Agricultural Food Production Tour

CNH Industrial Reman is a joint venture between what is now CNH Industrial and Springfield Remanufacturing Corp. The partnership brings together CNH Aftermarket Solutions product expertise, access to equipment, and dedicated dealer networks with SRC's remanufacturing operations, capabilities, and expertise. CNH Aftermarket Solutions is the parts and service arm of the larger company that also includes Case IH. CNH Reman, later called CNH Industrial Reman, was formed on December 31, 2009 and has added an average of 600 new products every year since. The remanufacturing facility is located in Springfield, Missouri and includes a tech center, distribution center, and call center.

At ShowMe Genetic Services, LLC our focus is creating customer success in the beef industry. As a CSS facility, we collect, store and ship semen for use around the world for a variety of customers. Our commitment to producing the highest quality semen and exemplary customer service is rooted in our belief that creating success for our customers leads to the sustainability of the beef industry in the US and around the world.

Lunch

Some people look at a lawn as a place that requires mowing, edging, seeding, fertilizing, and more – in short, as a chore. At Pennington we see it as an outdoor living space for making unforgettable memories, and we're dedicated to ensuring that your lawn is ready for any occasion. We've been at this for a long time, beginning in 1945 as a small seed store on Main Street in Madison, Georgia. We're proud that Brooks Pennington Sr.'s spirit of entrepreneurship is still with us today, and this drives us to make the finest grass seed, soil amendments, fertilizers, and wild bird seed that money can buy. From baseball games, parties, water balloon fights or playing fetch with the family dog, millions of homeowners have relied on Pennington to set their lawns and gardens as the stage for lifelong memories

Hankins Farms-

Modern fescue production and cover crop production

In 1946, grocer Ralph Hammons noticed a lot of wild Black Walnuts growing all over Southwest Missouri. Seeing the future potential of this local crop, he bought a cracking machine and began buying Black Walnuts from the hardworking Ozarks people who gathered them each fall.

Steak Dinner and Entertainment

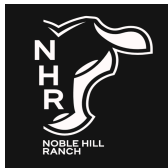

DAY 2

Breakfast 6:30-7:30am at Morrisville High School, Morrisville, Missouri

Gardener's Orchard and Bakery is a You-Pick family fun farm. Gardener's Orchard & Bakery is owned by the Gradinariu family. The Gradinariu family has owned and operated the orchard since 2013. Previously the orchard was owned by the Plaster family. The Gradinariu family immigrated to the United States from Romania in 1990.

They initially settled in Southern California and in the fall of 2004 the family decided to relocate to Southwest Missouri. This is where the life long dream of owning and operating a farm became a reality. The family owned and operated commercial turkey farms for 10 years before they took over the orchard in 2013. In 2015 the family decided to focus only on the orchard and sold the turkey operations. Throughout the years, the Gradinariu family has added a bake from scratch bakery, berries, farm tours, events, and locally grown produce to the farm. As a large family with 10 children, the family's goal is to encourage, support, and educate the local community about the benefits of eating local and the impact that has on our children, families, health, and local economy. Knowing what we eat and where our food comes from is so important to the Gradinariu Family. That is why they recommend to find and support a local family farm that can show you how food is actually grown and where it comes from. With the beginning of a new decade in 2020, the family's mission is to provide a fresh look into the local farm community through a initiative called "Meet your Farmer." A new video series is to be released monthly showcasing local farms, how food is grown locally and how you can support your local farmer. You'll be able to find details on Facebook and YouTube. The orchard is truly an answered prayer for the Gradinariu family and they are blessed to be able to live their dream every single day.

Nobel Hill Ranch- Cow/calf operation, backgrounding, feedlot, hay, wheat, and corn silage production.

Preferred Livestock Products is family owned and operated with the uncompromising belief that consistent, quality nutrition is the driver in a profitable operation. Our most important objectives are to efficiently enhance year-round forage inputs to

maximize genetic potential and consistently meet the producer's expectations and their animals' needs 365 days a year in a convenient, cost-effective way.

LUNCH AND CONCLUSION OF TOUR
