

AI GOVERNANCE THAT WORKS IN PRACTICE

FROM INVENTORY TO EXECUTION—EGBG LLC HELPS USCIS TURN AI POLICY INTO OPERATIONAL CONTROL, WITHOUT SLOWING DELIVERY.

EGBG LLC

AI GOVERNANCE | IT GOVERNANCE | STRATEGY
COMPANY ONE-PAGER

WHAT WE DO

Turn the AI use case inventory into something leadership can see, trust, and act on.

- Translate policy into operational workflows
- Build and run the USCIS AI use case inventory
- Drive AI Impact Assessment (AIIA) execution for high-impact systems
- Align governance with system authorization realities
- Convert compliance into leadership-ready insight

THE PROBLEM

Most agencies are stuck here.

- Inventory = static reporting exercise
- Governance = late-stage friction
- AI definition confusion across teams
- Risk ownership unclear
- Leadership lacks a usable picture

OUR APPROACH

Make governance usable.

- Treat inventory as a living operating picture
- Flag AI early—before it becomes expensive to fix
- Tie governance to real delivery workflows
- Align risk decisions to lifecycle maturity
- Translate technical detail into executive clarity

PROOF

USCIS execution, not theory.

- | | |
|----------------|---|
| 7 | High-impact AIAs completed |
| FEWER | DHS HQ revisions than peer components |
| FOCUSED | Feedback on clarity—not substance |
| ALIGNED | Inventory aligned to OMB + DHS expectations |
| DIRECT | Support to CIO / Deputy CIO governance bodies |

WHY IT MATTERS

OMB will publish your inventory regardless.

External actors will interpret what they see.

Transparency is now a performance metric.

Governance is cheap early—expensive late.

EGBG LLC

STRATEGIC PARTNER TO USCIS

GOVERNANCE THAT ENABLES.
CONTROL THAT ENDURES.
