

## **PREAMBLE FOR NET CONTROL**

***This is (NAME/CALL). Welcome to the West Valley Amateur Radio Club's morning/evening call in net. This is an open directed net all traffic should go through me. All licensed amateurs with two-meter privileges are welcome. You need not be a club member to join in the fun.***

***Our repeater is in Sun City West, AZ, has an output Frequency of 147.300 MHz, with a standard positive 600 KHz offset and a 162.2 Hz tone.***

***If anyone should have an emergency during the net - transmit a double break and we will assist you as needed (we have an excellent track record).***

***Information about our club including the 14 weekly nets may be found on our web page at [westvalleyarc.com](http://westvalleyarc.com). More information upon request.***

***I will periodically wait 10 seconds at the end of check-ins to allow Echolink users to check-in. If you are an outbound mobile or short timer, let me know and you will be placed at the top of my list.***

***Announce your topic/trivia if applicable then ask for check-ins. And have fun!***

***I like to remind everyone the net is open to all hams throughout the net.***

***Feel free to personalize your preamble.***
