Computer Courses For "Normal" People

Catching A Wave

Join this session to learn healthy Internet practices including securing your Internet browsers optimizing your World Wide Web experience, and staying safe from the many dangers lurking around each virtual corner.

Beyond CTRL-ALT-DEL

In this exciting session we will cover such items as: What to do during a tech emergency, best practices for the securing of email, and keeping your computer clean and running its best.

Don't Throw IT ~ Get To Know IT

In this session we cover speeding up your computer, fighting malicious software (viruses, etc.), Internet safety, and how to setup and manage your network, including your wireless networks.

Just Hit Send

Email has crept into every aspect of our lives. In this session we will discuss making the most of your email experience, all with a dash of email etiquette.

Securing The Human

Sometimes the biggest threat stares back at you from the mirror. Learn to protect your computer, and your identity, from deceptive social engineering tactics.

Freeware Free-4-All

With so much software out there it's hard to sort the trash from the true treasure. Join us as we reveal FREE software to unleash your computer ... and spare your wallet.

I Turned IT On...Now What?

During this session we reveal how we can leverage the power of "the cloud", discuss choosing the right computer, and ways for maintaining your online privacy.

What's This Button Do?

Learn how to tell if your system is as safe as you think by discovering your level of vulnerability. We will cover data integrity, auditing systems, and remediating your discovered computer and network issues.

F.A.O. (Frequently Asked Questions)

Join us as we deliver real and simple answers to your technology questions to solve your digital woes. Bring in your questions and leave with REAL answers. Plenty of open discussion to be had!

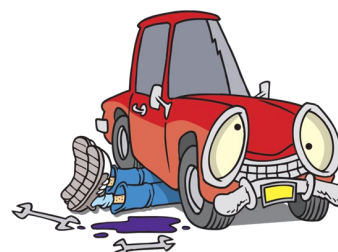

Risky Business

What would you do if you lost your computer to disaster or theft? In this session we discuss protecting yourself from a digital disaster, and what to do if the unthinkable actually happens.

Viruses, Hackers, and SPAM! Oh My!

Let's learn security secrets for protecting your computer. We will expose the threats attacking your computer and help you understand how to defeat them.

Press ANY Key To Continue

Computer slow? Viruses? Learn how to tend to your computer yourself, including recovering from issues, restoring performance, and basic maintenance procedures.
