

iTESS delivers technology transformation and capital program management solutions that help government agencies modernize operations, strengthen security, automate processes, and successfully deliver complex projects.

CORE COMPETENCIES

TECHNOLOGY & TRANSFORMATION

AI Strategy, Governance & Enterprise Automation - AI readiness, responsible AI governance, use-case prioritization, workflow automation, intelligent process improvement, decision support, adoption and change management.

Cybersecurity, Risk & Information Assurance - Cyber program support, NIST/RMF alignment, security governance, risk and control assessments, CUI protection, compliance coordination and continuous-monitoring support.

IT Modernization, Cloud & Digital Transformation - Legacy modernization, cloud adoption, systems integration, enterprise applications, requirements, ITSM improvement, implementation, transition and stakeholder engagement.

INFRASTRUCTURE & CAPITAL PROGRAMS

Design & Construction Project Management - Owner's representative A/E PM; multidisciplinary coordination across Architecture, Structural, Civil, Mechanical, Electrical, Plumbing, Environmental, Hazardous Materials, Security, Commissioning, Cost Estimating, QA/QC, Design Reviews & Construction Administration / Type C A/E Services.

RELEVANT EXPERIENCE / KEY PERSONNEL EXPERIENCE

- **Enterprise CMIS Modernization - Air National Guard:** governance, phased deployment, migration planning, UAT, training, operational readiness, stakeholder coordination and stabilization.
- **Cybersecurity, Risk & Information Assurance:** security, risk, compliance, governance and information-protection requirements integrated into enterprise technology and modernization initiatives.
- **Program Governance & PMO Execution:** milestones, risks and issues, stakeholder coordination, executive reporting, requirements management, quality reviews and transition planning.
- **Federal A/E Design & Construction Project Management:** Current project-management experience supporting VA, GSA, and other Federal programs, coordinating multidisciplinary teams across Architecture, Structural, Civil, Mechanical, Electrical, Plumbing, Environmental, Hazardous Materials, Security, Commissioning, Cost Estimating, and QA/QC. Responsibilities include scope and fee management, schedule coordination, RFIs, design submissions, consultant coordination, and construction-phase support / Type C A/E services.

WHY ITESS

Government-Focused Delivery

Mission-driven execution in regulated public-sector environments.

Disciplined PM Leadership

PMP, Agile, ITIL, Lean Six Sigma and cybersecurity-based delivery.
