McDowney, Milton, FOIA
n:\udd\milton\letters\auxaid.wei\sc. young-parran
01-04268

In determining whether the provision of an aid or service would result in an undue burden, covered entities should consider their overall financial resources. If the provision of a particular auxiliary aid or service would result in an undue burden, the public accommodation must provide an alternative auxiliary aid or service, if one exists, that would not result in an undue burden but would nevertheless ensure, to the maximum extent possible, effective communication with individuals with disabilities.

The National Safety Council states that the provision of closed captioning on driver safety course videos would violate copyright laws. However, in most circumstances, it is anticipated that the need for captioning can be addressed in the ordinary course of the licensing agreements between the National Safety Council and the copyright owner. Therefore, copyright laws should rarely, if ever, be an obstacle to the provision of closed captioning. If copyright posed an insurmountable obstacle to captioning, the National Safety Council may, nevertheless, be required to find another way to make the driver safety course accessible to persons with hearing impairments.

I hope this information is helpful to you.

Sincerely,

John L. Wodatch
Chief
Disability Rights Section

Dear Ms Reno,

The South Florida Chapter of The National Safety Council's reply to our request for a Driver Safety Course directed towards the hearing impaired was, at best, wanting. (See enclosed letter from the Chapter.)

As the enclosed article from the bulletin of SHHH national points out, we tried to show the Council Chapter how they could meet the needs of a large segment of the population without altering their presentation. Were they to avail themselves of the various assist-ive devices which are used at our meetings, the Driver Safety Course could be made available, all over the country, to the deaf and hard of hearing communities.

AARP, with funding from United Hearing and Deaf Services for Real-Time Captioning, is presenting the course for $8.00 enabling these drivers to receive an insurance credit.

Would you please use your good offices to prod the National Safety Council to comply with the Americans With Disabilities Act.

Thank you for your help.

Cordially,

Alice D. Weingart, President

RE: Late Deafened Safety Courses

Dear Ms. Weingert:

I have investigated this entire area and it is impossible for us to alter any of the videos due to copyright laws. I have contacted our national office and they do not have any of the mature driving courses using closed captions. However, we have contacted the Greater Fort Lauderdale Convention Center and they have, for your use, nineteen headsets which could be utilized by the late deafened people who want this course. Registration could be handled via sending a list of people to our office.

We are willing to set up the entire program at a cost of $12.00 for each of the participants. We are also willing to pay for the parking at the convention center to limit the cost to the individuals taking this course.

I need your quick response so that I may make the final arrangements with the convention center. Looking forward to hearing from you soon and thank you for your cooperation.

Sincerely,

Murry Corito
Executive Director

The Honorable John W. Olver
Member, U.S. House of Representatives
463 Main Street
Fitchburg, Massachusetts 01420

Dear Congressman Olver:

This is in response to your inquiry on behalf of your constituent, XX , of Fitchburg, Massachusetts. We apologize for the delay in our response.

Ms. XX asks if the Americans with Disabilities Act of 1990 (ADA) requires the United States Taekwondo Union, Inc. (USTU) to have appropriate First Aid supplies available during classes and to have their instructors certified in First Aid and CPR.

Taekwondo schools may be covered by title III of the ADA, which prohibits discrimination on the basis of disability by private entities that own, operate, or lease places of public accommodation. Places of education, entertainment, gathering, recreation, and exercise are places of public accommodation.

An association or union, such as USTU, would only be subject to title III to the extent it owns, operates, leases, or leases to a place of public accommodation. Therefore, when the USTU contracts to use such a facility, it may be subject to title III with respect to the operation of that facility.

An entity covered by title III must make reasonable modifications to its current policies, practices, and procedures in order to ensure that those policies do not exclude individuals with disabilities from participation in the programs that they offer. Covered entities are not required to make modifications in their programs that would fundamentally alter the nature of the program or services provided, nor are they required to expand the scope of their program to provide programs or services that they have not previously offered.

cc: Records Chrono Wodatch Hill McDowney Berger FOIA
N:\UDD\BERGER\CONGRESS\OLVER.REV\secy.johnson

One cannot assume, however, that people with disabilities are in greater need of First Aid than others. Therefore, First Aid preparation is not an ADA issue, but, rather, one of good safety practice. Similarly, the negligence issues raised by Ms. XX are governed by State law and not by the ADA.

Enclosed, please find a copy of the Department of Justice regulations implementing title III. I hope this information will be of assistance when responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

Dear Attorney General Barr,

I am writing to you on behalf of my constituent, XX , of Fitchburg, Massachusetts.

I have enclosed a letter that I received from Mrs. XX regarding her concerns about the United States Taekwondo Union, Inc. (USTU). Mrs. XX asks if the ADA, with regard to reasonable accommodations, could require that USTU instructors be certified in the areas of First Aid and CPR.

I would appreciate your assistance in addressing Mrs. XX concerns regarding this matter. If you have any questions, please feel free to contact my aide, Peggy Bird, in my Fitchburg district office.

Thank you for your time and attention to my request.

Sincerely,

John W. Olver
Member of Congress

JUN 4, 1996

The Honorable Craig Thomas
United States Senator
2632 Foothill Boulevard, Suite 101
Rock Springs, Wyoming 82901

Dear Senator Thomas:

I am responding to your letter on behalf of your constituents, XX and XX , regarding the Americans with Disabilities Act (ADA). Please excuse the delay in responding.

Your constituents' correspondence alleges that the rules of the subdivision in which they live prohibit snowplowing in the winter. Your constituents argue that this rule may inhibit individuals with disabilities from visiting them at their homes.

Title II of the ADA prohibits discrimination on the basis of disability by State and local government entities. Title III of the ADA prohibits discrimination on the basis of disability by places of public accommodation, which are, by definition, nonresidential. The Fair Housing Act prohibits discrimination on the basis of disability in residential facilities. It is not clear from your constituents' correspondence which, if any, of these provisions covers the Hoback Ranches Board of Directors.

Under the ADA, the local government may not deny services to individuals on the basis of disability, if it makes those services available to other citizens. Generally, however, it is not required to provide special programs or services for individuals with disabilities if it does not provide such programs or services for individuals without disabilities.

The rule against snowplowing that your constituents complain of does not appear to discriminate on the basis of disability because the rule affects both people with disabilities and people without disabilities equally.

I hope this information is helpful to you in responding to your constituents.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

01-04281

March 4, 1996

Hoback Ranches Board Of Directors
P.O. Box 33
Bondurant, Wy 82922

Directors,

We are writing in regards to the newly adopted rules of no snowplowing in Hoback Ranches Subdivision. These rules were adopted without the knowledge or consent of the residents of Hoback Ranches, along with the general public which they affect. We know of hundreds of people that feel as strongly opposed to this action as we do.

When we purchased our property there were no restrictions of this nature in our deed or in the covenants.

By attempting to stop snow plowing, which is a way of life in Wyoming, you are denying us and the general public our constitutional rights.

First of all our equity is being stagnated. This by people who are not year round residents.

Second, we are registered Sublette County voters and taxpayers. We are being denied some of these services, that we pay for, during the winter season. One of the reasons given for the new rules was because of safety. How safe is it when we are denied medical, fire and sheriff personnel? How safe is it when our vehicles, snowmobiles and trailers have to be parked out on the highway? Not too safe since there have been break ins and thefts. If you think your home is safer in the winter, then we suggest you think again.

Snowmobilers with sleds can empty out a house and depart in many directions and never be tracked.

Third, we have friends and family that are disabled and would be unable to visit us unless the road was plowed. We find this to be discriminating and we feel against the American Disabilities Act. This is a public road to be used by the public.

These legal rights are being denied by you, the same biased Board of Directors, who in December of 1995, illegally closed and padlocked a gate across this public road. In a meeting called by the Civil Attorney of Sublette County in regards to the locking of the gate, this same biased Board of Directors denied the other residents, whom you are suppose to be representing on their behalf, their legal rights to equal time to state their cause. When finally given a chance to speak they were unprofessionally interrupted and at one point were called liars.

We do not feel this biased Board of Directors has the right to continue to take away our constitutional rights.

Respectfully,

XX

H.R.I.S.D.
Box 33
Bondurant, Wyoming 82922

Directors:

This letter is in reference to the past action of building and locking a gate across a public road -Rim Road- approximately 8 miles south of Bondurant. Forestry personnel say that Rim Road is a public road and this action was illegal and is a dangerous thing to do.

I understand your group has taken it upon yourselves to limit the lifestyles and property use of residents that choose to live on Hoback Ranch Estates all year. Although you don't live full time at Hoback Ranch Estates, you feel you have the right to control the lives of those that do. This is dictatorial and not the way our republic was meant to function.

The impact of your decision affects many facets of the residents lives and I can see no logical reason for such an action to be taken by your group.

Your decision affects residents economically by having a portion of their tax money not being used to keep Rim Road open; affects safety as no ambulance, police or fire vehicles can reach the properties if the roads are not plowed; the property is devalued due to the limited access and most importantly, you are discriminating against any handicapped person that might visit there, if they can't ride snowmobiles due to their handicap.

I hope your group can realize how untenable your position is in trying to control the lives and property of the full time residents. As I look over the deed and covenants there are no provisions for restricting usage of the property to summer season only.

Respectfully,
XX

Ms. Marcia Beach
Executive Director
Advocacy Center for Persons with Disabilities, Inc.
2671 Executive Center Circle West
Suite 100
Tallahassee, Florida 32301-9071

Dear Ms. Beach:

Your letter to Attorney General Janet Reno has been referred to me for response. Your letter indicates that the Florida State legislature is considering a proposal to reallocate funding for such care of individuals with developmental disabilities from one program ("ICF/DD") to another (Home and Community Based Waiver Act) without changing the type of services provided, and to cut the amount of funding. You allege that this action would violate the Federal medicaid statute and the Americans with Disabilities Act (ADA). Please excuse our delay in responding.

The issues that you raise primarily involve Florida's administration of the Federal Medicaid program. Inquiries and complaints regarding the implementation of Medicaid program requirements should be directed to the Department of Health and Human Services at:

Health Care Financing Administration
Department of Health and Humans Services
230 Independence Avenue, S.W.
Room 5400 Cohen Building
Washington, D.C. 20201.

Title II of the ADA requires States to administer services, programs, and activities, "in the most integrated setting appropriate to the needs of qualified individuals with disabilities." 28 C.F.R. S 35.130(d). In some circumstances it may be a violation of the ADA for a State only to provide services to an individual with a disability in an institutional,

as opposed to a community, setting. Helen L. v. Didario, 46 F. 3d 325 (3d Cir. 1995).

cc: Records, Chrono, Wodatch, McDowney, Hill, FOIA
n:\udd\hille\policylt\beach.ltr\sc. young-parran

01-04285

An individual with a disability may take action under title II by filing a private suit in Federal district court or by filing a complaint with the Department of Justice or the appropriate "designated agency." The regulation implementing title II designates the U.S. Department of Health and Human Services (HHS) as the agency responsible for investigating alleged violations of title II by providers of health care and social services. The address for filing complaints with HHS is:

Office for Civil Rights
Department of Health & Human Services
330 Independence Avenue, S.W.
Room 5400 Cohen Building
Washington, D.C. 20201.

I hope this information is helpful to you.

Sincerely,

April 29, 1996

The Honorable Janet Reno
Office of the Attorney General
U.S. Department of Justice
10th and Constitution Avenue, NW
Washington, DC 20530

Dear Madam Attorney General:

Florida is preparing, in the last few days of the legislative 1996 session, to grossly violate the provisions of both the ICF/DD and Home and Community Based Waiver Acts (HCBW). They are doing so in a way that is harmful to individuals with DD and that violates the rights of individuals with DD under those acts and under the Americans with Disabilities Act. They are doing so in

violation of the terms of Florida's waiver approved by the U.S. Department of Health and Human Services in 1992.

Florida is planning to eliminate all ICF/DD funding used to finance nursing home-type supports in private institutions and totally replace such funding with a greatly reduced amount of funding under the Home and Community Based Waiver. They are totally disregarding the fact that the purpose of the HCBW is to allow individuals to move from institutional and nursing home settings such as most ICF/DD's in Florida, into inclusive community settings. Florida will not be moving the individuals into the community - just changing the funding. Because of the drastic reduction in funding by the Florida Legislature (a cut of over 35 million dollars from the Developmental Services program), the same services that are presently available to the individuals under the ICF/DD program will not be available to them. Most individuals will be left without adequate supports in the same 64 bed nursing home-type ICF's and other similar structures.

Further violated will be the right of individuals under the ICF/DD program to be informed about the Home and Community Based Waiver and given a choice of either institutional (ICF/DD) services or home and community based

services. As you know, Federal law does not allow a state to force individuals into the HCBW program. This is particularly harmful to individuals when there are insufficient funds to provide necessary services under the HCBW.

The Advocacy center supports the phasedown and closure of public and private institutions that confine individuals with developmental disabilities. However, this proposal does not provide for phasedown or closure of any institution(s). It simply uses funds approved for that purpose. The legislature is scheduled to Sine die in three days.

We urgently request that you notify Florida of this imminent violation which we believe could jeopardize all medicaid funding to Florida.

Sincerely,

Marcia Beach

XX

Dear Mr. XX :

The Disability Rights Section of the Civil Rights Division, Department of Justice, has reviewed your recent inquiry to President Clinton about alleged discrimination on the basis of disability at an All Seasons Resorts residential camp facility located in Ohio. You indicated that you filed a lawsuit regarding the incident at a local court in Dayton, Ohio. We have carefully reviewed the issues raised and have the following suggestions with respect to them.

Title II of the Americans with Disabilities Act (ADA) prohibits discrimination on the basis of disability in the services, programs, and activities of public entities (State and local governments). This office is responsible for investigating alleged violations of title II by public entities for which it is the designated enforcement agency, including State and local law enforcement programs and court systems. Absent exceptional circumstances, however, this office does not intervene in litigation in State or local courts and does not review decisions of such courts on the merits of cases pending before them. Accordingly, we have determined that intervention by the Department of Justice in your court case is inappropriate. We suggest that you contact private counsel for advice on how to obtain a decision in the case, or otherwise bring the case to closure by the courts.

The information you provided about the incident describes it as involving an All Seasons Resorts facility, which may be a place of public accommodation, subject to title III of the ADA. Title III prohibits discrimination on the basis of disability by places of public accommodation. If an All Seasons Resorts facility constitutes a recreational establishment, it may be covered by title III of the ADA, and may be required to reasonably modify its policies regarding the services it provides in order to afford those services to individuals with disabilities, unless it can demonstrate that such policy modification would fundamentally alter the nature of the services. In addition, the facility may be required to remove

physical barriers to access to the extent that such barrier

cc: Records, Chrono, Wodatch, McDowney, Talian, FOIA
n:\udd\talian\congress\XX .hud\sc. young-parran

01-04289

removal is readily achievable, i.e., easily accomplishable and able to be carried out without much difficulty or expense. Coverage and enforcement of title III of the ADA is described in the enclosed manual.

Strictly residential facilities, however, are not places of public accommodation under the ADA. Instead, such facilities may be required to meet nondiscrimination and accessibility requirements under the Fair Housing Act, enforced by the following office:

Ms. Sara K. Pratt
Director, Office of Investigations
Fair Housing and Equal Opportunity
Department of Housing and
Urban Development
451 7th Street, S.W.
Room 5204
Washington, D.C. 20410.

I hope this information is useful in resolving your concerns.

Sincerely,

John L. Wodatch
Chief
Disability Rights Section

JUN 29, 1996
JUN 25, 1996

Dear Mr. XX

This letter responds to your letter to President Clinton about the state of Hawaii's quarantine of guide dogs and other animals entering the state. We apologize for the delay in responding to you.

The Americans with Disabilities Act of 1990 ("ADA") authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist your constituent in understanding the ADA's requirements. However, it does not constitute a legal interpretation and it is not binding on the Department.

The Department of Justice is aware of the quarantine imposed by the state of Hawaii on all carnivores entering the state, and agrees with you that the quarantine violates the ADA. As the article enclosed with your letter points out, the quarantine has been challenged in federal court in Hawaii. The district court in Hawaii ruled that the ADA did not apply to the quarantine, and that even if it did apply, the state had complied with the ADA by "modifying" the quarantine by allowing a person with a disability to stay in a cottage at the quarantine station.

The parties challenging the quarantine appealed the decision to the United States Court of Appeals for the Ninth Circuit (the Circuit court that has appellate jurisdiction for cases decided

by federal district courts in Hawaii). The Department of Justice filed a friend of the court brief with the Ninth Circuit, supporting the position of the individuals challenging the quarantine, and urging the appellate court to reverse the decision of the lower court. The United States argued in its brief that the ADA did apply to the quarantine, and that modifications were needed, and could be made, to allow individuals with disabilities who use guide dogs to travel freely to and from Hawaii.

cc: Records; Chrono; Wodatch; Magagna; Contois; McDowney; FOIA
udd\contois\XX

The Ninth Circuit ruled that the ADA does apply to the quarantine, and held that Hawaii's quarantine requirement "discriminates against visually-impaired individuals by denying them meaningful access to state services, programs and activities by reason of their disability in violation of the ADA." The Ninth Circuit refused to rule, however, on whether the modifications proposed by the plaintiffs (a system of rabies vaccinations and antibody tests, accompanied by identifying microchips) were the kind of reasonable modification required by the ADA. It has sent the case back to the district court in Hawaii for further factual inquiries on this issue. The Department of Justice will continue to monitor the case, and may again participate in the case, in an effort to compel Hawaii to comply with the requirements of the ADA.

I hope this information addresses the concerns expressed in your letter to the President.

Sincerely,

John L. Wodatch
Chief
Disability Rights Section
Civil Rights Division

01-04293

XX
February 23, 1996///

The Honorable William Clinton
President of the United States
The White House
1600 Pennsylvania Ave.
Washington, DC

Dear Mr. President:
I am writing you a letter concerning a matter of freedom in the United States of America that concerns one hundred thousand guide dog users who are also voters. We must be able to travel the entire United States of America if the Americans with Disabilities Act is to be worth the paper that it was writen on.
I am a totally blinded veteran who tried to vacation in the beautiful state of Hawaii which has been called paradise. I am an owner of a guide dog by the name of Bubba. We arrived in Hawaii on Labor Day 1994. While disembarking from the aircraft and while everyone was being greeted with flower leis I was met by an officer of the state agricultural department who then informed me that my guide dog was to be confiscated and to follow him to a van that was to take me to a warehouse where my guide dog was to be taken.

I thought that the Americans with Disabilities Act was there to protect my guide dog as a prosthetic for my individual freedom and independence which I value as much as life itself. I found that even with proper vaccination records and documentation this was not sufficient. They made veiled threats against the life of my guide dog if I did not comply with the unjust rules of the state. So after about two hours of a passive sit-in in front of the cage where they held him, and after they told me that they were going to dump me off of the airport grounds without a white cane, I decided to go with them to the animal quarantine station. I was held in deplorable conditions. I was forced to stay in a little cottage with an eight foot fence around it. It was padlocked and there was the overwhelming smell of the 1700 animals waste that I would spend the next twenty days inhaling with the Trade Winds. I still hear them barking to this day.

I found that many of the rules that govern the station were not adhered to, and they were given to me in print form and they were not read to me at all. There were no communication devices available nor were there any pull cords, fire alarms or extinguishers.

I was told that I should not have come to Hawaii alone, that most disabled people come with a sighted guide. I quickly informed the director of the quarantine station that this is what my guide dog was for. Then I was told that I would have to pay a
01-04294

registration fee of twenty dollars, five dollars a day for one hundred and twenty days or for the length of my stay and ten dollars for an health certificate. After adding this and multiplying this figure by 1700 it came to be about $3,213,000 annually.

/The quarantine station also sold flee powder and different vaccinations. I found out that the University of Kansas perfected a test that can detect the rabies strain within forty eight hours, but they refuse to use it because of the lost monies. I believe that an individual's freedom is worth more than that. At least that's why I joined the Marine Corps. It is in that great tradition that I feel I must be one of the first to fight for the rights and freedom of all disabled persons that use animal prosthetics. Now I am blind and can not enjoy my fiftieth state like any other citizen. Maybe disabled people are really third class citizens after all. Is the state of Hawaii above the rest of the United States and free not to follow the rules of the Americans with Disabilities Act?

I also found out that circus animals do not have to go through this quarantine, allegedly because those animals are with there trainers. But I am with my guide dog more than any one is ever with a lion,elephant or any other circus animal. I also found out that I can travel to Puerto Rico, Mexico, the Bahamas, Canada, and a few other countries without having to put my guide dog in any quarantine or having to notify them of my arrival thirty days ahead of time. This really bothers me because we are the United States of America. I guess all that I am asking is that you, Mr. President, check out the practice and legality of the state of Hawaii's treatment of disabled people who choose to use animal prosthetics and force Hawaii to comply with federal law because disabled persons may what to explore Diamond Head or run on the beautiful beaches of the island without the hassle of a one hundred and twenty day delay. As you know, no one can vacation that length of time. Please read the article accompanying this letter. I eagerly await your reply. Thank you very much, Mr. President.

Sincerely,

XX

P.S. Four more Years!

01-04295

JUL 12, 1996

The Honorable Russell D. Feingold
United States Senate
502 Hart Senate Office Building
Washington, D.C. 20510

Dear Senator Feingold:

This is in response to your recent letter on behalf of one of your constituents, who would like to know whether the Americans with Disabilities Act of 1990 (ADA) requires hotels and motels to supply closed captioning on all televisions. We apologize for the delay in our response.

Title III of the ADA covers places of public accommodation,

including hotels and motels. Section 36.303(e) of the Department's regulation implementing title III (enclosed) states that "Places of lodging that provide televisions in five or more guest rooms... shall provide, upon request, a means for decoding captions for use by an individual with impaired hearing." Therefore, while not every television is required to have closed captioning, a hotel must be prepared to supply closed caption decoders on request.

The Television Decoder Circuitry Act requires manufacturers to include closed captioning capability in all new televisions 13 inches and larger. Therefore, as old televisions in hotels are replaced with new ones, the requirement for decoders will be automatically met.

I hope this information will be of assistance to you in responding to your constituent.

Sincerely,

Deval L. Patrick

01-04297

JUL 12, 1996

The Honorable Ernest F. Hollings
United States Senate
125 Russell Office Building
Washington, D.C. 20510-4002

Dear Senator Hollings:

This letter responds to your inquiry on behalf of your constituent, Mr. XX , concerning coverage of a 401k plan under the Americans with Disabilities Act of 1990 (ADA). We apologize for the delay in our response.

Mr. XX letter indicates that he has a hearing impairment that prevents him from telephonically making changes to his 401k account. He further indicates that the company managing the account does not respond to his written requests for account changes.

If Mr. XX 401k account is a fringe benefit of his employment, it may be covered under title I of the ADA. Title I prohibits employers from discriminating on the basis of disability in employment matters, including fringe benefits and insurance. Title I requires employers to make reasonable accommodations to ensure that employees with disabilities have equal opportunities to participate in fringe benefit programs with non-disabled employees. A reasonable accommodation in the situation Mr. XX describes might involve altering account access procedures to allow written changes rather than telephonic ones for an individual with a hearing impairment.

Mr. XX employer may not escape its obligation to provide reasonable accommodation by contracting with another entity, such as CIGNA, to provide or manage its fringe benefits. The employer must ensure that the necessary reasonable accommodations are provided, either by the contractor or by the employer itself.

SIR:

I HAVE COME ACROSS A PROBLEM THAT I THINK WOULD BE OF INTEREST TO YOU. IT CONCERNS MY 401K PLAN MY EMPLOYER HAS CONTRACTED IT TO CONNECTICUT GENERAL LIFE INSURANCE COMPANY KNOWN AS C I G N A. MY EMPLOYER'S MAIN RESPONSIBILITY IS TO MAKE THE REQUIRED SALARY DEFERRAL CONTRIBUTIONS AS INDICATED BY ME.

CIGNA HOLDS THE FUNDS IN THE VARIOUS ACCOUNTS THAT I HAVE CHOSEN FROM THEIR PROSPECTUS. THE PROSPECTUS STATES THAT I CAN MAKE CHANGES AS THE MARKET FLUCTUATES BY THE USE OF THEIR 800 PHONE NUMBER.

NOW THIS IS WHERE THE PROBLEM STARTS, I'AM HARD OF HEARING. SOMETIMES I CAN HEAR AND SOMETIMES I CAN'T. SEVERAL TIMES I TRIED TO USE THE PHONE BUT I JUST COULD NOT HEAR WELL ENOUGH. SO I WROTE A LETTER TO C I G N A EXPLAINING MY PROBLEM TO THEM, TWO LETTERS AND AS OF THIS DAY I HAVE NOT GOTTEN AN ANSWER.

I KNOW THERE WAS A DISABILITY LAW THAT WAS PASS, I BELIVED SOMETIME IN 1994.
IF C I G N A IS NOT ANSWERING TO A CLIENTS PROBLEM, ARE THEY BREAKING THE LAW? IF NOT I FEEL THE DISABILITY LAW COULD USE SOME REVISIONS.

SINCERELY YOURS
XX

JUL 12, 1996

The Honorable Lynn Woolsey
Member, U.S. House of Representatives
1101 College Avenue
Suite 200
Santa Rosa, California 95404

Dear Congresswoman Woolsey:

This is in response to your inquiry on behalf of your constituent, Mr. XX who seeks information about the applicability of the Americans with Disabilities Act (ADA) to a mobile home park. I apologize for the delay in responding.

Title III of the ADA prohibits discrimination on the basis of disability by places of public accommodation and commercial facilities. Strictly residential facilities do not fall within the statutory definitions of places of public accommodation and commercial facilities. Accordingly, the individual dwelling units in residential communities (such as mobilehomes in mobilehome parks) are not covered by title III of the ADA. Common areas (such as recreational facilities) in such communities are also not covered where use is restricted exclusively to residents and their guests. However, if a residential community opens up common areas to general use by non-residents, it may lose its strictly residential character. Areas open to the public will probably be covered by the ADA if common area activities or facilities fall within one of the twelve categories of places of public accommodation in title III. For example, rental offices that are open to the public would be considered rental establishments or service establishments under title III. Meeting rooms, if not restricted to tenants and their guests, would be places of public gathering covered by the ADA. Parking, entrances, access routes, and restrooms serving the areas covered by the ADA would also be covered. If certain facilities are made available to the public only for certain events, they will be covered by the ADA only for those events that are open to people other than tenants and their guests.

Mobile home parks may also be covered by the Fair Housing Act, 42 U.S.C. SS 3600-3620. That Act prohibits discrimination

on the basis of disability in the sale or rental of dwellings.

XX California XX

Lynn Woolsey
Member of Congress
439 Cannon Bldg
Washington, D.C. 20515

Dear Congresswoman Woolsey:
While attending your meeting with Veterans, that was postponed once, on October 4, 1995 at the Petaluma Veterans Memorial Building in Petaluma, California, the subject matter of enforcement of The Americans With Disabilities Act within mobilehome Parks were addressed. Your Field Representative, Jim Chaaban stated to me he would look- up the previous records and contact me. Your letter dated November 8, 1995, which was received on November 17, 1995 addressed a very, very limited reply that I'm totally dissatisfied with.
This problem was addressed, to you to resolve, not assignment of "PROJECTS" for me to work off for resolution!!!
ITEM 1: Mr. Grable was indeed contacted at the number provided (707 528-9941) on many occasions, it took a call to your Santa Rosa Office to complain he did not bother to return my calls for his office to respond. When they did, a female that could not speek nor understand English well contacted me three and a half (3 1/2) weeks after to tell me in exceptionally broken words they could not help me.
ITEM 2: Golden State Mobilehome Owners League were contacted even prior to my contacting your office for assistance. They mentioned it was a Federal Law and could not assist me. A Mr. Coleman C. Persily sent you a copy of my letter dated April 4, 1995 (see Encl) requesting a copy of the law, to date, nothing has been received.
This problem was addressed to you Congresswoman Woolsey, not for you to think up someone else to address the problem to. In short, there is an error in the Federal Law, you are my Representative in Congress, and its your sworn job for you/or your office to correct, not my job to bounce from one recommendation your staff can think up to "Get out of WORK".
ITEM 3: Senator Mike Thompson were also contacted, he also sent you, under cover letter a copy of my complaint. To date, no reply.

WHAT THE HELL IS GOING ON CONGRESSWOMAN WOOLSEY???????????????????? I deserve an answer, If your Jim Chaaban were ever in my platoon, he would be reduced to the lowest grade, and kicked out of the Corps for not doing his job.
My original letter were dispatched to your office (see Encl 2)February 18, 1995 and no positive reply to date, other than you most recent (see Encl 3) November
8, 1995 assignment of work-projects. If you want Veterans support, this is a piss poor way.

Sincerely,
XX

XX
Glen Burnie, Maryland XX

Dear Mr. XX

Senator Barbara Mikulski has forwarded your complaint regarding the Delaware River and Bay Authority, which operates the Cape May - Lewes Ferry, to this office for response. Your letter indicates that the Cape May - Lewes Ferry encourages reservations, requires such reservations to be made during business hours, and requires reservations to be made at least 24 hours in advance. Your letter contends that the reservation system should provide extended reservation hours for people with disabilities and should accept short-notice reservations from people with disabilities.

The Americans with Disabilities Act (ADA) prohibits discrimination on the basis of disability by State and local governments and places of public accommodation. It requires covered entities to reasonably modify their policies, practices, or procedures when such modifications are necessary to avoid discrimination on the basis of disability.

Your letter does not indicate that the Cape May - Lewes Ferry's reservation policies distinguish between people with disabilities and people without disabilities or that the policies affect people with disabilities differently from people without disabilities. Rather, the hours and policies apply identically to both. Because the reservation system does not appear to discriminate on the basis of disability in violation of the ADA, we will take no further action in this matter.

For your future reference, complaints of disability-related discrimination against fixed-route transportation systems, such as the Cape May - Lewes Ferry, are investigated by the U.S. Department of Transportation. Such complaints may be submitted directly to that department at the following address:

Departmental Office of Civil Rights
Office of the Secretary
Department of Transportation
400 7th Street, S.W.
Room 10215
Washington, D.C. 20590

Telephone: (202) 366-4648.

I hope this information is helpful to you.

Sincerely,

John L. Wodatch

XX
Glen Burnie, MD XX

The Honorable Barbara A. Mikulski
United States Senate
World Trade Center, Suite 253
Baltimore, MD 21202-3041

Dear Senator Mikulski:

I wrote the Cape May-Lewes Ferry on March 5, 1996 with a complaint that their Reservation System failed to take into consideration the needs of the Handicapped; and I proposed a very easy and inexpensive way to eliminate the problem (copy enclosed).

The reply I received from the Delaware River and Bay Authority (a bi-State Agency of Delaware and New Jersey) dated March 18, 1996 in no way directly responded to my complaint (copy enclosed).

Under the Constitution, Rivers and Navigable Waterways are under Federal jurisdiction usually by the Army Corps of Engineers or the U. S. Coast Guard. Bi-State compacts such as the Delaware River and Bay Authority need the approval of Congress; and the Ferry is obviously engaged in Interstate Commerce, also a Constitutional matter.

I would very much appreciate it if you would direct my complaint to the proper Federal Agency that would handle this bi-State matter under the American with Disabilities Act (ADA) of 1990 [42 U.S.C. 12101 et seq.].

Sincerely

XX
Glen Burnie, MD XX

Reference (a) Your letter dated March 5, 1996

Dear Mr. XX

Thank you for your recent letter concerning our reservation system policy and the specific needs of disabled customers. The Cape May - Lewes Ferry system encourages feedback from our patrons and it is such input from concerned customers like yourself that has helped us improve in recent years.

This is the second year of a very intricate reservation system and we are making progress each season. As to your specific observations, although our reservation line has limited hours during the slower winter season, they are open and available to take reservations on weekends from early May to mid-October, with expanded daily hours of 7:00 a.m. - 8:00 p.m. during most of our busy summer season, May through September. Same day reservations are not available at this time.

Although I cannot be specific with dates, the Ferry is proceeding with

plans for new terminal facilities and refurbished vessels, all which will better address the needs of the disabled traveler. Once again, thank you for your comments and suggestions. We will examine possible solutions and look forward to serving you even better in the future.

Sincerely,

Larry Sharp
Director of Marketing
Cape May Lewes Ferry

01-04308

5 March 1996
XX
Glen Burnie, MD XX

Cape May - Lewes Ferry
P. O. Box 517
Lewes, DE 19958

Gentlemen:

Last month, I tried to make Ferry reservations, but I wasn't able to do so.

Your brochure (1996 Winter Schedule, January 2 - April 3, 1996) says in part:

> "Reservations are encouraged. Call 1-800-717-SAIL (7245) to guarantee your space. Reserve at least 24 hours in advance. Processing fee: $5. No same-day reservations accepted".
> ...
> "Reservation line hours - 8:30 am - 4:30 pm (Mon-Fri)".

This means that after 4:30 pm on a Friday, I can't get reservations for that Saturday, Sunday or Monday. The earliest reservation I can get is for Tuesday (if I call on Monday). I am handicapped/disabled and your reservation requirements are unacceptable for my needs. Being disabled means that I have physical limitations as to when and how and with whom I can travel; and your extremely severe reservation requirements do not take my needs into account.

The Americans with Disabilities Act (ADA) of 1990 (42 U.S.C. 12101 et seq.) requires that business, industry, state and local government and quasi-governmental units accommodate individuals with disabilities to the fullest extent possible.

Since you have a reservation system already set up, I am asking that you make only a slight modification to it for your disabled customers. Have your telephone announcement add something to the effect that if the caller is disabled, then reservations will be accepted for the same-day, and on Saturday and Sunday also. You already have employees who can cover this small additional duty.

To make sure that the non-disabled do not impose on you, you could require that the Handicapped auto license plate or window ID card number be given at the time of reservation. On arrival, verify the Handicapped license or ID number; and if a non-disabled person is abusing the system, he could be given a ticket as if he parked in a reserved Handicapped parking space.

01-04309

Please let me know as soon as possible when you will implement this or a better reservation system for the disabled.

Sincerely,
XX

JUL 25 1996

The Honorable Lee H. Hamilton
U.S. House of Representatives
2314 Rayburn Building
Washington, D.C. 20515-1409

Dear Congressman Hamilton:

This letter is in response to your inquiry on behalf of your constituent, Mr. William C. Keeney, regarding his complaint against the State of Kentucky under the Americans with Disabilities Act of 1990 (ADA). Mr. Keeney alleges that the Kentucky Health Reform Act violates the ADA by providing that

out-of-state residents whose group health insurance policies are issued to Kentucky employers are subject to the same rules and limitations as Kentucky residents, including the lack of insurance coverage for high-dose chemotherapy and bone marrow transplant for cancer patients. We apologize for the delay in responding.

Generally, because of the nature of the insurance business, consideration of disability in the sale of insurance contracts does not necessarily constitute "discrimination." An insurer or other public accommodation may underwrite, classify, or administer risks that are based on or not inconsistent with State law, provided that such practices are not used to evade the purposes of the ADA.

However, the question of disability-based distinctions in employer-provided health insurance involves a complex and changing area of the law. In some cases, denying coverage for a given procedure to treat a given illness may violate the ADA where the procedure is covered for the treatment of other illnesses. See Henderson v. Bodine Aluminum, Inc., 70 F.3d 958 (8th Cir. 1995). We have enclosed the Equal Employment Opportunity Commission's latest guidance on the application of the ADA to disability-based distinctions in insurance. I hope this information is helpful to you in responding to your constituent.

Sincerely,
Deval L. Patrick
Assistant Attorney General
Civil Rights Division

Sellersburg, Indiana 47172
Telephone
812-246-2875

March 13, 1996

Representative Lee H. Hamilton
1201 East 10th Street
Jeffersonville, Indiana 47130

Representative Hamilton:

Enclosed are copies of correspondence and information I recently supplied to the U.S. Attorney's Office in Louisville. As you can see from the enclosures, the Kentucky Health Reform Act has created a terrible and in my opinion, illegal, situation for the citizens of Kentucky relative to the treatment of certain cancers by means of high-dose chemotherapy with bone marrow transplant. I bring this to your attention because of the impact this law has on many of your constituents in Southern Indiana.

The Kentucky Department of Insurance has advised that those out-of-state residents working in Kentucky whose group health insurance policy is issued to a Kentucky employer are subject to the same rules and limitations as a Kentucky resident. Simply put, because they work in Kentucky many Indiana residents do not have health insurance coverage that could be quite literally life saving. This is especially true for the treatment of breast cancer.

Not only is this morally reprehensible, I firmly believe it violates the Americans With Disabilities Act. I have requested that the Department of Justice investigate based on the ADA. As you can understand, time is of the essence. Any efforts on your part to encourage Justice to expedite would be greatly appreciated.

Mr. Hamilton, treatment by high-dose chemotherapy with bone marrow transplant has moved beyond the experimental stage. I myself was given approximately three-to-four weeks to live last May suffering from non-Hodgkin's lymphoma. I had the high-dose and bone marrow transplant and am in full remission today. Recent studies confirm its particular value in the treatment of breast cancer. This truly is a life and death situation that few, particularly Indiana residents, are aware of.

I look forward to hearing from you.

Sincerely,

William C. Keeney

01-04313

United States Attorney's Office
510 West Broadway- 10th Floor
Louisville, Ky. 40202
Attn: Ms. Regina Edwards via HAND DELIVERY

Re: Complaint Based on the
Americans With Disabilities Act

Ms. Edwards:

The Commonwealth of Kentucky, through the Kentucky Health Policy Board, ("Board"), is illegally discriminating by disparate treatment against persons suffering from certain cancers by denying those person as a matter of law insurance coverage for treatment of the cancer by bone marrow transplant.

The Board is an agency of the Commonwealth established pursuant to the Kentucky Health Reform Act, commonly referred to as H.B. 250. As part of its charge, KRS 304.17A-160 mandates the Board define the standard health benefits plans that will be permitted to be issued within the Commonwealth. Accordingly, all providers of health care insurance issued within the Commonwealth are required to issue uniform policies.

The uniform language mandated by the Board specifically excludes coverage for bone marrow transplants for certain cancers, including breast, while mandating coverage for other cancers such as lymphomas. The excluded procedures are not alleged within the policy to be experimental or investigatory but are specific exclusions. Section 501(c) of the ADA does not apply as the prohibition is not based on underwriting or classification of risks.

Title II of the ADA specifies that an individual with a disability may not be discriminated against by state government. Cancer is a chronic disease and is a covered disability. As an indication of the extent of this discrimination, I offer the following which I believe to be accurate but not always verified.

1. Kentucky is the only state in the union that mandates a prohibition on treatment by bone marrow transplant for certain cancers.
2. All federal employees, including those in Kentucky, are covered for treatment by bone marrow transplant for breast cancer, by federal mandate.
3. Medicaid recipients are covered because of the federal relationship.
4. At least one local insurer, Humana, is prohibited from covering certain bone marrow treatments for Kentucky residents but will cover persons insured from out-of state who are treated at the University Hospital, Louisville.

My client suffers from breast cancer and is a candidate for treatment by bone marrow transplant. She has been denied coverage for this procedure based on the standard policy language promulgated by the Board. I know of others in similar circumstance.

Ms. Edwards, this is truly a life and death problem, not only for my client but also for many other residents of the Commonwealth. Bone marrow transplants have been proven to be very effective, especially so in the treatment of breast cancer. There is now legislation pending, House Bill 504, that mandates coverage for the treatment of breast cancer. Its passage this term is questionable and, if passed, its retro-active effect is more questionable. The intervention of the Department of Justice is warranted and needed.

Please confirm you have received this inquiry. I have enclosed copies of certain pertinent information for your ready review. Time is of the essence. Any efforts to expedite would be greatly appreciated.

Sincerely,

William C. Keeney

01-04315

U.S. Department of Justice

Civil Rights Division

Office of the Assistant Attorney General Washington, D.C. 20035

JUL 26 1996

Mr. John D. Del Colle
Associate Executive Director
Eastern Paralyzed Veterans Association
75-20 Astoria Boulevard
Jackson Heights, New York 11370-1177

Dear Mr. Del Colle:

The Attorney General has asked me to respond to your letter to her. You question the decisions that the New York City Department of Buildings has made regarding accessibility of buildings to people with disabilities.

Your letter indicates that the Department of Buildings has limited the scope of the "minor alterations" exception to the City's building permit requirements and has prohibited use of combined ramp/stair configurations.

As your letter correctly notes, title III of the Americans with Disabilities Act (ADA) requires places of public accommodation in existing buildings to remove barriers to access when it is readily achievable to do so. Providing a ramp at an entrance step is a common method of achieving such barrier removal.

The Department of Justice is committed to ensuring full implementation of the ADA. The ADA is intended to balance the needs of people with disabilities with the reasonable needs of businesses. Therefore, the ADA requirements are flexible and implementation relies on voluntary compliance and innovative solutions to accessibility problems. In keeping with this intent, the Department seeks to expand the range of safe, cost-effective, and usable accessibility options available to businesses.

The ADA allows ramps and stairs to share a landing, as long as additional space is provided beyond the minimum landing and

maneuvering clearance requirements. See ADA Standards SS 4.8.7 and 4.13.6. This additional space is necessary to prevent wheelchairs from rolling off the ramp landing onto a step. The New York City approach prohibits stair/ramp combinations even when this additional space is provided. There does not appear to be any significant safety reason for this strict prohibition.

01-04316

Although the New York City approach to ramp/stair combinations does not violate the ADA, it imposes more rigorous requirements than the ADA does and significantly limits the range of accessibility options available to small business enterprises. As your letter notes, the New York City requirements make compliance more difficult for small business owners, limit the accessibility options available, and may discourage voluntary compliance.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

01-04317

June 25, 1996

The Honorable Janet Reno
Attorney General
U.S. Department of Justice
Constitution Ave. & 10th St., NW
Washington, DC 20530

Dear Attorney General Reno:

I am writing to alert you and to request your assistance to help persons with disabilities access small businesses in New York City.

Due to a change in the interpretation of the New York City Building Code, it has become more costly and more difficult for small business owners to comply with Title III of the Americans with Disabilities Act. In the recent past, New York City had adopted a progressive policy allowing small businesses to remove one-step barriers without a building permit. This streamlined the process by considerably reducing the cost and time consumption of barrier removal.

The current interpretation (Technical Policy and Procedure Notice #1/95 enclosed) narrows the scope of work to be done without a permit, limits the types of material used in construction, and prohibits the use of a shared ramp/step configuration that is used safely throughout the nation. The result is an increased burden on business owners when they undertake the process of barrier removal. As you know, the law requires businesses to remove barriers only when it is readily achievable to do so. EPVA feels strongly that this interpretation adds significantly to business' burden, decreasing the likelihood of barrier removal, and therefor substantially reduces the opportunity for persons with disabilities to access businesses.

The most significant change is the New York City Department of Buildings refusal to recognize a shared ramp/step configuration. The Department of Justice, the Architectural Transportation and Barriers Compliance Board, and the American National Standards Institute (ANSI) all support the ramp/step configuration which New York City's Department of Buildings has now deemed to be unsafe, with no architectural data to support the claim.

The bottom line is that New York City, the largest city in the country, has now made it more difficult and expensive for small business owners to comply with the ADA. The ADA calls for the removal of barriers where it is readily achievable. By requiring the costly procedure of obtaining a permit, and requiring a more elaborate ramp design, the Department of Buildings has made barrier removal readily unachievable, allowing small business owners to sidestep the ADA.

01-04318

I would be grateful if your department could investigate this problem, and at the very least, advise the New York City Department of Buildings that the ramp/step configuration is a safe, affordable design and must be utilized as a design alternative in New York City.

Thank you for your attention to this matter. I look forward to learning of the action your department will be taking to correct this problem which appears to be unique to New York City.

Sincerely,

JOHN D. DEL COLLE
Associate Executive Director
Government Relations

JDD/ic

U.S. Department of Justice

Civil Rights Division

Office of the Assistant Attorney General Washington, D.C. 20035

JUL 26 1996

The Honorable Paul David Wellstone
United States Senator
2550 University Avenue W. #100N
St. Paul, Minnesota 55114

Dear Senator Wellstone:

This is in response to your letter on behalf of your constituent, XX According to your letter, Mr. XX claims that his son, XX has been unable to gain admission to law school because, due to a disability, XX is unable to achieve a high enough score on the Law School Admissions Test ("LSAT"). You ask what obligations educational institutions have to make accommodations in their admissions process for students with disabilities.

Title III of the Americans with Disabilities Act ("ADA") requires private entities that offer tests such as the LSAT to offer them in a "place and manner accessible to persons with disabilities," so that "the examination results accurately reflect [an individual with a disability's] aptitude or achievement level or whatever other factor the examination purports to measure." See 42 U.S.C. S 12189; 28 C.F.R. S 36.309(a) and (b)(1)(i). This obligation includes a duty to make reasonable modifications to the way in which an examination is administered, which may include "changes in the length of time permitted for completion of the examination or adaptation of the manner in which the examination is given.: 28 C.F.R. S 36.309(b)(2). XX may request that the entity administering the LSAT make appropriate modifications to ensure that the test will accurately assess his ability.

Law schools that are part of a State university system have an obligation under title-II of the ADA to make "reasonable modifications" to their policies, practices, and procedures, where "necessary to avoid discrimination on the basis of disability." See 42 U.S.C. S 12132; 28 C.F.R. S 35.130(b)(7). Private law schools have a similar obligation under title III of the ADA. See 42 U.S.C. S 12182(b)(2)(A)(ii); 28 C.F.R. S 36.302(a). This obligation does not require an institution to

01-04320

lower its admission or performance standards. Neither title II nor title III requires modifications that would "fundamentally alter" the nature of a covered entity's programs. See 28 C.F.R. S 35.15(b)(7); 42 U.S.C. S 12182(b)(2)(A)(ii); 28 C.F.R. S 36.302(a). Therefore, unless there is evidence that a tester has failed to administer a test in a manner that complies with the ADA, the ADA does not require law schools to discontinue the use of standardized tests in the admissions process.

We hope this information is helpful in responding to your constituent.

Sincerely,

Deval L. Patrick

Office of the Assistant Attorney General Washington, D.C. 20035

AUG 1 1996

The Honorable Bennie Thompson
U.S. House of Representatives
1408 Longworth House Office Building
Washington, D.C. 20515-2402

Dear Congressman Thompson:

This letter responds to your inquiry on behalf of the Mississippi State Board of Medical Licensure ("Mississippi Board") regarding the Americans with Disabilities Act, 42 U.S.C. SS 12101-12213 ("ADA"). Your inquiry attached a letter from the Mississippi Board expressing concern about the impact of the ADA upon the Board's ability to protect citizens from medical providers who are not fit to practice medicine due to chemical dependency. Please excuse our delay in responding.

According to the Mississippi Board, prior to the implementation of the ADA, the Board had regulations in place designed to ensure that applicants and licensees were sober and fit to practice medicine. The Board's letter states that these regulations required applicants and licensees to verify sobriety, either through a monitoring program or urine screens, and show that a relapse had not occurred and that the applicant or

licensee had been drug-free for a minimum of two years. It is not possible for us to comment upon the legality of the specific regulations to which the Board refers in its letter, as we have not had an opportunity to review these regulations.

In its letter, the Board states that the ADA "has negated this Board's regulations designed to specifically protect its citizens from licensees who are suffering from chemical dependency and has erased this Board's ability to enforce this regulation." The letter also maintains that the ADA "will allow physicians who have problems to become more mobile and move from state to state with little or no interference from state regulatory boards."

01-04322

The Mississippi Board's concern is based on an apparent misunderstanding of the ADA's requirements. The ADA prohibits State licensing boards from administering licensing programs in a manner that discriminates on the basis of disability. However, the ADA does not preclude State licensing boards from determining whether applicants or current licensees are engaging in illegal drug use or whether they are otherwise fit to practice medicine. Nor does the ADA prohibit sharing of information among State regulatory boards about licensee malfeasance or unfitness to practice.

In enacting the ADA, Congress chose specifically to exempt from civil rights protection drug addicts who are currently engaged in the illegal use of drugs. Therefore, the Mississippi board may ask an applicant or licensee if he or she engages in illegal drug use.

Congress did not exclude alcohol dependency from coverage under the ADA. Therefore, individuals who are dependent on alcohol may not be excluded simply on the basis of their status as alcoholics. They may, however, be held to the same standards of conduct that other participants must meet, including those standards prohibiting drinking or drunkenness.

In order to encourage individuals with chemical dependencies to pursue rehabilitation and recovery, Congress chose to provide ADA protection to individuals with a history of drug dependency who have successfully completed a drug rehabilitation program, who are currently participating in such a program, or who, through their own efforts, are no longer engaging in the illegal use of drugs. Therefore, a licensing board may not categorically exclude applicants or licensees on the basis of their former drug dependency.

However, the ADA does not prevent a licensing entity from determining that an applicant or licensee is unfit to practice medicine based on a record of misconduct, even if that misconduct was due to alcohol or drug addiction. Licensing authorities can legitimately take into account an applicant's or licensee's employment history, military and school record, credit history, criminal record, financial and legal problems, record of disciplinary actions, suspensions or terminations from school or jobs, and so forth. The Board may inquire generally about any leaves of absence or terminations from employment in the past; whether there is anything that would currently impair the applicant's or licensee's ability to carry out the duties and responsibilities of a physician; and past suspensions or

revocations of hospital privileges, malpractice suits, or patient complaints, among other things.
01-04323

Whether a licensing board's questions regarding an applicant's or licensee's history of alcohol or drug abuse is permissible under the ADA will depend on whether the questions are necessary to the objective of licensing only those candidates capable of practicing the profession at issue in a competent and ethical manner. Such questions must be focused on actual, current impairments of candidates' abilities or functions, and must be narrowly tailored to determine the current fitness to practice the profession. Enclosed is a list of questions proposed by boards that license attorneys that the Department has concluded do not, on their face, violate the ADA.

In its letter, the Mississippi Board maintains that unfit physicians will be free to move from State to State because the ADA precludes the States from obtaining or sharing information about an applicant's or licensee's history of chemical dependency. As noted above, nothing in the ADA prohibits the Board from asking applicants or licensees about past conduct or behavior that may evidence an incapacity to practice medicine. Such conduct or behavior, whether it results from mental illness, substance dependency, or other factors, constitutes a legitimate area of inquiry under the ADA. Nor does the ADA preclude the sharing of this legitimately obtained information with other jurisdictions.

I hope this is helpful to you in responding to the Mississippi Board.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

Ms. M. Faith Burton
Congressional Liaison Officer
U.S. Dept. of Justice
Room 1603
Washington, D.C. 20530

Dear Ms. Burton:

This request for an inquiry and guidance is made on behalf of the Mississippi State Board of Medical Licensure.

Specifically, I have received correspondence from members of the Board of Medical Licensure relating their concerns about the Americans with Disabilities Act (ADA) and their inability to effectively protect citizens from medical providers that have been, or continue to be, involved with drugs or alcohol (See letter attached). Board members contend the Americans with Disabilities Act has negated the regulations they established and implemented to protect its citizens from physician licensees who are suffering from chemical dependency. Board members further contend the ADA "has reopened the door which, as interpreted, will allow physicians who have problems to become more mobile and move from state to state with little or no interference from state regulatory boards".

I am respectfully requesting your office conduct an inquiry and respond to my office regarding the legitimacy of the Board's concerns as it relates to their ongoing efforts to protect the public from chemical dependent practictioners. Whatever guidance you are able to provide to my office and the Board regarding this matter would be appreciated.

Sincerely,

Bennie G. Thompson
Member of Congress

RE: Americans with Disabilities Act
Interpretation Problems

Dear Representative Thompson:

The Mississippi State Board of Medical Licensure, a state agency, is responsible for licensing and regulating physicians (M.D.s and D.O.s) and podiatrists (D.P.M.s) in the State of Mississippi.

As a part of the overall function of protecting the public from licensees who are impaired or have been impaired to the extent that their professional competency is affected, this Board assesses and reviews the background of all applicants for licensure in the State of Mississippi. It is not uncommon for applicants seeking licensure to practice medicine on the citizens of the State of Mississippi to have been involved with drugs or alcohol to the extent that they are diagnosed with chemical dependency.

Prior to the Implementation of the Americans with Disabilities Act, the Mississippi State Board of Medical Licensure had regulations in place designed to ensure the sobriety of these practitioners prior to their licensure in this state and, once licensed, to monitor the practitioner to ensure that citizens were not subjected to possible harm from these practitioners. The regulation required an applicant to show and be able to verify sobriety, either through a monitoring program or urine screens, that a relapse had not occurred and that applicant had been drug free for a minimum of two years (24 months).

In effect, the Americans with Disabilities Act as is being interpreted, has negated this Board's regulations designed to specifically protect its citizens from licensees who are suffering from chemical dependency and has erased this Board's ability to enforce this regulation. We, the physicians who make up the Mississippi State Board of Medical Licensure, are very concerned that the Americans with Disabilities Act will seriously curtail this Board's ability to protect the citizens of this state from practitioners seeking licensure who have problems with chemical dependency.

In the past, the various medical boards, which comprise the physician regulatory authorities at the state level, have been severely criticized for not being willing to discipline and regulate licensees and allow them to travel from state to state as a result of problems in their practice. In order to address this, boards have become more vigorous in their regulatory and investigative efforts.

The Federal Government initiated the National Practitioners Data Bank for the reporting of disciplinary actions by various boards in order to manage physicians who are performing in an untoward manner.

Now, the Americans with Disabilities Act has reopened the door which, as interpreted, will allow physicians who have problems to become more mobile and move from state to state with little or no interference from state regulatory boards. In fact, an impaired physician under the current Americans with Disabilities Act can make a career of practicing medicine by running from state to state without any interference from a state medical board.

This Board requests immediate steps to correct the intent of this legislation by a review of the legislation with appropriate changes in place to allow State Boards of Medical Licensure to continue assessing the competency, qualifications, sobriety and ability of applicants who apply for licensure without being required to comply with Federal Mandates which do not protect the public.

We solicit your careful review of the problems which will affect the citizens of this state, and all other states, if state medical boards are prohibited from having in place regulations designed to specifically prevent that which is now allowed with the Americans with Disabilities Act.

Your interpretation of the above and your assistance in making appropriate changes if the intent of the Act is as outlined above will be appreciated.

As officers and members of the Mississippi State Board of Medical Licensure, we
sincerely solicit your prompt review and response to this request.

Sincerely,

MISSISSIPPI STATE BOARD OF MEDICAL LICENSURE

The Honorable Harry Johnston
Member, U.S. House of Representatives
1501 Corporate Drive
Suite 250
Boynton Beach, Florida 33426

Dear Congressman Johnston:

This is in response to document number DF, an inquiry on behalf of your constituent, Mr. XX . Mr. XX inquired about provisions for visually impaired patrons in several theaters for performing arts.

Title II of the Americans with Disabilities Act of 1990 (ADA) requires a State or local government program or service, such as a public theater, to ensure that its communications with individuals with disabilities are as effective as communications with others.

Similarly, title III of the ADA requires a public accommodation, such as a theater that is privately owned and operated, to provide auxiliary aids and services necessary to ensure equal access to the services that it offers. Those auxiliary aids and services must ensure effective communication with persons with disabilities.

Both title II and title III require covered entities to ensure effective communication with the participants in their programs or services, unless doing so would cause a fundamental alteration of the program or service or would result in an undue burden.

In addition, both title II and title III require covered entities to reasonably modify their policies, practices, or procedures when such modifications are necessary to afford their services to people with disabilities. Such reasonable

cc: Records Chrono Wodatch Hill McDowney Conway FOIA
N:\UDD\BERGER\CONGRESS\JOHNSTON\secy.johnson

modifications are required unless they would fundamentally alter the nature of the services offered.

Enclosed, please find the Department of Justice regulations implementing title II and title III. I hope this information will be of assistance to you in responding to Mr. XX

Sincerely,

Deval L. Patrick
Assistant Attorney General

Hon. Harry Johnston
1501 Corporate Drive
Suite 250
Boynton Beach, Fl. 33426

Dear Congressman Johnston,

I am a resident of Broward Country and am visually impaired. I have attempted many times to buy tickets at the Broward County Center for the Performing Arts and at the Parker Playhouse, but am informed each time that no provisions are made for visually handicapped people; all seats are sold on a first come first served basis, with special consideration for season ticket holders.

I believe that this is a direct violation of the federal law Americans with Disabilities Acr, which mandates that special consideration be given to citizens with disabilities.

I would appreciate it if you would please advise me what action you can take to remedy this unfair situation.

Yours very truly,

XX

AUG 29 1996

The Honorable Patty Murray
United States Senator
2988 Jackson Federal Building
915 Second Avenue
Seattle, Washington 98174

Dear Senator Murray:

This is in response to your inquiry on behalf of your constituent, Mr. XX , who requests information regarding the Americans with Disabilities Act of 1990 (ADA). Please excuse the delay in responding.

Specifically, Mr. XX requests a listing of disabilities covered by the ADA and other similar civil rights laws. However, the ADA does not provide an exhaustive list of disabilities. Rather, the regulation implementing title III of the ADA defines a disability as "a physical or mental impairment that substantially limits one or more of the major life activities ...; a record of such an impairment; or being regarded as having such an impairment." 28 C.F.R S 36.104. For your convenience, I have enclosed a copy of that regulation.

With regard to States and their programs, States are not required to grant special status to people with disabilities. However, if a State chooses to do so via a particular program or service, it is not required to use definitions or criteria established by Federal civil rights laws.

If Mr. XX has any questions or needs additional information regarding the requirements of the ADA, he may contact the Department's ADA information line at 800-514-0301 (voice) or 800-514-0383 (TDD).

Office of the Assistant Attorney General Washington, D.C. 20530

SEP 5 1996

The Honorable Sam Farr
Member, United States House of
Representatives
701 Ocean Street
Santa Cruz, California 95060

Dear Congressman Farr:

This letter is in response to your inquiry on behalf of your constituent, Mr. XX , regarding automobile insurance and the Americans with Disabilities Act of 1990 (ADA). Mr. XX wishes to know whether auto insurance companies may charge him more for driving a golf cart than they would charge for a standard automobile if he drives the golf cart because of his disability. We apologize for the delay in responding.

The ADA prohibits unjustified discrimination in all types of insurance, including automobile insurance, provided by public accommodations. However, because of the nature of the insurance business, an insurer or other public accommodation may underwrite, classify, or administer risks that are based on, or not inconsistent with, State law, provided that such practices are not used to evade the purposes of the ADA.

With respect to the purchase of insurance, the ADA allows insurance companies to charge more for insurance, or to refuse to insure someone with a disability, only if the higher charges or refusal to provide coverage is based on sound actuarial data and principles, and not on speculation. Thus, while the ADA does provide some protection for individuals with disabilities in their dealings with insurance companies, it does not prohibit the use of legitimate actuarial considerations.

If an insurance company is simply charging all policy holders more for golf cart coverage without regard to disability, the question of whether this charge is legal would be determined

cc: Records, chrono, Wodatch, Magagna, Milton, McDowney,
FOIA:dhj T. 8/28/96 udd\Milton\Congress\insure.far

DJ 202-11-0

01-04334

under State insurance law and would not be an ADA issue. It would be an ADA issue, however, if the company charges more for coverage for a person with a disability who drives a golf cart than it does for others. In that case, the difference would have to be based on legitimate actuarial considerations.

I hope this information is useful to you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

lc

RE: XX
XX
XX
XX

ADA COMPLIANCE

Mr. XX would like to know if the Americans with Disabilities Act (ADA) contains provisions that governs the way car insurance companies conduct business with disabled individuals. He drives a golf cart instead of a car because it is easier for him to get in and out of the vehicle. Also, he suffers from extreme motion sickness, and the golf cart allows him to drive at a very slow speed.

Unfortunately, his insurance carrier (AAA of N. California) has informed him that his insurance will cost him $700 per year. If he drove a car, the insurance would only cost $300. Mr. XX believes that he should be allowed to pay the same rate as a car driver. He thinks that it is unfair to be required to pay a higher rate, since he is disabled.

He has been in touch with the State Insurance Commissioner. He has also contacted McPherson's office for assistance. They informed him that they will help him deal with that agency, and that our office can help him with ADA information.

202-11-0

01-04336

SEP 9 1996

The Honorable Tom Harkin
United States Senate
Washington, D.C. 20510-1502

Dear Senator Harkin:

I am responding to your letter on behalf of your constituent, XX , regarding accessibility of "web pages" on the Internet to people with visual disabilities.

