

Intermediate Project Engineer – Air Quality Focus

BCX is a boutique environmental consulting company which specializes in air quality, environmental compliance and carbon management services. We are in search of an experienced professional who shares our values and wants to grow with us to join our team.

Why Choose BCX – Our Core Values

- We value teamwork and helping others; working with companies to help them achieve their business goals, and working with each other to meet our personal long-term career goals
- We value integrity, honesty, respect, work quality and communication
- We value the opinions of our team, and welcome input and innovation
- We value training, feedback and mentorship

The successful candidate will be responsible for:

- Performing air emission calculations and air dispersion modelling in support of Environmental Compliance Approval (ECA) applications, Air Emission EASR registrations, and air quality impact assessments
- Participating in reviewing air quality monitoring programs and data
- Participating in carbon management support activities (e.g., preparing sustainability reports, assisting clients to prepare for GHG verification audits)
- Preparing reports for annual reporting (e.g., NPRI, ChemTRAC, GHGs)
- Performing project management tasks for various projects including, but not limited to, proposal writing, cost estimates, budget/time management, task prioritization and client communication
- Training junior or other intermediate staff on performing project tasks and regulatory requirements, as appropriate
- Working in a team environment and promoting BCX's market presence through quality work and attention to detail

The successful candidate must possess the following qualifications:

- A University Degree in Chemical/Environmental Engineering from a recognized institution
- Minimum 3-5 years of environmental consulting work experience with a focus on air quality
- A P.Eng. or Limited Engineering Practitioner (LEP) licence by PEO is an asset
- Fluent with dispersion modelling software including AERMOD View, and Microsoft Office Tools (i.e., Excel, Word, Outlook, etc.). Experience with other advanced air dispersion models is an asset
- Proven experience developing air emission inventories
- Sound knowledge of regulatory requirements and a thorough understanding of Environmental Compliance Approvals and annual reporting
- Ability to set priorities and meet deadlines in a fast-paced environment
- Strong technical writing and time management skills
- Effective internal and external communication skills
- Attention to detail and exceptional problem-solving skills
- A valid Ontario Driver's licence
