

Beacon-4-Life™ - to stop the hazards to first responders associated with incendiary strike flares and the environmental contamination they cause.

Protect the health and safety of first responders and civilians. Stop exposing them to the dangers associated with incendiary strike flares - intense heat, noxious smoke, sparks, and flames.

Save our environment from the dangerous chemicals emitted from the use of traditional incendiary strike flares, and the environmental contamination from the toxic flares left behind on our roadways and waterways.

Designed by a first responder with patents pending.

A more cost-effective alternative to incendiary flares.

The incendiary strike flare, that has been used for many years, is now seen as a liability by many emergency service departments.

BENEFITS

- Multi-functional warning beacon, flashlight, work light, and SOS signal.
- No heat, sparks or flames.
- No noxious smoke.
- No burned skin or uniforms.
- No risk of igniting accidental fires.
- No environmental damage.
- No wasted taxpayer dollars on single-use & dangerous strike flares.

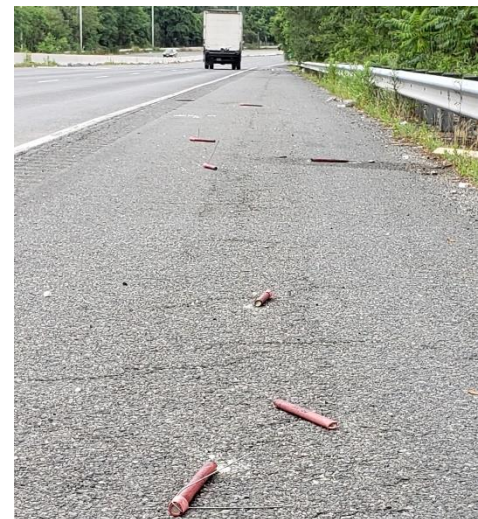

This outdated technology is toxic to the environment, and poses a risk of fire and personal safety.

These flares are NOT cost-effective and carry a lot of risk. First responders typically ignite 10 incendiary flares per hour at an accident site. At \$89.95 per Beacon-4-Life light, it pays for itself in about 22 hours. That doesn't factor in the additional costs associated with injuries and fires, and the superior performance and multiple functions of this device. Add the lifetime warranty and it's far more cost effective.

A safer alternative to incendiary flares

First responders ignite 5 or more flares for a single accident every 30 minutes.

It only takes one flare discarded into a water source to contaminate 240,000 gallons of water to a level of 4µ/L perchlorate.

Strike flares littering our roadways, contaminating our environment.

Incendiary strike flares can be a significant source of perchlorate contamination to both surface and ground water. Unburned flares improperly disposed of can contaminate water with perchlorate up to 2,000 times more than completely burned flares*.

Approved for: **Class 1, Division 2 Groups A, B, C, D.** Patent Pending.

FEATURES

- Approved for: Class 1, Division 2, Groups A, B, C, D.
- 12-inch-tall design is visible in variable conditions.
- Manufactured using high strength Polycarbonate.
- Operates on 3 D-size alkaline batteries (Included).
- Over 100 hours of effective operation per set of batteries.
- Focused spot beam flashlight function.
- Single and dual color combinations: Red, amber, red & white, red & blue, red & amber, blue & amber, and green & amber.
- Dual colors can be operated independently or both colors flashing together.
- O-Ring is sealed at the lens and battery cap.
- Field replaceable lens.
- Visual low battery indicator.
- Two side body clips.
- Four attachment loops.
- **Lifetime Warranty** covering defects in materials and workmanship under normal and intended use.

STRIKE FLARE

OPERATING TIMES	Up to 140 hours	20 hours	Up to 150 hours	30-minutes with wire stand
LEDS	20 LEDs (Warning Beacon), (1) 3 watt LED with Parabolic Reflector (Flashlight)	8 LEDs	16 LEDS	N/A
FLASH PATTERNS	Up to 17	2	10	N/A
COLORS PER UNIT	Up to 2	1	Up to 2	1
HEIGHT	12"	8"	1.25"	16" long when ignited
FUNCTIONS	Warning beacon, Flashlight, Work light, Lantern, S.O.S. signal	Warning light only	Warning light only	N/A
RECHARGEABLE	No	No	Yes	N/A
FIELD REPLACEABLE PARTS	Lens, Body, Battery Cap, LED Module, Base Plate	No	No	Disposable
BATTERY TYPE	3 (D) Cell Alkaline	4 (AA) Cell	CR-123	N/A
INCLUDES	Base plate, Traffic Cone Ring, 3 (D) Cell Batteries, FREE S&H in the Continental U.S.	Warning light only	Warning light only	Wire stand
PRICE	\$89.95 each	\$67.49 to \$108.73 each	\$59.95 to \$67.95 each	Average cost \$2.00 to \$5.00 each depending on quantity ordered
