PROFESSIONAL DEVELOPMENT WORKSHOP:

Maximize Student Achievement using Brain-Based Strategies

Classrooms today are not the same as they used to be. Students are experiencing brain-based challenges and innovative, effective teaching strategies are needed to help match the needs of our students.

We've got the answers.

IN THIS WORKSHOP, YOU WILL:

- ✓ Receive the latest research on the brain and **how its function is affecting your students and classroom**;
- ✓ Understand **how and why** the brain impacts readiness to learn;
- ✓ Learn easy to implement activities and movements that get your students' brains activated and ready to learn;
- ✓ Feel equipped with proven strategies to **help improve classroom behaviour, emotions, and learning** at its core.

What Educators Are Saying

“

"I found the presenter interesting, genuine and passionate about her topic which gave me new inspiration, ideas and motivation. The information was relevant and helpful."

“

"Thank you for your lovely presentation. It was very informative and thank you for reminding me to spend a few minutes at the start of the lesson waking up my students' brains."

“

"A tremendous amount of great information; latest research and tips to properly engage our students and their brains."

“

"The information on how the brain actually works was truly fascinating and helpful for classroom application."

About the Presenter

Dr. Laura Dieleman, BSc, DC, is a mother of three, a chiropractor by trade, and has done postdoctoral studies in functional neurology for the last 13 years with a focus on children with neuro-behavioural disorders. While in the midst of having three children, Dr. Dieleman developed a growing concern for the increasing challenges children around her were facing. Due to this, she shifted her focus toward neurobehavioural disorders in children and found an incredible link between learning, movement, behaviour, and brain function.
