

REGIONAL WIRELESS COOPERATIVE POLICIES AND PROCEDURES	 Regional Wireless Cooperative
	No. O-01.11
Subject: Configuration Management of Radio Programming Files Procedure	Effective Date 12/14/11 Rev: 11/12/14

1.0 Purpose

- 1.1. The purpose of this procedure is to ensure the proper configuration management processes and procedures are in effect to document changes to subscriber programming file.

2.0 Owner

- 2.1. Regional Wireless Cooperative (RWC) Operations Working Group (OWG).

3.0 Applies to

- 3.1. All members, interoperability participants and entities otherwise having subscribers using the operational capabilities of the Regional Wireless Cooperative (RWC).

4.0 Background

- 4.1. Each subscriber that operates on the RWC network is loaded with a programming file that controls the operational capabilities. Changes to programming files will be required, from time to time, to support the changing operational needs of the agencies, changes to the RWC infrastructure, and vendor driven changes. Because changes to programming files have direct and immediate impact on the operational capabilities of the agencies, it is imperative that a procedure exists to address how programming file changes are requested, tested, approved and implemented.

5.0 Procedure Statement

- 5.1. Administrative control processes will be in effect at all times to ensure that all changes to RWC subscriber programming files are properly requested, analyzed, tested, approved, documented and implemented.

6.0 Supporting Rules

- 6.1. Programming file changes will only be made by member agencies, interoperability partners or their approved contractors.
- 6.2. Each change to a programming file will be thoroughly tested by member agencies and interoperability partners. Where appropriate the RWC Administrative Managing Member may participate in development and testing activities.
 - 6.2.1. RWC Administrative Managing Member must have current copies of the programming files and subscriber layout document.

7.0 Responsibilities

- 7.1. Member agencies and interoperability partners are responsible for creating their own internal processes for collecting, evaluating, and documenting changes to the subscriber programming files.
 - 7.1.1. Related documentation will be sent to the RWC Administrative Managing Member along with the programming files.
- 7.2. The RWC Administrative Managing Member can provide a baseline programming file to member agencies and interoperability partners with approved talk group plans.
 - 7.2.1. The requesting agency is required to test and validate prior to the production release (final version) of the programming file.
- 7.3. Owners of subscribers using the RWC network will be responsible for collecting and retaining all documentation relative to programming file change requests.
- 7.4. The RWC Administrative Managing Member will assign a name to the programming file and provide it back to the agency.

Formatted: Indent: Left: 0.5", Hanging: 0.5"

8.0 Conditions for Exemption or Waiver

~~8.1.~~ As provided in the Waiver or Exception Policy.

~~8.2.8.1.~~

9.0 Applicable Policies and/or Procedures

- 9.1. As listed at www.rwc.org.