The Americans with Disabilities Act (ADA) requires State and local governments and places of public accommodation to furnish appropriate auxiliary aids and services where necessary to ensure effective communication with individuals with disabilities, unless doing so would result in a fundamental alteration to the program or service or in an undue burden. 28 C.F.R. S 36.303; 28 C.F.R. S 35.160. Auxiliary aids include taped texts, Brailled materials, large print materials, and other methods of making visually delivered material available to people with visual impairments.

Covered entities under the ADA are required to provide effective communication, regardless of whether they generally communicate through print media, audio media, or computerized media such as the Internet. Covered entities that use the Internet for communications regarding their programs, goods, or services must be prepared to offer those communications through accessible means as well.

Mr. XX suggests compatibility with the Lynx browser as a means of assuring accessibility of the Internet. Lynx is, however, only one of many available options. Other examples include providing the web page information in text format, rather than exclusively in graphic format. Such text is accessible to screen reading devices used by people with visual impairments. Instead of providing full accessibility through the Internet directly, covered entities may also offer other alternate accessible formats, such as Braille, large print, and/or audio materials, to communicate the information contained in web pages to people with visual impairments. The availability of such materials should be noted in a text (i.e., screen-readable) format on the web page, along with instructions for obtaining the

materials, so that people with disabilities using the Internet will know how to obtain the accessible formats.

cc: Records, Chrono, Wodatch, McDowney, Hill, FOIA
n:\udd\hille\policylt\harkinxx.ltr\sc. young-parran

01-04337

The Internet is an excellent source of information and, of course, people with disabilities should have access to it as effectively as people without disabilities. A number of web sites provide information about accessibility of web pages, including information about new developments and guidelines for development of accessible web pages. Examples include:

http: //www.gsa.gov/coca/wwwcode.htm
Center for Information Technology Accommodation
General Services Administration

http: //www.trace.wisc.edu/text/guidelns
Trace Center, University of Wisconsin

http: //www.webable.com/index.html

http: //www.psc-cfp.gc.ca/dmd/access/welcom1.htm

These sites may be useful to you or your constituent in exploring the accessibility options on the Internet. In addition, the Department of Justice has established an ADA home page to educate people about their rights and responsibilities under the ADA and about the Department's efforts to implement the ADA. The address of the ADA home page is http://www.us-doj.gov/crt/ada/adahom1.htm.

I hope this information is helpful to you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

01-04338

Deval Patrick
Assistant Attorney General

01-04339

Mime-Version: 1.0
To: tom_harkin@harkin:senate.gov
Subject: ADA and web pages
Content-Type: text/plain; charset=us-ascii
Content-Transfer-Encoding: 7bit

Dear Senator Harkin,

I'm a web designer based I Iowa City, and also a lawyer. I contribute a regular column to the Web Consultant's Association on-line newsletter. My topics usually lean toward the small designer, but recently a question of a different sort arose that interested me.

One of the great concerns of web designers today is providing web page compatability for "web interpretters" for the blind and other handicapped peoples. These systems require web pages to be Lynx compatible, which means that the use of almost "essential" elements such as imagemaps and tables render the pages inaccessible to such people.

Web designers, on the whole, would *like* to provide text-only alternatives to commercial web sites, but our clients are, by and large, not willing to pay anything extra for that service. An average estimate

01-04340

ILLEGIBLE that it would raise the costs of each site, and continued ILLEGIBLE, by about 35 to 40%.

ILLEGIBLE, someone recently noted that if one were to read the ADA very strictly, it could be argued that a web page (especially in the case of a government organization or public service agency) is a "public accommodation", and hence could be required by law (under the ADA) to be Lynx compatible. I think this is probably stretching the law a bit beyond it's intent--especially since the ADA was passed before the web became the popular tool that it is today. It does raise some interesting points, though.

I posed the question to the list as a whole, and most designers (there are 8000 on the list) seemed to think that this was just the type of thing that might encourage people to "do the right thing" when they purchased site design. On the other hand, others pointed out that (beyond the initial cost concerns) government agencies would still mail materials to anyone who called, so they offered a viable alternative. My initial response was that, especially in the case of the blind, if they aren't offering *braille* printed materials, the web converters are, in fact, the *only* service the agency provides that can be accessed by the blind in a manner "equal" to that provided to others. This, of course, only spurred more interest.

Needless to say, no firm conclusions were reached. I'm sure there's probably an activist-oriented organization out there that has thought about this type of legal challenge, but as far as I know none are currently before the courts.

I did offer to drop you a note, though, and see if maybe:

A. There is currently any discussion in Congress surrounding the issue of equal access to the WWW for the handicapped, and, if so, whether that is in fact linked to the general themes established by the ADA.

B. If not, would you be willing (or interested in) to provide a few words of input on the subject (if nothing else by way of support to help "encourage" those who are doing their best to forward this issue, and maybe to prod those that aren't thinking about it into at least recognizing the importance of the issue)?

In either case, I would be more than happy to forward any material you thought appropriate to the WCA mailing list (and, if you were interested in being associated with that issue, to other appropriate lists as well) in the interest of at least providing some insight from the sponsor of the ADA itself.

Sorry for the rather quick and dirty note--work calls. I hope my haste hastened weakened the message.

Also, I'm not sure how your list of potential consultants on web/Internet issues looks, but I'd be more than offer to volunteer what services I could. By way of background, I have my BA in Communications from the UI, as well as a J.D. and an LL.M. I'm currently the webmaster at ACT in Iowa City, and President of my own web firm on the side. I spent the last three years in Washington running a small non-profit, and have some lobbying experience as well (as a clerk for the Chesapeake Bay Foundation). I'd be more than happy to provide any feedback/comments or any other services I could contribute in the effort to generate some decent net legislation. (And if you're really interested in such an offer, I do have a 15 minute fix to make the CDA not only workable, but constitutional ;)).

01-04341

appreciate your taking the time to wade through this and, of course, ILLEGIBLE you the best of luck in the coming election.

Sincerely,
XX

SEP 17 1996

XX
XX
XX

Dear Ms. XX

Senator Herb Kohl has referred your correspondence regarding tornado warning signals for deaf people to the Department of Justice for response.

Title II of the Americans with Disabilities Act (ADA) prohibits discrimination on the basis of disability in State and local government programs. If tornado warnings are provided by State or local governments, then those systems are covered programs under title II of the ADA.

Title II requires State and local governments to ensure that their communications with program participants with disabilities are as effective as their communications with other participants, unless doing so would result in a fundamental alteration to the program or in undue financial and administrative burdens. Generally, to satisfy communication obligations, State or local governments must furnish appropriate auxiliary aids or services when necessary to ensure full participation of people with disabilities in public programs.

Your suggestion of a flashing light that is activated when a tornado siren is activated is one possible means of ensuring effective communication of tornado warnings to individuals with hearing impairments. Other options may also be available. The ADA does not dictate use of any particular method of complying with title II's effective communication requirement, as long as the method chosen ensures effective communication with persons with disabilities.

Ms. Patricia Ryan
Executive Director
Maine Human Rights Commission
State House Station 51
Augusta, Maine 04333-0051

Dear Ms. Ryan:

I am responding to your letter of July 21, 1995, submitting the Maine Human Rights Act, as amended ("law"), for review and possible certification under title III of the Americans with Disabilities Act ("ADA").

I apologize for the delay in responding to your request and I thank you for your patience. In an effort to carry out our responsibilities under the ADA and to provide helpful information to you, we have undertaken a detailed and comprehensive review of the materials submitted.

Our review of the submitted materials indicates that the Maine law's construction requirements are very nearly equivalent to the construction and alterations requirements of title III of the ADA. You and your team have done an excellent job adapting the ADA requirements to the Maine enforcement system. However, a number of issues need further clarification. We, therefore, request clarification before we make a preliminary determination regarding whether the Maine law meets or exceeds the requirements of the ADA.

Our analysis of the material you submitted is discussed in detail in the attached side-by-side comparison of the Maine law with the ADA title III regulations (including the ADA Standards for Accessible Design (Standards)). The side-by-side comparison identifies those elements that do not appear to meet the requirements of the ADA. Sections of the ADA Standards for which we could find no equivalent Maine law provision are designated "not equivalent" ("NE"). Other sections are identified as

"possibly not equivalent" ("PNE"), indicating that further clarification is needed regarding the Maine law's intent and meaning.

N:\UKK\HILLE\MAINE\TAZ.LTR
Records Chrono Wodatch Blizard Hill Cert File FO1A

It is important to note that, although the Maine law covers both public and private facilities, ADA certification applies only to title III (i.e., privately owned) facilities. Our analysis does not address the Maine law's application to publicly owned facilities. In addition, certification applies only to new construction and alterations requirements. Therefore, our analysis does not address the Maine law's requirements regarding existing buildings or businesses' policies and practices.

As we have previously noted, no transcript of hearings was included in your submission, as called for by the title III regulation, 28 C.F.R. S 36.603(c)(3). The reason for this omission is unclear.

While the side-by-side comparison should provide a comprehensive picture of the areas of concern, I would like to highlight some of the areas about which we are concerned.

1. Definitions

The Maine law uses the term "primary function" in its alterations provision without including a definition. A definition is needed.

2. Structural impracticability (28 C.F.R. S 36.401(c)(3))

The Maine law does not specify that when it is structurally impracticable to make a facility accessible for people with one type of disability, it must, nevertheless, be made accessible for people with other types of disabilities, to the extent it is not structurally impracticable.

3. Elevator Exception (4.1.2(5) Exception 1)

The Maine law is unclear regarding whether it includes ADA Standard 4.1.3(5) Exception 1 or whether it relies only on Maine law S 4594-F3C. The two are substantially similar in most respects. However, Maine law S 4595-F3C does not specify that

non-elevator buildings must comply with all other accessibility requirements, even on upper floors.

01-04347

4. Path of Travel (4.1.6(2))

The Maine law addresses requirements separately for alterations costing more than $100,000 and alterations costing $100,000 or less. Maine's path of travel requirement for large (>$100,000) alterations is largely equivalent. However, for smaller alterations, the Maine law requires provision of accessible path of travel elements when the cost is not "disproportionate." Because the Maine law does not specify that disproportion only applies if path of travel costs exceed 20% of alterations costs, Maine's provision is potentially not equivalent.

In addition, the Maine law requirement for smaller alterations fails to address priority of accessible path of travel elements in the event of disproportionate cost.

For large alterations, the Maine law prohibits evasion of path of travel requirements by performing a series of small alterations. However, the Maine law does not address this issue for smaller alterations. Furthermore, for both large and small alterations, the Maine law does not specify inclusion of alterations undertaken in previous years as part of the total alterations cost in figuring disproportion.

5. Historic Buildings (4.1.7)

It is unclear whether the Maine law adopts the Uniform Federal Accessibility Standards ("UFAS") requirements for alterations to historic buildings, or the ADA Standards, or both. Based on Maine law S 4594-F5, our analysis has assumed the Maine law uses UFAS. The Maine law does not address the ADA requirements for buildings not covered by section 106 of the National Historic Preservation Act, or for consultation with interested persons.

The UFAS requirements used by Maine law do not require a notification system to be provided when the accessible entrance is not the entrance used by the general public. The ADA Standards (S 4.1.7(3) (b)) require such a system.

6. Toilet Rooms (4.22.4)

The Maine law does not specifically address the ADA requirement that a 36-inch wide toilet stall be provided in addition to the accessible stall whenever 6 or more toilet stalls are provided. Because Maine law includes a specific provision

for toilet stalls, it is unclear whether it also adopts the ADA requirement for stalls.

I believe a meeting on these issues will be very useful. I appreciate your willingness to set aside time on November 4 to meet with Eve Hill. You may also contact Ms. Hill at (202) 307-0663 with any questions you may have about our analysis.

Sincerely,

John L. Wodatch

The Honorable Bob Stump
U.S. House of Representatives
Washington, D.C. 20515-0303

Dear Congressman Stump:

I am responding to your letter on behalf of your constituent, XX , regarding coverage of the Americans with Disabilities Act (ADA).

Mr. XX asks whether recreational facilities in a residential complex are required to be accessible to people with disabilities under the ADA if use of the facilities is restricted to residents and their guests.

The ADA does not cover strictly residential facilities. However, the Fair Housing Act may cover such facilities and may require them to be accessible to people with disabilities. The Department of Housing and Urban Development's regulation implementing the Fair Housing Act is available from the Fair Housing Information Clearinghouse at (800) 343-3442 (voice), (800) 483-2209 (TDD).

I hope this information is useful to you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General

Dept., of Justice
Washington, D.C/

Gentlemen:

Re: Americans with Disabilities Act.-- private facilities

It is my understanding that facilities that are not open to the public are exempt from ADA architectural requirements. I reside in Sun City West, AZ which is a planned retirement community. Included in the community is over 60 million dollars of recreation facilities owned by a resident controlled non profit corporation. All residents pay annual dues to this corporation and are voting members of the corporation. Only residents and to a limited degree their
guests may use these facilities. Monitors are employed at each facility to insured that the use of the facility is limited to that as here-in stated. Question-- Are these facilities exempt from the architectural access requirements of ADA?

Very truly your,

XX

NOV 22 1996

The Honorable Nancy L. Johnson
Member, United States House of
Representatives
480 Myrtle Street, Suite 200
New Britain, Connecticut 06053

Dear Congresswoman Johnson:

This letter is in response to your inquiry on behalf of your constituent, Mr. XX who was denied a waiver under local zoning ordinances to allow retail sales of firearms from his residence. Please excuse our delay in responding.

Title II of the Americans with Disabilities Act (ADA) prohibits discrimination on the basis of disability by State and local government agencies. Section 35.130 (b)(7) of the Department's regulation implementing title II (enclosed) provides that "[A] public entity shall make reasonable modifications in policies, practices, or procedures when the modifications are necessary to avoid discrimination on the basis of disability, unless the public entity can demonstrate that making the modifications would fundamentally alter the nature of the service, program, or activity."

A waiver of a zoning ordinance to allow an individual with a disability to operate a business from a residence may be "reasonable" if, for example, other similar waivers have been granted. However, the ADA does not necessarily require a waiver to operate a business from a residence simply because an individual has a disability. Such a waiver may "fundamentally alter" the community's interests to ensure a separation between commercial and residential areas.

cc: Records, chrono, Wodatch, Nichol, McDowney, FOIA,

01-04352

At this time, there is insufficient information to determine whether the Plainville Zoning Board violated title II of the ADA. We have opened an investigation in this case, and Mr. XX will be receiving correspondence from this office in the near future.

We hope this information is helpful to you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General

Re: Conversation of 9/18/96 inre imminent loss of Federal Firearms license due to actions of Plainville Zoning Board.

Dear Mark,

As the date of the enclosed letter will indicate, I have sent it so that if the Herald does not print it, you may be able to influence them to do so. As I have often indicated, although I am a registered Deomocrat, I support those political representatives that show a genuine concern as representing the entire country and not just their district. It is for this same reason that I am presently writing to you, as I know that if your office cannot be of assistance, you will at least direct me as to what possible recourse I may have.

My present problem is that my request for variance in the Town of Plainville, ZBA application # 08-96-35, to allow for retail sales of Pistols and Revolvers at retail in an R-11 zone was recently denied. Thus, although I presently possess a Federal Firearms License, issued by Alcohol, Tobacco and Firearms, a State License to sell pistols and revolvers, a Town license to sell pistols and revolvers at retail, all of which are valid until the year 2000, with the exception of the Federal License which I may lose, I recently received a letter stating that after fourteen years of being licensed in Plainville, I am in violation of Zoning laws and had to apply for a "Variance". The Town of Plainville has known of these sales as they issued the license and a form has to be filed with them every time a weapon is sold, which is seldom, as I operate very discreetly, and my own neighbors did not know of my situation until the Town advertised the purpose of my variance hearing in the paper. I have many dictionaries and they define a "Variance" as the act of varying from the norm. In this case, sales from an R-11 zone (Residential) after fourteen years of trouble free and very discreet operation. My request for said variance was based on a hardship, which in my case is a total disability and severe handicap, preventing me from operating a full time commercial business where I would to overcome high overhead, etc. It was for this reason that Chief of Police, Daniel Coppinger and former Chief, Frank Roche took measures to assure that a license was issued to me. I have to be available during the daytime hours

to allow ATF access for inspection of records, and by operating from my home, I am able to occupy myself by doing repairs to guns, selective sales, etc. and still be available for ATF inspections, while at the same time allowing me to be available for my visiting nurses, as well as therapy and rest in between appointments. My operation has never caused a traffic problem, either vehicular or pedestrian for the fourteen years I have already been operating from this location. The only reason given for the denial of my application, although the ZBA did praise the manner in which I conducted my business and stressed that if no problems have ever been incurred in the past, there is no reason to believe they will exist in the future, was the fact that I am in an R-11 zone. I stressed that I realized this and this was why I requested a variance, citing hardship as the reason for said request. I do not make a living, or even a marginal profit from the operation I conduct, but it does keep me from vegetating as numerous Doctors, including the Mayo clinic have determined that my condition prohibits my ever being gainfully employed again. Having just turned 54 yrs. old, that leaves somewhat of a bleak future, let alone the effect it has on the morale of a person trying to live with and overcome severe disabilities and lead somewhat of a semblance of a reasonable life style with a reason to wake up in the morning. Although I have been confined to a wheelchair by several doctors, my present life style has so far helped me to avert this drastic measure, although I am limited to walking short distances with a walker and/or crutches. Although I have the right to appeal the decision of the ZBA to Court, I am presently not in a financial position to incur the expenses involved in so doing, especially since the operation I conduct is not what could be called profitable operation or one that is operated for monetary gain, and I was hopeful that possibly through the many Federal Acts to assist the handicap and disabled, there might be a possible avenue of seeking assistance for relief of my dilemna through such an act as the ZBA never considered or discussed the hardship and handicap aspect of my request for variance, but merely cited what the zoning regulations read in black and white, yet they did grant variances for fences beyond property line limits as hardships, for partially built garages that had constructed without a permit and outside the property line limits so the homeowner would not have to demolish the partial construction, although they did state that had he applied for a permit, he would have been aware of the regulations and could have properly applied for whatever variances he needed. The manner in which the board operated led me to believe that they acted in a discriminatory manner as their primary fear seemed to be that about twelve persons possess a Federal Firearms License in Plainville and they feared setting a precedence.

I indicated that the purposes of a variance hearing was to act on each case based on its own merits and action on my request should have no different effect than allowing a garage or fence to be built outside property restrictions. This did not absolve anyone else from the required regulations and each person has to apply as an individual. Most of the presently licensed dealers in my situation are gainfully employed, (one is a police officer for the town, active) and to the best of my knowledge and research, none are handicapped or disabled. My immediate neighbors on both sides had no objection to my operation if I continued to conduct it in the same manner, and most of the people who showed up and objected live at the far end of the street in the immediate vicinity of a vacant retail premises, which if I was operating a profitable operation, I could lease and the sales in question would be right in their front and back yards. However, I prefer to operate discreetly, do not advertise, interview by appointment only and determine from by background as a retired Police Detective and long time president of the New Britain P.D. Police revolver club, having shot competitively. I also stressed that I have one of my children and two, sometimes three, of my grandchildren living in my home, so there was no way I would consider a slipshod operation. The Police Department also indicated that I have turned down potential customers that they referred to me as I felt that they either did have justification for the need of a weapon, did not know how to properly handle one safely, referring them for a training course before I would consider a sale to them and have rejected some outright as conversing with them indicated to me that they suffered mental disorders as a result of old age or other reasons.

It would appear that in todays society and with the pressure to place guns in only the proper, competent hands, coupled with the handicap and disability factor, the Town ould bein favor of an operation such as that which I conduct. Most of my business has been conducted with the City of New Britain, Town of Berlin, Town of Plainville and those individual police officers I felt comfortable selling weapons to, and as I have also turned down police officers who had drinking problems, etc., even though the law basically exempts law enforcement officers from the stringent regulations that govern the general public. I have been licensed for the sale of guns and sporting goods for over 23 years and have never encountered a problem with any weapon I sold, which can be verified with ATF who I have assisted in the past to take illegal guns off the street and stop legal persons from buying and selling to others that did not meet the requirements. This can be verified by Agent Richard Cocharro of the Hartford office of ATF. Alcohol, Tobacco and Firearms has indicated support for my operation and the manner in which

it is conducted and rather than revoke my license because of the ZBA ruling, have placed my renewal on hold pending the exhaustion of all remedial avenues. This action is being taken by Agent Ernest Giuliani of 25 Grandview Road in East Greenwich, R.I. 02818 - phone 401 528-4366, who is in charge of my Federal License renewal which has been approved for everything with the exception of the Zoning ruling in Plainville.
In summary, it would appear that I am seeking to determine if there is any manner of intervention that can be taken under handicap or other regulations as having to resort to court for an appeal would force me to forfeit my license because of the expense involved. Any help or information that you may be able to provide me with would be greatly appreciated to guide me in a direction whereby I could avoid court costs, etc. I am confident, that as in the past, Nancy Johnson and her staff will do everything in their power to assist in this dilemna, but I was not advised of time restrictions if any exist for appeal, so I am hopeful you can at least look into this matter as soon as possible.

Respectfully
XX

ILLEGIBLE

01-04357

T. 11-22-96

DEC 4 1996

The Honorable Tim Holden
Member, U.S. House of Representatives
Berks County Services Center
633 Court Street
Reading, Pennsylvania 19601

Dear Congressman Holden:

I am responding to your request for information on the Americans with Disabilities Act (ADA) on behalf of your constituent, Ms. Carolyn Jaffe.

Specifically, Ms. Jaffe requests information regarding the responsibility of a landlord and a tenant as it relates to the removal of barriers in an existing building. The regulation implementing title III of the ADA (enclosed) states that "[b]oth the landlord who owns the building that houses a place of public accommodation and the tenant who owns or operates the place of public accommodation are public accommodations subject to the requirements of this part." 28 C.F.R. S 36.201(b). However, the regulation does allow the parties to allocate their compliance responsibilities between them through means of a lease or contract.

The responsibilities of an entity subject to the title III regulation are two-fold. Both facilities housing places of public accommodation that are designed or constructed for first occupancy after January 26, 1993, and those that are altered or renovated after January 26, 1992, must comply with the ADA

Standards for Accessible Design. 28 C.F.R S 36.406. In addition, a public accommodation must "remove architectural barriers in existing facilities ... where such removal is readily achievable." 28 C.F.R. S 36.304. This provision requires that public accommodations in existing facilities that are not being altered must, nevertheless, remove barriers to access where that removal is able to be carried out without much difficulty or expense.

If Ms. Jaffe has any questions or needs additional information regarding the requirements of the ADA, she may contact the Department's ADA information line at 800-514-0301 (voice) or 800-514-0383 (TDD). Members of the Disability Rights

October 16, 1996

Congressman Tim Holden
633 Court Street
Reading, PA 19601

Dear Congressman Holden:

I am writing to request a determination regarding handicap accessibility for medical office buildings. I have been renting space at 309 Madison Avenue, where my medical practice is located and I would like to know who is responsible for supplying ramps, handrails, etc. My patients have complained about the difficulty of getting into and out of my office, and I am interested in finding out whether the responsibility for these measures falls upon the landlord or myself as the tenant.

I would like to thank you in advance for your expedient response to this request. Time is of the essence, since winter is approaching we would like to have this issue resolved so that our handicapped patients will be able to continue to receive medical treatment irregardless of weather conditions. Thank you again for your time and consideration of this request.

Sincerely,

Carolyn Jaffe, R.Ac., CMT

DEC 9 1996

XX
XX
XX

Dear Ms. XX :

I am responding to your letter regarding the accessibility of gas stations to people with disabilities. Your letter asks the Department of Justice to take action to compel companies that operate gas stations to provide a "full service" option for their customers. Please excuse our delay in responding.

The Department of Justice is responsible for enforcing title III of the Americans with Disabilities Act (ADA), which prohibits discrimination on the basis of disability by places of public accommodation, including gas stations. The ADA requires existing gas stations that are not otherwise being altered to remove architectural barriers to the extent that it is readily achievable to remove them. The Department of Justice regulation implementing title III requires such barrier removal to comply with the ADA Standards for Accessible Design (Standards) for each altered element if it is readily achievable.

If a self-service gas station determines that it is not readily achievable to redesign gas pumps to enable people with disabilities to use them, the gas station is not required to make physical modifications to the gas pumps. However, the gas station is required to provide its services to individuals with disabilities through any readily achievable method, such as providing refueling service upon request to an individual with a disability at self-service prices. A service station is not required to provide refueling service to individuals with disabilities at any time when it is operating exclusively on a remote control basis with a single cashier. Similarly, the ADA does not require a self-service gas station to initiate a full-service operation.

cc: Records, Chrono, Wodatch, Blizard, FOIA
n:\udd\blizard\drsltrs\gaspumps.ltr

Because no Federal civil rights law enforced by this Division prohibits the operation of gas stations on a self-service basis, we can take no further action in response to your request.

Sincerely,

John L. Wodatch
Disability Rights Section
Civil Rights Division

XX
XX
XX

Dear Mr. XX :

Your letter to President Clinton was forwarded to the Disability Rights Section, Civil Rights Division, Department of Justice. Your letter argues that your student loan lender should be required to grant a deferment of your loan payments because you have a disability.

The Disability Rights Section enforces title III of the Americans with Disabilities Act (ADA), which prohibits discrimination on the basis of disability by places of public accommodation, including banks. Covered entities must make reasonable modifications to their policies, practices, and procedures when necessary to avoid discrimination on the basis of disability. However, modifications are not required if they will fundamentally alter the nature of the service provided.

A lender must grant deferments to people with disabilities on the same basis as it grants them to people without disabilities. A lender may not use a person's disability as a basis for refusing a deferment that the person is otherwise qualified to receive. In addition, a lender may be required to make reasonable modifications to its deferment policies in order to ensure that people with disabilities have equal access to deferments. However, the ADA does not require a lender to grant deferments on the basis of disability. To require a lender to forego repayment of money loaned indefinitely would likely constitute a fundamental alteration of the lender's loan program.

If your student loan was guaranteed by the Federal government, you may wish to contact the U.S. Department of Education to determine the options available to you.

Field 1 = XX
XX
XX

Field 2 = Dear Mr. President.

During all our Nations concerns on crime and protection for the criminals rights, I would like to ask this question? What about the VICTOMS RIGHTS!! Two and a half years ago 5-28-94 to be exact, I became a victom of a violent crime. I was shot at point blank range by a 357 magnum pistol. the most shocking point is, I was shot in the HEAD. The bullet entered my lower left side of my neck under the jawbone. 1/4 in. from jugular traveled through the roof of my mouth, sinuses, and out my right temple. The bone from my mouth tore out my right eye. so now Im blind there. My point is that as far as I know I am one out of 60 million t ever survive such a magnitude of injury and still function okay mentally. the gun was a semi-automatic. Why am i telling you this you might ask, well so far I cant get anyone to listen to my story of survival and trials of pain. during the last 2 years I have been denied benefits jobs and government help. Why. I was denied help from a CA. agency called victims of violent crime due to i complained to my state legislator about there treatment of my case. I tryied to get in touch with this departments supervisor but to no avail. So I called my representative. case was put on hold for nine months then turned down because i didnt press charges. YEAH right against who was i supposed to do that to. THE officer lied and give a correct police report much less icant get a copy of my taped testimony from them that will show I was telling the truth. and that hes lying. This all started because the person handling my case wasnt doing her job. I notice that a lot lately, most state agency workers just dont want to take the time to investigate your needs so they brush you off for an easier case. I cant even get a lawyer to help due to there is no money involved for them. Federal law took away my job because im blind but when I applied for benifits under this law so I can go back to school and learn a new profession. Ihad to pay a lawyer to get the benifits I should of gotten anyway. Im studying environmental science now thanks to you and your federal courts that listened and gave me my chance to go back to school and be a productive citizen again. I believe you need to set up an agency to regulate companies that handle student loans for my old ones in default because of company greed... I applied for defferment of payments once when i got laid off a couple of years ago and no problem, butr when i applied for defferment due to disability I when through all kinds of hell and denied that right. I sent them certified copies faxes etc. and they never processed them. they defaulted my student loan as if i never applied for it. The biggest case i

Have is this and its so simple. if i never contaced them then why do they

01-04366

have my coreect address after i moved nuch less my reciepts of requests. I would like to speak out as a victom. please help..
even though i was shot with a gun i believe its not the laws of our nation that are correcting our problem. criminals will get them anyway no matter how many laws we pass, although to make assult weapons or semi auto pistols of 357 magnum range for5 sell to the public is rediculous..

sincerly thankyou XX

01-04367

DEC 13 1996

The Honorable Rick Lazio
U.S. House of Representatives
Washington, D.C. 20515-3202
Dear Congressman Lazio:

I am responding to your letter on behalf of your constituent, Mr. XX , regarding the requirements of the Americans with Disabilities Act (ADA) for sidewalks at new highway construction projects. Please excuse our delay in responding.

Generally, the ADA does not require installation of pedestrian walkways in new construction projects where no such walkways are planned. When public entities build new facilities or alter existing facilities, the Department of Justice's regulation implementing title II (enclosed) requires that the newly constructed or altered areas be made accessible to individuals with disabilities. The regulation specifically provides that new construction of or alterations to streets give rise to accessibility obligations for curb ramps. 28 C.F.R. S 35.151(e). Therefore, if a State or local government were constructing a new street or intersection or were altering an existing street or intersection, it would be required to provide accessible curb ramps or ramps where pedestrian walkways that are elevated or curbed intersect with the new or altered street or intersection. 28 C.F.R. S 35.151(e)(1). In addition, if the State or local government were building or altering a pedestrian walkway, it would be required to provide curb ramps or ramps as needed where the walkway intersects streets or intersections. 28 C.F.R. S 35.151(e)(2).

In addition to the requirements for new construction and alterations, title II of the ADA also requires public entities to ensure that existing programs, services, and activities are accessible to individuals with disabilities unless to do so would cause a fundamental alteration of the nature of the program,

service, or activity or would result in undue financial or administrative burdens. 28 C.F.R. S 35.150. If installation of a curb ramp or of a pedestrian walkway is necessary to ensure

cc: Records, Chrono, Wodatch, McDowney, Hill, FOIA
n:\udd\hille\policylt\lazio.tr\sc. young-parran

01-04368

that individuals with disabilities have access to a particular State or local program, such as a school, equivalent to the access available to non-disabled individuals, the public entity may, in some circumstances, be required to install a ramp or walkway where none existed previously.

Of course, the ADA does not prohibit State or local governments from exceeding the requirements of the ADA. Nor does it limit their discretion to provide new pedestrian walkways and ramps as they see fit to serve interests in addition to accessibility.

I hope this information is helpful to you in responding to your constituent.

Sincerely,

Deval L. Patrick
Assistant Attorney General
Civil Rights Division

Dear Ms. Davis:

I am writing on behalf of Mr. XX of XX New York.

Mr. XX has been told that the Americans with Disabilities Act requires state's to install sidewalks in all new highway construction with potential pedestrian access (e.g. service roads to major highways). Mr. XX is concerned because many of these sidewalks destroy substantial areas of greenery along the roadway. I would greatly appreciate if you could see to it that this claim regarding the act is investigated.

If you have any questions or concerns, please do not hesitate to contact me.

Sincerely,

Rick Lazio
Representative in Congress

Mr. Michael McDonough, Director
Bureau of Support Services
Portland Public Safety
109 Middle Street
Portland, Maine 04101

Dear Mr. McDonough:

Thank you for your assistance and cooperation with my November 1, 1996, review of the Portland 9-1-1 system's compliance with title II of the Americans with Disabilities Act (ADA). You were very helpful. Thank you, also, for your letter of November 26, 1996, regarding the steps you have taken to improve the Portland 9-1-1 system's accessibility to individuals who use TDDs for telephone communication.

As we discussed during our meeting, title II of the ADA prohibits discrimination on the basis of disability in State and local government services, including 9-1-1 services. Section 35.162 of the enclosed regulation implementing title II requires that telephone emergency services provide direct TDD access.

My review raised several concerns about the accessibility of Portland's 9-1-1 services to people who use TDDs. Those concerns involved the need for additional TDD equipment, written standard operating procedures for handling TDD calls, training and testing for call-takers, and public outreach.

Your November 26, 1996, letter indicates that you have purchased two additional TDDs in order to ensure that each call-taker has easy access to a TDD. Your letter also indicates that you have purchased a video training series about TDD-accessible 9-1-1 services, that all personnel assigned to the communications

division are receiving that training, and that call-takers will be tested on the material.

udd:hille:me911new.ltr
cc:Records Chrono Wodatch Magagna Hill Mather Novich FOIA

01-04371

In light of the significant steps you have already taken to ensure TDD access to your system, only a few issues remain to be addressed and you have agreed to resolve these issues. First, you should ensure that backup TDD equipment is available for cases of equipment failure. You have indicated that your 9-1-1 system's standard operating procedures do not include procedures for answering TDD calls. Such procedures are important to ensure that TDD calls are handled appropriately and consistently. Such procedures must ensure that call-takers consider "silent" open lines as possible TDD calls and respond accordingly without requiring the TDD caller to hit additional keys, that call-takers understand the language conventions used in TDD calls, that call-takers understand how to call a TDD-caller back using a TDD, and that call-takers respond appropriately to TDD Relay Service calls.

To ensure the continued effectiveness of your training and testing program, refresher courses should be given to call-takers periodically (e.g., every six months) and test calls should be made periodically to ensure call-takers are responding appropriately.

Finally, the TDD-accessibility of Portland's 9-1-1 system needs to be brought to the attention of the community. A public education campaign should be designed and implemented to make TDD users and others aware that Portland's 9-1-1 services are directly accessible by TDD. The assistance of individuals from the local community(ies) who are deaf, hard of hearing, or who have speech impairments should be sought in developing and carrying out this program. I have enclosed a list of groups in your area who may be able to assist in this effort. As part of this outreach, the next edition of the local telephone directory must prominently note the direct TDD accessibility of Portland's 9-1-1 services. Such notices should appear at each location in the directory where 9-1-1 services are mentioned.

I understand that the Portland 9-1-1 system will be substantially renovated in the next year to become a Primary Public Service Answering Point in the new statewide 9-1-1 system. I expect that the necessary changes described above will continue to work under the new system. However, we will, of course, work with you to resolve any inconsistencies with the new system. We

also expect to contact the persons responsible for implementing the statewide system to provide any assistance they may need to ensure that the new system complies with the requirements of the ADA.

I have enclosed a copy of the Telecommunications for the Deaf, Inc.'s publication, Emergency Access Self-Evaluation (EASE) manual, for your information. If I can be of assistance in addressing the issues I have noted, please do not hesitate to contact me at (202) 307-0663 or at the above address. I would also appreciate being kept informed of your progress.
01-04372

Again, thank you for all your cooperation and effort in this matter.

Sincerely,

Eve L. Hill
Attorney

Office of the Assistant Attorney General Washington D.C. 20530

Oct 25 1996

The Honorable Vernon J. Ehlers
Member, United States House of
Representatives
166 Federal Building
Grand Rapids, Michigan 49503

Dear Congressman Ehlers:

This is in response to your inquiry on behalf of your constituent, Mrs. Sharon R. Brinks, regarding whether hotels can require deposits for auxiliary aids and services such as assistive listening devices. A hotel is considered a public accommodation and is covered under title III of the Americans with Disabilities Act (ADA). Please excuse our delay in responding.

The ADA requires public accommodations, including hotels, to furnish appropriate auxiliary aids and services where necessary to ensure that no individual with a disability is excluded, denied services, segregated or otherwise treated differently than other individuals without disabilities because of the absence of auxiliary aids and services. Specifically, your constituent inquires whether a hotel can require credit card imprints before auxiliary aids such as an assistive listening device would be

provided. Section 36.301 of the title III regulations prohibits a public accommodation from imposing a surcharge on a particular individual with a disability or any group of individuals with disabilities to cover the cost of measures that are required to provide that individual or group with the nondiscriminatory treatment required by the ADA.

It is the Department's view, however, that reasonable, completely refundable, deposits are not prohibited by this section. Requiring deposits is an important means by which an entity can ensure the availability of equipment to meet the

cc: Records, chrono, Wodatch, Magagna, Deykes, McDowney, FOIA:dhj T. 10/4/96 udd\Deykes\Congrls\Ehlers 202-38-0

auxiliary aids requirement with future patrons. Therefore, the requirement of a credit card imprint would not be considered an unreasonable deposit. Further discussion of the meaning of surcharges and deposits may be found in the appendix to the enclosed regulation on page 305.

For your information, I am enclosing a copy of the title III regulation and the Department's Title III Technical Assistance Manual. I hope this information will be helpful to you in responding to your constituent.

Sincerely,

Deval L. Patrick

Sharon R. Brinks
ATTORNEY AT LAW July 31, 1996

Rep. Vern Ehlers

110 Michigan NW
Grand Rapids, MI 49503

Dear Representative Ehlers:

I am a Board Member for the Legal Network for the Deaf and Hard of Hearing. In that capacity, we as a Board try to stay abreast of issues involving communication access throughout the country and to be a resource to various individuals involved with the Americans with Disabilities Act issues, etc.

On a recent trip to Las Vegas, I discovered that two of the hotels, the Sheraton Desert Inn and the Flamingo Hilton, both required credit card imprints before they would permit me to check out an assistive listening device. The normal procedure in place throughout the United States has been to require some sort of a deposit (such as a driver's license) in order to assure that the assistive listening device would be returned. These are the first times that I had encountered a request for a blank credit card commitment by myself in order to obtain the rights due pursuant to the Americans with Disabilities Act.

I am wondering if you could inquire from the EEOC what their position is on this particular point. As I perceive the intent of the act as well as the legislation as drafted, requiring "financial security" is not appropriate. It has the potential to make communication access non-existent for some individuals.

Thank you in advance for your attention to this matter.

Sincerely yours,

Allegan

The Honorable Nancy Pelosi
Member, U.S. House of Representatives
Federal Building
450 Golden Gate Avenue
San Francisco, California 94102-3460

Dear Congresswoman Pelosi:

I am responding to your letter on behalf of your constituent, XXX , regarding the requirements of the Americans with Disabilities Act of 1990 (ADA) regarding health clubs and martial arts schools.

Health clubs and martial arts schools are covered by title III of the ADA and, therefore, are prohibited from discriminating on the basis of disability in the provision of their services. Title III requires, among other things, that covered entities make reasonable modifications to their policies, practices, and

procedures when necessary to ensure that people with disabilities have equal access to their services.

A health club, therefore, may be required to modify its training procedure to provide extra time for an individual with a learning disability to learn how to use the available exercise equipment. Similarly, exercises in an exercise class may have to be demonstrated more slowly than usual, either before or during class, in order to ensure that a person with a learning disability can follow the class. A martial arts school may need to modify some of its class requirements, such as requirements for specific warm-up movements, for a person with a disability who cannot carry out the required movements.

Title III does not, however, require a covered entity to make any modification that would fundamentally alter the nature of the services provided. Therefore, an exercise facility would not be required to develop a special curriculum for an individual with a disability. Similarly, a martial arts program that requires participants to demonstrate a specific level of achievement in order to advance in the program would not be required to exempt a participant with a disability from the fundamental requirements of a class.

cc: Records, Chrono, Wodatch, McDowney, Hill, FOIA
n:\udd\hille\policylt\pelosi.ltr\sc. young-parran

When an individual with a non-apparent disability requests a reasonable modification of policy under title III, a covered entity may ask the individual questions necessary to determine what modifications will be effective and reasonable. The entity may not ask additional questions that are not tailored toward determining the appropriate modification.

I have enclosed two copies of the regulation implementing title III of the ADA for your reference. I hope this information is helpful to you in responding to your constituent.

Sincerely,

Isabelle Katz Pinzler

Civil Rights Division

Enclosures
NOV 19 1996

San Francisco, CA

November 11, 1996

Norman Chesler
Representative Nancy Pelosi
450 Golden Gate Avenue
San Francisco, CA 94102

Dear Mr. Chesller,

I have a disability covered under title three of the 1990 ADA. I am writing to you regarding understanding of title three as this relates to public accommodation.

I have had a hard time in exercise, martial art classes and health clubs because of my disability. I have tried a few times on and off without out much success because of a number of difficulties from my disability. Outside of my experience with Adaptive PE I have had a hard time with sports, recreation and exercise.

Recently the 1990 ADA was brought to my attention. After reading title three of the handbook I am wondering if 36.203, Intergrated Settings, 36.302, Modifications and 36.201a, General and other sections of title three applies to my situation.

In Health Clubs/Fitness Centers/Gyms I have two problems. One is with understanding the instructions for the different cardiovascular and weight training machines. I need the instructions in audio tape (I had text books on cassettes in college) and not the printed form that appears on the machines. Because of information processing difficulties from my disability (I do not have hearing problems) it takes me much longer time then most people to understand how these machines work. Another method which should work is to have someone explain, taking a much longer time then the normal introductory explanation as to how the machine works. I have hurt myself (I have taken up to four months for one injury to get better)

several times on exercise machines because I do not understand how they work.

The second problem I have in health clubs is in group classes. I have gone to a number of exercise classes that are not aerobic classes which are for beginners. Though these classes have

beginners not everything is slowly demonstrated before it is done. Because I have Gross Motor Planning Disorder, (one of the difficulties I have from my disability), I am unable to reproduce an exercise or movement unless it is done slowly several times.

Because of this disorder I am unable to reproduce an instructors movements or exercises that they do unless it is demonstrated slowly several times. I am unable to participate for up to 35% of the classes because the instructors do not slowly do or demonstrate some of the exercises. I have found this to be a consistent problem at several places.

The classes are 30 to 60 minutes in length. If the instructor demonstrated slowly everything it would take up 2-3 minutes in the shorter classes and 2-4 minutes in the 60 minute classes. I think this would be a minor modification.

Would a health club be required to demonstrate everything slowly? The marketing people say the instructors are suppose to demonstrate everything slowly in classes which are for 'beginners' or 'all levels'. I have tried several ways to resolve this including meeting the instructors before class. If the 1990 ADA covered this situation it would open up exercise/recreational class opportunities for me that I could fully participate in.

I have found one type of martial art which I can learn and do somewhat even though I have a disability. While I am able to fully participate in most of the core of the class, I am not able to do 25%-50% of the warm ups because of primary and secondary restrictions and difficulties from my disability. What has happened, is that I have been taking private lessons which are very expensive (about 8 times the cost of a group class) partly because I can not do a lot of the 20-35 minutes

of warm ups. The instructor asks that I do them in the group class. In private lessons I only have to do warm ups which I can do.

Are martial art schools considered public accommodations in category's 10 or 12?

Does the 1990 ADA require that I be excused from some warm ups or be allowed to do other warm ups which I am able to do?

Sometimes there is one part of the core part of the class which I am not able to participate in because of my disability. Is the instructor required to provide an alternative activity for me during this part of the class?

With regards to the two situations covered in this letter I have the following question. It is always hard to explain my disability to someone not in the health care industry so that they understand it. Am I required to explain it? Should

I have a doctor's letter covering each detail of why I can't participate or do something? It would be easier to just have a letter documenting that I have the disability. If I did need to explain why I can't do each thing it would be hard for me and my doctor.

Though the difficulties covered in this letter may seem silly they are important to me. It is not possible for me to play most popular sports or recreational activities because of my disability.

I would greatly appreciat e any time that you spend looking into these issues.Can you please keep this letter confidential.

Sincerely yours,
XXX
XXX

December 10, 1996

Dear Mr. Chesler,

Thank you for your letter of November 26th.

I was confused by Congress Woman Nancy Pelosi's response. The information goes against what I have been told in the past with regards to Titles 2 and 3.

I assume there was miss communication with my first sentence of my letter of November 11th. I have a disability that is specifically listed as being covered in Titles 2 and 3. My disability is included in the circled areas of the enclosed copy marked A. As a direct result of my disability I have the disorders or difficulties mentioned in my letter. Perhaps you thought that physical exercise is my disability. I have always been told that private public places of exercise and recreation are covered in category 12 of Public Accommodation.

I have been told that I am covered in the two situations in my letter, but I have some questions regarding this.

Could you please review my letter of November 11th again and respond. I would appreciate if you could please assist me by answering the questions in my letter of the 11th.

Sincerely yours,
XXX

enclosures: photocopys

MAR 19 1997

The Honorable Jane Harman
Member, U. S. House of Representatives

1217 El Prado Avenue
Torrance, California 90501

Dear Congresswoman Harman:

I am responding to your letter on behalf of your constituent, David Raizman, asking for clarification of the requirements of the Americans with Disabilities Act of 1990 (ADA) with respect to the installation of accessible freeway call boxes. Mr. Raizman has asked you to determine if the ADA requires a public entity to modify or replace inaccessible call boxes in the absence of a specific Federal design standard for this type of equipment.

Title II of the ADA prohibits discrimination on the basis of disability in the programs, activities, and services of public entities, including public agencies responsible for freeway design, maintenance, and operations. Therefore, programs and services offered to motorists must be accessible to motorists who have disabilities. This program access obligation applies regardless of whether a specific Federal design standard has been issued for unique elements such as emergency call boxes.

In the absence of specific Federal requirements applicable to the design of emergency call boxes, a public entity may rely on the general accessible design criteria contained in the ADA Standards for Accessible Design (28 CFR pt. 36, Appendix A) and the Uniform Federal Accessibility Standards (41 CFR SS 101-19.600 to 101-19.607). Both of these standards provide guidance to public entities concerning design considerations for accessible routes, clear space, reach ranges, and operating mechanisms. In addition, the existing Federal standards and the enclosed Department of Justice regulations (28 CFR pts. 35 and 36) offer guidance about factors to consider in developing accessible emergency communication devices that will provide effective communication for people who have vision, speech, or hearing impairments.

cc: Records, Chrono, Wodatch, McDowney, Blizard, FOIA
n:\udd\blizard\drsltrs\harman\sc. young-parran

The ADA expressly provides that covered entities must comply with State or local laws or regulations that provide greater or equal access for individuals with disabilities. Therefore, if the State of California has established specific design standards for accessible call boxes, those standards should be followed unless or until they are superseded by more stringent Federal standards. Public entities should note that any Federal standards for the new construction or alteration of freeway call boxes will be prospective in application. They will not require the replacement of accessible equipment installed prior to the effective date of the standards. Existing equipment is required to be replaced only when the existing equipment fails to provide effective access to the public entity's program.

I hope that this information is helpful to you in responding to your constituent.

Sincerely,

Isabelle Katz Pinzler
Acting Assistant Attorney General
Civil Rights Division

November 22, 1996

The Honorable Jane Harman
Member, U.S. House of Representatives
Torrance District Office
1217 El Prado
Torrance, California 90501

Re: Inquiry to Department of Justice

Dear Congresswoman Harman:

The Western Law Center for Disability Rights is a non-profit organization that provides legal and mediation services to persons with disabilities throughout California, including thousands in your district. Many of those we serve are concerned about Los Angeles County's 4,300 emergency freeway call boxes, all of which are inaccessible to persons with hearing and speech impairments and

many of which are inaccessible to wheelchair users.

As you know, the "public entity" provisions of the Americans with Disabilities Act ("ADA" -- 42 U.S.C. S 12133) and earlier federal (i.e., the Rehabilitation Act -- 29 U.S.C. S 794) and state civil rights laws (i.e., California Civil Code Section 54) guarantee persons with disabilities free and equal access to precisely these kinds of benefits and services of state and local governments.

Nevertheless, the responsible State and County agencies have taken the position that they need not comply with these statutory mandates and the implementing regulations because of a specific, pending "guideline" proposed as an Interim Final Rule in June 1994 by the Architectural and Transportation Barriers Compliance Board (the "Access Board"). See 36 C.F.R. pt. 1191, App. A, S 14.2.6(4). Specifically, they say any dispute involving the pending call box guideline is "unripe" for adjudication because there can be no current obligation on their parts to do anything.

Meanwhile, disabled motorists in Los Angeles County and across the State and nation continue to ride our freeways without the benefit of access to the emergency aid made available at the call boxes.

The Honorable Jane Harman
November 22, 1996

Those persons we serve would like to have a better understanding of whether the continued pendency of this guideline (we have learned from the Access Board that they no longer are pressing for its finalization) in fact abridges the free and equal access rights guaranteed under the ADA, Rehabilitation Act and California Civil Code Section 54. Specifically, they have the following questions of the appropriate interpretation of these laws:

(1) What effect, if any, does the pendency of a specific Access Board guideline have on obligations incurred or rights provided under:

(a) 42 U.S.C. S 12133?
(b) 28 C.F.R. pt. 35 (see, e.g., 28 C.F.R. SS 35.130(b) (1) (iii), 35.130(b) (4), 35.151, 35.161, 35.162)?
(c) more general, but active and applicable accessibility guidelines under the ADA

Accessibility Guidelines (36 C.F.R. pt. 1191, App. A) (see, e.g., 36 C.F.R. pt. 1191, App. A, SS 4.2, 4.2.1, 4.2.3, 4.2.5, 4.2.6, 4.3, 4.5, 4.6, 4.10.14, 4.27, 4.28, 4.31)?

(d) more general, but active and applicable accessibility guideliness under the Uniform Accessibility Standards (41 C.F.R. pt. 101-19, subpt. 101-19.6, App. A) (see, e.g., 41 C.F.R. pt. 101-19, subpt. 101-19.6, App. A, SS 4.2, 4.2.1, 4.2.3, 4.2.5, 4.2.6, 4.3, 4.5, 4.6, 4.10.14, 4.27, 4.28, 4.31)?

(e) preceding and broader mandates under California law (see, e.g., Cal. Civ. Code S 54)?

(2) Does the answer to any question posed in Number (1) above change if it is shown that the pending guideline in the form of an Interim Final Rule has been withdrawn from consideration by the Access Board?

(3) Assume for purposes of this question that the appropriate State and County agencies agreed to commence remediation of the call box system before the pending guideline was finalized, further assume that the guideline was finalized during the remediation process and further assume that the finalized guideline required additional or different standards than those undertaken by the governmental entities: could these governmental entities be made to comply with the new, finalized guideline on a retroactive basis either with respect to:

(a) those call boxes that they have already remediated?

(b) those call boxes that they have yet to remediate, but have concrete plans and budgets to undertake that remediation?

(4) Is there any obligation under 42 U.S.C. S 12204 for the Access Board to propose a design standard for any particular facility or device, such as a freeway call box?

The answers to these questions would prove quite valuable to those we serve in assessing whether they must continue to wait for the Access Board to act or whether they have an immediate ability to enforce their rights dating back to 1968 and Section 54 of the

California Civil Code.

Thank you for considering this request. We would be glad to answer any questions posed by you or your staff, including any requests for further elaboration.

Very truly yours,

David H. Raizman
Executive Director

Office of the Assistant Attorney General Washington, D.C. 20530

The Honorable Bart Stupak
Member, United States House of Representatives
1120 E. Front Street
Suite D
Traverse City, Michigan 49686

MAY 2 1997

Dear Congressman Stupak:

This letter is in response to your inquiry on behalf of your constituent, XXX , regarding the Americans with Disabilities Act of 1990 (ADA). XXX refers to an article from the Detroit Free Press, stating that employers are required to provide designated smoking areas that will protect smokers from inclement weather and extreme temperatures. XXX wishes her employer to be directed to meet that requirement. Please excuse our delay in responding.

When Congress enacted the ADA, it specifically stated that the ADA does not preclude the prohibition of, nor the imposition of restrictions on, smoking in places of employment or other facilities covered by the Act. 42 U.S.C. S 12201 (b). Thus, the Detroit Free Press' statement that the ADA "does guarantee that any employer who decides to restrict or prohibit your ability to smoke on the job cannot do so without 'making reasonable accommodations' to your disability" is incorrect.

I hope this information is useful to you in responding to your constituent.

Sincerely,

Isabelle Katz Pinzler
Acting Assistant Attorney General

Smokers gain rights through 'addict' label

(handwritten) Detroit Freepress
(handwritten) Fall 1995
FEB 07 1997

By John (illegible)
Special to the Washington Post

Smokers of America, take heart. Your deliverance is at hand. No longer can you be denied covered employment opportunities. No longer can you be forced to huddle in alleyways in sub-zero temperatures to indulge your habit. No longer must you bear without recourse, the indignities heaped upon you by condescending, nonsmoking co-workers.

How has this come to pass? Who are your saviors? Why, none other than President Bill Clinton and Food and Drug Administration Commissioner David Kessler, who earlier this month transformed you from a despised and oppressed rabble into the newest legally protected minority.

Earlier this month, Clinton approved Kessler's finding that nicotine

is an addictive drug. As a result, you are now federally recognized drug addicts.

No longer are you responsible adult citizens who have foolishly chosen to run the risk of disease and death in the long term for the immediate gratification afforded by smoking. You are now victims of a "psychological substance use disorder." This means you are officially disabled and protected by the Americans with Disabilities Act (ADA).

The ADA protects anyone who has or is regarded as having a physical or mental impairment that substantially limits a major life activity. This has been interpreted to include drug addicts and alcoholics. Before, when smoking was just a nasty habit, the act did not apply to you. Now that you are officially impaired, you are legally entitled to all the rights and privileges currently enjoyed by those undergoing 12-step programs.

Before, employers could ask you whether you smoked during an employment interview. They could refuse to hire you even though you were the best-qualified applicant in order to save on their health care costs. They could deny you a promotion you had earned simply because you were a smoker.

No longer. Now any of these actions would constitute blatant discrimination against the disabled.

I do not wish to overstate the case.

Life is not a bed of roses. The ADA will not guarantee you the right to smoke on the job.

However, it does guarantee that any employer who decides to restrict or prohibit your ability to smoke on the job cannot do so without "making reasonable accommodations" to your disability. Although there is a great deal of legal uncertainty as to what counts as reasonable accommodation, you may feel confident that being driven outside

(handwritten) hi
This is

into freezing cold, driving rain or tropical heat in order to deal with your handicap will not qualify.

You should also be aware that now that you are officially disabled, you are entitled to a workplace free of harassment based on your disability.

This means that your employer is legally obligated to ensure that your supervisors and co-workers do not engage in conduct that would create an intimidating, hostile or offensive working environment for you as a smoker.

A week ago, you had to put up with the superior attitude of your condescending nonsmoking co-workers. If they insisted on badgering you with paternalistic lectures about how smoking is bad for you or gracious advice on how to quit, if they greeted your trips outside for cigarette breaks with looks of disgust or pity, or worse, with fake hacking coughs or derisive comments about kissing an ashtray, you had no choice but to grin and bear it.

Now, thanks to the president and the FDA commissioner, you can demand that your employer put a stop to such behavior and sue if he or she does not take "immediate and appropriate corrective action."

So do not be offended the next time Kessler refers to you as a drug addict. Do not rebel against being characterized as one bereft of free will, mindlessly enslaved by tobacco and unable to decide for yourself what risks you wish to run.

Try to see his statement for what it is--an open invitation to the wonderful world of legally recognized victimhood with all the rights and benefits contained therein. Accept the invitation. If you do, I think you will find the workplace to be a more felicitous, accommodating and warmer place.

Especially on those winter workdays when it is 10 below.

What I have.

Thank you very much for your attention (handwritten)

John Hasnas is an (illegible) professor at the Georgetown University School of Business.

JUN 13 1997

The Honorable Earl Pomeroy
U.S. House of Representatives
Washington, D.C. 20515

Dear Congressman Pomeroy:

This is in response to your letter on behalf of your constituent, XXX , who asserts that the North Dakota State Legislature has violated the Americans with Disabilities Act of 1990 (ADA) by failing to enact legislation to ban smoking in places of public accommodation. Please excuse our delay in responding to you.

The ADA prohibits discrimination on the basis of

disability. The ADA clearly permits a ban on smoking, but it only requires covered entities to make reasonable modifications in their policies and practices that are necessary to enable individuals with disabilities to participate in their programs and activities.

The Department of Justice has declined to state categorically that sensitivity to cigarette smoke is a disability because the degree of impairment varies among individuals. To be legally recognized as a disability, a physical or mental impairment must substantially limit one or more major life activities of an affected individual. Thus, the determination as to whether sensitivity to smoke is a covered disability must be made using the same case-by-case analysis that is applied to all other physical or mental impairments.

In some cases, an individual's respiratory or neurological functioning may be so severely affected by sensitivity to cigarette smoke that he or she will be considered disabled. Such an individual would be entitled to all of the protections afforded by the ADA. These protections may include a ban on smoking in a specific covered facility if such a ban can be imposed without fundamentally altering the nature of the business or program. In other cases, however, an individual's sensitivity to smoke will not constitute a disability because the individual's major life activity of breathing is affected, but not substantially impaired. In this situation, an individual would not be entitled to claim ADA protection.

cc: Records, Chrono, Wodatch, Blizard, FOIA
n:\udd\blizard\drsltrs\policy\smoking\sc. young-parran

After a determination is reached that a person is an individual with a disability who is entitled to claim the protection of the ADA, it is necessary to determine if a requested modification, such as a ban on smoking, is "reasonable." This determination involves a fact-specific, case-by-case inquiry that considers, among other factors, the effectiveness of the modification in light of the nature of the disability in question and its effect on the organization that would implement it. Staron v. McDonalds Corp., 51 F.3d 353 (2d Cir. 1995) (Lower court dismissal was reversed and remanded to permit plaintiffs to offer evidence that a requested smoking ban

was a reasonable modification).

Because of the case-by-case nature of these determinations, the ADA regulations do not require an absolute ban on smoking. Therefore, the failure of the North Dakota State Legislature to impose a ban on smoking in public places does not violate the ADA.

I hope this information is helpful to you in responding to your constituent.

Sincerely,

Isabelle Katz Pinzler
Acting Assistant Attorney General
Civil Rights Division

RECEIVED

DEC 18 1996

Congressman Earl Pomeroy
Washington, DC 20515

November 21, 1996

In 1995 the North Dakota State Health Department attempted to protect non-smoking employees and children from the effects of second-hand tobacco smoke. They also attempted to address the needs of the breathing disabled. This was presented as Bill 1367 at the 54th Legislative Assembly.

I have read through the entire testimony on Bill 1367 in utter disbelief. The way I see it, a majority of 52 legislators voted in favor of an activity that has no legal or constitutional right, and in doing so completely ignored the legal rights established by the federal government in the 1990 Americans With Disabilities Act.

ADA requires that a reasonable accommodation be made for the breathing disabled. Non-smoking areas may be socially adequate for the average non-smoker, but are entirely ineffective as a reasonable accommodation for the breathing disabled. A smoke-free policy is the most effective reasonable accommodation. (See Staron v. McDonald's Corp., 51F3d353)

It appears to me that rather than complying with ADA and requiring businesses to make reasonable accommodation for the breathing disabled.

North Dakota legislators have allowed private businesses and the hospitality industry to continue to make unreasonable accommodation for substance abuse.

Testimony was presented by Jess Cooper representing North Dakota's State Chamber of Commerce (GNDA) and David Meiers representing the North Dakota State Hospitality Association opposing Bill 1367 on the basis of the economic impact that it would have on private businesses and the hospitality industry.

In my research I have found no documentation of long-term negative economic impact on businesses (including restaurants) in other cities and states where a smoke-free policy has been established. In fact, in most cases business has increased. Why? Simple mathematics--the majority (75%) of all US citizens are non-smokers and prefer a smoke-free environment.

I am breathing disabled. Nothing aggravates my condition more than tobacco smoke. As a business owner I am fortunate that I no longer have to seek employment in a state that does not understand what it means to be breathing disabled. However, as an interior designer I travel all over North Dakota and Minnesota and I cannot enter most businesses, restaurants, and motel lobbies that are not smoke-free.

I know that the 1990 Americans With Disabilities Act covers my concerns. Under ADA I can sue each business and restaurant and motel all across North Dakota and Minnesota that I am unable to enter. Kind of a spendy solution, don't you think?

Over the past year I have had many conversations with other individuals who are also breathing disabled. We wonder what to do when North Dakota legislators, North Dakota's State Chamber of Commerce (GNDA) and the North Dakota State Hospitality Association do not seriously respond to federal laws like the Americans With Disabilities Act.

Your suggestion on how we can eliminate this form of discrimination in our state would be appreciated.

