

COMPANY PROFILE

QUALITY PACKING SOLUTIONS FOR YOU

www.trivikramaflexipack.com

OUR MANUFACTURING CAPABILITIES

- **Technical Laboratory & Quality Control**

Every batch undergoes rigorous testing for COF (Coefficient of Friction), bond strength, and seal integrity. Our in-house lab ensures that your packaging performs flawlessly on high-speed FFS (Form-Fill-Seal) machines.

- **Eight Colour Printing**

Equipped with a state-of-the-art Gravo Printing line for high-definition shelf presence and precision registration

- **Solventless Lamination**

Advance bonding technology ensuring zero chemical odor, making it ideal for sensitive food and beverage products.

- **Our Team**

Our team of packaging experts has years of experience in the industry and is dedicated to providing exceptional service to our clients. We are passionate about what we do and take pride in delivering top-notch packaging solutions.

- **Custom Pouching**

Specialised line for Stand-up Zipper pouches, Penta sealed pouches, Matt Coated pouches, Center seal pouches and side seal pouches.

- **Road to Recyclability**

We use Recyclable Raw material without compromising the shelf life of a product.

ABOUT US

Our Story

Trivikrama Flexipack has been at the forefront of the packaging revolution. Based in Haldwani, Nainital. We provide High-performance multilayered films and specialised pouches that empower brands to reach their customers with freshness and integrity.

Our Services

We offer a wide range of packaging services, including custom packaging, shrink wrapping, and palletizing. We also offer specialized packaging for fragile and high-value items.

Our Mission

At Trivikrama Flexipack, we are dedicated to providing top-notch packaging services that meet the highest standards. Our mission is to deliver quality and value through our food-grade certified products.

Our Vision

To redefine packaging excellence by blending cutting-edge technology, superior craftsmanship, and sustainable practices—creating value for businesses worldwide.

WHY PARTNER WITH US?

Choosing Trivikrama Flexipack means choosing reliability. We understand that your packing is the first point of contact between your brand and your consumer. Our internal quality audits ensure that every millimeter of film meets the highest global standards for oxygen and moisture barrier properties.

OUR MACHINES

GRAVO PRINTING MACHINE

A Highly Customisable Rotogravaure Printing line with Mechanical line shaft, suitable for long job lengths for printing on Paper, BOPP, Polyester, etc.

Machine Specs:

- Web Width upto 1000mm
- Cylinder Repeat: 400–800mm
- Printing Speed: upto 150 m/min
- Material: Polyester, BOPP, Paper, Foil

GRAVO INSPECTION

Inspection machine to screen out the defects before taking material for downstream processes.

Machine Specs:

- Machine speed upto 400 m/min
- Unwind Reel Dia: 1000mm
- Rewind Reel Dia: 1000mm
- Material: Polyester, Poly, BOPP, Paper

GRAVOLAM SOLVENTLESS

Solventless Lamination Machine that create material upto 3 Layers. Also, we have installed Corona treater that is used to increase bond between the layers.

Machine Specs:

- Machine Speed: 350 m/min
- Web Width upto 1000mm
- Material: Polyester, Metalised Polyester, Poly, BOPP, BOPA Film, etc.

GRAVO SLIT

This is the High Speed slitting machine to make ready-to-dispatch reels.

Machine Specs:

- Web Width upto 1000mm
- Machine Speed: 400 m/min
- Material: Polyester, Poly, BOPP

CENTER SEAL POUCH MAKING MACHINE

Pouching machine that creates Various categories of pouches such as Side Gusset pouch, Center seal pouch, 3 side seal pouch, etc.

Machine Specs:

- Machine Speed: 150 Pouch/min
- Packing Type: Pouches
- Orientation: Vertical
- Automation Grade: Automatic

STANDY ZIPPER POUCH MAKING MACHINE

Pouching machine that creates Various categories of pouches such as Die Cutting Pouch, Standy Pouch, Double Standy Pouch, Standy pouch with zipper, Three side seal pouch, Four side seal pouch, etc.

Machine Specs:

- Machine Speed: 150 Pouch/min
- Packing Type: Pouches
- Orientation: Vertical
- Automation Grade: Automatic

INDUSTRIES WE SERVE

TEA INDUSTRY

Our high-performance flexible laminates are engineered to protect and promote Tea brands

Ultimate Barrier:

Metallic layers lock in aroma and block moisture/oxygen to keep tea "garden fresh."

