AppTyx, Inc.

Your solution for a better software company.

Our Mission Statement

To create the software application that engages your customers worldwide.

Our Services

At AppTyx, our professional software application "app" developers create fast, secure, and user friendly apps using a variety of modern programming languages and technologies. We specialize in business, personal, academic, biological, and health care apps. Our developers can create apps for any business, academic, personal, or mobile environment.

Our Team

Trevor G. Smith
C.O., Developer, Sr. Administrator of Legal Affairs

Mr. Smith applies his extensive legal background to ensure that all of our applications meet the highest degree of security, compliance, and quality standards. As a developer Mr. Smith is responsible for our biotechnology application development.