Sincerely,

XXX

The Honorable Vernon J. Ehlers
Member, U.S. House of Representatives

166 Federal Building
Grand Rapids, Michigan 49503

Dear Congressman Ehlers:

This letter is in response to your inquiry on behalf of your constituent, XXX , regarding the Americans with Disabilities Act of 1990 (ADA). XXX is training a service dog for his son and is concerned that the dog has been prohibited from certain facilities, including his place of employment. XXX suggests that service animals in training who are accompanied by their trainer should be allowed the same privileges as service animals who are accompanied by people with disabilities. Please excuse our delay in responding.

Section 36.302 of the Department of Justice regulation implementing title III of the ADA states that a public accommodation must modify policies, practices, or procedures to permit the use of a service animal by an individual with a disability. The ADA does not specifically require such modifications for persons who are training service animals. Thus, the facilities that have barred XXX from entering with his service dog-in-training have not violated the ADA.

I hope this information is useful to you in responding to your constituent.

Sincerely,

Isabelle Katz Pinzler
Acting Assistant Attorney General
Civil Rights Division

April 8, 1997

Congressman Vern Ehlers
166 Federal Building
100 Michigan NW
Grand Rapids, MI 49503

Hon. Mr. Ehlers:

I am becoming increasingly frustrated with a select but important group of people. Although my contact is local, I am sure there are persons of this group across the nation.

My son was born with myotonic muscular dystrophy. He is expected to be in a wheelchair most, if not all, of his life. The very day he was born, when I was told of his diagnosis, I immediately called Paws with a Cause to register him for a service dog, expecting that there would be a long waiting list. My thought was that he could grow old enough to be able to utilize a service dog while his name worked its way up the waiting list. The Paws representative indicated that the waiting list was not near as long as I expected and that I should call again when he reached the age of two years old.

When he reached the age of two, I called again, only to be told he should have been placed on the waiting list when he was born.

I have occasional contact with a few Paws trainers and discussed my son with them. I also discussed some of the ideas I have in using new technologies (I am experienced in computer technologies) to help disabled persons with commanding their dogs through computer technology when they have vocal impairments. Since I have limited experience with dog training, and since the trainers were excited about my concepts, they instructed me in the proper training techniques for the first two years with the dog in preparation for service work.

One of the most important elements of the training rigor was told to me as, "Take the dog everywhere with you." I thought they meant to be sure the dog was exposed to every experience I could provide, and brought the dog to many places, but not with me at all times. A few months later, when a trainer saw me at work, he asked where the dog was. I told him she was at home and he explained to me that he meant that she should be with me at all times, as if I were the person needing the assistance. That way, if the dog decided to do something inappropriate (like beg from another person, for example), I, as an able bodied person, could provide the proper instruction and take corrective action. (It would be difficult for a wheelchair bound person to do that.)

I explained the situation to my manager at work, the director at the store where I shop, my school, and even to GRATA (I did not have a car at the time). All agreed to allow

the dog to act as my assistant, understanding that (a) I did not have facilities like that of Paws to use, (b) I could not "work" at training the dog, but had to continue my employment, and (c) that it was important for the dog to be exposed to these environments during her formative years.

Progress with the training has been good for nearly 18 months. However, my manager's supervisor was told about the dog's attendance with me at work and informed my manager that I was not to bring her if I wished to continue to be employed. (Two facts are important to understand here. First, the dog behaved perfectly for 18 months already without incident and showed no reason to anticipate any trouble. Secondly, my work performance has been such that I have always placed in the top 20% of the performance ranking of part time sales associates, usually one of the "top five," so there is no doubt that my work performance may have negatively influenced their decision.)

Since Coco (the dog) has not been allowed to accompany me to work, her advancement in training has literally halted. Since I have not been able to "work" her during the hours I am at work, she has not been able to learn new skills. The time I can afford to spend with her has been consumed with maintaining social skills.

Occasionally, I am confronted by persons such as security officers at shopping malls or public arenas. When they inform me that "pets" are not allowed, I explain why she is harnessed and with me. Until today, that has been sufficient explanation for the person requesting that I leave. More on today later...

A few weeks ago, while at the Kent County Health Department for an appointment with a Michigan Special Health Services nurse with my son (yes Coco was with me), I asked both the caseworker and the nurse if there was any state or federal forms I should file to "register" Coco as a service dog or service dog in training. They checked with others in the office, but could find no such registration.

Since my employer has forced me to curtail training to the point of no progress, my wife has also contacted Senator Glen Steil's office, your office, and countless other offices in Lansing and Washington to try to find some way out of this "Catch 22," where Coco would be allowed under the ADA if she were fully trained, but not allowed to be trained. For example, even if I were to fully train her on the proper handling of the wheelchair, doors, and buttons, could you not imagine her fear the first time she had to ride a city bus lift if she had not practiced it with "able bodied" supervision?

Today, I was refused entry into the State of Michigan building downtown to register my automobile plates. The security guard and the building manager refused to allow my admittance to the building because I was not the disabled person. Their excuse was that "other dog trainers" would want to "socialize" their dogs in the building. (Socialization is part of a show dog's training as well.) Even though I happened to have documentation about my son's disability with me, they would not allow me in the building to conduct business with the Secretary of State. The guard told me I should build "facilities" to do the training on my own property.

I think it is great that organizations like Paws with a Cause can build facilities to train service dogs in simulated "real world" locations. I also think it is great that they can hire professional trainers to spend time with the

animals. (Trainers also take the animals home with them, by the way.) Unfortunately, there is more demand than they can fill for service dogs.

With reasonable accommodation, I have been able to make substantial progress in training a service animal for my own son. Coco's presence with me these past 18 months has not been any more than a slight, pleasant distraction where ever I have gone. In addition to the substantial progress I have been able to make toward providing a service dog for my son, I have been able to further the education of the public in proper etiquette toward a service dog (ignore it, do not pet it, please).

The intent of the Americans with Disabilities Act is to make it possible for service dogs to assist their charges and to prevent discrimination against the disabled by those who would refuse the animal's entrance in public places. It is also the intent of the Family Leave Act to allow reasonable accommodation to a parent in the provision of needs to his family.

It is virtually impossible to purchase a service dog or the training of a dog to become a service dog. (I have tried!)

This is the first time I have ever been confronted with the inability to provide an important benefit for a member of my family simply because a small number of key persons refused to allow a reasonable accommodation. All they need to do is allow the dog to accompany me. This does not reduce my effectiveness as an employee or disrupt the environment around me in any way. Virtually everyone I meet finds my persistence in this task admirable and honorable. Many even wish to offer assistance when it would be counter to the dog's training (she should hold the door for me, not be allowed passage with a human holding the door!).

The unreasonable persons which cause most of my problems in this endeavor refer back to "the ADA doesn't force us to allow entry to a dog in training." After months of searching, I am confident that there is no law that does address the training of service animals. Therefore, after having all of this trouble and suffering the harassment and discrimination of a certain few, I am convinced that there needs to be just such a law.

I am not suggesting that a law be as vague as to allow anyone to claim that they are "training a service dog." Instead, the law should allow service animals in training accompanied by their trainer in the same way as a service animal accompanied by a disabled person. The trainer should be required to be registered as an employee of a bona fide service animal training organization (such as Paws with a Cause) or the registered trainer of a service animal intended for an immediate family member who is totally and permanently disabled (the Social Security Administration makes such determinations already) or otherwise deemed to be a candidate for placement of a service animal by a bona fide service animal training facility.

I feel that it is important that any person be able to assist their own family members. I understand the need to restrict animals from access to many public areas for health reasons or to protect the public from aggressive animals. However, for a person who can document the presence of a family member who is totally

and permanently disabled, the government should not stand in the way of that person's attempt to provide for that disabled family member in any reasonable way possible. To provide that balance, the trainer could simply be required to publicly register his or her intent to train the dog and receive some sort of paperwork (identification card, perhaps?) to identify the animal and trainer as "registered service animal in training" and naming the trainer.

Really, I do not understand why, in a non-health related building like the State of Michigan offices, a security guard would be so adamant that a well behaved dog should be expelled. Why did he assume I was not disabled? He did not see me drive. In fact, many legally blind persons do not appear to be so. I was even wearing shaded glasses at the time. We need to "plug this hole" in the ADA and allow more training of service animals. I can not be alone in this situation.

I look forward to hearing from you. I would also be very happy to meet with you, introduce you to Coco, and if you wish, my son Tom as well. I would also be willing to speak on behalf of this issue as required. You see, I am one of those parents who is willing to "do whatever it takes" for his offspring.

Sincerely,

XXX

JUL 11 1997

The Honorable Dianne Feinstein
United States Senate
331 Hart Senate Office Building
Washington, D.C. 20510-0504

Dear Senator Feinstein:

I am responding to your letter requesting information on the Americans with Disabilities Act of 1990 (ADA) on behalf of your constituent, XXX . Your letter was referred to the Department of Justice by the U.S. Equal Employment Opportunity Commission. Please excuse the delay in responding.

Specifically, XXX requests information regarding the ADA's requirements for access to public golf courses. Although the ADA requirements do not currently include specific accessibility standards for new construction or alterations of the unique aspects of a golf course, other facilities like restrooms, locker rooms, and restaurants must comply with the ADA accessibility standards.

In addition, both title II and title III of the ADA require that covered entities "make reasonable modifications in policies, practices, or procedures," when necessary to avoid discrimination on the basis of disability, unless it can show "that making the modifications would fundamentally alter the nature" of the service or activity. 28 C.F.R. SS 35.130 (b) (7), 36.302 (a). Where a golf course does not provide nor allow golf carts or

where the course provides or allows golf carts on the site but not in designated areas, the course may be required to modify its policies in order to allow people with disabilities to participate fully. For your convenience, I have enclosed a copy of the regulations implementing titles II and III.

If XXX has any questions or needs additional information regarding the requirements of the ADA, he may contact the Department's ADA information line at 800-514-0301 (voice) or 800-514-0383 (TDD). Members of the Disability Rights Section staff are available to answer questions on the information line from 10:00 a.m. to 6:00 p.m., Eastern time, on Monday, Tuesday, Wednesday, and Friday. On Thursday, the information line is staffed from 1:00 p.m. to 6:00 p.m.

---------- Message Contents----------
Dear Senator Feinstein,
We are having a little problem at our local golf course in Twain Harte, CA.
Our members are getting up in age and their is talk of having golf carts on our little course. What it boils down to - We would like to know: What does ADA legislation have to say about allowing golf carts on public courses. Would it be possible that you could send me any

information on the bill that relates to golf courses? It would be sincerely appreciated.

If the info would be adequate for e-mail, great. If not, snail mail would have to do. We are having a board meeting this coming Wednesday, April 16, 1997, and it would be great to have some info by then. Thanks for your consideration.

Your Constituent, (and a Democrat)

Linda D. Kilb, Esq.
Disability Rights Education and Defense Fund
2212 Sixth Street
Berkeley, California 94710

Dear Linda:

I am responding to your letter dated November 29, 1995, regarding the requirements of title III of the Americans with Disabilities Act (ADA). Your letter asks whether title III requires pharmacies to cut pills in half at the request of customers with disabilities when half-doses are prescribed by such customers' physicians. I apologize for the delay in responding.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that have rights or responsibilities under the Act. Pursuant to that authority, this letter provides informal guidance to assist you in understanding the ADA. However, this technical assistance does not constitute a legal interpretation of the statute, and it is

not binding on the Department.

Title III of the ADA requires places of public accommodation, including pharmacies, to make reasonable modifications to their policies, practices, and procedures when such modifications are necessary in order to avoid discriminating on the basis of disability. 28 C.F.R. S 36.302. We have consulted with persons associated with the pharmacy industry, including the National Association of Boards of Pharmacy, who have informed us that pharmacists regularly cut pills in half to meet dosing requirements prescribed by doctors at the request of patients. In light of this information, we believe that cutting pills in half for persons with disabilities is a reasonable modification required by title III under the circumstances described in your letter.

Re: Request for Policy Finding Under ADA Title III

Dear Mr. Wodatch:

On behalf of the Disability Rights Education and Defense Fund, Inc. ("DREDF"), I write to request a policy finding from the U.S. Department of Justice ("DOJ") under Title III of the Americans with Disabilities Act ("ADA"). 42 U.S.C. SS 12181 et seq..

DREDF is a national law and policy center dedicated to advancing the civil rights of people with disabilities. Because we are nationally recognized for our interpretation of disability civil rights laws, including the ADA, we are often questioned about the practical implications of such statutes. Through such an inquiry, DREDF has become aware of an issue that affects many individuals with disabilities who must, per doctors' prescriptions, take half-doses of medication, but who, because of their disabilities, are themselves unable to cut their pills in half. The issue is whether pharmacies are required to cut pills in half at the request of their customers with disabilities. DREDF requests that DOJ issue a policy finding on this matter.

DREDF's position, supported by both the statute, DOJ's implementing regulations and DOJ's ADA Title III Technical Assistance Manual ("the DOJ Manual"), is that cutting medication is a reasonable modification of policy and/or practice, and that refusing to provide such a reasonable modification constitutes unlawful discrimination on the basis of disability.

A pharmacy is a public accommodation subject to the provisions of Title III of the ADA. 42 U.S.C. S 12181(7)(F). Title III states that discrimination includes failing to make reasonable modifications in policies, practices, or procedures when such modifications are necessary to afford goods and services to individuals with disabilities. 42 U.S.C. S 12182(b)(2)(A)(ii). Title III further provides that a public accommodation may only refuse to modify its policies, practices, or procedures if to do so would fundamentally alter the nature of such goods and services. 42 U.S.C. S 12182(b)(2)(A)(ii).

A not-for-profit public benefit corporation dedicated to the Independent Living Movement and the Civil Rights of Persons with Disabilities

1633 "Q" N.W., Suite 220
Washington, D.C. 20009
(202) 986-0375
FAX (202) 462-5624

2212 Sixth Street
Berkeley, California
94710
(510) 644-2555
800-466-4232
FAX (510) 841-8645

By refusing to honor the request of an individual with a disability to have pills cut in half, apharmacy is refusing to reasonably modify its policies, practices, and/or procedures, and is effectively rendering its goods and services unavailable to certain individuals with disabilities. The ADA provides a pharmacy with only one reason to refuse a request for a reasonable modification -- that is, that to cut pills in half would "fundamentally alter" the nature of the goods and services it provides. It is doubtful that a pharmacy could support a claim that cutting pills to provide medication in half doses fundamentally alters the nature of its goods and services. The DOJ Manual's definition of "fundamentally alters" makes it especially unlikely that

any pharmacy could prevail on this defense. The DOJ Manual provides that "[a] fundamental alteration is a modification that is so significant that it alters
the essential nature of the goods, services, facilities, privileges, advantages, or accommodations offered." DOJ Manual, III-4.3600 at 29. Cutting pills in half does not alter the essential nature of the medication, and is consistent with, rather than a significant alteration of, the essential nature of the service of providing medication pursuant to a prescription for half doses.

In addition to asserting the fundamental alteration defense, a pharmacy might argue that cutting pills in half for customers with disabilities is a "personal service" that the ADA's regulations deem a public accommodation is not required to provide. 28 C.F.R. S 36.306. The DOJ's comments to S 36.306 (appearing in its section-by-section analysis) suggest, however, that this assertion cannot excuse a refusal to provide this reasonable modification. The comments clearly state that minimal actions that may be required as modifications in policies, practices, or procedures, such as a kitchen's cutting up food into smaller pieces, are not services of a personal nature within the meaning of S 36.306. 56 Fed. Reg. 35571 (Friday, July 26, 1991). It follows, therefore, that cutting pills in half is the type of minimal action that a pharmacy is required to perform as a reasonable modification in policy, practice, or procedure, and not a personal service that a pharmacy is not required to perform pursuant to S 36.306.

The above analysis brings DREDF to the conclusion that pharmacies should be required to cut pills in half at the request of individuals with disabilities. DREDF requests that DOJ issue a policy finding on this issue. Your response may be directed to my attention in DREDF's Berkeley office, 2212 Sixth Street, Berkeley, CA 94710, telephone (510) 644-2555, facsimile (510) 841-8645. Thank you for your attention to this matter.

Sincerely,

Linda D. Kilb, Esq.

(clinic\kerry\pharmacy)

AUG 6 1997

The Honorable Frank Pallone, Jr.
U.S. House of Representatives
Washington, D.C. 20515-3006

Dear Congressman Pallone:

I am responding to the correspondence that you forwarded on behalf of your constituent, XXX , of Edison, New Jersey. XXX takes issue with the use of fine print in legal and other documents, and believes such practices may be discriminatory against elderly persons, many of whom have vision impairments. Please excuse our delay in responding.

The Civil Rights Division of the Department of Justice is responsible for the implementation of the Americans with Disabilities Act of 1990 (ADA), which prohibits discrimination on the basis of disability by public entities and public accommodations. XXX query relates most directly to the auxiliary aids and services provisions of titles II and III of the ADA as these apply to covered entities, including governments and private sector businesses, respectively.

Such aids and services must be provided by these covered entities to ensure "effective communication" for individuals who have impaired vision or speech. A covered entity, thus, must provide effective communication under a flexible standard, reflecting the variable nature of what constitutes effective communication. This ADA flexible standard does not broadly regulate the nature of print, such as requiring a wholesale prohibition against the use of fine print. Rather, the ADA strikes a balance between protecting persons with vision loss from discrimination, while preserving economical means of producing printed materials, such as fine printing where it is appropriate.

The ADA's flexible communication standard accounts for other factors used to determine the effectiveness of communication in any given circumstance, including the length, complexity, and significance of the information being exchanged. Thus, most of the "legal documents" that XXX refers to in his letter

cc: Records; Chrono; Wodatch; Talian; McDowney; FOIA
h:\jtalian\myfiles\congress\okvision.ifo.wpd

are subject to the ADA's requirements, by virtue of the fact that

a government agency or private practitioner (attorney, insurance agent, or physician, for example) might be required to provide standard or larger print versions of a document upon request by the disabled person. Furthermore, such covered entities in our society must absorb the cost of this aid or service, unless it would result in an undue burden. The term "undue burden" means "significant difficulty or expense." In determining whether the provision of an interpreter, reader, tape, or other aid or service would result in an undue burden, covered entities should consider their overall financial resources.

The effective communication requirements of the ADA briefly described above are discussed more fully in the technical assistance manuals developed by the Department of Justice (enclosures). XXX can direct any questions about specific documents, or communications problems generally, to the various Federal ADA hotlines established to address such concerns by the American public. Our flyer listing the prominent Federal telephone resources on the ADA also is enclosed.

I hope this information will assist you in responding to your constituent.

Sincerely,

Isabelle Katz Pinzler
Acting Assistant Attorney General
Civil Rights Division

Doc 9900805 Jan. 11-1997

Honorable Congressman
Frank Pallone
House of Representatives
Washington, D.C.

Dear Congressman:

Thousands of people in our nation are being deceived and taking advantage of every day by Fine Print especially Senior Citizens who have some sort of vision difficulty but do not have any problem with standard news paper print. Fine Print is a means of hiding information. It is constantly used in Legal Documents and in Public Notice in Newspaper publications and contracts etc. Many people are being hurt in some way by Fine Print. Public notices which are important to every citizen because it most always effects local taxpayers. It's difficult even for people with good vision to read newspaper Public Notices.

(cont.)

Because of Fine Print many legal documents and public notices go on read and that is the purpose of Fine Print.
I am a very active and alert eighty year old man and with my eyeglasses I have no problem reading standard news print.
I ask you now to introduce or cause to be introduced legislative outlawing Fine Print completely and make it illegal to print anything in any form in less than the standard news print size.
I have enclosed newspaper examples.
Please acknowledge this letter.
I wish you a Healthy and Happy New Year

Yours Truly

XXX

AUG 8 1997

The Honorable Richard Burr
Member, U.S. House of Representatives
2000 West First Street
Suite 508
Piedmont Plaza Two
Winston-Salem, North Carolina 27104

Dear Congressman Burr:

I am responding to your inquiry on behalf of XXX of Winston-Salem, North Carolina, who wrote to you about the architectural design standards of the Americans with Disabilities Act of 1990 (ADA). XXX seeks information about the standards of the ADA as they pertain to accessibility to "private buildings" that serve the public, such as restaurants, banks, grocery stores. XXX also asks whether the standards that apply to covered buildings differ depending on when the building was constructed. Please excuse our delay in responding.

Title III of the ADA applies to "places of public accommodation," which are defined to include private facilities that house operations that affect commerce and fall within at least one of the 12 categories of business or service establishments, such as places of lodging, recreation, entertainment, and so forth, that are identified in the ADA. The definition of public accommodation encompasses most private sector business establishments that routinely operate in our country.

Under title III, all newly constructed places of public accommodation (and those undergoing alterations), as well as commercial facilities (factories, warehouses), must comply with the ADA Standards for Accessible Design. A building is covered under the new construction requirements only if it was first occupied after January 26, 1993, and its last application for a building permit or permit extension was certified as complete after January 26, 1992. Public accommodations in buildings occupied before January 26, 1993, that are not otherwise being altered, are required to remove architectural barriers where such removal is "readily achievable." The concept of readily

achievable incorporates the common sense notion of removing architectural barriers where it is both easy and inexpensive to accomplish. Barrier removal under the readily achievable

cc: Records, Chrono, Wodatch, McDowney, Talian, FOIA
jtalian\myfiles\congress\f-burrwile.ifo.wpd\sc. Young-Parran

standard is never required to exceed the requirements for new construction.

XXX specific concern apparently was prompted by his belief that the ADA requires the installation of automatic doors, while his local building code does not. The ADA design standards specify requirements for particular elements of a building. The requirements pertaining to doors are found in section 4.13 of the Appendix to the enclosed regulation. These technical provisions permit, but do not require, the use of automatic doors and doors that swing open in either direction. Doors that pull open are permitted, but appropriate maneuvering space also must be provided.

If Winston-Salem local codes require a particular type of exterior door opening, such a requirement does not necessarily conflict with the ADA because the ADA does not preempt all State and local regulations in the area of accessible design. States and localities are free to enact and enforce code provisions that provide equal or greater access than the ADA standards. To the extent possible, covered entities must comply with both the State or local code and the Federal requirement. If the State or local code provisions differ, however, from the ADA requirements in a way that results in less accessibility, then an entity subject to title III of the ADA is required to comply with the Federal standard.

The design standards of the ADA are described in full in the enclosed title III regulation and interpretative manual. I hope this information is helpful to respond to XXX He also may seek additional advice on the architectural barrier removal and design standards from several informational hotlines described on the enclosed summary of ADA telephone information services. Most of the hotlines are toll-free and have operators to answer questions on specific ADA subjects.

I hope this information is useful in responding to your constituent.

Sincerely,

Isabelle Katz Pinzler
Acting Assistant Attorney General
Civil Rights Division

Ms. Sally Conway
Department of Justice
Civil Rights Division
Post Office Box 66738
Washington, D.C. 20035

Dear Ms. Conway:

My constituent, XXX recently contacted my office regarding a problem he is having with some buildings in Winston-Salem, North Carolina, that he believes do not address the accessibility statutes of the Americans with Disabilities Act.

XXX has cited several buildings in Winston-Salem that he says have exterior doors that only open to the outside (pull open). These are standards the city of Winston-Salem has set, but he understands that the Americans with Disabilities Act requires any building to either have doors that swing open both ways, or can be opened automatically. I would appreciate any information that will address the following concerns: What are the standards of the Americans with Disabilities Act as they pertain to accessibility to private buildings that

serve the public (restaurants, banks, grocery stores, etc.), and are the statutes different for buildings that were built before the act was signed into law, as opposed to those built after the law was enacted. Please mail your response to my Winston-Salem office.

Thank you for your attention to this matter, and I look forward to hearing from you soon.

Sincerely,

Richard Burr
Member of Congress

RB:bv

AUG 13 1997

Ms. Elisabeth S. Shuster
Chief Counsel
Human Relations Commission
State of Pennsylvania
P.O. Box 3145
Harrisburg, Pennsylvania 17105-3145

Dear Ms. Shuster:

I am responding to your recent letter to Attorney General Reno with respect to a complaint now pending before the Pennsylvania Human Relations Commission. Please excuse our delay in responding.

The complaint, which was filed by the Eastern Paralyzed Veterans Association (EPVA), alleges violations of the Pennsylvania Human Relations Act by Widener University and the Pennsylvania Department of Labor and Industry. Because the Pennsylvania Human Relations Act requires compliance with the Americans with Disabilities Act of 1990 (ADA), you have asked the Department's advice on the application of the ADA to this matter.

The ADA authorizes the Department of Justice to provide technical assistance to assist individuals and entities subject to the Act to understand their rights and responsibilities. Because this response is based solely on the facts presented in your letter, it is intended only as technical assistance to help you to identify pertinent facts. This response does not constitute a legal opinion of the Department with respect to the

obligations of the parties to this dispute.

The facts, as we understand them, are that Widener University constructed a new football stadium that includes multi-level viewing stands and a press box. It is undisputed that there is no accessible means of vertical access provided to the press box. There is a significant dispute among the parties as to whether the press box is an integral part of the multi-level stadium or a separate single-story facility.

cc: Records, Chrono, Wodatch, McDowney, Blizard, FOIA
a:\shuster.wpd\sc. YOUNG-PARRAN

The press box is described by EPVA as an integral part of the stadium. It is described by the University as a single-story, 1200 square-foot facility. The University further asserts that it would require an elevator with a lift height of 36 feet to provide access to the press box.

When the University applied for a building permit for the stadium construction, it requested a waiver of the State requirement to provide an elevator to the press box. This request was denied by the Pennsylvania Accessibility Advisory Board. The Advisory Board did grant the University a variance that would have permitted the University to provide access to the press box by means of a wheelchair lift or "personal service" elevator rather than a full passenger elevator. The University appealed this decision to the Pennsylvania Department of Labor and Industry, which ultimately determined that the elevator exception set forth in Pennsylvania's Universal Accessibility Act applies to the press box. Therefore, the press box was constructed without an elevator.

In your letter, you posed two specific questions:

1) Whether a press box that has three levels is considered to have "stories" such that if those "stories" are less than 3000 square feet, the facility is entitled to claim the elevator

exemption under the ADA; and

2) If an elevator is not required, could a covered entity be required to provide vertical access by means of a ramp?

The ADA Standards for Accessible Design (ADA Standards), 28 C.F.R. pt. 36, App. A, S 3.5, define a story as:

> That portion of a building located between the upper surface of a floor and upper surface of the floor or roof next above. If such portion of a building does not include occupiable space, it is not considered a story . . . .

The definition goes on to note that "[t]here may be more than one floor level within a story as in the case of a mezzanine or mezzanines." Therefore, a facility that has three floor levels may be entitled to the elevator exemption if one or more of the floor levels does not fall within the ADA definition of a "story." When a building or structure is entitled to the ADA elevator exemption, it is not required to provide any accessible means of vertical access (e.g., lifts or ramps) between stories.

However, a facility that qualifies for the ADA elevator exemption is still required to comply with all of the other applicable accessibility requirements in the ADA Standards. See, 28 C.F.R. S 36.401 (3). Therefore, although the ADA may exempt a facility from the obligation to provide an accessible route (elevator, lift, or ramp) to the upper stories of a facility, the facility must still comply with any other applicable accessibility requirements. For example, if fixed seating, restrooms, drinking fountains, or telephones are provided in the press box, these elements must comply with the ADA Standards.

I hope that this discussion of the potentially applicable sections of the ADA Standards is helpful to you in resolving this matter.

Sincerely,

Isabelle Katz Pinzler
Acting Assistant Attorney General
Civil Rights Division

July 3, 1997

The Honorable Janet Reno
Attorney General of the United States
Department of Justice
Tenth Street & Constitution Avenue N.W.
Washington, D.C. 20530

Dear Attorney General Reno:

The Pennsylvania Human Relations Commission (PHRC) is the legislatively mandated civil rights enforcement agency in Pennsylvania.

Our statute, the Pennsylvania Human Relations Act, 43 P.S. SS951-963 (Act), is unique, in that our housing provisions cover both commercial and non-commercial housing. The Act provides that it is a violation of the Act to construct, operate, offer for sale, lease or rent or otherwise make available housing or commercial property which is not accessible, 43 P.S. S955(h)(7). Accessibility is defined in 43 P.S. S954 (v), as, among other things, being in compliance with
the provisions of the Americans with Disabilities Act (ADA).

Currently before the PHRC is a complaint filed by the Eastern Paralyzed Veterans Association against Widener University. The allegation is basically that Widener University has built a stadium with an inaccessible press box. Following a determination of probable cause by the PHRC, Widener has raised additional defenses based upon its interpretation of the ADA.

Throughout the investigation, the PHRC has attempted to avail itself of information from the ADA/stadium experts at the Justice Department. We have reviewed the May, 1996 release regarding stadium accessibility, and, of course, all the guidance and current case law. While the Commission prosecuting attorney handling the case has interpreted the actions of Widener to violate accessibility laws, the issues currently raised by Widener are unique. Since it is a federal law administered by the Justice Department, we seek your input.

We have enclosed the documents necessary to understand the issues raised by Respondent. Respondent's first defense included an approval by the Pennsylvania Department of Labor and Industry of its plans. Its second is an argument that the press box is a separate facility from the stadium and thus need not be accessible because of the small size. In general, the most recent defenses all relate to the elevator exemption for new construction found at 42 U.S.C. 12183(b) and the regulations relating to that section found at 28 C.F.R. S36.401(d). One of the questions that has arisen is, whether, under the elevator exemption, a press box that has three levels and is within a stadium (or separate from the stadium and "next to it") is considered to have "stories", such that if those "stories" are less than 3,000 square feet, the press box falls within the exemption. In addition, if, as the analysis to the elevator exemption regulation states, "lifts to provide access between floors are not required in buildings that are not required to have elevators", could a ramp be required if feasible?

I appreciate your prompt attention to this matter. Our contact person in this matter is Assistant Chief Counsel Nancy L. Gippert, the prosecuting attorney on the case. If Ms. Gippert is not available, Director of Housing, Raymond W. Cartwright should be contacted. They may be reached at (717) 783-8132. Ms. Gippert will be looking forward to hearing from your staff.

Sincerely,

Elisabeth S. Shuster
Chief Counsel

AUG 15 1997

The Honorable Philip M. Crane
Member, U.S. House of Representatives
300 North Milwaukee Avenue
Suite C
Lake Villa, Illinois 60046

Dear Congressman Crane:

I am responding to your letter on behalf of your

constituent, XXX , regarding the application of the Americans with Disabilities Act of 1990 (ADA) to the changes in rules for a fencing tournament that XXX has participated in with the Society for Creative Anachronism (Society). Please excuse our delay in responding.

Title III of the ADA prohibits discrimination on the basis of disability by any person who owns, leases (or leases to), or operates a place of public accommodation. 42 U.S.C. S 12182 (a). The term "operate" includes sponsorship of competitions and tournaments. A "place of public accommodation" includes places of public gathering (e.g., auditoriums, convention centers, lecture halls), places of recreation (e.g., parks, zoos, amusement parks), and places of exercise (e.g., gymnasiums). Thus, if the fencing tournament is held in a place of public accommodation then the Society, as a sponsor, organizer, and administrator of the fencing tournament, may be covered by title III of the ADA.

Title III requires, among other things, that covered entities make reasonable modifications to their policies, practices, and procedures when necessary to ensure that individuals with disabilities have equal access to goods, services, facilities, privileges, advantages, or accommodations. However, title III does not require a covered entity to make any modification that would fundamentally alter the nature of the goods, services, facilities, privileges, advantages, or accommodations offered.

cc: Records, Chrono, Wodatch, McDowney, Hahm, FOIA
jhahm\myfiles\policyltrs\f-crane72497.wpd\sc. YOUNG-PARRN

I have enclosed a copy of the regulation implementing title III of the ADA for your reference. I hope this information is helpful to you in responding to your constituent.

Sincerely,

Isabelle Katz Pinzler
Acting Assistant Attorney General
Civil Rights Division

Enclosure

XXX
Wauconda, IL XXX

May 1, 1997

Mr. John Wodatch
Disability Rights Section
Civil Rights Division
U.S. Department of Justice
P.O. Box 66738
Washington, D.C. 20035

Sir:

Pursuant to a phone conversation with your office on April 29, 1997, by my friend, XXX I am writing to you to request a "statement of policy" on the following issue. An organization that I belong to, called the Society for Creative Anachronism, currently has in place a competition style of fencing known as rapier combat. As the rules now stand, it is possible for the handicapped to compete on an equal to near-equal footing due to the availability of adaptive equipment for the handicapped fencer.

On June 1, 1997, my district intends to change its rules and equipment standards. The practice schlager blade they are substituting for the currently used epee blade has no adaptive equipment available. Also, by its very weight, this practice schlager is impossible for many of the handicapped to use. In short, my district is removing an accommodation which is currently in place without any suitable replacement. As we pay for our own equipment, it does not cause our club any undue financial burden to keep the old system.

A brief aside, the club officers claim this change is being made in the interests of safety.' Every fencing professional I've spoken to has stated that the epee is a much safer piece of equipment.

Mr. Wodatch, I am handicapped and if this change goes through, I will no longer be able to even consider competing because I will not be able to lift and hold the blade up. Many of my friends, who have such common ailments as Carpal Tunnel Syndrome, will no longer be able to compete due to the increased weight of the blade. Others, who have arthritis or weakening of the tendons will not be able to hold the blade due to the lack of availability of adaptive equipment.

The district has refused to reconsider this matter without an authoritative opinion, such as from your office. They have also requested that such an opinion be in writing. Sir, you are our last hope in this matter. We do not want to go to court and have some long, lengthy fight to have our rights restored. They should not be taken away in the first place. A simple letter from you will go a long way towards stopping it.

Hoping to hear from you soon,

XXX

AUG 28 1997

The Honorable Joseph I. Lieberman
United States Senate
Washington, D.C. 20510

Dear Senator Lieberman:

I am responding to your inquiry on behalf of your constituent, Dr. Jeffrey I. Gorelick, regarding a physician's obligation to provide auxiliary aids or services for persons with disabilities, and the burden of the costs associated with this requirement. Please excuse our delay in responding.

The Americans with Disabilities Act (ADA) requires public accommodations, including physicians, to furnish appropriate auxiliary aids and services where necessary to ensure effective communication with individuals with disabilities. In determining what constitutes an effective auxiliary aid or service, a physician must consider, among other things, the length and complexity of the communication involved. For instance, a notepad and written materials may be sufficient to permit effective communication when a physician is explaining a simple procedure. It may also be possible to provide effective communication by using a computer at which the doctor and patient can type out their communication. However, if the information to be conveyed is lengthy or complex, the use of written notes may be extremely slow or cumbersome and the use of an interpreter may be the only effective form of communication.

Dr. Gorelick's letter specifically raises issues associated with treatment provided to a deaf patient who, following an office visit, had an interpreter submit fees that exceeded the reimbursement that the doctor's practice received in Medicare payments for treating the patient. He thus incurred a net loss in treating the Medicare eligible patient.

(handwritten) FOIA

Under section 36.301(c) of the regulation, when an interpreter or other auxiliary aid or service is necessary to ensure effective communication, the physician must absorb the cost for this aid or service. As provided in section 36.303(f), however, the physician is not required to provide any auxiliary aid that would result in an undue burden. The term "undue burden" means "significant difficulty or expense." Undue burden must be determined on a case-by-case basis in light of factors such as the nature and cost of the aid or service, and the overall financial resources of the practice. Further discussion of the meaning and application of the term undue burden may be found in the preamble discussion on pages 607-610 of the enclosed regulation.

In determining whether the provision of an interpreter would result in an undue burden, the physician should consider not only the fees paid for providing the medical service or procedure, but also the overall financial resources of the practice. The physician should consider other factors that would minimize the degree of burden on the practice, such as the ability to spread costs throughout the general clientele and the provision of tax credits. As amended in 1990, the Internal Revenue Code permits eligible small businesses to receive a tax credit for certain costs of compliance with the ADA. An eligible small business is one whose gross receipts do not exceed $1,000,000 or whose work force does not consist of more than 30 full-time workers. Qualifying businesses may claim a credit of up to 50 percent of eligible access expenditures that exceed $250 but do not exceed $10,250. Eligible access expenditures may include the costs of providing auxiliary aids and services to persons with disabilities. Information about the tax credit and the tax deduction, including the appropriate form to file for a tax deduction, are enclosed.

Another consideration related to costs associated with the provision of auxiliary aids involves the fact that it is the physician who decides ultimately what the appropriate auxiliary should be. The auxiliary aid provisions of the ADA do not contemplate that a patient with a disability can unilaterally decide on the appropriate type of auxiliary aid. If a patient who is deaf brings a sign language interpreter for an office visit without prior consultation and bills the physician for the

cost of the interpreter, the physician is not obligated to comply with the unilateral determination by the patient that an interpreter is necessary. The physician must be given an opportunity to consult with the patient and make an independent assessment of what type of auxiliary aid, if any, is necessary to ensure effective communication. If the patient believes that the physician's decision will not provide effective communication, then the patient may challenge that decision under title III by

initiating litigation or filing a complaint with the Department of Justice.

I hope this information will be helpful to you in responding to your constituent.

Sincerely,

Isabelle Katz Pinzler
Acting Assistant Attorney General
Civil Rights Division

Letters to the Editor
333 Main Street
Danbury, CT 06810

Re: Impact of Aspects of the American Disabilities Act (ADA) on Small Group Medical Practices

I am sure the intent of special interest groups and legislators when passing legislation such as the American Disabilities Act, is good natured and looking out for the well being of those citizens that are afflicted with disabilities, but as with many other aspects of our bureaucracy, they fail to recognize the practical, every day impact of such legislation and how what may be a benefit or entitlement to one, may impose unfairness to another.

Case in point has occurred on multiple occasions in our medical practice, specifically regarding patients who are hearing and speech impaired. We see patients who are on state welfare and those who have absolutely no insurance at either minimal or no compensation whatsoever, as our moral and professional obligation to serve the needs of those less fortunate in our community.

We recently saw a deaf patient who is on state welfare for a problem who brought with them a sign language interpreter for the office visit. Soon after that visit, we received an itemized bill from that sign language

interpreter for her hourly fee, which not only was for her time spent in our office but actually began from the time that she left her home or facility, until she returned there. This fee was almost double the fee that we receive from the state for providing medical service to the patient. We, therefore, incurred a financial loss by seeing this patient. It seemed amazing to me as citizen and small business owner that there could be such a law

Danbury News Times

that required us to pay for the interpreter for this disabled patient, but when we checked with advocates for thehearing impaired as well as independent sources, we were shocked to find that that is, indeed, part of the American Disabilities Act.

It is one thing for us to take time out of our schedules to see patients free of charge, which I said earlier, that we do on a daily basis, but to actually incur a financial loss and have to pay to see patients is an absurdity. Though we are first physicians, we also have a business and as businessmen, we have salaries to pay and overhead to maintain. We would not be able to provide service to the community for very long if we had to take a financial loss and pay to see many patients. If our government and our society feels that the disabled, such as the hearing impaired, are entitled to this service, then I think that that is laudable, but it is incumbent upon the government and society to, therefore, pay for that entitlement. Why should the private sector, like our practice, be legislated to pay for those social benefits for this or any other patient.

Once again, I must emphasize that I am not against this patient or any like him receiving sign language interpreter services, but what I am against is that I am being asked to personally pay for that service as opposed to the state or federal government. We provide voluntary, uncompensated services to the community far beyond that of any profession and this is just one example of how we get taken advantage of by this system. I, for one, am becoming increasingly discouraged by such unfair bureaucratic practices and legislation.

Sincerely yours,

Jeffrey I. Gorelick, M.D., F.A.C.S.

NOV 6 1997

The Honorable James J. Jeffords
United States Senate
Washington, D.C. 20510

Dear Senator Jeffords:

I am writing in reply to your letter, with enclosures, on behalf of your constituent, Ms. XXX of XXX Vermont. Ms. XXX had provided you with a copy of the letter she wrote to President Clinton outlining some of the problems she and her disabled son have encountered, over the years, with various schools he has attended. Please excuse our delay in responding.

In her correspondence, Ms. XXX alleges that some of her son's school experiences may have involved discrimination on the basis of disability for failure on the part of the schools' various administrators and teachers to provide him with reasonable modifications of programs and, at times, freedom from harassing behavior by other students. Ms. XXX additionally describes difficulties her son has encountered with respect to his inability to obtain financing for enrollment in a Vermont State College to study art. She hopes our department may be able to assist her.

Staff of the Disability Rights Section, Civil Rights Division, have given careful consideration to the information Ms. XXX furnished. The circumstances she describes, however, do not reveal that current violations of Federal civil rights laws are involved. Several of her allegations concern issues related to education financing, vocational rehabilitation, and qualification for Supplemental Security Income (SSI). These matters with which she is principally concerned are properly within the jurisdiction of the Federal and State and local agencies that administer such programs. Accordingly, we are unable to be of direct assistance.

cc: Records, Chrono, Wodatch, McDowney, Talian, FOIA
talian\myfiles\congress\f-oknovoij.eff.ed.loans.wpd\sc. YOUNG

Ms. XXX should continue to pursue full explanations about qualifying for vocational rehabilitation with the appropriate State agency office in her locale. She should, likewise, seek advice on school loan matters from financial aid officers at the schools her son will attend or has attended in the past. These officials should be able to explain fully what her options are with respect to repaying outstanding student loans, or for obtaining waivers or exemptions from repayment based on her son's disabled status. At the Federal level, these matters are administered by the Department of Education through the following offices:

Mr. Thomas Hehir
Director
Office of Special Education
Programs
OSERS, Room 3086
Switzer Building
330 C Street, S.W.
Washington, D.C. 20202-1100
Telephone (202) 205-5507

Mr. David Longanecker
Assistant Secretary
Office of Postsecondary Education
U.S. Department of Education
ROB-3, Room 4082
600 Independence Avenue, S.W.
Washington, D.C. 20202
Telephone: (202) 708-5547.

Although Ms. XXX generally believes that her son's rights have been violated, a Federal investigative agency can only respond to allegations with supporting facts sufficient to identify a possible violation of Federal civil rights statutes and implementing regulations prohibiting discrimination on the basis of disability. Under title II of the Americans with Disabilities Act of 1990 (ADA) and, concomitantly, section 504 of the Rehabilitation Act of 1973, as amended, the Department of Education is the agency with primary jurisdiction to investigate alleged violations of these laws by educational public entities and/or schools that are recipients of Federal financial assistance. The Department of Justice may initiate judicial enforcement actions under title II of the ADA and section 504, but this is done only after a matter is referred to the Department of Justice from an agency with primary investigative and enforcement jurisdiction.

Referrals to the Department of Justice are made by the investigative agency, after a formal finding of discrimination. This follows a determination that the public entity or recipient school will not voluntarily comply with remedial actions to resolve the discrimination. Such a referral to the Department of Justice for consideration of judicial enforcement has not occurred with respect to any of Ms. XXX complaints.

If Ms. XXX has specific information about a school that has denied admission or discriminated in other educational programs, benefits, or activities with respect to her son based on his disability, she should file her complaint with:

Mr. Thomas J. Hibino
Office for Civil Rights/ED
J.W. McCormack Post Office &
Courthouse

Room 222, 01-0061
Boston, Massachusetts 02109-4557
Telephone: (617) 223-9662
FAX: (617) 223-9669; TDD (617) 223-9695.

Ms. XXX also has other enforcement options if she does not want to pursue a Department of Education administrative investigation, or if the Department of Education does not initiate an investigation based on Ms. XXX charge. As an alternative to investigation, she may file a section 504/title II lawsuit in the appropriate Federal district court if she chooses to do so. She does not need any approval letter from the Department of Education or the Department of Justice before proceeding.

Ms. XXX also may seek to resolve her complaints through alternative dispute resolution; or, she may consult with the State or local authorities involved, disability rights organizations, or organizations that provide alternative dispute resolution services (such as mediation or negotiation). We have enclosed a list of organizations serving Ms. XXX area. These groups may be able to identify resources available to provide Ms. XXX with assistance. Because Ms. XXX believes that her rights have been violated, we suggest that she contact private counsel or the nearest legal aid office and/or the local bar association to determine whether they may be able to assist

her at this time. An additional resource on the issue of accommodations for students with disabilities is:

AHEAD

P.O. Box 21192
Columbus, Ohio 43221-0192
Telephone: (614) 488-4972.

Our last suggestion pertains to Ms. XXX concerns about her son's application for SSI benefits. The most expeditious manner to resolve areas of disputed benefits or medical claims

processing is to contact the nearest local Social Security office. Ms. XXX may call the Social Security Administration's toll-free information number at (800) 772-1213 for instructions on exactly what information she needs to bring to any discussions about benefits claims, and to schedule an appointment. This procedure should expedite resolution of the problems she perceives she may encounter in obtaining SSI services. The Social Security Administration guarantees contact with its staff by calling their toll-free number, and we highly recommend that your constituents use this resource to resolve SSI disputes.

I hope this information is useful in responding to your constituent's concerns. I also hope that Ms. XXX son receives the benefits and assistance to which he may be entitled under Federal and State/local programs.

Sincerely,

Isabelle Katz Pinzler
Acting Assistant Attorney General
Civil Rights Division

NOV 12 1997

The Honorable John Glenn
United States Senator
200 North High Street
Suite 600
Columbus, Ohio 43215

Dear Senator Glenn:

I am responding to your letter on behalf of your

constituent, Mr. XXX who asked you to determine if a person who has had his colon removed is considered an individual with a disability for the purposes of the Americans with Disabilities Act (ADA). We apologize for the delay in responding.

The ADA does not identify specific diseases or conditions as disabilities because it would not be possible to guarantee comprehensiveness by providing a list of specific disabilities. The ADA provides that an individual will be considered an individual with a disability for the purpose of ADA coverage if he or she has a physical or mental impairment that substantially limits one or more major life activities, has a record of such an impairment, or is regarded as having such an impairment. This definition of "disability" is consistent with the definitions used in the Rehabilitation Act of 1973 and in the Fair Housing Act of 1988.

The Department of Justice regulations implementing the ADA provide a broad definition of the term "physical or mental impairment." Physical impairments include, among other things, any physiological disorder or condition that affects the digestive system. Therefore, the conditions described in Mr. XXX letter are potentially covered by the ADA if, in fact, they substantially limit one or more life activities of an affected individual.

I hope that this information is helpful to you in responding to your constituent.

Sincerely,

Isabelle Katz Pinzler
Acting Assistant Attorney General
Civil Rights Division

NOV 18 1997

The Honorable Ernest F. Hollings

United States Senator
1835 Assembly Street
Columbia, South Carolina 29201

Dear Senator Hollings:

I am responding to your letter on behalf of your constituent, Mr. XXX , who asked you to determine if a person who has fibromyalgia is an individual with a disability for the purposes of the Americans with Disabilities Act of 1990 (ADA). Mr. XXX letter also suggests modifications that he considers necessary to provide accessibility for people who use mobility aids, such as canes and walkers. We apologize for the delay in responding.

The ADA does not identify specific diseases or conditions as disabilities because it would not be possible to guarantee comprehensiveness by providing a list of specific disabilities. The ADA provides that an individual will be considered an individual with a disability for the purpose of ADA coverage if he or she has a physical or mental impairment that substantially limits one or more major life activities, has a record of such an impairment, or is regarded as having such an impairment. This definition of "disability" is consistent with the definitions used in the Rehabilitation Act of 1973 and in the Fair Housing Amendments Act of 1988.

The Department of Justice regulations implementing the ADA provide a broad definition of the term "physical or mental impairment." Physical impairments include, among other things, any physiological disorder or condition, cosmetic disfigurement, or anatomical loss affecting one or more body systems, including conditions that affect neurological or musculoskeletal systems. Therefore, fibromyalgia is a condition that is potentially covered by the ADA if, in fact, it substantially limits one or more life activities of an affected individual.

CC: RECORDS; CHRONO; WODATCH; BLIZARD; MCDOWNEY; FOIA
H:\GCONCEPC\HOLLINGSCGRSLTR.JB.WPD

With respect to the architectural modifications suggested by Mr. XXX I note that the U.S. Architectural and Transportation Barriers Compliance Board (Access Board) is now in the process of reviewing its ADA Accessibility Guidelines. The Access Board anticipates that it will publish revised guidelines for public comment in 1998. If Mr. XXX wishes to have his suggestions considered by the Access Board during this process, he may write to the:

U.S. Architectural and Transportation
Barriers Compliance Board
1331 F Street, N.W.
Washington, D.C. 20004-1111

I hope that this information is helpful to you in responding to your constituent.

Sincerely,

Isabelle Katz Pinzler
Acting Assistant Attorney General
Civil Rights Division

NOV 18

The Honorable Ron Wyden
United States Senator
500 NE Multnomah Street
Suite 320
Portland, Oregon 97232

Dear Senator Wyden:

I am responding to your inquiry on behalf of your constituent, Mr. XXX of XXX , Oregon, who wrote to you about alleged discrimination on the basis of disability at the International Air Academy (Academy) in Vancouver, Washington. Please excuse our delay in responding.

The Americans with Disabilities Act of 1990 (ADA) and section 504 of the Rehabilitation Act of 1973 (section 504), as amended, may apply to the allegation raised by Mr. XXX . Title III of the ADA prohibits places of public accommodation such as the Academy from discriminating on the basis of disability. Title III offers a variety of remedies for individuals who believe their rights under that statute have been violated. It provides for a private right of action, and Mr. XXX may wish to consult with a private attorney if he is interested in pursuing this option.

In addition to filing a private suit, there are a number of avenues that your constituent may pursue to resolve this matter, including consulting State or local authorities, disability rights organizations, or organizations that provide alternative dispute resolution services (such as mediation or negotiation). We have enclosed a list of organizations in Oregon and Washington. One of these groups may be able to assist Mr. XXX . A State or local bar association may be able to provide the names of private attorneys or mediation services that handle disability rights matters. The mediation process and information on securing a local mediator are summarized in the enclosed brochure "Want to Resolve Your ADA Complaint? Consider Mediation."

CC: RECORDS; CHRONO; WODATCH; TALIAN; MCDOWNEY; FOIA
H:\JTALIAN\MYFILES\CONGRESS\OKREFER.504.WPD

Title III also authorizes the Department of Justice to investigate alleged violations of the Act by public accommodations and commercial facilities. 42 U.S.C. S 12188 (b) (1) (A). In this respect, staff of the Disability Rights Section, Civil Rights Division, have reviewed Mr. XXX complaint. We determined that the Academy is approved to participate in the Federal education loan program administered by the Department of Education. This arrangement subjects the Academy to coverage by section 504, because of its status as a recipient of Federal financial assistance from the Department of Education.

When both title III and section 504 apply to a complaint, we frequently refer the complaint for processing by the agency with section 504 jurisdiction. This results from the fact that the Department has received several thousand complaints about potential ADA title III violations, and we do not have unlimited resources to investigate each of the complaints that we receive and attempt to resolve them informally. Additionally, we do not investigate each complaint that we receive for the purposes of bringing litigation. The Department may seek judicial relief only in instances where there appears to be a pattern or practice of discrimination or where an issue of general public importance is involved. The Department does not act as an attorney for, or representative of, an individual.

For these reasons, we have referred Mr. XXX complaint to the Department of Education for processing under section 504 (Enclosure). Mr. XXX also has a private right of action pursuant to section 504, which generally offers relief similar to that available under the ADA. The address for the Department of Education to which we referred Mr. XXX complaint is:

Mr. Gary D. Jackson
Office for Civil Rights/ED
915 Second Avenue
Room 3310, 10-9010
Seattle, Washington 98174-1099

Telephone (206) 220-7880
FAX (206) 220-7887; TDD (206) 220-7907

If Mr. XXX has additional questions or seeks to provide additional information, he should contact the Department of Education at the address listed above. If Mr. XXX has questions about the ADA or section 504, he may call the Department of Justice ADA information line (800-514-0301 (voice) or 800-514-0383 (TDD)). Members of the Disability Rights Section staff are available to answer questions on the information line on Monday, Tuesday, Wednesday, and Friday from 10:00 a.m. to 6:00 p.m., Eastern time. On Thursday, the information line is staffed from 1:00 p.m. to 6:00 p.m.

I hope this information is useful in responding to your constituent.

Sincerely,

Isabelle Katz Pinzler
Acting Assistant Attorney General
Civil Rights Division

Enclosures

U.S. Department of Justice
Civil Rights Division
Office of the Assistant Attorney General Washington, D.C. 20035

NOV 20 1997

The Honorable Tom Harkin
United States Senate
Washington, D.C. 20510-1502

Dear Senator Harkin:

I am responding to your inquiry on behalf of your constituent, Mr. XXX of XXX Iowa, who inquires about programs and advice for persons who are color blind. Mr. XXX mentions that in XXX he was rejected for military service due to color blindness. He implicitly seeks information about color blindness as it relates to Federal antidiscrimination statutes such as the Americans with Disabilities Act of 1990 (ADA). Please excuse our delay in responding.

Two prominent sources of information at the national level on eye disorders or pathology and degenerative eye disease are:

National Eye Institute
National Institute of Health
Department of Health and Human Services
Building 31, Room A03
Bethesda, Maryland 20892
Telephone (301) 496-5248

The Foundation Fighting Blindness
Executive Plaza One, Suite 800
11350 McCormick Road
Hunt Valley, Maryland 21031-1014
Telephone 1 800 683-5555
(410) 771-9470 (Fax)

Additional information about the issue of color blindness or sight impairment generally may be available through local service organizations. We have enclosed a list of resources in Iowa that may be able to answer specific questions that Mr. XXX may have about discrimination against persons with color blindness.

Congress and the courts have generally excepted the uniformed services from coverage by broad, cross-cutting Federal civil rights statutory provisions such as the ADA. Rather, nondiscrimination in the uniformed services is enforced through specific antidiscrimination policies established for and implemented by the Department of Defense and the chain of command. That physical conditions such as color blindness are disqualifying may be due no doubt to requirements related to combat-readiness. If Mr. XXX seeks to know why the military exempts persons with color blindness from the uniformed services, he might pose his questions to a local military recruiter or he may contact the Pentagon at the following office:

Colonel William Walton
Director
Military E.O. Office
OSD/FM&P-MEO (MMP)
Room 3A256, Pentagon
Washington, D.C. 20301-4000

The ADA and section 504 of the Rehabilitation Act or 1973, as amended, a civil rights statute similar to the ADA, prohibit discrimination on the basis of disability. They do not guarantee that persons with disabilities will be able to obtain all services that they need. Under the ADA, there is no specific

method by which an individual is "classified" as disabled. Each determination with respect to coverage is made case-by-case. To initiate ADA coverage, it must be established that an individual has a physical or mental impairment that substantially limits a major life activity, has a record of such an impairment or is regarded as having such an impairment. If Mr. XXX believes he has been discriminated against due to color blindness, the enclosed "Guide to Disability Rights Laws" and complaint forms should be helpful for filing his complaint and directing it to the proper Federal investigative agency.

I hope this information will be helpful to you in responding to your constituent.

Sincerely,

Isabelle Katz Pinzler
Acting Assistant Attorney General
Civil Rights Division

Enclosures

The Honorable Charles S. Robb
United States Senator
The Ironfronts, Suite 310
1011 East Main Street
Richmond, Virginia 23219

Dear Senator Robb:

I am responding to your letter on behalf of your constituent, XXX who asked you to determine if a person who has Rosacea is considered an individual with a disability for the purposes of the Americans with Disabilities Act of 1990 (ADA). Please excuse our delay in responding.

The ADA does not identify specific diseases or conditions as disabilities because it would not be possible to guarantee comprehensiveness by providing a list of specific disabilities. The ADA provides that an individual will be considered an individual with a disability for the purpose of ADA coverage if he or she has a physical or mental impairment that substantially limits one or more major life activities, has a record of such an impairment, or is regarded as having such an impairment. This definition of "disability" is consistent with the definitions

used in the Rehabilitation Act of 1973 and in the Fair Housing Amendments Act of 1988.

The Department of Justice regulations implementing the ADA provide a broad definition of the term "physical or mental impairment." Physical impairments include, among other things, any physiological disorder or condition, cosmetic disfigurement, or anatomical loss affecting one or more body systems, including conditions that affect the skin. Therefore, Rosacea is a condition that is potentially covered by the ADA if, in fact, it substantially limits one or more major life activities of an affected individual.

Civil Rights Division

Office of the Assistant Attorney General Washington, D.C. 20035

NOV 25 1997

The Honorable Robert F. Smith
Member, U.S. House of Representatives
843 East Main, Suite 400
Medford, Oregon 97504-7137

Dear Congressman Smith:

I am responding to your letter on behalf of your constituent, Ms. XXX . Please excuse our delay in responding.

Ms. XXX is the manager of a non-profit animal shelter operated by the Southern Oregon Humane Society (SOHS). According to her letter to you, the SOHS has purchased an existing office building that will be relocated to the SOHS property for use as an office building. Ms. XXX requested your assistance in obtaining a "formal" determination of the applicable requirements under the Americans with Disabilities Act of 1990 (ADA) because she has been informed by a local building official that the SOHS will be required to remodel the existing restrooms to make them accessible "to comply with the ADA."

The Department of Justice is authorized by the ADA to provide technical assistance to assist covered entities to understand their ADA compliance obligations. Because this advice is based solely on the facts presented in the incoming letter, it does not constitute a formal legal opinion about SOHS rights or responsibilities under the ADA. However, this guidance should enable Ms. XXX to understand the generally applicable ADA requirements.

If the new building is used strictly as an administrative office building for SOHS staff, then it is a "commercial facility" that is subject only to the new construction and alterations requirements of title III of the ADA. However, if SOHS operates the facility as a place of public accommodation (as that term is defined in section 36.304 of the enclosed regulation), then SOHS will also have the obligation to remove architectural barriers in the existing facility, where such removal is readily achievable, i.e., easily accomplishable and able to be carried out without much difficulty or expense.

(handwritten)FOIA

Because the ADA defines the term "alteration" to include any change "that affects or could affect the usability of the building," the relocation of an existing building from one site to another is considered to be an alteration. Therefore, SOHS would be required to ensure that, to the maximum extent feasible, would be required to ensure that, to the maximum extent feasible, the altered portions of the facility, i.e., the external elements of the facility that are physically altered, must comply with the ADA Standards for Accessible Design (appendix A to the enclosed

regulation). As a result of the relocation, SOHS will be required to make the building entrance(s) accessible and to provide an accessible route to each accessible entrance.

In general, the ADA does not require major retrofitting in existing facilities. Therefore, in a commercial facility, the ADA would not require restrooms that were not otherwise being altered to be made accessible. In a public accommodation, barriers to access in existing restrooms must be removed if it is readily achievable to do so.

Ms. XXX should note, however, that this letter addresses only the requirements of Federal law. Some States have adopted accessibility requirements through State statutes or building codes that are more stringent than the Federal regulation. The ADA expressly permits local authorities to enforce State or local laws that provide accessibility that equals or exceeds the Federal rules. Therefore, the State of Oregon may require SOHS to comply with provisions that impose obligations in addition to those identified in this letter.

I have enclosed two copies of the regulation implementing title III of the ADA for your reference. I hope this information is helpful to you in responding to your constituent.

Sincerely,

Isabelle Katz Pinzler
Acting Assistant Attorney General
Civil Rights Division

Enclosures

JAN 16 1998

The Honorable Patsy T. Mink
U.S. House of Representatives
Washington, D.C. 20515-1102

Dear Congresswoman Mink:

I am replying to your inquiry on behalf of your constituent, Mr. XXX of Honolulu, Hawaii, who believes there is a discrepancy in the nature of his military pension. Please excuse our delay in responding.

Staff of the Disability Rights Section, Civil Rights Division, have reviewed the issues raised by Mr. XXX and determined they are not matters that the Civil Rights Division is able to address. Mr. XXX implies that because there is a distinction between veterans' disability compensation, which he receives, and regular pension benefits for military service, which he apparently does not receive, this pension status possibility violates the Americans with Disabilities Act of 1990 (ADA). Our understanding of military pensions is that a veteran or service retiree is eligible for either one or the other type of pension for military service, but not both.

The ADA does not apply to the executive branch of the Federal government. A similar statute, section 504 of the Rehabilitation Act of 1973, as amended, prohibits discrimination on the basis of disability in programs that receive Federal financial assistance or that are conducted by the Federal government itself. Primary jurisdiction to investigate allegations about possible section 504 violations resides with the Federal agency that conducts or funds the program. If Mr. XXX believes that he was denied services or access to a VA program or activity based on his disability, he may file a section 504 claim with the following office: Mr. Gerald K. Hinch, Deputy Assistant Secretary, Office of Equal Opportunity, Department of Veterans Affairs, 1425 K Street N.W., Washington, D.C. 20420, telephone (202) 233-2012.

