Small Business. 2 employees, 2 sales agents, 2 dealers

INTRODUCTION

“Tactical Gear Designed For Law Enforcement By Law Enforcement”

Police Ballistic Shield™ was founded in 2017 near Tampa, Florida by Steve Bush, President, with the goal of providing quality products for law enforcement to keep officers safer on the job.

We are different because our management, sales team and dealers better understand the needs of law enforcement because they are either current or former law enforcement, or military.

ORGANIZATIONAL OVERVIEW

We provide ballistic shields, body armor, helmets, shield lights, scene lighting, distraction devices, duty gear and specialized protection for schools and K-9 officers.

Our customers include federal agents, police and sheriff's departments, schools, fish and wildlife departments as well as individual consumers.

Geographical Reach

- Founded in 2017 as a small business with one patented product.
- Eight years later, we have offices in Lutz, Florida and dealers strategically located across the United States, we maintain a strong presence nationwide, facilitating seamless collaboration and project delivery to law enforcement agencies across the US, Canada, South America. and Japan.

DIFFERENTIATORS

- **Innovative Solutions:** We installed custom **rolling ballistic shields disguised as white boards** so they can be hidden in plain sight at schools for immediate deployment against active shooters.
 - We partnered with a law enforcement officer whose partner was shot in his patrol car by a drug cartel despite driving an armored door cruiser. His partner saw the need to protect the head from being shot through the windshield, and went on to develop a **patented ballistic shield that mounts to the driver or passenger side door panel for immediate deployment from inside the car.**
-

AREAS OF EXPERTISE

Police Ballistic Shield, Inc. specializes in a wide array of areas, including but not limited to:

1. **Ballistic Shields:** We offer ballistic shields from several manufacturers:
2. **HighCom Armor's** line of Bellfire Shields, provide police and military personnel with advanced multi-hit protection from Level IIIA or Level III threats. Our shields are independently tested through an NVLAP accredited NIJ approved laboratory to meet or exceed ballistic resistance as specified under NIJ Standard 0108.01.
3. **Armored Republic** launched its own line of ballistic armor and body armor solutions in 2012. They entered the industry with the mindset of manufacturing top-quality, reliable products that offered customers high-value solutions. Their products are intended for responsible law-abiding American citizens, law-enforcement personnel, and military personnel.

With their unique in-house manufacturing processes and ability to acquire material made to their specifications, they set the standard for ballistic steel core body armor. Utilizing industry-leading fragmentation mitigation coatings, they increased what's possible with ballistic steel.

Recently, Armored Republic purchased Hardcore Defense – a very popular product line Police Ballistic Shield has carried for many years. We believe their manufacturing process has improved those products by keeping the entire process in-house with excellent quality control. The product names remain the same as before – Alpha Shield, Bravo Shield, Delta and Delta Special Shields – but better.

4. **Caliber Armor** Ultra Series Shield is made with ultra-hard alloy. Multi-shot rated. Finished with a polyurea protective coating. Made in the USA. It includes a fixed one-position handle for better balance, less carry fatigue and easy to use for right and left-handed users. Padded armrest and quick release arm strap come standard. Custom grip padding for handle and free POLICE or SHERIFF imprint.

Upgraded hardware ensures the ballistic performance of the shield is consistent throughout the surface. This shield and hardware passed and exceeded not only the RF2 threats, but also DEA and Special Threats like the M855 A1 and LPS projectiles. We think you still want .308 coverage so we test our shields against the testing to give you a true Level III++ / RF2 protection level. An extra pound gives you an extensive amount of extra protection.

Body Armor by Rothco and Legacy Safety & Security

It's rugged yet lightweight, is MOLLE (Modular Lightweight Load-Carrying Equipment) compatible and designed to offer ballistic protection with four plate armor pocket inserts.

This military tactical vest is fully customizable and can fit most pouches, holsters, and other modular gear. We like the adjustable padded shoulder straps with quick-release buckles effortless removal and an emergency drag handle on the back.

The **Legacy** Level IV Multi-Hit single curve 10x12" plates is a light-weight true multi-hit Level IV plate that far exceeds NIJ Requirements. This Level IV is not only one of the lightest plates on the market for this level, it stops 6 shots of that .30.06AP round.

Ballistic Barricades for Schools

Our children deserve a safe place to learn. We offer a custom-made ballistic whiteboard for ballistic protection in the classroom, conference room, or lobby that can be hidden in plain sight.

Designed to:

- prevent active shooters from seeing through, shooting through, and forcing their way through doors and other points of vulnerability.
- block a hallway while students or employees evacuate
- deploy immediately on-site as a rolling ballistic shield for school resource officers and other first responders.

When not called on for such emergency service, the Sentinel makes a great teaching aid or announcement board for daily use.

K-9 Protection:

We ensure your K-9 goes home with you at the end of the day. Heat exhaustion is often the leading cause of Police/Military Working Dog K-9 deaths annually. K-9 body armor vests on the market today offer zero ventilation or breathability. Our vest does. When your K-9 is more comfortable, they are less distracted and more focused on the task at hand. Whether it's a track, narcotics/weapon search or apprehension, you want and need your working dog to be 100%. You don't want to put them at risk for heat exhaustion.

The Titan K9 Tactical Ballistic Armor Vest 3.0 was developed with the concerns of K-9 handlers around the world in mind. By offering maximum coverage and ballistic/stab protection while maintaining the K-9's comfort and mobility, the Titan Vest 3.0 is truly the pinnacle for K-9 body armor and protection.

PAST PERFORMANCE

A sample of our customers include:

- Roswell, Georgia Police Department \$50,000
 - Huntsville, Texas Police Department \$54,000
 - El Paso County, Colorado Sheriff's Department \$27,000
 - U.S. Fish & Wildlife Law Enforcement \$20,000
 - U.S. BLM Law Enforcement \$13,000
 - Japanese National Police \$5,000
-
