

PRACTICE

PROCESS

BY: STACI-ANNE NOGAMI

1. LEARN

Learn as much as you can about how your topic, take the time to absorb the information.

2. BRAINSTORM

Using the mind map, generate as many ideas about your topic as you can. Try to think about related topics that interest you to get more range.

3. PRACTICE

read out loud your presentation 3 times. What is different about the 1st and 3rd time? Why is it different?

4. PREPARE

Make changes to your presentation as needed. Make sure to re-read your work.

5. RESEARCH

You may want to do some research at this point, and add some interesting facts and dates. It must fit nicely with your topic.

6. REVISION

Review your information, make sure you are using up to date information.

7. PRACTICE

Sing your favorite song before you present. Then practice by yourself, then with a friend.

8. DELIVER

Presentation day! If you're nervous, follow the Good Well Being Tips, then present. Good Luck!
