

## J-POLE DUAL BAND ANTENNA BUILD CLASS/ WORKSHOP

### Looking for your first dual band base station antenna?

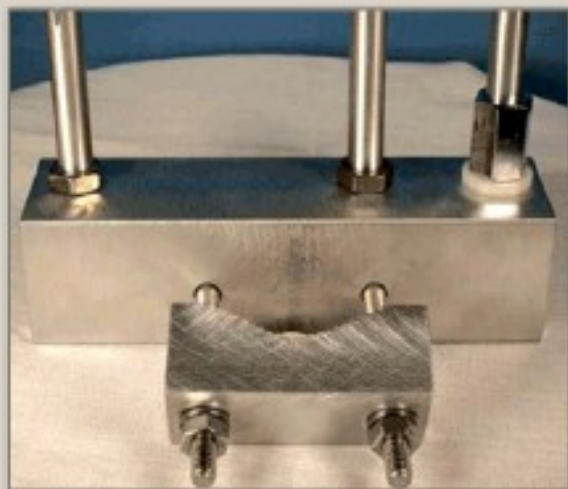

Join in with other club members and build a 2 meter/ 70 centimeter base station antenna from kit form. The kit provides all needed materials already pre-cut and ready to assemble. This antenna is designed for use outdoors but will work well indoors with an HT. For those with disabilities... members will be on hand to assist. Gary Franklin, K8BKB will be on hand to discuss basic operating principles of the antenna.

**When:** May 21 at 10:00 a.m.

**Where:** Shepherd Of The Desert Lutheran Church, 11025 N. 111th Avenue, Sun City, AZ 85351

**Kit cost:** \$58 and must be paid for in advance of the class/workshop. Checks should be made payable to WVARC.

**Registration/payment deadline:** May 7

To use this antenna for your installation you will need a suitable length of 50  $\Omega$  coax with PL-259 connector which must be obtained separately.

**Note:** The club will provide a length of coax cable and an antenna analyzer for testing on the day the workshop.

To register for the workshop and/or to arrange payment contact:  
Nick Robertson, W5CXR at 623-889-4124 or ncrnwr@yahoo.com
