

WVARC TECH COMMITTEE NEEDS NEW & RENEWED MEMBERS

The Tech Committee is taking on new and former members who want to commit their time. We need members:

- For the upkeep and repair of our two repeaters.
- To maintain, train, and deploy our advanced Doppler System.
- To work on needed budgets.
- To formulate effective training programs and other valued projects envisioned for our club.

Individuals who want to not only learn but dedicate time and talents to this endeavor will be appreciated.

You need not have an extensive technical background but must be willing to work and be a member of the club.

We will be holding a Zoom meeting once the winter residents return, so that we are able to streamline, upgrade, and shape the future Tech of this club.

If you would like to join or continue to be a part of this committee, contact Frosty, NQ1S, for more information at the email address on the club roster.