Cc: Records, Chrono, Wodatch, McDowney, Talian, FOIA
h:\talian\myfiles\congress\mink XXX va\sc. YOUNG-PARRAN

Claims about the denial of disability compensation and/or

receipt of improper medical treatment concerning the VA are primarily under the jurisdiction of the program office at the VA that oversees administration of such services. Therefore, if Mr. XXX disputes determinations by the VA about his eligibility for benefits, he should file his allegations with the following office: Mr. Newell Clinton, Director, Veterans Assistance Service (27), Department of Veterans Affairs, 810 Vermont Avenue, N.W., Washington, D.C. 20420, telephone (202) 275-5451.

We note that disagreements by a claimant with determinations by the VA concerning a benefits claim, or for changing the status of one's discharge for military service, must ultimately be resolved through the VA's administrative appeal process involving the Board of Veterans' Appeals. The VA regional staff that processed any claim by Mr. XXX can provide information about procedures to appeal the VA's determination in his case, or he may write to the Department of Veterans Affairs, (01C1), Board of Veterans' Appeals, Washington, D.C. 20420.

Mr. XXX may find it useful to enlist the assistance of a veterans' service organization such as the Veterans of Foreign Wars or the American Legion to assist in his VA claims and appeals. He also may consult with a private attorney to determine what other options are available to him. For his review we have enclosed a copy of the VA's benefits directory. It describes in detail the names and locations of veterans' assistance services and proper appeal authorities at the VA.

I hope this information is useful in responding to your constituent.

Sincerely,

Bill Lann Lee
Acting Assistant Attorney General
Civil Rights Division

Enclosure

FEB 12 1998

The Honorable Dave Weldon
Member, U.S. House of Representatives
Brevard County Government Complex
2725 Judge Fran Jamieson Way
Building C
Melbourne, Florida 32940

Dear Congressman Weldon:

I am replying to your inquiry on behalf of your constituent, Mr. XXX of XXX , Florida, who wrote seeking the status of his complaint filed with the Department of Justice. Please excuse our delay in responding.

Although Mr. XXX believed that his civil rights had been violated, his complaint generally involved a dispute concerning his eligibility for benefits under programs administered by the Department of Veterans Affairs (VA). After careful review we referred Mr. XXX complaint to the VA on April 8, 1997, and notified him about this action (Enclosure). As recently as November we responded to several telephone inquiries from Mr. XXX directing him to staff at the VA that were processing his complaint. Mr. Ken Kunkle, telephone (202) 273-8923, of the VA's civil rights office provided information that the VA staff contact on Mr. XXX file was Mr. Carl Wasson, telephone (202) 273-7345.

Disagreements between Mr. XXX and the VA with respect to his eligibility to receive service-connected disability compensation or to qualify for guaranteed or subsidized loans must be resolved through the VA's administrative appeal process involving the Board of Veterans' Appeals. The VA regional staff that processed Mr. XXX claim can provide information about procedures to appeal the VA's determinations in his case. In the alternative, Mr. XXX may write directly to the Department of Veterans Affairs, (01C1), Board of Veterans' Appeals, Washington, D.C. 20420.

cc: Records, Chrono, Wodatch, McDowney, Talian, FOIA
h:\talian\myfiles\congress\f-weld XXX .va.wpd\sc. YOUNG-PARRAN

Mr. XXX may find it useful to enlist the assistance of a recognized national veterans service organization such as the Veterans of Foreign Wars or the American Legion to help him in his VA appeal. He also may consult with a private attorney to determine what other options are available to him.

Additionally, if Mr. XXX believes that VA personnel were intentionally negligent in the handling of his complaints or intentionally misapplied the law, or otherwise engaged in fraud, waste, or abuse, he may wish to file a complaint with the VA's Office of Inspector General by writing to:

Mr. Richard Griffin
Inspector General (50)
Department of Veterans Affairs
810 Vermont Ave, N.W.
Washington, D.C. 20420
Telephone (202) 565-8621.

For Mr. XXX use, we have enclosed the VA's benefits directory that provides information about veterans' assistance services and proper appeal authorities at the VA. I hope this information is responsive to your constituent's concerns.

Sincerely,

Bill Lann Lee
Acting Assistant Attorney General
Civil Rights Division

MAR 5 1998

The Honorable Sherwood Boehlert
Member, U.S. House of Representatives
Alexander Pirnie Federal Building, Room 200
10 Broad Street
Utica, New York 12501-1270

Dear Congressman Boehlert:

This letter is in response to your inquiry on behalf of your constituent, XXX . Mr. XXX has asked you to determine if the Americans with Disabilities Act of 1990 (ADA) would require the Oneida County Historical Society to modify its facilities, and, to determine if Federal funds are available to defray the cost of compliance. We apologize for the delay in responding.

We do not have sufficient information about the Oneida County Historical Society to be able to say specifically how the ADA applies to that organization's operations. There are different requirements for public entities (usually State or local governments) and places of public accommodation operated by private entities. In general, however, Mr. XXX should be aware that the ADA applies different requirements to new construction and alterations than it applies to existing facilities that are not otherwise being altered.

New construction of (or alterations to) privately owned buildings subject to the ADA must comply with the ADA Standards for Accessible Design. Publicly owned buildings may comply with the ADA Standards or with the Uniform Federal Accessibility

cc: RECORDS; CHRONO; WODATCH; BLIZARD; MCDOWNEY; FOIA
C:\MYFILES\BOEHLERT.WPD

Standards. The ADA does not exempt historic facilities from coverage, but it does take into account the national interest in preserving significant historic structures. The ADA regulations establish special procedures that may be followed in situations where full compliance with the technical requirements of the ADA accessibility standards for new construction and alterations will threaten or destroy the historic significance of a facility.

Even if no alterations are planned, a public accommodation is required to remove architectural barriers to the extent that it is readily achievable to do so. Barrier removal that would threaten or destroy the historic significance of the facility would not be readily achievable; therefore, it would not be required. However, if it is not readily achievable to remove architectural barriers in customer service areas, the public accommodation is still required to make its goods and services available to customers with disabilities through alternative methods such as curbside service, if such methods are readily achievable. Public entities have a similar obligation - to ensure that individuals with disabilities are not excluded from their programs because the facility in which the program is offered is inaccessible.

Mr. XXX also asked about the availability of funds to pay for modifications to provide access. The ADA, itself, does not provide funds for construction. However, funds may be available through other Federal programs that provide funds for various types of construction. In addition, private entities may be eligible for a tax credit for expenses necessary to comply with the ADA. As amended in 1990, the Internal Revenue Code permits an eligible small business (one whose gross receipts do not exceed $1,000,000 or whose work force does not exceed more than 30 full-time workers) to claim a credit of up to 50 percent

of eligible access expenditures that exceed $250 but do not exceed $10,250. Information about this tax credit can be obtained from a local IRS office, or by contacting the Office of Chief Counsel, Internal Revenue Service.

I am enclosing copies of the Department of Justice regulations implementing titles II and III of the ADA and the Department's Technical Assistance Manuals. These documents should enable Mr. XXX to determine which requirements of the

ADA apply to the facilities that he manages. If Mr. XXX has further questions, he may contact the Department of Justice's toll-free ADA Information Line (800-514-0301 (voice) or 800-514-0383 (TDD)). Members of the Disability Rights Section staff are available to answer questions on the information line on Monday, Tuesday, Wednesday, and Friday from 10:00 a.m. to 6:00 p.m., Eastern time. On Thursday, the information line is staffed from 1:00 p.m. to 6:00 p.m.

I hope that this information is helpful to you in responding to your constituent.

Sincerely,

Bill Lann Lee

Enclosures

MAR 5 1998

The Honorable Jennifer Dunn
Member, U.S. House of Representatives
Nine Lake Bellevue Drive
Suite 204
Bellevue, Washington 98005

Dear Congresswoman Dunn:

I am responding to your letter asking if Federal law would require the installation of an elevator in a two-story facility that is being remodeled. Your inquiry was prompted by a letter from your constituents, Mr. and Mrs. XXX , who wrote to you objecting to a determination by the Washington State Building Code Council that the State's accessibility code requires the installation of an elevator or ramps to provide access to an upper level in a building being remodeled at the Atwood's Pet Resort. We apologize for the delay in responding.

Title III of the Americans with Disabilities Act of 1990 (ADA) requires newly constructed or altered places of public accommodation and commercial facilities to be readily accessible to, and usable by, individuals with disabilities. However, the ADA does contain a limited exception to this requirement. Section 303(c) provides that the requirement to provide access in newly constructed or altered facilities

. . . shall not be construed to require the installation of an elevator for facilities that are less than three stories or have less than 3,000 square feet per story unless the building is a shopping center, a shopping mall, or the professional office of a health care provider . . .

CC: RECORDS; CHRONO; WODATCH; BLIZARD; MCDOWNEY; FOIA
h:\GCONCEPC\MYFILES\DUNN.WPD

Therefore, federal law would not require the installation of an elevator in a two-story facility.

Your constituents should note, however, that the ADA does not preempt the authority of the State of Washington to impose more stringent requirements on construction through its building code process. Therefore, the State may require the installation of elevators in two-story buildings. The interpretation and application of the State's accessibility code is a matter that Mr. and Mrs. Atwood must resolve with State code officials.

I hope that this information is helpful to you in responding to your constituents.

Sincerely,

Bill Lann Lee
Acting Assistant Attorney General
Civil Rights Division

FEB 23 1998

Mr. XXX
XXX
Syracuse, NY XXX

Dear Mr. XXX :

I am writing in response to your letter to Senator Daniel Patrick Moynihan, which the Department of Justice received on February 3, 1998, regarding questions about the Americans with Disabilities Act (ADA).

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities having rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA's requirements. However, it does not constitute a legal interpretation or legal advice, and it is not binding on the Department.

The ADA prohibits discrimination on the basis of disability in employment, State and local government, public accommodations, commercial facilities, transportation, and telecommunications. The following four Federal agencies are primarily responsible for enforcing the ADA. The U.S. Equal Employment Opportunity Commission enforces ADA provisions prohibiting discrimination in employment against qualified individuals with disabilities (title I). The U.S. Department of Justice enforces ADA provisions prohibiting discrimination on the basis of disability in State and local government services (title II), and in public accommodations and commercial facilities (title III). The U.S. Department of Transportation enforces ADA provisions that require nondiscrimination in public and private mass transportation systems and services. The Federal Communications Commission enforces ADA telecommunications provisions (title IV).

The elements that an ADA claimant must prove vary slightly depending on the particular claim. For example, an ADA title I claimant must show that (1) he has a disability within the meaning of the ADA; (2) he is qualified for the job, with or without reasonable accommodation, and is able to perform the essential functions of the job; (3) he was subjected to an adverse employment decision; (4) the employer knew or had reason to know of his disability; and (5) he was replaced by a

non-disabled person or treated less favorably than a non-disabled person. An ADA title II claimant must show that (1) she has a disability within the meaning of the ADA; (2) she is qualified, with or without reasonable modifications to rules, policies, or practices, and meets the essential eligibility requirements for the receipt of services or the participation in programs or activities; and (3) by reason of such disability, she was denied the benefits of the services, programs or activities by a public entity. An ADA title III claimant must show that (1) he is

disabled within the meaning of the ADA; (2) a private entity owns, leases (or leases to), or operates a public place of accommodation; and (3) he was denied the opportunity to participate in or benefit from services or accommodations on the basis of his disability.

Remedies available under the ADA also vary depending on the claim. Under title I, remedies available may include hiring, reinstatement, promotion, back pay, front pay, reasonable accommodation, or other actions that will make an individual "whole." Compensatory and punitive damages also may be available where intentional discrimination is found. Under titles II and III, remedies available may include an order granting temporary, preliminary, or permanent relief; requiring that facilities be made readily accessible to and usable by individuals with disabilities; requiring provision of an auxiliary aid or service; or requiring modification of a policy, practice, or procedure. In addition, the Department may request monetary damages for individual victims and/or civil penalties against covered entities.

Enclosed, among other things, is a booklet entitled "A Guide To Disability Rights Laws" that provides an overview of Federal civil rights laws that ensure equal opportunity for people with disabilities. Also enclosed is the most recent status report that summarizes ADA activities of the Department of Justice during the fourth quarter of 1997. In addition, enclosed is a list containing telephone numbers and Internet and electronic bulletin board addresses of federal agencies and other organizations that provide information about the ADA.

I hope this information is helpful to you.

Sincerely,

John L. Wodatch
Chief
Disability Rights Section

Enclosures

MAR 17 1998

The Honorable Porter Goss
Member, U.S. House of Representatives
2000 Main Street
Suite 303

Ft. Myers, Florida 33901

Dear Congressman Goss:

I am responding to your inquiry on behalf of your constituent, Ms. XXX , regarding the obligation of the Peace River Federated Republican Forum to provide real-time captioning for a person who wants to attend a program sponsored by that organization. Please excuse our delay in responding to you.

Title III of the Americans with Disabilities Act of 1990 (ADA) provides that no individual shall be discriminated against on the basis of disability in any place of public accommodation. The ADA defines 12 categories of places of public accommodation, including places serving food or drink, lecture halls, and other places of public gathering. Organizations that do not usually fall within one of the 12 categories may become subject to the ADA when they lease a place of public accommodation for the purpose of sponsoring an event. Therefore, Ms. XXX has been correctly advised that her organization is subject to the ADA when it is sponsoring a public gathering such as a luncheon program with a speaker.

The ADA requires covered entities to ensure effective communication with program participants who have hearing impairments. This may require a covered entity to provide auxiliary aids for a person with a hearing impairment if it is necessary to ensure effective communication. Real-time captioning, i.e., having a reporter prepare a simultaneous transcription of a speech, is an auxiliary aid that is often effective, but other auxiliary aids may also be effective.

cc: Records, Chrono, Wodatch, McDowney, Blizard, FOIA
h:\cyoung\2goss-XXX .wpd\sc. Young-Parran

The obligation to ensure effective communication is not unlimited. A covered entity is not required to provide a requested auxiliary aid if the covered entity can demonstrate that providing that auxiliary aid would result in an undue financial or administrative burden, i.e., a significant difficulty or expense. In determining whether the provision of real-time captioning would result in an undue burden, Ms. XXX organization should consider not only the fees charged for the specific program, but also the overall financial resources of the organization. The sponsoring organization should also consider other factors that would minimize the degree of burden.

If the organization determines that providing real-time captioning would result in an undue burden, then the organization may propose the use of an alternative auxiliary aid. In such circumstances, it is important for the covered entity to work with the person who requested the auxiliary aid to identify an alternative that will provide effective communication. The use of amplification devices or assistive listening systems are effective communication aids for some people, but they are not effective for everyone.

I am enclosing copies of the Department's regulation implementing title III of the ADA and the Department's Title III Technical Assistance Manual. If Ms. XXX has further questions about the ADA, she may contact the Department of Justice's toll-free ADA information line (800-514-0301 (voice) or 800-514-0383 (TDD)). Members of the Disability Rights Section staff are available to answer questions on the information line on Monday, Tuesday, Wednesday, and Friday from 10:00 a.m. to 6:00 p.m., Eastern time. On Thursday, the information line is staffed from 1:00 p.m. to 6:00 p.m.

I hope this information will be helpful to you in responding to your constituent.

Sincerely,

Bill Lann Lee
Acting Assistant Attorney General
Civil Rights Division

MAR 23 1998

The Honorable Alfonse M. D'Amato
United States Senate
Washington, D.C. 20510-3202

Dear Senator D'Amato:

I am replying, in duplicate and with your original enclosures, to your inquiry on behalf of your constituent, Ms. XXX , of XXX , New York. Ms. XXX also filed her complaint directly with our department. She raises issues about the licensing of service animals used by persons with disabilities, and also alleges discrimination on the basis of disability by the Stanford Free Library. Please excuse our delay in responding.

Ms. XXX correspondence summarizes a dispute with local government officials about the status of her service dog and whether or not it will be licensed or certified by New York as a Medical Assistance Dog. Her correspondence further refers to efforts by the Town of Stanford supervisor to "revoke" her dog's license.

The Americans with Disabilities Act (ADA) does not require States to establish licensing or certification programs for service animals. Our review of the letter Ms. XXX received from the Stanford Town Supervisor, Mr. Kelly, shows that he is referring to State and local laws that require dogs to be licensed generally, whether or not the animal functions as a service animal for a person with disabilities. Thus, the dispute described by Ms. XXX about her dog's licensing does not raise an issue cognizable under the ADA.

On the other hand, under titles II and III of the ADA, both public entities (State and local governments) and public accommodations (private businesses) are required to admit to their facilities animals that are considered service animals as defined by the ADA (any guide dog, signal dog, or other animal individually trained to provide assistance to an individual with a disability), regardless of whether they have been licensed or certified by a State or local government. The incident described by Ms. XXX occurring at her local library thus raises issues that may be a violation of the ADA.

cc: Records, Chrono, Wodatch, McDowney, Talian, FOIA

Ms. XXX allegations about the Stanford Free Library are covered by title II of the ADA or Federal laws prohibiting discrimination in State or local programs that receive Federal financial assistance. The title II implementing regulation delegates to the Department of Education responsibility for complaints relating to educational programs, services, and regulatory activities, including libraries. Accordingly, we have referred this matter to that agency for investigation. We have enclosed a copy of our referral letter and our letter to Ms. XXX for your information.

I hope this information will assist you in responding to your constituent.

Sincerely,

Bill Lann Lee
Acting Assistant Attorney General
Civil Rights Division

Enclosures

MAR 30 1998

The Honorable Rosa L. DeLauro
U.S. House of Representatives
Washington, D.C. 20515-0703

Dear Congresswoman DeLauro:

I am responding to your letter on behalf of your constituent, Ms. XXX , regarding the application of the Americans with Disabilities Act of 1990 (ADA) to architectural barriers to access by people with disabilities.

Title III of the ADA, which prohibits discrimination against persons with disabilities by public accommodations, requires owners or operators of a place of public accommodation, such as a shopping center, department store, bank, hospital, restaurant, theater, library, etc., to remove architectural barriers to access. Title III also requires facilities that are newly designed, constructed or altered to be readily accessible to and usable by individuals with disabilities.

The ADA Standards for Accessible Design (Standards), 28 C.F.R. pt. 36, app. A, set forth the requirements for new construction and alterations of places of public accommodations. In removing architectural barriers, a public accommodation is also required to comply with the ADA Standards to the extent that it is readily achievable, that is, easily accomplishable and able to be carried out without much difficulty or expense. Section 36.304(b) and (c) of the enclosed title III regulations provide examples and suggest priorities of barrier removal steps.

Cc: RECORDS; CHRONO; WODATCH; BLIZARD; MCDOWNEY; FOIA
H;/GCONCEPC/MYFILES/CGRSBLIZARDDELAURO.LTR

Ms. XXX letter contains comment concerning the following four barrier removal issues: ramps, doors, accessible routes, and parking spaces. With respect to ramps, the ADA Standards provide that any part of an accessible route with a slope greater than 1:20 will be considered a ramp and must comply with section 4.8. Section 4.8 of the ADA Standards specifies a ramp's slope and rise, clear width, landing, and etc. For example, section 4.8.2 requires that the least possible slope shall be used for any ramp. Section 4.8.2 also requires that the maximum slope of a ramp in a new construction shall be 1:12, and the maximum rise for any run shall be 30 inches. In addition, section 4.8.5 requires handrails if a ramp has a rise greater than 6 inches or a horizontal projection greater than 72 inches. Section 4.9.4 of the ADA Standards further requires handrails at both sides of all stairs.

Section 4.13 of the ADA Standards sets forth the requirements for doors. The ADA Standards do not require that automatic doors be provided although other requirements for doors are addressed, including maneuvering clearances, hardware, and push/pull force. Automatic doors may be used where inadequate maneuvering space prevents a person with mobility impairments from approaching and opening the door without standing in the door swing. If automatic doors are provided they must comply with the requirements of the ADA Standards in section 4.13.12.

Section 36.304(c) of the enclosed title III regulations require a public accommodation to take measures to provide access to those areas of a place of public accommodation where goods and services are made available to the public. Thus, businesses may be required to rearrange tables, chairs, vending machines, display racks, and other furniture to provide accessible paths to

the extent that it is readily achievable. In determining what is readily achievable, businesses should consider, among other things, how many movable racks and display units intrude on accessible paths, and the impact on sales volume of the loss of selling space created by widening aisles and removing racks and display units.

With respect to parking spaces, section 4.6.2 of the ADA Standards require that accessible parking spaces serving a particular building be located on the shortest accessible route of travel to an accessible entrance. In some instances, local fire engine access requirements prohibit parking immediately adjacent to a building. In such situations, a marked crossing may be used as part of the accessible route to the entrance. Additionally, enforcement of parking regulations is a matter governed by State or local law. The ADA does not contain provisions specifically requiring spaces are occupied only by persons with disabilities. Decisions made by local law enforcement officials as to how to allocate scare enforcement resources are a matter of local prosecutorial discretion that typically would not raise ADA concerns.

I have enclosed a copy of the regulation implementing title III of the ADA for your reference. Also enclosed are documents entitled the Title III Technical Assistance Manual, the Title III Highlights, How to File a Title III Complaint, and the ADA Guide for Small Businesses. I hope this information is helpful to you in responding to your constituent.

Sincerely,

Bill Lann Lee
Acting Assistant Attorney General

The Honorable Jennifer B. Dunn
Member, U.S. House of Representatives
Nine Lake Bellevue Drive
Suite 204
Bellevue, Washington 98004

Dear Congresswoman Dunn:

I am responding to your letter on behalf of your constituent, Ms. XXX , regarding accessibility at the new post office in Issaquah, Washington. Please excuse our delay in responding.

The Americans with Disabilities Act (ADA) does not apply to the U.S. Postal Service. The U.S. Postal Service is covered by the Rehabilitation Act of 1973. Ms. XXX complaint comes under the jurisdiction of the United States Postal Service, which has the responsibility under section 504 of the Rehabilitation

Act of 1973, as amended, to ensure that its own programs and activities do not discriminate on the basis of disability. The section 504 regulations contain different requirements for newly constructed, altered, and existing postal facilities. The Postal Service has established jurisdiction over this complaint.

In addition, because the Issaquah Post Office was designed, constructed, altered, or leased by the Federal Government after 1968, the Architectural Barriers Act (ABA) applies to this complaint. The Architectural and Transportation Barriers Compliance Board (Access Board) has jurisdiction to enforce the provisions of the ABA. The Access Board also established jurisdiction over this complaint.

I understand that both the Postal Service and the Access Board investigated this complaint and pursued it to the extent of their jurisdiction. The Postal Service also took corrective action in response to some portions of the complaint.

(handwritten)FOIA

The Department of Justice, however, does not serve as a reviewing authority for the decisions of other Federal agencies following their investigations of discrimination complaints. If your constituent is dissatisfied with the determination concerning the merits of her complaint, she may be entitled to file an action in an appropriate United States District Court. Ms. XXX may wish to retain private counsel to assist her in assessing what courses of action may be open to her.

If you or your constituent have any questions, you may contact:

Mr. Rodger B. Carter
Coordinator
Architectural Barriers Compliance Program
United States Postal Service
4301 Wilson Boulevard, Suite 300
Arlington, Virginia 22203-1861

Telephone: (703) 526-2867 (Voice and TDD); or

Ms. Judith A. Haslam

MAR 30 1998

The Honorable Max Cleland
United States Senator
75 Spring Street, S.W.
Suite 1700
Atlanta, Georgia 30303

Dear Senator Cleland:

This letter responds to your inquiry on behalf of your constituent, Ms. XXX , who alleges that her newly built house does not meet the Council of American Building Officials (CABO) standards. She claims that she and her roommate, who are both individuals with disabilities, have had difficulties in resolving their concerns regarding the construction of their house with the builder, building supervisor, and county building inspector. Please excuse our delay in responding.

The Disability Rights Section of the Civil Rights Division of the Department of Justice enforces titles I, II and III of the Americans with Disabilities Act (ADA). Title I protects qualified individuals with disabilities from discrimination in employment by State and local government employers and by private employers, when these employers have 15 or more employees. Title II protects individuals with disabilities from discrimination in all of the services, programs, and activities of State and local government entities. Title III protects individuals with disabilities from discrimination on the basis of disability by most privately owned businesses that offer goods and services to the public.

The circumstances that your constituent describes do not appear to raise an issue over which we have jurisdiction. Nor

(handwritten)FOIA

are we aware of any other component of the Department of Justice or other Federal agency that would have authority to handle the matter. Instead, the issue Ms. XXX presents appears to be a matter over which a local government entity would have jurisdiction. Ms. XXX may wish to retain private counsel, or contact the local legal aid office, to ascertain what legal options, if any, may be available to her. She also may find recourse through the appropriate State or local building department. The CABO standards are not mandatory unless the local jurisdiction has adopted them in its building codes. Other building code requirements may be in effect in Ms. XXX locality.

If your constituent or your staff has questions about title II or title III of the ADA, they may call the Department's ADA information line at 1-800-514-0301 (voice) or 800-514-0383 (TDD). Members of the Disability Rights Section staff are available to answer questions on the information line on Monday, Tuesday, Wednesday, and Friday from 10:00 a.m. to 6:00 p.m., Eastern time. On Thursday, the information line is staffed from 1:00 p.m. to 6:00 p.m.

We regret that we are unable to help your constituent further. I hope this information is helpful in responding to your constituent.

Sincerely,

Bill Lann Lee
Acting Assistant Attorney General

U.S. Department of Justice

Civil Rights Division

Office of the Assistant Attorney General Washington, D.C. 20035

APR 3 1998

The Honorable John Breaux
United States Senate

Washington, D.C. 20510-1803

Dear Senator Breaux:

I am replying to your inquiry on behalf of Judge Frank A. Marullo, Jr., Chief Judge, Criminal District Court, Parish of Orleans, New Orleans, Louisiana. Judge Marullo seeks information about the availability of Federal financial assistance for capital improvements to the Israel M. Augustine, Jr. Criminal Justice Center in New Orleans. Please excuse our delay in responding.

Staff of the Disability Rights Section, Civil Rights Division, researched potential sources of funding in response to Judge Marullo's request. There are no Federal domestic assistance programs specifically earmarked for accessibility renovations and security upgrades to State and local court buildings. However, some State and local courts have, nonetheless, been successful over the years in their efforts to obtain Federal assistance for capital improvements.

According to Mr. Bob Tilden of the National Center for State Courts, Conference of State Court Administrators, 1700 North Moore Street, Suite 1710, Arlington, Virginia 22209, telephone (703) 841-0200, the funding sources have been innovative and wide-ranging. They have included such methods as Congressionally appropriated line-item riders, funding associated with Federal agencies such as the Federal Emergency Management Agency following disaster-related damage, urban-renewal funding through the Department of Housing and Urban Development, "impact funds" associated with a significant "Federal presence" in the local community, and "move-ins" to vacated Federal facilities. In 1995 the State Justice Institute published the results of a study entitled "Court Managers Guide to Court Facility Financing Survey" which describes such creative financing efforts undertaken by local court systems. According to Mr. Tilden, Judge Marullo should consult Mr. Hugh Collins, the State Court Administrator in New Orleans, for a copy of the financing survey.

(handwritten)FOIA

We also referred Judge Marullo's correspondence to the Office of Justice Programs (OJP) and the Department of Housing and Urban Development (HUD) (Enclosures). OJP's Bureau of Justice Assistance administers criminal justice formula grants.

Funding for facility renovation of State and local courts may be considered for this program under existing guidelines.

HUD administers Federal aid to promote community development under its Community Development Block Grants Program. State and local courts may be recipients of community development funding for capital improvements. Both OJP and HUD should be able to provide Judge Marullo with specific information about the Federal financial assistance programs under their administration.

An additional resource that Judge Marullo might find useful is entitled "Opening the Courthouse Door; An ADA Access Guide for State Courts", published by the American Bar Association's Commission on Mental and Physical Disability Law. This 1992 guide has a chapter with suggestions on funding resources that may be helpful to pay for providing access to the courts by persons with disabilities. It is available by contacting:

American Bar Association
Commission on Mental and Physical
Disability Law
740 15th Street, N.W.
Washington, D.C. 20005
Telephone (202) 662-1570

I hope this information is useful in responding to your constituent.

Sincerely,

Bill Lann Lee
Acting Assistant Attorney General
Civil Rights Division

Enclosures

Civil Rights Division

Office of the Assistant Attorney General Washington, D.C. 20035

APR 3 1998

The Honorable Joseph I. Lieberman
United States Senate
Washington, D.C. 20510-0703

Dear Senator Lieberman:

Your inquiry on behalf of your constituent, Ms. XXX , has been forwarded to the Disability Rights Section of the Civil Rights Division for consideration and response. Ms. XXX had several questions regarding proposed changes to regulations established by the State of Hawaii related to the quarantine of guide dogs for the visually impaired. In addition, Ms. XXX listed several changes to the regulations which she advocates. Please excuse our delay in responding.

As way of background, a group of private plaintiffs sued the State of Hawaii under the Americans with Disabilities Act ("ADA"), 42 U.S.C. S 12101 et seq., alleging that the State's refusal to modify its rabies prevention program violated the ADA. Specifically, the Plaintiffs argued that the State should be required to replace its quarantine of guide dogs for persons with visual impairments with a rabies prevention scheme that included administrative requirements aimed at ensuring that rabies would not enter the State. Among the safeguards proposed by the Plaintiffs were the use of titer-testing, microchip implantation and a record of vaccination since infancy for a dog provided by a reputable guide dog training school.

The United States intervened in the litigation, arguing that the Plaintiffs' proposals were reasonable under the ADA and would not fundamentally alter Hawaii's rabies control policies. As the litigation progressed, the parties agreed to a settlement, adopting much of what the Plaintiffs were seeking, including replacement of quarantine with a rabies control system advocated by the Plaintiffs. In accordance with the settlement, the State has proposed and is considering regulations which will implement the settlement.

(handwritten)FOIA

Ms. XXX is not correct in her assessment of certain facts regarding those regulations. First, it is not true that only guide dog schools that are members of the U.S. Council of Dog Guide Schools are eligible to be on the list of approved schools maintained by the State. Instead, under the regulations, any school that meets the following criteria is eligible to be included on that list:

1. Dogs must be required to have their first rabies vaccination administered between approximately 12 and 24 weeks of age;

2. A second rabies vaccine must be required approximately one year later;

3. All dogs in the school must be vaccinated against rabies by a licensed veterinarian or licensed veterinary technician under the supervision of a licensed veterinarian;

4. Before taking a guide dog trained at the school, the user must be instructed on the proper care, maintenance, and training for guide dogs, including proper veterinary care;

5. For all dogs that are still owned by the school, the school must have a policy or practice requiring that veterinary records of its guide dog graduates, including but not limited to rabies vaccination records, be made available to the school at the school's request.

Second, it is not correct that blind visitors can stay only in "pre-selected, pre-approved lodgings." Under the regulations, the State will maintain a list of hotels that have been inspected and have been approved because the hotels take steps to control stray animals and rodents and offer a secure environment that contains no other carnivores in the guest areas (except other certified guide dogs, security dogs or other animals entitled to be present pursuant to the Americans with Disabilities Act or other federal law). However, blind visitors are free to stay in other hotels or in other lodgings, including private residences, so long as they provide the address to the State so that the State may ensure that the residence meets the above criteria.

In addition to the above, Ms. XXX proposed several other revisions to the regulations. Under the State regulations, there is a public comment period while the regulations are being considered. We note from her correspondence that Ms. XXX has submitted her suggestions to the State for their review and consideration.

I hope this information is helpful to you in responding to your constituent.

Sincerely,

Bill Lann Lee
Acting Assistant Attorney General
Civil Rights Division

APR 17 1998

XXX
XXX
Oklahoma City, OK XXX

Dear Mr. XXX :

I am responding to your letter regarding the requirements of the Americans with Disabilities Act (ADA) for curb ramps and sidewalks at public streets and intersections. You have questioned decisions by Oklahoma City to install curb ramps leading from public streets to impassable areas where there are no sidewalks. According to your letter, Oklahoma City officials claim that these actions are required by the ADA.

Title II of the ADA prohibits discrimination on the basis of disability by State and local government entities. When public entities build new facilities or alter existing facilities, the Department of Justice's regulation implementing title II (enclosed) requires that the newly constructed or altered areas be made accessible to individuals with disabilities. The regulation specifically provides that new construction of or alterations to streets give rise to accessibility obligations for curb ramps. 28 C.F.R. S 35.151(e). Therefore, if Oklahoma City constructs a new street or intersection or alters an existing street or intersection, it is required to provide accessible curb ramps where pedestrian walkways that are elevated or curbed intersect with the new or altered street or intersection. 28 C.F.R. S 35.151(e)(1). Notably, resurfacing of streets gives rise to these obligations, as resurfacing is considered to be an alteration within the meaning of the ADA. See Kinney v. Yerusalim, 9 F.3d 1067 (3d Cir. 1993). In addition, if Oklahoma City builds or alters a pedestrian walkway, it may be required to provide curb ramps where the walkway intersects streets or intersections. 28 C.F.R. S 35.151(e)(2). However, the ADA does not require installation of ramps or curb ramps where there is no pedestrian walkway.

cc: Records; Chrono; Wodatch; Blizard; FOIA.
blizard\myfiles\drsltrs\XXX

Of course, the ADA does not prevent a public entity from exceeding the requirements of the ADA. Nor does it limit a public entity's discretion to provide new pedestrian walkways and ramps as it sees fit to serve interests in addition to accessibility.

I hope this information is helpful to you. As you requested, we are returning the photographs enclosed with your letter.

Sincerely,

John L. Wodatch
Section Chief
Disability Rights Section

The Honorable Kay Bailey Hutchison
United States Senator
10440 North Central Expressway
Suite 1160
LB 606
Dallas, Texas 75231-2223

Dear Senator Hutchison:

I am responding to your inquiry on behalf of your constituent, Mr. XXX who is concerned about the policy of the Town of Highland, Texas, which requires the compulsory use of sidewalks by runners and joggers. Mr. XXX recently sent a copy of the same complaint to the Disability Rights Section of the Civil Rights Division. The Section responded directly to Mr. XXX . Please excuse our delay in responding.

The Americans with Disabilities Act of 1990 (ADA) authorizes the Department of Justice to investigate alleged violations of title II and title III of the ADA, which prohibit discrimination on the basis of disability by private entities, public accommodations, and commercial facilities. In addition, the Department of Justice is responsible for enforcing title I of the ADA when a public employer is engaging in a pattern or practice of discrimination on the basis of disability, or when the Equal Employment Opportunity Commission (EEOC) has referred an individual complaint for enforcement after the EEOC has found that there is reasonable cause to believe a violation has

occurred and the EEOC has failed to obtain a conciliation agreement.

CC: RECORDS; CHRONO; WODATCH; XXX ; MCDOWNEY; FOIA;
E:/COBRIEN/MYFILES/CONGRESSIONALS.DRS/XXX .SEN

These ADA enforcement responsibilities are assigned to the Attorney General as the nation's chief law enforcement officer and head of the Department of Justice. Within the Department, ADA enforcement is assigned to the Civil Rights Division's Disability Rights Section, which also is responsible for enforcing section 504 of the Rehabilitation Act of 1973, as amended, and other Federal statutes that prohibit discrimination on the basis of disability. In enforcing the ADA, the Department of Justice represents the law enforcement interest of the United States. The Department does not act as an attorney for, or representative of, any individual complainant.

The circumstances that your constituent describes do not appear to raise an issue over which we have jurisdiction. Nor are we aware of any other component of the Department of Justice or other Federal agency that would have authority to handle the matter. Instead, the issue Mr. XXX presents appears to be a matter over which a local government entity would have jurisdiction.

To assist members of the public to understand their rights and responsibilities under the ADA, the Department operates an ADA information line (800-514-0301 (voice) or 800-514-0383 (TDD)). Members of the Disability Rights Section staff are

available to answer questions on the information line on Monday, Tuesday, Wednesday, and Friday from 10:00 a.m. to 6:00 p.m., Eastern time. On Thursday, the information is staffed from 1:00 p.m. to 6:00 p.m.

I hope this information is helpful in responding to your constituent.

Sincerely,

Bill Lann Lee
Acting Assistant Attorney General

Washington, DC 20035-6738

APR 22 1998

XXX
XXX
McMinnville, Oregon 97128

Dear Dr. XXX :

Senator Ron Wyden has asked me to respond to your letter to him regarding the Americans with Disabilities Act of 1990 (ADA). You expressed concern because some licensure boards, including the National Board of Medical Examiners (NBME), have permitted applicants who have learning disabilities to have additional time in which to complete their licensing examinations.

The ADA is a comprehensive civil rights law that prohibits discrimination on the basis of disability in employment, transportation, public services, public accommodations, and in the operation of certain licensing and certification organizations. The term "disability" is defined by the ADA as a "physical or mental impairment that substantially limits one or more of the major life activities of such individual." 42 U.S.C. S 12102 (2) (A). "Specific learning disabilities" are included within the definition of the phrase "physical or mental impairment." 28 C.F.R. S 36.104.

In enacting the ADA, Congress made specific findings that "society has tended to isolate and segregate individuals with disabilities, and, despite some improvements, such forms of discrimination against individuals with disabilities continue to be a serious and pervasive social problem . . . that persists in such critical areas as employment [and] ... education ...." (42 U.S.C. S 12101) Congress further found that:

CC: RECORDS; CHRONO; WODATCH; BLIZARD; MCDOWNEY; FOIA
E/GCONCEPC/MYFILES/WYDEN.WPD

individuals with disabilities continually encounter various forms of discrimination, including . . . failure to make modifications to existing facilities and practices, exclusionary qualification standards and criteria, segregation, and relegation to lesser services, programs, activities, benefits, jobs, or other opportunities [emphasis added].

There is no doubt that Congress intended that entities such as the NBME to be subject to the ADA's nondiscrimination requirements. Section 309 of the ADA expressly provides that "[a]ny person that offers examinations or courses related to applications, licensing, certification, or credentialing for secondary or postsecondary education, professional, or trade purposes shall offer such examinations or courses in a place and manner accessible to persons with disabilities or offer

alternative accessible arrangements for such individuals." 42 U.S.C. S 12189. The regulations implementing the ADA authorize testing entities such as the NBME to modify the amount of time provided to complete an examination in appropriate cases to accommodate persons with disabilities so as to ensure that the examination results accurately reflect the individual's aptitude or achievement level or whatever other factor the examination purports to measure, rather than reflecting the individual's impairment or disability. 28 C.F.R. SS 36.309 (b) (1) (i) and (b) (2).

I hope this information clarifies the provisions of the ADA concerning testing accommodations for people with learning disabilities.

Sincerely,

John L. Wodatch
Chief
Disability Rights Section

cc: The Honorable Ron Wyden

APR 27 1998

The Honorable Dianne Feinstein
United States Senate
Washington, D.C. 20510-0504

Dear Senator Feinstein:

I am replying to your inquiry on behalf of your constituent, Ms. XXX , whose office represents the San Ramon Valley Primary Care Medical Group ("Medical Group"). Please excuse our delay in responding.

Ms. XXX , on behalf of the Medical Group, has expressed

concern that health insurers do not reimburse physicians for costs associated with a physician's obligation under the Americans with Disabilities Act (ADA) to provide auxiliary aids or services (specifically, sign language interpreters) for persons with disabilities. The Medical Group believes that the ADA should require health insurers to reimburse medical practitioners when they provide interpreter services.

The terms and conditions of health insurance policies sold by insurance providers who are public accommodations must comply with the ADA. However, the ADA does not expressly require a medical insurer to reimburse health care providers for all expenses incurred by an individual with a disability.

Ms. XXX letter to you enclosed a copy of a letter on this issue that was sent to the Department of Health and Human Services (HHS). HHS, through the Health Care Finance Administration, has a significant role in determining which expenses constitute valid and acceptable insurer reimbursable medical expenses. HHS, pursuant to its overall regulation and monitoring of the medical insurance industry, is the most appropriate agency to determine which expenses should be reimbursed as medical expenses. We have been informed that HHS is researching medical insurance payment schemes, including those under the Medicaid/Medicare programs administered by the Health Care Finance Administration. HHS will reply directly to the Medical Group.

(handwritten)FOIA

For your information, we have enclosed a copy of the Department of Justice regulation implementing title III of the ADA, tax credit information, the Title III Technical Assistance Manual, and a Question and Answer flyer issued by the National Center for Law and Deafness, an ADA technical assistance grantee of the Department of Justice. I hope this information is helpful to you in responding to your constituent. As you requested, we have responded in duplicate.

Sincerely,

Bill Lann Lee
Acting Assistant Attorney General
Civil Rights Division

MAY 13 1998

Ms. Diane Merideth
Code Consultant
Safety and Buildings Division
Wisconsin Department of Commerce
P.O. Box 2599
Madison, WI 53701-2599

Dear Ms. Merideth:

I am responding to your inquiry about the application of title II of the Americans with Disabilities Act of 1990 (ADA) to the construction of "press boxes." You have asked if elevator access must be provided to a press box, and if the use of a platform lift or limited use elevator would be deemed equivalent to the use of a passenger elevator that complies with section 4.10 of the ADA Standards for Accessible Design.

The Civil Rights Division of the Department of Justice is responsible for the implementation of title II of the ADA. The ADA authorizes the Department of Justice to provide technical assistance to assist individuals and entities subject to the Act to understand their rights and responsibilities. This response to your inquiry is intended to assist you to understand the potentially applicable legal requirements and to identify pertinent facts that should be considered in applying the ADA Standards to press boxes and similar facilities. This letter does not constitute a binding legal opinion and it is not binding on the Department of Justice.

The ADA requires new construction of (or alterations to) public facilities to be readily accessible to and usable by individuals with disabilities. The Department's regulation implementing title II, 28 C.F.R. S 35.151(c), provides that a public entity may comply with this requirement by complying with

(handwritten)FOIA

the ADA Standards for Accessible Design that were adopted to implement title III of the ADA. The ADA Standards establish

requirements applicable to all covered facilities. There are no requirements that are unique to the design of a "press box."

The ADA Standards require a covered entity to provide an accessible route to an accessible facility and to provide an accessible entrance. Generally, a ramp is the preferred means of providing vertical access to an entrance. Elevators are required only in multi-story facilities.

The ADA Standards define a "story" as

> [t]hat portion of a building included between the upper surface of a floor and upper surface of the floor or roof next above. If such portion of a building does not include occupiable space, it is not considered a story for purposes of these guidelines . . .

"Occupiable space" includes

> [a] room or enclosed space designed for human occupancy in which individuals congregate for amusement, educational or similar purposes, or in which occupants are engaged at labor, and which is equipped with means of egress, light, and ventilation.

If a covered facility has two or more levels that fall within the definition of a "story," a covered entity must provide an elevator or other accessible means of vertical access to connect all floor levels in the facility. Although an elevator is the most common means of providing vertical access in a multi-story facility, ramps may also be used to meet this requirement. It is unclear from your inquiry if the press box at issue contains "occupiable space" and whether it is a multi-story facility. If it does not meet either one of these requirements, there would be no requirement for an elevator under the ADA.

Platform lifts are permitted in new construction only in certain limited circumstances identified in section 4.1.3(5), Exception 4 of the ADA Standards. These include:

> (a) To provide an accessible route to a performing area in an assembly occupancy.
>
> (b) To comply with the wheelchair viewing position line-of-sight and dispersion requirements of 4.33.3.
>
> (c) To provide access to incidental occupiable spaces and rooms which are not open to the general public and which house no more than five persons, including but not limited

to equipment control rooms and projection booths.

(d) To provide access where existing site constraints or other constraints make use of a ramp or an elevator. infeasible.

The ADA Standards do not permit the use of limited-use elevators as an alternative to using a passenger elevator. However, the Department would regard such limited use elevators as "equivalent facilitation" in the limited circumstances in which the use of a platform lift is permitted.

I hope that this information is helpful to you in responding to the questions that you have received.

Sincerely,

John L. Wodatch
Chief
Disability Rights Section

MAY 14 1998

The Honorable Henry Bonilla
Member, U.S. House of Representatives
11120 Wurzbach, Suite 300
San Antonio, Texas 78230

Dear Congressman Bonilla:

I am responding to your letter on behalf of your constituent, XXX , who asked about the application of the new construction and alteration requirements of the Americans with Disabilities Act of 1990 (ADA).

Mr. XXX has recently received a waiver of the Texas Accessibility Standards to permit the installation of strobe alarms in a manner that differs from that prescribed by either the Texas Accessibility Standards or the ADA Standards for Accessible Design (28 C.F.R. pt. 36, App. A) (ADA Standards). Mr. XXX has asked you to determine why he cannot also receive a waiver of the ADA's new construction requirements.

Basically, Mr. XXX cannot receive a waiver of the ADA requirements because, in contrast to the State of Texas which, in the course of enforcing its State building code, can give advance approval of variances, the Federal government is not authorized to make ADA building inspections and grant waivers absent a complaint that the ADA is being violated. To understand this more fully, it is important to remember that the ADA is a comprehensive civil rights act that prohibits discrimination on the basis of disability in employment, transportation, public services, and public accommodations. To achieve the objectives of the Act, the ADA also requires that public buildings and facilities, places of public accommodation, and commercial facilities be designed, constructed, and altered in compliance with the ADA Standards. The ADA Standards, therefore, constitute only one small part of a much broader piece of Federal civil rights legislation that is intended to enable people with disabilities to participate in society.

The enforcement of building codes is the responsibility of State or local officials - usually through plan reviews and building inspections prior to (and during) construction. Most

local building regulations include a process through which a

cc: Records; Chrono; Wodatch; McDowney; Blizard; FOIA.
Spinckne\myfiles\bonilla.wpd

builder or building owner may seek advance approval of variances from the code requirements. The ADA, like other Federal civil rights statutes, relies on case-by-case enforcement in response to complaints. The statutory enforcement process does not include any mechanism for Federal ADA building inspections or plan reviews analogous to those in the State code enforcement process.

Because each compliance determination is unique, the Department is unable to determine if a building complies with the ADA without conducting a full investigation, and the Department is authorized to investigate only when there is reason to believe that a violation of the ADA has occurred. Therefore, the Department cannot approve plans prior to construction or waive the requirements of the ADA Standards.

To mitigate the tension between State code enforcement and the ADA, title III of the ADA authorizes the Attorney General to certify State or local building codes that are equivalent to the ADA Standards. Enforcement of a certified code facilitates compliance with the ADA. However, State and local officials enforcing a certified code do not have the authority to enforce the ADA on behalf of the Federal government.

The Texas Accessibility Standards have been certified by the Department of Justice. Therefore, the State of Texas is in a position to assist owners and builders in the State by using the expertise of building officials to guide them in applying the law. Building elements constructed pursuant to a State waiver or modification are not certified - but that does not mean that waivers or modifications are prohibited. It only means that the burden will be on the covered entity in any enforcement action to prove that any modification approved by the State complies with the ADA.

I hope that this information is helpful to you in responding to your constituent.

Sincerely,

Bill Lann Lee
Acting Assistant Attorney General
Civil Rights Division

U.S. Department of Justice
Civil Rights Division
Office of the Assistant Attorney General Washington, D.C. 20035

MAY 14 1998

The Honorable William D. Delahunt
Member, U.S. House of Representatives
15 Cottage Avenue
Quincy, Massachusetts 02169

Dear Congressman Delahunt:

I am responding to your letter on behalf of your constituent, Mr. XXX regarding whether the Americans with Disabilities Act (ADA) requires the removal of snow and maintenance of sidewalks on a city street. Please excuse our delay in responding.

The answer to this question depends on the specific circumstances. The Department of Justice regulation implementing title II of the ADA requires a public entity (such as a city) to ensure that its services, programs, and activities in existing facilities are accessible to people with disabilities. The focus of the requirement is access to services, programs, and activities, as opposed to access to physical structures. Therefore, there is no general requirement that compels a public entity to ensure that all sidewalks are free of snow.

However, if the sidewalk is part of an accessible route that is required to provide access to a covered program or activity, the public entity that provides the program would be required to ensure the sidewalk remains accessible. However, temporary interruptions in accessibility, such as those caused by snow, generally do not constitute violations of title II unless they

persist beyond a reasonable period of time. Further, only those sidewalks that are required by the ADA to be accessible and that are within the control of the city will be required to be maintained by the city.

To the extent that a public entity provides snow removal services, title II requires those services to be provided in a non-discriminatory manner. However, sidewalk snow removal by private property owners is private action not covered by title II absent some substantial involvement by the public entity. The ADA, therefore, does not generally require local governments to pass ordinances compelling property owners to remove snow from sidewalks.

(handwritten) FOIA

If sidewalks lead to places of public accommodation (such as stores or restaurants) covered by title III of the ADA, the owners or operators of these public accommodations may have obligations to maintain them under title III. If a sidewalk is part of a required accessible route and if the public accommodation exercises control over the sidewalk, the public accommodation may be required to keep the sidewalk accessible. As under title II, temporary interruptions to access because of snow are permissible unless they persist beyond a reasonable period of time.

I hope this information is helpful to you in responding to your constituent.

Sincerely,

Bill Lann Lee
Acting Assistant Attorney General
Civil Rights Division

MAY 20 1998

The Honorable Herb Kohl
United States Senator
14 West Mifflin Street
Suite 312
Madison, Wisconsin 53703

Dear Senator Kohl:

I am responding to your inquiry on behalf of your constituent, Monte K. Hottmann, District Administrator of the School District of Cambridge, Wisconsin. Mr. Hottmann wrote to you concerning a determination by the Wisconsin Department of Commerce that the Cambridge School District is required to install an elevator to provide access to the press box/control room that the school district is building at its high school athletic field. The Wisconsin Department of Commerce has granted the school district a two-year extension of time in which to comply with this requirement of the State accessibility code, which is based on the requirements of the Americans with Disabilities Act of 1990 (ADA). Please excuse our delay in responding.

The Civil Rights Division of the Department of Justice is responsible for the implementation of title II of the ADA, which prohibits discrimination on the basis of disability in the

programs, services, and activities of public entities. The ADA authorizes the Department of Justice to provide technical assistance to assist individuals and entities subject to the Act to understand their rights and responsibilities. Because this response is based solely on the facts presented in Mr. Hottmann's letter to you, it is intended only as technical assistance to help Mr. Hottmann to understand the applicable legal requirements and to identify pertinent facts. This response does not constitute a legal opinion of the Department with respect to the obligations of the Cambridge School District.

(handwritten) FOIA

The ADA requires new construction of (or alterations to) public facilities to be readily accessible to and usable by individuals with disabilities, including those who use wheelchairs. The Department's regulation implementing title II, 28 C.F.R. S 35.151 (c), provides that a public entity may comply with this requirement by complying with the Uniform Federal Accessibility Standards (UFAS) or the ADA Standards for Accessible Design that were adopted to implement title III of the ADA. We understand that the State of Wisconsin has adopted accessibility requirements based on the ADA Standards. Therefore, our analysis will be based solely on those standards.

The ADA Standards require a covered entity to provide an accessible route to an accessible facility and to provide an accessible entrance. In a multi-story facility, an accessible means of vertical access must be provided to connect all levels. Although an elevator is the most common means of providing vertical access, ramps and (in certain, limited circumstances) platform lifts may also be used. See, S 4.1.3 (5), Exceptions 4, of the enclosed ADA Standards. If the press box/control room is not part of a multi-story facility and is reached by its own

entrance, a ramp may be used to provide access to the entrance.

Mr. Hottmann should note, however, that the ADA does not preempt the authority of the State of Wisconsin to impose more stringent requirements on construction through its building code process. Therefore, the State may require the installation of an elevator in the high school press box. The interpretation and application of the State's accessibility code is a matter that the Cambridge School District must resolve with State officials.

Mr. Hottmann also inquired about the possibility of amending the Federal regulations. The ADA Standards are based on the ADA Accessibility Guidelines (ADAAG) developed by the United States Architectural and Transportation Barriers Compliance Board (Access Board). The Access Board is now engaged in a total review of these accessibility guidelines. The Access Board anticipates that the revised guidelines should be published as a proposed rule before the end of this year. To be fully responsive to your request, we at the Department of Justice will apprise the Access Board of your constituent's concerns. You should know that we have heard separately on this issue from the Safety and Building Division of the Wisconsin Department of Commerce. In addition, we are also in consultation with the United States Department of Education regarding this issue.

If Mr. Hottmann wants to address the situation described in his letter to you with the Access Board on his own, he may write to:

Thurman M. Davis
Chair
U.S. Architectural and Transportation
Barriers Compliance Board
1331 F Street, N.W.
Washington, DC 20004-1111

Copies of the Department's regulations implementing title II and title III of the ADA are enclosed for your reference. The ADA Standards for Accessible Design are published as Appendix A to the title III regulation. We have also enclosed a copy of the Department's response to the Wisconsin Department of Commerce that discusses the applicable requirements in detail.

I hope that this information is helpful to you in responding to your constituent.

Sincerely,

Bill Lann Lee
Acting Assistant Attorney General
Civil Rights Division

The Honorable Joseph I. Lieberman

United States Senate

Washington, D.C. 20510-0703

Dear Senator Lieberman:

I am responding to your recent letter on behalf of your constituent, xxxxxxxxxxxxxx. Ms. xxxxxxx expressed concern that the Greyhound bus company may be excluded from coverage under the Americans with Disabilities Act of 1990 (ADA). Please excuse our delay in responding.

Section 304 of the ADA, 42 U.S.C. § 12184, prohibits discrimination on the basis of disability in transportation services offered by any private entity that is primarily engaged in the business of transporting people. Greyhound, and other private companies that provide bus service to the public, are subject to this prohibition and to the Department of Transportation's (DOT) implementing regulation (49 C.F.R. pt. 37).

The ADA requires DOT to issue a regulation to establish both the nondiscrimination requirements applicable to transportation providers and the design standards applicable to the vehicles they purchase. When this regulation was published in 1991, it did not contain design requirements for the "over-the-road" buses or OTRBs, which are commonly used by private interstate bus lines. OTRBs are buses that have an elevated passenger deck located over a baggage compartment. This exclusion was based on specific statutory provisions that required DOT to defer development of such standards until the Office of Technology Assessment completed a study required by section 305 of the ADA. That study was completed in 1993.

On March 25, 1998, DOT published, for public comment, a proposed rule that will establish design standards and purchase requirements for OTRBs. The proposed rule will also establish interim operating requirements to be followed by the private providers until their bus fleets are fully accessible. The public comment period will close on May 26, 1998.

I have enclosed a copy of this proposed rule for your information. I hope that it is helpful to you in responding to Ms. xxxxxxx.

June 23, 1998
The Honorable David L. Hobson
U.S. House of Representatives
Washington, D.C. 20515
Dear Representative Hobson:
This letter is in response to your inquiry on behalf of your constituent, Hugh W. Payton, M.D. Dr. Payton inquired about enforcement of the "Respiratory Section" of the Americans with Disabilities Act (ADA), particularity in the service sector, to protect individuals with a sensitivity to house dust mites and mold spores. We apologize for delay in responding.

There is no separate section of the ADA devoted to respiratory illness in particular. The definition of "disability" encompasses individuals who have a physical or mental impairment, which may include a

physiological disorder or condition affecting the respiratory system. To be legally recognized as a disability, however, a physical or mental impairment must substantially limit a major life activity (such as breathing) of an affected individual. Thus, the determination as to whether sensitivity to house dust mites and mold spores is a covered disability must be made using the same case-by-case analysis that is applied to all other physical or mental impairments.

In some cases, an individual's respiratory or neurological functioning may be so severely affected by sensitivity to house dust mites and mold spores that he or she will be considered disabled. Such an individual would be entitled to all of the protections afforded by the ADA. These protections may include the provision of an area treated to control dust mites or mold

spores, if such treatment would not fundamentally alter the nature of the business or program. In other cases, however, an individual's sensitivity to dust mites and mold spores will not constitute a disability because the individual's major life activity of breathing is affected, but not substantially impaired. In this situation, an individual would not be entitled to claim ADA protection.

The ADA prohibits discrimination on the basis of disability, but it only requires covered entities to make reasonable modifications in their policies and practices that are necessary to enable individuals with disabilities to partake of their goods, services or facilities. After a determination is made that a person is an individual with a disability who is entitled to claim the protection of the ADA, it is necessary to determine if a requested modification, such as the treatment of an area within the place of public accommodation to control dust mites or mold spores, is "reasonable." This determination involves a fact-specific, case-by-case inquiry that considers, among other factors, the effectiveness of the modification in light of the

nature of the disability in question, and its effect on the

entity that would implement it.

Because of the case-by-case nature of these determinations, the ADA regulations do not require the treatment of areas in a place of public accommodation to control dust mites and mold spores.

I hope this information is helpful to you in responding to your constituent.

Sincerely,

Bill Lann Lee

Acting Assistant Attorney General

Civil Rights Division

June 24, 1998

The Honorable Phil Gramm

United States Senator

2323 Bryan Street, #2150

Dallas, Texas 75201

Dear Senator Gramm:

This letter is in response to your correspondence on behalf of your constituent Janelle Culberson who is the Manager of the Best Western Irish Inn in Shamrock, Texas. Ms. Culberson requested a copy of the Americans with Disabilities Act (ADA) and inquired whether it was required that they install a teletypewriter (TTY, also known as a telecommunication device for the deaf). We apologize for the delay in responding.

Disability Rights Section staff contacted Ms. Culberson and was informed that the Inn was constructed in 1977, well before the passage of the ADA. As an existing place of public accommodation, the Irish Inn, among other things, is obligated to remove communication barriers that are structural in nature, where such removal is readily achievable; to provide auxiliary aids and services where necessary to ensure effective communication; and to ensure generally that individuals are not denied, on the basis of disability, an equal opportunity to participate in or benefit from the goods, services, and facilities of the hotel. See generally 28 C.F.R. §§ 36.202, 36.303, 36.304.

Accordingly, if the hotel offers its customers the opportunity to make outgoing telephone calls on "more than an incidental convenience basis," such as providing in-room telephone service for its guests, the hotel must make TTYs

available on request in private guest rooms. A hotel also is required to have a TTY at the front desk on request so that guests with hearing or speech impairments can contact the front desk from their rooms. However, as an existing place of public accommodation, the hotel is not obliged to provide TTYs in common areas such as lobbies.

I have enclosed copies of the ADA, as well as the Department of Justice's implementing regulations (28 CFR, part 36) and Technical Assistance Manual that applies to hotels, the *ADA Guide for Small Businesses*, and a list of other technical assistance materials that may be helpful to your constituent. I have enclosed a second copy of these documents for your files.

I hope that this information is helpful to both you and your constituent. If Ms. Culberson has additional questions about the ADA, she may call our toll-free ADA Information Line at 800-514-0301. As you requested, we are returning your constituent's correspondence.

Bill Lann Lee

Assistant Attorney General

Civil Rights Division

Enclosures

July 6, 1998

Mr. Michael Auberger

ADAPT

Post Office Box 9598

Denver, Colorado 80209

Mr. Bob Kafka

ADAPT of Texas

1339 Lamar Square Drive

Suite 101

Austin, Texas 78704

Dear Mr. Auberger and Mr. Kafka:

Thank you for your letter seeking clarification of the Americans with Disabilities Act's (ADA) self-evaluation requirements as they relate to the "integration mandate" of title II.

The ADA requires every public entity to conduct a self-evaluation of its "current services, policies, and practices, and the effects thereof, that do not meet the requirements of [the title II regulations] . . . ." 28 C.F.R. 35.105(a). One of the fundamental requirements of the title II regulations is that public entities "administer services, programs, and activities in the most integrated setting appropriate to the needs of qualified individuals with disabilities." 28 C.F.R. 35.130(d).

This integration requirement applies to all State activities, including the provision of nursing home, institutional, and community-based services to people with disabilities. L.C. v. Olmstead, No. 97-8358 (11th Cir. April 8, 1998); Helen L. v. DiDario, 46 F.3d 325 (3d Cir. 1995). Therefore, a State must review, as part of its self-evaluation, its policies and practices regarding the provision of nursing home, institutional, and community-based services to ensure that individuals with disabilities receive services in the most integrated setting appropriate to their needs.

