GrowN22 and Zero Carbon Kids Announce Exciting Partnership Agreement

Haringey, London, England: GrowN22 C.I.C. and new Haringey-based charity Zero Carbon Kids (ZCK) have entered into a partnership agreement to actively encourage recycling and repurposing of materials in the N22 area and beyond.

The agreement commits the organisations to achieving a net zero carbon footprint while continuing to enhance the local environment through a series of community events and urban greening interventions.

A portion of any profits made by the organisations will be used to sponsor planting schemes at new community garden project sites and will begin an extensive program of identifying suitable sites for the sponsorship of tree planting.

Further details will be released via social media channels in due course. In the meantime, please help to support our carbon neutral journey by visiting ZCK's eco stall at Downhills Park Cafe on 24th July 2020 11am until 3pm.

"We're thrilled to be linking up with GrowN22 at this early stage of the ZCK journey. As local residents, we've long been aware of the positive impact GrowN22 is having in Wood Green and beyond, and with our shared values and ambitions we look forward to many fruitful collaborations." Says Bonnie Morris, co-founder of Zero Carbon Kids

"Repurposing and recycling materials is at the very heart of what we do at our community gardens, and partnering with Zero Carbon Kids helps us expand a developing network of materials across Haringey" Says Luke Newcombe; Founder of GrowN22. "GrowN22 takes climate change extremely seriously and is doing everything within its remit to make the local environment cleaner and greener".

Press Denotes:

About Zero Carbon Kids

Zero Carbon Kids sells second-hand children's clothes to accelerate the journey to net zero. We collect outgrown clothes by bicycle, recycle them into the local community and direct monies raised towards tree planting and environmental projects. For more information please visit www.zerocarbonkids.co.uk and follow us on social media @zerocarbonkids.

About Grow N22 C.I.C.

GrowN22 exists to transform unlikely, disused and neglected spaces across Haringey into vibrant community gardens and growing spaces made for and by local people. Our aim is to transform Wood Green into a lush green urban paradise through creating community

gardens and greening the public realm. For more information on GrowN22, please visit www.GrowN22.com and follow us on social media @Grow_N22
