

## Simplex In The Park

### Simplex in the Park-Equipment Test on Location

This exercise will give you an idea about the range of your equipment. (Hand-helds and Mobile radios). Club members set up various antennas in the park. You are then able to connect your radio to their antenna and attempt to make contact (using Simplex with no help from a repeater) with other members who will be elsewhere. A "PIGTAIL" is required for this event. The club will provide some of the more common pigtails.

If you are unable to attend in person, you may be able to participate from home.

The club will provide refreshments.

**Location:** Surprise Community Park, 15953 N. Bullard Avenue, Ramada #9 (North parking lot)

**Date:** December 11, 2021

**Time:** 10 AM - 2 PM

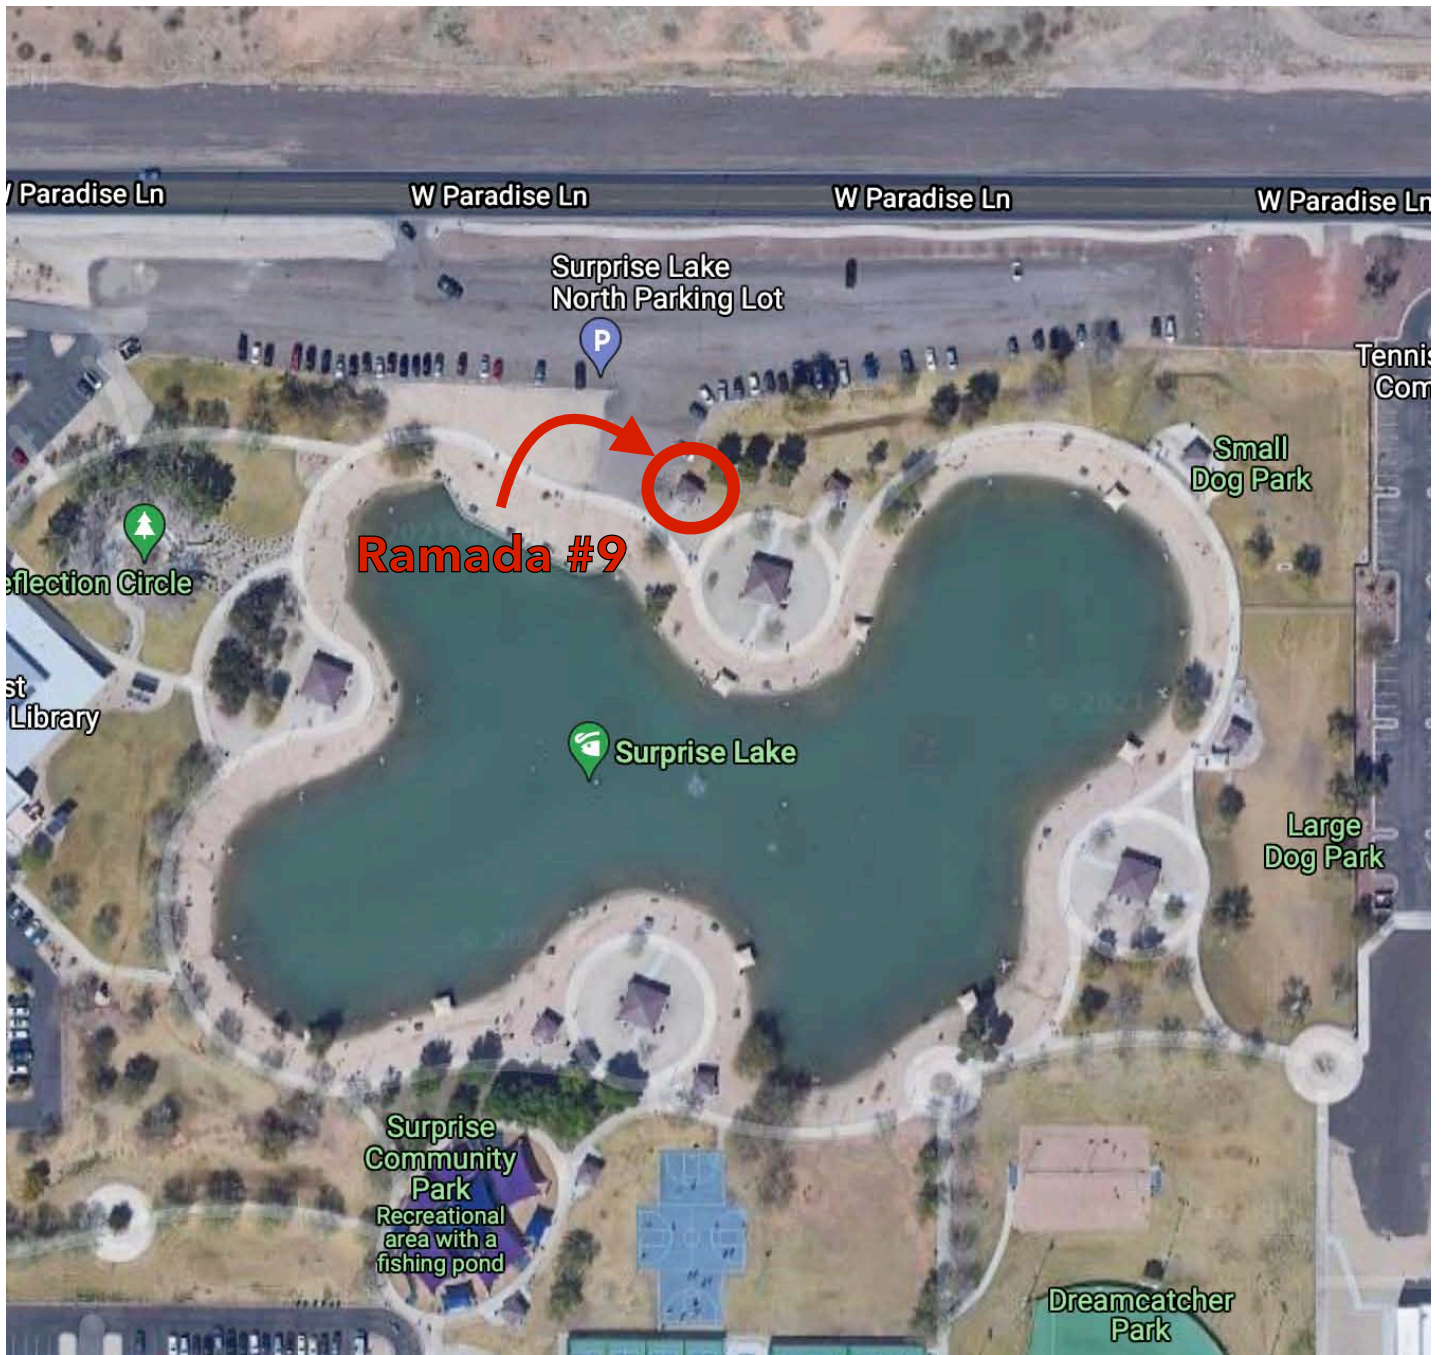

**Planned frequency:** 146.58 MHz