If a State has failed to address the ADA's integration requirement in its self-evaluation, then its self-evaluation is incomplete. In these circumstances it would be appropriate for State officials to address the integration issue. As provided in the Department's implementing regulation at 28 C.F.R. 35.105(b), interested persons, including individuals with disabilities or organizations representing individuals with disabilities, must be given an opportunity to participate in the self-evaluation process.

Sincerely, John L. Wodatch Chief Disability Rights Section >

July 14, 1998

Neil E. Hutcher, M.D.

Commonwealth Surgeons, Ltd.

5855 Bremo Road

Suite 506

Richmond, Virginia 23226

Dear Dr. Hutcher:

I am responding to your letter to Attorney General Reno about the coverage of obesity under the Americans with Disabilities Act of 1990 (ADA). Specifically, you have asked if the ADA prohibits employers from providing employee health insurance policies that do not provide for the medical treatment of obesity and related conditions. We apologize for the delay in responding.

The ADA does not identify specific diseases or conditions as disabilities. Instead, the ADA provides that an individual will be considered an individual with a disability for the purpose of ADA coverage if he or she has a physical or mental impairment that substantially limits one or more major life activities, has a record of such an impairment, or is regarded as having such an impairment. The Equal Employment Opportunity Commission (EEOC), the Federal agency responsible for implementing the employment requirements of the ADA, has determined that an individual who has been diagnosed as having "morbid" obesity may be considered an individual with a disability under the ADA.

The EEOC has also issued interim enforcement guidance on the application of the ADA to employer-provided health insurance. A copy of EEOC's policy statement is enclosed for your information. Because the EEOC has primary jurisdiction over this issue, any further questions on this topic should be addressed to the EEOC through its toll-free ADA technical assistance line (800/669-400 (voice) or 800/669-6820 (TDD).

I hope that this information is helpful to you.

John L. Wodatch

Chief

Disability Rights Section

Enclosure

July 24, 1998
The Honorable Roy Blunt
Member, U.S. House of Representatives
2740 East Sunshine
Springfield, Missouri 65804
Dear Congressman Blunt:

I am responding to your letter on behalf of your constituent, Mr. Jerry King, regarding the enforcement of title II of the Americans with Disabilities Act of 1990 (ADA). Please excuse our delay in responding.

Mr. King's letter indicates that as the local building official one of his duties is to enforce the accessibility requirements found in the city's building code. The city's building code is currently based on a model code published by the Building Officials and Code Administrators (BOCA). In his letter, Mr. King states that he had recently received a bulletin from the U.S. Architectural and Transportation Barriers Compliance Board (Access Board), and this bulletin stated that effective April 13, 1998, all State and local government facilities must comply with title II of the ADA. Mr. King, based on the bulletin, expressed his concern that because local building officials have the authority to enforce locally adopted building codes and lack the authority to enforce the ADA, that this may create an "enforcement dilemma."

Under the ADA, the Access Board is required to issue minimum guidelines to assist the Department of Justice in establishing accessibility standards. The Department is responsible for issuing final regulations, consistent with the guidelines issued by the Access Board, to implement title II. Recently, the Access Board published its new guidelines for title II, effective April 13, 1998. These new guidelines have not yet been adopted by the Department and are, therefore, not legally enforceable. However, the Department's existing title II regulations, in 29 C.F.R. Pt. 35, have been in effect since January 26, 1992.

Under title II of the ADA, State and local governments are prohibited from discriminating against persons with disabilities with regard to any programs, activities and services. Mr. King is correct that State or local governments lack the authority to enforce the ADA. The Department, along with other federal agencies, are responsible for enforcing the ADA. However, the fact that state or local governments lack the authority to enforce the ADA does not relieve them from their title II obligations to provide readily accessible programs, activities and services.

Lastly, in his letter, Mr. King inquired whether the accessibility provisions in BOCA are equivalent to the Department's ADA accessibility standards. Under title III of the ADA, the Department, upon request by a State or local government, may certify that a State or local building code meets or exceeds the minimum requirements of the ADA for new construction and alterations. To date, the Department has certified the building codes of the States of Washington, Texas, Maine and Florida. The Department, upon request by a model code entity, may also review a model code, such as the BOCA code, and issue guidance of whether the model code is consistent with the ADA accessibility standards. Although the Department has not completed its review of the BOCA code, it has reviewed the BCMC/ANSI provisions on which the BOCA code is based and the Department determined that those provisions were not equivalent to the ADA.

For your information I have enclosed a copy of an article entitled "Open Letter to Building Code Officials" which was published in the November/December 1995 issue of the Building Standards magazine. The article addresses not only the process of obtaining certification but also the many questions the Department has received regarding the role of State and local building officials in implementing the ADA. If Mr. King has

additional questions, the Department maintains a telephone information line to provide technical assistance regarding the rights and obligations of individuals, businesses, agencies, and others covered or protected by the ADA. This technical assistance is available by calling 800-514-0301 (Voice) or 800-514-0383 (TDD).

I hope this information is helpful to you in responding to your constituent.
Sincerely,
Bill Lann Lee

August 4, 1998

The Honorable Ted Strickland

Member, U.S. House of Representatives

Washington, D.C. 20515

Dear Congressman Strickland:

This letter is in response to your inquiry on behalf of your constituent, Mr. xxxxxxxxxxx. Mr. xxxxxxx has asked you to determine if the Kardex Systems "Lektriever," complies with the Americans with Disabilities Act of 1990 (ADA). Please excuse the delay in responding.

The ADA is a comprehensive civil rights law that prohibits discrimination on the basis of disability in employment, in transportation, in public services, and in the operation of places of public accommodation and commercial facilities. Among the ADA's requirements is a mandate for all public facilities, places of public accommodation, and commercial facilities to be designed, constructed, or altered in compliance with the ADA Standards for Accessible Design (ADA Standards), which were cited in Mr. xxxxxxx's letter to you.

The ADA Standards set the number and type of fixed building elements that must be accessible. The standards also establish the technical specifications that accessible elements must meet. The ADA does not apply to manufacturers of products such as the Lektriever. However, the ADA requires covered entities, in selecting products for use in new or altered accessible spaces to ensure that fixed equipment purchased complies with the ADA Standards.

In addition, the Department of Justice regulations implementing titles II and III of the ADA require covered entities to ensure that individuals with disabilities have an equal opportunity to participate in, or receive the benefits of, the programs and services that they offer. This provision requires covered entities to purchase and use accessible equipment when it is necessary to provide equal opportunity for individuals with disabilities.

Mr. xxxxxxx's letter to you indicates that the Lektriever system does not comply with the provisions of the ADA Standards that establish "reach range" or knee clearance requirements. Therefore, the ADA would not permit the use of the Lektriever in a space that is required to be accessible or in a situation where the use of accessible equipment is required as a reasonable accommodation for an employee with a disability. However, nothing in the ADA precludes the use of inaccessible equipment in spaces that are not required to be accessible.

I hope that this information is useful to you in addressing the concerns of your constituent.

Sincerely,

Bill Lann Lee

The Honorable Gil Gutknecht

Member, U.S. House of Representatives

1530 Greenview Drive, SW

Suite 108

Rochester, Minnesota 55902

Dear Congressman Gutknecht:

I am responding to your inquiry on behalf of your constituent, xxxxxxxxxxxxxx, who wrote to you concerning the accessibility requirements applicable to a high school stadium press box.

The Federal law that applies to this situation is the Americans with Disabilities Act of 1990 (ADA), which prohibits discrimination on the basis of disability by public entities, including public school systems. The Federal regulations implementing the ADA, which took effect on January 26, 1992, require all new construction to be readily accessible to, and usable by, people with disabilities. A public school system may meet this requirement by complying with either the ADA Standards for Accessible Design, 28 C.F.R. pt. 36, App. A, or the Uniform Federal Accessibility Standards, 41 C.F.R. pt. 101-19.6. In addition to this Federal requirement, most State building codes now contain accessibility requirements that are similar to those implemented by the ADA. Because Mr. xxxxxxxx letter specifically mentions a law that became effective in January 1996, we infer that the action affecting him was initiated under the State building code.

The ADA does not contain provisions that specifically address the construction of "press boxes." The ADA merely requires that all new construction by covered entities must comply with the applicable requirements of the regulations. In general, these requirements would include an accessible route to an accessible facility and an accessible entrance. In a multi-story facility, an accessible means of vertical access must be provided to connect all levels. Although an elevator is the most common means of providing vertical access, ramps and (in certain-limited circumstances) platform lifts may also be used. *See,* § 4.1.3.(5), Exception 4, of the enclosed ADA Standards. If the press box is not part of a multi-story facility, a ramp may be used to provide access to the entrance. The ADA does not provide for a waiver of these new construction requirements.

Mr. xxxxxx did not describe the press box in his letter to you, but, because he specifically complained that he is being required to install an elevator to provide access, we infer that his school has chosen to design a traditional press box that is located above the viewing stands with an entrance well-above ground level. This design choice is permitted by the ADA, but it is not compelled by it. Therefore, if Mr. xxxxxxxx school wants to comply with the ADA, but to avoid the cost of an elevator, the school should explore alternative press box designs.

Mr. xxxxxx should also note that the ADA does not preempt the authority of the State of Minnesota to impose more stringent requirements on construction through its building code process. The interpretation and application of the State's accessibility code is a matter that Mr. xxxxxx must resolve with State code officials.

For your information, we note that the ADA Standards are based on the ADA Accessibility Guidelines (ADAAG) developed by the United States Architectural and Transportation Barriers Compliance Board (Access Board). The Access Board is now engaged in a total review of these accessibility guidelines. The Access Board anticipates that the revised guidelines should be published as a proposed rule before the end of this year.

If Mr. xxxxxx wants to address this issue with the Access Board, he may write to:

Thurman M. Davis, Chair
U.S. Architectural and Transportation
Barriers Compliance Board
1331 F Street, N.W.
Washington, DC 20004-1111

Copies of the Department's regulations implementing title II and title III of the ADA are enclosed for your reference. The ADA Standards for Accessible Design are published as Appendix A to the title III regulation.

I hope that this information is helpful to you in responding to your constituent.

Bill Lann Lee
Acting Assistant Attorney General
Civil Rights Division

August 21, 1998

The Honorable Barbara B. Kennelly
Member, U.S. House of Representatives
One Corporate Center
Hartford, Connecticut 06103

Dear Congresswoman Kennelly:

This letter responds to your recent inquiry about the obligation of a manufacturer's service line to accept calls placed through a TDD (Telecommunication Device for the Deaf) relay system. Please excuse our delay in responding to you.

Your inquiry was prompted by one of your constituents, an individual with a hearing impairment, who attempted to contact a manufacturer's service line using the TDD relay, and was informed that the manufacturer does not accept relay calls. Your constituent received conflicting opinions regarding the manufacturer's legal right, under the Americans with Disabilities Act of 1990 (ADA), to reject her call.

The TDD relay system was established pursuant to title IV of the Americans with Disabilities Act of 1990 (ADA). Title IV amended the Communications Act of 1934 to require each common carrier that provides telephone voice transmission services to establish a TDD relay system to make telephone services accessible to people with hearing and speech impairments. The manufacturer's refusal to communicate with your constituent is, in our view, unjustified because accepting a relay call places no burden on the manufacturer. The manufacturer is simply required to talk to a relay operator, who then communicates with the individual with a hearing impairment using a TTY or TDD.

There is no question that if a business is covered under the ADA, it is required to accept telephone calls from individuals who have hearing impairments, by using either the relay service or a TDD. The difficult problem in this instance, however, is that a manufacturer is not clearly covered by the ADA. Title III, which prohibits discrimination by private businesses, reaches only those businesses that are "places of public accommodation."

The ADA provides a list of categories and examples in each category of what constitutes "public accommodations," such as, places serving food or drink, like restaurants; places of entertainment, like movie houses or theaters; and places of lodging, like hotels. "Service establishments" constitute one of the categories provided in the statute, but the category includes facilities like hospitals, lawyer's offices, and beauty shops. Manufacturers that are not engaged in selling directly to the public do not operate a "place of public accommodation."

Although the ADA does not cover manufacturers, there may be a state law prohibiting discrimination on the basis of disability, or dealing with consumer protection, that could assist your constituent. Your constituent might also want to contact the Connecticut Department of Consumer Protection, at 1-860-566-3290 or 1-800-842-2649; or a local Better Business Bureau. In the event the manufacturer is in a different state, your constituent could call the Federal Information Center for assistance in identifying the agency most likely to handle her issue, and their TTY/TDD number is 1-800-326-2996. Finally, a local group might assist your constituent by calling the manufacturer to discourage them from refusing to communicate with individuals who have hearing impairments by explaining just how simple it is to receive relay calls. A list of Connecticut organizations is enclosed.

I am sorry that we could not provide more assistance, and hope that this information is helpful to you in responding to your constituent.

Sincerely,

Bill Lann Lee
Acting Assistant
Attorney General
Civil Rights Division

August 26, 1998
The Honorable Michael Bilirakis
Member, U.S. House of Representatives
1100 Cleveland Street
Suite 1600
Clearwater, Florida 33755
Dear Congressman Bilirakis:
I am responding to your letter on behalf of your constituent, xxxxxxxxxxx, who asked you to initiate an investigation of the implementation of the Americans with Disabilities Act of 1990 (ADA) by the Disability Rights Section of the Civil Rights Division.

Mr. xxxxxx letter to you makes unfounded assertions about the Division's ADA implementation. Mr. xxxx is basing his request on a recent article in a publication called *The Mouth*, which alleged that the Disability Rights Section has completed only one ADA case since the statute was enacted. This assertion is simply wrong. It is premised on a failure to understand the role of the Department of Justice in ADA implementation, the nature of the Federal civil law enforcement process, and the allocation of ADA implementation responsibility within the Civil Rights Division.

The ADA prohibits discrimination on the basis of disability in employment, transportation, public services, and public accommodations. The Department of Justice bears the primary responsibility for the implementation of title II (public services) and title III (public accommodations) of the ADA. The Equal Employment Opportunity Commission (EEOC) has the primary responsibility for implementing the ADA's employment requirements and

the Department of Transportation (DOT) has primary responsibility for implementing the transportation-related requirements. However, the Department of Justice is responsible for litigation involving public employers or public transportation providers and all enforcement involving private transportation providers.

The Disability Rights Section is assigned to implement these requirements. The Section uses a multi-faceted approach to achieve compliance with the ADA. The Section investigates charges of discrimination and, when appropriate, initiates litigation. In addition, the Section intervenes as a party in some ongoing litigation and participates as *amicus curiae* in other district court cases. The Section also sponsors a pilot-project on ADA mediation. Under this program, the Section has awarded grants to train more than 350 professional mediators in 45 States and the District of Columbia to resolve ADA disputes without litigation.

In addition to these enforcement responsibilities, the Section reviews accessibility codes to determine if they are equivalent to the ADA. The Section operates an extensive ADA technical assistance program that includes a technical assistance grant program, the publication of technical assistance documents, and the operation of a toll-free ADA information line that receives over 160,000 calls each year. The Section also has responsibilities under section 504 of the Rehabilitation Act, the Small Business Regulatory Enforcement Fairness Act, and Executive Order 12,250. The Section's activities affect six million businesses and non-profit agencies, 80,000 units of state and local government, 54 million people with disabilities, and over 100 other Federal agencies and commissions in the Executive Branch. Additional information about all of these activities is provided on the Section's ADA Home Page on the Internet (http://www.usdoj.gov/crt/ada/adahom1.htm).

As of March 1998, the Disability Rights Section has a staff of 79 people, including 28 attorneys, assigned to handle these responsibilities. The Section's resources are supplemented, as appropriate, by other Civil Rights Division staff. The Appellate Section handles cases in the U.S. Courts of Appeals, and the Special Litigation Section litigates ADA matters that arise in the context of investigations under the Civil Rights of Institutionalized Persons Act.

With these limited resources, the Department has participated in 116 lawsuits as of May 1998. In 60 of these cases, the Department either initiated the litigation or intervened in an ongoing lawsuit. Fifty eight of these cases were handled by the Disability Rights Section; two were handled by the Special Litigation Section. The Department has also appeared as *amicus curiae*in 56 cases. The 20 *amicus* appearances in U.S. Courts of Appeals were handled by the Appellate Section with the assistance of the Disability Rights Section. Of the 36 *amicus*appearances in U.S. District Courts, 34 were handled by the Disability Rights Section, and two were handled by the Special Litigation Section. We have enclosed a copy of the Civil Rights Division's ADA case list for your reference.

The Division's extensive *amicus* participation enables us to fulfill one of our primary obligations in ADA litigation -- to influence the development of case law interpreting the ADA. The Department carries out this obligation in any lawsuit in which it participates. However, our experience has been that one of the most effective ways to target our limited resources is to participate as *amicus curiae* in cases where significant legal principles will be developed. As *amicus*, we are able to share our expertise on the legal issues with the court, without expending the significant resources required to initiate and litigate a case.

In addition to the cases that have been litigated since 1992, the Civil Rights Division has received over 10,000 ADA complaints that have been opened for investigation. As of July 1998, the Division has also received 469 referrals of employment discrimination charges from the EEOC, and three matters have been referred for possible litigation by other Federal agencies.

In resolving these complaints, the Disability Rights Section is guided by Executive Order 12,988, which requires Federal law enforcement agencies to seek pre-litigation resolutions of alleged violations. Therefore, the

Section diligently attempts to resolve cases through both formal and informal settlements before filing lawsuits. For instance, as of May 1998, the Section has offered 671 complainants the opportunity for mediation. However, even after a lawsuit is filed, the Section continues to seek pre-trial resolutions, such as consent decrees, which will bring about ADA compliance in the most cost-effective manner. As of May 1998, over 50 of these matters have been resolved through settlement agreements or consent decrees.

Despite the Division's accomplishments, we recognize that there are some people who we are not able to assist in a way that they find satisfactory. It appears that Mr. xxxx is one of those individuals. At the present time, the Disability Rights Section has two open investigations of complaints received from Mr. xxxx. One of the pending complaints was initially received in February 1996, but action was deferred while mediation was attempted. When mediation was unsuccessful, the Disability Rights Section initiated an investigation which is close to resolution. The second pending complaint, received in July 1996, is presently involved in mediation. The Disability Rights Section defers action on complaints that have been referred for mediation until the mediation process is completed. If mediation is successful, the complaint file is closed. If mediation is unsuccessful, the Section will review the file to determine if further action by the Department is appropriate.

The Disability Rights Section has corresponded directly with Mr. xxxx about his pending complaints. In addition to the pending complaints, the Section has received complaints from Mr. xxxx that have not been opened for investigation. This appears to be the source of much of his dissatisfaction. In his letter to you, Mr. xxxx criticized the Section for failing to provide appropriate "customer service." His comments indicate that he believes that the Department is required to investigate each complaint that it receives.

The role of the Department of Justice in ADA enforcement is often misunderstood by members of the public. Many people believe that the Department's role is to provide legal services for aggrieved individuals. Therefore, they expect that the Department will pursue each complaint until it is resolved to the satisfaction of the complainant. This perception is incorrect.

As a law enforcement agency, the Department's responsibility is to ensure the fair and effective implementation and enforcement of the law. When the Department initiates an investigation or a lawsuit, it acts on behalf of the United States, not on behalf of an individual complainant. The Department's goals in litigation are to address violations that raise issues of general public importance and to establish legal precedent that may be relied on by other litigants. Although individual complainants may form the basis for the Department's actions, the Department does not act as the attorney for the complainant.

The ADA specifically provides that each individual complainant has the right to initiate ADA enforcement litigation on his or her own behalf. Actions to enforce titles II and III may be filed at any time. Title I incorporates certain procedural requirements before a private lawsuit may be filed.

In summary, the Disability Rights Section works to promote compliance with the ADA in a cost-effective manner. The Section attempts to avoid costly litigation by resolving complaints amicably through informal or formal settlement agreements or through mediation. Nevertheless, the Section will not hesitate to file lawsuits when covered entities refuse to come into compliance voluntarily.

Since the ADA's inception, the Section has emphasized the need to educate the public about the law. By using resources to enlighten rather than simply litigate, the Department has encouraged voluntary compliance. However, when the Section is unable to gain voluntary compliance, the Department has used -- and remains committed to using -- all the enforcement tools that the law provides.

I hope that this information is helpful to you in responding to Mr. xxxx. As you requested, I am returning your constituent's correspondence.

Sincerely,
Bill Lann Lee

August 26, 1998
The Honorable Sander M. Levin
Member, U.S. House of Representatives
2107 E. 14 Mile Road, Suite 130
Sterling Heights, Michigan 48310
Dear Congressman Levin:
This is in response to your correspondence on behalf of your constituent, Mr. xxxxxxxxxxxx, who is preparing for reconstruction after a fire destroyed a portion of the interior of his restaurant. Please excuse the delay in our response.

Reconstruction after a fire is considered an "alteration." The requirements for alterations are found in the Department's title III regulation, 28 CFR Part 36, §§ 36.402-36.404, and Appendix A. Alteration is defined as "a change to a place of public accommodation or a commercial facility that affects or could affect the usability of the building or facility or any part thereof." (28 CFR § 36.402 (b)). The term alteration includes remodeling, renovation, rehabilitation, reconstruction, historic restoration, changes or rearrangement in structural parts or elements, and changes or rearrangement in the plan configuration of walls and full-height partitions. Normal maintenance, reroofing, painting or wallpapering, asbestos removal, or changes to mechanical and electrical systems are not alterations unless they affect the usability of the building or facility. (28 CFR § 36.402 (b)(1)).

Thus, if the damage caused by the fire is minor and can be corrected by cleaning, re-painting, or re-wallpapering, the ADA would not apply. If walls are being reconstructed or new toilet fixtures or other elements are provided, the ADA requirements would apply. Any alteration shall be made so as to ensure that, to the maximum extent feasible, the altered portions of the facility are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs. (28 CFR § 36.402 (a)(1)). Each element, space, or common area that is altered or added must comply with the applicable provisions of the ADA Standards for Accessible Design. (28 CFR § 36.402 (b)(2)). Further, if alterations of single elements, when considered together, amount to an alteration of a room or space in a building or facility, the entire space shall be made accessible. (28 CFR App. A, section 4.1.6 (1)(c)).

We are enclosing a copy of the regulation along with resource information about tax credits and deductions that may help businesses comply with the ADA.

We hope this information is useful to your constituent. If he has additional questions, he may call the ADA Information Line at 800-514-0301 (voice) or 800-514-0383 (TDD).

Sincerely,
Bill Lann Lee
Acting Assistant
Attorney General

The Honorable Joseph I. Lieberman
United States Senate
Washington, D.C. 20510
Dear Senator Lieberman:
This letter responds to your inquiry on behalf of your constituent, xxxxxxxxxxxxxxx, and his wife, who is an individual with a hearing impairment. Mr. xxxxxxxxxx and his wife support strengthening the Americans with

Disabilities Act (ADA) by requiring all businesses to have telecommunication devices for deaf persons, or TDD's, also known as TTY's, or text telephones. Please excuse the delay in responding.

Your constituent is correct in advising that the ADA does not necessarily require all businesses to have TDDs. First, not all businesses are covered by the ADA. Title III of the ADA, in relevant part, covers private businesses that are places of public accommodation. A business is a place of public accommodation if its operations affect commerce, and if it falls into one of twelve categories specified in the statute and regulation, examples of which are places of lodging, sales or rental establishments, service establishments, places serving food and drink, and places of entertainment.

Second, covered businesses are required to ensure effective communication with individuals who have hearing impairments, but they are not specifically required to use a TDD in receiving and making telephone calls. Title IV of the ADA establishes a relay service in every State that enables TDD callers who have hearing or speech impairments to call private businesses, and businesses to call individuals with hearing or speech impairments. Relay calls are facilitated through a relay operator, who uses a TDD to communicate with the TDD user, and, typically, uses her or his voice to communicate with the business entity. In this way, the relay operator conveys the TDD user's questions or responses to the business, and vice versa.

During notice and comment rulemaking for the Department of Justice's regulation implementing title III, the Department received some comments from individuals who were concerned that the relay service would not be sufficient for all types of communication. The Department felt that this concern was best addressed by the Federal Communications Commission, which was the agency responsible for rulemaking under title IV, which provides for the relay service. To obligate all businesses to have TDDs, therefore, is likely to require a change in the statute or its implementing regulations.

Under some circumstances, however, businesses are required to have TDDs. If a business customarily offers the use of telephone services to its customers on more than an incidental, or convenience basis, then it must provide use of TDDs. So, for example, a hospital or hotel that offers patients or patrons the opportunity to make outgoing calls would be required to provide a TDD on request. On the other hand, retail stores, doctors offices, or restaurants generally would not be required to have TDDs, because orders or appointments could be made using the relay service.

I hope that this information is helpful to you in responding to your constituent.
Sincerely,
Bill Lann Lee
Acting Assistant
Attorney General
Civil Rights Division

September 22, 1998
The Honorable Bob Graham

United States Senator
Post Office Box 3050
Tallahassee, Florida 32315
Dear Senator Graham:
This letter responds to your inquiry on behalf of your constituent, Mr. xxxxxxxxxxxxxxxxx, who asks whether the Americans with Disabilities Act of 1990 (ADA) addresses the accessibility of fishing piers. In particular, he inquires whether there are scoping requirements for railing heights and parking spaces. Mr. xxxxxxxxxx advises that Charlotte County, where he resides, has restored a fishing pier that provides both "handicap spaces" for fishing and a ramp for accessibility to individuals with disabilities.

The Architectural and Transportation Barriers and Compliance Board, which recommends accessibility guidelines and scoping requirements to the Department of Justice as part of its rulemaking authority under the ADA, is in the process of preparing requirements for recreational facilities and sites. This rulemaking includes fishing piers. The Department of Justice expects to issue its Notice of Proposed Rulemaking on recreation by the end of the calendar year.

With respect to your constituent's particular questions,

the ADA's accessibility standards provide general scoping requirements for accessible parking spaces. When your constituent asks about railing heights, we assume that he refers to guard rails that are often required for safety by local codes, and not hand rails that are addressed in the ADA's accessibility standards. Local codes often require guard rails to be approximately 44 inches high, a height that is likely to present an obstruction to a wheelchair user who is fishing. The question of whether and how the ADA requires such rails to be modified to prevent obstructing wheelchair users is likely to be addressed in the upcoming Notice of Proposed Rulemaking. The issue requires balancing the safety concerns represented by guard rails with the rights of individuals with disabilities to use the pier. We encourage your constituent to voice his concerns in writing during the notice and comment period of the rulemaking for recreational sites.

Even in circumstances where the ADA's accessibility standards do not provide scoping requirements for a particular element, the ADA still requires that covered entities take steps to ensure general accessibility. Private businesses that are public accommodations must provide access to their fishing piers by engaging in barrier removal that is "readily achievable" or easily accomplishable without great difficulty or expense. Further, if the businesses renovate a pier, they must ensure that the altered areasand path of travel to the altered areas are readily accessible to and usable by individuals with disabilities. Similarly, state or local governments that provide use of fishing piers as part of their recreational programs must ensure that individuals with disabilities are able to participate in such programs.

Thank you for your inquiry. We hope that this information is helpful to you in addressing the very timely concerns of your constituent.

Sincerely,
Bill Lann Lee
Acting Assistant
Attorney General
Civil Rights Division

xxxxxxxxxxxxxxxxxxxx
xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx
xxxxxxxxxxxxxxxxxx[xx]xxxxxx
xxxxxxxxxxxxxxxxxxx xxxxx-xxxx
Dear Ms. xxxx:

Senator Barbara Boxer has asked us to respond to your letter about private health care insurers and the costs associated with interpreter services required by the Americans with Disabilities Act (ADA). Please excuse our delay in responding.

On April 27, 1998, we replied to your similar inquiry made through Senator Dianne Feinstein's office (enclosure 1). We commented that the ADA does not expressly require a medical insurer to reimburse health care providers for all expenses incurred by an individual with a disability. We also provided information about congressional initiatives in the form of tax relief for public accommodations, including medical care providers, for providing patient interpreter services under the ADA. The ADA's title III regulation, furthermore, provides for flexibility in the methods that practitioners can use to effectively communicate with patients with disabilities who require auxiliary aids to obtain services.

The Department of Health and Human Services (HHS) also addressed the same issues in Mr. xxxxxxxxxxxxxxxxxxx March 31, 1998, letter to you. Like HHS, our Department has not targeted medical care service providers for failing to provide sign language interpreters. We likewise have been handling title III complaints presented to us on an individual basis.

We believe that the consideration of any other initiatives with respect to medical insurer reimbursable medical expenses is more appropriate for the Health Care Finance Administration (HCFA), which administers the Medicare/Medicaid programs and researches and monitors issues with respect to health care. Inquiries to HCFA may be addressed to:

Ms. Nancy-Ann Min DeParle

Administrator

Health Care Financing Administration

7500 Security Boulevard

Baltimore, Maryland 21244-1850

Telephone (410) 786-3000

I hope that you find this information useful and responsive to your concerns.

Sincerely,
John L. Wodatch
Chief
Disability Rights Section

September 8, 1998
The Honorable Charles S. Robb
United States Senator
The Ironfronts
Suite 310
1011 East Main Street
Richmond, Virginia 23219
Dear Senator Robb:

This letter is a response to your inquiry on behalf of your constituent, Ms. xxxxxxxxxxxxxxxxxxx, who is deaf. Ms. xxxxxx believes that movie theaters should be required to present movies with open captions. Ms. xxxxxx contacted Mr. Clyde W. Matthews, Jr., Managing Attorney for the Department of Rights of Virginians with Disabilities, who informed her that such an action is not mandated by the Americans with Disabilities Act (ADA) of 1990.

The issue of whether movies should be open-captioned was raised during the legislative debate on the ADA. Congress heard testimony from the motion pictures industry and from owners and operators of movie houses. Movie houses do not produce the movies they show. Instead, they have control of only completed films for the brief duration while they are playing. For that reason, it made little sense to place the obligation to caption films on movie houses. Thus, as Mr. Matthews explained to your constituent, movie houses are not required by the ADA to provide films with open captions, although they are encouraged to do so. Entities covered by the ADA that produce films are responsible for providing captioning or other means of making their films accessible to individuals with hearing impairments.

The motion picture industry has also suggested that providing open captioning might fundamentally alter the films they produce. Fortunately, emerging technologies and evolving ideas about captioning are likely to make such a suggestion obsolete and unnecessary. There are now several closed-captioning options for theaters or live performances in which the captions are made visible only to those who desire to see them.

Captions are either displayed on the back of the seat in front of the deaf patron, or in another location that does not require their placement directly on the film. These technologies are currently used by businesses and facilities open to the public. Here in Washington, for example, the Holocaust Museum and theImax Theater in the Air and Space Museum are using innovative applications of closed captioning, and the Arena Stage is using similar technologies for live performances. It is only a matter of time before these technological advances become widely available for use in movie houses.

As requested, we are replying in duplicate and returning the enclosure to your office.

Thank you for your inquiry. We hope that this information is useful to you in responding to the needs of your constituent.

777

September 16, 1998
The Honorable Dianne Feinstein
United States Senator
Washington, DC 20510-0504
Dear Senator Feinstein:
This letter responds to your most recent inquiry on behalf of your constituent, Ms. xxxxxxxxxxxxx. Ms. xxxxx requested your support in repealing or modifying the Americans with Disabilities Act (ADA) based on her concerns that certain historic facilities or noteworthy parts of those facilities were being closed to the public because of ADA requirements. Specifically, Ms. xxxxx was concerned that visitors were no longer able to view the second story of a house at the Duke Tobacco Homestead in North Carolina because the second story was not accessible to people with mobility impairments. Ms. xxxxx had been told by a docent that people with disabilities would be discriminated against if able bodied people were permitted to visit the second story of the house. Please excuse the delay in our response.

First of all, let me assure you that the ADA is a flexible law that does not require a private entity to close part or all of a historic house museum. The ADA provides a balance between the rights of people with disabilities and the importance of the preservation and use of historic facilities.

Historic museums such as the Duke Homestead are considered "public accommodations" under the ADA, and, therefore, have ongoing obligations under title III of the statute. Title III requires private entities, including private museums, to provide people with disabilities "full and equal enjoyment" of their programs and services and may require a private entity to modify its policies, practices or procedures; provide necessary auxiliary aids and services; and remove barriers to access in existing facilities when such removal is readily achievable. Please see the enclosed title III regulation at sections 36.201, and 36.301-36.305 (pages 471, and 474-477) for further discussion.

The ADA provisions for qualified historic facilities exist to achieve the goals of the ADA while protecting the significant characteristics of America's historic resources. These provisions may be used when an alteration to a qualified historic facility, including modifications done for barrier removal, would threaten or destroy its historic significance. Section 4.1.7 of the ADA Standards for Accessible Design (Standards), 28 C.F.R. part 36, Appendix A (page 504-505), specifically addresses alterations to historic buildings. Please see the enclosed Title III regulation for more information.

When it is not possible to remove certain barriers to accessibility because it is not readily achievable to do so or because the alteration would threaten or destroy the historic significance of the qualified historic facility, the ADA requires the use of alternative methods to provide access to the goods or services, if it is readily achievable to do so. For example, if the second floor of a historic house museum can only be reached by climbing stairs, it may be appropriate for a docent to show a set of photographs or a video that depicts the items, space and information shown on the second floor to a person who is unable to climb the stairs. The photographs or video would have to be shown in an accessible location. This would permit people with a

mobility disability to obtain information about the items and space on the upper level that others obtain who are able to climb the stairs.

A copy of the Title III Technical Assistance Manual is included to provide additional guidance on barrier removal requirements and the requirements for historic preservation (see pages 39 - 40 and 55 - 56).

I hope this information will assist you in responding to your constituent. As you requested, I am responding in duplicate.

Sincerely,

Bill Lann Lee
Acting Assistant
Attorney General
Civil Rights Division

October 5, 1998
The Honorable Jack Quinn
Member, U.S. House of Representatives
403 Main Street
Suite 240
Buffalo, New York 14203-2199
Dear Congressman Quinn:

I am responding to your letter on behalf of your constituent, Ms. xxxxxxxxxxxx, who wrote to you asserting that she was denied the opportunity to purchase health insurance because she has Graves' disease and a bipolar disorder.

You have asked us to determine if this decision violates Federal law. Please excuse our delay in responding.

The Department of Justice is responsible for enforcing the Americans with Disabilities Act of 1990 (ADA). Title III of the ADA prohibits discrimination on the basis of disability by places of public accommodation, including service establishments such as insurance companies. However, the ADA does not prohibit insurance companies from underwriting, classifying, or administering their benefit plans in accordance with State insurance laws, provided that such practices are not used as a subterfuge to evade the purposes of the ADA. Therefore, the ADA may allow insurance companies to charge more for insurance if the company's decision is based on legitimate actuarial data and principles, and not on speculation about the effects of a disability. An insurance company, however, may not refuse to serve a person with a disability because of limitations on coverage or higher rates in its insurance policies. Because each person's situation is unique, it is not possible for us to determine, based on the information provided by Ms. xxxxxx, whether the insurance company's decision on her application was made in compliance with the ADA.

The Department of Health and Human Services (HHS) is responsible for the implementation of other Federal laws that affect health care and insurance providers. Therefore, we have referred your letter to HHS for review and response with respect to the possible application of statutes subject to HHS jurisdiction. Questions with respect to HHS jurisdiction may be directed to:

title III of the ADA for your reference. I hope this information is helpful to you in responding to your constituent.

Sincerely,

Bill Lann Lee
Acting Assistant
Attorney General
Civil Rights Division
Enclosure

779

October 16, 1998
The Honorable Sam Farr
Member, U.S. House of Representatives
701 Ocean Street
Santa Cruz, California 95060
Dear Congressman Farr:

This is in response to your correspondence on behalf of your constituent, Ms. xxxxxxxxxxxxxxx, who is seeking information on the specific requirements for public buildings for compliance with the Americans with Disabilities Act (ADA).

We are enclosing a copy of the regulation for title III of the ADA, 28 CFR Part 36, which applies to "public accommodations" (businesses and non-profit agencies that serve the public) and "commercial facilities" (businesses such as manufacturing plants and wholesale operations that do not serve the public directly). Sections 36.304-310 of this document apply to public accommodations that existed before the ADA went into effect. Sections 36.401-406 apply to public accommodations and commercial facilities built or altered after the ADA went into effect. Appendix A contains the ADA Standards for Accessible Design that apply to new construction and alteration projects. These Standards also serve as guidelines for removing barriers, when removal is readily achievable, in facilities that existed before the ADA went into effect. §§ 36.304(a), (d), and (g).

We are also enclosing a copy of the regulation for title II of the ADA, 28 CFR Part 35, which applies to the programs, services, and activities of "public entities" (State and local governments). Section 35.151 applies to facilities built or altered after the ADA went into effect. Public entities may choose either the Standards for Accessible Design in 28 CFR Part 36, Appendix A, or the Uniform Federal Accessibility Standards in 41 CFR Part 101-19.6, Appendix A, for new construction and alteration projects. Sections 35.149-150 apply to facilities that existed before the ADA went into effect, and require "program accessibility" rather than "facility access." A public entity must operate each program, service, or activity so that the service, program, or activity, when viewed in its entirety, is readily accessible to and usable by individuals with disabilities, but a public entity is not necessarily required to make each of its existing facilities accessible. Program access can be achieved by

relocating services from inaccessible buildings to accessible ones, by assigning aides to program beneficiaries, or by delivering services to alternate accessible sites. When these methods are not effective in providing access to programs, a State or local government must undertake structural modifications to its existing buildings, unless an undue burden would result. §§ 35. 150 (a) and (b).

A Guide to Disability Rights Laws and an ADA Information Services list, two general resources that indicate which agencies provide information about the ADA and other disability rights laws, are also enclosed.

We hope this information is useful to your constituent. If she has additional questions, she may call the ADA Information Line at 800-514-0301 (voice) or 800-514-0383 (TDD).

Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,

Bill Lann Lee
Acting Assistant
Attorney General
Civil Rights Division

The Honorable Dianne Feinstein
United States Senate
Washington, D.C. 20510-0504
Dear Senator Feinstein:
This is in response to your inquiry on behalf of your constituent, xxxxxxxxxxxxxxxxxx. In his letter to you, Mr. xxxxxxxx raises issues concerning the applicability of the Americans with Disabilities Act (ADA) to athletic competitions.

Mr. xxxxxxxx is concerned by a federal court's decisions rendered earlier this year in the Casey Martin litigation. Please excuse our delay in responding.

For your convenience, I have enclosed a copy of the two opinions issued by the federal district court in that case. See Martin v. PGA Tour, Inc., 984 F.Supp 1320 (D.Or. Jan. 30, 1998), and Martin v. PGA Tour, Inc., 994 F.Supp. 1242 (D.Or. Feb. 19, 1998). You should also be aware that the case is currently under appeal to the Ninth Circuit Court of Appeals. Martin v. PGA Tour, Inc., No. 98-35309 (9th Cir. March 20, 1998).

Title III of the ADA provides that "public accommodations" may not discriminate against individuals with disabilities in the full and equal enjoyment of the goods, services, facilities, privileges, advantages or accommodations offered by that public accommodation. 42 U.S.C. § 12182(a). The law defines a "public accommodation" as a private entity that owns, operates or leases a place of public accommodation. 42 U.S.C. §§ 12181(7) and 12182(a). Congress established a list of 12 categories of private entities that should be considered public accommodations, including hotels, restaurants, theaters and schools. 42 U.S.C. § 12181(7). Golf courses are specifically listed in the statute as public accommodations. 42 U.S.C. § 12181(7)(L). Therefore, the federal district court ruled that the PGA Tour must comply with the provisions of title III because it is a private entity that owns and operates golf courses.

Title III requires a public accommodation to make reasonable modifications in its policies, practices or procedures if those modifications would not fundamentally alter the nature of the public accommodation's goods, services, facilities, privileges, advantages or accommodations. 42 U.S.C. § 12182(b)(2)(A)(ii). The PGA Tour had difficulty proving that its no-cart rule was fundamental to the game of golf because it allows carts in several of the competitions it sponsors. For example, the Senior PGA Tour, a highly competitive and multi-million dollar series of competitions, allows the use of carts, and the PGA Tour also allows golfers to use carts in the tournaments held to determine which golfers will qualify for the PGA Tour. Since the PGA Tour allows carts in some tournaments but does not allow carts in other tournaments, the federal district court ruled that its own rules and procedures demonstrate that the no-cart rule -- i.e., requiring competitors to walk -- is not "fundamental" to the golf competitions it sponsors.

There should be no concern that these rulings will undermine the integrity of sports competitions. The ADA's requirement of reasonable modifications was not meant to change the essential activities that comprise an athletic competition or to accommodate a lower skill level.

As requested, we are replying in duplicate. I hope this information is helpful to you in responding to your constituent. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,

Bill Lann Lee
Acting Assistant
Attorney General

The Honorable Dianne Feinstein
United States Senate
Washington, D.C. 20510-0504
Dear Senator Feinstein:

I am responding to your letter on behalf of your constituent, xxxxxxxxxxxxxxxxxxx (Reference xxxxx-xxxxx).

Mr. xxxxxxxxx wrote to you regarding an article by Walter Olson entitled "In the Land of the ADA, the One-Eyed Man Is King." The article appeared in The Wall Street Journal on June 22, 1998. Mr. xxxxxxxxx, based on the Olson article, stated in his letter that the Americans with Disabilities Act (ADA) should be repealed because it was being used to force businesses to hire unqualified personnel. To illustrate his opinion, Mr. xxxxxxxxx referred to a case described in the Olson article and concluded that the ADA was being used to force Aloha Airlines to hire a pilot with monocular vision. Please excuse our delay in responding.

The ADA requires employers to provide qualified persons with disabilities an equal opportunity to benefit from the full range of employment-related opportunities available to others. For instance, the ADA prohibits discrimination in recruitment, hiring, promotions, training, pay, and other privileges of employment. The ADA restricts questions that can be asked about an applicant's disability before a job offer is made, and it requires that employers make reasonable accommodation to the known physical or mental limitations of otherwise qualified persons with disabilities, unless it results in undue hardship. The ADA does not require employers to hire unqualified personnel.

Mr. xxxxxxxxx also stated in his letter that the ADA was being used to force Aloha Airlines to hire a pilot with monocular vision. Although the Aloha Airlines case was mentioned in the Olson article, this lawsuit was brought under the Hawaii state disability rights law and not under the ADA. The Olson article, however, does contain discussions of several ADA cases where individuals with monocular vision successfully challenged their employers' vision standards. For instance, the Olson article referred to a case in which a police officer with monocular vision obtained a judgment against the City of Omaha, as well as a Department of Justice settlement with the City of Pontiac of a case brought by a firefighter with monocular vision. The plaintiffs in both cases had a history of successfully performing their jobs with monocular vision. Officer Doane, the plaintiff in the case against the City of Omaha, performed all the functions of his job successfully and competently for nine years with monocular vision before the police department instituted its blanket policy of refusing to employ police officers with monocular vision. Mr. Henderson, the firefighter in the case against the City of Pontiac, had worked successfully and safely as a firefighter with monocular vision for fourteen years in a neighboring county. In both of these cases, the employers had a blanket policy of excluding from employment all persons with monocular vision regardless of the persons' ability to perform the job safely and effectively.

The ADA generally prohibits physical or mental qualification standards which exclude an entire group of people with a certain disability. The ADA, however, allows an employer to exclude an individual with a disability from a job if it can demonstrate that he or she would pose a "direct threat," that is, a significant risk of substantial harm that cannot be eliminated or reduced through reasonable accommodation. Any determination of a direct threat must be based on an individualized assessment of objective and specific evidence about a particular individual's current ability to perform the essential job functions, and not on general assumptions or speculations about a disability. Therefore, excluding an individual with monocular vision from a job even when he or she has demonstrated an ability to perform it safely and competently is precisely the kind of unwarranted discrimination that the ADA was intended to abolish.

As you requested, I am responding to your correspondence in duplicate. I hope this information is helpful to you in responding to your constituent. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,
Bill Lann Lee
Acting Assistant
Attorney General

November 10, 1998
The Honorable Max Sandlin
Member, U.S. House of Representatives
Sulphur Springs District Office
P.O. Box 538
Sulphur Springs, Texas 75483
Dear Congressman Sandlin:

I am responding to your inquiry on behalf of your constituent, xxxx xxxxxxx xxxxxx, concerning businesses that display the International Symbol of Accessibility or handicapped signs but do not have accessible facilities. Her letter arose from a recent incident where she and other members of her family stopped at a gas station that displayed the International Symbol of Accessibility on the side of its building, and were told by a clerk that the facility did not have any restrooms for the public or for people with disabilities.

Title III of the Americans with Disabilities Act (ADA) prohibits discrimination on the basis of disability by places of public accommodation, such as gas stations. Title III does not, however, require any place of public accommodation to fundamentally alter the nature of its business to provide different services, even if those services might better meet the needs of people with disabilities. If a gas station does not provide any restroom

facilities for customers, then the gas station does not have to alter the nature of its business by providing restrooms facilities for customers with disabilities. If the gas station clerk's statement was accurate, then the station was not required to provide accessible restroom facilities because it chose not to provide toilet facilities to any of its customers.

In a situation where a gas station does provide restroom facilities for customers, the ADA imposes different requirements depending on whether the restroom has been recently constructed or altered, or whether it is an existing facility. The Americans with Disabilities Act Standards for Accessible Design establish strict architectural accessibility requirements for new construction and alterations, including specifications for accessible toilet rooms. With few exceptions, the new construction requirements apply to facilities, including gas stations, first occupied after January 26, 1993. The requirements also apply to alterations (i.e., any change that affects usability such as remodeling, renovation, rearrangements in structural parts, and changes or rearrangements of walls and full height partitions) begun after January 26, 1992. New construction and alterations must be readily accessible to and usable by individuals with disabilities in accordance with the Standards. Please see the enclosed title III technical assistance manual, at pages 45-56, for more information on the accessibility requirements for new construction and alterations. See page 62 for specific information on the requirements for accessible bathrooms in newly constructed or altered facilities.

If a gas station has neither been constructed nor altered since the effective dates explained above, then accessibility requirements are less stringent. The ADA requires existing gas stations that are not otherwise being altered to remove architectural barriers to the extent that it is readily achievable to remove them. Readily achievable means easily accomplishable and able to be carried out without much difficulty or expense. Determining if barrier removal is readily achievable is necessarily a case-by-case judgment that involves the analysis of many different factors and circumstances. The Department's title III regulation contains a list of 21 examples of modifications that may be readily achievable, including: widening doors, installing offset hinges to widen doorways, rearranging toilet partitions to increase maneuvering space, and installing a raised toilet seat. The list is intended to be illustrative. Each of these modifications will be readily achievable in many instances, but not in all. Please see the title III technical assistance manual, at pages 31-38, for more information on barrier removal in existing facilities.

The Department's title III regulation recommends priorities for removing barriers in existing facilities. Because the resources available for barrier removal may not be adequate to remove all existing barriers at any given time, the regulation suggests a way to determine which barriers should be mitigated or eliminated first. A public accommodation's first priority should be to enable individuals with disabilities to physically enter its facility. Based on xxxx xxxxxxxx letter, it appears that the gas station at issue had accomplished this first priority by installing a ramp at the facility entrance. The second priority is for measures that provide access to those areas of a place of public accommodation where goods and services are made available to the public. Again, based on xxxx xxxxxxxx letter, the gas station may have accomplished this priority as well. Xxx xxxxxx, a person with an unspecified disability, was able to utilize the gas pumps. It is unclear whether xxxx xxxxxxxx daughter, who uses a wheelchair, was able to maneuver in the gas station store area. More facts are needed before a determination could be made whether the regulation's second priority for barrier removal was met.

The third priority for barrier removal should be providing access to restrooms, if restrooms are provided for use by customers or clients. If the gas station clerk's statement that they don't have any restrooms for the public means that the station does not provide restroom facilities to customers, then the gas station does not have any obligation under the ADA to provide restroom facilities to individuals with disabilities. However, if the gas station does provide restroom facilities to customers and those facilities are inaccessible to individuals with disabilities, then the gas station may be in violation of the ADA if it is readily achievable to make the restrooms accessible. As explained above, we cannot make this determination without more facts.

I can understand xxxx xxxxxxxx frustration that the gas station displayed the International Symbol of Accessibility, but did not have an accessible restroom. However, the Department's title III regulation requires the use of the symbol in some situations where a facility is not fully accessible. For example, the symbol must be displayed at a facility's accessible entrance when not all of its entrances are accessible. This requirement is irrespective of whether or not the public accommodation has accessible toilet facilities. Please see Section 4.1.2(7), at pages 497-498 of the enclosed title III regulation, and Section 4.30.7, at pages 544-545 of the regulation, for more information on signage requirements.

I hope this information is helpful to you in responding to your constituent. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,

Bill Lann Lee
Acting Assistant
Attorney General

December 3, 1998
The Honorable William D. Delahunt
Member, U.S. House of Representatives
15 Cottage Avenue
Quincy, Massachusetts 02169
Dear Congressman Delahunt:
I am responding to your inquiry on behalf of your constituent, xxxxxxxx xxxx. Ms. xxxx asked you to determine if the Americans with Disabilities Act of 1991 (ADA) may be interpreted to require places of public accommodation, such as shopping malls, to provide wheelchairs or other motorized vehicles for the use of their customers. Please excuse our delay in responding.

Title III of the ADA prohibits discrimination on the basis of disability in the operation of places of public accommodation such as retail stores. This requirement is implemented through regulations published by the Department of Justice in title 28 of the Code of Federal Regulations. Copies of this regulation and the Title III Technical Assistance Manual are enclosed.

The title III regulation generally requires public accommodations to make reasonable modifications in their policies or practices when the modifications are necessary to enable people with disabilities to benefit from the goods, services, or facilities offered. Public accommodations are also required to remove architectural, communication, and transportation barriers to access if it is readily achievable to do so. However, the regulation specifically provides that a public accommodation is not required to provide its customers or clients with personal devices, such as wheelchairs.

I hope that this information is helpful to you in responding to Ms. Levy. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,

Bill Lann Lee

December 14, 1998
xxxxxxxxxxxxxxxx
xxxxxxxxxxxxxx
xxxxxxxxxx, xxxxxxx xxxxx
Dear Mr. xxxxxxxx:

Senator McCain requested that I respond to your recent e-mail message, in which you suggested that accessible hotel rooms should be available on ground floors only. You expressed concern that individuals with

disabilities housed in accessible rooms on higher floors may not be able to safely exit buildings during emergencies. Please excuse our delay in responding.

The Americans with Disabilities Act of 1990 (ADA) authorizes the Department of Justice to provide technical assistance to individuals and entities that have rights or obligations under the Act. This response to your inquiry is intended to assist you in understanding the ADA's requirements. However, this technical assistance does not constitute a determination by the Department of Justice of specific rights or responsibilities under the ADA, and it is not a binding determination by the Department.

Title III of the ADA prohibits discrimination on the basis of disability by places of public accommodation, including hotels and motels. The Department of Justice is required by the ADA to issue a regulation to implement the statute. The Department's title III regulation is published at 28 C.F.R. part 36. This regulation and the Department's Title III Technical Assistance Manual are enclosed for your information.

In order to ensure that people with disabilities have a range of options equivalent to those available to other hotel guests, the title III regulation requires accessible hotel rooms to be dispersed among the various classes of rooms available at the hotel. Factors to be considered in dispersing rooms include room size, price, available amenities, and number of beds. Although there is no prohibition on locating accessible rooms on the first floor (if the available rooms offer a range of options), hotels usually find that some accessible rooms must be provided on more than one level of the facility in order to provide an equivalent choice of views or other amenities. To ensure the safety of individuals with disabilities in accessible spaces that are above the ground floor, the ADA regulation requires all new facilities, including hotels, to provide areas of rescue assistance on any level that does not provide an accessible egress route for emergency evacuation.

The Department believes that the dispersal requirements are essential to ensure that the services and facilities of a hotel are provided to individuals with disabilities in the most integrated setting appropriate to their needs. As stated in the preamble to the title III regulation, the "ADA recognizes that the provision of goods and services in an integrated manner is a fundamental tenet of nondiscrimination on the basis of disability." Please see the enclosed title III regulation, at page 472 and 595-597, for further information on the ADA's requirements for integrated settings.

As Appendix B to the title III regulation makes clear, the exclusion and segregation of individuals with disabilities and the denial of equal opportunities enjoyed by others, based on, among other things, presumptions, patronizing attitudes, fears, and stereotypes about individuals with disabilities is prohibited. If a hotel restricted accessible rooms to the ground floor because of fears or presumptions about the ability of individuals with disabilities to exit the hotel during emergencies, it would violate both the letter and spirit of the ADA. Individuals who seek accessible hotel rooms have a wide range of abilities and disabilities, as well as tastes in hotel rooms. The dispersal of accessible hotel rooms provides individuals with disabilities the greatest opportunity to select the rooms that best meet their needs and desires.

The U.S. Architectural and Transportation Barriers Compliance Board (Access Board) is currently reviewing the Americans with Disabilities Act Accessibility Guidelines, on which the requirements in the Department's rule are based. The Access Board intends to issue proposed revisions to the accessibility guidelines early next year. You may want to share your concerns about the safety of accessible hotel rooms with the Access Board during the notice and comment period for the proposed revisions.

I hope this information is helpful to you.

Sincerely, John L. Wodatch Chief Disability Rights Section Civil Rights Division

December 14, 1998
The Honorable Olympia J. Snowe

United States Senator
Two Great Falls Plaza
Suite 7B
Auburn, Maine 04210
Dear Senator Snowe:

I am responding to your letter on behalf of your constituent, xxxxxxxxxxxxx. Ms. xxxxx wrote to you indicating that the Town of Minot is in the process of building an addition to the Town Office. Ms. xxxxx described the Town Office as a one story building with a full basement and inquired whether the Americans with Disabilities Act (ADA) requires the installation of an elevator. Please excuse our delay in responding.

Under title II of the ADA, State and local governments (i.e., public entities) are prohibited from discriminating against persons with disabilities with regard to any programs, activities and services. Title II also requires that each facility or part of a facility that is constructed or altered must be designed and constructed so that it is readily accessible to and usable by individuals with disabilities. Title II permits public entities to choose either of two design standards - the Uniform Federal Accessibility Standards (UFAS) or the ADA Accessibility Guidelines for Buildings and Facilities, as adopted by the Department of Justice as the Standards for Accessible Design (Standards). Since the State of Maine has adopted an accessibility code that is based on the ADA Standards, our response will address the requirements of the ADA Standards rather than the requirements of the UFAS.

In new construction and in alterations where vertical access is required, section 4.1.3(5) of the ADA Standards requires a public entity to provide a passenger elevator that will serve each level, including mezzanines, in all multistory[(1)] buildings and facilities. Under the ADA, an addition is regarded as an alteration. Therefore, the Town of Minot must ensure that the newly added part of the building is, to the maximum extent feasible, readily accessible to and usable by people with disabilities. The question of whether title II requires the installation of an elevator depends on what type of addition is being made to the Town Office. For example, if a new story is being added to the Town Office or if the addition is a two story facility, then title II's readily accessible standard would require some form of vertical access (e.g., an elevator, a lift or a ramp) to the new story or basement. However, if space is being added to an existing floor level without affecting the circulation path between the basement and the ground floor, then it is unlikely that title II would require an elevator so long as the added space is, to the maximum extent feasible, readily accessible to and usable by people with disabilities.

Ms. xxxxx should note that this letter addresses only the requirements of Federal law. Some States have adopted accessibility requirements through State statutes or building codes that are more stringent than the Federal regulation. The ADA expressly permits local authorities to enforce State or local laws that provide accessibility that equals or exceeds the Federal rules. Therefore, the State of Maine may require the Town of Minot to comply with provisions that impose obligations in addition to those identified in this letter.

I have enclosed copies of the regulation implementing title II and the ADA Standards for your reference. Also, if Ms. xxxxx has additional questions, the Department maintains a telephone information line to provide technical assistance regarding the rights and obligations of individuals, businesses, agencies, and others covered or protected by the ADA. This technical assistance is available by calling 800-514-0301 (Voice) or 800-514-0383 (TDD).

I hope that this information is helpful to you in responding to Ms. xxxxx. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,

Bill Lann Lee
Acting Assistant
Attorney General
Civil Rights Division
Enclosures

1. Section 3.5 of the ADA Standards defines "story" as that "portion of a building included between the upper surface of a floor and upper surface of the floor or roof next above. If such portion of a building does not include occupiable space, it is not considered a story for purposes of these guidelines...." Section 3.5 defines "occupiable" as a "room or enclosed space designed for human occupancy in which individuals congregate for amusement, educational or similar purposes, or in which occupants are engaged at labor, and which is equipped with means of egress, light, and ventilation."

786

January 15, 1999
The Honorable Charles T. Canady
Member, U.S. House of Representatives
Federal Building
124 South Tennessee Avenue, Suite 125
Lakeland, Florida 33801
Dear Congressman Canady:

This is in response to your letter requesting information about the Americans with Disabilities Act (ADA) on behalf of your constituent, Mr. xxxxxxxxxxx of Dade City, Florida. Please excuse our delay in responding.

You have asked whether a convenience store and a restaurant may be exempted from requirements of the Americans with Disabilities Act (ADA) because the facilities were built before the ADA was passed. Your constituent, Mr. xxxx, had been told by the owners of the facilities that they were "grandfathered in" and exempt from ADA requirements.

In response to your question, title III of the ADA addresses accessibility requirements for public accommodations. Convenience stores and restaurants are considered places of public accommodation, as defined by the ADA's twelve categories of places of public accommodation. No places of public accommodation are exempted from title III requirements, regardless of their age. Older buildings, that are places of public accommodations, are not "grandfathered" under the ADA.

Some facility owners may not understand that ADA requirements may be different from requirements of a local building code. Although the facility may be "grandfathered" according to the local building code, the ADA does not have a provision to "grandfather" a facility.

While a local building authority may not require any modifications to bring a building "up to code" until a renovation or major alteration is done, the ADA requires that a place of public accommodation remove barriers that are readily achievable even when no alterations or renovations are planned.

Readily achievable means that barrier removal is easily accomplishable and can be done without much difficulty or expense. Any physical modifications that would be truly "physically impossible" would not be readily achievable, and would not be required under the ADA. For your information, I have enclosed the ADA Guide for Small Businesses and an ADA-TA publication for further discussion of these issues.

I have also enclosed information about the Department's ADA Mediation Program which has been established to help resolve complaints locally. This information provides guidance on how the program may be used.

I hope this information is useful to you. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,
Bill Lann Lee
Acting Assistant
Attorney General
Civil Rights Division

787

January 15, 1999
The Honorable Rubén Hinojosa
U.S. House of Representatives
Washington, D.C. 20515
Dear Congressman Hinojosa:

I am responding to your inquiry on behalf of your constituent, Mr. xxxxxxxxxxxxxxxxx, concerning the application of the Americans with Disabilities Act of 1990 (ADA) to the operating policies of golf courses. Specifically, Mr. xxxxxx complained that his golf course did not permit golfers who have disabilities to bring golf carts onto the course, and he asked if the ADA would apply to the golf course. Please excuse our delay in responding.

The ADA prohibits discrimination on the basis of disability in the all of the services, programs, and activities of public entities and in the operation of privately owned places of public accommodation, such as golf courses. Covered entities are required to make reasonable modifications in their policies, practices, and procedures in order to ensure that an individual with a disability has an equal opportunity to participate in the program or activity that the covered entity provides. However, a covered entity is not required to provide modifications that result in a fundamental alteration of the program that is offered.

A golf course may be covered under either title II or title III depending on whether it is publicly or privately owned and operated. However, in order to trigger the protection of the ADA in challenging a golf course policy, certain criteria must be met. The first criterion is that the affected golfer must be an "individual with a disability" as that term is defined by the ADA. This means that a person must have a physical or mental impairment that substantially limits one or more of his or her major life activities.

If a golfer's impairment substantially limits a major life activity, he or she is entitled to the protection of the ADA. A impairment that does not substantially limit a major life activity does not trigger ADA protection. Thus, the determination as to whether a particular golfer is entitled to seek a modification of a golf course rule requires a case-by-case analysis.

After it has been determined that the golfer is an individual with a disability, it is necessary to determine if a requested modification, such as the use of a golf cart in areas other than a designated path, is "reasonable" and whether the modification would fundamentally alter the golf course. These determinations also involve fact-specific, case-by-case inquiries that consider, among other factors, the effectiveness of the modification in light of the nature of the disability in question, the modification's effect on the organization that must implement it or on the golf course.

