NEURODIVERSITY

To ensure your session goes as well as possible, we have made a list of important things to consider.

- Can your computer support the software you would like to use?

- If you would like to use Dragon and Text Help (Read&Write)in a web browser, have the web extensions been added for them?
  (for example the extensions work on Google Chrome or Microsoft Edge)

- Have the permissions for write and modify for Dragon been changed?

- Have you launched your software?

- Has your software been installed correctly?

- Has the software been activated?

- Are you signed in correctly?

- Do you need a headset? Does it work?

- Have you charged your equipment?

- Do you have access to Microsoft Teams and have you tested it?

If you have answered NO to any of the above questions, please get in touch via info@n-attc.co.uk to speak with our team.
