About Us

Established in 2000 by Mick Clark in a prime location near Gatwick Airport. We focus on offering a personalised approach to plant hire in construction by tailoring our approach to individual client needs. Our experience ensures that all lifts are completed both efficiently and to the highest safety, all while at a competitive price.

Clark Lifting specialises in Roto Telehandlers, Mini Cranes, telehandlers and Glass Vacuum Units as well as general access equipment like scissor lifts and cherry pickers nationwide. We routinely repair and maintain equipment for clients as well as supply on site engineering support, personnel, and all lift plan requirements.

Having worked with a variety of contractors on projects including No. 1 Hyde Park, The Shard, The Cheese Grater, and Eros in London, as well as schools, recycling plants and large housing developments throughout the UK. Our projects have either been carried out under CPA Terms and Conditions or as a Contract Lifts, dependent on the needs of our clients.

Whatever your requirements, Clark Lifting is big enough to cope, small enough to care.

Contact us now and see how we can help you

Roto Telehandlers

With a 360° slew, able to lift to heights of 30m and lift 6 tonne subject to model specification, as well as offering pick and carry duties. With the various attachments available including winch, height reduced booms, man cages etc.

Telehandlers

We supply both a self-drive and an operated basis machines. With lifting heights from 4m – 20m and up to 12 tonne lifting capacity, as well as performance enhancing attachments, telehandlers are perfect for a busy site.

Spider Cranes / Mini Cranes

These incredible machines are capable of lifting up to 6000kg with boom lengths up to 36m. A light weight, compact and highly-effective solution for a wide range of applications, particularly in confined areas. With superb build quality and easy to use, allowing access where space is limited. Choices of diesel, gas or electric power available.

Glass Vacuum Units and Glazing Robots

Specializing in high quality 'under the hook' glass handling capabilities and utilizing the latest technology. Able to lift weights up to 1200kg. Simple and easy to use, allowing glass to be spun, angled, and laid down with ease. We can also design and manufacture custom lifters to support your needs.

Cherry Pickers and Tracked Access Machines

Ranging from 6m – 22m, with selected machines having the anti-crush fitted as standard. Straight and articulated booms can be supplied. Our tracked access machines, with low ground pressure, excellent all-terrain performance, compact dimensions and working heights up to 26m, are designed to be used anywhere, both indoors and out.

Scissor Lifts

Ranging in height from 3m – 18m, we stock small push-along, indoor and outdoor lifters. Available in electric and diesel types, they can come from small and compact, perfect for indoor, to the larger double deck machines built for rough terrain.