The ADA requires that golf course operators be prepared to modify or waive general rules in circumstances where the waiver is necessary to permit an individual with a disability to participate in its program and the waiver would not fundamentally alter the program that is provided. In most circumstances, requiring a golf course to allow golfers with disabilities to take golf carts off the designated path would be reasonable and, depending on the type of golf cart being used, would not usually result in a fundamental alteration.

I hope this information is helpful to you in responding to your constituent. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,
Bill Lann Lee
Acting Assistant
Attorney General
Civil Rights Division
788

March 12, 1999
The Honorable Kay Bailey Hutchison
United States Senator
961 Federal Building
300 East Eighth Street
Austin, Texas 78701
Dear Senator Hutchison:

I am responding to your inquiry on behalf of your constituent, Ms. xxxxxxxxxxxx, who wrote about the difficulties experienced by individuals with disabilities when doors are not accessible at public places.

Automatic doors are not currently required under the Americans with Disabilities Act (ADA) Standards of Accessible Design adopted by the Department of Justice. The high costs of installing automatic doors and the engineering challenges involved in achieving appropriate door closure force while providing access has resulted in the problem faced by your constituent.

However, whether to require automatic doors on at least some kinds of doors on at least some kinds of buildings is currently being considered by the Architectural and Transportation Barriers Compliance Board (Access Board). The Access Board establishes the ADA Accessibility Guidelines, which are then adopted as the minimum standard for accessibility by the Department, which may increase the requirements for accessibility and then promulgates its own regulation containing the ADA Standards.

Both the Access Board and the Department of Justice will be revising the accessible design requirements contained in the ADA Guidelines and Standards over the next two years. Your constituent is welcome to submit her comments on this difficult issue. Each agency will seek public comment through a "Notice of Proposed Rulemaking" published in the Federal Register. For information on when that may occur, Ms. xxxxxx may contact the Civil Rights Division later in the year by calling our ADA

Information Line, 1-800-514-0301 (voice) or 1-800-514-0383 (TDD). The Board can be reached at the following address and phone number:

Lawrence Roffee
Executive Director
Architectural and Transportation
Barriers Compliance Board
1331 F Street, N.W.
Washington, D.C. 20004-1111
Telephone: 202-272-5434

I hope this information will assist you in responding to your constituent. Please do not hesitate to contact the Department if we can be of assistance in other matters. As requested, we are returning your constituent's correspondence.

Sincerely,

Bill Lann Lee
Acting Assistant
Attorney General
Civil Rights Division
Enclosure

789

March 24, 1999
The Honorable Joe Scarborough
U.S. House of Representatives
Washington, D.C. 20515
Dear Congressman Scarborough:
I am responding to your letter on behalf of State Representative Jerry Melvin regarding the application of the new construction requirements of the Americans with Disabilities Act of 1990 (ADA) to the construction of fire stations. Mr. Melvin questions the conclusion of the State of Florida that the ADA (and the Florida Accessibility Code for Building Construction) require the installation of an elevator to provide access to the second floor of a fire station.

Title II of the ADA prohibits discrimination on the basis of disability in all of the programs, services, and activities of a public entity. Both title I and title II of the ADA prohibit discrimination on the basis of disability in employment. One aspect of this nondiscrimination mandate is the obligation to ensure that all new public buildings and facilities are readily accessible to and usable by individuals with disabilities. The federal regulation implementing title II (28 C.F.R. pt.35) permits covered entities to meet this obligation by complying with either of two design standards -- the Uniform Federal Accessibility Standards (UFAS) or the ADA Standards for Accessible Design.

Both UFAS and the ADA Standards require covered entities to provide an accessible means of vertical access (such as a ramp, a lift, or an elevator) to connect all floor levels in multi-story buildings. Mr. Melvin objects to this requirement because he believes that individuals with disabilities who require the use of an elevator are not eligible to be fire fighters.

Mr. Melvin's analysis appears to be based on the assumption that if the principal users of a facility will be able-bodied individuals, the facility may be designed exclusively to serve them. This analysis conflicts with the primary purpose of the new construction requirements of the ADA, which is to ensure that people with disabilities are not excluded from opportunities that would otherwise be available to them, because buildings are not accessible.

Even if a fire department could establish that the employment requirements of titles I and II of the ADA support exclusion of people who have mobility impairments from employment as fire fighters, that fact does not support the conclusion that no person with a disability will need access to the second floor of the fire station. For example, other employees, such as those responsible for cleaning, maintenance, and clerical tasks, may need access to some or all of the areas in question. Supervisory personnel and city officials may also need

access to such areas. It is not likely that persons with physical disabilities may be lawfully excluded from those types of positions or denied access to the second floor of a public building. In addition, because the useful life of a building may span many decades during which the uses of the facility can change. Although the current users of a facility may be fire fighters and other fire department employees, a public entity may later decide to open the facility for school tours, neighborhood association meetings, or other public activities that are required to be accessible.

The U.S. Architectural and Transportation Barriers Compliance Board (Access Board), the Federal agency that is responsible for developing the accessibility guidelines on which the UFAS and the ADA Standards are based, is now in the process of reviewing and revising its guidelines. A Notice of Proposed Rulemaking will be published in the Federal Register this year to solicit public comments on these rules. Mr. Melvin may wish to share his views on the elevator requirements of the standards with the Access Board during this rulemaking. Information about the rulemaking schedule may be obtained from the Access Board's Internet site at "www.access-board.gov" or from its toll-free technical assistance information line at 800-872-2253 (voice) or 800-993-2822 (TDD).

I hope this information is helpful to you. Please do not hesitate to contact the Department if we may be of assistance with other matters.

Sincerely,
Bill Lann Lee
Acting Assistant
Attorney General
Civil Rights Division

April 8, 1999
The Honorable Phil Gramm
United States Senator
2323 Bryan Street, #2150
Dallas, Texas 75201
Dear Senator Gramm:
I am responding to your letter on behalf of your constituent, Dr. xxxxxxxxxxxxxxxx. Dr. xxxxxxx wrote to you inquiring if financial assistance is available to assist him to alter a dental clinic building to make it accessible to individuals with disabilities.

Under title III of the Americans with Disabilities Act (ADA), any alteration to a place of public accommodation, such as a dental office, must ensure that, to the maximum extent feasible, the altered portions of the facility are accessible to persons with disabilities. An alteration is any change that affects or could affect the usability of the facility. Normal maintenance, reroofing, painting or wallpapering, asbestos removal, or changes to mechanical and electrical systems are not alterations unless they affect the usability of the building or facility.

With regard to Dr. xxxxxxxxx question of financial assistance, there are no Federal funds specifically available for the purpose of complying with the ADA. However, the Department of Housing and Urban Development awards Community Development Block Grants (CDBG) to communities in need of funds for various reasons, one of which is to provide accessibility for individuals with disabilities. Dr. xxxxxxx should be advised that each community establishes its own priorities for the use of CDBG funds. Therefore, it is important that Dr. xxxxxxx work with his community to assure that some of the funds are used to provide accessability to individuals with disabilities. If Dr. xxxxxxx would like to apply for a CDBG, he may send a request to: Andrew Cuomo, Assistant Secretary, Office of Community Planning and Development, Department of Housing and Urban Development, 451 7th Street, S.W., Room 7100, Washington, D.C. 20410.

In addition, the Internal Revenue Code permits eligible small businesses to receive a tax credit for certain costs of compliance with the ADA. An eligible small business is one whose gross receipts do not exceed $1,000,000

or whose work force does not consist of more than 30 full-time workers. Qualifying businesses may claim a credit of up to 50 percent of eligible access expenditures that exceed $250 but do not exceed $10,250. Information about the tax credit and the tax deduction is enclosed.

As you requested, we are returning your constituent's correspondence. I hope this information is helpful to you in responding to your constituent. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,
Bill Lann Lee
Acting Assistant
Attorney General
Civil Rights Division

June 2, 1999
The Honorable Max Cleland
United States Senator
75 Spring Street, S.W.
Suite 1700
Atlanta, Georgia 30303
Dear Senator Cleland:

This is in response to your inquiry on behalf of your constituent, xxx xxxxxxx xxxxxxxx. Please excuse our delay in responding. xxx xxxxxxxx expressed two concerns in his letter to you: (1) that the Department's lawsuit against American Multi-Cinema, Inc. and AMC Entertainment, Inc. (collectively, "AMC") is frivolous, and (2) that Bill Lann Lee's service as Acting Assistant Attorney General for the Civil Rights Division is not legal.

The Americans with Disabilities Act ("ADA") prohibits discrimination against individuals with disabilities in the full and equal enjoyment of the goods, services, facilities, privileges, advantages, or accommodations of any place of public accommodation, such as a movie theater. Discrimination includes giving persons with disabilities a good, service, facility, privilege, advantage, or accommodation that is not equal to that given to other individuals. The ADA also requires movie theaters designed and constructed after January 26, 1993, to be readily accessible to and usable by individuals with disabilities. To meet these requirements, a movie theater must provide wheelchair seating with lines of sight comparable to those for other members of the general public.

In 1997 and 1998, the Department conducted on-site investigations of six of AMC's theaters with stadium-style seating, including one theater located in Florida. AMC advised the Department that these theaters were

representative of the theaters that it was building and operating nationwide. The Department's investigation revealed that, in mose of its auditorium's with stadium-style seating, AMC denies persons who use wheelchairs access to the stadium-style section of the theater and instead relegated them to much less desirable seating areas that are in the front rows of the theater and very close to the screen. The Department found that AMC's theaters violated the ADA because they did not provide wheelchair seating locations in the stadium-style section of the theater with lines of sight comparable to those for members of the general public.

In June 1998, the Department advised AMC that its theaters failed to comply with ADA requirements. For seven months, the Department attempted to reach a settlement with AMC which would provide for AMC's voluntary compliance with the ADA. However, AMC refused to comply voluntarily, so the Department was required to file suit against AMC to compel compliance with the ADA.

xxx xxxxxxxxxx letter expresses concern that the lawsuit might be frivolous. However, a district court in Texas has alaready addressed the same issues in a case involving a movie theater operated by Cinemark, USA, and found a plain violation of the ADA. A copy of that ruling is enclosed for your reference.

xxx xxxxxxxxxx letter states that it would be inappropriate for the Department to file a lawsuit requiring a theater to give persons who use wheelchairs access to each and every seat in a theater auditorium. The Department agrees with him on this point, and our lawsuit does not seek to require every seat to be wheelchair accessible. Instead, the lawsuit only seeks to require AMC to provide a relatively small number of wheelchair seats in the stadium-style section of each auditorium with lines of sight comparable to those for members of the general public. For example, in auditoriums with 300 seats, only four wheelchair spaces with comparable lines of sight must be provided -- not 300 seats.

The second concern xxx xxxxxxxxxx letter raises is whether Bill Lann Lee has the legal authority to perform the duties of Acting Assistant Attorney General for the Civil Rights Division because his appointment to the position of Assistant Attorney General has not been confirmed by the U.S. Senate. Bill Lann Lee was named Acting Assistant Attorney General by the Attorney General under her authority to make designations to fill vacancies at the Department of Justice. Prior to the Vacancies Act amendments of October 1998, the Attorney General had the authority to make designations to fill vacancies at the Department of Justice under 28 U.S.C. Sections 509-510. This authority has been used by Attorneys General in both Democratic and Republican Administrations for over 60 years. Mr. Lee's apointment was clearly lawful under this authority and under the terms of the Vacancies Act.

The Vacancies Reform Act expressly provides that it applies only to vacancies arising after its effective date, with the exception that the Act limits the term of service for an acting officer in a vacancy that arose before the law took effect. Since the position of Assistant Attorney General for Civil Rights has been vacant since 1997, the Vacancies Reform Act provides that he may continue to serve for at least a 210-day period pending the submission of a nomination to fill the vacancy. Since Mr. Lee's nomination was resubmitted to the Senate in March 1999, Mr. Lee may continue lawfully to serve as Acting Assistant Attorney General for as long as his nomination is pending before the Senate.

I hope this information responds to the concerns raised in the letter from your constituent. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,
Jon P. Jennings
Acting Assistant
Attorney General

June 29, 1999
The Honorable Marge Roukema
Member, U.S. House of Representatives
1200 East Ridgewood Avenue
Ridgewood, New Jersey 07460
Dear Congresswoman Roukema:
This letter responds to your inquiry on behalf of your constituent, xxxx xxxx xxxxxxx, who alleges that Grand European Tours (GET), a division of Forbes International, Inc., is violating title III of the Americans with Disabilities Act of 1990 (ADA).

xxxx xxxxxxx claims that GET denied her request to bring a wheelchair for her sister on a tour of Ireland. In light of xxxx xxxxxxxxx imminent departure, an investigator in the Department's Disability Rights Section telephoned her and the company to obtain more facts and to attempt some type of resolution. It is our understanding that GET assisted xxxx xxxxxxx in locating wheelchairs to rent at all hotels in Ireland. The European company with which GET contracts to provide on-site transportation, however, uses motorcoaches that are not equipped to transport wheelchairs.

Unfortunately, the practices of the European company may be beyond the reach of the ADA. It is a well-established principle of statutory construction that legislation enacted by Congress does not extend beyond

the territorial jurisdiction of the United States unless there is evidence of clear legislative intent to the contrary. E.E.O.C. v. Arabian American Oil Co., 499 U.S. 244, 248 (1991); Foley Bros., Inc. v. Filardo, 336 U.S. 281, 285 (1949).

Title III of the ADA does not contain any express provisions extending the law to extraterritorial activities. Moreover, although title III of the ADA applies to public accommodations and commercial facilities whose operations "affect commerce" and the statute defines commerce, in part, as "travel, trade, traffic, commerce, transportation or communication . . . between any foreign country or any territory or possession and any State," such broad language, found in many laws, is not generally considered sufficient, by itself, to overcome the presumption against extraterritoriality. See E.E.O.C. v. Arabian American Oil Co., supra, 499 U.S. at 250-51; see also, sections 301(1), (2) and (7) of the ADA.

Furthermore, Congress, in passing the Civil Rights Act of 1991, amended sections 101(4) and 102 of the ADA, to broaden the ADA to protect extraterritorial employment. See sections 109(a) and (b) of the Civil Rights Act of 1991, Pub. L. No. 102-166, 105 Stat. 1071 (1991); E.E.O.C. v. Arabian American Oil Co., supra, 499 U.S. at 258-59. No comparable, explicit expression has been made with respect to extraterritorial coverage of public accommodations and commercial facilities under title III.

As a place of public accommodation, GET is prohibited from discriminating against people with disabilities either directly or through contractual arrangements with other entities, including transportation companies that it books. 42 U.S.C. § 12182(b)(1)(A)(i); 28 C.F.R. § 36.202(a). The Disability Rights Section has reminded GET of that obligation and urged it to contract with companies abroad that provide disability access. For the reasons stated above, however, the law may not provide jurisdiction for the provision of accessible services in foreign countries.

I hope this information is helpful to you in responding to your constituent. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,
Bill Lann Lee
Acting Assistant
Attorney General
Civil Rights Division

July 13, 1999
Mr. Hermann Paul Schlander
Cruise Ship Consultant
42-980 Massachusetts Court
Palm Desert, California 92211
Dear Mr. Schlander:
This letter is in response to your inquiries whether the Americans with Disabilities Act of 1990 (ADA) applies to foreign flag cruise ships. Please excuse the delay.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities that have rights or responsibilities under the Act. Pursuant to that authority, this letter provides informal guidance to assist you in understanding the ADA. However, this technical assistance does not constitute a legal interpretation of the statute, and is not binding on the Department.

Cruise ships are subject to the requirements of title III of the ADA. Section 301 of the ADA prohibits discrimination against persons with disabilities by private entities in their operation of places of public accommodation. A place of public accommodation is defined as a facility whose operations affect commerce and fall within one or more of the twelve broad categories of facilities listed in the statute. These categories include places of lodging, establishments serving food or drink, places of exhibition or entertainment, and places of exercise or recreation. Cruise ships, which typically contain guest cabins, restaurants, snack bars, movie theaters, lounges, health clubs, and pool areas, function as one or more of these types of places of public accommodation.

Cruise ships are also covered by section 304 of the ADA. Section 304 prohibits discrimination on the basis of disability in "specified public transportation services provided by a private entity that is primarily engaged in the business of transporting people and whose operations affect commerce." Specified public transportation is defined as "transportation by bus, rail, or any other conveyance (other than by aircraft) that provides the general public with general or special service (including charter service) on a regular and continuing basis." 42 U.S.C. 12181(10)

Nothing in the plain language of the ADA excludes from coverage foreign flag cruise ships that do business in the United States. The ADA does not exempt from coverage public accommodations or transportation services operated by foreign corporations. Absent a statutory exemption, corporations doing business in the United States must comply with all generally applicable laws, including laws that prohibit discrimination. The fact that a cruise ship sails under a foreign flag and is registered in a foreign country does not exempt it from generally applicable laws of the countries in which it does business.

Because foreign flag vessels generally are subject to the laws of the United States when they are in United States ports or other internal waters, the Department of Justice has determined that foreign flag cruise ships are subject to the requirements of the ADA when they are in the ports or internal waters of the United States. The Department of Justice Technical Assistance Manual provides that foreign flag ships "that operate in United States ports may be subject to domestic law, such as the ADA, unless there are specific treaty prohibitions that preclude enforcement." Title III Technical Assistance Manual III-1.2000(D) (1994 Supp.) The Department of Transportation has similarly determined that the United States "appears to have jurisdiction to apply ADA requirements to foreign-flag cruise ships that call in U.S. ports" except to the extent that enforcing ADA requirements would conflict with a treaty. 56 Fed. Reg. 45,584, 45,600 (1991). Therefore, unless there is a showing that the application of the ADA to a foreign flag cruise ship would conflict with an international convention to which the United States is a party, the ADA applies.

The Department of Justice has recently filed a brief as amicus curiae, or "friend of the court," in the United States Court of Appeals for the Eleventh Circuit in support of an individual with a disability who is appealing the dismissal of her ADA suit against a foreign flag cruise ship. The Department's amicus brief sets forth our position that the ADA applies to foreign flag cruise ships when they are in the ports or other internal waters of the United States.

I hope that this information is helpful to you.

John L. Wodatch
Chief
Disability Rights Section

794

July 14, 1999
The Honorable Charles S. Robb
United States Senator
The Ironfronts, Suite 310
1011 East Main Street
Richmond, Virginia 23219
Dear Senator Robb:

This is in response to your inquiry on behalf of your constituent, xxx xxxxxxx xxxxxxxxxx, who alleges that Sears and Roebuck has installed a computer customer service system that is inaccessible to persons with vision impairments and persons with poor or no manual dexterity.

Under title III of the Americans with Disabilities Act of 1990 ("ADA"), a public accommodation, such as Sears and Roebuck, shall take those steps necessary to ensure that no individual with disabilities is excluded, denied services, segregated or otherwise treated differently than other individuals because of the absence of auxiliary aids and services unless the public accommodation can demonstrate that taking those steps would fundamentally alter the nature of the goods, services, or facilities being offered or would result in an undue burden. 28 C.F.R § 36.303(a). The term auxiliary aids and services includes acquisition or modification of equipment or devices. Title III also requires a public accommodation to make reasonable modifications in policies, practices, and procedures when necessary to afford goods and services to people with disabilities unless the modifications would fundamentally alter the nature of the goods and services. 28 C.F.R. § 36.302(a).

Please note, also, that the ADA defines disability as a physical or mental impairment that substantially limits one or more major life activities, a record of such an impairment; or being regarded as having such an impairment. 28 C.F.R. § 36.104. To determine whether a person is substantially limited in the ability to perform a major life activity, we look to the nature and severity of the injury, the duration of the impairment, and the permanent and long term impact of the injury. (See 29 C.F.R. § 1630.2 (j)(2)).

You should be aware that the Division is examining the ADA's application to the use of computer customer services by public accommodations. We will take xxx xxxxxxxxxxx concerns into consideration as we continue our review.

As you requested, I am replying in duplicate and returning your correspondence. I hope this information is useful to you in responding to your constituent. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,
Bill Lann Lee Acting Assistant
Attorney General
Civil Rights Division

July 27, 1999
The Honorable George Voinovich
United States Senator

37 W. Broad Street
Suite 970
Columbus, Ohio 43215
Dear Senator Voinovich:
This is in response to your inquiry on behalf of your constituent, xxx xxxx xxxxxx. Xxx xxxxxx earlier wrote to the Disability Rights Section alleging that the failure of Clinical Health Laboratories (Laboratories) to accommodate her Multiple Chemical Sensitivity (MCS)and latex sensitivity violates the Americans with Disabilities Act of 1990 (ADA).

After careful review, the Section has decided against further investigation of xxx xxxxxxxx claims. That decision is based upon resources. The Section receives thousands of complaints each year and does not have sufficient staff to attempt to resolve each one.

xxx xxxxxxxx claims raise some of the most difficult issues under the ADA. Title III of the law and the Department's implementing regulation require a public accommodation to modify its policies, practices, or procedures when necessary to afford its goods and services to an individual with a disability, unless to do so would fundamentally alter the nature of those goods and services. 42 U.S.C. § 12182(b)(2)(A)(ii); 28 C.F.R. § 36.302. The Laboratories is a title III "public accommodation," but whether xxx xxxxxx is an "individual with a disability" is a question that is less easily answered.

"Disability" is defined in part as a physical or mental impairment that substantially limits a major life activity. 42 U.S.C. § 12102(2); 28 C.F.R. § 36.104. The Department assumed MCS was an "impairment" when it published its title III regulations several years ago. *See* 28 C.F.R. Part 36, Appendix B - *Preamble to Regulation on Nondiscrimination on the Basis of Disability in Public Accommodations and In Commercial Facilities*

(Published July 26, 1991) - at p. 585. Since that time, however, the courts have aired considerable medical controversy over the issue.

Assuming MCS and latex sensitivity are impairments, the next step is to determine whether they substantially limit one or more of the individual's major life activities. As the Department stated in the *Preamble* to its regulation, that determination must necessarily be made case-by-case. We also stated that the determination should be made "without regard to the availability of mitigating measures, such as reasonable modifications or auxiliary aids and services." The Supreme Court in a trio of cases recently held, however, that mitigating measures such as medications or prosthetic devices, used to ameliorate the effects of impairments, should be considered in making this determination. *Sutton v. United Air Lines, Inc.*, 67 USLW 4537 (1999); *Murphy v. United Parcel Service, Inc.*, 67 USLW 4549 (1999); *Albertsons, Inc. v. Kirkingburg*, 67 USLW 4560(1999).

Finally, xxx xxxxxxxx claims raise the issue of whether the ADA requires the Laboratories to use different medical products and to instruct its employees to refrain from wearing perfume in order to afford xxx xxxxxx its services. The answer to this question depends upon whether such actions can be deemed "reasonable" modifications of its procedures and, if reasonable, whether they would nonetheless "fundamentally alter" the nature of the Laboratories' services.

I am sorry that we cannot assist xxx xxxxxx. Let me also make clear that the Department takes no position on the merits of her ADA complaint. Rather, our decision is one of resource allocation. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,

Bill Lann Lee

Acting Assistant
Attorney General
Civil Rights Division
Enclosure

August 4, 1999
The Honorable Mary L. Landrieu
United States Senator
Room 326, Federal Building
707 Florida Street
Baton Rouge, Louisiana 70801
Dear Senator Landrieu:
This letter responds to your inquiry on behalf of your constituent, xxx xxxxxxxxx xxxxxxx, regarding the fine she received for parking in a space designated for individuals with disabilities.

The Disability Rights Section of the Civil Rights Division enforces titles I, II, and III of the Americans with Disabilities Act of 1990 (ADA). Title I protects qualified individuals with disabilities from discrimination in employment. The Equal Employment Opportunity Commission handles most employment-related complaints. Title II protects individuals with disabilities from discrimination in all of the services, programs, and activities of State and local government entities. Title III protects individuals with disabilities from discrimination by most privately owned businesses that offer goods and services to the public.

xxx xxxxxxxxx letter does not specify the location of the parking area in question, but the assumption is that it is on church property. Religious organizations or entities controlled by religious organizations, including places of worship, however, are specifically exempted from coverage under the ADA. The exclusion of religious entities set forth in the title III implementing regulation is derived from section 307 of the ADA, Public Law 101-336, codified at 42 U.S.C. 12187. This section states that "[t}he provisions of this title [Title III Public Accommodations and Services Operated by Private Entities] shall not apply to ... religious organizations or entities controlled by religious entities, including places of worship."

With respect to designated parking, the ADA only requires that public facilities and places of public accommodation provide accessible parking spaces for their clients and customers. The enforcement of parking regulations that govern the use of these accessible spaces, however, is a matter governed by State or local law. The ADA does not contain provisions specifically requiring law enforcement officials to ensure that accessible parking spaces are occupied only by persons with disabilities. Accordingly, the problem encountered by xxx xxxxxxx, whether the parking space was on or off the church's property, would be handled by local law enforcement officials.

Because the enforcement of parking regulations is a matter that falls within the jurisdiction of local officials, this Department cannot assist xxx xxxxxxx. Your constituent, however, may wish to continue working with the appropriate city offices that have the authority to handle this matter.

I hope this information is helpful to you in responding to your constituent. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,

Bill Lann Lee
Acting Assistant
Attorney General

797
August 5, 1999
The Honorable Joseph R. Pitts
Member, U.S. House of Representatives
50 North Duke Street
Courthouse, 5th Floor
Lancaster, Pennsylvania 17602
Dear Congressman Pitts:

I am responding to your letter on behalf of your constituent, xxx xxxxxxx xxxxxxxxxx, regarding whether it is appropriate, under the Americans with Disabilities Act (ADA), for the City of Lancaster to require his daughter and son-in-law to incur costs from replacing curbs and/or sidewalks adjacent to their house.

Title II of the ADA prohibits discrimination on the basis of disability by State and local government entities. The Department of Justice's regulation implementing title II requires public entities with authority over streets, roads, or walkways (including sidewalks) to construct certain curb ramps or similar structures in order to provide access to sidewalks for individuals with mobility impairments. See 28 C.F.R. § 35.150(d)(2). In addition, when public entities build new or alter existing facilities, streets or pedestrian walkways, the title II regulations require the construction of curb ramps or similar structures. See 28 C.F.R. § 35.151(e).

It appears from the letter that the City of Lancaster is requiring xxx xxxxxxxxxxxx daughter and son-in-law to replace curbs and/or sidewalks adjacent to their house as part of the City's annual street improvement project. As described above, under the ADA, constructing a new street or altering an existing street give rise to accessibility obligations for curb ramps. However, the ADA does not regulate the manner in which a covered entity, such as the City of Lancaster, should finance changes it must make in order to bring itself into compliance with the ADA. Rather, the ADA prohibits such an entity from placing a surcharge on any particular individual with a disability or group of individuals with disabilities in order to cover the cost of complying with the ADA. See 28 C.F.R. § 35.130(b)(8)(f).

In our view, curb ramps that are installed to meet the City's overall obligations under the ADA do not provide a particular benefit to the adjacent property owner and are more properly paid for through general revenues or other funds available for street and sidewalk improvements. However, public entities are free to allocate these cost among their residents in any manner authorized by state law.

Again, we must stress that, other than prohibiting a surcharge against a particular individual or group of individuals with disabilities, the ADA and its implementing regulations do not address this issue. Therefore, unless a covered entity attempts to place a direct charge on such an individual or group of individuals, the final determination with respect to payment for any improvements undertaken to comply with the ADA falls within the discretion of the taxing entity.

For your information I have enclosed a copy of the title II regulations. If xxx xxxxxxxxxx has additional questions, the Department maintains a telephone information line to provide technical assistance regarding

the rights and obligations of individuals, businesses, agencies, and others covered or protected by the ADA. This technical assistance is available by calling 800-514-0301 (Voice) or 800-514-0383 (TDD).

I hope this information is helpful to you in responding to your constituent. Please do not hesitate to contact the Department if we can be of assistance in other matters.
Sincerely,
Bill Lann Lee
Acting Assistant
Attorney General
Civil Rights Division
Enclosure
798
August 10, 1999
The Honorable Charles E. Grassley
United States Senate
Washington, D.C. 20510-1501
Dear Senator Grassley:

I am responding to your letter on behalf of your constituent, xxx xxxxxx xx xxxxxx. xxx xxxxxx wrote to you inquiring whether her automobile insurance company's policy of providing a premium discount for "good students" who maintain a grade point average of "B" or better violates the Americans with Disabilities Act (ADA).

Title III of the ADA prohibits discrimination on the basis of disability by places of public accommodation, including service establishments such as insurance companies. Therefore, an insurance company may be prohibited by the ADA from discriminating on the basis of disability in making decisions to grant or deny coverage, and in setting rates for types of coverage. However, because of the nature of the insurance business, an insurer may underwrite, classify, or administer risks that are based on, or not inconsistent with, State law, provided that such practices are not used to evade the purposes of the ADA.

In her letter, xxx xxxxxx indicates that it would be difficult for her son, who has a learning disability, to maintain a grade point average of "B" or better. xxx xxxxxx, therefore, believes that her automobile insurer's policy of providing a premium discount for "good students" is discriminatory towards her son and other students who do not have "the mental capacity" to achieve a B-average or better. The ADA prohibits insurers from making disability-based distinctions that lack an actuarial basis or are unrelated to actual or reasonably anticipated experience. In this case, the insurance company is making a distinction based on school performance, not disability. The automobile insurer is providing all policy holders with a "good students" premium discount without regard to disability. Therefore, the policy of providing a premium discount to "good students" does not appear to violate the ADA.

If xxx xxxxxx has additional questions, the Department maintains a telephone information line to provide technical assistance regarding the rights and obligations of individuals, businesses, agencies, and others covered or protected by the ADA. This technical assistance is available by calling 800-514-0301 (Voice) or 800-514-0383 (TDD).

I hope this information is helpful to you in responding to your constituent. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,

Bill Lann Lee
Acting Assistant
Attorney General
Civil Rights Division

799

August 12, 1999
The Honorable Christopher Shays
Member, U.S. House of Representatives
10 Middle Street
Bridgeport, Connecticut 06604-4223
Dear Congressman Shays:

Staff of the Disability Rights Section, Civil Rights Division, have reviewed the correspondence that you forwarded on behalf of your constituent, xxx xxxxxx xxxxxxxx, of Bridgeport, Connecticut (Reference #xxxxxxx). xxx xxxxxxxx wrote to you after encountering barriers to access during a recent visit to Washington, D.C. His letter indicates that both transportation facilities he used and buildings he visited lacked accessible restrooms. Sidewalks were difficult to traverse or lacked curb cuts. He mentions that he has similarly encountered lack of accessibility in his hometown of Bridgeport, both at facilities owned and operated by public as well as private entities.

Facilities in Washington, D.C. and Bridgeport, as in all American cities, are covered by nondiscrimination provisions of the Americans with Disabilities Act (ADA). Section 504 of the Rehabilitation Act of 1973, as amended (Section 504) may also apply to some of these facilities. The Disability Rights Section of the Civil Rights Division enforces titles I, II, and III of the ADA. Title I protects qualified individuals with disabilities from discrimination in employment by State or local government employers and by private employers, when these employers have 15 or more employees. Title II protects individuals with disabilities from discrimination in all of the services, programs, and activities of State and local government entities. Title III protects individuals with disabilities from discrimination by privately owned places of public accommodation. Section 504 prohibits discrimination on the basis of disability in programs that receive Federal financial assistance or in programs conducted by the Federal government.

Enforcement of the Federal statutes prohibiting discrimination on the basis of disability requires a fact-specific inquiry by the appropriate officials with oversight and enforcement duties. Coverage of public sidewalks and transportation may come under title II ADA enforcement duties placed with the Department of Transportation. Most of the Federal monuments and museums would be subject to section 504 enforced by the Department of the Interior. Enclosed are copies of appropriate regulations and other descriptive information on the ADA and section 504.

xxx xxxxxxxx may use the enclosed complaint forms to file his allegations with the Department of Justice. We will forward his complaint to the appropriate enforcement agency. He also may file directly with the Department of the Interior or the Department of Transportation, depending on which facility he identifies as having barriers to access for persons with disabilities. Complaints may also comprise any written statement that identifies the discriminating entity, the time and place when the discrimination occurred, and a description of the alleged discriminatory facility, program, or activity with sufficient detail to raise an inference that discrimination has occurred. Appropriate addresses for filing complaints are enclosed.

Please note that the enclosed information describes coverage of residential housing by the Fair Housing Act, as amended in 1988 (FHA). A complaint under the FHA would be filed with the Department of Housing and Urban Development.

If your constituent or your staff have questions about titles II or III of the ADA, they may call the Department's ADA information line at 1-800-514-0301 (voice) or 1-800-514-0383 (TDD). If they have questions about title I of the ADA, they may call the Equal Employment Opportunity Commission (EEOC) at 1-800-669-4000 (voice) or 1-800-669-6820 (TDD).

I hope this information will assist you in responding to your constituent. Please do not hesitate to contact the Department if we may be of assistance in other matters.

Sincerely,

Bill Lann Lee

Dr. Bonita M. Bergin
President
The Assistance Dog Institute
P.O. Box 2334
Rohnert Park, California 94927
Re: DJ 202-11-0
Dear Dr. Bergin:

This letter is in response to your request that the Department of Justice change the language of its regulations implementing titles II and III of the Americans with Disabilities Act of 1990, 28 C.F.R. pts. 35, 36. You requested that the regulatory term "service animal" be replaced by "assistance animal."

As you correctly note, we received a letter dated January 1996, in which xxxxx xxxxxx xxxxxxxxx made the same request. You infer that we did not respond adequately to xxx xxxxxxxxx. In a letter dated October 17, 1997, then-Acting Assistant Attorney General Isabelle Katz Pinzler clearly indicated that the Department carefully considered the issue and decided to retain the term "service animal" in its regulations. A copy of her letter is attached for your reference.

You have not offered any additional information that would cause us to reconsider our decision. We believe that we best serve the interests of people with disabilities by the consistent use of the term "service animal," along with our broad interpretation of that term to include:

any guide dog, signal dog, or other animal individually trained to do work or perform tasks for the benefit of an individual with a disability, including, but not limited to, guiding individuals with impaired vision, alerting individuals with impaired hearing to intruders or sounds, providing minimal protection or rescue work, pulling a wheelchair, or fetching dropped items.

28 C.F.R. § 36.104. A change of terminology would likely engender confusion among businesses and State and local governments.

If you have any remaining questions or concerns, please do not hesitate to contact our toll-free ADA Information Line,

1-800-514-0301 (voice), or 1-800-514-0383 (TTY).

Sincerely,

Bill Lann Lee

The Honorable Joseph I. Lieberman
United States Senate
Washington, D.C. 20510-0703
Dear Senator Lieberman:
This is in response to your inquiry on behalf of your constituent, Dr. xxxx xx xxxx of West Hartford, Connecticut.
Dr. xxxx is a physician who is concerned that the Americans with Disabilities Act of 1990 (ADA) requires him to provide a sign language interpreter for patients needing the service and further expects him to absorb the costs associated with the interpreter services.

We understand Dr. xxxxxx concern, but we believe that he may not be aware of the flexibility provided to him under the ADA. Title III of the ADA was enacted to ensure that people with disabilities are not excluded from receiving the benefits and services provided by covered entities, including physicians. However, in enacting title III, Congress carefully struck a balance between the rights of people with disabilities to participate fully in activities of daily life and the legitimate economic needs of the service providers.

The ADA does require physicians to ensure effective communication with patients (and, for pediatric patients, with their parents or guardians.) When one of these individuals has a disability that affects communication (*e.g.,* a hearing impairment), the ADA may require a physician to provide a sign language interpreter or other appropriate auxiliary aid to ensure effective communication, unless the physician can prove that providing the auxiliary aid will fundamentally alter the service or benefit that the physician is providing or result in an undue burden.

Ensuring effective communication does not necessarily require a physician to provide a sign language interpreter each time that a patient requests one. The physician has the right to select the auxiliary aid that will be provided and also the obligation to ensure that the selected method of communication is effective. In making this determination, the physician should consult with the patient to learn what auxiliary aids may be effective in the specific circumstances. For example, if a patient can communicate effectively in writing, then written communication through the exchange of notes or using a computer to facilitate conversation may be effective when a physician is explaining a simple procedure. However, if the information to be conveyed is lengthy or complex, or the patient has difficulty communicating in writing, then the use of written notes may be ineffective. The use of an interpreter may be the only effective form of communication. Thus, Dr. xxxx may not need to provide an interpreter for a routine office visit where paper-and-pen communication is sufficient to provide effective communication between him and his patient.

If an interpreter is necessary to provide effective communication, a physician must provide the interpreter without charge to the person with a disability unless it is an undue burden. The term "undue burden" means "significant difficulty or expense." Dr. xxxx states he was billed for two hours of interpreting services (apparently the "minimum" charges billed by the interpreter service) at a total fee of $60 even though the patient appointment lasted only 15 minutes. Thus, Dr. xxxx might be able to argue that these charges are within the "undue burden" standard as a "significant expense." Such an evaluation, however, is not based solely on a comparison of the interpreter costs to the revenue generated by the office visit at which the interpreter is present. Instead, the interpreting costs are considered in relationship to the overall financial resources of the practice and other mitigating factors such as the ability to spread costs throughout the general clientele and the availability of tax credits.

The Internal Revenue Code permits eligible small businesses to receive a tax credit for certain costs of ADA compliance. An eligible small business is one whose gross receipts do not exceed $1,000,000 or whose work force does not consist of more than 30 full-time workers. Qualifying businesses may claim a credit of up to 50 percent of eligible access expenditures that exceed $250 but do not exceed $10,250. Eligible access expenditures may include the costs of providing auxiliary aids and services to persons with disabilities. Further information on the tax credit can be obtained from a local Internal Revenue Service office, or by contacting the Office of Chief Counsel, Internal Revenue Service. The enclosed booklet also provides general information about the tax credit.

I hope this information will be helpful to you. Please do not hesitate to contact the Department if we can be of assistance in other matters.
Sincerely,
Bill Lann Lee
Acting Assistant
Attorney General
Civil Rights Division

The Honorable Frank R. Wolf
Member, U.S. House of Representatives
13873 Park Center Road
Suite 130
Herndon, Virginia 20171
Dear Congressman Wolf:
This is in response to the letter you forwarded from one of your constituents, xxxxx xx xxxxx. xxx xxxxx posed several questions regarding the applicability and enforceability of the Americans with Disabilities Act of 1990 (ADA) on entities that operate passenger vessels registered domestically or under foreign flags.

Passenger vessels, both privately and publicly owned, are subject to the requirements of the ADA. Section 301 of the ADA prohibits discrimination against persons with disabilities by private entities in their operation of places of public accommodation. A place of public accommodation is defined as a facility that falls within one or more of the twelve broad categories listed in the statute with operations that affect commerce. The categories include places of lodging, establishments serving food or drink, places of exhibition or entertainment, places of public gathering, sales or rental establishments, service establishments, and places of

exercise or recreation. Passenger vessels, which may contain guest cabins, restaurants, snack bars, movie theaters, casinos, lounges, gift shops, beauty shops, health clubs, and pool areas, contain one or more of these types of places of public accommodation.

In addition, privately owned passenger vessels are covered by section 304 of the ADA. Section 304 prohibits discrimination on the basis of disability in "specified public transportation services provided by a private entity that is primarily engaged in the business of transporting people and whose operations affect commerce." Specified public transportation is defined as "transportation by bus, rail, or any other conveyance (other than by aircraft) that provides the general public with general or special services (including charter service) on a regular and continuing basis." 42 U.S.C. 12181(10).

Passenger vessels operated by public entities also are covered by the ADA. Section 222 of the ADA prohibits a public entity which operates a fixed route system (such as a ferry) from purchasing or leasing new vehicles that are not readily accessible to and usable by individuals with disabilities, including those who use wheelchairs. Section 202 of the ADA prohibits a public entity from excluding a person with a disability from its services, programs, or activities.

Nothing in the plain language of the ADA excludes from coverage foreign flag vessels that do business in the United States. The ADA does not exempt from coverage public accommodations or transportation services operated by foreign corporations. Absent a statutory exemption, corporations doing business in the United States must comply with all generally applicable laws, including laws that prohibit discrimination. The fact that a passenger vessel sails under a foreign flag and is registered in a foreign country does not exempt it from generally applicable laws of the countries in which it does business.

Because foreign flag vessels generally are subject to the laws of the United States when they are in United States ports or other internal waters, the Department of Justice has determined that foreign flag vessels are subject to the requirements of the ADA when they are in the ports or internal waters of the United States. The Department of Justice Technical Assistance Manual provides that foreign flag ships "that operate in United States ports may be subject to domestic law, such as the ADA, unless there are specific treaty prohibitions that preclude enforcement." Title III Technical Assistance Manual III-1.2000(D) (1994 Supp.). The Department of Transportation has similarly determined that the United States "appears to have jurisdiction to apply ADA requirements to foreign-flag cruise ships that call in U.S. ports" except to the extent that enforcing ADA requirements would conflict with a treaty. 56 Fed. Reg. 45,584, 45,600 (1991). Therefore, unless there is a showing that the application of the ADA to a foreign flag vessel would conflict with an international convention to which the United States is a party, the ADA applies. Of course, the ADA also applies to U.S. flagged vessels. Recently, the Department filed a brief as amicus curiae, or "friend of the court," in support of a private lawsuit under the ADA against Premier Cruises. In the Department's brief we argued that title III of the ADA governs the operations of cruise ships that do business in the United States, including foreign flag ships such as Premier's "Big Red Boat."

With respect to your constituent's questions concerning enforcement, title III of the ADA authorizes the Department of Justice to investigate alleged violations of the Act by public accommodations and commercial facilities. 42 U.S.C. § 12188 (b)(1)(A). The Department may seek judicial relief only in instances where there appears to be a pattern or practice of discrimination or where an issue of general public importance is involved. The Department of Justice also is charged with enforcing title II complaints against public entities. With respect to both title II and title III complaints, an individual with a disability may choose to file an action in court rather than file a complaint with the Department.

I am enclosing a copy of the Division's latest Status Report which summarizes our ADA enforcement activity, as well as a copy of the Department's brief in the above referenced case against Premier Cruises. I hope this information is useful to you in responding to your constituent. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,

Bill Lann Lee
Acting Assistant

The Honorable Calvin Dooley
Member, U.S. House of Representatives
224 W. Lacey Boulevard
Hanford, California 93230

Dear Congressman Dooley:

This is in response to your inquiry on behalf of your constituent, xxxx xxxxxxx xxxxxxxx, who accompanied her parents last summer on an Alaskan cruise aboard Holland American's Nieuw Amsterdam. The ship was in large

part not accessible to her father who uses a wheelchair. xxxx xxxxxxxx has asked whether cruise ships that dock in American ports must comply with the Americans with Disabilities Act of 1990 (ADA).

The Department has long taken the position that such ships must be ADA compliant. The issue was discussed in the preamble to Section 36.104 of our title III regulation (28 C.F.R. Part 36, Appendix B at 585) and in sections III-5.3000 and 1-2000(D) of our Title III Technical Assistance Manual (1994 Supp.). The Department recently reiterated that position in an *amicus curiae* brief in *Tammy Stevens v. Premier Cruises, Inc.*, No. 98-5913 (11th Cir., filed March 24, 1999), a case that will be argued this fall. Two copies of our brief are enclosed should you care to share one with xxxx xxxxxxxx.

As the brief points out, cruise ships are covered by title III of the ADA because they typically contain guest cabins, eating and drinking establishments, places of exhibition and entertainment, and exercise and recreation facilities and thus function as one or more of the types of places of public accommodations enumerated in the statute. 42 U.S.C. 12181(7).

They are also covered by Section 12184(a) of the ADA, which prohibits disability-based discrimination "in public transportation services provided by a private entity that is primarily engaged in the business of transporting people and whose operations affect commerce." The Department of Transportation, which is authorized to implement Section 12184, has determined that cruise ships are covered by that provision. 56 Fed. Reg. 45,584, 45,600 (1991).

Cruise ships must therefore comply with the full range of title III requirements, which include nondiscriminatory eligibility criteria; reasonable modifications in policies, practices, and procedures; provision of auxiliary aids; and readily achievable removal of barriers in existing facilities. A ship is not required to comply with a specific accessibility standard for new construction or alterations, however, because no Federal standard for the construction of accessible ships has yet been issued. The Architectural and Transportation Barriers Compliance Board is currently developing such guidelines. 63 Fed. Reg. 15,175 (1998).

Our *Stevens* brief also addresses the issue of whether the ADA applies to foreign-flag cruise ships, like the one boarded by xxxx xxxxxxxx and her family, when they are docked in the ports or other internal waters of the United States (brief at pages 15-27). As you can see, the Department takes the position that they are covered and that boarding such a ship which has not removed barriers to accessibility subjects the individual with a disability to an act of discrimination that occurs in the United States.

I hope this information is helpful to you in responding to your constituent. If xxxx xxxxxxxx would like to file a title III ADA complaint with the Department, she can do so by writing to the Disability Rights Section, P. O. Box 66738, Washington, D.C. 20035-6738. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,
Bill Lann Lee

November 16, 1999
The Honorable George W. Gekas
Member, U.S. House of Representatives
108 B Municipal Building

400 South 8th Street
Lebanon, Pennsylvania 17042-6794
Dear Congressman Gekas:
This is in response to your letter requesting information about the Americans with Disabilities Act (ADA) on behalf of your constituent, Mr. Ross W. Watts, Mayor of the Borough of Palmyra, Pennsylvania.

You have asked about your constituent's request for a variance or exemption from requirements of the Americans with Disabilities Act (ADA). The Borough of Palmyra is concerned that modifications to handrails to create extensions of the gripping surface at the bottom of several stairs at the Palmyra Area Middle School create a hazard to pedestrians.

In response to your question, while there is not a procedure for exemption or waiver of ADA requirements, the ADA Standards do make allowance for existing conditions that may make it very difficult or impossible to fully comply with the alteration provisions. In those situations, an entity is required to comply to the greatest extent feasible taking into account existing conditions.

In altering a facility covered by the ADA, the alterations must be done to meet the minimum requirements of the ADA Standards and must not create a hazard for people who are blind or visually impaired. It appears from the photographs that were included with your letter that the handrail extensions do not fully comply with the handrail requirements in the ADA Standards. Section 4.9.4(6) Handrails, states that "ends of handrails shall be either rounded or returned smoothly to floor, wall or post." Although the handrail extensions shown do return to the post, they are a protruding object because the bottom of the extension is more than 27 inches above the sidewalk. Figure 19 (c) and (d) of the ADA Standards provide guidance on how the handrail may return to the post or ground and not be a protruding object hazard. If the handrail extensions are modified to comply with Figure 19, then the railings will not be a hazard to pedestrians.

Your constituent expressed particular concern about one stair that leads to the stage area of the middle school auditorium. To address this concern, the Borough of Palmyra should first determine whether the stair is required to have handrail extensions. The ADA Standards set minimum requirements for new construction and for the alteration of buildings and facilities and include both scoping and technical requirements. The scoping provisions determine the location and number of accessible elements and spaces and the technical provisions set requirements for the basic design. In Section 4.1.3(4) of the ADA Standards, it states that the requirements for stairs only apply when an elevator, ramp or other means of vertical access does not provide access to a level served by the stair. If an accessible route is provided to the Middle School auditorium stage using a ramp or lift, then the ADA Standards would not apply to the exterior stair. However, if the stair serves a level not served by a ramp, elevator or other means of vertical access, then the stair and handrail requirements would apply when the facility is altered.

I have enclosed a copy of the ADA Standards for Accessible Design which are part of the title III regulations and have marked the sections that apply to handrails for your use and for the use of your constituent. If the Mayor or other officials of the Borough of Palmyra would like further information on this matter, they should call the Division's toll-free ADA Information Line at (800) 514-0301 (voice) or (800) 514-0383 (TTY). Members of the Disability Rights Section staff are available to answer questions on the information line on Monday, Tuesday, Wednesday, and Friday from 10:00 a.m. to 6:00 p.m., Eastern time. On Thursday, the information line is staffed from 1:00 p.m. to 6:00 p.m.

I hope this information is helpful to you in responding to your constituent. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,

Bill Lann Lee
Acting Assistant
Attorney General
Civil Rights Division
Enclosure

November 16, 1999
The Honorable Joseph I. Lieberman
United States Senate
Washington, D.C. 20510-0703
Dear Senator Lieberman:
This is in response to your inquiry on behalf of your constituent, xxx xxxxxxx xxxxxx of Groton, Connecticut.

xxx xxxxxx has requested information on the application of the Americans with Disabilities Act of 1990 (ADA) to the insurance industry.

xxx xxxxxx wrote that he has been denied an insurance policy to pay off the mortgage on his house in the event that he dies before the mortgage is paid off, because he has a congenital heart defect.

Title III of the ADA prohibits discrimination on the basis of disability by places of public accommodation, including service establishments such as insurance companies. Because of the nature of the insurance business, however, consideration of disability in the sale of insurance contracts does not always constitute unlawful "discrimination." An insurer or other public accommodation may underwrite, classify, or administer risks that are based on or not inconsistent with state law, provided that such practices are not used as a subterfuge to evade the purposes of the ADA.

With respect to the purchase of insurance, the ADA allows insurance companies to refuse to insure someone with a disability only if the refusal to provide coverage is based on sound actuarial principles, or actual or reasonably anticipated experience. The ADA, therefore, does not prohibit the use of legitimate actuarial considerations to justify differential treatment of individuals with disabilities in insurance.

Enclosed for your information is a copy of the Department of Justice's Technical Assistance Manual for title III of the ADA. It discusses the definition of disability on pages 9 to 13, and the requirements applicable to insurance companies on pages 19 to 20.

I hope that this information is useful to you in responding to your constituent. Please do not hesitate to contact the Department if we can be of assistance in other matters.
Sincerely,
Bill Lann Lee
Acting Assistant
Attorney General
Civil Rights Division
Enclosure

November 30, 1999
The Honorable David Vitter
Member, U.S. House of Representatives
2800 Veterans Boulevard
Metairie, Louisiana 70002
Dear Congressman Vitter:
This letter is in response to your inquiry on behalf of your constituent, xxx xxxx xx xxxxxxxxxxx. xxx xxxxxxxxxxx wrote to you stating that the East Jefferson Levee District intends to provide pathways to a levee system for the citizens of Jefferson Parish. xxx xxxxxxxxxxx asked whether the Americans with Disabilities Act of 1990 (ADA) requires each of these pathways to be accessible to individuals with disabilities.

Title II of the ADA, which applies to State and local governments, requires that all new buildings and all alterations to existing facilities must be designed and constructed so as to be readily accessible to and usable by persons with disabilities. The construction of pathways to an existing levee is considered an alteration. Therefore, if the Levee District constructs pathways across the levee, the District must ensure that each constructed pathway is, to the maximum extent feasible, readily accessible to and usable by people with disabilities.

xxx xxxxxxxxxxx also asked whether the ADA would require the Levee District to provide each individual neighborhood its own accessible pathway for people with disabilities. The Levee District has the discretion to determine how many pathways it will construct across the levee. The ADA only requires that each constructed pathway is, to the maximum extent feasible, readily accessible to and usable by people with disabilities.

If xxx xxxxxxxxxxx has additional questions, the Department maintains a telephone information line to provide technical assistance regarding the rights and obligations of individuals, businesses, agencies, and others covered or protected by the ADA. This technical assistance is available by calling 1(800) 514-0301 (Voice) or 1(800) 514-0383 (TDD).

I hope this information is helpful to you in responding to your constituent. Please do not hesitate to contact the Department if we can be of assistance in other matters.
Sincerely,
Bill Lann Lee
Acting Assistant
Attorney General
Civil Rights Division

December 1, 1999
Mr. Charles Crawford
Executive Director
American Council of the Blind
1155 15th Street, N.W.
Suite 720
Washington, D.C. 20005
Dear Mr. Crawford:
This is in response to your letter to the Attorney General. Your letter addressed two issues: 1) your letter dated September 7, 1999, concerning a complaint against the Maryland Highway Administration by xxxxxxxx xxxxxxx; and 2) the Department of Justice's use of the computer software "Quattro Pro."

The Civil Rights Division has no record that we received either your letter concerning the installation of accessible pedestrian signals or a complaint from xxx xxxxxxx on the same issue. Our records indicate that we did receive a photocopy of a letter concerning the Maryland Department of Transportation from xxx xxxxxxx, but that letter did not constitute a complaint.

xxx xxxxxxx may have filed a complaint with the U.S. Department of Transportation (DOT), which is the agency responsible for investigating alleged violations of the Americans with Disabilities Act that involve services and regulatory activities relating to transportation, including traffic management. Because DOT has been designated to investigate complaints relating to transportation, the Department will refer your current letter pertaining to this complaint to DOT for appropriate action.

If you have any questions concerning this referral, you may contact DOT at the following address:
Mr. Ronald Stroman
Director
Departmental Office of Civil Rights
Office of the Secretary
U.S. Department of Transportation
400 7th Street, S.W., Room 10215
Washington, D.C. 20590
Telephone: (202) 366-4648
The second issue raised in your letter concerns the accessibility of "Quattro Pro," the spreadsheet software used by the Department. You have suggested that the Department test this program to determine its acceptability under section 508 of the Rehabilitation Act. Section 508, as amended, requires each federal agency to ensure that electronic and information technology developed, procured, maintained, or used by the agency is accessible to people with disabilities. The Department is committed to complying with section 508.

However, because the technical standards for determining section 508 compliance have not yet been published, it is not possible to make that determination now.

Section 508 requires the Architectural and Transportation Barriers Compliance Board (Access Board) to develop standards for accessibility for electronic and information technology. Those standards are now being developed. Until the standards become final, it is not possible to determine if specific software "complies" with section 508.

Section 508 also requires the Department of Justice to conduct a survey of the current accessibility of federal government information technology and to report its findings and recommendations to the President in February 2000. To fulfill this obligation, the Department developed a comprehensive survey package that included detailed surveys of web pages, software, information transaction machines, and other equipment. The Department used this package to conduct a self-evaluation of its own information technology, including a survey of its computer software. The data collected are now being analyzed along with the data collected by other agencies. This data will form the basis of the Department's report to the President and will be considered in ensuring that the Department complies with section 508 in our future software purchases.

I hope this information is helpful to you. Please do not hesitate to contact the Department if we can be of assistance in other matters.
Sincerely,
John L. Wodatch
Chief
Disability Rigths Section

808
December 6, 1999
xxx xxxxx xx xxxxxxxxx
xx xxxxx xxxxxx xxxxx
xxxxxxx, xxxxxxxx xxxxx
Dear Mr. xxxxxxxxx:
This letter responds to your inquiry to the Attorney General on behalf of xxx and xxxxxxxx xxxxxxxxxx, who alleged discrimination on the basis of disability by the Department of State in their application for passports. Your letter and those written by xxx xxxxxxxxxx indicated that the local passport office would not accept their state identification cards in lieu of their drivers' licenses. Instead, a witness, with a driver's license, was required to sign an affidavit before the clerk to verify their citizenship. The xxxxxxxxxx allege that this practice discriminates against individuals who, like them, are blind.

Both the Immigration and Naturalization Service (INS) and the Disability Rights Section of the Civil Rights Division of the Department of Justice received this complaint. On October 4, 1999, the INS referred the complaint to the Passport Office of the Department of State. Thereafter, the Seattle Passport Agency responded to the xxxxxxxxxxx complaint by a letter of apology, a clarification of the Department's policies, and a recognition that training for local passport acceptance agents should be increased.

On November 19, 1999, Catherine O'Brien of the Disability Rights Section spoke to you regarding this complaint. We understand that you and the xxxxxxxxxx extend your concerns beyond the individual situation they faced. You want the Passport Office to modify its policies and practices so that individuals who are blind are not required to do more than individuals who are sighted. The xxxxxxxxxx object to the response from the Seattle Passport Agency, which suggests that a written explanation about the nature of the disability accompany an identity card. They believe that passport offices simply should recognize federal or state identification cards presented by individuals who do not have drivers' licenses.

Because the xxxxxxxxxxx complaint alleges a possible violation of section 504 of the Rehabilitation Act of 1973, as amended, which prohibits discrimination on the basis of disability in programs or activities conducted by federal agencies, we have referred their complaint to the civil rights office of the Department of State, which has the responsibility to investigate section 504 complaints involving the Department's own programs. If you have any questions, please contact the Department of State at the following address:

Mr. Thomas Jefferson, Jr.
Associate Director for Equal
Opportunity and Civil Rights
Department of State
S/EEOCR
2201 C Street, N.W., Room 4216
Washington, D.C. 20520
Telephone: (202) 647-9295
Please do not hesitate to contact the Department if we can be of assistance in other matters.
Sincerely,
Bill Lann Lee
Acting Assistant
Attorney General Civil Rights Division

809
December 23, 1999
The Honorable Gordon H. Smith
United States Senator
One World Trade Center
121 SW Salmon Street
Suite 1250
Portland, Oregon 97204
Dear Senator Smith:

This letter is in response to your inquiry regarding the case, Drew, et. al. v. Merrill and Perinatal Associates, P.C., CA No. 99-810, on behalf of your constituent, Dr. Patrick A. Merrill. The Department recently successfully mediated this matter.

Questions raised by Dr. Merrill are: 1) whether the Americans with Disabilities Act (ADA) specifically encourages the use of alternative dispute resolution (ADR); 2) how the Department of Justice determines whether a case is appropriate for ADR; 3) whether the monetary relief agreed to in the consent decree made sense in light of previous settlement agreements; and 4) whether a physician should be given an opportunity to determine if "effective communication" can occur.

When Congress enacted the Americans with Disabilities Act, it specifically encouraged the use of alternative dispute resolution (ADR). Section 513 of the ADA provides:

Where appropriate and to the extent authorized by law, the use of alternative means of dispute resolution, including settlement negotiations, conciliation, facilitation, mediation, factfinding, minitrials, and arbitration is encouraged to resolve disputes arising under . . . [the ADA].

42 U.S.C. § 12212. The Department of Justice restated this provision in section 36.506 of the enclosed title III regulation.

The Division is committed to the active use of mediation and other ADR techniques in appropriate cases. In each case we consider whether the case is an appropriate one for ADR. Of course, Division practice will at times be controlled by rules of federal appellate and district courts. When a litigant or potential litigant makes a request for ADR, a Division manager will review the case and determine whether the case should or should not be subject to ADR.

Before the Department initiates litigation under title III of the ADA, it is our practice to notify opposing parties to set forth the basis upon which we believe there is a violation of the ADA and to encourage resolution. In this case, the Assistant U.S. Attorney and an attorney from the Civil Rights Division spoke to Dr. Merrill's counsel, and exchanged correspondence explaining the ADA requirements for effective communication and our intent to participate in the ongoing litigation. In fact, the Department delayed the filing of a Complaint in this matter because the parties continued to work toward settlement through the attorneys. As a result of those conversations, we were able to resolve a number of issues including agreement on a policy on sign language interpreters and staff training. We were not able to resolve all the issues in this case. When it appeared that the parties had gone as far as possible without an outside mediator, the defendants' attorneys recommended formal mediation. We readily agreed. The parties agreed upon a mediator and went to mediation to resolve the remaining issues in the case.

The monetary relief of $25,000 was agreed to by both the private plaintiffs and defendants in this case. The proper amount of damages is a very fact specific determination and in this case the Department concurred in the final amount. This amount was not excessive given the circumstances of the case. Prior to the negotiations, we had provided Dr. Merrill's counsel with examples of recent damage awards in other cases handled by the Department. For example, in a consent decree with 14 hospitals in the State of Connecticut concerning the provision of sign language interpreters, the hospitals paid $333,000 in compensatory damages to 49 persons with individual amounts ranging from $1,000 to $25,000.

Finally, regarding how a physician can determine how to ensure effective communication, title III requires physicians to furnish appropriate auxiliary aids and services where necessary to ensure effective communication with individuals with disabilities. The purpose of the requirement is to ensure that no individual with a disability is excluded, denied services, segregated, or otherwise treated differently than other individuals because of the absence of auxiliary aids and services.

