

Notice of Confirmation of the Results  
Of the Lead and Galvanized Service Line Survey  
For the City of Canyonville

Public Water System Name: City of Canyonville

PWS ID No.: 00169

Dear Drinking Water Consumer,

The City as a public water source has been required by Oregon Health Authority to conduct a survey of water lines (also called service lines) to the water main to determine if there are any lead or galvanized lines.

Our public water system is focused on protecting the health of every household in our community. This notice contains important information about your drinking water. Please share this information with anyone who drinks and/or cooks using the City of Canyonville water.

It has been determined that the service line that connects to your home, building, or other structure to the water main is **not** made of lead or galvanized material. This determination has been achieved by eyes on the service lines or through documentation.

This notice is clarification that there are **no service lines made from lead or galvanized materials** in the City of Canyonville.

Date: October 31, 2024

Dawn Bennett
