Surgery chair

DOC Classic Pro

novymed.com

Mobilizing 
Healthcare

The DOC, Dynamic Operating Chair is both an operating chair and table and was developed specifically for day surgery treatment. This unique product saves time; eliminates manual handling and the risk of back injury to clinical personnel, it offers a very high level of patient comfort and equally importantly reduces operating costs by improving efficiency. The DOC is suitable for ophthalmology, ENT, oral and plastic surgery. By using multiple operating chairs, patients can effortlessly flow from the Day Surgery Unit to the operating theatre and back ensuring maximum utilization of operating facilities.

DOC advantages

The DOC Classic Pro is unique and offers many advantages. It facilitates the whole clinical process; from admission and preoperative treatment to surgery and recovery. The patient stays in the DOC during the entire procedure.

① Before and after surgery there is no need to use an additional bed or stretcher, this saves time and capital investment.

② Transfer of the patient from a stretcher to the operating table becomes irrelevant. Therefore very ergonomic for all clinical nursing staff and patient.

③ Efficiency will increase significantly by 40-50% using multiple DOC operating chairs.

DOC Classic Pro