In determining what constitutes an effective auxiliary aid or service, a physician must consider, among other things, the length and complexity of the communication involved. During some doctor's visits a note pad and written materials may be sufficient to permit effective communication, for instance, when a physician is explaining possible side effects resulting from a flu shot. During other visits, however, the use of handwritten notes may be extremely slow or cumbersome (e.g., where information to be conveyed is important, lengthy, or complex). In these situations, the use of an interpreter may be the only effective form of communication. The title III regulation requires the doctor to decide what type of auxiliary aid to provide, but the doctor is first required to consult with the client or patient and determine what auxiliary aids will actually provide effective communication.

While the nature of medical services is considered one factor in determining the effective means of communication, the focus should be not only on the nature of the services, but also on the type of communication among the physician, patient, and companion. The fact that an office visit is characterized as routine does not necessarily negate the need for interpreting services. For instance, an interpreter may be required if a note pad does not facilitate effective communication among the physician, patient and others.

I hope this information is helpful to your constituent. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,
Bill Lann Lee

The Honorable Max Cleland
United States Senator
75 Spring Street, S.W.
Suite 1700
Atlanta, Georgia 30303
Dear Senator Cleland:

This is in response to your request for assistance on behalf of your constituent, xxx xxxx xxxx xxxxx of Rossville, Georgia. xxx xxxxx is disabled and seeks financial assistance to purchase a van.

Staff of the Disability Rights Section, Civil Rights Division, carefully reviewed xxx xxxxxxx request. Our Department enforces the Americans with Disabilities Act of 1990, and section 504 of the Rehabilitation Act of 1973, as amended. Both these laws are considered to be civil rights statutes prohibiting discrimination on the basis of disability; they do not provide financial assistance for persons with disabilities.

There are numerous other federal statutes to provide financial and other support to persons with disabilities, and to protect them from discrimination. We have enclosed a summary of federal programs targeted to assist persons with disabilities that was published by the Department of Education several years ago (Enclosure 1). Separate chapters in this publication describe income, housing, education, health, and transportation

assistance programs. xxx xxxxx should contact the federal, state, or local agencies that directly administer these programs in his area. Also enclosed is a list of organizations within Georgia that serve persons with disabilities (Enclosure 2).

The Office of Special Education and Rehabilitative Services (OSERS), Department of Education, administers most federal special education and rehabilitation programs to assist persons with disabilities. OSERS may have additional information and suggestions for xxx xxxxx with respect to Georgia's programs to assist persons with disabilities. xxx xxxxx may contact OSERS by writing to:

Ms. Judith Heumann
Assistant Secretary
Office of Special Education and
Rehabilitative Services
Department of Education
Room 3006
330 C Street, S.W.
Washington, D.C. 20202
Telephone: (202) 205-5465
The following state government resource in Georgia also may provide xxx xxxxx with information about obtaining the transportation and other financial assistance that he is seeking. He may contact:

Georgia Department of Human Resources
2 Peachtree Street, N.W.
Atlanta, Georgia 30303
Telephone: (404) 657-9358
or
Tools for Life
Georgia Department of Human Resources
Telephone: 1-800-497-8665
I hope this information is responsive to your inquiry.
Please do not hesitate to contact the Department if we can be of assistance in other matters.
Sincerely,
Bill Lann Lee
Acting Assistant
Attorney General
Civil Rights Division

The Honorable Mark Foley
U.S. House of Representatives
Washington, D.C. 20515
Dear Congressman Foley:

This is in response to your letter to the Attorney General. Your letter requests an inquiry by the Department regarding lawsuits alleging violations of the Americans with Disabilities Act ("ADA") filed against businesses located in Palm Beach, Florida. You attached several recent clippings from the Palm Beach newspaper citing examples of lawsuits filed by private attorneys in federal district court to enforce the ADA. As you have noted, the lawsuits were apparently filed by two lawyers on behalf of an organization called Citizens Concerned about Disability Access.

We have carefully reviewed the information provided in your letter and I have decided to refer the matter to the State Bar of Florida for their review. The Attorney General is authorized to enforce title III of the ADA, which applies to public accommodations; she is authorized to investigate alleged violations, undertake compliance reviews of covered entities, and file civil actions in federal court for equitable relief or damages in order to make facilities readily accessible to persons with disabilities. Likewise, private persons are also authorized to file civil actions pursuant to title III against covered entities for injunctive relief to correct the ADA violations; however, only the Attorney General may seek damages under title III. Entities covered by title III include, for example, places of lodging, establishments serving food and drink, places of entertainment, places of public gathering, sales and service establishments, transportation stations, places of public display or recreation, places of education or social services, or places of recreation.

Notwithstanding her authority to enforce the ADA, the law does not give the Attorney General authority to investigate or prosecute plaintiffs or attorneys for filing enforcement actions to remedy title III violations by public accommodations.

Therefore, the Department lacks jurisdiction to investigate or pursue claims of alleged frivolous or harassing litigation by private attorneys who file enforcement actions. Responsibility for investigating such claims lies with the State Bar of Florida or with the judiciary system in which the litigation is pending.

The Department takes very seriously the duty of all lawyers to comply with applicable court rules and codes of professional responsibility. The Federal Rules of Civil Procedure prohibit any attorney from filing a civil action in any United States court that is intended "[f]or any improper purpose, such as to harass or to cause unnecessary delay or needless increase in the cost of litigation." *See* Rule 11, Federal Rules of Civil Procedure. Likewise, local rules of procedure and State canons of professional ethics also require attorneys not to abuse the process of the courts and to maintain professional standards of conduct at all times. Accordingly, I will forward this matter to the State Bar of Florida to advise them of the information provided in your letter. In this case, it is that body which has the authority to review the facts and investigate any potential violations of the standards of professional conduct for attorneys practicing in Florida. I am enclosing herewith a copy of my letter referring this matter to the Florida State Bar.

I hope this information is helpful. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Robert Raben
Assistant Attorney General

The Honorable Ron Wyden
United States Senator
700 NE Multnomah Street
Suite 450
Portland, Oregon 97232

Dear Senator Wyden:

This letter is in response to your inquiry regarding the case, Drew, et. al. v. Merrill and Perinatal Associates, P.C., CA No. 99-810, on behalf of your constituent, Dr. Patrick A. Merrill. The Department recently successfully mediated this matter.

Questions raised by Dr. Merrill are: 1) whether the Americans with Disabilities Act (ADA) specifically encourages the use of alternative dispute resolution (ADR); 2) how the Department of Justice determines whether a case is appropriate for ADR; 3) whether the monetary relief agreed to in the consent decree made sense in light of previous settlement agreements; and 4) whether a physician should be given an opportunity to determine if "effective communication" can occur.

When Congress enacted the Americans with Disabilities Act, it specifically encouraged the use of alternative dispute resolution (ADR). Section 513 of the ADA provides:

Where appropriate and to the extent authorized by law, the use of alternative means of dispute resolution, including settlement negotiations, conciliation, facilitation, mediation, factfinding, minitrials, and arbitration is encouraged to resolve disputes arising under . . . [the ADA]. 42 U.S.C. ï½§ 12212. The Department of Justice restated this provision in section 36.506 of the enclosed title III regulation.

The Division is committed to the active use of mediation and other ADR techniques in appropriate cases. In each case we consider whether the case is an appropriate one for ADR. Of course, Division practice will at times be controlled by rules of federal appellate and district courts. When a litigant or potential litigant makes a request for ADR, a Division manager will review the case and determine whether the case should or should not be subject to ADR.

Before the Department initiates litigation under title III of the ADA, it is our practice to notify opposing parties to set forth the basis upon which we believe there is a violation of the ADA and to encourage resolution. In this case, the Assistant U.S. Attorney and an attorney from the Civil Rights Division spoke to Dr. Merrill's counsel, and exchanged correspondence explaining the ADA requirements for effective communication and our intent to participate in the ongoing litigation. In fact, the Department delayed the filing of a Complaint in this matter because the parties continued to work toward settlement through the attorneys. As a result of those conversations, we were able to resolve a number of issues including agreement on a policy on sign language interpreters and staff training. We were not able to resolve all the issues in this case. When it appeared that the parties had gone as far as possible without an outside mediator, the defendants' attorneys recommended formal mediation. We readily agreed. The parties agreed upon a mediator and went to mediation to resolve the remaining issues in the case.

The monetary relief of $25,000 was agreed to by both the private plaintiffs and defendants in this case. The proper amount of damages is a very fact specific determination and in this case the Department concurred in the final amount. This amount was not excessive given the circumstances of the case. Prior to the negotiations, we had provided Dr. Merrill's counsel with examples of recent damage awards in other cases handled by the Department. For example, in a consent decree with 14 hospitals in the State of Connecticut concerning the provision of sign language interpreters, the hospitals paid $333,000 in compensatory damages to 49 persons with individual amounts ranging from $1,000 to $25,000.

Finally, regarding how a physician can determine how to ensure effective communication, title III requires physicians to furnish appropriate auxiliary aids and services where necessary to ensure effective communication with individuals with disabilities. The purpose of the requirement is to ensure that no individual with a disability is excluded, denied services, segregated, or otherwise treated differently than other individuals because of the absence of auxiliary aids and services.

In determining what constitutes an effective auxiliary aid or service, a physician must consider, among other things, the length and complexity of the communication involved. During some doctor's visits a note pad and written materials may be sufficient to permit effective communication, for instance, when a physician is explaining possible side effects resulting from a flu shot. During other visits, however, the use of handwritten notes may be extremely slow or cumbersome (e.g., where information to be conveyed is important, lengthy, or complex). In these situations, the use of an interpreter may be the only effective form of communication. The title III regulation requires the doctor to decide what type of auxiliary aid to provide, but the doctor is first required to consult with the client or patient and determine what auxiliary aids will actually provide effective communication.

While the nature of medical services is considered one factor in determining the effective means of communication, the focus should be not only on the nature of the services, but also on the type of communication among the physician, patient, and companion. The fact that an office visit is characterized as routine does not necessarily negate the need for interpreting services. For instance, an interpreter may be required if a note pad does not facilitate effective communication among the physician, patient and others.

I hope this information is helpful to your constituent. Please do not hesitate to contact the Department if we can be of assistance in other matters.

The Honorable Gordon H. Smith
United States Senator

One World Trade Center
121 SW Salmon Street
Suite 1250
Portland, Oregon 97204

Dear Senator Smith:

This letter is in response to your inquiry regarding the case, Drew, et al. v. Merrill and Perinatal Associates, P.C., CA No. 99-810, on behalf of your constituent, xxxxx x. x. xxxxxx. The Department recently successfully mediated this matter.

Xx. xxxxxx asked how the United States initiates litigation under title III of the Americans with Disabilities Act. The United States may initiate litigation if there is reasonable cause to believe that any person or group of persons is engaged in a pattern or practice of discrimination or any person or group of persons has been discriminated against and the action raises a matter of public importance. Prior to filing any litigation, it is the practice of the Department of Justice to notify opposing parties, to set forth the basis upon which we believe there is a violation or violations of the ADA, and to encourage resolution without litigation.

The Civil Rights Division is also committed to the active use of mediation in appropriate cases, and we fund an extensive mediation program for new complaints that are not appropriate for litigation or that appear to be relatively uncomplicated and likely to resolve quickly. That program is not used when the Department first becomes involved in a case through a request to intervene in ongoing litigation, as in this case. The matters in dispute in this case were resolved successfully by alternative dispute resolution, as part of the litigation process. In each case, we consider whether the matter is an appropriate one for mediation. Of course, Division practice will at times be controlled by rules of federal appellate and district courts and mediation programs operated by the courts. When a litigant or potential litigant makes a request for mediation, a Division manager reviews the case and determines whether the case should be referred to mediation.

In this case, private counsel to the plaintiffs contacted the Assistant U.S. Attorney and an attorney from the Civil Rights Division about then-ongoing civil litigation. The Assistant U.S. Attorney spoke to Dr. Merrill's counsel, and exchanged correspondence explaining the ADA requirements for effective communication and our intent to participate in the ongoing litigation. In fact, the Department delayed the filing of a Complaint in this matter because the parties continued to work toward settlement through the attorneys. As a result of those conversations, we were able to resolve a number of issues, including agreement on a policy on sign language interpreters and staff training. We were not able to resolve all the issues in this case. When it appeared that the parties had gone as far as possible without an outside mediator, the defendants' attorneys recommended formal mediation. We readily agreed. The parties agreed upon a mediator and went to mediation to resolve the remaining issues in the case.

The monetary relief of $25,000 was negotiated and agreed to by both the private plaintiffs and defendants in this case. The proper amount of damages is a very fact specific determination and in this case the Department concurred in the final amount. This amount was not excessive given the circumstances of the case. Prior to the negotiations, we had provided Dr. Merrill's counsel with examples of recent damage awards in other cases handled by the Department. For example, in a consent decree with 14 hospitals in the State of Connecticut concerning the provision of sign language interpreters, the hospitals paid $333,000 in compensatory damages to 49 persons with individual amounts ranging from $1,000 to $25,000.

Finally, regarding how a physician can determine how to ensure effective communication, title III requires physicians to furnish appropriate auxiliary aids and services where necessary to ensure effective communication with individuals with disabilities. The purpose of the requirement is to ensure that no

individual with a disability is excluded, denied services, segregated, or otherwise treated differently than other individuals because of the absence of auxiliary aids and services.

In determining what constitutes an effective auxiliary aid or service, a physician must consider, among other things, the length and complexity of the communication involved. During some doctor's visits a note pad and written materials may be sufficient to permit effective communication, for instance, when a physician is explaining possible side effects resulting from a flu shot. During other visits, however, the use of handwritten notes may be extremely slow or cumbersome (e.g., where information to be conveyed is important, lengthy, or complex). In these situations, the use of an interpreter may be the only effective form of communication. The title III regulation requires the doctor to decide what type of auxiliary aid to provide, but the doctor is first required to consult with the client or patient and determine what auxiliary aids will actually provide effective communication.

While the nature of medical services is considered one factor in determining the effective means of communication, the focus should be not only on the nature of the services, but also on the type of communication among the physician, patient, and companion. The fact that an office visit is characterized as routine does not necessarily negate the need for interpreting services. For instance, an interpreter may be required if a note pad does not facilitate effective communication among the physician, patient, and others.

I hope this information is helpful to your constituent. Please do not hesitate to contact the Department if we can be of assistance in other matters.

February 23, 2000

The Honorable Bob Goodlatte
Member, U.S. House of Representatives
2 South Main Street
Suite A, First Floor
Harrisonburg, Virginia 22801-3707

Dear Congressman Goodlatte:

This is in response to your inquiry on behalf of your constituent, Dr. xxxxxxx x. xxxxxxx of Harrisonburg, Virginia. Dr. xxxxxxx is a physician who is concerned that the Americans with Disabilities Act of 1990 (ADA) requires him to provide a sign language interpreter for patients needing the service and further expects him to absorb the costs associated with the interpreter services.

We understand Dr. xxxxxxx's concern, but we believe that he may not be aware of the flexibility provided to him under the ADA. Title III of the ADA was enacted to ensure that people with disabilities are not excluded from receiving the benefits and services provided by covered entities, including physicians. However, in enacting title III, Congress carefully struck a balance between the rights of people with disabilities to participate fully in activities of daily life and the legitimate economic needs of the service providers.

The ADA does require physicians to ensure effective communication with patients (and, for pediatric patients, with their parents or guardians.) When one of these individuals has a disability that affects communication (*e.g.,* a hearing impairment), the ADA may require a physician to provide a sign language interpreter or other appropriate auxiliary aid to ensure effective communication, unless the physician can prove that providing the auxiliary aid will fundamentally alter the service or benefit that the physician is providing or result in an undue burden.

Ensuring effective communication does not necessarily require a physician to provide a sign language interpreter each time that a patient requests one. The physician has the right to select the auxiliary aid that will be provided and also the obligation to ensure that the selected method of communication is effective. In making this determination, the physician should consult with the patient to learn what auxiliary aids may be effective in the specific circumstances. For example, if a patient can communicate effectively in writing, then written communication through the exchange of notes or using a computer to facilitate conversation may be effective when a physician is explaining a simple procedure. However, if the information to be conveyed is lengthy or complex, or the patient has difficulty communicating in writing, then the use of written notes may be ineffective. The use of an interpreter may be the only effective form of communication. Thus, Dr. xxxxxxx may not need to provide an interpreter for a routine office visit where paper-and-pen communication is sufficient to provide effective communication between him and his patient.

If an interpreter is necessary to provide effective communication, a physician must provide the interpreter without charge to the person with a disability unless it is an undue burden. The term "undue burden" means "significant difficulty or expense." The evaluation of whether the cost of an auxiliary aid is an "undue burden" may not be based solely on a comparison of the interpreter costs to the revenue generated by the office visit at which the interpreter is present. Instead, the interpreting costs must be considered in relationship to the overall financial resources of the practice and other mitigating factors such as the ability to spread costs throughout the general clientele and the availability of tax credits.

The Internal Revenue Code permits eligible small businesses to receive a tax credit for certain costs of ADA compliance. An eligible small business is one whose gross receipts do not exceed $1,000,000 or whose work force does not consist of more than 30 full-time workers. Qualifying businesses may claim a credit of up to 50 percent of eligible access expenditures that exceed $250 but do not exceed $10,250. Eligible access expenditures may include the costs of providing auxiliary aids and services to persons with disabilities. Further information on the tax credit can be obtained from a local Internal Revenue Service office, or by contacting the Office of Chief Counsel, Internal Revenue Service. The enclosed booklet also provides general information about the tax credit.

I hope this information will be helpful to you. Please do not hesitate to contact the Department if we can be of assistance in other matters.

March 1, 2000
The Honorable Max Cleland
United States Senator
75 Spring Street, S.W.
Suite 1700
Atlanta, Georgia 30303
Dear Senator Cleland:

This is in response to your request for assistance on behalf of your constituent, Mrs. Xxxxxx x. xxxxxx of Stone Mountain, Georgia. Mrs. xxxxxx wrote for information on obtaining financial assistance to purchase a van for her disabled husband who uses a Rangerx wheelchair.

Staff of the Disability Rights Section, Civil Rights Division, carefully reviewed Mrs. xxxxxx's request. Our Department enforces the Americans with Disabilities Act of 1990, and section 504 of the Rehabilitation Act of 1973, as amended. Both these laws are considered to be civil rights statutes prohibiting discrimination on the basis of disability; they do not specifically provide financial assistance for persons with disabilities.

There are numerous other federal statutes to provide financial and other support to persons with disabilities, and to protect them from discrimination. We have enclosed a summary of federal programs targeted to assist persons with disabilities that was published by the Department of Education several years ago (Enclosure 1). Separate chapters in this publication describe income, housing, education, health, and transportation assistance programs. Mrs. xxxxxx should contact the federal, state, or local agencies that directly administer these programs at the local level. Also enclosed is a list of organizations within Georgia that serve persons with disabilities (Enclosure 2).

The Office of Special Education and Rehabilitative Services (OSERS), Department of Education, administers most federal special education and rehabilitation programs to assist persons with disabilities. OSERS may have additional information and suggestions for Mrs. xxxxxx with respect to Georgia's programs to assist persons who need specially equipped vehicles to transport wheelchair users like Mr. xxxxxx. Mrs. xxxxxx may contact OSERS by writing to:

Ms. Judith Heumann
Assistant Secretary
Office of Special Education and Rehabilitative Services
Department of Education
330 C Street, S.W., Room 3006
Washington, D.C. 20202
Telephone: (202) 205-5465

On a similar request from your office last year, we contacted the United Cerebral Palsy Association (UCP) in Georgia and spoke with Ms. Jan Popovich who suggested that the writer seeking financial aid in obtaining a

van should contact UCP with the request. At that time, Ms. Popovich said she could send a resource package targeted to the writer's request for obtaining transportation for a person with disabilities. We reiterate this information for Mrs. xxxxxx. The address for UCP is:

United Cerebral Palsy Association
1665 Tullie Circle
Suite 100
Atlanta, Georgia 30329
Telephone: (404) 329-9390

Ms. Popovich also provided us with several resources in Georgia that might aid Mrs. xxxxxx as well. The agency titles and telephone numbers are:

Foundation for Medically Fragile Children
Telephone: (707) 953-3750

Tools for Life
Georgia Department of Human Resources
Telephone: 1 (800) 497-8665

Georgia Learning Resources System
Telephone: 1 (800) 282-7552

I hope this information is responsive to your inquiry. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Bill Lann Lee
Acting Assistant Attorney General
Civil Rights Division

May 30, 2000

The Honorable Richard C. Shelby
United States Senator
308 U.S. Courthouse
Mobile, Alabama 36602

Dear Senator Shelby:

This letter is in response to your correspondence to me on behalf of your constituent, Mr. xxxxxxx x. xxxx. According to the documents enclosed with your letter, Mr. xxxx has brought a state court case appealing the denial of his application for a variance from a zoning requirement enforced by a local permitting authority.

Our inquiry into the circumstances reveals that, in consideration of flood danger, the zoning requirement prescribes a particular elevation for a dwelling Mr. xxxx is remodeling on beachfront property. Apparently, the local zoning officials denied the request for a variance based on regulations issued by the Federal Emergency Management Agency (FEMA) in its authority relating to safety and insurance. The elevation requirement poses difficulties for Mr. xxxx, who uses a wheelchair, and he asserts that because he is an individual with a disability, under the Fair Housing Act and the Americans with Disabilities Act (ADA), he should be granted a variance from the local zoning ordinance in order to build on ground level.

Title II of the ADA prohibits discrimination on the basis of disability in the programs, services, and activities of state and local government entities. Title II requires public entities to make reasonable modifications to their policies, practices, and procedures, including their zoning policies, practices, and procedures, when such modifications are necessary to ensure that individuals with disabilities are not subjected to discrimination because of their disabilities. 28 C.F.R. ï½§35.130(b)(7). In the appropriate circumstances, granting a variance to a zoning regulation can constitute a reasonable modification required under Title II. However, a modification need not be made if the public entity can demonstrate that making the modification would fundamentally alter the nature of the program, or cause an undue burden. 28 C.F.R. ï½§ 35.150(a)(3).

Zoning restrictions are also covered by the Fair Housing Act, which provides that it is a discriminatory practice to refuse to make a reasonable accommodation in rules, policies, practices, or services when such accommodation may be necessary to afford an individual with a disability equal opportunity to use and enjoy a dwelling. 42 U.S.C. ï½§ 3604(f)(3)(b).

While Title II and the Fair Housing Act require reasonable modification of zoning ordinances and procedures, they do not provide a broad exemption from zoning requirements for individuals with disabilities. Individuals with disabilities must generally comply with their local zoning requirements just as non-disabled individuals must comply. When a particular aspect of a zoning ordinance is alleged to be discriminatory, determination of what constitutes a reasonable modification of that aspect is highly fact-specific, requiring a case-by-case analysis. Crowder v. Kitigawa, 81 F.3d 1480, 1486 (9th Cir. 1996). An inquiry into reasonable modification in the case of your constituent would most likely necessitate findings of fact regarding the nature of the safety and insurance concerns addressed by the FEMA regulation and local ordinance, including the nature of the risks underlying the elevation requirement; the extent of risk posed by granting a variance; and the probability that harm would occur in the event that a variance was granted.

The Department of Justice does not intervene in state court actions implicating the ADA. Nor can the Department override a state court's judicial decision regarding an individual's case in a state judicial proceeding or serve as a reviewer of the judicial decisions of courts in individual cases. Although discrimination on the basis of disability in violation of the ADA may be a basis for challenging a court's decision, that challenge must be made through the applicable appeals procedure, including appeal to the U.S. Supreme Court.

The Department's policy in this regard is based on federal judicial decisions, including U.S. Supreme Court precedent, making clear that judicial determinations by state courts can only be reviewed through the state appellate process and by the U.S. Supreme Court. See, e.g., District of Columbia Ct. Of Appeals v. Feldman, 460 U.S. 462, 476 (1982); Campbell v. Greisberger, 80 F.3d 703, 706-07 (2d Cir. 1996) (federal court has no jurisdiction to hear ADA-based challenge to a state court decision). These cases make clear that ADA challenges to state court decisions must be made through the state appellate process.

I hope this information is helpful to you in responding to your constituent. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Bill Lann Lee
Acting Assistant Attorney General
Civil Rights Division

817

June 13, 2000

The Honorable Bob Graham
United States Senator
2252 Killearn Center Boulevard
Third Floor
Tallahasse, Florida 32308

Dear Senator Graham:

This letter responds to your inquiry on behalf of your constituent, Mr. xxxxx xxxxxxxx, regarding the lack of open-frame beds for individuals with disabilities in hotel rooms. Mr. xxxxxxxx proposes that accessible hotel rooms have open-frame beds, rather than closed-frame beds, for the use of individuals with disabilities. Please excuse our delay in tesponding.

Under the Americans with Disabilities Act of 1990 (ADA), the Department of Justice issues regulations that detail ADA requirements for over six million places of public accommodations, including hotels. The Department's existing rules contain requirements on what constitutes an accessible hotel room and also requires that hotels make reasonable modifications in policies, practices, or procedures when the modifications are necessary to provide accessibility but would not fundamentally alter the hotel's operations. The Department has never provided guidance on whether hotels are required to have open-frame beds in accessible guest rooms to accommodate persons with disabilities who travel with portable mechanical lifts. However, it appears that it would be a reasonable modification for a hotel to provide open-frame beds and would not fundamentally alter the hotel's operations to do so.

In the coming months, the Department will be undertaking additional rulemaking on our ADA regulations. We will take Mr. xxxxxxxx's comments into consideration during that process.

I hope that this information will assist you in responding to your constituent. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Bill Lann Lee
Acting Assistant Attorney General
Civil Rights Division

818

June 29, 2000

The Honorable Charles E. Grassley
United States Senate
Washington, D.C. 20510-1501

Dear Senator Grassley:

This is in response to your inquiry on behalf of your constituent, Ms. xxxx x. xxxxxxx, who was placed on disability retirement from her position as a corrections officer by the State of Iowa in April 1998. Ms. xxxxxxx wishes to return to her position and questions the legality of the retirement under the Americans with Disabilities Act of 1990. (ADA).

The Civil Rights Division's Disability Rights Section shares with the U.S. Equal Employment Opportunity Commission (EEOC) the responsibility for enforcing title I of the ADA, which prohibits disability-based discrimination in employment. EEOC investigates most complaints under title I. Only the Section, however, may initiate litigation against state and local government employers. The Section also enforces section 504 of the Rehabilitation Act of 1973, which prohibigts disability discrimination by recipients of federal financial assistance, with respect to entities such as state corrections systems that receive funds from the Department of Justice. Finally, the Section has authority to investigate certain employment discrimination complaints from state and local government employees under title II of the ADA, which prohibits discrimination in state and local government programs, services, and activities, including employment. Regulations issued to coordinate complaint processing between EEOC and other federal agencies provide that EEOC's title I regulations and appendix, and the case law arising under those regulations, govern the resolution of employment discrimination complaints processed elsewhere under section 504. See 28 C.F.R.ï½§ 37.12.

The EEOC regulations provide that employers must reasonably accommodate qualified individuals with disabilities, upon notice of need, unless to do so would cause undue hardship. Qualified individuals are those who are capable of performing the essential functions of the job with or without accommodation. It appears that Ms. xxxxxxx' employer determined that, because of her disability, she was not qualified to perform as a corrections officer with or without accommodation. It therefore transferred her to a vacant position, that of accountant, a type of accommodation prescribed by the ADA and the EEOC regulations. 42 U.S.C. ï½§12111(9)(B)(1994); 29 C.F.R. ï½§ 1630.2(o)(2)(ii)(1997).

In light of these legal principles, it is unclear whether Ms. xxxxxxx has a viable ADA claim. That would depend upon whether a type of reasonable accommodation existed that would enable her to perform the essential functions of the corrections officer position. Finally, the time frame for filing a complaint with EEOC is 180-300 days from the date of the alleged discrimination, depending upon whether there is a state or local agency authorized to grant relief from the practice at issue. The time frame for filing a title II complaint with the Disability Rights Section is 180 days after the date of the alleged discrimination, unless the time for filing is extended for good cause shown.

I hope this information will assist you in responding to your constituent. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Bill Lann Lee
Acting Assistant Attorney General
Civil Rights Division

819
July 31, 2000
The Honorable Mary L. Landrieu
United States Senate
Washington, D.C. 20510

Dear Senator Landrieu:

This is in response to your inquiry on behalf of your constituent, xxxxx xxxx xxxxxxx, identified in your transmittal letter to the U.S. Department of Justice as Landrieu Project No. 130200. Mr. xxxxxxx wrote to request private or public funding for an audit of existing hotel and transportation facilities, to be conducted by an entity that understands the combined requirements of accessibility, usability, and safety. Based upon his personal experience of inaccessible features in hotel rooms and inadequate or nonexistent taxi service, Mr. xxxxxxx feels strongly that past accessibility reviews have been conducted by entities that fail to possess the requisite understanding of these combined requirements.

Applicable ADA Requirements. Under the Americans with Disabilities Act of 1990, as amended (ADA), and the implementing regulation issued by this Department, hotels that are newly constructed or altered must generally be "readily accessible to and usable by persons with disabilities." Standards for accessibility for this purpose were developed only after extensive consultation with persons with disabilities and organizations representing persons with disabilities.

The ADA and the implementing regulation require existing hotels to remove architectural barriers if it is "readily achievable to do so." "Readily achievable" is defined in the implementing regulation as "easily

accomplishable and able to be carried out without much difficulty or expense," considering such factors as the nature and cost of the action needed.

The ADA and the implementing regulation issued by the Department of Transportation do not in any way address the number of taxis available in any locality. The ADA does, however, prohibit discrimination on the basis of disability in the delivery of taxi services. An example of discrimination of the basis of disability in the delivery of taxi service would be a taxi driver's refusal to accept persons who use service animals as passengers.

The requirements of the ADA with respect to public transportation are more stringent. The ADA does require newly constructed public transit facilities and "key stations" to be accessible to persons with disabilities. Under certain circumstances, the ADA also requires public entities to provide comparable paratransit service for persons with disabilities.

Enforcement of ADA Requirements. The ADA is enforced through the investigation and resolution of individual complaints. In the event that your constituent would like to file a complaint against a specific hotel or hotel chain or against an individual or group of taxi drivers, we have included complaint forms.

The ADA also authorizes this Department to conduct reviews of public accommodations, including hotels. We have used that authority to conduct reviews of newly constructed facilities. Enclosed is a document prepared by this Department entitled "Common ADA Problems at Newly Constructed Lodging Facilities." Nothing in the Act contemplates public funding for private compliance reviews.

We hope this information will be helpful to you in responding to your constituent. As you requested, we are returning your constituent's correspondence. Please do not

hesitate to contact the Department if we can be of assistance in other matters.

April 13, 2000

The Honorable Henry J. Hyde
Chairman
Committee on the Judiciary
U.S. House of Representatives
Washington, D.C. 20515

Dear Mr. Chairman:

This is in response to your letter requesting an inquiry by the Department regarding lawsuits alleging violations of the Americans with Disabilities Act ("ADA") filed against businesses located in El Cajon, California. You attached a letter from xxxxxxxxxxxxxxxxxxxx addressed to Congressman Duncan Hunter complaining that she had settled a lawsuit filed against her and her tenants in federal court involving allegations of ADA title III violations. The lawsuit was filed by an attorney on behalf of an "apparently disabled" person. She explained that rather than bear the expense of litigation, she elected to settle with the plaintiff on behalf of herself and her tenants. In conclusion, xxx xxxxxxx asks the opinion of her Congressman on what can be done to curb

possible abuse of the ADA through unnecessary litigation and whether where is new legislation pending to address her complaint.

The Attorney General is authorized to enforce title III of the ADA, which applies to public accommodations like the strip mall and businesses described in xxx xxxxxxxxx letter. The ADA authorizes the Attorney General to investigate alleged violations, undertake compliance reviews of covered entities, and to file civil actions in federal court for equitable relief of damages in order to make facilities readily accessible to persons with disabilities. Likewise, private persons are also authorized to file civil actions pursuant to title III against covered entities for injunctive relief to correct the ADA violations; however, only the Attorney General may seek damages under title III. Entities covered by title III include, for example, places of lodging, establishments serving food and drink, places of entertainment, places of public gathering, sales and service establishments, transportation stations, places of public display, places of education or social services, or places of recreation.

Notwithstanding her authority to enforce the ADA, the law does not give the Attorney General authority to investigate or prosecute plaintiffs or attorneys for filing enforcement actions to remedy title III violations by public accommodations. Therefore, the Department lacks jurisdiction to investigate or pursue claims of alleged frivolous or harassing litigation by private attorneys who file enforcement actions. Responsibility for investigating such claims lies with the state bar or with the judiciary system in which litigation is pending.

The Department takes very seriously the duty of all lawyers to comply with applicable court rules and codes of professional responsibility. The Federal Rules of Civil Procedure prohibit any attorney from filing a civil action in any United States court that is intended "[f]or any improper purpose, such as to harass or to cause unnecessary delay or needless increase in the cost of litigation." See Rule 11, Federal Rules of Civil Procedure. Likewise, local rules of procedure and state canons of professional ethics also require attorneys not to abuse the process of the courts and to maintain professional standards of conduct at all times. In this case, if xxx xxxxxxx identifies individual attorneys or allegations that may reveal a violation of professional standards by specific attorneys, she may want to bring this information to the attention of the relevant disciplinary entities.

In response to xxx xxxxxxxxx question regarding new legislation, your colleagues, Congressman Foley and Congressman Shaw, both of Florida, have introduced proposed legislation to require that title III entities be given ninety days' notice of a violation before they can be sued. The Department is deeply committed to enforcement of the ADA, and we join members of Congress in seeking to protect the civil rights of persons with disabilities.

I hope this information is helpful. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,

Robert Raben
Assistant Attorney General

cc: The Honorable John Conyers, Jr.
Ranking Minority Member

September 14, 2000

The Honorable Bob Graham
United States Senator
2252 Killearn Center Boulevard
Third Floor
Tallahassee, Florida 32308

Dear Senator Graham:

This is in response to your inquiry on behalf of your constituent, xxx xxxxxxx xxxxxx, whose concerns were brought to your attention by The Honorable Doug Wiles, Florida State Representative.

Xxx xxxxxx, who is deaf, reportedly considered running for election to the St. Johns County Board of Commissioners. He decided not to seek public office when he discovered that the Florida Division of Elections would not provide sign language interpreters so that he could participate in community forums and debates. Representative Wiles inquired whether the Americans with Disabilities Act would entitle xxx xxxxxx to any assistance.

Legal Requirements

Title II of the Americans with Disabilities Act (ADA) protects qualified individuals with disabilities from discrimination in the programs, services, and activities of public entities such as the Florida Division of Elections.

The Department of Justice's regulation implementing title II provides that a public entity must ensure that its communications with individuals with disabilities are as effective as communications with others and must furnish appropriate auxiliary aids and services where necessary to afford an individual with a disability an equal opportunity to participate in, and enjoy the benefits of, a service, program, or activity conducted by a public entity. 28 C.F.R. ï½§ 35.160. A public entity is not required to take any steps that would result in a fundamental alteration in the service, program, or activity or in undue financial and administrative burdens. 28 C.F.R. ï½§ 35.164.

Discussion

According to the information provided on its Internet site (www.election.dos.state.fl.us), the Florida Division of Elections has a variety of legal and administrative responsibilities, including, among others:

- overseeing the interpretation and enforcement of election laws;
- prescribing rules and regulations to carry out the provisions of election laws;
- providing advisory opinions to supervisors of elections and others;
- maintaining voter fraud hotline and providing election-fraud education to the public; and
- conducting regional workshops around the state for supervisors of elections, candidates, political committees, political parties, and others.

Significantly, the Division of Elections does not appear to provide any campaign resources to political candidates.

Under title II of the ADA, the Division of Elections must ensure that each of its activities is free from disability-based discrimination. For instance, with respect to its regional workshops and election fraud education sessions, the Division of Elections should provide appropriate auxiliary aids and services upon request, such as qualified sign language interpreters, to qualified individuals with disabilities for whom such aids or services are necessary for effective communication, unless doing so would impose an undue burden or result in a fundamental alteration. On the other hand, the Division of Elections is not required to provide auxiliary aids and services for other election-related activities, over which it exercises no administrative control and for which it provides no financial or other resources. Assuming that the Division of Elections neither administers nor sponsors the community forums and debates at issue, the Division of Elections would not have any obligation under title II of the ADA to provide auxiliary aids and services for those forums and debates.

It is the entities that hold the community forums and debates at issue that are generally obligated under ADA titles II, 42 U.S.C. ï½§ï½§ 12131 et seq., 28 C.F.R. pt. 35 (covering public entities), and title III, 42 U.S.C. ï½§ï½§ 12181 et seq., 28 C.F.R. pt. 36 (covering private entities) to provide appropriate auxiliary aids and services to qualified persons with disabilities, unless doing so would fundamentally alter the nature of the good, service, or program that is being provided, or would result in an undue burden. [(1)] For example, if a private entity such as the League of Women Voters were to hold a public debate among candidates running for seats on the St. Johns County Board of Commissioners, it would have to comply with title III of the ADA with respect to this activity, including the obligation to provide auxiliary aids and services to qualified individuals with disabilities, unless doing so would impose an undue burden or result in a fundamental alteration.

I hope this information is helpful to you. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,

Bill Lann Lee
Assistant Attorney General
Civil Rights Division

1. Religious entities and certain private clubs are exempt from title III of the ADA. 42 U.S.C. ï½§ 12187; 28 C.F.R. ï½§ 36.102(e).

822

October 3, 2000

The Honorable Steven T. Kuykendall
Member, U.S. House of Representatives
21311 Hawthorne Boulevard
Suite 250
Torrance, California 90503-5610

Dear Congressman Kuykendall:

I am responding to your letter on behalf of your constituent, xxx xxxxxxxxxxxxxxxxx, who inquires about the applicability of the Americans with Disabilities Act of 1990 (ADA) to the transportation needs of his mother, Xxxx xxxxxxxxxxxxx. xxxx xxxxxxx, who according to her son is bedridden, must engage a private agency for transportation services to her medical appointments. That agency carries her from her condominium up and down 30 stairs and charges $175.00 per trip. Please excuse our delay in responding.

The Department of Transportation (DOT) is responsible for enforcing the ADA's transportation provisions, including those pertaining to paratransit services. The DOT regulation implementing these transportation provisions defines paratransit as "comparable transportation service required by the ADA for individuals with disabilities who are unable to use fixed route transportation systems." Paratransit service is complementary to fixed route transportation and is demand responsive, providing origin to destination service. While the ADA requires that the service must go from the user's point of origin to his or her destination point, detailed operational decisions rest with the local paratransit systems. These local paratransit plans may provide for door-to-door or curb-to-curb service. The ADA does not mandate additional service, such as that required by xxxx xxxxxxx.

In fact, the preamble to DOT's regulation states that "... the ADA does not attempt to meet all the transportation needs of individuals with disabilities"; rather, it simply provides individuals with disabilities with the same mass transportation opportunities as others in the population. The preamble further states that the "ADA is a civil rights statute, not a transportation or social service program statute"; the ADA, then, does not intend complementary paratransit to be a comprehensive transportation system, but instead a "safety net" for individuals with disabilities who cannot use the fixed route system.

For your information, we have enclosed a copy of the DOT regulation, "Transportation Services for Individuals with Disabilities," 49 C.F.R. pt. 37. We also have included the portion of the regulation's preamble pertaining to paratransit service, which is in subpart F of the regulation. Please note that the "Urban Mass Transit Administration," is now known as the "Federal Transit Administration." If you or your constituent have questions about the DOT regulation you may contact:

Mr. Ronald Stroman
Director
Departmental Office of Civil Rights
Office of the Secretary
Department of Transportation
400 7th Street, S.W., Room 10215
Washington, D.C. 20590
Telephone: (202) 366-4648

You or your constituent, however, may wish to contact agencies or organizations in Los Angeles County that provide transportation and other services or referrals, including case management services, for the elderly and for individuals with disabilities. The following are agencies that may be able to provide assistance:

Westside Center for Independent Living
12901 Venice Boulevard
Los Angeles, California 90066
(310) 390-3611 # 211 (Veronica Addison)

Los Angeles County Area Agency on Aging
3333 Wilshire Boulevard, 4th Floor
Los Angeles, California 90010
(213) 738-4004

Wise Senior Services
Care Management
1527 4th Street, Suite 200
Santa Monica, California 90401-2354
(310) 576-2550 # 217 (Stacey Monroe)

I hope that this information will assist you in responding to your constituent. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,

Bill Lann Lee
Assistant Attorney General
Civil Rights Division

October 13, 2000

The Honorable Phil Gramm
United States Senate
Washington, D.C. 20510-4302
Dear Senator Gramm:

This letter is in response to your inquiry on behalf of Judge Arthur Ware, Potter County, Texas. Judge Ware seeks information about the availability of federal financial assistance for capital improvements to Potter County court facilities to promote compliance with the Americans with Disabilities Act of 1990 (ADA).

Staff of the Disability Rights Section, Civil Rights Division, researched potential sources of funding in response to Judge Ware's request. No federal domestic assistance programs specifically earmarked for accessibility renovations and security upgrades to state and local court buildings were found. Some state and local courts have, nonetheless, been successful over the years in their efforts to obtain federal assistance for capital improvements.

Funding sources have been innovative and wide-ranging according to Mr. Bob Tobin of the National Center for State Courts (NCSC). They have included such methods as funding associated with federal agencies such as the Federal Emergency Management Agency following disaster-related damage, urban-renewal funding through the Department of Housing and Urban Development (HUD), "impact funds" associated with a significant "federal presence" in the local community, "move-ins" to vacated federal facilities, and so forth. In 1995, the State Justice Institute published a study entitled "A Court Manager's Guide to Court Facility Financing", authored by Mr. Tobin. It describes creative financing efforts undertaken by local court systems. A copy of the guide may be available from the offices/libraries of the Texas State Court Administrator. It can also be ordered directly from the NCSC Publications Catalog available on the web (Enclosure 1).

The Department of Justice (DOJ) is currently funding an NCSC office to provide technical assistance on architectural standards and other resources to state and local courts to help them comply with the ADA. Information on this project is available through:

Ms. Deanna Parker
Project Director, ADA Resources
National Center for State Courts
300 Newport Avenue
Williamsburg, Virginia 23185
Telephone (800) 616-6164 Ext.1863
(757) 564-2051 (Fax)
(757) 259-1845 (TDD)

The Department's Bureau of Justice Assistance (BJA) administers criminal justice formula grants and HUD administers federal aid to promote community development under its Community Development Block Grants Program. We understand that funding for facility renovations of state and local courts may be eligible for consideration under these programs. Information about these block grant programs may be obtained directly from these agencies by contacting HUD and BJA respectively at:

Mr. Cardell Cooper
Assistant Secretary
Office of Community Planning and Development
HUD
Washington, D.C. 20410
Telephone (202) 708-2690

Ms. Nancy Gist
Director
Bureau of Justice Assistance
Office of Justice Programs
DOJ
810 7th Street, N.W.
Washington, D.C. 20531
Telephone (202) 514-6278

An additional resource that Judge Ware might find useful is entitled "Opening the Courthouse Door; An ADA Access Guide for State Courts", published by the American Bar Association's Commission on Mental and Physical Disability Law in 1992. This guide contains a chapter with suggestions on funding resources that may be helpful to provide access to the courts for persons with disabilities. We could not provide a copy of this copyrighted material but it is available by contacting:

American Bar Association
Commission on Mental and Physical
Disability Law
740 15th Street, N.W.
Washington, D.C. 20005
Telephone (800) 988-2221
Refer to ABA Product Code No. 344-0022

We also suggest a review of programs listed in the Catalog of Federal Domestic Assistance now available on the web (Enclosure 2). It is the most comprehensive summary of financial assistance available from the federal government and includes information about application procedures for both block (formula) and discretionary grants. According to Ms. Parker of NCSC, it is possible that courts may qualify for funding under the Department of Transportation's (DOT) block grant transportation programs, as well as those administered by HUD and BJA. DOT's block grants are listed in the Catalog.

With respect to Judge Ware's request about obtaining additional drug enforcement agents and border patrol personnel in his area, we have referred his correspondence directly to the Drug Enforcement Administration and Immigration and Naturalization Service for their review.

I hope this information is useful in responding to your constituent. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,

Bill Lann Lee
Assistant Attorney General
Civil Rights Division

824

January 5, 2001

The Honorable Don Nickles
United States Senator
3310 Mid-Continent Tower
409 South Boston
Tulsa, Oklahoma 74103-4007

Dear Senator Nickles:

This letter is in response to your inquiry on behalf of your constituent, xxxxxxxxxxxxxxxxxxxxxxxx, Oklahoma, who designs web sites. Xxxxxxxxxx questions whether or not section 508 of the Rehabilitation Act of 1973, as amended (section 508) applies to websites made available to the general public by private industry or by state and local governments. Please excuse our delay in responding.

According to his letter, xxxxxxxxxx found contradictory information when he tried to conduct online research regarding "the Americans with Disabilities Act Title III Section 508." xxxxxxxxxxx confusion appears to stem from a misunderstanding of the differences between the Americans with Disabilities Act of 1990 (ADA) and a separate law - the previously mentioned section 508. As stated in the Department of Justice's technical assistance materials quoted by xxxxxxxxxx, section 508 does not apply directly to any individuals or entities other than the federal government. The ADA, however - not section 508 - controls the degree to which the websites of state and local governments, and those of private entities falling within the definition of "public accommodation," must be made accessible to individuals with disabilities.

The applicability of the ADA to the online activities of covered entities is explained in the enclosed brief, which was filed with the Fifth Circuit Court of Appeals in the case of Hooks v. Okbridge. The brief explains that commercial businesses that otherwise qualify as "public accommodations" - whether they provide services solely over the Internet or in combination with a "bricks and mortar" establishment - are subject to the ADA's prohibition against discrimination on the basis of disability.

xxxxxxxxxx' allegation that the Department reserves its technical assistance for its own employees rather than for the tax-paying public is mistaken. xxxxxxxxxx directed his question to an e-mail address (sec508.questions@usdoj.gov)(link sends e-mail), which is indeed reserved for use by federal employees who are responsible for their agencies' compliance with section 508. The Department has limited the scope of this e-mail address because section 508 only applies to federal agencies. All persons who send messages to this address receive the same automated reply that xxxxxxxxxx received. [(1)] This automated response was carefully designed to give members of the public, who are seeking information about section 508 or the ADA, the toll-free telephone numbers of the Department's ADA Information Line, where specially trained staff members are prepared to answer their questions. Only the targeted e-mail address (sec508.questions@usdoj.gov)(link sends e-mail) is reserved for federal employees.

I hope this information will assist you in responding to your constituent and that our explanation clarifies the pertinent differences between section 508 and the ADA. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,

Bill Lann Lee
Assistant Attorney General
Civil Rights Division

Enclosure

1. The text of the automated e-mail response is as follows:

This e-mail address (sec508.questions@usdoj.gov)(link sends e-mail) is reserved for federal employees who are working with their agencies' compliance with section 508 of the Rehabilitation Act.

If you are a federal employee corresponding on behalf of an agency, we will respond to your message as soon as possible.

If you are not a federal employee, you will not receive a response to your inquiry, nor will you receive any other acknowledgment of your correspondence. We regret this circumstance, but our limited resources prevent us from responding to inquiries unrelated to the implementation of section 508 by public agencies.

Anyone with general questions about the Americans with Disabilities Act (ADA) may call the Department of Justice's toll free ADA Information Line, 1-800-514-0301 (voice) or 1-800-514-0383 (TTY). Thank you.

825

January 19, 2001

The Honorable Bob Graham
United States Senator
2252 Killearn Center Boulevard
Third Floor
Tallahassee, Florida 32308

Dear Senator Graham:

This is in response to your inquiry on behalf of your constituents, xxxxxxxxxxxxxxxxxxxxxx. Xxxxxxxxxxxxxxxxx have asked that the Americans with Disabilities Act (ADA) be amended to prohibit the "forced" relocation of persons with developmental disabilities to a more integrated setting. Please excuse our delay in responding.

The xxxxx letter describes the situation of their son, xxxxx xxxxx, as follows. xxxxx is an adult with developmental disabilities who is a long-time resident of the Melmarck Institute, located in Pennsylvania. County and state officials want xxxxx to be moved to a smaller home in order to comply with the ADA mandate for community-based housing for persons with developmental disabilities, despite his desire to remain in his current setting, and have denied the request of xxxxxxx family to apply his Medicaid payments to the cost of his current home.

The Department of Health and Human Services (HHS), through its regional office in Philadelphia, Pennsylvania, has fully and thoroughly investigated the numerous complaints that xxxxxxx xxxxxxxxxx have filed against Pennsylvania agencies in connection with their son. These complaints have been rejected by HSS on the basis that the actions of the agencies were consistent with the ADA's requirement for treatment in the most integrated setting appropriate to the needs of persons with disabilities. Attached are two letters sent by HSS to xxxxxxxxxxxxxxxxxx in May 1999 and February 2000. It should be noted that the Department does not serve as a reviewing authority for the administrative actions or decisions of other federal agencies following their investigations of complaints about discrimination.

Providing programs and services in the most integrated setting appropriate to the needs of persons with disabilities is a core concept of the ADA and the Department's implementing regulations. The application of this concept to persons with developmental disabilities was recently upheld by the Supreme Court in Olmstead v. Zimring (527 U.S. 581, 1999) (holding that mentally disabled patients may in specified

circumstances compel a state to provide them treatment in a less segregated setting). The concept of the enhanced integration of persons with disabilities is a fundamental principle underlying the ADA and its goal of a fuller life for the persons it is designed to protect. The amendment to the ADA requested by xxxxxxxxxxxx xxxxx could undermine the efforts by states to provide services to people with disabilities in their communities.

We hope this information will be helpful to you in responding to your constituents. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,

Bill Lann Lee
Assistant Attorney General
Civil Rights Division

Enclosures

826

January 19, 2001

The Honorable William E. Kennard
Chairman
Federal Communications Commission
Washington, DC 20554

Dear Chairman Kennard:

Thank you for your informative letter to Attorney General Reno concerning whether the federal regulations implementing the Americans with Disabilities Act of 1990 (ADA) require covered entities to provide an effective means of telephone communication for individuals with disabilities who are unable to access interactive voice response systems and voicemail. Your letter provides information that people with disabilities who rely on relay services to facilitate telephone communication are unable to use these systems despite the Federal Communications Commission's (FCC) repeated efforts to address access through the regulations governing the relay system required by title IV of the ADA and the regulations implementing the Telecommunications Act of 1996.

Your letter suggests that there are several alternative means through which access to the services provided by IVR systems or voicemail may be provided to individuals with disabilities. These options include obtaining and using accessible IVR and voicemail equipment, providing a dedicated TDD line, allowing an individual to "opt out" of an IVR system to speak with a live operator, or providing an alternative telephone number at which a relay system user could contact a live operator.

At the present time, the regulations implementing the ADA, 28 C.F.R. pts.. 35 and 36, do not require covered entities to utilize accessible IVR systems, accessible voicemail equipment, or dedicated TDD lines. Public entities are required to use TDD's or "equally effective telecommunications systems" when the public

entity communicates with applicants and beneficiaries by telephone. 28 C.F.R. section 35.161. However, the appendix to the regulation specifically states that public entities may meet this obligation by utilizing the TDD relay service required by title IV of the ADA. 28 C.F.R. pt. 35, App. A. Similarly, the auxiliary aids provisions of the title III regulation, 28 C.F.R. section 36.303(d)(2), provides that "[t]his part does not require a public accommodation to use a TDD for receiving or making telephone calls incident to its operations." In responding to commenters who questioned the application of these provisions to automated systems or voice recordings, the Department noted its view that these telecommunication issues would be more appropriately addressed by the FCC in its rulemaking under title IV of the ADA. 28 C.F.R. pt. 35, App. A; 28 C.F.R. pt. 36, App. B.

It is significant to us that, although the FCC has addressed these issues in its regulations, you continue to receive a significant number of consumer complaints that indicate that the FCC's regulations have failed to ensure that relay system users achieve effective communication with entities that use interactive voice response systems or voicemail. Because the FCC's extensive efforts have not proven successful in providing effective communication, we believe that it is appropriate and necessary for the Department of Justice to revisit this issue under the ADA regulations. We anticipate that the Department will be proposing amendments to its ADA regulations later this year. We will include new regulatory language on the use of interactive voice response systems and voicemail among the issues that are addressed in that rulemaking. We will also include the information in your letter as a factual basis for the development of new rules establishing requirements for what constitutes effective communication.

Thank you for bringing this important issue to our attention. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,

Bill Lann Lee
Assistant Attorney General
Civil Rights Division

827

January 19, 2001

The Honorable Max Sandlin
Member, U.S. House of Representatives
Post Office Box 538
Sulphur Springs, Texas 75483

Dear Congressman Sandlin:

This letter is in response to your inquiry on behalf of your constituent, xxx xxxxx xxxx. Xxx xxxx sent you an email regarding the Americans with Disabilities Act (ADA) requirements for private toilet and bathing facilities. Please excuse the delay in responding.

Title III of the ADA, which prohibits discrimination against persons with disabilities by public accommodations, requires owners or operators of a place of public accommodation, such as a restaurant, bank, hospital, car dealership, etc., to remove architectural barriers to access. Title III also requires facilities that are newly designed, constructed or altered to be readily accessible to and usable by persons with disabilities. Therefore, the ADA requires all public and common use toilet and bathing facilities to be accessible to people with disabilities. A limited exception, however, exists for private toilet and bathing facilities intended

for the use of a single occupant of a private office. The ADA requires that private toilet and bathing facilities must be designed to be "adaptable," that is, designed to be easily modified to be accessible.

In his email, xxx xxxx comments that his employer, a hospital, constructed toilet and bathing facilities for the use of its emergency medical service personnel. Under the ADA, toilet and bathing facilities for the use of employees are considered common use facilities. Therefore, the hospital's common use toilet and bathing facilities must be accessible to people with disabilities.

xxx xxxx also comments in his email that a friend, who owns a car dealership, wishes to construct a new building which includes a private shower in his office. The ADA does not require private toilet and bathing facilities for the use of the occupant of a private office to be fully accessible at the time of construction. The ADA, however, requires the private toilet and bathing facilities to be designed to be adaptable so that accessible elements can be easily installed when needed after construction.

Please note that the ADA establishes only minimum accessibility requirements. Nothing in the ADA prohibits state and local governments from establishing and enforcing more stringent requirements for accessibility. Therefore, the State of Texas or a local building authority may require toilet and bathing facilities that serve private offices to be fully accessible.

If xxx xxxx has additional questions, he may wish to call the Department's ADA Information Line. The ADA Information Line provides technical assistance regarding the rights and obligations of individuals, businesses, agencies, and others covered or protected by the ADA. This technical assistance is available by calling 800-514-0301 (Voice) or 800-514-0383 (TDD).

I hope this information is helpful to you in responding to your constituent. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,

Bill Lann Lee
Assistant Attorney General
Civil Rights Division

828

February 6, 2001

Dr. Henry Betts
Past Medical Director/President/CEO
Rehabilitation Institute of Chicago
345 East Superior Street
Chicago, Illinois 60611-4496

Dear Dr. Betts:

This letter is in response to your request that the Attorney General address two issues:

- the accessibility to persons with disabilities of programs conducted under the federal E-Rate Discount Program, 47 U.S.C.A. ï½§ 254(h); and
- the accessibility of information kiosks in airports.

E-Rate Program

The Universal Service Fund for Schools and Libraries (E-Rate Program) was created by section 254 of the Communications Act, 47 U.S.C. ï½§ 254. It is administered through a nonprofit entity, the Universal Service Administrative Company, Schools and Libraries Division, and funded through the Federal Communications Commission.

Recipients of federal funds are subject to section 504 of the Rehabilitation Act of 1973, as amended, 29 U.S.C. ï½§ 794a. Section 504 generally requires programs to be accessible to people with disabilities. Under section 504, schools and libraries that receive federal assistance through the E-Rate Program or other federal program should provide their computer and telecommunications services in a manner that does not discriminate against people with disabilities. For instance, a library may need to provide an appropriate auxiliary aid or service - such as screen reading software - upon request to a user who is blind, unless doing so would impose an undue hardship. It may also need to ensure that a computer station is configured so that it can be utilized easily by someone who uses a wheelchair and take other appropriate actions.

In addition, regardless of whether schools and libraries receive federal assistance, they have obligations under the Americans with Disabilities Act (ADA). Public schools and public libraries are covered by title II of the ADA, while private schools and private libraries are covered by title III of the ADA.

As you know from your work in this area, section 504 of the Rehabilitation Act and titles II and III of the ADA incorporate some degree of flexibility in determining how entities may meet their nondiscrimination obligations.

If you have specific information about libraries or schools that have violated section 504 of the Rehabilitation Act or title II of the ADA, please send that information to the U.S. Department of Education. The office serving your region is:

Mr. Don Pollar
Office for Civil Rights
Midwestern Division
U.S. Department of Education
111 North Canal Street, Suite 1053
Chicago, Illinois 60606

Title III of the ADA covers private entities that may or may not receive federal financial assistance. If an entity receives federal funds, it is covered by section 504. Complaints against such an entity may be referred to the Department of Education at the above address. Complaints against private entities that do not receive federal financial assistance may be directed to the Department of Justice at the following address:

Disability Rights Section
Civil Rights Division
Department of Justice
P.O. Box 66738
Washington, D.C. 20035-6738

Information Kiosks

The various types of entities that own or operate information kiosks at airports are subject to different federal disability rights laws. Airlines are covered by the Air Carriers Access Act, 49 U.S.C.A. ï½§ 41705. Public entities, such as state and local governments, are covered by title II of the ADA, 42 U.S.C. ï½§ 12131-61. Private entities whose actions affect commerce and who fall within one or more of 12 "public accommodation" categories - including, among others, banks or insurance companies - are subject to title III of the ADA, 42 U.S.C. ï½§ï½§ 12181-88. All commercial entities - including those that are not "public accommodations" - are subject to the new construction and alteration provisions of title III. All entities receiving federal assistance are subject to section 504 of the Rehabilitation Act. The legal obligations contained in these laws differ in some significant respects.

The Department of Justice offers extensive technical assistance on the ADA. The ADA Information Line is available during weekdays to provide technical assistance. It also provides a 24-hour automated service for ordering ADA materials. This free service provides answers to general and technical questions about ADA requirements and is a source for free ADA materials. You may reach the ADA Information Line by calling:

1-800-514-0301 (voice)
1-800-514-0383 (TTY)

ADA information is also available on the Department of Justice's ADA Home Page:

www.usdoj.gov/crt/ada/adahom1.htm

Questions regarding an entity's obligations under section 504 of the Rehabilitation Act are generally handled by the federal agency that is providing financial assistance to the entity. The Department of Transportation is likely to be the agency to contact for many airport operations:

Ms. Mary N. Whigham Jones
Deputy Director
Departmental Office of Civil Rights
Office of the Secretary
Department of Transportation
400 7th Street, S.W., Room 10215
Washington, D.C. 20590

The Department of Transportation is also the appropriate agency to respond to questions regarding the Air Carriers Access Act.

Finally, you suggest that the issue of whether information kiosks at airports have to be accessible to persons with disabilities is governed by section 508 of the Rehabilitation Act, 29 U.S.C. ï½§ 794d. Section 508 applies to federal agencies' electronic and information technology. Information kiosks at airports - unless those kiosks are owned or operated by federal agencies - are not directly subject to section 508. The Department of Education is responsible for determining whether state governments' electronic and information technology must comply with the accessibility standards for section 508, as part of their responsibilities under the Assistive Technology Act, as amended, 29 U.S.C. ï½§ï½§ 3001 et seq. Questions about whether state governments that own airports have a responsibility to ensure that their information kiosks are accessible to persons with disabilities under the Assistive Technology Act should be directed to the Department of Education.

We hope this information has been helpful to you. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,

John L. Wodatch
Chief
Disability Rights Section

829

February 6, 2001

The Honorable Ted Stevens
United States Senator
Federal Building - Box 4
101 12th Avenue
Fairbanks, Alaska 99701

Dear Senator Stevens:

This is in response to your inquiry on behalf of your constituent, xxxxxxxxxxxxxx, who contacted you about a complaint he filed with the Disability Rights Section of the Civil Rights Division. Please excuse our delay in responding.