Premium Finish:

High-definition printing on foil substrates ensures maximum shelf visibility and brand prestige.

Functional Design:

Optimized for stand-up stability and hermetic sealing to prevent leaks and contamination.

Durability:

Tough, puncture-resistant structures designed for the rigorous logistics of the food industry.

FROZEN FOOD INDUSTRY

Our specialized laminates are engineered to withstand the extreme demands of the cold chain for products like frozen vegetables and snacks.

Freeze-Thaw Resilience:

Formulated to remain flexible and puncture-resistant at sub-zero temperatures, preventing bag breakage.

Moisture Lock:

High-barrier film prevents freezer burn and dehydration, preserving the texture and color of green peas and corn.

Hermetic Seal Strength:

Optimized for high-integrity seals that withstand the pressure of frozen contents during transit.

Frost-Resistant Clarity:

High-definition metallic printing ensures branding remains sharp and visible even in icy retail environments.

SPICES INDUSTRY

We provide high-barrier flexible packaging tailored for ground spices like Haldi, Mirchi, and Dhaniya.

Aroma Retention:

Advanced multi-layer laminates lock in essential oils and pungent flavors.

Contamination Shield:

Near-zero moisture and oxygen transmission rates prevent clumping and spoilage.

Oil & Heat Resistance:

Specialized inner films resist staining and maintain seal integrity against spice oils.

Vibrant Branding:

High-definition printing on metallic substrates for premium shelf appeal and clear product identification.

SANITARY NAPKIN INDUSTRY

We provide premium, high-integrity packaging solutions for hygiene products like sanitary napkins, ensuring both safety and discretion.

Hygiene Barrier:

Advanced films offer a dust-proof and moisture-proof shield to maintain product sterility and softness.

Odour & Freshness Control:

Specialized barrier layers lock in freshness and prevent external contamination.

Discreet & Durable:

Engineered for high puncture resistance and soft-touch finishes, providing a premium feel and durable portability.

Re-Closable Convenience:

Compatible with high-quality zipper systems to allow for hygienic multi-pack storage and easy access.

SUGAR INDUSTRY

Our high-performance laminates for products like Fine White Refined Sugar are designed to maintain purity and flow in every environment.

Moisture Defence:

Engineered with superior water-vapor barriers to prevent clumping and hardening, ensuring a free-flowing product.

Contamination Shield:

Provides a hygienic, airtight seal that protects against pests, odors, and environmental dust.

Puncture Resistance:

Robust multi-layer construction specifically designed to handle the abrasive nature of sugar crystals during transit.

High-Gloss Branding:

Metallic substrates combined with precision printing offer a premium look that reflects product quality on the shelf.

ADHESIVE INDUSTRY

We engineer high-performance, chemical-resistant laminates for demanding products like Advanced Structural Adhesive.

Chemical Compatibility:

Specially formulated inner layers prevent delamination and withstand aggressive chemical compounds.

Zero-Permeability Barrier:

Advanced foil-based structures block air and moisture to prevent premature curing and ensure maximum shelf life.

Heavy-Duty Durability:

High-burst strength and puncture resistance designed for the rigors of industrial handling and site use.

Precision Dispensing Support:

Flexible yet stable construction optimized for clean dispensing and minimal product wastage.

CHOCOLATE INDUSTRY

We provide specialized, high-performance packaging solutions for temperature-sensitive products like Chocolate.

Aroma & Flavor Lock:

Advanced multi-layer barriers prevent flavor migration and protect the rich, complex notes of fine cocoa.

Moisture & Light Shield:

Opaque metallic structures block light and humidity to prevent fat bloom and ensure a perfect snap.

Fat-Resistant Inner Layers:

Specially treated films resist oil penetration, maintaining the structural integrity and aesthetic of the pouch.

Luxurious Brand Appeal:

High-definition printing on gold-toned metallic substrates offers a premium, gift-quality finish that stands out on the shelf.

TOFFEE INDUSTRY

We provide high-barrier flexible packaging tailored for the unique needs of sweets and toffees like Toffees.

Stick-Resistant Properties:

Formulated with specialized release layers to ensure toffees don't adhere to the packaging, regardless of humidity.

Aroma Preservation:

Multi-layer metallic laminates lock in rich buttery and caramel scents, preventing flavor loss over time.

Oxygen & Moisture Block:

High-performance barriers prevent the product from becoming soft or grainy, maintaining the perfect chewy texture.

