

NATIONAL OPPORTUNITY YOUTH COLLABORATIVE

A Momentum Strategy & Research Initiative

Momentum Strategy & Research is excited to introduce the official launch of the National Opportunity Youth Collaborative—a.k.a. **Opportunity Collaborative**. Schools involved in serving the country's opportunity youth will be able to access annual reports on the performance of alternative schools across the country and join other peer schools in collaborating on group prioritized measures.

The attached form allows alternative schools, school networks, or other direct educational service providers to participate in this effort. There are a variety of participation levels to choose from, as well as the opportunity to join in on research efforts being led by Momentum.

School Participation Levels

Schools may select from the following participation levels:

Basic—Receives Opportunity Collaborative's four annual publications, including an Annual Alternative School Performance Report

Basic Plus—Same as Basic, plus a customized annual performance report that highlights your school's comparative performance

Peer Group—Same as Basic Plus, plus a report comparing your school's performance against peer schools

2017-2018 Project: Assessment of Student Re-Engagement

The inaugural **Opportunity Collaborative** project is designed to help alternative schools collect and track data to inform how their students arrive and progress through five levels of skill acquisition, motivation, and social-emotional well-being. What's more, participating schools will be able to see (over time) how the rate of progress of their students compares to other participating schools. Momentum has teamed up with Epicenter, an industry leader in secure data management (<http://epicenternow.org>), to facilitate secure data submissions and is working with them on developing customized, interactive data tools.

In order to participate in this, or any future **Opportunity Collaborative** projects, participating schools must have access into our Data Center. This can be achieved by joining at the Peer Group level, or by adding Data Center Access to the Basic or Basic Plus levels. Schools only wishing to receive publications need not sign up for Data Center Access.

NATIONAL OPPORTUNITY YOUTH COLLABORATIVE

2018-2019 Participation Form

Please complete the following information and email the completed form to jernst@momentum-sr.org.

Contact Information	Billing Information (if different from Contact)
Name Organization Address Email	Name Organization Address Email

Number of Schools	Participation Level	Description of Benefits	Per School Cost	Line Total (# Schools X Per School Cost)
	Basic	Receives NOYC four annual publications	\$500	
	Basic Plus	Same as Basic, plus a customized annual report including your school's comparative performance against national averages	\$1500	
	Peer Group Participant	Same as Basic Plus, plus a report comparing your school's performance with average Peer Group outcomes (includes Data Center Access)	\$3000	
	Data Center Access	Add on to Basic or Basic Plus participation levels	\$600	
Participation Total
