VIEWING -All bulls are available for viewing at the Barwick Ranch until the morning of Thursday February 9th when the cattle will be hauled to Alma Sale Barn.

CAN'T BE THERE ON SALE DAY?- If you are unable to attend and would like to submit a bid, please feel free to contact Rodney at number listed above.

ABSENTEE BIDDING- absentee bidders who wish to utilize the internet may bid online at www.dvauction.com. Please register online 24 hours prior to sale. We guarantee your satisfaction of all bulls purchased sight unseen. All bids will be handled with integrity and confidentiality.

TERMS AND CONDITIONS- Terms are cash or check, all settlements must be made day of sale before bulls leave the grounds. All bulls sell under the terms of the AGA (American Gelbvieh Association).

HERD HEALTH- All bulls will sell with health and brand papers.

SEMEN INTEREST- we will be retaining a 1/3 semen interest in all bulls sold, unless otherwise noted

ANNOUNCEMENTS- A supplement sheet will be available on sale day with updated information **including homozygous black and carcass traits**. This sheet and any announcements made from auction block take precedence over catalog. All responsibility goes to the buyer after the auctioneer says SOLD. Every effort will be made to ensure safe handling of cattle throughout the sale and load out process.

GUARANTEE- All bulls are guaranteed against injury or death through the first breeding season. (90 days after turn out). If a replacement bull is not available, a credit will be given toward the purchase of a bull at the sale the following year. If a problem should arise, please contact Barwick Gelbvieh immediately to resolve this issue.

DELIVERY- All cattle can be delivered free of charge in Nebraska and northern Kansas. Arrangements can be made for delivery anywhere in the US.

**** If you haul your bull(s) day of sale, you will be given a \$100 discount per bull****

FREE CARE- All bulls not taken home on sale day will feed and cared for until April 1st free of charge. Bulls needing fed after April 1st are subject to a cost of \$3 per head/per day.

RESPONSIBILITY- All persons attending the sale do so at their own risk. Neither the sales management nor the consignors assume any liability, legal or otherwise, for any accidents which may occur.

Dear Beef Producers:

Welcome to the 9th Annual Barwick Gelbvieh Production Sale. Most importantly we want to say THANK YOU, 1st to the mighty God we serve for seeing this through and 2nd for your interest and support of our breeding program. It's always a pleasure doing business with each of you and appreciate your evaluation of our offering.

We are excited to have Steinkruger Farms as friends and guest cosigners at our sale.

Our numbers are not large, but the quality runs deep with bulls that will flat add pounds to the scales and \$\$\$\$ in your pocket. We take great pride in calving ease and their gentle disposition. The bulls are fed a high roughage ration for longevity and we have strived to put together an outstanding set of functional bulls that will be evidenced by performance, carcass quality, and maternal traits in their offspring allowing for pounds on sale day and quality replacement females.

We are sincerely honored to have you evaluate our genetics and invite you to visit our ranch to view the cattle prior to sale day. See you on Friday, February 10th at Alma Livestock, Alma Nebraska !!

Sincerely,

The Barwicks and Steinkrugers

13	-0.6	73	113	17	54	0.08	43	0.33	0.42	82.77

Calving Ease Direct (CED): Represented as percent of unassisted births of a bull's calves when he is used on heifers. A higher number represents more favorable calving ease.

Birth Weight (BW): predicts the difference, in pounds, for birth weight. (actual birth weights can be deceptive as the environment, nutrition, and over due calves are key factors).

Weaning Weight (WW): predicts the difference, in pounds, for weaning weight (Adjusted to age of dam and 205 days of age). This an indicator of growth from birth to weaning. Higher number preferred.

Yearling Weight YW): predicts the difference, in pounds, for yearling weight (adjusted to a standard 365 days of age). This an indicator of growth from birth to yearling. Higher number preferred.

Milk (MK): The genetic ability of a sire's daughters to produce milk expressed in pounds of weaning weight.

Total Maternal (TM): An index that combines growth and milk information as a prediction of the weaning weight performance of calves from a sire's daughters. A greater TM value means a mother that returns comparatively higher weaning weights on her calves. TM Index = MK EPD + ½ WW EPD.

Yield Grade (YG): Differences in yield grade score, which is a predictor of percent retail product. Smaller values suggest that progeny will have a better lean to fat ratio.

Carcass Weight (CW): Differences in pounds of hot carcass weight, adjusted to an industry standard age endpoint. Higher number preferred.

Ribeye Area (REA): Differences in ribeye area in inches between the 12th and 13th rib. Greater are preferable.

Marbling (MB): Predicts the differences in the degree of marbling within the ribeye as expressed in marbling score units. Greater marbling numbers are preferable and are an indicator of higher carcass quality grades

Feeder Profit Index (FPI): An economic selection index designed to aid producers in selecting sires whose progeny will perform in the feedlot and are sold on grade and yield. Well ranking sires for FPI have higher marbling and carcass weight than their contemporaries. As a terminal index, little emphasis is put on maternal traits such as stayability and calving ease.

Multi-Breed Genetic Evaluation - All of the AGA EPDs are backed by the industry's largest and most robust multi-breed international genetic evaluation in the world. Growth and carcass EPDs for Gelbvieh and Balancer animals are directly comparable to Simmental, Red Angus, Shorthorn, Limousin and a growing number of other breeds. The multi-breed EPDs combine pedigree, performance, ultrasound, carcass and genomic data into one easy to use set of numbers. Seedstock breeders and their commercial customers can have confidence in the AGA's EPDs to evaluate the genetic merit between breeds for both purebred and hybrid seedstock.

Gelbvieh and Balancer Breed Average EPDs – Active Sires

	CED	BW	WW	YW	MK	TM	ST	YG	CW	REA	MB	FT	FPI
Gelbvieh	12	0.1	68	98	21	55	15	-0.22	30	0.67	0.20	-0.04	74.09
Balancer®	13	-.05	71	108	20	55	14	-0.05	35	0.48	0.36	0.00	80.44

Gelbvieh and Balancer Breed Average EPDs - For non-parent animals

	CED	BW	WW	YW	MK	TM	ST	YG	CW	REA	MB	FT	FPI
Gelbvieh	12	0.1	68	98	21	55	16	-0.21	30	0.66	0.21	-0.03	74.44
Balancer®	13	-0.5	70	107	20	55	14	-0.06	34	0.48	0.37	0.00	80.32

Sire Selection: A large portion of a ranchers revenue comes from pounds sold on sale day. If you are looking to put your cow herd on the fast-track to herd improvement, sire selection is key to meeting your goals. While we believe structure and phenotype are essential in the selection process we encourage you to take into account EPDs and carcass data. Understanding EPD data is a useful tool in making the best sire selection for your herd.

This is another bull that was a stud from day one that we loved watching grow. Hes huge middled and big hiped. Extremely easy fleshing and will sire great feeding big steers and will make excellent replacement heifers. His dam never misses and will be heading to the donor pen. We purchased his sire from Beastron Ranch a few years ago and he constantly stamps out good ones.