Metallic Brilliance:

High-definition printing on gold-toned substrates creates a vibrant, eye-catching shelf presence that signals premium quality.

SAUCE INDUSTRY

We provide high-performance, leak-proof flexible packaging for liquid products like Tomato Sauce, available in both bulk pouches and single-serve sachets.

Acid & Oil Resistance:

Specially formulated inner layers withstand the high acidity of tomatoes and vinegar, ensuring the laminate doesn't degrade.

Airtight Freshness:

Multi-layer metallic barriers block oxygen and light, preventing oxidation and maintaining the sauce's vibrant color and flavor.

Leak-Proof Integrity:

Engineered with superior seal strength to prevent bursts and leaks during high-speed filling and rigorous transit.

Versatile Formats:

Optimized for both large stand-up pouches and easy-tear small sachets, offering brand consistency across all sizes.

OUR PRODUCTS

CENTER SEAL POUCH

Our Center-Seal Pouches (Pillow Packs) are the industry standard for high-volume, cost-effective packaging of staples and savory snacks.

High-Speed Versatility:

Optimized for seamless performance on Vertical Form-Fill-Seal (VFFS) machines, enabling rapid production cycles.

Economic Efficiency:

A minimalist design that provides maximum volume with minimum material usage, reducing overall packaging costs.

Robust Burst Strength:

Engineered with reinforced center and end seals to withstand the internal pressure of nitrogen flushing and heavy contents.

Total Barrier Protection:

Multi-layer metallic laminates offer a superior shield against light and moisture, keeping contents crisp and fresh for longer.

SIDE SEAL POUCH

Our Three-Side Seal Pouches offer a sleek, secure, and cost-effective solution for high-precision dosing and sample-sized products.

Hermetic Seal Integrity:

Engineered with consistent side-seal strength to provide a total barrier against moisture, oxygen, and external contaminants.

Optimized for Dosing:

The flat, uniform profile is perfect for powders, granules, and small medical devices, ensuring easy and complete product evacuation.

High-Speed Processing:

Designed for maximum efficiency on automated vertical and horizontal filling lines, reducing production lead times.

Compact & Portable:

A space-saving format that fits easily into secondary cartons or travel kits, maintaining professional brand presence in a compact size.

STANDUP WITH ZIPPER POUCH

Our Stand-Up Zipper Pouches (SUP) are the gold standard for consumer convenience and retail visibility across the FMCG sector.

Re-Closable Convenience:

Integrated high-quality zippers allow for multiple uses while maintaining product freshness and preventing spills.

Maximum Shelf Impact:

The bottom-gusset design allows the pouch to stand independently, providing a large billboard area for vibrant, eye-catching branding.

Custom Barrier Protection:

Tailored multi-layer laminates protect against moisture, oxygen, and UV light, making them ideal for snacks, dry fruits, and pet food.

Sustainable Efficiency:

Uses significantly less plastic than rigid containers, reducing transportation costs and carbon footprint without compromising on durability.

PENTA-SEAL POUCH

Our Penta-Seal (Flat sides) Pouches represent the pinnacle of shelf presence and functional design for the high-end beverage and food sector.

Penta-Seal Architecture:

The four-corner seal design provides a robust, brick-like structure, offering four flat panels for 360-degree branding.

Ultimate Aroma Vault:

Engineered with high-barrier metalized layers to lock in delicate aromas and prevent the ingress of oxygen and moisture.

Space-Efficient Design:

Combines the best features of a side-gusseted bag, allowing for more product volume in less shelf space.

Structural Integrity:

The reinforced seal profile ensures the pouch maintains its crisp, premium shape throughout the supply chain and consumer use.

ROLL FORM

We offer high-performance, custom-printed 2 Layer & 3 Layer designed for high-speed Form-Fill-Seal (FFS) lines, tailored for brands looking for a professional, minimalist edge.

Custom Brand Integration:

Precision printing of corporate identities on silver metalized substrates, perfect for industrial components or private label branding.

High-Speed Efficiency:

Optimized for seamless performance on automated packaging machinery, reducing downtime and waste.

Superior Protection:

Multi-layer construction provides an exceptional barrier against light, moisture, and oxygen to extend product shelf life.

Cost-Effective Scalability:

Roll-form supply offers a lean, efficient packaging solution for high-volume production across various sectors, from electronics to dry staples.