We did receive to complaints from xxx xxxxxxx on July 12, 2000. One named the Fairbanks North Star Borough and the other named the 4th Judicial District of the Alaska state courts. Both concern xxx xxxxxxx's property tax dispute with the Borough and the alleged failure of both entities to provide effective communication to xxx xxxxxxx, who is blind.

We apologize for the delay in responding to xxx xxxxxxx. His complaints raised a number of complicated issues that have engendered a thorough review. The first is whether the Borough, as a public entity, had an obligation to provide him with documents in alternate formats when interacting with xxx xxxxxxx as a citizen. The answer is clearly "yes." Under title II of the Americans with Disabilities Act of 1990 (ADA), a state or local government entity must take such steps as are necessary to ensure that communication with members of the public with disabilities is as effective as communication with others, unless to do so would cause a fundamental alteration of the program, activity, or service or an undue financial or administrative burden. The Department has specifically stated that tax bills, for example, must be made available in large print or audio tape (or Braille, if necessary) for persons with vision impairments. The Americans with Disabilities Act Title II Technical Assistance Manual, II-7.1000 (1993 and 1994 Supp.)

It appears from the information provided that the Borough provided audio tapes of documents to xxx xxxxxxx until he filed suit against it. The second issue, then, is whether, once the Borough became a defendant, it had an obligation to provide its court pleadings in an accessible format. The Department has not interpreted the law to require this result.

Xxx xxxxxxx has also alleged, however, that the state court failed to communicate effectively with him in the course of adjudicating his dispute with the Borough. Under title II, access to the case files in the court clerk's office is a covered "service" to which the duty to provide effective communication attaches. It appears from the information provided that the clerk's office of the 4th Judicial District attempted to provide audio tapes of the court's written rulings and correspondence to xxx xxxxxxx the contents of the whole court record, including the submissions of the Borough, or believed that the task would have constituted an undue administrative or financial burden.

I regret to say that the Disability Rights Section cannot pursue these issues further, however, because it simply lacks the resources to do so. I can understant xxx xxxxxxx's frustration at our inability to take up his cause. I am sorry that we cannot assist every individual whose ADA rights may have been violated.

Additionally, it is unclear what could be done at this juncture to remedy the alleged ADA violation that occurred in the course of xxx xxxxxxx's state court litigation. The Department does not have the authority to review the judicial decisions of courts in individual cases. Although discrimination on the basis of disability in violation of the ADA may be a basis for challenging a court's decision, that challenge must be made through the applicable judicxial appeals procedure.

The Department policy in this regard is based on federal judicial decisions, including U.S. Supreme Court precedent. See, e.g., District of Columbia Ct. or Appeals v. Feldman, 460 U.S. 462, 476 (1982); Campbell v. Greisberger, 80 F.3d 703, 706-707(2d Cir. 1996) (federal court has no jurisdiction to hear an ADA-based challenge to a state court decision). These cases make clear that ADA challenges to state or local court decisions must be made through the state and local appellate process, ultimately including appeal to the U.S. Supreme Court.

We have enclosed a list of organizations in Alaska that advise and advocate on disability issues. Xxx xxxxxxx may wish to consult one of these to explore any options or bases on which to appeal the decision made with respect to his tax case.

I hope this information is useful in responding to your constituent. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,

William R. Yeomans
Chief of Staff
Civil Rights Division

Enclosures

The Honorable Steny H. Hoyer
Member, U.S. House of Representatives
U.S. District Courthouse
6500 Cherrywood Lane, Suite 310
Greenbelt, Maryland 20770

Dear Congressman Hoyer:

This is in response to your inquiry on behalf of your constituent, xxxxxxxxxxxxxxxxxxxxxxxxx, concerning the complaint she filed with this office under title III of the Americans with Disabilities Act of 1990 (ADA).

Initially, you requested our guidance on the statute of limitations for private litigation under title III of the ADA. Title III of the ADA is silent with respect to the statute of limitations for private litigation. You should be aware, however, that because title III is silent on the statute of limitations period for private rights of action, federal courts, when applying the ADA, will apply the most analogous state statute of limitations. "When Congress has not established a time limitation for a federal cause of action, the settled practice has been to adopt a local time limitation as federal law if it is not inconsistent with federal law or policy to do so." (Wilson v. Garcia, 471 U.S. 261, 266 (1985)). This process was endorsed by Congress in 42 U.S.C. ï½§ 1988(a), which directs the court to 1) follow federal law if federal law provides a limitations period; 2) apply the common law, as modified by state constitution or statute, if no limitations period is provided by federal law; but 3) apply state law only if it is not inconsistent with the Constitution and laws of the United States. (Hickey v. Irving Indep. Sch. Dist., 976 F.2d 980 (5th Cir. 1992)). Federal courts generally interpret Congressional silence on statute of limitations periods as a directive to apply the most closely analogous statute of limitations under state law by considering the essential nature of the federal claim and the extent to which the proceedings provided under respective state and federal causes of action are functionally equivalent. (Owens v. Okure, 488 U.S. 235 (1989); Andrews v. Consolidated Rail Corp., 831 F.2d 678 (7th Cir. 1987); Wills v. Ferrandino, 830 F. Supp. 116 (D. Conn. 1993)). Because title III does not provide its own statute of limitations for private rights of action, the court must "borrow" the most appropriate state statute of limitations.

Thus, if xxxxxxxxxxxx decides to bring a private right of action under title III, proceedings may be time-barred by statutes of limitations applied by the courts. Xxxxxxxxxxxx may wish to consult a private attorney to determine the appropriate statute of limitations in Maryland.

xxxxxxxxxxxx also wished to express her dissatisfaction with the Department's handling of her complaint. We regret that xxxxxxxxxxxx was dissatisfied with the outcome of our investigation. In addition to litigation, there are a number of avenues that xxxxxxxxxxxx may wish to pursue to resolve this complaint, including consulting state or local authorities, disability rights organizations, or organizations that provide alternative dispute resolution services. We have enclosed a list of organizations serving your area. These groups may be able to identify resource groups available to provide assistance. A state or local bar association may also be able to provide the names of private attorneys or mediation services that handle disability rights matters.

To assist members of the public to understand their rights and responsibilities under the ADA, the Department of Justice has published technical assistance manuals that explain the ADA regulations. In addition, the Department operates an ADA information line (800-514-0301 (voice) or 800-514-0383 (TTY)). Members of the Disability Rights Section staff are available to answer questions on the information line on

Monday, Tuesday, Wednesday, and Friday from 10:00 a.m. to 6:00 p.m., Eastern time. On Thursday, the information line is staffed from 1:00 p.m. to 6:00 p.m.

For your information, I am enclosing a copy of the Division's ADA Status Report that summarizes our ADA enforcement activity. I hope this information is useful to you in responding to your constituent. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,

William R. Yeomans
Acting Assistant Attorney General
Civil Rights Division

March 28, 2001

Barbara Greenstein
Deputy City Attorney
City of Santa Monica
City Attorney's Office
1685 Main Street, Room 310
P.O. Box 2200
Santa Monica, CA 90407-2200

Re: DJ 202-12C-179
Gayle v. Ampco System Parking, Inc., et al.

Dear Ms. Greenstein:

This letter is in response to your letter of January 9, 2001, as well as the blueprints and photographs of parking structures that were submitted to the Department of Justice for review. The City of Santa Monica, which owns parking facilities in and around Santa Monica's Third Street Promenade, was notified in November, 2000, that the Department had received a complaint alleging that the parking facilities around the Promenade are not accessible to persons with disabilities in violation of the Americans with Disabilities Act of 1990 ("ADA"). The complaint upon which our investigation is based alleges that the city-owned parking structures around Santa Monica's Third Street Promenade do not have any van accessible parking spaces or accessible ticket dispensers or cashiers.

Title II of the ADA requires that each service, program, or activity conducted by a public entity, when viewed in its entirety, is readily accessible to and usable by individuals with disabilities. See 28 C.F.R. ï½§35.149 and ï½§35.150. Although not every existing facility need be made accessible, the service, program, or activity must be accessible unless the proposed action would fundamentally alter the service, program, or activity or would result in undue financial and administrative burdens. See 28 C.F.R. ï½§35.150. In addition, accessible features must be maintained so they are readily accessible to and usable by individuals with disabilities. See 28 C.F.R. ï½§35.133. Accessible routes may not be obstructed. See Appendix A to 28 C.F.R. ï½§35.133.

In addition, Title III of the ADA prohibits discrimination on the basis of disability by public accommodations and requires entities that own, lease, or operate places of public accommodation to design, construct, and alter them in compliance with the Standards for Accessible Design set forth in Appendix A to 28 C.F.R. Part 36. See 28 C.F.R. ï½§36.101.

The Department understands that the City contracts with APCOA/Standard Parking to operate parking structures one through six on Fourth and Second Streets around Santa Monica's Third Street Promenade.

APCOA/Standard Parking must ensure that the structures comply with Title III and the City is obligated to ensure that the structures are operated in a manner that complies with the City's Title II obligations.

It is the responsibility of the Attorney General, and of this Division in particular, to enforce the provisions of Title II and Title III of the ADA. Where an entity is found to be in violation of Title II or Title III of the ADA, it is the responsibility of the Attorney General to take appropriate action to eliminate that violation, including the presentation of the matter to the appropriate court for civil proceedings. However, in the interests of resolving the complaint expeditiously and without resort to litigation, we are seeking your continued cooperation in addressing the following concerns.

As acknowledged in your letter, in November 2000, Department staff inspected the six parking structures around the Third Street Promenade. All six structures, as currently operated, use a single entryway for both entry and egress that provides insufficient vertical clearance for van accessibility in violation of the ADA. See Appendix A to 28 C.F.R. Part 36 ("Standards for Accessible Design"), ï½§ï½§ 4.1.2(5)(a) and (b). Our inspection also identified the following ADA violations:

1. On the upper levels of structures one through six, the accessible parking spaces do not have access aisles that are five feet wide and do not have accessible routes to the elevators. For example, in parking structure five, the accessible parking space near the West elevator has a built-up curb ramp that is too steep for people who use wheelchairs and that projects into the parking space. This curb ramp also creates an access aisle that is not level. See Standards for Accessible Design, ï½§ï½§ 4.3.7; 4.3.8; 4.7.2; 4.7.8; 4.6.6. Similarly, the accessible parking space near the east elevator does not have an access aisle that is five feet wide and has a change in level between the access aisle and the sidewalk that is greater than 1/4". See Standards for Accessible Design, ï½§ï½§ 4.6.3 and Figure 9; 4.3.8; 4.5.2.
2. In structure six, the walkway from the east elevator to Second Street is less than 36" wide as it passes the corner of the elevator structure and there is no curb ramp where the walkway meets the sidewalk. See Standards for Accessible Design, ï½§ï½§ 4.3.3; 4.3.8; 4.5.2; 4.7.
3. The men's and women's toilet rooms in structures one through six are not accessible to people using wheelchairs, visually impaired individuals, and other individuals with disabilities:
    A. The routes to the toilet rooms from the accessible parking spaces, the elevators, and the street/alley are not accessible. For example, in structures two, three, four, and six, the ramps to the toilet rooms from the alley and first level of parking are too steep. See Standards for Accessible Design, ï½§ 4.8.2. In structures one through six, the ramps to the restrooms do not provide handrails on both sides of the ramp and/or are placed too high. See Standards for Accessible Design, ï½§ 4.8.5. In structure three, the ramp from the alley to the toilet rooms is less than 36" wide. See Standards for Accessible Design, ï½§ 4.8.3.
    B. The self-closing faucets do not stay open for at least ten seconds. See Standards for Accessible Design, ï½§ 4.19.5.
    C. The toilet paper dispensers do not permit continuous paper flow and are mounted too far away from the rear wall. See Standards for Accessible Design, ï½§ï½§ 4.16.6; 4.17.3; Figure 30(d).
    D. The hand dryers protrude more than four inches into the circulation path. Appropriate cane detectible barriers to warn blind or visually impaired persons may be installed. See Standards for Accessible Design, ï½§ 4.4.1.
    E. In the men's toilet rooms, the urinal and its flush are mounted too high. See Standards for Accessible Design, ï½§ï½§ 4.18.2 and 4.18.4.
    F. In some of the designated accessible toilet stalls, the rear grab bar is missing and/or the far end of the side grab bar is not at least 52" from the rear wall. See Standards for Accessible Design, ï½§ï½§ 4.17.6; 4.17.3; Figure 30(d).

G. All signs designating the toilet rooms do not have raised characters accompanied with Grade 2 Braille non-glare finish, and are mounted too high. See Standards for Accessible Design, ï½§ï½§ 4.30.1; 4.30.4; 4.30.5; 4.30.6.

One of our primary concerns continues to be the lack of any explanation as to why structures one through six are currently operated using only the primary entryway that provides insufficient clearance for van accessibility. Our inspection of the structures identified an alternative point of entry ("second entryway") into each of the six parking structures (specifically, the entryway along the "east aisle" in structures two, four, and six and the "west aisle" in structures one, three, and five). Near these second entryways is a section of parking spaces reserved for accessible parking. These second entryways and the accessible parking spaces near them have sufficient vertical clearance for several van accessible parking spaces. Although these areas seem to have been open to the public previously, they are now closed off to the public by gates, chains, and other barriers, and apparently are currently used by police and public works vehicles, and for trash.

In one of our telephone conversations regarding the second entryways, you mentioned a traffic study that was evaluating the traffic flow pattern of downtown Santa Monica. If the City's position is that opening the second entryway in structures one through six to provide van accessible parking is an undue financial or administrative burden, the head of the public entity or his or her designee must make such a determination and submit a written statement of the reasons for reaching that conclusion. See 28 C.F.R. ï½§35.150(a)(3).

Individuals with disabilities must be afforded services that are equal to and as effective as those afforded to individuals without disabilities. See 28 C.F.R. ï½§35.130(b)(1)(ii) and (iii). Integration is fundamental to the purposes of the ADA. See Appendix A to 28 C.F.R. ï½§35.130. A public entity may not provide different or separate services for individuals with disabilities or otherwise limit the enjoyment of any right, privilege, advantage, or opportunity enjoyed by others receiving the service. See 28 C.F.R. ï½§35.130(b)(1)(iv) and (vii).

In this case, you sent to us for review blueprints and photographs of six additional city-owned or operated parking structures in downtown Santa Monica, including: structures seven and eight, the Ken Edwards Center, the Wilshire House, the Main Library, and the Menorah Housing Project. However, none of these parking structures is comparable to the public parking provided for individuals without disabilities for the Third Street Promenade. [(1)] As stated in your letter, structures seven and eight provide parking for Santa Monica Place, a shopping mall immediately south of the Promenade. It is our understanding that the Wilshire House provides subsidized housing for the elderly and mobility impaired and that the Ken Edwards Center functions as a community center, has tenants, holds meetings and community forums, and has very limited hours. It is inappropriate to relegate individuals with disabilities to park at the library, a public housing project, a senior housing complex, a community center, or a completely separate shopping mall, in order to access the Third Street Promenade when individuals without disabilities can choose to park in structures one through six which surround the Promenade in a variety of locations.

In an effort to settle this matter without resort to litigation, the Department recommends that the City voluntarily agree to provide van accessible parking for the Third Street Promenade by opening to the public the second entryways in structures one through six, correcting the other aforementioned ADA violations, and installing the requisite signage to direct persons to van accessible parking spaces and accessible restrooms in compliance with the Standards for Accessible Design, ï½§ï½§ 4.1.2(7); 4.30; and 4.6.4. Please forward your written response no later than April 27, 2001. If you have any questions, please do not hesitate to contact me at (202) 353-2288. Thank you for your cooperation.

Sincerely,

Angela Liang
Trial Attorney
Disability Rights Section

1. In addition, the blueprints and photographs provided to us are incomplete and do not have sufficient enough information for us to determine whether they have van accessible parking. The blueprints for structure eight do not indicate where the parking spaces are located and we were not provided the blueprints for the first level of parking for structure seven.

June 6, 2001

The Honorable Joseph R. Pitts
United States Senator
Lancaster County Courthouse
50 North Duke Street
Lancaster, Pennsylvania 17602

Dear Senator Pitts:

This letter responds to your correspondence on behalf of your constituent, xxxxxxxxxxxxxxx, whom you indicated had heard there was a rule or regulation that provides free Internet service to people with disabilities. Your correspondence particularly questioned whether there is any such regulation under the Americans with Disabilities Act (ADA) of 1990. Please excuse our delay in responding.

The ADA prohibits discrimination against individuals with disabilities in employment, state and local government services, public accommodations, transportation, and telecommunications. Within its remedies, it is possible that an employee or program participant might be provided with modified computer equipment to permit access to the Internet if accessing the Internet is an essential function of an employee's job, or if accessing the Internet is required to benefit from a covered program. The ADA, however, has no specific provisions to assure that individuals with disabilities will be provided with free access to computers or the Internet.

I believe, however, that your constituent might be referring to the New Freedom Initiative that was announced by President Bush on February 1, 2001. The New Freedom Initiative is a set of proposals sent to Congress that focuses on increasing access to assistive and universally designed technologies, expanding educational opportunities, promoting home ownership, integrating Americans with disabilities into the workforce, expanding transportation options, and promoting full access to community life. Title I of the Initiative proposes a significant increase in federal funding for guaranteed low-interest loans to purchase assistive technology. The prohibitive cost of computers that are configured with assistive technology was specifically cited as an example of why such loans are necessary. I have enclosed a copy of the New Freedom Initiative and the White House press release for your consideration.

I hope this information assists you in responding to your constituent. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,

William R. Yeomans
Acting Assistant Attorney General
Civil Rights Division

Enclosures

833

July 5, 2001

The Honorable Eleanor Holmes Norton
Member, U.S. House of Representatives
815 15th Street, NW, Suite 100
Washington, D.C. 20005-2201

Dear Congresswoman Norton:

This is in response to your letter on behalf of your constituent, xxx xxxxxxx xxxxx xxxxxx, regarding the Americans with Disabilities Act (ADA) and the requirements for public accommodations. We apologize for the delay in responding.

Title III of the ADA, which applies to public accommodations and commercial facilities, went into effect on January 26, 1992. Pursuant to title III, public accommodations, like movie theaters, must provide effective communication for individuals with hearing, vision, and speech disabilities via the use of auxiliary aids. Examples include sign language interpreters, assistive listening devices, TDDs, audiotaped materials, large print, Braille, and readers. The type of auxiliary aid needed to provide effective communication will depend on the nature and content of the conversation or discussion. Covered entities are not required to take steps that would result in undue financial or administrative burdens.

Your constituent, xxx xxxxxx, who is a person with a hearing impairment, complains specifically about assistive listening systems at movie theaters in the Baltimore County area. In his earlier complaint filed with the Justice Department about a General Cinemas movie theater, he stated that the assistive listening system then available at the theater was ineffective and that the system was not maintained, including a failure to replace batteries or repair damaged equipment. He noted that he had heard about a different auxiliary aid, the loop system, that might perform better than the assistive listening system currently in use at General Cinemas. By letter dated March 12, 2001, the Department declined to investigate that complaint citing a lack

of resources, and advising him of his right to file a private lawsuit. In that letter, the Department also provided technical assistance materials and the toll-free telephone number at which he could reach trained Department staff who would be able to answer questions or provide additional assistance.

The primary enforcement mechanisms under title III are private lawsuits brought by individuals and suits by the Department of Justice whenever it has reasonable cause to believe that there is a pattern or practice of discrimination, or that the discrimination raises an issue of general public importance. Unfortunately, the Civil Rights Division is unable to pursue many complaints received pursuant to title III due to the huge volume of complaints and limited staff and resources.

In this situation, as described by xxx xxxxxx, the movie theater has a responsibility under the federal title III regulation currently in effect to "maintain in operable condition those features of facilities and equipment that are required to be readily accessible to and usable by persons with disabilities..." 28 C.F.R. ï½§ 36.211. If the assistive listening system in use at the theater is not maintained properly, or if fresh batteries are not available to operate the assistive listening system, the theater would be in violation of that provision of the federal ADA title III regulation. However, the theater would not be required to replace the current assistive listening system with an alternative listening system if the current system provides effective communication when properly maintained.

The Department actively pursues investigations involving movie theaters and effective communication. For example, a nationwide settlement agreement with Loews Cineplex Odeon theaters required that chain to provide and maintain assistive listening systems at all of their theaters nationwide. Another movie theater chain in Arizona entered a similar agreement to provide assistive listening systems throughout their properties in that state.

I hope this information is helpful in responding to your constituent. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,

William R. Yeomans
Acting Assistant Attorney General
Civil Rights Division

July 30, 2001

DJ No. 202-26S-0

Mary E. Ham, Esq.
Vice President, General Counsel
Steak'n Shake, Inc.
500 Century Building
36 South Pennsylvania Street
Indianapolis, Indiana 46204

Dear Ms. Ham:

This letter responds to your April 9, 2001, letter, in which you pose several questions about accessibility requirements under title III of the Americans with Disabilities Act (ADA) in relation to the Steak'n Shake chain of restaurants. Please excuse our delay in responding.

The ADA authorizes the Department of Justice to provide technical assistance to individuals and entities with rights or obligations under the Act. This letter provides informal guidance to assist you in understanding the ADA accessibility standards. However, this technical assistance does not constitute a legal interpretation of the statute and it is not binding on the Department.

Title III of the ADA prohibits owners or operators of a place of public accommodation, such as the Steak'n Shake restaurant chain, from denying persons with disabilities an equal opportunity to participate in or benefit from the goods and services that are provided. In addition, public accommodations are required to remove architectural barriers from existing facilities when it is readily achievable to do so. Title III also requires facilities that are newly designed, constructed or altered to be readily accessible to and usable by persons with disabilities.

We note at the outset that your letter provides very limited information regarding the specific nature of your inquiry or the specific circumstances that inform each of your questions; we will attempt to respond, however, based solely on the information you have provided.

You first ask whether the ADA's requirement that a restaurant provide access to at least 5 percent of its fixed seating area includes non-fixed or "movable" seating. You note, furthermore, that your restaurants provide counter seating, booths (both of which we understand to be fixed or built-in) and tables and chairs (which we understand to be movable). If the fixed seating area is newly constructed or altered, then the ADA requires access to at least 5 percent of fixed or built-in tables to be distributed throughout dining areas. The 5 percent calculation does not include movable seating. In addition, where food or drink is served at counters exceeding 34 inches in height, a portion of the counter 60 inches minimum in length must be accessible to persons with disabilities or service must be available at accessible tables in the same area. See ADA Standards for Accessible Design (ADA Standards) at 28 C.F.R. pt. 36, app. A, ï½§ 5. In an existing restaurant that has both fixed and movable seating and where the fixed seating area is not being altered, the ADA requires that barriers to access be removed when it is readily achievable to do so. In this context, providing accessible seating that includes seating at movable tables may be permissible. This analysis, however, is to be made on a case-by-case basis and cannot be determined in the abstract.

Second, you ask whether the ADA requires a urinal, toilet or other plumbing fixture to be "centered" with regard to the "clear floor space" in front of the fixture. With regard to the location of a plumbing fixture in relation to the clear floor space in front of it, the ADA does not require that the urinal, toilet or other plumbing fixture be strictly centered or centered with mathematical precision in relation to the clear floor space in front of it. The ADA does require that the clear floor space be located in front of the fixture, and that the urinal, toilet or other plumbing fixture not be located beyond the required width of the clear floor space.

In addition to these general considerations, the ADA includes specific clear floor space requirements for lavatories, water closets, urinals, etc. These requirements take into consideration the space required for a person in a wheelchair to approach the particular fixture, either from the front or the side, and in some instances to transfer onto the fixture, as would be the case with a water closet. For example, the ADA requires a clear floor space of 30 inches by 48 inches in front of a lavatory so as to allow for a forward approach by a person in a wheelchair, and the clear floor space cannot extend more than 19 inches underneath the lavatory. 28 C.F.R. pt. 36, app. A, ï½§ 4.19.3. There are different requirements, however, for the clear floor space for water closets, the arrangement of which is dependent, among other things, on the approach provided to the water closet. 28 C.F.R. pt. 36, app. A, ï½§ 4.16.2. We refer you to these more specific ADA requirements as you consider the arrangement of clear floor space in relation to the plumbing fixtures at issue in your restaurants.

Third, you ask whether toilet stall doors are subject to the same minimum maneuvering clearance as other doors. Generally, toilet stall doors are subject to the doors requirements in section 4.13 of the ADA Standards, which includes the maneuvering clearance requirement. However, section 4.17.5 of the ADA Standards specifically provides that "[i]f toilet stall approach is from the latch side of the stall door, clearance between the door side of the stall and any obstruction may be reduced to a minimum of 42 in[ches]...."

Therefore, except for the allowance provided in section 4.17.5, doors requirements in section 4.13 of the ADA Standards apply to toilet stall doors.

Fourth, you ask whether a toilet stall door that closes as a result of gravity is considered to be equipped with a closer. Although we are not altogether certain of what you mean when you reference a door that closes as a result of gravity, we note for your information that if a toilet stall door is equipped with a gravity hinge, then the door is not considered to be equipped with a closer.

Last, you ask whether movable chairs may encroach on an accessible route in a restaurant. The ADA requires that all fixed accessible tables must be accessible by means of an access aisle at least 36 inches clear between parallel edges of tables or between a wall and the table edges. Therefore, movable chairs may encroach on an accessible route. However, the restaurant must provide an accessible route to an accessible table. For example, if movable chairs at an occupied table obstruct an accessible route, then the restaurant employees must move the chairs so that a person in a wheelchair can maneuver to an accessible table.

We hope that this information is helpful to you. If you have additional questions about the ADA, you may call our ADA Information Line at 800-514-0301 (voice) or 800-514-0383 (TDD).

Sincerely,

John L. Wodatch
Chief
Disability Rights Section

August 14, 2001

Vickie L. Dawes
Deputy County Counsel
Office of the County Counsel
Contra Costa County
651 Pine Street, 9th floor
Martinez, CA 94553-1229

Re: ADA Complaint DJ # 202-11-69

Dear Ms. Dawes:

The purpose of this letter is to inform you of our findings from the investigation of this complaint under the Americans with Disabilities Act of 1990 (ADA), and to offer to informally resolve some problematic areas.

Contra Costa Regional Medical Center (Contra Costa) is a public entity covered by title II of the ADA, which prohibits disability-based discrimination. 42 U.S.C. ï½§ 12132. Section 35.160(a) of the Department of Justice's

title II implementing regulation requires that a public entity take appropriate steps to ensure that communications with applicants, participants, and members of the public with disabilities are as effective as communications with others. Section 35.160(b)(1) requires a public entity to furnish appropriate auxiliary aids and services where necessary to afford an individual with a disability an equal opportunity to participate in, and enjoy the benefits of, a service, program, or activity conducted by a public entity, and section 35.160(b)(2) requires that, when determining what type of auxiliary aid or service is necessary, a public entity must give primary consideration to the request of the individual with the disability.

As you know, the complaint alleged that Contra Costa did not provide effective communication for xxxxxxxxxx, who is deaf, during his treatment at Contra Costa from March 17-20, 1997. The Department expanded the scope of the investigation to review all of Contra Costa's systems for effective communication, including the provision of auxiliary aids and services, TDD's, captioned televisions, visual alarms, training, and public notice and education.

As to the specific complaint, the Department did not find sufficient evidence to pursue this charge, but xxxxxxxxxx advocate at Berkeley Place, a non-profit community organization with a Deaf/Disability Project, has indicate there is an ongoing problem at Contra Costa with providing xxxxxxxxx and other individuals qualified sign language interpreters.

We have reviewed the information that you provided about Contra Costa's systems and technology for facilitating communication with patients and companions who are hearing or speech impaired. We believe they are adequate in fulfilling Contra Costa's legal obligations under the ADA with the following exceptions, including Contra Costa's policy and procedures for providing appropriate auxiliary aids to patients and companions who have hearing of speech impairments. Specifically, we find it imperative that Contra Costa implement a system to consult such persons in deciding how to achieve effective communication. Therefore, in order to resolve the complaint, the Department seeks that the following actions be undertaken at Contra Costa:

1. Assessment
   The determination of which appropriate auxiliary aids and services are necessary, and the timing, duration and frequency with which they will be provided, shall be made by the Hospital Personnel who are otherwise primarily responsible for coordinating and/or providing patient care services, in consultation with the person with a disability, unless otherwise impossible. The assessment will take into account all relevant facts and circumstances, including without limitation the nature, length, and importance of the communication at issue, as well as the individual's communication skills, knowledge, the patient's health status or changes thereto, the reasonably foreseeable health care activities of the patient (e.g., group therapy sessions, medical tests or procedures, rehabilitation services, meetings with health care professionals or social workers, or discussions concerning billing, insurance, self-care, prognoses, diagnoses, history and discharge), and the availability at the required times, day or night, of appropriate auxiliary aids and services.
2. Initial assessment.
   The initial assessment will be made at the time an appointment is scheduled or on the arrival of the patient or companion at the Hospital, whichever is earlier. Hospital Personnel will perform and document a communication assessment as part of each initial inpatient assessment that is required by the Joint Commission On Accreditation of Healthcare Organizations ("JCAHO"). Completion of communication assessments will be documented in the patient's record. Hospitals may use, but are not required to use, the Model Communication Assessment Form provided as an attachment to this letter.

3. Ongoing assessments
   If a patient or a companion of a patient who is deaf or hard of hearing or who has a speech impairment has an ongoing relationship with the Hospital, the provision of appropriate auxiliary aids or services will be reconsidered as part of each routine assessment of an inpatient, or on a regular basis with respect to other patients and companions. Hospital Personnel shall keep appropriate records that reflect the ongoing assessments and communications with the patient, such as copies of hand written notes, interpreter fees, notations on patient's use of any and all auxiliary aids, etc, in the patient's file and/or record.
4. Individual Notice In Absence of Request
   If a patient or a companion who is deaf or hard of hearing or who has a speech impairment does not request appropriate auxiliary aids or services but Hospital Personnel have reason to believe that such person would benefit from appropriate auxiliary aids or services for effective communication, the Hospital will specifically inform the person that appropriate auxiliary aids and services are available free of charge.
5. TTY's in public areas, including signage and storage

   a. Contra Costa needs to make a TTY device available wherever a telephone is made available to the public (whether public pay telephone, public closed circuit telephone, or otherwise). Specifically, the Hospital should make a TTY device available in the 3rd Floor Lobby, 4th Floor Lobby, 5th Floor Lobby, and 3rd Floor IMCU/CCU Waiting Area. To satisfy this, Contra Costa can permanently install the required TTY's or make available a sufficient number of portable TTY's. Standards ï½§ï½§ 4.1, 4.31.9. Each such TTY, whether permanently installed or portable, shall comply with the Standards set forth in Schedule A, attached.
   b. Wherever public telephones are available but TTY's are not permanently installed, Contra Costa should post signs complying with the Standards set forth in Schedule A. Such signs will indicate the location of the nearest portable or permanently installed TTY's.
   c. Portable equipment for use in public areas should be stored in places that are readily accessible to all Hospital Personnel who have client contact at all times of the day and night. All Hospital Personnel need to be notified of the storage location that is closest to their work area(s). The equipment is to be stored at the appropriate supervised location (e.g., nurses' station, admission desk, etc.) closest to the public phone for which the equipment is to be made available. Such equipment shall be made available to patients or companions who are deaf or hard of hearing or who have speech impairments as soon as practicable but no more than ten (10) minutes from the time of the person's request.
6. Telephones in Patient Rooms
   Contra Costa should make 3 additional TTY's with printout capability available for patient room use. Contra Costa should make the TTY's available within thirty (30) minutes of a patient's arrival in a patient room, regardless of the hour of the day or night.Contra Costa will notify all relevant Hospital Personnel of the availability and location of this equipment.
7. Visual Alarms
   In the Cafeteria where the Hospital has an audible alarm in place, it will add a visual alarm complying with the Standards set forth in Schedule B.
8. Captioning and Decoders Instructions
   Clearly stated directions for use of the closed caption capability shall be in the Patient Handbook (or equivalent publication) or otherwise available in each patient room or public area containing a

television with captioning capability. The directions for operating the closed caption function shall also accompany all closed caption decoders for standard television sets.

9. Notice to Hospital Personnel and Physicians
   Contra Costa should adopt and distribute, in an appropriate form, a written policy statement regarding the Hospital's policy for effective communication with persons who are deaf or hard of hearing or who have speech impairments. The policy statement shall include, but is not limited to, language to the following effect:

> "If you recognize or have any reason to believe that a patient, relative, or a close friend or companion of a patient is deaf or hard of hearing or has a speech impairment, you must advise the person that appropriate auxiliary aids and services will be provided free of charge. If you are the responsible health care provider, you must ensure that such aids and services are provided when appropriate. All other personnel should direct that person to the appropriate Program Administrator. This offer and advice must likewise be made in response to any overt request for appropriate auxiliary aids or services."

Ms. Dawes, these provisions track the provisions of a much larger consent decree that concluded the Department's litigation against several Connecticut hospitals. As I have previously noted, the decree can be found at the Department's ADA Home Page at the following address: http://www.usdoj.gov/crt/ada/. As a by-product of that action, the Department last summer published a "pictogram" book to help hospital emergency rooms communicate with persons who are deaf as an interim measure, until more effective communication can be established. A press release concerning this project is attached. We hope to have that book available for purchase from the Government Printing Office by the end of this summer.

Please call me within a week to schedule a time when we can discuss what I have proposed and timelines for achieving compliance. I invite you to make any suggestions so that we can resolve this complaint in a way that is meaningful for you and the government. Thank you for your cooperation to date, and I look forward to hearing from you soon. I can be reached at (202) 616-5576, by fax at (202) 305-9775 or by email at lisa.m.levine@usdoj.gov.(link sends e-mail)

Sincerely,

August 15, 2001

The Honorable Tim Holden
Member, U.S. House of Representatives
101 North Center Street
Pottsville, PA 17901

Dear Congressman Holden:

This letter is in response to your inquiry on behalf of your constituent, xxxxxxxxxx. Xxxxxxxxx, who is the President of a volunteer fire company in Schuylkill County, Pennsylvania, asked you to determine how the Americans with Disabilities Act of 1990 (ADA) applies to the fire company. Specifically, xxxxxxxxx wants to know if the fire company is required to install a lift or an elevator to provide access to a "social room" that is now reached by means of a staircase.

From the information provided in your letter, we infer that the volunteer fire company is a private entity that is not funded by the county government. We have also inferred that the fire company, not the county government, owns the building that houses the fire company. If these assumptions are correct, the fire company would be subject to title III of the ADA. Title III prohibits discrimination on the basis of disability by private entities that own, operate, lease (or lease to) places of public accommodation. The statutory term "public accommodation" includes social service providers, such as fire companies.

If the fire company's building was constructed on or after January 26, 1992, it is subject to the new construction requirements of the Act. A new building must comply fully with the ADA Standards for Accessible Design. The Standards require elevator access in any building with three or more stories. A privately owned building that has less than three stories does not have to provide elevator access to the upper floor.

If the fire company's building was constructed prior to January 26, 1992, the fire company is only required to remove architectural barriers to the extent that it is readily achievable to do so. The statute defines readily achievable as "easily accomplishable and able to be carried out without much difficulty or expense." The Department's regulations provide that a covered entity should refer to the ADA Standards to identify barriers. The barrier removal requirement does not exceed the requirement for an altered facility. Therefore, if the fire company's building is less than three stories, it is not required to have an elevator. If the building is more than three stories, the fire company must consider whether it is "readily achievable" to install an elevator or other means of vertical access. If the cost of installing an elevator would not be "readily achievable," the fire company would not be required to provide access to the second floor.

I hope this information is helpful to you in responding to your constituent. If xxxxxxxxx has additional questions about the ADA, he may contact our toll-free ADA Information line ((800) 514-0301(voice) or (800) 514-0383 (TDD)) to discuss his questions with members of the Disability Rights Section's staff. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,

Ralph F. Boyd, Jr.
Assistant Attorney General
Civil Rights Division

BY FACSIMILE TO 925-228-7009
AND FIRST CLASS MAIL

John Dodson, Owner
Pine Meadow Public Golf Course
451 Vice Hill Way
Martinez, CA 94553

RE: ADA Complaint DJ # 202-11-79

Dear Mr. Dodson:

In regard to our recent phone conversation, the Department finds that reasonable modifications to the policies of Pine Meadows Public Golf Course ("Pine Meadows") for persons with vision impairments could be accomplished without any substantial danger to customers of your facility. As discussed, we are therefore requesting that the following information be sent to our office within 30 days to informally resolve this investigation.

Please provide us with the following:

1. A copy of a written policy adopted by your establishment concerning accommodations made for persons with vision impairments at your facility (see enclosed sample). We will also need assurances that you will have copies of this policy available to your customers in alternate formats, including large text and Braille (see enclosed lists of California ADA Technical Assistance Centers to inquire about obtaining such services).
2. Verification, such as photographs, that this policy is posted at your establishment;
3. Confirmation that all appropriate employees of Pine Meadows have been issued a copy of the golf course's policy on serving people with vision impairments;
4. Proof of payment of damages in the amount of $100 paid and mailed directly to the complainant, xxx xxxxxx xxxxxx including:
    a. A copy of a certified check made payable to xxx xxxxxx xxxxxx in the amount of $100 **or** a copy of a gift certificate to Pine Meadows in the amount of $100 made payable to xxx xxxxxx xxxxxx;
    b. A copy of a certified mail receipt indicating receipt of the payment by the Complainant. The check must be mailed to xxx xxxxxx xxxxxx at xxxx xxxxxxxxxxxx xxxxx, xxxxxxx, xx xxxxx.

We are obligated to inform you that no one may intimidate, threaten, coerce, or engage in other discriminatory conduct against anyone because he or she has either taken action or participated in an action to secure rights protected by the ADA. Any individual alleging such harassment or intimidation may file a complaint with the Department of Justice. We would investigate such a complaint if the situation warrants.

Finally, under the Freedom of Information Act (FOIA), 5. U.S.C. $ 552, we may be required to release this letter as well as other correspondence and records related to the complaint in response to a request from a third party. Should we receive such a request, we will safeguard, to the extent permitted by FOIA, the release of information that constitutes an unwarranted invasion of privacy.

We appreciate very much your cooperation in this matter and believe that this matter can be resolved quickly and amicably. If you wish to discuss the terms of our proposed settlement, please contact me as soon as possible.

Please reference the Department of Justice complaint number cited above in any correspondence that you send to this office. If you have questions or concerns, feel free to contact Deputy Chief Susan Reilly by phone at (202) 307-2230, by fax at (202) 305-9775 or by e-mail at susan.reilly@usdoj.gov.(link sends e-mail)

Sincerely,

Jennifer A. Schlosberg

Enclosure
Sample Policy on Accommodating Persons with Vision Impairments
List of California ADA Technical Assistance Centers

Revised Policy (Date)

Pine Meadows Golf Course provides assistance to its customers with physical and mental disabilities in order to allow full access to the services we offer. We welcome the patronage of customers with vision impairments who are accompanied by assistants who act as spotters. We recognize the importance of the role that spotters play in insuring the independence of people with such disabilities.

It is our policy to welcome any spotter who personally assists a person with a vision impairment, and recognize that they provide a wide range of services including but not limited to:

- Assisting persons with vision impairments by retrieving balls, clubs, and other materials on the golf course;
- Assisting persons with vision impairments by notifying them of physical barriers or dangers on the golf course, including carts, clubs, balls, shrubbery, and other players;
- Assisting persons with vision impairments by driving their golf carts;
- Assisting persons with vision impairments by estimating distances or wind factors on the golf course.

Pine Meadows Golf Course is committed to conveying the content and meaning of this policy to its staff. We are committed to helping our staff recognize the importance of the role that assistants play and minimizing the limitations placed on the independence of the persons whom they serve.

To the end outlined above, we set forth the following policy:

I. Upon entering Pine Meadows Golf Course's place of business, a person with a vision impairment who is accompanied by an assistant who acts as a spotter is:
   - not required to show proof of a disability;
   - not assessed a surcharge for the spotter, unless the spotter is playing golf as well;
   - welcome to review this policy in alternative formats including large print or Braille; and
   - welcome to request assistance in reading this policy by a Pine Meadows Golf Course employee.

II. In no event will a person with a disability accompanied by an assistant be denied service or be given inferior service due to the expressed preferences of other customers. In the event that other customers express a preference to not be proximity to a customer with disability, Pine Meadows Golf Course will honor the individual's right not to be the subject of invidious discrimination on the basis of disability.

III. In the event that an individual wishes to inquire about our policy, or lodge a complaint alleging that our policy has been breached, the individual should contact_____ at( )____-_____, or write to (her/him) at_____.Questions about the Americans with Disabilities Act (ADA)

may also be addressed to the United States Department of Justice's ADA Information Line, at 800-514-0301 or 800-514-0383 (TDD).

xxxxxxxxxxxxxxxxx
xxxxxxxxxxxxxxxx
Lodi, New Jersey 07644

RE: ADA Complaint DJ# xxxxxxxxxx

Dear xxxxxxxxx:

I thoroughly enjoyed speaking with you on August 21, and I would like to reassure you that disability rights is most certainly not a losing battle and that you are not alone in fighting it. My job would be meaningless if that were the case. After our conversation, I inquired about the questions you asked me and gathered some information for you to look at.

The Air Carrier Act prohibits disability-based discrimination in air travel and requires air carriers to accommodate the needs of passengers with disabilities. The Act was implemented and is enforced by the U.S. Department of Transportation (DOT). I know some of the specifics, but I thought the "Plane Talk Guide" and "Horizons" would help you understand your rights. Also, because DOJ does not handle alleged Air Carrier violations, I located a person over at DOT that you could speak with or file a complaint with. His name is Mike Spollen and he is a consumer aviation protection specialist in the Office of Civil Rights at DOT. His number is 202-366-5945.

I also asked my supervisor about you being carried into restaurants by employees and she said that it is absolutely unacceptable. However, unfortunately because you were unaware that carrying a person is not a reasonable accommodation and, therefore allowed yourself to be carried, monetary compensation would be hard to obtain. If you got injured as a result compensation would be warranted, however you may still file a complaint against the restaurant because it is illegal to carry a person with a disability as an alternative to doing readily achievable barrier removal. Finally, no public accommodation is able to be "grandfathered" or exempt from the ADA, so you can bring a copy of the law into Burger King next time you want a whopper.

Coincidently, after I hung up with you, John Shahdanian, the attorney for North Bergen, called me to say that the Town accepts the Department's Letter of Resolution. What this means is that once the NJ DOT inspects the property at the Municipal Building, the Town Council will pass a resolution to have the accessible spaces added to the parking lot. "Accessible spaces" means that there is an accessible route (curb cuts, ramps, etc...) from the designated spaces to the accessible entrance of the building. The Department is also requiring the Town to publish its 1996 policy concerning the Municipal Building's alternative delivery of services in the local paper and to submit to the Department the Town's plans to build a new accessible municipal building. I hope that you understand that because of your complaint the Town of North Bergen will have a new, completely accessible municipal building in the near future. And also because of your complaint disabled town

residents will now have accessible spaces at their disposal. So this battle might have been small but it was won and consequently, you made a difference in your community.

I wish you the best and please feel free to call me anytime at (202) 307-2756. As soon as I receive photos of the completed accessible spaces, I will send you a copy of the resolution and a closing letter. If you have any other complaints, don't be hesitant to call our hotline 1-800-514-0301 or file them via mail. Hope to speak with you soon. Take care!

Best Regards,

Natalie Sinicrope

September 14, 2001

The Honorable C. W. Bill Young
Member, U.S. House of Representatives
801 West Bay Drive, Suite 606
Largo, Florida 33770

Dear Congressman Young:

This letter is in response to your inquiry on behalf of your constituent, xxxx xxxxxxx xx xxxxxxxx, concerning an alleged violation of the Americans with Disabilities Act of 1990 (ADA). Please excuse the delay in responding.

The ADA authorizes the Attorney General to investigate alleged violations of title II and title III of the ADA, which prohibit discrimination on the basis of disability by state and local government entities, public accommodations, and commercial facilities. In addition, the Attorney General is responsible for enforcing title I of the ADA when a public employer has engaged in a pattern or practice of discrimination on the basis of disability, or when the Equal Employment Opportunity Commission has referred an individual complaint for enforcement.

The ADA enforcement responsibilities are assigned to the Attorney General as the nation's chief law enforcement officer and head of the Department of Justice. Within the Department, ADA enforcement has been delegated to the Civil Rights Division's Disability Rights Section, which is also responsible for enforcing section 504 of the Rehabilitation Act of 1973 and other federal statutes that prohibit discrimination on the basis of disability. In enforcing the ADA, the Department of Justice represents the law enforcement interest of the United States. The Department does not act as an attorney for, or representative of, any individual complainant.

We have carefully reviewed xxxx xxxxxxxx's complaint alleging that a retail store violated the ADA by neglecting to main an electric scooter that it provides as a courtesy to customers with disabilities. The law does not require a public accommodation, such as a aretail store, to provide scooters for its customers. Therefore, the store's failure to maintain this equipment does not violate the ADA. This determination does

not affect your constituent's right to pursue her allegations in some other manner. Xxxx xxxxxxxx may with to consult a private attorney to discuss other options.

Other avenues may be effective in resolving this complaint, including consulting with organizations that provide alternative dispute resolution services. We have enclosed a list of organizations serving her area. These offices may be able to identify resource groups available to provide assistance. A state or local bar association may also be able to provide the names of private attorneys or mediation services that handle consumer disputes.

To assist members of the public to understand their rights and responsibilities under the ADA, the Department of Justice has published technical assistance manuals that explain the ADA regulations. In addition, the Department operates an ADA information line (800-514-0301 (voice) or 800-514-0383 (TDD)). Members of the Disability Rights Section staff are available to answer questions on the information line on Monday, Tuesday, Wednesday and Friday from 10:00 a.m. to 6:00 p.m., Eastern time. On Thursday, the information line is staffed from 1:00 p.m. to 6:00 p.m.

For your information I am enclosing a copy of the Division's ADA Status Report that summarizes our ADA enforcement activity. I hope this information is helpful to you in responding to your constituent. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,

Ralph F. Boyd, Jr.
Assistant Attorney General
Civil Rights Division

840

September 27, 2001

Sharon K. Storms
Manager III
Program Compliance Section
Driving and Traffic Violator Schools Complaint Unit
Department of Motor Vehicles
Licensing Operations Division
P.O. Box 932342
Sacramento, California 94232-3420

Dear Ms. Storms:

This is in response to your letter, dated July 27, 2001, to Edward Wu, Unical Driving and Traffic School DS0853, informing Mr. Wu that he had to bring his classroom location into compliance or submit a written "exception letter from ADA requirements from an appropriate federal jurisdiction agency." As the federal office with responsibility for enforcing title III of the Americans with Disabilities Act of 1990 (ADA), we wished to respond to your letter.

The ADA does not establish specific requirements regarding alterations that must be made to existing facilities for the purpose of accessibility if alterations are not otherwise planned. Title III of the ADA, which applies to places of public accommodation and commercial facilities, simply requires that places of public accommodation remove architectural and communication barriers to the extent that it is readily achievable to do so. Congress defined the term "readily achievable" to mean "easily accomplishable and able to be carried out without much difficulty or expense."

In determining whether an action is readily achievable, the factors to be considered include: 1) the nature and cost of the action needed; 2) the overall financial resources of the entity; 3) the number of persons employed by the entity; 4) the effect that complying will have on the entity's expenses and resources; 5) legitimate safety requirements necessary for safe operation; 6) the impact otherwise of the action upon operation of the site; 7) the relationship of the entity to any parent corporation or entity; and 8) the overall financial resources, size, and types of operations of any parent corporation or entity.

The Department of Justice regulation implementing title III of the ADA requires that measures taken to remove barriers must comply with the ADA Standards for Accessible Design unless such compliance is not readily achievable. If it is not readily achievable to remove barriers in an existing facility that is not otherwise being altered, then barrier removal is not required. However, where barrier removal is not readily achievable, the public accommodation must nonetheless make its goods, services, or facilities available through alternative methods, such as curbside service, home delivery, or relocation of activities, where those methods are readily achievable.

Furthermore, please note that both the landlord and the tenant of a retail establishment are public accommodations and have full responsibility for complying with all ADA title III requirements applicable to that place of public accommodation. The title III regulation permits the landlord and the tenant to allocate responsibility, in the lease, for complying with particular provisions of the regulation. However, any allocation made in a lease or other contract is only effective as between the parties, and both landlord and tenant remain fully liable for compliance with all provisions of the ADA relating to that place of public accommodation.

Finally, because the Department of Justice does not have authority to approve facilities or designs for compliance with the ADA or to grant exceptions based on individual circumstances, we cannot provide Mr. Wu, or any other entity that you are monitoring, with a variance for his classroom. This does not necessarily mean, however, that Mr. Wu, or any other entity, is capable of providing readily achievable barrier removal at his facility, and you may wish to further investigate Mr. Wu's financial and other circumstances.

I hope this information will be helpful to you in conducting further classroom monitoring inspections in the future.

Sincerely,

Naomi Milton
Supervisory Attorney
Disability Rights Section

cc: Mr. Edward Wu

841

October 17, 2001

The Honorable John Ensign
United States Senator
400 South Virginia Street
Suite 738
Reno, Nevada 89501

Dear Senator Ensign:

This is in response to your inquiry on behalf of your constituent, xxxxxxxxxxxxxx, who asks whether the Americans with Disabilities Act of 1990 (ADA) prohibits the University of Nevada at Reno (University) from charging a fee for the use of accessible parking spaces. Please excuse our delay in responding.

Xxxxxxxxx has enclosed a memorandum issued by the University announcing that campus accessible parking permits will need to be displayed, in addition to official accessible placards or license plates issued by the Nevada Department of Motor Vehicles, on all vehicles parked in campus accessible parking spaces effective September 10, 2001. The University will charge $2.00 for a daily permit and $37.00 for an annual permit. The University memorandum does not disclose whether the same (or any) fee is charged for the use of

nonaccessible parking spaces on campus. xxxxxxxxx's letter, however, raises the possibility that the University imposes a fee for all campus parking.

The Department's regulation implementing title II of the ADA requires public entities to make their programs, including their parking programs, accessible to persons with disabilities. Therefore, if a public entity, such as the University, provides on-campus parking, it must provide an appropriate number of accessible parking spaces for persons with disabilities.

The Department's regulation implementing title II of the ADA prohibits a public entity, such as the University, from imposing surcharge on a person with a disability for any measure that is necessary in order to ensure nondiscriminatory treatment required by the ADA or the regulation. Because accessible parking spaces are required (if nonaccessible parking spaces are provided) in order to comply with the nondiscrimination requirements of the ADA, the University would be prohibited from charging a fee for permits for its accessible parking spaces that is greater than the fee it imposes for nonaccessible on-campus parking.

Because neither your constituent's letter nor the University's memorandum discloses the amount, if any, charged for nonaccessible parking, we cannot determine at this time whether the University's fee for accessible parking violates the ADA. We note, however, that nothing in the ADA requires a covered entity to provide free parking to individuals with disabilities in situations where all other drivers must pay fees.

We hope this information will be helpful to you in responding to your constituent. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,

Ralph F. Boyd, Jr.
Assistant Attorney General
Civil Rights Division

The Honorable Rick Santorum
United States Senator
Suite 250 Landmarks Building
One Station Square
Pittsburgh, Pennsylvania 15219

Dear Senator Santorum:

This is in response to your inquiry on behalf of your constituent, xxxxxxxxxxxxxxxxxxxxxxxx, who asks whether the Americans with Disabilities Act of 1990 (ADA) requires that hospitals and doctors' offices provide adjustable examining tables for patients with disabilities who cannot use standard-height tables. Please excuse our delay in responding.

Title II of the ADA prohibits discrimination on the basis of disability by public entities, and title III of the ADA prohibits discrimination on the basis of disability by public accommodations. Hospitals and doctors' offices may be either public entities or places of public accommodation. Under the ADA and the Department's implementing regulations, the issue of adjustable examining tables may be addressed under the "policy modification," "barrier removal," and "program accessibility" standards.

Under the policy modification standard, entities subject to the ADA are required to make reasonable modifications in their policies, practices, and procedures if necessary to afford a person with a disability an equal opportunity to participate in the services, facilities, or activities that the entity provides. The regulations provide an exception for modifications that result in a fundamental alteration in the nature of the services, facilities, or activities that are offered. The determination of whether a particular modification meets the conditions of the policy modification standard must be made on a case-by-case basis.

Whether provision of an adjustable examination table is necessary and reasonable and would not fundamentally alter the nature of the services provided is a fact-specific inquiry. Relevant facts include the needs of the patient and the resources of the hospital or doctor's office. Use of a nonadjustable examining table, of suitable height, is another possible policy modification that would alleviate the difficulty that persons with mobility impairments have in using standard examining tables.

Under the barrier removal standard of title III of the ADA, which applies to hospitals and doctors' offices that are public accommodations, a standard-height, nonadjustable examining table constitutes an architectural barrier to persons with certain mobility impairments. Therefore, an adjustable table must be provided if it is readily achievable to do so (that is, easily accomplished and able to be carried out without much expense). If it is not readily achievable to obtain such a table, then an alternative means, such as a lowered height table, must be provided if that means is readily achievable. With respect to hospitals and doctors' offices that are public entities, the "program accessibility" standard of title II of the ADA requires that covered entities make their programs, such as medical services, readily accessible to and usable by persons with disabilities unless to do so can be shown by the covered entity to cause a fundamental alteration in the nature of a service or an undue financial and administrative burden. Once again, under these standards, the Department of Justice makes the determination of whether a particular action is required on a case-by-case basis.

Your constituent's letter addresses the needs of "handicapped and elderly" persons. To be entitled to the protection of the ADA, a person must have a physical or mental impairment that substantially limits one or more of his or her major life activities. Whether an impairment limits a major life activity is a fact-specific inquiry. Old age is not, in and of itself, such an impairment. In the event that your constituent would like to file a complaint against a specific hospital or doctor's office, we have included complaint forms.

We hope this information will be helpful to you in responding to your constituent. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,

Ralph F. Boyd, Jr.
Assistant Attorney General
Civil Rights Division

November 15, 2001

The Honorable Joseph R. Pitts
Member, U.S. House of Representatives

Lancaster County Courthouse
50 North Duke Street
Lancaster, PA 17602

Dear Congressman Pitts:

This is in response to your letter on behalf of your constituent, xxx xxxxxxx xxxxxx, regarding whether sidewalks, and in particular curb ramps, in a residential development built in 1993 must comply with the Americans with Disabilities Act of 1990 (ADA), if plans for the development were approved by local authorities in 1988. Please excuse our delay in responding.

As you know, the ADA prohibits discrimination on the basis of disability by state and local governments (title II) and private entities that operate places of public accommodation or commercial facilities (title III). If the residential development that is the subject of xxx xxxxxx's inquiry was built by a private developer with the expectation that the sidewalks in the area would be turned over to a local government, then title II of the ADA could apply. If, however, the sidewalks at issue were constructed by a private developer as part of a purely private residential development, such as a gated community, the ADA would not apply at all. As noted above, title III of the ADA only applies to private entities that operate places of public accommodation or commercial facilities.

With respect to title II of the ADA, section 15.151 of the regulation implementing title II (copy enclosed) provides that buildings or facilities designed or constructed by, on behalf of, or for the use of a public entity are required to be constructed to be readily accessible to and usable by individuals with disabilities if the construction was commenced after the effective date of title II, which was January 26, 1992. Buildings or facilities that were under design on that date are subject to these requirements if the date that bids were invited fell after the effective date. Sidewalks that are considered "new construction" under this requirement must be designed and constructed with curb ramps. Similarly, when an existing sidewalk is altered by a public entity after January 26, 1992, the public entity must install curb cuts.

Existing sidewalks that are not otherwise being altered are subject to Section 35.149 of the title II regulation, which prohibits a public entity from denying the benefits of its programs, activities, and services to qualified individuals with disabilities because the entity's buildings or facilities are inaccessible to or unusable by individuals with disabilities. A public entity that has responsibility for, or authority over, sidewalks or other public walkways, must ensure that such sidewalks and walkways meet the program access requirement and, when viewed in their entirety, are readily accessible to and usable by individuals with disabilities. This may require the public entity to install curb ramps on an existing sidewalk. In addition, a public entity is required to maintain sidewalks in operable working condition. See section 35.133 of the enclosed title II regulation. The only exception to this requirement permits isolated or temporary interruptions in operation when required for maintenance or repairs of the sidewalks. See section 35.133(b).

I hope this information will be useful to you in explaining the requirements of the ADA. You may wish to inform your constituent that further information is available through our Americans with Disabilities Act Information Line at 800-514-0301 (voice) or 800-514-0383 (TTY). Please do not hesitate to contact the Department if we may be of assistance in other matters.

Sincerely,

Ralph F. Boyd, Jr.
Assistant Attorney General
Civil Rights Division

December 26, 2001

The Honorable Wally Herger
Member, U.S. House of Representatives
410 Hemsted Drive, Suite 116
Redding, California 96002

Dear Congressman Herger:

This is in response to your inquiry on behalf of your constituent, xxx xxx xxxxxxxx. He asks whether it is legal for potential plaintiffs to seek an out of court settlement of alleged violations of title III of the Americans with Disabilities Act (ADA) when he questions whether the potential plaintiffs are truly seeking any modifications to make the property more accessible. Please excuse our delay in responding.

Xxx xxxxxxxx received a letter from attorneys at the Frankovich Group in San Francisco, identifying alleged title III violations at his Days Inn Hotel in Yreka, California. In the letter, the attorneys explained their claim that there are an inadequate number of accessible parking stalls, no van accessible parking, improper signage, and that the hotel must develop a policy to hold rooms with accessibility features until all other rooms in the hotel are rented. The letter proposes a settlement rather than litigation over the identified problems, and recommends that xxx xxxxxxxx cooperate with the Frankovich Group rather than litigate.

Although we cannot be certain of all of the facts on the basis of your constituent's letter, this situation follows a pattern that has become familiar to us in which some law firms sent out warnings about threatened litigation in hopes of getting the respondent to fix the problems and pay attorney's fees to avoid litigation. It is impossible to know from the face of the letters whether your constituent has actual ADA violations at his property, but if the allegations of inaccessible parking and a discriminatory hotel reservations policy alleged in the Frankovich letter to your constituent are accurate, he should first correct the violations in order to protect himself from liability, and perhaps seek legal counsel to deal with the Frankovich Group. If xxx xxxxxxxx needs assistance in determining how to come into compliance with the ADA title III standards for accessible parking or suggestions about hotel reservations policies, he may call the Justice Department Information Line at (800) 514-0383 (TTY) for advice and technical assistance. In addition, he may consult our website at www.usdoj.gov/crt/adm/adahom1.htmfor information and examples of prior settlement agreements in ADA title III cases.

Because it seems that your constituent is also concerned about the possibility that he might be sued or charged attorney's fees to settle, we recommend that he contact the State Bar of California at www.calbar.org(link is external) if he wishes to complain about the attorneys in question or if he seeks a referral to an attorney to represent him with experience in this area of the law. If xxx xxxxxxxx has no ADA violations on his property or if he corrects and violations before litigation is concluded, it is unlikely that he would be liable for any attorney's fees pursuant to the ADA, although we do not address liability under California law.

The ADA does not authorize payment of attorney's fees prior to an adjudication and the order of a court. The ADA provides only, in section 505, that a court may award a reasonable attorney's fee, including litigation expenses, and costs to the prevailing party in a suit commenced under the ADA. In Buckhannon Board and Care Home, Inc. v. West Virginia Department of Health and Human Resources, 531 U.S. 1004 (May 29, 2001),

the Supreme Court addressed the question of when a party is the prevailing party for purposes of section 505 of the ADA, holding that a party must secure either a judgment on the merits or a court-ordered consent decree to qualify as a "prevailing party."

Xxx xxxxxxxx is under no obligation under the ADA to pay attorney's fees to settle with the Frankovich Group, but his hotel is required, under title III of the ADA, to comply with certain ADA accessibility standards. Xxx xxxxxxxx should provide appropriate parking spaces, including van accessible parking where required, as well as proper signage in order to avoid the possibility of future liability for attorney's fees.

We hope this information will be helpful to you in responding to your constituent. Please do not hesitate to contact the Department if we can be of assistance in other matters.

Sincerely,

Ralph F. Boyd, Jr.
Assistant Attorney General
Civil Rights Division
