

## Grant and Energy Rebate Programs For Upgraded Lighting

The 2019 DEP Grant can cover up to 50% of the cost of fixtures up to a maximum of \$6,000.00. Plus, you are still entitled to your local Power Company Energy Rebate.

The combined DEP Grant and Energy Rebates can reduce the cost of a lighting upgrade by as much as **60%**.

Why upgrade your lighting? **Simple - it saves you money often times as much as 50% or more on your electric bill!** Upgrading your lighting lowers ongoing electric bills, reduces maintenance costs and improves operations.

The DEP Grant has several basic requirements: A. The entity must be a for-profit, non-franchised business with less than 100 employees, B. Show \$500.00 or more in yearly energy savings and a 25% reduction in energy consumption. The DEP Grant is a First Come – First Serve program, until the money is gone.

While Grant and Rebate paperwork is required, Steel City works with the Grant Administrator, and the Power Companies to prepare the information needed for your applications.

All that is needed: Current copy of your electric bill and an inventory of all your existing lighting which Steel City completes for you. Next we design a solution that meets your needs and the requirements for Grant and Energy Rebate.

At this point you will know what your Grant and Energy Rebate will be, your final out of pocket costs, Return On Investment and projected ongoing energy savings.

I look forward to working with you to, if you have any questions please don't hesitate to contact me by phone 412-606-6053 or <mailto:gbritcher@me.com>.

### **Example: Upgrading MH Parking Lot Lights with LEDs**

16 - 240w LED Shoe Box Lights Replacing 16 - 400w MH

Fixture Cost (\$300.86 x 16)	\$4,813.76
Less Grant (50%)	(\$2,406.88)
Less Energy Rebate (\$125.00 x16)	<u>(\$2,000.00)</u>
<b>Final Fixture Cost</b>	<b>\$406.88</b>
