29-30,  
2022

11 AM Saturday  
To  
11 AM Sunday

WINTER FIELD DAY 2022

*This year's Winter Field Day Rules* are out and are much like last year's. There are only three categories;

- \*Indoor
- \*Outdoor
- \*Home

and only two power multipliers

- \*Low (100 watts or less)
- \*QRP.

I applied for and received the Winter Field Day club call, "W7D". The "D" denotes Desert rather than "V" for Valley. There's a group in northern Nevada that always gives me a hard time about using V so I used D instead.

Neither the location nor the number of transmitters has been decided yet, so we are open to suggestions. Because WFD is an emergency communications test, FT4/FT8 modes are **not** allowed.

Again you're allowed to work your station using your call and applicable privileges, and all of your contacts may be added to the club total. To accomplish this, fill in the "CLUB" line on the Cabrillo log using **West Valley ARC**, and all submissions must be the same.

The club will arrange for the applicable software.

**I am planning to form a WFD committee to work out all the details. If interested please email me. We need a few good men & women.**

Questions can be answered throughout the month on my Wed. morning net @ 9:00 AM on 147.300.
